

Campus Master 2511

"This is still part of China's territory, right?" Xiang Yongzhan asked, "I didn't seem to see the national border on the way here, which means we're still on Chinese soil?"

"I suppose so!"

That chief said, "The national border line here is very ambiguous, the Vietcong had also threatened that this was also their land, both sides have negotiated many times on this issue, but it has been fruitless."

China's neighbourhood is actually due to historical legacy issues, or because of the covert instigation and support of some countries such as Rice, which has caused ambitious people in some of the neighbouring countries to become agitated, and as a result, the problem of unclear border lines exists between China and many neighbouring countries.

This has always been a rather thorny issue, and even high officials in general would not easily nod their heads and take a stand, or at most just say forcefully that this is our Chinese territory, but when it comes to taking further action, there is none.

So this issue is also a headache for the border guards, where to guard the national border, but this national border is not the same thing as the other side's national border, the two sides of the patrol collided, then whether to expel each other, or turn a blind eye?

These are all questions!

Xiang Yongzhan said, "No need to tell me so much, I'm not a politician, let alone a diplomat, I'm a soldier, I just know that I'm stepping on the land of China under my feet!"

That chief could not help but blush at once, obviously he was thinking too much on this issue, and it was not something that he, the chief, should worry about.

"But if it's really in the midst of chaos, I'm afraid the Vietcong's army will really come over!" The regimental commander added.

"Just to have them come over!"

Xiang Yongzhan sneered, "If they don't come over, there's really no way for this play to go on!"

Then, amidst that regimental commander's somewhat stunned look, Xiang Yongzhan began to look around, as if he was observing and looking for something.

"Order the troops to retreat!"

Xiang Yongzhan suddenly said in a deep voice, "Just leave people here to keep a close watch on the movements in this underground base, the rest of you, all retreat!"

The leader was stunned, "Retreat?"

Xiang Yongzhan nodded, "That's right! Retreat!"

The captain was stunned, "But here if we leave, will the reformers in this underground base escape?"

Xiang Yongzhan said, "Why else would we leave surveillance personnel behind?"

The chief in charge of command just choked for a moment.

Xiang Yongzhan explained, "It's useless to see that piece of building, withdraw the troops to that area, there are many buildings there, it's convenient for the troops to conceal themselves, and it's also more suitable for a surprise attack"

The more the regimental commander listened, the more wrong he was, he said in dismay: "Captain Xiang, what is convenient for concealment and sudden attack? Are you thinking of ambushing the Vietcong's border guards?"

"Correct me!"

Xiang Yongzhan said very seriously, "It's not that I want to ambush the border guards of Vietnam, to be precise, it's that I want to strike hard and beat up those motherfuckers who dare to collude with the dynasty and invade my Chinese territory!"

That chief instantly understood Xiang Yongzhan's intention, it turned out that Xiang Yongzhan really intended to use this matter to take action against the Vietnam border guards!

This was almost like trying to start a war unilaterally!

The captain opened his mouth, wanting to say something but then stopped.

Xiang Yongzhan said, "If you have anything to say, just say it, we are all on the same side, no need to be polite."

The captain said, "Captain Xiang, it's not that I don't want to teach the Vietnamese a lesson, but the problem is that if you do this now, it will probably provoke a war between the two countries! The relationship between the two countries is quite tense now, and the top has been asking us to exercise restraint, this"

But Xiang Yongzhan asked, "When did I have to start a war?"

The chief was stunned, "But this"

Xiang Yongzhan said, "It's just as well that the Vietcong don't come, if they do, then it's an invasion and I'm fighting the invaders, is there anything wrong with that? Besides, the Vietcong colluded with the dynasty to brutally kill our unarmed common people, shouldn't they deserve to die?"

"Of course they deserve to die!"

That chief immediately said, "But the question is"

Xiang Yongzhan waved his hand, "No buts, I'll take care of any problems! That's it, take the troops and retreat immediately."

But that leader said, "There is still one more problem!"

Xiang Yongzhan frowned at once: "What other problem?"

As a soldier, what he hated most was people being motherly, especially soldiers, they should behave like soldiers, that is, they should be thunderous and daring.

The captain said, "Captain Xiang, the building you pointed out just now does not actually belong to our Chinese people, but to some people who have roamed into the vicinity of New Malaysia City, the vast majority of them are foreigners, there are Vietnamese, Thais, Filipinos and some other countries who have roamed over, this place is mixed with fish and dragon, extremely chaotic."

Xiang Yongzhan frowned at once: "Hmm?"

The captain said, "The most important thing is that the gang that the Vietnamese secretly support is also in that area, if we retreat there, we will definitely expose our tracks, and then even if we really want to ambush them, it won't work as a surprise at all!"

Xiang Yongzhan nodded slowly, "So that's how it is!"

He had wronged this regiment somewhat, it seemed unfamiliar with the local area was still really tricky, he frowned and thought quickly.

"This one"

At this time, Ji Feng, who had not been involved in the discussion, but suddenly coughed, cleared his throat, looked at that headman and asked, "Isn't there any place to hide around here?"

That captain shook his head and said, "This neighborhood is too desolate, it's simply a place where birds can't shit, otherwise it wouldn't be an almost trivial zone! If this was in the 100,000 mountains, it would be really easy to hide, even if it was a bit closer to Xinma City, it would still be easy, but it's still really hard to hide here!"

Ji Feng slowly nodded, indeed, there was no place to hide in this surrounding area at all, not even some trees or lush wild grass, there was rubble or wilderness everywhere, to say that it was a place where birds don't shit really wasn't an exaggeration at all!

"This dynasty has chosen a good place to build a base!" Ji Feng couldn't help but say, "Normally, as long as you get close to this place, you will definitely be discovered, and a closer look will reveal that the buildings in this vicinity hardly have any features, even in the air I'm afraid I won't be able to find any"

"Humph!"

Xiang Yongzhan sneered, "With the help of the Vietcong who are familiar with the situation, of course they will choose the place!"

According to Cage's explanation, this base was built with the help of the Vietcong soldiers as well as some local Vietcong, only at that time those people did not know that it was going to be an underground base, and after it was built, all those who knew about it, except for some important people, were secretly taken away and became reformers.

It was because of the help of people who were so familiar with the local terrain that this underground base location of the dynasty was chosen so well.

“Retreat back!”

Xiang Yongzhan suddenly gritted his teeth, “Retreat farther and be as concealed as possible!”

It was so easy to have such an opportunity, it would be a pity to give up just like that, Xiang Yongzhan was not willing to do so.

The captain said, “But if we retreat too far, it won’t work as a surprise attack!”

Xiang Yongzhan nodded, of course he understood this, he gritted his teeth and said, “If you can’t raid, then don’t raid, my Chinese warriors can’t only win by raiding, they can take those bastards by force!”

The regimental commander immediately said, “Please give the order to the captain! Our regiment promises to complete the mission with determination!”

“Old Xiang!”

Just as Xiang Yongzhan was about to give the order, Ji Feng suddenly said, “Why do you think, at this time, the Vietcong soldiers would move out?”

Xiang Yongzhan said, “They’re wearing the same trousers as the dynasty, we’re going to eliminate the dynasty’s underground base, so of course these bastards can’t sit still!”

Ji Feng asked, “But now that Kage has been captured by us and Luo Qiu has escaped, what use is this underground base? You can’t tell me that the Vietcong didn’t get the message when our warplanes were out during the day!”

How could the Vietcong not have received the news of a warplane shooting down a helicopter at the border?

Also, where did the helicopter come from? I’m afraid we all know that!

Xiang Yongzhan frowned: “Are you saying they rushed here for another reason?”

Ji Feng nodded and said, “Either, there is something in this underground base that they have to protect, and they have to destroy it or grab it! Either that”

Xiang Yongzhan blurted out, “Luo Qiu?!”

What kind of person was so desperate to preserve the base? Either the Vietcong or the fleeing Luo Qiu, who, as a military officer of the dynasty, certainly had the ability to talk the Vietcong’s border troops into it!

“Apart from these two points, I can’t think of any other reason!” Ji Feng slowly nodded his head and said.

“It seems that there might really be something to be gained today!” Xiang Yongzhan laughed coldly, then he shouted lowly, “Order, all troops advance, pay attention to concealment!”

He smiled coldly, since that was the case, let’s fight a tough battle today!

With a decision, then the execution would be much smoother, Xiang Yongzhan was only grasping the big picture, the real command was still that of the regiment leader to come. After all, he was more familiar

with his own troops, knew how strong his soldiers were in battle, and would definitely be more comfortable in command.

The troops immediately advanced, but just at this time, Xiang Yongzhan suddenly ordered that half of the mobile equipment be left behind, and at the same time, a portion of the men would drive the remaining half of the mobile equipment to the area where the Vietcong were secretly supporting that gang, and carry out a surprise attack on that gang!

The rest of the men, all on foot!

At first, that chief was a little confused as to why Xiang Yongzhan had to make this arrangement, but after he received the intelligence that the Vietnamese border guards were speeding up their march, he realised what was going on.

Campus Master Chapter 2512

“Captain Xiang, the Vietcong border battalion has sent out about two regiments!”

When the news was received, the leader of the Chinese border guards got a bit stressed, although he was confident in the fighting ability of his troops, but his side was a regiment of undermanned men while the other side was about two regiments, the disparity in numbers between the two sides was a bit big!

Xiang Yongzhan asked as he walked away, “What, are you under pressure?”

The regimental commander nodded and said with some embarrassment, “It would be a lie to say that there is no pressure.”

Xiang Yongzhan said, “In fact, I am also under pressure, we want to give the Vietcong a good blow this time, but if in the end, instead of hurting the opponent, we end up getting ourselves killed, that would really be a joke.”

That captain immediately asked, “Then should we request reinforcements? Or send in warplanes to reinforce?”

Xiang Yongzhan waved his hand and said, “No! In war, numbers are not the main factor. Even in the cold weapon era, there were countless examples of winning with less, not to mention that this is the hot weapon era, and it is not impossible for one man with one gun to sweep away dozens of people!”

The captain nodded and said nothing more.

Xiang Yongzhan added, “In fact, this operation is not because I’m good at it, but because I have to fight!”

In order to win a battle, the commanding officer must first have confidence, so Xiang Yongzhan said a few more words to give the captain some encouragement: “Those few reformers are cowering in the underground base, there are explosives everywhere inside, our men can’t get in, they don’t come out, can they just keep on consuming?”

That chief nodded and listened carefully.

Xiang Yongzhan stepped over the gravel with one foot, his body swayed a little but quickly steadied, "So, we have to fight, because this group of Vietcong soldiers are 100% coming for that underground base, or there is something in the underground base that they have to get, or Luo Qiu has run over to the Vietcong border battalion and sent them over again! "

"But whichever is possible, there is at least one thing that the Vietcong soldiers have access to the underground base, or at least are able to talk to those transformers!" Xiang Yongzheng said, "That's all we need!"

"I understand!"

After hearing that, that regiment leader immediately knew what Xiang Yongzhan meant, he clenched his teeth: "Don't worry, Captain Xiang, our regiment may not be good at other things, but when it comes to fighting, we have never been afraid of anyone!"

Xiang Yongzhan patted him on the shoulder: "Good job, whether we can successfully take that underground base this time, depends on you and your brothers! Besides, how well this battle is fought and whether the base can be taken down, the highest levels of the military will be directly concerned!"

There was no doubt that Xiang Yongzhan's pep talk was extremely effective, and that regimental commander immediately summoned several battalion commanders to cheer him up, while giving a deadly order, while his orders were conveyed down layer by layer, and finally reached the ears of every soldier.

Immediately, the atmosphere of the whole unit was different!

When Ji Feng saw this scene, he couldn't help but shake his head and smile, this guy Xiang Yongzhan was really good at leading troops into battle!

And Xiang Yongzhan's strategy of advancing on foot had likewise worked.

"Captain Xiang, the Vietcong are coming in fast."

"The Vietcong have split into two groups, one group is taking the road and the other is taking the dirt road!"

Xiang Yongzhan said, "No matter whether they take the road or the dirt road, we also split into two teams and set up ambushes right on both sides of the road, we must catch them off guard!"

And as Ji Feng listened to that chief telling Xiang Yongzhan time and time again about the intelligence he had received, Ji Feng was curious, what exactly was the intelligence system of the Chinese military? Why could it grasp the movements of this Vietcong so accurately?

Is this by high technology? Or was there an undercover agent of the Chinese military among the Vietnamese?

Ji Feng was curious about this, but he didn't ask Xiang Yongzhan, this obviously involved military secrets, I'm afraid he wouldn't tell him even if he asked Xiang Yongzhan!

Soon, that regiment leader knew the exact route of the Vietcong, so he immediately divided his troops into two teams to ambush the Vietcong on the highway and the dirt road respectively.

The so-called road was in fact also meant to connect the two countries for easy passage, and this was the official passage built at the expense of both. And the so-called dirt road, which is actually a minor road and, to put it bluntly, a smuggling line, is a route often taken by the local gangs, but now it comes in handy!

And because the Chinese fighters were all lightly armed and lying on the sides of the road, they were surprisingly completely concealed and would not have been noticed at all if they hadn't been looking!

But if there were cars and other mobile equipment, it would be hard to say, and Xiang Yongzhan's decision was very wise!

Not long after, we saw faint lights coming from the distance, along with the faint roar of engines.

Ji Feng couldn't help but sneer as he watched, just this is still the elite border guard army of Vietnam? This kind of strutting and marching stance is simply asking for an ambush!

Of course, war is now a very unfamiliar word to many armies, and I'm sure the Vietcong border guard battalion wouldn't have thought that Xiang Yongzhan would have the audacity to risk provoking a war to ambush them, perhaps they thought they could just confront the Chinese army near the base and that would be the end of it!

But the Vietcong border battalion in their cars and lights were unaware that there were elite Chinese border guards in ambush on both sides of the road, all lightly armed, and with their guns trained on them and other weapons at the ready

When that regimental commander received the news that another Vietcong army that had taken the dirt road had also entered the ambush circle, he immediately shouted, "Fight!"

Off at this time, the Vietcong army suddenly speeded up their march, that was because he got the news that the gang they were secretly supporting, had been struck by the Chinese army, and they had to rush to their rescue as soon as possible.

So, unprepared, the Vietcong army was instantly met with a head-on blow!

"Boom! Boom! Boom!"

The next moment, a terrifying explosion accompanied by a sky-rushing fire instantly obliterated that road!

The rocket, trailing a long trail of flame, hit a jeep and instantly reduced the Vietnamese soldiers on board to a pile of rubble, along with the jeep!

"Ta-da! Ta-da-da"

"Boom boom boom!"

All the Chinese soldiers were trying to empty almost all the weapons around them in the shortest time possible, firing all kinds of attacks towards the Vietcong soldiers in a frenzy!

Submachine guns, assault rifles, hand grenades, rocket launchers, even machine guns and even machine guns!

The attacks were like a tsunami, one wave after another, terrifying as hell!

Ji Feng couldn't help but frown as he watched, and was even quite surprised in his heart. Originally, he didn't think too much of the modern army, especially the army that only carried light weapons, after all, the war scenes he had seen in the training space of the intelligent brain were too shocking.

But at this moment, he was shaken.

Although this kind of battle was not as powerful as the kind of super-powered bombardment and battle in the vast and boundless starry ocean of Starfleet, it was definitely enough to make people's blood boil and go crazy, and had enough power!

From this moment on, Ji Feng no longer had any half-hearted contempt!

Even, when he saw a soldier beside him firing madly towards the convoy on the highway while cursing madly, "Fuck you, Vietcong brats, fuck you, let you bully us, let you be arrogant again, go to hell!"

Ji Feng was instantly infected, that kind of crazy fervor, that kind of reckless fight to the death, really makes any man's blood boil.

Especially that sense of honour and belonging to fight for the country, which really can't be compared to anything else!

Ji Feng didn't say a word, he grabbed a grenade, narrowed his eyes and threw it towards a place instantly, his eyesight was needless to say, his technique was even more tricky, his throw was extremely accurate, the grenade landed in front of a few Vietcong soldiers who had reacted quickly and were already on the ground hiding.

Boom!

After a loud bang, several Vietcong soldiers were instantly sent flying!

High explosive bombs are really powerful!

Ji Feng was infected by the heat of the blood and was thoroughly involved in this ambush, both sides didn't have any extra words to say, they could only fight until one side begged for mercy or was completely annihilated!

In the distance, near the dirt road, another team led by Xiang Yongzhan, also exchanged fire with the enemy, also in an ambush

Even Xiang Yongzhan did not expect that the battle would be fought so easily!

It took less than two hours for the battle to be completely introduced, the Vietcong were killed and wounded, and the rest were all captured! The prisoners alone numbered in the hundreds!

On the other hand, the Chinese border guards only suffered a few dozen casualties between the two teams together, and most of them were wounded, even one guy, who was cold-shot by a Vietcong when he was cleaning up the battlefield, ended up being shot through the thigh and became a wounded soldier!

A great victory!

It was a great victory! And it was a one-sided victory!

The Vietcong had sent two regiments of elite border battalion fighters, but they didn't even reach their destination and were all wiped out halfway!

Afterwards, Xiang Yongzhan, after conferring with that regimental commander, decided to leave some of his men behind to escort the prisoners and interrogate some of the main captives aka commanders of the Vietcong army on the spot, and after figuring out how to enter the dynasty base, without saying a word, they headed towards the base at top speed!

"Old Xiang, I'll just lead the team down there!"

Ji Feng said, "Don't rush, there are naturally reasons why I'm going down there. Firstly, I understand Vietnamese and I already speak it well, no one will suspect me after I go down there. Secondly, if there is really any emergency, maybe I can handle it!"

He then stopped Xiang Yongzhan who still wanted to speak and led the team into this underground base of the dynasty!

Campus Master Chapter 2513

It is a hall.

The stone walls, painted with a layer of concrete, look a little rough. The beams overhead are made of reinforced concrete, and the colour is also very grey.

In the whole hall, apart from some trolleys in the middle and some wooden boards hanging on the walls, the place is empty and the floor is uneven, it looks like we have come to an underground warehouse that has been abandoned for a long time.

This was Dynasty's underground base near Xinma City!

Ji Feng brought a few people with him, posing as the Vietnam border guards to arrive here, during which he did not encounter any obstruction, and he did not see a single person until he arrived in this hall, and even there was no more sound in this except for a buzzing sound.

Simple, crude.

This was the first impression of the hall of this underground base, but in fact, Ji Feng was looking at it with his eyebrows furrowed and his eyes shining.

Ji Feng found that this underground base was very interesting!

For safety's sake, Ji Feng had activated the bio-current on his eyes before he entered the underground base, turning on the perspective function of his eyes, so as soon as he entered the hall of the underground base, his eyes could see through the walls.

The scene inside the wall caused Ji Feng's eyes to flash!

Through the layer of concrete and stones outside the wall, he saw that inside was a thick metal wall, more than ten centimetres thick!

This is not to mention that on the ground and above the head, there was also a thick layer of metal!

The walls made of stone and the floor made of cement, this is simply a cover-up!

This

It's like an underground metal fortress!

What's more, behind the wall, Ji Feng saw rows and rows of bombs, buried close to the root of the wall!

If these bombs were detonated, everything around the base would be blown to pieces, but the base would not be harmed in any way!

Seeing this, Ji Feng really couldn't help but feel awe in his heart, fortunately he didn't attack before, otherwise, as long as the transformers hiding in this base detonated the explosives, then the border guards would definitely suffer heavy casualties!

"I really have to thank those little brats from Vietnam, otherwise, it wouldn't be easy to get in!" Ji Feng secretly said, with such a metal fortress, if the reformers inside were to hold on, unless they used drilling bombs or some other tactical missiles to strike hard, they wouldn't be able to hurt this base even a little bit!

What the hell is the Kingdom doing here with such a toothache-inducing underground base?

"Go!"

Ji Feng lowered his voice and said in Vietnamese, while giving a gesture behind his back to the few warriors he had brought, signaling them not to speak, just follow him.

The few warriors nodded and didn't say anything. In fact before coming down Ji Feng had explained to them that after entering the base he would only speak in Vietnamese, and whether they understood what he was saying or not, they had to pretend to understand and nod their heads.

Ji Feng led several warriors through this wide hall and came to a wall at the back, only to find that the wall was, instead, full of eight metal doors.

"Each of these eight doors corresponds to a passage that leads to a different part of this base!" Ji Feng quickly recalled in his mind the information he got from Cage about this underground base, "The leftmost one is leading to the training ground, followed by the dining hall, warehouse, and ammunition depot respectively"

Ji Feng slowly walked forward while his mind was turning rapidly, his heart was alert. Because he used his perspective eye to scan around, but did not find where exactly the four transformers were hiding.

Ji Feng knew that this was because this underground base was said to be too big and it was difficult for his vision to reach so far.

"The control room!"

Ji Feng had a judgement in his mind, if these four reformers were going to hold on, then they would definitely have someone in the control room so that they could find out in advance if someone was attacking outside.

Just go to the control room!

Ji Feng instantly made a decision, but he didn't rush into action, instead, after looking around, he shouted in Vietnamese, "A few people! A few lords! Are you there? It was Lord Luo Qiu who told us to come!"

No one responded.

Ji Feng frowned darkly, but his face did not move at all as he shouted again, "Several lords, Lord Luo Qiu said that you should leave here as soon as possible to join him, the Chinese army is about to arrive, several lords, if you can hear us, please come out quickly, we need to leave here as soon as possible!"

"....."

Still no one answered him.

Ji Feng looked anxious, raised his hand to look at his watch, and walked around to look again, shouting, "Several lords, I know you must be able to hear me, if you don't believe me, you can send one of your men out first and let Lord Luo Qiu talk to you directly!"

"....."

Ji Feng's words did not receive a response, at this moment, Ji Feng immediately became anxious, he said loudly, "You few, hurry up and look around to see if there is any trace of several lords, we must leave as soon as possible, otherwise it will be troublesome if we are blocked inside by the Huaxia army."

Although the few warriors who followed him couldn't understand what he was saying, they were able to read his hand signals, so they nodded and started looking.

Ji Feng said to himself, "Really, we sent out two full regiments to repel the Chinese, but we can't find any trace of these lords, if we wait until the Chinese reinforcements arrive, we won't be able to leave if we want to!"

"Click!"

Suddenly, a metal door located on the wall was opened.

At the same time, a voice came from overhead, "You few, come in through this door."

Ji Feng seemed to be startled by this sudden voice and looked up in a panic, but saw a speaker at the corner of the wall above his head, from where the voice was coming.

"Go! Let's go in!"

Ji Feng hurriedly said, "A few lords are inside!"

Afterwards, Ji Feng led a few warriors to immediately walk in through the door that was opened, but in his heart he couldn't help but sneer, because this door that opened automatically was the one that led to the ammunition depot, and the fact that this door could open automatically proved that there must be someone in the control room, but it let them go to the ammunition depot

The first thing you need to do is to get to the ammunition depot. Or was it for some other reason?

But no matter which one it was, there was at least one thing: to get rid of the four reformers, we had to first get rid of the people in the control room.

However, Ji Feng did not move, and led a few warriors towards the ammunition depot.

What he saw along the way made his heart even more amazed.

In this passageway, all around was constructed of metal, it looked almost like a huge castle poured with metal, even the passageway was almost two meters high!

The metal beneath his feet was also dark grey and stretched to the end, where the ammunition depot was.

Ji Feng squinted his eyes and looked around without a trace, but at the same time his heart was aghast because he found that there were at least seven or eight machine gun points in the passage – there were small openings at the top of the passage, which contained cameras and gun ports.

Because these small openings were in the shadow of the light, even an ordinary person looking directly at them might not be able to see them.

However, this could not be hidden from Ji Feng's eyesight.

He found that the muzzles of the guns there, which were slightly changing direction as they walked, were pointing at them all the time.

Ji Feng didn't tell the few soldiers about this discovery, nor did he warn them to be careful, not because he didn't want to, but because he couldn't. Because once he said it, it might cause the people in the control room to be alerted.

So Ji Feng just slightly lowered his head, letting the military cap on his head cover his face as much as possible, and then walked forward at a fast pace.

This underground base was full of organs, and Ji Feng was extraordinarily vigilant in his heart.

Under this dreary atmosphere, Ji Feng and the others arrived at the end of the same tunnel and stood in front of the ammunition store door, which was a metal door with a code lock, and at this time the door was locked and could not be entered.

Ji Feng said loudly, "Several lords, I've reached the end, but the door here can't be opened!"

"Ta-da-da"

Suddenly, a burst of gunfire rang out, and at once sparks flew all around.

A few warriors were startled and subconsciously about to raise their guns to counterattack, but Ji Feng shouted, "Hey!"

Those few warriors looked at him one after another, but they saw Ji Feng frowning and shaking his head imperceptibly.

Because Ji Feng noticed that although the machine gun overhead suddenly opened fire, the gun was pointed to the side, not directly at them, so obviously the other side this wasn't meant to kill them!

Ji Feng, however, looked panicked and kept shouting, "Aiya! Oops! A few lords, what's going on here?"

"How many of you are really from the Yue Kingdom?" The voice came over again.

"Of course you are!"

Ji Feng asked with some confusion, "This Lord, why are you asking this?"

The other party said, "Then tell me your unit number!"

Ji Feng immediately said the unit number, all this information was learned from the captives of Vietnam, and before coming down Ji Feng had already memorized all this information in his head, at this moment he said it but did not pause at all.

"That's right, it's the same as what Lord Luo Qiu said." Just then, Ji Feng vaguely heard the sound of someone else speaking, and he instantly narrowed his eyes slightly, it was obvious that there was more than one person in the control room.

"A few lords, where are you?" Ji Feng shouted, "It will really be too late if we don't leave, we need to retreat quickly, the Chinese army will be here soon!"

"Don't worry!"

The voice said, "I'm not afraid even if the Chinese army arrives, see that door in front of you? There are all kinds of weapons inside, now you go in, take those strong ones on that innermost shelf and wait for us in the hall!"

Campus Master Chapter 2514

All kinds of weapons?

Ji Feng glanced back imperceptibly at the ammunition depot, he was interested to know what weapons were in the dynasty's ammunition depot that could make the other side so confident that they weren't even afraid of China's army coming!

"Pop!"

Just as Ji Feng was secretly contemplating, he heard a sudden crunching sound from the door of the ammunition depot, as if it was the sound of a spring jumping, Ji Feng immediately realised what was going on, he took two steps forward to the door of the ammunition depot and with just a gentle push, he saw that the heavy metal door was easily pushed open.

At once, Ji Feng was even more certain in his heart that someone was really in the control room!

But Ji Feng did not rush into action, the machine gun above his head alone was not that easy to deal with, even if he could dodge it, but the few soldiers who followed him might not be able to.

Therefore, even though he knew that there must be more than one person in the control room, and most likely the four reformers were all inside, Ji Feng could only hold back for the time being, and just gave a wink to those soldiers before walking into the ammunition store.

Those few warriors also hurriedly followed, leaving only two warriors waiting outside – in fact, they were left outside to meet Ji Feng and the others, because what would happen next was anyone’s guess, and Ji Feng had to be careful and careful again.

“Ah!”

As soon as they entered the ammunition depot, one of the warriors couldn’t help but let out a low cry of surprise, and the other warriors froze for a moment. Even Ji Feng, after entering the ammunition depot and seeing the scene inside, couldn’t help but have some slight consternation.

It was dazzling!

This ammunition depot was all lined with rows and rows of iron shelves, looking just like a library, but unlike a library, what was placed on the iron shelves were not books, but all kinds of weapons!

Pistols, submachine guns, rifles, sniper rifles

grenades, bombs, explosive packs The bombs alone are divided into several kinds, for example, one of the rows of shelves are all time bombs, another row of shelves are c4 bombs, and various other types of bombs.

“Look over here, strong magnetic bombs!” A soldier couldn’t help but exclaim.

“There are also rubber bombs over here!”

“This is a long-range high-powered sniper rifle!”

The weapons placed in the ammunition depot of this underground base really made these Border Guard soldiers who were used to seeing weapons couldn’t help but be shocked, even though they still remembered that they must not reveal themselves, let alone expose their identities, so even when they were exclaiming they all lowered their voices to an extremely low level, almost to the point of being imperceptible, but Ji Feng’s could hear it all.

The first thing you need to do is to get to the exhibition hall, it’s just too shocking.

With these weapons, arming several regiments would certainly not be a problem!

This is really a bit unbelievable!

Ji Feng also felt the same way and was shocked!

However, his shock was more from the shock of the dynasty’s strength.

This was only one of the underground bases of the dynasty, and it was likely that it was only a relatively unimportant underground base, but there were so many weapons inside, even some very advanced weapons, so one could imagine how many weapons there would be in the main base of the dynasty!

Imagine, if those transformers even the lowest level transformers, each with weapons, form an army, just in terms of small-scale combat alone, which other country’s army in the entire world is its opponent?

..... Ji Feng can’t think of it!

The same cannot be said for China!

“This can be really how powerful the dynasty is in the end, what exactly are they going to do?!” Ji Feng look really heart can not help but some bottomless, the more understanding of the dynasty increased, the more you can feel the dynasty’s strength is strong.

“There are at least a few thousand firearms here!”

Ji Feng swept through with a glance and roughly estimated the number of weapons here, and that was just the guns, not including things like bombs.

“Keep going in!” At this time, the voice came over again, “Have all of you bring as many weapons as you can, and when you do, rush out!”

“Yes, my lord!”

Ji Feng immediately answered, but then he hesitated, “My lord, aren’t you going?”

The voice said, “You guys go first, we’ll follow afterwards.”

Ji Feng hurriedly said, “My lords, this won’t do, although the Chinese army has been forced back, their reinforcements will come at any time, we have to leave immediately and together, otherwise, once the Chinese warplanes come, they might just bomb this place... ..”

“Then take your weapons with you and come to the control room!” The voice said.

“The control room?” Ji Feng was slightly stunned and then said, “Right, a few lords, Lord Luo Qiu also instructed that we should go to the control room and copy down all the information before destroying it all.”

“Then you should act quickly!” The voice said.

“Yes!”

Ji Feng immediately nodded, and then waved his hand and said loudly in Vietnamese, “Get the weapons!”

He then immediately picked up a rifle and hung it on his body, then a grenade and a pistol, and the other soldiers took a look and understood what it meant and started to get their weapons.

Ji Feng put the pistol on the back of his waist and then continued to walk inside, he wanted to see what kind of weapons were in this ammunition depot.

But all the way to the innermost part of the ammunition depot, he didn’t find anything special, the whole ammunition depot was filled with a large number of weapons and ammunition.

Ji Feng swept a glance and was ready to go back, but the moment he turned around, he suddenly narrowed his eyes slightly: hmm?

Just now when he turned around because of the angle, there seemed to be a slight stutter in his vision.

Ji Feng immediately paid attention, in this underground base, he was not sure how many times more alert than usual, and he had even activated the bio-current from the very beginning when he came down.

So, when Ji Feng looked carefully, he really found that there seemed to be a gap in the wall not far in front of him No, not a gap, there seemed to be a door there, only that the door and the wall fit together so well that it could be said to be a tight fit, even if one were to lie down and look carefully one might not be able to see it!

But this could not be concealed from Ji Feng's eyes, and he was immediately sure that there was definitely a door here!

But the strange thing was that there was nothing on the door, no handle, no code, and no lock even, he didn't even know how to open the door!

Ji Feng was not reckless, he just took a deep look at that door, remembered the location of the door, and then had a careful scan of the surrounding walls, after making sure that there were no other doors, he then took his weapon and took a few other warriors who were already fully armed and walked out of the ammunition depot.

"A few lords, we have the weapons, but how do we get to the control room?" Ji Feng looked up and shouted to the camera above him.

"Come in through the front door!" Another person's voice came out of the speaker.

Ji Feng made a mental note, but on the surface he didn't move at all, he just led the other soldiers forward, and as expected, as he passed through the passage, he saw that halfway up the left side of that wall, a door had actually appeared!

It was still a metal door, and Ji Feng took a look at it, and if it was closed, the door was equally able to fit tightly with the wall of the passage, no wonder he didn't see it when he came, because at that time it was still just a wall!

"Go!"

Ji Feng waved his hand and said in Vietnamese, before entering that door.

He wasn't afraid that the transformers inside here would recognise him, because back when the border guards had launched their attack earlier, they had cut off everything around them, including the electric wires and optical cables and so on with everything around them, all of which they had learned from Cage's mouth.

So Ji Feng believed that just after the Border Guards started their attack, this underground base had already been unable to connect with the outside world.

This was also the reason why Ji Feng would be so bold as to bring in only a few people, because at this time the reformers in the base could not get in touch with the outside world at all, so they could only choose to trust themselves, especially when they spoke Vietnamese so fluently!

Along this slightly narrow passageway, Ji Feng and the others walked forward at a fast pace, each looking very anxious, the leader Ji Feng was even more anxious in his steps, with an anxious look on his face, raising his hand from time to time to check his watch.

A qualified super agent, disguise is not only in the face makeup or in the dress to change, a word, a move or even a subtle look should be paid attention to, because even sometimes just a wrong expression will make people have a feeling that something is not right, will cause the other party to be suspicious.

Therefore, at this moment, Ji Feng could say that he had made his disguise the most subtle, and the result was that they walked smoothly through the passage and turned into another passage according to the instructions of the voice in the said speaker.

At this time, Ji Feng already knew in his heart that they were indeed heading towards the surveillance room.

Because even in the passage, there was no distinction between east and west, north and south, but Ji Feng was able to generally detect the distance they were walking, and combined with Cage's statement, he came to this conclusion.

As expected!

When they entered a door after walking for nearly ten minutes, they immediately saw a block of screens that showed their faces exactly.

It was a very wide room, and in the middle of the room were dozens of computers, while on the surrounding walls were large screens, and there was even a glass curtain wall in one of the places, showing a certain passage!

Ji Feng secretly said, "Finally, here we are, this is the monitoring room!"

Then, he turned his head to look around and said loudly, "A few lords, we've arrived, where are you?"

In fact, at this time, he had already heard the sound of breathing if anything, only that there were only three people, and there was another reformer who was not here!

Campus Master Chapter 2515

Ji Feng didn't move, he just pretended to be looking for someone while walking slowly. In fact, he was able to determine the direction the other three were hiding through the sound of their breathing, but exactly where they were, he couldn't be sure for a while.

Moreover, there were too many devices in this control room, and his penetrating eyes would be affected to a certain extent here.

"Hula~!"

Suddenly, a sound came, Ji Feng immediately followed the sound and saw that inside the control room, there was actually another door, inside was what seemed to be a small room, at this moment the door of that room was pulled open and three men came out, all three of them had Asian faces and looked like they should all be from Vietnam.

At a glance, Ji Feng could tell that these three men were all reformers.

Only, these three guys looked like nothing different from the outside, at first glance they were just like ordinary people, only that the bones in their bodies were modified, but this could not be seen from the surface.

“It seems that these three are only the lowest level of transformation human.” Ji Feng secretly said. These three people were just like those ordinary transformers he had seen, other than their bones, other parts of their bodies were not transformed. Of course, biological bombs were a must.

“Three lords, it’s good that you’re all right!”

When Ji Feng saw those three, his face immediately showed joy and he said in a panic, “Let’s hurry up and leave, the Chinese army might arrive at any moment.”

However, those three reformers did not respond to him, but stared at Ji Feng as well as those few warriors carefully, with a wary look in their eyes, as if they were scrutinising them.

Ji Feng raised his hand to check his watch and said anxiously, “Three lords, what are you waiting for, let’s hurry!”

“Are you really from the Vietcong Border Battalion?” One of the reformers asked, speaking, in pure Vietnamese-speak.

“Yes!”

Ji Feng nodded his head and asked somewhat strangely, “This lord, is there any problem?”

The three reformers looked at each other and shook their heads at the same time, and the one who had just spoken said, “Send two of you over, we have a companion who is injured and need you to carry him out.”

Ji Feng was stunned, “Ah? Injured? Quick, quick, hurry up and save him! This lord, we’ve also brought medical tools

But the reformer waved his hand and said, “Medical tools won’t be needed, he has already taken medicine, you guys just need to carry him on your backs.”

Ji Feng immediately nodded: “No problem, you two come with me!”

He casually pointed to two warriors and together with him, they were about to walk towards the small room inside the control room, and the three reformers immediately led the way in front.

When he arrived at the small room, Ji Feng realized that it was a place similar to a lounge, with a bed and a sofa inside, as well as a computer and a TV, and although the room was not very big, it looked comfortable.

Only, at this moment, there was a reformer lying on the bed, this person’s eyes were closed, both hands were covering his chest, and there were still some blood stains on his body, Ji Feng did not have surprised, “Ah? This adult was injured in the chest? This is a vital part, emergency treatment must be carried out urgently, otherwise it might be life-threatening!”

“No need!”

Who knew that one of the reformers stopped it, “We have already given him special effects medicine, it won’t be life-threatening in a short time, let’s wait until we bring him back to Vietnam to treat him!”

Only then did Ji Feng nodded and said, “Alright then, you two, hurry up and carry this lord on your backs!”

As he spoke, Ji Feng began to reach out to help the reformer lying on the bed, only when he was pulling him up, the hand holding his head was silently pressed on the reformer’s ear door, at once, the reformer’s body shook imperceptibly, and there was no more sound.

A cold aura flashed in Ji Feng’s eyes, no matter if this reformer was really injured or not, he had to personally solve this potential threat.

Immediately afterwards, Ji Feng placed the man on the back of a warrior, then while the three transformers were distracted, he suddenly stormed out and attacked the three transformers with lightning-fast hands.

“Bastard!”

When Ji Feng struck out, those three reformers immediately realized that they had been deceived and immediately roared out to fight back, but Ji Feng’s speed was too fast and did not give those three reformers the slightest chance to resist, his hands snapped three times and instantly struck them heavily on the head.

Instantly, the three men’s eyes rolled over at the same time and they passed out.

Ji Feng’s attack that contained bio-current was too much for even senior reformers to bear, let alone ordinary reformers like them.

So much so that until those three transformers had all fallen to the ground, those few warriors hadn’t even used to react.

“Search them, tie them all up!” Ji Feng said in a deep voice, “Go two people to occupy the control room!”

“..... Yes!”

Only then did those few warriors react, and the warrior carrying the Transformer even directly threw the Transformer towards the ground, then quickly searched through the Transformer’s body.

“Barf!” A sound was made, only to see a small bottle fall off the body of one of the transformers.

“Clatter!”

The vial made a strange sound.

Ji Feng immediately frowned and immediately picked up the vial, secretly saying, “Could this be the transformer’s food?”

He immediately unscrewed the cap of the vial and looked inside, but it was this look that made him suddenly frown, and the cold light in his eyes was bitterly cold: "Send someone up and tell Xiang Yongzhan to come down!"

A soldier immediately ran over to report the situation, in order to disguise their identity, so they did not bring some clearly marked contact tools.

Not long after, Xiang Yongzhan brought his men down, and Ji Feng could see it clearly in the surveillance, even the situation near the ground. He couldn't help but be secretly amazed, fortunately the troops had evacuated the area earlier, otherwise they would definitely have been seen through by these few transformers.

"Older brother, have you taken them all down!?"

Xiang Yongzhan couldn't help but ask excitedly after he came in.

Ji Feng nodded, "Taken, you can have someone search again to see if there are any more leaks."

Xiang Yongzhan couldn't help but feel a little strange and asked, "What else is there to search for? The entire underground base is only this big, and you can see everything in the surveillance"

Ji Feng directly interrupted him: "If there is someone hiding under the table, can the ceiling camera see it?"

Xiang Yongzhan then smiled and nodded: "Yes! Search! Everyone, search this place carefully!"

After making the arrangements, he hurriedly asked, "By the way, have all the bombs here been defused? Where are the control devices?"

Ji Feng said, "The bombs are all controlled through the computer, I have turned them all off, now search them again, just in case there is a leak, in case there really is and the person is holding the remote control device for the bombs"

Xiang Yongzhan laughed: "Older brother, you don't need to scare me, if it wasn't completely safe, you certainly wouldn't have sent someone to call us down, this is not your character."

Xiang Yongzhan still knew something about Ji Feng, he knew that this guy Ji Feng came from a folk background and was very much a kind of jianghu hero, to be more accurate, this kid was very much enough of a friend, usually this kind of risky thing he would try to solve it himself, and he was also very considerate, rarely would there be similar oversights.

Ji Feng glanced at him and said, "You don't trust me that much."

Xiang Yongzhan laughed: "No way, although you kid will often say that you will get a good deal, but the character is still okay ee? No, Ji Feng, you seem to have words in your mouth here?"

Ji Feng, however, did not dwell on this topic, but said, "Cut the crap, first check out this underground base."

“Let’s see the weapons depot and warehouse first!” Xiang Yongzhan said, “What did Cage say, there are a lot of weapons and ammunition in the weapons depot, and there seems to be a lot of important things in the warehouse, let’s go over there and take a look!”

“Let’s go to the warehouse first!”

Ji Feng said, “I’ve already been to the weapons depot, there are indeed quite a lot of weapons in there.”

Xiang Yongzhan said, “Don’t, I’ll go check out the weapons depot first, maybe there’s a laser gun in there too.”

Ji Feng could not help but be moved in his heart, but shook his head and said, “I’m afraid there are no more laser guns, at least I haven’t found any yet, even if you want to see them, you have to talk about it later, let’s go to the warehouse first.”

Seeing that Ji Feng had already moved on, Xiang Yongzhan did not insist on going to see the weapons depot, he quickly followed and said, “Cage said there was something important in the warehouse, does it mean that the laser gun is not actually in the weapons depot, but in the warehouse?”

Ji Feng said, “We’ll find out if we go and take a look.”

Back in the surveillance room Ji Feng had already memorised the structure and layout of the entire underground base in his head, so at this moment he didn’t even need to pause and went straight to the warehouse.

Moreover, the warehouse door had already been opened by him, so he and Xiang Yongzhan entered the warehouse directly.

“What is this?” When he came to the warehouse, what he saw at first sight were boxes stacked up, some wooden, some cardboard boxes, stacked up in different places.

Further inside, there were some clothes, food, and a very strong smell of oil.

Xiang Yongzhan couldn’t help but say, “This is no underground base, it’s clearly an underground fortress! There’s even oil, the dynasty is really well stocked!”

As he spoke, he casually pulled down a paper box, took out the sabre he was carrying and cut the tape on it, opening it to reveal some canned goods inside.

“Go inside!”

Ji Feng said, “Your side is the cold storage and miscellaneous goods area, I just saw in the surveillance room that there is another small warehouse in front, I’m afraid the important things are in there.”

Xiang Yongzhan was stunned, “Is that so?”

He followed quickly, bypassing the cold storage and finally coming to a small door.

“What’s in here?” Xiang Yongzhan looked at the door with a combination lock and couldn’t help but say, “There shouldn’t be any treasure in here, right?”

As he spoke, Ji Feng had already pulled the door open, and Xiang Yongzhan froze, "Is it really a treasure?"

Campus Master Chapter 2516

Not only was Xiang Yongzhan surprised, even Ji Feng was a little stunned.

As soon as he entered the small warehouse, what he saw at first sight were rows and rows of safes. These safes were big and small, but they were neatly arranged.

There was no doubt that if these safes were not waiting to be sold, then it could only mean that there was something very important inside. Otherwise, in such a secluded underground base, having gone all the way through a coded door, and having arrived here to actually use a safe to hold something.

Obviously, the contents of this safe were not simple!

"Open one and take a look!" Xiang Yongzhan said, "Older brother, do you know the password?"

"I don't know." Ji Feng shook his head.

"But didn't you open all the doors?" Xiang Yongzhan asked, "You don't know the password, how did you open the doors?"

"All these doors can be opened directly by computer remote control in the control room!"

Ji Feng said, "But this is a safe! Didn't Cage say that only Luo Gnarly was the only one who could get in here, even he wasn't qualified to enter, and I'm afraid that no one else knew the password apart from him. I just looked in the control room too, there are cameras all over the warehouse, but only here!"

Apparently this is a very confidential place, and even the cameras are not installed, I'm afraid it's to keep it a secret from the people in the control room. Since even his own people were kept secret, one could imagine that there must be something very important here.

Xiang Yongzhan couldn't help but say, "This is troublesome, it looks like we have to move it all away and go back to study it slowly."

"Don't be in a hurry yet!"

Ji Feng said, "Let's take a look first."

This small warehouse was not very big, it was only about twenty meters long and about five or six meters wide, and it was stacked with safes, so it was possible to walk a few steps and look at everything inside.

Ji Feng, however, looked at it carefully, even including some corners without leaving them behind.

Xiang Yongzhan asked, "Are you worried that there are organs here?"

Ji Feng nodded slightly: "The entire underground base is densely packed with organs, this small warehouse is so important, there might be organs too you see!"

Xiang Yongzhan was stunned: "What?"

Ji Feng pointed at a corner and said in a deep voice: "Look carefully."

Xiang Yongzhan looked in the direction of Ji Feng's finger and turned on his torch at the same time, and immediately he saw a glimmer of light at the corner of the wall, which seemed to be a metallic sheen: "A metal wire? How come it's connected to the inside of the wall?"

Speaking of this, Xiang Yongzhan suddenly reacted and his face changed, "It's a mechanism?!"

"Mm."

Ji Feng nodded, he first looked carefully and then looked up again before saying, "Old Xiang, it's lucky that you weren't reckless and careless just now, otherwise, I'm afraid that the two of us would have been beaten into a sieve just as soon as you moved the safe."

Xiang Yongzhan was stunned, "What exactly is the organ?"

Ji Feng pointed upwards, "See that light? Look carefully in the shadow of the light, is there a gun muzzle!"

Xiang Yongzhan immediately took a torch and shone it over, and sure enough, he saw that right next to the connector of that light bulb, there was a small hole, and inside was indeed a gun barrel.

Ji Feng said, "See? That's a machine gun, there's one next to each of these lights, there are six lights here, do you think you can dodge if these six machine guns fire at the same time?"

Xiang Yongzhan then couldn't help but wipe a cold sweat and cursed, "Damn it! This gang is really cunning, they actually have a mechanism here, this is not only to deal with outsiders, but also their own people!"

Ji Feng nodded slightly, the people of the dynasty, they really acted with ruthlessness!

"Can this organ be removed?" Xiang Yongzhan asked.

"I'll take a look first."

Ji Feng carefully observed for a while before saying, "Look, there's a metal wire attached to the back of each of these safes, no matter which one is moved, it will punish the mechanism!"

The metal wires behind all these safes were connected into a metal net, so dense that it was still a bit troublesome to crack.

Xiang Yongzhan said, "I'll call for reinforcements and ask someone who is proficient in this area to come over."

Ji Feng shook his head and said, "Don't rush, I'll try."

Xiang Yongzhan was immediately startled: "Older brother, this is not something that can be tried casually, if it is not done properly, it can lead to death, I'd better call for reinforcements Hey hey, what are you doing?"

The words of Xiang Yongzhan had not even finished, but I saw that Ji Feng actually casually took the torch in Xiang Yongzhan's hand.

Then he saw him pinning the metal wire behind one of the safes, then he wrapped that metal wire around the flashlight, then he saw him take out his pistol from behind his waist, unload the magazine, retire a bullet and insert it between the metal wire and the torch.

Xiang Yongzhan got nervous, there were six machine guns above their heads, this was no joke!

“Don’t mess around, old man, it won’t take long for me to call for reinforcements!” Xiang Yongzhan said.

“You’re afraid, huh?” Ji Feng asked with a smile without even looking back.

“..... nonsense, of course I’m afraid!” Xiang Yongzhan said, “To die in battle is an honorable sacrifice, but to be killed by a machine gun in this situation is called death!”

Ji Feng laughed: “Don’t worry, none of us will die, of course, if you’re really afraid then quit first, I’m here alone enough to take care of it.”

Xiang Yongzhan suddenly said, “What words, if you want to go, you should also take you with you Holy shit!”

He didn’t finish his sentence, he suddenly shouted, but saw that Ji Feng took advantage of the time he was talking, and actually fished out a military knife from his body, and directly cut the metal wire between the safe and the torch!

Xiang Yongzhan was instantly shocked, he subconsciously collapsed a step forward, grabbed Ji Feng’s collar and pulled it back.

“Whew~!”

As soon as Xiang Yongzhan took Ji Feng with him, he pulled his legs out and ran away. As soon as he left the small warehouse, he pushed Ji Feng against the wall, then he himself pressed himself against the wall and shouted, “You’re crazy, kid!”

Ji Feng, however, was warmed by Xiang Yongzhan’s action, and with a smile on his face, he said, “Am I crazy, or do you have too little guts?”

Xiang Yongzhan was instantly enraged, “I’m too timid? Do you call that bold? You are looking for death, you think you are invulnerable to swords and guns and can withstand machine gun fire?”

Ji Feng asked, “Has that machine gun fired yet?”

“Open”

Xiang Yongzhan’s voice stopped abruptly, and then a stunned look appeared on his face, “Not firing? What happened? How come the mechanism wasn’t triggered?”

The first thing you need to do is to get rid of the problem. Would I do anything without full confidence?”

“What’s going on? Did you use bullets and a torch instead of a safe?” Xiang Yongzhan knew what was going on as soon as he thought about it, “That’s right, that must be it!”

“Sort of!”

Ji Feng nodded and laughed, "I originally wanted to just use a pistol instead of a safe, but I found that there was gun oil on that pistol, so I had to use bullets instead just to be on the safe side."

Xiang Yongzhan couldn't see it, but Ji Feng was able to see inside that wall, the mechanism was controlled using electric current, it wasn't too complicated, that's why Ji Feng dared to be so arrogant and cut the metal wire directly.

"Holy shit!"

Xiang Yongzhan couldn't help but burst out foul, just now it really made him nervous.

Ji Feng laughed, "You saw how I did it just now, right? This metal wire is long enough, wrap a bullet around the middle and don't tug on the wire, it's not hard, right? Let's do it!"

Xiang Yongzhan asked, "What for?"

"Of course it's to cut all the metal wires, do you really want to wait for reinforcements to come?" Ji Feng said.

"....."

Thus, Xiang Yongzhan and Ji Feng, both of them, retired the bullets in several magazines and successfully separated all the metal wires from the safe.

After completing it, Xiang Yongzhan couldn't help but say, "This is quite a fiddly job! I hope the contents of this safe will be of some value, don't let my efforts go to waste!"

Ji Feng said, "Don't worry, it won't be a waste of effort for sure."

Xiang Yongzhan asked casually, "How do you know?"

Ji Feng pointed to his head and said, "Because I have a brain and know how to deduce."

Xiang Yongzhan: "....."

Ji Feng smiled, naturally he wouldn't tell Xiang Yongzhan that he already knew exactly what was in these safes, and likewise he wouldn't easily open the safes in front of Xiang Yongzhan, he always had to keep some cards for himself, after all, it was already noticeable enough now!

Afterwards, Xiang Yongzhan asked people to move all these safes, and many of them were particularly heavy, some large safes even required four or five people to lift them, weighing several hundred pounds!

This made Xiang Yongzhan somewhat puzzled, what exactly was contained in them?

"After clearing out the small warehouse, it's time to take a look at the weapons vault." Ji Feng said, "Perhaps, it's possible to really find a laser gun or something like that."

"There's really a laser gun?!" Xiang Yongzhan asked in surprise.

Ji Feng shook his head and said, "We'll know if we go and take a look."

Xiang Yongzhan asked, "Haven't you seen it? How come you still don't know?"

Ji Feng didn't say anything, he just waved his hand to indicate to Xiang Yongzhan to follow him when he went to the weapons depot before, but he didn't have time to examine it carefully, now he could be sure that in that ammunition depot, there must be something else.

"Captain Xiang, you come quickly, we found a lot of people over here!" Just as Ji Feng and Xiang Yongzhan were about to go to the weapons depot, Xiang Yongzhan suddenly received a call from the captain in charge of command.

"A lot of people?"

Xiang Yongzhan was stunned, "What many people?"

There were only four reformers left in this entire underground base, and this had been confirmed by all the captives, where were the others?

That chief said, "Just come and take a look quickly and you will know."

Xiang Yongzhan then exchanged a glance with Ji Feng and said, "It's really strange Let's go check it out first and then go back to the weapons depot."

Ji Feng nodded: "Go."

He was also curious, was there really someone else in this underground base?

Xiang Yongzhan then asked, "Which location are you in?"

The chief said, "We came in from the hall, we entered the fifth door, just go all the way to the end."

Ji Feng and the two of them immediately rushed over to the location he said, they were both wondering, even if there were still fish in this underground base, but where did this 'many people' appear from?

Campus Master Chapter 2517

"It's the prison cell."

According to the location that the chief said, Ji Feng immediately knew what that place was, that the chief should be in the cell of this underground base, however, Ji Feng was feeling a little strange, before when he was in the control room, he had already taken a rough look at the whole underground base through the monitoring, and did not see that 'many people' ah.

Ji Feng didn't have time to think much about it, no matter what the situation was, he would definitely know when he arrived anyway.

He lifted a rifle with his hand and walked ahead of the others, "You follow me!"

Ji Feng laughed: "You know how to walk?"

Xiang Yongzhan said, "Can't you just point me out from behind?"

Ji Feng couldn't help but shake his head and laughed, "Then why not just let me go ahead, why bother?"

The first thing you need to do is to take a look at the actual situation.

Ji Feng couldn't help but have a tan.

From these words he immediately understood what Xiang Yongzhan meant, this guy was feeling a little embarrassed – or to be more accurate, he felt a little embarrassed.

In fact, Xiang Yongzhan was indeed a bit embarrassed, since he came to the southwest, most of the things were almost all done by Ji Feng, he, the leader of the special operations brigade, not only did not play a big role, but also could only watch Ji Feng go into battle when it came to dangerous things.

For example, when going after Luo Qiu, for example, later being attacked by a helicopter, and then this time

If things go on like this, Xiang Yongzhan feels that there is no point in being the head of this special combat brigade, as a soldier, but he can only follow behind Ji Feng, which makes him very embarrassed.

Xiang Yongzhan decided to reverse this awkward situation, but as a result, he did not expect that after coming to this warehouse, he would actually have to rely on Ji Feng, whether it was to crack off the mechanism behind the safe, or to discover the machine gun overhead, etc.

So, Xiang Yongzhan became even more a bit embarrassed.

No matter what, he is also a soldier, moreover the captain of the special forces, this kind of charging thing will not need to trouble Ji Feng anymore!

After thinking about Xiang Yongzhan's mind, Ji Feng didn't say anything more, he just shook his head and smiled, then followed behind Xiang Yongzhan and walked quickly towards the front.

They first entered a passageway, then following Ji Feng's memory, and then circling around a curved passage, they arrived at the prison cell.

Although from the hall of the underground base, this whole underground base was divided into several parts, and behind each door was connected to one place, but in fact Cage was the one who said that there were actually several passages in the middle that were connected to each other, only that the connected passages were not normally opened.

I think this is also for the sake of secrecy.

But when Ji Feng was in the surveillance room, he opened all the doors, so they didn't take long to arrive at the cell.

When they said it was a cell, it was actually a place used by a dynasty to punish members who had made mistakes, or to hold some people who had been arrested, which was just a few rooms, except that these rooms were divided on both sides of the passage, so it looked like a corridor in a prison, which was why it was called a cell.

When Ji Feng and the two of them arrived, there were already seven or eight people in the corridor, and the one at the head was none other than the captain.

"Captain Xiang!"

Seeing Ji Feng and Xiang Yongzhan arrive, that captain immediately saluted.

Xiang Yongzhan returned the salute and asked, "What's going on?"

That captain said, "Captain Xiang, come and see this side, according to your orders, we searched this underground base inch by inch, and when we ended up here, we found something unexpected"

As he spoke, that chief pointed to one of the rooms and said, "Captain Xiang, look."

Ji Feng and Xiang Yongzhan then looked in the direction of that captain's finger, only to see that it was a cell against the right hand side, at this moment the metal door with iron windows had been opened, but surprisingly, the inside was very large, almost rather more than square feet.

The most important thing was that inside this cell, there was actually a door, and this door was as big as a wall!

Xiang Yongzhan immediately asked, "What's behind the door?"

"People! A lot of people!"

The captain said, "Captain Xiang, just come over and take a look."

With that, he took a few steps up to the door, grabbed the handle on the door with both hands and pulled hard, and at once, the door was slowly pulled open!

The next moment, Xiang Yongzhan could not help but reveal a stunned expression: "This is"

Ji Feng also couldn't help but be astonished, "What's going on here?"

That chief stretched his hands: "I don't know, it was like this when we found it, and we didn't dare to delay, we hurriedly called you and Captain Xiang, we didn't know what was going on either!"

Ji Feng and Xiang Yongzhan looked at each other, both of them could not help but be shocked.

..... Behind this gate, what appeared in their line of sight was a large underground space, while on the walls on either side were shelves of one kind or another.

The most important thing was that on the shelves were people lying one after another!

All of these people, all of them naked, naked, both male and female, but without exception all of these people were lying there honestly, without the slightest movement.

It seemed that the movement of the door, including the sound of the conversation between Xiang Yongzhan and Ji Feng, could not affect these people in the slightest!

However, in such a silent underground world, behind such a door, there was such a scene, looking at these people lying naked on the shelves, not moving, and not just one or two people, looking at this number I am afraid there are at least seventy to eighty people

This gives people an eerie feeling, if a timid person suddenly sees this scene, I'm afraid they will be scared to death, even the tips of their hair will stand up!

This is just too eerie!

Also

It was too eerie!

“What’s going on here?!” Xiang Yongzhan was stunned beyond belief.

Even though he was used to seeing big scenes, whether it was a bloody battlefield or some high-end receptions, even some extravagant parties, he had heard of them all, but there was never a time when he would be so stunned as he was now!

Was this an underground burial complex that had been discovered? Or has some kind of paranormal event occurred?

Xiang Yongzhan had never heard of such a thing in all his life!

That captain smiled bitterly and said, “Captain Xiang, we don’t know either, it was like this when we came, and this door was unintentionally discovered by a soldier, if we didn’t see a handle on this wall, we really wouldn’t have thought to pull it up and look!”

When they were searching, they had to open every cell to check it, and when they entered this cell, one of the soldiers saw a handle on the wall, so they subconsciously pulled it, but they didn’t think they could actually pull it a little bit. ...

And there was the scene before them!

Xiang Yongzhan could not help but be a little dumbfounded, the scene that appeared before him made him not know what to think or what to say. It was only after a while that he asked, “By the way, are these people dead or alive?”

It was only then that he reacted, they had made such a big noise, how come these people didn’t react at all, were they all dead?

“Could this be a graveyard of an underground base?!” Xiang Yongzhan’s brow furrowed at once.

“It’s not a graveyard!”

Ji Feng shook his head and said.

Xiang Yongzhan was just about to ask how do you know, when he heard that chief say, “Captain Xiang, we’ve checked, these people don’t look like dead people, but they don’t look like living people, their state well, how to say it, is very strange.”

Xiang Yongzhan could not help but frown: “Strange what? What dead people living people are dead or alive, and this can’t even be checked?”

“It’s alive!”

That chief immediately said.

Xiang Yongzhan didn’t say anything, but took two steps forward to one side of the shelf and he looked at these naked people lying on the shelf for the first time up close.

“Ka ka ka~!”

The surrounding soldiers simultaneously raised their guns and aimed at those around Xiang Yongzhan to prevent any change.

Ji Feng nodded secretly as he watched, the combat education of these warriors was still very high, even though they were not warriors of the special combat brigade, they also reacted quickly and knew how to cooperate very well, it seemed that it was not too much to say that the border guard army was elite.

Ji Feng also just swept a glance, then turned his gaze to those who were lying motionless on the shelves, frankly speaking, when he first saw these people, he couldn't help but have a feeling of numbness in his scalp and a chill in his back.

So many naked 'bodies' are not really scary, but the problem is that so many people, both male and female, are lying motionless on the racks, as if they are pork to be sold, which more or less makes people uncomfortable all over!

Ji Feng couldn't help but secretly say: "This how after coming to the southwest, strange things are one after another?!"

"These people are so strange!"

Suddenly, Xiang Yongzhan said with great surprise, "Ji Feng, take a look."

Ji Feng was stunned, "What's wrong?"

Xiang Yongzhan pointed at a person in front of him and said, "Look at this person carefully, this person is still breathing, he's not dead. But this person's breathing is really strange, if you don't listen carefully you can't really hear it. It's like being a vegetable!"

Ji Feng's gaze looked over, he carefully surveyed the person and couldn't help but nod slightly, Xiang Yongzhan was right, this person was really in a very strange state.

This was a nude woman, long hair drooping down from the shelf she was lying on, the other side of her hair was covering her face, only the physical features of that breast and lower body indicated that this was a woman, only, the face that was covered by the hair, vaguely seemed to reveal a gaze, but on closer inspection it did not, there was always a kind of eerie feeling.

It was also fortunate that Ji Feng had been trained countless times in the training space of the intelligent brain to be bold, otherwise, how could he possibly study and examine it so closely now?

Didn't you see that all those warriors looked tense and vaguely uncomfortable?!

Campus Master Chapter 2518

Looking at this nude woman in front of him, Ji Feng also had a very strange feeling in his heart.

It was because this woman was really too strange.

If one held his breath and listened carefully, one could vaguely hear a hint of breathing from this woman, but the breathing was so subtle that it was somewhat difficult for Ji Feng's ears to hear the breathing clearly.

Even if he looked closely, he couldn't see this woman's chest rising and falling!

No wonder Xiang Yongzhan said that this woman looked like a vegetable!

“What a living hell!” Xiang Yongzhan couldn’t help but say, “The others are like this too!”

“Is that so?”

Ji Feng immediately looked over, and sure enough, he saw that all the people on that rack were like that, all lying naked on the rack, unmoving, simply like a bunch of living dead people!

There was something really eerie about so many people lying silently on the shelves.

Xiang Yongzhan couldn’t help but settle down and said, “What the hell is going on with these people? Ji Feng, can you see any clues?”

Ji Feng shook his head and said, “I don’t know.”

He really couldn’t tell, even when he looked with his penetrating eyes, he could only see that in these people’s bodies, the blood flowed extraordinarily slowly and was very different from ordinary people. However, to say if there was anything special about their bodies, Ji Feng was unable to find it.

This also meant that these people were ordinary people, but this situation they were in right now was really strange in every way.

“Captain Xiang, what should we do with these people? Should we carry them all back?” Faced with this eerie scene, that captain couldn’t help but ask.

“No need for now. Bring those few reformers over and ask about the situation.” Xiang Yongzhan said, before he could figure out the identity of these people, he could not easily bring them back, the military base of the border guard was not for everyone, there were also many military secrets there.

After a soldier went to convey the order, Xiang Yongzhan then said, “Older brother, I’ll have to rely on you to interrogate them this time.”

Ji Feng said, “I’ll try.”

However, just at this time, a loud sound suddenly came from the entrance of the passage, “Boom!”

Ji Feng and the others were startled at the same time, and Xiang Yongzhan immediately shouted, “It’s a bomb! Be on guard!”

All the soldiers were on alert, and the chief even hastily contacted the others through the communication device on his body, “What’s going on? What’s going on?”

“Ah...”

A low moan came out of the earpiece.

The captain’s face immediately changed, and he immediately asked loudly, “What is going on? Say something!”

Without saying a word, Xiang Yongzhan casually grabbed his gun and rushed outside, “Something must have happened, go!”

Ji Feng and Xiang Yongzhan rushed out one after another, and the other warriors followed suit. Even in such an emergency situation, they still maintained their formation, working in groups of three, responsible for guarding the three directions respectively, cooperating calmly and tacitly.

It was also because these warriors worked well together that Ji Feng and Xiang Yongzhan could charge forward with confidence, at least the back way did not have to worry about being cut off. So it only took them a short time to rush out of the passage and into the hall, but they saw that many warriors had also come out and were on alert asking each other what had happened.

“What’s happened?” Xiang Yongzhan bellowed.

“Chief, we were searching when we suddenly heard an explosion, and we don’t know what happened!” A soldier who was leading the group said.

Xiang Yongzhan immediately barked, “All squads report.”

A soldier immediately shouted, “My squad is in charge of searching the weapons depot, there are no accidents.”

“My squad is in charge of the rubbish removal room, there is no situation.”

“My squad is in charge of the hall, no situation

With a single report, the situation of all the squads was soon clear, but Xiang Yongzhan’s face instead sank as he frowned and drank, “Where is the control room? Where are the men guarding the captives?”

No one answered.

Xiang Yongzhan immediately realised what was going on, and without saying a word he immediately rushed towards the control room, while at this time Ji Feng had already taken a step ahead and had already rushed into the passage.

The group arrived at the control room almost as fast as they could, but as soon as they entered the door, everyone could not help but be shocked, and Xiang Yongzhan even shouted angrily, “Bastard!”

There was a hue and cry.

All the warriors who had followed had taken up combat positions, each on alert.

It was no wonder that they were so nervous, for the scene before them was extremely surprising, one might even say extraordinarily astonishing.

All the computers and equipment, including tables, chairs and benches, had fallen to pieces, and many of them had even fallen to pieces, for example, a few computers had even turned into a pile of scrap, and some wires were still sparking with electricity.

When they looked at the floor, they saw six or seven soldiers lying motionless on the ground, strewn about, seemingly already unconscious, as there were still very obvious injuries on their bodies, and one soldier’s clothes were still on fire.

“Save the men!”

Xiang Yongzhan bellowed.

However, as the warriors stepped forward for emergency treatment, Xiang Yongzhan's face became completely gloomy.

"Chief, this brother's neck has been snapped." A warrior's face was ugly as he said.

"This one is also out of breath." Another soldier also said.

Xiang Yongzhan grimaced and gritted his teeth, "Doggone thing, what the hell is going on here?! What about the others?"

A soldier shouted, "Chief, this brother is still breathing, he's still alive."

As he spoke, this soldier had taken out a water bottle from his waist and at the same time took out a small bottle from his body and fed the special effects current inside to the fainting soldier.

"Chief, this one is still alive too."

As the scene was cleared, the last three warriors were found to be alive, the others were all dead.

Xiang Yongzhan's face was so gloomy that water was almost dripping out of it, his eyes were even more filled with anger, his whole person was like a lion in a rage, roaring, "These brothers were all killed Where are those few transformers?!"

No one knew, everyone shook their heads.

Ji Feng frowned and said, "Old Xiang look over here, there might be the answer you want here."

Xiang Yongzhan immediately followed the sound and saw that in the corner of a wall, there was a severed hand with a pool of blood beside it, obviously the hand had only just been broken.

"Whose is this?" Xiang Yongzheng asked in a deep voice.

"It should be the hand of one of the transformers!" Ji Feng said in a deep voice, "Look at his bones, they're not quite the same as a normal person's."

"A reformer was blown up here?" Xiang Yongzheng frowned, "What the hell happened here?!"

Ji Feng looked at the scene and said in a deep voice, "I suspect that someone detonated a bomb here, and that the three remaining reformers were either blown to pieces and died, or they were rescued!"

Xiang Yongzhan frowned at once, a cold aura flashed in his eyes, he knew what Ji Feng meant by this, those four reformers were all unconscious when they left at that time, and it was Ji Feng himself who knocked them out, so of course it was impossible for them to set off the bomb.

Then, the only person who had the chance and ability to detonate the bomb was one or some of the few border guards left behind.

But the question is, why did the bomb have to be detonated?

Was there something wrong with this? If there really was a problem, what this meant was clearer to Xiang Yongzhan than anyone else.

“Wake up the one with the lightest injuries.” Xiang Yongzhan said in a deep voice.

“Old Xiang, those three remaining transformers aren’t here.” At this time, Ji Feng was the one who had already quickly scanned the control room a few times and said, “With all the blasted limbs and broken arms here, the combination is only one person’s worth at most!”

Xiang Yongzhan instantly cursed angrily, “Doggone thing!”

At this moment, the least injured soldier had already woken up and let out a low moan. Xiang Yongzhan immediately heard that this moan was the same sound that had come from the communication device earlier, so obviously this person still had some consciousness just now, so he was not too deeply unconscious.

Xiang Yongzhan immediately asked, “I’m asking you, what the hell is going on here?”

The soldier said, “Report, report chief, we we were attacked by the transformers, they are not unconscious

Xiang Yongzhan frowned at once, “What?! How is this possible?!”

Ji Feng also frowned slightly, he was the one who struck out at those few transformers at that time, so he knew best the state of those few people, how could it be that someone was not unconscious?

“Tell me more clearly, what is going on?” Xiang Yongzhan said in a deep voice.

“We were guarding those four transformers, but suddenly there was an explosion, then one of the transformers’ body exploded, I fell on the ground and vaguely saw those remaining few transformers running out

Xiang Yongzhan could not help but have a cold flash in his eyes: “You mean, suddenly exploded? Where is the explosion point, is it here?”

He pointed to a spot on the floor of the control room where there were obvious traces of the explosion.

“It seems to be

The soldier said, “But I can’t be sure.”

Xiang Yongzheng asked, “Who detonated the bomb?”

The soldier slowly shook his head, “I don’t know, the explosion happened all of a sudden, but I definitely saw those few reformers run out By the way, there was another soldier who also ran out.”

Swish!

Xiang Yongzhan’s eyes suddenly flashed a sharp mane: “What did you say?!”

The warrior, however, was a bit hesitant, seemingly not quite sure, he only saw a very blurry scene before he was about to pass out, and couldn’t be sure whether what he saw was real, or whether he was hallucinating or blurry-eyed.

“You take a good rest first.”

Xiang Yongzhan patted the soldier's shoulder and said, "Don't worry, the whole underground base has our men, including the entrance, which is also guarded by our men outside, those people can't fly out even if they have wings, I will make them pay for the lives of their dead brothers!"

"No matter who he is!"

Xiang Yongzheng added at the end.

Campus Master Chapter 2519

This sudden turn of events interrupted Ji Feng and Xiang Yongzhan's intention to continue exploring the small warehouse, and even stopped them halfway to the ammunition depot.

The death of several soldiers even made Xiang Yongzhan furious.

"Pass the order down, each squad search the area under their responsibility carefully, don't leave any corner behind, whether it's a box cabinet or a sewer, search it all."

Xiang Yongzhan gritted his teeth and said, "No matter where those bastards are hiding, make sure you bring them back to me!"

All the soldiers stood at attention at the same time and answered loudly, "Yes!"

At the same time, Ji Feng couldn't help but feel a stirring in his heart.

He suddenly remembered something and immediately said, "Old Xiang, we should divide some of our men and focus on the sewers and vents."

Xiang Yongzhan's expression could not help but stare as he slowly nodded his head.

Ventilation openings, sewers!

These were indeed two places that could easily be overlooked. This underground base of the dynasty was so large, with so many people living inside, the sewers and vents would definitely not be too small, especially the vents, if the air circulation was not smooth, the people inside would definitely suffocate.

"There must be more than just one vent here, we need to focus on lining it up!" Xiang Yongzhan said, "Hurry up and move!"

"Yes!"

Apart from a few soldiers who were responsible for staying behind to tend to the injured warriors, preparing to send them to the ground and then back to the border guard station with the rest of the wounded, the other soldiers started to move.

The deaths of several of their comrades had made them all red-eyed as well, vowing to get those few transformers back.

However, after everyone had gone out, Ji Feng said in a low voice, "Old Xiang, something is not quite right, did you hear what that soldier said just now?"

Xiang Yongzhan nodded with a grave expression, "Yes, I did."

In fact, Xiang Yongzhan was more perceptive than anyone else, he noticed as soon as the injured warrior said that there were warriors running out with those few transformers.

"I understand what you mean, but I still don't believe that my soldiers will be traitors who eat their own country!"

Xiang Yongzhan gritted his teeth, "This might be that soldier's illusion. These Border Guard soldiers are stationed here all year round, they are elite troops, their combat power is no worse than that of the regular field army, and their consciousness must be nothing to write home about"

Ji Feng said, "You also said, they are stationed here all year round, so will they be infiltrated by people from the dynasty, you can't forget that the Vietnam border guard battalion is a good example, they are practically becoming the dynasty's private army!"

Xiang Yongzhan blurted out, "That won't happen to our Chinese army!"

Ji Feng said, "What about the fleet commander incident a few years ago?"

Xiang Yongzhan couldn't help but choke at once.

Of course he knew exactly what Ji Feng was talking about when he said this so-called Fleet Commander incident, which had actually been going on for almost ten years.

At that time, because Ah Shui and Ah Hui from the Treasure Island side had successively called out the Mainland, openly made some very bad remarks, and even both took some actual actions.

At that time, the relationship between the two sides was once so tense that all military zones in the country were renamed as war zones, and some war zones even ordered a level of war readiness, that is, fighter-bombers were not put into storage, tanks were kept in full fuel at all times, troop carriers were kept on 24 hours a day, and warships were not docked, just waiting for an order to be given, ready to strike at any time.

At this time, the intelligence service noticed an unusual behaviour of one of the fleets.

It was only after investigation that the commander of the fleet was surprised to learn that he had hooked up with a beautiful spy and had been caught in the act of eating his way out.

However, in order to eliminate the repercussions and to prevent the commander, who was in control of the military, from resisting by force, a very powerful naval general was sent from above to come to the fleet in the name of inspection, and then arrested both father and son on the spot during a dinner meeting.

Despite the strict secrecy from above, the matter still spread from the opposite shore and the outside world learned about it, and it was because of this that the military made a great effort to carry out deep management.

When Ji Feng said this, there was no doubt that he meant it.

Xiang Yongzhan shook his head and said with great certainty, "I believe our soldier, and I would like to believe that it was that soldier who looked out of sight, when the explosion had just occurred and this was a state of chaos, anyone could have looked out of sight."

“But what if it wasn’t?” Ji Feng asked, “What if this thing is true?”

“If it’s true

The company’s main business is to provide a wide range of products and services to the market. By the way old brother, I’m afraid this matter will be hard for you once more.”

Ji Feng asked, “How so?”

Xiang Yongzhan pointed to the control room, which was in shambles, and said, “Can you find a way to restore the control room? I don’t want anything else, as long as there is monitoring, otherwise it would be more trouble just for those few transformers.”

The combat power of the transformers was beyond words, and Xiang Yongzhan knew it well. Although these Border Guard soldiers were also elite, they had never fought with transformers after all, so once they exchanged blows they might suffer a big loss.

If we could have surveillance and see the entire base, it would be much easier for Xiang Yongzhan to command!

Ji Feng looked at the mess and couldn’t help but say, “I can only try my best, but in the end, I can’t guarantee if I can recover.”

Xiang Yongzhan said, “Do your best, please brother.”

Many of the computers in this control room had been broken, some had been blown all to pieces, and some parts were even shattered, it was not even known how many computers in the entire control room combined could still be used, but Xiang Yongzhan still had great hopes.

After all, this underground base is not small, and there are many passages inside, so maybe those people are hiding in one of the passages, and it would be much more convenient if they could have surveillance. Otherwise, they might still be attacked by those three transformers, and then they would be passive.

Ji Feng quickly cleaned up, but all the damaged computers were put aside first to see if there were any that could still be used, but as Ji Feng cleaned up, his face was getting heavier and heavier, so far he hadn’t found any computers that could be used.

“Older brother, what about it?” Seeing that Ji Feng was cleaning up faster and faster, Xiang Yongzhan couldn’t help but ask.

“Don’t rush, I’m thinking of a way.” Ji Feng said.

Xiang Yongzhan couldn’t help but feel his heart sink as soon as he heard that, thinking of a solution, which meant the situation was bad.

“Old Xiang, bring your computer over here!” Ji Feng suddenly said.

“My computer?” Xiang Yongzhan was stunned.

“It’s the small computer that you carry around to command.” Ji Feng said, “All the computers here are damaged, and some of them have broken monitors even if the main computer is not broken, so I need to use your computer to operate it.”

Xiang Yongzhan immediately pulled out a slightly larger than market handheld computer from his pocket and said, "Older brother, please."

Ji Feng didn't have time to be polite with him, he was now grabbing time, he immediately took it and then unplugged all the network cables and several three-plug cables from a computer he had selected long ago, then plugged it into the PDA, and then started tapping quickly on the keyboard.

"Tic! Tic-tac-toe!"

Suddenly, a voice sounded on that PDA, "Okay, all the footage recorded by all the available cameras in the entire underground base are here."

Xiang Yongzhan was immediately overjoyed and said busily, "Let me take a look."

He came forward and looked at the surveillance footage page by page, but soon his brow couldn't help but frown, "How come there are no vents or sewers"

"Hey, Wang Xin, it's Ji Feng." And at the same time, Ji Feng was already talking to someone with his mobile phone, "You immediately locate my position now, then try to control all the surrounding cameras that you can use, in addition you wait a moment."

Speaking of this, Ji Feng immediately looked at Xiang Yongzhan: "Old Xiang, I remember you have some privileges right?"

Xiang Yongzhan was stunned: "What privileges?"

Ji Feng said, "The satellite. I want to borrow the military's satellites to monitor the surrounding area, as well as face and body recognition, only then will I be able to find those people in the shortest possible time. If I'm not wrong, you should have certain privileges to use the satellites, right?"

Xiang Yongzhan nodded: "Yes, there is some, but how did you know that?"

Ji Feng said, "Because my little uncle also has one, although his rank is higher than yours, but you are also a commander of the special forces, sometimes you definitely need the satellite to cooperate."

Many times the operations of special forces are located in deep mountains and forests, or some secret operations, this time it is necessary to use satellites to locate as well as give other help, but definitely not using the positioning system of Rice, but the military's unique satellite launched up through some other name.

The company's main business is to provide a wide range of products and services to the market.

"There is nothing however, hurry up and tell me how you use it and the password to use it, my people are still waiting." The military said.

"Are you sure you want to use it?" Xiang Yongzhan asked, "What are your people"?

Ji Feng said, "In a word, give or don't give, if I give I have a ninety percent chance of catching those people, if I don't give, there is only a fifty percent chance, you decide for yourself."

Now time waits for no man, about ten minutes have passed since the incident took place, the longer the delay, the greater the possibility of those people escaping from the base.

Xiang Yongzhan was never one to hesitate, and he was always quick to act, so he made a decision at once: "Here! Of course! But I want you to catch those bastards, I'll kill them alive!"

Ji Feng smiled faintly, "Ninety percent is a modest statement!"

Soon, Wang Xin's voice came through, "Boss, it's done, within five kilometres of your perimeter is now under real-time surveillance."

"Very good, you keep monitoring and wait for my news!" Ji Feng finished, turned his head and smiled, "Old Xiang, the perimeter has been taken care of, the mouth is blocked, then next, we should go catch the rats!"

Campus Master Chapter 2520

"How do we catch it?"

Xiang Yongzhan frowned, "We're not familiar with this underground base, we don't even know where the sewers and vents are yet."

Ji Feng said, "Just take a look at the computer in your hand, won't you know?"

Xiang Yongzhan said, "But there is no picture of the sewers and vents on it!"

Ji Feng took the computer and quickly looked through the images on it and said, "The first thing to look at now is where there are cameras that have been destroyed, but I think that if they were in a hurry to escape, they would not have had time to destroy the cameras."

Xiang Yongzhan said, "But even if one of the cameras is broken, then it's possible that they deliberately destroyed it in order to divert our attention."

The trick of striking out at the east with a sound bite is still very practical sometimes.

Ji Feng said, "Then they should have at least destroyed the cameras on both roads, one road must have been taken by them and the other was the one that attracted our attention, but look, none of the cameras have been destroyed!"

Xiang Yongzhan didn't bother to look at the computer, he was relieved to have Ji Feng looking at it, he just frowned and said, "Since none of them have been destroyed, can we find them?"

Ji Feng shook his head and said, "There's nothing to be found."

Xiang Yongzhan then shook his head and said in a deep voice, "It seems that blowing up the control room, I'm afraid, wasn't just to be able to quickly take out the warriors guarding those few transformers, they also wanted to destroy the surveillance to buy time for them to escape!"

Destroying the control room was much more direct and effective than destroying a few cameras.

Destroying the cameras would instead reveal their whereabouts, but destroying the control room would be tantamount to destroying all the surveillance, and even if it could be restored, the intervening period would be enough for them to escape.

Now there was no sign of them in the surveillance footage, which meant that they must have used the time to escape.

“The top is sure that all the controls have been set up, right?” Ji Feng asked.

“Don’t worry, there will definitely be no problem!” Xiang Yongzhan said, the people staying above can be much more than those who came down, so many elite warriors, even if the ones who escaped were reformers, they could definitely be taken down easily, “There’s definitely no problem outside, but I’m just worried about the vents or sewers leading further away, or even

Speaking here, he squatted and said in a deep voice: “I even wonder if there is a secret escape passage in this underground base that leads all the way to the far end, and if those three reformers would have left through this secret passage.”

Ji Feng said, “There is indeed an escape tunnel, didn’t Cage already explain all that before! But as soon as they came in, there were warriors already firmly guarding it, and you heard the report just now, there were no problems.”

Xiang Yongzhan said, “Then it must be a vent or a sewer!”

Ji Feng didn’t say anything, but kept sliding the screen on top of the computer, his eyes fixed on it, he wanted to find what he needed from it.

Xiang Yongzhan was a bit anxious, if they really let those three reformers escape under their noses, it would not just be a matter of losing face, those few warriors who were killed, would have died for nothing.

Xiang Yongzhan would not allow such a thing to happen!

He gritted his teeth and said, “If we can’t, I’ll ask for support again, send helicopters over to monitor the entire area within a dozen kilometres, and at the same time send troops to search the area, there are no good people living here anyway, so I’m not afraid of disturbing them.”

“No need for now!”

Ji Feng pointed at the screen and said, “I’ve found the vent and sewer.”

Xiang Yongzhan immediately asked, “Where is it? We’ll go there now!”

Ji Feng shook his head and said, “Don’t rush, I’ve found five vents so far, and it goes without saying that the sewers must eventually converge into a main sewer, the key is the vents, and these five vents aren’t even in the same place

How about it, how long has it been since you’ve tried a short dash? ”

Xiang Yongzhan froze and asked, “What do you mean?”

Ji Feng laughed: “Let the two warriors stay and watch the surveillance, we’ll go catch the rats!”

Xiang Yongzhan immediately called two warriors over, then Ji Feng smiled, “Bring your weapons and keep up with my speed!”

Xiang Yongzhan just wanted to say don't worry, but before he could say anything, he suddenly saw Ji Feng rushing out, so fast that he couldn't help but be surprised, and then he looked at Ji Feng but he had already disappeared.

"Shit!"

Xiang Yongzhan hurriedly followed and rushed out.

However, he waited until Xiang Yongzhan had run a long way, but he didn't see Ji Feng's figure, and he didn't even hear the sound of footsteps, which made Xiang Yongzhan couldn't help but open his mouth, his face full of astonishment.

"This kid's speed is really" Xiang Yongzhan stood in place for a while and could only return to the control room helplessly, taking the PDA from the soldier's hand and quickly looking through all the surveillance he could see.

"Here it is!"

Xiang Yongzhan immediately saw Ji Feng from the video, yet that was it, causing Xiang Yongzhan's entire body to shake, his eyes even filled with a look of shock, "What a speed!"

Perhaps it was because the PDA was carrying so many surveillance images, so the reaction was somewhat sluggish, or perhaps because the camera had some difficulty in capturing the image, making it surprising for Xiang Yongzhan to see Ji Feng's figure in the PDA to be somewhat illusory, instantly sweeping past the camera.

That speed, it simply reached a very amazing level!

"Swish!"

In the screen, Ji Feng suddenly stopped and then waved at the camera, seemingly gesturing for Xiang Yongzhan to follow, apparently Ji Feng was seeing that Xiang Yongzhan had not followed, so he expected that he must have returned to the control room to check the surveillance screen.

This made Xiang Yongzhan couldn't help but laugh and curse, "This guy, I think he's more of a monster than those transformers!"

Saying that, he also hurriedly followed him.

But when Xiang Yongzhan was just halfway there, he saw Ji Feng coming out of the passage with his head on top, and he hurriedly asked, "How is it?"

Ji Feng shook his head and said, "There's nothing in this side of the passage, the ventilation channel is covered with dust, there's no sign of people passing through, now let's go see the other vent" Let's do this, the sewer you know where it is, right? You just keep going along this passageway leading to the living area and you will see the sewers in front of you."

Xiang Yongzhan said, "Then move separately."

He knew that his speed was not as good as Ji Feng's, so it was better to separate instead.

Ji Feng nodded, "Then let's move." As soon as the words were spoken, Ji Feng once again disappeared in three or two steps into the other passage.

Xiang Yongzhan froze as he watched, then shook his head with a bitter smile and also began to run with all his might.

In this way, Ji Feng used the shortest time to check all the vents once, and finally, he stopped in front of the last vent he checked, looked at the somewhat crooked vent wire mesh, and couldn't help but grunt coldly.

"This is it!"

Ji Feng called to one of the warriors who was searching nearby, "Go and get your Captain Xiang over here, I've made a discovery here!"

Soon, Xiang Yongzhan arrived, and when he was still a few meters away he hurried over in three steps and asked, "Ji Feng, what have you found?"

Ji Feng pointed to the vent and said, "This is where they escaped from."

Xiang Yongzhan immediately asked, "Can you be sure?"

Ji Feng said, "I looked on the way here, there is a passage with the fewest cameras, it is entirely possible for them to avoid these cameras in the shortest possible time and thus escape from here. Look at the dust inside this vent, it's very messy, this is the sign that someone crawled through it."

Xiang Yongzhan immediately said, "Chase!"

Ji Feng said, "Get a few smaller fighters to go in and chase after them, be careful that the other side might leave bombs or some other traps, be careful."

Xiang Yongzhan said, "I will personally lead the team to go after them!"

Letting those few reformers get away under his nose, and even killing a few warriors, if he didn't get them back, he wouldn't have anywhere to put his face.

Ji Feng shook his head and said, "This vent is not very big, you can't do much in there, so you're still a liability if you go. Hurry up, pick out a few smaller ones and get in quickly."

This vent can only allow an adult to crawl in, even squatting is not possible, Xiang Yongzhan is sturdy, I am afraid that after going in, may not be able to get out, only a burden, not much help at all.

The first thing you need to do is to get out of the ventilator. "

"Yes!"

Several soldiers shouted in response.

Ji Feng said, "Everyone, please remember that you must work well with your comrades. If you can't see anyone, then you will crawl all the way along the ventilation tunnel, to find out exactly where this ventilation tunnel leads to, and be careful!"

"Yes! Chief!" Several soldiers responded.

“Let’s go!”

Ji Feng didn’t bother to correct the few warriors’ address to him, now was not the time to dwell on this, he had to seize the three reformers before he could.

In fact, if it wasn’t for the fact that he himself was also somewhat tall in height and build, he would have wanted to chase after them himself, because he was certain that those three reformers must have escaped from this ventilation channel, so the faster he chased them, the better.

He originally wanted to use his perspective eyes to track them, but he looked carefully for a while and didn’t see anything. Moreover, in this place there was metal everywhere and most of the air ducts were built on the side of the walls, making his vision somewhat blocked as well, so he could only let a few fighters go in.

“Old Xiang, don’t worry, we can definitely catch them!” Seeing Xiang Yongzhan’s hesitant face, Ji Feng said, “They must not have run far, and besides, they won’t get far.”

“Let’s hope so.”

Xiang Yongzhan nodded and said.
