

Campus Master 1991

“Hmm?”

When He Hongwei heard that, he immediately sat up straight, a cold light flashed in his eyes, it was that insidious villain Wu Zhiyong who called?

He Hongwei was really very sensitive to the three words Wu Zhiyong, it was really because, he had hated Wu Zhiyong almost to his bones!

“Is it Wu Zhiyong?” He Hongwei’s eyebrows immediately tightened as he lowered his voice and asked.

Ji Feng waved his hand, gesturing for him to keep quiet for now.

Although Ji Feng now heard that the voice on the phone sounded very much like Wu Zhiyong’s, after all, he couldn’t be sure yet. Because Ji Feng was actually not really too familiar with Wu Zhiyong, although to put it mildly the two could already be considered old enemies and rivals, but strictly speaking, there had never been a face-to-face encounter between them.

Moreover, even when they spoke directly face-to-face, there was hardly any.

On the contrary, Ji Feng had spoken to Wu Zhiyong once or twice on the phone, but it still seemed a bit arbitrary to try to judge that the person on the phone was Wu Zhiyong based on that alone.

After all, Ji Feng is not a voice analysis machine, and even if his memory is good, he can only remember that this should be Wu Zhiyong’s voice.

Moreover, if the person on the other end of the phone was really Wu Zhiyong, He Hongwei would be even more unable to speak.

If Wu Zhiyong knew that he was now with He Hongwei, I was afraid that it would cause Wu Zhiyong to be wary and defensive.

Of course, Wu Zhiyong would certainly be even more angry and bitter too.

After all, knowing that two of his enemies were sitting together, no one would be too comfortable in their heart knowing this news!

He Hongwei also knew that his reaction was a little too emotional, he nodded slightly, took a deep breath, leaned his body back and stopped talking.

Only, his face was not very pretty.

As soon as Wu Zhiyong was mentioned, He Hongwei would recall the shame this person had brought to him back then. As a man, no one could forget so quickly.

How could He Hongwei not hate?

“You’re Wu Zhiyong, right?” Ji Feng asked in a deep voice.

“What do you think?” The voice on the phone didn’t answer directly, instead it asked a rhetorical question.

“Heh!”

Ji Feng grinned, “I’m sorry, I don’t like to talk to people who hide their heads, that’s all

“Ji Feng!”

The voice on the other end of the phone snapped, “Are you afraid, or are you just weak-minded?”

Ji Feng shook his head and smiled, “What do I have to be fainthearted about?”

The other party couldn’t help but coldly snort, “I think you know this question best in your own heart!”

Once he heard this, Ji Feng immediately became a little impatient.

What do you mean you know best in your own heart?

Ji Feng really didn’t know what he needed to be faint-hearted about, whether it was patting his conscience or finding someone to confront him face to face, Ji Feng dared to pat his chest and say that he had never done anything wrong, nor did he care to do so.

And how could he possibly be weak-minded?

“I don’t have this kung fu to bullshit with you!” Ji Feng shook his head and coldly snorted, “If you’re bored with idleness, you can just go bang your head against the wall, and stop bothering me with these unsavory words! That’s all

“Ji Feng!” The voice on the other end of the phone suddenly rose a little higher.

“Just say what you have to say, I don’t have time to bother you!” Ji Feng said nonchalantly.

“..... This time, it’s you who wins!” The voice on the phone said in a low tone, listening to the tone, there was also a wave of indignation, obviously resentful, and I don’t know if it was because there was already hate in his heart, or if he was choking on Ji Feng’s hard feelings.

The other party went on to say, “But next time you won’t be so pleased with yourself!”

“It’s really him!”

When Ji Feng heard this, he couldn’t help but secretly say.

Originally, he was still a bit unsure if the person on the other end of the phone was actually Wu Zhiyong, as he wasn’t too familiar with his voice, but now he was certain that it was Wu Zhiyong speaking.

Because apart from Wu Zhiyong, there would not be a second person saying such things.

When Wu Zhiyong said that he had won this time, he was talking about the fact that Wang Zhijun’s father had been directly suspended from the investigation, that the old Wang family was about to fall, and that the Wu family was about to lose a good knife, or an arm, for that matter.

On the other hand, he, himself, was unharmed and did not even lose a single strand of hair.

This is why Wu Zhiyong was so indignant that he put down some harsh words, saying that he would not let himself be so proud next time

This is something that only Wu Zhiyong could say, and only he, could dare to say this.

“Younger Wu, before you say this, shouldn’t you first think about who actually jumped up in this matter?” Ji Feng said indifferently, “Don’t put the blame on others whenever something happens, isn’t it a bit too classless to do so?”

“You

Wu Zhiyong was instantly furious and almost cursed, Ji Feng’s words were too arrogant!

Now he actually said that this matter was started by himself If Ji Feng hadn’t forced his own brother, Wu Zhihe, to death, would he have thought of taking his life?

And not to mention this, there is also a series of things before, including Ji Feng snatched his brother Wu Zhihe’s girlfriend Rong Suyan, hardened the Rongpeng Group to tear away a piece of it, especially including his own old man planting his head etc etc, so many things, was it not Ji Feng’s doing?

If not for these things, there may not even be a crossover between him and Ji Feng at all, and how could he possibly be thinking of taking Ji Feng’s life?

How could Ji Feng not mention these things?

“All right! Young Master Wu, if that’s all you’re calling to say, then I already know.” Ji Feng said indifferently, “Next time if we fight again, I will definitely be on standby and wait to be taught Senior Wu’s high-handedness!”

“Then, I won’t let you down for sure!” Wu Zhiyong’s voice was incomparably low, and it was evident how stifled he was in his heart.

“Then we’ll ride a donkey and see how it goes!” Ji Feng said nonchalantly.

“..... We’ll see!”

Wu Zhiyong said in a sullen voice, and then snapped and hung up the phone.

The next moment, Wu Zhiyong slammed the phone out.

“Pop!” With a snap, that phone was dropped with parts falling all over the place, and the phone screen went dark straight away.

“Son of a bitch!”

Wu Zhiyong’s eyes were red, his teeth were clenched tightly, and there was a strong hatred in his eyes as he roared, “How arrogant he is! Damn it!”

Ji Feng was really too arrogant, and those words of his had irritated Wu Zhiyong so much that if they were not talking on the phone but in person, Wu Zhiyong would definitely not hesitate to rush over and choke Ji Feng or give him two fierce punches when he heard those words.

It was really too rampant!

It was the first time that Wu Zhiyong had ever seen someone who dared to talk to him like that!

Ji Feng even bluntly said that if they fought again next time, they would definitely be on standby and wait to learn their own high stances He was clearly laying out his carriage and had no qualms about challenging himself.

This means simply shouting to Wu Zhiyong: "I'm right here, come if you have the guts!"

Who could stand it?

As the leading figure of the third generation of the Wu family, Wu Zhiyong was even compared to Ji Shaodong and He Hongwei, but now he was directly provoked by a young bastard like Ji Feng, who was not even hairy yet.

From this, we can also see how rampant Ji Feng should be to dare to shout out such words so recklessly?

You know, even when He Hongwei flipped him off, he wasn't as arrogant as the current Ji Feng!

Stomp stomp stomp

A sound of footsteps came, the nanny heard the commotion in this room and hurriedly walked over, cautiously asking, "Eldest young man, what happened?"

Wu Zhiyong instantly roared, "Nothing happened, get out! No one is allowed to come in without my orders!"

"Ai Ai"

The nanny was immediately scared and nodded her head repeatedly, hurrying out in a panic.

Wu Zhiyong was gasping for air, and his eyes were staring deadly, he wanted to tear Ji Feng alive right now!

He clenched his teeth and with a thick wave of hatred in his eyes, he growled secretly in his heart, "Ji Feng, hello, you're good! From today onwards, we won't stop until we die!"

"I want you to die!" Wu Zhiyong shouted.

"....."

In this empty room, apart from his roar, yet there was no more sound, let alone anyone giving him a half-hearted response.

To use the Yanjing language, he was merely sending out a mute hate!

The so-called mute hatred means that even if one has anger in one's heart, one can only hold it in one's heart and cannot or dare not voice it out.

This is what happened to Wu Zhiyong now, his hatred was so strong in his heart, but he could only yell in the room alone and drop something, that's all.

To be practical, Wu Zhiyong could not do anything, he simply could not do anything to Ji Feng, he could not do anything to Ji Feng.

"Boom~!"

Wu Zhiyong sat down heavily, his chest heaving violently, but a touch of indignation, and a hint of helplessness surfaced on his face.

In fact, after the venting just now, Wu Zhiyong has realized that this stifling today was entirely of his own making.

If he hadn't taken the initiative to call Ji Feng, this wouldn't have happened, and he wouldn't have had to hear Ji Feng's provocative words that were so arrogant that they were the worst.

Moreover, Wu Zhiyong also understood that he actually shouldn't even have made the call at all.

The previous encounter was actually clear to everyone in their hearts what was going on, and Wu Zhiyong knew that Ji Feng would definitely take on the Wang family on the pretext of being assassinated, even if that assassin was not sent by him, Ji Feng would definitely take on the Wang family, implicating the Wu family by the way.

Wu Zhiyong likewise believed that Ji Feng must also know in his heart that the assassin was sent by him.

But neither side came out to speak, they didn't need to talk to each other, both of them just unspoken, this is the encounter, this is the fight.

But this time, Wu Zhiyong's loss was really too stifling, this heel, planted is really too painful, so painful that he gritted his teeth!

Campus Master Chapter 1992

Wang Zhijun's father was taken down, and now that the Discipline Inspection Commission has gotten hold of quite a bit of evidence, it doesn't really matter whether the next step is to immediately enter the judicial process or whether it will be handled in a low key manner.

As long as he, as a person, has come down from his original position, then there is actually nothing more to say.

After he falls, the Wang family will no longer have anyone who can take charge of the family. Those who were already very hostile to the old Wang family will react, even if they can figure it out with their toes.

In fact, as soon as it was confirmed that the Discipline Inspection Commission had a lot of evidence, everyone already knew that there was absolutely no chance for Wang Zhijun's father to rise again.

And at that time, someone from the outside world had already started targeting the old Wang family.

According to what Wu Zhiyong had learned, in just a few days, the report letters were like snowflakes that flew to the leaders of the Central Commission for Discipline Inspection, and the contents of those report letters were almost all related to people from the Wang family, and some of the ones reported were not from within the Wang family, but were also from the old Wang family's faction.

This is already going to be a deadly hand, to beat the dogs in the water!

You have to know that at this time, the old man of the old Wang family hadn't really passed away yet!

If they waited until the old man had really passed away, the scenario that the Wang family would have to face would be imaginable, and the thought of this made Wu Zhiyong depressed to the extreme.

The fall of the old Wang family meant that one of the Wu family's most powerful arms had been cut off, and it was an arm that was very good at attacking!

The reason why Old Man Wang was able to reach such a high position today was because of his insidiousness and venom and planting of evidence, so it can be said that when it came to biting people, Old Man Wang was definitely a good hand back then!

Because of this, the rest of the Old Wang Family also seemed to have learnt seven or eight percent of this tactic from Old Master Wang, and the people who bit him were also quite powerful.

Usually, if the Wu family had anything that they couldn't face or ask for, they would basically leave it to the people of the Old Wang family. In this regard, they were very experienced and skilled, and at the same time, they were indeed very powerful, giving their opponents an extreme headache.

The initial conflict between He Hongwei and Wu Zhiyong was in fact a result of He Hongwei hinting that a few people from the Old Wang Family's junior generation had spread the word, causing He Hongwei to lose face in Yanjing and ruthlessly sweeping away the Old He Family's face.

This was just one example, there were many more like this.

It was evident that the Old Wang Family was still very useful.

But now, just because of this son of a bitch Ji Feng, the old Wang family is actually looking at a complete downfall, and the cause of this matter is still caused by the fact that Wu Zhiyong wanted to find someone to assassinate Ji Feng

The more he thought about it, the more he couldn't hold his breath, remembering that Ji Feng must be smiling with glee right now, not knowing how to mock his Wu Zhiyong's incompetence and stupidity, probably even the entire Wu family was mocked.

Just thinking about this made Wu Zhiyong's heart burn with anger, so in a fit of rage, he finally couldn't help but give Ji Feng a call.

He had to make his attitude clear, he had to let Ji Feng know that a momentary victory didn't mean anything, there were still long days ahead, everyone would have fun!

More importantly, Wu Zhiyong wanted to use this phone call to give away the anger he was holding inside himself, otherwise, he would really go crazy!

However, Wu Zhiyong did not expect that when he made this call to Ji Feng, instead of warning him and giving him his anger, he was directly ridiculed and laughed at by Ji Feng, who even challenged him with impunity.

Riding on a donkey – we'll see!

This was the challenge that Ji Feng launched, and when he said this without any fear, it actually meant that Ji Feng shouted out his disdain for Wu Zhiyong in the loudest voice possible!

It was an attitude of pure disdain!

Wu Zhiyong immediately freaked out

“Ji Feng! I’m not finished with you!” A voice with intense to extreme anger came out of Wu Zhiyong’s room and spread far and wide

.....

At the same time, in the private room of the Taste Country Residence on Jiangzhou’s Jinling Road, Ji Feng only shook his head very plainly and smiled, putting the phone back into his bag again.

The fact that he was still wearing a faint mocking smile on his face, compared to the furious look of Wu Zhiyong in Yanjing, was simply a heaven and a earth, not comparable at all.

In this kind of temperament alone, the difference between Ji Feng and Wu Zhiyong was already high and low!

“Ji Feng, is that Wu Zhiyong calling?” Before Ji Feng could put the phone away, He Hongwei immediately asked eagerly.

“That’s him!”

Ji Feng nodded slightly and said very gently, “Who else could it be but him!”

He Hongwei immediately frowned, sneered and asked, “What did he want to do by calling you? Is he afraid of being beaten by you and wants to kowtow to you to make amends?”

Ji Feng shook his head and laughed, He Hongwei’s words could be described as sarcastic, how could a person like Wu Zhiyong kowtow to someone to make amends?

Even if he was defeated, he wouldn’t go that far, unless Wu Zhiyong really didn’t have any backbone at all.

When He Hongwei said this, he obviously still had anger in his heart.

Ji Feng laughed, “He told me that I won this time, but told me not to be too complacent, and that if we fought again next time, the ending would be different!”

“Bullshit!”

He Hongwei immediately sneered and said with great disdain, “I really don’t know where he got this kind of confidence! The outcome of a fight between two people is not only related to the development of the situation, but more importantly, it has a lot to do with whether a person is right or wrong! If a person’s heart is not right, even if he is capable, he will definitely fall in the end!”

He Hongwei brushed aside his mouth and said, “People like Wu Zhiyong forget it, I won’t talk about him either, I feel like I’ve fallen off the wagon when I talk about him!”

Ji Feng was dumbfounded, but in his heart, he was secretly nodding his head.

He Hongwei’s disgust and hatred for Wu Zhiyong was already well known to everyone, moreover, that kind of humiliation would be absolutely humiliating and even unbearable no matter who it fell on.

What’s more, it was the son of a powerful family like He Hongwei?

However, even so, He Hongwei rarely said anything about Wu Zhiyong in front of others, which could not help but say that He Hongwei had a good upbringing and his own cultivation was quite outstanding!

So the kind of gentle and elegant temperament like the one on He Hongwei's body was not faked, but this person was originally very cultured, and was not at all comparable to the kind of person who could pretend to be a modest gentleman.

From this point, Ji Feng could see that in fact, even among the great families of the world, there was a great difference, and how could a family like the He family, which had such a good family upbringing for the next generation, not be strong?

"Older brother, since people have already given you war letters directly, there is no problem going to Southern Guangdong, right?" He Hongwei asked with a smile, "No matter what, it's better to prepare early"

"Mmm! Let's talk in detail tomorrow!" Ji Feng smiled faintly.

It was indeed time to prepare properly, since he had already said that he would walk and see, if he lost under Wu Zhiyong in the future, wouldn't it be humiliating?

In fact, the conflict and encounter between him and Wu Zhiyong was no longer a matter of saving face or not, with Wu Zhihe's death in the middle, they had almost become deadly enemies!

"Well then, let's not talk about that at the wine table, don't let some inconsequential people spoil our fun." Ji Feng smiled and lifted his glass of wine.

.....

The two of them stayed at Taste Country Residence for about two hours or so before ending the dinner, in fact they didn't eat much, they were mainly talking and talking for such a long time and drinking along with it.

Afterwards, Ji Feng paid the bill, said goodbye to He Hongwei, and drove off with Bai Zhu.

The first thing that happened was that Ji Feng's car gradually merged into the traffic, and He Hongwei couldn't help but shake his head with mockery and laugh, because Wu Zhiyong still dared to be so outspoken with Ji Feng, he really didn't know his face.

In fact, as soon as the Wu family and the Ji family exchanged words, He Hongwei immediately thought of the news that shortly before this, Ji Shaodong himself had declared war on Wu Zhiyong.

Now it seems that Ji Shaodong declared war on Wu Zhiyong, that is even to lift Wu Zhiyong up.

Just take a look at how stupid Wu Zhiyong's series of actions and methods have been over the last year or two, especially how badly he lost when he fought with Ji Feng either directly or indirectly, you can tell that in fact, Wu Zhiyong is only a vain name, he is not that powerful himself.

It was only because he was the youngest master of the Wu family that everyone else gave him face, and no one in general was willing to put in the effort to fight him after knowing his identity, so that made his prestige complete.

In fact, strictly speaking, Wu Zhiyong's name is just a false one, or simply blown out of proportion.

Perhaps Wu Zhiyong really has some ability, among the Wu family and the Yanjing group of playboys is considered outstanding, but compared with Ji Feng and Ji Shaodong, that little ability is too ridiculous

.....

So not to mention Ji Shaodong's hand, Ji Feng alone, has already made Wu Zhiyong ashamed, if Ji Shaodong is involved again, Wu Zhiyong is afraid that he will be beaten even half to fight back!

Based on his call to Ji Feng today, He Hongwei could conclude that Wu Zhiyong was a small-minded and narrow-minded person who could not become a great weapon!

"This kind of fool, I'm sorry for myself if I don't clean him up!" He Hongwei snorted coldly.

Campus Master Chapter 1993

When they returned home in the evening, both Xiao Yuxuan and Tong Lei had already returned.

As soon as Ji Feng returned, Tong Lei couldn't help but wrinkle her nose and snapped, "What a strong smell of alcohol!"

Xiao Yuxuan also asked helplessly, "Hurry up and take a shower How much wine did you drink? How did you get such a strong smell of alcohol all over your body?"

Ji Feng laughed: "I didn't drink much, it was all taken up by my clothes!"

Tong Lei blinked, a hint of laughter in her beautiful eyes, "You played a trick on me?"

Xiao Yuxuan also asked strangely, "Didn't you go to see He Hongwei today? Did the two of you not have a good time, so you cheated while drinking?"

"It's not as exaggerated as you guys think!" Ji Feng shook his head and laughed: "We have nothing going on, our relationship is fine Alright, I'll go upstairs and take a shower first, we'll talk later."

Ji Feng shook his head and smiled as he went upstairs, but as a result Bai Zhu was left behind by Xiao Yuxuan and Tong Lei, who had to ask what was going on, knowing that in the past, every time Ji Feng came back from drinking, there was not such a strong smell of alcohol.

Bai Zhu was equally puzzled and was naturally unable to answer.

In fact, Ji Feng hadn't really drunk too much wine, he and He Hongwei had only drunk a bottle of white wine combined, which was nothing for their drinking capacity, at most they were just a little tipsy.

The reason why Ji Feng had such a strong smell of alcohol on his body was that he had deliberately activated the bio-current on his way back to secrete all the alcohol from his body.

The reason why Ji Feng did this was to keep a clear head. He Hongwei proposed to go to Southern Guangdong and to stop the cooperation between the Brilliant Group and the Boundary Peng people, a starting point Ji Feng was quite in favour of, but how exactly to do it, or rather, which way to cut in, this was something that needed to be thought through.

In addition, the whole thing Ji Feng must also be considered in a holistic manner, how to stop it, what kind of impact this will have on the Tengfei Group and themselves, how the Wu family will react and so on, all these issues, Ji Feng must first have a rough measure in his mind, or make some arrangements in advance.

The actual fact is that if you wait until the temporary hold, it will be a little late.

When Ji Feng finished washing up, he was about to go downstairs to accompany Xiao Yuxuan and Tong Lei, when he saw them all coming upstairs as well.

“Why aren’t you watching TV anymore?” Ji Feng asked.

“There’s nothing to see, a thousand of them are war themes, but that actor is dressed more fashionably than people nowadays, one can kill dozens of ghosts” Xiao Yuxuan brushed off her mouth.

“Huh!”

Ji Feng instantly laughed: “It’s a bit exaggerated.”

Frankly speaking, some of the domestic TV dramas nowadays are just too bad, if all those guerrillas and the like are really that powerful, then why did just a few million Kepong troops manage to occupy half of China?

Moreover, China also paid the price of tens of millions of dead and wounded soldiers and civilians?

This kind of drama really doesn’t look interesting, if you want to watch exaggerated ones, you might as well just go watch sci-fi movies, which are still a visual treat instead.

“Since we’re not going to watch it, let’s take an early rest.” Ji Feng laughed heatedly and was about to pull the two girls’ small hands, but they hurriedly dodged away.

“Little rascal, you’re not allowed to think of bad things!” Xiao Yuxuan gave him a white look, “You just drank, sleep alone by yourself today!”

“Huh?”

Ji Feng was stunned, and then explained, “That’s just the wine stained on the clothes, you guys smell it now, does it not smell anymore, I didn’t drink much wine”

“That won’t work either!” Xiao Yuxuan but directly interrupted Ji Feng, “I don’t like the smell of alcohol you exhale, and it will also have an effect on our bodies, we must sleep alone today!”

“Lei Lei” Ji Feng just turned his gaze to Tong Lei, and she ended up smiling sweetly, “Sister Yu Xuan and I have the same attitude!”

“.....”

Ji Feng then scratched his head and smelled carefully, he really smelled a bit of alcohol on himself, he then shook his head and smiled, the alcohol was still not fully secreted, so that for people who hadn’t been drinking, it did smell a bit uncomfortable.

He then nodded helplessly and said, “Alright then, I’ll sleep alone today.”

Xiao Yuxuan spread her face and smiled, "That's right."

She stepped forward to Ji Feng, leaned forward slightly, and with a smooch, kissed Ji Feng on the cheek, "When you don't smell like alcohol tomorrow, I'll give you permission to go to bed Giggle!"

Xiao Yuxuan smiled delicately and went into the room.

Ji Feng took Tong Lei's small hand and gave her a kiss on her soft face as well and said, "You should rest early too."

"Mm!"

Tong Lei nodded, and then she suddenly asked in a low voice, "Ji Feng, do you know why Sister Yu Xuan doesn't want to sleep with you?"

"Isn't it because it's uncomfortable to smell alcohol?" Ji Feng asked.

"Silly, huh?"

Tong Lei wrinkled her nose and said, "Sister Yu Xuan is toning up her body"

Before she finished her words, Ji Feng was startled and asked offhandedly, "Toning up her body? Reilei, what's going on? Is Yu Xuan's body uncomfortable anywhere?"

"What!"

Tong Lei couldn't help but hit him and whispered, "Sister Yu Xuan is trying to have a baby!"

Ji Feng was stunned, "What?"

Looking at him like that, Tong Lei couldn't help but shake her head and said, "These few days I just feel that Sister Yu Xuan basically doesn't stay up much at night anymore, and according to Xiao Ying, she doesn't sit around a lot in the company, every hour or so she gets up and walks around and moves her body, I felt a bit strange, so I asked Sister Yu Xuan about it. "

"And she said she wanted to have a baby?" Ji Feng immediately asked.

"Neither!"

Tong Lei shook her head and said, "Sister Yu Xuan said that she is getting progressively older now, and she must take advantage of the fact that she is still quite young to get her body into the best condition first, so that she can feel more at ease if she gets pregnant again."

Ji Feng said doubtfully, "Does her body still need to be toned up? As long as you stick to practicing aerobics, there will be no problem at all"

"What do you know!" The woman's mind you do not understand, for any woman, to be able to become a mother, is the most happy, is also one of the most important moments in this life, and how can not be cautious treatment?"

"That's true!"

Ji Feng nodded slightly, in fact, no matter for men or women, children are naturally important.

Tong Lei added: "And ah, the environment is so polluted now, the rate of deformed fetuses is even many times more than in ancient times, you know, ancient technology is incomparable to now. Who doesn't want their child to be born healthy? Isn't it normal for Sister Yu Xuan to place so much importance on toning her body?"

Ji Feng faintly nodded, he now understood.

Xiao Yuxuan this is wanting a child, although she did not say that she wanted a child right now, but, from the fact that she was so anxious to insist on toning her body right now, if it was possible, to have a child now Xiao Yuxuan would definitely be very happy.

Only

The actual fact is that you can find a lot of people who are not able to get a good deal on a lot of things.

Moreover, how to explain to Tong Lei's parents, this is also a problem.

After all, with Tong Kai De's status, it is simply impossible to hide this kind of thing from him completely.

And there was another point, right now, Ji Feng's body had not yet cultivated to its peak state, and according to the wise brain, the better the physique, the better the genes inherited by the next generation, and the child would naturally be more outstanding, at least, physically.

So Ji Feng still wanted to wait a little longer.

But now it looked like this was something that had to be considered, and if he waited too long, I was afraid that Xiao Yuxuan would be uneasy in her heart and might even be secretly anxious.

"Ji Feng, this is something you have to think about, don't worry about me" Tong Lei said softly.

"I know." Ji Feng nodded and patted Tong Lei's small hand, "You go and rest first, I'll think about it tonight."

"Mm!"

Tong Lei nodded her head lightly.

After Ji Feng returned to his bedroom, he couldn't help but slightly shake his head and sigh lightly.

"Having a child is really something to think about!" Ji Feng was lying on the bed and couldn't help but scratch his head, "How on earth should I solve it"

"Forget it! It's useless to consider so much, let's solve one aspect first." Ji Feng secretly said.

Just worrying here wouldn't help, instead it was better to solve the problems one by one, so Ji Feng concentrated his mind and entered the training space of his intelligent brain.

"Master!"

As soon as Ji Feng entered, he saw Wisdom Brain floating over, as if it was a ball of light floating in the air.

However, Ji Feng was surprised to find that the shape of the Wise Brain seemed to have changed a little compared to before.

The original Wise Brain was only a ball of light about the size of a fist, but now, it was slightly larger and its shape had become slightly oval, like a standing egg Of course, the current Wise Brain was much larger than an egg.

Ji Feng couldn't help but ask: "Smart Brain, how did your shape change?"

The wise brain naturally replied, "Because the energy provided by the director was abundant, so the wise brain followed the master's pattern and tried to change its current shape, but it didn't succeed."

Ji Feng smiled faintly, "So that's how it is!"

In his heart, however, he couldn't help but be taken aback, the wise brain had actually started thinking about changing its shape?

Does this mean that the intelligent brain has started to have its own aesthetics and know how to judge beauty or ugliness? Or is it that the brain has become curious enough to try to change its own shape, and to refer to its own shape?

If this is the case, will the brain one day develop its own unique 'consciousness', as if it were a real person?

Campus Master Chapter 1994

Ji Feng looked at the intelligent brain and was somewhat uncertain in his heart.

Right now, the intelligent brain has obviously begun to have curiosity, although it seems that the intelligent brain is still only somewhat curious about its own appearance, but as time passes, will the intelligent brain have a richer sense of self?

Will it, for example, be able to think like a normal human being?

It is true that the current Brain also has its own unique thinking, but in reality, this thinking is only programmed, that is to say, the current thinking of the Brain is only a completely logical thinking given to it by its designer and maker.

It is the same as when a computer program is running, and because of this program, the Brain can think and act, for example, by having conversations with itself, teaching itself various theories and so on.

To put it more bluntly, at the moment the brain is only thinking rationally, that is, it is programmed to know that one plus one equals two, but it does not actively think about why it equals two.

But now it's different, the brain is curious, and it's starting to imitate

This is a sign of having an autonomous mind!

It's like a young child who is curious about the world and begins to imitate the actions of adults.

To put it simply, this would be subjective thinking, or sensual consciousness.

This is a bit surprising to say the least.

Right now the intelligent brain is only beginning to develop this kind of self-consciousness as if it were a child, so will it gradually grow in this kind of consciousness in the future?

Then it would be like a normal human being, thinking more and more clearly and maturely, and finally having its own thoughts?

Ji Feng looked at the intelligent brain in a daze, and his heart could be described as amazed and doubtful.

Although the technological level of this kind of artificial intelligence was incomparably advanced even in the world, it was only a program after all.

But if one day, the intelligent brain becomes a thing with independent thinking and independent consciousness, then can it still be trusted completely and unconditionally?

Ji Feng was more or less unsure in his heart

“Master, do you want to start today’s training immediately?” The intelligent brain asked.

“Wait a moment first!”

Ji Feng waved his hand and stared at the oval-shaped ‘body’ of Wisdom Brain for a while before he asked, “Wisdom Brain, I remember you said earlier that it was because the energy I provided was too abundant that you thought of changing your appearance, and you did so by imitating my appearance. Only it didn’t work, right?”

The brain immediately nodded and replied, “Yes, Master.”

“Well!”

Ji Feng nodded and immediately asked again, “Then explain in detail what kind of energy I’m providing you with and how I’m providing it?”

Regarding this question, Ji Feng was very concerned.

He was very curious about how he had provided that so-called quite abundant energy to the intelligent brain, the causes and consequences of this whole thing, as well as the whole process, Ji Feng had to understand it clearly, otherwise, he would really worry that in his mind, another ‘person’ would appear, and then that kind of feeling would be a bit twisted.

Moreover, in Ji Feng’s impression, it seemed that he had never provided any energy, but the intelligent brain said that he had not only provided energy, but also a lot of energy?

Hearing Ji Feng’s question, the intelligent brain replied, “Master, it is like this, the intelligent brain one itself has enough energy, and even if there is no energy left, there will be special staff to repair or recharge it

Ji Feng nodded, he could understand this point.

The term wise brain is very straightforward, it is like a computer running, but the battery power cannot support the computer for a long time, so after a period of use, it needs to be recharged.

Although the Smart Brain is a high-tech product of the Gamma Galaxy, the energy it carries is certainly not comparable to the batteries of such ordinary computers on Earth, but, after all, this energy is not infinitely usable, so after it is exhausted, it needs to be repaired and recharged.

“Originally, according to the design standard, Smart Brain One was designed to survive on its own for more than three hundred Earth years, or longer” said Smart Brain.

“That long?”

Ji Feng was immediately taken aback again, originally he had already overestimated the technology of the Gamma Galaxy, but he hadn't expected that the energy carried by the Smart Brain could actually last for more than three hundred years?

That was indeed somewhat amazing!

“However, the vast majority of intelligent programs have a survival time that far exceeds the design standard, but of course, because of the different models, the various programs are set to different standards.” The intelligent brain explained.

“Then your energy” Ji Feng looked at the intelligent brain and asked in a suspicious manner.

“Have you forgotten, master, when the intelligent brain came to Earth, the energy has already consumed the vast majority.” The intelligent brain said.

“Look at my brain!”

Ji Feng immediately slapped his head, even though it was only his consciousness that came into this training space, everything here felt so real, even the slapping of his head, so this instantly brought Ji Feng back to his senses, and he also immediately remembered some information that he had communicated with the wise brain a long time ago.

Ji Feng asked, “Wise Brain, the energy you are referring to is actually the bio-current in my body, right?”

“Yes, master!” The intelligent brain nodded.

“You can automatically absorb the bio-current in my body?” Ji Feng asked again.

“Yes, master.”

“Then”

Ji Feng paused slightly and asked again, “Because my cultivation level is getting higher and higher, and I also insist on practicing body building exercises constantly every day, which makes the concentration of bio-current in my body also get higher and higher, so the energy I provide is getting stronger and stronger, which makes you feel energized, is that right?”

The intelligent brain responded, “Master is right!”

So that's how it is

Ji Feng suddenly realized, no wonder the wise brain said something about abundant energy, it turned out that it was because his cultivation level was increasing, the strength and concentration of bio-

current in his body was increasing, and the wise brain could automatically absorb bio-current, that's why he felt energized.

In that case, is it possible that the gradual generation of this self-awareness by the intelligent brain is also directly related to the growth of one's cultivation level?

Ji Feng secretly deliberated.

After thinking about it for a while, he couldn't come up with anything, so Ji Feng simply stopped thinking about it and asked, "Wise Brain, do you want to become like me?"

"Want to?"

The intelligent brain's voice was a bit puzzled, as if it didn't understand Ji Feng's words.

"That's right, do you want to become like me?" Ji Feng asked.

"Want to"

The state of the Wisdom Brain seemed to be somewhat unstable as if it said, "Master, there is not enough information in the database, and according to the data, Wisdom Brain One has to follow the program and cannot understand what the master means by 'want'."

Ji Feng raised his eyebrows, "Thinking is thinking, it is a desire, for example, why do you want to change your shape?"

The intelligent brain said, "To become the same as the master."

"That's what you're thinking." Ji Feng said, "Can you feel it?"

"....." The intelligent brain seemed unable to understand and finally said, "Master, there is not enough data"

Ji Feng then understood that the intelligent brain had not yet developed self-awareness, or rather, his self-awareness had only just started to develop, just like a small baby.

This self-awareness was still very weak, and the wise brain's behavior was still at that most basic stage of curiosity, and even this curiosity was still very hazy.

As for a somewhat stronger sense of self, it had not yet arisen at all.

This made Ji Feng breathe a sigh of relief, but at the same time, he could not help but secretly keep an eye on it, it seemed that the intelligent brain was gradually generating self-awareness, this phenomenon actually seemed to have this kind of seeds a long time ago.

From the beginning, the intelligent brain was only very raw, to later it began to say some very human statements, the tone of voice almost made Ji Feng occasionally mistakenly think that he was talking to a friend.

All the way to now, the intelligent brain is starting to be curious and will imitate

If it continues to develop further, will the intelligent brain fully develop that kind of mature self-awareness?

This is a question that Ji Feng doesn't dare to answer for sure, but even if we ask the intelligent brain, I'm afraid it doesn't even know itself. Or rather, it doesn't even realize that it is becoming different from the past and is generating a consciousness that belongs to it

The first thing that I would like to say is that I am not sure if it would be very awkward to have a person living in my own mind, just to say how he and the brain should communicate, or if the brain would still be able to serve itself faithfully like it is now, with everything being centered on itself?

All these questions, Ji Feng has absolutely no answers right now, and he can't give himself any answers.

What exactly should be done, Ji Feng has not thought of it yet.

But first of all, one thing was for sure, if he let the intelligent brain leave him now, Ji Feng really couldn't let go of it in his heart. It's not that he couldn't let go of the huge amount of knowledge and all kinds of high-tech information in the database of the intelligent brain, but he couldn't let go of this little thing, the intelligent brain!

For Ji Feng, the Smart Brain really had a special significance.

It was at a time when Ji Feng was at his most desperate and disillusioned point in his life that the Smart Brain appeared.

It can be said that it was the appearance of the wise brain that changed Ji Feng's life and saved him from being down and out for the rest of his life. If the wise brain is a 'person', then it has a great kindness to Ji Feng, the kindness of promotion, the kindness of knowing and the kindness of rebuilding

The kindness is indescribably great!

The first thing you need to do is to get a good idea of what you are getting into.

If it were to leave the wise brain, or if the wise brain were to leave, Ji Feng is afraid that he would feel an empty feeling in his heart, not knowing what it would be like!

Campus Master Chapter 1995

After asking the intelligent brain a few more questions, and after ascertaining that the intelligent brain had only developed curiosity up to now, and had not really developed the kind of unique thinking and consciousness that belonged to it, Ji Feng also stopped mentioning this issue for the time being.

Why the intelligent brain would produce self-awareness was beyond Ji Feng's comprehension, and he couldn't figure out the principle behind it.

After all, Ji Feng didn't even know the principle of the wise brain, so he naturally couldn't try to figure out why such a change would occur.

And whether or not the intelligent brain would produce true self-awareness in the future, or rather, when it would produce such self-awareness, all of this was still unpredictable, or at least, Ji Feng did not know.

It was for this reason that Ji Feng did not continue this topic with the intelligent brain.

This was because Ji Feng was not sure if there would be any relationship between his usual chats with the Wise Brain and the Wise Brain when the Wise Brain produced this kind of self-awareness.

Therefore, after deliberating for a moment, Ji Feng changed the topic.

It wasn't that Ji Feng was afraid that the Wise Brain would produce its own unique consciousness, but if the Wise Brain really produced a mind, Ji Feng really didn't know how to get along with the Wise Brain for a while.

So Ji Feng changed the topic and asked, "Wise Brain, according to your judgment, how long would it take for my physique to reach its peak state?"

Ji Feng remembered very deeply that when he first came into contact with bodybuilding gymnastics, he had once seen two people dueling on the virtual three-dimensional light screen in the training space, those two people, so strong that they were simply not human, I was afraid that even the supermen played in the movies were just like that.

Especially after seeing them leap a hundred meters in a single bound, and blow up a small mountain with a single punch, that kind of power could be described as perverted!

If he were to face off with either of those two, I'm afraid he wouldn't even have the slightest chance to resist and would be killed in seconds in a single glance!

Ji Feng was ashamed of himself just because of his extreme strength and his speed, which had completely surpassed the limits of the human body.

Ji Feng remembered that at that time, the intelligent brain had said that those two people were both super masters of the Gamma Galaxy, and their physique and strength had already surpassed the extreme ranks of super agents.

In other words, those two people, could no longer be described as super agents, they were true super masters.

And according to the intelligent brain, if one wanted to become an expert like them, one could not achieve it just by relying on body building exercises, because body building exercises were incomplete, and when it came to the back, one would need to rely on oneself to cultivate and figure it out in order to go to the next level.

Now for Ji Feng, to become like those two super masters, for the time being, is not a luxury, because just the bodybuilding exercises in the database of the intelligent brain, Ji Feng has not even finished practicing.

So what Ji Feng is most concerned about now is when his physique will be able to reach the pinnacle in the ranks of bodybuilding gymnastics. To put it bluntly, it is when he will be able to reach the pinnacle with the crippled bodybuilding gymnastics in the intelligent brain database.

Ji Feng asked this question not because of anything else, just because Xiao Yuxuan wanted to have a child.

"Master, based on your progress and frequency of practice, you need at least another six months to a year before your physique can reach its strongest!" The intelligent brain said.

“It will take that long?” Ji Feng asked.

“Yes, master!”

The intelligent brain nodded and said, “Because the difficulty of the movements of the bodybuilding exercise is gradually increasing, master is still a certain distance away from the most peak state.”

Ji Feng nodded thoughtfully and then asked, “Last time you once said that the stronger my physique is, then the better the genes my next generation will inherit will be, so if I have a child now, and if I have a child after reaching my peak state, will there be any difference between them in terms of physique?”

“It will, master.” The intelligent brain said with great certainty.

“Indeed!”

Ji Feng secretly said in his heart, then immediately asked, “What difference will there be?”

The wise brain said, “After the master’s physique reaches its peak state, and then breeds the next generation, its physique will definitely be better.”

Ji Feng asked hesitantly, “Is there just a difference in physical strength? Is there a difference in ability? For example, one might be a little more intelligent?”

The intelligent brain shook its head and said, “There is not enough information in the database, the second question cannot be answered.”

“What do you mean?” Ji Feng was stunned.

“According to the information, the master’s brain field has been developed enough, and until the master finishes the body building exercises, the master’s brain field will not be developed any more.” The intelligent brain said, “According to the law of heredity, the master’s offspring will have a certain chance of being able to inherit certain characteristics of the master, but the brain domain development is acquired and cannot be inherited.”

Ji Feng immediately understood, “This is the difference in physique you are talking about?”

“Yes, master!” The intelligent brain responded.

“Then my physique continues to be enhanced, doesn’t it have a greater impact on the next generation?” Ji Feng asked again.

“Master, there is a certain chance of inheritance, not all of the master’s characteristics will be passed on to the next generation.” The intelligent brain returned, “However, the physique strengthened through body building exercises will improve the master’s genes and will be passed on.”

“So that’s how it is” Ji Feng then understood, practicing bodybuilding gymnastics will make the physique enhanced, and this physique will naturally directly affect the physique condition of the next generation, for example, if the parents’ physique is too poor, it might make the little child born with a weak physique, will Weak and sickly, etc.

But after Ji Feng has practiced body-building exercises, his physique has been strengthened, the genes inherited to the next generation will naturally be improved, and the physique of the child will definitely be greatly improved in the future.

As for brain development, this is entirely an acquired behavior, it is estimated that it is very difficult to inherit, if the next generation wants to become the same as Ji Feng, then it is necessary to practice bodybuilding gymnastics and at the same time use biological currents to gradually develop the brain domain in order to

Ji Feng also wanted to ask more clearly, but more detailed questions, the intelligent brain can not say clearly, after all, it is also only a super agent's auxiliary system, is set to assist a person to become a super agent, and is not an encyclopedia.

But after the intelligent brain said so, Ji Feng had a plan in his heart.

There was no doubt that if one were to have a child now, it would definitely not be as physically strong as the child one would have later, because Ji Feng's physique was still growing, and the genes inherited would definitely get better and better, that was for sure.

However, according to the intelligent brain, Ji Feng feels that even if he wants a child now, this is actually only a difference in terms of physique, and in terms of things like intelligence and brain development, there should be no difference, or rather, not much of a difference.

Even if there is a difference, the gap can be narrowed or even eventually erased through later efforts.

And the best way to narrow this gap is to practice bodybuilding gymnastics.

When he understood this, Ji Feng couldn't help but let out a sigh of relief. He had discussed the issue of having children with his brain before, but the explanation given by the brain at the time was unclear, only saying that the deeper the gymnastics practice, the better the genetic inheritance, but it didn't say exactly where the gap was and what it was.

Today, on the other hand, the wise brain explains it a little more clearly.

This also shows that the current Wise Brain is also a little more human than before. Does this mean that the Wise Brain is actually growing?

"Master, do you have any more questions?" The Wise Brain's voice brought Ji Feng's thoughts back to reality.

"No more." Ji Feng shook his head.

"Then, Master, do you want to start practicing now?" Wisdom Brain asked.

"Start!"

Ji Feng nodded heavily, "To strive to reach peak condition as soon as possible"

Swish~!

The scene in front of Ji Feng suddenly changed, he once again entered the training space of the wise brain, in front of him was a white space, there was nothing in front of him, it was as if he had come to a space filled with white fog, his body was wrapped in that thick fog.

“Master, the rules are the same as last time, please use your bio-current to disperse these fogs!” The voice of the intelligent brain rang out next to him, “Master, shall we begin now?”

“Start immediately!” Ji Feng immediately nodded his head.

In the next moment, the wise brain disappeared, and after that, Ji Feng was left standing alone in the entire space, looking at the white space as he began to push the bio-current to disperse those white fogs.

Don’t ever think that it was easy to do so, in fact, it was an extremely difficult training.

No matter what he did, it was impossible to disperse the white mist, especially after he had activated the bioelectric current, and he could clearly feel the stickiness and the incomparable random fluidity of this white mist.

If the bio-current released from the body were a hand, the white mist would be the equivalent of water, and no matter how you pushed it with your hand, that water would never be pushed away straight away like a solid, but would instead flow backwards, rendering all that had been done before useless.

And to pass this level, you have to disperse all the white mist in the entire space, which is like a person diving into the water but having to use his hands to push all the water around him away Even if it could really be done, you can imagine just how difficult it would be!

Ji Feng doesn’t even know how many times he’s done this kind of training, he’s been blocked from this level for a long time, and since he started practicing bodybuilding, Ji Feng has never encountered such a difficult way of training.

In the past, the training was either physically painful, such as following the phantom and doing various exaggerated movements, which would cause immense pain to the body, but as long as he gritted his teeth, he could still pull through.

Some required repeated practice, such as the previous obstacle ball training, which had to be practiced over and over again, with incredibly precise and subtle control of the bio-current, before it could be successful.

But no matter how difficult it was, as long as it was persistent, it was always possible to succeed; after all, he knew the solution, he just had to grit his teeth and practice.

But now, he could hardly find a way to crack it at all.

Yet Ji Feng knew that if he wanted to be even stronger, he had to get past this hurdle!

Campus Master Chapter 1996

“Phew~~!”

Ji Feng retired from his training state and couldn’t help but let out a long breath.

Looking at the time, it was already past five in the morning, and it was unexpected that a whole night had passed in the blink of an eye.

“It seems that it will take not a short time to break through this barrier!” Ji Feng said in a dark voice. Ever since he finished talking to the intelligent brain last night, Ji Feng had been training, but a whole night had passed and he still hadn’t made any progress.

The thick fog that surrounded him had actually not changed at all, no matter how much he pushed the bio-current, he could only poke the white fog around him, but immediately afterwards, the white fog that seemed like a sticky liquid would flow backwards and surround his body again.

It was not difficult to move the white mist alone, as long as one could activate the bio-current and release it from his body, one could move the white mist around him.

However, it was not so easy to disperse all the white fog and not let it flow back again after being moved.

At least so far, Ji Feng did not have any solution.

Unless, he could release all the bio-currents in his body and form a huge barrier, and then push it straight through, so that he could disperse all those white fogs.

But just by looking at the size of the entire space, Ji Feng immediately dismissed this idea, for the simple reason that even if he released all the bio-currents in his body, he would definitely not be able to form such a wide barrier, that would be completely impossible to do!

Ji Feng couldn’t help but shake his head and secretly said, “It looks like it will take not a short time to break through this barrier.”

Obviously, this barrier was simply too difficult and too hard.

To break through this level, I’m afraid that hard practice alone is not enough, perhaps, a little bit of enlightenment is also needed, perhaps there is still some kind of trick in it, but there is no telling when to find this trick.

After moving his body a few times, Ji Feng quickly put on his clothes and went to the bathroom to finish washing up, and then quietly went downstairs.

Through the bedroom door he could hear clearly that both Tong Lei and Xiao Yuxuan were still breathing very evenly, obviously they were both still asleep.

Therefore, in order to avoid disturbing them, Ji Feng went downstairs gently and prepared to go to the backyard to move his body.

However, as soon as he reached the backyard, Ji Feng couldn’t help but be slightly stunned.

It was clear that Bai Zhu was treating the tree as her opponent, imagining the various attacks that the tree might make, and then she would make various dodging moves in response.

Ji Feng couldn't help but smile slightly, this kind of exercise method of Bai Zhu's was also very good. At least, when one could not find an opponent, this practice of setting up an imaginary enemy for oneself not only allowed one to be alert at all times, but also enhanced one's strength.

In fact, from small individuals to large countries, this practice is beneficial.

For example, if we only talk about technology and force, it would be very difficult to find a rival in the whole world. As the only superpower in the world nowadays, any other individual country would not be able to fight against Rice.

But if, after becoming a superpower, the people of Rice become complacent and slacken off, and the swords and guns go into storage, I believe that in no time at all, Rice will definitely fall from the throne of the world's number one power and will be overtaken by others.

Therefore, in order to avoid this situation, Rice has constantly set up one imaginary enemy after another, so that the whole country is always on the alert, and the military will often fight some local wars, on the one hand to test new equipment, and on the other hand, actually to ensure that the combat effectiveness of the troops will not decline.

In fact, this is almost the same as what Bai Zhu is doing now.

Both are to improve their strength or, at least, to keep their current state from regressing and, at the same time, to go further.

Of course, to say that the only difference between the two is that Bai Zhu sets up an imaginary opponent for himself, an imaginary master, to pursue his own personal progress in strength, whereas an act such as Rice's, which sets up a country for itself as an imaginary enemy, is actually for the development of the whole country and for the combat effectiveness of the whole force.

One is a whole and the other is an individual, and the difference is just that, but its meaning and nature are the same.

"Pa!"

Bai Zhu suddenly bent slightly and made a dodging motion, followed by her fierce padding step and rushed up, her knee directly hitting the thick tree trunk.

The next moment, Bai Zhu took two steps back, conceived another movement, and then attacked again
.....

Ji Feng held his arms and watched with a smile from the side.

Bai Zhu's movements were quite fast, although because this was only an imaginary enemy, every time she was attacking, her strength was not too strong, but her movements were very standard, and she was fully concentrated, so much so that Ji Feng stood next to her for so long, Bai Zhu didn't even notice.

"Hoo~~!"

Bai Zhu suddenly hurried upwards, then spun on her feet, her body went behind the big tree in a flash, and then attacked quickly.

“Beautiful!”

Ji Feng exclaimed.

Bai Zhu’s movements were clean and quick, and her strikes were extremely fast, the height of the attack was about Bai Zhu’s chest, if the opponent was a grown man, then there was no doubt that Bai Zhu was attacking the opponent’s back waist heart, which was the vital part.

“Young Ji?”

Bai Zhu snapped back, a look of surprise appearing on her pretty face, “You’re up.”

“Mm!”

Ji Feng nodded and said, “Bai Zhu, that was a beautiful hit just now, and the movements were even more severe than before.”

Bai Zhu smiled, “Because I’ve been feeling more physically energetic lately, many moves that were a bit difficult to do before are now very comfortable instead, so I wanted to practice more in order to consolidate.”

Ji Feng nodded and said, “That’s because you insist on practising aerobics, a feeling I’ve had before.”

Even now, Ji Feng still remembered that when his physique started to increase, the feeling of suddenly having inexhaustible strength, as if he could kill a cow with one punch, was really powerful and painful!

And every time his physique was enhanced afterwards, he had this feeling, so Ji Feng understood it very well.

“By the way, young Ji, when I was practicing body building exercises, I sometimes felt that some of the movements didn’t quite work, what’s going on?” Bai Zhu suddenly asked.

“Oh? What movements?” Ji Feng was stunned.

“It’s a movement in the second stage of bodybuilding gymnastics” Bai Zhu posed a bow stance, then one hand in front and one behind, with his hands in a false grip, “This movement, I’ve also practiced it over and over again, but whether it’s in normal combat or when I’m actually fighting an enemy, I don’t think I can use this move”

“So this is it!”

Ji Feng’s heart suddenly dawned on him, he nodded and smiled, “It’s nothing, just practice it as it is, maybe you’ll use it later.”

Bai Zhu was a bit puzzled but still nodded, since Ji Feng let her continue practicing, it would definitely not harm her.

Ji Feng smiled, “Actually, ah, this is the posture to master a certain weapon, right now you can’t touch this kind of weapon, but you might have the chance later, anyway, it’s always good to master it in advance, as the saying goes, there’s no pressure on the art, right?”

“That’s right!” Bai Zhu nodded in relief, “But what kind of weapon is that you’re talking about, using this kind of posture to master it, it feels like it should look a bit odd, right?”

“Keep practicing then.” Ji Feng smiled, “As for what kind of weapon it is, I’ll tell you when the time is right.”

In fact, as soon as Bai Zhu made that move, Ji Feng knew what was going on.

Strictly speaking it should be blamed on Ji Feng’s negligence, when he had previously taught Bai Zhu the whole set of bodybuilding exercises he had learned, he had directly taught Bai Zhu a whole set of bodybuilding exercises, which also included some special moves, such as those that were specifically practiced to master a certain weapon, or a certain piece of machinery.

What Bai Zhu has just done is the manoeuvre to master the latest generation of laser cannons.

Although this is an extremely advanced high-tech weapon, because the energy of the laser cannon is so strong when it is fired, it generates a certain amount of shock waves that can affect the user personally.

So in order to fully master the laser cannon without any side effects, one has to practise some movements to cancel out these shock waves.

Ji Feng had already been exposed to these weapons in the training space of the intelligent brain, so he had long since become accustomed to them.

But naturally, Bai Zhu did not know about these weapons, which was why she felt that these movements were a bit strange.

However, Ji Feng told Bai Zhu to keep practicing, because as time went on, he would sooner or later create those high-tech weapons that he had been exposed to, and by then, these movements that Bai Zhu had practiced would naturally have a use.

Thinking about the vast amount of weapon information and knowledge in his mind, Ji Feng couldn’t help but feel some anticipation in his heart.

He was eager to see what those countries that kept bouncing around would become nervous if those high-tech weapons that were far beyond this era were manufactured by him one by one.

Especially in the recent years, with the gradual rise of China, Kepong felt a great threat and kept contacting some neighboring countries, wanting to besiege China and making every effort to trap it.

The KAI Peng has even acted as a vanguard, constantly confronting China in various areas and seeking trouble with it.

On some territorial issues, KAI Peng has even turned black and white, repeatedly disputing with China and even coming close to clashing with it by force.

Campus Master Chapter 1997

The KAI Peng even acted as a vanguard, constantly confronting China in various areas and seeking trouble with it.

On some territorial issues, Kepong has even turned black and white, repeatedly disputing with China, and even coming close to clashing with China by force.

In particular, some wolves in Kepong, including some politicians and military radicals who are extremely hostile to China, have been openly calling for the non-existence of certain acts of genocide in the war of aggression, and have also shouted the slogan of protecting 'Kepong's territory' and wanting to confront China by force.

This slogan is echoed by the continuous provocative actions of the Kepong military, especially the Kepong navy, which has even sailed directly into Chinese waters and either rammed some Chinese fishermen and arrested them on some random charges, or openly claimed that certain territories belong to Kepong.

This situation is really irritating.

Just think of having a neighbour around who is extremely bad in character and personality, who actually comes into his own yard to pee and openly claims that the area he has peed on belongs to him, while his own family is just walking in the yard, only to be beaten up by this bad neighbour

This is simply bullying!

And what the other side is relying on is nothing more than the fact that the family has advanced weapons, a developed economy and, more importantly, a powerful guy behind it.

So, in order not to be bullied, one has to have a more powerful fist and a more developed economy!

And those advanced weapons in Ji Feng's mind are definitely the most leading in this world, without a doubt, as long as they are manufactured and all of them are digested, then if that bad neighbour dares to make trouble again, he can be hit hard and hurt!

However, it was not the right time to manufacture those weapons.

Because right now, Ji Feng did not have enough strength.

Once that kind of high-tech weapon appeared, it would inevitably cause other countries to be on high alert, and by then, before even the military could digest it, I was afraid that China would have to be sanctioned.

After all, China's economy is too ruthlessly dependent on foreign countries.

As He Hongwei had said before, as far as it is concerned, an ordinary citizen within China, from the time he wakes up in the morning until he goes to bed at night, every single thing he eats and everything he uses in between, but almost everything that is a big brand of goods, is foreign.

There are some that were originally domestic brands, but gradually they have all been acquired by foreign countries.

Once foreign countries impose economic sanctions on China, when the time comes, China's economy will definitely be greatly affected, thus creating a huge tremor.

If you want to preserve economic stability, then you will also have to give up your high-tech weapons
.....

As stifling as it sounds, it is true.

Therefore, before the time is ripe, Ji Feng will have to hold back and must develop the economy first,
one step at a time

Leaving Bai Zhu alone to exercise in the backyard, Ji Feng trotted out to buy breakfast, and afterwards,
he contacted He Hongwei and agreed to meet at the Tengfei Group in the morning.

After breakfast, Ji Feng took Bai Zhu with him, along with Xiao Yuxuan and Xiao Ying, and went to the
Tengfei Group.

At around 9:30am, He Hongwei arrived at the Tengfei Group with two bodyguards.

.....

“Older brother, not coming for a while, this group of yours is really doing a great job, awesome!” As he
walked along, almost all the workshops that He Hongwei saw were in operation, and all that could be
seen inside the office building of the Tengfei Group was also a busy scene.

While it was busy, no one was seen to be in a state of panic, not to mention chaos, everything was going
on in an orderly manner, which showed that the staff had long since got used to this fast pace.

This is enough to show that the group is full of energy.

This was a phenomenon that was not often seen in many other enterprises.

Ji Feng waved his hand at his words and laughed, “It’s useless for you to praise me, because I don’t get
any credit for this, it’s all Han Zhong and Yu Xuan who made it happen. Besides, compared to the
Tianyao Group, the Tengfei Group is just a little kid, there’s nothing to brag about.”

He Hongwei laughed: “You’re too modest.”

Ji Feng shook his head and smiled, “All right, let’s get down to business, brother Hongwei, tell us your
plans, the Brilliant Group is not that easy to deal with.”

He Hongwei nodded, “I agree with you, if the Brilliant Group was easy to deal with, it wouldn’t have
made us both so cautious. I have never taken the Brilliant Group lightly!”

As he spoke, He Hongwei took out two folders from the briefcase he was carrying and placed them on
the table.

“What’s this?” Ji Feng asked.

“I have prepared two plans on how to stop the Brilliant Group from cooperating with the Boundary
Pontiffs.” He Hongwei said.

“First, the strategic items involved in this cooperation between them both, one of them is a high-
strength alloy that the R&D department of the Brilliant Group is working on with the Academy of
Sciences, because I’m not a professional, I can’t introduce clearly what exactly is good about this alloy,

but I know that this alloy is extremely competitive in the current market, and there are even some technologies that can be applied to the military!”

He Hongwei explained, “Originally, the patent ownership of this alloy was shared between the Brilliant Group and the Academy of Sciences, but then the Brilliant Group was the one who funded a portion of the ownership in the hands of the Academy of Sciences and bought it over, as a result, it now becomes solely owned by the Brilliant Group.”

“Wait a minute.”

Ji Feng waved his hand and interrupted He Hongwei: “Let me interrupt, since this alloy is so good that it can even be used in the military field, then it is reasonable to say that this should be a strategic project, and the country should attach considerable importance to it, how could the patent in the hands of the Academy of Sciences be sold to the Brilliant Group?”

No matter what it is, once it is linked to the military field, it will at least attract a certain degree of attention.

Without a strong military, you can’t even speak with a straight back!

So for this kind of technology, the country should have found a way to buy the patents out of the Brilliant Group’s hands.

This doesn’t make sense!

Who knew, but He Hongwei only laughed coldly at his words: “Is it new? It happens all the time that large state-owned enterprises with a market value of several hundred million dollars are eventually valued at a few hundred thousand dollars and sold to private individuals, now just selling a patent ownership, and only a part of it, what’s so unusual about it?”

Ji Feng was stunned, then he nodded with a bitter smile and didn’t say anything.

He immediately understood what He Hongwei meant.

There must be some kind of human relations in between that outweighed the national interest, or rather, someone had operated in violation of the rules, so that the Brilliant Group, as a private enterprise, had gotten ownership of the patent of a strategic national project, and still had full ownership.

“With the Wu family around, do you think it would be difficult for the Brilliant Group to get the patent?” He Hongwei brushed aside his mouth, and suddenly, he looked at Ji Feng with a smile, saying, “If you still have doubts, I advise you might as well ask the original old president of the Brilliant Group, Rong Peng. You have such a good relationship with his daughter, he will definitely know everything about you!”

Ji Feng had originally listened attentively and was deeply impressed by He Hongwei’s words, but when he heard this last sentence, his face suddenly turned black.

What kind of words are these!

He Hongwei’s words were clearly ambiguous, thinking that he and Rong Suyan had a very intimate relationship

“Who did you hear this from?” Ji Feng said without good humour.

“Who else do I need to listen to? This matter has long been spread around, who in the whole circle doesn’t know?” He Hongwei laughed harshly.

“You keep talking!”

Ji Feng shook his head helplessly and didn’t bother to argue, it seemed that outsiders had already decided that it was him who had rigidly snatched Rong Peng’s father and daughter from the Wu family, and even snatched Rong Suyan from Wu Zhihe’s hands.

The more you explain to people, the more it feels like there’s no silver in this place, and people will think they’ve gotten away with it.

Therefore, Ji Feng simply changed the subject.

He Hongwei nodded with a smile and said, “So my first plan is that we first enter Southern Guangdong with great fanfare, buy the patent and production line of this alloy from the Brilliant Group, create a buzz and let the outside world know that this alloy is a strategic national project, so as to put pressure on the Brilliant Group and let them know how many people they will be subjected to if they cooperate with the Kepong people! The accusations!”

“Of course, while creating momentum and putting pressure on the Brilliant Group and the Wu Family, we should also find ways to combat the Bebonians.” He Hongwei said, “At the same time, the top will also cooperate with our actions and will give some help when the time comes.”

“Since we know that the patent transfer at that time was an irregular operation, then why don’t we just investigate and deal with it?” Ji Feng frowned and asked, “As long as the irregularities can be investigated, it wouldn’t be too difficult to get the patents back if we want to, right?”

“If it’s just a separate investigation and punishment, it’s not very meaningful.” He Hongwei shook his head and said, “First of all, what the Academy of Sciences holds is also only a part of the patent ownership, not the entirety. Even if the previous deal was cancelled, it wouldn’t affect the Brilliant Group’s deal with the Kepong people.”

He Hongwei said, “Secondly, under the Brilliant Group, there is not just this one strategic project, not all of them are operating in violation of the law, you can check this kind of alloy, can you still check them all?”

“That’s true,” Ji Feng nodded his head.

“So ah, the trouble with this matter is the trouble here, if you can use administrative means, the top would have used it long ago, why come to us?” He Hongwei said.

“Hmm! You go on.” Ji Feng nodded thoughtfully.

Campus Master Chapter 1998

“So yeah, here’s the trouble with this matter, if it was possible to use administrative means, the top would have used it already, why come to us?” He Hongwei said.

“Hmm! You go on.” Ji Feng nodded thoughtfully.

“Creating a sound bite and putting pressure on the Brilliant Group, that’s one thing.” He Hongwei said, “Secondly, we should find a way to crack down on the Boundary Pontiffs, especially that Lingxia Group that will soon be cooperating with the Brilliant Group, so we should focus on cracking down on it. In this way, due to the pressure of public opinion, even if the Wu family is dead set on asking for money, they can’t disregard the bad effects of selling their technology and projects to the Kepong people!”

“And at the same time, although the Lingxia Group also has extremely strong competition on the Chinese side, as long as they find a way to find their lifeline, by then, no matter how desperate the Lingxia Group is for the projects in the hands of the Brilliant Group, they will have to give it some serious thought!”

“You wait a moment!”

Ji Feng raised his hand, temporarily interrupting He Hongwei, and said, “I have a question, if, say, there is no regard for this outside influence at all and insists on cooperating with the Boundary Pontiffs, then what should we do?”

He Hongwei nodded and said, “The possibility you mentioned is actually very small, one could even say there is none.”

“Don’t say things so absolutely!” Ji Feng did not think so, he reminded, “Brother Hongwei, you must not forget that when Su Po Electrical was sold to a foreigner, almost everyone was against it, but what happened in the end, the deal was still completed, and now the brand is already owned by a foreigner!”

Even in an era when foreign products were unanimously regarded as good value and cheap, and many people did not buy foreign products, Sopo Appliances still dominated half of the industry in China.

This shows the strength of Sopo Appliances and its market appeal!

Even one of the top leaders at the time expressed his personal views, hoping that the mega conglomerate would continue to do so, and that the national brand of China would be maintained.

But even under these circumstances, Supo Electric was still sold to a foreigner, resulting in a sigh of relief from the industry and the market.

Many people thought that another iconic Chinese company had fallen and become a foreign brand.

But what can be done about it?

No matter who opposed it, people eventually sold it, and from then on, as long as the people entered the kitchen, they used foreign brands, and the profits were all earned by foreigners, so who could do anything about it?

So in Ji Feng’s opinion, if the Wu family insists on not considering the views and opinions of the outside world and insists on the cooperation between the Brilliant Group and the Kepong people, then it is obvious that no one from the outside world can stop it.

Therefore, for He Hongwei’s first intention, Ji Feng did not think that the plan was too feasible.

“This issue you mentioned, I’ve actually considered it, but this time it’s different.” He Hongwei said, “This time we aren’t just going to stop the Brilliant Group, but we’re also going to use every means to combat the Lingxia Group, so what happened to Su Po Electrical won’t be repeated on us.”

“Even if there are still any surprises, we still have a second set of plans!” Without waiting for Ji Feng to speak, He Hongwei continued.

“Then tell us about your second set of plans!” Ji Feng said.

Since He Hongwei was so well-informed, Ji Feng didn’t doubt whether he was boasting or not. If he didn’t have a little bit of ability, He Hongwei wouldn’t have been able to sit in the position of the boss of the Tianyao Group at this age, and if it was purely based on the administrative level, He Hongwei’s administrative level was even half a level higher than Ji Shaodong!

What’s more, He Hongwei had long proven his talent and ability through several capital operations and two large mergers and acquisitions, so Ji Feng believed that since He Hongwei was so sure, he must still have his way.

“The second option would be tantamount to pulling a tiger’s skin to make a big flag.” He Hongwei smiled and teased.

“Tell me!” Ji Feng laughed.

“The method is actually very simple, since the Brilliant Group has several strategic projects under its umbrella, we should simply find a way to launch industries related to these several projects, and then cooperate with the military, or directly with the Academy of Sciences. Use the influence of the military or the Academy of Sciences to directly put pressure on the Brilliant Group!” He Hongwei said.

Ji Feng couldn’t help but frown: “This method

He Hongwei smiled gently: “If you have doubts you can raise them directly, now we are at the discussion stage, say whatever you want.”

Ji Feng said, “Actually, after all is said and done, it comes back around to the original point

Brilliant Group is a private enterprise, no matter what kind of resources they hold in their hands, that is theirs, and who they are willing to cooperate with that is also their freedom, others can’t control it!”

He Hongwei sneered: “Usually it may be out of control, but one thing you haven’t noticed is that the few strategic projects under the Brilliant Group are all from the hands of the state or local government!”

Ji Feng asked, “What about this?”

He Hongwei said, “Since it’s a strategic project to be given to a private enterprise, there will naturally be some conditions, in our country, no matter how big the private enterprise is, it’s always an auxiliary economic system, and there are always more restrictions than state-owned enterprises, you should know this, right?”

Ji Feng nodded and said, “I understand some of it.”

In our country, state-owned enterprises are the most dominant economic system, and private enterprises are auxiliary. Although there have been many detours since our economy began to develop rapidly, state-owned enterprises have always held up no matter what.

The most important thing to thank for all this is the iron-fisted Hong Laozi of that year.

Because with the reform and opening up, the rapid development of the economy, on the one hand, has given rise to a lot of corruption, especially in state-owned enterprises, those leaders have power in their hands, more money, the worst of human nature in their bodies, so all kinds of disgusting and disgusting phenomena have emerged.

The consequence of this phenomenon is that a large number of state-owned enterprises are insolvent, many of them have gone bankrupt and a large number of workers have lost their jobs.

At this time, there are many people advocating some rhetoric, such as, because it is the era of market economy, the stiff and aging state-owned enterprises are no longer able to keep up with the times, lack competitiveness, and simply do not have the soil and ability to survive.

And the solution to these problems is to change the system of state-owned enterprises one after another, allowing private takeovers and turning them into private enterprises, so that the enterprises are their own, then the owners will naturally have the drive, the enterprises will be profitable, they will be able to survive and potentially grow

However, the then iron-fisted old president used his strong-arm tactics to squash this trend, because his old man knew very well that those who said these things were selfish and all wanted to use extremely low prices to turn the country's property into their own.

At that time, the old man sent several inspector teams to go around the country to firmly investigate and deal with this phenomenon.

In Ji Feng's impression, he had once read a news story on the internet about a large machinery factory in a certain province where the machinery alone was worth tens of millions of dollars, plus the intangible assets such as plants and land, as well as patented technology and sales channels, all together totaling several hundred million dollars.

However, at that time, it was valued at only two million and sold to a private party.

When this matter was found out, it was a shock to the whole country, knowing that the machinery inside the factory was sold as scrap metal, and the whole factory was more than that much money!

Later, after investigation, it was discovered that the owner who bought the factory was originally a vice president of the factory, and he had a very close relationship with the city's leaders

The company's business is a very important part of the company's business.

However, the iron-fisted boss resisted the pressure from all sides and, by relying on his strong hand and his excellent economic skills, he was able to resolutely investigate and deal with the situation while at the same time making urgent rectification, eventually resisting the trend and giving new life to most of the state-owned enterprises.

After so many years of development, state-owned enterprises are now highly competitive and not at all inferior to private enterprises.

All this can be attributed to the group of aspirants represented by the iron-fisted bosses.

Without their tough attitude, their courage to be the first in the world, and their exceptional skills, there is no telling how many enterprises would be privately owned now, and in that case, it would be the country and the people who would suffer.

When he thought of the old man with an iron fist, Ji Feng could not help but recall some of his old man's resounding words.

"No matter if there is a mine field or an abyss in front of me, I will go forward without a second thought, and will bow and die!"

"I have prepared a hundred coffins and one for me, nothing more than a death together, but in exchange for the long-lasting peace of the country"

.....

Until now, the resounding and impassioned words of the old president still resonate and reverberate across the land of God for a long time.

In fact, many other things that were beneficial to the people were started from that time, set down by the old man, such as social health insurance, free and compulsory education and so on

However, it is said that the old man suffered an unknown number of assassinations

Campus Master Chapter 1999

In fact, many other things that were beneficial to the people started from that time, set by the old man, such as social health insurance, free and compulsory education, etc

However, it is said that the old man has suffered from assassination for an unknown number of times

.....

"Ji Feng, Ji Feng!"

The sudden voice made Ji Feng jerk back his thoughts and he saw that He Hongwei was looking at him in surprise, "What are you thinking about? Did you hear me talking to you, how come you didn't react half-heartedly?"

Ji Feng shook his head and laughed, "I wasn't thinking about anything, I was just a bit lost in thought, what did you say?"

He Hongwei glanced at him with some suspicion and asked, "Ji Feng, is there nothing wrong with you? It's not your habit to wander off in the middle of a conversation, is there something on your mind?"

Ji Feng waved his hand, "No, it's just that just now you were talking about state-owned enterprises and private enterprises, and I thought of the iron-fisted old man."

He Hongwei was instantly solemn, his face showing respect, "His old man is indeed very respectable, just alas, let's not talk about that!"

As a son of a family who had grown up in Yanjing since childhood, He Hongwei was much clearer than Ji Feng about some of these things, yet the more this happened, the more helpless he became and the more regretful he felt in his heart, but this was something he could not just comment on.

But He Hongwei was aware that no matter who mentioned the old man, he would be full of respect and say that his old man was respectable.

Even for those who had been ruled by the old man's iron fist, even if they hated the old man in their hearts, they would not dare to show the slightest disrespect in front of people.

This was the old man's personality, which commanded respect and made some people fearful.

But after all, it still leaves some regrets

"Let's go back to what we were talking about earlier!" He Hongwei was reluctant to go deeper into the conversation and said, "You didn't listen carefully just now, so I'll say it again. What I mean is that when the Brilliant Group got those few strategic projects, on the contracts signed, it was stated that if the domestic and official if there is a need for this, the Brilliant Group should give priority to the domestic units, especially the state-owned units!"

Ji Feng instantly worked out the flavour: "Are you trying to say that you want to make false projects and use the name of the military or the Academy of Sciences to put pressure on the Brilliant Group to comply with this treaty?"

For example, if the Brilliant Group had a high-tech alloy project in its hands, and if the military was also working on this project, or if it was a new project that was being launched that would use this alloy technology, then if the military sent a request for cooperation to the Brilliant Group, according to the treaty, the Brilliant Group would have to consider the military's request first, and could not cooperate with the Boundary Peng Lingxia Group!

He Hongwei nodded, "That's right, that's what I mean, but strictly speaking, yet it's not to do fake projects, I really intend to cooperate with the military and the Academy of Sciences to do these few projects, even if they can't be put into practical use immediately, but at least we should be able to see the results in a short time!"

He mused, "In this way, I will have enough reasons to put pressure on the Brilliant Group, and even the Wu family will not be able to say anything because priority will be given to domestic enterprises, a clause that was deliberately restricted in the contract! In fact, I'm sure that the Wu family wouldn't dare to say anything, otherwise, this is actively handing over the handle, such a stupid thing the Wu family people shouldn't do!"

Ji Feng frowned, "That's true, but isn't it a bit too difficult to rashly launch a project and try to make achievements in a short period of time?"

Since it was a strategic project, it meant that it must contain quite competitive factors such as precious resources, advanced technology or excellent ideas, and since that was the case, it would not be that easy to surpass it, and I was afraid that it would be difficult even just to launch this project.

“It’s not too difficult.”

He Hongwei said, “If we decide to go with this plan, I will communicate with the military and the Academy of Sciences, I have already understood that the Academy of Sciences has already made some progress on some projects, if we intervene, we should be able to bluff the Brilliant Group if we operate it and then exaggerate it a little.”

“And what if we can’t bluff?” Ji Feng asked.

“If we can’t bluff,” He Hongwei shook his head and smiled, “then we will only be able to use the first method, desperately hitting the Lingxia Group, while making a lot of noise to put pressure on the Brilliant Group, however, using the the first method is more or less difficult if we want to succeed.”

Ji Feng pondered for a moment and suddenly asked, “What are the other several strategic projects under the name of the Brilliant Group?”

“An alloy project, which you already know about, another one is machinery, and another one is a new material for high temperature resistance.” He Hongwei gave a brief introduction, “The project about machinery, it’s not clear in a few words, if you want to see it, I have the details here. As for the new high temperature resistant materials, there are so many places where they can be applied, such as aviation, such as aerospace, or weapons and so on.”

“Hmm!”

Ji Feng nodded and said, “You give me a copy of all the materials separately. Also, I might not know much about that high temperature resistant material, but that mechanical project, maybe I can help, maybe we don’t need to engage in any fake projects at all!”

He Hongwei was stunned: “What do you mean?”

Ji Feng laughed: “I know some mechanical technology, and don’t forget, Rong Peng brought out a large group of technicians from the Brilliant Group, if we get it right, we can launch the project directly, there is no need to falsify it, and the Brilliant Group will have to bow down obediently!”

“Really?”

He Hongwei asked in disbelief.

Ji Feng spread his hands, “Do I have to lie to you? But it’s too early to say, I have to read the information before I can be sure.”

He Hongwei said, “No problem, the information can be given to you now, so what, old brother, if you can work out this project then it would be great, this is a real surprise!”

Ji Feng laughed: “Don’t be too happy first, I have to read the information first.”

Although Ji Feng had a vast amount of knowledge about machinery in his mind, right now Ji Feng didn’t know the details of the Brilliant Group’s machinery project, so he wasn’t sure if he could really help.

However, Ji Feng was somewhat confident in his heart that he might be able to help with that new high temperature resistant material that the Brilliant Group was working on.

The temperature of the weapons in the Gamma system, such as laser guns, is also very high when they are fired, so the manufacture of laser guns also requires high temperature resistant materials, not to mention the more powerful laser cannons and other weapons.

So, for this high temperature resistant material, Ji Feng might instead be a little more certain.

However, he did not say all the words yet, let's wait until he had read the information, maybe he could even give He Hongwei a surprise.

"The information is all here!" He Hongwei took all the folders out from his bag and put them on the table, "It's useless to talk too much today, you grab the time to read it and then we'll communicate."

He Hongwei felt more or less impatient because Ji Feng's words gave him no small amount of hope.

When he came here, He Hongwei had not thought that Ji Feng would instead be able to help him technically. Originally, He Hongwei had only wanted to join hands with Ji Feng and use their respective influence and funds to jointly resist the Wu family and stop the cooperation between the Brilliant Group and the Lingxia Group.

Now it could be said to be an unexpected pleasure.

This time, He Hongwei was even more excited about joining forces with Ji Feng.

"That's all for now then, I won't stay much longer, I'll go back and wait for your news!" He Hongwei stood up, he wanted to free up time for Ji Feng to look at the information as soon as possible.

"No problem!" Ji Feng smiled, "I'll do my best."

He Hongwei patted his shoulder, and without saying anything else, he turned around and left. Some words didn't need to be said, he believed that Ji Feng understood what he wanted to say.

Ji Feng sent He Hongwei away and was ready to go back to his office to look at the information, but just as he reached his office, the phone suddenly rang.

"Ding"

Ji Feng took out the phone and found that it was Zhang Lei calling, he smiled and picked up the phone, "Lei Zi, what's up?"

Zhang Lei's voice immediately came over, "Crazy, I'm at Jinling Road Pedestrian Street, come over immediately."

Ji Feng was stunned, "What's so urgent?"

Zhang Lei said, "Don't ask what's up, if you're not busy now come over, you'll know what it is when you arrive."

Ji Feng nodded and smiled, "Good, I'll go over now."

He knew Zhang Lei's temper, although this guy was big-headed, he was very measured. Now that he was in such a hurry to call himself over, it was obvious that there was something going on, and I was afraid that it wasn't too good to say over the phone.

After hanging up the phone, Ji Feng picked up the folder on the table, and then he went out the door.

“Ji Feng, you’re leaving?” Han Zhong walked over to the door and saw Ji Feng striding out, and immediately asked.

“Mm! Something has to go out for a while.” Ji Feng said.

“Alright then, I was going to say I’d have a couple of drinks with you at noon.” Han Zhong smiled and waved his hand, “Take care on the way.”

Afterwards, Ji Feng went to Xiao Yuxuan’s office, said hello to her, and then quickly left together with Bai Zhu.

.....

About an hour later, Ji Feng arrived at Jinling Road Pedestrian Street, parked his car at the nearby car park, and then Ji Feng, together with Bai Zhu, rushed over to the address that Zhang Lei said.

From a distance, Ji Feng saw Zhang Lei, with Shen Jingyi standing beside him, but at the moment Zhang Lei was talking to a young man, and it seemed that they were very familiar with each other, talking and laughing.

Ji Feng was a bit strange, he looked at the young man and felt some familiarity, but because he could only see a side face, he did not recognize who this person was for a while.

While thinking, Ji Feng and Bai Zhu walked over together, “Lei Zi, what’s the matter with calling me here in such a hurry?”

“You’ve finally come over.” Zhang Lei laughed and pointed to the young man next to him, saying, “Crazy, look who’s here!”
