

Campus Master 1761

Chapter 1761

Unbelievable!

This was the most intuitive feeling of Ji Yu Ying and Ah Tak!

Three people had really taken out so many Yamaguchi Group leaders and sect heads.

Even for those who survived the violent explosion, they would have to lose their skin, or at least half their lives, without dying.

The villa was so strong, but the explosion was so violent and so terrifying that there was no safe place to hide inside or outside the villa!

If one were to hide in the basement underneath the villa, it would be even more miserable.

When Ji Yu-yin went to the Mainland, he had heard that in some places in the Mainland, there was a special dish called stewed chicken, where the chicken was cleaned after its hair was removed and then wrapped up in some lotus leaves or something and buried in the ground, and then a fire was built on top of it.

This dish is very tasty and well known.

Just look at Taro Sakata's villa, with that violent explosion and roaring fire, even a cow down there, not to mention a human being, would definitely be steamed alive!

This also meant that there were really not many people who could walk out of this villa alive!

Ji YuYi suddenly thought again of the several gunshots she heard earlier, and she suddenly realised that at that time, it must not have been Ji Feng who was in a fierce battle with someone else, otherwise, how could he come out so quickly now?

Then .....

Who fired those shots?

Ji YuYi thought of the situation before – because she heard the gunshots, and reflecting the light shining out of the villa windows, she could vaguely see that the surrounding guards were all desperately rushing inside the villa, yet when they had just rushed in, there was a shocking explosion inside the villa!

..... Ji Yueting couldn't help but be horrified!

As long as one is not a fool, when one thinks about the events before and after, one can see at a glance that those shots before were definitely fired by Ji Feng, or, one of the White Spider or Li Guoliang, it is certain that the shots must have been fired by Ji Feng's side.

As for the purpose, it was naturally self-explanatory.

The sound of those shots alerted all the guards around the villa, and with that, those guards swarmed the villa and rushed in desperately.

As a result, when the violent explosion sounded, all those who were inside the villa, as well as those who were not too far away from the villa, were in the vicinity of the explosion!

The only people who were not hurt were the guards who were a bit far away and had not yet had the chance to rush into the villa. The only people who were not hurt were the guards who were a bit far away and had not yet had the chance to rush into the villa.

Other than that, the people inside and outside the villa were really wiped out!

How ruthless!

When Ji YuYi thought of this possibility, she could not help but secretly shiver, her heart subconsciously startled.

The way Ji Feng played this game was really ruthless.

However, what shocked Ji Yuqing even more was Ji Feng's ability!

Even after seeing the result with her own eyes, Ji YuHui was still a little incredulous.

How could this be possible!

There were so many people in the villa, how did Ji Feng put the bomb into the villa, and how did he leave calmly after shooting?

In fact, Ji Yuwen was equally curious and surprised as to how Ji Feng had entered Taro Sakata's villa silently, but compared to these latter matters, how Ji Feng had entered the villa was really an irrelevant matter.

Unfathomable!

This thought flashed through Ji Yuhui's mind, and she could not help but feel awe in her heart.

It was definitely unfathomable. Although she had not seen with her own eyes how exactly Ji Feng had managed to do all this, just from her knowledge of the Yamaguchi Group, it was clear enough to know just how difficult Ji Feng's operation was this time.

Before this, Ji YuYi even thought that it would be impossible for Ji Feng to achieve his goal.

However, Ji Feng had managed to do it!

Not only did he do it, but he did it cleanly and beautifully, he himself wasn't even half nervous, looking at his calm demeanor, it was almost as if he was returning from a holiday.

"It's incredible!" Ji YuYi once again couldn't help but marvel, "Ji Feng, you, how on earth did you do that?"

"How did you do it?"

Ji Feng chuckled, "My luck was better, and besides, these boundary tent people are too stupid!"

Ji Yuhui: "....."

The boundary tent people were too stupid?

Looking at Ji Feng's light-hearted look, Ji Yuqing really didn't know what to say.

If the Boundary Tent people were all stupid, how could they even be able to gain a firm foothold in Rice and grow to a scale that was straight up to the White Hand Party?

Besides, if the Yakuza were all stupid, then what were they, the gangs that had been forced by the Yakuza to defend themselves passively? The dumbest of the dumb?

After all, the villa of the Yakuza chairman in New York was still burning, so who dared to say that Ji Feng was not qualified to say that?

"Then what was the explosion just now?" Ji YuYi couldn't help but ask, "Those grenades I gave you weren't that powerful!"

"That's why I was luckier, after I infiltrated the villa, I inadvertently found a lot of bombs, which just happened to be used to entertain these boundary tent brats!" Ji Feng smiled, "If not for these bombs, maybe there would have been some trouble tonight!"

Ji Yuhui was speechless!

Ji Feng's luck was indeed good, the bombs that Sakata Taro had placed in the villa had actually been found by him and had successfully detonated!

It was also these bombs that put an end to the small lives of so many elites of the Yamaguchi-gumi!

However, was it really just Ji Feng's good luck?

If he didn't have extraordinary abilities, how could he have easily infiltrated Sakata Taro's villa and thus found the bombs inside the villa?

Something like a bomb couldn't just be randomly placed in the living room, it must have been placed in some hidden place.

In other words, Ji Feng had sneaked in silently, like no one's business, to find the bomb hidden by Taro Sakata!

This skill alone was enough to shock people.

At least, Ji YuYing thought that there was no such expert in the entire Chuk Yuen Gang who could easily sneak into the villa with so many people there.

"Young Ji, we should retreat!" The others were shocked, but White Spider had already gotten used to how tough Ji Feng was, and she reminded in a low voice beside her.

"There's no need to retreat in a hurry, there's still things to do!" Ji Feng waved his hand, immediately after that, he took out a few grenades from the bag he was carrying and handed them to White Spider and Li Guoliang, saying, "Those guards on the mountain should all be coming down soon now, you guys entertain them some more!"

Since they had come, they could not leave so easily.

What's more, according to what Ji YuYing said, these guards were all elites of the Yamaguchi Group's operation team, so if they could take out one more, they would earn one more.

For the boundary tent people, Ji Feng was not used to showing mercy!

White Spider immediately said, "Yes!"

Li Guoliang, however, nodded heavily and said, "Don't worry, Mr. Ji, I won't save my bullets!"

The previous action of Ji Feng and White Spider had made such a big scene, so hot, that Li Guoliang was a bit impatient, as a soldier, there was no one who didn't hate the Boundary Tent, he certainly hoped that he could take out a few more Boundary Tent people with his own hands.

What's more, the Yamaguchi group had dared to lay their hands on Chu Yue, they deserved to die!

Ji Feng nodded and said, "Your own safety is most important, do not venture in, finish your bullets and throw out all the grenades, then come back immediately, never get attached to a fight!"

Bai Spider could not help but purse her lips and laugh lightly, "Young Ji, if we follow what you say, then we may not be able to go back until dawn, don't forget, behind the villa, those guards have left a lot of guns behind!"

Ji Feng also laughed as he said, "Just finish shooting the bullets in your guns!"

"Yes!"

The two White Spiders answered at the same time, and then, they set off again, their figures disappearing into the darkness.

At this moment, the three of them were already a bit numb with shock.

At this moment, there was only one thought in their hearts – don't offend Ji Feng, this person was too scary.

From the conversation between Ji Feng and the white spider, it seemed that they had taken out the guards at the back of the villa and then sneaked into the villa silently, thus causing such a violent and shocking explosion, taking out so many people, but their bullets and grenades had not even moved!

This kind of combat power alone was enough to send a chill down the spine!

When the explosion sounded again in the distance, the three of them looked at each other and could clearly see the look of shock in each other's eyes.

Ade, on the other hand, was in shock as a wave of resentment surged in his heart.

How could this happen?

Looking at Ji Feng's subdued expression, Ade could not help but secretly grit his teeth .....

.....

"YuYi, let's say goodbye here, we'll be in touch when I've finished with the matter!" Ji Feng shook hands with Ji Yu Yi and smiled.

When everything had calmed down, Taro Sakata's villa had become ruins, and in the distance, the sound of police sirens could already be faintly heard, Ji Feng and the others were retreating.

Ji Yuwen couldn't help but marvel, "Ji Feng, you really created a miracle this time, of course, maybe it was just a casual trip for you to take out so many people from the Yamaguchi group, but this is indeed a miracle, it's too shocking."

Ji Feng waved his hand with a smile, "It's still thanks to your help that we were able to make it this far, if it wasn't for the special glass blade you provided, I'm afraid it wouldn't have been so easy for us to get into the villa."

Ji YuYi shook her head with a bitter smile, she knew that for Ji Feng, the glass cutter she provided was actually just to make his operation a bit smoother, in fact, with Ji Feng's skills, even without the glass cutter, he would still be able to succeed.

"What happens tonight will shake the entire New York underground world!" Ji Yuhui said, "However, I will help you keep it a secret."

"Thanks!" Ji Feng nodded his head.

He didn't really care if it could shake the New York underground world, being able to solve Xiao Gu's troubles was the most important thing.

But Ji Feng was unaware that his actions would cause a violent earthquake in the entire New York underground world, and the reaction of the outside world in the following days was enough to show this .....

## Chapter 1762

It was late at night in New York.

The fierce battle around Taro Sakata's villa had long since ended, and only the roaring fire caused by the explosion was still burning, reflecting the dark night in red.

Ji Feng sat in the car and saw this scene in the rear-view mirror, looking calm, not feeling guilty because he had caused the explosion.

These people, they deserved to die!

They all deserved to die!

If we were to say that all of these people were taken out, perhaps some people would be a bit wronged, but if half of them were pulled out at random and taken out, there would definitely be a leak.

The reason for this is because of what the Yakuza did to the Chinese in New York!

According to Kee Yu-Yi, the Chinese in New York were actually not living as comfortably as many people thought they were.

In fact, many of these Chinese people who are far away across the ocean are not living a very good life.

Because of the discrimination against them by foreigners, and also because of the incomparable hatred towards them by the Kaitou people. The members of the Yakuza, in particular, were ruthless against the Chinese in New York and would do anything!

According to Ji Yu-yen, perhaps those who were in business, even though they hated the Chinese, they were still law-abiding and would not do anything outright, but at most they would find an opportunity to humiliate the Chinese in Rice, or use some underhanded tactics to make things difficult for the Chinese.

But the more outrageous things that the decent businessmen of the border tent did not do were not many.

The Yamaguchi-gumi, however, were a different story.

The Yamaguchi-gumi is a gangster organisation, and it goes without saying that the quality of its members is very good, not to mention the fact that the Kaitoupan people are by nature bullying and fearful of the Chinese, and are extremely hostile to them.

Now that the Yamaguchi group had even set their sights on Chu Yue's body again, and they dared to lay their hands on his little aunt's family, how could Ji Feng be merciful under such circumstances?

Instead of being half-heartedly intolerant, he even felt a little pity.

Because before the explosion at Taro Sakata's villa, a part of the Yamaguchi Group's action team was responsible for guarding the hill behind the villa, so even if Ji Feng had deliberately fired to draw the attention of the guards outside, in the end, because the distance was too far, those guards who were on the hill, were not affected by the explosion.

Although later on White Spider and Li Guoliang made another surprise attack on those people from the Yamaguchi Group's operation team who were running wildly down from the mountain, but after all, there was still a power grid in between and it was dark, so what kind of results could be achieved, Ji Feng had no idea in his heart.

If there is no that electric grid then .....

The actual fact is that there are a lot of people who are not able to get a good deal on this.

Just as the boundary tent people hate the Chinese, Ji Feng has absolutely no half-hearted feelings towards the boundary tent people, and if there is a chance, he will definitely not show any mercy to the boundary tent people!

"Guoliang, go straight to General Manager Ji's villa!" Ji Feng shook his head, withdrew his thoughts and instructed, "You are more familiar with New York, find secluded roads and don't meet up with the police so as not to cause unnecessary trouble."

"Yes!"

Li Guoliang answered, and the car began to accelerate, and soon disappeared into the darkness.

The sharp and piercing sirens behind him also faded away.

.....

When Ji Feng returned to Ji Nan Yue's house, it was already after midnight and everyone else had gone to bed except for those bodyguards, but when Ji Feng returned upstairs, he found Ji Shaolei sitting in his room with a cigarette in his hand.

Looking at the room again, it was smoky, and Ji Feng smelt a pungent smell of smoke as soon as he entered.

"Second brother, why are you smoking so much?" Ji Feng asked with a frown.

"Back!"

Ji Shaolei, however, stood up at once, seeing that Ji Feng had returned, his face instantly revealed a look of relief, he had been waiting on tenterhooks before, not to mention sleep, he could hardly sit still, he could not wait to go directly to Ji Feng and see what the result was.

You know, Ji Feng and the others were only three people, the Yamaguchi group had a meeting, even if they were not good enough, they would still far outnumber Ji Feng and the others, right?

And everyone knew what the Yamaguchi group was for, so Ji Shaolei knew very well how much danger Ji Feng would face this time.

He couldn't help but ask with concern, "San'er, is everything alright?"

Ji Feng nodded with a smile and said, "I'm fine, but the Yamaguchi group will be miserable ....."

"Sit down and talk!" Ji Shaolei immediately came to life, he casually pulled over a chair and handed Ji Feng another cigarette, "There's plenty of time anyway, take your time."

"You're not going to sleep?" Ji Feng asked with a smile.

"Do you think I can sleep at this time of the day?" Ji Shaolei asked rhetorically.

Ji Feng lost his smile and said, "Well then, speak slowly, you'll be very painful to listen to ....."

Afterwards, Ji Feng then described the course of action tonight, in general, but of course many of the details were ignored, such as the fact that he could see through the door of the room and see the inside very clearly, as well as the discovery of the laser gun in the hidden safe above the villa, and so on.

All these things, Ji Feng could not say, not because he was worried that Ji Shaolei could not keep the secret, but this kind of thing, it was best if less one person knew about it.

However, even though Ji Feng was very vague, Ji Shaolei still listened with great pleasure.

Especially when Ji Feng said that he deliberately shot at the window to lure the guards around the villa in, and then detonated the bomb, Ji Shaolei couldn't help but exclaim, "Good bombing!"

Ji Feng hurriedly waved his hand, "Little Aunt and the others are all asleep, keep your voice down!"

Ji Shaolei hurriedly lowered his voice, but still couldn't help but heave a smile, "Good, San'er, well done!"

The ghosts in the tent were killed, it was a pleasure!

Ji Shaolei's blood boiled as he listened, he really regretted how he had listened to Ji Feng and stayed behind to protect his little aunt's family at that time, and as a result, nothing happened at home, but he was the one who missed out on a wonderful drama.

What a pity!

.....

The two of them only went to bed separately, and this was something that Ji Feng insisted on, otherwise, looking at Ji Shaolei's excited look, I'm afraid they could talk all night long!

However, after sending Ji Shaolei away, Ji Feng did not go to bed as he wished, he received a call from Ji YuYi.

"Ji Feng, there's news!" Ji Yuhui said, "The casualties have been counted."

"Oh?"

Ji Feng couldn't help but ask, "Where did you get the information from, is it accurate?"

Ji Yuhui said, "The information is definitely accurate, this is the information my people got from the police station ..... Ji Feng, do you know how many people died in the Yamaguchi group?"

Ji Feng raised his eyebrows and asked, "How many people?"

"Over two hundred people!" Even though he had been psychologically prepared and had even witnessed the scene of the explosion at Sakata Taro's villa, however, when Ji YuYi reported this number, there was still a feeling of extreme shock!

Over two hundred people!

Normally, even in a big firefight between two gangs, not so many people would die, but Ji Feng, with just two of his men, had taken out more than two hundred people from the Yamaguchi gang!

Moreover, the vast majority of them, surprisingly, were still elites of the Yamaguchi-gumi's operation team.

"There were that many people?" Ji Feng asked.

In his impression, there were actually only a few dozen people in the villa, even if he added in the ones who were later drawn inside the villa by the gunshots and later blown up, together they would only add up to about a hundred people, where did he get this figure of over two hundred people from?

Ji Feng couldn't help but ask, "The police have come up with the exact figures so quickly?"

Ji YuYi laughed bitterly, "That's a really glib question you're asking ....., Ji Feng, don't you know how shocking what you've done today is? I believe that at most by daybreak, the whole of New York will be shaken, and even the whole of Rice, will be shocked by it!"

Ji Feng laughed, "It's not that exaggerated, is it?"

"Not exaggerated at all!"

Ji Yuhui said, "Apart from terrorist attacks, there has never been so many people killed at once in Rice over the years! The police department is on the verge of a major attack, they dare not take it seriously? Explosions, shootings ..... over two hundred people, just like that, in just one to twenty minutes! Now the police are all in a panic, all on edge, afraid that it's a terrorist attack ....."

Ji YuYi said, but in her heart she was shocked and emotional.

It was because the shock of Ji Feng's action was too great for her!

Ji Feng, however, did not know what Ji Yuoyi was thinking, he was concerned about something else: "Yuoyi, have you inquired if all the leaders of the Yamaguchi group have died?"

Ji Yuqing was stunned and then laughed bitterly, "You really dare to think about ..... the size of the Yakuza, how could all the leaders be dead? How many people would it take? It's shocking enough now, if all the ringleaders were dead, it would definitely be a shocking case!"

Ji Feng frowned slightly, "Then those people inside the villa, what were their identities within the Yamaguchi group? Are they all hall masters?"

Ji YuYi said, "Most of them were hall masters, Sakata Taro was among them, the police have found his body ..... Ji Feng, you took out all the top brass of the Yamaguchi group at once, there were even a few big heads below the hall masters, they were all taken out together ....."

Ji Feng was then relieved, it seemed that the ones who died tonight were all the main figures in the Yamaguchi group. As for those minor heads, they probably weren't even qualified to come to this meeting, so they got away with it.

When Ji YuYi saw that Ji Feng was silent, she thought he still had regrets in his heart and could not help but say, "Ji Feng, you don't still don't know what to do, do you? You have almost wiped out the top echelons of the Yakuza, in this way, the entire Yakuza is paralyzed, this kind of blow, is fatal!"

Ji Feng smiled faintly, "Then you still don't beat up the falling dogs?"

Ji YuYi said, "I have already made arrangements, the Yakuza's territory, manpower, and funds, of course I will not let go ..... Of course, this is all your credit, so when the matter is completed, there will definitely be your share."

Chapter 1763

Ji Feng smiled faintly: "Then you still don't beat up the falling dogs?"

Ji YuYing said, "I've already made arrangements, the Yamaguchi group's territory, manpower, and funds, of course I won't let go ..... Of course, it's all thanks to you, so when it's done, you'll definitely have a share."

When Ji Feng heard this, he couldn't help but shake his head with a smile.

He said, "I don't need these things, let's sort of take what we need. If it wasn't for your help in getting that special glass blade in advance and providing such accurate information, I wouldn't have been able to wipe out the Yamaguchi-gumi's hall masters! So, the Yakuza's turf or whatever, it's considered a reward for you ....."

Ji Yuet said, "A reward for me? That's too good to earn, right? Ji Feng, do you know how much territory the Yamaguchi-gumi controls in New York and how much these territories are worth?"

Ji Feng actually used the land left behind by the Yamaguchi-gumi as a reward, a statement that made Ji Yuoyi both amused and speechless.

The Yamaguchi-gumi controlled at least 30% of the territory in New York, straight up to the biggest local gang, the White Hand, and in that alone, the monthly operating costs of the venues, the protection fees, were a considerable amount.

Yet again, these pale in comparison to other income.

Almost every gang does something else incidentally in the venues they watch over, such as a bar controlled by the club, and if someone is dealing in white flour, then the club gets a cut of that, otherwise those guys don't get to sell in the venue.

And outside, there is always the risk of being caught by the police, but not in this bar .....

This income alone is an extremely large sum of money every year.

What's more, many gangs also deal directly in white flour, so they need territory and the venues they need to sell .....

Of course, the income of the gangs is much more than that. As far as Ji Yu-yi knows, the most profitable business of the Yakuza is actually the sale of white flour, as well as the smuggling of cars and arms.

Now that the Yakuza in New York had been wiped out by Ji Feng, these industries, even if they could not be taken up by the Chuk Yuen Gang, would at least have a large portion of them in the hands of the Chuk Yuen Gang, which was a huge amount of money.

Ji Feng actually said that these were all rewards for her, which made Ji Yuwen speechless.

If providing a piece of information and preparing a few glass cutters was all it took to get this, then there was really nothing in this world that could be more lucrative than this!

This was simply faster than robbing a bank!

So Ji YuYi just laughed bitterly and said, "Ji Feng, if you don't want it, how can I be at ease?"

Other people might not know, but Ji Yuhui was very clear that in fact, she really hadn't done anything, the Yamaguchi group, all of them, had fallen into Ji Feng's hands.

Ji Feng's strength was so strong that it was simply terrifying!

Therefore, even if there was more money, Ji Yuoyi could not keep it to herself, she could not and likewise did not dare.

No one knew better than Ji Yuhui how powerful Ji Feng was!

Ji Feng was able to take out the lair of the Yakuza with just two of his men, but the Chuk Yuen Gang was even weaker than the Yakuza. If they angered Ji Feng, how could the Chuk Yuen Gang resist his wrath?

Ji Feng smiled, "Then you can save it for me first."

Ji YuYi pondered for a moment before smiling, "Alright then, it's a deal, let's call it a share for you, I will give you regular dividends."

Ji Feng smiled and nodded, he really didn't care if he shared the dividends or not.

It's not that Ji Feng didn't care about money at all, as a poor person, Ji Feng was actually very thrifty, only that Ji Feng didn't want to get involved in these businesses.

What's more, the Yakuza had left behind a lot of territory and many industries, but these things always needed someone to run them, and Ji Feng had little interest in this, nor did he have the energy to do so.

In fact, saying that he was putting his share of the money with Ji Yuoyi was just a casual remark by Ji Feng. He took action against the Yakuza with the sole purpose of killing all those who dared to threaten his little aunt's family, especially the boundary tent people, who could not be left behind.

As to whether it was for the sake of making money, Ji Feng did not think about it.

The two talked a few more words and were ready to hang up the phone.

Ji Feng suddenly had a movement in his heart and said, "YuYi, this matter, I still hope you can keep it a secret for me."

Ji Yuhui smiled lightly and said, "Don't worry, I know what to do even if you don't say anything."

The top echelons of the New York Yamaguchi-gumi had been directly taken out of the pot.

This was no different from breaking an arm of the entire Yakuza. If the Yakuza headquarters in the boundary tent got the news and knew that it was done by Ji Feng, they were afraid that they would stop at nothing to take Ji Feng's life.

With the Yakuza's wealth and strength, it would be really easy to send a few world-class top assassins. The danger that Ji Feng would have to endure at that time was self-evident.

"This operation, we in the Chuk Yuen Gang are also considered to be part of it, if the news leaks out, it will do us no good as well." As if to reassure Ji Feng, Ji Yuqing added.

"That's good."

Ji Feng nodded with a smile and said, "Keep in touch."

Ji Yuhui gladly said, "Keep in touch."

After hanging up the phone, Ji Feng scanned the phone screen again and couldn't help but raise an eyebrow, it was already almost dawn!

"Looks like there's no way to sleep tonight." Ji Feng shook his head, the good thing was that he was overly energetic, it didn't matter if he didn't rest for a night, it was only after dawn that he needed to deliberate on how to talk to his sister-in-law.

"How should I say it ....." Ji Feng casually lay on the bed and fell into deep thought.

.....

At this moment, Ji Feng, who had already left the matter of the Yamaguchi group behind, naturally did not know, because of his thunderous measures against the Yamaguchi group, how big a storm the entire New York underground world had actually set off!

The Yakuza in New York, the top brass above the rank of hall master, had been wiped out, dozens of Yakuza hall masters, generals, and even all of them including the head of the association, Taro Sakata, had not escaped, all of them had been blown up in Taro Sakata's villa.

In addition, most of the elite members of the Yamaguchi-gumi's operation team were also killed in the villa.

All together, there were two hundred of them!

No one was spared!

As those guards who happened to be on guard on the hill at the time of the explosion and were lucky not to have been killed because they were too far away from the villa were questioned by the police, the news, from the New York police station, spread uncommonly throughout the city's underworld, and even, many people in cities outside New York, learned of the news.

For a time, there was silence.

All those who learned the news were dumbfounded, unable to speak for a long time.

How is this possible?

This was the first reaction of all those who had received this news, and their reactions were all surprisingly unanimous after learning of it.

..... were all so shocked!

Unbelievable!

Anyone who had even the slightest knowledge of the Yamaguchi-gumi, after hearing this news, there was not a single person who was not shocked beyond belief and stood frozen on the spot!

Over two hundred people!

Among them were the Yakuza's gold medal fighters, the war veterans, and so many members of the elite operations team, how could they have been wiped out?

No one dared to believe their ears, it was unbelievable!

They immediately poked around again, yet the news they got was the same, and moreover, it came directly from those members of the Yakuza Action Group who had managed to stay alive.

At this moment, they finally believed that the news they had received earlier was true.

All the top brass of the Yakuza chapter in New York, the big generals, had really been wiped out in one fell swoop!

And they also got an even more shocking news – the Yamaguchi-gumi, it seemed, had been taken out in less than an hour!

It was so shocking!

However, as the intense shock and disbelief faded, another thought flashed through the minds of all these people – who did it?

Could it be the Rice military?

Or did the mercenaries from ..... use heavy weapons?

Apart from the Rice military and those iron-blooded and ruthless mercenary corps, they really could not imagine who else could have taken out so many people from the Yakuza in just one hour.

They had weapons in their hands, they were well-trained, even battle-hardened!

How could they be taken out in such a short period of time without even the slightest resistance?

Even the most powerful White Hand in the underground world could never have taken out the Yakuza in such a short period of time!

Who did it?

A foreign man in his fifties or sixties was looking in shock at a man of his age in front of him, except that the former was wearing pajamas and looked imposing, while the latter was dressed in a suit and bow tie even late at night, looking like a foreign butler or something.

“The Yamaguchi-gumi has been destroyed? Who the hell did that? Could it be that those b\*tch politicians in the Rice government are going after the yakuza?”

The foreign man in pajamas had a look of shock and fear on his face as he asked furiously, “The Yamaguchi-gumi is so powerful and that gang of boundary tent monkeys are so militant and vicious, how could they be wiped out in an instant? What the hell is going on here?”

The butler-like man shook his head slightly and said, “Sir, I’m sorry, we haven’t got any information about that, and it’s said that there was no trace left at the scene, so it’s hard to tell who did it! However, according to the information from our people inside the police station, one of the Yakuza guards said that they should have been assassinated.”

“Assassinated?”

The man in the pyjamas almost didn’t jump up as he roared in anger, “Hell! What the hell kind of talk is that, does he think we’re all stupid? Unless Satan has come into the world, who can take out the Yakuza by assassination? Damn it!”

Chapter 1764

Seeing the man in pyjamas in a fit of pique, the butler-like man shook his head with a bitter smile.

In fact, when he heard the news, he was equally weirded out beyond belief and almost broke into a cursing fit.

Assassination?

Could there be a more absurd speculation than that?

The strength of the Yamaguchi-gumi was such that anyone who had even the slightest knowledge of it could not help but be alarmed. In the underground world of Rice, apart from the White Hand, it is the Yakuza.

Especially in New York, this prosperous metropolis is the key territory for the Yamaguchi-gumi to develop, and the number of their men and their strength here are unmatched by any other gang.

Even if all these people were blind and didn't spot the assassin, just standing there and letting the assassin kill them at will would be enough to kill the assassin!

How could he have been assassinated?

How could it be an assassination?

Besides, there were so many members of the Yamaguchi group guarding Taro Sakata's villa, what kind of assassin could be so powerful that he could sneak into the villa without a sound and kill all those people?

Wouldn't anyone have noticed?

"Investigate! We must find out as soon as possible what really happened in the villa at that time!" The man in pyjamas said in a fury.

"Yes, sir!" The butler-like man immediately bowed slightly. He could well understand why the family head was so furious, the Yamaguchi-gumi was so powerful, and they had all been wiped out in one night, especially the top brass of the Yamaguchi-gumi, and such incredibly strong generals, none of whom had gotten away.

Not to mention other even weaker gangs?

If it was really the MiG or the military that was targeting these gangs, then the head of the family, who was also the leader of the gangs, would definitely not be able to escape either.

So now they must use the fastest time to find out what really happened to the Yamaguchi gang last night, and who, in the end, wiped out the top brass of the Yamaguchi gang in one night, with such ruthlessness, such harshness, such ..... a shock from the bottom of one's heart!

Such conversations were happening all over New York at the same time, and even in cities outside of New York, there was a lot of talk in the underground world, and everyone was shaken to the core.

Also in an estate, an old man's face was full of shock. In front of him stood a butler as well, except that this duo was a lot more composed and not as out of sorts.

"How could this happen? Butler, who did this?" The old man asked in a deep voice.

"Boss, it's not clear yet." The butler said.

"Not clear?" The old man's brow furrowed, "After such a big incident, up to now we are still not clear who did it? Where did you get this information from?"

“Yes, boss, this is the information we got from inside the police station, as for who actually did it, unfortunately, we haven’t found out so far, there doesn’t seem to be any trace left at the scene!” The butler-like man said.

If one was familiar with the White Hand in Rice, upon hearing the name ‘Boss’, one would immediately associate them with the White Hand.

The reason is that the White Hand Party does not belong to a certain family or a certain person, but multiple families have joined together to form the White Hand Party in Rice.

Above the individual families, there is an arbitration committee, the highest authority of the White Hand Party.

Each member of the Arbitration Committee is chosen from among the various families, so if the people of any family are in the majority in the committee, the power is greater.

And of these, the head of each family is known as the boss.

So, in effect, the head of each family is one of the most powerful people in the White Hand.

And this person who was called the boss would obviously be the head of the family belonging to a certain family, and the other person, the steward of that family.

At this moment, whether it was the boss or the butler, both of them were equally shocked, with a strong look of horror in their eyes, and a touch of disbelief!

Of course, the old man was slightly calmer than the butler, but the careful butler noticed that although the boss looked calm, the knot in his throat was sliding up and down from time to time, a natural reaction of the human body brought on by fear after being shocked to the extreme.

Many people’s minds go blank when they are extremely scared, and they tremble and gag subconsciously.

The boss had seen a lot of big worlds, so naturally he would not be trembling with terror in his mind like ordinary people, but his occasional gulping action was still enough to show how shocked and scared he was inside.

“Boss, could it be that the military intervened? Or was it the mercenaries who did it?” The butler guessed, “Only they would have the ability to do that, to wipe out the top brass of the Yakuza in one night!”

“Definitely not them!”

The boss, however, waved his hand and said with great certainty, “Our White Hand’s sources of information are not afraid to say that they are more extensive and well-informed than the CIA, but at least they are not too far behind. If the rice military were to make a move, or if a mercenary group were to make a move, we would have been informed beforehand, so it must not have been them!”

The butler nodded slightly.

Indeed, in Rice, the White Hand Party was so powerful that outsiders could hardly imagine it.

Don't ever think that the White Hand is just a gangster organisation that can hardly reach the top of the world, if that's what you think then you're wrong. The true power of the White Hand lies in the fact that the gang has been thoroughly integrated into all levels of society in Rice, and even a senior official of the Rice government may be a member of the White Hand.

And in recent years, the White Hand has even helped some party and political dignitaries to run for office with its huge financial and power, and its power has expanded extremely rapidly.

Under such circumstances, if someone were to take on the mob, there is no way the White Hand would not know about it.

So it was clear that there must have been some reason unknown to the White Hand that caused the Yamaguchi-gumi to be wiped out overnight.

"Keep a close eye on it and make sure you find out who really did it!" The old man said through clenched teeth.

"Yes! Boss!"

The ripples caused by the top brass of the Yamaguchi-gumi being wiped out overnight spread rapidly, and after just a few hours, almost the entire country of Rice already knew the news.

And at the same time, some were shocked, some were scared, others were furious and even furious.

At this moment, the King, who was far away in the Atlantic City of Rice, had likewise received the news.

"What?!"

In the middle of a darkened room, the faint light emitted from that mobile phone shone into a pair of eyes as fierce as a hungry wolf, and immediately afterwards, a roar came out of the room, "How is this possible! How can the Yamaguchi-gumi be wiped out? What the hell is going on?"

Quickly, Master Wang casually took a mask from the bed and put it on his face, while sitting up in shock, "Tell me clearly, what is going on?"

As the voice on the phone recounted, those eyes gradually filled with shock, and the king's breathing became more and more rapid.

"Only some of the guards managed to stay alive?" The king's voice trembled a little as he asked this.

"Who the hell did this?" The king roared low.

There was a shocking explosion at the villa of Yamaguchi-gumi leader Taro Sakata, which was blown into ruins, and no one in the villa survived, including Taro Sakata and the majority of the Yamaguchi-gumi's hall masters, a full two hundred people were killed in the explosion .....

This news, forgive how calm the king is, but also was shocked for a long time did not react.

How could this be possible!

This kept echoing in his head, how could the Yamaguchi-gumi be wiped out in one night, this was a fantasy from the sky!

However, the news that came over the phone was such that Master Wang could not help but believe that this was the truth.

“Was it an assassination?” The king’s body shook.

.....

“Thank you, I understand .....,” Master Wang hung up the phone, and those originally fierce eyes were now filled with bewilderment, shock, and ..... fear!

According to the guards who managed to survive at the scene, they heard gunshots in the villa, and it was likely that someone had infiltrated the villa and carried out an assassination on the top brass of the Yakuza, which caused such a terrible consequence.

..... assassination!

Just hearing these words, the king was shocked beyond recognition.

Just how perverted must one be to be able to enter a villa guarded by so many people like no one’s business, and finally detonate the villa and kill over two hundred people?!

It was unimaginable!

Is there really such a person in this world?

What had happened in Taro Sakata’s villa last night?

All of this, the king had no way of knowing.

What’s more, right now he didn’t even want to think about it either, because the moment he got the news, his heart lifted – he was worried about something else!

“The laser gun!” At this moment, the King panicked, “Has anything happened to the laser gun?”

“.....”

No one could answer his question.

Yet the king could no longer sit still, he hurriedly got up from the bed, dressed and hurried to the door of the other room and knocked on the door.

“The child, the child .....,” the king shouted urgently, at this moment he was completely devoid of his usual gloom and calmness, he was simply like a death row prisoner who was on the verge of a catastrophe in fear.

“BANG BANG BANG~!” Seeing that there was no response inside the room, the king knocked hard again with unparalleled eagerness a few times.

“Father, I, I can’t get up .....,” came a voice from the room.

The king then remembered that his son could not get out of bed and walk around if he was lying in bed without help, and if he needed anything, he always called the attendants directly .....

“Squeak-!”

The king hurriedly pushed the door and walked in, only to see that his son had already put on his mask.

If it was in normal times, the king would have praised his son for knowing how to be cautious at all times and not revealing his identity so easily, yet now, he was all but unable to care about that.

“Son, something big has happened, we have to rush to New York immediately.” As soon as he entered the room, the king said urgently.

Chapter 1765

“Son, something big has happened and we need to get to New York immediately.” The King said eagerly as soon as he entered the room.

“Something big has happened?”

The young grandson was a little bewildered and more than that, he was in a state of shock and disbelief because he saw the look in his father’s eyes and the tone of his voice, as if he was in a state of panic, usually no matter how big things went wrong, even when the family was crushed, his father had never been so frightened, what had happened that could make his father so scared and panicked?

The king said, “The Yamaguchi-gumi chapter in New York has been wiped out! We need to rush over there immediately .....

The young duke was shocked, “The Yakuza was wiped out? The White Hand did it? Or the MiG, or the military?”

The king said, “It should be neither, according to the memories of those who survived, it seems that they were assassinated.”

“Assassination?!”

Little Duke exclaimed at once, “What assassination could wipe out the Yamaguchi-gumi? Even a world class assassin doesn’t have this ability, right?”

The king said, “We don’t know who did it yet, but it’s very possible that someone infiltrated Sakata Taro’s villa, and although the villa exploded later, we have no way of knowing what happened in the middle, so we have to get there as fast as we can.”

The youngest son was a bit puzzled: “Father, why are you in such a hurry? Although we have a good relationship with the Yamaguchi-gumi, we are two different organisations after all. Moreover, this is Rice, even if something happens to the Yakuza, the dynasty can’t just sit back and do nothing, then at least it should be the person in charge of the New York side who is in a hurry, we are only in charge of the Chinese region, and we are not too familiar with them .....

The king said in a deep voice: “We have to go!”

The young duke was stunned, “Father, what’s going on?”

He felt that his father seemed a bit different today, very odd. Even if someone else from the Yamaguchi group had destroyed them, then it should be the head of Dynasty in New York who went to contact

them, they were in the same city and must be a little more familiar with them, but how could his father be so anxious and even so panicked?

The king gritted his teeth, turned back and closed the room door, then walked back to the bedside, lowering his voice and saying in a deep voice: "Son, something big has happened ..... to avenge your death, I used my connections to steal a new type of weapon that was newly developed in the organization. Because the Yamaguchi group is mainly responsible for all kinds of smuggling between the boundary tent and Rice, so I let a relatively close friend in the Yamaguchi group bring the weapon from the boundary tent to Rice."

"I originally planned that after the organization sent that ancient martial arts expert over to cure you, then we would bring people to sneak back to China again, and by then even if Ji Feng was more powerful, he would die without a burial in the face of the organization's newly developed weapons."

"But I didn't expect that before that expert in ancient martial arts arrived, something would happen to the Yamaguchi group first!" The king said through gritted teeth, "If someone really infiltrated into Sakata Taro's villa before something happened to the Yamaguchi group, then there's no guarantee that that new type of weapon won't be taken away, and if that's the case, then the consequences would really be unthinkable!"

It was no wonder that his father was so anxious, it turned out that the newly developed weapon of the organisation had been stolen by someone he had sent.

"But father, even if that new type of weapon falls into the hands of others, without all kinds of technical parameters and drawings, it would be impossible for others to imitate it, right?" The young duke said, "Besides, with your position in the organization, I believe that just a new type of weapon will definitely not be punished too heavily, you don't have to be so anxious ....."

The king shook his head helplessly and said, "You don't understand! How powerful this new type of weapon really is, if you didn't see it with your own eyes, you wouldn't be able to imagine it! It was only when I went back to the organisation's headquarters last time that I saw this weapon, it was just too powerful!"

"Now this weapon has only just been developed, it has just gone through the first stage of testing, the subsequent testing and testing has not even been completed before I stole it, do you think if the organisation knew about it, it would let me off easily?"

"Then, what then?" Little Duke panicked, if the organisation was going to go after them, they would really have no way to escape!

"So, just in case, I stole all the drawings and research materials of that kind of weapon along with it, and eliminated all traces of it." The king said, "Originally, I was planning that when I got the weapon, I would take out all the people who knew about the Yamaguchi-gumi, so that no one would know that the weapon was in my hands."

The young lord nodded slowly, indeed, with his father's energy, it was not difficult to achieve this step.

The king said in a hateful voice, "But how could I have ever imagined that the Yamaguchi group would be in trouble early! Now that kind of weapon still does not know whether or not it was destroyed in the

explosion, if it was stolen, once it gets out, the organization will definitely get wind of it, then as long as it is traced down, it can definitely be traced back to me, by then, not to mention avenging you, wiping out the Ji family, whether we can protect ourselves will have to be said separately .....

The king really hates it!

His son was severely injured several times, even his life was hanging by a thread, and, also, it was all Ji Feng's hand!

His own family, too, had been dealt a merciless blow.

How could the prince not hate?

He really hated Ji Feng, even the entire Ji family, and he could not wait to have Ji Feng's corpse on the spot right now, so that the Ji family would immediately be destroyed!

And this time, his son had been crippled again!

Even the organization's best medical experts were at their wits' end, and in the end, they could only turn to the nebulous Chinese ancient martial arts, and it was still unknown whether they could cure their son.

Under such circumstances, the king's heart was instantly filled with hatred.

He wanted revenge!

At the very least, he would never allow himself to watch his son just sitting in a wheelchair while Ji Feng enjoyed his life as a young master of a magnificent family, living a life of leisure and happiness!

Therefore, the king stole a newly developed high-tech weapon from the organisation, and was prepared to find the opportunity to kill off Ji Feng and his family one by one when he returned to China, so that they could also taste the painful taste of their loved ones being tortured.

However, the king did not expect that the plan, which was going smoothly, would suddenly have an accident in the middle of the process, and it was such an unimaginable accident – the Yamaguchi group had been destroyed overnight.

This was unbelievable.

But to the king, it was like a thunderbolt, making him almost unable to stand.

He had to get to New York as fast as he could. If he could get his weapons back, then everything would be fine. The Yamaguchi-gumi was just a gangster organisation, so it was no big deal if it was wiped out, but if the weapons could not be recovered, then there would be real trouble.

If the organisation found out what he had done, they would not even have to be exposed, and there would be no place for them in the whole world.

The only thing that awaited them was death!

So as soon as he heard the news that the Yamaguchi-gumi had been destroyed, the king's hands and feet were as cold as if a great calamity was at hand.

Now that he had slightly stabilised his emotions, he was going to take his son with him and rush off to New York.

Even if the weapon really could not be recovered, he would have to find a way to escape with his son, or see if he could find some way to make amends .....

“Son, hurry up and get dressed, we have to get to New York immediately! We can’t afford to delay!” The king said eagerly.

“Good!”

The young duke immediately nodded his head, and he too realised the seriousness of the matter.

No wonder his father had to rush to New York, if the weapon was found by the New York branch first, or if they got wind of it, or if something else happened, then there would really be no place for them as father and son anymore.

In fact, there is competition between the various branches of the dynasty, because your performance determines your status in the organisation, and consequently, the amount of resources you can enjoy, and the distribution of other benefits.

If the New York branch knew about it, the headquarters would definitely know about it, and at that time, I’m afraid that the whole world would know about the identities of their father and son.

At that time, not to mention seeking revenge on Ji Feng, they would be thanking the heavens if they were not chased by Ji Feng to the ground.

Father and son hurriedly dressed and packed their bags, and then led the way to New York.

While they were worried, they were also puzzled and shocked – who on earth could have wiped out the Yamaguchi-gumi?

The Yakuza had been assassinated .....

Is there really such a supreme master in the world?

The two of them could not have imagined that the person who had single-handedly wiped out the Yamaguchi Group and shocked the entire underground world of Rice, and even the entire underground world of the world, was the person they hated the most, and could even be said to hate to the bone – Ji Feng!

And as it turned out, when the father and son duo of the King knew that it was actually Ji Feng who had exterminated the Yamaguchi Group, the kind of shock they felt was beyond words.

This news made them stand on the spot in shock, as if they had been struck by lightning!

That feeling, perhaps they would never forget in their lifetime!

At this point, however, the two of them were still holding on to a ray of hope, trying to find the new weapon that was nowhere to be found.

In fact, in their hearts, they might not even believe that it was only two people who had destroyed the Yamaguchi-gumi .....

At this time, the entire underground world of Rice was shaken .....

However, as one of the parties involved in this event, Ji Feng was acting as if nothing had happened, he even left that incident behind and just stared at an object in front of him, frowning, with a grave look in his eyes.

–Laser gun!

Chapter 1766

“Click~~!”

“Ka~~”

Ji Feng took the laser gun that had been brought along from Sakata Taro’s villa and quickly fiddled with it a few times.

Immediately after that, Ji Feng’s frown tightened.

Ji Feng found that this laser gun was very different from the laser guns he remembered from the Gamma Galaxy, at least, from the appearance, there was almost nothing that was the same.

Whether it was the material, or the shape, or even the parts inside, there was nothing that looked the same.

Of course, as for the structure inside and whether the principle of this laser gun was the same, Ji Feng didn’t know yet, but I thought that since even the intelligent brain had confirmed that this was indeed a laser gun, I thought that the firing principle should be the same.

The fact that Ji Feng deliberated and even used his perspective eye to look at the internal structure of this laser gun did not ease the gloomy look on his face, but rather his expression seemed even heavier.

What was certain was that this was indeed a laser gun!

There was no doubt about it.

After Ji Feng activated his penetrating eyes, he could clearly see the internal structure of this laser gun. He found that although this laser gun was very different from the laser gun of the Gamma Galaxy in his mind, both in terms of structure and appearance, it did not seem to be the same kind of thing at all.

However, what really made Ji Feng confirm that this was a laser gun was that inside the laser gun in front of him was a metal sphere about the size of an adult’s fist.

Inside this metal sphere was a material that emitted a special laser.

This material, after being stimulated by special means, emits an extremely powerful laser, and through the unique structure of the laser gun, this laser is amplified countless times, and the laser’s energy is enhanced to an extremely terrifying degree.

With this laser strike of terrifying energy, nothing can resist.

Moreover, there is no possibility of this laser missing, as long as it is aimed, it will shoot straight through, and as long as the energy is sufficient, it is theoretically possible to hit infinite distances, moreover, that speed is even as fast as the speed of light.

If a person is faced with this kind of laser gun, unless he can use the kind of material that is specially restrained to block the laser, otherwise, there is no way to dodge or resist, there is only one way to die.

Therefore, in the Gamma system, warriors wear a protective suit, which is made of materials that are specially resistant to radium, combined with some other unique materials, but it is only barely able to resist the radium.

However, if the intensity of the laser reaches a certain level, the suit will not be of much use.

That's what makes the laser gun so terrifying!

It is also because the killing power of this laser light is so terrifying that it is widely used in the military in the Gamma system, and in turn, more powerful laser weapons are developed, as well as laser guns.

Even some space fortresses are equipped with laser cannons, but of course of a much larger calibre.

Once fired, a few shots of this type of cannon could destroy an asteroid .....

This shows how terrifying this kind of laser light is, and how powerful it is, to what extent!

Ji Feng never thought that this kind of terrifying weapon, which originally existed only in the distant outer galaxy of the universe, would be seen on Earth, and, moreover, appear right in front of his eyes, or in a way that he did not expect, suddenly.

Originally, Ji Feng only wanted to see what exactly was hidden so tightly by Sakata Taro, but he did not expect that he would make such a discovery that would take him extremely by surprise.

The Yamaguchi-gumi actually had laser guns!

This was something that Ji Feng had not expected in any case.

But it was a fact, and now this laser gun was in Ji Feng's hand, which could not be denied in any way.

Ji Feng's expression could not help but become even more grave, the Yamaguchi group had a laser gun, what did this mean, no one knew better than him.

He knew the power of the laser gun better than anyone else, because he had seen it with his own eyes when it was fired, and that kind of terrifying power was really impressive.

Yet, now this terrifying weapon was appearing in the Yamaguchi-gumi.

Where had they gotten this thing?

Did the Yakuza build it themselves?

Or was it .....

Did they get it from somewhere else and hide it away as a treasure?

These questions are nowhere to be found out, and Ji Feng naturally could not think about it, nor could he figure it out, because the Yamaguchi group's hall masters had all gone to meet their Great God Amaterasu with the violent explosion in the villa, and the origin of this laser gun had become a mystery.

However, Ji Feng had to be cautious, what he was most concerned about was, who had made the laser gun?

This was the most important thing!

Although the power of a laser gun was enormous, and could even be described as terrifying, to create such a terrifying weapon, however, required an extremely high level of technology, and there was an even more important point – the material!

Radium is not an ordinary laser, and it is extremely difficult to find materials that can emit this kind of laser, at least for now Ji Feng does not know, among the various materials he knows, what is capable of emitting this kind of laser light.

Even in the Gamma Galaxy, the laser weapons that had started out were just another kind of laser. It was only after many years of development that the scientists stumbled upon a very unique material, which led to the development of this laser gun. Then after continuous improvement and research, finally the laser gun that is commonly equipped with the army appeared.

Moreover, that material, which can emit laser light, was also found on a planet deep in the universe, which is also known as a resource mining star, and is of course the target of competition among the various countries of the Gamma system.

But now, when laser weapons rarely appear on Earth, a laser gun has actually appeared first!

Does this not mean that someone has already mastered this technology and can easily create laser guns that can only be found in distant outer space?

"Master, this laser gun, it's not perfect." The intelligent brain's voice suddenly sounded in Ji Feng's mind.

"It won't be perfect?" Ji Feng was stunned, "What do you mean?"

"This laser gun has flaws in its design, it can't be considered a true first generation laser gun." The intelligent brain said, "Strictly speaking, this can only be considered a prototype, it's still a long way from a real laser gun."

"Is that so?"

Ji Feng picked up the laser gun again, stared at it carefully for a long time, couldn't help but shake his head and said, "Is there a problem with the defensive measures?"

"That's right, although it hasn't been tested, but based on the principle of the laser gun it can be seen that what this laser gun has done in terms of safety is not enough, and when it is excited, it will cause harm to the user himself." The intelligent brain said.

"There will be radiation!" Ji Feng nodded his head.

Originally, he hadn't noticed it, but after Ji Feng was reminded by the intelligent brain, he realized that the design of the laser gun wasn't perfect.

The first thing that a laser gun that could truly be used to equip the army had to ensure was that the user himself would not be harmed in any way, because when the laser light was excited, it would be accompanied by radiation, and there was no doubt that the user was closest to the laser gun and would be exposed to the most radiation.

Under such intense radiation, it would not take long for the user's health to develop problems.

The laser guns that can really be used in the army do not have this problem at all.

The source of the radiation has been strictly isolated and when it is activated, all the energy and radiation is transformed into radium light and emitted without causing any harm to the user at all.

And because the radiation is converted into radium light, even the target that is hit is not exposed to radiation.

A real laser gun, so to speak, does not cause any harm other than physical damage to the target.

If we look at it from this point of view, this laser gun in front of us is still far from a real laser gun!

It would not be an exaggeration for ..... to say that it was a half-baked product.

"So in that case ..... no one has mastered the technology of manufacturing laser guns yet, or to say the least, not fully?" Ji Feng couldn't help but say to himself, but he soon shook his head again and said, "No!"

Even if the other party had not yet mastered the technology to actually manufacture laser guns, the fact that they were able to manufacture such semi-finished products was already remarkable.

The most crucial thing was, who, exactly, would think of making a laser gun?

One must know that this type of weapon, the laser gun, was only a concept in the world, at most it was only under research, it only existed in theory.

But now, Ji Feng had seen a half-finished product!

What surprised Ji Feng even more was what the intelligent brain said next.

"But ..... this laser gun is very imperfect, but the shape and the vast majority of other constructions are the shape of the first generation of laser guns, and if the safety issue can be solved, this is a truly perfect first generation laser gun." The wise brain said.

"What?"

Ji Feng was stunned and asked in consternation, "Wisdom Brain, do you mean to say that this laser gun, as long as the safety issues are solved, is actually the first generation laser gun of the Gamma Galaxy?"

The Wise Brain nodded and said, "Yes. Exactly the same."

Ji Feng was immediately shaken, his hands and feet were a little cold, and he couldn't help but ask in a deep voice, "That means, in fact, this gun was not developed by someone or some team on their own,

based on the theory of the laser gun, but they originally knew about this laser gun of the Gamma Galaxy, and just built it according to the technology of the Gamma Galaxy?"

The intelligent brain said, "It can be explained in this way."

Ji Feng was silent, his eyebrows furrowed tightly and twisted into a deep 'Chuan' character.

His heart, however, was flooded with waves of shock.

How could it be like this?!

How was this possible?!

Chapter 1767

The laser gun in front of you, the one used, is actually Gamma technology?

And .....

The brain even said that if the safety issue of the laser gun is solved, this is a real first generation laser gun of the Gamma system!

There is no doubt that the people who made this laser gun definitely mastered the Gamma Galaxy technology, otherwise, how could they have made this Gamma Galaxy first generation laser gun?

Of course, maybe there is a coincidence too .....

For example, someone proposed the concept of laser guns, and next, there were special scientists studying this aspect, and as a result, coincidentally, after countless trials, they very coincidentally found the method of manufacturing laser guns, and the laser guns manufactured by this method are the first generation of laser guns in the Gamma Galaxy!

Of course Ji Feng had to admit that the possibility of such coincidence did exist, there was no doubt about it.

However, it must also be recognized that the probability of such a coincidence occurring is really too small to be exaggerated, and it is not even an exaggeration to say that the probability is one in a billion.

Imagine one is in a distant gamma system and the other is on Earth.

The two places are separated by an incomparably long distance, and it is simply impossible to communicate with each other. Therefore, Ji Feng can be sure that it is absolutely impossible for someone to obtain the technology of manufacturing this kind of laser gun from a certain country in the Gamma system, and with the current level of technology on Earth, it is simply a fool's dream to achieve interstellar navigation.

Since they cannot interoperate, the people on Earth cannot learn the technology of the Gamma system.

More importantly, the distance between the two sides is so long and so far away that the customs and habits of the two sides, their social environment and the development and evolution of human society are all very different.

Perhaps the humans of the Earth and Gamma galaxies ..... might be called humans, or at least aliens ..... There is only one thing in common between the two – both are higher intelligent beings, humans. Both have their own social systems and their own civilizations.

In addition, Ji Feng really can't think of anything else that is the same between the two sides.

If that was the case, then naturally the scientists on Earth could not be exactly the same as those in the Gamma Galaxy when they designed the laser guns.

The different origins and upbringing of the two sides dictated that their thinking and ways of thinking were also very different when they thought about things.

Although we cannot say who is superior or inferior, at least both sides will certainly not think exactly the same.

In fact, not to mention the scientists on Earth and the scientists in the Gamma system, even if it is just on Earth, between two equally incomparable scientists, their way of thinking and ideas will not be exactly the same, even if they both specialise in the same field, their ideas will still be different.

But the fact of the matter is that there is indeed a laser gun on Earth, and there are some flaws in its design and manufacture, but there is no doubt that it is indeed Gamma technology.

Could it be that the scientist who made the laser gun was really thinking exactly the same way as the Gamma scientists?

The chances of such a possibility are so small that one could figure out with one's toes that the chances are so small as to be almost non-existent!

Therefore, to say that the design idea of this laser gun is exactly the same as the design idea of the Gamma scientists is just a coincidence, Ji Feng would not believe it.

As long as one is not a fool, one will definitely not believe it.

Then .....

How did the human beings on Earth, create the first generation of laser guns in the Gamma Galaxy?

How was this possible?

"What the hell is going on here? Did this laser gun fly over from the Gamma Galaxy by itself?" Ji Feng couldn't help but be secretly surprised, "It's unbelievable!"

"To say that there are some talented scientists on ..... Earth who are super talented and based on some scientific conjecture of the concept of a laser gun, and thus designed and manufactured an imperfect laser gun, this is understandable, but the key problem is that this is actually completely the technology of the Gamma Galaxy, which is really unimaginable!" Ji Feng's heart was very unsettled, one could even say that he was shocked.

For a while, Ji Feng didn't say a word, just staring at the laser gun in front of him.

Only after a long time did Ji Feng ask in a deep voice, "Intelligent Brain, are you sure this is the technology of the Gamma Galaxy?"

The intelligent brain's voice rang out, "Yes master, this is indeed a first generation laser gun!"

Ji Feng frowned and asked, "Then why did ..... appear here?"

The intelligent brain said, "Master, there is not enough information to answer."

Ji Feng couldn't help but sigh lightly, although the intelligent brain was an artificial intelligence, it wasn't an all-powerful god, so naturally, it couldn't know why the first generation of laser guns had appeared on Earth. Moreover, when the intelligent brain made a judgment on a thing, it relied on its database, and if there was no information in the database in this regard, it naturally could not answer.

However, this kind of thing, Ji Feng could only discuss with the intelligent brain, and could not let anyone else know, which also made Ji Feng somewhat helpless.

After pondering for a moment, Ji Feng suddenly asked, "Wise Brain, do you think ..... there will be another artificial intelligence program like you that has come to Earth from the Gamma Galaxy?"

This was the question that Ji Feng was most worried about.

In fact, from the moment he saw this laser gun, Ji Feng could not help but thump in his heart and sink downwards subconsciously, especially after the confirmation from the intelligent brain that it was indeed a laser gun, Ji Feng could not help but be secretly shocked, could it be that there was still an artificial intelligence on this Earth?

However, by the time the intelligent brain said that this laser gun was exactly the technology of the Gamma Galaxy, and once the safety issues were taken care of, it would be the perfect first generation laser gun, Ji Feng was almost about to exclaim in shock.

He immediately wondered if there really was this artificial intelligence that was just like a wise brain that had come to Earth?

As incredible as this sounds, if you say it out loud, I'm afraid nine out of ten people will think you're nuts, and the remaining one will probably scoff at you and won't believe such nonsense at all.

After all, human beings have been exploring extraterrestrial life for many years, but no trace of extraterrestrial life has ever been found, so gradually the vast majority of people are only curious about extraterrestrial space, but it is still unlikely that they will really believe it.

Others did not believe, but Ji Feng did.

Not to mention the fact that there was an alien artificial intelligence from the Gamma system in his head, this was a real fact.

Since he could get an alien AI, was it possible that other people could also get one?

This speculation made Ji Feng's heart very apprehensive.

So he couldn't help but ask, "Intelligent Brain, do you think there is such a possibility?"

Instead, the intelligent brain did not answer immediately, but after a moment, it replied, "Master, theoretically speaking, there is such a possibility."

Ji Feng was instantly shocked, "Is there really such a possibility?"

"Yes, master." The Wise Brain said, "The arrival of Wise Brain One is an example of this."

"That's also true, if you can come to Earthbound, why can't other AIs come over?" Ji Feng nodded slightly, what Wisdom Brain said was not without reason. The Wise Brain One it spoke of was also itself, which was a customary name it used for itself.

The Wise Brain said, "However, according to the calculation and analysis, the probability that there are other artificial intelligences coming to Earth is very small."

Ji Feng's eyes lit up at once, "Oh? Why do you say that?"

The intelligent brain explained, "Because the Gamma Galaxy is too far away from Earth, if we just rely on the AI itself, it cannot move on its own initiative, it must have a carrier and also have enough energy to move. For example, Smart Brain One, however, is also because of the destruction of the Gamma Galaxy, and with many small probability events happening at the same time, it only had enough energy to come here along with a stream of particles."

Ji Feng nodded slightly, how the Smart Brain came to be, he naturally knew very well long ago.

However, Ji Feng was the one who caught the point in Wisdom Brain's words.

He immediately asked, "Wise Brain, you mean that if the artificial intelligence of the Gamma Galaxy wants to move, its prerequisite is to have a carrier and also have enough energy?"

"Yes, Master."

The intelligent brain said, "Without a carrier, the AI cannot sustainably survive, and without energy, it cannot travel through the universe."

Ji Feng immediately asked, "That's why you said that the possibility of other AIs coming to Earth is very small, because to meet these conditions at the same time, and also under the condition that all kinds of small probability factors are working at the same time, the AI can come here?"

The intelligent brain said, "Yes. At the time of the destruction of the Gamma Galaxy, all kinds of possibilities will be there, so those small probability factors may not be unable to happen at the same time, and from this, there is the possibility of another AI coming to Earth Row."

Ji Feng's heart sank downwards, doesn't this mean that on Earth, there really is another artificial intelligence?

"But ....."

When the intelligent brain just spoke, Ji Feng immediately asked, "But what?"

The intelligent brain explained, "However, even if those small probability factors happen at the same time, but, in the cold and dark universe, it is very difficult, or even almost impossible to obtain enough energy, the odds are so small that they are almost negligible, of course, Intelligent Brain One is a special case."

Ji Feng's eyes couldn't help but slightly brighten up, "Wise Brain, according to you, all the conditions are difficult to meet at the same time, so the possibility of having another AI coming to Earth is actually very, very small, is that right?"

"Yes, Master." The intelligent brain said.

"Is that really the case?" Ji Feng couldn't help but whisper softly to himself as he jerked his head up again, looked at the laser gun in front of him and asked, "Since that's the case, then how can the appearance of this laser gun be explained?"

Chapter 1768

"Is that really the case?" Ji Feng couldn't help but whisper softly to himself as he jerked his head up again, looked at the laser gun in front of him and asked, "In that case, how can the appearance of this laser gun be explained?"

"It cannot be explained." The intelligent brain said, "Because there are too many possibilities."

"Like what?" Ji Feng eagerly pursued the question, this matter was so important that Ji Feng, who had always been calm and steady, could not sit still a bit.

"For example, perhaps the most unlikely thing happened, but it really happened." The intelligent brain said.

"..... That is to say, those probable events with extremely small odds have happened, and so there really is a second artificial intelligence that has come to Earth!" Ji Feng's voice was a little heavy.

"It can be understood like this." The intelligent brain said, "This is one of the kinds of possibilities."

"Phew~~!"

Ji Feng couldn't help but let out a sigh, his heart was even heavier, could it be that a second AI had really come to Earth?

At this time, the intelligent brain's voice sounded again, "And then again, it's just a coincidence."

"Coincidence?"

Ji Feng shook his head with a bitter smile and said, "In this world, how can there be so many coincidences! Even if there really is something that coincidental, it's still man-made."

Of course he understood what the intelligent brain meant, the intelligent brain was saying that the laser gun in front of him was so similar to the first generation laser gun of the Gamma Galaxy that it could even be completely said to be the first generation laser gun of the Gamma Galaxy as long as the safety issue was solved, in fact, such was just a coincidence.

This is because certain scientists on Earth, when developing it, happened to make the laser gun just like this, and it just so happens that the trajectory of technological development on Earth, especially in the development of a weapon like the laser gun, overlaps with the trajectory of the development of the laser gun in the Gamma system.

That is why this imperfect laser gun appeared.

This was what the intelligent brain meant.

Ji Feng couldn't help but shake his head and smile bitterly, the intelligent brain is only analyzing with its intelligence, in this regard, it is far from being able to compare with real humans, after all, even if the intelligent brain is analyzing, it is also very logical, unlike humans, who will know how to speculate, know how to assume .....

What's more, the intelligent brain analyzed this result, Ji Feng really does not dare to agree.

Is there really such a coincidence?

Two places that are so far apart, with no idea how many star rivers in between, it's not even too much to say that they span the universe, and on the issue of laser guns, the trajectories of the two places are actually exactly the same?

Ji Feng did not believe that such a coincidence could really happen!

Why was it that only one technology, the laser gun, had such an amazing coincidence above it, but not the others?

Therefore, Ji Feng would rather believe that the Yamaguchi group ..... should strictly speaking be the person who made this laser gun, because by some kind of coincidence, he got the technology about laser guns from the Gamma galaxy, plus tried to figure it out, and this is how he made this laser gun!

Compared to the intelligent brain's so-called 'coincidence' analysis, Ji Feng was more willing to believe his own deduction.

No matter what was said now, there was one fact that could not be denied – that was, someone had really mastered the technology to manufacture the first generation of laser guns in the Gamma Galaxy, and was close to succeeding!

"..... Just who made this laser gun?" After some analysis and a long discussion with the intelligent brain, Ji Feng's mood became heavier instead of lighter.

"Someone has already mastered this technology, doesn't that mean that the other party might also have other technologies regarding the Gamma Galaxy?" Ji Feng's mind was racing, his brain was spinning rapidly, and he kept thinking.

"Then, how did they get these technologies?"

"Could it be that one's guess was true, that there was indeed another AI that had come to Earth from the Gamma Galaxy and had been obtained?" This conjecture made Ji Feng's hands and feet go cold.

If there really was such an AI, no matter who had gotten it, they would not be able to make use of it gradually like they did, and the laser gun in front of him was already enough to explain everything.

This person who had gotten the AI had set his eyes on the development of alien weapons, whether the other party wanted to create this kind of transcendent weapon that was an unknown number of years ahead of the technological level themselves and thus sell arms themselves, or whether they wanted to give this kind of weapon to the country where the other party was first ..... For China, that was not good news.

And for Ji Feng himself, that is equally more bad news!

It's not, the Yamaguchi group got such a laser gun, so it goes without saying that since the Yamaguchi group got it, the dynasty will definitely get it too!

If the dynasty gets this kind of weapon ..... imagine it, so many reformers, so strong in themselves, not even afraid of bullets, and only special forces can deal with them. If all these transformers were armed with this kind of laser gun, who else could deal with it?

"..... Wait a minute!"

Ji Feng suddenly cackled in his heart, "Dynasty?"

Dynasty ..... Dynasty .....

Ji Feng's fingers tapped his knee quickly, his expression was becoming increasingly grave, mentioning Dynasty, he suddenly thought of a problem – when he first met Wang Xin in Jiangzhou, she had said that at that time she was hired by someone and seemed to be looking for something on the internet.

And according to Wang Xin's guess, what those people were looking for seemed to be a piece of intelligent programming!

Ji Feng immediately ordered to find that piece of program as far ahead of those people as possible, but then it was a painstaking search, and eventually it was not found, so Ji Feng could only give up the search.

At that time, Ji Feng wondered if that incident was related to the dynasty. Now that he thought about it again, Ji Feng suddenly realised that perhaps, in this world, there really was another artificial intelligence in existence!

It was the same intelligent program that those people were looking for at that time!

If those who were looking for what could only be a program at the time were indeed the people from Dynasty, then everything would be able to make sense.

Transformer, laser gun .....

The laser gun is perhaps a little better, as weapons are updated quickly, and someone may be able to develop it in a few decades.

However, the dynasty's transformer, until now Ji Feng still felt very shocked.

In this world, the most complex thing is not the mysteries in the stars, nor the various changes in the microcosm, but the most complex and profound, is the human being.

A very famous scientist once said that mankind's understanding of itself is only skin deep, not even skin deep!

This shows how complex and profound the human body really is.

In the dynasties, however, they have been able to modify the human body, even to the point of removing the bones and replacing them with bones made of special materials, making the human body much stronger.

Although there are obviously still problems with the transformation of the human body, the mere fact that the human body can be transformed is a remarkable achievement.

If the dynasty had not used this technology in the wrong direction, merely transforming the human body and turning an ordinary person into a terrifying killer or a deadly soldier, but had instead used this technology in medicine for the benefit of mankind, it would have benefited the whole world and would have been a world-wide sensation.

Even, this technology would become the greatest contribution of this century!

..... Such an advanced and brilliant technology was first researched by a non-governmental organisation, and it is clearly years ahead of the world standard.

Would Dynasty's technology have reached this point if not for the help of only the program?

From these facts, I'm afraid that Dynasty really has an AI program, and Ji Feng even guessed that the AI program that Dynasty has, most likely also comes from the Gamma Galaxy!

This is very likely!

Although the intelligent brain thought that it was extremely harsh, or even almost impossible, for an AI program from the Gamma Galaxy to come to Earth intact, that was only a logical judgment it made through the data in its own database.

However, Ji Feng knew very well that even if something was even less likely, as long as such a possibility existed, it could not be completely denied.

Since the intelligent brain was able to come to Earth and enter his brain, why couldn't there be another section of the artificial intelligence program that also came to Earth and thus was obtained by the dynasty?

Obviously this possibility existed.

"Phew~~!"

Thinking about this, Ji Feng's mood couldn't help but feel heavier again, the dynasty had an AI, their level of technology was naturally needless to say, even if they couldn't grasp those technologies carried by the AI for a while, but with time, they would always slowly grasp it.

Moreover, compared to those scientists from various countries who are still burying their heads in the sand, they are already too far ahead.

The power of the dynasty would become more and more terrifying as time went on!

Especially, when Ji Feng faced such an immensely powerful opponent, the pressure he was under was, naturally, imaginable.

The only thing that was thankful now was that from this laser gun it seemed to be able to tell that the artificial intelligence program that Dynasty possessed carried technology that should not be as advanced as the program in the database of the intelligent brain, and it was a long way in between.

The reason why Ji Feng made such a judgment was based on something.

For example, the other party could only develop the first generation of laser guns, which were not yet the most perfect, and there were major safety hazards in them, which would cause extremely serious injuries to the users.

The laser gun in the intellect's database, on the other hand, was the most advanced fourth-generation laser gun in the Gamma system. And, so far at least, there is no more advanced laser gun than the fourth generation.

The reason why Homo sapiens came to Earth was because the Gamma system had been destroyed.

So there is a way to tell that the information carried in the database of the intelligent brain should be the most advanced technology in the Gamma Galaxy.

If the dynasty really had an artificial intelligence program, then its technology level would have a full three generations difference compared to the wise brain.

These advanced technologies were Ji Feng's advantage.

#### Chapter 1769

Being ahead in technology, and more than one generation ahead, was an advantage that Ji Feng possessed, and it also made him slightly relieved, and his heart, which was very heavy because of seeing this first generation laser gun, was quite relaxed.

Ji Feng had never been a pessimistic person, since this laser gun had already appeared, it always had to be faced, just being pessimistic could not change anything.

Originally, Ji Feng's mood was heavy simply because, the appearance of this laser gun was too unexpected, leaving him with no mental preparation at all. Even though he had long known that Dynasty's technology was advanced, he was still severely shaken when he saw the laser gun.

However, just after a careful analysis, Ji Feng was a lot more relaxed.

As an opponent, Dynasty was powerful, this was indeed indisputable.

However, facing such a powerful opponent, Ji Feng would not choose to retreat because he still had enough advantages. Moreover, even if he conceded defeat, what could they do, given what Dynasty was doing now, what could they do that was good?

Although Ji Feng could not be sure that this laser gun was made by the Dynasty, just a simple analysis would make it clear that, I am afraid that apart from the Dynasty, which possessed enough technology to transform the human body, there was no other individual or organisation that could possess such advanced technology.

Therefore, even though he could not be sure, Ji Feng was still able to conclude that this laser gun, in all probability, was made by Dynasty, and no one else had this ability and technology except Dynasty.

Moreover, it was very likely that Dynasty had an artificial intelligence program that also came from the Gamma Galaxy, but was far inferior to the Wisdom Brain in terms of technology.

Ji Feng put the laser gun back again and then packed it carefully in a luggage bag.

Obviously, the dynasty's technology in manufacturing laser guns had not yet reached a mature level, so this thing had great safety risks, and it was not small, so it was naturally impossible for Ji Feng to carry it around with him.

Afterwards, Ji Feng picked up the stack of information in the box and looked at it carefully.

There was no doubt that, after the confirmation of the intelligent brain, this was the technical information and various parameters of the first generation of laser guns. Only, according to the wise brain's judgment, this information was somewhat incomplete, and after comparing it with the technical information of the first-generation laser gun in the wise brain's database, it was found that this information seemed to be somewhat disconnected in many aspects.

"What's going on here? Could it be that the segment of the AI program that Dynasty got deliberately cut corners and didn't provide the real technology?" Ji Feng was secretly puzzled as he whirled around and asked, "Intelligent Brain, do you think there is any such possibility?"

"Master, it's impossible!" Wisdom Brain said flatly.

"Why?" Ji Feng immediately asked.

"Because when the intelligent programs were initially set up, they were all used to assist humans in production and work, there is no way that there would be a deliberate concealment, which is not in line with the set up procedure." The intelligent brain said.

"So that's how it is ....., " Ji Feng nodded slowly, his heart drifting off.

Indeed, the people of the Gamma Galaxy are not stupid, just the right idea, they are a little too smart, technology is even more years ahead of the Earth, then they naturally will not create artificial intelligence that confront themselves and do not know when they will be slippery with themselves.

Even if there really was that kind of AI, it would have been destroyed a long time ago, so how could it have been allowed to stay until now?

So as soon as the intelligent brain said that, Ji Feng immediately dismissed his original guess.

Obviously, the shortage on this laser gun profile was not a smart program playing tricks on it, so what could be going on with ....., ?

After thinking for a while, Ji Feng still couldn't figure out what was going on, so he asked the intelligent brain, "Intelligent brain, for what reason do intelligent programs usually have this kind of information shortage?"

The intelligent brain immediately said, "According to the analysis, the most likely reason is that the database is damaged, causing a shortage of information."

Ji Feng's eyes instantly lit up, "The database is damaged?"

He suddenly realized that, yes, this was indeed very likely, if the artificial intelligence program owned by the dynasty had really come to Earth from the Gamma Galaxy, then was it possible that it had been damaged in some way in the process?

As the intelligent brain said, if the database was damaged, then it is not surprising that Dynasty created this half-finished laser gun.

It also explains why Dynasty has been advancing in the field of human modification for so long, but the laser gun has only been produced, and is still half-finished.

Perhaps, in all probability, it was because the artificial intelligence program that they had received had been damaged in some way, which had caused the intelligence program's database to be damaged, and much of the information was incomplete or had simply disappeared.

If that was the case, that was really good news!

Ji Feng stood up, casually lit a cigarette and came to the window, looking at the sky outside which was already gradually getting lighter, a brilliant light flashed in his eyes.

"It doesn't matter if the dynasty has an AI program or not." Ji Feng secretly said, "At least, one is already a deadly enemy with Dynasty, and is bound to do it to the end!"

"However, now it seems that one is a bit behind in terms of action." Ji Feng secretly mused, nowadays, Dynasty had even started manufacturing laser guns, plus the modified people in their organization, now Dynasty had also formed a certain climate in terms of force.

He had to speed up his actions too!

Ji Feng sneered, "Since you, Dynasty, want to produce laser guns, then fine, let's go and see who's laser guns are more powerful and more powerful!"

Even if he knew that Dynasty was likely to have artificial intelligence, Ji Feng would definitely not back down for half a day.

In time, now Ji Feng could already be sure that even if he didn't take the initiative to mess with Dynasty, Dynasty would definitely take the initiative to mess with him in the future.

Just because he had an intelligent brain in his body, once something technologically advanced came out, the dynasty would definitely make a move.

Instead of being passive and defensive later, it would be better to be completely proactive and active now!

The actual fact is that you can find a lot of people who are not able to get a good deal on a lot of things.

.....

The first time I saw the company, I had to take my time and gradually turn those advanced technologies in my head into reality, because of the appearance of a laser gun that was not supposed to belong on Earth, was disrupted.

It was because of the appearance of this laser gun that Ji Feng became even more full of fighting spirit, and his whole body was filled with motivation as if fresh blood had been injected into it.

The plans he had originally made also began to change.

It was believed that in a short while, a technological storm caused by him would blow up.

But at this time, there was already a huge storm in the outside world, which had spread throughout the whole of Rice and even to other countries in just a few hours.

Among them, the one who felt this storm most deeply was the eldest daughter of the Bamboo Gang, Ji YuYing.

Although she had known for a long time that Ji Feng had single-handedly killed all the top brass of the Yamaguchi Gang, how great an impact it would have on the underground world of Rice, when the storm really came, Ji Yuoyi realised that she had underestimated the strength of this storm.

Ji Feng's unbelievably strong act really caused too much of a shock to the entire underground world of Rice, and that kind of violent impact caused everyone to be shocked, and even the bosses of several clans of the White Hand Party began to be extremely upset.

Within just a few hours, Abe had received a dozen phone calls in a row from some of the most prominent figures in the underground world of Rice, and the meaning of their calls was surprisingly consistent – they were all asking if the matter was related to the Chuk Yuen Gang, as the top brass of the Yamaguchi Gang had been wiped out overnight.

While some of these gangsters, or their spokespersons, were blunt in their calls, others were too concerned about their own face to be so direct as to avoid making the TUF look down on them and think they were afraid.

But whether they were asking euphemistically or directly, the meaning was the same.

The Yamaguchi-gumi had been wiped out overnight, and everyone was wondering if the incident had anything to do with the Chuk Yuen Gang.

Because in the underground world of Rice, everyone knew that the Yamaguchi-gumi and the Takenakeno gang were deadly enemies, and the two sides were almost incompatible with each other.

If the Yakuza were to be destroyed, it would definitely be the Takenryu gang that would benefit the most.

And as it turns out, the Takenakeno Gang has indeed gained a lot, as the gangsters have already got the news that the Takeno Gang had started to send their men out to seize the Yakuza's territory a few hours ago.

So it was obvious that the Takenakeno Gang must have known about the destruction of the Yakuza even earlier than they did. Combined with the relationship between the two gangs, those gangster bigwigs had no choice but to suspect the Takeno Gang.

Of course, the Bamboo Gang would not admit it, but only excused that they also received the news of the extermination of the Yamaguchi-gumi before they started their operation.

All other questions were brushed aside by Abe, or simply avoided the issue.

Those gangster bigwigs had no evidence, so they had to let it go.

“Okay, we in the Chuk Yuen Gang are willing to be friends with anyone who is friendly ..... Okay, I will pass on the message to our gang leader, goodbye.”

Snap!

Ah Bo hung up the phone as he couldn't help but let out a long breath.

After picking up a cup of coffee and taking a sip, Ji Yuqing asked, “Here to ask about the Yamaguchi group again?”

Ah Bo nodded and smiled bitterly, “Yes, it's almost twenty calls already, things are really going badly!”

Ji YuYing also shook her head and laughed bitterly, “How can it not be a big deal? There are so many elites in the Yakuza and all the top brass, but they were wiped out in such a short period of time.

Abe sighed, “Yes, it's really too ruthless! I'm afraid that the gangsters are all scared to death!”

Chapter 1770

Ah Bo sighed, “Yes, it's really too ruthless! I'm afraid those gangsters are all on tenterhooks right now!”

Not only are they uncomfortable!

If the mob bosses were only worried, they wouldn't have called to enquire.

In the past, if a gang had been attacked, they would have been concerned, but they would not have called to find out whether it was the Chuk Yuen Gang that had done it, as they had their own sources of information.

But this time it was different, as there was one call after another, and to call directly to ask if it was the Chuk Yuen Gang, like this, was undoubtedly extremely rude, and if one met someone with a bad character, one might even think that these people were calling to provoke them.

We are all in the triads, no one is more noble than anyone else, so who are you to call to question me?

If it was in normal times, those yakuza bigwigs would naturally not do such a thing that would lose their 'status', but now, they all seem to be calling one after another as if they had made an appointment.

From this, we can see that these people were absolutely terrified, because fear and shock made them no longer care about losing their identity, hurrying to clarify the problem, this is the most important thing, as for the rest, it is all a side issue.

Especially when compared to survival, all other things had become less of an issue.

Even the Yamaguchi-gumi, a powerful gang, was destroyed overnight, but the other gangs did not receive any news, and they did not know who had done it, and whether it was specifically aimed at these powerful gangs.

The fact that even the White Hand, a huge powerhouse, is sitting on its hands, and that people from those families are calling, speaks volumes about the fear and uncertainty they are feeling.

However, who would have thought that this was all because the Yamaguchi-gumi had provoked Ji Feng's relatives, and as a result, Ji Feng, in a fit of rage, had actually destroyed the Yamaguchi-gumi!

If this news got out, I'm afraid those people would be shaken even more.

The news that three people had cleanly wiped out the Yamaguchi-gumi was, obviously, even more shocking!

Thinking of this, Ji Yu-yi could not help but smile bitterly once again. In fact, she was not at all shocked in her heart, knowing that she had watched the powerful Yamaguchi-gumi turn into corpses with a series of shocking explosions.

The shock of seeing it with one's own eyes was inexpressibly strong, and only when one had experienced it first-hand could one know what it was really like!

"Uncle, has the gag order been passed on?" Ji Yuqing asked.

"It has already been issued." Ah Bo nodded.

"Well! Make sure to tell the brothers who took part in the operation that day that no matter what they saw or heard about this matter, they must all keep it to themselves and absolutely not reveal a single word, not even to their internal brothers!" Ji Yuqing instructed in a firm tone.

Ah Bo nodded and said, "Don't worry, Eldest Miss, I have instructed them according to your orders, those are old brothers in the gang, they know what to say and what not to say. Moreover, they have only met Ji Feng, but they don't know Ji Feng's identity."

Only then did Ji YuYi nod in satisfaction and said, "That's good!"

But Ah Bo hesitated, "Eldest Miss, there's something I don't know if I should say."

Ji Yuet said, "Go ahead, Ah Bo, you've grown up with me, there's nothing we can't say to each other, right?"

Hearing Ji Yueting talk about this, Ah Bo's somewhat old face could not help but reveal a smile, he nodded and said, "Then I will say it ..... Miss, there is a Chinese saying that paper cannot cover fire, there is no impermeable wall in this world, what happened last night, sooner or later, someone will know about it, do you believe it?"

After a brief moment of thought, Ji Yuqing nodded and said, "I believe it."

There is nothing in this world that can be kept absolutely secret, even if it is a country's top secret, it will eventually be known to outsiders.

Ah Bo said, "In that case, then if the news gets out in the future, do you think Ji Feng will think that the news leaked out from us?"

Ji Yuhui's eyebrows knitted slightly as she gave Ah Bo a surprised look and asked, "Ah Bo, what you mean is ....."

Ah Bo said, "I think that Missy should contact Ji Feng again and mention to him our arrangements and the gag order we have placed on our men, so that he can be well informed. That way, in future, even if news leaks out, he will know that we will not leak the information."

Ji Yueting asked, "Is this necessary?"

Ah Bo nodded very seriously and said, "Of course it is necessary, Miss, I don't know what kind of temperament that person has, but one thing is clear to us all: this person is extremely powerful and can even be described as unfathomable. It is best to be friends with such a person, but even if we cannot be friends, we must not become enemies!"

In response to Ah Bo's words, Ji Yuqing was deeply impressed.

Ji Feng's strength could be described as terrifying, and anyone who had such a friend would feel more or less at ease even if they encountered the greatest trouble. But on the other hand, if anyone becomes an enemy with someone like Ji Feng and becomes a deadly rival .....

Hey, I'm afraid that those enemies of Ji Feng will be awakened from sleep until midnight!

Just like what Ah Bo said, this kind of man who is so strong to the extreme, absolutely cannot be an enemy of him.

"Think carefully, Missy, if you don't explain the situation to him now, then once the news leaks out, the first thing he will suspect when the time comes will definitely be that someone on our side has leaked the news." Ah Bo said, "If he is a magnanimous person and is willing to believe that it might be because someone on our side leaked the news due to a moment of carelessness, then it would be better to say something, just explain to him and this misunderstanding can be solved."

"But if he is not that generous, then once the news leaks out, he will be thrust into the limelight and it will not be easy for him to deal with the secret attacks of other gangs or the wild reprisals of the Yakuza headquarters in Kaitou. When that happens, won't he hate us to death?"

Ah Bo laughed bitterly, "Eldest Miss, I'm really not going to hide it from you, ever since I saw what happened with my own eyes last night, I've been thinking since I got back, if it was our Chuk Yuen Gang that was hostile to Ji Feng and thus was attacked and killed by him, would we end up any better than the Yakuza?"

I'm afraid not!

Ji Yueting immediately answered in her mind.

With Ji Feng's perverted strength, it would be easy for him to exterminate the JUF!

Thinking about this, Ji YuYing couldn't help but nod her head thoughtfully.

After a brief moment of contemplation, she nodded and said, "Ah Bo, you're right, I'll call him now."

Ah Bo immediately reminded, "Missy, use that military classified phone, and don't speak so clearly on the phone to prevent being eavesdropped by the Mickeys."

Ji Yuhui said, "Don't worry, I've always used a confidential phone. I also asked Ji Feng a long time ago, and his phone is also absolutely secure."

Before the very first call, Ji Yuwen had already politely reminded Ji Feng and asked if his mobile phone was secure.

Ji Feng gave her an affirmative answer, and it was obvious that Ji Feng was also aware of that nasty habit of the Mi Guos who liked to listen in on other people's calls.

In fact, many Mi Guos don't know that they think they live in such a democratic `free country and that all their rights are respected. But in reality, the vast majority of the people of Rice are having their phones tapped. The authorities are certainly not tapping everyone's phone at all times, that way, even if there are more than enough people, they are still too busy.

They use computers to monitor people's communication devices, just set the keywords in advance and then listen automatically.

In fact, this was no longer a secret to those who had a mind to do so, and naturally, Ji Yu-yi knew about it.

Only then did Ah Bo feel relieved.

However, Ah Bo was unaware that his grandson, at the moment, was hiding in his room, his face full of grimace and resentment, gnashing his teeth from time to time and muttering something to himself.

Ah De was terrified!

Ji Feng's strength was so terrifying, that what he saw with his own eyes made Ah Bo's legs go a little weak, because he remembered what Ji Feng said to him that day, that arrogant guy said that for the sake of Missy, he would not behave with himself .....

Now that he thought about it, he might have really gotten a lucky break back then!

The moment he thought of this, Ade couldn't help but feel weak in his legs and even more scared to death in his heart.

However, he was reluctant to admit that he had been scared by Ji Feng, and he even felt a sense of humiliation, as if ..... he had been scared by his love interest, where would this make him put his face?

"Must think of a way, must cure this son of a bitch!" Ade gritted his teeth and muttered to himself, "Aren't you powerful? I'll see how powerful you'll be if you're sieved by a bullet!"

.....

The night completely passed and a new day, as expected, arrived.

Ji Feng and Ji Shaolei both got up early and moved their bodies in the courtyard, while White Spider sat beside them with a wary gaze.

“Cousin, cousin, good morning!”

Chu Yue yawned as she walked down from upstairs, she still looked sleepy-eyed and her clothes were loose-fitting, as if she was sleepwalking.

Ji Feng swept a glance at her and suddenly lost his smile.

Ji Shaolei smiled and asked, “Little Yue, you’re up quite early!”

Chu Yue said, “I almost didn’t sleep well all night, I guess!”

“Oh?”

Ji Shaolei asked in surprise, “Why?”
