

Billionaire CEO Won't Leave

Chapter 416

Mu Rushun choked silently, and didn't know what to say to express his regret.

Her father is now under the care of kangmobei, and mu Rushuang is not too sure. After all, the disputes between the Mu family and the Kang family are largely caused by her.

"Kangmobei takes care of Dad Will it not be so..." Mu Rushuang lowered his head uneasily.

Mousse left nature to understand what his sister was thinking, but now, what else could he do.

"It's OK. When we get rid of the threat of silence, we'll take my father to America." Moussili was relieved.

What makes Mu Sili even more depressed is that his father Mu Liancheng thinks the same way about this kind of uneasiness. He also heard his father's attitude when he talked to comber on the phone just now.

"It's better than being in Shen Shimo's hands..." Murmured moussili, driving to see if there were any suspicious tracking vehicles around.

"Ha ha ha, fun."

Shen Hedan in his office, laughing at the latest news.

The stock market performance of Mu group is more tortuous than roller coaster.

After Shen Shimo took a stake in the company, the company experienced the highest price rise, but after that, the stock market performance of the company fell like a cliff.

Although Shen Hedan only has a general understanding of the reasons, in the final analysis, Shen Hedan thinks that the collapse of Mu's stock price is due to Shen Shimo's fault, so he thinks it's funny.

"Do analysts pay attention to the stock of moose?" Shen Hedan asked the secretary with great interest.

The Secretary heard the sound and thought for a moment, then said slowly: "I'll call the analyst."

After that, the Secretary hurried back and forth and led the analyst in.

"Mr. Shen, I have analyzed Mu's stock market. According to the recent performance of Mu's stock market, such cliff like ups and downs have a great impact on the shareholders' confidence in holding shares. Recently, a series of inexplicable events have always happened in Xin Kang's stock market, but after the events, the results are always displayed in Mu's stock market. This shows that Xin Kang's Secret hostility with Mu's stock market is very strong, in other words, it is only a small business. If we want to keep the growth momentum of Xinkang, Mu will continue to fall." After a brief analysis, the analyst informed Shen Hedan of his analysis views.

"Ha ha ha, that's interesting. I see. Go out." After listening with a smile, Shen Hedan indicated that the analyst could go back to his post.

"Mr. Shen, what's your next plan?" Asked the secretary.

"What are you going to do? It's still investment. Continue to analyze the investment applications from small companies. If there is a future, continue to invest, others, wait for a while. The time is not yet ripe." Shen He Dun light way.

The so-called opportunity is that after the open and secret struggle between mu and Xin Kang, a mantis catches cicadas, he takes the attitude of a yellow sparrow and takes advantage of it.

Xinkang, the project department is always between the prefabricated house and the official office building. Due to the recent farce, the work place of the project department is not fixed, but the performance and execution are still the same.

The animation short films produced by Qianqiu group are integrated into the game in the form of copies. As copies, if you want to open them, you have to pay for them. The price paid is half of the price of the movie tickets. Such a new attempt really makes the new Kang's income source further expand, and at the same time, it also expands the new channel of movie release.

The launch of paid movie copies once again reaped a lot of revenue for commobei. The new comrades quickly ranked top in the list of the rich, and their value gradually soared. However, it seems that the new comrades have no plan to go public.

The outside world is busy, and the Kang family is as warm as ever.

Kangmobei returned to the shopping mall after more than a year. Every day, he was

very tired. However, when he returned home, the warmth of his home was another scenery, especially the warmth that Bai nianxi shared with the children.

"Did you find out about the previous explosion?" Kang Xinyue is worried about the safety of kangmobei and that his new Kangshi will be hit.

"It's over. It's settled." He said with a smile.

"Well That's good... " Kang Xinyue wants to care more about something, but seeing that Kang Mobei is still eating with a good appetite, he doesn't say any more words to spoil the fun.

"In short, good, safety and health should be put first." Kang Li Qing coldly raised his eyes and looked at Kang Mo Bei.

Bai nianxi smiles subconsciously.

"Mobei, is the financial report of animation film coming out?" Bai nianxi asked.

"Well, it came out, and the effect was good. As a copy, the sales volume exceeded 10 million on the first day." Conmber replied.

"What about sharing? When can I have it? This animation is produced by Qianqiu group. " Bai nianxi said jokingly.

"Ha ha, you young couple, what you have is his, and what he has is yours. Why are you so clear?" Kang Xinyue was amused by their quarrel.

"That must be scored clearly. I spent 4 billion on Lumi island. This is not the investment in construction. When will it be paid off?" Bai nianxi pretends to be proud and smiling, looking at Kang Mobei and saying.

Conmobei's face is soft and mysterious, and he smiles: "in five months, he will hand in the money with interest." "Well, what do you say if you can't do it?" Bai nianxi smiles and glances at kangmobei.

"Tut Tut, I can do what I say. Just wait." He said with a mysterious smile.

.....

The next day, Yan Heng, a newly employed operation elite and his current Secretary from conmo north, rushed a planning plan.

The title of the plan is "chain store management plan".

Kangmobei is interested in the new channel of film release all over the country. After talking to Yan Heng about this idea once, Yan Heng continued to follow up the plan of this idea. After a long time, the plan was finally drafted.

"Chain stores The cost will be high. " Kangmobei's lukewarm words extinguished most of Yan Heng's enthusiasm.

Yan Heng said cautiously: "but it's very feasible. If it is implemented as planned, we will open 1000 chain stores across the country, and each movie will be released in cooperation with the cinema. At the same time, we will also win the right to CO release. The ticket price is the same as that of the movie ticket. We will integrate m + experience technology with private cinemas, so that the audience can watch movies with different experience. I believe this idea will be successful It's so popular that M + technology is not limited to online games. "

"Well, that's a good idea. I think so, too. I just don't like running such a huge national chain store." Said conمبر.

"Then..." Yan Heng's words are blocked.

After a few seconds, a figure appeared in his mind. Immediately, he said with a smile: "go to make the budget of the plan, and carry it out as soon as possible."

"Ah?" Yan Heng can't figure out what kangmobei is thinking.

"This plan is passed, you will follow up the implementation." After that, he left the office with his mobile phone.
