

BOOT CAMP 1291

### **Chapter 1291: Underwater Operation**

The sea was a little turbid due to the ocean currents. Ye Jian turned on the flashlight and nodded. Her head was facing down and her legs were facing up. She had already dived into the water.

Time ticked by and Ye Jian finished clearing the obstacles below the sea. She didn't even have time to change her posture when she came out of the water. She immediately met up with the water ghost codenamed "Big Eel" and entered the next sea area.

Not only was the seawater dark, but it was also very muddy. Big Eel led the way while holding a navigation board. This time, he slowed down and took care of Ye Jian as they moved forward.

The navigation board was a type of hand-held equipment with a graphical compass and underwater depth displays. It could help divers to navigate accurately underwater without getting lost due to the dark environment.

The two of them continued exploring the bottom of the sea. For three hours from 5 am to 8 am, Ye Jian didn't appear on the surface of the water. She stayed in the water and under the lead of Big Eel, she steadily completed the combat training and missions.

Big Eel shielded her and stayed alert. Ye Jian took action and completed the mission. Three hours later, she finally sneaked into the enemy's boat. Ye Jian started to cut in from the back. The water ghost that she cooperated with was responsible for luring. The maritime combat training had entered its most crucial moment.

Li Jinnian, who had been lurking in the water, was like a sea monster hiding in the depths of the sea, quietly waiting for his prey to arrive.

He was waiting for Ye Jian. He wanted to test the results of this female soldier's underwater training.

However, Ye Jian didn't want to fight with Demon King Li at all. She was confident that she could fight with Demon King Li on land but when she was underwater, she knew her limits and didn't dare to fight with him.

She carefully avoided the detection range of the ultrasonic waves and moved her feet towards her target.

"She doesn't plan to fight with the enemy." Three hours had passed. The navy commander, who had been observing on the surveillance screen, pointed at the figure that had been hiding in the sea for three hours. He said proudly, "Li Jinnian, the sharp knife of the unit, is on par with Xia Jinyuan."

The major general was a little protective. "Your Li Jinnian is not bad. Our Xia Jinyuan is not bad either. Add Ye Jian to the equation and I feel at ease, Old Dong!"

The navy commander's surname was Dong.

“That’s why I said that you really won this time. Back then, you even wanted to win Li Jinnian over. You were so ruthless that you didn’t leave a single soldier for our navy. Old Yang, it’s been on my mind all these years.” The navy commander laughed. This Old Yang was still the same as before. Whenever he saw a good soldier, he would try to recruit them.

Who didn’t want them? Everyone wanted them!

Undeniably, there were more top soldiers in the army than in the navy.

Major General Yang adjusted his military cap and felt that he needed to change the topic. He restrained his expression and said solemnly, “I’m very grateful to you for taking care of Ye Jian. I know that her training time is short so I specially arranged for her to undergo three days of individual training. Old Dong, thank you for always supporting our army’s work! Thank you very much!”

“There’s no need to be so polite. Our main reason is that Ye Jian is indeed a good seedling. Even if she’s a soldier in your army in the future, she’s still a soldier of our country.” On the screen, Li Jinnian suddenly turned around like a sea monster. One could feel his fierceness even through the screen. He sped through a few meters and the navy commander interrupted the conversation. “He has found his target.”

#### **Chapter 1292: Hardships That One Can See**

Everyone in the control room turned to look at the screen that could clearly show Li Jinnian’s movements. The navy commander instructed the technical lieutenant, “All-round surveillance.”

“Yes!” The technical lieutenant pressed on the control keys. After the commands were sent out, the original two screens that showed Li Jinnian’s actions extended to six screens.

Not only could they see Li Jinnian’s movements in the water from 360 degrees, but they could also see Ye Jian’s figure on the screen.

Ye Jian was looking for cover when she suddenly felt a sense of danger. It was as if a deep-sea monster was entrenched in the dark and muddy seawater. It was stretching its tentacles to catch its prey.

In an instant, Ye Jian knew that she had been locked on by Li Jinnian! Her teammate failed to lure him!

Ye Jian was getting increasingly stressed after being targeted by Li Jinnian, who was the most powerful person on the team and had the codename ‘Demon King’. Her first reaction was to find cover and not fight the Demon King head-on!

The navy commander, who was observing her, saw her reaction and her ability to move underwater. He smiled at the serious-looking major general and said, “Although she has only been training for a month, her underwater skills are not worse than a real water ghost.”

“Frogmen are afraid of using their hands to move underwater. The correct way to move and dive is to swing your legs up and down to provide momentum. You can free up your hands to do other things. You can either shoot, fight, dive into the water, or explore underwater.”

“From the moment Ye Jian discovered the danger to the moment she evaded and sought shelter, you can see how professional she is in diving. Look at her. She was moving her legs and her hands were exploring the water. Don’t underestimate this action. People’s natural reaction underwater is to use both hands and feet together.”

“Also, to practice your reaction to swimming with your legs moving up and down, you need to step on the spot in water for two hours every day. Your head and shoulders must be exposed to the water. Your hands must be raised. You need to rely on your feet to step on the water and float to complete the training requirements.”

After he finished speaking, the navy commander asked Big Whale, who was standing beside him, “I heard that Li Jinnian added more materials to Ye Jian’s water-treading training for the first half a month?”

The major general, who had been listening attentively, looked at the water ghost that had been training with Ye Jian for more than a month. He smiled and asked, “What’s wrong? Did she fail?”

To add more training for a soldier usually meant that they failed normal training and needed additional training.

Big Whale immediately straightened his back and answered the major general seriously, “In the beginning, there will be unqualified instances. According to the training requirements, if you use your hands three times within the 20 minutes of water-treading, you will be deemed unqualified.”

“Ye Jian had two months less training time than the team members. If she doesn’t meet the requirements, she needs to be strengthened. We used the lead weight method on her waist. Each piece weighed two kilograms. Four pieces each were attached on the left and right sides of her waist. A total of eight kilograms. She trod in the water until she passed!”

The major general only knew a little about the professional skills of the frogmen. Hearing that, he nodded and said, “Based on what you said, Ye Jian has passed the diving mission.” A faint smile appeared on his serious face. Even his powerful voice had a hint of a smile. “This girl has always been strict with herself. No matter what she does, she will do her best. She won’t be distracted or waste her time. I’ve never been worried that she won’t be able to complete her training here.”

### **Chapter 1293: Danger!**

“Ye Jian is an outstanding soldier. After a week of underwater weight training, she completed the fully-gear swim training with flippers in third place!” Big Whale spoke with a prideful look on his face. It was evident that he acknowledged Ye Jian’s ability. “Major general, we all think that Ye Jian will have a place in any military unit she is in in the future. All male soldiers will look up to her!”

Ye Jian didn’t know that the water ghosts had such a high opinion of her. At this moment, she was already 17 meters deep underwater. The feeling of being stared at by Demon King Li still existed.

The feeling of being stared at in the water was scarier than being stared at on land. Physically and psychologically, it wasn’t like being stared at on land where you could still run away immediately and find a hiding place. There was nothing in the water. You couldn’t hide even if you wanted to!

Her physiology and mentality were being challenged. The pressure from being in deep water pressed on her limbs, adding to her already tense emotions. Ye Jian touched a reef and grabbed it with both hands. Feeling something solid in her palms relieved her tense emotions.

She didn't even see Li Jinnian's shadow in the water. However, she felt like she was being watched. Even though she was hiding behind the reef, she didn't relax.

Frogmen underwater combat was a two-person combat. If a comrade got into trouble, their partner could save them immediately.

But now, there was only Ye Jian and she was a new recruit. Even though Li Jinnian found her, he didn't swim over immediately. He was worried that Ye Jian would get flustered once she saw him and instinctively rush to the water's surface.

This was the most dangerous thing to do when diving.

When frogmen swim in deep water, they would breathe in gas that was as pressurized as the water in the environment. If the pressure from the gas suddenly exceeded the pressure from the outside, their blood would bubble and they would suffer from life-threatening decompression sickness.

Ye Jian was about 19 meters deep. If she rushed into the water because of Li Jinnian's appearance, she might die.

Even the experienced Li Jinnian didn't dare to be reckless. After Ye Jian swam a certain distance, Li Jinnian swam towards the inflatable boat that Big Shark was on.

The fact that she was able to escape from his hands and find an underwater cover immediately meant that Ye Jian had already explored this part of the sea and memorized its position.

"She's quick-witted and has a solid foundation. She's bold but restrained." The navy commander, who had been sitting in front of the surveillance screen and hadn't left, commented on Ye Jian's underwater performance once again. "Also, she was able to escape from Li Jinnian's hands quickly. Old Yang, hand her over to our team for another two years. I will hand to you an outstanding commando frogman!"

There were a total of seven people in the surveillance room. Everyone was staring at the figures of Ye Jian and Li Jinnian. Even after three hours, no one felt tired and wanted to leave the control room.

Major General Yang came specially to see Ye Jian's training. He was willing to stay for another three hours if needed.

The major general who had seen multiple exercises and participated in multiple actual combat exercises heaved a sigh of relief when he saw Ye Jian avoiding the danger.

"We have high hopes for her. We hope that she will be able to join the military unit and carry out missions as soon as she enters the military school." The major general's serious voice was low and deep, like a heavy rock. "Our country's special forces combat ability still needs to be improved. We urgently need someone like Ye Jian."

## Chapter 1294: Confrontation

“For the time being, you’re building an army of amphibious frogmen. Old Dong, the task on my shoulders isn’t any lighter than yours.”

Through this sentence, the navy commander seemed to have guessed something. A look of surprise flashed across his face and he turned serious. “A sea, land, and air force? I see! I understand!”

No wonder Ye Jian had to be sent over. Her future prospect and the direction of the military had already been decided!

“You have a better vision than me. She has already been training for five years. Coupled with the four-year military school, such a young Special Forces soldier with nine years of training experience. Old Yang, you’re really far-sighted. I feel ashamed.”

There were only four people in the surveillance room. One was a technical lieutenant and the other was Big Whale. The navy commander wouldn’t tell anyone what he said and this conversation wouldn’t leak any information.

Li Jinnian seemed to have noticed that his ‘prey’ had disappeared into the distance. He turned around slowly and faced the screen. His expression couldn’t be seen clearly because he was wearing a mask. However, from the way he moved his legs, one could tell that he was in a good mood.

The sea current rushed past the mask in front of her eyes. A few unknown fishes swam along with the current leisurely. Ye Jian held onto the reef with her hands and squinted slightly. She swam in the opposite direction of the current.

However, the inflatable boat had a deeper draft than a dinghy. There was a group of skerries nearby. If it was her, she would definitely hide the boat behind them.

Since Li Jinnian had his eyes on her, the task of installing the magnetic mine could only be left to her partner, Big Eel.

Under the guidance of the navigation board, Ye Jian and Big Eel met up under the water twenty minutes later. The two of them kept their heads facing up and communicated using hand signals.

Ye Jian pointed at the surface of the water and crossed her arms. “I’m targeted. Exchange missions.”

“Okay!” Big Eel understood what she meant and nodded. It seemed like Demon King Li wanted to fight with Ye Jian underwater so he had to cooperate.

After the mission exchange, the two of them split up again.

Ye Jian slowly moved up from the deep water level. When she was about three meters away from the water level, she took the opportunity to get closer to the boat. This was the first time she was acting alone underwater. No matter how bold she was, she didn’t dare to be as carefree as she was on land. She remembered the important points of underwater activities and didn’t make any mistakes.

Not far away, Li Jinnian floated to the surface of the water. He smiled and said to Big Shark on the boat, "She's here. I'll fight with her underwater."

"Don't be too harsh. She was able to avoid you just now because she reacted quickly. We need to see her true combat capabilities underwater. Don't treat her like a seasoned soldier." Big Shark didn't persuade Li Jinnian to give up. He just reminded him again and again, "Ye Jian can handle it. You must be careful! Don't let anything happen to her."

Li Jinnian understood what was going on even without Big Shark's reminder. He made an 'OK' gesture and put on his breathing mask again. Then, he slowly descended and carried out the underwater interception.

The entire training was centered around Ye Jian. Li Jinnian wanted to test Ye Jian's underwater combat skills. Big Shark wanted to see if she could successfully clear the dinghies that prevented them from landing on the beach. The navy commander and the major general of the army wanted to see if her training results were up to standard.

The muddy seawater stirred. Danger suddenly appeared. Ye Jian saw a figure approaching silently like an electric eel. She turned around and swam one meter towards the surface of the sea. She lowered the water pressure on her before facing Li Jinnian.

#### **Chapter 1295: Head-on Attack**

The muddy water was so quiet that she could hear the sound of her flippers moving up and down. Listening to the soft sound of water not far away, Ye Jian's first instinct was that Li Jinnian was chasing her.

As she swam to the surface of the sea, Ye Jian took out the frogman dagger. The dagger was a special weapon that could prevent rust and magnetic fields. Even if it encountered the electromagnetic signal of the underwater explosive device, it wouldn't cause an explosion.

Holding a dagger, Ye Jian lured the eel around the boat. First, she wanted to buy time for Big Eel. Second, she wanted to lure all the underwater dangers onto herself.

Li Jinnian attacked head-on. He forced Ye Jian to the underwater obstacle course.

There were ropes hidden among the seaweed. If they were not careful, they would be entangled by the seaweed or their equipment.

"Is Demon King crazy? He chased Ye Jian to the underwater obstacle course!" Big Eel, who was swimming towards the boat, looked at the disappearing figure in the water with surprise in his eyes. "Does he really want to spread the reputation of the Demon King to the entire military?"

All the water ghosts knew how difficult the underwater obstacle course was. There were waste materials, fishing nets, ropes, and seaweed that were cultivated. These can all be easily entangled with equipment like the frogmen's respirator!

Even the veterans would be extra careful when entering.

Big Eel was worried for Ye Jian. Big Whale, who was observing on the surveillance screen, was worried for Ye Jian too. He secretly glanced at the face of the navy commander from the corner of his eyes. When he looked over, Big Whale was frightened by the cold look on the commander's face. His heart dropped.

Oh no! The commander seemed a little angry.

"How many water ghosts are there in the base now?" The navy commander looked serious.

Li Jinnian was too bold! He actually brought Ye Jian to an underwater obstacle that soldiers needed at least eight months of basic training before going through! Did he not want his future anymore?!

Once something happened, the army would lose a general and the navy would lose a general too! In the end, it would harm the country and their efforts would be wasted!

Big Whale immediately replied, "Eleven of my team's codenamed water ghosts are in the base! Including sixteen combat frogmen and reconnaissance frogmen! A total of twenty-seven soldiers!"

"Send four combat frogmen to watch over the situation. If any problem arises, rescue them immediately!" The navy commander immediately gave the order. As the commander, he had the responsibility to ensure the safety of all the soldiers and to prevent any possible dangers.

"Yes!" Big Whale immediately executed the order. He was afraid that something would happen!

Although Major General Yang didn't know much about underwater combat, when he saw Ye Jian's calm and unhurried swimming posture, he vaguely felt that Ye Jian seemed to be swimming forward on purpose.

"There's no need for that now. Let's observe her first." He stopped Big Whale from leaving. "Ye Jian never does anything rash. Just now, she took the navigation board and swam towards the east. Based on my understanding of her, she has a motive for swimming towards the east."

This meant that she wasn't forced by Li Jinnian to the east.

Major General Yang had known Ye Jian for three years. He also paid attention to her training. Also, Ye Jian had carried out a few missions in the military. He felt at ease with her constancy.

Hence, Major General Yang thought that she did it on purpose.

Big Whale received a nod from the navy commander before returning. He said, "Although Ye Jian's training time is short, the water ghosts on the skerry bring her to complete many training sessions."

"We have taught her how to use the survival knife to release herself from seaweed and fishing nets. It's just not as complicated as it is now."

### **Chapter 1296: She Was Luring Him Over**

That meant that with Li Jinnian around, although there would be some danger, there wouldn't be any fatal problems.

This was a form of trust. He could give his life to his comrades and trust them.

“Old Dong, I’m not nervous, what’s there for you to be nervous about? Let’s see how exciting this underwater battle is.” Major General Yang reassured him. He was even more certain that Ye Jian was doing this on purpose.

This young lady had an adventurous spirit but she was steady. He believed that she wouldn’t put herself in danger.

After he finished speaking, he laughed and said, “There’s no hurry. Let’s wait and see.”

“Although Li Jinnian isn’t my soldier, my soldier, Xia Jinyuan, has mentioned to me that he is number one in the entire military in underwater technical skills. The Demon King might be brutal, but he’s admirable!”

The navy commander was pleased that his soldier was being complimented. “I’m not worried about Li Jinnian. I’m just afraid that you might be worried. Since you’re not worried, let’s wait for an exciting underwater battle!”

The entire underwater training base was equipped with the underwater detection system used by the submersible vehicle. The lieutenant was familiar with operating the three rows of computers. The underwater obstacles were displayed clearly on the screen.

Ye Jian was already close to the underwater obstacles. When she turned around, Major General Yang was even more certain that she was swimming towards the dangerous area on purpose and not forced by Li Jinnian.

It was just as Major General Yang had guessed. When you enter the enemy’s defensive zone and are faced with a situation where they had sufficient reinforcements and there was no backup on your side, it was dangerous to enter the complicated sea area. It is inconvenient to move and reduces your speed. However, it would also provide a natural obstacle and cover.

As the captain, how could a new recruit like her face Li Jinnian head-on? She needed to hide quickly and end the battle quickly!

The survival knife in her hand was extremely effective at this moment. The blade of this special dagger was two centimeters wide and eight centimeters long. There was a line of sharp sawtooth along the back of the dagger. As long as it was used well, it could cut through the ropes, water plants, and fishing nets at the bottom of the sea.

This was one of the ‘underwater survival’ skills that Ye Jian learned during the first month. She could use it creatively!

She stepped on the water with her flippers. As she pushed the seaweed away with one hand, she used her other hand to cut the long seaweed that might entangle her breathing equipment.

Facing these lethal dangers alone was a test of physical fitness and also a test of courage and willpower.

The simulated actual combat training allowed Ye Jian's mental endurance, self-control, and courage to overcome difficulties to improve greatly.

This training showed how high Li Jinnian's expectations for Ye Jian were.

He wanted to use all his strength to dig out Ye Jian's potential and make her an outstanding frogman!

Li Jinnian grabbed a piece of seaweed with one hand and smiled.

He thought that he was the one who forced her into the water obstacle course. Actually, she was the one who lured him over.

Good job, Ye Jian. This was her first time participating in simulated combat training. She immediately knew how to make use of underwater obstacles to seize the opportunity!

In such an environment, when the frogmen and the anti-frogmen met, it was very likely that both sides would be too close to each other to draw their guns in time. At that time, the underwater combat skills would affect the outcome of the battle to a large extent, and they would have to complete the mission and retreat quickly.

#### **Chapter 1297: This Doesn't Make Sense**

Ye Jian wanted to lure him in. She wanted to observe him secretly and then attack and retreat quickly.

The visibility in the water was low and the situation at the bottom was a little complicated. Ye Jian grabbed a rope with one hand and looked around calmly, waiting for Li Jinnian to get closer.

One, two, three... As she counted to eight in her heart, a black figure, like an arrow fish at the bottom of the sea, flashed past a cluster of seaweed.

It's starting!

The underwater battle began!

The people in front of the surveillance screen held their breath when they saw Ye Jian's sudden attack. The water ripples expanded one by one. Ye Jian was using the dagger very agilely and attacked Li Jinnian's gas supply system directly.

The air supply system was the main focus of the frogmen's underwater combat and defense. Once the air supply was cut off and the mouthpiece fell, the frogmen would lose their oxygen supply.

Li Jinnian's eyes turned dark. What a strong killing intent this female soldier had! She wanted to kill him immediately!

Spot the enemy, be ahead of the enemy, one shot one kill, end the battle quickly... These were all underwater combat tactics. Ye Jian remembered them and used them deftly.

Ye Jian, who had the initiative, knew very well that she didn't have the ability to fight with Li Jinnian for too long. How could she win against Li Jinnian? She would first help Big Eel to install the magnetic mine, then use the complicated terrain to escape!

Escaping was Ye Jian's main tactic.

Li Jinnian raised his hand and used his elbow to block Ye Jian's dagger attack. Ye Jian didn't hesitate to retract her right hand.

Then, an incredible scene appeared. The dagger in her right hand appeared in her left hand in the next second. The speed at which she changed hands was so fast that the navy commander and Big Whale in front of the surveillance screen didn't even have time to react.

Major General Yang knew Ye Jian's capabilities.

She could shoot twice as fast as other people. It was a piece of cake for her to change the hand holding the dagger.

"She has never shown this move before." Big Whale heaved a sigh of relief. Fast, too fast! Fortunately, it was Li Jinnian who was facing her. He had to attack her air supply system twice to avoid it.

Major General Yang smiled subtly. "Ye Jian has a special ability. She can pull the trigger and shoot immediately."

"What?" The navy commander felt that it was unbelievable. Everyone knew that accurate shooting required accurate aiming and then pulling the trigger quickly. How could she turn the steps around?

It didn't make sense and didn't seem possible.

When Major General Yang heard that for the first time, he also could not believe it like the current navy commander. However, it was the truth.

"At that time, I heard the same thing as you. I was so shocked that I thought it was impossible. But it was the truth. I saw her shooting with my own eyes. She picked up the gun and finished shooting within two seconds. Her reaction speed was faster than normal people," Major General Yang said proudly. He restrained the smile on his face. "She was familiar with every gun. She told me that as long as she holds the gun, the blueprint of the entire gun will appear in her mind. The moment she raises the gun and shoots, the blueprint comes to life such that she can even feel the movement of the bullet."

Big Whale took a deep breath. This... was too heaven-defying. What a powerful special skill!

In the water, Ye Jian attacked with all her might. She focused on Li Jinnian's mask, breathing pipe, throat, and ears. Her attacks were fast and ruthless. She employed the strategy of focusing on the means available to her rather than on her limitations, thus finding opportunities to complete an attack using what she had learned.

At this moment, Li Jinnian was facing Ye Jian's tactics head-on. He realized that the female soldier who dared to fight with him was like a water ghost, not a recruit!

### **Chapter 1298: The Demon King Is Hard To Deal With**

To be able to show her killing intent in such a special environment without any fear, it was obvious that her mental fortitude was as strong as a veteran!

He didn't take out his dagger. Every time Ye Jian attacked, he would quickly block and slow down his actions so that Ye Jian could see how one should defend themselves.

Ye Jian quickly realized his intention. She respected this young major even more.

Xia Jinyuan and he were the same kinds of people. They were willing to lead and guide their comrades who fought alongside them. They were not afraid that the other party would improve and suppress them.

That was why Xia Jinyuan had such a high opinion of Li Jinnian.

The dagger in her left hand stabbed horizontally at the ventilation valve on Li Jinnian's vest. Even though Li Jinnian was only defending, Ye Jian felt that she was having a hard time.

With the mask covering his face, Ye Jian didn't see the satisfied smile on Li Jinnian's face. Even though his thin lips were slightly raised, it was like a spring breeze had suddenly come, melting the ice on his face.

Li Jinnian, when he wasn't smiling, had a majestic aura that made people respect him. However, once he smiled, the spring breeze would spread and peach blossoms would bloom around him. Even his cold eyes seemed to be covered with flowers, so handsome that it made people blush.

"Do you want to escape?" Li Jinnian held Ye Jian's left hand and asked in a low voice. Unfortunately, the water and the mask blocked their voices so Ye Jian couldn't hear him.

"You either fight or die in underwater combat. There's no such thing as escaping."

Knowing that she couldn't hear what he said, Li Jinnian used his actions to tell Ye Jian that there was no other choice but to accept the challenge!

The defense turned into an attack. The roles of both sides changed. Li Jinnian, the underwater Demon King, directly pressed Ye Jian onto the fishing net. At the same time, he stretched out his right hand and attacked Ye Jian's breathing tube.

When Ye Jian saw this, she released her left hand that was holding the dagger. Then, she quickly attacked with her right hand and snatched the dagger back. Her actions were so fast that even Li Jinnian was surprised!

What a bold female soldier! He was already facing her but she still dared to release the dagger. Wasn't she afraid that the dagger would land in his hands?

Ye Jian had her own judgment when she dared to let go of the dagger. After crossing hands with him a few times, she only dared to let go after knowing her limits.

Trapped in the net, Ye Jian moved her legs vigorously to move her body up a little. As she used one hand to block Li Jinnian, she used her sharp blade to cut the net behind her. With a turn of her body, she managed to escape from Li Jinnian's ferocious attack.

In the water, the broken fishing net shook slightly. Ye Jian didn't leave after she broke free from the net. Instead, she took the initiative to attack.

There was a certain level of difficulty in moving backwards, towards, and sideways. Since they were already facing each other, Ye Jian chose to attack head-on without any hesitation. Even if her actions were restricted, she still had to fight to the end!

"Ye Jian lasted for five minutes!" Big Whale stared intently at Ye Jian's defensive moves. He was still excited even though she was forced into the net. Demon King Li's moves were all lethal, but Ye Jian was able to block them. Her true abilities are revealed!

The navy commander nodded lightly. The admiration in his eyes got stronger. "She was able to last for more than five minutes against Li Jinnian. Old Yang, you should continue sending her here for training next time."

### **Chapter 1299: Fight It Out, Bear Hug**

"I'm relieved to hear that." Major General Yang smiled. His gaze was on Ye Jian's every move. His expression was slightly serious.

Big Whale was keeping an eye on the time and Ye Jian's defensive moves. He heaved a sigh of relief when he saw that she didn't play any tricks and was using practical approaches to defend.

Every move she made was effective. When she found an opportunity to attack, she would immediately attack the important points without any hesitation. This female soldier is a person who can accomplish great things!

The obstruction from the water severely affected Ye Jian's speed. Facing Li Jinnian's attacks, Ye Jian used simple and practical attacks... She could only attack while defending.

Li Jinnian had a taste of Ye Jian's speed. With a dark look in his eyes, he didn't slow down his attack speed anymore. Instead, he attacked at his usual speed.

Facing the underwater Demon King's attack, Ye Jian's reaction speed reached its peak. She even used her flippers to protect her mask and breathing tube.

Two figures were entangled in the water and bubbles kept rising. Ye Jian hugged Li Jinnian's upper body tightly from the front. She trapped his hands and used her mouth to bite his mask's breathing pipe...

Fight!

Fight!

She could only give it her all and fight!

She had already used the tactics "catching him off guard with a surprise attack" and "preemptive strike". She had also did countersurveillance using the geography and concealed herself using the obstacles... She had used all the moves she could think of but they were all neutralized by him. Since she couldn't win and there was no hope of escaping, she could only fight it out!

The two of them were stuck together. Li Jinnian, who was shocked by Ye Jian's strength, didn't know whether to laugh or cry. She hugged his upper body and wrapped her legs around his right leg like a koala.

Ye Jian knew that she wouldn't be able to escape and she wouldn't be able to beat Li Jinnian. Hence, she decided to take him down with her.

At the end of the day, her professional skills were still lacking. She didn't know how to fight underwater so every move she made was suppressed by Demon King Li.

Li Jinnian, who was tied up on one leg, gave a signal to end the fight.

Ye Jian's breathing tube was pulled off by Li Jinnian. Bubbles immediately appeared in the water. Having lost her oxygen, Ye Jian's face turned red. In the next second, a pair of strong arms grabbed her shoulders. The backup breathing tube was put back into the mask. The oxygen that was used to maintain her life returned to the mask.

"Go up." Li Jinnian made a hand gesture. They weren't entangled anymore. He started swimming up.

In front of the surveillance screen, Big Whale was laughing so hard that his shoulders were twitching. As his commander and the major general of the army were present, he could only suppress his laughter. He was holding it in until his eyes were filled with tears.

Demon King Li got stunned for three seconds by Ye Jian's bear hug!

She hugged his upper body and wrapped his leg... This must be the first time the single major had such intimate contact with a woman! Was his face red?

Hahaha, it's probably a little red!

The major general of the army was smiling too. This Little Ye. She definitely thought that she would "die" together with him at the end. She couldn't win against him and she couldn't escape. She hugged Li Jinnian with the intention of fighting to the death.

This move... What move is it?

"Did she break any rules?" The major general wasn't concerned about winning or losing. He was concerned about the rules that should be followed during training.

### **Chapter 1300: This Is a Little Awkward**

The smile on the navy commander's face was a little deep. He was also amused by Ye Jian's last 'bear hug'. "It's not against the rules, but it's not worth it. We don't recommend the frogmen to die with their enemies. As long as they can persevere physically, there's still a chance to counterattack. However, they must fight with the determination to win."

"Frogmen fight with a strategy that persists in quick judgment, quick reaction, and quick action. Ye Jian did it all in the beginning. Later, when Li Jinnian retaliated, she was able to escape from the net despite the huge disparity in strength. After more than a month of training, there were results!"

The major general had a serious look on his face. Mutual destruction was not suitable for modern warfare, especially for talents like Ye Jian. If she sacrificed herself, it would be a huge loss for the country!

“Stop bluffing. It’s already impressive that Ye Jian can last for 12 minutes against Li Jinnian! Also, this time, it’s to test her underwater combat results after a month. It’s not a comprehensive result. The requirements can’t be too high.”

“Real underwater tactic isn’t just two people fighting underwater and the battle ends once the victor is decided. Reconnaissance frogmen will use underwater sonars and sensors to determine the general position and direction of the enemy frogmen. When the enemy enters the water, we will wait for the enemy from the back or the side. Once the enemy enters our attack range, we will use underwater guns to kill them directly. It’s rare for us to fight face to face.”

Ye Jian and Li Jinnian broke through the water surface one after another. The navy commander made an inviting gesture and left the control room with the major general. As the commander, he was very satisfied with Ye Jian’s results!

“Her training period is too short. For us frogmen, a month is like a kindergarten child entering school. Although there’s a bit of foundation, it’s still far from being qualified.”

The navy commander retracted the smile on his face and said in a deep and stern voice, “The Special Operations Frogmen became an important military unit in various countries since World War II. Our country started late but we invested a lot of money and resources into the development and training of the frogmen.”

“As wars become more informative, the anti-frogmen warfare has become more advanced, and the chances of them fighting underwater aren’t very high. Even so, to improve the frogmen’s survivability and combat ability, underwater combat training is essential.”

“Ye Jian is not bad. She has mastered the essentials of underwater combat. However, she still needs to be skilled in tactics. If you send her to my side during the winter vacation, she will definitely improve.”

Major General Yang nodded slightly. He pondered for a moment before asking, “Do you think she can participate in the competition against the American Special Forces next year? We had the intention of letting her participate when we sent her to your military unit for training.”

They even arranged for her to participate in such an important overseas competition? The navy commander couldn’t hide his surprise.

“That’s what we plan to do. That’s why, even if you didn’t tell me about her training during the winter vacation, I would have discussed it with you.” It was noon. The sun was scorching their skin. The major general walked in the sunlight. The golden epaulet on his shoulder shone with a cold golden light. It showed the might of a major general. “This year’s winter vacation, next year’s two-month summer vacation, and following the competition in September. We will train her for about half a year.”

The navy commander had no objections to this. He had no right to interfere with the army's arrangements. "I can cooperate with the army's arrangements and let Ye Jian return to the army for training at any time. However, it's intermittent training. Once she starts, she might have to work several times harder than the other frogmen."
