

## Campus Master Chapter 2921 -

He originally thought that it would be difficult for Ji Feng to say anything, after all, as he was a young man with an extraordinary background, he was afraid that it would be an overbearing gesture, and I was afraid that the reason why so many of them came over was not completely hidden from Ji Feng.

If it were an ordinary person, he would not be very happy in his heart.

This made Professor Tong's heart feel confident, thinking that there should not be much problem in completing the mission this time.

Ji Feng was also very cooperative and immediately changed his experimental equipment when he conducted the next step of the experiment, using the equipment that Professor Tong had prepared for him.

However, at this time, Professor Tong noticed that the few technicians had actually frowned again.

Professor Tong's heart immediately thumped and gave those few people a wink to call them to a distance and asked in a low voice, "Well, there's nothing wrong this time, right?"

However, the technicians shook their heads at the same time.

Professor Tong was suddenly anxious in his heart, "What's going on? He used the equipment here can't you guys still read it?"

One of the technicians shook his head and said with a bitter smile, "Professor Tong, he is indeed using the equipment we have prepared for him, but the first step of refining and purifying the ore, he has already done it, and now the ore is half-finished."

Professor Tong opened his mouth when he heard this, stunned.

He had overlooked this point!

The first stage of preparation they hadn't read, then they couldn't keep up with it later, it was a case of not being able to read one step and not being able to follow it step by step.

"Is there any good solution!?" Professor Tong asked.

"Unless one can know the various data and technical indicators when refining and purifying the ore!" A technician said, "The technical indicators of each experimental step behind must also be clarified, only then can we say we have mastered the technology."

The most crucial thing about a technology is not the hard work, but the technical indicators in it and that one item of data, but they are not involved in any of these things, even if they are just starting to do it now, but Ji Feng's operation is very fast and he doesn't even give them a chance.

"This ....."

Professor Tong couldn't help but be a little hesitant. They had come this time just to see for themselves and steal from Ji Feng. Now that the technicians couldn't figure out the data and technical indicators, how could they get these from Ji Feng?

After thinking about it slightly, Professor Tong whispered and admonished, "Then later on like this, you guys watch carefully and write down all the steps, as for the technical indicators and various data, I'll think of something else."

This was all that could be done now, otherwise, to figure these things out, he would have to ask Ji Feng to do the experiment from scratch again, not to mention that Ji Feng was afraid that he would not agree, and even if Ji Feng agreed, on what grounds would he talk to Ji Feng?

Returning to the test bench, he found that Ji Feng had surprisingly already done deep processing on that small piece of stuff. Several technicians did not dare to be distracted and immediately continued to look at it.

Next, Ji Feng's experiment was done smoothly, the alpha ore was processed very smoothly and the next step was to make it into an energy source.

And this, was the most crucial step!

In fact, Ji Feng had already made a laser gun before this, only that he hadn't found a suitable energy source, so he quickly destroyed the laser gun, but this accumulation of technology was no longer a problem for him.

As for those key things, such as the trigger in the laser gun, the energy converter, and some other key devices, they were not a problem.

As long as there was a suitable energy source, it was only necessary to re-tune those devices according to the performance of the energy source to bring them to the most stable state.

So this experiment was not a problem at all for Ji Feng, rather it was very easy.

This was also why he could find a place to sit and relax with a cigarette when everyone else was very serious and nervous. It was because this was actually no longer a problem for him.

If it wasn't his first time dealing with the Alpha Ore, he wouldn't even have had to make the trip here, he would have been able to make the laser gun directly in that small workshop at home.

"Mr. Ji!"

Ji Feng was having a cigarette when Professor Tong came over with a smile and also followed Ji Feng's example and sat down directly on one of the steps, "Seeing that your experiment is going so well, I guess it should be successful soon?!"

Ji Feng nodded, "It should be soon, a day or two at most, the most important thing now is to make the energy source, the rest of the work is just debugging and finally fine-tuning, it's not even a problem!"

Professor Tong nodded and smiled, "That's good, it's good that it went well ..... then what, Mr. Ji, I have an unpleasant request, I just don't know if I should say it ....."

"An unrequited request?!" Ji Feng smiled at his words and asked, "What, is there a problem with the experimental equipment?"

“Hmm? Oh, no no .....

“Then it’s that you have more important work to do and the experiments here have to be put aside for a while?”

“Neither.” Professor Tong couldn’t help but sweat a little at that, what work was more important than this research right now?

“Is it related to the research?” Ji Feng asked.

“More or less ..... a bit related!” Professor Tong stammered and said.

“Then there’s no need to say!” Ji Feng said.

Professor Tong: “.....”

He couldn’t help but freeze for a moment, not even reacting for a moment, not expecting Ji Feng to speak so directly, making him unexpectedly unable to say a single word.

If according to the usual experience, two people dialogue, if one of them say, there is a sentence I do not know when to say, I have an unpleasant request and so on these words, the other party even if not quick to say ‘but say no harm’, but at least will want to know what exactly is the matter.

But Ji Feng was .....

Professor Tong was blocked from speaking, and his face could not help but feel a little embarrassed.

Ji Feng casually put out his cigarette and said, “Professor Tong, right now our goal is to do everything we can to get the laser gun researched, other than that, anything else is irrelevant to us, right?”

Professor Tong could only nod awkwardly, not knowing what to say.

Ji Feng smiled, “Let’s go, there’s still quite a lot of work to be done next!”

Looking at Ji Feng’s back, Professor Tong opened his mouth and stiffly failed to utter a single word. In fact, when he saw that smile on Ji Feng’s face, he suddenly realised that Ji Feng knew what he was going to say eight out of ten` nine times, and that was precisely why he was unable to say anything because of a few words.

Professor Tong couldn’t help but shake his head with a bitter smile, he didn’t expect Ji Feng to be so young but so old-fashioned in his actions, this really doesn’t seem like something a young man can do.

The man who was walking towards the bench, Ji Feng, could not help but frown slightly. Just now he had choked Professor Tong speechless, in fact, he just did not want to wait for Professor Tong to make a request and then refuse it, so that everyone would be embarrassed!

I believe that if Professor Tong was a smart person, then he should understand what he meant and naturally, he would not mention it again.

Coming to the workbench, Ji Feng dismissed his distractions and began to concentrate on his experiments.

To make these semi-finished products into real energy sources in front of him, there were still certain processes and techniques needed in between. Although the theoretical basis had already been passed off, this was after all the first time he dealt with the energy sources of alpha ores, so Ji Feng had to be careful and more cautious.

The others were watching, and did not dare to make too much noise, but just watched carefully and thoughtfully.

With the rapid loss of time, the experiments were completed one by one, and in the blink of an eye it was getting dark, and the manufacture of the energy source had come to an end.

However, Ji Feng suddenly stopped.

“That’s it for today.” Ji Feng said, “It’s already late, so I should go back too.”

Professor Tong was stunned, “Go back?!”

Ji Feng laughed, “What, Professor Tong thought that I could make something in just one day?”

Professor Tong couldn’t help but wave his hands, “No no, I just didn’t expect time to pass so quickly ..... Mr. Ji, since it’s already so late in the day, or else we shouldn’t go back tonight, after all, it’s not safe to go back at night! The factory has also arranged a place to stay, the conditions are very good .....

Ji Feng smiled: “No need, my house is not very far from here, let’s leave it like this for now!”

Seeing that Ji Feng had already packed his things and was ready to leave with his suitcase, Professor Tong hesitated and couldn’t help but say, “Mr. Ji, can you go back a few minutes later? I have something I want to ask you for advice!”

Ji Feng frowned and gave him a look, but finally nodded and said, “OK, no problem, go ahead!”

Professor Tong looked around and said, “Mr. Ji, let’s go over there and talk.”

“Fine!”

Ji Feng nodded and followed Professor Tong to the side and said, “Professor Tong, you can say what you want to say now, is there something you need my help with?”

Professor Tong shook his head and said, “No, no, Mr. Ji, actually it’s like this, the technicians I brought here this time are all fresh blood in the institute, the new strength of the country’s scientific research in the future, but they are still too young and still have a lot to learn, so I have an idea, can you please use this research as an example and guide them a bit? Can I ask Mr Ji to use this research as an example and guide them?”

“Guidance?”

Ji Feng waved his hand and laughed, “Professor Tong is too generous to me, I wouldn’t dare to be guided, I am also a young man and have a lot to learn. So, don’t mention this matter.”

Professor Tong, however, hurriedly said, “Mr. Ji, you are too generous, just with your skills, I have to learn from you, Mr. Ji, you should not excuse yourself, or else this way, they may have some questions, you just give them a few opportunities to ask questions, you see .....

Before he could finish his words, he was interrupted by Ji Feng.

“Professor Tong!”

Ji Feng’s voice snapped up a bit and his eyebrows frowned slightly, “Let’s not mention this kind of thing anymore, can we?”

Professor Tong froze.

Ji Feng said, “Feel free to look here if they want to, but just don’t say anything else, okay?”

## Campus Master Chapter 2922 -

“Professor Tong!”

Ji Feng’s voice snapped up a little higher and his eyebrows frowned slightly, “Let’s not mention this kind of thing anymore, can we?”

Professor Tong froze.

Ji Feng said, “Feel free to look at them here if they want to, but, just don’t say anything else, okay?”

Professor Tong’s face suddenly turned red, and he instantly understood what on meant. Those technicians were watching here, in fact, they were just stealing lessons from the side, so Ji Feng wouldn’t say anything, but if he made other requests, that would be a bit too much!

Ji Feng was already saying something quite clear!

Professor Tong was embarrassed, he originally thought that Ji Feng shouldn’t be able to wipe his face too much about this, but he didn’t expect Ji Feng to say it so bluntly, leaving him speechless for a while.

“That’s it, I’ll be here on time tomorrow!” Ji Feng said, nodded his head and smiled at Professor Tong before turning around and walking away.

“Hey .....

Looking at Ji Feng’s back, Professor Tong subconsciously wanted to call out to him, but the words came to his mouth but he didn’t know what to say, so in the end, he could only want to say something but stopped.

Seeing Ji Feng leaving with his suitcase, those technicians around him gathered around, and someone asked, “Professor Tong, how did the talk with him go?”

Another person then said, “I heard it just now, it seems he doesn’t agree!”

“Disagree? Why? Isn’t this all a contribution to the country?” Someone felt dissatisfied.

“That’s right, sooner or later this technology will still be the country’s, now pulling the strings is this to sit on the ground?”

“All right! All stop talking!”

Professor Tong’s face sank when he heard this, “Don’t say such useless things in future!”

A technician said, “Professor Tong, it’s not that we talk too much, but we’re really not used to seeing this kind of behaviour from him, there’s no organisation at all .....

“It’s your business if you’re organised!”

Suddenly, a woman’s voice came over, everyone was stunned to look, but saw a beautiful woman who didn’t know when she was actually standing not far away, they immediately recognized that this beautiful woman was with Ji Feng.

This woman was naturally Bai Zhu, and at this moment she had a mocking smile on her face as she said, “You are the so-called national high quality scientific research talents? Your so-called high quality is to slander others behind their backs?!”

“What are you talking about, who’s slandering others behind their backs!” A technician said loudly.

“Quite a loud voice?!”

Bai Zhu snorted and said, “The technology is in my youngest’s hands, does it have a dime to do with you guys? Why do you guys have to be around to learn? My family’s eldest youngster is saving face for you guys, but don’t give shame, to put it in a bad way, what are you guys?!”

“You .....

“How do you talk, what do you mean?”

Bai Zhu’s words instantly seemed to have offended the public, causing those technicians present to become somewhat annoyed.

Bai Zhu said disdainfully, “I’m already being polite by talking to you guys like this! You people are not even qualified to give me a glance! If you don’t teach others the skills you have, that’s disorganisation and bad character? What kind of people are you!”

“You .....

Bai Zhu said disdainfully, “If you have good character, then don’t come and get involved with us! If you are organised, then why do you need to hang around with my youngest?!”

“.....”

All of them were dumbfounded and red in the face, but they didn’t know how to retort, although Bai Zhu’s voice wasn’t high, these words were pearls of wisdom, which made their faces hang, and their mouths couldn’t spit out the words, and they all held their faces red!

Looking at these people's appearance, Bai Zhu sneered and dropped a sentence: "When you can research a technology that is similar to this level, and then generously cry out to offer it to the country, then it will not be too late for you to judge others!"

After saying this, she swept a disdainful glance at these people and then turned around to leave, leaving behind her a group of people standing there with red faces and dumbfounded embarrassment.

After a while, until Bai Zhu's figure had disappeared outside the gate, the sound of the car engine starting was far away, only then did the people present look at me, I looked at you, and only then did they come back to their senses!

"You guys ah ....."

Professor Tong looked at those red-faced technicians and stomped his feet in anger, "Let me say what you guys are good at! How can you say that kind of thing? Even if he doesn't want to teach others, it's his right to do so, but to denigrate people behind their backs is a question of character! How can such a person do scientific research?!"

"....."

All the technicians couldn't help but turn red, some lowered their heads, while others were full of defiance.

Professor Tong looked at them and could not help but secretly shake his head, these young people, they completely lacked the good virtue of the previous generation or even the previous generations of technicians who devoted themselves to scientific research and seldom cared about their personal gains and losses, nowadays, all they think about is how to apply for projects, get patents, apply for funding, or be evaluated for any titles and so on.

It doesn't even matter how they got the technology in their hands!

This kind of thinking is now the mainstream of society, and to think that even the research institutes in the army are like this, Professor Tong couldn't help but feel embarrassed!

He originally just wanted these people to learn the technology in Ji Feng's hands and be able to use it for the country, originally this was a very rare learning opportunity for those young people.

But how could he have not expected that instead of thinking of cherishing it, those people would show this face just because people didn't teach it immediately, and they were seen to do so, and now, well, they were sneered at and dumbfounded!

"Let's all go back and rest!"

Professor Tong couldn't help but sigh in his heart, waved his hand and turned around to leave as well, leaving behind a group of technicians who looked at each other in disbelief.

"What are you so angry about? The camera has captured the whole process anyway, if you study it carefully you can definitely figure out what's going on!"

"Exactly! Luckily, we prepared in advance! As long as we study it carefully, we'll be able to master this technology by then, and we'll never have to look at anyone else again!"

Listening to the whispers coming from behind this, Professor Tong really wanted to get angry, but these people were not all his men, there were also talents from other labs and other professional fields, so he could only shake his head secretly.

"Young Ji, you're too irritating too!"

On the way back, Bai Zhu couldn't help but say, "You don't have to be so irritating to those kinds of people at all, they're not good people at all!"

She didn't say what those people were saying behind their backs, afraid that Ji Feng would get angry after hearing it.

Ji Feng shook his head and laughed, "It's fine. They can never learn anything with that kind of attitude!"

Bai Zhu said, "Then you can't just indulge them, they are obviously learning your skills next to you, but they are still saying some untoward things behind your back, they have no quality at all, such people are not worthy of following you to learn your skills."

Ji Feng laughed: "They will soon find out that if they still have this kind of attitude, they are going to suffer!"

Bai Zhu immediately had a mental shake and asked, "Young Ji, you plan to pack them up?!"

"Clean up? Not so much!"

Ji Feng shook his head and smiled, saying, "However, if they are still like this, then I don't mind giving them a deep lesson!"

Only then did Bai Zhu feel relieved, the way those people acted was so abominable that it really wouldn't be a relief if they weren't taught a lesson. Especially, they were actually talking about young Ji behind his back like that, if Ji Feng didn't let her, she would have wanted to go and give those people a beating.

When she returned home, Xiao Yuxuan, Qin Shujie and the others had already returned, and once Yao Yao saw Ji Feng, she even directly trotted and jumped onto him, saying joyfully, "Daddy!"

Ji Feng smiled and picked her up, teased her for a while, and found that the little girl's spirit was already much better than before, so he was quite relieved. It seemed that the little girl seemed to be very happy living here.

This made that thought in Ji Feng's heart pop up again, could this be used as a reason to ask Qin Shujie to move over?

"What are you thinking about! Eyes wandering, not thinking of anything good, right?!" Xiao Yuxuan suddenly touched him and flirted.

"Hey!"

Ji Feng laughed twice and looked at her wickedly.

Xiao Yuxuan's pretty face then slightly heated up, and understanding in her heart that he must be thinking of something nasty, she gave him a blank look and changed the subject, "Hey, to tell you the truth, I'm in charge of the alloy project."

Ji Feng asked curiously, "Why? Didn't I tell you to give this project to Han Zhong? You're not familiar with this piece and you're definitely not as comfortable doing it as he is!"

Xiao Yuxuan said, "Han Zhong also has a lot of work on his hands, and he said he might not be too busy, so I took it!"

"This guy, what the hell!"

Ji Feng frowned, this new chrome alloy project Han Zhong is the most familiar with, from the beginning of the research all the way to the press conference, and later some things, it was Han Zhong who was responsible for it, now when it comes to the production process actually want to change someone?

Xiao Yuxuan said, "In fact, he is also tired enough, the company is growing so fast, but the manpower is obviously insufficient, especially the competent manpower, is seriously lacking, and then let Han Zhong take over this project, it will indeed bring him a considerable burden."

Ji Feng nodded and said, "So be it! Then I'll finish the things I have on hand as soon as possible, and I'll help you with this when the time comes!"

Xiao Yuxuan's job was not easy, moreover, Xiao Yuxuan did not know much about this field of alloys, so Ji Feng did not intend to leave this new chrome alloy matter to her, he decided to develop the laser gun as soon as possible and then start the plan of mass production, so that the Tengfei Group could cross into the industrial field as soon as possible.

As for Han Zhong, Ji Feng didn't take it to heart, he just decided to wait for a few days to find time to visit him, after all, he hadn't seen him for a long time, and if he could make Han Zhong scream, he was afraid that he had encountered some difficulties in his work.

## Campus Master Chapter 2923 -

The next day, Ji Feng arrived at the factory very early, he looked very calm, as if nothing had happened, which made Professor Tong look a bit confused, could it be that the woman beside Ji Feng had not told him what had happened yesterday after he returned?

Professor Tong felt that it seemed a bit unlikely that the woman had overheard what the technicians had said yesterday, which would have made anyone angry and would have told Ji Feng, right?

Besides, even if she didn't tell Ji Feng, just by the performance of those technicians yesterday, Ji Feng saw it in his eyes, could he really have no idea at all?

He wanted to ask Ji Feng, but he didn't know how to say anything, so his words turned into a greeting: "Mr. Ji, so early today?"

Ji Feng smiled, "Isn't Professor Tong even earlier?" He looked around and found that all those technicians were coming one after another and standing around, so he didn't say anything, nodded to Professor Tong and went into the workshop.

Professor Tong hurriedly followed him, and at the same time turned around and winked at the technicians, hoping that they would all have some sense and not say those cool words, which would not do them any good!

You know, they are not begging them to do the technology now, but they are begging others to learn the technology!

If they still think they're great, if they see people not warming up to them or not looking up to them, then they'll be slandering them in their hearts, they're too classless and have no brains!

The technicians followed behind, but no one dared to say anything, especially when they saw Bai Zhu who was following Ji Feng, which made them a bit embarrassed, after all, what they said last night had fallen on Bai Zhu's ears word for word, and they were even scolded by Bai Zhu, which really made them lose face at all!

Ji Feng and Professor Tong walked all the way to the entrance of the workshop, four warriors were already standing guard at the entrance, Ji Feng swept a glance at the weapons in their hands and couldn't help but nod slightly, these four warriors were all loaded with live ammunition, not with bluffing gadgets, which showed that they really took their security work seriously.

When Professor Tong saw the look in Ji Feng's eyes, he couldn't help but smile, "Mr. Ji, this is all according to your request, specifically doubling the manpower to ensure security, the workers in this factory are absolutely not allowed to go near this workshop, even if they are our internal staff, as long as they are after you have left the workshop, we all have to leave and cannot enter at will. "

Ji Feng nodded slightly, indeed, it was not a bad job in terms of security.

Especially when he came he saw that several intersections not far outside were isolated with a barrier wall, with a construction sign hanging outside, and only one intersection could reach this workshop.

"Are there soldiers standing guard around?" Ji Feng asked.

"Of course there are!"

Professor Tong immediately said, "There are a total of eight posts around here, each post is equipped with two warriors, all fully armed, all these warriors are dispatched by the Jiangzhou Military Region, there are even warriors from the Special Warfare Brigade among them!"

Ji Feng smiled: "Is that so!"

Professor Tong said, "So, you don't have to worry about security, the top has already arranged it, it's not my responsibility and you don't have to worry about it, someone will arrange it properly!"

Ji Feng nodded and said, "That's good!"

Professor Tong asked, "By the way, Mr. Ji, is it possible to slow down the progress of today's test appropriately?"

Ji Feng stopped walking, looked at Professor Tong and asked, "Oh? Why should it be slowed down?"

"It's like this, because what we did yesterday was some rough processing, such as roughly handling the ore and so on, but today we are starting to conduct precision experiments, I think we'd better experiment a few more times, wouldn't that be safer?" Professor Tong smiled, "After all, this research can't be taken too seriously! Of course, this is just a little personal suggestion of mine, the decision is still in your hands!"

Ji Feng smiled and nodded, saying, "Mm, I know!" After saying that, he continued to walk forward, leaving only Professor Tong frozen in place, he knew? What did this mean? Did he agree or disagree?

Professor Tong hurriedly took two quick steps to catch up with Ji Feng and just wanted to speak, but he saw that Ji Feng had already taken out his ID card and the necessary documents for the soldier standing guard at the entrance to check, so Professor Tong had to hurry to take out his documents as well.

After entering the workshop, Ji Feng started his experiment according to the plan. Yesterday, he was refining and purifying the ore, and basically the work was almost done, but in fact, yesterday was just the basic work, or just the preliminary preparation work.

This is the most crucial step, if the energy source cannot be made, then the whole experiment will be meaningless. In fact, to be frank, the only reason why Ji Feng wanted to do this experiment was to develop the energy source.

The only shortcoming was the energy source, which was also the most difficult for him.

So, he agreed with what Professor Tong had just said, and the experiment today should indeed be done a few more times, but of course, his purpose and Professor Tong's were completely different.

The experiment began.

Ji Feng continued to refine the semi-finished energy blocks, at this time, Bai Zhu sat on a chair at the entrance of the workshop, a dagger appeared in her hand, as she played with various patterns, nimble fingers playing with the dagger flying between her fingers, really let people have a kind of pleasing feeling.

Even a soldier standing guard at the entrance to the workshop saw Bai Zhu playing with the dagger the moment the door closed, and his eyes froze at the sight.

However, while the dagger Bai Zhu was playing with was flying up and down, her eyes were glancing upwards to the roof of the workshop above her, her eyebrows frowning slightly before she turned her head to look at the technicians who had already leaned over and formed a circle, and a cold smile spread across the corners of her mouth.

"Professor Tong!"

Ji Feng shouted out while doing his experiment.

Professor Tong immediately answered, "Mr. Ji, what do you need?"

Ji Feng said, "Tell these people to go pull the ore, also, a portion of the alloy will be delivered today, you tell them to first process that alloy according to the drawings I brought!"

Professor Tong froze, "Pulling ore? Machining ..... alloy?"

He was a bit overwhelmed for a moment.

"What, is there any problem?" Ji Feng looked up at him and asked, "Didn't you say that everyone here, including you, had to listen to my command?"

"Yes yes, that's right."

"I still remember you saying that all these people are actually here to do hard labour, right?"

"..... Right!"

"So are there any more questions?" Ji Feng asked.

"No problem ....."

Professor Tong was already laughing bitterly in his heart, who didn't know that was just polite talk, how could he take it seriously? But it was true that he had said that everything here was Ji Feng's main priority, because the same thing was meant from above, everything here had to listen to Ji Feng's arrangement and command.

It is also because of this, plus Professor Tong wanted these young people to learn something, at least the technology of how to make laser guns, so he said the words for Ji Feng not to be polite and directly use them as hard labor, but .....

The company's main business is to provide a wide range of products and services to its customers.

At this moment, those technicians standing around heard the conversation between Ji Feng and Professor Tong, their faces couldn't help but change, let them pull the ore?

Although this is not a heavy job – because the factories nowadays are extremely modern, for example, this workshop is used to transport equipment and ore directly by using the light rail laid on the ground, and pulling ore only requires a small train.

But the problem is, the train can only transport the ore into the workshop from outside, but not directly to the equipment, there is about ten meters in between but you have to use a human trolley to push, Ji Feng is obviously going to let them do this!

"....."

A few of the technicians' faces were green, making them do this?

Some people even looked at Ji Feng with some anger, wanting to express their discontent in this way, but what they didn't expect was that after Ji Feng finished speaking, he continued to lower his head and do the experiment, not even looking at them again.

This instantly made them speechless with anger!

Some people looked at Professor Tong, hoping that he could say something for them, but seeing the bitter smile on Professor Tong's face, they knew that this path was equally unworkable.

“Hurry up, those who don’t want to do it can leave!” Ji Feng said.

“.....”

No one was willing to move, it wasn’t just a matter of doing hard labour, but in Ji Feng’s eyes they were simply a bunch of hard labourers, not scientific researchers at all!

This was really too insulting!

You know, even though they belonged to the new generation of fresh blood in the research institute, but outside companies who wanted to cooperate with military industrial units, wanted to cooperate with the military research institute on any technology, they all begged them to the research institute, even when they met them, they were accompanied by smiles, good words, good cigarettes, and even some shopping cards, welfare, and so on.

If they were generous, they would even give them a bank card as a token of appreciation after the meal!

And now, they are directly treated as ..... migrant workers here?

This is simply outrageous!

A few of the young technicians were about to get angry!

## Campus Master Chapter 2924 -

And now, here they are being treated like straight up ..... migrant workers?!

This is simply outrageous!

There were a few young technicians who looked like they were about to get angry!

Professor Tong glared at them with a threat in his eyes, the meaning of which seemed to say that if anyone didn’t listen, then today’s matter would definitely not be finished, just like that, only then did the fire of those blue-faced technicians barely suppressed.

However, it was as if Ji Feng didn’t even see the technicians’ faces and expressions, and while he was busy with the task at hand, he said, “Professor Tong, today’s experiment is extraordinarily important, and I also need to be quiet, so except for those who are working today, all other idle people will go and wait outside the workshop.”

Professor Tong was stunned and exclaimed, “Spies?!”

This is too much, isn’t it?

They were all young people with certain talents and achievements in different fields drawn from the various research institutes of the military, all of them were the kind of people who were smart and had a solid foundation and were extremely capable of learning.

The reason why such people were brought over was because they would definitely learn faster than the average technicians and be able to master the technology of the laser gun better.

But now when it came to Ji Feng’s mouth, he was treating them like spies?

Professor Tong couldn’t help but laugh bitterly, of course he knew that Ji Feng didn’t really suspect them of being spies, this was clearly an attempt to drive them out of the country!

He couldn’t help but feel a little annoyed in his heart, this is good .....

The actual fact is that you can find a lot of people who are not only interested in the technology, but also in the technology. What can you do?

You have to know that it is Ji Feng who is in full charge here, even he has to follow Ji Feng’s orders and commands!

“Mr. Ji, this .....” Professor Tong didn’t even finish his words before he was interrupted by Ji Feng.

“Alright, you can start now!” Ji Feng said, “Professor Tong, go ahead and make the arrangements as I suggested earlier, other than that all the idle people are out!”

“.....”

Idle people!

All the technicians in the room were almost green in the face!

What do you mean by “strangers”?

They were all technically competent in their workplace, but how come they had become miscellaneous people here? What kind of words are you saying?

“Mr. Ji! You’re going too far!” A technician was immediately displeased and exclaimed.

“Bai Zhu, tell the warriors at the entrance to come in and clear out the irrelevant personnel!” Ji Feng said without looking back, “Especially some idle people!”

“Yes!”

Bai Zhu shouted in response.

This scene could really make the faces of those technicians turn wonderful, from white to red, from green to black, and some of them were as black as the bottom of a pot!

Professor Tong also couldn’t help but be shocked, didn’t expect Ji Feng to get real and directly call the warriors outside to come and clean up, if those warriors did it, it would be no lighter than heavy, he hurriedly said, “Mr. Ji, don’t get angry, don’t get angry .....”

Ji Feng snapped his head around and looked at him, which immediately brought his voice to a screeching halt, and even by Ji Feng’s calm eyes he looked at his heart with some drums.

“Professor Tong, you don’t agree with my arrangement?!” Ji Feng asked.

“That’s not what I meant ……”

“Then what do you mean?!”

“I just ……”

“You are in full charge here?” Ji Feng asked coldly.

“…… No.”

“Am I in charge or are you in charge?!” Ji Feng asked again.

“……” Professor Tong was already filled with a bitter smile, he already understood that this matter had become a foregone conclusion, it was useless for anyone to say anything else, Ji Feng’s attitude at this moment already said everything.

Ji Feng said, “Get to work!”

He didn’t say any more unnecessary nonsense, just dropped these words and continued to do his experiments, while Bai Zhu was staring at those technicians with an unpleasant face, already ready to call the warriors outside to come and clean up some irrelevant people, the so-called idle people!

Those technicians looked at Ji Feng with an unpleasant expression, especially when they saw that Ji Feng did not even look at them from the beginning to the end, directly ignoring them as if they were air, that kind of contemptuous gesture made them extraordinarily annoyed.

“Work!”

When Professor Tong saw the look on those people’s faces, he bellowed and said with a sullen face, “All of you work according to Mr. Ji’s instructions, those who are willing to pull the ore stand to the left, those who are willing to process the alloy stand to the right, whoever is not willing to do both, then please go out first! Hurry up!”

“……”

No one spoke, and no one moved. Everyone stood there with resentment on their faces, no one was willing to really do that kind of heavy work, let alone really be a hard worker!

Even if someone wanted to give in, but being reprimanded like a grandson in front of so many people, they were not comfortable in their hearts, and so the stalemate went on.

Seeing this, Professor Tong couldn’t help but curse an idiot in his heart and bellowed, “Since no one has come forward, I’ll take the initiative to distribute …… you bunch to pull the ore, and the rest of you to pack up the equipment quasi-based processing alloy, go! Whoever doesn’t go, beware of your assessment!”

Those people took a look at Professor Tong seemed to be really angry, finally, someone moved and slowly went to pull the ore with a small cart.

When one person moved, the others naturally followed slowly, so a large portion of them went to pull the ore, while another portion went to pack up another piece of equipment, ready to process the alloy when it came.

Ji Feng did not even look at those people, just patiently doing experiments, how to process energy blocks into real energy sources, which requires more than just a simple process is enough, but also needs enough fine, and strict data indicators and so on.

The morning passed quickly, and Ji Feng finished his morning experiments. At this time, those technicians had sort of pulled a bunch of ores, each one tired and sweaty, while another part of them were working hard on some alloys.

Without saying a word, Ji Feng packed up his things and went out, leaving behind only a group of technicians with unpleasant faces.

Lunch time passed quickly without any break in between, and Ji Feng started his afternoon experiments immediately after lunch was over, Professor Tong naturally had to follow along beside him, while those technicians, likewise, were all tossed and turned, and some of them were already prepared to take a short nap to rest and rest, but now that was also a bust.

But what they didn’t expect was that as soon as they walked to the workshop, Ji Feng’s words instantly made their hearts go cold and icy.

Only to hear Ji Feng say, “The ore doesn’t need to be pulled, everyone go and take care of the alloy!”

With just that one sentence, someone immediately exploded, “Deal with the alloy? How dare you think of that, asking us technicians to handle the alloy? Do you really treat us like ordinary workers?”

“Exactly!”

Someone complained, and immediately someone else echoed, “Usually it’s others who beg us, no one has ever treated us so arrogantly, handling alloys? Hmph! Whoever likes to do it, I won’t do it anyway!”

Professor Tong suddenly shouted, “What are you talking about? Shut up all of you! Just do what you’re told to do, where’s all the talk?”

Although those people stopped talking, they looked extremely unconvinced, and some of them were muttering something under their breath.

Ji Feng looked at them and turned his head to Professor Tong and said, “Professor Tong, should you take them out, or should I have them kicked out?!”

Professor Tong cackled in his heart and said in a panic, “Mr. Ji, don’t be angry, I’ll say they ……”

“You’re too arrogant too!”

A technician couldn’t help himself, upon hearing this, he immediately said, “Don’t think that you are in charge here, you can do whatever you want, give us small shoes if you want, we can’t afford to piss off but still can’t afford to hide? Sorry, since we can’t serve you, we won’t serve you!”

“That’s right! No more!”

“Making yourself look like a grandpa, you really think you’re two or five or eighty thousand, quit, whoever says so .....

At once, Ji Feng’s words got these technicians riled up and they shouted.

Professor Tong hurriedly reprimanded and apologized to Ji Feng, but it didn’t have much effect. Ji Feng said indifferently, “Let them out!”

“No need for you to drive them out, we’ll go ourselves!” A technician said, “We won’t even come back if you beg us in the future!”

“That’s right, let’s go!”

In just a minute or two, not a single one of the forty to fifty people left, all of them left the workshop.

Professor Tong rubbed his hands anxiously, “This ..... is really .....

Then he looked at Ji Feng, but it was as if nothing had happened, continuing to do his experiments, which made Professor Tong could only help but shake his head and laugh bitterly, then hurriedly chased him out.

.....

Outside the workshop.

The group of technicians were all furious and were yelling to leave.

One person, however, suddenly said, “No, why do we have to leave? If we’re going to leave, it’s that guy who’s going to leave!”

“..... is right! How can he be a leader like that? How can he be in charge of everything? No, let’s call the top and complain about him, let’s call the top separately and see how arrogant he still is!”

When Professor Tong came out after him, it was already too late, a dozen people all took out their phones and called the unit to complain about Ji Feng.

Professor Tong couldn’t help but cover his forehead, this is the end ..... these people made their own death, then no one can save them!

Those technicians couldn’t help but feel a little relieved after making the call, and even had a look of hatred on their faces, as if they saw the scene where Ji Feng was relieved of his command and no longer qualified to be in charge here.

That was a real relief!

“You ..... guys are really making a fool of yourselves!” Professor Tong was so angry that he couldn’t help but stomp his foot!

## Campus Master Chapter 2925 -

“You guys ..... you are really making a fool of yourselves!” Professor Tong was so angry that he couldn’t help but stomp his feet!

These people really didn’t know what was right and wrong, and even more so, they didn’t know the sky was high, Professor Tong was really angry with them.

Looking at these young people with a smug and relieved look on their faces, Professor Tong was so angry that he didn’t even know what to say, this institute had no ears to hear about things outside the window, and the state was raising them to just do research, but it really raised these people to the point that they didn’t know what their surnames were!

They even thought of complaining about Ji Feng and asking the top to replace him?

Where the hell have their brains gone? Don’t they think that if Ji Feng is replaced, then this research project will still be meaningful? What the country wants is the technology in Ji Feng’s hands!

I really don’t know how these people’s brains grew, thanks to the fact that the vast majority of them are still PhDs and postgraduates, but they don’t even have that kind of brain!

“Professor Tong, don’t be angry, we’re not mad at you, it’s just that that person is too arrogant and too bullying, we can’t stand it anymore!” A technician said.

“Yes, Professor Tong, we don’t have anything against you, you have always defended us, we all see this in our eyes and remember it in our hearts, but that man is too much, first he treats us as hard labourers not to mention, now he wants to directly throw us out as idle people, this is simply too much bullying!”

“Yes!”

“If we can put up with this, then he may not be able to bully us in the future!”

.....

A group of people were talking, all of them looking extremely indignant.

The more Professor Tong heard, the angrier he became, and he couldn’t help but say angrily, “Shut up all of you! You ..... guys are simply unbridled!”

Seeing that Professor Tong was shaking with anger and his face was turning red, a man said, “Professor Tong, don’t be angry, this time we are just fighting for our own rights and interests, nothing else .....

“What the hell are you fighting for!”

Professor Tong was so angry that he even burst out foul language, which made many people slightly stunned, they saw that Professor Tong’s face was red with anger, looking at them with a very odd look, for a while before saying, “What rights and interests do you want to fight for? Call the top and ask them to reprimand Mr Ji? Or just replace him and not let him be in charge of this project anymore!?”

Many people nodded their heads.

Someone even said, "It would naturally be better if the person could be replaced, this kind of person can't be a leader at all, he doesn't take others seriously at all, he really thinks he's a leader?!"

"That's right!"

"Stop it, all of you!" Professor Tong roared lowly, gritting his teeth and looking at them with hatred, saying, "You guys are really too self-righteous! I ask you all, if say the top really replaced Mr. Ji and didn't let him be in charge of this project anymore, then what are you doing?!"

Some people froze.

"With Mr. Ji gone, what's the use of you guys staying?!" Professor Tong said angrily, "Only Mr. Ji knows all the technology for this project, what use do you guys have now that he's gone!!?"

"Then ..... the big deal is that we all just walk away!" Someone said.

Some people also froze, yeah, all the technology of this project is only known to Ji Feng, if he is replaced, then is there any need for them to stay? Wouldn't they all have to go home then?

Someone said, "What are you afraid of, since this project is a military project, then he will definitely have to hand over the technology when the time comes, the big deal is that we will be involved again then!"

Since this is a military project, there is no doubt that this kind of technology will be hard to hide, I'm afraid that in the end it will still have to be handed over to the military, by then there will be no use for Ji Feng to follow, they will just get involved again, won't they?

"..... idiot!"

Professor Tong looked at the man for a while before he couldn't help but curse angrily.

The man blushed and said, "Professor Tong, why are you scolding people?!"

Professor Tong couldn't help but shake his head, he wasn't just cursing, he couldn't help but hit people to be right! But ..... seeing these people's faces, he really didn't want to say a word.

"Since this is the case, then I will also call to report upwards, this matter has become this way now, someone must be responsible!" Professor Tong said.

Although he had the title of professor, he was not an all-rounder, he only specialized in one field. If these technicians got into trouble with Ji Feng, they would definitely not be able to learn the manufacturing technology of the laser gun, which would be tantamount to not completing the task explained from above!

In addition, if these people and Ji Feng have such a deadlocked relationship, will this affect the scientific research process, we do not know yet, and we do not know how Ji Feng will react, so this matter must be reported, and someone must come forward to take responsibility.

But the technicians didn't care much, they didn't think it was a big deal, because it was a case of Ji Feng being too arrogant, too incapable of being a man, too deceitful.

As for them, when the time comes, they would at most receive two criticisms, that's all!

A similar situation had happened before.

One of the research institutes cooperated with a university, and there was a conflict between a technician of the institute and a professor of that university.

This is a similar situation that we have all experienced and are not very concerned about.

You know, military researchers are now much more desirable than those in society, because with the deterioration of the external environment, the country is under a lot of pressure, so military spending has increased a lot in recent years, and the research on weapons for the military is even more heavily skewed, so the status of all these military researchers has also increased a lot!

So as far as these technicians are concerned, this time they think it's pretty much the same!

Seeing their reaction, Professor Tong who was dialing the phone couldn't help but secretly shake his head, these people were really spoiled, they simply didn't know the sky was the limit!

This time, for the sake of secrecy, they weren't told what exactly this project was, only that it was a military project, extremely important and so on, if these people knew that what they were learning was actually a laser gun project, I wonder what expressions would be on their faces!

"Dang it ....."

Suddenly, a technician's phone rang, a look of triumph flashed across his face as he glanced at the caller ID, pointed to the phone with the others and said, "See, there's a call from the institute, there must be a result ....."

As he spoke, he picked up the phone, "Hey, leader, how's it going ....."

"What?!"

Suddenly, his voice raised a few notches and his face changed abruptly, with a look of disbelief in his eyes.

"Now I officially inform you that you have two choices, firstly, you will be dismissed from the institute, the unit will pay you an extra six months of salary according to the contract signed with you, but you should be reminded that because you signed a confidentiality agreement with the unit at the beginning, you cannot participate in any form of scientific research within three years, let alone leave the country ....."

The voice on the phone was very loud, making it possible for the people next to him to vaguely hear it, and a number of them could not help but be stunned.

As for this technician, that was even more so as his face changed dramatically.

He was just about to speak, but then he heard the voice on the phone say, "Secondly, you should go and beg forgiveness from the person in charge of you this time now, in which case the unit can just give you a disciplinary action and a certain punishment, but you will not be fired!"

At this point, the voice said, "You're on your own!"

Pop!

The phone was hung up.

That technician was dumbfounded, holding the phone, his face pale!

Seeing this, a man next to him could not help but ask cautiously, "Buddy, what's going on? What did your leader say ....."

"Dang it ....." Before he could finish his words, his phone also rang, followed by a number of technicians present whose phones rang one after another, these were those technicians who had just called the top to make a complaint, and now they had all gotten a reply. These were the technicians who had just called up to complain, and they were now getting a response.

However, when they finished answering the phone, their white faces and the panicked and bewildered looks in their eyes were surprisingly consistent!

The information coming back from ..... was shocking!

Either be fired or, go and beg for Ji Feng's forgiveness, other than that, there is no third way out!

Almost everyone was told so! Even, two of the technicians were directly informed by the leader over the phone that they were fired, and there was no room for maneuvering, nor was there any need to beg for Ji Feng's forgiveness!

There was nothing else, just dismissal!

This made those two people's faces turn green! Dismissal! If it were any other unit, dismissal would not be unacceptable, but here it was different!

Because the military institute they worked for had signed a non-disclosure agreement before they joined, and if they left the institute, whether because they were fired or because they left of their own accord, they would not be allowed to do any research work for three years!

This means that their source of income is completely cut off for the next three years, not to mention the high salaries and benefits offered by the military institute!

Three years, by that time, the technological development alone would be enough to keep them up to date, what future would they have?

For the technicians in the institute, there was nothing more miserable than this!

The two technicians stood frozen in place with the phone in their hands, their legs went limp and they sat down on the ground, their faces pale .....

This scene really scared the others, all of them were like being poured a pot of cold water on the head, all cold body, the heart was even more poured a cold heart!

I can't believe ..... this would be the result!

Professor Tong saw their reaction and couldn't help but snort coldly, really angry and helpless, now you know that you are afraid? What have you been doing?

If they had gathered their arrogance earlier, they wouldn't be in this dilemma now, they are simply making their own death!

## Campus Master Chapter 2926 -

Outside the workshop.

Those technicians no longer had the same smugness and arrogance they had before. Especially the dozen or so technicians who had called upstairs to make a complaint, their faces were white and there was a look of panic in their eyes!

If they hadn't seen with their own eyes that the caller ID was indeed the leader's phone number and the voice coming from the phone was also the leader's voice, they couldn't believe this result!

How could this ..... be possible!

They called to complain about Ji Feng, but instead of nothing happening to Ji Feng, they were reprimanded by the leader, and they were only given two choices ..... both of which were painful to choose from!

When they think of the consequences of being fired, they can't help but tremble at the bottom of their hearts, but to say to go and beg for Ji Feng's forgiveness ..... this is simply more unbearable for them than firing them!

Just now ..... just now, they also gave Ji Feng a shrug and walked out of the workshop with a swagger, now let them go back to the workshop to beg for Ji Feng's forgiveness, this is simply the same as they reach over and let Ji Feng slap their faces hard, this is almost like killing them ah!

"Dingling ....."

Suddenly, another technician's phone rang, only to see that he was abruptly startled, then he thought that he had not just called to complain about Ji Feng, he could not help but feel a little more at ease, although he saw that the caller ID was from the leader, but thought that there should be something else looking for him.

He picked up the phone, "Leader, you ....."

"What are you up to?!" As soon as the phone was connected, a roaring roar came from inside, the sound so loud that people a few meters away could hear it clearly.

"Leader, I ....." The man was even more startled, his face changed and he tried to explain in a panic.

"I what I?! Ah?! What did the unit send you to Jiangzhou for?" The roaring voice on the phone seemed extraordinarily angry, "But look what you've done to yourself! I think you don't even know how thick the sky is, you don't even know your own name, do you?"

The man was so confused by the scolding that he didn't even know what was happening, even though he had a bad feeling in his heart, but he didn't want to believe it. Because just now, he didn't call to complain about Ji Feng!

But what he feared came to him, just as he thought so, he heard the roaring voice on the phone roaring, "I'm telling you, now you are in Jiangzhou for me to complete your task honestly, if anything goes wrong in the middle, then no one can save you, when the time comes, you will take the initiative to hand in your resignation report, you are on your own!"

There was a snap!

The other party hung up the phone.

The man stood frozen on the spot, with a stunned look on his face.

"Ding Ding ....." Soon, some other people also received calls one after another, and looking at their miserable pale faces and the kind of angry roar coming out of the phone, one could guess that the content of the call was much the same.

"....."

When the call was answered, everyone couldn't help but look at each other in disbelief, and it was only at this point that they realised that they were probably really in big trouble today!

Except for those two people who had absolutely no chance of being fired straight away, everyone else couldn't help but panic, and those who had been warned had a red face and a blue face, which was simply wonderful.

"Professor Tong ....."

At this time, someone remembered Professor Tong and carefully approached him, asking, "Professor Tong, we can only rely on you for this matter!"

Professor Tong coldly snorted, "Sorry, there's nothing I can do. What's more, I'm not your direct leader, I'm only nominally your lead team, I can't help you either!"

Those people's faces turned even whiter, but they were still undeterred and said, "Professor Tong, please help us, we can't lose this job, otherwise, we will be finished in the future!"

Professor Tong's face was sullen and he did not say a word.

A few more people came around and begged, "Professor Tong, please help us, otherwise we will really be finished!"

Professor Tong's face was expressionless, but in his heart he was so relieved.

Although he was nominally the leader of these people, in reality these people were not in the army, only a small number of them had military status, the others were all contract employees in the various research institutes, so he, the leader, could not actually discipline these technicians at all like he did the military.

After all, this is just a job for people, and the discipline of the army does not apply to them completely.

On the way, although these technicians seemed to be quite obedient, after all, that kind of scatteredness and freedom made them much worse than the soldiers, which made Professor Tong a bit dissatisfied, but he could not say anything about them.

As a result, when they came to Jiangzhou they actually didn't put Ji Feng in their eyes again, let alone listen to him as the leader, so he was naturally very angry in his heart.

Now it was good!

These people had finally kicked the bucket!

Now they had remembered that they were their leader, what had they been doing?

However, after all, Professor Tong was not an official specialising in politics, but a scientist, so after those people begged and pleaded, he softened his heart and said, "I can go and talk to Mr. Ji, but I'll say it up front, I'm just going to try, I don't know whether they will forgive you or not."

The technicians naturally thanked him profusely, their eyes were now glazed over by the blow to the head, but their minds were clearer than before, they knew that Professor Tong could not make the decision on this matter, and to agree to help them plead for mercy was already a great favour.

"Then you guys wait outside, I'll go talk about it!"

Professor Tong walked into the workshop, but saw that Ji Feng was still busy working in front of the equipment, which made him slightly stunned, and he could not help but admire more or less at the bottom of his heart, saying that no wonder he was able to make such achievements at such a young age, just this kind of focus and seriousness was something that many people did not have.

With this kind of attitude, you are halfway to success.

"Mr Ji is really serious!" Professor Tong walked forward with a smile on his face, "I wasn't able to help much either, I'm really ashamed!"

"Not really!"

Ji Feng stopped the work in his hands, the next ones were more delicate and fine work, so he couldn't be distracted, so he simply stopped, "Professor Tong doesn't need to be overly modest, there's still a lot of work that needs your help next, after all, there's a shortage of manpower now, you'll have to work a little harder too!"

Professor Tong gave an erroneous cry and said, "So what, Mr. Ji, actually it's like this, those technicians are just young and vigorous and have been spoiled in the institute, in fact they all have no bad intentions!"

Ji Feng nodded his head, "Oh!"

"....."

Professor Tong then couldn't help but be a little stunned, what did this oh mean?

He had some difficulty in speaking, but when he thought about the pleas of those technicians, he still said, "Mr. Ji, look since there is a shortage of manpower now, those technicians ....."

"Professor Tong, are they spoiled, what's it to me?!" Ji Feng suddenly asked.

"Ah?" Professor Tong was stunned.

"I am not their leader, nor am I their parent, I have no obligation to spoil them, right?" Ji Feng asked.

"..... right!" Professor Tong nodded his head and smiled bitterly, he seemed to have realized what Ji Feng was going to say.

"Then, in that case, is there anything else to say?" Ji Feng asked again.

Professor Tong was speechless.

Ji Feng smiled, "That's it, let them go back where they came from, as they said, since they can't afford to serve, then I won't serve!"

Professor Tong was anxious and said, "Mr. Ji, don't be angry, these people are all technical backbones, if we drive them away, won't there be a shortage of manpower for many things to come? We can't do it with just the two of us!"

Ji Feng immediately laughed: "There's a shortage of everything in this world, but not a shortage of people, especially young technicians, and that's a flood of them! Just as well, our headmaster also called me earlier, hoping that I would arrange more students from our school, United University, Professor Tong should know about it, right? The scientific research force there is also not weak, and there are even more young graduate students with PhDs, if we let them come over, they can also be competent, moreover, at the very least, they are much better than those people outside!"

Professor Tong opened his mouth, hard unable to say anything, and had to admit that what Ji Feng said was reasonable.

"Mr. Ji, no matter what, they all know that they are wrong, they should always be given a chance to correct themselves, after all, these people are also the technical backbone of various research institutes that have been cultivated for many years, if they are really fired, then the military's scientific research force will be more or less affected."

Professor Tong consoled, "Just give them another chance to see how they perform, what do you think?!"

In order to obtain Ji Feng's forgiveness, Professor Tong had even used a salutation.

Ji Feng said, "It's fine to give them a chance, just do as I said earlier, let them pull the ore and process the metal, then all of them wait outside, no one dares to step into the workshop without my order ....."

"Promise you won't!" Professor Tong didn't even wait for Ji Feng to finish, he turned around and walked quickly towards the outside.

"Humph!"

Ji Feng shook his head and couldn't help but give a cold snort. In fact, if it wasn't for the fact that he was really short of some manpower, he definitely wouldn't want this group of people anymore, these people were simply the kind of spoiled unbearable bastards who still thought they were great.

But it had to be admitted that these people had more or less a technical foundation, especially in the field of weapons, and were far from those post-graduate and doctoral students in universities and so on.

That's why Ji Feng interrupted to give them a chance, but if these people want to learn any more technology from him, don't even think about it!

Soon, Professor Tong came in with those technicians, those people followed behind Professor Tong, no longer had the same unbeatable and high-minded look as before, all of them had embarrassed faces, some of them even turned red, lowered their heads, not daring to look at Bai Zhu and Ji Feng at all.

Instead, Ji Feng didn't even look at them, which made them both relieved and incomparably lost and embarrassed in their hearts, but they stiffly didn't dare to say one more word!

"Go to work!" Ji Feng said indifferently.

Everyone went to work honestly, and no one dared to disobey him any more!

## Campus Master Chapter 2927 -

The day quickly passed again, this whole day Ji Feng has been immersed in the experimental research, for those technicians to move ore to do hard work did not even look at a glance, as if these people do not exist.

But those technicians didn't dare to have any complaints or grievances!

The call from the leader suddenly sobered them up from their original arrogance and incomparability, making them realise how ridiculous their previous complacency and arrogance really was, and that they could lose their jobs, and even their future, without a word!

This made them honest!

Even if these people had never done heavy work before, and were so tired of carrying ore that they were red in the face, none of them dared to stop and take a break .....

They were really scared!

The first thing you need to do is to take a look at the actual situation, and you can't help but shake your head at this scene. At that time, if they had listened honestly to Ji Feng's orders and not put themselves in such a high position, thinking that the sky was the boss and they were the second, why would they have ended up in this situation now?

But now, after angering Ji Feng, it is still unknown when they will be able to follow the study again, because Ji Feng is not their mentor or leader, he has no obligation to teach them, even, when Ji Feng is doing experiments those people can be around to watch this is already considered Ji Feng is quite good to them!

So, for the situation these people were in, Professor Tong couldn't help but say in his heart, "I should!"

But after a long time, Professor Tong couldn't bear to look at them, after all, these people had never done any heavy work, and now a few of them were already exhausted, so Professor Tong had a heart that couldn't bear it and found Ji Feng to plead for those people.

But what Professor Tong didn't expect was that just as he came to the front, he heard Ji Feng say, "Professor Tong, you've come just in time, the ore doesn't need to be moved!"

"Really?!" Professor Tong was instantly overjoyed.

"That's right!"

Ji Feng nodded slightly and said, "The alloy doesn't need to be processed for now either ..... eh? It's all finished processing already?!"

Only then did he realize that on the two rows of shelves not far away, there were already processed laser gun casings, although they were only half-finished, but looking at that quantity it was almost time to use up all the alloy that had been shipped.

Professor Tong nodded and said, "Yeah, it's already been processed a long time ago, everyone has gone to move the ore!"

Ji Feng nodded noncommittally and said, "Let's leave it at that for today, the first stage is sort of complete on my side, and if there are no surprises, the energy source will be able to be made soon."

"That's great, Mr. Ji, your speed is really fast!" Professor Tong couldn't help but say in surprise.

Ji Feng smiled and said, "Call those people over, the next energy source still needs them to test it, of course, the premise must be if they are willing to do it, if not I definitely won't force ....."

Professor Tong immediately said, "They are definitely willing, I'll go get them!"

Just kidding, still not willing now? Who would dare to put up a show?

I'm afraid those technicians would like to start testing the next second, so heavy ore for them to push with trolleys and carry by hand, that kind of intense labor makes them really unbearable, I'm afraid their bodies will fall apart.

Professor Tong was just about to leave, but he was stopped by Ji Feng again, "Wait."

Professor Tong was stunned, "What, Mr. Ji still has something to do?!"

Ji Feng smiled, "Professor Tong, there is one more thing that must be done before we can move on to the next stage, the surveillance video that was recorded overhead before, can it be deleted?!"

"Ah?!"

Professor Tong's face suddenly turned red, looking embarrassed. He didn't expect that Ji Feng would know that there were surveillance cameras on this overhead, which had all been hidden very concealed ah, how .....

The next sentence of Ji Feng, however, even made Professor Tong's mouth open wide, and he stood there dumbfounded, not knowing what to say.

Only to hear Ji Feng say, "I've already asked Bai Zhu to remove the hard drive, so I don't need to bother Professor Tong, but I still need to tell you, otherwise it's a bit impolite!"

"....."

Professor Tong's face was bitter, he no longer knew what to say.

Not only had the person discovered the surveillance camera overhead, but they had also already removed the hard drive that stored the video and information without even knowing it themselves, what could he say?

Professor Tong could only smile stiffly and stuttered, "Then, then I'll go and call them!"

After saying that, he hurriedly walked out.

Ji Feng shook his head and smiled, Xiang Jiefang couldn't be confused, could he be, to send these people to steal the master? Did he really think he was that stupid?

.....

Yanjing, the military compound, Xiang Jiefang's office.

"Elder Xu, is there any news from the people you dispatched?" Xiang Jiefang asked.

"No news yet, just that those few little brats didn't listen very well and seemed to have angered Ji Feng and caused a little conflict, which has now been resolved!" The one who spoke was an old man sitting opposite to Xiang Jiefang.

If Ji Feng was here he would have recognized it, this old man was no other than the old man from the military's Sixth Research Institute that he had seen in his younger uncle Ji Zhenping's office before he left Yanjing.

"There's a conflict?"

Xiang Jiefang couldn't help but stare at his words, "What the hell is going on?!"

The old man known as Elder Xu said, "Actually, there isn't much conflict, it's just that those boys are usually spoiled and not quite willing to obey Ji Feng's command, and as a result, there is conflict between each other."

Xiang Jiefang couldn't help but frown at his words, "Nonsense! They went over there to learn other people's techniques, and they are still not willing to obey their command? Do they still have to be taught by others of their own accord? Xu Lao, you must tell those technicians that the most important thing now is to learn the techniques, nothing else is important!"

Xu Lao's words made Xiang Jiefang a little angry, he didn't even look at what was going on, he was still playing with his temper, it seemed that those technicians were really spoiled, they couldn't distinguish between priorities, they didn't have any sense of the bigger picture!

The person himself went to steal the teacher is already very that, do not pay at all, do not even want to listen to the command of others, what do they want to do? What can such people do if they want to come?

"I've already arranged for it, they definitely won't dare!" Xu Lao said.

"We'll talk about these issues later!"

Xiang Jiefang waved his hand, but in his heart, he said, "That Ji Feng kid might be even more angry, and he must have taken the blame for it all on his head. But in fact, those people were not sent by him, but by the young technical elites that Xu Lao had pulled out from the various research institutes underneath.

But now, it seemed that there was something wrong with Elder Xu's arrangement.

"Elder Xu, how are the technical abilities of those people? Will they be able to learn?" Xiang Jiefang couldn't help but ask.

"Chief, don't worry, those are the technical backbone of the younger generation of the various research institutes, they will definitely be able to figure it out as long as they have seen it, besides there are other arrangements besides, there will definitely be no problem in learning the technology!" Xu Lao said confidently.

In his opinion, although they had not yet mastered the technology of the laser gun, based on the study of the one from the dynasty that had been captured before, most of the technology in it had already been eaten up by them, although they did not know how different the laser gun developed by Ji Feng was from the one from the dynasty, but according to Ji Feng, the principles in it should all be similar.

Since that was the case, there was certainly not much of a problem.

After all, people from different professions and fields were responsible for different techniques, and a person only needed to write down one step and combine them all to create the completed laser gun.

There wasn't much difficulty in that!

Xu Lao was confident.

"Ding Ding Ding ....." Suddenly, the phone on Xiang Jiefang's desk rang, he gestured to Xu Lao and casually picked up the phone, "This is Xiang Jiefang!"

A few moments later, Xiang Jiefang's brow furrowed and his face sank: "What nonsense! You're not fit for purpose! I know, I'll handle this!"

After saying that, he hung up the phone with a snap.

Seeing that Xiang Jiefang had suddenly lost his temper, Xu Lao couldn't help but be stunned and asked carefully, "Chief, what are you ....." doing?"

"Elder Xu, who exactly are the people you sent there?!" Xiang Jiefang couldn't help but rub his brow, "Just now, the following reported to me that instead of listening to Ji Feng's command, those technicians even complained about Ji Feng, and as a result, it enraged Ji Feng, the entire first stage of the research experiment didn't involve those technicians at all, and even, even the video of the entire research process was taken away by him!"

"What?!"

Elder Xu instantly exclaimed, "The footage taken was also taken away?!"

Xiang Jiefang's hand was raised high, but after holding it back, he didn't slap it down, but finally put it down heavily on the table and said, "He's simply not good enough for what he's done!"

Xu Lao's face turned red and he couldn't say a word.

"It's just that!"

A moment later, Xiang Jiefang waved his hand and said, "It looks like that kid is also guarding against us, he doesn't want to give away his technology!"

Xu Lao immediately said, "This kid is really ....." Minister Ji's son how so little awareness, this is really ....."

The highest chief has said that we should respect knowledge and even more so intellectual property rights, and that it is our awareness that is not high! It's just that!"

Speaking here, he sighed lightly and said, "Since things have come to this point, then let's not do anything else next, and talk about cooperation after Ji Feng has developed something!"

Xu Lao knew he was in the wrong, so he didn't say anything, but in his heart, he hated those technicians, but from the bottom of his heart, he still felt that Ji Feng's technology wasn't anything too advanced, it might just be a certain key issue they hadn't mastered yet ....."

## Campus Master Chapter 2928 -

That evening, Ji Feng received a phone call from Xiang Jiefang, in which he explained to him about those technicians, and Ji Feng just laughed and let it go, and did not take it to heart.

However, when Xiang Jiefang frankly admitted that they wanted to learn the technology of laser guns, Ji Feng could not help but be slightly stunned, and his heart was more or less impressed. It has to be said, to be able to reach this position, Xiang Jiefang indeed has the courage, just because he can frankly admit that he wants to secretly get the laser gun technology in hand, this is not ordinary people can compare!

You know, as a leader, there are very few people who would admit their mistakes so openly, but Xiang Jiefang did so openly, and on this point, I don't know how many people should learn from him.

However, admiration does not mean that Ji Feng would give the technology to the military at the drop of a hat.

So when Xiang Jiefang mentioned the technology transfer thing again, Ji Feng laughed: “Xiang chief, you are not quite ..... I am in business, you also know that the core of business is technology, if the technology is handed over, then our business can be a bit dangerous! ”

The company’s technology is the core of the business, and if you hand over the technology, then our business can be a bit dangerous!

Ji Feng couldn’t help but smile bitterly: “Chief Xiang, this technology was originally applied to weapons, the civilian side .....” He shook his head, it’s not like the laser gun technology can’t be applied to the civilian market, but this doesn’t intersect with the business side of the Tengfei Group!

The actual fact is that you’ll be able to get a lot more than just a few of these. With your new alloy technology, there is still a lot of potential in the civilian market, right? Whether it’s for military or civilian use, I think your new alloy can be used for everything! Also, if you could modify the energy source you mentioned, it would also be promising in the civilian market!”

Ji Feng was stunned, he knew so much about Liberation?

He did not know that many of the technologies in the civilian market had been converted from military to civilian use, and that most of the military technologies could be applied to civilian use with some slight changes, or with some deletions, and the results were quite good!

When it comes to the conversion of military technology to civilian use, the most typical example is alloys!

I’m afraid no one would have thought that when military alloy technology was opened up to the civilian market, the surge swept the country in an instant, and now if you look around our lives, you can see all kinds of alloys almost everywhere, while in the beginning, high performance alloys were used for military purposes.

For these, Xiang Jiefang, as one who has worked his way up from the military, is naturally no stranger to this.

However, the issue of using the technology of laser guns in the civilian market, Ji Feng had his considerations, but this was not a reason to sell the technology to the military.

So Ji Feng still refused very politely, “Chief Xiang, still the same words as before, I can guarantee to provide it exclusively to our Chinese military only, but forget about the buyout, I think a long-term and stable cooperation is far better than a one-time buyout, what do you think!?”

“You brat .....

Hearing Ji Feng’s refusal, Xiang Jiefang could not help but shake his head, this kid’s attitude was really resolute, but there was no way, this technology was Ji Feng’s, although the two of them had an agreement before, but it did not include having to let Ji Feng sell the technology to the military.

So, Xiang Jiefang did not mention this matter again, but only said, “You first develop the thing as soon as possible, and then we can talk about it! There’s always a solution to things!”

Ji Feng nodded and smiled, “You’re right, I’m close to success on my side, it’ll only take a few more days at most, two days if it’s quick!”

Xiang Jiefang’s spirit shook at his words, “So soon? That’s good, then you should do it as soon as possible!”

After ending the call, Ji Feng was in a good mood. It seemed that Xiang Jiefang’s attitude had been relaxed, which was a good sign.

With motivation, Ji Feng was naturally more energetic about his research. In fact, after this day’s experiment, the energy source was close to being manufactured, and the next step was to test the various data and indicators of the energy block, especially the stability, and then the final encapsulation could be carried out.

In this regard, Ji Feng intended to leave it to those technicians who had their eyes above the ground!

He wanted to see whether these technicians had the corresponding skills since they were looking at people through their noses, and also because he would not waste his time on such boring experiments, as there were more important things to do next.

–Assembling the production line for the new chrome alloy!

In fact, there were no more problems with the laser gun now, except for the problem of the energy source. However, once the laser gun was developed, the Tengfei Group would have to provide enough new chrome alloy to manufacture the laser gun, so as to be able to guarantee the mass production of the laser gun.

Once the laser gun is developed, the military will have to replace it in large quantities, and just the thought of how much demand there will be makes people tremble.

Even if only the regular field armies were to be equipped with laser guns, it would be a staggering figure.

And how to ensure sufficient production is also extremely important.

This was also the opportunity for the Tengfei Group to enter the industrial field and rise to prominence!

So while those technicians were testing the energy block data and indicators, Ji Feng returned home in the evening, ready to discuss with Xiao Yuxuan about the alloy production line.

However, when Ji Feng and Bai Zhu returned home, they saw Qin Shujie and Xiao Yuxuan and the others talking about something at the villa’s front door, while the little girl was running around, looking very happy.

“Daddy~”

Yao Yao’s eyes were sharp and when she saw Ji Feng coming back she instantly had a happy smile on her little face and ran over and jumped into Ji Feng’s arms at once, “Daddy you’re back, Yao Yao missed you so much!”

Ji Feng laughed and picked the little girl up, “Little girl is really sweet-mouthed!” Saying that, he gave a fierce kiss on Yao Yao’s little face, causing the little girl to giggle and say daddy beard zapper while but laughing non-stop.

Played with Yao Yao for a while before Ji Feng turned his head and asked, "Why are all standing at the door?"

Xiao Yuxuan said, "Shujie wants to go back, we are persuading her!"

Ji Feng immediately looked at Qin Shujie and asked, "Shujie, you want to go back?"

Qin Shujie nodded her head and said, "Mm. I've been here for a few days, it's time to go back, and the house needs to be cleaned up, otherwise it's going to get moldy!"

"There's a nanny at home, do we still need you to clean up?!" As soon as Ji Feng heard it, he knew that this was a complete excuse on her part, "Besides, Yao Yao's school hasn't been decided yet, why do we have to go back in such a hurry?"

"There's always a need to go back!"

Qin Shujie gathered her hair, avoided Ji Feng's gaze and said, "I've already asked a friend to contact me about the school, the kindergarten doesn't matter, there's a good kindergarten near our community, although it's not a particularly good one, it's close to home, so it's good to take care of her!"

Ji Feng knew that she might be a little uncomfortable living here, and wanted to persuade her to stay, but couldn't open her mouth. To let her live here for her own sake was too aggravating and unfair to her.

After all, Qin Shujie was not Bai Zhu, and it was more or less difficult to get her to suddenly accept people like Xiao Yuxuan and Tong Lei like a family, especially when their relationship was still so special.

So Ji Feng could only nod and say, "Alright then, I'll send you back!"

"Mm." Qin Shujie nodded her head.

"Shu-jie, then you can come more often in the future, we're good sisters right?" Xiao Yuxuan said.

Since Ji Feng had agreed to Qin Shujie leaving, it was not good for her to persuade her, however, the few days Qin Shujie had stayed here had allowed them to get to know each other a bit, at the very least it had allowed her to understand that Qin Shujie was not a snobbish woman and was not bad at heart, they were still getting along rather well.

Qin Shujie nodded her head and smiled, "Of course. Sister Yu Xuan, Lei Lei, the few days I was here were actually some of the happiest times I've ever had, and we'll still be good sisters from now on!"

Looking at this gentle and elegant, yet charming and beautiful young woman, the original bit of not feeling in Xiao Yuxuan's heart instantly disappeared without a trace.

"Let's go, since we have to go back then we should do it before it's too late!" Ji Feng said, turning around and getting into the car with Yao Yao in his arms.

After saying goodbye to Xiao Yuxuan and the girls, Qin Shujie took Zhang Li and got into the car as well.

Leaning on Ji Feng's shoulder, Qin Shujie was very quiet and bashful and said softly, "Honey, thank you."

Ji Feng was stunned, "Thank me? Thank me for what?!"

Qin Shujie pursed her lips and shook her head with a light smile, saying; "Nothing. Anyway, it's just to thank you! Just don't ask, anyway, I'm very happy to follow you during the few days here, I'm also very happy and happy!"

Ji Feng was dumbfounded, "That's a strange thing to say ..... Forget it, since you don't want to say, then I won't ask."

The woman's heart, he really can't guess.

However, in Qin Shujie's gentle, watery eyes, there was a smile of happiness.

It's not just that the few days she spent here made her feel happy and warm, but that ever since she followed Ji Feng, she felt her life had changed forever, like this time when Yao Yao had an accident.

But following Ji Feng's side, his generous and strong arms, the kind of strength that really treated Yaoyao as his daughter and her as his wife, made her really at ease and happy!

Following Ji Feng, she was really happy!

But, this kind of little daughter's mind, she can just know it in her own heart, just be secretly happy, no need to let Ji Feng know!

## Campus Master Chapter 2929 -

Two days passed in a flash.

On the third day, Professor Tong called, "Mr. Ji, it's out, the data is out!" Perhaps because of his excitement, there was a tremble in his voice.

Although Ji Feng had expected it, he could not help but feel a tremor in his spirit when he heard it: "Oh? It's all out?"

Professor Tong said, "That's right! A total of five times, each time the test results are similar, all within the reasonable margin of error you gave, you succeeded!"

"Good!"

Ji Feng exclaimed.

The energy source had succeeded, he couldn't help but clench his fist and waved it fiercely in excitement!

Although at least the energy block tested by the technicians led by Professor Tong had not yet been completely made into an energy source, it was actually only the last step away from being made into an

energy source, the stable performance of the energy block was the main thing, and the next step in making the energy source was only to encapsulate it and leave a proper external interface!

It can be said that the stable performance of the energy block is one of the necessary conditions for the manufacture of the energy source, which is also the most critical condition.

For example, Ji Feng once made a rudimentary laser gun, or a small laser cannon, using nuclear energy as the energy source, because the energy source was extremely unstable, so Ji Feng made layer after layer of protective measures, and also used the isolation suit to wrap, just that, when using together with the detection can still detect very strong nuclear radiation.

If it wasn't for the fact that the fighter jets of the Philippines and Vietnam were chasing too tightly and too fast, he would never have used it, because a messed up, the whole ship might have been swept by that strong nuclear radiation ..... High intensity nuclear radiation for the human body in the end has what kind of harm, that is self-evident!

If the situation were more serious, for example, if the entire laser gun had exploded after firing, the power would have instantly swallowed the entire ship, and they would have been swallowed up by the terrifying energy to the point of no residue left!

You can imagine how terrifying an unstable energy source can be!

Therefore, in order to create a stable and long-term laser gun, a stable and gentle energy source is one of the most essential conditions!

"Mr. Ji, when are you coming over to take a look!?" Professor Tong's voice also seemed excited, what the success of the energy block test meant, of course he couldn't possibly not know, "We still need to rely on you for the next research!"

"I'm coming over!" Ji Feng said.

"Then we'll wait for you in the workshop!" Professor Tong said.

After hanging up the phone, Ji Feng couldn't help but wave his fist twice, it really worked!

So it seemed that the production line was going to be launched as soon as possible, Ji Feng changed his clothes while picking up his mobile phone and dialed Xiao Yuxuan, "Yuxuan, how is the selection process for the alloy production line going?"

Xiao Yuxuan said, "Still in progress, your requirements are too high, the best in terms of finishing is still Kepong and Europe, but you treat Kepong as a secondary consideration, a European attached to our requirements may be only a few, I am making the selection!"

It is easy to produce alloys, even with small artisanal workshops.

For example, this new batch of chrome alloy that Ji Feng used recently was actually produced in a small factory in cooperation with the United University.

However, the purity of the new chrome alloy produced by this method is not guaranteed, there are too many uncontrollable factors, for example, in the finishing process, the lack of precision of the instruments will lead to too much or too little of one or several elements in the alloy, which will affect the final performance of the new chrome alloy.

Therefore, to produce the new chrome alloy in large quantities, there must be a precision production line, and this kind of production line, which is difficult to find in the country, must be imported from foreign countries.

This matter was handed over to Xiao Yuxuan, the selection of manufacturers, screening models and so on these issues must be left to the professionals, Ji Feng was freed up to optimize the design of the laser gun as much as possible, after all, at this stage the materials used in the manufacture of the laser gun were not exactly the same as those of the Gamma system.

He communicated with the intelligent brain, but did not want to use its database completely, he wanted to rely more on his own ability to optimise the design.

"All I want is a production line with sufficient precision, whether it's new or second-hand, it doesn't matter!" Ji Feng said, "You keep an eye out for more, and it's best to buy them as soon as possible!"

"I know." Xiao Yuxuan nodded and asked again, "What if Boundary Pont's is the most suitable? Should we buy it from the Boundary Pont?"

When it comes to finishing capabilities, Kepong is one of the best in the world. Many people know that Germans are stereotypical, serious and strict, but in fact, if one spends some time in Kepong, one will find that in fact, Kepong people are no worse than Germans in terms of rigour and seriousness, or even better than them.

In addition, the people of Kepong are like sponges, absorbing and learning from other countries' advanced technology, so that the finishing technology of Kepong can be said to be one of the top two in the world, almost on a par with Germany.

What's more, Kepong's machines are cheap! And a lot cheaper too!

This makes the competitiveness of Kepong's machines rise sharply, just take a look around how many Kepong machines, whether it is small to household appliances or large to construction machinery such as excavators and so on, Kepong machines in China completely occupy most of the mountain, which is not without reason!

These reasons Ji Feng naturally also knows that the Kepong machines are indeed good, putting aside national hatred and other stereotypes, objectively and fairly speaking, although the Kepong products are not good value for money, but the quality is really quite good, moreover, the price is also much cheaper than the European.

But the problem is .....

Ji Feng's heart has a natural rejection and disgust for Kepong, the tyranny this country inflicted on China decades ago and the disaster it brought to China has not dissipated until today!

"If we can pick the right one in Europe, then we'll use the European one!" Ji Feng said in a deep voice, "Even if the European machines are more expensive, we won't buy Kepong's!"

"I know."

Xiao Yuxuan nodded, she had long known that Ji Feng would answer in this way, Ji Feng's attitude towards the people of Kepong, as the person closest to her, she naturally knew it all too well, in fact, the reason why Ji Feng said that he wanted to make Kepong a secondary consideration was actually to deliberately put pressure on the Europeans as a way to press the price, not really to consider Kepong's machines.

Ji Feng said, "As soon as possible, the production line still needs time from loading the ship to shipping it over, but we don't have that much time to waste on our side!"

Xiao Yuxuan nodded and said, "OK! I'll arrange it as soon as possible!"

Ji Feng gave a few more instructions before hanging up the phone.

He couldn't help but frown at the boundary canopy .....

"Sooner or later, one day, China's industry will completely surpass Kepong, it will!" Ji Feng secretly said to himself.

.....

When Ji Feng arrived at the workshop, Professor Tong and the others were looking at something around a piece of equipment, and some were even dancing with their hands in great excitement.

"Professor Tong!"

Ji Feng's voice brought the people present back to their senses, and as soon as Professor Tong saw Ji Feng he even immediately said excitedly, "Mr. Ji, it's successful, we've succeeded!"

Looking at this middle-aged man who was as excited as a child, Ji Feng suddenly felt a sense of respect in his heart, our country, there are still such dedicated people with the heart of a child!

"This is the test data, take a look!" Professor Tong handed a stack of a4 paper to Ji Feng and said, "These are the results of all the tests, the stability of the energy block, the unit energy contained and various other indicators were tested separately, the errors are all within the reasonable range you gave!"

Ji Feng nodded with a smile and took the test results, "I'll take a look, you guys have worked hard!"

Professor Tong waved his hand with a smile on his face, "No hard work, no hard work, you did all the experiments and research, we just followed the beatings ....."

Speaking of which, Professor Tong couldn't help but feel a bit emotional, to say the least, they were really just following Ji Feng around and doing all the research from start to finish!

Especially when those technicians were having a temper tantrum playing a big game, Ji Feng was the only one in the workshop seriously researching the experiment, at that time they didn't even make it to play hands, now they are just in charge of the test, what can it be?!

Ji Feng didn't say anything else, and picked up the test results and looked at them.

The first thing he looked at was the radioactivity of the energy block, after all, this thing was the most basic indicator of whether the warrior using the laser gun would be harmed.

"So low?!"

Even though Ji Feng had been mentally prepared for this, he couldn't help but be shocked when he saw the shockingly low radioactivity value on the a4 paper, which was almost negligibly low!

Professor Tong said excitedly next to him, "Mr. Ji, it is really inconceivable that the originally radioactive ore, after your treatment, would become almost free of any radioactivity. If this technology can be applied to today's nuclear physics, it will certainly have great significance for reference!"

Ji Feng shook his head and smiled, saying, "It's not the same, it's mainly the characteristics of the material, it doesn't have much to do with the treatment method!"

Although Ji Feng said so, Professor Tong was still excited.

Ji Feng smiled and continued to read on, and when he finished reading all the test results, he couldn't help but show a look of excitement on his face, nodding his head and saying, "We can confirm that the experiment is successful! Tomorrow, start manufacturing samples!"

The energy source was a success!

When Xiang Jiefang and the others, who had been following the progress of the development of the laser gun, learned of the news, they could not hide their excitement, and they were really impressed by what it meant!

At the same time, however, there were those who were resentful.

On the steps of the flower bed in the open square of Jiangzhou Station, two young men in their twenties and thirties were both smoking cigarettes and looking depressed.

"This time my future is over!" One of them said with a grizzled expression, and with that, he took two fierce puffs of his cigarette.

"Isn't it the same for me?" Another man gritted his teeth and said, "It's all because of that bastard Ji Feng, he has ruined our future!"

## Campus Master Chapter 2930 -

These two people were the same group of people who had previously called outside the workshop to complain about Ji Feng and threatened to have him replaced by the top, except that the vast majority of them had asked to go and beg for Ji Feng's forgiveness after being severely reprimanded by the top at that time, but these two people were more unlucky and were directly fired from the unit!

Originally, they were still very reluctant and did not want to go back in disgrace, because now they no longer had their place even if they rushed back to the unit.

What's more, after being dismissed from the unit, they will be subject to the confidentiality agreement they signed before joining, and will not be able to work in the same field of research for the next few years.

They wouldn't even be qualified to go to a military tribunal!

So these two men were late in leaving the factory after the matter had come to a head, trying to ask for Ji Feng's forgiveness, but the soldiers standing guard were not going to be polite to them, and after the work badges hanging on their chests were taken off, and after Professor Tong personally explained that they were disqualified from working, the soldiers standing guard unceremoniously asked them to leave the factory!

The two men could then only leave helplessly.

Now while waiting for the bus, both of them were filled with resentment in their hearts and couldn't help but curse Ji Feng behind their backs.

After cursing for a while, the two men became downcast again because they actually knew that even if they cursed Ji Feng to death behind his back, it would not help, Ji Feng could not hear them at all and would not be affected in any way by their curses!

So the two of them gradually just smothered their cigarettes and stopped talking. The next thing they were going to face was being sacked from the unit, or even being ostracized from the entire industry .....

When they thought of such consequences, both of them could not help but tremble a little in their hearts, and in their hearts they even hated Ji Feng to the bone.

"If I have the chance in the future, I will definitely not let Ji Feng go!" A technician gritted his teeth and said, "The reason I've ended up in this situation is because of this man! I won't let him go!"

"That's right! This man is simply cold and heartless, I really regret that I actually stayed and begged him at the end, trying to ask for his forgiveness ....., I just want to kill him now!" The other man was similarly gnashing his teeth in hatred, and while saying this he waved his fist twice so fiercely that it seemed like he would want to smash Ji Feng to death if he were right in front of him!

But both of them knew that they were just sending out their mute hatred here, in fact, even if Ji Feng was in front of them, they wouldn't dare to do anything.

However, just at this time, a voice suddenly sounded out from the side, "If you really want to kill Ji Feng, I can help!"

Both of them were startled by this sudden voice and turned their heads in a panic, then they saw an ordinary dressed man, probably in his thirties or forties, sitting on the flower bed next to them, and at the moment this man was looking at them with a smile on his face.

"You, what are you?!" One of the technicians asked, and the other was wary, knowing that what they had just said was somewhat inappropriate.

"I'm the one who can help you!" The man said, "Just now I think I heard you guys say that you lost your jobs? And it was because of Ji Feng?!"

"Why are you asking this! You ....., you know Ji Feng too?!" Another technician opened his mouth to ask. Although he was already wary inwardly, he didn't know that in fact, his question was already equivalent to giving the other party an answer.

Sure enough, the smile on that man's face got even wider as he smiled and said, "Of course, if I didn't have a grudge against Ji Feng, how would I have noticed your conversation? I used to be an employee in his company, but then, just because of a little thing, he fired me, without any mercy at all! Both of you, how did you offend that villain Ji Feng again?!"

"We ....."

"We didn't offend him!" One man was just about to speak when he was interrupted by another technician; their research project was top secret, so naturally they couldn't just tell outsiders.

Hearing this, the man smiled and said, "It's alright, since you guys don't want to talk about it then forget it! However, I am planning to seek revenge on Ji Feng, if you guys can give me a little information about him, I will pay you enough!"

"We don't need payment or anything, and we can't give you information, I'm sorry!"

"I'm not offering anything less!" The man said.

"That won't do either, we don't know ....."

"One hundred thousand!"

"Sh, what?!" The two technicians froze for a moment.

The man said, "As long as you guys tell me some information about Ji Feng, like what he's been up to lately, where he passes by every day, etc., I'll give you each a hundred thousand dollars for the information, how about that?!"

When the two technicians heard that, they couldn't help but look at each other, and one asked, "What do you need to know all that for?!"

The man said, "I told you, I have a grudge against Ji Feng, if it wasn't for Ji Feng, I wouldn't have achieved nothing by now, and ....., my wife also divorced me, except for a small house, I don't have anything, it's all because of Ji Feng! "

"Then ....."

"So I want revenge!" The smile on that man's face disappeared and he said through gritted teeth, "I sold the house, I want to take revenge at all costs, now, I just want you guys to tell me about Ji Feng, do you know where he is? As long as you guys tell me, the money is negotiable, I can add more!"

The two technicians were somewhat moved, and one of them blurted out, "How much can you add?"

"So, you guys do know where Ji Feng is and what he's doing?" The man asked, "I first need to know if you guys are bluffing me!"

"Bluff you?"

The technician immediately grunted and said, "I know where Ji Feng is now, and I'm still bluffing you?"

The smile on that man's face instantly became bright and incomparable, "Really?!"

"Of course it's true!" The technician said.

However, the other technician felt a bit of danger, and just as he was about to speak, he heard the man say, "This is really good news, it's not in vain that I've gone to all that trouble, it seems that you really know!"

The two technicians froze and one said, "Did you just trick us?"

The man said, "That's right! I don't have enough information at hand, so I can only check up to your level, but I can't find out what you're doing and where you are, but I didn't expect that you really have information!"

"Intelligence?!"

As a military research institute, for these two words that is really too sensitive, these two technicians abruptly face changed, just want to speak, then suddenly felt a violent pain at the back of the head, the eyes black, the person lost consciousness.

Two men dressed in ordinary clothes had appeared behind them at some point and helped them up before they fell softly to the ground, looking as if they were a couple of buddies leaning together who were on better terms.

The man who had originally accosted them stood up and with a wave of his hand, lowered his voice and said, "Get rid of it, quickly, don't draw attention to yourself!"

The other two men nodded slightly and racked the two technicians separately and left the square quickly without attracting anyone's attention.

.....

"Professor Tong, have you finished what you were told to do?" Ji Feng asked.

"It's all done, we're just waiting for the final test!" Professor Tong smiled.

"That's good!" Ji Feng nodded his head in satisfaction.

In the workshop, Ji Feng started his research again, only that what he was doing now was not the energy source, but he was designing and tuning the two key structures, the trigger and the converter, and as for the encapsulation of the energy source, Ji Feng had left this job to Professor Tong, which was actually the same as giving it to those technicians.

—The technicians are still treated as hard workers, but they are just more advanced ones.

But now those technicians don't dare to have the slightest complaint. In fact, it's not only the shock from above, but also Ji Feng's own technology that amazes them.

Just one energy source alone was enough to shock them.

The radioactive ore must not only be energetic, but it must also be treated in such a way that there is almost no radiation and no harm to the human body, which is easy to say, but the technology involved is so complex and profound that they know it too well.

To be fair, they couldn't do it!

They were in awe of Ji Feng for that alone, not to mention the harsh criticism from above on the phone that made them tremble in fear!

With the help of these technicians, Ji Feng's progress was much faster, so he quickly started the design and tuning of the trigger and converter.

In fact, strictly speaking, the word energy had to be added in front of the names of these two structures. The trigger was to excite the energy from the energy source and then pass through the converter to convert the excited energy into a laser super high energy laser to be fired out, which was the main structure belonging to the laser gun.

However, because he had already had previous experience, Ji Feng did not have any difficulty in studying it. Now he was waiting for the energy source to be encapsulated to ensure that not a single bit of radiation would leak out and the damage to the human body would be directly reduced to zero, and then he would start connecting the trigger and the converter and carry out the tuning.

As soon as this step is completed, then it's time to assemble it, and the rest is just a matter of minor issues, and the laser gun is almost complete!

Now, it was just waiting for these technicians to wrap up the energy source with isolation material and encapsulate it!

As a hard worker, Ji Feng considered these technicians to be qualified. The encapsulation of the energy source was completed, and the test went smoothly.

The energy source, completely finished!
