

Campus Master 2501

Ji Feng was right in his assumptions!

In about ten minutes, the Chinese fighter jets arrived. Although there was only one, it was not a problem to use one fighter jet against one helicopter.

Even from a distance, Ji Feng could see the long flaming tail of the fighter jets firing missiles, which looked like a shooting star from a distance.

“Boom!”

A loud sound came faintly, and then the small black dot in the sky was seen to suddenly explode into a ball of fire, and the helicopter was destroyed!

After observing the direction of the explosion, Xiang Yongzhan shouted, “Chase!”

The group of people quickly chased after them.

However, although they could still see the helicopter before, although it had already flown far away by that time and was only a small black dot in the air, after all, they could still reach their line of sight, but when they really gave chase, they found that it was surprisingly so far away.

They ran for half an hour before they arrived at the spot where the helicopter had crashed, but the scene was already a mess, the helicopter had long since blown apart and there was a scattering of wreckage on the ground.

“Look around and see if there are any bodies!” Xiang Yongzhan wiped a handful of sweat from his face and bellowed.

“Yes!”

All the warriors began to search, and soon, a warrior found the body, and Xiang Yongzhan’s spirit immediately shook, “Ji Feng, come and take a look, is this Luo Qiuqiu?!”

Ji Feng walked over and saw the body that had been blown up long ago and mutilated, looked at it carefully, but couldn’t help but shake his head, “I can’t tell!”

How could he tell if it was Luo Qiu when the person had already been blown up like this?

What’s more, even if there were any features on Luo Qiu’s body, they were no longer visible.

“Is Luo Qiu a Transformer?” Xiang Yongzhan asked.

“No.”

Ji Feng slowly shook his head, he knew what Xiang Yongzhan meant, if Luo Qiu was a Transformer, then just by looking at the bones of this corpse, he would be able to come up with a rough judgment.

But the problem was that Luo Qiu was really not a Transformer, which was also strange to Ji Feng, because ever since he knew that such an organisation as Dynasty existed, any person from Dynasty that he had seen, even if they were not a Transformer, had a biological bomb implanted in their body.

However, this Luo Qiu had not!

Ji Feng had also used his penetrating eyes to observe Luo Qiu at that time, but he found that there was not a single abnormality in Luo Qiu's body, which meant that he was a completely normal person.

This was one of the things that Ji Feng couldn't understand, how could Luo Qiu have been spared?

Could it be that the Dynasty's strategy to control its men had changed?

"There's more over here!"

A warrior's shout interrupted Ji Feng's thoughts, and he looked over at the sound, but found that the corpses were still mutilated and had long since been burnt beyond recognition, so it was impossible to see them clearly.

Ji Feng carefully stared at the two corpses and observed them for half a day, but in the end he shook his head slightly: "Old Xiang, Luo Qiu has escaped!"

Xiang Yongzhan was instantly shocked, "How do you know that? Neither of these two people?"

Ji Feng said, "Neither of them."

Puzzled, Xiang Yongzhan asked, "But didn't you say that you couldn't tell? Then how did you determine that neither of these two corpses was Luo Qiu?"

Ji Feng said, "From the size, Luo Qiu's body is thin and small, which may be related to the martial arts he has been practicing for years, but if you look at these two people ..... these two corpses, they are obviously a bit more stout than Luo Qiu!"

Xiang Yongzhan's heart then believed seven or eight percent, because Ji Feng's analysis was reasonable, and he also believed that Ji Feng's eyesight was superior, and he would not be wrong in general.

However, Xiang Yongzhan was still a bit upset in his heart, after working so hard for a while, in the end Luo Gnarly had run away?

"Older brother, take a closer look, could it be that the helicopter caught fire after being hit and exploded violently, so Luo Qiu was deformed by the explosion?" Xiang Yongzhan asked, undeterred.

"Do you think these two corpses haven't been deformed?" Ji Feng asked, "They were blown up to almost no human shape, which I can see, can't you still tell their body shapes?"

"Can ....."

"Old Xiang, Luo Qiu has run away!" Ji Feng said.

Xiang Yongzhan then couldn't help but give a lurch and his heart sank: "Really ran away?"

Ji Feng let out a light sigh and said, "Old Xiang, you saw it before, after Luo Qiu got on the rope ladder, he just grabbed onto it, but didn't go up, at that time I guessed that he shouldn't follow the helicopter all the way."

Xiang Yongzhan nodded slowly and said thoughtfully, "Because the helicopter's target is too big, it's easy to be tracked, Luo Qiu's men have suffered heavy losses and he's been exposed, so perhaps the most

important thing he should be going to right now is the dynasty's secret stronghold, or maybe his own secret stronghold, so he wouldn't have followed the helicopter all the way up, but got down somewhere in the middle!"

Ji Feng said, "Ten times out of ten! Even if Luo Qiu didn't go to their stronghold, he definitely wouldn't follow a helicopter with such a big target all the way down!"

In this remote border area, a helicopter flying around here was very noticeable. But if Luo Qiu had any brains at all, he wouldn't have been flying in a helicopter!

So from the moment Luo Qiu was rescued by the helicopter, Ji Feng already had little hope in his heart of catching Luo Qiu this time. It's just that he was also very reluctant, he didn't want to fight for so long and still end up letting Luo Qiu escape, he wanted to do his last bit, so he asked Xiang Yongzhan to request help from the military's fighter jets.

But the result .....

"Go back and have someone clean up the scene!" Xiang Yongzhan was also very upset and was keen to find Luo Qiu's body at the scene, but in the end it was not to be found.

"Go back!"

Ji Feng nodded, "Old Xiang, it looks like you're going to have to clean up a bit over here. Luo Qiu's base here, and the gangsters backed by that whatever Vietcong, these all need to be cleaned up. The fact that Luo Qiu was able to escape so quickly this time is a lesson."

Xiang Yongzhan said, "I know."

Ji Feng said, "Also, where did this helicopter come from, all these things need to be clarified, I think, if we act fast enough, even if we let Luo Qiu escape, but he must not be able to pack up his things or arrange for some people to retreat!"

"I'll just take care of these things!" Xiang Yongzhan said.

Ji Feng then nodded and asked again, "By the way, that Transformer, make sure you keep an eye on him, don't let him get away."

Xiang Yongzhan coldly snorted, "Run? I'm afraid he won't be able to wake up without a day or two after the high voltage electricity hits his body, how can he still run?"

Ji Feng knew that the high-voltage electricity he was talking about was a military method of subduing people, and hearing that Xiang Yongzhan had already made arrangements, he was relieved that although Luo Qiu had escaped, there was still the reformer Kage who had been caught.

The other group was to transport the wounded and the captive Kage back to Xinma, this group had already left first, a few soldiers were badly wounded, although taking special effects current, but also must be rescued as soon as possible.

They waited until Cui Guangming arrived with the border troops, and only then did Ji Feng and Xiang Yongzhan return, leaving some of the odd jobs on this side to Cui Guangming and the border troops.

When Ji Feng and the others returned to the border guard station, it was already close to evening, but at this time, the border guard force had already started to move.

“Old brother, just watch, when tomorrow morning comes, the situation in Xinma City will definitely be different!” Xiang Yongzhan said.

“But this will only solve the problem for a while, treating the symptoms but not the root cause!” Ji Feng said.

As long as the Vietcong was still behind it, if this gang was exterminated today, another gang would probably appear tomorrow, and the situation of Chinese people being bullied would still not be completely changed.

Xiang Yongzhan was silent for a moment before he spoke, “There is no way, the current environment is like this, if China wants to rise, some countries will sit on the edge of their seats, they will definitely try every way to provoke and disrupt the development of China!”

Ji Feng didn’t say anything else, seeing the situation in Xinma City was indeed very irritating, but there was not much he could change.

“Old brother, to change all this, it is impossible in a short time!” Xiang Yongzhan said, “The country’s development can’t rise overnight, but, in terms of localisation, you can change the situation.”

Ji Feng pointed at himself, “Me?”

Xiang Yongzhan nodded, “That’s right. If you can really develop the laser gun, at least we will have enough to compete with the dynasty in terms of single combat weapons, and as for some other countries, we have an overwhelming advantage! There is very little chance of a large-scale war happening now, however, skirmishes never stop!”

Speaking here, Xiang Yongzhan paused and added: “As you can see, several of my brothers have died today under that weird weapon, old brother, kind of old brother begs you to develop that weapon as soon as possible, can you?”

Ji Feng slowly nodded and said, “Actually, I’m more anxious than you are, but I can’t rush this, I have to find the right energy source, otherwise, even if it’s barely manufactured, it’s almost like an untimely bomb, it might suddenly blow up at some point, and the consequences would be much more terrible than an ordinary weapon blowing up!”

“Put more effort into it!”

Xiang Yongzhan said, “Whatever you need, whether it’s manpower, intelligence, or anything else, as long as I can do it, I won’t hesitate to say anything!”

Ji Feng nodded and said, “I won’t be polite with you if I need to.”

“Older brother, I’m really in a hurry!”

Xiang Yongzhan said, “Those few brothers who died today, in fact, their families were not very rich, rich family members who come to be soldiers, right? These brothers have never enjoyed a day of happiness, hard training for them is free time, do not know when they have to carry a gun to the battlefield, this is

almost to put their heads on the waistband of their trousers, may not return home once in a few years, although they also have a settlement, but for their families, they will never see this family again... ..”

Speaking of this, Xiang Yongzhan’s voice changed a little, the death of several comrades made his heart very sad.

Campus Master Chapter 2502

In the end, Ji Feng could not say anything, he could only say, “Old Xiang, I dare not say anything else, but there is one thing I can guarantee, as long as I find a suitable energy source, I can definitely manufacture a laser gun. The materials are already available now, the new chrome alloy from the Tengfei Group can perfectly be used to make a laser gun .....

“But what if we can’t find a suitable energy source?” Xiang Yongzhan asked.

“If that’s the case .....

Ji Feng paused and slowly said, “Then I also have a solution, but the manufactured laser guns may be somewhat less safe and won’t be used too many times .....

Xiang Yongzhan’s eyes suddenly lit up: “That means, in fact, you can create a laser gun right now?”

Ji Feng said, “You could say that, but .....

“Then there’s no buts or not buts, since you can make a laser gun right now, what are you waiting for?”

Xiang Yongzhan did not wait for Ji Feng to finish, immediately said: “Older brother, today you have seen how powerful that laser gun is, almost nothing can stop it, pointing at anything, surprisingly powerful, defensible! If you could make a laser gun now, where would their arrogance be?”

Ji Feng said, “But the problem is, if there is no suitable energy source, even if you can barely make the laser gun, there will still be great hidden dangers, for example, there is a possibility that the chamber will blow up, and some other problems, which will cause some damage to the user itself!”

If there was no suitable energy source, then Ji Feng could only adopt the suggestion of the intelligent brain to use nuclear energy as the energy source, which could not be that stable as far as the current technology of the nuclear field was concerned, and more importantly, to shrink and shrink the nuclear reactor again, the final shrinkage might only be half a matchbox in general, and there must also be enough energy itself, which was a problem in itself.

Of course, this problem is not without a solution, but if the technology can not reach and insist on going on, then the laser gun every time it is fired, it will produce a huge radiation, whoever uses this kind of weapon, who will be hurt, after a long time, what changes in the body Ji Feng are not sure.

So it’s not that Ji Feng couldn’t make a laser gun, but he didn’t have a suitable energy source, so he couldn’t make a laser gun with stable performance and great power!

After hearing this explanation from Ji Feng, Xiang Yongzhan could not help but be silent.

He longed for powerful new weapons, and in modern times where skirmishes like this were constant, if the troops were equipped with such new weapons, the casualties would definitely be much smaller.

Although as a soldier Xiang Yongzhan was used to seeing death, and did not even know how many of his comrades had fallen in front of him, he was not hard-hearted enough to ignore the physical injuries suffered by his soldiers.

Those, however, were his comrades!

“Is there nothing else that can be done?” Xiang Yongzhan asked.

“Not for now!”

Ji Feng shook his head and said, “Unless we find a suitable energy source.”

Xiang Yongzhan then became vaguely anxious: “Energy source, energy source ..... ee?! That’s right! Didn’t that Luo Gnarly and Cage drop a laser gun when they were escaping? What kind of energy source did their weapon use? Couldn’t you use this opportunity to study it?”

Ji Feng said, “I’ll definitely research it even if you don’t say anything.”

Xiang Yongzhan immediately said, “Then as soon as you can, you work hard, it’s best to start researching it now .....

“Don’t you rush first!”

Ji Feng waved his hand and interrupted him, saying, “You must first have a mental preparation, the dynasty’s laser gun, likewise, has flaws.”

Xiang Yongzhan was stunned, “What do you mean?”

Ji Feng asked, “Do you know why Luo Qiu left his laser gun behind?”

Xiang Yongzhan heard something wrong, he immediately looked straight and asked, “Wasn’t it when he was beaten by you and dropped the laser gun when he was fleeing in disarray?”

Ji Feng shook his head and said, “No. Think about it, if I was really that good, would I have watched him kill those soldiers before? And still give him the chance to escape?!”

Xiang Yongzhan’s brow then furrowed, but he didn’t say anything.

Ji Feng said, “If Luo Qiu had been holding a laser gun in his hands, then even if I was powerful, I definitely wouldn’t have chased him away in a mess. Luo Qiu is a top expert in his own right, plus the laser gun in his hand, hey!”

Ji Feng shook his head and smiled, if the laser gun hadn’t gone wrong, he wouldn’t have dared to chase him too close, let alone chase Luo Qiu away in a mess.

“What’s wrong with the laser gun?” Xiang Yongzhan asked.

“We don’t know yet, we need to study it before we can be sure.”

Ji Feng said, “But I saw a big bag bulging on that, it must be something wrong with the inside of the laser gun, eight out of ten `nine times it’s the energy source that’s wrong.”

For the structure of the laser gun Ji Feng can say that he is familiar with it, according to his understanding, the laser gun in Luo Qiu's hand, should be a problem in the energy source, otherwise the normal problem would not bulge a big bag.

Xiang Yongzhan was stunned: "That laser gun of the dynasty, there is also a problem in the energy source?"

Ji Feng said, "What's so unusual about that?"

Xiang Yongzhan said with disappointment, "I originally thought that if you were inspired by that laser gun or researched what energy source they used, you could start manufacturing it in bulk, who knew that ....."

Ji Feng said, "Old Xiang, this is something that cannot be rushed, nor can we speculate, how about this, wait until I study that laser gun first, then we can know exactly what the problem is!"

Xiang Yongzhan could only nod helplessly, "That's the way it has to be. Are you going to study it now?"

"No!"

Ji Feng shook his head and said, "There is a more important thing to do now ..... interrogate Cage!"

It was evident that Cage must also have a certain status within the dynasty, maybe not as high as Luo Gnarly's, but no less, at least, he was the most powerful and most advanced advanced advanced transformer Ji Feng had ever seen!

With this alone, he could get quite a bit of information from Cage's body.

Xiang Yongzhan likewise wanted to get some important information out of Cage's mouth as soon as possible, so without saying a word, he immediately arranged for manpower and a room to prepare for Cage's interrogation.

Although this was at the border guard unit's premises, this time the operation was dominated by Xiang Yongzhan's special operations brigade, so it was no trouble at all for him to arrange it.

When Ji Feng and the others saw Cage, the white man was still unconscious, hanging from an iron frame with his hands clasped by a special belt.

"Tens of thousands of volts of high voltage electricity, even an elephant can't stand it! Not to mention him!" Xiang Yongzhan sneered, "From this it shows that although this guy is already a transformed human, he hasn't yet broken away from the human category, his flesh and internal organs should still be the same as a normal human."

Ji Feng, however, did not say anything more, but took a few steps forward and stared at Cage carefully, "Give me a pair of gloves, make them thinner."

The soldier next to him froze.

Xiang Yongzhan waved his hand, "Go and get the gloves!"

"Yes!"

The soldier saluted and hurriedly went out to get the gloves. At this moment, Ji Feng was staring at Cage carefully, as he urged the bio-current to work on his eyes, his gaze then gradually penetrated Cage's flesh and saw inside his body.

A biological bomb!

"It's true!"

Ji Feng sneered, "Old Xiang, it's also lucky that you used high voltage electricity to stun him, this guy also has a biological bomb near his heart, it's not small in size! If it explodes ....."

The biological bomb inside Kage's body was almost the size of an adult's fist, all about the same size as Kage's heart.

If this bomb were to explode, I'm afraid that everyone around Cage would be affected!

Xiang Yongzhan said, "This is still inspired by you, when we chased after him, we saw that this guy was knocked out by you and his body was almost sinking into the mud, I knew that this guy might be the one you left for us on purpose, so I simply let him remain unconscious!"

Ji Feng asked, "How do you wake him up?"

Xiang Yongzhan laughed, "It's very simple!"

Saying that, he brought an electric rod from the hand of a soldier next to him, flipped the switch, and immediately a nuisance blue electric arc emitted from the front of that electric rod.

"Use this low-voltage electric rod to give him another hit, and he will wake up immediately!" Xiang Yongzhan said.

"Wait a moment first!"

Ji Feng stopped Xiang Yongzhan and said, "Old Xiang, if I want to interrogate him, I'll have to use neurotoxin, but after the interrogation, he might have to become an idiot."

Xiang Yongzhan frowned, "Is there no other way? After we have interrogated him, I'm afraid the top will have to send someone to interrogate him, if he turns into an idiot ....."

Ji Feng shook his head and said, "I can't guarantee if other methods are effective, as you know, reformed people are not the same as ordinary people, ordinary torture is useless to them!"

Saying that, he pointed to the bullet holes on the shooting body.

This guy's flesh and skin wasn't even afraid of bullets hitting his body, what other torture methods could be more powerful than this?

Xiang Yongzhan then hesitated a little: "I can't make the decision on this matter, I have to ask for instructions from above."

Ji Feng also knew that Xiang Yongzhan was in the military, so he definitely could not do whatever he wanted, so he said, "We have to be quick, if there is really a dynasty base near Xinma City, maybe they

have already received word and started to evacuate by now, if we are slow, by then everyone will have run away and we won't be able to catch any of them!"

Xiang Yongzhan immediately said, "I'm going to ask for instructions."

Just as Xiang Yongzhan went to call for instructions from above, Ji Feng began to observe Cage, he found that Cage wasn't just his bones had been transformed, his flesh and skin also seemed to be different from normal people.

Of course, there were also blood vessels and other tissues inside Kage's flesh and skin, but it looked a bit strange!

But exactly what was strange, Ji Feng couldn't say.

Ji Feng ripped open Cage's shirt and saw no wounds other than some bullet holes, so he was a bit puzzled.

Could it be that the technology level of the dynasty, has really advanced to such an extent?

Ji Feng remembered that laser gun again!

Campus Master Chapter 2503

Could it be that the technology level of the dynasty had really developed to such an extent?

Ji Feng thought of that laser gun again!

The first time he saw the laser gun was in New York, and at that time, Ji Feng was shocked. He did not expect that this kind of technology, which only existed in the Gamma Galaxy, had appeared on Earth, and that was not all.

The astonishment in Ji Feng's heart was inexpressible!

How could a technology from the Gamma Galaxy appear on Earth?

Could it be that there was someone other than himself who had the technology of the Gamma system?

And this time when he saw the laser gun again, this astonishment in Ji Feng's heart became even stronger, because he could obviously see that the laser gun Luo Qiu took was obviously better than the one before.

This also meant that the technology of the dynasty was progressing, and not at a slow pace.

Now, this was also verified from this Kage's body.

From the most ordinary transformer that was initially mistaken for 'Wolverine' by Ji Feng, then a slightly more advanced one, and then an advanced transformer, only that the advanced transformer at that time was one with loose skin and flesh, and that face was even less like a human face, it was simply a kind of monster that was inhuman and ghostly.

But by now, Kage was obviously much better!

When you think about it, it had only been a few short years in between, and Dynasty had already achieved this step, which really made Ji Feng feel amazed while having a huge pressure.

How on earth did the dynasty manage to do all this?

And, this transformer, and the laser gun, where exactly did Dynasty get all this technology from?

Ji Feng thought a lot .....

“Intelligent brain!”

Eventually, Ji Feng concentrated on his mind and called out to Wisdom Brain, “You come and take a look at this guy, especially his bones, skin and flesh, you take a closer look at all of them.”

Wisdom Brain’s voice rang out in Ji Feng’s mind, “Master, this needs to be tested with a test method.”

Ji Feng immediately understood what the wise brain meant, if the wise brain wanted to detect things in the outside world, or to collect the outside environment it had to rely on bio-current, so Ji Feng immediately activated the bio-current and let the wise brain detect Kage’s body.

The intelligent brain was fast and finished a moment later, “Master, the test is complete, the sample’s bones are a composite metal compounded with biological elements, and his flesh and blood likewise use a large amount of biological elements .....

Ji Feng was instantly shaken: “So, this person’s flesh and skin is really different from normal people?”

The intelligent brain said, “In terms of microscopic composition, it’s the same. It’s just that the sample’s muscle tissue is more developed than a normal human, and the muscles are more resilient.”

Ji Feng immediately asked, “How much stronger can it be?”

The intelligent brain said, “The initial test is about fifty times or more, and some parts can reach eighty times or even higher.”

“Fifty times?!” Ji Feng couldn’t help but lose his voice and exclaim, what a concept was fifty times, this wasn’t just the flesh and blood of fifty people combined together.

Even some metals were not as tough as fifty times as much as human muscles!

This also meant that this Kage’s flesh and skin was probably tougher than some low-density metal, and maybe even much more than that!

“No wonder this guy isn’t even afraid of so many rifle bursts!” Ji Feng couldn’t help but marvel, this physical quality, it was definitely beyond the realm of humans!

“What level of technology has the dynasty reached?!” Ji Feng was shocked and amazed.

He stared at Kage who was still unconscious, thought about it and asked again, “Intelligent Brain, then can you detect how exactly that biological bomb next to his heart was implanted?”

The intelligent brain said, “Master, the intelligent brain did not detect a channel on the sample’s body surface that could lead straight to the heart.”

Ji Feng nodded, "That's right. There is no such wound on his body."

Although the Wise Brain was already very human at times, it usually still had a mechanical feel when talking and was somewhat programmed in its speech.

For example, the 'sample' in the Smart Brain's mouth actually referred to Cage, the target being tested, and when it said 'channel', it could actually be understood to mean a wound.

The wise brain analyzed for a few more moments, but in the end, it still did not come up with a result: "Master, the wise brain could not find an exact answer. However, two possibilities can be drawn based on the program analysis."

Ji Feng immediately asked, "Which two possibilities?"

The intelligent brain said, "First, there was actually a channel on the sample's body surface, however, after the biological bomb was implanted in the body, this channel disappeared."

Ji Feng's heart immediately moved and he nodded, "It's possible, for example, that the wound healed on its own, or that after Kage was implanted with the bio-bomb, someone deliberately erased all traces, such as using some means to make that wound where the bio-bomb was implanted disappear!"

The wise brain did not say whether Ji Feng's analysis was right or not, in fact this level of autonomous thinking and analysis was still somewhat difficult for the wise brain, it simply said, "Secondly, it is that the sample's skin and flesh tissues were implanted with the bio-bomb before being attached to it, and then the skin and flesh were attached, so that again no traces would be left behind... .."

"What?!"

Ji Feng once again couldn't help but lose his voice and exclaim, "Before attaching? First ..... implant a biological bomb?!"

The intelligent brain said, "Yes, master, this possibility exists, and there is a fifty percent chance of it!"

"....."

Ji Feng almost didn't know what to say.

The scenario in the second possibility described by the intelligent brain really shocked Ji Feng – according to the intelligent brain, the skin, flesh, blood vessels, etc. on Kage's body, but anything other than internal organs and bones, were likewise almost the same biological elements as the skin and flesh of ordinary people in terms of microscopic composition, only that the toughness was much stronger than the muscle tissue of normal people! much stronger!

And in order to grow this flesh and skin on the body, it seems that the original flesh and skin must first be removed ..... which means that when Cage was transformed, all the flesh and skin was removed from his entire body, leaving only a bunch of internal organs, as well as ..... a skeleton and a head!

At this time, the biological bomb was first implanted next to Cage's heart, and then this super-tough flesh was attached to Cage again .....

The mere sound of this makes one's scalp tingle and goose bumps rise!

Ji Feng could even imagine that scene, which made him feel uncomfortable while being shocked at the Dynasty Organization's progress in this area.

Just thinking about that scene, Ji Feng couldn't help but frown.

A good person actually had to get rid of his entire body's skin and flesh, and even his bones had to be transformed ..... This was unbelievable!

"Wise Brain, can this kind of technology ..... be reached in the Gamma Galaxy?" Ji Feng asked.

"It can, master." Wisdom Brain said.

Ji Feng's spirit shook when he heard that, "It really can? Then what level can the Gamma Galaxy reach in this regard?"

The intelligent brain said, "Master, in the Gamma Galaxy, inhumane transformation of the human body is forbidden, and biochemicals are likewise not allowed."

"Biochemicals?" Ji Feng was stunned.

The intelligent brain said, "Yes master, in the history of the Gamma Galaxy, the human body had also been modified and modified so thoroughly that the entire human body was synthesized from biochemistry, but then the various empires and the Federation all banned this technology at the same time."

Ji Feng couldn't help but feel shocked once again.

The entire human body could actually be synthesized using biochemical technology?

Wouldn't that mean that it was almost the same as creating a human being?

Hearing the intelligent brain say this, Ji Feng then realized that the Gamma Galaxy's technology in human transformation was only more mind-boggling, not knowing how many times better than the Dynasty's technology!

Ji Feng asked again, "Then why did the Gamma Galaxy ban this technology later?"

The intelligent brain said, "Master, there is no more detailed information in the database. It's just that according to the information, the various empires and the Federation were later more enthusiastic about developing intelligent robots to assist humans."

Ji Feng nodded slowly in thought, thinking to himself, "What exactly was the reason for banning human modification technology in the Gamma Galaxy? Was it because this technology was like cloning technology, which had already involved human ethics and morals, or was it because something had happened to this technology of transforming human bodies into human beings?"

Ji Feng did not know.

The Gamma Galaxy was also far away from him, so he did not pay too much attention to it anymore, and instead asked the intelligent brain to record the results of the analysis of Cage's body, which might be useful later.

Afterwards, Ji Feng, together with the intelligent brain, conducted research on other aspects of Cage's body condition. For example, why Cage was not as afraid of bio-currents as others, according to Ji Feng's analysis, it was probably because the flesh and skin on Cage's body was closer to that of a normal human.

"Older brother, it's approved from above!"

Just as Ji Feng was researching, Xiang Yongzhan walked into the room with big strides and said, "However, the top has requirements, you must ask some questions that the top wants to know before you can start your interrogation, moreover, you can't kill the person or damage his body, and when we bring the person back, the top will definitely send experts to analyze and study this guy carefully!"

Ji Feng immediately came to life and said, "Good! Old Xiang, what questions does the top want to ask?"

Xiang Yongzhan said, "I've already made a record, meanwhile the above will also fax over the specific questions, we'll wait a few more moments."

Ji Feng nodded and said, "No problem!"

Taking this time, he was also deliberating in his head which questions he should ask Cage, although Cage was stronger than the average advanced reformer, Ji Feng was not sure if Cage would still be able to stay awake after the neurotoxin was injected and the interrogation was over, so he also had to ask all the questions he wanted to ask at once.

"Right, Old Xiang, have someone bring over that laser gun, you might need it during the interrogation later." Ji Feng said.

"A laser gun?"

Xiang Yongzhan was a bit puzzled, "How can that be used for interrogation?"

Campus Master Chapter 2504

"A laser gun?"

Xiang Yongzhan was a bit puzzled, "How can that be used for interrogation?"

Ji Feng said, "You just go and get it."

Although Xiang Yongzhan had doubts in his mind, he still led someone to bring the laser gun in order to save time – this weapon was now absolutely top secret and no one could touch it alone without his permission, let alone take it out of the room, so he had to go and get it himself.

When Ji Feng took the laser gun, he just felt a sinking feeling in his hand: "Good man, so heavy?"

Xiang Yongzhan said, "It's heavy!"

The weight of this laser gun was really beyond Ji Feng's original expectation, the length of this laser gun was not as long as a rifle, but the combined size was a bit larger than a rifle, just right for two hands to hold.

Ji Feng knew a lot about laser guns, so he knew that under normal circumstances a laser gun of this size would actually be a little heavier than a rifle, but definitely not too much heavier.

But now, once he picked it up, the laser gun actually pressed his hand down, so he could see the weight!

Ji Feng couldn't help but ask in amazement, "I'm afraid this is not even less than a hundred pounds, right?"

Xiang Yongzhan nodded and said, "It should be about the same! How can a weapon this heavy be suitable for single combat? Older brother, isn't this a bit ....."

Even if Ji Feng had developed the laser gun and also succeeded in mass production, I'm afraid that it would be difficult enough for warriors to carry just a laser gun into battle even if they didn't carry anything, almost a hundred pounds, even a strong and fit person would definitely get tired of carrying it for a long time, unless they were those born with divine strength, Hercules.

But the problem is that most warriors are still ordinary people, not Hercules.

So Xiang Yongzhan was a little worried that the laser gun he had been waiting for would be such a clumsy thing. What was the point of having such a powerful gun? Could it be bigger than a cannon? Could it be more powerful than a missile?

What he wanted was a high-powered weapon suitable for single-armed combat!

Ji Feng was also surprised and said, "Don't worry, this is the radar gun developed by the dynasty, it's not at all the same thing as the radar gun I'm going to make ....." Well, apart from the principle being roughly the same, everything else is basically different!"

Xiang Yongzhan immediately asked, "Then the laser gun you developed, it probably weighs about how much?"

"About ....."

Ji Feng hadn't really thought about this question, he immediately estimated it in his head and said, "It would be about the same weight as a rifle, or it would be even lighter."

Xiang Yongzhan was stunned: "Really?!"

Ji Feng nodded and laughed, "Do I have to joke with you on this?"

Xiang Yongzhan pointed at the laser gun in Ji Feng's hand and hesitantly said, "But this laser gun of the dynasty ....."

Ji Feng laughed: "Old Xiang, if I told you that this laser gun of Dynasty is a defective product, would you believe me?"

Xiang Yongzhan was stunned: "A defective, defective product? Older brother, you're not kidding, right?"

Ji Feng said, "Old Xiang, let's not talk about a perfect laser gun, just what kind of standard should a qualified laser gun be? Do you think it would be such a big bulge after firing a few shots, and then it wouldn't work? If it was in the middle of a large army battle, what do you think this kind of weapon would be useful for?"

Xiang Yongzhan suddenly dawned on him, "Are you saying that this weapon developed by the dynasty is still as flawed as the previous one?"

Ji Feng pointed to the bulge above the handle of the laser gun, which was the size of a baby's fist, and said, "This is the best proof! Of course, this laser gun is definitely a great improvement over the previous one, but it's still flawed!"

Xiang Yongzhan immediately asked, "Then if it's a laser gun made by you, does it have any flaws?"

Ji Feng said, "Of course there are flaws, only that they are not as fatal, only in terms of power and service life, it is still a certain distance from perfection."

Xiang Yongzhan asked, "Can it be used normally?"

Ji Feng suddenly lost his smile: "If it can't be used normally, why develop it?"

Xiang Yongzhan: "....."

In fact, Xiang Yongzhan was tempted to say that the development of anything started with a defective product, which could not be used at the beginning, but through continuous improvement, it would definitely be usable eventually, and wasn't the Dynasty's laser gun also in the same process of improvement?

But when he thought of Ji Feng's promise to his own old man, Xiang Yongzhan stopped talking, knowing that Ji Feng would not have made this promise if he was not completely sure.

You know, the military order thing is not that easy to set up, when the time comes, if you mess up, maybe your own old man really dare to send Ji Feng to the military court.

"Be quick. The quicker you get it done, the better!" Xiang Yongzhan didn't continue this topic, he didn't understand a lot of what Ji Feng said anyway, he just needed to see the final result anyway.

Ji Feng said, "Don't worry, I promised your father that I would definitely deliver the finished laser gun within a year, there will definitely not be a day's delay!"

In fact, Ji Feng was even more anxious than Xiang Yongzhan, as he saw the dynasty's laser gun getting better and better with each passing improvement, the pressure on Ji Feng was getting bigger and bigger.

But this was something that could not be rushed, if there was no suitable energy source and the laser gun had to be manufactured by force, then it would undoubtedly be irresponsible to the warriors using these laser guns, if the laser gun had fatal hidden dangers, then Ji Feng would rather let this laser gun stay in the laboratory!

But Xiang Yongzhan was looking forward to it and said, "You should work harder, you'd better be able to produce the finished product tomorrow, then I definitely want to buy you a drink!"

Ji Feng laughed, "Let's interrogate this monster first! Wake him up!"

Xiang Yongzhan picked up the electric wand, flipped the switch, and violently pounded the blue arcing end onto Cage's rib cage, but it made a 'thump! It made a crunching sound, barely different from a pounding on metal.

He couldn't help but curse, "Monster!"

However, his blow did not work, and Cage did not move at all in the face of the electric rod's stimulation.

Xiang Yongzhan's face instantly sank, and he immediately turned the switch up, just ready to try again.

Ji Feng said, "Pound his rib cage!"

The first time I saw him, I was able to get him to do it.

Xiang Yongzhan's brow then wrinkled: "Could it be that the voltage before was too high and had electrified this monster?!"

Previously, when Ji Feng was chasing Luo Qiu, Xiang Yongzhan led his men while they were halfway to see Cage who had been knocked out by Ji Feng. Because he knew that this guy was a transformed monster, so in order to avoid any accidents, Xiang Yongzhan used an extremely high voltage on him and electrocuted him to the point of complete unconsciousness.

Could it be that the voltage was not controlled properly at that time, or that the physical quality of this guy was overestimated, and as a result the voltage was too high to nullify this guy?

Ji Feng shook his head and said, "It shouldn't be, look at his breathing is still very even, it should be because after his body has been transformed, his endurance and other aspects are too much stronger than normal people, this way ..... you can increase the voltage again and try again!"

Xiang Yongzhan complied and tried again, but the result was that Cage's body still trembled a few times, but soon there was no movement again.

Seeing this, Ji Feng couldn't help but frown: "Old Xiang, move aside first, I'll try."

After Xiang Yongzhan moved aside, Ji Feng stepped forward and stared at Cage for a moment, then he violently raised his hand high and transformed his palm into a sword, slashing at Cage's shoulder with a fierce blow.

"Ow...!"

In a flash, Cage suddenly raised his head and let out a strange cry, his eyes were red, and his whole body even struggled violently a few times.

Hula~!

The surrounding soldiers instantly tensed up, pulling the bolts of their guns and pointing them at Cage.

Even Xiang Yongzhan was startled for a moment, but immediately he went up and smashed his fist on Cage's face: "I'll make you scream weirdly!"

Ji Feng couldn't help but nod secretly as he watched, Xiang Yongzhan was able to sit on the throne of the special operations brigade's captain, and he really didn't just rely on his family background, just this guy's guts alone was not something that ordinary people could compare with.

Cage's head snapped back from the blow and clanged against the iron shelf behind him with a loud bang that seemed so harsh in this empty room.

"Ho-!"

Cage roared at Xiang Yongzhan with his eyes wide and mouth open, "Yellow-skinned monkey, I'll tear you up!"

This, he cursed in English.

But Xiang Yongzhan went up to him and gave him a kick – a yin-raising kick!

"Boom!"

This kick struck Cage's crotch with lightning speed.

However, in the next moment, without seeing Cage roar, he heard Xiang Yongzhan suddenly let out a muffled cry and his foot jerked back, and when he looked at him again, it seemed that his face was a little white.

Ji Feng couldn't help but look stunned in his heart, what happened?

Then he noticed that Xiang Yongzhan's body was crooked, one leg was drooping, his foot was not on the ground, his posture was very strange.

As soon as he pulled Xiang Yongzhan back, he held him up and asked, "Old Xiang, what's going on?"

Xiang Yongzhan's face turned black, and only after a while did he grit his teeth and said hatefully, "..... kicked the iron plate!"

"Eh?"

Ji Feng did not react for a moment, Xiang Yongzhan this consciousness is kicked on the iron frame? But he clearly watched Xiang Yongzhan was kicking at Cage's crotch ah?

Xiang Yongzhan pointed at Cage and gritted his teeth, "This monster ..... is not a man, that place is a piece of bone, harder than a block of iron!"

Ji Feng smiled and was stunned.

No wonder Xiang Yongzhan said that he had kicked on an iron plate, the bones on this Kage's body were modified, and there was nothing unusual about it being harder than iron, but ..... Kage wasn't a man?

"Phew~!"

Xiang Yongzhan took a few deep breaths, pointing his toes on the ground and moving around a few times before turning his head and saying, "Bai Zhu, can you please go to the next room first and rest for a while?"

Bai Zhu then looked at Ji Feng and saw the latter nod before she turned around and walked out, and Xiang Yongzhan immediately sent a soldier to take Bai Zhu to rest.

And then, Xiang Yongzhan gritted his teeth, “Strip all the clothes off this monster, I want to see what the hell this is today!”

Campus Master Chapter 2505

“Zira~”

Bai Zhu had only just gone out for a moment when a few soldiers stepped forward and directly stripped the clothes off Kage’s body, because Kage’s hands, feet and neck were tied, the clothes could not be taken off, so he had to cut them with his saber, but one of the soldiers yanked violently and tore the clothes off Kage’s body!

In this operation, the soldiers of the Special Operations Brigade had suffered many casualties, so how could these soldiers be too kind to Cage? If they didn’t have to interrogate him to get some information out of him, these soldiers would have wanted to kill him right now!

Immediately, Cage was naked in front of everyone except for his feet, which were still wearing his shoes!

Cage shouted in anger, “Bastard! I’ll kill you, I’ll tear you apart!”

He struggled desperately, but his limbs and neck were tied with straps that allowed him very little movement at best, so how could he possibly break free?

Cage was struggling and hissing with rage, but the soldiers in the room were amazed, all staring at Cage with eyes wide open and faces clearly stunned to the core!

“This is .....

“A monster! This is a monster!”

“Look at it, what is it?”

.....

Even though they were in a disciplined special combat brigade, these warriors couldn’t help but be astonished after seeing Cage’s naked body, and they couldn’t even help but let out cries of amazement and murmur!

In fact, it was no wonder that these warriors felt so astonished, it was because the scene before them was so astonishing that even Xiang Yongzhan could not help but freeze for a moment after seeing it.

— At this moment, after removing his clothes, the crowd realised that Cage’s body was actually so grotesque, with muscles that were angular, but too angular.

Where there should be muscle, Cage’s body was extraordinarily muscular, but where there shouldn’t be muscle, it was just skin covered in bone!

For example, on Kage’s ribs, there was not a single muscle to be seen, and even dark silver bones could be seen faintly peeking out from beneath the special flesh!

Ji Feng knew that Cage's bones were actually silvery white, but they only appeared dark silver because they were separated by flesh and skin.

Kage's arms, as well as his abdominal and pectoral muscles, were exceptionally well-developed, and just by looking at those lumpy muscles, one could imagine what explosive power they contained. Not to mention the fact that his flesh is so much more resilient than normal!

Looking at Cage's two legs, the same thing was true.

Both his thighs and calves were lumpy and muscular, but below his thighs and hips and waist, they were extremely bony, but underneath the flesh of his waist, there were several black strips connecting his waist to his thighs and down to his knees, and then down to his ankles!

The black strips were as thick as an adult's thumb and were wrapped in flesh, so it was hard to see them, but the taut black strips looked like the large tendons of an ordinary human being. Only, if the long black strip was the big tendons of Kage's body .....

It was ridiculously thick!

The thighs and calves were equally muscular, and at the knee between the thighs and calves, which was also skin and bone, several black strips were attached to it .....

If you just look at the muscles on Cage's body, it's definitely more powerful and shocking than some bodybuilding practices. If you look at Cage's bones, it is simply like a person who has been bedridden for years and is thin and completely skin and bones.

This kind of body type really froze the warriors present.

But what made them even more dumbfounded was that Kage's lower body, there was really nothing that a man should have, it was empty, there was only a slightly protruding bone, about the size of two adult palms .....

The kick that Xiang Yongzhan just kicked, I'm afraid, was on top of this bone!

Being surrounded by so many people and still naked, Cage was so humiliated that he roared, "Bastards! You fucking yellow-skinned monkeys, I'll break your necks!"

One of them, without saying a word, went up to Cage and hit him in the ribs with the butt of his rifle, which hit him with a bang, as if it had hit a rock.

The warriors looked at Cage even more strangely, with a hint of alarm, this monster, was much more powerful than the transformers they had seen before!

"..... What a fucking monster!"

For a long time, Xiang Yongzhan couldn't help but exhale a breath, "Ji Feng, have you ever seen this kind of transformer before?!"

Ji Feng shook his head, "No, I haven't seen one. The transformed man I saw before wasn't like this at all, look, the skin on his body is very tight, you could even say it's tensing up, and there are these black things, they serve to connect the muscles all over his body and can be used to generate force very well, they sort of act as big tendons."

Xiang Yongzhan nodded and said, "That's right. Look at his joints, there's this black stuff on every joint, this stuff is not just to connect the muscles, I'm afraid it's also to protect the joints."

Ji Feng nodded, "Seriously, now I want to study his body before interrogating him, this kind of modified human, it's really unheard of!"

This Kage in front of him was definitely stronger than any Transformer Ji Feng had ever seen before, there was no doubt about that, and his body was definitely modified better than other Transformers, whether it was a perfect transformation or not, Ji Feng didn't understand their standards, but at least with the way things looked now, Ji Feng felt that Kage could definitely kill them in seconds if he took on a former advanced Transformer!

Metal bones, skin and flesh that were tens of times stronger than ordinary people, and these big tendons that were surprisingly thumb-thin ..... No wonder Cage's strength was so strong, at that time, if Ji Feng hadn't used a bio-current whip, he wouldn't have been able to subdue him in a short time!

Instead of saying that this is a monster that is not human, it would be better to say that this is an extremely terrifying monster that has been transformed with technology!

While Ji Feng was shocked, he was also shocked by the level of technology in the dynasty.

Now he suddenly remembered what Luo Qiu had said and couldn't help but secretly wonder, Dynasty, what kind of organisation was this? What was the purpose of their founding this organisation? Who, exactly, had created this organisation?

And, where exactly did their technology come from?

Ji Feng looked at the laser gun in his hand and suddenly his heart shook as he thought, "Could it be that when the Gamma Galaxy was destroyed, there wasn't just one intelligent brain that came to Earth?! Otherwise, why are the trajectories of the two so similar, the Gamma Galaxy has a laser gun, the Dynasty likewise has a laser gun ....."

"Ji Feng! Ji Feng!"

Suddenly, Xiang Yongzhan's voice interrupted Ji Feng's thoughts, "What are you thinking about so lost in thought, you didn't respond even after calling you twice?"

Ji Feng smiled and said, "Nothing, just thinking about some things."

As he spoke he looked at Cage who was still snarling and hissing in anger and said, "Alright, let's start the interrogation, Old Xiang, are you ready?"

Xiang Yongzhan nodded and said, "It's all arranged, it can start anytime."

Ji Feng said, "Then we'll start now."

Xiang Yongzhan then nodded in agreement, "Everyone listen to the order, wait outside the door, no one is allowed to come in without my order or an emergency!"

"Yes!"

All the soldiers in the room answered at the same time, then quickly turned around and split into two teams and left the room.

At this point, only Ji Feng and Xiang Yongzhan were left in the room, and of course, there was a hissing Cage who was struggling desperately, causing the iron frame that was holding him in place to clatter with vibrations.

“Yellow-skinned monkey, if you can, let’s fight one on one, I can break your neck with just one hand!” Cage yelled.

“When I grabbed you, did anyone help?” Cage spoke in English, and Ji Feng returned the same in English, sneering.

Cage froze, and then he growled, “That was a sneak attack, you used some weird way to sneak up on me, otherwise I wouldn’t have lost!”

Ji Feng said, “Well, whatever you say, but the result now is that you were caught by me, the initiative is now in my hands, and you, as a transformed monster, now either cooperate with me or die!”

Cage then froze, indeed, no matter if Ji Feng had used some despicable means or not, but the result now was that he had become a prisoner.

“Listen!”

Ji Feng said, “As a member of the dynasty, you should know how our Huaxia military will treat you .....”

Cage roared, “If you dare to do anything to me, I will die with you!”

Ji Feng said, “Dying together, is that it? You mean the biological bomb inside you?”

Cage was immediately shocked, “How do you know?”

Ji Feng said, “We don’t know nothing about dynasties! Think about it, since we know that you have a biological bomb inside you, yet we still dare to do this to you, it means that we have a way to control this bomb, the same way we have a way to control you! As you probably know, there is now a drug that will not have any effect on your body, but can act directly on your brain .....”

Ji Feng pointed to his temple, “This drug can paralyze the nerves in your brain, and in turn your mind will not be under your control, at that time, you will answer whatever we ask you, and you will become an idiot afterwards!”

“Shameless! Bastard!” When Cage heard that he was going to turn into an idiot, he roared in anger.

Ji Feng coldly said, “If you curse again, this drug will now be injected into your brain, do you want to try it?!”

“.....”

At once, Cage’s voice came to a screeching halt.

Xiang Yongzhan watched from the side, thoughtful, the corners of his mouth pulled up in a slight curve, it looks like there’s a game!

Campus Master Chapter 2506

“Shameless yellow-skinned monkey!”

Perhaps feeling intimidated by Ji Feng’s words and losing face, Cage couldn’t help but yell low, “If you have the guts to let go of me now, I’ll make sure you know what it’s really like to have your neck snapped!”

Ji Feng glanced at him and said in a cold voice, “It’s true that I don’t know what it’s like to have my neck snapped, but I do know what it’s like to become an idiot! I’ve heard that there are some countless rare and weird places in this world, and what is most needed there should be a misogynistic monster like you .....

Cage cursed angrily, “Yellow-skinned monkey, shameless!”

Ji Feng just shook his head and laughed: “That’s all you can curse over and over again, is it? Well, it seems that you don’t have any new tricks, so let’s stop here, someone, bring over the medicine and inject our Lord Cage .....

As soon as Cage heard Ji Feng say this, a look of fear flashed in his eyes and he shouted, “Stop it! Damn it! You damn yellow-skinned monkey, you dare to do this to me, I will not let you go!”

Ji Feng, however, ignored him and waved directly to a soldier, who understood and saw a sly wink from Xiang Yongzhan, who then immediately turned around and went out, and a moment later, he came back, with a thick syringe in his hand.

Looking at the needle, which was much thicker than an embroidery needle, Cage, who was angrily cursing yellow-skinned monkeys, damn it, hell, etc., suddenly stopped his voice abruptly.

Ji Feng smiled, took the syringe from that soldier’s hand and asked, “It’s the amount for five people, right?”

The soldier said, “No, because this man is a monster, much stronger than ordinary people, so we increased the dosage!”

Ji Feng frowned at once and said in a deep voice, “Increased the dosage again? Didn’t I say that the effect of this drug is quite powerful, if we increase the dose again, maybe this one hit will kill the person!”

The soldier didn’t dare to speak.

At this moment, Xiang Yongzhan laughed, “There’s nothing to be alarmed about, just kill them. Just study them!”

Ji Feng said, “But we still need to get some information from his mouth.”

Xiang Yongzhan laughed, “That’s fine, didn’t we capture Luo Qiu? He’s already explained quite a lot, and he’s definitely going to completely surrender next, so it doesn’t matter if we want this monster or not now. Anyway, we’re only injecting this monster with this drug to verify if what Luo Qiu said is true.”

Ji Feng asked, “Then what if it’s confirmed from this monster’s body that what Luo Qiu said isn’t true?”

Xiang Yongzhan said without hesitation, "Then we'll kill both of them together as we said before! If it's confirmed that what Luo Qiu said is true, then kill the monster, we don't have the food that transformers like them need anyway, and they won't survive long in our hands."

Ji Feng glanced at Cage out of the corner of his eyes, thought about it slightly and mused, "Fine! Let's do it then."

Xiang Yongzhan nodded and said, "You carry it out."

"Mm."

Ji Feng nodded his head.

Afterwards, he took the syringe and aimed it at Cage's head, while slightly turning his head sideways to the warriors on his left and right, "You two, hold his head in place, I want to inject the drug directly into his eyes ....."

"Yes!"

The two warriors next to him immediately nodded in response, and they held Cage's head down at the same time, one on the left and one on the right.

Cage saw that Ji Feng was holding the syringe, the needle was actually aimed at his eyes and was getting closer and closer, looking at Ji Feng's stance it seemed that he was ready to stick it in, Cage was immediately terrified and struggled desperately, while yelling, "Stop! Damn it! You can't do this to me, I'm an Englishman, you can't do this to me ....."

Ji Feng laughed: "Why can't I do this to you? So what if you are an Englishman? Does anyone know that you've been captured by us? And does anyone know that you're dead?"

Cage was terrified and he struggled desperately, "No! Don't do this! You can't ....."

Ji Feng, however, said to the two warriors, "Secure him, don't let him move around, or I can stab him to death with one blow!"

The two warriors immediately fixed Cage even harder, but anyone who looked at such a large syringe is about to poke towards their eyes will definitely be scared out of their wits, Cage is also no exception, has long been scared loudly roar, desperately struggling.

Ji Feng said loudly, "Hold him!"

Two more warriors came over and fixed Cage's head. At this time, Cage couldn't carry it any longer, and immediately shouted, "NO! I'll tell you everything!"

Ji Feng said, "Don't be afraid, this thing won't hurt your eyes ....."

"Damn it, don't think I can't understand Chinese, this drug of yours will turn me into an idiot ....." Cage said angrily and somewhat frightened.

"Heh!"

Ji Feng then laughed, he knew that Cage could understand Chinese, because just now when he was talking to Xiang Yongzhan, Cage had some vague differences, and then he deliberately asked the soldier to get the syringe and exaggerated, as a result, there was a glimmer of fear in Cage's eyes.

Ji Feng immediately concluded that Cage must know Chinese, but he did not reveal it, but continued to scare Cage, because, he wanted to get some different information from Cage's mouth!

"In that case, are you really willing to talk?" Ji Feng asked.

Cage said, "You take this away from me first, and as long as you promise not to hurt me, I'll tell you all, for God's sake!"

Ji Feng smiled and said, "No problem, as long as you cooperate, I promise not to hurt you!"

Cage added, "After I'm done talking, you're going to let me go!"

Ji Feng immediately just shook his head and smiled, "Do you think that's possible? I can't do that!"

Cage said, "Damn it! If you don't let me go, others will still hurt me ....."

Ji Feng tanned: "As a reformer, you're not even afraid of bullets hitting your body, but you're actually so afraid of others hurting you? How can others hurt you?"

Cage suddenly stopped talking.

Ji Feng said, "Releasing you is impossible, but if you are very cooperative, our Chinese military is also very welcome, moreover, now the Chinese military is very eager to eradicate the organization Dynasty, I think you should be able to help in this regard, right?"

Cage's face suddenly changed: "Eradicate the dynasty? God! That's absolutely impossible, you guys can't do it ....."

Ji Feng asked, "Oh? Why can't you do it?"

Cage said, "The dynasty is too powerful, and your Chinese technology is too backward to be a match for the dynasty!"

Ji Feng smiled and said, "But we have millions of troops ....."

"Hell! You don't know anything about dynasties, their technology is so advanced that you can't imagine, they can build a terrifying army at any time if they want!" Cage said.

"Is that to create modified people like you?" Ji Feng asked.

Cage said, "That's right! But not only that, there is a lot of technology that you can't imagine, and weapons ....."

With a smile on his face, Ji Feng said, "You don't need to worry about these, no matter how powerful an organization is, it definitely can't compete with a country!"

Cage said, "That's because you don't understand dynasties, although Huaxia is huge, it also has huge enemies!"

Ji Feng immediately frowned, his heart moved and asked thoughtfully, "You mean that the Dynasty might have cooperation with some countries? Or, the dynasty itself is an organization formed by some or certain countries?"

Cage said, "I don't know. I only know that Dynasty is very scary and has cooperation with many countries, and there are people from Dynasty in almost every country, and there is no organization that can fight against Dynasty."

Ji Feng laughed: "Well, even if what you say is true and China can't get rid of the dynasty, but have you considered one thing, you are in our hands now, we can't eradicate the dynasty but we can destroy you! But if you cooperate, maybe you will gain some freedom!"

Cage was silent at once, after saying so much, this one sentence of Ji Feng's spoke to his heart. Yes, the dynasty was powerful, but no matter how powerful it was it couldn't protect him anymore, instead it was the weak China that could exterminate him at any time .....

"I need energy!"

Cage said, "Without energy, I will die, so I need your promise not to kill me, give me energy ....."

Ji Feng asked, "What type of energy?"

Kage said, "I don't know, it's a liquid, it's blue and red ....."

Ji Feng nodded slightly and said, "Don't worry, we have caught many of the dynasty's transformers before and have obtained some energy, and have been researching them for a long time and should have come up with results, so the energy you need should be provided to you!"

Cage, however, listened with a completely unsure heart, "No, I have to get the energy first, and then I will tell you some news."

Ji Feng slowly shook his head, smiled and said, "Cage, it seems you haven't understood the situation, now if you don't cooperate, you will immediately become an idiot and then you will die, but if you cooperate, at least now you won't die, now you, have no choice, understand?"

"Damn it!"

Cage couldn't help but curse angrily, but in the end, he could only give in, because he knew that what Ji Feng said made sense, he had no choice, "Alright, you must keep your promise!"

Ji Feng said, "Even if I cheat you, there's nothing you can do about it, is there?"

Cage was instantly furious, he felt helpless that he might be cheated, but he could do nothing but say, "Then what do you want to know?"

Ji Feng deliberated mentally and said, "Nothing in particular, just talk about what you know first, for example, who is the boss of the dynasty?"

"I don't know."

Cage said, "I only know that everyone calls him KING!"

Campus Master Chapter 2507

“King?”

Ji Feng frowned, “What kind of name is that?”

Cage said, “That’s what we call him, king is the master of the dynasty, the whole dynasty is his.”

“king.....”

Ji Feng couldn’t help but repeat it again, “In your language, king means king right? In that case, when you call the boss of the dynasty, you are calling him the king? Or, translated according to the Chinese language, this dynasty’s boss, is the emperor?”

The word king is difficult to translate accurately, for example, in Chinese the word can be interpreted as meaning emperor, but in some places it can be seen as king.

King and emperor, sometimes, are not the same, and an accurate translation of the word might be helpful in understanding where the boss of the dynasty came from.

But Kage was unable to give Ji Feng an accurate answer, he said, “Maybe.”

Ji Feng asked again, but Kage was also a bit confused, because although he could understand the Chinese language, he could only understand it because he had spent a long time at the border of this Chinese language Vietnam, but to say that he could really translate it accurately, he was far from being able to reach this standard.

In desperation, Ji Feng stopped delving into this issue and put it aside for the time being, but asked again, “So, this king of yours, is he a man or a woman? What is this person’s origin, what are his characteristics and what language does he speak?”

Cage replied, “King is very mysterious, never shows up in public, every time he appears, it’s on the screen, you know, nowadays technology is very advanced, king doesn’t even need to arrive in person, his orders can be given to everyone at will.”

Ji Feng slowly nodded, he could completely understand, even many large companies had now popularised remote video conferencing and so on, not to mention dynasties.

In fact, even Ji Feng could easily convey his orders to the senior management of the Tengfei Group, which only required a simple internet video.

So what Ji Feng was more concerned about was where this KING was coming from.

However, Cage was shaking his head and said, “I don’t know, king speaks English, but the voice can’t be heard as male or female, king’s voice is like a voice from a computer ..... hell, to be precise it should be a computer synthesized voice.”

Computer synthesized voice?

Ji Feng smiled and could not help but have some slight surprise, he did not expect this king to be so mysterious, even a brilliant reformer like Cage had never seen the real face of king, not even in person, only when king gave orders was he able to see his person on the computer screen.

Why would King be so mysterious?

Ji Feng thought: "Perhaps, this King is also afraid that once his identity is exposed, it may cause some people or some countries to target him? Or maybe, King himself is a very dignified person?"

For a while, Ji Feng thought of many possibilities, and the possibility of each speculation was still very high, which made him also a bit puzzled, just knowing that this king was mysterious, but not even knowing whether it was a man or a woman, not to mention the origin of king or other information.

"So, when you see king on the screen, does this person have any characteristics?" Ji Feng asked again.

Cage froze, "Characteristics?"

Ji Feng nodded and said, "For example, is this person very stout, or very petite? When King was speaking, did he have certain special ways of speaking, for example, did this person use certain words and so on?"

Cage thought for a moment and said, "I don't know."

Ji Feng frowned: "Don't know? Very well, it seems that you never want to know ....."

Cage was instantly scared and panicked, "Hell! I really don't know! King only shows his head every time he's on the screen, but his face is still wearing a mask, so you can't see his face at all ....."

"Him?"

Ji Feng sharply noticed the information flowing from Cage's words and immediately asked, "So, you still know some information?"

Cage froze: "What did you say?"

Ji Feng said, "When you were addressing King just now, but you called him 'he', so that means he is a man?"

In English, addressing a man is different from a woman.

Kage said at once, "I don't know, but the leader of such a powerful dynasty would be a man, right?"

When Ji Feng heard him say this, it dawned on him that this was just Cage's own conjecture.

But this is normal, if it were anyone else after learning how powerful the dynasty is, the first thought I'm afraid would be that this KING should be a man, after all, in comparison, the top experts in many fields are men, even in areas where women are better at, such as cooks, or tailors .....

However, Ji Feng would not be so arbitrary, so he skipped the topic and asked, "In that case, you don't know anything about your leader other than the title KING?"

Cage thought for a moment and nodded, "Yes."

Ji Feng nodded slightly and asked again, "Well, since you don't know anything about king, let's talk about dynasty, you are in the organization dynasty, so introduce us to it!"

Cage asked, "What do you want to know?"

Ji Feng said, "What you know, I want to know, let's do this, let's start with when you entered Dynasty!"

Cage said, "Alright! Actually, I wasn't from Dynasty before, two years ago, I was just an employee of a farm in England, damn it! I blame that bastard Bill, he was supposed to deliver that day, but I lost a bet to him, so he asked me to deliver ....."

It turns out that two years ago Cage was an employee of a farm in England and had to deliver to a milk processing plant in Bill's place because he lost a bet to a man called Bill, who was also an employee, but on the way there there was a little car accident and because he was in a bad mood, Cage cursed and got into a confrontation with the other man, during which Cage was knocked unconscious.

"When I woke up I realised I was in a white room that had no windows, just a small door and was cold everywhere, and God, I can't believe I was kidnapped!"

Cage said, and could not even help but show a hint of fear in his eyes.

Ji Feng, however, noticed that while Cage's emotions were fluctuating, his face was barely expressive. Ji Feng secretly kept an eye out, but didn't move, he just asked, "And then what?"

Cage said, "And then ..... I was taken out by two people, it was a long corridor, God, I saw a lot of people, each of them was locked up in a room, even some of them had several people locked up in the room... .."

When Ji Feng heard this, he immediately became more attentive, from these details he could probably imagine the scene, also listening attentively was Xiang Yongzhan, who was not only listening, but also jotting down something in a book from time to time, next to the soldier who was recording with a DV.

According to Cage, he only found out later that it was someone from Dynasty with whom he was involved in a car accident, and as a result his swearing angered the other side, so he was caught here, where he would be subjected to a kind of scientific transformation!

Cage was terrified, but he was unable to escape and had no way to resist, so he was at the mercy of the men.

He was terrified and tortured, and he saw many people like him being transformed, but many of them were unsuccessful and were then destroyed.

Only later did Cage learn that they had been transformed in an underground base in the dynasty.

Ji Feng stood there quietly listening without any mood swings, even when he heard Cage say that Dynasty had captured many people for inhumane transformation, and even those who did not succeed were directly destroyed, he did not have any mood swings, only his eyes were fixed on Cage's eyes, because he wanted to make sure if Cage was lying.

"Where is this underground base?" Xiang Yongzhan, however, suddenly opened his mouth and asked.

Cage said, "It's under an island."

Xiang Yongzhan asked, "Exactly where is it?!"

Cage said, "I don't know. When we go out from the base, we are blindfolded and also have our ears plugged, and we are not allowed to go free until we are on land."

Xiang Yongzheng asked, "Can you come up to the top of the island?"

Cage said, "Occasionally you can, but you can't have many people up there together, only twenty people are allowed at a time, and you are not allowed to leave the forest boundary of the island, otherwise you will be captured and destroyed on the spot afterwards."

Ji Feng frowned and asked, "Since you are not even allowed to cross the border of the forest, how did you know you were on an island?"

Cage said, "The sound of the waves! You can hear the waves in the forest too! And every time I left the base, although I was blindfolded and my ears were blocked, I could feel that I was on a boat ..... or in a submarine, but definitely at sea and would be sailing for a long time, only the sea is so vast!"

Ji Feng said, "You're quite clever!"

Cage then got a little smug, "Of course, I was the highest paid employee on the farm, that bet must have been Bill cheating ..... damn it, if it wasn't for him, I'd be ..... now"

"Alright, alright!"

As soon as he saw Cage about to curse, Ji Feng immediately waved his hand and said, "Go on, tell us everything you know about the dynasty!"

Cage then said resentfully, "After being reformed, I was sent here with Luo, oh no..... where am I now? Am I still around Newmarket?"

Obviously, Cage only now suddenly remembered that he had been unconscious for some time before, would this be the same as the last time he was caught by the dynasty, when he woke up, he was already in a distant place?

Ji Feng said, "Now I'm asking you, not you asking me!"

Campus Master Chapter 2508

Being blocked back by Ji Feng's words, Cage was about to get angry, but when he saw Ji Feng's ice-cold eyes, he couldn't help but give a jolt and swallowed back the curse that was on his lips!

Ji Feng coldly snorted and said, "Cage, I hope you can cooperate enough, or else ....."

The first time I saw you, I said, "Damn it! I've cooperated enough!"

Ji Feng didn't bother to argue anything more with him, but nodded slightly and said, "I hope you've really cooperated in good faith. Well, let's continue with the dynasty thing."

Cage was stunned, "What else?"

Ji Feng said, "For example, what's going on with Luo Gnarly, the 'Luo' you're talking about."

Cage was a little hesitant when he heard that and asked, "Haven't you already caught him? Just ask him what you want to know, ah, he must know more about him himself than I do ....."

Before he could finish his words he was interrupted by Ji Feng: "Of course we have already asked him, but yet, I don't know if he is sincerely cooperating with us, that's why I have to ask you again, if your answer is different from his, then ....."

Ji Feng suddenly grinned, "One of you two is going to be unlucky!"

He said, he shook the large syringe in his hand, which was almost as thick as a baby's arm, and although his face was smiling, there was no trace of laughter in those eyes, instead, they were filled with an icy cold look.

Cage was immediately so frightened that he couldn't help but shrink his neck, but was immediately strangled by the belt around his neck, and he hurriedly straightened his neck again, which was very comical.

However, Cage did not dare to be the slightest bit slack about Ji Feng's words and hurriedly asked, "Then what do you want to know about Luo?"

Ji Feng said coldly, "Everything about him, I want to know."

Cage could only say honestly, "Well, I don't know much, but I'll tell you all ....."

The corner of Xiang Yongzhan's mouth couldn't help but pull up a curve when he heard this, and he sneered in his heart. This Cage was an employee of an English farm, so had the kind of kind of cunning that was unique to the locals, as well as some small shrewdness, and as soon as he heard Ji Feng ask him about Luo Qiu, he seemed to suspect that Luo Qiu had not been caught.

Only, while possessing that cunning, Cage hadn't become bolder because he had turned into a powerful reformer ..... Perhaps Cage had been bold, but because he had now fallen into their hands, that innate small farmer's timidity had returned.

Therefore, he could only honestly cooperate with Ji Feng.

"Luo is the chief instructor of that island base!" Kage's first introduction to Luo Gnarly made Ji Feng and Xiang Yongzhan's hearts amazed at the same time, "At the same time, he's also a military officer in Southeast Asia!"

"What the hell?"

Xiang Yongzhan immediately raised his eyebrows and drank, "A military official?! Luo Qiu is merely a lackey of the dynasty, since when did he become a military official?!"

The so-called military officials are those who are engaged in military diplomacy in the diplomatic field, usually in embassies abroad, responsible for gathering intelligence and so on in various aspects, and responsible for cooperating with ambassadors abroad in the military field to do their job better.

And this, only a country or a region can have military attachés in embassies!

The dynasty is just a secret underground organisation, when did it actually have military officers? And a so-called military attaché for Southeast Asia?

Are they treating this organisation like a country?

Kage looked at Xiang Yongzhan with surprise and said, "The dynasty is so powerful, what's so strange about having military officers?"

Xiang Yongzhan instantly just choked.

Indeed, to someone like Kage, the dynasty seemed to be extraordinarily powerful, one could even say that it was so powerful that it was not even unusual to have military officers .....

Cage, however, seemed to have realized something and looked somewhat suspiciously at Xiang Yongzhan, then at Ji Feng, and then he shut up!

Ji Feng secretly screamed in his heart, Cage must have realized something, he immediately said, "Cage, you dare to lie!"

Cage was stunned, "What?"

Ji Feng drank with a cold face, "Luo Qiu clearly said that he himself was one of the heads of the dynasty around Southeast Asia, how come he's a military officer again?"

Kage said at once, "What he said is true, Luo is indeed one of the people in charge in Southeast Asia, he is a military officer, of course he is in charge."

Ji Feng's eyes immediately glared, "But why are you and Luo Gnarly saying different things? I didn't hear the term military officer in his mouth! Cage, are you sure you're telling the truth?"

Cage said, "Of course it's true!"

Ji Feng coldly snorted, "I have to remind you, now you and Luo Gnarly's words are already incorrect in one place, if there are any more contradictions in each other next, what will be the consequences, I don't need to remind you again, do I?"

The first time I saw you, I was in the middle of a fight.

Ji Feng said in a cold voice: "This time forget it, but there will be another time ..... hum!"

Cage is angry and anxious, he obviously said the truth, but these two people are nothing, but also at any time can be their own life, Cage is really angry, but now small life in the control of Ji Feng, he did not dare to get angry, can only force suppress the anger, said: "I said all the truth!"

Ji Feng impatiently waved his hand and said, "All right, all right, go on."

Only then did Cage continue to speak, only that his eyes were still more or less resentful and reluctant, but seeing this result Xiang Yongzhan was already secretly glad, fortunately Ji Feng reacted quickly, preempting Cage's reaction before he could, and directly berated Cage for lying, as a result, Cage was immediately frightened into confusion, and no longer had the effort to think about his own words just now.

Otherwise, I'm afraid that if I had said something out of the blue, Cage would have realised that Luo hadn't been caught, and the conversation might not have gone on.

Xiang Yongzhan also found the advantage of this kind of conversation, through this kind of conversation, from many details can infer or directly imagine some situation of the dynasty, this is better than injecting Cage with neurotoxin and then a slab of interrogation!

Although it was possible that Cage was telling lies in the middle of this, that would be embellishing himself, I'm afraid, and he certainly wouldn't dare to lie about the introduction of Dynasty and Luo Qiu.

Xiang Yongzhan secretly reminded himself to remember to keep his temper under control; this English peasant was timid but had the kind of cunning that belonged to him.

"Luo is the military attaché for Southeast Asia, responsible for liaising with allies in the military field in Southeast Asian countries, and for maintaining these alliances, and cooperating with the king's operations in China as well as Southeast Asia."

Cage said, when he said the title of the king, he used Chinese, but the tone of his voice was rarely raw and strange, he obviously didn't say much!

Ji Feng's eyes narrowed at once, "Have you met the king?"

Cage shook his head, "No, I haven't met him. Only seen him in the video too, he's also wearing a mask, I don't know what he looks like!"

Ji Feng immediately asked, "Then at what time did you meet on the video?"

Cage said, "Just a few months ago, he ordered Luo to mobilise a group of men for him to use!"

Ji Feng and Xiang Yongzhan exchanged a glance without a trace, when Cage said this, it all connected, the king, Luo Qiu, the dynasty .....

"So, the king's position in the dynasty is much higher than Luo Qiu's?" Ji Feng asked.

"Of course!"

Kage said rightfully, "The king and the European duke sir are equal, Luo is only a military official, how can he compare to the king!"

"Duke ....."

Ji Feng pondered for a moment and asked, "The Duke is also a member of the dynasty?"

Cage said, "Of course! Mr. Duke has the same status as the King, only that the King is in charge of China and Southeast Asia, while Mr. Duke is in charge of Europe."

Ji Feng immediately asked, "Then why is the title different?"

Cage said, "It's because the regions where they are located are different. I once heard Luo say that the title of king has a very unique meaning in China, Luo said, king is our master, then the king is a party ..... a governor."

Ji Feng's eyebrows however had tightened up: "It's a party of vassals, right?"

Kage nodded at once: "That's right that's right! It is a party ..... a party vassal!"

The Chinese language was still a little too difficult for Kage.

A party of vassals!

Xiang Yongzhan could not help but sneer, he really did not expect that the king actually had such a big origin, such a prominent status and identity!

Ji Feng asked again, "In that case, the dynasty has people in charge in every part of the world?"

Kage said, "Maybe so, I only know some, but not all."

Ji Feng nodded slightly and suddenly asked, "Does the king have a lot of power?"

Kage said, "Of course, Luo said, the king is trusted by King, and has a lot of power in Asia, especially in China and Southeast Asia!"

Ji Feng then nodded thoughtfully, although it was indeed a bit of a waste of time to interrogate Kage in this way, Kage's words provided Ji Feng with a great deal of information.

First of all, Ji Feng knew that the boss of the dynasty was a man called king, although he didn't know the origin, he didn't know if it was a man or a woman, but at least he knew this man's code name, or rather his name!

I don't know what level it is further down, but at least, someone at the level of the king and his men would be a vassal, or an ambassador for that matter.

A person like the king is extremely powerful and has direct access to king, and the king is trusted by king.

This means that there must not be much hierarchy between the king and the king.

If the system of ancient Chinese dynasties were to be followed, I'm afraid that underneath king would be the king and his men, who would be assisted by so-called 'military officials' like Luo Qiu, who would be responsible for dispatching men and for military and operational matters.

In this way, the framework of king's dynasty ..... was formed!

Campus Master Chapter 2509

Kage's introduction left a sinking feeling in the hearts of both Ji Feng and Xiang Yongzhan.

The dynasty was really too powerful!

This organisation could even be said to be a worldwide organisation, not only did it have a strong economy to back it up, it even had special 'military officers' who were directly responsible for intelligence and military operations!

In fact, on the whole, the dynasty has long since formed a very tight system, it really is like a dynasty in general, no wonder it dares to be called by that name!

What's more, no one knows who the boss of this organisation, KING, is yet, let alone where it is!

According to Cage, it's surprising that a reformed man like him doesn't know exactly where he was captured and from where he came out, even if all he knows is that his boss is Gnarly Lo, and beyond that is a regular supply of food – the energy that Cage needs.

In that case, what they had learned about the dynasty up to now was not even the tip of the iceberg!

Ji Feng then asked a series of song questions, all of which Cage answered honestly, but regrettably, Cage was basically unable to answer some of the key questions that Ji Feng asked.

For example, who actually did the transformation for him, what means were used and so on, Kage surprisingly did not know!

He couldn't even say what was going on with his body!

This made Ji Feng and Xiang Yongzhan feel even more chilled, the dynasty's actions were really too thorough and cautious, even to their own internal personnel are extraordinarily secretive, let alone outsiders, even more so, don't want to know the dynasty's situation.

“What are you looking for when you send people inside the primeval forests of my China?”

Eventually, Ji Feng asked about this operation of the dynasty.

Cage said, “I don't know.”

Ji Feng frowned: “Don't know?”

Kage said, “I asked Luo, but he said that what we were looking for was something that would be good for me, and if we could find it, it might make my body stronger!”

Ji Feng's brow then couldn't help but frown, “Cage, do you know that if you lie to me .....”

Cage immediately said sharply, “Hell! Everything I said is true!”

Ji Feng stared at him for a while before he nodded slightly and said, “I hope you're telling the truth.”

After asking all the questions he wanted to know, Ji Feng then turned around and asked, “Old Xiang, is there anything else you want to ask?”

Xiang Yongzhan then pointed to the few sheets of paper in his hand, which were the information faxed over from above, and already the things he wanted to know on them, “There are also these.”

Ji Feng nodded and was about to ask Cage when Xiang Yongzhan suddenly said, “Wait.”

He turned his head to a soldier and said, “Go and see if the connection is ready!”

The soldier immediately answered and went out, and Ji Feng asked, “Old Xiang, what is this link you speak of?”

Xiang Yongzhan said, “I'm going to go directly through the internal link and let the top see our interrogation, how about this, it's better for me to ask!”

Ji Feng was an outsider after all, although he was now nominally a special advisor to the military, but after all, he was not a member of the military, so it was more prudent for Xiang Yongzhan to ask.

“No problem.”

Ji Feng agreed readily and reminded him again, “Don’t rush.”

Xiang Yongzhan then nodded knowingly, he knew that Ji Feng was afraid that he would say the wrong thing in a moment of haste and cause Cage to be alerted, he had already made a mistake once before, so how could he do it again?

Soon, the soldier quickly walked in and said, “Captain, it’s ready.”

Xiang Yongzhan nodded and said, “Very well, let’s begin!”

About half an hour later, Xiang Yongzhan finished asking all the questions, which also included some impromptu questions from the end that was connected to Xiang Yongzhan, and Cage also gave his answers honestly.

“There are no more questions, right?”

When everything was over, Ji Feng asked.

Xiang Yongzhan nodded, “All clear, you can start.”

Ji Feng then looked at Cage and said, “You’ve cooperated well and performed well, which makes us happy and we can consider giving you freedom in the future.”

Cage was instantly pleased.

Ji Feng added: “But before that, you have to think carefully again, there is still any important information that you have missed, the more you explain, the better it will be for you!”

Cage thought for a moment, then shook his head, “There’s nothing more. I’ve told you everything I know.”

Ji Feng suddenly turned pale and said, “Why didn’t you tell me where your base is near Xinma City? How come you didn’t tell me about the dozen or so ordinary people in my China who were brutally killed by your people?”

Cage was instantly anxious and wanted to say something but Ji Feng was not giving him a chance, instead he suddenly asked, “Did you have any involvement in the brutal killing of my ordinary people in China?”

“.....”

Cage froze for a moment and then said, “No, I know about this matter, but I didn’t participate.”

Ji Feng stared at him and asked, “Is that so?”

“Of course!”

Cage shouted as if he was suffering from a great injustice, “How could I possibly lay hands on ordinary people?”

Ji Feng's expression then went cold, "But those Vietnamese captives we caught said that you and Luo Qiu were both present when the brutal killing of my Chinese people took place, when you both did it, a few people were killed by Luo Qiu with a laser gun, but one of them was killed by Ji Feng with a gun, how do you explain that?!"

"That can't be right!"

Cage shouted at once, "This is slander! It's those damn yellow-skinned monkeys smearing me that Law killed your people, but I didn't! Please believe me!"

Ji Feng said in a cold voice: "When the Vietnamese captive gave an account of these issues, it was after he was injected with neurotoxin, there is no way he could have lied, who do you think I would believe more, you two?"

Cage then froze, and after a moment, he finally gave in and busily said, "Sir, this is my responsibility, but at that time I had no choice ....."

Ji Feng nodded: "I can understand that, just like I have no choice now!"

"What?"

Cage froze.

Ji Feng said, "If you are awake, you will never be able to tell us the truth 100 percent of the time, and if you live, you will not be able to face the people who died under you, so you will have to pay for what you have done!"

Cage then realised that he was about to be treated badly and he burst out shouting, "Bastard! You promised to give me my freedom ....."

Ji Feng sneered, "Do you think it's possible for you to get your freedom based on the things you've done?"

Cage roared in anger and struggled desperately, but where could he break free?

Ji Feng activated the bio-current and slapped his palm on Cage's head, quickly injecting the neurotoxin simulated by the bio-current into Cage's body, at once, Cage's struggle stopped and his roar came to an abrupt end, his body trembled slightly, but gradually quieted down.

Looking at Cage's eyes gradually becoming somewhat dazed, Ji Feng couldn't help but coldly snort, "Freedom? You don't even spare the lives of ordinary people, and you still want freedom?!"

After capturing the first Vietcong border guard battalion in the 100,000 mountains, Ji Feng learned from the mouth of that squad leader that Luo Qiu and Cage were both present at the scene when the dozen villagers who had gone up the mountain to collect medicine were brutally killed, and that both of them had done it.

Luo Qiu used a laser gun, while Cage used a regular rifle!

This was confirmed by the injuries on the dead villagers. It was because of the very strange little holes in the burnt bodies of the villagers that Ji Feng suspected that those villagers might have been killed by the laser gun, and there was no doubt that Luo Qiu had definitely done it.

But Cage did it without any overwhelming evidence, so Ji Feng simply questioned Cage in a very certain tone, and eventually, Cage got scared and admitted that he had indeed killed the villagers.

He deserved to die!

“Ji Feng, can we start now?” Xiang Yongzhan asked from the side.

“Almost done.”

Ji Feng looked at Cage’s eyes and asked, “What’s your name and where are you from?”

“My name is Cage, from England .....” Cage’s speech started to become slow, his eyes unfocused and looked confused, only knowing how to answer Ji Feng’s question instinctively.

“No more questions.”

Seeing this, Ji Feng was sure that the bio-current had worked, “Old Xiang, grab the questions.”

Xiang Yongzhan then nodded and immediately asked, “Cage, let me ask you, what exactly were you looking for in the primeval forest?”

Cage said, “Looking for a plant.”

Xiang Yongzhan and Ji Feng looked at each other, both of them were a bit surprised, they didn’t expect them to make such a big fuss just to find a plant, was it some kind of heavenly treasure?

Xiang Yongzhan immediately asked, “What kind of plant? What are its characteristics and effects?”

Ji Feng said, “Old Xiang, ask one by one.”

After being hit with neurotoxin, one’s reaction would be extremely slow, so if Xiang Yongzhan asked several questions at once, he might end up not getting a single answer.

As expected, Cage opened his mouth, but did not speak, seemingly not knowing how to answer.

Xiang Yongzhan then simply asked one by one.

“This is an unknown plant that grows underground, it is what Luo proposed to find, he said he grew up living in this mountain forest and had seen this plant .....”

“The roots of this plant can produce a kind of juice, Luo said that this juice, if used on our bodies, would make our bodies stronger and more resilient ..... at least twice as strong!”

Ji Feng and Xiang Yongzhan froze for a moment at the same time, and it was only then that it dawned on them that Luo Qiu and the others had entered the primeval forest to find what was actually a plant that could enhance the physique of transformed people.

It was no wonder that they had raised such a fuss, if that unknown plant could really double the physique of the reformers, wouldn't that mean that the strength of all these reformers would have increased drastically?!

Right now these reformers are already not afraid of bullets, if there is another drastic increase, then what a terrifying battle force this will be?

Campus Master Chapter 2510

"Ta-da-da ....."

A sudden burst of gunfire cut through the silent blackness of the night, and in the sparse lights it was possible to see a convoy of trucks and jeeps whistling past, speeding away from Xinma City .....

At the same time, at the border guard unit's residence, Ji Feng and Xiang Yongzhan had also finished their interrogation of Kage and were ready to leave.

They had learned important news from Kage's mouth – Kage, who was controlled by neurotoxin, had finally given an account of the Dynasty's underground base near Xinma City!

So, while interrogating Kage with Ji Feng, Xiang Yongzhan was the one who informed the border troops to move out and pounce straight away!

"Older brother, what do you think, can we catch Luo Qiu this time?" The duo asked Xiang Yongzhan as they walked outside.

Ji Feng shook his head and said, "It's hard to say, it depends on whether Luo Qiu will run back to the base!"

After learning the detailed address of the underground base from Kage's mouth, as well as the method of entry, the border troops had been deployed, but Xiang Yongzhan was unsure in his heart, not knowing if he could catch Luo Qiu. From what Kage had explained, Luo Qiu was definitely a vital figure!

Xiang Yongzhan gritted his teeth and said, "Even if this son of a bitch doesn't run to the base, as long as he's there, he won't be able to get away this time!"

Ji Feng said in a deep voice: "If I were him, I would definitely not run towards the base, I would find a way to inform the base on my way to escape, so that the people in the base can destroy important information and equipment, and if necessary, I can just blow up the base!"

Xiang Yongzhan was stunned at the words, and jerked to a halt turning his head to look at Ji Feng, stunned, "Blow up the base?! Does Luo Qiu dare to expose his whereabouts?"

Ji Feng nodded and said, "Although I've only fought with this Luo Qiu once, I can tell that this is definitely a cunning and ruthless person, plus his kung fu is very skillful, if he wants to escape, ordinary police or soldiers won't be able to catch him at all, so he doesn't have to be afraid of exposure at all, he can very easily find a way to contact the base on the way! "

"Furthermore, since Luo Qiu as the main character has already escaped, this side has been completely exposed, so what's the use of having this base?"

Ji Feng said in a deep voice: "So if Luo Qiu hadn't been beaten silly by me, I think eight out of ten `nine times he would have chosen to destroy the base and leave nothing for us!"

Hearing this, Xiang Yongzhan could not help but curse angrily, "Son of a bitch!"

Ji Feng said, "Now I just hope that the Border Guard soldiers are fast enough to rush in before those people destroy the base, we just delayed some time, I don't know if it's still too late!"

Xiang Yongzhan nodded slowly, "This bastard Cage, he didn't even tell us the truth at the beginning, if you hadn't used neurotoxin, I'm afraid we wouldn't have known the real way to enter the base until now!"

Ji Feng said, "It's not hard to understand, Cage knows that he has fallen into our hands, he must have kept a few hands so that he can negotiate with us, although this person is naturally timid, he has some small intelligence, he is also a bit cunning!"

Xiang Yongzhan said angrily, "Wait until I come back! If the base hasn't been destroyed yet, it's fine, if it really is, I won't be able to spare Kage when I come back!"

Ji Feng said, "Let's not talk about that right now, immediately inform the border troops involved in the war, tell them to be more careful and to be careful when entering the base!"

Xiang Yongzhan nodded and said, "That's right!"

He immediately took out his mobile phone and informed the people leading the front line, this was no joke, if those soldiers entered the base and the whole base suddenly exploded, or if there were some kind of traps inside, then the border guard forces would definitely suffer a lot of losses, and might even suffer heavy casualties!

As the two walked and talked, they soon got into a jeep.

This time, all the people used in the operation were from the border guard force. The soldiers of the special combat brigade had suffered certain casualties during the daytime and were still resting after the battle, so Xiang Yongzhan did not try to be brave.

Ji Feng likewise didn't inform Bai Zhu, he didn't even know if there was any danger in this operation, it was better to let Bai Zhu rest in the base.

"Older brother, I didn't expect that a visit to the southwest would actually involve such a large list of things, but it so happens that this main figure has not been caught yet!" Xiang Yongzhan said, "Speaking of which, this operation is considered a failure!"

"That's not necessarily true!"

Ji Feng shook his head, "On the contrary, I think we've gained a lot this time in Southwest China!"

Xiang Yongzhan asked, "How so?"

Ji Feng said, "First of all, we know the system and structure of the dynasty, and we know that the old boss of the dynasty is called king! In the past, apart from having access to a few reformers and knowing that the dynasty has a king and a young duke, what else do we know other than that? In the past, apart

from having access to a few reformers and knowing that the dynasty had a king and a young duke, what else did we know? We neither knew where the dynasty sent its people from for each operation, nor did we know what the dynasty's reformers were all about. But now, we know it all!"

Xiang Yongzhan couldn't help but nod, "That's right!"

The dynasty's structure was known, which was helpful for them to understand the dynasty's strength as well as to parse it.

Besides, knowing the system of the dynasty was almost like starting to get in touch with the way the dynasty operated, such as the fact that they moved manpower through military officials, that they had underground bases, that they cooperated with the military of some countries or certain forces, and so on, all these situations, were quite important!

"Besides, you should not forget that this time, apart from investigating the murder of those dozen villagers who were brutally murdered, there is another purpose for coming to Southwest China!" Ji Feng said.

"Eh?" Xiang Yongzhan was stunned.

Ji Feng said, "To help those villagers take revenge and carry out a counterattack!"

Xiang Yongzhan was suddenly dumbfounded.

Ji Feng said, "Now that the revenge of those villagers has been avenged, and hundreds of Vietnamese border guards have been wiped out in the 100,000 mountains or have become captives, that in itself is already a capital, and when the country wants to take this as an example, I believe it will take the initiative."

Xiang Yongzhan blurted out, "Now all that's left is to counterattack!"

Ji Feng nodded, "That's right! Make a counter-attack, hit hard, and hurt those bastards in Vietnam!"

Xiang Yongzhan gritted his teeth and said, "Not only should we hit them hard, but we should also hit them so hard that their bones are broken! I want the beasts of Vietnam to know exactly what the consequences will be for brutally killing my Chinese people and provoking China!"

"Ta-da-da ....."

Not long after the jeep had left the city, a burst of gunfire could be faintly heard, and Ji Feng and Xiang Yongzhan looked at each other at the same time.

Ji Feng said, "Crossfire! Looks like that underground base of the dynasty hasn't had time to be destroyed!"

Xiang Yongzhan said in a deep voice, "I'm afraid there are some kind of traps or special arrangements in the base, driver, speed up and get there as fast as you can!"

The driver, however, said, "Chief, we're already going very fast now, going any faster would be somewhat dangerous!"

Ji Feng glanced at it and found that the speed shown on the yardstick had reached nearly one hundred and thirty, and that was fast enough for the jeep they were riding in.

“Old Xiang, don’t worry, it won’t take long to get there.” Ji Feng said, “As long as the commanders at the front line are alert, there shouldn’t be too much of a problem.”

“The key is I’m afraid that there are still reformers inside that base, those monsters aren’t even afraid of bullets!” The rest are in the hands of Luo Qiu, and God knows if Luo Qiu has placed them all inside the base!”

The army encountering the reformers is not really scary, but it is inevitable that there will be some casualties, and this is what Xiang Yongzhan is most worried about.

Ji Feng said, “The reformers are also fine, although their bodies are not afraid of bullets, their heads are! Besides, bombs and grenades are enough to blow them to pieces! The fighting strength of the border troops shouldn’t be weak!”

Xiang Yongzhan said, “Let’s hope so!”

Xiang Yongzhan’s fears proved to be right, when Ji Feng and the others arrived at the scene, the battle had practically all come to an end, there were corpses everywhere, and there were soldiers who had been wounded and the medical staff were dressing their wounds.

But what Xiang Yongzhan learnt was that there were indeed reformers in the base, but none of them had come out, instead they were hiding inside the base.

The entrance to the base was at the back of a stone building, and one of the chiefs in charge of the front line command said, “Captain Xiang, according to the explanation of the captured tongues, there are at least four reformers inside now, and there is a large amount of potent explosives inside, once detonated, it is enough to blow up the whole area!”

Xiang Yongzhan and the others stood at a distance, looking at the stone building, and asked, “What else is inside besides these things?”

The regimental commander said, “There is said to be some food and weapons as well.”

“Food?!”

Ji Feng frowned for a moment and asked, “Is there any food for reformers?!”

The regimental commander shook his head, “I don’t know, I’ll go ask now.”

He returned a moment later and said, “There really is reformer food in there too! According to the captives, the reformer food is kept in a special warehouse with a combination lock on the door, and usually only two people can get in, Luo Gnarly and Cage .....

“No wonder those reformers are guarding the base to the death!” Xiang Yongzhan said in a deep voice, “There’s food for them in here, if they lose that, they won’t survive long even if they escape! That’s why they must defend it to the death!”

“Then ..... we force an attack?” The regimental commander asked.

“We can’t forcefully attack!”

Xiang Yongzhan immediately shook his head and said, “There will be a lot of casualties if we attack strongly, and once we push these people to the brink, they might really blow up the whole base!”

The regimental commander asked, “Then ..... what should we do?”

Xiang Yongzhan frowned in contemplation and did not speak.

Just then, that regimental commander suddenly said, “Captain Xiang, we just received news that the Vietcong’s border battalion has moved!”

Xiang Yongzhan sneered, “I was just about to find them!”
