

Campus Master 2361

“A major discovery!”

Professor Yu’s entire body was so excited that he could hardly contain himself.

There was no doubt that this was definitely a major discovery, although this discovery was not as significant as those milestone inventions, but, for China, for Chinese materials science, this discovery was simply too significant!

Professor Yu was holding the test chart in one hand and squeezing the little ball with the other, so excited that he could not contain himself.

Perhaps an innovative technology will benefit the scientific community or even the whole world, but it may not be as significant to China as the emergence of such a small piece of alloy.

For those high technologies, sometimes China may not be able to use them, and perhaps, it may be years or even a decade before they work.

However, the emergence of this alloy means that from now on, China has made a breakthrough in materials science, and many fields that it could not have ventured into can now be entered.

To take a simple example, foreign strategic weapons such as bombers or strategic transport aircraft can already cover the entire sky, but China does not even have its own large aircraft, which is certainly related to the adjustment of national strategic priorities, but ultimately, it is because the technology is not in place and cannot be developed.

The most important point in this is the material!

For example, the fighter jets, China’s own production of fighter jets, other engine life is not even half as long as some advanced countries fighter jets.

The lack of strength of the material accounts for a large part of the reason!

At the same time, the performance of an aircraft has a lot to do with the materials used to make it!

Not only aircraft, but also warships, aviation, aerospace, rockets and even spaceships – the more such top-notch technical fields, the more demanding the requirements for materials.

This is just the military side, if we extend it to the civilian sector, any industry related to metals, any industry with high requirements for material strength, cannot do without good materials.

If the material is not good, it will become the biggest bottleneck to its development.

For example, the most widely used excavators, bulldozers and other construction machinery, China’s demand is great, but these heavy construction machinery, but how can not compare with foreign imports.

To be fair, in these fields, in fact, China’s technology is not worse than those of foreign companies, and even the technology of some domestic heavy industry enterprises in some areas have exceeded foreign, standing at the top of the world, but the quality of machinery is not as good as foreign, this can not be denied.

Technology is good again and what is the use?

Without materials, all the technology, all the drawings can only become a pile of waste paper, that's all.

Even if they are barely made, the quality will not be up to scratch, and in the end, the reputation will only get worse and worse.

But what would it be like if this alloy was added in?

Although Professor Yu had only initially tested some of the physical properties of this alloy, there was no doubt that the hardness of this alloy was truly staggering. In his lifetime of studying materials and machinery, Professor Yu had never seen such an outstanding alloy.

Perhaps some other untested aspects of this alloy will have flaws of one sort or another, but whatever the flaws are, just the two points of hardness and stability alone are enough to make a qualitative leap in China's mechanical field!

"The value of this new alloy is immeasurable!" Professor Yu's face, which already had some old age spots, was filled with excitement.

"Teacher, this alloy really has such a great value?" Hearing Professor Yu praise this alloy so highly, several students were more or less hesitant, "The properties of this alloy haven't even been tested yet"

"Yes, it hasn't been tested yet."

Professor Yu nodded and said, "My evaluation, too, is for now, if we wait until all the other properties and indicators of this alloy have been tested, I might say that the importance of this alloy to China's industry cannot be overestimated!"

After a pause, Professor Yu said, "Or in other words, ever since the birth of industry in China, apart from computers and standardised assembly line production, the emergence of this alloy is the greatest of all!"

Several students were stunned, they really did not expect that their teacher would give such a high rating to this alloy!

Professor Yu's gaze was fixed on the little ball of alloy, not taking his eyes off it for a moment, but he was aware of the students' reactions.

"Humph! You've been with me for more than two years, you're about to become PhDs, so you're just short-sighted, why have you forgotten the basics?" Professor Yu reprimanded.

"....."

Several students looked at each other, not knowing why the teacher suddenly criticized them.

Professor Yu said, "Have you forgotten the properties of the alloy? It has such extraordinary hardness and stability, and it is so light, what does this mean?"

Several students could not help but be slightly stunned, but in a flash, they all revealed a dazed look.

“Teacher, this means that if this alloy is used to make the equipment, its electrical and thermal conductivity should be very low, and the equipment will improve more than just its service life and quality, the safety factor will be greatly increased.” A student said.

“Exactly.”

Other students also nodded their heads, this was in line with the principle of the alloy.

However, Professor Yu glared at them and said in a deep voice, “You guys, I think you’ve all read too much! I’ve always stressed to you that you should live and learn, but it seems that you can’t learn!”

Several students looked embarrassed, they had read stupidly, didn’t that mean they were all nerds?

“You guys are still not convinced?”

Professor Yu snorted coldly and said, “Let me tell you, with what we know about the properties of this alloy, if it enters into practical application, the production cost will be greatly reduced under the premise of ensuring product quality and longevity, which means that our Chinese products will have a competitiveness that others do not have.”

“Think about it, if the quality of Chinese industrial products or equipment is the same as or even better than the imported ones, but the price is much lower than the imported ones, do you think, is this competitive?” Professor Yu asked.

“Of course it is!”

Several students blurted out without hesitation.

If the quality of a domestic car is the same as or even better than a Mercedes-Benz or BMW, but the price is half that of the other, or even lower, only a fool would buy an imported car instead of a good one at a good price!

“So, do you think that the emergence of this little piece of alloy will be significant for the industrial sector of our country as a whole, as well as for the country’s economy?” Professor Yu asked, “Do you guys still think it’s an exaggeration now when I say that the value of this piece of alloy is immeasurable?”

“.....”

Several students shook their heads thoughtfully, if we look at it from this aspect, instead of being exaggerated, Professor Yu’s words could be said to be very conservative.

The reason is that the application of the alloy is really too wide, from the space rocket spacecraft to some household equipment, all cannot be separated from the metal.

One could imagine what it would be like once this alloy was really put into practical application!

“Teacher, who made this alloy?” At this time, a student suddenly asked.

“.....”

At once, Professor Yu was stunned, and it dawned on him that this piece of alloy was only found inadvertently in the clutter, and it was still unknown who had made it!

Who had made it?

Suddenly Professor Yu's heart fluttered and he said, "Go and ask the staff on duty who left the clutter on the workbench.

One of the students rushed over, and without Professor Yu saying much, he understood how important this alloy really was.

So it was too important to find the person who had made this alloy.

After a few moments, that student came back: "Teacher, I asked, the duty officer said that only one person had come in this lab today, but she didn't know what that person's name was, she only knew that that person was specially approved by the old headmaster to let in"

Professor Yu was stunned: "Specially approved by the old headmaster?"

The student nodded and said, "Yes. Teacher, you also know that our lab only recognizes school cards or applications, and the staff on duty said that the person came in with the old headmaster's work permit, so only the old headmaster's name was left in the register"

"The old headmaster the old headmaster must know!" Without saying a word, Professor Yu turned around and headed out.

"By the way, you are free to conduct the experiment today." After walking a few steps, Professor Yu dropped these words and walked out quickly without looking back, leaving behind a group of students who looked at each other in disbelief.

.....

"Ji Shao"

In the evening, Ding Weijian received a call from Ji Feng, which took him by surprise.

Although he had known Ji Feng for not too long, but after all, there was hardly any encounter between the two of them, now Ji Feng suddenly called, which made Ding Weijian a little surprised and at the same time a little confused, what did Ji Feng, a gentry, want to do with himself?

However, hearing that Ji Feng had asked himself out for dinner over the phone, Ding Weijian agreed after just a little thought.

Although he didn't know what exactly Ji Feng wanted to do, but since Ji Feng had asked for it, this face could not be denied, besides, even if he didn't see Ji Feng's face, the captain's face always had to be seen.

"Xiao Ding, how is your captain doing? Has he been criticised?"

The two of them met at a mid-range restaurant and asked for a private room, so they sat down and chatted while eating.

When Ding Weijian smiled, he couldn't help but shake his head and said, "There was no criticism, but after our captain went back, she took the initiative to go to Bureau Gao's office, seemingly to tell Bureau Gao that she did all those things."

Ji Feng did not move and asked casually, "Then what did your High Bureau say?"

Ding Weijian said, "Our High Bureau's reaction was also very strange, he surprisingly didn't have a word of criticism, he just said that he knew about it and then let our captain go back"

Ji Feng then raised his eyebrows.

Campus Master Chapter 2362

Ding Weijian said, "Our Gao Bureau's reaction was also very strange, he surprisingly did not have a word of criticism, he just said he knew about it and then let our captain go back"

Ji Feng then raised his eyebrows.

This is a bit strange, arresting police officers from other sister units without an overwhelming reason, this is not a big thing, but not a small thing either.

If the other side really wanted to pursue the matter seriously, it would be a real nuisance when the time came.

But the deputy director of the city bureau, Gao Ruonan, actually did not criticize Li Ruonan, which made Ji Feng feel somewhat strange.

Even if Li Ruonan is the daughter of Mayor Li, but her kind of behavior, I'm afraid, is not what the party leaders can tolerate, disobeying orders, acting without permission, not giving face to the leaders all these kinds of behavior, absolutely no one leader will like.

The fact that the deputy director is able to sit in the position of deputy director of the Municipal Bureau means that this person also has some ability and background, you know, this Jiangzhou Municipal Bureau is not quite the same as the municipal bureaus of other cities, the deputy director is at the level of deputy department, that is, he is at the same level as the deputy mayors of other cities!

To this position, if he didn't even dare to criticize Li Ruonan twice, then there would be no point in doing this deputy director he wouldn't be able to sit in this position!

That's why Ji Feng found it strange.

"Then did that Gao Bureau say anything after your captain left?" Ji Feng asked.

"It doesn't seem to have actually even if it said anything, I don't know." Ding Weijian shook his head and smiled, "Although I am also considered a bit of a rank, but the position is too low, for the leadership of things know only a half a star, or heard some gossip."

Ji Feng then nodded and smiled and said, "It doesn't matter if your position is low, your chief also started as a small police officer, you are still so young, there are plenty of opportunities in the future."

Ding Weijian then shook his head and smiled, saying, "I really don't think about it so much now, I've seen so much that I'm not even interested in promotion anymore, now I just think about how to solve the case."

The two of them chatted for a few minutes, and Ji Feng asked Ding Weijian about some other things, including the origin of the Gao Bureau and so on.

“Our Gao Bureau used to be just the deputy director of the bureau office, that is, when Director Zheng was still in office.” Ding Weijian said, “But then after Director Zheng was transferred to South Guangdong, the original Deputy Director Chen was promoted to Director, and Bureau Gao was promoted up, and the division of labour of several other Deputy Directors was also adjusted.”

Ji Feng nodded and smiled, “So that’s how it is, so this Bureau Gao is still a local cadre born and bred in Jiangzhou?”

Ding Weijian shook his head and said, “That’s not true, our Gao Bureau is from Jin City, but he should have come to Jiangzhou very early, and the accent he speaks with doesn’t sound Jin City at all

Ji Feng said, “So it’s from Jin City.”

At this time, Ding Weijian lowered his voice and said, “In fact, the bureau said that our Chen Bureau and the former Director Zheng did not deal with each other very well, Gao Bureau used to befriend Director Zheng when he was the deputy director of the office, but it seems that he did not befriend him, and even once because of some work mistake or something, it made Director Zheng furious and almost had to remove his deputy director position. ”

“Oh?”

Ji Feng asked with a smile, “Then how come he wasn’t removed from his position, but instead, he even rose up the ranks?”

The deputy director of the office, naturally, was completely incomparable to the position of deputy director, besides, looking at the situation of the High Bureau, he, the deputy director, was holding real power.

Ding Weijian said, “It was said that at that time it was because the current Chen Bureau had bailed him out, so he became Chen Bureau’s man

The first thing you need to do is to get a good idea of what you are doing. No wonder it didn’t take long to sit in the deputy director’s seat before he could take charge of the criminal police team!”

He was not too fond of this official business, but he was no stranger to it.

Ding Weijian said, “It’s all about the leaders, I’m not too sure about the details, but I heard that Bureau Gao is indeed a hardcore subordinate of Director Chen.”

Ji Feng then nodded thoughtfully and asked, “Then in that case, this time, your Gao Bureau signaled your captain to let those murderers go, it might actually be your Chief Chen’s intention as well?”

“That

Ding Weijian was a little hesitant and shook his head, “I’m not sure about that.”

Ji Feng smiled and nodded, but in his heart he had a further understanding of this matter and a more accurate judgment.

And there was also a clearer understanding of the power of the Yang family in Jibei.

The family in northern Jibei is able to influence the police in Jiangzhou, this energy is really not small, and from this, Ji Feng also generally has an indirect understanding of the status of Yang Feng and his mother and son in the Yang family.

Perhaps, the Yang family really regarded Yang Feng as their future successor.

After separating from Ding Weijian, Ji Feng thought about it and was ready to go to his second uncle. Although this matter was not a big one, it did involve the Yang family, and there was no telling if the Yang family would take this to the family level, so it was better to talk to his second uncle and listen to his opinion.

But to Ji Feng's surprise, when he was about to call and ask where Second Uncle was first, he learned that Second Uncle had gone to Yanjing.

Ji Feng had to briefly recount the matter over the phone, without bringing any emotional factors, he didn't want to influence Second Uncle's judgment because of himself.

After listening, Ji Zhenguo, however, just said, "Anyone should be law-abiding, or at least law-abiding, no matter whose family it is."

Ji Feng then smiled, second uncle was really hard-headed, not only hard-headed as an official, but even harder as a person.

Ji Feng believed that when Second Uncle said this, he definitely had no shame in his heart, because he himself did the same thing and demanded this of his children.

For example, when second uncle knew that his youngest son, Ji Shaoyun, was not learning, he directly threw the other into the army, during which time Ji Feng did not even hear second uncle ask a word about how the boy was doing, but heard Ji Shaolei say that second aunt, because she was really distressed, secretly went to the army to see Ji Shaoyun once, and came back to receive criticism from second uncle.

So when he heard the second uncle's words, Ji Feng subconsciously nodded his head, because he knew that compared to those leaders who sat on the stage and talked about anti-corruption and advocating integrity, only to have their faces taken away by the Discipline Inspection Commission, these words coming from the second uncle's mouth were absolutely full of strength and very powerful!

With these words from second uncle, Ji Feng naturally knew what to do.

However, the next thing Ji Zhenguo said was, "The same goes for you, be law-abiding and don't take the wrong path."

Ji Feng then couldn't help but scratch his head, in fact, he had always tried to abide by the law as much as possible, but to be strict, he had actually broken the law quite a few times, so I guess that was why Second Uncle had nudged him.

"Second Uncle, I'll remember." Ji Feng said, "I will definitely not take the initiative to do bad things, and I will not take the initiative to touch the bottom line of the law."

"That's good."

Ji Zhenguo naturally heard the leeway left in Ji Feng's words, but he didn't say anything, because after half a lifetime of vicissitudes and experiences, Ji Zhenguo knew this society better than anyone else.

Next, Ji Zhenguo closed the line, he went to Yanjing to talk to several ministry leaders about work, naturally the United States so much time to chat with Ji Feng.

After speaking to his second uncle, Ji Feng took Bai Zhu and drove home, but just at this time, his mobile phone suddenly rang.

"Old Principal?"

When Ji Feng saw the caller ID, he was more or less surprised that the call was actually from the old president of the United University, he immediately instructed Bai Zhu to turn down the music in the car and then picked up the phone, "Old president, hello."

Soon, the old president's voice came over the phone, "Ji Feng, are you busy now? Is it convenient to talk?"

Ji Feng smiled and said, "Old Principal, if you have any orders, please speak."

"It's like this, I want to ask you, did you do an experiment about alloys in the school's laboratory today? Or, was it an experiment related to alloys?" The old headmaster asked.

"How do you know that?" Ji Feng asked, "Old Principal, is there something wrong? Is the equipment broken?"

In Ji Feng's opinion, the old headmaster called here specifically for this matter, so he couldn't just be curious about what project he was experimenting on, right?

I was afraid that there was something wrong with the equipment, or that he had made some mistake and someone had reacted to the old principal.

"It's really you?"

The old headmaster's voice had some surprise in it, "Ji Feng, are you sure you're doing the alloy experiment?"

Ji Feng nodded and said, "Yes, Old Principal, I was indeed doing experiments, trying to make some new alloys Old Principal, what went wrong?"

The old headmaster said, "Ji Feng, it's not clear over the phone, why don't we do this, you should come over now if you have time?"

Ji Feng raised his hand to look at the time and nodded, "Okay."

The old headmaster said, "Then I'll wait for you in my office."

"I'll be right over."

Ji Feng's heart was strange, but he agreed very quickly, no matter what went wrong, since the old headmaster had personally called he had to go over there, besides, if it was really him who had broken the equipment or made any mistakes, he would definitely take the blame.

However, Ji Feng did not know that the old headmaster was so surprised and even shocked that he did not even put the phone down after the call ended.

The old headmaster was indeed very surprised, he did not expect that the new alloy that Professor Yu said was of great significance and immeasurable value was really made by Ji Feng.

Perhaps because of his excessive shock, the old headmaster even subconsciously took another look at the number he had just dialed to confirm that he had really just called Ji Feng.

This was too unexpected!

Campus Master Chapter 2363

In fact, when Professor Yu first said this, the old headmaster's first reaction was actually thinking that this could be done by an old professor in the school, knowing that there were several professors in the school in their respective fields of expertise, leading the country and standing at the forefront of the field of technology.

But then, after questioning and investigating, the result was really out of the old headmaster's expectation, today the mechanical laboratory was only used by Ji Feng!

The old headmaster was really a bit incredulous, could this really be done by Ji Feng?

At Professor Yu's urging, the old headmaster then called Ji Feng, but the result was even more surprising to him – it was really Ji Feng who did it!

The old headmaster even developed a feeling of unreality, although that boy Ji Feng had achieved quite good results, but when it came to doing scientific research, it was not the same thing as other achievements at all!

Without long-term research and precipitation, without profound professional knowledge, if you want to make a breakthrough in scientific research, the chances are simply too small to know how to describe it.

Therefore, the old headmaster was really incredulous about the fact that Ji Feng had suddenly developed a new alloy.

Even, the old headmaster was wondering if this new alloy developed by Ji Feng was related to some expert from the Tengfei Group.

In fact, according to the level, the old headmaster could talk to Ji Zhenguo, and when Ji Zhenguo came to visit the school in the past, he was very polite to the old headmaster, not to mention other officials.

The power of a university principal is not small.

Therefore, the old headmaster was better informed than many people and heard more news, so he knew that Ji Feng had a very close relationship with the Tengfei Group, and many people said that the boss behind the Tengfei Group was Ji Feng, which the old headmaster certainly knew by heart.

So, now that Ji Feng has suddenly developed a new alloy that has shocked Professor Yu, an authoritative expert, could it be related to the Tengfei Group?

For example, could it be because one of the experts of the Tengfei Group had an inspiration or an idea in this regard, but because the Tengfei Group did not have a suitable laboratory, Ji Feng came to borrow the laboratory of the United University?

The old headmaster suddenly felt that this possibility existed.

Otherwise, it would be too difficult to explain, no one would believe that a youngster could achieve such results, especially when this youngster was studying economics and management, and crucially, he hadn't attended a few classes!

The old headmaster's speculation and the doubts in his mind were soon answered, because it was in a new district, so the roads were still kind of smooth, Ji Feng took Bai Zhu and arrived at the school as fast as he could, he came straight to the old headmaster's office and hurriedly asked the old headmaster the purpose of his phone call with him.

"Old Principal, is there something wrong? Did I mess up those machines in the lab?"

After Ji Feng arrived at the old headmaster's office, he was more or less surprised to see that Professor Yu was also there, but he also nodded politely to Professor Yu, thinking that this should also be a staff member of the school, and after that, he hurriedly asked the old headmaster.

The old headmaster, however, shook his head and said, "You don't have to worry, nothing has gone wrong and none of the equipment has been damaged."

"Then"

"The reason for calling you here is that there is actually something more important than the equipment being damaged."

The old headmaster said, "This is Professor Yu, our school's expert in the field of mechanics and materials science, and an academician of the Academy of Sciences"

Ji Feng was immediately slightly startled, as soon as the old headmaster said so he immediately remembered, there were indeed quite a few experts of great weight in the school, among them there were also academicians of the Academy of Sciences, I heard that they were also doctoral supervisors and so on, this Professor Yu was one of them.

However, since Ji Feng did not study in this field, he did not pay much attention to it, but only listened to it as an anecdote, but never thought that the one standing in front of him now was Professor Yu.

Ji Feng immediately nodded to the professor and greeted him, "Hello Professor Yu."

Professor Yu was a bit impatient and took out a small easy-to-open transparent plastic bag from a black briefcase on the coffee table and asked, "You are Ji Feng? Did you make this thing?"

Ji Feng fixed his eyes on it, but he saw that in the corner of the transparent plastic bag in Professor Yu's hand, there was a small black thing that looked just like a small steel ball in size.

Ji Feng couldn't help but hesitate and said, "Professor Yu, I really can't tell if you're holding it like this, can you let me hold it and take a look?"

Professor Yu said, "Of course you can."

Saying that, he handed the bag to Ji Feng.

"This is" Ji Feng just took the plastic bag and immediately knew what it was after just two glances, he couldn't help but ask with some surprise, "Professor Yu, where did you get this?"

"In the laboratory." Professor Yu said.

"In the same laboratory where you did your experiments before." The old headmaster added next to him and asked, "Ji Feng, you made this thing, right?"

Ji Feng then hesitated slightly before nodding his head and saying, "Yes, Old Principal. This is indeed what I made, I have some interest in this piece of machinery and materials, and I recently had some inspiration and ideas, so I wanted to give it a try, and I didn't expect that it was really made."

When he saw that small ball Ji Feng knew that it was the new alloy he had made, it wasn't actually a small ball, it was just one of the small pieces that he had missed somehow when he was experimenting, the reason why it would look like a sphere now, that was actually also because the size was too small and the irregular shape wasn't too obvious.

But if you look closely you will still see that it is not a small ball.

It was just not known when this small thing had fallen. Ji Feng guessed that perhaps he had received a call from Li Ruonan just after he had finished his experiment, so he had packed up in a hurry, and perhaps it had fallen at that time.

However, to Old Principal and Professor Yu, whether this little thing was a sphere or not, or how exactly it had been left behind due to sloppiness when Ji Feng was cleaning up, none of this mattered, what mattered most was that this new alloy was actually made by Ji Feng!

That, was the point!

A look of excitement clearly appeared on Professor Yu's face as he said, "This Mr. Ji, this is really made by you?"

Ji Feng sweated for a moment and was busy saying, "Professor Yu you must not call me that, you should just call me Ji Feng. This thing is indeed made by me, originally there was about a piece as big as a small thumb, the rest was used up during the test, and part of it was melted down when I used it for other experiments, this small piece might have fallen down unintentionally."

He had also heard that this Professor Yu was not like those so-called 'experts' who often jumped up and down, this should be a person who really did research, for such experts, one would have a kind of admiration from the heart, and Ji Feng was no exception.

Professor Yu said, "Calling anything is fine Ji Feng, can I take the liberty to ask, what kind of alloy is this?"

Those messy things Professor Yu did not care about, what he really cared about was scientific research.

Ji Feng then said, "The main body of this alloy is actually still steel, but a lot of other elements have been added in between this, however, slightly more chromium has been added, so if you insist on a name, it should be okay to call it chromium alloy."

"Chromium alloy?"

Professor Yu frowned, "Ji Feng, that's not a good name."

Ji Feng was a bit suspicious: "Not good?"

Professor Yu said, "The name chrome alloy is already there, and this alloy is just too common, it's everywhere in everyday life, here, this is chrome alloy"

Ji Feng followed the gaze that Professor Yu pointed to, but found that Professor Yu was pointing to a metal teacup on the coffee table

"..... stainless steel?!" Ji Feng looked at the stainless steel cup in consternation, "Stainless steel is chrome alloy?"

"That's right."

Professor Yu nodded, "This is the most common chrome alloy."

Ji Feng immediately laughed bitterly, no wonder Professor Yu said that he had come up with a bad name, dare I say it, he was stealing the name of stainless steel, and he was stealing it so ignorantly.

"Then there are other elements in this, so why don't we just name it after one of them?" Ji Feng said.

"No, this new alloy I have examined, which are all very common ingredients, only the composition ratio and processing process are different, so that caused the different performance of the alloy, and these ingredients almost all have the name of the alloy" Professor Yu said. "I think we'll call it the new chrome alloy, so it's also a little easier to distinguish."

Ji Feng nodded and said, "No problem."

It didn't matter what the alloy was called, the point was, he could tell that the old headmaster and Professor Yu seemed to have something to say next.

"Ji Feng" As expected, Professor Yu spoke up.

"Dingling"

However, just then, a ringing sound suddenly rang, but it was Ji Feng's phone ringing, he said sorry, then took the phone out and scanned it, but found that it was an unfamiliar number, and the place of belonging was Yanjing.

Ji Feng thought about it, but walked to the side and picked up the phone in a whisper, "Hello, who is it?"

At this time, an unfamiliar voice came from the phone, "Is this Ji Feng? Do you have time, come out and sit down and have some fun together!"

When Ji Feng heard the other party's slightly stiff tone, he couldn't help but be stunned: "You're"

In his impression, he hadn't heard this voice before, it was unfamiliar, so he could be sure that this person who called him, he definitely didn't know.

A person he didn't know was talking to himself in such a raw manner, even with a vaguely commanding tone, which made Ji Feng a bit odd, thinking that this might not be something good.

Campus Master Chapter 2364

However, to Ji Feng's surprise, the person on the other end of the phone smiled and said, "Don't worry about who I am first, come out and meet me and you will naturally know."

"Heh!"

Ji Feng smiled and said, "Sorry, I'm very busy now, I don't have that much time to go around in circles with you, if you want to play games, you can go to someone else, if it seems too boring you can go to the mental hospital, there are many people there"

After saying that, Ji Feng casually hung up the phone.

He shook his head and smiled, turned around and walked back, saying, "Professor Yu, if you have anything to say, you can continue."

Professor Yu nodded and said, "Ji Feng, I want to ask you, do you understand the value of this new chrome alloy?"

Ji Feng then couldn't help but be slightly stunned for a moment and hesitantly said, "I should understand some of it"

Professor Yu shook his head and said, "No, you don't understand. Ji Feng, you don't know how valuable this new alloy really is, let alone how significant it is to our Chinese industry!"

Ji Feng laughed: "Professor Yu, I really haven't thought too carefully about what you're saying, so what, just say what you have to say."

"Good then, I won't hide anything." When Professor Yu smiled, he nodded and said, "Here's the thing, Ji Feng, now that some of the physical indicators of this new alloy have been tested, however, some other performance indicators have not been tested, so the first thing to do now is to have all the detailed performance indicators of this new alloy tested."

Ji Feng nodded and said, "Well, it's true that I haven't had the time to test it yet."

It had only been a short time since he had successfully researched this new alloy before Li Ruonan came looking for it, so where did he have so much time to test it one by one?

Besides, although he was learning about alloys in the training space of the intelligent brain, he might not have such a clear understanding of the current technical equipment and some other precautions about alloys.

So Professor Yu mentioned, Ji Feng really think need to carefully test once.

Moreover, although the alloy was successfully developed, whether its performance was the same as the previous projection, and whether there were any errors in the middle, all these needed to be carefully tested.

Professor Yu said, "After a comprehensive test, it would be best to report it immediately. Ji Feng, this new alloy you have developed, from my experience, its application areas are too wide, even in the military field, it will definitely have a great role to play, and will even become a milestone new material!"

Looking at Ji Feng, Professor Yu said, "Therefore, I implore you not to treat this new titanium alloy as just a tool to make money."

Ji Feng couldn't help but stand in awe at his words.

The first thing that Professor Yu thought of was the country.

If this was said in the mouth of some official, it might make Ji Feng feel fake, but when this was said by Professor Yu, Ji Feng believed that he was definitely not that hypocritical.

In fact, people like these old generation, they all have an inexplicable sentiment for the country in their hearts, even they can really do sacrifice their ego for the sake of the country, which makes people have to respect and Ji Feng feels admiration in his heart.

"Please rest assured, Professor Yu, I had also planned to give priority to cooperation with the country, the military field will definitely not cooperate with foreign countries, as for the civil field, that is also definitely to give this new alloy to the Tengfei Group for in-depth development." Ji Feng smiled as he explained.

Only then did Professor Yu nodded reassuringly and said, "That's good, I'm relieved that you think like that."

Ji Feng smiled, "Is Professor Yu still worried that I will sell this new alloy to foreign countries?"

Professor Yu said, "It's not that there's no such possibility, after all, few people nowadays would cross the line with the front, but now I'm relieved, I admit that the old man was measuring a gentleman's belly with a small man's heart."

"Professor Yu has spoken highly of you." Ji Feng waved his hand with a smile and said, "I can completely understand Professor Yu's worry and admire it."

"The reason why Old Yu is so cautious is actually because he understands the value of this new alloy better than anyone." At this point, the old headmaster smilingly said, "Ji Feng, I'm afraid you don't know that before you came, Old Yu had been fidgeting, fearing that you were profit-oriented and would sell it to whoever offered a high price, and it was useless for me to persuade him, and he had to hear your promise for himself before he felt at ease."

Professor Yu didn't deny it, but said, "You're not worried because you don't understand the value of this new alloy. If I exaggerate, the appearance of this new alloy may change the world's landscape in the near future!"

Ji Feng was stunned: "It's not that serious, is it?"

Professor Yu said, "It's not that there's no such possibility, the emergence of this new alloy represents a breakthrough in our material science sound, and what does a breakthrough in material mean?"

Ji Feng asked, "What?"

Professor Yu said, "It means that the foundation of our Chinese industry may make a qualitative leap!"

Seeing that Ji Feng was a bit confused, Professor Yu said, "Let me give you the simplest example, some of China's equipment, it is not that they are not technically up to scratch, but because they have not made a breakthrough in materials, they are unable to produce advanced products, and therefore, they are squeezed for survival in the international market by foreign products."

"But what if we are also able to produce products of the same quality as foreign countries?" Professor Yu asked.

"And machine tools!"

Without waiting for Ji Feng to answer, Professor Yu added, "High-precision machine tools, why are foreign countries so tightly blocked against China? Because this is the foundation of the foundation in industry, with high strength materials, the standard of China's machine tools may all improve greatly, then think about it, in a few years at most, how much will the industrial level of the whole of China improve?"

"So, you must not think that this is just a relatively advanced alloy." With an excited look on his face, Professor Yu said with emotion, "It will probably raise the whole of China's industry by a huge margin, ah."

"I understand." Ji Feng slowly nodded his head. In fact, he understood all these truths, he just wasn't as proficient as Professor Yu who specialized in this field.

"That's why it's imperative to test this new chrome alloy as soon as possible and get the data and performance of all aspects clear." Professor Yu said.

"But"

Ji Feng said with a bitter smile, "Professor Yu, to be honest, I'm actually not very good at this aspect of testing, uh how to say it, although I like machinery and I also like to research something on my own, but actually I have not gone through systematic study after all, to be able to develop this new alloy is just It's just luck."

Professor Yu immediately said, "It doesn't matter, this is just the most basic common sense in materials science, I can send a few students to help test it, or if you submit the alloy, the country will be very happy to send specialised professionals to test it."

"Let's not turn it in for now."

"Testing in a national laboratory is definitely more accurate... What, are you worried that someone will turtled up and steal your results?" The old headmaster asked.

“You don’t have to worry about that.” Before Ji Feng could speak, Professor Yu immediately said, “The field of materials is not quite the same as any other academic field, because there is also a processing process involved, as long as you master the processing process, no one will try to steal your results.”

After a pause, Professor Yu said, “Let me give you the simplest example, Coke, it’s a drink that everyone knows, right?”

Ji Feng nodded his head.

Professor Yu added: “How hot Coke is sold all over the world, I think you young man must know more about it, how huge the profit is naturally can be imagined, this will certainly also cause the eyes of other beverage enterprises, so these years down I do not know how many enterprises and professional research institutions have conducted research on Coke, but what is the result do you know? ”

Ji Feng asked, “What is the result?”

“The result is that everyone knows exactly what ingredients are contained in Coke, and even knows the proportion of each ingredient in it, such as how many percent of water, how many percent of sugar, etc., but no one can successfully replicate it, at most, they can only get it similar, do you know why?”

Ji Feng blurted out, “The process.”

Professor Yu nodded, “That’s right, it’s the process. Of course, the process here also includes the recipe. From this you can imagine that as long as you master the process, no matter who you give the alloy to for testing, you don’t have to worry about it.”

“I understand.”

Ji Feng said, “Professor Yu, I would like to ask you a favour, do you think it’s okay?”

Professor Yu asked, “What kind of favour?”

“It’s like this, I would like to” Ji Feng had a smile on his face and just as he spoke, he ended up being interrupted by the phone ringing once again.

“.....”

Especially when he took out the phone and saw that it was still the same number from earlier, he couldn’t help but frown slightly, with a few moments of displeasure in his heart.

In a whirl, he didn’t even pick up the phone and simply hung up.

“Professor Yu, it’s like this, I want to ask you to come and help test the alloy, do you think it’s okay?” Ji Feng asked, “Of course, I don’t mean for you to do the testing yourself ah, I just want you to take the lead and then let your students do the rest, you see”

Professor Yu asked, “Why do you want me to do the testing”

“Ding ring”

Once again, Ji Feng’s phone rang, again interrupting Ji Feng’s conversation with Professor Yu once again.

Swish!

Ji Feng's face was steeply gloomy, this person is still endless?

He had already said that he was busy, but he was still calling to harass him constantly, what did he want?

Ji Feng said sorry to Professor Yu, then with a sullen face, he picked up the phone, "Who the hell are you, is it interesting to call like this?"

Campus Master Chapter 2365

Ji Feng said sorry to the professor, then with a sullen face, he picked up the phone, "Who the hell are you, is it interesting to call like this?"

"Ji Feng, too much anger, right?" However, the voice on the phone was a bit gloomy and said, "Since I grew up, no one has ever dared to take the initiative to hang up on me, and you are still the first"

"Pop!"

Without saying a word, Ji Feng directly hung up the phone.

No one dared to take the initiative to hang up on him?

That's a joke!

Ji Feng couldn't help but snort coldly in his heart, extremely disdainful, I really don't know which family's children are spoiled again and have come outside to play the bully

"Professor Yu, you continue to say." Ji Feng shook his head, no longer bothered, turned his gaze to Professor Yu and said politely.

"Actually I don't have anything to say, just some questions, why did you think of asking me to help you with the testing?" Professor Yu asked, "Ji Feng, is it that you still don't quite understand the significance and value of the appearance of this new alloy?"

"I already understand it, you introduced it very clearly just now." Ji Feng smiled and nodded, saying, "Professor Yu, in fact, the reason why I asked you to help with the testing is that I have my own considerations."

"Oh?"

Professor Yu asked, "Then tell me."

Ji Feng said, "As I said before, the reason why I was able to develop this new alloy was, to put it mildly, a sudden inspiration, or rather, it was just an accident. ."

Speaking here, Ji Feng paused and said, "So, how to test, use experimental equipment and so on, I am not very good at these tasks, while Professor Yu is an authority in this area, so if you take your disciple to do it, it will definitely be no problem."

Professor Yu then dawned on him and nodded, "So that's how it is."

"Yes."

Ji Feng nodded, "That's why I want to bother Professor Yu, and there's another reason besides that, Professor Yu understands the use of this new alloy the best, and also knows its value, so how to deal with this thing, or what field of application it can be extended to, these are things I also hope you can take more trouble with, Professor Yu."

Professor Yu was then a bit stunned, he did not expect that Ji Feng would even ask him for help on how to dispose of this alloy.

"That's not very good, is it?" Professor Yu asked.

"How is it not good, it's definitely not a problem." Ji Feng smiled and said, "Professor Yu, you don't need to worry about anything else, after the results of the analysis of this new alloy's research, there will definitely be your name on the report, because strictly speaking, this thing should be considered as something that we both completed together"

Professor Yu could not help but frown slightly and waved his hand, "Ji Feng, do you think I am looking at this point of fame and fortune?"

When Ji Feng saw this, he knew he had misunderstood and said, "Professor Yu, don't be angry, in fact, this has nothing to do with fame and fortune, as you said, the processing process of the alloy is in my hands, so I am still afraid that you will steal my research results?"

"Then what do you mean?" Professor Yu asked in a deep voice, just now Ji Feng's words almost made him really angry and he almost blew his beard off.

"Professor Yu, anyone who puts in labor should be paid, and you should also be paid, and the pay should be much higher than ordinary people." Ji Feng laughed, "Let you take the students for testing, you have put in your labour, it is only right that you should get something in return, don't you think so?"

Only when Professor Yu heard these words did his face ease up.

The next step is to develop, strengthen and improve the alloy, which is too difficult for me to do alone. What do you think?"

The alloy is developed, but then there are various processes to test, improve and so on, because for different industries, the performance of the alloy has to change, which requires the alloy to be changed.

This process is also not simple, and Professor Yu thinks this job suits him very well.

"Old Yu, I think this is a good proposal from Ji Feng, you might want to give it some thought?" The old headmaster was also blowing off steam next to him.

"There's no need to consider it."

Professor Yu waved his hand and said, "I agree to this offer."

Ji Feng then couldn't help but smile, "Thanks a lot Professor Yu, please teach Professor Yu more in the future, and I wish us good cooperation!"

Professor Yu said, "However, let me say one thing up front, this new chrome alloy was developed by you, so in whatever report that follows, your name must be put in front!"

Ji Feng smiled and nodded, "No problem no problem, next it will be hard for Professor Yu."

What he wanted was for Professor Yu's name to appear on the report, and it didn't matter who's name came first or who's came second as far as said name was concerned.

In fact, the reason why Ji Feng would strongly invite Professor Yu to participate in this alloy project, apart from those explanations he gave, there was actually another very important reason.

..... He couldn't be too famous or make too much of a splash.

It's really because he's already attracting enough attention himself now, with Kang Yuan slimming powder, 3D TV sets, special effect currents any of these products, all of which contain high-tech elements, and they're still coming from his hands.

If he comes up with a new alloy now, there is no guarantee that people will not be suspicious of him.

And now with Professor Yu involved, with Professor Yu's prestige in the academic world, when the time comes, even if Professor Yu's name is placed at the end, then everyone will think that this is Professor Yu being humble and promoting newcomers and bringing up his juniors.

At that time, many people's eyes will be focused on Professor Yu, and he, Ji Feng, will be able to relax a lot.

Of course, what Ji Feng said to Professor Yu was not a lie. Although he knew how to process the new alloy, he was still very rusty when it came to the next testing, strengthening and so on.

Ji Feng believed that with Professor Yu's participation, it would definitely be beneficial to him.

Of course, participating in this matter should likewise be a good thing for Professor Yu, Ji Feng knows better than anyone the value and significance of this new chrome alloy, and Professor Yu's participation in it will definitely reap both fame and fortune, and that's not all the benefits

Professor Yu is certainly clear about this, in fact, any expert, even if they have already achieved fame and fortune, for some epoch-making big projects, also want to participate in it, after all, as long as not a saint, will have seven feelings and six desires, some like money, some like women, some like fame

So, Ji Feng and Professor Yu could be said to have hit it off immediately, and the two of them finalized some details of the cooperation in the old headmaster's office.

The two of them decided that the next process of testing and so on would be carried out by Professor Yu, while the Tengfei Group would also send some experts to participate in it, but of course Professor Yu would be the leader in this process.

The processing process of the alloy was in Ji Feng's hands, so he was not afraid that the results would be most regrettably taken up by others, so he was able to hand over all the work with confidence and boldness.

After all the details and data were studied, I believe that the Tengfei Group side must have made a reasonable plan on how to apply this new alloy and Ji Feng would not have to worry too much about it.

Professor Yu was a man of thunder and lightning, and after deciding on the cooperation plan, Professor Yu left, he had to organise students to test and analyse the alloy as soon as possible.

Of course, that little alloy alone was definitely not enough, so Professor Yu asked Ji Feng to make some more alloys out of it, and Ji Feng naturally agreed readily.

But just when Ji Feng was about to go to the laboratory, his phone actually rang again.

Ji Feng took out the phone and saw that it was the same number as before.

His brow furrowed and a wave of anger rose in his heart, what, did this see himself as a good bully or was he deliberately molesting himself?

Ji Feng casually picked up the phone and said in a deep voice, "This is Ji Feng."

"Ji Feng, you hung up on me once again!" The other party's voice had a vague sense of anger in it, "Don't you think it's rude to do that?"

"..... is it?" Ji Feng smiled.

"What do you think?" The other party said in a deep voice, "As the youngest of the Ji family, you shouldn't be so impolite, right?"

"It seems that I really seem to be a bit rude, I'm really sorry." Ji Feng smiled faintly.

"Just if you know."

"But."

Ji Feng didn't wait for him to finish before interrupting him and said, "Rude also depends on what kind of person it is to, for you to hang up your phone, I on the contrary feel that this is too polite to you!"

"....." The other man was stifled, and the ragged gasp was a good indication of how badly he was blocked.

"Just say what you have to say, I don't have that much time to beat around the bush with you." Ji Feng said in a deep voice.

"....."

The other party had the urge to curse again, it was you who was going around in circles all the time alright, "Ji Feng, I still mean the same thing, I want to ask you to come out and sit down and have a drink."

Maybe because it was suffocated by Ji Feng hanging up several times in a row, so that it finally learned to be smart and did not dare to be too tough with Ji Feng again, so even the tone of voice when speaking was much lighter.

After thinking about it, Ji Feng said indifferently, "Sure."

"Then come to Jiangzhou Prosperity Avenue"

“Jiangzhou Economic Development Zone, University City, Science Avenue Jiangnan Fishing Village, call me when you arrive.” Ji Feng didn’t even listen to what the other party was saying and said straight away.

“.....”

The other party was once again choked up for a while before saying, “Good!”

Pop!

Ji Feng hung up the phone straight away.

“..... Hoo!” At this moment, a young man, who was not badly dressed, couldn’t help but grunt angrily, “He actually hung up on me again!”

Campus Master Chapter 2366

Ji Feng met the person who called him at Jiangnan Fishing Village, a young man probably in his twenties, dressed in what appeared to be a decent manner, the clothes on his body had no logo whatsoever, but one could tell at a glance that they were not ordinary fabrics and certainly not ground-floor goods.

Only, what surprised Ji Feng was that apart from seeing that young man, there was another person next to him.

“Hey”

The man looked more or less embarrassed when he saw Ji Feng, especially when he saw the burning eyes of Ji Feng, “Ji Feng, you’re here. So what, let’s go in and sit down, I’ve booked all the private rooms”

Ji Feng, however, could not help but frown and asked, “Li Weidong, what’s wrong with you?”

It turned out that the person who looked a bit awkward when he saw Ji Feng was no other than the one who had dealt with Ji Feng more than once, Li Weidong, Li Ruonan’s second brother, the second son of Mayor Li, Li Weidong!

Ji Feng really did not expect that the person who called him to meet with him was actually Li Weidong, which was a bit out of his expectation.

He was talking to Professor Yu about something important in the old headmaster’s office, but the phone kept ringing one after another, constantly disturbing him, and even the person on the phone was very rude when he spoke, which made Ji Feng a bit annoyed.

So later on, he didn’t even ask who the other party was and agreed to meet directly. He just wanted to see who was so arrogant!

There was no doubt that Ji Feng intended to meet this person, and if necessary, he definitely did not mind giving the other party a deep lesson!

However, it turned out that the person he met was Li Weidong.

Li Weidong was just stunned: “What?”

Ji Feng sank his face and said indifferently, "If you want to see me, just call and say so, why do you have to play this game, is it interesting?"

Li Weidong then knew what was going on, he said, "Ji Feng, don't misunderstand, this time the matter"

"OK."

Li Weidong didn't even finish his words before he was interrupted by Ji Feng, he waved his hand and said, "Li Weidong, we are also considered old acquaintances, you know my character well, just say what you have to say, I don't have that much time to waste here."

Li Weidong "....."

Ji Feng was so blunt that it made his face more or less unbearable and even a little embarrassing.

"Ji Feng, it's not very convenient to say some things here, I think it's not too late for us to have a seat in the box first, what do you think?" Li Weidong asked after two awkward laughs.

"I say no." Ji Feng said.

"....."

Li Weidong then couldn't help but change his face, this Ji Feng was too disrespectful: "Ji Feng, no need to be so godly, right?"

Ji Feng said, "I wouldn't dare to take your words for granted, Second Younger Li, I'd like to know what role you're playing in this matter!"

Whether or not to give you Li Weidong face, it depends on what exactly you are looking for from me.

At least for now, Ji Feng did not have the slightest good feeling towards them, especially because the other party's behavior of calling again and again had caused Ji Feng's disgust.

So Ji Feng needed to know who was actually looking for him today, whether it was Li Weidong, or this young man beside Li Weidong.

However, before Li Weidong could speak, the young man couldn't help but frown and said, "So you're Ji Feng, huh! It's really better to meet than to be known! You're also called Feng, so I guess you're also known as Young Feng, right? But this Maple Young Man of yours is really a bit of a misnomer!"

Li Weidong couldn't help but blush and hurriedly pulled the corner of that person's coat, secretly saying in his heart, "Talking to Ji Feng like this, do you still want to do things?"

Li Weidong knew better than anyone else what kind of person Ji Feng was.

He didn't even put Ji Feng in his eyes at the beginning, but what was the result?

This is a lesson learned from personal experience!

"Ji Feng, don't be angry, Yang Feng didn't mean anything by that, it was just a joke" Li Weidong hurriedly explained with a smile, for Ji Feng's temper and methods, Li Weidong had seen it more than

once or twice, if he really provoked Ji Feng, he would be right here on the spot. If he really provoked Ji Feng, he would beat them up on the spot, and they would really have to suffer.

However, Ji Feng was slightly surprised at his words, “Yang Feng?”

The uncommonly dressed young man smiled faintly, “It’s me. It seems that you have heard of me ……”

He could not help but shake his head, but ignored Yang Feng, but turned his head to Li Weidong: “Li Weidong, can you give me a reasonable explanation for this matter?”

How Li Weidong came to be with Yang Feng was a surprise to Ji Feng.

Who exactly was this Yang Feng, Ji Feng immediately understood everything just by hearing his name.

If he hadn’t guessed wrong, this Yang Feng should be the one that Yang Bin said he hated to the bone, and the future successor of the Yang family who hated to have Yang Bin die right away.

What’s more, this Yang Feng, and his aunt had an affair with each other!

However, no matter how bad Yang Feng’s behaviour was, Ji Feng did not want to care much about it, what he was concerned about now was how Yang Feng had gotten together with Li Weidong, and moreover, these two had actually approached him.

Li Weidong then some embarrassment, said: “Ji Feng, you do not misunderstand, I and Yang Feng is a friend, because Yang Feng is not too familiar with Jiangzhou, so I, a friend of course, must help ……”

“Then how did the help come to me?” Ji Feng asked.

“He said he was looking for you, so of course I had to help with the introduction.” Li Weidong said, “Ji Feng, you wouldn’t be so stingy, there’s no harm in meeting one more friend!”

“Mm.”

Ji Feng nodded and said, “There is no harm in getting to know a few more friends, but that also depends on what kind of friends they are.”

Li Weidong was just stunned.

Yang Feng, on the other hand, became furious and said in a deep voice, “Ji Feng, what do you mean by that!”

Ji Feng smiled, but he didn’t even look at Yang Feng, he just stared at Li Weidong and asked, “Li Weidong, I’m just asking you, do you really not know?”

Li Weidong was a bit suspicious: “What do I know?”

“It’s best if you don’t know.” Ji Feng stared at him, nodded slowly and said, “A few days ago, there was a case in Jiangzhou, someone was chased and killed, and two innocent security guards were almost killed by random gunfire, this case, your sister was in charge of it.”

“Ah?!”

Li Weidong couldn't help but be taken aback, "Who is the murderer? How can Ruo Nan be in charge of such a case, if she encounters those murderers, won't it be dangerous?"

Ji Feng stared at him and said, "But those murderers were moved away the next day and then released."

"Why?" Li Weidong was surprised.

"Because they were very well-connected." Ji Feng said, "And for that reason your sister even had a fight with her leader, but it didn't help."

"What do you mean?"

Li Weidong said hesitantly, "Do those murderers really have such a deep background that the Jiangzhou Municipal Bureau is so scornful?"

Ji Feng said, "If the murderers can even call you a brother and a son of a worldly family, then do you think that the Municipal Bureau will be scrupulous?"

"No way?"

Li Weidong couldn't help but be stunned at once: "Ji Feng, is this true?"

Ji Feng smiled and said, "You can ask the one beside you, I think he should be able to answer that question."

Yang Feng's face sank abruptly, "Ji Feng, you say I'm the murderer, do you have any proof?"

Li Weidong's face then changed, he looked at Yang Feng in consternation and then at Ji Feng, "This is Ji Feng, what do you mean by what you just said?"

Ji Feng said, "Why don't you ask that brother beside you why he came to me?"

Li Weidong was stunned, and then he looked at Yang Feng. The heart was steeped in Yeah, why did Yang Feng come to Ji Feng?

You know, Yang Feng is completely unfamiliar with Jiangzhou, otherwise there would be no need for him to help lead the way.

But in this case, Yang Feng took the initiative to go to Ji Feng, saying that there was something

The first thing you need to do is to find out what you want to do.

Yang Feng's eyes narrowed, and his face gradually turned gloomy: "Ji Feng, is this your way of treating guests? You can't be so rude, can you?"

The look in Ji Feng's eyes was awe-inspiring as he said, "The thing about etiquette is that it depends on who you're talking to, there's wine when friends come, but"

The next words he did not say, but Li Weidong and Yang Feng are not fools, they naturally know what Ji Feng means – friends come with wine, then the wolves come, waiting for the shotgun!

Ji Feng was not treating them as friends at all, so he was waiting for them with a hunting rifle!

Li Weidong felt that his face was hot and hot, and there was some indignation in his heart, this Ji Feng guy was too arrogant, he was not as old as himself, and he was friends with Ruo Nan, how could he call himself second brother?

Even if Ji Feng's second uncle is in a high position and has a better family history than himself, it's not too much to ask that both sides get along as equals, right?

But now, I have personally brought my friend here, and also said good things, but Ji Feng is still so disrespectful you do not give face to Yang Feng is just, how can you not give face to me?

The first thing you need to do is to get a good idea of what you're doing.

In that case, what did Yang Feng come looking for Ji Feng for?

"Ji Feng, in that case, this beam you are planning to tie up?" Ji Feng's squeezing one after another made Yang Feng a little annoyed, and he asked in a deep voice.

"Make a beam?"

Ji Feng glanced at him and asked, "Do you think, do you deserve it?"

Campus Master Chapter 2367

"Ji Feng, in that case, this beam you are planning to make?" Ji Feng's successive squeezes made Yang Feng a little annoyed, and he asked in a deep voice.

"Make a beam?"

Ji Feng glanced at him and asked, "Do you think, do you deserve it?"

A person who had an ambiguous relationship with his aunt, who didn't even care about human decency, actually dared to say that he was worthy of tying up with him, such a person was also worthy?

However, Yang Feng was unaware that Ji Feng already knew all about those nasty things about him, and when he heard Ji Feng say that, Yang Feng naturally took it as Ji Feng's contempt for him, not putting him in his eyes at all, which made Yang Feng couldn't help but be furious at once!

"Ji Feng, it's better not to be so arrogant! There's nothing to be gained by being too arrogant!" Yang Feng's face clouded over as he said in a cold voice.

"You're sick, aren't you?" Ji Feng said.

"....."

Yang Feng's face became steeply and terribly gloomy, his eyes flickered with anger as he glared at Ji Feng and said in a cold voice, "What did you say? Ji Feng, repeat what you just said!"

Ji Feng snorted and said, "Looking for a scolding, are you? Then listen carefully, I say, are you sick?"

Swish!

Yang Feng's face was so gloomy and dark that it was almost dripping out.

However, Ji Feng snorted, "I originally had my own things to do, but you suddenly called one after another, and dragged like two fifty eight thousand, asking who you were and not saying, coming up and asking me to come out to play who are you, you want me to come out and I come out? What do you think you are?"

"....."

"I can come out is already very much give you face, you come up without first saying what you are looking for me, on the contrary, tell me not to be too arrogant, do you think you have the face to say this?" Ji Feng said in a cold voice, "I really don't see what's so arrogant about me, but you, I really don't know where your bottom line comes from, calling me out just to see you flailing around here?"

Yang Feng: "....."

Li Weidong also couldn't help but open his mouth, but couldn't say a word, even though he acted as the introducer, but he didn't know what to say, he was really blocked a bit by Ji Feng.

What's more, Li Weidong really didn't know what Yang Feng had come all the way here to find Ji Feng for.

The fact that Yang Feng had called him before was indeed a suspicion of harassment, but Ji Feng still came out, which in itself was already enough to give face.

Li Weidong felt that if he had dared to harass Ji Feng, I'm afraid the latter wouldn't have given him face.

As a result, after coming out, Yang Feng did not lower his stature at all and went toe-to-toe with Ji Feng, which ended up angering Ji Feng.

Of course, Ji Feng did not give much face after arriving, which made Li Weidong cursed in his heart, how did he think of introducing them both, this is simply a fucking matter of effort, two guys are so tough, but also so tit-for-tat.

Both of them have the word "Feng" in their names!

Are all the guys named Feng such dicks?

Li Weidong cursed in his heart, but with a bitter smile on his face, he said, "You two, you can't talk about anything just by being so tit-for-tat, let's sit down first, we have to talk about everything."

Li Weidong really didn't want to take this, but he couldn't because Yang Feng had just been scolded by Ji Feng and couldn't say a word, his face was really embarrassed and he was about to get angry.

If Li Weidong didn't say anything at this time, I'm afraid that these two people would really break out into a fierce conflict, and then he, Li Weidong, would really be caught in the middle, and he would really be the one to suffer at both ends, so Li Weidong had to speak out to round up the situation.

In any case, now he Li Weidong is present, this conflict better not get up, otherwise he will be involved in this matter, it is not worth it.

Besides, no matter what, the relationship between him and Yang Feng is a bit better than his relationship with Ji Feng In fact, he and Ji Feng can't even talk about a good relationship, and if we're talking strictly, they can at most only say if they're enemies.

So Li Weidong would still be more or less partial to Yang Feng.

Now that Yang Feng was choked by Ji Feng and could barely speak, Li Weidong of course had to help him out.

As expected, after hearing Li Weidong's words, Yang Feng couldn't help but coldly snort, fiercely glaring at Ji Feng and turning around to walk towards the box inside.

"Ji Feng, let's go, now go in and have a seat, no matter what's going on you can't just stand here and talk about it, it's not a good influence with all these people coming and going!" Li Weidong said, "Go go go, let's go in and talk."

"Humph!"

When Yang Feng saw how Ji Feng was posing, he couldn't help but give another cold snort, fiercely flung his hand and walked towards the box.

Seeing this, Ji Feng couldn't help but flash a cold light in his eyes, this Yang Feng was a bit too arrogant!

"Young Ji!"

And at this time, the manager of that Jiangnan Fishing Village saw Ji Feng and was startled, he hurriedly greeted him, "Young Ji, are you here for dinner, or are you looking for Brother Biao?"

Ji Feng said, "Nothing, just someone calling to see me, go about your business, don't mind me."

He knew that this manager was following Silly Biao, and it was all under Silly Biao's control in this generation, so he waved his hand casually.

However, when Ji Feng made such an arrangement, that manager did not dare to be careless and said, "Young Ji, how about this, I will arrange a few hard dishes for you, which box you are in, and today's order will be counted on the stage"

"No need!"

Ji Feng waved his hand and said, "Come as you are, there's no need to be special."

The manager said, "How can I do that? I can't do that. If you, Mr. Ji, come to eat here and still charge money, then I won't have any place to put my face, Mr. Ji, you are busy first, I won't bother you."

The company's main business is to provide a wide range of products and services to the market.

The first thing you need to do is to sit down and talk about it, and it's not good to have people coming and going at the door.

In fact, in the gentry circle, no matter how big the hatred is, if you want to talk about it, you basically sit down and talk about it, not just find any place and go toe to toe, first of all because the impact is not

good, and then, if you talk about it, such as who gave in, such as who paid what price, proposed what conditions, etc., these are also as far as possible not to spread to the outside.

Ji Feng also wanted to hear what exactly this Yang Feng was looking for, so he also walked into the box.

Several people sat down, Li Weidong naturally sat in the middle, Bai Zhu sat right next to Ji Feng, alert and coldly staring at Yang Feng, as long as Ji Feng gave the order, she would definitely capture Yang Feng in the shortest possible time, even if this Yang Feng was also a practitioner!

In fact, from the posture of Yang Feng's walk, Ji Feng just a quick glance to see, this Yang Feng is definitely a practitioner, and looks like kung fu should be quite good, at least not as false as he appears to show.

Bai Zhu also saw it, which made her even more alert, and she was even rehearsing in her head that if she really did fight later, she wouldn't just use her fists, she would definitely use her weapons then!

"If you have something to say, say it."

Ji Feng raised his hand and looked at the time, seeing that it was almost time to leave work, he had to go back and discuss the development of the alloy with Xiao Yuxuan, "I don't have that much time to spend with you guys here!"

Yang Feng's face then turned a few shades colder as he asked in a cold voice, "Ji Feng, I heard that you saved a person?"

Ji Feng didn't even look at him, he just said, "What, is it wrong to save someone?"

"Of course it's right to save someone, but the key depends on what kind of person you saved!" Yang Feng said, "The person you saved is an enemy of my Yang family, as well as a fugitive who committed a great crime! He has committed a great crime against my Yang family, Ji Feng, I hope you can hand him over, and my Yang family will definitely have a big thank you afterwards."

"Oh?"

Ji Feng smiled indifferently and asked, "I'd like to know, what crime has he committed?"

Yang Feng said, "Murder! He killed two of the Yang family's guards and absconded in fear of the crime!"

Ji Feng then raised an eyebrow as he remembered that Yang Bin had told him that he had once injured the two people responsible for watching them before escaping with Yang's mother and son.

If the dead people Yang Feng was talking about were these two people, that would mean that it was very likely that Yang Feng had killed them, or, Yang Feng had ordered someone to kill them because at that time, Yang Bin had said very definitely that he had only injured those two people, but had definitely not killed them!

However, this planted tactic is indeed very effective, if we really want to go through the official process, I'm afraid that Yang Bin will really have to be gotten back to Jibei Province, while Ji Feng has no good reason to stop it yet, after all, this is a police case, he, as an outsider, naturally cannot interfere in it at will.

“So that’s how it is, that’s really unfortunate!” Ji Feng said, “However, the one I saved was not a criminal, but a victim who was being chased by a gang of murderers, which is not the same thing at all as the criminal you are talking about.”

“This is what he told you?” Yang Feng asked.

“It doesn’t matter who said it, what matters is that it’s the truth.” Ji Feng said.

If he said other things, Yang Bin could possibly lie to him, but the fact that Yang Bin was being chased and killed that night, and even those murderers brutally shot those two innocent security guards, was something that Ji Feng had personally experienced, which no one could lie to him about.

Yang Feng’s face then turned a little gloomy and said, “Ji Feng, I think you should have misunderstood or been deceived. Yang Bin is a criminal, and a felon who has killed two people and carries two lives on his back!”

“I don’t think so.” Ji Feng said.

“It looks like we don’t see things the same way.” Yang Feng said, “However, whether Yang Bin is a felon or not, it’s not up to me, and at the same time, it’s not up to you. It’s up to the police to say, and the law to say, don’t you think?”

“So what?” Ji Feng said noncommittally.

Campus Master Chapter 2368

“This also means that since Yang Bin has broken the law, he has to go through the legal process.” Yang Feng said in a deep voice, “It’s better for all of us if you hand over Yang Bin

“I can’t understand what you’re saying.” Ji Feng shook his head and said, “Yang Bin is a big living person, he has his own hands and feet, where he wants to go no one else can control, I likewise can’t control, so there is no question of me handing it over or not.”

“Ji Feng!”

Yang Feng gritted his teeth, stared at Ji Feng, and said, “I won’t say anything dark in front of a clear person, what is going on in this matter, I think you know what is going on in your heart. Yang Bin is an enemy of my Yang family and likewise a fugitive felon, what good will it do you to harbor such a person?”

Ji Feng said, “You can eat rice indiscriminately, but you can’t say things indiscriminately, do you have any evidence when you say I’m harboring Yang Bin?”

“Evidence I don’t have.” Yang Feng said, “However, I do know that it is you who is harboring Yang Bin.”

If he hadn’t inquired clearly, Yang Feng naturally wouldn’t have come directly to Ji Feng after arriving in Jiangzhou, in fact, he already knew after arriving in Jiangzhou that all those police officers in Jibei Province were held by the military, and he also inquired that this matter was because of Ji Feng’s meddling.

Moreover, his friend in the Jiangzhou Municipal Bureau told him that this matter was not only interfered by Ji Feng, but also the one who was in charge of this case before was the daughter of the mayor of Jiangzhou, Li Ruonan.

This is also the reason why Yang Feng approached Li Weidong, he knew Li Weidong before, but the relationship was not good enough to a certain extent, only, this time he just had to play nice with Li Weidong, then as Li Weidong's sister, naturally he would not be too difficult for him.

So now the key to things is Ji Feng.

Yang Feng didn't expect Ji Feng to be so hard to speak to, looking at him that way was really wild, it was really the first time Yang Feng had seen such an arrogant person, if not for the fact that his purpose hadn't been achieved, he really wanted to clean up Ji Feng ruthlessly and give a deep lesson!

But now, Yang Feng was clear that he couldn't do that, otherwise, the next thing would be troublesome. Although he was not afraid of Ji Feng, but after all, this was in Jiangzhou, he was just a dragon, but Ji Feng was a snake on the ground, the so-called strong dragon does not suppress the snake on the ground, but Yang Feng still understood the truth.

This is why Yang Feng was willing to sit down and talk to Ji Feng even though he was so angry, and his tone was not as strong as before.

Only, let Ji Feng hand over Yang Bin this was a must, Yang Bin knew too much and was too strong, he absolutely could not be let go, otherwise, he would definitely be a huge threat in the future.

"Ji Feng, as long as you hand over Yang Bin, consider that I, Yang Feng, owe you a favor, and my Yang family will definitely have heavy thanks." Yang Feng said, "I will definitely return this favor to you in the future whenever I have the chance!"

"Your favor I don't need it!" Ji Feng said indifferently.

"Ji Feng, when one is in society, one can't always have a smooth ride for the rest of one's life, one might run into some trouble and need someone else's help, don't you think so?" At this time, Li Weidong rounded up next to him with a smile and said, "The so-called more friends, more roads, isn't this good?"

Ji Feng glanced at him and said, "It's true that many friends make many roads, but it also depends on what kind of friends, if they are foxes and friends, then more might be a dead end! Weidong, I think it's better for you to screen with your heart when you make friends in the future."

Li Weidong: "....."

In his heart, he cursed, "What the fuck do I need you to teach me?"

Who are you calling fox friends? If all my friends are fox friends, then what am I?

Li Weidong was depressed, he originally wanted to take the opportunity to advise Ji Feng, but did not expect to be educated by Ji Feng in turn, really depressed enough.

"Ji Feng!"

Yang Feng's face sank completely, Ji Feng's three and two unforgiving refusals made him incomparably annoyed, he gritted his teeth and said, "You should know that Yang Bin cannot hide for the rest of his life, as long as he is still in this world, he will always be a fugitive, unless he goes back to face the law, otherwise, it is useless for anyone to protect him!"

Ji Feng was non-committal and didn't even make any comments.

"Moreover, even if he is able to hide now, but in the following days, the longer he hides, then the more suspicion he will have, and if necessary, he can even be shot dead on the spot when hunting him down later!"

Yang Feng said, "Or, whoever finds his trail, they can also report or arrest him. Don't forget that in this world, there is something called a wanted notice!"

Ji Feng glanced at him and said, "Are you threatening me?"

Yang Feng shook his head and said, "It's not a threat, I'm just stating a fact. You should know that Yang Bin can't hide for the rest of his life, he always has to come out. As long as he comes out, he will be arrested."

Ji Feng asked, "So what if I don't want to see him get caught?"

Yang Feng shook his head and said, "You can't protect him."

Ji Feng smiled and said, "But I do want to give it a try, how can you know what the outcome is if you don't try some things!"

Yang Feng's eyes then narrowed and said, "Ji Feng, we both have the word maple in our names, so we are kind of related, and I want to make you a friend, so I hope you will think about my proposal."

Ji Feng smiled noncommittally and asked, "What if I don't say yes?"

Yang Feng said, "Then I can only say sorry. I must catch this person Yang Bin, my position is the same as the police, no one can live in this world with impunity after killing my Yang family, that's not possible!"

"Besides"

After a pause, Yang Feng added: "I've heard some things about you for a long time, I believe you are a smart person, harboring Yang Bin will really do you no good at all, only a hundred harms, I believe you must know this better than I do, so why not make a win-win choice?"

"Win-win?"

Ji Feng shook his head and smiled, saying, "Win-win"

He stood up and looked at Yang Feng's gaze that followed him and said, "Yang Feng, you're right, we both have the word maple in our names, yet I don't think it's a good thing, if I could choose, I really wouldn't even want to have the same name as someone especially you! "

Yang Feng's face then changed and a flash of anger surfaced in his eyes.

But Ji Feng didn't care, if he had to be related to a guy who had an affair with his aunt, he would rather just change his name, otherwise he was really afraid that he would be mushy to death.

"In that case, you have to protect Yang Bin?" From Ji Feng's words, Yang Feng realised what was going on and couldn't help but ask coldly.

"That's right, I'll bail out Yang Bin." Ji Feng said.

"I'm afraid you can't bail out!" Yang Feng said in a cold voice.

"Then we'll see what happens!" Ji Feng said, "Let's see if he ends up in your hands or if I'll be able to keep him!"

"..... Good!"

Yang Feng stared at Ji Feng, gritted his teeth and said coldly, "Then we'll see who will have the last laugh. Ji Feng, I advise you better not be too complacent, it's true that the person is in your hands now, but don't forget what I said."

Ji Feng's eyes narrowed and he laughed noncommittally, "Wanted order well, if you have the ability, you can go ahead and send it out, any tricks, I'll go on."

"Good!"

Yang Feng said in a cold voice: "That's what you said!"

Ji Feng nodded his head very calmly and said, "Nothing wrong at all, that's what I said!"

Yang Feng's face turned blue as he glared at Ji Feng, gritting his teeth in anger.

Li Weidong opened his mouth to say something, but when he saw Ji Feng's ice-cold eyes and then looked at Yang Feng's face, he really didn't know what to say.

"Knock knock knock"

Just then, there was a knock on the door of the box, and then the manager of Jiangnan Fishing Village walked in and said, "Young Ji, the dishes are ready, is it okay to serve them now?"

Ji Feng waved his hand and said, "Yes! Also, remember to ask them to settle the bill later!"

The manager was stunned, but when he saw Ji Feng's face, he hurriedly nodded, "Hey, I'll make a note of it."

"Ji Feng!"

Yang Feng's face was blue and he said angrily, "I hope you'll still be so arrogant the day Yang Bin is shot."

Ji Feng turned his head to look at him and said indifferently, "Trust me, Yang Bin won't be shot."

After saying that, he paid no more attention to Yang Feng, but took Bai Zhu with him and left in stride, leaving only an embarrassed Li Weidong and an iron-faced Yang Feng.

"Son of a bitch!"

Looking at Ji Feng's back, Yang Feng couldn't help but curse angrily.

Li Weidong shook his head with a bitter smile and said, "Old Yang, you should have greeted me in advance today, this matter has made a mess."

In fact, Li Weidong's heart is also a bit uncomfortable, Yang Feng came to Ji Feng, and did not tell him what it was about, but only after arriving did he know that it turned out that they were not friendly with each other, and could even be said to be tit-for-tat, and as a result, in Ji Feng's mouth, Yang Feng even became a fox friend, which made Li Weidong very depressed, and did not even know what was going on it was belittled by Ji Feng.

Yang Feng said in a deep voice: "I didn't expect this person to be so arrogant either, he simply doesn't put anyone in his eyes!"

Li Weidao said, "He has always been like this. But Old Yang, why on earth did you have to catch that what's-his-name, I think it was Yang Bin, right? Did he really kill someone from your Yang family?"

Yang Feng's face changed and said, "What, Young Li, you don't believe me?"

Li Weidong said, "It's not that I don't believe you, I'm just a bit strange, according to reason, although Ji Feng is arrogant, he's not that kind of brutal and unreasonable person, how come he would be so rude to you"

"How should I know, I'm afraid this person is used to being arrogant!" Yang Feng hummed, while in his heart he couldn't help but have a murderous surge, he guessed that he was afraid that Yang Bin had said something to Ji Feng, otherwise, Ji Feng wouldn't have been so rude to him, no matter how much his status was not much lower than Ji Feng, we were all sons of the family, no one was a head lower than anyone else.

If Yang Bin really dares to talk nonsense outside

Yang Feng couldn't help but clench his fists, this was his biggest worry, so Yang Bin must die!

Campus Master Chapter 2369

The meeting with Yang Feng did not affect Ji Feng's mood.

For such a golden jade dude, Ji Feng did not care in the slightest.

Of course, this is not to say that Ji Feng did not put Yang Feng in his eyes, at least this person is a practitioner, this point has caught Ji Feng's attention.

So after he left Jiangnan Fishing Village, he went straight to the military hospital.

"Sir."

When he saw Ji Feng, Yang Bin struggled to sit up.

Ji Feng casually pulled over a chair and sat down. First, he looked at Yang Bin's condition and found that he was recovering well, and even some minor activities were no longer a problem, so he was quite relieved.

And then, Ji Feng asked about the situation concerning Yang Feng, especially the fact that Yang Feng knew kung fu, Ji Feng paid a lot of attention.

“Yang Feng” mentioned this person, Yang Bin’s expression is still a bit obscure, said: “In fact, he was also sent to learn kung fu, only, I was following the master to learn kung fu, while he was directly following the master to learn.”

“Sect Leader?”

Ji Feng raised an eyebrow and asked, “What kind of sect’s master?”

Previously, Yang Bin had said that he had been sent to a martial arts sect to learn kung fu since he was a child, but at that time, Ji Feng did not pursue what exactly the sect was, because at that time, he was more interested in understanding why Yang Bin was being hunted down and killed, whereas now, he was interested.

Yang Bin said, “It’s the Yue Shan School.”

“Yue Shan Sect?”

Ji Feng pondered for a moment, but had not heard of this sect: “Tell me the details.”

Yang Bin nodded and said, “Yue Mountain Sect is located in the southwest mountains, there are not many people in the sect, as far as I know there are only a dozen main figures, the rest are some disciples and some family members, it is said that Yang Xiao Jiang’s father came from this sect.”

Ji Feng dawned on him, he had also heard his elder brother Ji Shaocong say that the Yang family’s old man had come from a martial arts sect back then, and was said to be highly skilled in martial arts, and had once even fought with Elder Tie Long.

It turned out that this sect had been passed down.

Yang Bin went on to say, “In fact, every child in the Yang family was sent to train in martial arts when they were young, some for maybe a year or two to build a foundation, some for a few years to sort of make it to the top, and some, maybe a decade or so, like me.”

Speaking of this, Yang Bin’s expression was more or less gloomy.

Because while practising martial arts on the mountain, one could not learn many cultural lessons, at most, one could just read and write, and then to learn anything else that was almost impossible.

“They have a lot of investments in Jibei Province as well as the southwestern provinces, especially in real estate, for example, many famous properties in Qihe City are developed by the Yue Shan Group.” Yang Bin said.

Ji Feng nodded slightly, this was no longer much of a surprise to him, because from Shen Jingyi he had learned that the martial arts sects nowadays had actually all moved with the times and started doing business, and some of them were doing a lot of business!

Because these martial arts sects were themselves very powerful, and there was no need to say much about their force, so few people dared to mess with them, plus some of their disciples were spread all over the north and south of the country, so it was strange that their business did not grow.

The Yue Shan Sect is no exception, and with the Yang family, the sect has a great backing, so their business is naturally not small.

However, although they were making a lot of money from their business, these martial arts sects knew what made them start, so they didn't leave their kung fu behind, and because the conditions were better, they were in a better position to practice kung fu, so their cultivation was more refined.

According to Yang Bin, the head of the Yue Shan Sect was already a Xiantian master and extremely strong years ago just because he persisted in his training, so even though Yang Feng had only followed him for a few years to learn kung fu, his strength was also very good.

Yang Bin, on the other hand, had learned kung fu from other members, so although he had been practising for more than ten years, he had only just touched the threshold of Xiantian, and was not yet a true Xiantian master.

"I've met Yang Feng." Ji Feng suddenly said.

"Hmm?"

Yang Bin was stunned, and then asked, "Sir, where did you meet Yang Feng? Where is he?"

Ji Feng said, "He's in Jiangzhou."

"Sir."

Yang Bin sat up straight for a moment and said, "Sir, I beg you for one thing."

Ji Feng nodded and said, "Go ahead."

Yang Bin said, "Sir, please help me, I want to get out from here."

Ji Feng then frowned slightly and asked, "Get out? What do you want to do?"

Yang Bin said, "Yang Feng came to Jiangzhou, he must not have brought many people with him, he is not very strong himself, this is a very rare opportunity, I want to Mr., don't ask what I do, and you won't be dragged into anything in the future."

"You want to move him, don't you?" Ji Feng asked.

"....." Yang Bin didn't say anything.

"How do you want to move him? Kill him? Or beat him up hard and give him a deep lesson?" Ji Feng asked again.

Yang Bin still didn't say anything, except that he also had some struggling look in his eyes, apparently he also had some conflicts in his heart.

Ji Feng said, "If you want to take revenge, there are plenty of opportunities and methods, but the question is, have you thought about how to take revenge?"

Yang Bin looked up in astonishment.

Ji Feng patted him on the shoulder and said, "The most important thing you should do now is to get well, if you want to take revenge, there are many opportunities later."

Yang Bin was silent for a moment before he shook his head and said, "It's useless. Although Yang Feng's strength is not strong, he usually has a lot of bodyguards following him around, so it's almost impossible to take revenge. Besides"

Speaking here Yang Bin paused for a moment before continuing, "With Yang Feng's character, he will definitely not let me go, I saw his scandal, he will definitely kill me to feel at ease, so next even if my injuries heal, I will still face his chase after chase."

Ji Feng laughed: "Even if you are going to be hunted, that will be later, if you can't even recover from your injuries now, how are you going to escape the chase?"

Yang Bin couldn't help but be stunned at his words, and then he nodded, "That's right, sir, you're right."

Ji Feng then smiled, "Recuperate your injuries at ease."

Yang Bin nodded his head heavily and said, "Sir, I understand. Just now I was too impulsive this life of mine is yours, sir, I won't take the risk easily."

Ji Feng then smiled and nodded his head, saying, "It's best if you can think like that."

Seeing that Yang Bin had figured it out, and Ji Feng had learned the information he wanted to know, he left with confidence.

"Young Ji, why didn't you tell him that you had gone toe-to-toe with Yang Feng stating that you would bail him out?" As he was leaving, Bai Zhu asked with some confusion.

"There's no need for that." Ji Feng shook his head and said, "Let's wait for him to recover from his injuries before we talk about anything. Besides, we don't even know what's going on between Yang Bin and the Yang family yet."

Bai Zhu was stunned, "You don't believe what Yang Bin said? Then aren't you inviting an additional enemy for no reason by going toe to toe with Yang Feng like that?"

Ji Feng shook his head: "It's not that I don't believe Yang Bin, I just can't believe everything yet."

Bai Zhu smiled, could not help but slowly nod, indeed, even if what Yang Bin said is very true, does not seem to be lying, but some precautions are always necessary, after all, Yang Bin is just a stranger, what kind of things he has experienced, what kind of person he really is, whether it is really as he is showing now, are still not easy to say.

"Then Yang Feng" Bai Zhu is still a bit puzzled, since he can't trust Yang Bin completely for the time being, why is he in a hurry to offend Yang Feng?

If Yang Bin's words were not to be trusted, wouldn't that be making enemies for no reason?

Ji Feng shook his head and said, "Actually, Yang Bin's words are not untrustworthy, at least one thing is certain, this Yang Feng is definitely not a good person, the bullets that were hit on those two security guards in the district is proof enough."

Yang Feng's people were so ferocious that they could even shoot two innocent security guards at will, this was enough to show how cold and ferocious they were, then, imagine what kind of behavior they usually had, this was completely not taking other people's lives seriously.

It shows what kind of person Yang Feng was who sent them here!

If Yang Feng didn't usually have this kind of style, the people below him would definitely not dare to be so ruthless and cruel!

Based on this alone, Ji Feng was certain that Yang Bin was credible, which was why he had gone toe-to-toe with Yang Feng and was determined not to hand Yang Bin over.

Only, there was no evidence to prove that what Yang Bin said was true, but Ji Feng believed that what Yang Bin said, eight out of ten '9 should be true.

The fact is that the most important thing is that it is not just a matter of the size of the person.

.....

"Teacher, the results of the toughness test of the alloy are out"

"Bring it to me quickly." Professor Yu hurriedly stood up, took the report sheet, just swept a glance, his face could not help but reveal a look of excitement, "Good! Good!"

"Teacher, the toughness of this alloy is also too strong, this is not even seen in alloys." A student also said with great surprise.

"Test the conductivity and thermal conductivity again!" Professor Yu said excitedly.

"Teacher, there are not enough samples." The student warned with some distress.

"What?"

Professor Yu was stunned and then said, "No, we have to ask Ji Feng to hurry up and make another batch of samples out"

When Ji Feng received the call from Professor Yu, he also just remembered that he still had to make alloy samples, he couldn't help but shake his head, all the time was delayed by Yang Feng, and looking at the time, he could only wait until tomorrow to go to the lab again.

However, Professor Yu's enthusiasm was also infectious to Ji Feng, so before he went to bed, Ji Feng also conceived several alloy ideas in his mind.

Ji Feng had never intended to make just one alloy, and the kind of alloy that Professor Yu was testing right now was just one of his ideas.

What Ji Feng really wanted to make was the top alloy in the intelligent brain's database, the kind of super alloy that could make laser cannons and even cosmic ships.

Because Ji Feng had never forgotten what he had said before – he wanted to crush the Sumida Group and turn the alloy in the hands of the Hishita Group into a pile of scrap metal!

Campus Master Chapter 2370

After making the sample alloy, Ji Feng left the rest of the work to Professor Yu.

Even if someone set his eyes on Ji Feng, he could say that he had been promoted by Professor Yu, and no one could say anything.

Therefore, Ji Feng was not at all worried that the appearance of this new alloy would cause a sensation because its performance was too outstanding. In fact, Ji Feng was eager for the appearance of the new chrome alloy to cause a certain degree of sensation.

Because, as long as the news got out, the Brilliant Group would know whether that so-called super alloy in their hands was really superb and outstanding, or whether they were boasting about it.

As for the Lingxia Group, who spent a lot of money to buy the so-called super alloy from the Brilliant Group, after knowing this news, I really don't know how they will react, Ji Feng is more or less looking forward to it in his heart!

I'm afraid it's not a very good feeling to spend a lot of money on super alloy technology, only to find out that what you bought back is actually only a pile of scrap metal.

But now, of course, neither the Lingxia Group nor the Brilliant Group knew about the new chrome alloy, at least until Professor Yu had finished all the tests and reported to the top, there would never be any news.

Ji Feng has also discussed with Professor Yu, for the few students involved in this project, have greeted, if this kind of thing is in the military, it is certainly a high level of confidential information, now even if it is placed in the laboratory of the United University, but also need to be confidential.

The first thing that he was thinking about was something else.

To put it bluntly, the emergence of this new chrome alloy will undoubtedly cause a considerable impact on the industrial sector.

The problem is that there are so many areas where the alloy can be used, and the range of applications for the alloy is just too wide!

From small iron pots and plates used at home, to aerospace equipment and other machinery, all need alloys.

You can imagine exactly what an impact the emergence of this new chrome alloy will have on the industrial sector.

Therefore, it was definitely not possible to put the alloy into all industrial fields at once now. Doing so might improve China's industrial level, but it would at least also cause a huge impact on many enterprises, or even make others close down, which was not good for the stability of society as well as the smooth development of the industrial level.

Ji Feng guessed that even if he didn't take all this into account, I'm afraid that the top wouldn't even stand by and watch this happen, and the family probably wouldn't agree to it in the first place.

"I think it's better to follow what we discussed before, to advance into military manufacturing." Han Zhong said, "With our existing talent pool, I'm afraid that if we rashly enter heavy industry, we won't be able to support it. Manufacturing, on the other hand, is a little easier."

"I think so too."

Xiao Yuxuan nodded and said, Ji Feng had told her long ago that he wanted to research new materials, so Xiao Yuxuan had been mentally prepared for this from a long time ago and had also started making preparations early, so her knowledge of the industrial field was not superficial.

Xiao Yuxuan said, "At this stage, if we dabble in manufacturing from scratch, we don't have the technology reserves, nor do we have enough talent reserves, this is not a wise choice, so I think we should go and acquire other companies, with their talent reserves, plus our technology, and the reputation of the Tengfei Group, things can be done."

Ji Feng listened and nodded with a smile, it was obvious that both Xiao Yuxuan and Han Zhong had mature ideas on how to develop next, and even Xiao Yuxuan had come up with a plan that had already been made, it was obvious that she had been making preparations for more than a day or two.

In this regard, Ji Feng was very satisfied and relieved.

Since both Xiao Yuxuan and Han Zhong were prepared, he didn't need to worry about anything anymore; with their abilities, they would definitely do something.

Moreover, once the Tengfei Group ventured into the manufacturing industry, it would be like opening the door for the group to enter the industrial field, from this time onwards, the Tengfei Group would be making a big push in the industrial field, when that time comes, the first thing Ji Feng has to do is to squeeze as much as possible the survival space of the Boundary Sumida Group and the Lingxia Group in China!

When the Tengfei Group really develops, it will be the time for both sides to fight to the death!

Although it would take enough time to get to this point, Ji Feng was confident.

He believed that with Han Zhong's business acumen, Xiao Yuxuan's ability, the technology he provided, and the support of the state, it would not be difficult to achieve this step.

So, Ji Feng's next focus shifted to another research – the energy source!

That's right, the energy source needed for the laser gun!

At the same time, he also wanted to turn the advanced weapons of the Gamma Galaxy in the database of his intelligent brain into reality.

In particular, after Ji Feng obtained a laser gun from the Boundary Pontiff, Ji Feng felt a bit of urgency in his heart. Even though, that laser gun could only be technically considered a defective product, it meant that the technology level of the person who made this laser gun had reached a very amazing level.

At the same time, Ji Feng kept getting some not-so-good news, such as the fact that the dynasty was constantly improving the combat capabilities of the transformers, and even researching how to enable the transformers to possess internal strength, combining technology with martial arts

This is what gives Ji Feng the most sense of urgency!

Because once this research by Dynasty succeeds, this means that Ji Feng's bio-current will probably no longer be the nemesis of the reformer, in this way, if we only talk about the single combat ability, I am afraid that no one can cure the reformer.

Imagine if the dynasty released a group of reformers to do something in China at this time

Who can stop it?

The first thing you need to do is to find a way to make powerful weapons while trying to develop the Tengfei Group and improve your own strength, and this laser gun is the first choice!

With the new chrome alloy, the material problem for the laser gun was solved. The laser gun made with this new alloy was definitely not comparable to the defective one that Ji Feng had obtained.

The material problem was solved, but how to have the right energy source was still a problem.

Without enough energy, even if the material used to make the laser gun was good, there was no way to fire it and it would only be a piece of scrap metal.

The energy source used in the laser gun that Ji Feng had previously obtained was not something that Ji Feng could see at all, because the energy source was not stable at all and would suddenly explode at some point, perhaps after firing a few times or in the middle of firing, and the consequences would be far more frightening than a gun blowing up.

That is like an untimely bomb, carrying it around may explode at any time, so how could Ji Feng choose that kind of energy source?

But what to choose as the energy source, Ji Feng was a bit uncertain for a while.

Electricity?

The actual fact is that you can't get a lot of money for your own personalized products.

Or nuclear energy?

.....

When he received the call from Professor Yu, Ji Feng was still thinking hard about which energy should be used as the energy source for the laser gun, but soon, Ji Feng's attention shifted to the content of Professor Yu's call.

"Ji Feng, all the test results of the new chrome alloy have come out, the performance of this alloy is better than I could have imagined!" At the other end of the phone, Professor Yu was so excited that he almost shouted out, "I'm afraid you don't even dare to think about what kind of performance this alloy has reached from the data!"

With a smile on his face, Ji Feng said, "Professor Yu, you have worked hard, to be able to do all the tests in such a short period of time, it's not easy."

Professor Yu said, "What's so hard about it, to be able to discover such a new alloy, not to mention a little hard work, even if I had to work for three days and three nights straight I would be willing to do it!"

Ji Feng couldn't help but laugh dumbly, but in his heart, he was in awe.

There are not many pure experts and scholars like Professor Yu, who are also selfish, but their starting point is the public good.

That kind of spirit is really admirable.

"Ji Feng, since the data is all out, is it time to report upwards next?" Professor Yu asked, "This kind of alloy is a big deal, it's better to report it as early as possible."

"Professor Yu, I actually think that we don't need to report it upwards." Ji Feng smiled, "Since the test results are already out, then we can publish all this data, then if the higher authorities pay attention to it, they will definitely come to us, but if they don't pay attention to it, then even if we report it, it won't be of much use, don't you think?"

"This"

Professor Yu then hesitated a bit: "Ji Feng, do you have something else in mind?"

Ji Feng smiled, "That's not true, I just think that although this new alloy is significant, it's not a national research project after all, so it's not too good for us to report it rashly."

Professor Yu then asked, "Ji Feng, are you worried that after reporting it, this technology will be taken by the state for nothing?"

Ji Feng smiled, "This is only one side of the reason" Professor Yu, you should just publish the data first, we will talk about the rest later, what do you think?"

Ji Feng had other plans in mind, naturally he could not just be taken by the top for nothing.

Moreover, even if the top is not taken for nothing, Ji Feng does not intend to report it for the time being, because he has other uses for it.
