

BOOT CAMP 1581

### **Chapter 1581: Work Together, Scary Together**

Li Jinnian's codename was 'Demon King'. He was good at long-range and short-range combat. His various skills were outstanding. He was especially good at commanding. His goal was to annihilate the enemy. His combat style was tough. He didn't give the enemy any chance to retaliate.

This Li Jinnian left a deep impression on Ye Jian once again.

Moreover, Demon King Li's rigorousness exceeded her imagination. Because there was no combat map, although the scout had scouted out the abandoned building in front, the surrounding environment was not carefully surveyed. To make more detailed arrangements, he ordered two scouts to quickly understand the terrain around the entire building.

They needed to take down the building fast. It was already 8:17 AM!

Now that he knew about the mission target, Li Jinnian wasn't in a hurry to move. He went through the deployments in his mind and explained them one by one.

He was the commander of the combat competition. Only by making preparations in advance could he confirm everyone's mission. Li Jinnian's motto was "Don't fight a battle that you're not confident of winning."

The Water Ghosts weren't anxious. They waited patiently for the news from the front. Ye Jian had always been patient. As she waited quietly, she leaned against the rock with her gun on her back and closed her eyes to rest.

The rain was so heavy, but she was still able to calm down. Li Jinnian couldn't help but look at her a few more times. There was a faint darkness in his cold eyes.

Azure Bird was good at enduring hardships. She was stronger and more resilient than he thought. She was an outstanding female soldier.

He didn't look at her for too long. After taking a few more glances, Li Jinnian looked away and contacted the other team members who were fighting outside.

"Demon King, one of our brothers died. Two members of the Snow Region Brigade died and one was bitten to death. Both sides didn't show up easily." Big Shark reported the situation of their peripheral combat. Just like Xia Jinyuan, Li Jinnian wouldn't gather all his team members and split a team to wipe out the 'smoke bomb' team that Xia Jinyuan released.

Li Jinnian received Big Shark's report, and so did Xia Jinyuan. So far, one more person has died on both sides.

The strength of the two teams was already quite strong. Now, they were only one person short of 'death'. The major general of the army and the navy commander discussed and analyzed the situation at

the same time. In addition, there were other generals who analyzed the situation. The initial estimate was that the Storm Commando Brigade had a chance of winning, but the price they had to pay would be huge.

The Storm Commando Brigade would win because they were familiar with fighting in such a storm. They could make a favorable judgment based on their experience.

The Snow Region Brigade was tenacious and had a lot of combat experience. Although they were at sea, they were down-to-earth. To them, this was no different from a mountain battle. The only thing they weren't as familiar with was the environment of the island.

"In the future, we should only have this kind of competition once a year. Only then can we work together." The major general of the army was sincere and pointed out their shortcomings. "All this while, we have never placed our combat targets on the sea and focused on land combat. This is a huge taboo!"

When he went back, he would ask the military for a sum of money for the Snow Region Brigade for combat training.

The navy commander nodded and expressed his agreement. He said earnestly, "You're right. This kind of competition can only happen once a year. It won't blind you. You can keep discovering new problems and improve continuously."

### **Chapter 1582: A Female Soldier Who Can Be A Major**

Why did they need to prepare, practice, and fight?

Firstly, they were afraid that if peace lasted for too long, the bloodlust of a soldier would disappear. They would think that they were a real soldier after going to the training ground. Secondly, they needed to innovate and improve constantly. They needed to discover new problems and improve their combat ability continuously.

As the saying goes, 'If you want to fight, you will die. If you don't fight, you will be in danger.' If you don't fight, you won't practice. If you don't use your soldiers to fight, you will only guard your own field every day. Those were all just for show. If someone else fired a shot, they would be wiped out.

Soldiers were the guardian deities of a country. If even their guardian deities became weak, the country would be destroyed.

A special forces soldier was the sharpest knife in the country. It was a sword that could turn the tide at a critical moment. There was no need for other countries to fire a shot at them. They would just be courting death.

After seeing the shortcomings of each other's team, the two senior generals understood what kind of targeted training they would need in the future.

The situation on the screen changed. Group B ambushed one of Group A's members. Then, Group A entered Group B's defensive area and launched a sneak attack. No one could gain an advantage.

The scout from the Storm Commando Brigade brought back news. Li Jinnian's deployment was even more careful. "There are five areas. Three groups will be responsible for clearing their own areas."

The building was in the shape of a '7'. The front, back, and middle sections were arranged in one group. One group was at the back while the other was to block the retreat path. The Demon King's ruthlessness could be seen from his tactics.

This was a ruthless and calm man who was on par with Major Xia.

Ye Jian listened attentively until Li Jinnian pointed at her. "Azure Bird and I will enter the range of the target first. I will scout, and you will complete your breakthrough."

"Okay!" Ye Jian nodded. This time, she wasn't the only sniper. There was another sniper who went around the back of the building to intercept them. Demon King Li's plan was very clear. He would press everyone into a 'trap' and hit them until there was no one or no bullets left.

J5 heard this, and his expression turned serious. The Demon King was so stable that no one could find any flaws!

He was a little worried for his comrades from the Snow Region Brigade. It was exciting to meet such an opponent... Unfortunately, he was captured. He didn't know what would happen to him.

With a thorough plan, there was no need to wait anymore. They dragged J5 through the dense rain and headed towards their destination.

The rain didn't show any signs of stopping. Figures started approaching the abandoned building like ghosts from the island. Ye Jian and Li Jinnian were faster than the other members. The two of them covered each other and braved the heavy rain to get within a thousand meters of their target.

Using the binoculars disguised as leaves, he carefully observed the building less than a kilometer away. After observing, Li Jinnian bent down and asked Ye Jian to squat down.

His slender fingers, which were wearing combat gloves, split into different areas on the ground. He pointed at one of the areas and said, "This is their path of retreat. This is the breakthrough point. You are in charge of tearing it apart. Look at their terrain."

Ye Jian took the binoculars from him. After observing the terrain, she pointed at the area she was in charge of. "I'm hiding here. It will be a turning point when the two sides exchange fire. I can attack and cover."

### **Chapter 1583: Straightening Up**

The environment on the island was complicated and heavy. It provided her with a lot of hiding places. This place could be used to attack and defend. It was also convenient for her to change her position quickly.

Li Jinnian thought highly of this point too. When he saw her pointing it out, a hint of admiration appeared in his cold eyes. "Okay, I'll wait for your news."

At ten o'clock sharp, the members of the Storm Commando Brigade were all out for battle. Ye Jian didn't approach them. She was fighting alone and carrying out a sniper mission. Hence, while keeping in contact with the Water Ghosts, she arrived at the location she had agreed on with Li Jinnian.

This was a sniping spot that could be used to attack and provide cover for the team members. The field of vision was quite wide too.

"Sniper, Azure Bird, in position. Over." Ye Jian sent her coordinates and aimed the barrel at the bottom of the building. She waited for the Water Ghosts to come and complete the battle.

The comrades in charge of reconnaissance discovered the situation and reported that the Water Ghosts of the Storm Commando Brigade were approaching them. Xia Jinyuan immediately said to Sparrowhawk and Kite, "The two of you will cooperate with G3 to attack the periphery!"

There were previously six comrades moving around the periphery. In the end, only G3 was left. With Sparrowhawk and Kite, who were good at assault and shooting, Xia Jinyuan was very calm.

The flames of war between the two Special Forces were fully ignited. The Water Ghosts infiltrated the building, and both teams started killing each other. Ye Jian opened fire faster and aimed to complete Li Jinnian's mission.

The large screen in the command room displayed the entire battle. The technicians analyzed all the data so that the high-ranking officers in the command room could understand it in time and send the data to the military.

In the military, Lieutenant General Xia placed his hands on the conference table and stared at the data on the screen.

There were not many generals in the conference room. Besides the three high-ranking generals in military uniforms, the Commander that Ye Jian used to accompany was among them.

Sitting beside the Head was a casual and dignified leader. This was the highest-ranking leader of the country. He placed great importance on the confrontation between the two teams. He arrived at the military headquarters early to watch it.

"The two teams are very good at combat. However, Group B is obviously more used to fighting at sea and can accurately find their vital points. Group A's counterattack is strong. Not bad. To be able to remain so calm in other people's territory, their combat ability must be outstanding."

The highest-ranking official of the country gave a very high evaluation of this confrontation. Although he was serious the entire time, his gaze was very gentle. The invisible pressure was still present, but it could be seen that the highest-ranking official was satisfied with this day's confrontation.

When the highest-ranking official saw the last scene, he couldn't help but point at the screen. He asked Commander Xia with uncertainty, "Lieutenant general, this soldier is a female soldier, right?"

"Yes, this is a cadet from the Chinese Academy of Sciences. She's currently in her first year of university. Her code name for this mission is Azure Bird," Commander Xia replied calmly. "She's quite an outstanding female soldier. If nothing goes wrong, she will become the only female soldier who will be participating overseas next year."

Ye Jian was outstanding. She was even more outstanding than his shameless son. He wasn't the only one who saw her excellence. Everyone present saw it too. Ye Jian was worthy of praise!

An orphan; a child with no roots. Since she was so outstanding, he would give her a good wind.. He hoped that she could rise up.

### **Chapter 1584: The Grief Of Blood And Tears**

Ye Jian's strong and fearless figure appeared on the screen. When the Storm Commando Brigade broke through the defense line of the Snow Region Brigade, Ye Jian changed her sniper rifle to an assault rifle.

In the dense rain, as the raindrops hit her body painfully, her entire body got so cold that her blood seemed to have frozen. Even then, she could still aim at her target and protect her comrades as they attacked.

That was the place where her comrades charged into battle and disregarded their lives. Some people died there. She stepped on their bodies and went ahead. She saw the cruelty of war and the sorrow of blood and tears.

The sound of bullets hitting the ground came from the rain. The signaler that represented death made a long and hurried 'beep' sound. Ye Jian's expression turned colder and colder.

This was a match, but it was also a war!

Her bullets were meant to protect her comrades' lives. Her mission was to protect her comrades' lives!

Why was she here?

Because she was a soldier! She carried the mission of a soldier. The sacred mission of fighting to protect her country!

Her country has already risen. And behind its rise, there is a strong military force. There are new weapons appearing and thousands of soldiers protecting the country. She is a soldier who fights for the glory of her country!

At this moment, Ye Jian was like an unsheathed sword. She was invincible!

In the end, not many members of the Storm Commando Brigade entered the three-story building. There were only eight people.

However, the Snow Region Brigade wasn't any better. Xia Jinyuan and Li Jinnian were ruthless soldiers. Even though their combat area was only three stories high, the Storm Commando Brigade couldn't go up another level. The Snow Region Brigade couldn't go up or down either.

When they went up, it was an open-air roof. There was Ye Jian, the sniper, suppressing them outside. Below, the Water Ghosts of the Storm Commando Brigade appeared and disappeared mysteriously. If they were cold, they would be shot.

"Azure Bird has powerful firepower. It's a lethal suppression. Aim at her! It's good to release a stray bullet too!" Ye Jian suppressed the Snow Region Brigade twice. They couldn't rush out.

Snipers had terrifying abilities. They could cause serious and far-reaching damage to a small or large-scale formation or the entire military area. They could severely injure a unit and sometimes destroy an elite unit.

This was definitely not an exaggeration. It was an indisputable fact.

"Her amazing sniping skills can even match an armored vehicle! It looks like she didn't use all her abilities the last time we worked together," K7 said in a low voice. He almost got hit too. If Q King didn't pull him, he would have died.

The member of the Snow Region Brigade with the codename 'Long Eagle' pressed his back against the mottled wall. He raised his assault rifle and scanned the area outside. Then, he quickly came back and squatted on guard. He said to K7, "If we don't kill the sniper outside, we won't be able to escape! Not to mention an armored vehicle, just her accuracy alone is enough to shoot a sieve through large-scale equipment!"

Another member of the Snow Region Brigade finished suppressing his firepower. He wiped the rainwater off his face and said in a low voice, "It's hard. She's still hiding."

She fired so many shots that no one knew where she was hiding. This ability was enough to scare people.

### **Chapter 1585: Too Satisfying**

When they said that a sniper could destroy even an armored machine, they were not describing how powerful the other party was.

If a sniper were up against an armored vehicle, such as a tank, a land overlord, those who didn't know would think that the sniper wouldn't be able to win the tank.

That would be a huge mistake.

The tanks nowadays relied on computers and optical instruments. To snipers, these were suitable targets. As long as a sniper targeted them, the tanks would be destroyed.

Uncle Chen became the 'ace soldier' of his era because of his amazing sniping skills. Before he retired, he groomed a batch of outstanding snipers too. Unfortunately, he retired in a hurry and left too many regrets.

Fortunately, his regrets didn't last forever. He groomed Ye Jian to be outstanding.

Even though Ye Jian was very young now, with Uncle Chen's guidance and her hard work, her sniping skills had reached the point where no matter how good the other party's concealment was, she could hide while lying down and kill the other party with one shot.

This was Ye Jian's ability. No one in the entire Snow Region Brigade could surpass her.

The moment she held the gun, she could feel the reaction of the bullet when it was pulled. The four-dimensional image of the gun appeared in her mind. Not everyone had such a talent.

If Ye Jian were to face small and large formations alone, she would have no problems.

Xia Jinyuan listened to his comrades and felt proud. Little Fox, I said that you would become an outstanding soldier. Look, you haven't joined the Snow Region Brigade yet, but my comrades are already full of praise for you!

Wiping away the rainwater on his face, his eyes were filled with the wildness of a wolf. He looked at the time and said to K7, "There are still five minutes before the time. Don't even think about winning, but fight to your heart's content! Fight Demon King Li again, and fight to your heart's content!"

It was too satisfying. It was so satisfying to meet a strong opponent to kill!

K7, who was always expressionless, had a carefree expression on his face. He nodded and replied, "There are still four more days. I'm even more excited! I look forward to fighting with Azure Bird. It's fun!"

This time, it was different from the continuous competition. As long as they died, they wouldn't be able to return to the battlefield. It was a competition that was split into stages and subjects. The members who died on the first day would return to the team the next day to complete the next competition. That was why K7 said that it was better later.

When the highest-ranking officer that the military had been observing saw this, he opened his mouth again. "She has a righteous aura and a fearless spirit. The Chinese Academy of Sciences has always been the cradle for grooming our country's new generation of officers. This female soldier didn't embarrass the school but brought honor to the school!"

The highest-ranking official didn't know that Ye Jian had carried out a mission before.

However, he admired Ye Jian's state of mind. She didn't treat this match as a competition. Instead, she treated it as a battlefield filled with smoke and flames of war. Every bullet she fired was to protect her comrades, and the leaders of the country behind her.

She was a female freshman soldier from the National University of Defense Technology, codenamed 'Azure Bird.' Not bad!

The navy commander called Ye Jian and told her personally, "Azure Bird, the highest-ranking official of the country has given a very high evaluation of your combat skills. He has also said that all female soldiers should take you as their role model!"

### **Chapter 1586: Demon King Wants to Snatch People**

Just like what the senior generals had predicted, the Storm Commando Brigade won completely. There was still 41 seconds before the time was over

However, it was just as the generals had expected. Although they won, it was a tragic victory.

The Snow Region Brigade was a pack of wolves from the depths of the Snow Region. They had a strong and unbreakable rapport, absolute obedience, and even a unified combat. They were determined to bite the other party to death and not let go. Maritime warfare was their weakness. If it was mountains, forests, highlands, plains, and deserts, the Storm Commando Brigade would have a hard time winning.

Of course, it wasn't that the Storm Commando Brigade couldn't do it. They were formed last June and were able to fight with the Snow Region Brigade for a few hours under Demon King Li's lead. The fact that they were able to win in the end proved how successful Demon King Li's training was.

If they had been established a few years earlier, the match today would have been more exciting.

Ye Jian, who was on the phone with the navy commander, stood up straight when she heard this. Her clothes were so wet that not a single spot was dry. She was definitely excited when she heard the highest praise from the country. However, her voice was still calm as she replied calmly, "This is what I should do because I'm a soldier."

"Very good!" The navy commander praised and admired Ye Jian even more.

When the navy commander found out that someone was secretly targeting Ye Jian, he took off his military cap and placed it on the table. He stood up and said coldly, "If she violates any military rules, I will take off my military uniform!"

He trusted Ye Jian.

Ye Jian never lost her cool when she was praised. Everyone here was so outstanding. Why did they only praise her?

There was another reason. She was the only female soldier in both teams.

This identity was enough for the highest-ranking leader of the country to pay more attention to her. In addition, she was a little fierce in the last half an hour. Naturally, the highest-ranking leader paid more attention to her and praised her.

She was not the only one who received praise and glory. She belonged to everyone!

"The tent is set up. Go and change your clothes." Li Jinnian walked over and reminded her calmly. His expression was still the same as before. Even the way he looked at Ye Jian was the same as before.

After talking to the navy commander, they helped her to set up her tent. Ye Jian smiled. "Thank you."

"You're welcome," Li Jinnian replied. As he looked at the female soldier walking closer, a faint smile flashed past his dark and cold eyes. When she walked closer, he said calmly, "Today was exciting. We'll continue tomorrow."

Ye Jian was really surprised when she heard the Demon King, who never complimented anyone, praising her. Fortunately, she reacted quickly and replied calmly, "My comrades cooperated well. That's why I have the firepower. If not, I won't be able to achieve results."

"Yes, but you're really good. You're good at sniping." Li Jinnian suppressed the awkwardness in his heart and tried his best not to let the topic drop.

He had no choice. He was now carrying a huge responsibility. The commander secretly ordered that no matter what method he used... he needed to try to make Azure Bird join the Storm Commando Brigade.

He received this order ten minutes ago.

### **Chapter 1587: A Flower in the Army**

Li Jinnian wasn't surprised when he received the commander's secret order. The vice-captain, Big Shark, had hinted to him several times and mentioned it to the commander at the same time.

As for himself, he would be hypocritical if he said that he didn't want Ye Jian to join the team.

How could he remain indifferent when such an outstanding soldier was standing in front of him? He also wanted Ye Jian to join the Storm Commando Brigade.

But some things can't be achieved just by thinking.

Ye Jian was not an ordinary soldier. She was a female soldier sent by the army to study in the navy. She was a seedling carefully groomed. The direction she was being grooming was as a 'special forces soldier.' This was not completed overnight. It started when she was 14 years old.

The commander wanted him to convince her to join the navy. Li Jinnian felt that this was harder than fighting with Xia Jinyuan.

Recalling the conversation he had with the commander ten minutes ago, Li Jinnian couldn't help but raise his hand to rub his forehead. How should he tell Ye Jian?

"Jinnian, I think that Ye Jian is a good female soldier. She has the ability, qualifications, and looks... Do you think that her looks are ordinary? She would be a flower in the military!"

"How can we miss such a good soldier? We must try our best to win her over."

At that time, the commander's voice was very low. It was obvious that he purposely took a few minutes to contact him while carrying the high-ranking commander of the army who was watching the battle.

Hence, the more he spoke, the lower his voice got. He seemed to be afraid that other people would hear him.

“In the past, I knew that she was powerful. However, I thought that no matter how powerful she was, she was still a female soldier. It’s the same if we recruit a few more powerful male soldiers. But now, I have to say that I thought too simply of Ye Jian. How is she so impressive? She’s going to soar into the sky!”

That was what he said at that time. “If she wasn’t powerful, the army wouldn’t have sent Q King over personally. If she wasn’t powerful, the army wouldn’t have spent so much effort to groom her.”

“That’s right! That’s why we need to keep her!”

The commander’s tone at that time made him speechless. Because Ye Jian was outstanding, he wanted to keep her... It sounded right. It was easy to understand.

Before he could open his mouth, the commander lowered his voice and said, “Talent. We are not afraid of having too many people in our team. The moment the Snow Region Brigade attacked, they shocked the few of us who were watching the battle.”

“It’s true that the army sent her. However, Ye Jian is still a cadet. We haven’t decided which unit she will be assigned to. That’s why we need to act first. We can’t wait for the other army units to join in the fun.”

After listening to this, he understood something. He asked the commander, “You mean that... someone will come and snatch her from us. There aren’t many of us?”

Li Jinnian didn’t know that when the navy commander heard him say this, he heaved a sigh of relief. He finally understood what he meant!

That was what he meant.

At this point, Li Jinnian wasn’t as embarrassed as he was now. When he saw that he could hang up the call after he finished speaking, the commander whispered to him, “I just mentioned Ye Jian’s appearance. I feel that you’re not bad either. Why don’t you use a honey trap?”

“Your vice-captain, Big Shark, mentioned it to me implicitly before. At that time, I felt that it was ridiculous. Now that I think about it, it seems like it’s all right. You are both unmarried. It’s a good thing that you two can be together.”

After Big Shark, someone else wanted to matchmake him and Ye Jian.

### **Chapter 1588: Sacrifice ‘Male Sex’**

He didn’t have any thoughts, but people kept mentioning it to him. Could it be that in their eyes, he was already old enough to need help to marry?

Whether he wanted to find a girlfriend or not, he would have to see if she was willing to accept him.

Also, Li Jinnian glanced at the female soldier who was able to keep up with him. After all, he was influenced by the commander. For some reason, he couldn't help but look at her again. Li Jinnian, who had never liked a woman before, suddenly felt that... she was indeed very... beautiful.

Major Li Jinnian, who was indifferent to women, finally couldn't go against his true thoughts. This was the first time he complimented a girl in his heart.

She was beautiful. She did not have a strikingly beautiful face, but it wasn't plain either.

Ye Jian's beauty combined the two. When she was in combat, she was as beautiful as a peony. When she bloomed, she was famous in the capital city. When she was quiet, she was like a lotus flower that grew in the vast blue waves. She didn't compete with the world. She was so beautiful that people could see it right away.

When she smiled, she was like a stream hidden in a mountain stream. She was gentle and virtuous. Even when you looked at her smile, you would feel comfortable. You couldn't tell that she was a sniper who could take care of everything by herself. When she smiled, she wasn't aggressive at all. Only the faint and elegant look on her face could give hints that she was a tough girl.

Ye Jian could tell that Li Jinnian was looking for a topic to chat with her. Hence, she smiled and responded to everything he said. She maintained her manners.

They were still a distance away from the camp. Seeing Demon King Li, who didn't like to talk much, was about to run out of topics to talk about, Ye Jian naturally asked, "Demon King, my codename was 'Golden Phoenix,' why did it change to 'Azure Bird' the next day?"

She kept wanting to ask, but she didn't have the chance. The two teams were training all the time. When they had the time, they would gather around and start talking about training and skills. They didn't have the time to talk about things that had nothing to do with the competition.

This time, if she didn't want the atmosphere to turn cold, she should ask.

Li Jinnian didn't hide it. He replied, "Q King said that there are many codenames like 'Golden Phoenix' in the military unit. It's very vulgar and unpleasant. He was the one who named you 'Azure Bird.' It's indeed better than 'Golden Phoenix.'"

Azure Bird, the predecessor of the Phoenix. It could be seen how high Xia Jinyuan's expectations for Ye Jian were.

He didn't tell the commander that Ye Jian and Xia Jinyuan seemed to have a special relationship.

However, this was other people's personal matters. As long as it didn't affect their training, he wouldn't care about it. He wasn't interested in it either.

No matter how beautiful Ye Jian was, he had to keep his distance. He didn't want people to misunderstand and cause unnecessary trouble.

Li Jinnian was a mature and introverted man. He had always analyzed things thoroughly and was an outstanding soldier who had his own set of principles and bottom line. Since he had a vague feeling that Ye Jian and Xia Jinyuan's relationship was not normal, he wouldn't do anything.

Even if he did admire Ye Jian, he had to stay in the 'comrades admire their comrades' framework and not take another step forward!

Ye Jian understood where her codename came from. She pursed her lips and smiled. So it was Major Xia who gave it to her.

However, 'Azure Bird' sounded better than 'Golden Phoenix'. Although she didn't care about these things, it was good to have an elegant codename.

### **Chapter 1589: Leave No One Behind**

Knowing that he was someone who could joke, Ye Jian smiled and said, "Azure Bird is indeed better than Golden Phoenix. It's more elegant. Demon King, did you name the team?"

They all had simple names related to fish.

"Yes, it's easy to remember." Thinking of this codename, a smile flashed past Li Jinnian's eyes. Last year, when they formed a team, everyone needed to have a codename. Coincidentally, when they were diving, they caught a lobster. The team member who caught the shrimp was called 'Big Prawn.'

Big Shark replied, "Codename Big Prawn? Then my codename is Big Shark." The entire team's codename came from there.

After listening to the process of taking the 'codename,' Ye Jian smiled until her white teeth were revealed. "It's indeed easy to remember. As long as I shout according to the sea creatures, someone will come out and answer me."

Li Jinnian could hear the teasing in her laughter, but he didn't take it to heart.

The codename of their team was worse than the codename of the members of the Snow Region Brigade. It was easy to remember. It didn't matter if it was bad.

In front of them was the mountain camp that they arrived at tonight. Li Jinnian saw that her shoulders seemed to be trembling and quickened his pace. "Change your clothes and come to my side to discuss the confrontation tomorrow and the next two days. There's not much time. Hurry up."

At five o'clock, the transport plane would send them here from the island. This was the venue of the competition two days after tomorrow. It was a mountain that was three hours away from the Hai Province.

The command center calculated the time very precisely because they needed to avoid being seen. Everything could only be done in the dark. The darkness was the best cover. Hence, once the wind and

waves stopped, they immediately sent their planes to the island. It was almost 9:00 PM when they reached the mountains.

Although the competition only lasted for five days, there were three points: the sea, the mountains, and the highlands. The training that followed was focused on the highlands, plains, mountains, and dense forests. Li Jinnian would lead the Storm Commando Brigade for the special training.

This was what the Water Ghosts hoped for. This was the kind of training they needed.

“We have already received the order?” Ye Jian’s eyes lit up when she heard about the confrontation tomorrow and the day after. “Our two teams didn’t camp together tonight. No one knows where the other party is. How are we going to start?”

After thinking about what the navy commander said, Li Jinnian felt awkward. Now, he was calm and replied calmly, “Our next mission is ‘hunting’.”

“Hunting” meant killing the members of both sides within two days without leaving a single one alive.

While Ye Jian was talking to the navy commander, Li Jinnian received an order and instructions from the major general.

They still had many missions to complete during the hunt. They were all obstacles. Only by completing these missions and killing the other party’s members could the competition be considered as ‘hunting.’

After summarizing the mission to Ye Jian, he added, “The exact time hasn’t been given. So, the confrontation between tomorrow and the next two days might start tonight. We need to discuss it before we fall asleep.”

“Okay, I’ll change my clothes and come over immediately!” Without any delay, Ye Jian quickened her pace.

It was a little cold. She had been in the wind and rain for the entire day. She finally managed to dry her combat uniform a little after four hours on the transport plane. However, when she came down from the mountains, she met a cold rain again. Her combat uniform got wet again.

It was a little cold. Autumn had started in the mountains. The temperature at night was 20 degrees fahrenheit.. Even Ye Jian, who had a good physique, felt a little cold.

### **Chapter 1590: I Want to Be the First to Experience**

“Hunting” was the longest mission in this competition. When Ye Jian saw the arrangements inside, she couldn’t help but purse her lips. The difficulty was even higher than before. It looked like a mission, but it wasn’t.

This confrontation was split into three small missions, each more difficult than the last.

This time, they needed to carry 25 kilograms of combat equipment. They needed to complete the hostage targets, search and fire, support shooting, and 100 rounds of precision shooting at a limit of 300

meters. Ye Jian pursed her lips because she had completed before on a 300 meters limit distance of 100 rounds of precision shooting.

“Everyone needs to complete the 300-meter rifle with 100 bullets at a time limit. In the middle, they need to pass through four obstacles.” Li Jinnian emphasized the time limit of 100 bullets to shoot accurately. This was the strength of the Storm Commando Brigade and the Snow Region Brigade. The difficulty was that they needed to change their guns and their targets.

Li Jinnian looked at Ye Jian. “Which partner do you choose?”

Switching guns midway meant that one of the team members would quickly change their magazine and pass the gun in their hand to their partner after firing 50 rounds. Their partner would need to fire 50 rounds before they could complete the change of gun and switch targets.

This training required both of them to cooperate well and know how many bullets were fired.

Also, both sides must shoot at the same time. Only when the other side changed their magazines would they need to slightly control their shooting speed. This was the only way they could load their magazines properly. They had to complete 50 rounds of shooting. The time between the two sides was enough for them to switch guns.

Why did Li Jinnian ask Ye Jian first? It was mainly because she didn’t have much time to train with them. She could choose someone who can cooperate well with ther.

“Demon King, it’s best if you partner with Azure Bird.” Big Shark, who had a band-aid pasted on his face, suggested.

There was no problem with Ye Jian, but she didn’t know if there was a problem with Demon King Li.

“Sure.” Li Jinnian nodded. The rest of the team members had their own tacit partners. There was no need for him to arrange them one by one. They could discuss among themselves. He glanced at Ye Jian calmly and continued the topic. “Search, hostage, and support shots are completed in two groups. I will be in charge of one group while Big Shark will be in charge of the other group.”

As for Ye Jian, she was naturally arranged to be in Li Jinnian’s team.

Since they needed to march tomorrow and the next two days, and there was a continuous confrontation on the fourth and fifth days, the two teams had to complete their arrangements according to the four-day competition.

It was late at night. None of the members of the two teams fell asleep. They gathered together and discussed the battle tactics for the next four days.

Xia Jinyuan pointed at the last round of the sniper team competition and said coldly, “It’s a one-way cycle. Every member of our team needs to fight with every member of the Storm Commando Brigade. Our teams have the same number of people, which means that each person needs to shoot 21 rounds at once.”

“The same goes for Azure Bird. She needs to have a showdown with all of you. Those who haven’t seen her sniping before, take a good look at how she completes her sniping. It’s a beautiful sniping skill. If you can’t learn it, just take a look.”

Long Eagle said, “I want to be the first to experience it.”
