

Campus Master 2311

Now things are not really all about Ji Feng and Wu Zhengxin, but a game between two families or even two factions.

And the situation now is that the Ji family is in complete control of the initiative and the Wu family is at a complete disadvantage.

So, what will the Wu family do in response?

This has become the focus of many people's attention, and now the Ji family has already set up a position to cut Wu Zhengxin down, depending on how you, the Wu family, will save.

The Ji family even sent Ji Shaoyou to turn himself in during this process, which is like setting an example to the Wu family that if a son of my Ji family breaks the law, we will definitely not cover up for him and will even send him to turn himself in.

In this way, the Wu family was cornered – with the example of the Ji family in front of them, how could the Wu family save Wu Zhengxin?

The Ji family would never cover up for him, or even send Ji Shaoyou to turn himself in, while the Wu family would still try to save Wu Zhengxin when they knew he had already committed a crime?

The Wu family was immediately forced into a very awkward situation!

This made the Wu family's situation even more difficult, and even made Wu Zhengxiang and others embarrassed and annoyed, because outsiders did not know that Ji Shaoyou turned himself in not only because of the Ji family's high moral character, but because Wu Zhiyong first blackmailed Ji Feng with this matter, trying to use it to negotiate with the Ji family, only to be easily defeated by the Ji family.

The family was even put in an awkward position because of this.

This is really a bit helpless!

"Brat, in such a hurry to go back?" Looking at her smiling son, Xiao Sumei couldn't help but be sad to see him go to school in Jiangzhou, while she had to stay in Yanjing to take care of her husband, because when he reached this position, he was really too busy, and many times he couldn't eat and drink regularly, so she had to always urge him on.

But in this way, Xiao Sumei has less time to see her son, especially since her son seems to be very busy as well, and she can't even see him a few times this year, Ji Feng was raised by her side, so how could she not want to panic?

Ji Feng laughed: "Of course I have to go back, seeing as this is about to graduate, if I don't go back, I won't even be able to get my diploma."

The school was about to hand in its thesis, and then after the summer holidays, the school would start defending the thesis, followed by the internship, so there was little time left.

Of course, Ji Feng naturally does not need to participate in the internship, and he does not have to run around to find an internship unit like other students do, as long as he puts his name on the Tengfei company, then naturally everything is taken care of.

But the thesis is a must, and he still has a mess in Jiangzhou, so he really can't stay in Yanjing all the time.

Besides, Qin Shujie also runs a jewellery company, and now that something has just happened to the company, she can't stay any longer. She has to go back as soon as possible to stabilise people, and at the same time, the structure of the company and the purchase of goods and other aspects, also have to be adjusted.

In this way, several people played in Yanjing for a few days, and Ji Feng spent some time with his mother, and then, he had to go back to Jiangzhou.

Now he was just saying goodbye to his mother.

"Brat!"

Xiao Sumei hummed and said, "Making it sound like I'm not supporting your schooling, if it wasn't for mommy teaching you carefully, would you be as successful as you are now?"

Ji Feng immediately nodded his head and said, "That's right! That's true! Yesterday, my dad was talking about this, he said that thanks to you educating me all these years, I've become so good, and it's all because of you, old man!"

"That's more like it!"

Xiao Su Mei was so complimented by her son that she didn't care about him calling her 'old man', she just said, "Since you're going back, then mum won't stop you, but you have to promise mum one thing before you go!"

Ji Feng didn't even think about it and smiled, "Mom, if you have any requests, just ask, not to mention one thing, even ten or twenty things, I will agree."

Xiao Su Mei said, "Well, since you said so, then mum will make a few more requests."

"You say." Ji Feng smiled and said.

"First, after you graduate, you have to come back to Yanjing to work. Whether you take the civil service exams according to your father's wishes and go on to a career path or do whatever you want according to your own wishes, it doesn't matter, as long as you come to Yanjing to work."

Xiao Su Mei said.

"Ah?" Ji Feng immediately grew his mouth, somewhat stunned, "What about ..... the second?"

"Second, after you graduate, you have to find a suitable date to get married as soon as possible, don't talk yet, listen to me finish my sentence!" Xiao Su Mei glared at her son, "Although you and Lei Lei are still young, but after all, they are both over twenty, now is the best time to have children, if you wait until time drags on, then it will be more difficult to have children than now, and ..... did you hear that!"

Ji Feng hurriedly said, "Heard it heard it! But ....."

"Don't but." Xiao Su Mei interrupted him and said, "Listen to mum's arrangement, this kind of thing you kids are inexperienced and don't know the greatness of it, I can tell you, if a girl is older and has another child, it will be very easy to be dangerous, don't you know not to feel sorry for people!"

Ji Feng was stunned and helpless, and also a bit tearful: "Mom! It's still too early to talk about this, if I think about this now I won't be able to get a thesis ....." that what, I forgot to ask just now, you said and, and what?"

Xiao Su Mei said, "Nothing, that's because mum didn't organize her words well ....."

"Didn't organize the language?" Ji Feng looked at his mother suspiciously, well, this excuse was quite bullish.

"Brat, don't change the subject!"

Xiao Su Mei hit him, only symbolically of course, "Have you remembered all that I told you?"

Ji Feng nodded his head repeatedly and said, "Remembered remembered."

"Then good, since you have remembered, then some time later when I have time someday, I will go and discuss your marriage with Lei Lei's parents .....", Xiao Su Mei said.

"Mm! That's the way it should be." Ji Feng nodded his head and said.

"The main thing is that you're both of age and it's time to have children." Xiao Sumei added.

"....."

Ji Feng lifted his luggage bag and said, "So what, mum, I'm going to miss my flight soon, let's leave it like this for now, let's talk about this when I'm done with this period and come back next time!"

After saying that, Ji Feng turned around and hurriedly walked out the door, before Xiao Sumei could even pull him back.

"This brat!" Xiao Sumei couldn't help but shake her head, "Why is he so philandering, brat, he just deserves a beating!"

"Whew~~!"

All the way downstairs, Ji Feng still couldn't help but wipe a cold sweat, how come Old Mother is so anxious to hold her grandchildren now?

And ....." still so anxious!

The first thing you need to do is to get married.

The fact is that you can't get married, and you can't get married if you don't want to.

The fact that the mother, Xiao Su Mei, suddenly raised this matter and seemed to be in such a hurry made Ji Feng really not at all mentally prepared and more or less caught off guard.

But more importantly, Ji Feng heard some other kind of meaning in his mother's words.

–The first thing you can do is to come back to Yanjing to work and hurry up and get married to Tong Lei, and for that reason you can even completely ignore the fact that you will be called to go on a career path or do any other work.

This gives Ji Feng a not so good feeling in his heart, it seems .....

The actual fact is that you can find a lot of people who are not able to get a good deal on this.

However, to say that he broke off with Xiao Yuxuan ..... Ji Feng couldn't help but shake his head, it looks like Old Mother still hasn't died, this is to find an opportunity to do his job again.

“If Old Mother knows that she not only has Xiao Yuxuan and Tong Lei, but also Xu Yuan and Qin Shujie they .....” Ji Feng smiled badly, “then I'm afraid Old Mother will not even have the idea of breaking it up!”

“Pop!”

He snapped his fingers, and then with a heated smile, walked quickly towards the entrance of the district, he still had to take a taxi to rendezvous with Qin Shujie and Bai Zhu, and then directly rush to a military airport in Yanjing, and then fly from there to Jiangzhou.

As for his mother's thoughts, Ji Feng could more or less guess that she was actually acting from the perspective of a woman and a mother at the same time, not wanting to be a womanizer or to feel sorry for a certain girl and to be single-mindedly devoted to Tong Lei.

But obviously she was going to be disappointed.

But after all this time, the mother's mind has more or less faded, otherwise it wouldn't have been so easy to run away from the house just now.

Take your time.

The reason why Ji Feng didn't explain to his mother is actually because he feels that this is a matter for young people and some concepts are not the same as his mother's, so let time fade away.

As for Xiao Yuxuan and the girls .....

Ji Feng will not give up no matter what, absolutely not!

Afterwards, Ji Feng called and spoke to his father, Ji Zhenhua, and then flew to Jiangzhou with Qin Shujie and Bai Zhu.

As for the old man's place, Ji Feng went to see him once more before he left, only that the old man's health wasn't too good and his appetite had dropped a bit, which made Ji Feng a bit sad, but he couldn't do anything about it because it was the effect of the hot weather on the old man's body.

Grandpa's body, on the other hand, was a little more special, so the effects were probably a little more obvious.

Ji Feng couldn't help but feel a little melancholy, but while his heart was saddened, he knew that the only thing he could do was to fulfil the promise he had made to Grandpa at the beginning – to go to the top of the world as soon as possible!

Although getting to this point was really not that easy to do, Ji Feng would not hesitate to keep going, and, moreover, his pace would get faster and faster.

So even on the plane back, Ji Feng was thinking about the idea of researching super alloys .....

He wouldn't let the Hishita Group get that complacent!

Campus Master Chapter 2312

“Daddy!”

The moment the little girl saw Ji Feng, her watery eyes instantly became bright, then she ran towards Ji Feng with her little feet spread out, her two little arms were still stretched out.

Ji Feng's heart really ached and loved her, so he hurriedly took two steps forward and picked the little girl up, kissed her vigorously on her red little face and smiled, “Yao Yao, do you miss daddy?”

Yao Yao nodded her head vigorously, as if she was afraid that Ji Feng wouldn't see it, “Yes!”

“Where do you miss?” Ji Feng asked with a smile.

“Here!”

Yao Yao pointed to her little head, those onion white like fingers were really too cute, “Daddy, Yao Yao can miss you, Auntie Yu Xuan and Auntie Lei Lei said you'll be back soon, but I keep waiting and waiting, but I still can't see you coming back .....”

Ji Feng laughed, “Daddy is not back!”

“Mmm.”

Yao Yao was very happy and wrapped her arms around Ji Feng's neck and pressed her little face to Ji Feng's face with extra affection.

Looking at her happy look, she simply treated Ji Feng as her real father.

In fact, a child's mind is the most simple, whoever treats her well will be treated as a relative. Because she could feel Ji Feng's love for her, Yao Yao was extra fond of being with Ji Feng, and now that she suddenly saw Ji Feng after several days, the little girl's little mind was certainly full of happiness.

This made Qin Shujie couldn't help but be a little jealous as she came up from behind and said, “Yao Yao, you don't want mommy anymore?”

Qin Shujie was really amused and angry, this little girl ran over when she and Ji Feng and Bai Zhu were coming back together, only for Yao Yao to run straight towards Ji Feng, almost as if she hadn't seen her at all.

How could Qin Shujie not be jealous?

“Mummy~!”

The little girl was particularly smart, once she saw her mother’s tigerish face, she immediately knew where she might have done something wrong, so she hurriedly stretched out her arms to ask her mother for a hug.

Only then did Qin Shujie pick her up and hold her in her arms.

This scene made both Xiao Yuxuan and Tong Lei look a little mesmerised until the little girl’s giggling sound rang out, which brought their thoughts back.

Ji Feng and Bai Zhu returned from Yanjing, and Qin Shujie, a guest, also came, the lively home that is needless to say, Xiao Yuxuan for Yao Yao is extraordinarily fond of, the little girl is innocent and smart, extraordinarily loveable, so several women have been teasing the little girl, which makes the little girl almost play crazy.

Until the little girl was tired of playing and lay down on the sofa to sleep in Xiao Yuxuan’s arms, several women only then gave up.

After dinner, when Qin Shujie took the little girl away, Xiao Yuxuan could not help but look at her a few more times.

Tong Lei looked at it and secretly said, “Sister Yu Xuan really likes children and really wants them.

She felt that she should talk to Ji Feng again, Sister Yu Xuan’s age is not small, if she doesn’t want a child again, then she will really become a senior maternal age, in that case having a child is going to be dangerous.

In fact, noticing the look of Xiao Yuxuan, but also not only Tong Lei, Ji Feng also saw the look of Xiao Yuxuan with a fond look.

He could not help but sigh in his heart, knowing that he owed Xiao Yuxuan too much, and if he could, he certainly wanted to have a child with Xiao Yuxuan.

But the problem was that right now, Ji Feng’s cultivation had not yet reached its peak, and even exactly how far he could cultivate in the future, Ji Feng did not even have a measure in his heart, he just knew that his current strength was still too far behind.

At least compared to the two experts in the illusory three-dimensional light screen that the intelligent brain had once shown him, Ji Feng’s strength was still far inferior.

Therefore, Ji Feng was planning to cultivate himself to that point before having a child.

That way, the genes inherited by the little child would be extraordinarily good in the future, and they would naturally be extraordinarily good when they grew up, at least in terms of their physical condition, and would be very outstanding.

However, now that he saw Xiao Yuxuan’s expression, Ji Feng’s original idea was somewhat shaken.

Did he have to wait until he was truly accomplished in his training before having a child?

The fourth stage of bodybuilding gymnastics was not available behind, and Ji Feng had to figure it out by himself, especially regarding the cultivation behind, as his strength increased, it became more and more difficult to break through, and in which direction to break through, Ji Feng had not found the direction yet, so he was only insisting on repeating the previous movements over and over again every day.

The reason was to build a solid foundation so that when it was time to make a breakthrough, the water would come to fruition.

But now, it seems that there is no telling when the breakthrough will come, when the day will come, not only Ji Feng can't say, even the intelligent brain can't predict.

When the evening came, Tong Lei really talked about this matter, and Ji Feng could only shake his head and laugh bitterly, and told the reason for his concerns.

"So that's how it is ....."

Tong Lei was a little surprised, although Ji Feng had mentioned it to her before, but not in such detail, only now did she understand that it turned out that Ji Feng's high strength or not was actually related to how outstanding the young child would actually be in the future.

"I think, this is something you should talk to Sister Yu Xuan about." Tong Lei said, "Besides, it doesn't seem like a big deal to me, like our parents are ordinary people who neither have special powers nor know kung fu, and so are the vast majority of people in the world, but isn't their next generation thriving just the same?"

Ji Feng said, "I just think, wouldn't it be better if children were better?"

"How good do they have to be?" Tong Lei asked.

"....."

How good does it have to be?

This question Ji Feng was really a bit unable to answer for a while, and he hadn't thought clearly about how far he could go to have a child.

"If say, now you suddenly get a method that allows you to cultivate into a god, then do you also have to wait until after you have cultivated into a god before you want to have a child?" Tong Lei asked.

"Of course not." Ji Feng shook his head and said.

"That's not it?"

Tong Lei blinked and said, "Sometimes if you think too much, you will suffer from the consequences instead, don't you find that you have more worries now than before?"

Ji Feng couldn't help but be touched.

Tong Lei said, "Think about it, sister Yu Xuan is not young now, don't let her wait until she is sad."

Ji Feng took her small hand and asked, "What about you?"

"What about me?" Tong Lei blinked.

“You ah .....”

Ji Feng then couldn't help but let out a soft sigh, feeling more or less guilty in his heart. In fact, he didn't want to have a child now, in fact, there were more or less factors that took into account Tong Lei's feelings, only that Tong Lei was so tolerant of him, and never said anything.

The actual fact is that you are able to give me all that I want, and I'm content .....”

Ji Feng embraced her and nodded faintly.

That night.

A kind of woozy sound was faintly coming from the bedroom, the woman's delicate whisper and the soul-crushing moans, the bedroom was filled with spring.

“Don't be in there .....”

“It's not safe now .....”

“It's best if it's not safe!” When Ji Feng's voice rang out, the next moment was a long hysterical cry from Xiao Yuxuan.

This conversation, if anything, and the soul-crushing moans, came out faintly, causing the three women downstairs, Bai Zhu and Xiao Ying and Han Zhen, to not be able to stop their pretty faces from burning.

The next morning, Xiao Ying saw that Xiao Yuxuan had a very different feeling from before, today she looked extraordinarily beautiful, her pretty face was also red and moist, so she couldn't help but look a little dazed.

And what surprised Xiao Ying even more was that there was an inexplicable joy in Xiao Yuxuan's eyes.

Xiao Ying originally wanted to ask, but Xiao Yuxuan was the one who temporarily decided to take a day off and let Xiao Ying move freely, as a result, Xiao Ying was dragged by Han Zhen to the street.

This day Tong Lei also did not go to school, but instead, she and Xiao Yuxuan were whispering and laughing together.

“Lei Lei, thank you.”

Xiao Yuxuan took Tong Lei's hand and said with heartfelt gratitude.

But Tong Lei only smiled sweetly, “Sister Yu Xuan, why are you still polite with me, we have long been a family, haven't we?”

Xiao Yuxuan could not help but be very moved in her heart and nodded, “That's right, it's family.”

“That's right.”

Tong Lei suddenly remembered something and said, “Where is Ji Feng? How come we haven't seen him since breakfast?”

Xiao Yuxuan pursed her lips and said, “He's upstairs.”

“This bad egg is really smart!” Tong Lei said in exasperation, “He did something bad himself, but instead he hid himself away.”

“Lei Lei!”

Xiao Yuxuan then blushed a little.

Tong Lei couldn't help but laugh lightly, then looked at Xiao Yuxuan's stomach again and asked, “Sister Yuxuan, when will we know if there's a baby?”

Xiao Yuxuan blushed and said, “It's still early ..... It's not even certain yet.”

Tong Lei said, “That's okay, this bad guy is at home anyway, big deal, just let him try a few more times, he will definitely give you a baby .....”

“Lei Lei!” Even though her relationship with Tong Lei had long been intimate, but when it came to this topic Xiao Yuxuan was still a bit shy and snapped, “Why have you learned to be bad too!”

“Giggle!” Tong Lei couldn't help but laugh delicately, “It's not because you and that bad guy brought it on!”

“.....”

However, Tong Lei was unaware that although the bad guy she was talking about was upstairs, he was not hiding upstairs, but was inside his small laboratory, drumming up something.

At the moment, Ji Feng's hand was holding a high-temperature electric gun, which seemed to be melting some kind of metal.

..... In fact, Ji Feng was doing an experiment.

Even during these days in Yanjing, he was not idle at night, one was following the intelligent brain to learn those knowledge about alloys.

On the plane back, Ji Feng had generally identified several alloys, and he naturally wanted to make them as soon as possible.

Now, Ji Feng was just experimenting to determine which alloy was more suitable to manufacture.

But after a few moments, Ji Feng turned off the high-temperature electric gun in his hand, he couldn't help but shake his head, the equipment on hand didn't work, he needed more advanced and at the same time slightly larger equipment.

Campus Master Chapter 2313

“Where to get the equipment .....”

Ji Feng could not help but mutter, those equipment he originally got to want to melt metals was not impossible, but if we say to try to make alloys, it was far from enough.

In particular, according to the knowledge that Ji Feng learned from the database of the intelligent brain, there are several metals or elements that need to be refined at extremely high temperatures, and some

of them have to be purified before the process of alloying can begin, but this is very difficult for Ji Feng to do.

The equipment he had at home was actually purchased by Ji Feng to make the trigger box for the 3D TV and to set up the security device for the villa.

But if we're talking about making alloys, that's a lot worse.

Just by melting the metal, the temperature of the electric gun can't reach, and it can't even destroy the structure of some metals.

So Ji Feng thought that he must find a way to get some more professional equipment over.

The first thing that came to Ji Feng's mind was to buy it, so after saying hello to Xiao Yuxuan and Tong Lei, he planned to go out for a stroll, but when he thought about it, he was scratching his head a bit.

This alloy-making equipment was not like some hardware or some electronic equipment, which could be sold everywhere in the market.

Besides, Ji Feng wasn't even sure which one of them was selling this kind of equipment in Jiangzhou.

So if he went out now, it would be almost like a headless fly, bumping around without being able to feel the doorway.

So, Ji Feng simply took out his mobile phone and called his second brother, Ji Shaolei.

However, as soon as Ji Feng said his idea, Ji Shaolei was surprised and asked, "Third son, you're planning to enter the industrial field?"

"Not really."

Ji Feng said, "At the moment there's just such an idea, but it's not even ready yet, and I haven't even thought about what the product will be ....."

Ji Shaolei asked, "So what are you going to buy equipment for now?!"

Ji Feng laughed: "Just buy it to play with myself first."

"Play with it?"

At this statement from Ji Feng, Ji Shaolei had more or less a toothache, that was all machinery and equipment made up of lumps of iron, what was fun about it?

"Second brother, just say that you know where to find such equipment in Jiangzhou!" Ji Feng also knew that his statement was a bit strange, but now he couldn't explain it clearly, he couldn't tell Ji Shaolei that I was going to make an alloy that had never existed in the world before, and was going to use it to strike at the Boundary Pont's Lingxia Group, making the super alloy project that it had spent so much effort and a lot of money to acquire from the Brilliant Group, turn into a pile of scrap paper.

The so-called extremely advanced super-alloys produced by the Hishita Group under that project would be turned into rubbish!

If he said that to Ji Shaolei right now, it might really scare him!

So what Ji Feng said was rather vague.

“Equipment is sold everywhere, but I don’t know much about this, so you’ll have to go and see for yourself exactly what kind you need.” Ji Shaolei said.

“That’s no problem.”

Ji Feng smiled, “I was planning to go shopping in person, but I didn’t know where to sell this kind of equipment, so I had to look for you.”

Ji Shaolei laughed: “There are more than enough selling this kind of machine and equipment, Jiangzhou is full of them ..... Let’s do it this way, now I happen to have some time, let’s meet first.”

Subsequently, Ji Shaolei gave Ji Feng an address.

“Wuli Street?”

Ji Feng felt that this address seemed somewhat familiar, but he couldn’t remember where he had heard it before, but he didn’t think much about it, and first gave Bai Zhu a call, then he took Xiao Yuxuan and Tong Lei along to this place called Five Mile Street.

Now that Bai Zhu and Han Zhen Xiao Ying were not at home, Ji Feng naturally could not just leave Xiao Yuxuan and Tong Lei at home, now how many enemies he had, even Ji Feng himself could not say, he certainly had to be careful at all times.

On the contrary, Xiao Yuxuan also solved Ji Feng’s confusion for him, saying, “Five Mile Street is one of the streets in Machine Square .....”

Only then did Ji Feng know that there was actually a special area in Jiangzhou for trading hardware, accessories, machinery and equipment, and other light and heavy industrial products, just like the International Automobile City is where car dealers pile up, this Machine Square is where machines and machine-related spare parts and other products are sold.

When they arrived at Five Mile Street, Ji Shaolei had already arrived first.

“I’ve contacted a company for you, it has a full range of products, basically all alloy equipment is available now, you can choose for yourself when you arrive.” Ji Shaolei said.

“Are they all for civilian use?” Ji Feng asked casually.

“Nonsense!”

Ji Shaolei said, “You think military ones can be bought here? Besides, there shouldn’t actually be a big difference between civilian and military ones, right? I think the biggest difference should still be in the technology.”

Ji Feng laughed: “That’s not necessarily true!”

The difference between military and civilian use is not small, technology is only one aspect, the quality of the equipment, accuracy, etc., also have a big difference.

The most advanced technology is in the hands of the company, but if there is no supporting machinery and equipment, it is difficult to produce the corresponding products.

It is for this reason that some developed countries, such as Rice, have banned so many export items to China, of which industries such as high-precision machine tools are the most obvious examples.

Among all industrial fields, machine tools are the most basic and are even called the mother machines of industry!

Because machine tools are the machines that produce machines, to put it bluntly, but all those devices that require precision must be machined with machine tools.

Therefore, foreign countries are extraordinarily strict in blocking China in terms of machine tools, which makes the country have a huge gap with foreign countries in terms of high-precision industry, which in turn also affects the country's livelihood.

"Let's go, I have a dinner party at noon, I have to go back after I hurry to finish my business." Ji Shaolei said.

When a few people arrived at a storefront on Wuli Street, there was already someone waiting at the entrance, a middle-aged man of about forty, slightly blessed, when he saw Ji Shaolei and the others coming, he immediately greeted them with a smile on his face.

"Mr. Ji, a rare guest!"

Ji Shaolei smiled and exchanged pleasantries with him, and through their conversation, Ji Feng learned that this man was the general manager of this trading company.

"Mr. Ji, right, I don't know what kind of equipment you want?" The middle-aged man asked politely.

"Equipment ....."

Ji Feng deliberated for a moment and said, "I can't say for a moment, the equipment I want doesn't have to be too big, but it must be advanced, I'm making alloys for ..... How about this, do you have an atlas here, or simply go directly to your warehouse and take a look?"

The middle-aged man readily nodded in agreement, then had someone take out a folder and said, "This is all about equipment for making alloys, because I don't know the specific requirements of little brother, so I can't recommend it, you can only choose for yourself."

Ji Feng nodded: "Thank you."

He opened the folder and saw that inside was a stack of report-like documents with the names of various machines, models, prices and manufacturers, etc.

But after looking at it for a while, Ji Feng shook his head and said, "Why don't we go to the warehouse and take a look?"

There was no concrete concept in just reading this report, and although there were some specifications of the machines on it, such as how many meters long, how many meters wide, etc., but without seeing the real thing, it always felt short of something, a bit too abstract.

“Our warehouse is a bit far from here, moreover, a lot of the equipment is not in stock, you have to order it from the manufacturer, I’m really sorry.” The middle-aged man pointed to the folder in Ji Feng’s hand and said, “However, there are still picture books behind this, you can take a look first.”

There was more?

Ji Feng continuously flipped backwards, and indeed he saw the atlas, which all looked like they were physically photographed.

However, when Ji Feng finished flipping through the atlas, he couldn’t help but frown: “Are they all such big machines? No smaller ones?”

“Sorry, we are all here for factory supplies, even the average small workshop will buy the big ones, the small ones are hard to sell, so .....

“Understood.”

Ji Feng nodded and said.

The middle-aged man added: “How about this, what kind of machine do you need, you can tell me the requirements, I can ask with the manufacturer for you, our company represents several brands, we also produce small equipment, just the precision is not very high .....

Ji Feng said, “It doesn’t matter if the accuracy is not very high, as long as it’s not too outrageous .....

He went over his requirements, focusing on, “Firstly, the temperature must be sufficient when melting the metal, secondly, the equipment must not occupy too large an area, and in addition to this, I want the processing equipment that goes with it.”

Some alloys produce toxic gases during the production process, and there must be supporting equipment to deal with these toxic gases.

The middle-aged man took note of all these requirements and said, “Is it convenient for you to leave your contact information, little brother? If there is any news, I can also inform you.”

Ji Feng nodded his head, left his contact information and prepared to leave.

And just at this time, his phone rang, he took out his phone and saw that it was his younger uncle Ji Zhenping calling, making an apologetic gesture to the middle-aged man, he hurriedly walked out and picked up the phone.

“Little uncle.”

“Little Feng, where are you now?” Ji Zhenping asked.

“I’m in Jiangzhou, ah.” Ji Feng was a bit strange, it seemed like something didn’t seem right from listening to Little Uncle’s voice, right?

“Good then, you should immediately rush to Jiangzhou Military Division Airport now, there will be a plane coming to Yanjing in two hours, you will take that plane and come over.” Ji Zhenping said.

Ji Feng was stunned, “So urgent? Little Uncle, why are you going to Yanjing again, is something wrong?”

“Mm. Something’s up.” Ji Zhenping said, “It’s not convenient to say over the phone, so hurry up and set off, I’ll tell you after we meet, remember to be quick!”

“Okay.”

Ji Feng nodded, but in his heart, he was surprised, listening to the tone of his younger uncle, it seemed that things were not ordinary, huh?

What exactly had happened?

Campus Master Chapter 2314

Because of the seriousness of what Little Uncle said, Ji Feng didn’t dare to delay. After hanging up the phone, he gave an explanation to Ji Shaolei and then hurriedly headed back with Xiao Yuxuan and Tong Lei.

On the way back, Ji Feng called the three Bai Zhu again to inform them. By the time he arrived home, Bai Zhu and the girls were already waiting at home.

After that, Ji Feng didn’t even have time to rest a little, so he took Bai Zhu and rushed towards the military airport in Jiangzhou without stopping, where someone was waiting to pick him up.

When Ji Feng put the car away and the two of them boarded the plane, only then did Ji Feng have time to ponder what the matter was that Little Uncle was so anxious to find himself.

In fact what makes Ji Feng feel strange is that the little uncle actually said that this matter is not even good to say on the phone ..... to know, his mobile phone or Ji Zhenping gave him, using the military special encryption network, confidentiality that is naturally needless to say, just like this, actually still not aspect to say on the phone?

What could it be?

What is the change in the matter of Wu Zhengxin?

The Woo family will certainly not sit idly by and wait for death, or at least they will not stand by and watch Wuzhengxin be sentenced, otherwise, this is a major blow to the prestige of the Woo family, and may even shake the confidence of those who are attached to the Woo family.

Just imagine, everyone knows that the biggest rival of the Wu family is the Ji family, but the Ji family is not the only rival of the Wu family, the Wu family has offended many people.

Anyone who has lived in Yanjing for a long time and is well-informed probably knows that the Wu family actually has another enemy that cannot be ignored – the grandson of the He family, He Hongwei!

Although He Hongwei is still not in charge of the family and there are still people from the previous generation in the He family who are making decisions, anyone can see that with He Hongwei’s ability and his position in the He family, I am afraid that in twenty years’ time, he will be the next generation head of the He family.

At that time, what kind of pressure and revenge will the Wu family face?

In fact, strictly speaking, there is no need to wait until twenty years later. As he grows older, He Hongwei's voice in the He family is gradually increasing, and sometimes even his parents and elders will seriously consider his opinions.

If the elders of the He family had known that He Hongwei would inevitably take revenge on the price of things once he took control of the entire He family in the future, would they, as elders, have to pave the way for their child in advance?

The pressure the Wu family was facing could be imagined!

In fact, it wasn't just the He family, there were quite a few people in Yanjing who were at odds with the Wu family.

People with a discerning eye would not fail to see that!

So, if Wu Zhengxin really fell this time, it would definitely be a major blow to the Wu family, and how could those around the Wu family not have some thoughts in their minds?

The fact that Wu Zhengxin is Wu Zhengmin's own brother, the Wu family's own son, even he was planted in the hands of the Ji family ..... No, strictly speaking, Wu Zhengxin was planted in the hands of Ji Feng, and even the Ji family did not even make much of a move!

Then .....

The Wu family is so unbeatable in front of the Ji family?

In this way, should those in the Wu family lineage consider what future they actually have following the Wu family in the future? But anyone with a bit of foresight, I'm afraid, will be thinking in their hearts about what their future path should be.

Once people's hearts are scattered, the cohesiveness of the Martial Family will be greatly reduced, and the Martial Family will not be far from its downfall then!

Therefore, the Wu family in any case is not to allow Wu Zhengxin to be sentenced, with the Ji family in the battle can be defeated, but can not be a defeat to the point that people can not see hope.

The first thing you need to do is to get your own personal information.

Could it be that .....

Suddenly, Ji Feng's eyes instantly narrowed and his pupils couldn't help but contract sharply as he thought of another possibility .....

The old man's body!

But immediately, Ji Feng shook his head and ruled out this speculation, it was impossible.

Although Ji Feng also noticed a few days ago that the old man's body had declined and was worse than before, but as long as there were no accidents, the old man's body would still not have any major problems in these last few years, at most it would be gradually weakening ..... This is normal, after all, the old man is old and the years are not forgiving.

Moreover, now the second uncle's family is still in Jiangzhou, if it is true that the old man's health is out of order, then the second uncle will certainly be the first to rush over to the right, how is it possible that the younger uncle only informs himself.

So as soon as this thought flashed through his mind, Ji Feng dismissed this guess.

"Little Uncle must have something else if he is so eager to call himself into the capital!" Ji Feng secretly said, "It seems that things are quite urgent, and they are not ordinary ....."

"Forget it!" Ji Feng shook his head and simply stopped thinking about it, he felt that he seemed to be quite impatient lately.

So, Ji Feng simply meditated and closed his eyes slightly to think about making the alloy now.

.....

The first thing you need to do is to get off the plane and get out of the airport before there is a military vehicle waiting there, but Ji Feng was not in a hurry to get on it, but first talked to his uncle on the phone before he got on it.

The military vehicle took him to the unit where his uncle worked – the General Staff.

"The chief is busy and won't be back until later, please wait for a while!" The staff member in charge of Ji Zhenping's office poured a glass of water for Ji Feng and said.

"Thanks!"

Ji Feng nodded, more or less amazed, he had talked to his little uncle on the phone before, how come he was still busy?

But luckily, Ji Feng didn't have to wait for long, about twenty minutes or so Ji Zhenping came back, even though the air conditioning was on in this office building and the temperature wasn't very high, when Ji Zhenping walked into the office, Ji Feng was still able to see that his blouse was almost soaked with sweat.

"Little Uncle."

Seeing Ji Zhenping's appearance, Ji Feng was a little surprised and asked, "What is it that you've called me here in such a hurry for?"

Ji Zhenping said, "Things are a bit troublesome."

Ji Feng was then slightly stunned, then sat up straight and waited for Ji Zhenping to say more.

"Little Feng, let me ask you, do you still remember that weird weapon you handed in earlier?" Ji Zhenping asked, and when he said that, he lowered his voice and said, "It's the weapon you brought back from over there last ....."

"Rice!"

Ji Zhenping was making a silent gesture, even though this was in one of the General Staff's office buildings, with heavy guards around and a guard outside the door, Ji Zhenping was still very careful not to make a sound at all when talking about sensitive information.

Ji Feng, however, was more or less surprised and nodded, "Remember, why?"

Of course he knew what Ji Zhenping was referring to, that so-called weird weapon was actually the laser gun he had found in the dark room of the villa of one of the leaders of the Yamaguchi group, a yakuza organisation in Kepong, during his last trip to Rice.

At that time, when he saw this laser gun, Ji Feng was really shocked, he really did not think that he could see such an advanced weapon in this world, this is completely the weapon of the Gamma system, how could it appear on Earth?

Although later confirmed by the intelligent brain, this weapon is only the first generation of the Gamma system laser gun, and when the destruction of the Gamma system civilization, laser guns have been developed to the fourth generation, Ji Feng mastered the technology, is also the fourth generation, compared with it, the reality of this laser gun obtained in the power is too much smaller, even incomparable.

However, Ji Feng had always carried this matter in his heart, and every time he thought about it, he felt a heavy sense of pressure.

Because he knew very well that since this laser gun could appear, it meant that there was already someone or some organisation, or even some country, in this world that had the ability to make such advanced weapons that transcended this era!

This kind of thing, Ji Feng thought to himself, was definitely not something that could be solved just by his own strength alone, so Ji Feng handed over that first generation laser gun.

Of course, there was another reason why Ji Feng would hand in the weapon besides this one – this weapon was somewhat unappealing to him.

Because that weapon had many flaws, it could almost be said to be a defective product.

In fact, when Ji Feng wanted to make the alloy, he actually couldn't help but have the idea of wanting to make a more powerful weapon. To make a weapon, you first need materials, which is why Ji Feng had such high requirements for the equipment used to make the alloy.

And of course Ji Feng suspected that this weapon might have something to do with the dynasty, so although he hadn't mentioned this matter all this time, he had never forgotten it in his heart.

But now Ji Zhenping suddenly mentioned it, which was a bit of a surprise to him.

"It's that weapon that's in trouble!" Ji Zhenping said.

"Eh?!"

Ji Feng immediately frowned and couldn't help but be a little stunned, "Something happened to the weapon? What do you mean?"

Ji Zhenping said, "Forget about this first, you answer me a few questions first ..... Little Feng, can you be sure that at the time you found this weapon, at that location this was the only one?"

Ji Feng immediately nodded and said, "Yes, at that time the whole safe was turned over by me, just this one weapon, of course there are some other things, I also turned in ah, little uncle, what exactly happened?"

"That ....."

Ji Zhenping, however, did not immediately answer Ji Feng's question, but mused, "Little Feng, in the process of bringing this weapon and those drawings back, did you have any possibility of leaking?"

Ji Feng was slightly stunned, "Little Uncle, do you mean to say that this matter got out? No, it shouldn't be that, it's that someone else found out that this kind of weapon still exists in the outside world, or something similar to it?"

Campus Master Chapter 2315

Ji Feng was slightly stunned: "Little Uncle, do you mean to say that this matter has spread out? No, it shouldn't be this, it's that someone else has found out that this kind of weapon still exists in the outside world, or something similar to it?"

His expression then turned serious, if this was really the case, it meant that the person who made the laser gun must have made more than one, and, most likely, after the first successful production, had learned enough experience to make it even more sophisticated.

Because according to Ji Feng and the intelligent brain's judgment, that first generation laser gun was actually not enough for normal combat at all, perhaps it was okay to fire a few times, but because of its flaws, it was actually far inferior to the first generation laser gun in the Gamma Galaxy, and accidents could also occur when firing it.

If Uncle Junior had found this weapon again, it was obviously likely to have been improved upon.

"It's too early to tell." Ji Zhenping shook his head and said, "This issue is well impossible to say for sure right now."

"What do you mean?" Ji Feng asked.

"That weapon you brought back, we have tested it and it is incredibly powerful!" Ji Zhenping said, "And also came up with some data about the weapon when it was fired."

Ji Feng nodded, he had expected this, there was no way the Bureau would not conduct research after getting this kind of weapon.

Data like this were actually some of the most basic research.

For example, when the laser gun was fired, how many joules of heat would be generated, or how much kinetic energy would be generated, etc. These were professional studies that Ji Feng had also studied in the training space of his intelligent brain, so he was not surprised.

“But that’s also why we have a general understanding of the characteristics of this weapon, which is extremely powerful and has an unexpectedly long attack range!” Ji Zhenping said.

“Hmm.”

Ji Feng nodded, this was the characteristic of a laser gun, not only was it extremely powerful, but because it was with the characteristics of a laser, the striking distance was exceptionally long, even as long as there was enough energy, it could theoretically hit an infinite distance ..... Of course, this was only theoretical, because there couldn’t be that eternal energy provided to a laser gun .

Ji Feng asked, “Then what do you mean when you say that something went wrong?”

Ji Zhenping’s face then turned serious as he said, “There are two problems, firstly, when our people were out on a mission, they had exchanged fire with the enemy and found that the other side’s weapons were extremely powerful, so the above suspected if there was a weapon born that we didn’t know about, so they sent people to track it down.”

Ji Feng nodded and listened quietly, the world was definitely not as rosy as advertised, the military’s special forces would often carry out some special missions, and even skirmishes were a regular occurrence.

It was like when he and Xiang Yongzhan had teamed up to destroy the Western Xia branch of the dynasty, what was done above was a propaganda that a certain unit of the military was holding a military exercise, thus covering up the past.

“What about the results of the tracing?” Ji Feng asked.

“The result?”

Ji Zhenping shook his head and said, “The result is that the person who was sent there was sacrificed!”

Ji Feng then couldn’t help but raise his eyebrows, “Sacrificed? In that case, is it something important that has been traced, or is close to the truth?”

The reason why the person in charge of tracing was killed was definitely because he had found out something secret, but someone didn’t want him to know about it, so this was the reason for the killing.

Ji Zhenping said, “Maybe so, the people sent there didn’t send back any news, there wasn’t even any trace left at the scene ..... except this!”

“What?” Ji Feng asked.

“Just take a look at this!” Ji Zhenping pulled open the desk drawer, then took out a photo and handed it to Ji Feng, “Can you tell anything on this?”

“Hmm?!”

As soon as Ji Feng took the photo, he subconsciously frowned.

Only to see that on this photo, there was actually a dead man!

The man was wearing a suit and was well-dressed, looking like a high society gentry, but on his forehead, there was a bloody hole, while his two eyes were staring as if he was dead!

“This is .....”

Ji Feng frowned, “This is the person who sacrificed?”

Ji Zhenping nodded and said, “Look more carefully, can you tell anything from this?”

When Ji Feng smiled, he paid attention again, he stared at the photo carefully for a while, but could not see anything wrong, the angle the photo was taken from was fine, it looked like this person had died somewhere, lying on his back, and then someone had taken such a photo of him from above to below.

So, from here, you can see the floor with a strange pattern underneath the man, and other than that, you can't see any landmarks or anything special around, the background of the photo is the floor and nothing else.

“Hmm?!”

Suddenly, Ji Feng's eyes narrowed slightly as he subconsciously sat up straighter and said, “This is .....”

Ji Zhenping asked, “What do you see?”

Ji Feng pointed at the head of the sacrificed man in the photo and said, “How is this blood hole ..... in him a bit odd?”

At first glance, Ji Feng thought that this person had been shot in the head, which is why such a blood hole was left on his forehead, but when he looked carefully he realized that this blood hole was not quite the same as an ordinary bullet hole.

The flesh around the bullet hole did not have any outward turning or other features, let alone the characteristics left behind by the bullet, but rather some ..... burnt feeling.

“Is this someone who put a gun against his head and fired?” Ji Feng asked.

“Originally, we thought so too, but only after testing later did we find out that it wasn't.” Ji Zhenping shook his head.

“Then this is .....” Ji Feng then wondered a bit, the muzzle of the gun was shot against the head at close range, only then would there be such scorch marks ah.

“The burn marks are indeed there, and it also looks very much like the gun was fired directly against the head.” Ji Zhenping said, “However, when the experts performed an autopsy on it, they realized that it wasn't just the outer skin that was actually burnt, it went all the way deep into his head, and the whole area around the bullet hole was burnt.”

Ji Feng was slightly stunned, “All of it was burnt?”

“Yes!”

Ji Zhenping nodded and said, “It was as if a flame had passed through the middle of his head! This is definitely not a mark left by a bullet hit, much less a wound left with a military thorn.”

“Well, because it’s impossible for a military spike to leave a burn mark.” Ji Feng nodded his head and said.

“But it wasn’t a wound caused by any other hot weapon either, or at least, not any of the weapons we know of.” Ji Zhenping said.

“Then what could it be? Could this be the newly emerged high-powered weapon .....” Just as the words came out, Ji Feng’s voice suddenly came to an abrupt halt as he suddenly looked up at Ji Zhenping, stunned, “Little Uncle, are you suspecting that this wound was caused by the Judas Laser Gun?! ”

A laser gun!

At the mention of a newly emerged weapon, Ji Feng suddenly thought of this possibility.

Yes, it was likely that the wound was caused after the laser gun was fired, Ji Feng was not too unfamiliar with this, what the laser gun emitted was actually a high energy laser, if it reached a certain energy, not to mention a human head, even if it was a steel plate or some super strong alloy, it could easily be penetrated.

Moreover, because of the extreme energy of the laser gun, some models of laser guns generate extremely high temperatures when they are fired, and it is not uncommon for them to burn wounds.

There were even some laser guns that were specifically designed as high-temperature laser guns to carry out special missions and so on.

Now that I think about it, the bullet hole in the head of the man in the photo is, in all probability, the mark left by the laser gun after it was fired, and most likely, it is also a high-temperature laser gun!

“Little Uncle, I understand, no wonder you asked me if there was any possibility of leaking the laser guns and drawings that I brought back!” Ji Feng said in a deep voice, “It seems that you have also determined that the wound was caused by a laser gun?”

“It’s not completely certain yet.” Ji Zhenping said.

“Didn’t you guys go through a test?” Ji Feng asked, “You can do another experiment for comparison, so wouldn’t that make it 100% certain?”

“It’s certainly better to be able to do that!”

Ji Zhenping said, “But unfortunately, the weapon that you brought back was destroyed in the last test!”

Ji Feng was immediately stunned, “Destroyed? How could it be ruined?”

Although the laser gun was a high energy weapon, its stability was unquestionable, even if ordinary guns were prone to malfunctions such as blowing up, the laser gun did not have these problems, but how was that laser gun destroyed?

The actual reason, even those experts don’t know, only that during the last test, that weapon suddenly emitted a strong light, then the parts inside were all melted off, and even burned a very expensive instrument for this reason, and even two soldiers were burned and are still being treated to this day .....

“How can that be?!”

Ji Feng couldn't help but shake his head, “This is simply impossible .....”

When he said this, he suddenly remembered something and couldn't help but ask: “Little Uncle, what kind of tests did those experts actually do? Even if they put that weapon on the fire, there wouldn't be such a problem, it couldn't be that someone dismantled that weapon, right?”

“No.”

Ji Zhenping said, “Ever since you turned the weapon in, the military has been paying extra attention to it, and it's certainly impossible to dismantle it before you figure out the principle of the weapon .....”

Ji Feng couldn't help but ask: “Then what kind of project was the last test done?”

“It seems to be doing electromagnetic or some kind of ray scanning .....” Ji Zhenping said, “I don't remember exactly.”

“.....”

Ji Feng was speechless.

Seeing this, Ji Zhenping immediately asked, “What's wrong? Did you remember something?”

Ji Feng smiled bitterly, “Little Uncle, I probably know how that laser gun was destroyed.”

Campus Master Chapter 2316

“Oh?”

Ji Zhenping immediately asked, “How was it destroyed?”

“It was caused by an electromagnetic scan or a ray scan!” Ji Feng said.

“You tell me in detail.” Ji Zhenping said.

“Let's put it this way, in a laser gun, there is an energy source, this thing is like a bullet in an ordinary pistol in general, it is responsible for providing energy.” Ji Feng said, “Different models of laser guns, the type of energy source is also diverse, just like the energy sources we use now are also diverse, electricity, oil, solar energy, wind energy and so on .....”

“The energy source of this laser gun is similar, as long as it is able to provide super high energy, it can be used.” Ji Feng said, “Of course, the premise is that this ultra-high energy source must be controllable.”

“Well!”

Ji Zhenping nodded his head and said, “I understand what you mean.”

Ji Feng said, “And on the outside of this energy source, there is a shell, something that is responsible for holding the energy source, it's like the magazine of a pistol, or a nuclear reactor for example, there must be a thick layer of protection on the outside.”

“That is to say, outside this energy source, there is a container responsible for holding it, and at the same time, this container also serves as a protection?” Ji Zhenping asked.

“That’s what it means.” Ji Feng nodded, “Originally, if it was a technically mature and well-made laser gun, this self-destruction phenomenon would definitely not occur, because but any energy source that can be used in a laser gun is extremely stable, and in addition to having an energy source in the laser gun, there is also something that is responsible for triggering these energies.”

“The energy provided by the energy source has to be triggered and then go through a conversion device to be transformed, which in turn becomes a super high energy laser, or a high energy ray similar to a laser.” Ji Feng said, “And if say the laser gun was really destroyed, the energy source would not be triggered, and even if the laser gun disintegrated, the energy source would at most only dissipate into the air, and would not be transformed into something threatening at all.”

Ji Feng said, “However, the laser gun that I got back is itself very flawed, not too stable, and I am afraid that the energy source used is not a proven energy source that has been verified time and again, plus the materials used to make the laser gun are not up to a certain standard, so when it goes through electromagnetic scanning or ray scanning, it might be triggered.”

Speaking here, Ji Feng wore a confident look and said, “If I’m not wrong, the scanning equipment those experts used when doing the tests was probably the principle with pulses, because that would most likely trigger an outbreak of that unstable energy source!”

Ji Feng couldn’t help but shake his head, he thought that was what was going on, and when he thought about it, he realised that it was actually quite normal and completely just as expected.

The laser gun he had obtained was unstable, especially the material used to make it, which was a huge gap from a mature and stable laser gun.

For example, if a gun was made of metal, it would be stable and powerful, and the bullets would be as easy to kill as cutting vegetables.

But if the gun is made of plastic, once the bullet is fired, the explosive kinetic energy generated will be enough to blow the plastic pistol to pieces, and even the person holding the pistol will be injured.

The exception is, of course, if it is a special plastic.

The energy source is unstable, the material used to manufacture the laser gun is not up to standard, or the technology is not up to standard, and as a result, the laser gun is not activated by the energy source in the normal way, there is nowhere to vent the energy, it is strange that the laser gun will not be destroyed!

This is why he had already judged that the laser gun would not last long and had many flaws.

The technology was not up to scratch and the materials could not keep up, so naturally it was not a generally qualified and stable weapon!

But soon Ji Feng realized that something was wrong ..... not because he was wrong, but rather because he seemed to be saying a little too much.

He immediately looked up, and as expected, he saw that Little Uncle was staring at him with an odd gaze.

Bad!

Ji Feng immediately said secretly in his heart that he had said too much.

Laser guns, energy sources, triggers, and pulses, etc. .... These things may not be understood even by many professionals, because the technology of laser guns is not at all the technology of this era, but he had deigned to say them all in one breath.

It would be strange if Little Uncle was not shocked.

“Little Uncle, in that case, it seems likely that there is a second or even more laser guns out there!” Seeing that the situation was not good, Ji Feng hurriedly changed the topic and said, “This one in all probability `9 died under the laser gun, and it seems that he was almost tracking down the truth, so this is why he was silenced.”

Ji Zhenping nodded slightly, he thought so too, and in fact all the above thought so too, except that he was more interested in knowing another issue now.

“Little Feng, what you just said about laser gun energy sources and the like, how do you know so much about these things?” Ji Zhenping asked.

“Uh .....”

Ji Feng instantly said in his heart, “It’s really here.

He laughed: “It’s not that simple, although I majored in economics, but I’m extra interested in these science and technology things, and I like to research, and I’ve also read many foreign professional academic reports, so I know all this, how about it, little uncle, your nephew I’m not bad, right?”

“Not bad at all!”

Ji Zhenping said: “The reason for the destruction of the laser gun, even many experts can not say a reason, even the principle of the laser gun has not been understood, until now is only in the inferred stage, but you, but you are actually so clear in all the details .....”

The actual fact is that even some experts haven’t figured out the problem, a college student, just by reading books and studying, can research so clearly?

Although Little Uncle is not too highly educated, nor is he an expert in this science and technology, Ji Feng is aware that what he just said was too much.

Although that what energy source, trigger, conversion device and so on is very simple to say, just a simple sentence, but if one wants to understand the principle of each and every part of this, without sufficient academic knowledge it is simply impossible.

Not to mention the principle of it in simple and easy to understand words, straightforward to speak out.

Ji Feng was more or less chagrined in his heart that he had been a bit forgetful just now, but that wasn’t a bad thing, he could just take this opportunity to give his little uncle some heart padding.

So he smiled: “Little Uncle, there is a saying that interest is the best teacher! In the past, when I didn’t go to university, I was seriously short of money, so I thought I should study something related to money when I went to university, so I studied economics.”

“But after I went to university I wasn’t short of money again, and I also found out that I didn’t like economics majors much at all, instead I was more into the research and formulas and such in science and technology.”

Ji Feng laughed heatedly, “So when I have nothing to do I like to read about these aspects, and I have a special little lab at my home in Jiangzhou that is used for research!”

“Right!”

Ji Feng suddenly remembered something and said, “The alerting device I have there, I made it myself after buying the basic parts, it works very well, there are several times when someone invaded it was detected by me in advance, just today I even asked second brother to help me buy the machine and equipment!”

“Oh?”

Ji Zhenping asked, “What’s the purpose of buying machinery and equipment?”

Ji Feng said, “I’m going to research on metals, like making some super alloys or something like that. I’ll simply research it myself, if I can research something more powerful than that super alloy of theirs, I’ll see what they think!”

“You kid ..... never thought you’d have such a talent in this area! It seems that if you do research, you might really achieve something!” Ji Zhenping shook his head and laughed.

“I will continue to work hard!”

Ji Feng laughed, “Little Uncle, maybe one day I can really research something that will shock the world, I already have some ideas now and have prepared a lot of information, as long as I wait for the equipment to arrive, I can start researching.”

Ji Zhenping laughed, “As long as you don’t delay your work, it’s not a bad thing if you have something that interests you, so you might be able to achieve something if you keep going!”

Ji Zhenping knew that there was no shortage of such examples in the world. Without professional study, one could really achieve a lot just by relying on one’s interest.

But soon he got serious and said, “Little Feng, do you know that if what you say is true, that would be a serious problem!”

“..... hmm.”

The smile on Ji Feng’s face also disappeared and was replaced by a serious look as well, “Yeah.”

The problem was indeed serious!

The fact that a more advanced weapon had actually appeared on the battlefield, and that it was most likely a laser gun, caused Ji Feng to be greatly surprised in his heart.

This meant that the laser gun had most likely been improved, or at least certain flaws had been corrected, or even, it was ready to be put into use.

What's more, once the laser gun was really developed successfully, then, to cite one example, maybe the other side could research more powerful weapons, and then I'm afraid that, except for nuclear weapons, all the weapons in the world now would become a pile of scrap metal!

And what alarmed Ji Feng the most was which country, or which organization, actually possessed such a strong level of technology.

Was it really a dynasty?!

According to Ji Feng's speculation, the laser gun that he brought back from Rice was most likely made by the Dynasty.

Campus Master Chapter 2317

"Little Uncle, where exactly was the person you sent out to be killed?"

After a long moment of silence, Ji Feng asked in a deep voice.

This sudden news surprised Ji Feng, the radium gun had actually appeared again and was actually being put into practical application, no one knew better than Ji Feng what this actually meant.

This means that the person who made the laser gun now must have made another technological breakthrough, and if this laser gun was really made by the dynasty, then it is conceivable how far the dynasty's technology has reached.

They were able to make a breakthrough in the technology of laser guns, but what about in the transformation of human beings?

Ji Feng couldn't help but recall the words of the expert, Suo San, whom Qiao Rong had transferred from Dynasty before, that Dynasty was constantly searching for experts in the martial arts and was also researching ways to combine internal power with high technology .....

If they ever make a breakthrough, the combat power of those transformers will obviously soar, and by then, not to mention self-burdening, I'm afraid different bombs may not be able to pose much of a threat to them!

It is because Ji Feng would like to know exactly where the people sent by the military were killed .....

In fact, he wants to know where the military sent people in the first place, or to put it more bluntly, who the military suspected at the time!

If you know this question, maybe for some of the dynasty's situation, Ji Feng will be able to understand a little more clearly, and whether this laser gun is made by the dynasty or not, Ji Feng can also do a good job of knowing.

However, to this question, Ji Zhenping shook his head and said, "These are all classified, and according to the rules, I can't tell you."

Ji Feng was busy saying, "Little Uncle, you know me, I'm asking these questions, but I just want to help, and I'm particularly fond of laser guns, and I've also studied them very deeply, to be arrogant, I'm afraid many experts in your army may not know as much as I do in this area!"

Ji Zhenping nodded slightly, indeed, regarding what Ji Feng just said about the principles of the laser gun, what triggering device, what energy conversion device and so on, and even making the principles so clear, this was something that many experts could not do.

However, approval is approval, but regulations are regulations.

Ji Zhenping just shook his head and said, "You should not pry so much, these issues cannot be told to you."

"Why?"

Ji Feng frowned and said, "I'm not a big mouth, can I still run around outside and talk about it? Little Uncle, I just want to know some information and then synthesize what I have learned, so that it is more conducive for me to make judgments ..... Besides, in the past, whenever I learned any updates, especially about some situations in the dynasty and abroad, would I tell you in a timely manner."

"So what?" Ji Zhenping asked.

"That would be considered active cooperation, a merit, right?" Ji Feng said, "I can't even exchange these merits for some information?"

"You brat ....."

Ji Zhenping couldn't help but shake his head and laugh at his words, saying, "Just give up your heart! No means no, this is not negotiable, even if you are my nephew, I can't tell you!"

Ji Feng was a bit helpless, he really wanted to know who had made this laser gun, since the military had already sent someone to trace it, it meant that they must have a suspect, or at least a general direction, which was also quite important information for Ji Feng.

But how come Little Uncle is so archaic on this issue, he has to strictly adhere to the rules!

"Little Uncle, won't you think about it anymore?" Ji Feng was still a bit undeterred and said, "If possible, I can exchange some technology with you guys, what do you think?"

"What kind of technology?" Ji Zhenping asked.

"It's the alloy technology!" Ji Feng said, "I've been researching the technology of alloys recently, and I've finally made a certain breakthrough recently, that's why I'm buying the equipment to test it, if it succeeds, I believe that the so-called super-alloy project that the Boundary Peng people bought from the hands of the Brilliant Group, in front of my alloys it will just be a pile of scrap metal!"

Speaking here, Ji Feng asked seductively, "How about it, Little Uncle, you think about it? In fact, your military isn't at a disadvantage, I'm inquiring about this information because I want to help and do my part!"

Ji Zhenping was immediately amused, "What kind of technology can you drill into! The super-alloy technology of the Brilliant Group has been studied by several famous experts in this field for three or four years before a breakthrough was made by chance, you are a student who hasn't even graduated from university and your major is not even related to ....."

The fact that Ji Zhenping did not continue to say, just that constantly shake his head and face with a smile, but enough to show that he did not believe much of what Ji Feng said about super alloy technology, only Ji Feng's words as a joke.

"I ....."

Ji Feng opened his mouth, he really wanted to tell Ji Zhenping that any one of the technologies in my head would be enough to make the Brilliant Group look up to, even those top experts in Boundary Pong and Rice would be listening with little stars in their eyes, and many of the technologies could not be manufactured even by the most advanced equipment in the world now!

My technology, it's alien technology!

But now Ji Feng could only say helplessly, "Little Uncle, then how will you be willing to talk about it?"

"Why do you want to know so much?" Ji Zhenping asked strangely, "Really just want to help?"

"Yes!" Ji Feng nodded his head.

"Then you are a little too enthusiastic!" Ji Zhenping said, "Overwhelmed with love, huh?"

"....."

Ji Feng spread his hands and said, "Little Uncle, put it this way, remember what I told you last time when I brought the weapon back? I suspect that this laser gun was actually made by the dynasty, of course, it could also have been made by the rice country or the Kepong people, but it should have some relationship with the dynasty ....."

Ji Zhenping faintly nodded his head.

When Ji Feng saw that there was a chance, he hurriedly said, "Little Uncle, think about it, if this thing is really made by the dynasty, just based on our country's relationship with the dynasty, do you think there will be a few days of peace in the next few days?"

Ji Zhenping gave him a look and said, "Then what do you mean?"

Ji Feng said without hesitation, "Of course I want to find out the source of the weapons! Little Uncle, you know that I have a unique method of dealing with reformers, and that this method has now been mastered by both the Red Arrow Brigade and the Special Operations Brigade, only that the power is not yet there, but I believe that in a short time, this method will have some effect, and now this weapon is the same!"

He pointed to the picture in his hand and said, "As long as I know where the source of this weapon is, I might be able to come up with a corresponding method to ..... at least, just with my delving, I believe I can figure out a way to restrain it."

"No more, I can at least help take out a few more transformers and strike a blow at the dynasty's power!" Ji Feng said, "Little Uncle, you ....."

"All right!"

Ji Zhenping, however, waved his hand without waiting for Ji Feng to finish, saying, "It's useless for you to say any more, not even half of the information about this matter can be revealed."

Ji Feng was stunned: "Why?"

Ji Zhenping said, "Willingly it is simple, the photo you are holding in your hand is only one of our many agents!"

Ji Feng was stunned, and then said, "So that's how it is!"

The first time Ji Zhenping said this Ji Feng suddenly realized, no wonder no matter how he said it himself, little uncle just did not let go, it turned out that it was not because little uncle was ancient, but there was a reason for the matter!

In fact, the meaning of Ji Zhenping's words had been expressed very clearly – one of the many agents, which means that, in addition to the agent who was killed off, the military must have sent other agents to investigate this matter, and so far, those agents have not been discovered, at least, they should still be alive!

Therefore, during the mission, any information about them must not be disclosed, otherwise, if any information leaks out, it may pose a great threat to the lives of those agents who are still secretly investigating.

As a general, Ji Zhenping naturally could not take the lead in breaking the rules and doing such a thing!

Even if the face is his nephew, he absolutely can not reveal half a cent, because no one can guarantee that there will not be any accident, Ji Feng may not reveal to the public, but one more person knows this news those agents will be more dangerous, to put it badly, maybe Ji Feng may leak the news when he talks in his sleep at night .....

Unless, this time, the mission is over.

Understanding this, Ji Feng stopped asking questions, he said, "Then, little uncle, it's me who shouldn't ask ....."

Ji Zhenping said, "In fact, after knowing that some of us were killed, I had a not-so-good feeling in my heart that this mission would fail, and the above wanted to withdraw the remaining people back, but the threat of this new type of weapon was too great, and this issue had to be clarified, so after thinking it over, I still continued this mission, then at this time, I really can't add even the slightest bit more danger to those who are walking on the tip of the sword at all times!"

Ji Feng nodded and said, "I understand! But little uncle, I think that instead of just tracing it, we should lure the snake out of the hole and find a way to get another laser gun ....."

"That's easy for you to say!"

Ji Zhenping glared at him and said, "This kind of weapon is so powerful, how can you lure a snake out of a hole? Who will lure it? You're not taking the lives of the soldiers underneath seriously, are you! Let me tell you, you're just lucky you're not one of my soldiers, otherwise I'd have to kick you!"

Ji Feng instantly laughed bitterly, "I didn't say I wanted those agents to be the bait."

"Then who do you want to let go? You go, huh?" Ji Zhenping hummed.

"Hmm. I'll go." Ji Feng nodded his head.

Campus Master Chapter 2318

Ji Zhenping then stalled and whirled and said, "Get lost, the main thing is not finished yet, less bullshit here to waste time ....."

"What I said is true!" Ji Feng said, "Little Uncle, I'm kind of familiar with this kind of weapon, after all, I should be the first person in the country to come into contact with this kind of weapon ..... plus my hands, I think I'll be the most suitable for this bait!"

"Don't talk about these useless things!" Ji Zhenping said, "This is a matter for the military, it has nothing to do with you!"

"How can it not have anything to do with it!" Ji Feng said, "At least I should do my part, right?"

"Little Feng, things aren't as simple as you think!"

Ji Zhenping sighed and said, "You haven't experienced it, so you don't know the dangers involved, of course, if you were a soldier, I definitely wouldn't deliberately try to protect you just because you're my nephew, but now you're just an ordinary citizen, it's a matter of principle!"

Ji Feng was then a little helpless, his little uncle was very resolute in what he said, he knew that this was not going to work out.

In fact, Ji Feng could understand, this kind of dangerous thing, the army would definitely not fake it, and it might also involve the military's intelligence network outside, the military would not easily let himself participate in the operation.

"Actually, there is another reason for not allowing you to participate." Ji Zhenping suddenly said.

"What reason?" Ji Feng asked.

"Some people might gossip about it!" Ji Zhenping said, seeing that Ji Feng was a bit puzzled, he explained, "Little Feng, in fact, the army is not ironclad now, and that weapon was brought back by you, but after bringing it back, it soon picked up and self-destructed, and even for this weapon, the country sent a lot of manpower, and there were people who sacrificed ....."

Ji Feng puzzled said: "Then what?"

Ji Zhenping said, "And then? Some people think that this thing from start to finish might just be a hoax, that the enemy deliberately threw this weapon out as bait to get us to trace the source, and in turn the enemy might then trace it back to our intelligence network ....."

"I see." Ji Feng said, "Some people think that this is a trick played by the enemy to lure a snake out of a hole?"

"That's right!" Ji Zhenping nodded his head.

"I can be sure it's not!" Ji Feng shook his head and said in a very certain tone, "At that time when I found this weapon, it was hidden tightly, not only in the dark room, but also in the safe of the dark room! If it wasn't for chance, I probably wouldn't have been able to find it at all!"

Ji Zhenping asked, "Who can prove it?"

"Hmm?"

Ji Feng was stunned for a moment, then he whirled and said, "I can prove it."

Ji Zhenping shook his head and said, "Your proof is not convincing."

"Why?" Ji Feng was stunned, "I found that weapon, I know the whole process clearly, how could it be unconvincing?"

"If this whole thing is really just a trap, a means for the enemy to lure the snake out of the hole, then what kind of role did you play in the middle of it?" Ji Zhenping asked.

"I ....."

Ji Feng was just about to speak when he suddenly frowned, he immediately realized a problem, "Little Uncle, is there someone who suspects that I am an accomplice of the enemy?"

Ji Zhenping said, "No matter where you are, there will always be people with sinister intentions, they never care about what good you have done, they will only speculate if there is some unseen secret behind your good deeds!"

Ji Feng nodded slightly and couldn't help but be silent for a while.

For example, even if you take out all your family fortune and donate it to the poor, I'm afraid that some people will not think that you are being charitable and great, but will only think that you must be doing it to become famous and to make people appreciate you!

But those people have never thought about whether they themselves have donated a single dime!

Ji Feng himself had personal experience, and there were once people talking behind his back, saying that all those technologies of the Tengfei Group might have come from the dynasty!

As for the fierce battles between him and Dynasty, how many times he had been attacked and killed, how many modified people who had taken out a huge threat to China, those people would never think about it, and I'm afraid they didn't want to think about it either!

The same is true now!

Ji Feng had brought the laser gun back from Rice, and on his return, there were even two agents who were seriously injured, and if Ji Feng hadn't been on the ship at the time to break open the container, I'm afraid that entire intelligence network would have been completely swept clean by Rice.

But these are the same questions that some people wouldn't think about!

They would just maliciously speculate that with such a good weapon, they would actually take it back to the country?

If they kept it, once they had researched the technology of the laser gun, their future would naturally be unlimited.

Therefore, some people secretly speculated that the reason why the laser gun was brought back was just to set up a trap, and the laser gun was just a bait to lure China's agents to track it down, and then they could follow the vine and wipe out China's intelligence network!

"Little Uncle, who said all these words?" Ji Feng asked. His words took on a hint of fire. For these villains with sinister intentions, Ji Feng felt disgusted in his heart, one could even say that he hated them beyond measure!

"Just some villains!" Ji Zhenping said, "It doesn't really matter who said it, sometimes these people are afraid they don't even know what they're saying, they're just telling lies with their eyes open for some purpose! The important thing is that once such claims get around, they will more or less cause some bad repercussions!"

Ji Feng frowned and asked, "Then that means that all these words have already affected you, Little Uncle?"

Ji Zhenping couldn't help but shake his head with a smile and said, "With those little people, they're not qualified enough to influence me! It's just that since there's this kind of talk, it's more or less inappropriate for you to get involved again!"

Ji Feng nodded and said, "I understand, I want to avoid suspicion!"

"It's good that you can understand." Ji Zhenping nodded, "However, little uncle, for this kind of malicious slander in secret, aren't there any punitive measures in the army?"

"There will certainly be punitive measures!" Ji Zhenping said, "Since some people can't control their own mouths, then naturally someone will do it for them! Only, punishing all these villains is actually insignificant, it's the people behind them, or rather, the people who taught them to say these things, that would be of more interest to me!"

Ji Feng immediately asked, "What, is there someone else behind them who is directing them?"

Ji Zhenping said, "Part of it! Some people themselves just like to maliciously speculate on others, such people are inherently wrong-hearted. But there are others, they are just a talking machine, a sounding board, they will say whatever others tell them to say ....."

Ji Feng asked, "Has the investigation found out who is directing this?"

Ji Zhenping said, "Currently under investigation, some people, na, are always immortal ..... Forget it, don't talk about it, sooner or later there is a way to clean up those bastards who say blind things with their eyes open!"

Ji Feng could not help but smile, it seems that the investigation of the little uncle is already some eyebrows, and the other party's behavior, must have caused the little uncle's anger.

In fact, for any decent person, tricks like this kind of backstabbing in the back ground were abhorrent.

“Little Feng, there’s no need to think about being a decoy to participate in the investigation.” Ji Zhenping returned to the original topic and said, “If you really want to, you can investigate privately yourself, but there is one rule, no matter what you can’t risk yourself alone, you must do it on the premise of ensuring your own safety, understand?”

Ji Feng smiled, “Don’t worry little uncle, I won’t joke with my own life, right?”

“It’s best if you understand!” Ji Zhenping said, “Alright, that’s it for today’s conversation, don’t go back to Jiangzhou for now, since you’re so knowledgeable about laser guns, then communicate with the experts at the research institute, hopefully you’ll be able to produce results as soon as possible .....”

“Mm.”

Ji Feng nodded his head.

Ji Zhenping couldn’t help but let out another soft sigh and said, “I don’t know which country has actually developed this weapon that is so powerful and even far ahead of our country, this is really not good news .....” It looks like an eventful year is coming!”

Ji Feng thought to himself, the power of this radium gun can be more than just huge, it is not even too much to describe it as terrifying.

Especially the fourth generation laser gun, smaller, more convenient to carry, but that power is a bit outrageous, even some super alloy may not be able to block the laser gun attack!

And this super-alloy is a technology from the Gamma system, not the so-called alloy of modern Earth!

However, Ji Feng agreed with what the novel said about the eventful times.

Nowadays, the whole world is not very peaceful, after so many years of development after World War II, nowadays many people have reached a state of stillness, and under the surface of peace, there are dark currents.

In the vicinity of China, there are countries such as Kepong and the Philippines jumping up and down, and Kepong is even more eager to dominate Asia, while further afield, there are countries such as Rice doing their best to contain China’s development.

At the same time, there are mysterious and powerful organisations like the Dynasty, who don’t know what they are up to!

This is definitely an eventful year!

And in the midst of this turbulent tide, it has become an extremely difficult task for China to rise as fast as possible while protecting itself!

The first to bear the brunt were the military and the elites of various industries in China.

Ji Feng picked up the photo in his hand again and looked at it. On it, the bloody hole pierced in that agent’s head was so blinding that Ji Feng couldn’t bear to look at it.

This agent, whose name Ji Feng did not even know up to now, had sacrificed so much that people didn’t even know there was such a person.

However, what made Ji Feng feel grateful was that there were still Chinese soldiers fighting, there were still people disguised in various identities, risking being killed or even tortured on the spot if they were discovered, serving the country.

Campus Master Chapter 2319

However, what made Ji Feng feel grateful was that there were still Chinese soldiers fighting, and there were still people disguised in various identities, risking the risk of being killed or even tortured on the spot if they were discovered, to serve the country.

Everyone's aim is to see the country rise and become truly strong.

Ji Feng suddenly felt a sense of relief, because he knew that he was not alone in his fight now, nor was he alone in his efforts.

In fact, it wasn't just these soldiers and agents who were working hard, the government, as well as many elites, were all contributing their strength to the strength of this country, even the ordinary people who were only concerned about living their own small lives were actually hoping that this country would be rich and strong.

Ji Feng couldn't help but feel a sense of pride in his heart. He stared straight at the agent on the photo who had been shot in the head with a laser gun and secretly said, "I will definitely avenge you! With so many people working together, fighting side by side, your sacrifice will certainly not be in vain!"

"Alright, let's stop here for now." Ji Zhenping said, "Now ....."

He raised his hand to look at his watch and said, "Those experts are still at work now, I'm afraid they can't find the time to talk to you at this time, I'll make an appointment for you first, you can come back when they are almost off work."

After that, Ji Zhenping picked up the phone and didn't know who he was contacting, a moment later, he put down the phone and said, "At five o'clock in the afternoon, the two old experts from the research institute can spare the time to come, I will bring you there then."

Ji Feng nodded his head without any dissatisfaction.

Of course he knew that those experts were usually very busy, especially after the appearance of the laser gun, I'm afraid they would be even busier, and since he was just an ordinary university student, in the eyes of those real experts, I'm afraid that he, the first grandson of the Ji family, was not as good as the introduction made by Little Uncle on the phone, 'This is a young man who is very interested in the laser gun and has achieved some research results in private'. The young man was more useful!

Therefore, Ji Feng agreed to do so with great pleasure.

After coming out of Ji Zhenping's office, Ji Feng first went home, but found that his mother, Xiao Su Mei, was not at home, only the nanny was washing dishes and waiting for Xiao Su Mei to come back to cook together.

Ji Feng called his mother, only to learn that she had gone to a charity organisation again. Ji Feng had nothing to do around, so he went to the old man's place again.

After talking with the old man for a while, Ji Feng double-checked and confirmed that there was definitely nothing wrong with the old man's health, and only then did he leave with peace of mind.

Around four o'clock, Ji Feng started to set off, and then under the leadership of his younger uncle, they arrived at a building that was only four stories high but covered an extensive area .....

On the way here, Ji Feng couldn't help but tsk his surprise, this building was located not very far from the General Staff, but the sign hanging on it belonged to some company's research institute, from the outside it was completely unnoticeable that it was the military's research institute.

"Little Uncle, this is our military research institute in China?" Ji Feng was a little surprised, "Doesn't the military have a special place set aside for this?"

"What special place?" Ji Zhenping asked.

Ji Feng said, "It's a place dedicated to military eyes ah, like the fifty-one district in rice country kind of place, the surrounding area for many miles is a military restricted area, who dares to cross the boundary may be shot ....."

The actual fact is that you can find a lot of people who are not able to get a good deal on a lot of things.

The first thing you need to do is to ask a question that involves a very confidential issue, and the younger uncle will always answer the question or simply digress and not answer it at all.

However, Ji Feng was able to see a little bit of clues from Ji Zhenping's reaction, and he asked in a low voice: "Little Uncle, it seems that I guessed right, right? There are also places like Area 51 in our country, but we just can't talk about them because of the level of secrecy?"

Ji Zhenping, however, just smiled and said, "You've watched too many foreign movies, right?"

Ji Feng laughed, "Little Uncle, you don't need to talk about everything, just say whether my guess is right or not!"

"What do you think?" Ji Zhenping asked.

"I think there must be one, it's just that it hasn't been admitted to the public!" Ji Feng said, while his gaze was fixed on Ji Zhenping's reaction, but he was disappointed because Ji Zhenping's face only had a little smile on it, but other than that there wasn't any other unusual expression.

Ji Feng wanted to ask more questions, but he was interrupted by Ji Zhenping: "All right, don't talk about these useless things! When you meet the two experts later, you have to speak cautiously and just exchange the experience and results you have mapped out with the two experts."

"Okay." Ji Feng nodded, it seemed that his hope of gossiping some insider information from Uncle Xiao was gone.

In fact, Ji Feng did not know that this research institute was only used to research some not very important projects, and at the same time, it could serve as a cover to divert the attention of certain people, so that they would not overly trace where the real research base was.

The two experts who wanted to see him today, in fact, just happened to be at this institute today for some stuff, which is why they were here to see him.

These two experts, both looked old, one of them had white hair, and the other looked to be about 50 or 60 years old.

However, both of them had an aura unique to technicians, serious and earnest.

Ji Feng greeted the two experts politely.

“Young man, I heard that you have some research on new types of weapons?” One of the experts didn’t even wait for the introduction to finish before asking straight to the point.

“..... research not to speak of, just blindly poking around on my own.” Ji Feng said.

“Then tell me, that weapon you are talking about, what is its principle, and also, why was it suddenly destroyed?” Another expert also spoke up and asked.

Ji Feng then stood in a bit of awe.

These two experts seemed to be quizzing him, but in reality they were so impatient to ask, obviously they really wanted to know the answer immediately, as for some other red tape, it wasn’t too important to the two experts.

This is the real expert!

Ji Feng secretly said, those so-called experts who appear frequently in the media all day long and say some bullshit all day long, but still think they are talking about the Bible, compared to these two, those people should simply be ashamed of themselves!

“Here’s the thing, that laser gun .....

“You call it a laser gun?” As soon as Ji Feng opened his mouth, one of the experts nodded thoughtfully and said, “That’s a very imaginative name, using the principle of high-energy laser emission and shaped like a submachine gun, hmm, laser gun, that’s a good name.”

“Young man, please continue.” The other expert said.

“Yes.”

Ji Feng nodded and said, “The principle of that laser gun has actually been stated by this expert just now, it is the use of a high energy laser, only that this laser, which is stronger and more destructive than any normal high energy laser energy, is mainly dependent on three reasons, the first is the extraordinarily large amount of energy provided by the energy source after it has been excited .....

“Secondly, the energy conversion device in the laser gun will convert this huge energy into this powerful high-energy laser, so the role of the energy conversion device is also extremely important.”

“Thirdly, it comes to that long needle at the very front of the laser gun, that is a guiding device, in fact, to put it bluntly, it is like the barrel of an ordinary gun, it is to play a guiding and directional role .....

Ji Feng explained the principle and structure of the laser gun, and added: "In fact, strictly speaking, there is another device that is also essential, which is the trigger, only when the trigger is functioning, the energy source will be excited ....."

The two experts' expressions suddenly became solemn, and the one with white hair among them said, "Then, why would that laser gun self-destruct?"

Ji Feng immediately said the words he analyzed in Ji Zhenping's office again, but the two experts looked vaguely excited.

"Young man, you know all the principles of this weapon?" One of the experts asked, "So, if we fully support you, can you manufacture it?"

"This ....."

Ji Feng shook his head and smiled bitterly, "I'm afraid I can't."

"Why?" The two experts asked in unison.

"The hardware can't keep up!" Ji Feng said, "First of all, there is no suitable energy source, there is also the material for manufacturing the weapon, as far as I know, I'm afraid there is no material of sufficient strength to manufacture the laser gun now, I think the two experts have seen the production material on that laser gun before, that material is obviously quite advanced, but it still doesn't work, so... .."

The two experts had a regretful look on their faces, indeed, they had seen the material used to make the laser gun, of course they knew how advanced it was, but even that had destroyed itself, so it was clear how ridiculously high the material requirements were for this kind of weapon!

The energy source and the materials alone were the only things they could do nothing about at the moment!

They had the technology, but they couldn't build it because of objective limitations.

Understanding this, how could the two experts not regret it?

Of course, he often left out some parts of the technology on purpose, but the two experts were able to guess a rough idea after deducing it backwards and forwards!

Although the technology they mastered was still far from mature, and due to the limitations of materials and other objective reasons, the possibility of making a laser gun in the near future was almost impossible, this exchange was a great gain for the two experts.

For Ji Feng, some of the unique ideas of the two experts were also very enlightening, making him gain a lot as well.

After all, he was not a professional researcher, and although he knew all the techniques, they were only memorised by rote in the training space of the intelligent brain, but it was still a bit difficult to really learn by example.

So Ji Feng was happy to interact with them, the real experts!

Campus Master Chapter 2320

It was not until Ji Zhenping reminded that it was getting late and it was time for dinner that the three of them ended the exchange with some impatience.

When Ji Feng was about to leave, one of the experts even said, "Young man, if we really develop a laser gun in the future, you will take the credit for it!"

Another one even said, "Young man, do you want to come and work at the research institute? As long as you are willing, we two old men will definitely recommend you!"

Ji Zhenping was a bit stunned, he knew the temperament of these two experts, they were serious and could not rub sand in their eyes, but now, they were pushing Ji Feng so much?

Ji Zhenping suddenly felt that his previous idea that Ji Feng's research was just child's play seemed to ..... be wrong?

However, no matter what, Ji Feng's performance today really made Ji Zhenping couldn't help but brighten up his eyes, and he realized that perhaps this nephew of his said that he liked to study, especially to study these science and technology things, wasn't just talking for fun.

What happened today was the best proof of that!

This was a bit out of the ordinary!

On the way back, Ji Zhenping looked at Ji Feng from time to time, he really couldn't help but be a bit curious, this kid was too outstanding, just because he came from a poor background but learned an outrageously strong kung fu, then maybe it might be taught to him by some miracle man in the folklore, not that there was no such possibility, so it was still acceptable.

But now even the two experts from the military research institute have such a high regard for Ji Feng that he can even communicate with them on an equal footing ..... Although this communication is only limited to one item, the laser gun, this is still enough to amaze people!

How in the world did this kid's brain grow? How did he learn this skill?

Ji Zhenping really couldn't figure it out, could there really be such geniuses in this world?

"Little Uncle, why do you always look at me like that?" Ji Feng asked with a smile, "You're like this, making me a little uncomfortable!"

"..... kid, so what you said is true, you really have researched a certain result?" Ji Zhenping was still a little hesitant.

"It's not really an achievement, it's actually that I have researched on laser guns." Ji Feng laughed: "At that time when I brought the laser gun, wasn't there still some information, and I had read it at that time!"

"Then ..... you said that you are having Shao Lei help you order equipment to prepare for the manufacture of the alloy, does this mean that you have made a breakthrough in this area of research as well?" Ji Zhenping asked.

"Mm."

Ji Feng nodded and said, "That's right, at least I've done some extrapolations on draft paper and computers, theoretically speaking, I've designed several quite good alloys, and I can guarantee that they are definitely better than the so-called super alloys in the hands of the Brilliant Group!"

Ji Zhenping asked, "Theoretically?"

Ji Feng nodded and said, "Yes, that's theoretically speaking, because right now I haven't even gotten the right equipment yet, none of it has entered the real test phase yet, so at the moment this project can only stay in theory ....."

Ji Zhenping suddenly got a boost of spirit and asked, "So, if you can really manufacture it, you can really surpass that super alloy project in the hands of the Brilliant Group?"

Ji Feng said, "I guess so, right now everything is still in the theoretical stage, and I am not good at being 100% sure, because in the process of manufacturing the alloy, if the process or equipment does not meet the requirements, then the manufactured alloy may not be able to reach the theoretical height!"

Ji Zhenping nodded, of course he understood this reasoning, but he was more concerned about another thing: "If it is really possible to create an alloy that strong, doesn't that mean that it is one step closer to creating a laser gun?"

Ji Feng laughed, "It's not that easy, just having the materials is only the first step, where do you get the right energy source? There are also some extremely precise electronic components needed in that energy conversion device, I'm afraid it's still a problem ....." In short, to create a laser gun, what needs to be overcome is not only technical difficulties, but also hardware difficulties, and that's not just one or two difficulties!"

"As long as there is hope!" Ji Zhenping said, "Kid, it seems that you are very deep in this research, so you have to speed up your research, you can't fall too far behind others ....."

"Little uncle, you think I'm a god, how much power can I have alone?" Ji Feng said, "When I return to Jiangzhou, I also have to hire technicians in these fields, especially skilled technicians with high craftsmanship, in this way, I might even be able to make a certain breakthrough!"

Ji Zhenping said, "Then you should be bold enough to engage in it! If there are any difficulties, just talk to your second uncle, I will communicate with him about the situation over here, and he will definitely support you when the time comes!"

Ji Feng laughed: "That would be best ....."

In fact, at this time, Ji Feng's heart was already laughing.

From these words of his younger uncle, he was able to see that he had actually completely accepted the fact that he had advanced technology, and had even placed all his hopes on himself.

This was also one of the objectives that Ji Feng wanted to achieve, he had to find a way to explain why he had such advanced technology, that's why he bought a lot of equipment that he didn't need, and he also planned to set up a small laboratory once he arrived in Jiangzhou, the purpose was of course to cover his ears.

As long as people think that all those technologies were researched in this laboratory, then Ji Feng's purpose will be completely achieved.

—No matter who researched it, as long as everyone's attention was focused on the word 'research', that would be enough.

As long as the technology was researched and not dropped from the sky, then it was normal!

After the problem of the source of the technology was solved, then the rest of the matter was not a problem.

So Ji Feng said very readily, "Little Uncle, don't worry, I'll do my best to research it!"

Only then did Ji Zhenping nod in satisfaction, then rubbed his brow again and said, "I don't know which country is actually researching this kind of weapon, it looks like it should be a hostile force in China ..... This is really not good news!"

Ji Feng was silent.

Because he guessed that the laser gun was probably from the dynasty, and it might even be somewhat related to Kepong or Rice, but no matter which party researched it, this was a huge threat to China.

Ji Feng could feel the heavy responsibility on his shoulders, because he had seen with his own eyes how the dynasty had infiltrated China, and the wolfish ambition of the Kepong people and the dynasty!

The Kepong people's ambition is unquenchable!

The dynasty's motives are unclear, yet its infiltration of China is deep .....

And then there's the terrifying Transformer, and the project that the Dynasty is now researching, combining the Transformer with the ancient martial arts of China, if this project is successful in their research, then the Transformer will be practically unbeatable in the field of close combat!

Because at that time, the reformers would probably no longer be afraid of bio-currents, then they would have lost their nemesis, and the consequences of that would be absolutely terrifying!

Once that happens, no one will be able to stop the transformers in single combat, they will become a human killing machine!

And the first to bear the brunt would be China!

This is not good news!

So even if Ji Zhenping didn't say anything, Ji Feng wouldn't stop his research on laser guns and other weapons, it would be a fierce battle where he didn't know where his enemies were, but they were always there.

All he could do was to allow himself to progress without listening!

That evening Ji Zhenping went straight to Ji Feng's house with him, and because the two families themselves lived in the same neighbourhood, the younger aunt also came over.

At this time Xiao Sumei had already finished her day's work from that charity organization and returned home, while hearing that her son had returned, Ji Zhenhua also took the rare step of leaving work on time and returned home a full three or four hours earlier than usual.

It was a rare occasion for the two families to get together, which made Xiao Sumei very happy, especially when her husband got off work on time and her son came back, which made her very energetic.

Ji Feng, on the other hand, accompanied Ji Zhenping and his father to talk.

During the conversation, Ji Zhenping inevitably had to talk about what happened today. Ji Zhenhua was also more or less surprised, not expecting Ji Feng to have such in-depth research in the field of science and technology, which he had not expected.

However, the fact that his son was able to achieve such an achievement made him very pleased, but men are very subtle in their expressions. Ji Zhenhua only looked at his son approvingly twice, patted him on the shoulder and said, "Well done, keep up the good work!" It is the greatest encouragement to Ji Feng.

.....

The next day, Xiao Sumei took a leave of absence from the unit and did not go to work ..... In fact, she was not paid for her work in the charity organization, but only volunteered to help.

The actual fact is that you can't get any more than one day to go back to your home to keep your mother company.

This time, however, Xiao Sumei did not mention the matter of the child again, it seems that the last time Ji Feng fled in fear, so that Xiao Sumei did not dare to scare her son again.

"Dingling ....."

The mother and son were talking when Ji Feng's mobile phone suddenly rang, he didn't even look at it and casually picked up the phone, "Hello, this is Ji Feng, who is it please?"

A slightly unfamiliar voice came on the phone, "Mr. Ji? Hello!"

Ji Feng was slightly stunned, then he remembered who the owner of the voice was, this person calling was the general manager of the machinery trading company that his second brother had introduced to him.

"Mr. Ji, I have already contacted the equipment you want for you, when do you have time to come and look at the information?" That general manager asked.

"Contacted?"

Ji Feng's eyes lit up and immediately said, "I'll have time tomorrow, let's do this, let's make an appointment for tomorrow afternoon ....."

After confirming the time with the other party, Ji Feng hung up the phone, but his heart was more or less excited, with the equipment, then the next step would be to start manufacturing the alloy .....
