

Billionaire CEO Won't Leave

Chapter 425

"Oh

After witnessing the actual scene, Mu Sili vomited almost every day for the next two days. Until the fourth day, after all the animals died, his desire to vomit reached its peak.

Shen Shimo also came, with a calm smile:

"this poison is developed by Weishi. After smelling the gas of this poison, the nucleus will be fatally destroyed. The most obvious change of the animals whose nucleus has been destroyed is that the skin surface loses its regeneration function. Without the natural protective barrier of skin, death is the only result. However, this poison is not safe. The upgrade point of the agent lies in the interior. After the nuclei of all internal organs are destroyed, the internal organs will gradually lose their relevant functions. Therefore, within four days, the animals who humiliate the agent will surely die. "

After listening to the introduction of Shen Shimeimei with a little pride, Mu Sili felt nausea. Can this kind of vicious thing really exist in the world! This is the first feeling of mu Sili.

"The recent business that the Wei family took over was to let the Middle East people get some strange disease and die in a certain sea area while they were on a cruise ship, thus causing chaos in a region and friction with China," Shen Shimo continued slowly. "You already know the inside story. You either take the task or die here."

Mu Sili looked at Shen Shimo and felt that he had been on the boat. But in his heart, there was no feeling of regret. Maybe the desire to vomit covered up other feelings. He nodded without feeling: "OK."

"Sure? If you are sure, all your next actions must be under the supervision of my Wei family. Oh, yes, anyway, you seem to have no other choice, either accept it or die, ha ha. " Silent and laughing.

.....

In a trance, when mu Sili saw that he was in the downtown block of a city, he didn't know how long he had been away from the experimental area.

Although he didn't have much appetite, he found a restaurant at random. After taking a seat, Musi Li's mind was uncontrollably fantasizing. Imagine that the fester you see happens to combert.

"Ha ha..."

In the process of fantasy, Musi Li even laughs happily.

It's just this matter, how to use it, can it be applied to commobei. He can't get a reagent like that unless he gets on the cruise ship.

When you really get the reagent, can you do it yourself? Musili asked himself.

I don't know.

"Mr. Shen, that Mousse is coming. "

Shen Hedan is basking in the sun leisurely in the office. The secretary wants to talk but stops to report, and Musi leaves.

Frowning, Shen Hedan stood up: "is he looking for me? Tell him to come in

Mousse was in a suit and shoes with a radiant look.

Maybe it's the brain tonic of that fantasy, there is a kind of illusion that revenge has been avenged, and Musi is only so red.

"You look good. What can I do for you?" Shen He delayed the polite way.

Musi Li takes out his mobile phone with a smile and puts a picture in front of Shen Hedan.

The content of the photo is a picture of the dead animals festering all over the ground. Shen he frowned because of the smell of the picture.

"What do you mean?" Shen He delay cold voice way.

Looking around the office, there are others. Musi Li uses the performance of looking around to indicate Shen Hedan. It's not convenient for others to listen to the next words.

"You go out first." Shen Hedan looks at Mu Sili and tells others.

"I want to cooperate with you," Musi Li said slowly as he sipped tea. After the clearance, he sat down and said, "do you know what the Wei family's core business is

"Speak up." Shen He Dan's face was cold.

"Hum, I know that their core business is this picture," Mousse said with a pause. "This picture is taken in a test area. The cause of death of these animals is that they inhaled some kind of poison..."

Mu Sili slowly told Shen Hedan everything he knew. After listening, Shen Hedan was shocked.

"How do you know?" Shen Hedan widens his eyes and stares at Mu Sili.

"The Wei family recently negotiated a huge business. Shen Shimo asked me to carry it out, so I knew." Musi from a face indifferent smile.

Shen Hedan was shocked and speechless.

In the past, the feud between the two families was just a matter of the two families. The Shen family and Wei Jiaming fought secretly, but it would not rise to the situation of life and death.

But now, everything is different. Before, the Wei family was determined to kill him, but Shen Hedan only had the ability to deal with it.

At present, Shen Hedan is determined to destroy the Wei family when he learns that the Wei family's core secret is to make a fortune by war.

But in front of Mu Si Li, Shen He Dan dare not believe it.

"Why did you choose to tell me that?" Shen Hedan was outspoken.

"It's very simple. It's the Wei family that destroyed my Mu family. Isn't it normal to take revenge?" Musi said light reason, although not the real reason, can be said to be very convincing.

"As long as you continue to give me information, in return, I will support the rise of the new Mu family after the fall of the Wei family. I do what I say." Shen Hedan looks at Mu Sili with a serious face. "Well, that sounds good. That's it."

After that, Musi got up and left by himself.

The long shock reverberated in Shen Hedan's chest. He could count all the things that

made him at a loss.

Moussili successfully completed the layout of the double agent. He wandered between the two families. Although he was walking on thin ice, he was also fearless.

What he wants is very simple. After the destruction of conmobei, his father and sister can continue to be well.

"I'd like to visit the Wei family's biotechnology company, OK?"

After leaving Shen Hedan's office, Mu Si goes straight to Shen Shimo's villa.

Silent and cold, looking at Musi Li, he didn't speak.

After a little thought about the wording, Mu Sili said slowly: "don't you want to step on Shen Hedan and Kang Mobei? In this respect, I also have something worth using. If I have strong evidence to prove that I understand the career of the Wei family, they will believe me... "

"Shut up! Don't try to push your nose on your face! When this task is finished, talk to me about the terms. Nothing else, please Then he got up and left the living room.

Musili realized that he was too anxious. He was a little anxious to get the poison Then use.

Kangmobei is busy with his small world, Lumi island. Although the business is not bigger than before, it is hard to be happy because of his interest.

Hearing that Shen Hedan himself came to him, kangmobei didn't feel much. Until he learned everything about the Wei family, kangmobei was also shocked.

"We have to destroy Wei. Mousse is my man now. We have to find a way." Shen Hedan's eyebrows didn't seem to stretch.
