

BOOT CAMP 1651

Chapter 1651: A Brilliant Decision

Demon King Li was different. He focused on the ultimate destructive combat. He didn't alert anyone as he finally created a 'huge explosion.' By the time the enemy reacted, it was too late. He had already completed his mission and was preparing to clear the area.

However, they needed to conserve their forces. They needed to use their best energy to 'kill' the members of the Snow Region Brigade. They couldn't waste their energy.

There was nothing they could do. The Storm Commando Brigade focused on underwater training and so were their missions. Facing such a snowstorm, the Storm Commando Brigade was still unable to fight against the environment like the Snow Region Brigade.

This competition was enough to let the members of the Storm Commando Brigade and the navy commander see the gap between them and the Snow Region Brigade.

Although they were not as good as them, to be able to compete evenly against such a powerful Special Forces unit that could fight against an entire army was definitely a helpful accumulation of experience and a direction in the future.

The wind started blowing again. Although it wasn't as strong as in the afternoon, the temperature at night was dropping fast. When it blew, it felt like her heart was frozen.

Ye Jian followed Principal Chen to the Snow Region Plateau and had already undergone cold-resistant training. Thus, although she felt cold, it didn't affect her.

Two members of the Storm Commando Brigade were already suffering from frostbite on their ears and limbs. Every step they took was painful and itchy. It was an extraordinarily uncomfortable feeling, like a group of ants gnawing on them.

The members of the Snow Region Brigade had the advantage. For instance, when Xia Jinyuan, J5, and the rest were carrying out missions, they stayed in the Snow Region Plateau until the end of the year. From time to time, they would have to go to the barren land to train. This snowstorm was a piece of cake for them.

At night, the members of the Snow Region Brigade were more active than in the day. The first ten members of the Snow Region Brigade had already infiltrated the final location and entered the camp 12 minutes earlier than Big Shark.

"There're surveillance cameras, infrared cameras, and a fully equipped 95 assault rifle. There's even an infrared laser on it. The optical scope is also installed. There's also a night-vision device. Damn it! Q King, just the equipment on this gun is better than ours." A member of the Snow Region Brigade observed

through the night-vision goggles. When he saw the equipment in the hands of his three comrades who were patrolling, his eyes widened. "Compared to them, we're no different from refugees."

Xia Jinyuan heard his comrades reporting the equipment on their guns. Then, he looked at the 95 assault rifle in his hand. Comparisons were odious.

Besides a rifle, there was nothing else.

Speaking of which, which local military unit was fighting with them? Their equipment was too high-end. Wasn't it the local military unit they met previously? Did a field military unit come?

Since his equipment was not as good as theirs, then...., Xia Jinyuan smiled and said slowly, "That's easy. Just take their guns and use them."

That's right. Major Xia was such a scoundrel.

All the members of the Snow Region Brigade agreed with his shameless behavior. This was a brilliant decision!

"Don't focus on your equipment. What I said before doesn't change. No matter how much you snatch it, it's not our target. I still hope to see a 'living' Azure Bird." Xia Jinyuan smiled as he said this to his comrades.. J5, who was closest to him, couldn't help but shiver.

Chapter 1652: Azure Bird Is in Trouble

Why did he feel that Azure Bird was going to be unlucky?

Did Azure Bird commit a crime?

Q King would only be ruthless when someone made a mistake. If not, he wouldn't be like this.

Azure Bird committed a crime? Would she commit a crime? She was very cautious. From Q King's expression, the crime seems to be big.

"Q King, do you mean that you want them to block Azure Bird only?" J5 didn't ask what Azure Bird did. Instead, he asked around to prevent the dark clouds above Q King from getting darker.

Xia Jinyuan turned his head and glanced at him. His gaze was sharp like a hawk and fierce like a snow wolf. After landing on J5's face for a while, he smiled slightly. "She needs a lesson."

...

It was indeed a crime, and a huge one at that!

J5 immediately stopped asking. His brothers' voices came from the earpieces. They were reporting the latest situation to Q King.

"There are too many sentry posts. There's even a wire fence with high-voltage electricity on it. We need to destroy the electricity first." The members of the Snow Region Brigade who entered from the west touched the edge of the core position. They stared at the wire fence and rubbed their hands.

They were going to start a huge fight!

Xia Jinyuan slowly raised his hand and pushed the bush in front of him down gently. He stared coldly at the soldiers patrolling in front of him. Through the night-vision goggles, he saw the equipment on the soldiers clearly.

It was indeed much more advanced. The red dot scope was much more advanced than the scope on their guns.

The command center was most likely inside.

“Take their equipment and disarm them,” Xia Jinyuan replied to his comrade. “Don’t destroy the power too much. Just remove a transformer and leave a gap for the brothers behind to enter.”

The few black shadows that were nestled beside the wire net received instructions. Like ghosts, they touched the edge of the wire net and started to destroy it.

There were four patrolling soldiers and two guards in front of Xia Jinyuan. He laid down again and signaled J5 to come closer. Then, he started drawing on the snow.

“We killed six of their guards. Q King, aren’t we a little too arrogant?” J5 pretended to be surprised. Then, his expression changed. “But this is the best way! Sure, it’s settled.”

He tapped his finger on the map. “I’ll cut in from here. There are two trees here that can provide cover. I’ll take care of the sentinels here. You can take care of the sentinels here and then take care of the four patrolling soldiers together.”

He repeated Xia Jinyuan’s arrangements.

The night was windy, so it was convenient for the members of the Snow Region Brigade. It was also very convenient for Ye Jian. Looking at the equipment in the hands of the patrolling soldiers, Ye Jian couldn’t help but smile.

The ‘holographic diffraction’ scope was equipped with an infrared laser scope. If she could get these, it would greatly increase her night combat ability. She wouldn’t let her target slip away easily.

“Three meters, two meters, one meter, cover!”

As Ye Jian reported the number and got closer, Li Jinnian cooperated with her and moved out to cover her. He pressed down another patrolling soldier. Then, this soldier inexplicably ‘died.’

He was patrolling this area and there were guards at the same time. When did this man sneak in?

“I don’t want your gun. I just want the equipment on your gun.” On the other side, Ye Jian ambushed the sentinel from behind. She threw him over her shoulder and threw him into the fluffy snow. The soldier’s face was covered with snow.

When she scooped it up, there were two tubes of snow in his nose.

Chapter 1653: Strong Firepower

Ye Jian first inspected the assault rifle that fell into the snow. Then, she smiled politely at the soldier and said, "Thank you for your hard work. I need to take away the equipment on the gun. I will return it to you after this ends."

The dazed soldier didn't stop Ye Jian from taking away the equipment on their guns. These equipment belonged to the Special Forces. If not, they wouldn't be equipped with such high-end individual combat equipment.

The soldier patted the snow off his face and looked around.

He had been standing guard here the entire time. The patrolling soldiers walked back and forth but didn't notice any ambush. When did Special Forces soldier come over?

The infrared laser aiming tool used the same principle as the HUD used in fighter jets. The laser holographic image was projected onto the aiming tool. The gunner only needed to overlap the target with the red dot displayed in the middle of the image and pull the trigger to hit the target.

Also, there was another good thing about this. Normally, night-vision equipment would make visibility narrow, making it difficult to grasp the distance. Hence, it was difficult to aim. The infrared laser aimer had a point of identification, and it could open its eyes to aim and shoot at the same time, greatly increasing the accuracy.

Ye Jian was very satisfied with the equipment she got.

Ye Jian loaded the equipment and adjusted the parameters. Then, she saluted the soldier before greeting Li Jinnian.

Li Jinnian just happened to place the red dot scope on his rifle. This was an equipment that only needed to point the red dot at the target to be able to quickly complete the aiming. Its biggest feature was that as long as the point of the gun was aligned with the point of light on the scope, even if the point of view was a little off, and the gun was pointed in the right direction, the red dot of light could be aimed at the target.

However, the shortcomings were obvious. Since the point of the laser was visible, they had to shoot immediately in the dark. If not, they would be discovered.

"It's a little unexpected. Their individual combat equipment is too high-end." Ye Jian walked to Li Jinnian and said with some suspicion, "I feel that something is wrong. The local military unit isn't a field unit. It's unlikely that even the sentinels have such high-end equipment."

Li Jinnian was correcting the parameters. When he heard that, he said calmly, "No surprise. The command center is inside. Our final position is to attack the command center and meet the generals."

Ye Jian was enlightened.

Big Shark's voice came from the earpiece. They had already destroyed the electric net and entered the final combat location.. Li Jinnian and Ye Jian exchanged glances and immediately headed there.

With Big Shark's clearing in front, the sentinels and patrolling soldiers didn't meet each other. This meant that the east direction was cleared completely. At the same time, they got access to the guns. Some Water Ghosts even changed their guns. Their firepower was stronger.

The surveillance camera was still working diligently. The technicians switched the images several times, but they didn't notice any suspicious movements. However, the power grid in the east and west directions had indeed been partially destroyed. This meant that the two teams of Special Forces soldiers had successfully entered the combat area.

"Report, KD7 and TM12 transformer destruction! Preliminary suspicion is that the destruction was carried out by the two groups of soldiers entering the combat area."

"Report, eleven soldiers in east have died!"

"Report, 13 soldiers from the five sentry posts in the west have died!"

The east was the Demon King's entry point and the west was Q King's entry point. This meant that the two teams were about to meet!

Chapter 1654: Confrontation

The navy commander and the major general of the army in the command center couldn't help but sit up straight. They each held a cup of thick green tea and asked the technicians to open all their surveillance cameras so that they could observe the combat situation of every Special Forces soldier better.

The flames of war had already started. The Water Ghosts of the Storm Commando Brigade gathered and started their attack.

"It's a destructive battle. Let's end it quickly!" After observing and reconnaissance, Li Jinnian started to arrange the battle according to their shooting and mobility. "Big Shark, you will bring five riflemen to suppress the main gunner and provide support with a machine gunner."

"Big Prawn, you are the rifle unit's reinforcement! Azure Bird, Big Eel, and I will be in the combat unit. Big Eel, go in and support Sea Anemone."

Sea Anemone was the scout of the Water Ghost team. At this moment, he was the closest to the enemy's base. He was the one who positioned the enemy's base so that Li Jinnian and the rest could enter the battlefield quickly.

With the detailed location of the battle, Li Jinnian quickly split his team into three. Azure Bird, Big Eel, and himself were in the combat team while Big Prawn and the rest were in the fire suppression team.

At the same time, Li Jinnian arranged for a machine gun to reinforce the rifle unit.

This was a reinforcement weapon to compensate for the lack of firepower of the infantry. It was used to counterattack the enemy with more intense shots, block their movements, and support their comrades.

This arrangement was very reasonable. A rifle wasn't like a machine gun with a large capacity of firing. Continuous autonomous shooting would deplete the bullets in the magazine very quickly. At this time, the rifle team would have to change the magazine and couldn't fire continuously.

In this way, the machine guns worked. The machine guns had the ability to prevent the barrel and the engine from overheating. They could also provide continuous ammunition. The continuous shooting time was also better than the rifles. To a large extent, it protected the rifle team.

Even if the rifle team changed their magazine or changed their hiding position, they would be protected.

Big Prawn belonged to the entire team, including the reinforcement weapons of the machine gunners. His firepower suppression wouldn't be too concentrated. Instead, he would cooperate with the rifle team and the machine gunners to reinforce them.

It was impossible for them to fight until the end. They needed to have a 'path of retreat.'

It could be said that Big Prawn was the most dangerous. Once the rifle squad, machine gunners, and the combat squads failed, he would have to go up alone and use his firepower to help his comrades retreat.

The bullets had already broken the peace in the depths of the mountain. The little sparrows that were resting were so frightened that they rushed into the sky one after another. The wild chickens that were hiding in their nests let out frightened cries and ran around in the bushes.

The gray haired rabbits seemed to have lost their sense of direction. One moment, they were running here and, the next moment, they were running there. The timid ones trembled in fear from the sound of bullets.

On the screen in the command center, a bullet broke the silence of the night. The image of the mountain snow suddenly had a 'fire line,' It was the trajectory of an empty bullet.

The soldiers of the enemy base had been waiting for a long time. All of them were tense. They would act immediately if they heard anything.

Instantly, the two sides started firing at each other. The gunshots were deafening. It felt like a landslide. It seemed like the entire place would be flattened in the next second.

Chapter 1655: Only Number One

The rifle squad was meant to suppress the enemy. Hence, they just needed to force the enemies in the base to stop them.

The entire shooting range was 300 meters. Big Shark and the rest were equipped with high-end equipment so they could shoot at targets within a wide range.

"Beep! Beep!" The sound of the laser indicator was heard.

In 1999, the military exercises didn't complete the implementation of the laser simulator. Although the Soviet Union army developed part of the laser simulation system in the 1980s, the cost was huge. The country was still in the trial phase.

This time, in order to use the 'Laser Model Confrontation Control System,' the military had been setting up and building this mountainous area since May. This was so that the military and the highest-ranking officials who were paying attention to this competition would know the entire situation immediately.

At the same time, there were experimental components inside to see which areas needed to be perfected and which areas needed to be improved.

This 'Laser Model Confrontation Control System' used laser firing. Through the communication network, the satellite positioning data, ammunition stock, combat status, and other information sent by every laser simulation confrontation machine were transmitted to the military at the fastest speed. This allowed the highest-ranking leaders of the country who had been paying attention to this match to know the progress of the match immediately.

It could also let the highest-ranking leader know the combat strength of the two teams.

"Although the Storm Commando Brigade has only been established for a year, the captain of the unit is capable. It's a credit to him that he can match against the Snow Region Brigade, which has been around for more than ten years."

"As for the Snow Region Brigade, they are brave and smart. They are able to suppress two rows of firepower and be deployed in teams without losing a single soldier. The deployment was well done."

At 7:30 PM, a high-ranking official finished a day of work and arrived at the military headquarters to observe the final confrontation between the two teams. When he saw the confrontation, the highest-ranking official had a gratified smile on his face. He gave Li Jinnian and Xia Jinyuan a high affirmation of their combat skills.

Lieutenant General Xia knew that his son had some ability. Although he knew it in his heart, he never mentioned it. Now that he had received the approval of the highest-ranking officer, the lieutenant general continued, "As the leader, how he fights and how he deploys directly affects the lives of every soldier. He holds the lives of his entire team in his hands. He must have outstanding abilities."

"You're right. As a captain, if you don't stand out, you should give up your position." The highest-ranking leader nodded in agreement. "The captains of both teams are very outstanding. With them leading, I have high hopes for their participation next year. I hope that they can work hard and return victorious."

This was the first time that the country sent Special Forces soldiers to participate in an international competition. It was the same as sparring with the outstanding Special Forces from other countries.

Don't talk about friendship or competition. As a soldier, there will never be a second place. There will only be first!

“We will not disappoint the country!” Lieutenant General Xia stood up and gave a military pledge to the highest-ranking official. The hope of the country’s leader was also what he and the thousands of soldiers behind him hoped for.

The highest-ranking official looked at the screen and observed the entire competition with a stern gaze. When he saw that the forces deployed in advance had been destroyed, the highest-ranking official’s mouth tightened.

Chapter 1656: Strangulation

The combat ability of the local forces still needed to be improved. War wasn’t just about the field forces. It was also the responsibility of the second and third-tier local forces.

“Next year, the military assembly will focus on the second, third, and local garrisons. Let them hand over the result to the country and the people.” During the discussion, the highest-ranking leader said this to Lieutenant General Xia. It was highlighted by the civilian records. They were just waiting for the military assembly next year.

On the screen, Ye Jian and Li Jinnian had already reached the enemy’s base. There was an abandoned warehouse that was about 11 meters long and 4 meters wide. The warehouse was made of mud bricks and had a triangular roof. It was similar to the warehouse of a brick factory.

The two of them helped each other. When Big Eel’s voice came from their earpieces, he told them that he had met up with the scout, Sea Anemone. Li Jinnian moved quickly and entered the abandoned warehouse.

He half-squatted to make sure that his surroundings were safe. Then, he signaled for Ye Jian to move.

The two of them crossed paths and moved to the back at the fastest and safest speed. When a few figures appeared in the night-vision goggles, Ye Jian quickly switched to semi-automatic shooting and started the encirclement.

“Press the firepower at the front! Big Eel and Sea Anemone, attack from the side!” Li Jinnian fired from the back. He was firing autonomously to provide cover for Ye Jian. Beep... The sound came from the front. Some soldiers had already ‘died.’

“F** k! They’re surrounding us! Back up!”

“North... Mmm...” Before a soldier could finish his sentence, someone covered his mouth and pulled him off the abandoned wood. He died instantly.

“Be gentle, be gentle. I’m already gone. Why are you still dragging me?” The soldier was still in a panic when he was suddenly pulled down. When he saw that the other party was still dragging him into the corner, his back hit a piece of wood and he gritted his teeth in pain.

Big Eel laughed and said, “Brother, let us use you as a step. If you kick this crappy place, the entire wall will collapse. Let me borrow your body.” He sounded extremely shameless.

The soldier was so angry his mouth was about to turn crooked. "I'm already dead. Do you still want to use the useless me?"

"That's right, that's right. Useless is still good for use." Big Eel wasn't angry. Instead, he smiled. The soldiers here were interesting.

"F** k, hurry up!" The unlucky soldier had no way of resisting. If he really died on the battlefield, it was not impossible for him to be dragged as a stepping stone.

Big Eel and Sea Anemone cut the warehouse from the north. It was the same as splitting the entire warehouse into two. One in front, and one in the back. As a result, not only were the soldiers in the warehouse attacked from the front and back, but even the middle.

"Machine gunners, advance!"

"Rifle squad, move around and kill them from the front and back!"

In the warehouse, Li Jinnian gave orders one after another. When the notification indicated that the bullets had entered the countdown, he immediately said to Ye Jian, "Alert, change the ammunition!"

The tracers were loaded in advance when loading ammunition into the magazine. Normally, they were placed at the third last bullet position. This way, during combat, as long as the tracers appeared, they would know that they needed to change the magazine.

Ye Jian quickly became alert while Li Jinnian leaned against the wall and changed his magazine.

"Clear, move forward!" Hearing the sound of the magazine being pushed in, Ye Jian knew that he had finished loading the magazine. Thus, she took care of one of the enemy's machine gunmen with precision.

Chapter 1657: The Eagle In the Sky and the Dragon in the Sea

Big Eel, who was fighting in the middle, said, "Complete the attack! Hurry!"

Soon, Big Shark and his rifle squad moved under the cover of Big Prawn and the machine gunner as they completed their shooting.

"Bang, bang, bang, bang!" The sound of bullets ringing in her ears never stopped. The trajectories flew across the snowy night, bringing with them the beauty of fireworks in a prosperous era. Under the snow light, it looked exceptionally beautiful and frightening.

In the warehouse, a portion of the soldiers from the 16 local forces were suppressed by the firepower at the front and couldn't move. Behind them were the two killing gods, Li Jinnian and Azure Bird. Their cooperation was flawless as they broke through the defense line and killed their way in.

The entire battle was like an inescapable net that surrounded the entire warehouse. The soldiers inside couldn't advance or retreat. They were suppressed by the firepower and couldn't even raise their heads. If they raised their heads, it would explode.

“Cleared!”

“Cleared!”

“Cleared!”

The clearing of the targets at the front, back, and center meant that the entire base had been taken down. From the attack to the roundabout tactic of encirclement and elimination, the entire mission took 16 minutes.

Next was the position that the Storm Commando Brigade had occupied.

Li Jinnian turned on the flashlight on his helmet and pointed at the battle map. “This is the highest point of the entire battlefield. This is our final position. The Snow Region Brigade will enter from the west. We will enter from the east. Now, we will squat here.”

Li Jinnian pointed at a coordinate and said in a cold voice, “Big Shark bring our 12 comrades to the final location. Azure Bird and I will complete our ‘hunting’ mission.”

Li Jinnian didn’t dare to let Ye Jian leave his sight. The target in Xia Jinyuan’s ‘captive’ plan was Ye Jian. As the captain, he needed to protect her.

He was afraid that Ye Jian’s mistake would make Xia Jinyuan want to teach her a lesson. If he was right, Xia Jinyuan wouldn’t just send one person out. He might even personally come to teach Ye Jian a lesson.

If it was him, he would do the same.

At this moment, Ye Jian wasn’t as uneasy as before. She made a mistake and would definitely receive punishment. She wasn’t worried about the punishment she would receive. Instead, she was serious about completing the competition until the end!

The sound of bullets coming from the east came to an end. Xia Jinyuan, who was holding a rifle in his hand, raised his head and looked at the sky. A faint smile flashed past his thin lips. He made a gesture to accelerate. He walked at the front like an arrow leaving the bow.

The big screen in the command center showed the figures of the members of the Snow Region Brigade. They were all gathering towards the command center.

The navy commander raised his head and looked at the command tent. He said to the major general, “Good lad, he really came over. Our place is very well-hidden. He actually found it?”

“He’s an all-rounded soldier. He’s an eagle in the sky and a dragon in the sea. He’s a ferocious tiger on land. It’s not surprising that he can find this place. However....” The major general was very satisfied with his soldier’s judgment. He paused for a moment and smiled. “I didn’t expect him to reach here so quickly.”

This speed was a little too fast.

Chapter 1658: Exposed

Why did it feel like his plan was to go to the command center and catch these generals?

“Report, Group B has entered the periphery of the command center!”

“The peripheral sentinels are controlled. Four members of Group B will enter.”

“Infrared detection has been destroyed. Two members of Group B are entering.”

Speak of the devil. Major Xia brought the six members of the Snow Region Brigade into the command center. The moment they entered, they were blinded by the white light. They raised their hands to cover their eyes.

The navy commander laughed loudly. “Q King, you actually managed to reach the command center. You really touched the wrong place. This is not a place for you to fight.”

Xia Jinyuan, who had finished saluting, smiled and replied, “I just want to borrow the command center.”

“Borrow the command center?” The navy commander was puzzled. He didn’t know what he was planning. “What do you want? We don’t have any weapons.”

The major general of the army stood up too. Although he had a serious expression on his face, he couldn’t hide the smile in his eyes. “Since you came over directly, our position is considered to have fallen. I’ll give you five minutes. After that, you can leave.”

“Yes!” Xia Jinyuan saluted again. Then, he walked towards a technical soldier who was operating the main control panel. “Brother, I’ll borrow this for five minutes. Thank you.”

Z7, who followed behind, waited for the technical soldier to get up so that he could sit down immediately.

The technical soldier didn’t stand up immediately. Instead, he asked the general for instructions. After getting a nod, he stood up. Oh no, he said in a low voice worriedly, “It’s a brand new control console. Don’t press it.”

The equipment in the entire command center was extraordinarily expensive. The technical soldiers were more attentive to them than serving their ancestors. They were afraid that something would happen.

Z7 patted the technical soldier’s shoulder and said seriously, “Don’t worry, Brother. If I break it, you can take my head.”

“Stop wasting time. Hurry up.” Xia Jinyuan pressed him to his seat. “Bring out Azure Bird’s position and final location position. K7, draw a map! T6 and V8, cut into Group A’s wireless communication and complete the wiretap.”

G3 was in charge of guarding to prevent people from the Storm Commando Brigade from coming over too.

Xia Jinyuan sat down on his own. He took off his combat gloves and placed them on the side of the operating table. His slender fingers typed in a series of commands on the keyboard. Then, he moved his left hand on a few buttons on the operating table. He pulled out all the surveillance cameras.

A surveillance camera with an unknown number caught a black shadow that flashed past. Xia Jinyuan narrowed his eyes slightly. This figure was like a scout from the Water Ghost. As for this person, he needed to see where he was.

The technical soldier at the side watched as the Special Forces soldiers in snow camouflage uniforms moved their fingers and operated the equipment skillfully. He was stunned when he saw them.

From his posture, it was obvious that he was more familiar with operating these instruments than the technical soldiers.

“Demon King, I’m afraid that my whereabouts were exposed. The surveillance camera flickered. They probably caught me.” The scout from the Storm Commando Brigade, codenamed ‘Sea Thrust,’ quickly found a new cover. “They have already been at the command center for two minutes. I didn’t hear any fighting sounds inside. Demon King, you didn’t guess wrong. The command center isn’t our final location.”

Li Jinnian glanced at Azure Bird who was walking a few steps in front of him. If he confirmed that it wasn’t the final location, then... Xia Jinyuan would probably be searching for Azure Bird when he entered the command center.

Chapter 1659: She Needs A Lesson

Why did he think that way? It was probably his instinct.

Xia Jinyuan had high hopes for Azure Bird. He had spent so much effort to groom her but, in the end, she committed a huge crime on the battlefield. Xia Jinyuan wouldn’t let Azure Bird off so easily.

In that case, should he cooperate with Xia Jinyuan and teach Azure Bird a lesson?

“Demon King, I’m Q King.”

Just as Li Jinnian was wondering if he should cooperate with Xia Jinyuan, an impossible voice sounded in his earpiece. Li Jinnian’s expression turned cold. Their radio signal had been hacked!

In other words, the entire communication was interrupted.

“I only have five minutes. It took me two minutes to crack your radio code. Three minutes later, I will leave. The command center will not lend me any more time,” Xia Jinyuan spoke very quickly but his words were clear and sharp. It gave people the illusion that he was speaking very slowly. “I need Azure Bird. I want to give her a good greeting gift.”

“I know that you have been bringing her to your side and will send people to protect her. Demon King, Azure Bird doesn’t need protection. She needs everyone to be at ease. She can take on thousands of soldiers alone and can wipe out a company with a sniper rifle.”

“On the contrary, she needs to be taught a lesson! Do you understand what I mean?”

His voice was calm. There was no anger in it. Even the tone of his every word was controlled. No one could hear his emotions.

However, Li Jinnian knew that the usually calm Xia Jinyuan was really angry this time.

The two of them were the same kind of people. The angrier they were, the less emotional they would look. When their emotions fluctuated, they controlled their limbs, actions, and words extremely accurately. No one would be able to tell that their emotions had changed.

“I understand,” Li Jinnian replied. Then, he asked him calmly, “Just this?”

Xia Jinyuan’s laughter came from the earpiece. “This is a big matter. Sorry to disturb you. See you later.” He hung up the phone quickly and instructed T6 and V8, “Okay, switch back. I’m done.”

That’s right. He came for this. He came for Ye Jian.

The group of people came and left in a hurry. As for the scout from the Water Ghosts, Sea Urchin who was discovered, there was no one there anymore. Xia Jinyuan walked to the position where Sea Urchin was squatting and looked at it. He narrowed his eyes slightly.

Demon King Li said that their reconnaissance soldiers could complete missions on both land and sea... That was true. It wasn’t an ordinary mission. It should be perfect.

The position where he was squatting was less than three meters away from the position where Pigeon was squatting. From the footprints he left behind, the tip of his toe was pointing at the position where Pigeon was. This meant that Pigeon had been discovered.

As for Pigeon, he was an expert in snow and mountain reconnaissance, but he didn’t discover the location of the Water Ghost’s scout!

Pigeon was sweating profusely. He really didn’t realize that there was a Water Ghosts soldier less than three meters away from him!

“Demon King has many talents under him. He trained the entire team in less than two years. I need to ask him for some advice.” Xia Jinyuan raised his leg and covered the footprint with the snow beside him. He muttered something and turned to leave.

Z7 and the rest were sweating because of his words. Demon King’s training could only be described with one word: brutal!

Chapter 1660: Ha, Wishful Thinking

If that was the case, their future training might be harsh and cruel. Thinking about the days, haha, hahaha... There was pain.

The high-ranking officers in the command center were puzzled by Xia Jinyuan’s arrival. Did he create such a huge commotion just to contact the team he was fighting against?

There was no conversation throughout. They were talking about Azure Bird.

The major general frowned. He pondered for a moment and said to the admin officer beside him, "Check the trajectory of Azure Bird." There were too many implications in Xia Jinyuan's words. Azure Bird didn't need protection. Of course, as a Special Forces soldier who could fight alone, why would she need protection?

She shouldn't be protected. She should be protecting her comrades.

In the last sentence, he said that Azure Bird needed to be taught a lesson. Why did Azure Bird need to be taught a lesson?

When they reached the command center's territory, they finished their work and left. However, they didn't explain themselves properly. Instead, they let them guess and wonder why Azure Bird needed to be taught a lesson.

"There's no need. Contact Group B's leader." The major general didn't want to take a detour so he asked the technical soldier to contact Xia Jinyuan directly.

Xia Jinyuan, who had already left, didn't hide anything. He reported everything to the major general of the army. When he was done, he added, "She won't be able to achieve anything without hard work. She has too little combat experience. I need to let her experience failure. As a soldier, she has to experience what kind of cruelty she has to face. Captives are never given preferential treatment."

Especially when they were captured by criminals who were organized, disciplined, and had their own set of rules. There was no such thing as preferential treatment of captives. The criminal organization wouldn't abide by rules, such as not injuring or threatening or insulting captives.

They caught you and fed you well. Ha, dream on!

The major general of the army fell silent. Ye Jian had indeed made a huge mistake. Then, he instructed, "Don't play tricks. Teach her a lesson appropriately. After all, she hasn't officially entered the military. She's just a cadet."

"She has not undergone systematic and professional training. She has also undergone various tests of the Snow Region Brigade. You can't be impatient. If she admits her mistake, she will still be punished. However, you need to know your limits. Do you understand?"

Xia Jinyuan agreed, but the look in his eyes was frighteningly cold.

If his girlfriend made a mistake, he wouldn't cover it up or hide it from his superior.

His girlfriend made a mistake. As her boyfriend, he was responsible for making her realize her mistake and letting her swallow the bitter consequences of it!

There was no such thing as 'repeating mistakes' in his dictionary. The first time it appeared, he would strangle it mercilessly. There wouldn't be a second chance.

Ye Jian didn't feel cold when she was walking, but she shivered for some reason. Then, the sense of danger she felt in her past life hit her like an avalanche. She stopped in her tracks.

"What?" Li Jinnian sharply noticed her abnormality and asked her directly, "Is there something?"

Ye Jian pursed her lips and looked around. There was nothing abnormal. She didn't feel that she was being watched. The cold shiver was a little... weird.

No, no, it wasn't inexplicable.

After killing White Crane, if Captain Xia knew... What was waiting for her?
