

## **BABY MAFIA 1011**

### **Chapter 1011: "Trying The New Ability"**

Some inactive hunters, who usually focused on infiltrating various forces to give connection and access to the active hunters, couldn't help but notice the abnormality.

Especially those who joined the annual beast and monster tide.

These inactive hunters somehow knew that Niel got a task to steal a transmigrator's unique ability through someone else.

Niel should have transferred the ability to one of the two young geniuses because the owner of this ability was also a kid.

Then, something unexpected happened.

Niel and the kids disappeared. They didn't come back even after a few days.

Even the ability thief was gone, and her people were also anxious about their boss.

Just what's going on?

Everyone didn't know what happened until Ainsley returned to the battlefield after her two-day break.

They saw her using Yoona's ability.

In today's battle, the monsters and beasts Ainsley faced actually weren't as strong as the butterfly and the mammoth.

For the past two days, the two big bosses had worked hard together with other elite monsters and beasts that Ainsley captured to fight the beast and monster tide.

After all, beasts and monsters with high intelligence also used the shift method to keep attacking the humans 24 hours a day.

The other batches, besides the butterfly and the mammoth, might not necessarily know that the two of them had been caught by humans.

Thus, when different batches arrived to attack the main city gate and hopefully infiltrate the city, they were shocked to see their comrades actually attacking them for the humans!

These mini-bosses weren't all as strong as the butterfly and the mammoth, who were sent to kill many human elites rather than just infiltrating the city.

Facing the butterfly and the mammoth, they all wanted to flee in shame.

[Lady butterfly! Giant mammoth! What are you doing?! Why are you attacking us? Did you betray us for the humans?!]

These bosses were especially mad at the mammoth because beasts often colluded with humans to boost their strength without having to work hard.

Being cared for by humans was actually advantageous for beasts, especially high-level beasts who aimed to be a sacred beast and compete with other candidates.

This giant mammoth also had the blood of an ancient mammoth and was one of the sacred beast candidates in this bloodline type.

The others thought that the mammoth betrayed them for benefit. But why would lady butterfly do the same thing?

Everyone didn't know what happened until a monster cautiously expressed her idea.

[It seems that... humans already tame the two seniors? I-I can see a trace of a contract bond between the two of them and a human baby...]

Ainsley didn't assign the butterfly and the mammoth to someone else because she thought of creating a force for Ava, Zilla, and the three sacred beasts.

The mammoth was also worth cultivating if he could be the Sloan Family's fourth sacred beast.

Because of this, Ainsley kept the contract and didn't give them away to others.

The monster could see the contract bond between the two bosses and Ainsley!

Other beasts and monsters couldn't help but check whether this was true or not, and when they found the truth...they felt like fainting.

The worst outcome for warriors like them who were chosen to fight humans was to be tamed by humans and end up working for them.

Death was better than being tamed!

But the two seniors were tamed just like that...

This is an insult to their race!

But none of them was strong enough to fight the two seniors, resulting in a lot of mini-bosses choosing to run away instead.

Even the final boss designed to appear at the end of the 7-day deadline fell into deep contemplation, afraid that the human cub would tame them too.

Because the monsters and the beasts were subconsciously afraid of the human cub who could tame the two seniors, the battle on the fourth day was extremely smooth.

This is precisely why Ainsley took the chance to try her new realism art ability.

The baby stood at the top of the city wall with her usual pink uniform.

Her hair was tied into a cute ponytail, and she didn't bring anything else with her.

Ainsley slowly closed her eyes and concentrated on the fifth color mixed with other colors in her energy core.

She had purple for her shaman ability, pink for her charm ability, gray for her 3D mapping ability and gold for her luck manipulation ability.

Sometimes when she was in a shaman mode and used the blood manipulation ability under the Godfather's control, the purple in her energy core turned red.

Then...what was the color of this new ability? The realism art's aura color was actually orange.

Ainsley could see a speck of orange on her round energy core.

Because she hadn't used it at all and she gained it from someone else, it was extremely unstable.

Ignoring the unstable ability, Ainsley slowly channeled her orange energy to her right hand first to summon the drawing tools.

The drawing tools that she could summon were actually different from the ones Yoona had because it all depended on the user's imagination.

In just a few seconds, various pencils, pens, crayons, oil and water paints, various sizes of brushes, canvas, paper, and even a tab with its pen tab appeared in the air.

Ainsley never knew the effect of different drawing styles but she's about to experiment with them all.

First of all, she chose the regular pencil and a piece of paper.

She wasn't good enough to directly paint or draw in the air, so Ainsley needed the paper as her medium.

For starters, Ainsley drew a simple picture of her cute uniform that she usually wore.

### **Chapter 1012: "Energy Sucker"**

Ainsley drew anything before, but it didn't hinder her from drawing a perfect doodle when using this ability.

It turned out that precise imagination was more important than a person's drawing ability because this ability was really unusual and unique.

After drawing her pink uniform in black and white, the drawing on the paper suddenly flashed with orange light.

Then, clothing the size of Ainsley's palm fell midair before landing on Ainsley's tiny palm.

The clothing was black and white, but the material was the same as the clothes Ainsley was currently using.

The details were also the same. Just the size was different.

Maybe the size became like that because Ainsley drew on paper, and her imagination subconsciously made her think of tiny clothes instead of big one.

Ainsley stopped using the ability and just looked at the tiny clothing on her palm closely.

It was really magical that something just came out of thin air!

Well, the drawing on the paper disappeared, leaving a pure white paper.

It means the thing came out of a drawing...the drawing became reality.

No wonder the ability was called a realism art. Not because the type of the art was a realism style but because the art could become a reality.

Then, Ainsley started to experiment on the paper using the pencil a few more times to see the energy expenditure she needed to use this ability.

It turned out that the more complicated and detailed the drawing, the larger the energy expenditure.

Living beings always cost more energy than non-living beings.

But the more detailed the drawing, the better the effect would be.

Also, the speed of drawing something didn't rely on Ainsley's speed of drawing but actually relied on the speed of her imagination constructing the picture.

So, if Ainsley could imagine something fast enough while moving her hands to draw, she could fight a battle by using this ability.

She didn't have to prepare drawings beforehand to fight someone.

This needed a lot of training, though, especially imagination and focus training.

After all, it was easy to be distracted when someone was fighting.

After trying the pencil, Ainsley started to use the coloring pencils, the crayons, and other drawing media.

In the end, she even used the tab and the pen tab to draw digital art.

After trying all the styles, Ainsley realized that each medium could better draw a specific type of drawing.

For drawing landscapes, it was better to use oil or water paints instead of other tools.

To draw something childish and rough, crayons would do.

To draw small details and delicate things, coloring pencils and pencils or pens was good.

But drawing living beings had better effects on a tab, using digital art. Maybe because Ainsley's imagination tended to be a digital art instead of a realistic art.

But the final result would still be something realistic and not just a 2D image fluttering in the air or something.

And the digital art gave Ainsley a lot of access and tricks to try a lot of drawings, especially when drawing using a tab could offer a lot of options.

Ainsley especially liked using the tab because not only it wouldn't arouse the enemy with her unique ability, but it could also create better results.

After trying all the styles, Ainsley directly chose to practice using the tab and the pen tab she had summoned.

Normal tabs and pen tabs couldn't work because they didn't come from her ability.

That day, Ainsley drew all sorts of monsters and beasts to practice her skill and even somehow made a detailed encyclopedia as a reference for when she wanted to draw them.

With this, it would be easier to create beasts and monsters without weakening the final result.

Of course, it was harder to create beasts and monsters who had high intelligence, especially if she only imitated them in a drawing.

Just like what Code-L said, a fake would always be a fake.

Because of this, Ainsley focused more on designing her own monsters and beasts or tools that she could use in emergencies!

As for drawing humans...that was too high-level, and even Yoona hadn't been able to do that.

Even if they could draw humans and other living beings aside from beasts and monsters, the final result would be more like a living puppet than a real human being.

Because of this, Ainsley preferred drawing beasts, monsters, and tools instead of other living beings.

Oh. She also couldn't draw special abilities because they were all abstracts, and even if she could imagine it, somehow, it wouldn't work.

Thus, this ability really had some limitations but also some features that Ainsley hadn't explored yet.

Not to mention that the energy expenditure of this ability was way larger than any other abilities, including the luck manipulation ability.

Ainsley had to grow her orange part on the energy core as fast as she could or just separate it to make a whole new core.

Otherwise, she could only draw once or twice and then she would be out of energy to even use other abilities!

Usually, certain energy inside the energy core would only work for that specific energy.

When someone used the energy crystal to recharge, they could choose which ability's energy they wanted to recharge.

The larger the color area, the more energy it could contain.

This was also why in later stages, there was a need to split the energy core into several connected cores, especially when the ability user had more than one ability.

But the realism art ability was really a thief.

Even if its own energy tank was small, it could suck other abilities' energy and convert them to be its own energy!

## Chapter 1013: "Uncle & Auntie Transmigrators"

Such a thief...maybe because the ability itself was acquired by stealing other people's energy or whatsoever so it had this weird characteristic.

Anyway, Ainsley was afraid that if she weren't careful, the ability would suck her energy core dry, and then she would die in an instant!

But Ainsley soon found some tricks to save up more energy when drawing, and that was to avoid mistakes so that she didn't have to redo the drawing.

Even if the outcome weren't as perfect as when she redo the drawing, it would save up more energy and wouldn't waste energy.

Drawing directly in the air also saved up a lot of energies used to create the drawing tools!

Even more awesome was the fact that Ainsley could change the surrounding air to have her tab's feature.

She just had to imagine it because everything and anything could be a medium to draw.

After playing with her new ability for a whole six hours, Ainsley returned to Jake's mansion with her energy core close to drying up.

If not for Zev's timely reminder, Ainsley might have died because of her dry energy core!

[You...really. This ability is awesome, but if you don't control the energy expenditure, you will die without knowing!]

Zev couldn't help but reprimand Ainsley on the way back.

After all, he wasn't sure if he could remind Ainsley all the time. Who knows if next time the baby isn't so lucky to have someone to remind her?

And Zev had this natural sensitivity toward Ainsley's state all because he was her system.

If it were anyone else, they wouldn't know that Ainsley's energy core was close to drying up for real.

[Heheheh...okay, okay, I'll pay more attention next time...or maybe you have an item in the system's inventory to measure my total energy?]

Ainsley couldn't help but ask Zev because she hadn't had any sudden mission even when she faced a lot of danger.

Zev used to give her a lot of missions with benefits, but not anymore!

Zev only snorted at Ainsley's words and harrumphed.

[Don't rely too much on the system. If one day the system doesn't work or something, you will be done for!]

Actually, Zev hadn't issued any new mission despite Ainsley's various problems because he knew Ainsley didn't need anything urgently right now.

All the things she needed, she could get it with hard work and effort.

All the benefits the system gave her in the past were just a newbie package to ensure smooth growth in the beginning.

But after that, Ainsley had to work hard and not rely on the system!

Ainsley could only pout at Zev's words and gave up on trying to use shortcuts.

[Okay, okay, I'll just train my energy sensitivity so that I can know when my special energy is alarmingly low...]

Another day to train...it was really hard to be a mafia boss!

When Ainsley returned to Jake's mansion, she thought she could rest well.

However, she forgot that the Billios Family's higher-ups had just been notified about her true identity as a transmigrator.

How could they not visit the baby once more to express their concern?!

Ainsley had just stepped into the living room when a bunch of adults suddenly pounced on her and started chattering in high-pitch voices.

"Little Ain! I heard that you're a transmigrator? Oh my! That stinky brat Jake finally did one thing right!"

"Hush, hush, this is a secret. Don't shout too loud! Little Ain, even if you're a transmigrator, our Billios Family still welcomes you."

"Actually— you will be put on our protection list because of your identity. Right, we also bring several transmigrators here. You can talk to them."

The person who said the last sentence immediately pushed two adults, one man and one woman in front of Ainsley.

The ambush caught Ainsley off guard, but she quickly understood what was going on.

When she saw the two people in front of her, her eyes became a little more eager than usual.

"Hello, uncle, auntie..." Ainsley obediently called out to the two people, instantly melting their hearts.

"I heard that you were a twenty-year-old college student, but you played a toddler pretty well. Very cute."

The uncle couldn't help but comment.

His words sound mean and full of sarcasm, but it was really what he thought. He never looked down on Ainsley or anything.

Ainsley could also sense the young man's intention and knew he had no malice towards her.

The baby couldn't help but blush and twist her fingers shyly.

"Hahaha, thank you for the praise, uncle. This body influences me one way or another. Sometimes I really felt like my actual age is only four..."

The uncle and the auntie obviously had the same experiment with Ainsley, and both of them couldn't help but chat more while bringing Ainsley to the couch.

"Really? So it's not just me. I'm actually already thirty years old, but then I entered the body of a twenty-five-year-old girl."

The auntie had a somewhat wise and mature vibe but coupled with her tomboy, youthful look...it gave people a weird atmosphere.

"This body is a very tomboy girl. After I entered her body, I also started to change bit by bit and become more similar to this body."

The auntie, who became five years younger, couldn't help but sigh.

She was glad that she didn't become older after the transmigration, but the original soul's different personality stumped her.

"Before the Billios Family takes me in, I have to act like the original body to avoid suspicion."

"But those hunters still found me, and the Billios Family saved me."

The auntie still had trauma related to those hunters.

They were so scary!

#### **Chapter 1014: "Uncle Elu & Monica's Original Worlds"**

The auntie didn't act like the original body to fool the hunters. She just wanted to fool the people who knew the original body.

However, who would have known that there would be a hunter here?

She thought that she only had to avoid suspicions of people who knew the original body.

But the dangerous ones weren't these people...

It was the hunters!

When she was chased by these people, she thought she would die.

Fortunately, the Billios Family found her by chance and took her in.

The uncle also had a similar experience. But his real age was way older than the auntie.

He was about to turn fifty, but he got into the body of a thirty-old middle-aged man.

For a while, he couldn't adapt. Not to mention that the original body also had a very different personality from him.

Ainsley listened to the two people's stories and couldn't help but ask some questions.

"Can you tell me about your previous worlds? How did you come here?"

"Do you guys also have a unique ability that the original body doesn't have?"

Facing Ainsley's various questions, the uncle and the auntie were calm and slowly explained a lot of things to this young girl in the body of a toddler.

It was the uncle who first answered Ainsley's question.

This uncle...his current name is Elu.

Uncle Elu was someone who lived in a fantasy world similar to this world.

But in his world, there was no special ability because people's magic was actually a beast tamer.

All the people in his world would awaken as a beast tamer when they were thirteen years old.

His world was a world dominated by beasts and humans.

There were also alien beasts that threatened both beasts and humans, so the humans evolved to be beast tamers.

Humans who become beast tamers could be separated into different ranks, from the lowest F-rank to the highest triple S rank.

The beast they could tame as their fighting power depended on their rank when they awakened their strength.

This power couldn't change from a lower rank to a higher rank but within rank, there were still levels.

Which means one could still improve their levels despite gaining a low rank and could only become a low-rank beast tamer.

Uncle Elu was once a B-rank beast tamer, quite popular and strong in his world.

Then, he was gravely injured in a battle, but when he woke up, he came to another world and became this thirty-year-old beast tamer.

Uncle Elu did bring a unique ability bound to his soul, which was the ability to improve his contracted beasts' abilities.

It was an all-around buff, and it was all because, in his previous world, the beastmasters also had to learn buff spells to help their beasts.

Unlike in this world where beasts fought without the humans helping them with buffs and such.

Because of Uncle Elu's unique ability, the Billios Family noticed him when he was in danger and saved him in time.

Ainsley had read a lot of novels with a similar theme to Uncle Elu's previous world, so when she heard Uncle Elu's words, she was dumbfounded for a while.

It turned out there were really worlds like that out there?

Well, if this world with unique ability users could exist, such a world like the one Uncle Elu described could exist as well!

"I see...so Uncle Elu is a pro beast tamer, right?" Ainsley couldn't hide her admiration at all.

Her eyes were twinkling as she looked at the ordinary-looking uncle Elu in front of her.

If Uncle Elu didn't tell her about this, she wouldn't have known that Uncle Elu was actually a pro beast tamer in his original world.

And that also gave him a unique ability bound to his soul when he arrived in this world.

Speaking of unique ability...it seemed that the ability was related to each person's speciality?

But Ainsley didn't think that her speciality had something to do with luck...

Or maybe because she always had bad luck in the past, and then she was lucky enough to be transmigrated...

That's why her ability was luck manipulation ability? It could be.

Ainsley cast aside her thoughts for a while and continued to ask Uncle Elu a few more questions before she shifted her attention to the mysterious auntie.

The auntie also noticed Ainsley's gaze on her and immediately spoke,

"Hello, hello, my name is Monica. You can call me Moni."

The auntie had this calm and wise vibe but coupled with her youthful look, it gave such a strange yet beautiful impact.

Obviously, Ainsley couldn't call Monica as auntie Monica with such a young-looking face.

Thus, she immediately called out sweetly.

"Sister Moni. Nice to meet you."

Which women didn't like being called sisters when they were already quite old?

Auntie Monica obviously liked being called sister by such a cute kid.

Her smile became even more sincere as she started to narrate her own story.

"So...unlike Elu, I came from a much more advanced world. You can say it's an interstellar era where humans live with so many weird species."

Interstellar era!

Ainsley's ears instantly perked up as she looked at Monica with eager eyes.

Quick, tell her more about the interstellar world!

Sensing Ainsley's eagerness, Monica laughed softly and started to tell a lot of things about her world.

"I was a researcher in my previous world. I researched a lot of medicine and things related to medicinal knowledge."

She had to say that the healing pod Thomas created with his technology-related ability came from her and the Billios Family.

Thomas didn't have such a high imagination to create a detailed healing pod, but Monica has!

### **Chapter 1015: "A Hidden Circle"**

Monica had a high imagination and knowledge to design the healing pod.

It's just that she couldn't create the healing pod, so she needed Thomas, who could make technologies out of thin air, just like Ainsley's realism art.

But this one was only for technology-related items, and he also needed related materials to be able to create the desired technology according to the blueprint.

"As for how I came to this world...I died because of exhaustion and suddenly woke up in this body. Just like Elu, I also tried to blend with the new environment."

Monica let out a wry smile as she recalled her hardship when she had to adjust her personality and attitude in front of others who knew the original body.

The original body was a grumpy and bad-tempered woman, completely opposite of the calm and wise Monica.

Because of this, Monica had a hard time mimicking the original body's behavior so that she could avoid suspicion.

A pity, in the end, she was still detected by the hunters and had to run away to save her life.

The Billios Family saved her and provided her with a lot of things so that she could continue to be a researcher, just like in her original world.

Without the Billios Family, she couldn't continue to be a researcher, especially when this body didn't have anything to do with medical research whatsoever.

Not to mention that the original body's family was not powerful or anything. It was really hard to be a researcher without a backer.

Now that the Billios Family supported her, she could continue to create new breakthroughs after breakthroughs, and as a thank you gift, she contributed to the Billios Family.

It's just that her medicinal knowledge and products were highly restricted to those outside of the Billios Family's circle.

The Billios Family was afraid of the hunters aiming for Monica's knowledge and targeting her again.

Thus, so far, no one knew about Monica even when she could literally change this world's medical field.

The Meidian Family would be left far behind if Monica announced herself and her products that she created.

After listening to Monica's words, Ainsley suddenly felt that the hunters were probably quite dumb.

There was a chance that they could improve their original world, but they ignored it for no reason.

Instead of making use of the transmigrators' knowledge just like in the past, they hunted down these people instead.

Because of this, this world's development has stalled. Whether in terms of knowledge, technology, or even the fantasy element.

After all, there were also transmigrators from a magic world and a cultivation world.

They could actually help the ability users to be stronger as a whole.

A pity.

The world elites hunted down the transmigrators, making these people hide from the public's eye and choosing to serve individual organizations or forces.

Maybe Ainsley was one of the rare transmigrators that stood out and became well-known despite not contributing anything to this world using her previous world's knowledge.

"Those hunters and world elites are really stupid. If they are a bit nicer to the transmigrators, they would have been able to improve this world as a whole..."

Ainsley murmured as she cursed the hunters once more. She couldn't understand the reason behind their frantic hunting.

Is it because they're afraid that the transmigrators will bring chaos to this world or something?

But since they discovered that there are a lot of worlds outside this one, shouldn't they be prepared for inter-dimensional war or something?

They can use these transmigrators to improve so when the worst case arrives, they can resist.

Blame Ainsley and her wild imagination.

The people in this world had absolutely no thoughts about other world civilizations coming to attack them.

After all, so far, the dimensional holes and the transmigrators were just some rare cases when the space was unstable.

It was actually impossible for a bunch of otherworldly people to come to this world to invade them.

Both Elu and Monica heard Ainsley's murmurs and couldn't help but laugh at her childish words.

"It's okay. The hunters aren't that dumb. At first, I also thought that they were unreasonable. But after knowing their reason for doing this—"

Uncle Elu was about to continue his words when both Jake and Monica suddenly looked at him with stern eyes.

Their eyes were speaking to Elu, warning him not to say anything further in front of Ainsley.

Uncle Elu finally realized that he probably almost said something he shouldn't say at all.

The uncle immediately smiled stiffly at Ainsley and waved his hands to distract Ainsley.

"Oh, anyway, since the Billios Family already knows about your situation, you will be safe."

Uncle Elu clumsily shifted the conversation, and Ainsley could detect something strange in his words.

But even if Ainsley knew that Uncle Elu was acting strange, she didn't pursue the previous conversation anymore and obediently followed Uncle Elu's next conversation.

"I don't know that the Billios Family is so powerful until they can protect the transmigrators from the world elites."

Ainsley smiled sweetly while saying this and didn't forget to look at Jake, who was still sitting next to her.

Hey. Who would have thought that the Billios Family was stronger than it looked like on the surface?

Jake could see Ainsley's admiration when looking at him, and in that instant, he suddenly felt like a proud dad.

Jake cleared his throat while lifting his chin high, unknowingly resembling a peacock with its feathers spread open like a fan.

"The Billios Family isn't that big to oppose the world elites alone, but we have connections with other huge forces, " Jake paused before continuing.

"In short, there's a hidden circle."

A hidden circle!

Ainsley was shocked.

### **Chapter 1016: "Blair Is The Other Transmigrator"**

Ainsley didn't expect there would be a hidden circle to protect the transmigrators.

And Jake was included in this global circle.

Seeing Ainsley's reaction,

Jake smiled with a hint of pride in his eyes as he ruffled Ainsley's hair.

He didn't forget to continue his explanation.

"These forces in the circle are also secretly sheltering the transmigrators in exchange for the transmigrators' knowledge or innate ability."

These forces were all as well-known as the Billios Family and weren't limited to the human race alone. There were many forces like this in other races too.

The Billios Family took the initiative to create a secret circle for these forces to join hands to protect the transmigrators under their wings.

Because of this, even the world elites didn't dare to touch the transmigrators registered under these forces.

They could only hunt down other loose transmigrators before these forces picked them up.

No wonder they repeatedly aimed at Ainsley.

After all, Blair was already safe when she became the Aretha Family's adopted daughter.

It was only Ainsley, who had no one to rely on, that became the hunters' target.

Maybe in their eyes, Ainsley was a big fat sheep ready to be slaughtered.

But Ainsley didn't have to worry anymore. Jake would soon announce Ainsley's status as the Billios Family's adopted daughter.

It means the hunters didn't have any reason to hunt Ainsley when Ainsley was already someone under the Billios Family's wings.

Once again, this information refreshed Ainsley's knowledge of the Billios Family.

The Billios Family turned out to be stronger than she thought!

The current Sloan Family still had a long way to go if they wanted to catch up with the Billios Family.

Of course, Ainsley didn't really care about this when she was only here in this world for about a year.

There was still a long way to go!

After talking to the two transmigrators that Ainsley ever seen in this world, the baby become less nervous with her identity as a transmigrator.

It turned out, from year to year, there were many transmigrators.

Maybe if they looked at the hunters' database, they could see how many transmigrators come to this world each year.

Last year alone, there were around 100 transmigrators all around the world.

This year, the number increased, but most of them were not in the human continent.

When Ainsley got this secret news from Code-L, who extorted a certain someone, the baby's eyes widened.

"So...I might meet more transmigrators if I go abroad and visit other continents?"

Ainsley was really eager to see more transmigrators because most of them were kind and also cared about their fellow transmigrators.

Only one or two extreme people liked to create chaos and harmed the people in this world.

Jake, who delivered the news from Code-L, couldn't help but pat Ainsley's head with a doting face as he answered.

"Yes. You can meet more transmigrators...oh, and there's actually one transmigrator near us. I just got the news from some people."

Jake had connections with other shelter forces, and of course, he also had a way to see which transmigrators they had found.

The forces mainly got this data by stalking the hunters and monitoring which people they attacked.

In other words, Jake actually had long suspected Ainsley to be a transmigrator.

But in the face of Ainsley's cute appearance...Jake often forgot this idea.

Only now did he confirm his suspicion.

Ainsley heard that there was one more transmigrator around her, and the baby couldn't help but look at Jake with bright eyes.

"Really?? There are more transmigrators here? Do I know them? Can I meet them?"

It's just that...in front of Ainsley's enthusiasm, the three adults slowly looked away from the baby's face.

How could they tell Ainsley that the fellow transmigrator she wanted to see was actually someone who once harmed the Sloan Family?

After all, not all transmigrators were kind, and many even looked down on the local people of this world.

They also didn't know that there might be other transmigrators in this world, so they didn't care which person they offended.

As long as they could afford to offend the person, they would do it anyway.

Blair was included in this category.

She didn't know that there were other transmigrators in this world, and she did look down on other locals except for her own Aretha Family.

If not for this, how could she be so unreasonable to ask her family to attack the Sloan Family?

Jake, Elu and Monica sighed at the same time as they recalled the information they got.

They only recently knew that Blair was also a transmigrator. With this, there were already two people who transmigrated into the body of a toddler.

It's just that...compared to Ainsley, who kept making achievements, Blair became more low-key, as if she never existed in the first place.

Either because the Aretha Family knew that Blair was a transmigrator and wanted to hide her from the hunters, or other reasons.

The three adults knew there was a holiday between Ainsley and Blair. Thus, they were afraid that Ainsley wouldn't like what they wanted to say next.

Jake shook his head as he cursed Blair in his mind before he looked at Ainsley with the same loving eyes.

It's just that...this time, he was also a bit nervous, and he didn't dare to look straight at Ainsley's gaze.

"Hum...the other transmigrator...you have seen them."

Jake tried to stall the conversation, wishing that someone out there could barge into the living room and stop this discussion.

A pity. No one came to stop him even after he stalled for a few minutes.

In the end, he had to tell Ainsley the truth.

"The other transmigrator...it is Blair."

### **Chapter 1017: "Too Insignificant"**

At first, Ainsley was eager to know the truth, and she even pestered Jake a bit.

She hugged the man's arm and acted like a spoiled baby, but when Jake dropped the bomb...

The baby almost flung Jake's arm away out of fright.

The other transmigrator near her turned out to be Blair?! Blair Aretha? That bastard who attacked her family for no reason?

Ainsley instantly lost all her excitement when she heard she could know a fellow transmigrator.

Even if Blair was also a fellow transmigrator, Ainsley didn't care.

For such a girl...it was better for her to stay at home and stop making trouble for everyone!

Ainsley's face changed so fast that the three adults could only put on a wry smile in front of the baby.

It was clear that Ainsley's previously eager eyes turned dull, and she even showed a hint of disdain when Jake mentioned Blair.

So what if Blair was a transmigrator? She was the culprit behind the Aretha family's invasion of the Sloan Family.

It was near impossible for Ain to forgive this girl.

But regarding Blair's identity...Ainsley was still a bit curious.

"Does the Aretha Family know that Blair is a transmigrator? Or maybe they don't even know transmigrators exist?"

After all, although the Billios Family knew about this secret, the other 7 great and 7 sacred families didn't necessarily know about the transmigrators' existence.

Sadly, the Aretha Family and the Walter Family both knew this secret.

"The Aretha Family already knew a transmigrator existed, but they don't know Blair is a transmigrator."

Jake answered Ainsley's question while arranging some biscuits and snacks for the baby.

"Knowing the secret doesn't mean being involved in the secret."

"So far, the Aretha Family hasn't been in touch with transmigrators and isn't included in the shelter forces," Jake added.

It means that the Aretha Family was actually not strong enough to be considered a 'shelter' by the world elites.

Some transmigrators in the past also went to the Aretha Family for protection, but when they knew that the Aretha Family wasn't that reliable, they immediately escaped.

After all, if the Billios Family was a first-class force, the Aretha Family was only a second-class or maybe, only a third-class force.

This means the Sloan Family, who was already developing so fast, wasn't even included in the third-class force.

But they were seen as one of the top 1% forces in the Godlif country simply because of the Irregular Tamer guild and Ainsley under the Sloan Family.

The two forces were unique, so the Sloan Family was invited to the annual event.

But in terms of global forces, the Sloan Family was just an insignificant ant!

The Aretha Family itself wasn't worth mentioning, not to mention the Sloan Family.

Ainsley knew that her family was a top-notch family in the Godlif country, but in the whole world, it was too small and weak.

Still, although the Aretha Family wasn't an official shelter recognised by the world elites, the hunters didn't target Blair because Blair was an official family member of the Aretha Family.

And this family actually had some dealings with the black market's people, which means they had some connections to the world elites themselves.

This was the reason why the hunters had to abandon their thoughts of hunting Blair and switched their target to Ainsley, who didn't have any relationship with their organization.

And at that time, she only had the Sloan Family alone.

Too insignificant.

But Jake didn't mention this again in front of Ainsley.

He was careful not to tell Ainsley that her Sloan Family was actually still considered too weak in front of the world elites.

The Billios Family was huge because they had many businesses and connections in various fields, but the Sloan Family wasn't like that.

They did make a breakthrough in the potion and precious stone business, but the two businesses alone weren't enough to deter the world elites.

If anything, it would only help the Sloan Family connect with various elite forces, but they might have to trade more inheritance stones with the world elites in exchange for Ainsley's safety.

Such a thing...

Jake wouldn't allow it.

Of course, Jake didn't say anything about this and only talked about the Aretha Family's connection with the world elites.

"Anyway, the Aretha Family knows some secrets, but they have no one with soul sensitivity ability."

Jake took a cookie and casually fed it to Ainsley's little mouth as he continued to blabber.

"That's why until now, the Aretha Family is still ignorant about Blair's condition. The world elites also deliberately concealed the news."

They hoped that if one day the Aretha Family threw their adopted daughter away, they could still hunt Blair and steal her soul.

"Oh, well, let's not talk about the Aretha Family. After the beast and monster tide ends."

Jake had planned to hold a banquet and press conference to welcome Ainsley to the Billios Family, but if Ainsley got things to do...

Thankfully, Ainsley didn't have any emergency schedule for the time being.

"I can attend the banquet...and after that, I'll go back to the Roane Region before departing to neighboring countries."

After all, Ainsley still had the plan to set up guild branches abroad.

Maybe by the time she finished building the foundation, the Pandora Island's development and the guild buildings in the Godlif Country would have entered the final stage.

Indeed. While Ainsley went to the capital to fight the beasts and monsters, her workers also worked hard to build the guild buildings in various places across the Godlif Country.

Now, the previous branches had gotten their own guild buildings, and there were more buildings being built everywhere around the Godlif country!

### **Chapter 1018: "The Transmigrators' Disease"**

It was estimated that after the expansion, the guild would have more than 300,000 people registered as guild members.

The big guilds in each country had millions of members due to the large human population in this world.

Soon, Ainsley's guild would be like that too!

Ainsley listened to Jake planning things related to her welcoming banquet, and out of the blue, she recalled the bet she had just made with the three bosses a few days ago.

She already got the reward after winning the bet, but she hadn't inspected the Yazzie entertainment company that she got from one of the big bosses.

Ainsley still remembered Zev's mission which forced her to be well-known in the whole capital city, even among ordinary people.

Undoubtedly, being a celebrity would accomplish this mission pretty fast and Ainsley really did want to take a different path from the Godfather's fame.

She wanted to show the world that the mafias weren't all bad...

At least her family and a few close friends weren't that bad aside from selling a few illegal stuff.

If she could change people's perception of the mafia society by becoming a celebrity...

Ainsley smacked her lips as she ate more cookies while not forgetting to listen to Jake's blabbering.

That day, Ainsley knew a lot of things related to transmigrators and the shelter forces.

Jake even gave her a list of transmigrators that were already tied to these shelter forces.

"If you want, after the welcoming banquet, I can bring you to the Godlif country's transmigrators gathering."

Jake gave Ainsley another banquet invitation to socialize.

"I heard that they will hold such an annual gathering in a few weeks."

Maybe after Ainsley attended the welcoming banquet, she would have to rush to join the transmigrator gathering.

But what Ainsley didn't expect is that...

A lot of these transmigrators, especially those with young bodies, were actually famous celebrities!

"This...is this true? These stars are all famous in Godlif country...they're actually transmigrators?"

Ainsley saw five to ten celebrities of various ages in the transmigrator list that Jake sent to her tablet.

These transmigrators actually had more abilities and could contribute more to their affiliated shelters, but they also chose to infiltrate the entertainment industry.

Why is that so??

For this, Jake laughed and calmly explained the truth.

"Actually...you should know that as a transmigrator, your soul and your body won't match, right?"

"Right..."

"In some serious cases, these transmigrators will fall into a deep coma here and there. They might also die because of the soul and body clash."

This was the first time Ainsley heard of this theory and the whole body shook without her knowing.

"W-what...? That can happen? Then, what about me— "

After all, she was a twenty-or-so college girl who entered the body of a toddler.

The soul and the body matching rate should be dangerously low, right??

But she didn't have any of these issues...

Facing Ainsley's slightly panicked face, even Uncle Elu and Monica felt nostalgic.

After all, they also used to be scared like that when they heard about this from other elders in the Billios Family.

Jake also knew that whoever heard that they might fall into a coma anytime and might die out of the blue would subconsciously panic.

The young man immediately took Ainsley into his embrace and carefully stroked the baby's long hair, trying to stabilize her emotion.

"It's okay; it's okay. For now, you are alright because the assimilation degree is quite high."

This is also why Ainsley would often act like a real toddler, simply because the assimilation degree was high.

But it didn't mean she would lose herself, just like what the shamans experienced after getting possessed by their contract spirits.

After all, in this case, Ainsley was actually the one possessing the body and not the other way around.

"Degree of...assimilation?" Ainsley tilted her head as she chewed the remaining cookies in her mouth.

She was glad that when she was shocked before, she didn't choke on the cookies.

It seemed that being a mafia boss made her calmer than others.

"Hum. Assimilation can be achieved by receiving trust and other positive emotions from people around you or people from this world."

Jake didn't forget to wipe the cookie crumbs around Ainsley's as he explained.

"In this case, your assimilation degree is high because first, the original Ainsley doesn't have that many presences in other people's hearts."

It was like a blank canvas.

That's why when Ainsley took over, no one doubted her even when her character suddenly changed.

"The second reason is that...because you're a mafia boss, and you successfully make your subordinates, and your family loves you."

When these locals believed in Ainsworth, loved her and even swore a soul oath, the world's consciousness would slowly accept Ainsworth's existence.

It wouldn't repel Ainsworth from Ainsley's body anymore.

"Some of the transmigrators in the list does not occupy any important position in their shelter forces or in any other society."

Jake slowly elaborated and finally connected the dots to the entertainment industry.

"That's why these transmigrators become celebrities to receive love, trust and other positive emotions from their fans instead."

As for Uncle Elu and Monica, they had a high position in the Billios Family.

Basically, almost all Billios Family members respected them regardless of their identities.

Not to mention that indirect respect, love and affection through their creations also increased the assimilation degree.

"We discovered this assimilation theory decades ago, but only transmigrators affiliated to the shelter forces will know about this."

The scattered transmigrators were busy living their life, blending with the people in this world or avoiding the hunters' pursuit.

How could they know there is such a disease?

### **Chapter 1019: "Debut As A Celeb"**

When these transmigrators fell into a coma and such, and their condition worsened, it would be too late to save them.

This is why being affiliated with a shelter force was something incredible and good for the transmigrators.

It's just that...how could the transmigrators know such a force exists?

They wouldn't even necessarily know that other transmigrators existed.

And the existing transmigrators also couldn't just openly tell their existence to this world because only a small number of forces knew this top secret.

Imagine if everyone knew about transmigrators...

Their first reaction must be a negative one.

This is also why Ainsley still didn't dare to come out of the 'closet' and tell the truth to Grandpa Yofan and the others, no matter how kind they were to her.

If they knew that the one inside this body wasn't the boss they thought it was...would they kill her and hate her instead?

Or maybe they would fear her...

Ainsley wasn't ready to face this trial.

Ainsley suppressed her negative thoughts, and her thoughts returned to those transmigrators who became celebrities.

"So...they become celebrities to stabilize the connection between their soul and their body?" The baby asked Jake in her sweet and innocent voice.

Jake immediately nodded solemnly.

"Yes, that's right. But there are also transmigrators with unique bound abilities that require fans' power to make them stronger."

It's more like the power of faith that they could get from fans...

"Actually, I heard that in legends, there are many ability users with charm-related abilities who need the love and affection from many people to grow stronger."

Jake shared what he knew about this legend with Ainsley, who also had a charm ability user.

"It was said that this kind of person is born with a unique charm bloodline."

"They can tame beasts and monsters using their charm. They can also convert the power of fans' love for them into their special energy."

In this way, they basically didn't need energy crystals to recharge their charm ability.

As long as there were fans out there loving them, they could get unlimited amounts of energy!

"These ability users are all non-human races, and they're all listed in folklore or legends."

"Some legendary beasts also have this kind of bloodline—"

Jake paused before peeking at Ainsley's face.

Since knowing that Ainsley was a transmigrator, Jake already thought about her unusual charm ability.

It could be that although Ainsley's bound ability was the luck manipulation, she might unknowingly awaken her bloodline or something...

After all, Jake also knew that the Sloan Family's founder could abduct the three sacred beasts to guard the Sloan Family for such a long time because of his unusual bloodline.

And it's the legendary charm bloodline in legends.

"You...do you want to see if the power of fans can evolve your charm ability to the next level?"

Jake asked with a smile, but he didn't really think Ainsley would agree.

All of this is just a speculation and there's no saying if Ainsley could really become such a legendary figure—

But Zev, who was usually silent and acted as a decorative toddler spirit, suddenly shouted energetically after Jake's words fell.

[Legendary charm bloodline! Host, if your body has this bloodline, the next time you consume the evolution potion, you can choose a different evolution path!]

Abilities can evolve, enabling the ability user to gain various unique skills in the process.

At first, Ainsley's charm ability path would either be charming non-human races just like how she charmed humans, or...

The charm control skill could control people like puppets using charms.

But if Ainsley chose another path, for example, that unique bloodline path...

She could possibly get all the skills while achieving the state that Jake mentioned before.

Using fans' affection, belief, and faith is the source of your charm ability's energy!

[Don't forget that your realism art ability can devour other abilities' energy. If you can get a stream of energy for the charm ability...]

It means the supply for the realism art ability would be stable too!

Ainsley didn't have to worry about suddenly dying because of the realism art ability sucking her whole energy core dry.

Not to mention that Ainsley had only entered the early stage of the core-splitting realm.

Since she has five abilities, she's ready to split her core into five smaller cores.

This would undoubtedly give Ainsley more place to store special energy to fuel her abilities.

[Host, you should follow Jake's suggestion! Let's try becoming a celebrity and see if you can evolve your charm ability further!]

Zev was even more optimistic about Ainsley's charm ability than other abilities.

After all, other abilities aside from the 3D mapping ability had certain risks that could harm Ainsley's health and lifespan.

But the charm ability was the ability with the lowest risk rate. It's just that...people found it hard to evolve this ability to become a useful one.

Others couldn't do it..but it didn't mean Ainsley also couldn't.

Zev was extremely positive about Ainsley's future development.

If Ainsley could really have such a legendary skill...they wouldn't need to be afraid of those hunters in the future, even without the Billios Family's protection!

Ainsley listened to Zev's suggestion and was already persuaded to join the entertainment industry to evolve her charm ability.

But...

[I don't have time to debut and such. I have to develop the guilds and the island...I have to go abroad often. How can I debut as a celeb?]

But the era was already advanced.

Zev hurriedly gave Ainsley a precious suggestion.

[Become an internet celebrity! Use live broadcasts and such! Then, you can slowly debut using your fame as an internet celebrity.]

Ainsley's eyes instantly lit up.

[Okay, let's do this.]

That's how the legend started!

### **Chapter 1020: "The Hunters' Retreat"**

After Ainsley decided to debut as a celeb while building her guilds abroad at the same time, she started to approach Jake with this idea.

And Jake immediately supported her because he also wanted the baby to evolve her charm ability.

"If this is the case, I'll invite some big stars, agents and entertainment company's bosses to your welcoming party. How is it?"

Of course, some of the big stars invited would be transmigrators, and this is also a chance for Ainsley to mingle with the tiny transmigrator circle.

After all, for the past year, she didn't know that there were any other transmigrators besides her in this world.

Now that she knew, she didn't need to be so wary and anxious all the time. She could blend with the transmigrators and share some stories.

"Okay, please do that, dad. If it's not burdensome for you, it is. If it's hard to invite them— "

Ainsley hadn't finished her speech when Jake had already interrupted her.

"It will be their honor to attend a party held by the Billios Family. We don't often have a banquet or something, so it's really a good thing to be invited."

The Billios Family was used to holding a family-only banquet that didn't include outsiders.

But because they wanted to welcome Ainsley to the family now, they would hold two-day parties where outsiders and insiders could join both parties.

At this point, Ainsley still didn't know what would happen at that party...

After a few days going to the battlefield, Ainsley didn't encounter any other strong and weird beasts or monsters.

Even the promised last boss didn't appear in any area, leaving this year's beast and monster tide the easiest of all years.

It should be more dangerous than last year, but because of Ainsley, it became the opposite.

Not that Ainsley complained, though.

After the event ended, everyone didn't go back to their own regions yet because the Billios Family had already announced the press conference and the welcoming banquet involving Ainsley.

A day after the beast and monster tide ended, the Billios Family made an official press conference, announcing Ainsley as their adopted daughter.

Many people in the upper circle of ability users and mafia societies already knew about this but others outside of the circle didn't know.

Especially ordinary people.

The ordinary people knew the Billios Family more than any other ability user families in the society.

Thus, when the Billios Family announced that they had adopted a daughter, and it was the family head's daughter on top of that, it blew up.

Various ordinary people's news channels and social media collectively announced this happy event of the Billios Family Head adopting a daughter.

Netizens and curious people immediately dig out the news and when they saw the picture and information of Jake Billios's newly adopted daughter...

They were shocked.

[Isn't this baby mafia boss featured in the Court Variety Show's latest episode?!]

[Yes, yes! I thought she was only joking when she said she adopted Jake Billios!]

Yes. It's not Jake adopting Ainsley but Ainsley adopting Jake as her father.

Of course, in the eyes of rules and laws, Jake adopted Ainsley, but everyone knew the truth was the opposite.

[This is insane. Now that the Billios Family has formally announced the news, this kid is going to soar to the sky.]

[She's already popular through that variety show, anyway. She will only get more exposure this way.]

[Yeah, yeah, and she's one of the rare kind mafia families. I don't think it's strange that the talent-loving Billios Family wants her.]

The Billios Family's official blogs, social media accounts and other channels simultaneously released the happy news of welcoming a new family member.

Such a big thing...even ordinary people who didn't know Ainsley yet slowly knew her with the label of 'Jake Billios' adopted daughter'.

Because of this, Ainsley's path to debut as a star became much smoother than before.

Not to mention the hunters assigned to Godlif Country reported the news to their headquarters.

[That transmigrator kid is already under the Billios Family's umbrella for real. It's already officially announced. We can't touch her anymore.]

The hunters at the headquarters couldn't help but curse the hunters assigned to the Godlif Country.

They couldn't even beat a transmigrator in the body of a child! How useless they could be?!

The headquarters had received data about Ainsley, and they were ecstatic to find such a good hunting target.

Her bound ability was one of the rarest and most precious abilities they saw.

If they could get her ability before getting her soul, or just extract the ability directly from the soul...

That would be good.

And such a good quality soul would help more with their noble mission to save the world from year to year.

But now that they lost the target and the Billios Family picked her up...the headquarters were mad.

[For now, don't target her. But once she goes abroad, we can arrange an 'accident' without the Billios Family knowing.]

This had happened a lot, and the related shelter forces couldn't do anything when they didn't have proof of the world elites going back on their words.

But because of this, the shelter forces also often take advantage of the world elite's forces without breaking their agreement over the transmigrators.

After receiving the command, the hunters assigned to Godlif Country immediately obeyed.

[Alright, boss. By the way...what about Niel and the two kids? We suspect that they fell into the Billios Family's hands.]

But they don't have any concrete proof, which means they can't do anything to the Billios Family.

Can't confront them or anything...

In this aspect, they completely lost to that brat and the Billios Family!
