

Chapter 1001

A few years ago, official vehicles entered the station and the airport. To tell the truth, although everyone seems to be indifferent, there is a fire in their stomach.

Except 120, this may be the difference between humans and animals. People are always compassionate.

The 120 with purple warning lights lit up before the plane landed.

As soon as the plane landed, the purser falsely helped Ouyang to get off the plane " Please slow down, old lady. Don't worry. Watch your feet. "

The purser regarded the old lady as the main target this time and Zhang Fanzhen as the bag carrier.

"OK, thank you!"

After getting off the plane, 120 drove directly to the side of the hanging ladder, "Dr. Zhang Fan! Dr. Zhang Fan! "

All the officers in white coats went up the hanging ladder and shouted when they saw an old lady coming out of the cabin.

"Come, come, I am, I am!"

"Quick, the operation has begun. The patient's condition is very serious. "

The officer was really worried and almost took Zhang Fan down the hanging ladder.

After 120, the driver directly stepped on the floor oil and roared away. It was really roaring away.

"What happened?"

After Zhang Fan sat down, he began to ask.

"In the morning, the waiter found..."

The officer said something about the situation. As for the specific condition, he was not very clear.

If Zhang Fan couldn't ask anything, he wouldn't ask. The main reason is that the car runs too fast. If you don't grasp the handrail, you can fly out of the window.

Because the traffic police have prepared in advance, which one of the 120 runs is full of joy. It is estimated that the car hasn't run so fast since it came to the capital. The driver dances like sitting in a chair, hands and feet.

As soon as he entered the golden mean, Zhang Fangang got off and Lu Ning waited in front of the surgery building.

"Come on, Zhang Fan, hurry up, the operation will wait for you."

"Leave me alone, you run, I'll follow." Zhang Fan looked at Ouyang while running. It was difficult for the old lady to catch up. As soon as Ouyang saw Zhang Fan, he waved his hand to let Zhang Fan run first.

Really, just like driving out thieves, Lu Ning leads the way in front, Zhang Fan chases in the middle, and the moderate officer drives out with Ouyang behind.

If this scene is put on the street, it is estimated that the police and enthusiastic people can jump out and be a hero, but it is common in the hospital.

Doctors and nurses passing by didn't even look at it.

After entering the special elevator for surgery, Lu Ning gasped and said: "brain stem bleeding, bleeding points are troublesome, and the probability of surgery on the golden mean side is not high.

When the head of government asks who can do it, we are not sure. After all, it is the brain stem.

Have you had surgery with the director of the second brain Department of the golden mean? He recommended you. "

"Well, I had brain stem surgery with director Li of brain No. 2. At first, the bullet leaned against the brain stem without bleeding. It was squeezing at most."

Zhang Fan explained.

"They have no move now. The identity of patients is relatively special. They are not only rich, but also influential in the cultural and collection circles. Now Dr. Huang Mao of Gangwan suggests conservative treatment.

Mediocre doctors firmly support surgical treatment, but everyone is not sure about surgical treatment. Now it is a little difficult to ride a tiger. "

Although Gangwan came back in the late 1990s, some people's flesh came back, but their heart didn't come back.

For example, it is particularly obvious in the medical sector that they are not qualified for Biao, even for Bangzi country.

In fact, in the early years of Hong Kong, because equipment and instruments entered early, medical technology was really better than that of China.

However, this thing is like drinking water without roots. You can't make many things.

Although Li Jiapo is not big, he plays with high precision. Especially in some key instruments of medical equipment, Europe and the United States have to rely on others. Therefore, the upgrading can be said to be ahead of most countries.

The meatball country is forced by the cow and finds another way. Flowers are played in the track field. For example, the digestive endoscope plays everywhere in other developed countries all over the world.

Moreover, the most important patients are not in other people's hospitals. They are just consultants invited. Anyway, they are irresponsible and it doesn't matter to say it with their mouth.

But this has brought great pressure to the doctrine of the mean. Surgery is immediate, both good and bad are immediate, and conservative treatment, who knows what results can be achieved, especially in the brain stem. If one is bad, it will make a vegetable.

You say this treatment is effective or ineffective, so sometimes, those who watch the excitement are never afraid of big things.

When Zhang Fan entered the operating room, he saw his master and uncle pursing their lips. It seemed that they were sulking.

In the observation room of the operating room, the doctors are operating on the display screen.

Several harbor doctors invited by their families said with a little regret: "why don't they stop bleeding? They have been clearing the hematoma around the focus. It's useless. If they don't stop bleeding, it will bring brain stem ischemia!"

Speaking in pure English definitely sounds more authentic than the spoken language of many people in Jinmao country.

Who doesn't know that without hemostasis will bring ischemia. If you are not sure, once you move this piece, maybe the patient will swallow gas on the operating table immediately.

But if they're wrong, they're right.

"We are waiting for a more comprehensive doctor in the brain stem!" The moderate vice president clenched his teeth.

"Oh, is it an expert from Jinmao country or Marubeni country? Is it in time?"

"No, it's our domestic experts!"

"In China? I don't seem to have heard of a great doctor in the brain stem! China has no leading figures in the brain stem in major journals! "

The two old men didn't speak, but their chat all went into their ears.

In particular, old Lu was gnashing his teeth angrily and muttered in his heart, "this bastard, let him write some papers and write some papers well, and he will know to fool me."

Martial uncle is not so angry, but he is a little bent. When did you let the doctor of Gangwan stand here and point out.

I can't help it. Both of them are ordinary foreigners. They can't do outside the brain.

If it weren't for Zhang Fan, they wouldn't have come to the operating room. As a result, the two old men were foreign today.

As soon as Zhang Fangang entered the door, he saw master pursing his lips. In his ears, he heard a doctor talking in Mandarin and two doctors talking in English. Zhang Fan is also strange in his heart.

Can't we unify language standards.

After seeing Zhang Fan, Lu didn't say anything, so he pointed to the monitor and asked Zhang Fan to have a look. Wu nodded gently.

Zhang Fan smiled at his master and martial uncle. As a result, his master didn't give Zhang Fan a good face.

Zhang Fan wondered, "what's the matter with the old man?"

"How's it going?" Lu Lao asked softly.

That means, can you do it? Can you do it.

"The bleeding is serious. We must stop bleeding now. Depending on the situation, the bleeding point is deep in the brain stem, and the patient has a high probability of sudden death. "

"How big is it?" Old Wu asked.

"Sure!" Once Zhang Fan entered the state, it was like Altman changed and Popeye ate spinach.

The temperament is completely different.

If not during the operation, Zhang Fan is a shy young man next door. He is a little chicken thief, greedy and delicious. He has both advantages and disadvantages. He is an ordinary man.

However, once you enter the state, you can definitely compare your temperament with domineering.

Zhang Fan stared at the monitor. A brain structure has been completely constructed in his brain.

"Bleeding is fast, and about three to four centimeters will break into the ventricle. We must stop bleeding. Because of bleeding and ischemia, the brain stem is extremely sensitive and fragile, and the fluctuation of the patient will definitely be uncontrollable.

Master and uncle, now we need experts in the heart and breathing to stand on the stage! "

With the arrival of Zhang Fan, the head of the government also came in. The clamoring harbor doctors stopped talking.

"Experts in the heart and breathing are up to you. We can't return now. Foreign media have released the patient's situation. "

After entering the observation room, the head looked at Zhang Fan and nodded gently. Although what he said made everyone sink in his heart, his tone was as kind as ever.

With many experts and scholars coming in, the family members of the patients also came in.

At this time, Ouyang also entered the operating room. When the old lady looked at the head, she was obedient. There were stars in her eyes.

Old Lu looked at Zhang Fan, his eyes full of encouragement and worry. After all, the old man is not an expert outside the brain. He knows now that the risk is great, but can't he go to school at this time?

may not! Because you are a doctor, what you learn is to save people, and what you eat is to save people.

It is absolutely impossible to retreat in distress.

"Zhang Fan, I'm a physiology professor at LAN medical college. I should have been a teacher for you. I can help you stabilize the internal balance of patients!"

"Dr. Zhang, I'm the director of Yaxiang's heart. I'll help you with your blood pressure!"

"Zhang Yuan, I'm the director of Xihua breathing. If you have any requirements, please say it directly."

"Zhang Fan, I'm the director of Jitong God..."

For a time, almost the top experts in China were there, and the doctors in Gangwan were stupid.

Darling, darling, what's going on.

To tell you the truth, sometimes the land University of China is reflected incisively and vividly at this time.

In this case, don't tell the truth. Even Marubeni will envy it.

"OK, please let the teachers know the vital signs of the patient. Master, uncle and chief, I'm in the operating room. European hospital, please help me explain the process of the operation to my family members and leaders in the observation room! "

"Good, good, good!"

"Thank you, thank you, thank you doctors!" In the patient's child's 90 degree bow, Zhang Fan and a group of experts entered the operating room.

In the operating room, although the surgeons rarely spoke, their expressions were quite serious.

Because patients have more and more bleeding, with the removal of hematoma, just like the river is dredged, the speed of water flow increases a lot.

"The heart rate is getting faster and faster!" The anesthesiologist's pressure voice reminded him.

"Lao Li, I can't wait. Go into the brain stem!"

Although he was not sure, the leader of the expert group decided to put all his eggs in one basket.

Lao Li's mouth is dry, not afraid, but nervous!

At this time, the door of the operating room opened. Lao Li looked up and Zhang Fan came in.

Like eating a mouthful of sour bayberry, the secretion in the mouth burst out in an instant.

"Team leader, wait a minute, Zhang Fan is coming! Here comes Zhang Fan! " With that, Lao Li shouted to Zhang Fan, "come on, go to the operation!"

"Good!"

The fastest disinfection put on the operating suit, and Zhang Fan went on the operating table.

Then, he took over the main knife of the operation.

Everyone else was breathing. Only Lao Li took a long breath smoothly.

Chapter 1002

Doctors don't brag. To tell the truth, they brag. At the low end, you will talk about what super awesome surgery you have seen, and what surgery his teacher's teacher has done for a big man.

If it is a little higher, it will show off. Alas, there are too many operations today. The patient has to let me do it. Other doctors in the Department operate on him, but he is not willing to do it.

The middle end can blow. Recently, the section chief of his own scientific research project team has been attracted by the appropriation, and it is estimated that a large amount of money will be approved. Then, he is obsessed with whether to change the electrical display in the laboratory or the UHF incubator.

The high-end can't be blown at all. They can't sit together. They despise each other. What is he studying? It's wrong from the beginning!

The harbor doctor would be really stupid.

The word "one side is in trouble and all sides support" is really beyond the comprehension of ordinary countries.

This thing seems to be a simple word. In fact, it contains the most basic quality of China.

When nothing happens, the people of Sanchuan look down on the people of Shaanxi Province. Their diet is not as good as ours. They are either noodles or steamed buns.

Nanhu people look down on Sanchuan people. Can they count when they eat pepper? Just put some pepper in the pepper to scare people.

Hui Province despises Su Jiang. Money is great! Your capitals are all within our boundaries.

Anyway, there is more wine on both sides of the river. There are hot peppers on both sides of the river.

But once something happens, darling, thousands of troops can make people feel that they are too happy in China. Chinese people are so cute. Fuck, when it's all right, they start to hate each other again.

This is the operation of the golden mean. At the beginning, the hot ridicule and cold ridicule of the harbor, and the media in the golden Mao country had a sharp nose like a dog and began to joke across the shore early.

"After all, the development of extracerebral surgery in China is still slow. If this justice of the peace is in China, let alone Mayo, let alone Cleveland, any state hospital can do extracerebral surgery!

We now strongly urge the golden mean hospital to publish the gentleman's condition! "

After Jinmao finished, Sandao said. After Sandao finished, Li Jiapo said, as if they could get rid of the disease.

This disease, to tell the truth, may not be able to be done in any country.

Their medical treatment is really more advanced than that of China, but it is not to the point of hanging.

However, China's primary medical treatment has hit the world, although few Chinese doctors and nurses have a good temper.

The medical leaders in the meeting are more and more ugly. At their level, face is a very important thing.

Everyone is working hard to let those who look down on China have a look.

Therefore, when Zhang Fan showed that he was sure, the bosses stood up one by one, regardless of fame and wealth, and did not fight for steamed bread.

Zhang Fan stood at the position of the main knife. Holding gauze in both hands, he gently covered the patient's craniotomy incision, and did not start immediately.

Zhang Fan didn't move, and all the other doctors stopped. Quietly looking at Zhang Fan.

At this time, both the leader of the expert group and the major directors outside the golden mean's mind are waiting quietly.

"Report signs!"

"The patient's blood pressure is 160/110mmhg and heart rate is 120..." the anesthesiologist reported the patient's vital signs for the first time.

"Mr. Chen, reduce blood pressure as low as you can." Zhang Fan said softly.

"Well, there's no problem with transient shock blood pressure, but too long and too low blood pressure will lead to insufficient perfusion and reperfusion injury."

The professor of Lanshi Medical College looked at Yaxiang's professor. After the two made eye contact, Professor Chen of Lanshi said in his awkward Mandarin.

Professor Chen is also a God. His two children are academicians of the Academy of Engineering in medicine, but it's his turn. Because of his age, he didn't get the evaluation.

Therefore, the old man complained that the expert committee had no eyes as soon as he took class a few years ago.

The old man gave Zhang Fan a physiology course. His awkward Mandarin was mixed with serious spoken English words from time to time. To tell the truth, his class was like listening to heavenly books.

Sometimes, he would say, "you should practice your oral English well. Look at me, my oral English is better than that of my children. Although I haven't been abroad, I'm still very good ~!"

He is also the only old man who can take postdocs and continue to teach undergraduate students.

"Half an hour, I only need half an hour!"

"Twenty minutes at most, no matter how much, the patient is so old, I can't guarantee whether there will be injury!"

Ji Tong's director looked at Zhang Fan and said quite seriously. He also wondered that such a tall surgeon should have shock blood pressure for half an hour when he had brain stem injury.

"Aren't you a doctor? Master's time should also understand ah! "

The other doctors didn't say it, but they were a little suspicious.

The old man in LAN city looked at Zhang Fan and said, "I knew it. I knew it. You must be in surgery and didn't take physiology seriously. Okay, okay, there's no way now, there's no way!"

Zhang Fan Khan came down. The old man was so cute that Zhang Fan enjoyed the feeling of his student age again.

"Take amiodarone. I'll try to delay you. Hurry up! ~" However, the teacher is still a teacher. He also worked hard to see the students in trouble.

"Old Chen, it's dangerous. It's too long." The professor of Jitong looked at old man Chen and persuaded him. He muttered, "he's a surgeon. He doesn't understand anything. How can you follow the students when you're a teacher of internal medicine!"

"If something goes wrong, I'm responsible, but the person can't do it. Now if my students dare to take over, it will take some time. Can I not help the field? It's more dangerous than if the patient died on the operating table. I've decided! What do you think? "

To tell you the truth, even if you don't take political responsibility at this time, you're really a man of temperament with your reputation all your life.

Everyone looked at each other! Finally, the professor in the heart of the golden mean said: "at most half an hour, Zhang Yuan, more is really too dangerous. If the operation is finished, it's a vegetable!"

"Half an hour, please!"

With that, Zhang Fan took away the gauze that had become a red scarf, turned his head and gently nodded to Lao Chen, "step down!"

Antihypertensive drugs are pushed directly.

Blood pressure quickly starts from high pressure and jumps all the way to shock blood pressure.

Blood pressure, human blood pressure, why does high blood pressure damage the body.

In fact, high blood pressure will cause damage to the blood vessel wall, and excessive pressure will lead to the expansion of capillaries at the end of some organs to form congestion.

There is also high and low blood pressure, which damages blood vessels.

Many old people at home have high blood pressure and feel that they are not dizzy or dazed recently. I didn't take the medicine on time. Then I felt uncomfortable a few days later and began to take

antihypertensive drugs again.

This is absolutely not possible. Taking antihypertensive drugs actually controls blood pressure at a stable level, from high to low, which is not only easier to damage blood vessels, but also particularly easy to cause cerebral infarction.

Therefore, when you have high blood pressure, don't listen to any folk prescription. Remember to take medicine.

When the blood pressure drops, Lao Chen's heart is lifted up. He is deeply afraid that the patient will have thrombosis and infarction.

At this time, once there is another infarction, such as pulmonary thrombosis and coronary embolism, there is no need to do the operation, and the white cloth will be pulled directly.

Just when blood pressure drops, "start!"

The leader of the expert group, Lao Li of the second Department of mediocre brain surgery, took a small retractor to open the brain tissue for Zhang Fan to create a surgical field of vision.

Surgery is hard to say. This thing is very particular. A sterile concept has many rules.

For example, the sterilized hands should not be higher than the shoulders or lower than the waist. No matter whether you touch anything or not, once they are higher or lower than these two positions, they will be polluted.

Doctors must exchange positions back-to-back and never face-to-face.

So, in the operating room, if the doctors are waiting for the patient's examination, you can see a pair of doctors hanging their hands like erha. If they don't have a mask and stick out their tongue, they are really a group of erha.

If the description is simple, it is also simple.

Two or three people try to pull open their muscles and let another person repair deeper tissue with a knife and fork.

The pulling of brain tissue is not the pulling of other places, such as the abdominal cavity, such as limbs. The pull hook is like a rake. Sometimes, the doctor needs a lot of effort to pull it apart.

But the brain can't. this thing is a pile of fat. When pulling, don't say too much. Even if it's a little inappropriate, this thing can give you an instant collapse like the cream of a birthday cake.

And what are they doing now?

In fact, it is to gently move a gap along the gap of the cream cake, and then repair the red rotten strawberries in this gap.

It is necessary to repair the rotten strawberries, that is, plasticity. Put the broken and rotten strawberries together one by one with small tweezers and scissors, and then try to stick them together with transparent tape.

Brain surgery is about that.

Sounds like it's hard, because cream, everyone knows. If you don't pull it, it's easy to collapse, let alone pull it.

In fact, it is more difficult than this, because the cream cake of the brain also has a layer of capillaries like fishing net red silk stockings inside and outside.

The blood vessels of other organs of the body are broken by doctors, because most of the blood vessels in the body are circuit. If they are broken on the left, they can continue to supply this piece of blood from the right.

But cerebral blood vessels are not. This thing goes black. If you break it, it can't return.

Therefore, after many patients with intracerebral hemorrhage were rescued, like Nicholas Zhao Si, the mouth was crooked and the leg was lame because the blood vessel in charge of the mouth and leg could not be repaired, and the brain was responsible for the strike.

And the brain stem is even more terrible.

If you don't know which one to move here, you can make the patient suffocate.

You don't know which piece can make the patient have a fever and roast chicken.

You don't know that if you move that piece, the patient's heart may jump out of your mouth.

Because breathing, heart rate and body temperature are almost a joint relationship, it is no exaggeration to call the brain stem a forbidden area for surgery.

Zhang Fan holds small tooth forceps in one hand and ophthalmic forceps carefully in the other.

Just like devils entering the village, take a step, look around, take a step, look quietly, and I'm afraid of stepping on thunder.

Time ticked along.

Five minutes have passed.

The sweat on the general physician's face flows down. Aren't you nervous? Those who are not nervous are stupid and bold.

Now Zhang Fan is dancing, dancing on the two eggs they created. One carelessness is the matter of breaking eggs and hanging people.

ten minutes

Finally, in front of the broken blood vessel.

At this time, the blood vessels are like a naughty little boy hiding behind his door and poking his head, spitting to people outside from time to time.

When he saw the little broken child, not only Lao Li, the leader of the expert group, but also Zhang Fan held his breath.

Because so far, people have not hung up, indicating that Zhang Fan's operation is effective.

However, this is the beginning. Being able to get to this step can only show that Zhang Fan is an expert outside his brain. The really difficult thing starts.

Everything in front is just an appetizer.

Spitting blood vessels are just like women who wore flirtatious clothes at the mouth of small hutongs and felt a thick layer of white powder on their face in early years, and they can't see their age!

"Come on, come on, uncle, come and play!"

Puff, puff, the blood vessel broken fiber thread danced with the wave in the blood, just like a handkerchief in a woman's hand.

Doctors are like a man looking for flowers and willows. They know that they may be caught by the police and may be infected with some poison, but their brother's firmness makes him know that there are tigers in the mountain and his brain is like crazy. He has to see the depth inside!

Zhang Fan took a deep breath.

Success or failure depends on it.

Chapter 1003

Many industries may only be divided into very fine and fine when they are at the higher end of the industry.

In the basic, it is estimated that an employee can go through all.

For example, as long as a cook with a little training, such as the cook of New Oriental or new Lanxiang, the eight basic cuisines can be done by lifting the kitchen knife.

Of course, there is no problem fooling ordinary people.

But medical treatment is not good. When it comes to the basic level, it is divided quite carefully.

Let alone interdisciplinary. For example, clinical and oral medicine are two industries directly. Even if they cross departments, they are like crossing a mountain.

The medical profession has a joke that is not a joke. It is vigilant to doctors and patients.

One year, a man fell and landed face to the ground. His face blossomed when he got up. Not only his lips fell into a rabbit's mouth, but also his mouth was cracked.

Moreover, the forehead was cut like an old bag, the corners of the eyes were broken, and the eyes became larger. I don't know, but the blood on the face, coupled with the painful grin, was like a ghost.

At the hospital, emergency doctors began to call for consultation, including general surgery, stomatology and ophthalmology.

The mouth came first, sewed up the suture on the mouth, and then left.

Then the general practitioner came. When sewing, he had to take anesthetics. One shot at a time, one shot at a time. The patient was in pain and was about to call his mother.

After sewing the forehead, the general foreign doctor wants to go, "let the ophthalmology sew the rest."

As a result, the patient begged for pain. Please, doctor, sew it together. It really hurts.

The little young doctor of General Foreign Affairs expressed compassion, "OK, I'll sew it for you."

I thought it was just a small cut. It's no big deal. I sewed it with three or two stitches.

Then, in the gratitude of the patients and their families, the doctor left with a sense of achievement.

As a result, before long, the patient had corneal ulcer in the eyes where the wound was sutured, and then the corneal ulcer led to blindness!

Because the doctor of general surgery sewed the patient's tear sac at that time!

Doctor, if you don't keep awe of life, life will teach you that your uncle is still your uncle after all.

I don't know whether Lao Li, the leader of the expert group and a group of old professors of internal medicine standing outside prayed in their heart. Zhang Fan prayed anyway: "Sir, I'll go in slowly. Just bear it!"

Brain stem surgery, at this time, luck also has to talk about. Burst blood vessels will cause damage to the microenvironment. At this time, no one knows where the microenvironment depends on platelet adhesion.

Generally speaking, meat and meat are now smeared together with spit, waiting to touch porcelain. It's good to say that when you're not close, you haven't started yet. A meat pimple fell off.

The brain seems to say, "you see, you see, you broke my good thing."

With a deep breath, as he slowly exhaled, Zhang Fan stabbed the probe directly into the place where the blood vessel burst.

As the matte probe entered the brain stem, time seemed to solidify.

In the operating room, even the itinerant nurses dare not walk. They are deeply afraid of an accident with the wind.

Zhang Fan's hands are as stable as a mechanical arm. The naked eye can't see whether it shakes, but it's a panic in his heart.

The life state monitor in the operating room didn't make a sharp sound. Zhang Fan's ears and eyes were sweating. Really, it's no exaggeration at all.

This kind of extracerebral surgery, although Zhang Fan's hands are as stable as an old dog, in fact, among all the operations, in the system, extracerebral surgery is the most failed operation of Zhang Fan,

because this kind of surgery is too unpredictable.

"Is there any fluctuation in blood pressure and breathing?" Zhang Fan stared at the probe. The bleeding has been significantly reduced. Now it depends on whether the patient's brain touches the porcelain or not. Once you touch porcelain, it's troublesome.

"No change, Dr. Zhang no change." The anesthesiologist said everything with a vibrato.

.....

In the observation room, Zhang Fan started the operation. Ouyang didn't know where to find an audio-visual education whip. She didn't wait for the head to explain, so she directly stood in front of the display screen.

Then, in front of the authorities of various disciplines in China, like commentators, they began to explain Zhang Fan's operation to the head and his family.

"President Zhang is now close to the fourth ventricle. At present, the fourth ventricle is still safe. As long as he can stop bleeding and repair blood vessels without breaking through the fourth ventricle within a safe time and distance, the probability of recovery will be greatly improved.

Please see, president Zhang has started to clean up the hematoma of the brain stem with ophthalmic forceps. Beautiful! It's very accurate and thorough. Look, everyone, president Zhang's hand doesn't have any deviation. He ruthlessly removed the hematoma that oppressed the brain! "

A strong wind of women's volleyball commentary made Ouyang move to the observation room, use a popular language, and then tell the professional things clearly.

This is the ability, and it can highlight the skill of the chief surgeon. It's too powerful.

The head kept nodding. To tell the truth, the old man really understood it under Ouyang's explanation.

Without Ouyang's explanation, in his eyes, there are several pairs of big hands on the screen, holding knives and forks and picking up bloody cheese.

Seeing the head nodding uncontrollably, Ouyang brought in the style of old man song who explained volleyball in the early years.

The president of the golden mean and the presidents of many large hospitals in the capital looked at the head's gentle nod and thought again. It seems that after going back, the hospital must find such a person to prepare!

"Why didn't you move? They all entered the brain stem blood vessels. Why didn't Dr. Zhang move!"

In the observation room, we saw Zhang Fan stop his hand and hold the probe as if it had solidified.

Knowledgeable people almost take a breath at this time.

The inexperienced thought something had happened to Zhang Fan, so he was very surprised or wondered. So is the chief. Why doesn't he move? It's definitely not because of urinary suffocation!

"Now is the most important..." when the dean of the golden mean was about to explain, Ouyang turned his eyes and Ren immediately interrupted the words of the dean of the golden mean.

The president of other small hospitals may have to curry favor with the moderate president. Ouyang is not afraid to turn the matter of outreach to Zhang Fan.

But the chief asked, how can you, an old man, explain? Didn't you hear that Zhang Fan handed over the task to me before entering the operating room?

Ouyang immediately said loudly, "chief, now it's like the last stone when the levee is closed. If it can't be blocked, just look at it."

Then he glanced at the moderation Dean. The old man smiled awkwardly and the head nodded.

The family members, the family members standing next to the head, are pinched together at this time. They wish they could add some oil and cheer up the doctors in the operating room.

Dinghaishen needle went in, and the patient's life state did not change.

After listening to the anesthesiologist's report, Zhang Fan, like a rabbit, accelerated the speed of the operation.

Twenty minutes, shock blood pressure has been twenty minutes.

With Zhang Fan's acceleration, Lao Li knows that this is the time for Zhang Fan to show his technology.

The tweezers in Zhang Fan's hand, like his fingers, quickly clamped this piece of broken tissue.

The clamping of each piece is so firm, so without a trace of hesitation.

Whether this thing is broken or not, Zhang Fan doesn't need to test at all, just as the patient's brain was blown open by Zhang Fan himself.

Up and down, it will not involve other organizations at all.

Between one in and one out, the tweezers hurried without a trace of blood.

That's accurate! The leader of the expert group sighed deeply in his heart, whether he can clamp the tissue, yes, absolutely, but he can't do Zhang Fan so accurate, so fast, so no secondary damage.

It's so beautiful. In the eyes of insiders, this operation is like a work of art.

Or Taotie sees a big meal with beautiful color, aroma and taste!

Zhang Fan did it faster and faster.

Twenty five minutes!

Broken into rotten cotton wadding, the blood vessels dancing in the pool of blood finally took shape.

How thick are the blood vessels? They are not as thick as a child's arm, nor as thick as a carrot, but an oil pen core.

With such a large blood vessel, Zhang Fan not only found the missing fragments in a nest of blood pools, but also held them together with gelatin.

Not to mention sticking together, but also sticking out a common pipe.

Moreover, time is limited.

More difficult, the location space is also limited.

If you spread out the position and let go of the position, many doctors can do this.

The difficulty is that any one or any organization here is Lord Ma's ass, which can't be touched.

Hard, really, hard.

Although Zhang Fan's hands look fast and accurate.

But his head, his forehead, and his unwrapped skin were like entering a sauna room.

Sweat is like a batch of rain, constantly exuding, and the head nurse in the operating room keeps wiping Zhang Fan.

Turn your head, wipe it, turn your head and wipe it.

Twenty eight minutes later, Zhang Fan finally spliced the blood vessels completely.

"Come on, boost, come on, boost!"

Zhang Fan doesn't know how much time has passed now. He is afraid that it will exceed half an hour. The time given by physicians is the limit time. If you can save a little, the possibility of injury will be doubled.

Under extreme conditions, sometimes the effects of the first minute and the next minute are absolutely different.

When Zhang Fan shouted for boosting blood pressure, internal medicine experts quickly pushed various drugs into the patient's blood vessels.

At this time, the people in the observation room and people outside the industry raised their hearts to their throat.

They think this is the most tense time.

In fact, the most intense climax has passed, and now is just the time to test the results of the operation.

As long as the blood vessels don't leak, the operation will be successful.

But the blood vessel leaked, and the doctor couldn't help it. How did he pry someone's head open and sew it up again.

There is nothing superfluous to say.

This thing is a hammer deal.

OK, now is the time to open treasure.

Operating room.

At this time, the doctors who underwent the operation were completely relaxed.

OK, it's useless to be nervous now.

With the entry of the medicine, the withered blood vessels slowly, slowly, from the original gray to gray, just like the popsicle sucked by a child, become full and ruddy.

Zhang Fan looked at it quietly, quietly.

"Blood pressure 11070mmhg, heart rate 80 minutes!" The anesthesiologist looked at the life state reported by Zhang Fan with a kind of relief.

"Doctor Zhang, it's successful!"

The leader of the expert group said softly.

"Yes, it worked. How long did it take us?" At this time, Zhang Fan dared to ask.

"Hehe, you boy, you can. In less than half an hour, the old man is so nervous that I haven't seen you before?"

At this time, Lao Chen also began to talk and laugh.

When the sound of doctors talking and laughing in the operating room came out, the people in the observation room breathed a sigh of relief.

"Thank you, thank you." The family members thanked the head excitedly.

"This is what we should do. We are all a family."

Chapter 1004

The old man took it for granted that a young man so young and excellent that he could crush almost all doctors of the same age should be a god of learning and the favorite of teachers of all subjects in his student age.

The old man looked at Zhang Fan carefully. Although he was wearing a mask, the young man was still very recognizable. He had a black face on his forehead and bright eyes. How could such a student, such a student of God, have no image at all?

The old man wondered!

"Hehe, hehe, your weight is too big in school. There are too many students looking for you. I was a little transparent at that time!" Zhang Fan is dying of embarrassment.

"That's right. After you listen, the graduated students praise me as an old man. You old guys have less vision than my students. You're also known as an expert. Do you have a level?"

There are several of them from the academician jury. The old man took the opportunity to ridicule them.

"Why did you go there a few years ago? Old Chen, you can't do this. Why didn't you make some sense? Why didn't you make achievements a few years ago? Can you blame us?"

Besides, as soon as you teach physiology, people are doctors outside the brain. Does it have anything to do with you? "

The levels are almost the same, and no one is afraid of anyone. Come anyway, expose the bottom.

This is just like the Chinese people after the disaster. Once they passed the danger, these people began to fight against each other without even going out of the door. One doesn't like the other.

Zhang Fan was embarrassed and couldn't even catch up.

If the old man had not been too famous in school, one could not understand Mandarin, one could not understand self-made English, and the two sons of the family were academicians, Zhang Fan would never have known the old man.

When he went to school, most of his time was either on the way to sell instant noodles or on the way to wholesale instant noodles.

The big guys quarreled, and other doctors did their own things as if they couldn't hear. Although the operation was successful.

But there are still many things to follow.

"Dear teachers, thank you very much today. Without you, the operation couldn't succeed. After the operation, I personally brought tea and water to all teachers. Now please rest outside. Please also ask your teachers to discuss the patient's postoperative treatment plan. You are an expert in this regard."

Zhang Fan's meaning is, OK, there's nothing for you. If you want to quarrel, go outside and quarrel. We have something else to do!

"Hey! Your student has a very similar style to you! " Yaxiang's Professor Hei hei for a while.

"This is professional ethics~ Have you ever been in the operating room? " Old man Chen does not show weakness.

A group of people came out of the operating room in a quarrel. Really, one of these people is unconvinced. Although there are great differences in schools and hospitals, it can be said that professors

who have reached this class have got rid of the school's reputation.

For example, old man Chen, people change schools and go to the golden mean. The golden mean must be happy and send people suites.

"Zhang Yuan, I feel the level has improved! It's less than two years, but now it's impressive. "

Lao Li smiled and began to chat with Zhang Fan. Because now the patient's vital signs are stable, he has begun to prepare to close the brain.

It can be said that it is the final stage of the operation.

"Hehe, director Li, to tell you the truth, I'm not particularly sure about this operation. We don't tell lies in front of real people. This kind of operation is a common practice, and the reproducibility is very poor.

If I had the same operation again, I might not have succeeded! "

Zhang Fan said very seriously.

"Yes, it's already very dangerous today. When you didn't come, we were all ready to go into the brain stem. What is Dr. Zhang doing now? "

The leader of the expert group recognized Zhang Fan's level. Let alone the level of scientific research, it can be said that there is no one more stable than Zhang Fan in China.

With such high technology, how many patients must let him practice, and so many patients must have good scientific research projects.

"Oh, me, I've been doing a little research on the lower gastrointestinal tract recently."

When the leader of the expert group asked, Zhang Fan thought in his brain. Recently, there are really no topics outside his brain, but we can't be timid with such a high platform.

Therefore, the topic recently studied with Marubeni was told.

"Oh? Lower gastrointestinal tract, is it about gastrointestinal bleeding after stroke? This is a little... "

The meaning of the expert group is that this subject seems to be very mature. Is it copying? But I think it's wrong. Isn't it a waste of time to copy other people's results at such a high level?

"Oh, no, it's a lower gastrointestinal tumor!"

"Well!" The head of the expert group almost didn't hold his breath, "aren't you out of your brain?"

Zhang Fan hasn't spoken yet.

Lao Li said, "where? He's an orthopaedic!"

The leader of the expert group was in a mess, and the hooks in his hands really shook.

Orthopedic doctors engaged in gastrointestinal tumors, and then took down brainstem hemorrhage in the golden mean?

"Hehe, you two can really joke. The surgeon is not good at it. If the operation is successful, you can't relax too much, ha ha!"

The leader of the expert group felt that what he said was a little funny, so he smiled first.

"Oh, really, he worshipped Lu Lao as a teacher. As a result, he registered for orthopedics. When I went to tea vegetable, I thought this guy was cheating!"

Zhang Fan was embarrassed. At that time, he really swaggered and cheated.

"Our hospital is a grass-roots hospital, doing everything, doing everything in general, all..."

Zhang Fan said politely.

As soon as the leader of the expert group listened, he also understood, oh, this is a surgeon. No wonder he is not famous.

However, people's surgical skills are really high, so they politely said: "do you have difficulty in the subject of lower gastrointestinal cancer? If you need help, we are still nervous about the scientific researchers, but we can still support the equipment. It is not easy to engage in scientific research in the west, I know."

"Oh, thank you, thank you."

Zhang Fan is very sincere.

"After the operation, I'll talk to the digestive teaching and research group to see if they have replaced the equipment recently. You don't have to pay for it. I'll try to scrap the equipment. Although it's replaced, it's still possible to use basic research."

The leader of the expert group of others is kind. Although it is the equipment replaced by others' golden mean, these equipment, let alone placed in grass-roots hospitals, even in the provincial capital universities that are not rich, are regarded as high-end.

Where is this place? It is the richest place in China for scientific research funds.

"Er..." Zhang Fan hesitated. He was kind. What Zhang Fan couldn't say made the other party too embarrassed.

While holding gauze and sewing with Zhang Fan, the head of the expert group said, "don't look down on these equipment. They are 80% new. Although it is not the top in the world, it is also at the forefront. "

"Professor, forget the equipment. Can you introduce me some researchers to support me?"

"Hiss..." the leader of the expert group took a breath, "you are very rich! You seem to have a partner, Shuimu? They are not good at medical treatment! "

In an instant, the head of the expert group began to despise Shuimu?

"No, it's the University of Marubeni!" Zhang Fan doesn't want to tell. To tell the truth, he doesn't want to tell.

None of the experts in the expert group are joking and don't understand.

On hearing this, I was curious, "yes, the medical treatment in Marubeni still has its own characteristics. That university, their Waseda? Fame is big enough, but their academic status is still not good.

Why don't I give you a lead? You can contact the moderation digestion and let them take the lead and take you. Don't work with Waseda either. "

"Well, not only Waseda, but also..."

"Hey, Dr. Zhang is OK. There are many contacts. They are all private universities in Marubeni?"

"No, Jindong University, Kyoto University, Kyushu University, Hokkaido University and Northeastern University. We have set up a research group on gastrointestinal tumors.

Because they have more patients with intestinal tumors, they are very interested and come to more schools! They brought all the instruments and equipment, that is, there are a few scientific researchers here. It all depends on them! "

Zhang Fan smiled shyly.

There was no way to talk that day. The head of the expert group stared bigger than an ox's eye. After watching it for a long time, he said: "no wonder, no wonder, no wonder Dr. Zhang doesn't like second-hand equipment. Your equipment is estimated to be the most advanced in China.

We haven't changed yet! "

Zhang Fan said in his heart: "it is estimated that Asia is the most advanced!"

But this cannot be said, and it becomes a show.

The leader of the expert group stopped talking and sewed his head down. His heart was not shocked, but he felt very strange.

The orthopedic doctor, the apprentice of the liver and gallbladder boss, is now flying out of the brain surgery. He is clearly a doctor from the frontier. The units that can cooperate are the best universities in Asia.

What's this called!

.....

"Hard work, you hard work!" The head kept at the door like a family salute.

The more we engage in technology, the more valuable it is to move technology.

Although the chief is not a medical graduate, he is also a technical graduate, so he is very polite to the old experts of these old men and women.

"Chief, how, how, how about the talents trained by our northwestern universities? But now the government's support for us is too eccentric.

In particular, some expert groups are biased against our Northwest. Personally, I don't care, but I have to give our school some support, otherwise... "

Lao Chen took the opportunity to talk to the head. Ouyang's eyes were green. After waiting for a long time and talking for most of the day, it was his turn to give the final award. As a result, a bad old man jumped out and cut his beard.

Can you do it?

Ouyang's hair blew up.

"Dr. Zhang Fan, he didn't stand out when he just graduated!" Make complaints about the old director's head, and what he can do is to make complaints about the old man's head and his smiling face.

At this time, when Ouyang opened his mouth, old Chen's face changed. He turned to Ouyang and said, "who are you? You don't understand. You can't talk nonsense."

"Hehe, I'm the president of the tea vegetable hospital. Zhang Fan is the vice president. When Zhang Fan graduated, he was really ordinary, but Doctor Zhang fan can bear hardships and drill holes.

Our hospital spared no effort to cultivate, first went to Qingniao for further study, then went to magic capital, and even contacted the Royal Hospital in Sandao. If Dr. Zhang Fan hadn't been responsible for important scientific research projects and the experts of Marubeni wouldn't let Zhang Fan go out.

Now Dr. Zhang has gone abroad for further study. This is all cultivated by our hospital and our tea vegetable government at all costs. "

Ouyang nine points true and one point false. Anyway, people can't cut off his beard now. He said and looked at Zhang Fan in the monitor. He muttered in his heart, "my young master, you should come out quickly. Such a good opportunity must not be let go! "

Chapter 1005

It is only at a certain level that we can seriously count on paying attention to, caring for and reusing talents. In general, it can not be reflected at the grass-roots level.

Simply put, for example, in a Northwest county hospital, the superior said to give you an MRI or transfer you two or three doctors. Which one do you choose? Don't even think about it. It can be said that as long as there is no nuclear magnetic resonance, we will definitely choose nuclear magnetic resonance, and we will never choose a doctor.

If the president of some county hospitals is younger, they don't choose a doctor. Most people can understand the Tao and Tao in this.

Originally, Ouyang thought that he couldn't have his beard cut off today. He finally met such a big leader. If he ran away or was cut off by others, Ouyang would have a heart attack.

The head is still very polite, let Ouyang say, and let old man Chen.

"It's all due to credit. Without a school teacher, Dr. Zhang can't enter the door of medicine. Without a hospital, Dr. Zhang can't improve as quickly as possible. All due to credit, all due to credit!"

Just after the head said that he recognized the school, Lao Chen hurried to speak. Ouyang spoke too fast. He was afraid that when Ouyang spoke, he would have no chance to speak.

"Chief, the reserve force of our school is too poor. You want to solve the problem of brain drain for us!"

Ouyang was happy and muttered, "the old man has spent most of his life in school. The leaders may not be able to solve this!" Therefore, Ouyang was proud and did not worry. He asked the old man to grind the head first.

Who is Ouyang? He knows too much about the government.

For leaders below the municipal level, you can open your mouth to important people. Maybe he really has people. But you can't ask for money. Leaders at this level are running in the head of money. If you ask for money with him, he can treat you as an enemy.

Leaders at or above the municipal level, especially the leaders of principal officials, you open your mouth and want people. It's really hard for people to promise you. Because it can't be done well, it has become a provincial system. For example, the leader in front of you can promise you talents? It's impossible. Now it's a national policy to make a statement. Can you speak easily? No.

"I will certainly pay attention to this matter. The western development is imminent. What is the key point? Isn't it the talents who are willing to contribute to the western region! If China has such talents as Chen Lao who make solid contributions to the west, it doesn't need much, as long as 100000, the development of the west is not difficult.

Old Chen, you must take good care of your body now... "

Old man Chen's excited face turned red. He kept saying that he was in good health and could work for decades.

In the operating room, there was no sound of chat. The leader of the expert group was in no mood. He had thought that the young doctors outside the brain could still carry him.

Now when I listen, I don't have any mood to support.

The leader of the expert group didn't want to talk, and Zhang Fan was more reluctant to chat. So the people in the operating room are quietly doing the finishing work. The atmosphere seems more serious than at the beginning.

Lao Li looked at Zhang Fan and smiled, "the topic Terminator!"

The finishing work was very fast. Before long, the old man's head was inlaid with a stainless steel screen like titanium alloy steel mesh instead of the skull, and then covered the scalp. If you lift the scalp, you

can directly see the brain flowers churning in the tomato pot.

"When will Dr. Zhang leave the capital and the follow-up treatment of patients? If Dr. Zhang has time, he will also participate in the expert treatment group."

"After the dangerous period of the patient's operation has passed, I estimate that I will go back to the frontier. I don't have much time. I can only ask you."

Zhang Fan knew that these goods didn't want to involve himself.

However, my strength lies in the operation. As for the postoperative treatment, I have no right to speak. It's just right not to go.

After the operation, the old man accompanied Zhang Fan "In the past, I wanted you to be my student. You said you were Lu Lao's disciple. I thought you were bragging again.

I didn't expect it to be true. What's more unexpected is that your current level has impressed me. At that time, you said you didn't think well. Why do you want to take root out of your mind now?

It's common to tell the truth outside the green bird's brain. If you really want to be outside the brain, come to the golden mean! "

Lao Li wanted to pull Zhang Fan to the golden mean.

It is easy to find a talented orthopaedic, and the orthopaedics of China also has an inside story.

It's easier to find a genius who is a foreigner. After all, the number of doctors engaged in general surgery is the largest and the most basic department.

And looking for a doctor outside the brain, when the talent is found, the golden window closes too quickly.

For example, in today's operation, if Lao Li is young and 20 years old, and if he has current operation experience in his early twenties, he decides to roll up his sleeves and do it.

But now, no, there is a cargo in the brain, but the two hands are not enough. The short time is better. If it's a little long, it suck to make the brain into tomato paste.

Although a little exaggerated, the department outside the brain, to tell the truth, the more high-end, the more particular about the operation. In general surgery or orthopedics, there is no difference between more injury and less injury.

The outside of the brain is different. A little more damage. You can make the patients who had no epilepsy lie on the ground and vomit white foam to you from time to time, but they didn't have this

disease because the doctor hurt a little more!

How to avoid damage can only keep improving.

"Hehe, director Li, in fact, I think your operation has reached the bottleneck stage. Have you turned to scientific research?"

"Who said that? Don't talk nonsense! Scientific research belongs to scientific research. Clinically, I'm still a knife. I don't do this kind of bleeding surgery now. After all, this kind of surgery is done by young doctors. At present, my main direction is brain tumors.

Hey, your boy excites me. Why do you want to dig me to your hospital? "

Lao Li looked at Zhang Fan jokingly. I thought to myself, "I'll go. How long has it been? This boy has begun to dig people. Hey, I didn't take it seriously in those years. Now people take me seriously!"

To say that surgeons can't operate is to say that women don't look good and don't worry about you. They all have a good relationship. Zhang Fan thought to make Lao Li a little angry first, and then his heart became rough.

As a result, no one is a fool, or Zhang Fan's Taoism is not good.

"Hehe, our hospital is almost out of mind. As you know, surgery is OK, but scientific research is not, so I want you to take our brain out.

If you have a good subject, take our doctor with you by the way. There are several experts and masters outside our brain! "

"Hehe, let me tell you something. There are more than 30 doctors in our department, and almost half of them are doctoral tutors. How many masters do you have? You are proud! "

Lao Li, I'm the landlord. You poor boy, still want to dig my corner.

Zhang Fan disdained to turn his mouth. There's no way. He hasn't lit his knife yet. People pull out the gun. I'm not sure.

Just out of the operating room, Zhang Fan saw Ouyang wink at him.

However, this time, Zhang Fan didn't understand Ouyang's meaning, mainly because it seemed that the meaning expressed was too complex. For a time, Zhang Fan didn't understand it.

Seeing Zhang Fan confused, Ouyang nuzui old man Chen, and then glanced at the head with the corner of his eye.

"God, the old lady has too much appetite. If she wants to dig Lao Chen, she has to dig Lao Chen through the head. If this is really poached, I think I can become a traitor to my alma mater.

The medical department of Lan City can show Lao Chen! "

There is no way to communicate with Ouyang, because at this time, the head accompanied his family has come.

"Thank you, thank you doctors. Thanks to you all this time... "

Because of the presence of the head, the family quickly thanked the doctors and gave their business cards to the doctors. Zhang Fan saw the head come over with a smile and quickly stuffed the business cards into his pocket.

"Great, my little fellow is great!" The chief came over with a smile, grabbed Zhang Fan's hand and said kindly.

Zhang fan can only make you smile shyly, and can't ask: where are you from Lanshi! This is stupid.

Ouyang and old man Chen also came over.

"There's a reason why I say villagers. My wife is from your LAN city. When I was young, I worked in your LAN city for a long time. I'm also half Lan City people, so aren't we villagers?"

"Yes, yes, yes!" Zhang Fan said with a smile.

"It's good to be rooted in the West and work hard to improve their technical level. It has the calm side of northwest people. What, are there any difficulties in life? "

At this time, the chief spoke.

This kind of operation, if the mediocre doctor takes the lead, the chief needless to say.

If you are an evergreen or academician, needless to say, because they all enjoy special state subsidies.

But he's a young doctor. But it's not appropriate to boast. The head will certainly not chill the young people's heart.

"Life..." Zhang Fan thought, he really has no difficulties in life.

Ouyang was so worried that she was almost angry. She was deeply afraid that Zhang Fan would have no difficulty. Please rest assured that it would be over.

Seeing that Zhang Fan was about to say it, Ouyang couldn't care about being polite or impolite.

"Dr. Zhang is now the executive director of our hospital!" Ouyang smiled and squeezed in front of old man Chen.

Lao Chen is really a good man. He really makes way for Ouyang.

"Yes, I have always advocated the bold use of talented young cadres."

"Chief, in fact, we have many difficulties. However, what we can overcome by ourselves is not to burden the organization. For example, our hepatobiliary Research Center, children's Hospital and intestinal tumor laboratory were all built with our own funds.

It doesn't burden the finance at all. Although many of our doctors don't even get a house at present, we start with units and then individuals. This is the belief of our frontier people! "

The chief nodded his head seriously. He was still feeling that the frontier people were simple!

As a result, it's not over yet.

Ouyang began to turn around and ask for conditions!

Chapter 1006

Someone said that when communicating, the tone is much more important than what you want to express.

I don't know whether this is right or not. Anyway, Zhang Fan thinks what Ouyang said makes the head a little emotional. After all, the old man also ran on the Gobi desert in the Northwest for many years.

The old man nodded and stared at Ouyang, as if he remembered his youth.

As a result, Ouyang took a look and immediately said, "we are not afraid of anything, but we are afraid that the leaders do not pay attention to it. I would like to invite you to visit our hospital and our front-line medical staff! "

"Well!" The leader hesitated. Leaders at this level are absolutely not free. It is absolutely impossible for them to leave when they say so and promise when they open their mouth.

"Don't make it difficult for you to lead. Don't say leadership. It's me. If you go to a meeting now, you

should prepare one month in advance, arrange substitute courses and arrange the work of the laboratory. Where can you say to go?"

Lao Chen explained for the head like a clapper. While talking, he also looked at Ouyang with the eyes of college students looking at primary school students. That means, can't you speak less? Don't be ashamed.

Ouyang thought she was laughing. She was afraid that no one would take the next sentence. She thought Zhang Fan would take it. Unexpectedly, the old man took it.

"Yes, yes, yes, I didn't think carefully. The leader is busy, but I don't understand. "

"It's okay, it's okay, I can understand your mood. No matter what work you do, you need to be understood and recognized by others. This is because our work is not in place. You are wronged! "

"Chief, you know us very well! If there were a medical school for tea, we would develop more smoothly. " Ouyang's eyes were red, but her words didn't make people feel that she was moved.

Open your mouth and you'll have a medical school.

The cheering came again. "Hehe, you might as well say something practical! He said, "what do you really want?" Old Chen's head was almost angry and smiled by Ouyang. He thought the Dean didn't understand anything!

Zhang Fan looked at his poor teacher, alas!

Ouyang's expression was so embarrassing that the chief was embarrassed. Really!

"If you have difficulties, you can mention them with confidence and boldness." The chief nodded.

This is what Ouyang is waiting for.

"We now have the largest rescue helicopter in Asia, which is maintained by an air flight team of the combat readiness force. There are eight surgical vehicles, one top laboratory in Asia and three top laboratories in China.

We are ready to continue to tighten our belts, and then set up a rapid thrombolysis platform for

cerebral infarction and myocardial infarction. We should also establish a comprehensive medical emergency platform.

Once there is a major accident and we need to dispatch, we can set up a rescue force equal to the scale of class II class A hospital within half an hour.

Moreover, not only the equipment is equivalent to class II class A hospitals, but also the personnel should train the team who will use me in the first battle and win with me.

We should not only radiate the surrounding prefectures and counties, but also include the high-level medical care of the surrounding counties, so that our medical care can also become a vanguard in the development of the West.

Not only Lao maozi has medical treatment, we also have medical treatment! You can't let the countries of sta know Lao maozi and don't know our country! "

Ouyang Yu changed his shy, embarrassed and bewildered appearance in front of him, and became heroic and domineering. I didn't wear a green uniform, or I would be a female general!

Darling, is it true or not? Anyway, I'm very angry.

With his head half open, Lao Chen raised his finger to Ouyang. The old man looked like he was frightened or didn't know what to say. Because Ouyang was at a loss. Even the largest hospital in Lanzhou didn't have a rescue plane. It was the largest in Asia! Too brave to brag in front of the leaders and rush out of China to Asia.

Darling, why don't you rush out of the earth!

The head didn't respond so much, because when waiting for Zhang Fan, his people had probably reported the situation of tea vegetable city hospital and Zhang Fan. But how can things on paper be lifted up by Ouyang's report!

"We are a peace loving country. We should learn from others' strengths and help others' weaknesses. Since they need our medical care, we can do more work in this regard, so as to develop together and rapidly. Don't engage in confrontation!"

"The chief still looks high and far. make a pointed comment! However, our financial pressure is too great. It was supposed to raise funds for the housing of some medical personnel.

But in order to build the platform, we don't build the house, we build the hospital. But it's not enough! "

"How many gaps are there? Can the tea government subsidize a little? "

Zhang Fan almost couldn't help laughing. "This is an old man who wants to cut when he is a Saudi tyrant!"

Ouyang glanced at Zhang Fan and said without hesitation, "chief, tea vegetable doesn't even have a bigger enterprise!"

"How much do you need? Can you come step by step?"

"Stan's side is now full of old maozi's medical group. I heard that Europeans and Americans have begun to enter."

"How much do you lack!" The chief still asked.

"One billion!"

"Hiss!" Lao Chen looked at Ouyang with his head like a toothache! If the old man wasn't in good health, he might have scared Ouyang out of his heart!

"Ha ha!" The chief smiled, "this is the Dean Ou who is famous for tea! The from the Ministry of foreign affairs told me that there is a female Dean of tea vegetable, which is very powerful!

Last year, when I passed by chasu, the leaders of the local garrison also told me that the female Dean of chasu had the temperament of a joint army.

Today, I believe it! I thought the female Dean had a high level of knocking wood. It turned out that I was preconceived. It can build a regional hospital into a famous vanguard in the frontier.

Not easy! "

It was Ouyang's turn to be silly. Zhang Fan was silly. He thought that such a big leader would know the hospital in a small place. Unexpectedly, the door was clear!

Zhang Fan looked at Ouyang and thought, "it's over!"

Ouyang also looked at Zhang Fan and said, "it's over, the old bottom has been lifted!"

"Hehe, don't be nervous. I'm glad you did a good job. Billion, I really can't take it out. If we all want to do this to you, what if you come to ask for some today and he comes to ask for some tomorrow? " Although he was smiling, his tone was still very serious.

Ouyang is really embarrassed, and Zhang Fan is also embarrassed.

Ouyang glanced at Zhang Fan, which meant: "Hey, hasty, hasty!"

Then, the head said, "I don't know. President ou and president Zhang see a little money in my hand? I still have some special funds for the head. Not much. I can't give them all to you. a hundred million!

Hehe, come on, what the country needs is doctors and leaders like you. Do not disappoint the people's expectations of you! "

At this time, the leader said very seriously.

"Yes, we must live up to the people and the leadership!" As soon as Ouyang listened to one hundred million, she was ready to ask for tens of millions. In fact, she didn't expect to get one hundred million.

"For special purpose!"

"A certain amount of money must be earmarked for special use. We will never build a family building!"

"Good! Then I'll wait and see how the female president of the frontier and president Zhang handed me an answer! However, we should improve the conditions when it's time to improve the conditions. Otherwise, how can you keep talents, right, Dean Zhang?

Work hard, the northwest world is very big, and there is room for you to show! "

The head said jokingly as if he had seen through their tricks ~!

"Yes, yes!" Zhang Fan and Ouyang kept nodding their heads. They all said so. It's no longer good to ask for policies. Ouyang thought to himself, "Hey, my political wisdom is not enough!"

The atmosphere of the talk here is very harmonious. The two doctors in Gangwan are a little tasteful.

"Doctor Zhang, I just checked your thesis, from the first but visceral central tumor to your master's thesis, not to mention the academic content.

The grammar in your paper is flawed, and your skills are pretty good, but if you want to improve, you still have to go out and have a look. If you don't have a good English, it's estimated to be too difficult! "

Zhang Fangang is about to speak.

The chief smiled and said, "English is indeed a tool for many disciplines. How to make good use of this tool needs hard work. But we can't abandon the basics.

You estimate that the income is good. Have you hired Filipino servants at home? You don't have to be poor in English, do you? Ha ha, you should have confidence in your own country and your own culture! "

.....

With the departure of the chief, many big men also left the operating observation room.

Everyone was very polite to Zhang Fan.

As we left, the people in line patted Zhang Fan on the shoulder one by one.

Chapter 1007

"In this world, you still have to make your own money and spend it yourself. If you spend other people's money, you will be looked down upon by others!"

Ouyang muttered to Zhang Fan unhappily. I don't know how much special funds the head has, but the 100 million given to the tea vegetable hospital hasn't arrived yet.

First came a group of people, a group of business, not white eyed, but did not say to go to the bank. When you meet a big customer, you bow and bow. What people said is also clear. Special funds are used for special purposes, independent accounts, independent accounts, small monthly inspections and large quarterly inspections. If they are improperly used or used for other purposes, they don't say the consequences, but their eyes are very obvious.

Moreover, people also made it clear that Ouyang was not afraid to take back the money he spent in a year. Ouyang was very angry about the fact that he had to report money.

"They are jealous! Do you think so? "

"Yes, they are jealous. The leaders of the bird market estimate that they will have to pay so much money. If they don't do well, they will have to pay national taxes. "

Zhang Fan is worried about the books and materials that Zhang Fan needs to read in the second half of the year. It doesn't matter to read books and materials. The main thing is that he has to publish papers.

Not only have to worry, but also deal with the old lady! It's hard for Zhang Fan. Zhang Fan doesn't know how much he misses Chen Sheng at this time!

When the old man left, he joked and said to Zhang Fan, "look, light surgery is good and useless. It's despised. It's impossible without academic status. Come on, young man! ~ "

The old man left with a smile. To tell the truth this time, Zhang Fan has given the old men spirit.

Foreign newspapers have been abundantly saying that China has cut and opened the port's justices of the peace to the operating table, so it's almost careless about human life. The Chinese media have not spoken.

It's OK to talk about it abroad. Even those who are crooked stand up and start to talk. Then some people in the harbor also start to say how bad the conditions on huaguoda road are.

When the country is rich, it is necessary to talk about face. The Chinese community has prepared the draft of mouth fight. After asking various experts, the head said that the operation was done well.

So I didn't send the manuscript. After the operation was over and the patient woke up, the news that the patient was out of danger was sent out immediately.

The chief was happy and specially praised Zhang Fan in front of Lu and Wu, so the two old men were still happy. Although Zhang Fan's face rose outside his head, he was always happy.

"Don't read it first. You can't write a paper this time and a half! Come on, tell us how we spend this money. Money is money when it's spent. If it's not spent, it's called paper. What if they repent of being naughty! "

"Ha ha, Dean, this is specially approved by the head. How can you be naughty? You're worried!"

"What do you know? After waiting for a long time, the head forgot that they gave you a card for a few months at a time and it expired in a year. What do you think is appropriate for us to buy first? "

"Myocardial infarction and cerebral infarction..."

"You're stupid. How much money can you spend? Xue Fei started it himself! Another thing, when you were in the hospital, did you pay attention to the people who shook hands with you and patted you on the shoulder? "

"Well! Too many people... "

"Hey, you'll die of surgery. Come on, discuss what to buy! Oh, there's no hope! "

As Ouyang lost much money, Zhang Fan was helpless. The old lady was more and more difficult to serve. It used to be a little better. I would give some advice in advance or explain it afterwards. Now I completely let the sheep go!

"Why don't you bring some medical equipment. I think we can find sponsors for surgery. At present, there is a generation gap between internal medicine and surgical equipment. "

"Well, it's good to have this idea. Remember, you are not only a surgeon, but also the executive director of the tea vegetable hospital. You must consider how to develop the hospital and how to balance the personnel.

For example, Lao Gao, you can't let him go to orthopedics. Don't you think he's doing very well now? There are rules to file a lawsuit with the government. You can't let Chen Sheng go, Ren Li or Juma Buick.

Ren Li doesn't understand. When she goes, people in the government can definitely fool her like children.

Lao Chen can't fool, but when this guy goes, it's estimated that he won't fight as methodically as Lao Gao. He will be reconciled.

Let Lao Ju go. What could have been done, his eyes on the top of his head, and his temper are looked down upon by everyone. What could have been done, let him worry you.

So, do you think I'm just staring at Lao Gao? Orthopedics has you. Can he improve at his age? It's better to give full play to the waste heat and fight with the government.

You don't want to listen, I don't like to say, when you beg me! "

Look at Zhang Fan's mouth. The old lady doesn't like it. I won't tell you!

"No, Dean, I'm listening carefully. Look at you. If you say you're not happy, you'll be unhappy. Let's discuss what to buy!

There is no need to buy the digestive department and the respiratory department. These two departments have caught the big head of the pill country.

Cardiology will cost some money, and endocrinology will have to change some equipment. And gynecology. The delivery beds are all products of the 1960s. They need to be changed. Pediatric equipment needs to be replaced.

I fell in love with a set of nuclear medicine equipment, especially the cyclotron dynamometer γ Immune counter, automatic drug packaging, renogram, bone mineral density, intraoperative gamma detector, quality control instrument, radiation detector.

These are all good things. In the past, we bought them first when we were in urgent need.

Now that we have money, we still pick it up for nothing. We must be rich for a while! "

Zhang Fan told Ouyang what he was thinking about.

Ouyang began to make up for Zhang Fan's leaks.

"These equipment for women and children inside and outside are small things. Have you ever thought that if you engage in nuclear medicine, you have to afford a specially decorated building. This equipment can't be put together with other disciplines. Such a budget is estimated to be insufficient!

I won't calculate the cost of personnel training for you. It's your worry. Think about it, one hundred million is really not enough. "

The old lady probably got the answer as soon as she estimated.

"Hey, why don't you give more? There are too many small things to buy, but it's not enough to buy some big guys!"

Zhang Fan was helpless.

They didn't take money at all. They felt they wanted less.

When Zhang Fan and his colleagues were in the capital, the candidates in the South were ready to start one by one.

Their goal is tea!

Lao Chen, who is far away from Qingniao, doesn't work very well. Zhang Fan and Lu Lao are not there. No one receives him. Lao Chen and they have been playing in Qingniao for a few days.

Then the three people buy tickets for each person. According to Ouyang's instructions, they must all be planes, and they must arrive at tea on the same day.

Old lady, this is to pretend

Chapter 1008

In a mediocre hospital, patients recover well after waking up. This kind of family actually pays great attention to the maintenance of the body on weekdays.

But this still happened. It shows a problem that there are many accidents in cardiovascular and cerebrovascular diseases.

In particular, it is self-evident that patients with hypertension and diabetes take medication on time.

The patient can speak slowly in the hospital bed.

The ward visit time is only half an hour, and only one person can enter at a time.

As long as people are saved, the hospital will be particularly awesome. Don't mention you as a justice of the peace. Even if the chief executive comes, you should follow other people's rules.

The patient's wife whirled her old man's hand, "it's really dangerous this time. Foreign newspapers say you have

Thanks to the government, a very young but powerful doctor was invited at the first time.

It's good for the country to be rich and strong. What do you say if it's in the harbor this time.

In the future, you can no longer smoke and drink! "

The old lady said in broken pieces, and the old man nodded his head gently.

From life to death, and then from death to life, people will definitely change after experiencing the great fear of the world.

For example, the old man is, "is the doctor gone?" It's still hard to say.

After all, the brain is open, the brain will still be edema, and all functions will be reflected more slowly.

"Are you sick? I'll call the doctor now! "

The old man waved his hand gently, but his head was still fixed and could not shake.

Young husband and wife, old company. The old lady understood the old man's meaning in an instant.

This tacit understanding, to tell the truth, can definitely be envied by young couples.

"Do you want to see the doctor who saved you?"

"Well! Be grateful. "

"OK, I'll arrange it. Don't worry. The doctor will be satisfied."

The patient shook his head again.

"Great grace, no, thank you!"

"What do you mean?"

"My collection, there is a jade Guanyin, send it to the doctor."

"When you recover, will you deliver it yourself? I know the Guanyin you said. You didn't give it to him when half the city paid for it.

Wouldn't it be better for you to send it to the doctor yourself? "

The old man shook his head. "Help, other things! You are not young! "

"I see, I see!" The old lady's eyes are full of Tears.

She understood the old man's meaning, "I can ask the country to hire people. You are not young, so you should be on guard!"

"OK, I'll ask the boss to come to the door with me now!"

The old man nodded gently.

Where does Zhang Fan live? The old lady really didn't know, but she asked through the general office.

Of course, the chief knew this. The chief thought about it and didn't say anything more, but he wrote a pair of words.

"Take root in the west, angel in white" not only wrote a picture, but also wrote the donor.

In the midsummer of 10 years, Zhonghai gave it to Comrade Ouyang.

"Send this pair of words to Comrade Ouyang and tell Comrade Ouyang and Comrade Zhang fan that we have not forgotten them, the country has not forgotten them, and the people have not forgotten them.

I hope they will make persistent efforts and act as the vanguard of the country's western development!
"

.....

Ouyang and Zhang fan are still discussing how to spend money on the hotel.

Many enterprises claim to have an annual income of tens of billions or hundreds of billions. In fact, if they press the net profit, they will still lose money.

For example, China sells oil.

The annual revenue of tea vegetable hospital is \$3 billion. In fact, most of them have to be handed over to the government.

Because the hospital is a non-profit unit, the annual depreciation fee, chassis fee, salary and bonus are not much.

That is, Zhang Fan's external diagnosis and treatment is counted as their own small Treasury. There is not much other living money.

Listen, hundreds of millions of a hospital are actually all fixed assets.

It is estimated that the special fund of the head will be given to the Frontier Medical System and the regional hospital in the frontier for the first time.

Before they could work out a reason, someone came to the hotel.

"How interesting! This is my job!"

The old lady's son and the office clerk came to Zhang Fan's hotel.

When the old lady personally holds a glass like Guanyin which is slightly larger than the wine box.

Zhang Fanjian will never.

This time I have asked the head for 100 million. Although it is not personal, this recognition is definitely not felt by making some money.

"This is a little bit of our thoughts as patients. Before long the old man woke up, he must let me thank you.

If you don't accept it, the old man can't recover well. He always feels indebted. "

"Dr. Zhang, just accept it. When we make a friend, you don't even want to make friends with us.

It's not asking you to do something. This is a small ornament. The old man has been playing with it all his life.

It's not worth a few dollars. Leader, do you think so? "

The patient's son is a middle-aged man. He smiled and said to the officer in the general office.

The officer in the general office did not speak, but smiled.

Entangled for a long time, Zhang Fan couldn't accept it. Zhang Fan looked at Ouyang.

Ouyang thought for a moment and said, "now you take it first. When the old man recovers, you can return it. After all, we are doctors. Everything is for the patient's health, isn't it!"

"Yes, yes..."

Ouyang wanted to understand that the old man said that the sky was a collector, and did not ask Zhang Fan to bring equipment to the hospital.

As long as it doesn't occupy the public interest, this kind of thing doesn't matter to Zhang Fan.

In fact, this is like two peas, and the higher authorities do not define them.

After all, the top medical care can not die in the major hospitals in major cities.

Zhang Fan is embarrassed to accept Guanyin, which is like light green translucent glass.

At this time, the director of the general office spoke: "President Ouyanghong, President Zhang Fan, before I came, the head specially sent you a word. Please sign for it."

Ouyang couldn't stop laughing.

"Did you write an inscription for the hospital? I said, I said, I didn't remember anything, but the head was thoughtful.

Ha ha, the gate of our hospital can be changed.

The name of our hospital is written by the head of the hospital. It has more face. "

Ouyang, with the help of Zhang Fan and the officers of the general office, slowly opened the words of the head.

To tell the truth, I don't know from which generation, the leaders hardly mentioned a word.

Slowly, Ouyang stopped laughing and Zhang Fan became serious.

"This is the first time for the chief to send words to individuals. I hope you will live up to the expectations of the chief."

The officers then left the hotel.

Ouyang and Zhang Fan quietly face these words.

"What can we do?" For a long time, Ouyang said a word.

In her heart, Zhang Fan's Guanyin is actually a glass.

And this is the most important gift.

What is the annual income of tea? In 2010, one hundred million was not a small number.

In fact, the chief is to praise Zhang Fan and Ouyang, because they let the chief really ring when he was young.

Second, to make Ouyang's pressure less.

It's easy to say that special funds are used for special purposes, but it's really hard to stare at the pressure and spend money.

This kind of leader who works from the bottom knows too well what's going on here.

.....

On the plane to the bird market, Zhang Fan and they took off from the capital, Lao Chen and they took off from Qingniao, and Dr. Chen and they took off from modu.

People in all directions are a destination, the bird market.

Chapter 1009

After flying to the bird market, he even entered Zhang Fan's sphere of influence.

This week, Lao Zhao of niaoshi Central Hospital and Xu Guangwei of the First Affiliated Hospital contacted Zhang Fan.

Once Zhang Fan went out to recruit, he felt that he had made a mountain out of a molehill.

They all have medical university as backup, so they can't feel Zhang Fan's desire for talents.

Moreover, most importantly, they just admire Zhang Fan. As for the tea vegetable hospital, they can't catch up with others' eyes.

Of course, this is Zhang Fan's job. They won't say anything, but they also asked Zhang Fan what to go to the bird market after the meeting.

After Zhang Fan arrived at the bird market, Lao Zhao and Xu, as well as several directors of general foreigners from the central hospital came to pick up the plane.

"Ouch, they are all busy people. What can they do?"

Zhang Fan greeted several people with a smile.

"No, we can't. We're busy people. You're the one." Lao Zhao smiled and said hello to Zhang Fan, and then said hello to Ouyang.

"It's not like catching people at the airport! So anxious? "

Zhang Fan asked with a smile.

"Get in the car first, say while walking, and give President ou and president Zhang a warm welcome today."

The old lady smiled and nodded.

She looks very kind now.

Lao Chen was dumbfounded when he was on the plane.

"One hundred million? Earmarked? Or the special fund of the head? "

"What do you think!" Ouyang's expression at that time was so proud.

"Hey, a leader is a leader. I want to review here. Every time I go out with Zhang Yuan, I don't do a good job.

Let many opportunities slip away. This time, the Dean gave us a personal demonstration, and we will do better in the future! "

"There are so many good things!" Zhang can't see it. Lao Chen can show his role when he takes the time.

"Hey, as long as you have a heart, you still have a chance. You see, the capital implementation not only needs funds, but also the leaders recognize our work.

How can you know if you don't come and pay attention? You should keep up with Dean Zhang. He can't say something, but you can say it, can't you? "

Zhang Fan on the plane wants to change a plane if he can't change a plane. He can show off. Give me a horn. I think the old lady can stand up and speak.

.....

As soon as we arrived in the northwest, the weather immediately made people feel comfortable, although the big sun hung in the sky like a large light bulb of thousands of watts.

But it's cool and hot. It's definitely not like the weather in the south. It's clear that the sun is not very big, but hot people don't have time to sweat.

"What time did they arrive?" Zhang Fan began to ask Chen Sheng.

Ouyang gets off the plane and doesn't care or ask anything. Whoever you love, hold a long stick calligraphy and painting box in your arms.

Chen Sheng wanted to help the old lady take it. The old lady didn't even loosen her hand. She said, "this is something used by literati. You won't take it. I'll take it myself!"

For a time, people have become literate.

.....

"Have all the people who signed the letter of intent come yet? It's all air tickets. We can't save a little money. If people can come to tea, we can't go too far! "

The old lady doesn't care. Zhang fan can only do it himself.

To tell you the truth, Dean, it sounds very powerful. In fact, there are many trivial things.

"I asked in advance, that is, Li Guanghai and his wife have arrived at tea in advance."

Chen Sheng reported to Zhang Fan with a smile.

"The couple have arrived at the tea plant?"

"Well, after the Dean talked with Li Guanghai, Li Guanghai and his wife came directly to tea.

It was said that they came for an investigation, but as a result, an investigation became a tourism. Now the couple are playing on the grassland. "

"Hey! They have a big heart. OK, as long as you come, whether you are yourself or your family, you will be reimbursed for the plane ticket. "

"OK!"

After arranging the old lady's accommodation in the hotel, Zhang Fan took Chen Sheng to pick up.

"Zhang Yuan, it's not necessary. Just a few undergraduates. Even if they graduate from a famous university, it's not necessary for you to pick them up in person. I'll send a car to pick them up."

The president of the First Affiliated Hospital was a little puzzled and said to Zhang Fan.

"Hey, hey, not just undergraduates."

Zhang Fan smiled. The recruitment was successfully completed.

"Even a master's degree is nothing!"

Lao Zhao also said.

Both of them couldn't think of it. Zhang Fan and his disciples went out and brought several doctors, and Lao Xia's disciples alone absolutely surprised them.

"Don't underestimate people. Wait. In the future, there will be no drama in your two hospitals!"

Zhang Fan made a rare display for a while.

This kind of display is only interesting in front of experts!

"Hehe, Zhang Yuan's boasting is not like this. Not even you.

I know the level of Lao Zhao, director of general foreign affairs in your hospital. Even if there are several rising stars, they are not as exaggerated as you! "

"Hehe, don't you believe it? Then you'll accompany me to pick up people later, and then you'll know. "

After a rest, it's time to pick up.

Zhang Fan asked Lao Zhao to find a Koster.

Then he came to the airport with two curious babies.

"Little martial uncle! Here we are! "

The first to arrive is Yang Weidong, a master's student of West Lake master brother.

"Ha ha, I'm tired. Let's get in the car and have a rest. There are a few more people. Come on, let me introduce you.

West Lake University, master of hepatobiliary department, Professor Tang Gaozu of Shaw Hospital! "

After introducing each other, Lao Zhao looked at Lao Xu.

They think the tea vegetable hospital is really short of people. A master's degree is such a big battle.

The two politely shook hands with Yang Weidong.

Yang Weidong went home, but his family didn't say anything. His former colleagues and classmates thought Yang Weidong was crazy and didn't take a good companion, so they ran to the frontier.

Reading is a typical fool!

Before long, the oral couple of Sanchuan and three male nurses came.

Lao Zhao and Xu think it's nothing. Even the mouth of Sanchuan Xihua is an undergraduate after all.

Both of them think it's time to support tea.

Then, not long after, the doctor's Apprentice of master modu came with two master's students.

"Martial uncle! Here we are. "

"Good! Just come. Let me introduce you to... "

"These three people have some goods. They still came with scientific research projects, and they were originally brought out by a mentor.

Ah, a good teacher is different! "

After Zhang Fan's introduction, the three master nephews got on the car.

Zhao Jingjin began to talk sour.

For the first few, he felt nothing. He was a little sour when he was a research team and a legitimate student of Qiu school.

But I'm not afraid. After all, these people are still student dolls.

"According to the situation, Zhang Yuan really wants to monopolize the frontier ordinary foreigners!"

Xu Guangwei of Annex I also said with emotion.

"Hey, hey, what else? Where are you? You'll be surprised."

Zhang Fan said with a smile.

Chapter 1010

Many industries in China have a general division, such as what is only Shanhaiguan and what is not out of the South Tianmen gate.

Right? Anyway, some industries really have a default sphere of influence.

For example, before Zhang Fan became famous, most of the throwing knives on the border were from the capital or Shaanxi.

Although Shaanxi is famous all over the world for roujiamo, mutton paomo and mud bumps.

This place is also very fierce in medical treatment. Of course, this fierce refers to the northwest.

However, with the rise of Zhang Fan, especially in ordinary foreigners, people slowly stopped flying knives in the border.

Often invited experts will say: liver cancer? Hey, isn't there Zhang Fan in your frontier? I really can't get away recently. If I'm not familiar with Dr. Zhang, I can introduce it to you.

In a slang, Zhang fan can live in the frontier now. Not only is he powerful, but his school is also very powerful.

There's a lot of stress in tearing here.

For example, you are a doctor of liver and gall flying knife. When you come to the frontier, Zhang Fan won't say anything.

But if you really need help on your liver and gall in the future, or when you need some ideas in this regard.

You often fly to the frontier. How can you open your mouth.

This is the so-called face, the so-called rule that can't be put on the table in the industry. Therefore, only those who invite throwing knives, and no throwing knives take the initiative to find living ones.

Before they finished their sour words, the last one arrived today.

Zhao Yanfang got off the plane and simplified her car. They took a suitcase with them.

"Well, old Xia's disciple?"

"Well! Zhang Yuan, no, you dug up Dr. Zhao? "

They are really stupid.

According to their political status, Dr. Zhao Yanfang can only be regarded as unemployed vagrants in front of them, not even a formal unit.

However, according to the academic level, these two people can't lift their heads in front of others.

Lao Zhao's River scholar knows very well that he would never have been elected if he had not been in the frontier.

And Lao Xu knows that his hospital can never find such a person.

"Hehe, what's up? Will there be anything else for you in the future?"

"Waste, waste, it's good for Dr. Zhao to be a professor in our school. Go to your hospital, ah, waste, waste!"

"Lao Xu, that's wrong. What a waste. "

"You are the hospital. Even if you have some fame now, you don't even have a university. Ouch, the great God, how did you invite!"

Lao Xu's heart was broken when he looked at Dr. Zhao coming out from a distance.

Xia is always someone. The founder of Chinese transplantation is not only the liver, not just the big kidney, but all organ transplants.

Now the master's textbooks on transplantation are compiled by others.

It can be said that people are the ones who make rules and regulations in this regard.

Such a professor is awesome, and Zhao Yanfang's comprehensiveness is obvious to all. This is the seedling of academicians. If it weren't for his bad character, he might have become famous long ago.

"Dr. Zhao, hard work! Welcome! " Zhang Fan smiled very happily. This is the chief instructor of tea vegetable surgery in the future.

"It's hard to fly! I just came to have a look. I haven't decided to start yet.

Dr. Zhang hopes that your hospital and your technology will not disappoint me! "

If you can't chat, this is the master who can't chat.

I don't care about your mood at all. People just say what they say, what greetings and what manners.

Sorry, No.

Also, if you don't have a character, you won't make a big surgical winner.

"Hey, hey!" Zhao Jingjin glanced at Zhang Fan and whispered to Xu Guangwei, "this Lord is not something we can afford to entertain."

.....

"How beautiful China is. I don't know if I don't come to the frontier. I don't know if I don't come to the frontier.

You are all experts and scholars. You are usually busy with work and research. Today we don't go to the scenic spot. We can take a look at the scenery of the frontier on the way.

When everyone is settled, Zhang Yuan and I will apply and take you to the most beautiful place in the frontier for vacation.

Now, let's start towards tea vegetable! "

Lao Chen Chong became a temporary tour guide. Although it is more convenient and fast to fly, in order to let everyone enjoy the scenery of the frontier.

Zhang Fan decided to take a car back to tea. Of course, it's not time for Zhang Fan to almost spit out his gallbladder when he just graduated and mixed on the bus.

Koster, the decorated car specially reserved for leaders in Annex I was requisitioned by Zhang Fan.

The chairs inside are wide, just like a small conference room.

"In the distance is Tianshan Mountain, with snow and green grass. Herding girls and riding boys, this is the frontier of our country! "

"Now we have entered the Tianshan Mountains, and when we get out of the Tianshan Mountains, even if we have reached the boundary of tea!

The forests here are spruce, the largest spruce virgin forest in China. Master, slow down!

Please open the window. Does it have a faint smell. It is lighter than the fragrance of flowers. There is no astringent taste of grass, but a kind of massiness.

What kind of banking country, what kind of northern Europe, our style here is definitely better than them.

When tea is ready, you must try the Saibei mutton I bought.

Such meat is not ordinary. It can be said that it grew up drinking spring water and eating winter, spring and summer grass. "

Lao Chen said quite smoothly. It's a pity that this guy didn't go to the publicity department.

"Look, ahead is Sailimu with tears of God."

The weather is quite awesome today. There were no clouds in the blue sky.

The blue sky is reflected on the crystal clear lake, snow mountains and forests.

The breeze blows, darling, just like a huge silk dancing gently.

Pure blue, pure green, the air is full of this natural.

This made a bunch of people who thought that the frontier was either desert or Gobi look silly.

After all, they have been studying for many years. Although they have no literary talent, no one will stand up and shout: shit, how blue and green!

When the car crossed the grassland, walked through the lake and slowly entered the primeval forest.

In the forest on both sides of the road, an eagle flew by from time to time.

Flocks of sheep appeared on both sides of the road from time to time.

You can imagine that in the quiet forest, on the dark green forest surface, cars are like boats.

Really, this kind of tranquility is beyond words.

Slowly, as the car passed through the forest, tea appeared.

Just like in the fairy tale world, the winding forest suddenly opened up and a castle appeared.

Really, this feeling is particularly shocking.

"Comrades, the tea is here. In the distance, our colleagues came to meet us! "

Ren Li took the administrative cadres of the hospital and waited for xiamapo early.

Chapter 1011

If the environment can make you feel comfortable and make you miss and forget, then coupled with human feelings, it is the shackles that fetter your steps.

Moreover, you are willing to take off this shackle.

The bigger the city is, the weaker the human relationship is. It's not that the city people are arrogant,

but that everyone is under too much pressure.

Houses, cars, tickets, old people's soup cans and children's milk cans are really not easy to tell the truth.

Although some people in big cities wear tens of thousands of dollars and sit hundreds of thousands of dollars under their hips.

But the pressure is really breathless. When you open your eyes, you don't dare to do anything. First think about how much money you owe the bank today.

Therefore, people's relationship is often very simple. Colleagues are colleagues and strangers leave the unit.

Small cities are different. First, a house price crushes everything.

If you have a good career prospect, to tell you the truth, you can't even think about it. It's too happy.

It's really like a peach blossom garden.

This is also the established way of Zhang Fan and Ouyang.

Is to let everyone feel the warmth that big cities can't feel.

Zhang Fan leads the way forward, Ouyang leads the solution of external contradictions, and Ren Li and Lao Gao try to improve the relationship between colleagues.

Lao Chen does a good job in logistics.

Laoju, the key moment is to release the Tibetan mastiff.

He has a special identity. First, he was an anti epidemic hero in that year, which was recognized by the state.

The second character is the character that no one pees.

Now the basic plan of the tea vegetable city hospital has been established.

Although it is a pilot project at the Asian level, it is jointly organized with Marubeni, but the leading person is actually most Marubeni scholars.

There are two national experimental projects. Allogeneic skin transplantation has achieved results, but after all, it is not developed in tea, so it can only be regarded as nominal.

The liver center cancer program has been greatly improved. But this project was further studied by Uncle Zhang Fan.

Now, tea has its own source of power. There are three hospitals, one class a hospital and two class 3B hospitals.

There is also a third class hospital under negotiation.

There are four doctors, including a comprehensive doctor and master. The master of general foreign studies can almost account for half of the departments.

Medicine is a wonderful subject, which makes people feel strange. But if a hospital is not suitable for ordinary foreigners, the whole hospital is actually a castle in the air.

For example, Chinese hospitals and maternal and child hospitals all over the country, have they made any achievements? Yes, maybe they have made good achievements.

But knowledgeable people know that they often invite foreign doctors from other people's general hospitals for consultation.

Therefore, Zhang Fan started to build a team from the beginning of general education.

Now, people are coming. The next question is how to keep people.

Rows of 120, listening to the dismounting slope, rows of medical staff holding mountain red.

The fiery red mountain red, supported by the white coat, is so gorgeous.

Get out of the car, a group of little girls, warmly sent up the flowers, the smile is so sincere.

Without a slightest look, it is a welcome from the bottom of my heart.

It is not only money, but also sincerity that can move people.

.....

The tea government is crazy.

Because I made a sum of money from the general office of the National People's court for tea, 100 million.

Darling, what's the concept.

Without going through the frontier province or bird market, he directly entered the account of the people's Hospital of chasu city.

Greedy eyes, really, one by one.

"The equipment of the tea vegetable city hospital is good enough, and they have their own small Treasury.

The central government has repeatedly asked government organs, enterprises and institutions not to have their own coffers.

Since they earned it. We'll just turn a blind eye.

But this time, this is the tea element health system allocated by the state to us. The tea element health system is not only their municipal hospital.

I think I can take out part of this money to improve county and township health centers.

Many doctors in our counties and townships suffer. They are covered with mud on rainy days and soil on sunny days.

Not only do we have to save lives and heal the wounded, but also repair houses and install glass. Infrastructure is too difficult! "

The leader in charge of culture, education and health put forward suggestions to the boss of tea vegetable.

Health, a leader in charge of municipal health can only take charge of units below the county level. He takes charge of the urban health system, and others don't listen. Therefore, he also wants to be a victim.

"This is a special fund!"

The tea vegetable boss is also greedy.

"Not only the culture, education and health need to be improved, but also the small and medium-sized

enterprises in our urban area are crying for food!

This is the money of the country, not the money earned by their tea vegetable hospital, but the money earned by them. Look, monitor, have we asked, No. But the country's money can't let them make their own decisions.

They are still not the people's hospital! "

Anyway, one is one. Everyone is greedy for this meat. This kind of money is not worth eating.

But let's think about Ouyang and Zhang Fan. It's hard to chew the meat with bones. So he encouraged boss tea vegetable to talk to Ouyang Zhang Fan.

"It's said that the municipal hospital has asked for several staffing this time?" Boss Cha Su didn't follow up, but asked about the preparation.

"Yes, they all go through special talent channels. It is said that their own hospital also gives each person a suite, and a doctor's level gives a million resettlement fees!"

The leader in charge of health drooled.

"Hey, after all, it's also the first time that tea vegetable has introduced doctoral talents on a large scale. We'd better go to tea vegetable hospital tomorrow."

"Funds?"

"We'll talk about money then. For example, we can discuss the preparation, can't we! Let's go and say foolishly, "is Ouyang a reasonable person?"

The poorer the place is, the more attention is paid to the three melons and two jujubes in front of us.

They will never think that these doctors are more important than 100 million. Whether they can create future wealth or not, they must first eat a mouthful of meat in front of them.

.....

The next day, the hospital held a general meeting of the whole hospital. Originally, I didn't want to invite leaders. As a result, Chen Sheng received a phone call and told Zhang Fan and Ouyang that the leaders would come to the meeting.

As soon as Ouyang heard this, he knew how the wind blew. The old lady hurriedly handed over the chairing of the meeting to Zhang Fan.

Then the one who runs away with Chen Sheng is faster than the one who drives out the thief.

What's the old lady doing? Someone was asked to frame the banner sent by the head.

She knows that it's not impossible to insist. In a word, there is no way for leaders to earmark funds for special purposes.

However, after all, it is still required to go to the government, so it is better to have a way than not having a hard top.

Ouyang originally wanted to find an expert to mount it when he was free. As a result, he couldn't. He had to take it out to scare people today.

Before long, the leaders came. They were like coming to the tea vegetable hospital for an expanded meeting.

Even the people's Congress came. It's estimated that they want to change trains!

Attach importance to talents, thirst for talents and make good use of talents.

The leaders spoke so well that the following group of people who just came out of school were excited and didn't know what to say.

Too much attention, really too much attention!

Thirty miles out of the city to meet, flowers and wine, I don't want to say any more.

At the meeting, even the leaders of the city came. Not one or two came, almost all of them.

Really, moved! When was talent so valued!

Tea vegetable didn't come in vain. I don't feel bad with the enthusiasm of the leaders!

After the meeting, Zhang Fan wanted to run, but he was caught by boss Cha su.

Zhang Fan is not stupid now. He knows what such a complete team wants to do when they enter the hospital. Anyway, nominally, he is not the president and runs away.

As a result, he didn't run away. It is estimated that the leader stared at him like infrared aiming from entering the meeting.

"Dean Zhang, I owe a lot for going out this time. Not only did it bring in doctoral talents, but also brought in special funds for tea.

It's really hard work. We must thank our Zhang Yuan! "

Zhang Fan knew what the leaders were up to as soon as he heard it.

"Hehe, let's go to the conference room and have a lot of work to report to the leaders."

"OK, let's listen to the frontier first knife and arrange work for us. Who are we? We serve experts and scholars.

Many times, some work is actually left to us. You can do research at ease, and we will do a good job in service! "

Zhang fanhan has come down. He is so talkative. If he hadn't been at the bottom of Ouyang's bowl of wine, Zhang Fan estimated that he could hand over the funds to the leaders with both hands and let the leaders serve him.

Of course, Zhang Fan also keeps talking about the wheels. What leaders come is important, and leaders don't come is reassuring. Anyway, Zhang Fan doesn't talk about money.

He's ready. If Ouyang doesn't come into the office, he'll enlarge his move.

Talk to these leaders about the current progress of intestinal tumors.

Don't you want to listen to the report!

As a result, before reaching the meeting room, Chen Sheng appeared.

"Oh, good leaders." Chen Sheng immediately pretended that he had just seen it. He stood at attention and saluted at a moment's notice. People can't see what he did. He pretended.

For Ouyang, the leaders should face it squarely. For Zhang Fan, the leaders will pay attention. For Lao Chen, the leaders just nod.

Chen Sheng winked at Zhang Fan. Zhang Fan understood at a glance that the old lady was ready.

Zhang Fan was relieved. He smiled and accompanied the leaders into the conference room.

As soon as I entered the conference room, I saw Ouyang standing next to a person and said carefully, "be careful, but I dare not break it ~!"

"President Ouyang seems busy!"

The leader said to Ouyang with a mocking tone.

When the leader comes to the unit, the leader of the chief officer doesn't see anyone. If he puts it in

peacetime, he will definitely have a bad face.

But today is different. Everyone comes to pay money, so his face is still very good.

"Oh, officer Li, why don't you tell me when the leader comes? I'll call him now and tell him the work regulations face to face!"

Ouyang casually asked an officer Li, and the leaders casually said that they had stopped Ouyang's action.

If you don't stop, you'll never be able to talk today.

"It's all right, it's all right. Dean ou, what are you doing?" The leader in charge of health hurried out and asked.

"Oh! I haven't had time to report to all the leaders. I originally wanted to report to all the leaders after mounting.

The head of the capital is very satisfied with and attaches great importance to the work of our hospital. The head especially praised our tea government.

This is not incidentally returned to the hospital a word! "

As soon as you said this, you look at me and I look at yours. By coincidence, you put your eyes on the words to be mounted on the table!

Chapter 1012

Work, when a lot of work involves interests, it is quite difficult to do.

Because at this moment, both individuals and units will enter a wonderful state, that is, the earliest philosophical thinking mode in China, chaos.

The regulations are not biased towards their own, and they can think of ways to blur the regulations.

The leaders are ready to speak through the establishment, because the channel for special talents is so wide that they can't get in a few in a year.

Although it doesn't seem to matter, to be honest, ordinary people have two ways to enter the system.

One is the national examination, the other is to take special talents. It can be said that the doctor of the national examination is not a required undergraduate.

After all, leaders have more voice, so Ouyang is ready in advance.

When Ouyang was in the capital, when he didn't have a killer mace, he actually thought about it early.

Before returning to tea, you must spend all your money, and you won't keep any points. Therefore, Ouyang and Zhang Fan took the time to discuss how to spend money.

But with the killer mace, you don't worry.

After all, it's still a little hasty to spend money.

When the leader of tea vegetable in charge of culture, education and Health asked, the boss of tea vegetable suddenly felt that it was not good again.

This is to know a person before you become vigilant.

For people like Ouyang, you should directly watch the Taoist mountain as soon as you enter the door. You must not involve others, and you must not give Ouyang a little chance.

Be sure to stick your neck and take out the money before talking about anything else.

However, he looked at his men who were still in the fog and sighed, "no wonder you can only manage the county and township health centers now, and your level is like this!"

As soon as the leader in charge of health finished, Ouyang immediately said, "it's all my fault. We were originally recruited in modu.

As a result, the leader of the capital office called President Zhang and I to the capital.

The whole journey is confidential, and I can't report... "

Ouyang is like telling a story, with both voice and emotion, but also with suspense.

They are all people in the system. Others may not care, but who can not be curious about the capital

and the general office?

"The chief not only praised our tea vegetarian government, but also sent a pair of sons to encourage our tea vegetarian medical workers.

Hey! The leaders' expectations of us have put too much pressure on us! "

Ouyang said, and everyone looked at him with the same eyes.

The words are not so amazing, but the small words below make people have to be careful.

"In the summer of 10 years, send president Ouyang to Nanhai, head!" Someone read it gently.

Then, suddenly cold.

No one knows what to say. Originally, I was thinking about how much money I could take out from Ouyang and Zhang Fan.

Some people even think about how to spend the money when they get it! As a result, as soon as he entered the door, Ouyang was like carrying a mechanism gun.

If you don't agree, you'll fire.

Moreover, the caliber of the gun tube was so large that a group of people sweated down.

To tell the truth, if you give a red headed document, you may not be able to block all kinds of ghosts and gods.

As the general office said, the funds for culture, education and health must be earmarked for special purposes, but if people repair the bridge today, the bridge will collapse. If they do not repair it tomorrow, the levee will collapse.

As long as it's not in your pocket, no one can take it.

However, this is not a document, not even a document, so that a group of people can't speak.

The leader in charge of culture, education and health closed his mouth tightly, and the green veins on his head came out.

It is estimated that regret is greater than anger. If his life could come back, he would definitely ask the nurse for a bandage to block his mouth before entering the office.

"Good, good, good, President Ouyang and president Zhang Fan have done meritorious service to tea vegetable.

If I can get the attention of the head, I will have face when I go to the bird market in the future. Who dares to say that our tea vegetable city is a small place that no one cares about outside the border pass mountain.

Where even the leaders are concerned, who still looks down on it.

Hard work, hard work. If comrades can be like President Ouyang and president Zhang Fan of our tea vegetable hospital, why can't we go to the bright road and get rid of poverty and get rich? "

Boss Cha Su turned his head and thought that the money would not come, but it seemed that he could borrow it to let the people in the bird market see it!

After that, he hinted to let the photographer of the Publicity Department

If you don't want money, it depends on Ouyang. Everyone wants to leave here early. No one wants to be a back wall for others.

As a result, everyone wanted to go, but Ouyang didn't let him go at this time.

If you use Ouyang's words, it is: come whenever you want and go whenever you want. Where do you go when you are an old woman?

"Zhang Yuan, isn't there still a lot of difficulties in the hospital. Today, the leaders come to the hospital. How much they attach importance to the work of our hospital.

Tell the leaders about the difficulties.

Chen Sheng, come on, what are you doing standing there? Can't you work when you see the leader.

Make tea for the leaders and send someone to invite Ren secretary and President of the high court.

And the senior talents who have come this time are also invited to let the leaders investigate and see whether everyone is qualified or not. "

In a few words, the small officers of the general affairs office of the medical office began to decorate the venue like flying.

The nameplates of the leaders seemed to have been prepared early and were placed on the rostrum.

None of them is bad.

The sweat of the leaders came down. The wolf didn't catch it. It seems that we have to lose all the children today.

I don't know. I thought Ouyang had a plan.

Everyone looked at the leader in charge of culture, education and health with one word in their eyes: traitor!

Because he gathered everyone together to ask for money. Without him, we might not be so neat, nor would we let Ouyang make dumplings and round them.

And he, like Ouyang's support, gave Ouyang the bullet and gun at the critical moment.

The leaders in charge of culture, education and health are almost crying.

Really, the fuck in my heart is definitely worse than the dog.

Zhang Fan couldn't help it. If Ouyang hadn't looked at it, he would have laughed.

A group of leaders, like those kidnapped, sat on the rostrum reluctantly.

"Well, let's meet the new comrades. I have another meeting later, Dean Ouyang. Can we be brief? "

The boss of tea vegetable began to beg for mercy, because the government still owed some funds to the municipal hospital. He was deeply afraid that Ouyang would become a school bully who could not sell his name and ask for money directly at the conference.

To tell the truth, he is not afraid of anything except money.

It can also be regarded as the sadness of being a leader in a poor place.

Before long, the staff came.

Ouyang knows too much and too little. So at this time, she stopped talking and handed over the leadership to Zhang Fan.

This also tells you from another aspect that I am in charge of Zhang Fan in the municipal hospital.

Zhang Fan took the microphone and coughed gently.

"Close the door!"

The leaders, especially the boss of tea vegetable, trembled on their faces.

If he can start his life again, it is estimated that he will never come to the hospital to think about this money.

At the beginning, Ouyang promised not to allocate funds to the municipal hospital. As a result, he handed over the two hospitals to the municipal hospital as branches.

Turn around and the woman won't admit it.

Ouyang asked for money. He could criticize Ouyang for her lack of political integrity.

Lao Gao asked for money. He couldn't see it. Let his men fight with Lao Gao every day.

Anyway, a piece of meat is indispensable for a mouth fight. I don't see that the mouth fight in China is much more agile than before.

What to do, what to do.

However, if Zhang Fan really asks for money, he wants the money that the government should allocate.

Can he not give it?

He knows too well why Ouyang wasn't so powerful before, why Ouyang wasn't so domineering before, and why Ouyang didn't have a leader to write an inscription before.

He knows everything inside. So there are some things that Ouyang can mess with.

He can also come from the water and go into the water.

But when Zhang Fan spoke, he had to be careful.

It's not stupid. Although the leaders usually don't woo Zhang Fan in words, in fact, they will get closer when talking and laughing. This is the real skill.

"Ha ha!" Although the meat on his face was shaking, he still smiled and looked at Zhang Fan.

The General Affairs Officer immediately closed the door of the conference room. With a click, the doors were locked.

"Attach importance to talents, reuse talents and make good use of talents!"

These three words were spoken by the head of the government in front of Ouyang and me. "

With that, Zhang Fan looked at the leader.

The smiling face of the leader immediately became serious and took the lead in clapping.

Like a medal.

"Without the support of the government, we would not have gone away from the magic city and Sanchuan this time.

Before leaving, everyone was talking.

Say, can we welcome high-end talents in big cities?

To tell you the truth, I was also terrified at that time.

However, the government has given us reassurance.

At the beginning, the leaders told us that as long as we are talents, we can't be stingy.

Special treatment for distinguished talents. The cost of housing and settling down is in line with that of first tier cities.

With the reassurance of the leader, I have the courage and courage to go to the magic capital, Sanchuan and accompany the capital.

Fortunately, our recruitment team is very successful and successful.

Today, I will report to all leaders and introduce your newly hired colleagues.

Dr. Zhao Yanfang studied with Professor Xia, the father of transplantation in China. In organ transplantation, Dr. Zhao did not get the mantle of Xialao, but also combined the strengths of Chinese and foreign families in transplantation and even surgery

Dr. Yang Weidong... "

Zhang Fan began to introduce one by one, and the leaders were surprised.

I thought it was just a few doctors. As a result, each of them was a great God.

"We finished the task. We wanted to solve the difficulties ourselves, but we didn't expect the leaders to come to the hospital at the first time.

I want to review. In the future, I must actively close to the organization. If you have any difficulties, you must report to the leaders. You can't take it for granted. "

"Come, come! The meat show is coming ~ "the sweat on the leader's face came out.

He looked at Zhang Fan. How did he see it? How did he feel that this guy and Ouyang were copied from

the same mold.

He has been thinking about whether to take some out of the stability maintenance fund or subsidize some from the special education fund.

At this time, Zhang Fan continued: "because of the tea vegetable government's policy of attaching importance to and reusing talents, our best doctoral and master's undergraduates are not far away or remote.

From big cities to the frontier. He came to the frontier with his family.

For example, Dr. Yang Weidong's lover is a teacher in a famous local middle school, but for feelings and the development of the frontier.

She gave up her good life and work in a big city and came to tea.

And Dr. Yang's lover, an excellent accountant... "

When Zhang Fan said this, the boss of tea vegetable finally didn't panic. Really, he didn't panic at all.

At this time, he left in no hurry and sat firmly on the rostrum. His face was serious and solemn, listening to Zhang Fan's report.

While listening, he wrote something from time to time.

When Zhang Fan finished.

Boss Cha Su looked steadily at the people in the meeting and even nodded gently to the new comrades.

Then he spoke.

"Comrades, some people say I'm biased. Some even say I'm arbitrary. Said I gave too much support to the city hospital.

Now, I can say that our support is far from enough.

Who is unconvinced? As long as you pat your chest and say that you want policies, you can do as well as the flowers of the tea vegetable hospital. You don't have to surpass the tea vegetable hospital, as long as you do almost the same as the tea vegetable hospital.

I will definitely give you the greatest support.

Now, the tea vegetable hospital has become the vanguard of the frontier medical system. When I go to the meeting, I can say to the leaders that we have struggled, we have struggled.

Now, the tea vegetable hospital has recruited the Golden Phoenix. We must do a good job in the logistics of these Phoenix.

Comrades, we can't be careless. Can we keep these golden phoenix without good logistics?

I still say that we attach importance to talents and reuse talents.

We must solve the difficulties raised by President Zhang Fan at the first time.

Talents should not be allowed to worry about family affairs while doing scientific research.

This is a crime~

The personnel office came down to draw up a list. Solve the worries of these talents with the fastest speed.

I would like to emphasize here that if we can reuse talents, please keep up with the tea vegetable city hospital! "

Chasing the foot board to finalize the matter.

To tell the truth, the municipal hospital is not short of money, but it is still difficult to arrange several family members.

Both personnel and politics are right at all.

Chapter 1013

Chasu hospital, a general hospital and two branches, is located in the city just like Pinzi.

It can be said that pathogens in all directions can be intercepted by the municipal hospital.

The president of Hua hospital was bullied by the municipal hospital and was almost crying. In the past, the municipal hospital was always full, and some had minor diseases. They disliked the poor environment of the municipal hospital.

But now the three hospitals have a lot more options. If you want a good environment, you can go to the second branch. If you want more attention, you can go to a branch.

If you want to recuperate, you can go to the third branch hospital. This model directly led to a collapse in the number of patients in China Hospital.

The product shaped square array of the municipal hospital is like a lock, which firmly locks the China Hospital in it.

Of course, Zhang Fan is not Ouyang. He never cared about this aspect, nor did he ask how many patients our hospital received today and how many patients China hospital received today.

Now Ouyang doesn't care much about the business of the municipal hospital. Otherwise, he will definitely ridicule the president of Huahua hospital.

Zhang Fan never had the idea of competing with others. Because Zhang Fan doesn't think it's necessary.

When Ouyang rolled other hospitals, Zhang Fan even felt that Ouyang was lonely.

In fact, Ouyang is more lonely now. In the past, he wanted to suppress people like Lao Gao in the hospital, not his own lineal people.

Outside, we should surpass other hospitals and let other doctors look up to the municipal hospital.

Now, boring. The work of the health bureau is all entrusted to the director, who is responsible for the general direction and financial and personnel rights.

If you can't do well, the director's executive ability is not good. If you do well, the Secretary's leadership is good!

Moreover, because of the inscription of the head, she doesn't even go to the health bureau now, just in her own office.

The Council did not participate, and the dean's ward round did not participate. The old lady was playing with cactus in the office day by day.

Humming a tune, I looked up from time to time to see the framed word hanging on the wall. To tell the truth, really, Ouyang's complacent little life makes him have a good taste.

In the past, Ouyang had to prepare for a quarrel with the leader in charge of health. She won't let Zhang Fan do such a thing easily.

Results now really, let alone quarrel, the leaders in charge of health don't come to the municipal hospital.

Now Ouyang people can be lazy and don't ask anything, but Zhang fan can't.

To keep people, it is not enough to rely on small favors. The most important thing is to make achievements.

There was no one before. I had a lot of ideas. I can only think about them. Even the laboratory needs some hands from Zhao Jingjin of the bird market to use it.

Now I have someone!

Zhao Yanfang said she just came to have a look, but Zhang Fan didn't take her statement seriously.

Want to run when you come? Oh, you look down on me, director Zhang.

All the others have signed the employment contract, but Zhao Yanfang didn't sign it, but the job has been assigned to Zhang Fan.

"Although I have improved the operation of liver central tumor, the damage is too large and the requirements for doctors are too high.

I think to restart this project now, the best goal is to form a surgical model, and it is best to become a clinical treatment guide.

Li Guanghai, Yang Weidong and Ma Yichen led the establishment of the hepatobiliary central tumor model research group.

Anyone who has an idea in the Department can apply to the three of them. Dr. Li Guanghai is the leader of the group, and Yang Weidong and Ma Yichen are the deputy leaders.

Dr. Xu Yan, you were originally a group, so now you take Dr. Zhao and Dr. Wang to continue your research on common bile duct and twelve intestinal anastomosis of common bile duct.

Dr. Zhao Yanfang, your workload is a little larger recently.

We and Marubeni jointly study intestinal tumors. At present, they are leading. I want you to pick this one up. We can't rely on the people of Marubeni to do everything. We don't even know the specific content when we get results.

There are other laboratories, you also need to participate. After all, your experimental experience and academic level are the highest in our hospital.

Other groups can find Dr. Zhao if they have any problems in scientific research.

Dr. Zhao is the general director of scientific research in our tea vegetable hospital. "

Without waiting for Zhao Yanfang to speak, Zhang Fan continued: "although everyone has scientific research tasks, after all, we are a hospital, not a research institute.

Therefore, we can't put down our daily duty, outpatient service and surgery. After all, the focus is to apply what we have learned.

All experimental expenses shall be reimbursed. First go to the accounts of the Department. Director Zhao Quanping, the welfare of the Department and overtime pay should be raised.

"

In the morning, at the morning meeting of general practitioners, Zhang Fan gathered two general practitioners and one liver and gall together for a meeting, and then directly began to assign tasks.

For a time, the original deputy directors in the Department trembled. The sense of urgency was no joke.

This is a new force, and depending on the situation, several are not only highly educated, but also seem to be familiar with Zhang Fan.

It's really hard after that.

In the past, people competed with each other.

Both know each other's depth and understand each other's length.

Now it's different. People can do scientific research first.

It's a legend to put it in the tea vegetable hospital. Who has done scientific research in the past? It's an operation level one by one. If your appendix is three centimeters, I'll find a way to get two centimeters out.

Now, the sky has changed. Zhang Yuan doesn't pay attention to this.

Several half old deputy directors looked at each other and felt a sense of rabbit death and fox sorrow.

And the most terrible thing is, I heard that most of these doctors and masters are Zhang Fan's nephew!

The deputy directors feel headache when they think about it.

This is the lineage. With their ideas, this is president Zhang's man!

In fact, Zhang Fan didn't think so. Although martial nephews may be familiar with themselves relatively, they can't play Shh in technical units. Can you do it, hard or not, no results, everything is false.

Although Zhao Yanfang felt that she was a little deceived, the research here led the Marubeni country.

She just wanted to see it, because Zhang Fan's meatball country was so frightening that almost all the top universities in meatball country came.

In fact, Zhang Fan is not so attractive.

The main reason is that there are too many patients with intestinal tumors in Marubeni.

To tell you the truth, this country is very wonderful.

Eating and opening restaurants pay special attention to hygiene. Even chopsticks are metal. It is said that Chinese traditional chopsticks are unsanitary.

All appliances should be sterilized at high temperature.

But when you pay attention to hygiene to the extreme before eating, you don't like to pay attention to hygiene when eating, and you like to eat raw meat.

Not only seafood, but also beef.

Then, large areas of intestinal tumors appear. It has become a national disease in this country.

Zhang Fan's general surgery and hepatobiliary department have been started. Now it is barely a comprehensive department integrating scientific research and medical treatment, and there is also a P2 level laboratory.

Generally speaking, level P laboratories are divided into four levels. Level 1 is to study harmless, level 4 is the highest, and level 2 is applicable to the study of microorganisms with medium potential harm to people and the environment. It is said that Kazakhstan has a level 4 laboratory in Jinmao.

I don't know what they want to do.

Not long after Zhang Fan came back, Shaohua returned to tea with his mother and mother-in-law.

The two old people were the most shocked when I went out this time.

In the past, I listened to my son or my son-in-law. Today I became the assistant to the director, tomorrow I became the assistant to the president, and the day after tomorrow I became the vice president.

Others call Zhang Fan either dean or a knife.

In fact, the old people at home don't feel much.

At most, I feel that others are polite to them.

Live as you should, and there is little change.

As for income, the old man didn't worry about it. Anyway, it seems that his annual income is more than 100000.

Therefore, the two old people also seem to feel that Zhang Fan is young and still in the climbing period of his career.

Didn't take the Dean seriously.

I didn't take his name seriously.

After all, all the family members were born as ordinary citizens. If they didn't say anything else, they would say they bought a car. The two old men thought that the Santana made by the factory director and the field director was the best car.

But this time, when we arrived at the magic capital, darling, we really surprised the two old people.

Shao Hua hasn't had time to contact Zhang Fan's master brother and sister-in-law. She was going to let Jing Shu lead them around the devil city first.

As a result, because Shaohua's tickets were booked by the little officer of the medical office, I don't know whether it was Lao Chen's leak or the little officer's anger.

Shao Hua and they just got off the plane. The manager of Olympus in Marubeni and Jing Shu are waiting for the pick-up at the airport.

The manager of Olympus also said well, absolutely not out of line. Zhang Fan was busy going to the capital and didn't care.

As a result, the two old ladies were frightened.

The manager followed him and arranged where he went in advance.

Especially seeing Zhang Fan's new house, even if the two old ladies have not seen the world.

But looking up is the signal tower of magic capital, and looking down is the Dahuang river.

Can't it be scary!

"Will Zhang Fan be all right? He won't be the dean and bribed! It's okay if we eat, drink and wear, but we can't let the child commit a crime! "

Shaohua's mother whispered to Zhang Fan's mother privately. The old lady suspected that Zhang Fan had committed an official crime.

Zhang Fan's mother looked at the house, and then Jing Shu's exaggerated expression shouted, "my brother is too cow, my brother is too cow."

The old lady quietly asked Shaohua, "don't commit a crime!"

"Mom, don't worry, this is Zhang Fan's exchange for technology. It has nothing to do with him not being the dean."

"Is his level so high? Can you change such a big house? "

The old man is always like this. He always thinks that the child is not old, always thinks about how to help the child and how to protect the child, unless one day he can't walk or work.

Shao Hua and his sister-in-law finished the house property certificate, and then booked the decoration. They didn't stay in Mordor much. There are still a lot of things at home. And Zhang Fan went back.

The two old ladies finally understood that Zhang Fan was no longer the child in their eyes.

Chapter 1014

How much is the income of the tea vegetable city hospital? This is what the new group of doctors and masters are most concerned about.

These people come from big cities, and it can be said that they also come from the most prosperous areas of China.

In fact, personal income is not particularly concerned for them.

Because when they go there, their income is almost the same. Unless it can become a blade, a flying knife that can blossom everywhere, or the platform is quite awesome.

Otherwise, the income is almost the same everywhere. Medicine is a special industry.

For example, doctor, in other industries, it is estimated that he has reached the top level of the industry. But medicine is different. If doctors graduate and enter the hospital without better scientific research projects, they are actually similar to undergraduate graduates.

Therefore, if you want to reflect your value in this industry, you should see how much the hospital invests in research topics.

The turnover rate in the medical industry is particularly high. Whether it is a bachelor, a master, or a doctor, he plunges into the hospital and begins to feel what to do.

As a result, after working for two months, the superior doctor, the middle peer, the lying patient, a stick hit the novice's head like nothing.

How could this happen? Because the mentality is not straight. Because this business is too busy. There is no life in your hand. Whether you are a doctor or a postdoctoral, I'm sorry. Go and change the medicine first.

This makes the mentality of many people who haven't experienced the workplace collapse in an instant. I've been reading for half my life. Did I come to you to change my dressing?

Far from it, it's a pharmaceutical factory of Renhe. It's not big. To tell the truth, it's big. Look at the drug catalogue, what red pill, what Salvia miltiorrhiza, and what great sword for promoting blood circulation and removing blood stasis.

Anyway, he produced almost all the products with high prices. As a result, he stopped talking about allergic reactions. A plague came and missed the fight. Their R & D was an egg.

But people have a lot of money. From the eye drops made by director Zhou in those years to the

washing known by the whole people, they are healthy. Anyway, they can't cure diseases or harm people.

Then the new doctor was fooled by equipment manufacturers and pharmaceutical manufacturers and went to sell it! A few years ago, to be honest, this industry has such a tradition.

It's not that the old comrades don't know. What doctor looks for a nurse, what teacher matches a doctor.

This is what everyone in society takes for granted.

A few years ago, to be shameless, surgeons went to equipment manufacturers, physicians married drug dealers, and the director's wife opened a company and became an agent! The bigger the city, the more such things happen.

One is interested in the future of the other, and the other is interested in the money path of the other. Really, a few years ago, the little money the doctor made was a joke in front of others.

The tea vegetable city hospital is an alternative. If only local residents seek medical treatment, let alone raise laboratories, these equipment obtained by Zhang fan can destroy the government's financial production.

The small treasury of the tea vegetable city hospital now depends on Stan's local tyrants and foreign friends who come here in admiration.

Two days after Zhang Fan returned to tea, Huifeng's shareholders also came.

The means of others is that uncle Qian opens the way. There was originally a small hotel opposite the municipal hospital. Not to mention the stars, it's 30 yuan for one night anyway.

William is still rich. He invests directly in the government and cooperates with the government. The owner of the small hotel happily packed Xiaomi according to the demolition money. If he bites to death and doesn't go, it's not impossible to participate in one share.

Just when the staff of the municipal hospital were curious about the entry of the excavator and bulldozer opposite.

William's son also airborne tea.

At the beginning, the government didn't wake up. Good people from the three islands went to tea to build hotels. Is it the scenery here that attracted him?

We are still discussing how we can pay more money.

In a small place with a small population, not to mention others, even those who sell fried chicken legs

don't come to tea. Do you think the government won't be interested in such a tycoon.

As a result, people have been looking at listed hospitals for a long time.

Although I always felt that it was a little boring, the leaders came out to receive me in the face of money.

This task was entrusted to the leader in charge of culture and education. The tea vegetable boss didn't say much. He just meant to have a good reception and pay more money.

The leader in charge of culture, education and health pondered the boss's words.

He personally took William and William's son to the tea vegetable hospital. Although he didn't like to come to the city hospital because of the pressure, Ouyang now has a hobby and likes to bring the leaders to his office.

Then sit on the reception sofa and face the big characters mounted on the wall.

To tell you the truth, the pressure is just like the head is watching him. Don't talk about it. It's uncomfortable to drink water.

But this time he had to come.

According to his meaning, it's actually simple. He thinks that seeing a doctor can cost a few money. He simply avoids the cost, cures the disease, and lets the local tyrant pay more money to invest in tea.

The idea is also right. It's indisputable to sing any song on any mountain.

However, not only Ouyang but also Zhang Fan did not do this.

He finally pulled up the team and pointed to these people to invest. He wanted to be free and wanted more.

The leader took William to Ouyang's office, "let's change a conference room. After all, people are foreign, and it's more formal in the conference room."

"It's okay, it's okay, it's not business negotiation. That is, when the leader comes, I will come forward to receive him. If the leader doesn't come, he will seek medical treatment and I will see a doctor. The outpatient hall will be enough for them. "

The leader's face was red, green and white. I scolded my mother in my heart, "are you a reception? Are you a reception? It's a naked show, isn't it? "

Endure and endure, and finally have to endure!

"People can be regarded as investors, and the tea vegetable city hospital should keep pace with the government."

"It's the same reason to pay for seeing a doctor. Why don't you give us back the money you owe us! "

Ouyang can also be polite to the boss of tea vegetable. For this, Ouyang directly pushed each other to the sky.

Ouyang can keep his word in the tea vegetable hospital, but this one may not keep his word. Although he is a senior official, he can't kill this subordinate.

William's translation was also shocked. He didn't expect that there were such tough people in remote small cities who didn't pay attention to their hundreds of millions of bosses.

It made him too angry.

Where you go, you are not hugging. When have you been so insulted.

William's son's disease didn't sound good, so he didn't tell others specifically. Because of his son, a serious playboy.

In a popular word, it is to drink the strongest wine and play

As a result, the money hasn't been spent, and the liver can't work. It's strange. You have to play drunk. Can't you play soberly?

William was ashamed and didn't tell his subordinates.

As a result, the guy who is not the chief translator probably wants to show off his sense of existence in order to win face for his boss.

Sometimes, it seems very strange. In many things, the bad is the leader.

For example, William Mishima, he knows the country of China!

But the leading party knows very well.

He said: "madam, do you know the status of Mr. William? He is a noble on the three islands.

We come to tea vegetable. Your government invited us to invest. Billions of investment. This is not a small project. You should put your position right. Don't think that when you become the president, this hospital is your home.

Believe it or not, as long as our boss tells your leaders that you will finish class every minute. "

"Oh!" Ouyang blew up immediately.

How long has it been? I haven't been angry. Today, someone dared to threaten me in my office.

Ouyang's triangular eyes stared.

The leaders in charge of culture, education and health are big.

Although he doesn't like Ouyang, to tell the truth, he doesn't dare to provoke Ouyang.

What kind of person is this woman? She's going to make three points without reason. Now you come to beg others. You're not Chinese. Don't you look for a hammer with a walnut!

What a mess!

Chapter 1015

Ouyang has a big temper and a hot temper. But he is definitely a very clever man. In current words, it is definitely a person with dual business online.

Some people have a hot temper. No matter what the situation is, they blow up and quarrel with everyone. It's not just a matter of temper, it's also a matter of brain.

In the hospital, Ouyang reprimanded the former Secretary, ridiculed Lao Gao, and even often patted the table with the former president. In those years, Lao Huang retired early. If he delayed for another two years, Ouyang might be angry and have a hemiplegia.

For excellent doctors, which one hasn't been cleaned up by Ouyang. In the old lady's words, if I don't give you a tight string, can you be so excellent today.

Every time he said this, the doctors would look at Zhang Fan with a smile.

But Ouyang never said that he didn't look at the gate, nor did he blush with the little nurse and little doctor. He really couldn't see it, so he said: you can serve dessert!

What is this? This is the art of being a man and the level of leadership. Yes, she can't be soft. Originally, women have obvious disadvantages in the workplace. She knows very well that if they are weak, they can be bullied by other departments. She also talks about their ambitions.

For the same level, she has to press the other side, which is a struggle for the right to speak.

For excellent subordinates, they will give the strongest blow immediately when their shortcomings are found all the time. It can be said that those who can't resist have become excellent. Don't blame Ouyang for his poor means.

This is already a very good leader. I'm afraid the leader will always smile at you and pass you in his heart. China's officialdom culture for thousands of years doesn't know how to deal with you. Just drying you for a few months can make you flustered and confused. You don't know what's wrong, and then you can't wait to jump out of the building.

When the translator stood up and spoke, Ouyang PI smiled and said hello.

He turned his head and said, "no bed, make an appointment! Since you are a gentleman from Mishima, you should know that you have to make an appointment to see a doctor! "

The translator was thoughtful, "Hey, when and when did China Hospital start making an appointment? What a big hospital you are!

OK, you cow, you wait. Let's go to the bird market. When your leaders invite us, we will be as hard to talk as you. "

Then I turned around and began to translate, which roughly means that the hospital has poor level and poor environment, which is inconsistent with the identity of the boss.

As he spoke, the translator became more and more happy because he saw that his boss's face was becoming more and more ugly. He was secretly proud. While looking at the boss, he looked at Ouyang: "let you bang, let you bang, let you look down on me, the dean of a small hospital!"

Ouyang was angry and happy. I didn't have an excuse for you. I thought it was difficult to pull out the knife, but you thought about it!

John was worried, "I've got a chance to save my life in exchange for a house. I'm troubled by three or two sentences! Can I spare you? The second generation burned 300 square meters for me. I haven't had

time to settle accounts. Now another one comes out. Do you want me to spare the villa? My father is capable. Do you have a capable father? "

And the old man also saw that the tea vegetable government did not seem to be the same as other local governments. They could not control the tea vegetable hospital!

The old man "takeahike" is in a hurry. In Chinese, it means how far you get to me!

It's silly to lick the hook and hemorrhoids. He didn't understand. Looking at Ouyang, he wasn't a beautiful old lady. He couldn't be called good-looking.

Look at the old man. His fingers trembled and pointed at himself, trying to say: we are a group!

But before he could say anything, the old man stood up and pointed to the door. His face was purple. It was pale. He was worried and angry. It changed color, just like a round eggplant.

My face is green, really, like a cucumber all at once.

As you walk, you turn your head to see. As you walk, you turn your head to see. It's almost a tail. He was about to cry, "why is it so difficult to deal with people? In the past, let alone meet such a small Dean, even if you meet a larger leader, it is polite.

Why, why is it like this today? What have I done. Are you reasonable? "

He will be wronged.

Does he have a temper? Yes, but think about the income of foreign enterprises and the superior treatment at ordinary times. He endured it again and again.

William turned to look at Ouyang. The smile is so intimate. On the purple round fat face, there is a pair of yellow beard. It is really like a hairy big purple potato.

"I will abide by and respect the rules of your court! Just, help my child! "

Ouyang looked, "I was going to let you make an appointment, but your last sentence moved me. There are only those who cannot be saved, and there are no people who should not be saved.

However, you should be prepared for the medical expenses here. It is estimated that the cost is about the same as that of the top hospitals in Jinmao country! "

Ouyang thought, shall we have the same international standards? If he's too expensive, we'll follow the rules of the meatball country. Anyway, we can't see a doctor for our own people.

Ouyang underestimated people this time.

Originally, when Ouyang said that the price was expensive, William was mentally prepared. He wanted to invest a little.

Unexpectedly, Ouyang talked for a long time before he said something similar to the golden Mao country.

William's atmosphere is starting to breathe.

"Madam, dear madam, don't worry. I'll call in now. Ten million is not enough. I'll continue!"

Ouyang's eyes are green. Is this the legendary rich man?

It's time for our tea vegetable hospital to celebrate the new year today!

"Zhang Fan!" The old lady called Chen Sheng directly.

Excited, the money was like picking it up. At the beginning, he treated the big men in the capital. When people came to the emergency room to lie down, Ouyang had nothing to do.

Before long, William's children were arranged to enter the hospital.

Of course, the specifications are the highest. Because of the government's anti-corruption work, no one often lives in the special needs ward. Ouyang is distressed to see it empty. Now there are people.

There are eight nurses as soon as they are matched. They are all old nurses who are about to retire and can't run. Ouyang Meiqi's name says: these eight are the most experienced nurses in the hospital, and there is nothing richer than them.

William nodded with satisfaction. Of course, the salary is calculated by hour, just like the ventilator in ICU.

Several old nurses were moved to tears. When did we become so expensive.

Doctor, Zhang Fan took the lead, and then one by one in the hospital. All experts above the deputy high level participated in the treatment group.

"Disease, surgical treatment, internal medicine recovery! We must let your son recover! "

Ouyang asked the logistics personnel to put the instruments they couldn't use into the ward if they were expensive.

What kind of brain function instrument and lung function instrument are put on the ash machine at ordinary times.

The leader in charge of health, Khan, stayed. This is spent according to the amount of money in the card. How can the city hospital and a field hospital have a virtue!

William didn't feel inappropriate at all. Instead, he felt that the hospital attached importance to his children.

In his words, it is rich and hard to make.

Ouyang and Zhang Fan, it's great to spend money this time.

Doctors and nurses are treated differently. They eat eight bowls outside the hospital every day.

The old doctors and nurses in the hospital were crazy. "Can't Zhang hospital?"

The newcomers can't believe it. "Is our hospital so well paid?"

Chapter 1016

For the hospital to improve life, the on-the-job employees in the hospital have really seen Zhang Fan's strength for the first time.

Earlier, although Ouyang had taken office in the Health Bureau, everyone still felt that Ouyang was the boss of the municipal hospital, although Zhang Fan became the first executive vice president.

But many people always feel that Zhang Fan is dean Zhang. This is also a common problem faced by many trust leaders. After some leaders take office, they first pay attention to sanitation and environment.

Then start to establish prestige from small problems, which can achieve the effect of establishing prestige, and will not make many people resist when they first arrive, because they are all small problems, and there is no reason to object.

Zhang Fan doesn't have this idea or mind. This practice makes sense. When Lao Mao said that at the beginning of getting off the bus, many leaders began to take care of health after getting off the bus. This is a kind of knowledge that Zhang Fan has never learned.

Ouyang had planned to help him get on the horse and give him a ride.

In fact, the old lady was worried that Zhang Fan could not hold down the old directors of some departments.

As a result, Zhang Fan kicked the owner of the hospital canteen for the first time after becoming the first executive vice president.

Ouyang also knows that the food in the canteen is terrible, but she is not a surgeon. She can still eat out at noon.

Once in a while, she didn't feel so bad.

But surgeons are different. At noon every day, even dinner is delivered to the operating room by the canteen. Many surgeons eat like torture.

This is what Zhang Fan deeply understands. Therefore, after he took office, he didn't think much about anything. He directly used bidding to establish a logistics service company.

This time, Zhang Fan got out of the relationship that had not been moved for ten thousand years.

To tell you the truth, maybe other places don't know Zhang Fan, but the government system, especially those with some status, knows too well who Zhang Fan is and who Zhang Fan is.

Therefore, many people were waiting to see how Zhang Fan kicked them out, and then how to invite them back.

As a result, the aggressive canteen owner is gone forever.

Now, many people with ideas have stopped. Ouyang is quite proud. She thinks it's all because of her good teaching. In fact, Zhang Fanshi can't help the pig food in the canteen.

Then, after a series of actions from the municipal hospital, we got used to it slowly. The municipal hospital finally entered the era of Zhang Fan from the era of Ouyang.

Zhang Fan is never the same as Ouyang. He lies at the window all day. Like a spy, he secretly sees who is late.

He delegated power. I don't care if you come at noon or in the middle of the night. The operation of the Department and the patient number of the Department are not seen by anyone. When things come out, I will clean up your department director at the first time.

I can do it, but I can't do it. Replace me. I still train a large group of reserve directors behind me.

Therefore, there is no turbulence in the transition from Ouyang to Zhang Fan. Under normal circumstances, if you change the Dean, you must first run away a large group of people.

However, the municipal hospital did not move during the power transmission.

Then, the hospital will set up a graduate teaching point. Although we don't say it, we are still proud. Our hospital is not a simple regional hospital now.

Then, the branch was established, and Stan tuhao's medical treatment made everyone's income visible to the naked eye several times.

In the frontier in 2010, a resident doctor could get nearly 20000. To tell the truth, he didn't go to the bird market. Inpatients in major hospitals, including kickbacks, are in a mess, and they will die a little more than 10000 in January.

The resident doctor still has to be a senior resident doctor and prescribe medicine without conscience in order to get this number. As long as the doctors of tea vegetarians are serious, they don't have to be ignorant of conscience. Therefore, not only the doctors are happy for a time.

The local patients are also happy. Conscience hospital! Never write a big prescription.

Who wants to be scolded?

With fame, with profit.

The style of the city hospital was immediately different.

Then, rescue aircraft and various high-end equipment were filled into the municipal hospital one by one.

Moreover, with the entry of Dr. puwai, the laboratory that used to hang sheep's head and sell dog meat has finally run. In the past, this laboratory was just a decoration. Ouyang took it out to frighten the leaders.

In terms of idealism, the more prosperous it is, the more prosperous it will be. This is also Zhang Fan's Wang with the city hospital Wang.

When people feel that their current life and income are quite good.

Three island tyrants entered.

Good boy.

This time, the doctors and nurses in the city hospital are not used to it.

Xue Fei and Ba Yin are in the surgery lounge, eating eight bowls and chatting.

"Director Xue, you say we have eight bowls every day. After that, what if we can't eat eight bowls!"

Bayin, a little nurse, is a little fat. Although the mask makes a mark on her face, her mouth is not slow at all. Fish fillets in one bite.

Although the spicy food sucks, the high frequency makes Xue Fei not only speed up his eating.

The eight bowls are actually a kind of eating method brought in by my Qing Dynasty, which pays attention to four meat and four vegetables.

Because of the so-called serious gold family and the so-called old tribe that started in the Qing Dynasty, this eating method is quite popular.

Compared with the eight bowls in the mainland, most of the eight bowls of tea are beef and mutton and cold water fish.

"Your family has grassland. Your husband Xuefeng gives you cow tail every day. You haven't eaten enough. Slow down and save me some sand meat ~!"

Xue Fei talks a lot. When he starts eating, he wants to brag for everyone first. The food was slow. As a result, when he finished blowing the cow, everyone was almost finished.

Start working when you're full. To tell you the truth, sometimes you just eat some raw rice and a pot of cabbage with soy sauce.

In fact, doctors can eat it. Anyway, it's a working meal, but you can imagine your mood after dinner.

Therefore, in the past, in the operating room, the head nurse scolded the chicken flying and the dog jumping. Not only the nurse, but also the doctor, sometimes even the patient.

Now I eat well, at least I feel much better than before.

.....

The new master Yang Weidong came out of class and stood on his balcony, often looking at the endless virgin forest.

At sunset, the faint Golden Sunshine sprinkled in the forest. With the evening wind, the dark green leaves turned with golden light. In the rustling sound, the fragrance of the forest entered the room along the window.

Really, it's like living in a tree house in the forest.

"Little martial uncle picked a good place!" You can't call Zhang Fan little martial uncle in the hospital, but when you can't help it, you still call Zhang Fan little martial uncle.

"Yes, in my life, I never thought we could have such treatment. In the past, when you opened the window, it was the house opposite.

Now, open the window, it's the forest. You leave early in the morning. I don't know. In the morning, before the sun rises, the window is like a fairyland, with white birds crowing.

Husband, I like it so much. "

The couple snuggled together and quietly looked at the sunset.

.....

In the evening, Dr. Li Guanghai and his wife lay in bed. In the past, when there was great pressure, husband and wife life became a burden.

In a small rental room, everything is depressed. At the beginning, it was said that Dr. Li Guanghai's lover was short tempered. Lao Li told jokes to his wife to make his lover happy.

As a result, the wife didn't laugh. The picky neighbor next door laughed to death after hearing the joke.

Although it was a little exaggerated, it can be imagined that their environment had changed at that time.

This is also the reason why Dr. Li Guanghai's lover took the initiative to visit tea vegetarians, because big cities give her the feeling of suffocation.

When you get to the tea plant and face the forest, even if you want to shout loudly, except for the occasional cooperation of two or three little birds, the rest is the rustling sound of leaves.

The couple haven't been so relaxed for a long time and lie in bed.

Li Guanghai's lover leaned against her husband, "it's like I'm dreaming."

"Hehe, just like it. I'm afraid you don't like it. I think it's remote and there are few people here."

"Hey, hey, I've stayed enough where there are many people. Husband, I love you! "

"I love you too!" Lao Li is embarrassed. He is still a sage.

In order to resolve the embarrassment, Lao Li quickly changed the topic " How do you think about your work? "

"Hey, in the past, I wanted to leave school early. Now I have no pressure. It's a pity to leave school. Husband, do you think it's better for me to go to school or to the education bureau? "

Because Zhang Fan's relationship may be the relationship between the big calligraphy and painting in Ouyang's office.

This time, the channel of talent relationship was very large. Doctors used special talents to enter the establishment at the first time. And the families arranged better.

Li Guanghai's wife graduated with a master's degree in education. She is in magic capital, that is, in a private school. She is under great pressure day by day.

But when tea comes, people can speak directly. It's OK to go to key high schools, to the Education Bureau, or to enter the government. There are many choices.

In the past, I didn't choose to worry, but now I have more choices.

.....

In the laboratory of tea vegetable hospital, Zhao Yanfang hasn't finished work yet. People can become leaders not only by talent, but also by hard work.

Today, she is very busy, but she is very happy.

The people here are very simple. She seems to have returned to her college days.

In the morning, she went to the clinic for half a day, which was Zhang Fan's mandatory requirement.

In Zhang Fan's words, what kind of doctor do you call if you don't go to the clinic.

In the afternoon, she learned about the experimental project of cooperation between tea element and Marubeni in the laboratory.

With this understanding, we can understand the lights of thousands of families.

"The stall is too big. There are no serious experimenters on the tea side, so Zhang Fan hangs up, and the

others are all researchers from Marubeni.

Ah, how can this work? "

After reading the experimental records, the funds of the laboratory, and the funds, she still has to think about how to adjust and optimize.

.....

Zhang Fan's family, a little farewell wins a wedding. The couple had a tie. Zhang Fan is not comparable to Yang Weidong. He keeps exercising day after day. Thin is thin, but it's all tendon flesh.

Men and women are very strange. Men usually light a cigarette at this time, just like philosophers. Or just fall asleep.

Women are in good spirits.

Zhang Fan doesn't smoke, but he doesn't think about anything as if his brain is blank.

Shao Hua seemed to think of something. He put on the pajamas of Dika bear and jumped out of bed barefoot.

Then he took out the jade pendant of Laokeng glass sold for 800 yuan in the scenic spot. He also took out Guanyin, which Zhang Fan carefully brought back from the capital this time.

"Husband, where did you buy it and how much? I don't look as bright as mine! "

Zhang Fan didn't tell Shaohua the origin. But women, don't underestimate women's feelings. Shao Hua didn't care much about the gift Zhang Fan brought, so he worried about it.

Maybe women are all dragon changed. They really can't resist shiny things.

Chapter 1017

Tea is sweet in summer.

People used to eat and drink on time, so they attached great importance to the changes of seasons. With the changes of the times, it is not uncommon for people born in big cities to eat watermelon in winter.

However, you do eat watermelon, but the taste is hard to say. Often a few hundred dollars a watermelon may not be as delicious as a winter radish.

In July, Hami melons in the southern frontier entered the tea element. Because the Tianshan Mountain is tea element, they are all ripe Hami melons. He has a hemp skin body, but the flesh is golden. After cutting, the juice is as viscous as honey. The light juice flows slowly, which makes people salivate.

People in big cities can hardly see such mature fruits.

This kind of melon, not to mention eating, put in the house, can make the room have a faint sweet smell, absolutely no perfume can not match.

And it's not expensive.

The old people in the frontier seldom eat this kind of melon. It's too sweet. It can be said that you have to drink water to get rid of this sweetness.

Zhang Fan likes to eat. He often eats at the corners of his mouth. But I just love to eat. I really can't stop. This natural sweetness, like fried crispy in the mouth, comes suddenly and thoroughly.

A mouthful of Hami melon goes in, the nose is full of melon aroma, and the mouth is lingering with special sweetness. Really, I can't even think about it!

Also, Kur's early crisp pears are exported to Europe from tea, so tea is also the only area where Kur can eat authentic pears in large quantities.

This kind of pear is different from fragrant pear. The pear only receives fruit in six or seven years, and because it blooms early, it is often beaten by a late spring cold.

Therefore, there are not many people planting now.

But this kind of pear is definitely better than the fragrant pear known as the queen of pears. It pays attention to a crisp, landing from the hands of adults, and can definitely fall into pieces.

The moisture content will not be mentioned. If you bite a little bigger, it will definitely overflow from the corners of your mouth.

The most special thing is that this sweet aftertaste is a faint milk flavor.

This is Shao Hua's favorite.

William's only son operation is also scheduled in this fruity season.

In the past, this kind of operation had to be performed by Zhao Quanping, a general foreigner, and Lao Li, who had a liver and gall, and sometimes Song Ping or other deputy directors.

Lao Zhao, Lao Li and Song Ping, all of whom were born as ordinary foreigners, were not young, so it was very difficult to do such a big operation.

Many times, Zhang Fan has to accommodate them.

Now, martial nephews are here. In terms of the strength of ordinary foreigners, it is estimated that Zhang Fan is not included in the frontier. The ordinary foreigners of tea can be ranked in the forefront.

The first assistant of master Xu Yan's doctor disciple, the second assistant of Zhang Fan's disciple Ma Yichen, the third assistant of Yang Weidong, the main knife Zhang Fan!

Zhang Fan signed the operation notice.

Who knows, Ouyang made a rare call.

"It seems that the expenses of the three islands can't be spent!" Ouyang called Zhang Fan in a worried language.

"Ha ha!" Zhang Fan laughed.

"You don't know. I've thought of all the ways I should think of these days. It seems that I can't spend all of it. Don't you see his attitude at that time.

It's like, it's like sending beggars. Can you bear it? I'll show him how, and the money can't help spending.
"

Zhang Fan smiled and comforted the old lady for a while. Really, some people, money is a number to them.

Before the operation, William prayed piously in the ward.

Operation room.

Xia Yonghong, an anesthesiologist who is about to retire, helps the anesthesiologist director and a new

anesthesiologist.

The old lady's eyes are bad, but she is still quite experienced“ Xiaozhang hospital, thank you for letting the old woman have such a big operation in the last few days. ”

Call Zhang Fan Xiaozhang hospital. This is the privilege of the old doctor who had a good relationship with Zhang Fan when Zhang Fan just came to the hospital.

"I don't want to let you go. When you retire, I'll hire you back immediately. Don't go to a private hospital."

"Good, good, good, my old woman is waiting for you." The doctor, who was born as a worker, peasant and soldier, has been diligent in the hospital all his life and has a good reputation.

"Master, I went to disinfect!" Ma Yichen is calling Master Zhang Fan now. He is shouting very quickly.

"Go ahead. When you're free, take your martial brothers out more tea. After all, they're new here."

"Yes!"

Ma Yichen has made obvious progress this year. The young man is solid and honest.

After disinfection, put towel and cover film, the operation begins.

Disinfection is known to everyone, towel laying is also known, and what is the cover film.

In fact, it is a sterile PVC, which is actually a special plastic, which is directly pasted on the patient's place to be cut.

For example, to cut the belly, use this sterile plastic, such as girls' weight loss wrapped in plastic on their lower legs, and stick the plastic on their belly.

At this time, no matter how fat you are and how much meat you have on your stomach, all pull your skin tightly like pulling skin.

Zhang Fan took the scalpel and cut it directly without gestures. Many doctors like to rehearse on the skin to be cut with the back or handle of the knife before cutting.

Zhang Fan doesn't need to cut directly. The blade cuts across, because of iodophor disinfection, the skin is cash yellow, and the skin is tightened by plastic.

When the knife went down, it was like a lady with a mask and gently opening her red lips.

Under the support of golden iodophor and cream yellow fat, the red bleeding is particularly bright. With

the expansion of the incision, it is really like the gorgeous lips of the hell witch, slowly becoming larger, as if it wants to devour everything in front of it.

Although Xu Yan didn't have surgery with Zhang Fan, Zhang Fan's fame is too big for the school.

He is not only Lu's closed disciple, but also considered by Wu to be the most outstanding disciple of Qiu's new generation of surgical technology.

Therefore, Xu Yan also wants to see how his young and disgraceful martial uncle is better than his teacher.

Xu Yan had no idea of comparison since Zhang Fan started his knife.

First of all, little martial uncle was so decisive that he never hesitated to start and drop the knife. What surprised Xu Yan most was that martial uncle's anatomy was too powerful.

It's like knowing in advance whether the patient has a variant blood vessel. Almost every operation can avoid slightly larger blood vessels.

Absolutely no one else's operation, the patient's wound is like fireworks, showing bleeding flowers from time to time.

Besides, little martial uncle was too serious during the operation. Wheat colored forehead, frowning from time to time, even the footsteps of itinerant nurses in the operating room are light.

Looking at the little martial uncle's surgical wound, it was like a pile of red and yellow plasticine, without a trace of blood.

There are no empty scholars under the fame!

"Go into the abdominal cavity and wash your hands!" When Xu Yan was a little distracted, Zhang Fan said something dissatisfied.

Xu Yan quickly nodded with regret.

Relatively speaking, orthopedic surgery pays more attention to sterility, extracerebral surgery pays more attention to avoiding surgical injury, and general surgery pays more attention to adhesion.

To tell the truth, it would be terrible if the surgery of general surgery adhered.

In fact, after opening the abdominal cavity, doctors wash their hands with distilled water and remove the talc powder from their gloves.

Into the liver, Yang Weidong took the time to look at the operation clock. He entered the liver in ten

minutes and little martial uncle in ten minutes.

He wrote it down secretly.

Chapter 1018

Those who can follow Zhang Fan to tea are not salted fish. Xu Yan pursues further.

Whether in scientific research or treatment.

Yang Weidong is relatively simple. He pursued a leap in surgery.

Since I'm with little martial uncle now, I can't do the central tumor, so I'll do it well first.

After secretly remembering martial uncle's time, he decided to do it in the shortest time. Yang Weidong turned to look at Ma Yichen, and then looked at Xu Yan opposite.

Um! A gentleman hides his weapons in his body and moves in time.

Where there are people, there is competition, and where there are people, there is Jianghu.

How liver tumor surgery is done is difficult to describe.

If popular and refined, it is actually an apple that is broken and black. It seems a pity to throw it away. Well, the old people in the family usually pick up the knife.

In order not to waste, the knife will cut in circles along the black piece.

Of course, don't eat this kind of fruit in life. Really, you'd rather throw it away, rather not eat it, and don't cut off the bad. Eating looks good. In fact, this bad place is just an outbreak point. The whole fruit has long been polluted.

In liver surgery, doctors, like the elderly, should cut off the black and bad one, but not too much. Therefore, resection was started 1 ~ 2 cm along the extension of the tumor.

Although the liver doesn't seem to have much along the tumor for 1 ~ 2 cm, to tell the truth, if a tumor with a diameter of 5 cm is cut off and turned into a barbecue, people with a small appetite can't finish it. It's really a lump.

Entering the liver, everyone on the operating table began to concentrate more.

Zhang Fan takes an electric knife, Xu Yan takes an attractor, Ma Yichen and Yang Weidong take a small retractor.

The operating table pays great attention to cooperation, especially entering the abdominal cavity. Although this kind of excision operation is like opening the abdomen, it is not open.

That is to dig a hole in the abdomen of the human body. Therefore, where the knife goes, the attractor should follow at the first time.

Because at this time, it is necessary to absorb the burst blood at the first time to prevent the blood from blurring the vision, resulting in unclear vision and damaging the scalpel to other places.

In addition, the electric knife will emit the green smoke of barbecue all the time. If you don't smoke it in time, it won't take long for the abdominal cavity to be full of smoke, just like the children shooting in glass bottles during the Chinese new year, a bottle of smoke.

And the draw hook should also follow closely. At this time, the draw hook is like the dog leg of the scalpel. The scalpel needs to enter the liver. The draw hook is to break off the leg.

Therefore, although it seems that the assistant can't perform the operation independently, a qualified assistant can definitely make the chief surgeon's operation quite comfortable.

Really, it's no exaggeration at all. Surgery not only considers the quality level of a master knife, but also considers the assistant's familiarity with surgery, anatomy and the look of a doctor.

You're not familiar with surgery. You don't know what people are going to do next. The master knife with a bigger temper can scold such an assistant off the operating table. After all, there are not many superior masters who teach you by hand.

I'm not familiar with anatomy. The main knife operation was well done. As a result, if you don't pay attention, you pull the hook onto the artery, the artery is broken, and it's too late for the main knife to cry.

The wink, in fact, can also be said to be savvy. This is the most difficult, there is no place to learn, and it

is also one of the criteria for surgeons to succeed.

The simplest thing is that when a man and a woman fall in love, your object suddenly poses in front of you, either quietly or with a willow waist.

At this time, people either trim their hair or sell new pants and shoes.

If you have a good understanding, you will immediately find the problem, and then burst into a surprise, "ah, how beautiful!"

Whether the mouth is right or not, in fact, life is like this, and it also needs this occasional surprise.

Those with poor understanding looked up and said, "do you want to eat more?"

Although it's vulgar, it's probably similar to the savvy nature of doctors.

In addition to young doctors, a group of old guys have a mentality that I can't learn. Anyway, they can't fight any more than Zhang Yuan.

Most of them hold the mentality that they can't learn and look at it in vain, so this improved operation is really not fragrant inside the wall and fragrant outside the wall. Zhao Jingjin of the bird market and several hepatobiliary directors are drooling.

Zhang Fan didn't hide a little when he taught them. Teach your students, nephew, and don't hide.

Moreover, they are all ancestral disciples. They started with the liver and gall, so they learn faster than Zhao Jingjin.

Just when Zhang Fan brought a disciple to teach him to play music, the devil said Zhang Fan was a master of Shanghai's woodlouse and her celebrity father was flying towards the tea.

Boss Mishima was angry. Although he didn't say anything now, celebrities couldn't sleep.

Finally, after much inquiry, William took his child to tea vegetable surgery. Celebrities are going to visit with their daughters.

His daughter didn't want to. Her father said that she just didn't want to go to tea. The celebrities were in a hurry. They finally started with their daughter who had never touched a finger in her life. The girl who slapped her in the face was stunned.

"I'm trying to provide you with the best food and use the best. Now it's time to die. Why don't you be sensible! Now you see, if you don't go, you are an adult. In the future, you will live your own life, and I have fulfilled my obligations.

Go and have what you want in the future! "

The girl is not stupid. Although she was slapped, she didn't say she wanted to die or live, because she saw that her father was really anxious.

Wei wronged and her father made a plane to fly towards tea.

.....

"Note that there is a considerable difference in the relative volume between the left and right lobes of the liver. When entering the liver, be careful of bile leakage..."

After Zhang Fan entered the liver, he began to explain clearly to several people on the operating table step by step.

In fact, many things are almost the same. Often someone can explain the key and difficult points clearly. Zhang Fan never talks about skills and difficulties directly. Because he knew that his skills were hammered out through the system.

However, it may not be suitable for others. Especially in terms of technology, the vulgar point is to kill the pig and poke the ass. each has its own killing method. The elegant point is that the user is clumsy.

Clearly tell them the difficulties, and then let them think about it by themselves. It seems that it is not as fast as direct teaching, but once they understand it, the operation will have no difficulties for them.

For Zhao Jingjin in the bird market, Zhang Fan directly teaches them skills and lets them imitate, because others also want to be fast, and for his team, Zhang Fan must hope that everyone has his own expertise. Go hand in hand, flowers bloom is spring.

Some things are like this. Haste makes waste. Master Qiu's wise saying: slow is fast!

.....

"Your teacher doesn't agree with Dr. Zhang Fan here. Is he a martial brother! You go, wait for the operation, you go to contact, if you can let Dr. Zhang Fan accompany you to the ward is the best! "

Celebrities know that they have provoked Zhang Fan, so they let their daughter come forward to save some image in front of William.

However, he didn't know that their father and daughter had the same temper.

The female master hesitated to speak. His father is in a hurry.

The female master's heart was full of panic. On the way, she also knew the current situation of her

home.

She knew that if she was Zhang Fan, she would never give a good face. Even

Celebrities were also worried at this time. As a result, they all arrived at the door of the hospital, and his daughter said the original thing. Celebrities are almost crazy.

Originally, I wanted to settle things without spending money. Now it seems that I can't do without bleeding. He contacted a tea vegetarian who was also a broker.

"Let's talk about the hospital. Just give me face and let the hospital leaders accompany me around the ward. President Zhang can't, and so can other presidents! "

This is the person who eats by face. In fact, it is the same as what a friend of mine said.

With human affection, celebrities finally met Ouyang.

Ouyang knows about Zhang Fan in the magic capital.

Therefore, when introducing this man, Ouyang looked like Bao Gong.

"Do you think I'm free?" The broker who led the way was embarrassed to death.

He knew Ouyang was not easy to pester. He didn't expect to be so unkind.

His embarrassed hands were all rotten.

"I can donate to the hospital!" The famous people were sweating. He knew that if William could not recover his impression of him, there would be no future.

Ouyang was really open to money, and Bao Gong's face changed slightly, as if he could discuss it.

"How much are you going to donate?"

"50W ! "

"What, 50W, what should you do? I don't know. People hit 10 million on their account when they came in the hospital." Ouyang actually wants to shout and see if he can get more points.

Go around with me. What a big thing!

"200W ! " Sweat accompanied by saliva, the throat of celebrities wriggled up and down.

"500W!" Ouyang began to pick up the documents. He looked like I was busy.

Suddenly, celebrities seemed to see something, in a cold sweat. He kept blaming himself: "ouch, I'm dying, I'm dying! Today is a kick on the iron plate! "

A fox pretending to be a tiger has met a fox pretending to be a tiger!

"Five million is five million! Let Dr. Zhang Fan accompany me to the ward! "

"His ten million, my old lady is worth five million!"

Celebrities looked at Ouyang and trembled with anger. "It's too shameless, too shameless. No wonder those who hate you don't die are peers!"

He regarded Ouyang as a person like him.

.....

In the operating room, Zhang Fan dug out a large tumor on the child's head“ Ma Yichen, you take the tissue bag out for people to see, and then send it directly to the pathology department.

Yang Weidong, please write down the medical record. Later, we will test your model and simulate it with Li Guanghai on this case to see the success rate of your own animal experiment. "

After the tumor was removed, Zhang Fan began to explain.

"Zhang Yuan, your phone, President Ouyang's!" The plump Bayin who changed slightly after marriage took the phone to Zhang Fan's ear.

"Dean, what's the matter? I'm in surgery!"

"Hehe, I know. I didn't call you until the tumor was cut off. Let me make a long story short. Our international clinic has been donated by a rich man!

But I need to accompany him to William's ward. Do you think it's ok? If not, I'll give him no! "

Zhang Fan probably understood as soon as he heard it, because the old lady specially consulted with him. Then the rich man is ready to come out.

"How much did you pay? I asked you to move!" Zhang Fan didn't ask anyone.

"Five million!"

"Hehe, you're good! Five million in two steps. Dean, take two more steps after you get the money, but you must not be cheated. "

"Hey, look what you said, can I be cheated? All right, you have an operation! "

Both of them have a tacit understanding. They don't say who the rich man is. Anyway, it's a one hammer deal.

Chapter 1019

2010 may be the construction year of tea element, especially around the tea element hospital. First, a boss in Jiangsu and Zhejiang built a high-end community around.

As soon as I dug a shallow pit foundation, I began to advertise everywhere, such as what housekeeper style property, what prime location near tea, what is the first hospital in the frontier next door.

The day after William's operation, Zhang Fan went to Ouyang's office to discuss the postoperative expenses with Ouyang, as well as the charges in the international outpatient service.

After all, there is no precedent, and we can't catch it like William and Stan tyrants. It's like killing pigs. It's always impossible.

When he entered the office, he could not help nodding his head when he saw Ouyang holding a color page with reading glasses.

Zhang fanle said, "Dean, what good thing, so happy!"

The old lady lowered her head and saw from the frame of her eyes that it was Zhang Fan. The old lady happily took off her eyes and asked Zhang Fan to sit opposite. After all, he is a close person, otherwise Ouyang absolutely wants the other party to let him on the reception sofa and face the words on the wall.

"Hey, hey, these southern coastal people have brains and vision. They can shine in front of people's eyes when they do anything. Look at the advertising words of others. We tea vegetarians and local real estate businessmen should learn them well! "

Zhang fanle, when did the old lady start to pay attention to real estate. Take the color page from the old lady and have a look.

"Hey!" Zhang Fan feels embarrassed.

Because the real estate developer finally shouted the slogan that Ouyang was dead and alive, the first hospital in the frontier.

Zhang Fan put down the color pages. He was not so narcissistic as the old lady. "Dean, our international clinic is going to be renovated. This is what Secretary Ren and I discussed. Let's see what we need to add. "

Although Zhang Fan is a legal person now, when it is time to respect Ouyang, Zhang Fan is not vague at all. When Wang Mang's humility is not usurped, first of all, Zhang Fan's tutor can't make Zhang Fan an ungrateful person.

"I don't see. You're in charge now. Do it yourself. It's all your business to lose and earn anyway. How did you order the price? "

Although she said she didn't care, the old lady was happy to see Zhang Fan come for instructions. I didn't answer the document, but I still asked the price.

"In combination with the outpatient prices in Marubeni and the top three international outpatient prices in the capital, Secretary Ren suggested that our international outpatient general outpatient number should be 200 yuan, expert outpatient 500 yuan and designated expert 1000 yuan.

Some comrades think the price is a little higher. After all, our normal outpatient number is only three yuan for an ordinary number and eight yuan for an expert number. Here's the medical record book.

The price is so high, I'm afraid... "

"High? I think it's low. Are some comrades President Gao? " Ouyang squinted at Zhang Fan.

Zhang Fan has no expression.

"This smelly boy has understood three tastes!" Ouyang smiled in his heart.

Regardless, he then said, "can our normal outpatient service be compared with the international outpatient service?"

The normal outpatient service is subsidized by the state. Is there any international outpatient service?

Moreover, we are not an international metropolis here. The goal of international outpatient service is not to open for three years.

Don't be reluctant to decorate. How much people donate, how much we spend. In one word, it looks like there are more hotels than hospitals. "

Zhang Fan thought a little and nodded.

After all, I know the price of fuel, rice, oil and salt now.

Don't look like it's expensive to invest in various laboratories in the early stage. In fact, where is this? This thing is a gold swallowing pig. It has eaten almost hundreds of thousands in less than a month for the two current scientific research projects.

All the money came from the small treasury of the tea vegetable hospital. He wanted the government to pay. The government looked like he was dying. He wanted to ask the tea vegetable hospital for money.

Therefore, if you want to continue the research, you must have a profitable trading support.

"Although our place is small, it seems that everyone is ordinary people. For example, some enterprise bosses and some mine bosses. People have despised the environment of our hospital in front of me many times.

In the future, we can do this. All the special needs wards are torn off and changed into ordinary wards. The special ward is too cheap. It's cheaper than a better hotel. It's not worthwhile to accompany a nurse.

If you want a good environment, go to the international clinic. Especially for those who take a relationship, you have to find a way in this regard. "

Ouyang gives Zhang Fan advice.

An old family is like a treasure.

.....

The international clinic of tea vegetable hospital has begun to be renovated. To tell you the truth, it's really good to have money.

Everything is so grand that even the seats in the waiting area in the outpatient hall are leather sofas.

Lao Gao said in his heart, "sin!"

When the international outpatient department of tea vegetable hospital was renovated, the five-star

hotel opposite the hospital was also started.

William's son had a particularly successful operation. Because it was discovered early and young. Although he drank disorderly, he was still young after all.

Human body, really can't say. You take good care of yourself. You look like a 60-year-old heart and a 20-year-old heart. In fact, other things aside, as far as the compensatory capacity of an organ is concerned, a 60 year old heart is definitely not a 20-year-old opponent.

This is the advantage of youth.

After the successful operation, William waited for his son to wake up and spend the dangerous period of the operation, and began to build a five-star hotel at the first time. Moreover, he bought all the land around the municipal hospital he could buy.

Although the old guy seems to have lost his hair, his eyes are fierce.

.....

All the new doctors and nurses have entered the establishment, and even Zhao Yanfang has entered the establishment.

Zhang Fan's set of combined punches came down, and Zhao Yanfang was trapped in the intestinal tumor laboratory and couldn't get out.

Because there is a successful example of surgery, this kind of research is like a layer of paper. As long as we stick to it, we can open a hole and see the sky sooner or later.

This is magic. Now even if Zhao Yanfang doesn't intervene, she won't do it.

.....

At the weekend, Zhang Fan rarely didn't receive a call from throwing knife, which is also for a reason, because some special patients know which hospital Zhang Fan is in.

After all, tea is not the magic capital, not the capital. It takes a long time to see a doctor. After all, there are still a few people here.

Therefore, some patients do not need to contact the flying knife and directly come to tea vegetable for medical treatment, which also makes Zhang Fan's flying knife less.

As soon as I got home, I saw all four old people at home, with a sad expression.

"What's the matter, this is." Zhang Fan changed his clothes and asked. It's been fine these days. Nothing

happened.

When Zhang Fan asked for words, he actually clicked in his heart "They won't quarrel!"

Clearly know that their parents-in-law are reasonable, and their parents are tolerant people. But this expression can't be avoided by Zhang Fan.

Because this has never happened.

It is difficult for honest officials to stop housework. There is no way to be reasonable at home, nor is it a place to be reasonable.

So, once this happens, it's actually very tricky. Zhang Fan is more or less a person who has experienced wind and waves. At this time, sweat is slowly seeping on his forehead.

Zhang Fan asked, and then asked, "where's Shao Hua?"

At this time, Zhang Fan's mother said with a slight cry: "stone, we're in trouble for you!"

Zhang Fan was relieved.

"Hehe, what's the trouble?"

"You tell Zhang Fan, I have no face to say!" Zhang Fan's mother-in-law pretended to be angry and pushed Shaohua's father.

Shao Hua's father will have Zhang Fan's own father. Like the frosted eggplant, the two old men bowed their heads, smoked and didn't talk.

Especially Lao Tzu Zhang Fan, who used to be Lao Tzu. Don't even look at Zhang Fan.

"Don't worry, mom, don't be angry. Say something. I'm back!"

Zhang Fan calls his mother as his mother and his mother-in-law as his mother.

"Stone, we went to see the house some time ago!" Finally, Zhang Fan's mother spoke.

"Well, yes, what's the matter?" Zhang Fan sat down with a smile.

"Just a few days after we left, your father thought that this year's essential oil was cheap. Without discussing with us, they signed a purchase contract with other people in the village."

As soon as Zhang Fan heard it, he felt that there was not much to do. The original sitting straight body is lying on the sofa.

"Where's Shao Hua?"

"You don't listen to me!" Zhang Fan's mother is a little worried. When his eyebrows were on fire, he just thought about his daughter-in-law.

"Listen, listen, listen, OK, you say, I listen!" Zhang Fan smiled.

"As a result, I don't know why, the price of essential oil has been falling in recent days, especially some second-class dealers. After hearing that we signed the contract, they seemed to have negotiated it. The price has directly halved compared with previous years. "

"Oh, then sell it slowly. Wait, the price may rise next year."

Zhang Fan said with disapproval.

"You're right. That thing smells like volatilization. It won't be worth much next year." Lao Tzu Zhang Fan said angrily as soon as he heard that his son was not serious.

"It's not you..." Zhang Fan's mother thought that there was his father-in-law, so she didn't finish, and directly pushed her old man.

At this time, Shaohua came in. The two old men all looked at Shaohua.

Shaohua smiled bitterly and shook his head.

"Dad, don't worry. I'll discuss it with Zhang Fan. " Then he took Zhang Fan into his bedroom.

"What's the matter? You look anxious." Zhang Fan took Shaohua to sit down and poured him a glass of water. The girl's anxious mouth peeled.

"Dad, they signed a contract for essential oil with the people on the farm, about more than one million. I don't know why, this year's two dealers collectively pressed down the price!

We'll have to pay a lot of money at their price. I'm going to go to the bird market tomorrow, but I can't... "

Although Shaohua didn't say it, Zhang Fan understood what she meant.

"Who is this thing sold to! What are they doing with this? "

Zhang Fan waved her hand and motioned her not to worry.

Chapter 1020

There is a kind of gambling in the frontier. The vastness of the frontier is neither felt by people in ordinary provinces nor experienced by people in cities.

Not to mention the southern frontier, the endless Gobi desert, a single person here, is no different from a grain of sand.

The northern frontier is a little better. In many places, because it is far away from snow mountains and rivers, there are large areas of dry land that can't be seen at a glance.

This kind of land can't be turned into irrigated land. It's better to be flat. It's definitely not the land of loess high slope or Sanchuan. The gullies are like the land deliberately washed by children peeing.

A large area of such land in the northern frontier will not be planted because there is no water? To tell the truth, these lands are chicken ribs, and there are too many frontier lands.

This kind of land slowly becomes a paradise for fighting.

No one knows whether the weather will be good this year, so farmers don't like planting this kind of land, but the area of this kind of land is too large. Many, many people contract with farmers, ranging from 30 to 50 per mu.

Then we can contract thousands of Mu at a time. After sowing seeds, we don't have to care about anything. We don't need any weeding and chemical fertilizer, even soil fertilizer. At the time of harvest, kangmaiying, a large harvester, went in directly without storing it by himself. Grain dealers bought it on the ground.

As long as there is plenty of rain this year, you can make a fortune once. The grain planted in this land has more plant fiber, so the flour is especially strong.

There is an advertisement for instant noodles on TV. The noodles are like springs. In fact, the flour from this land is like this. A bowl of sliver, pattering and particularly smooth.

However, once the rain doesn't work this year, especially in spring, if you play a little for a few days, you'll lose a big son.

Moreover, with the development of large-scale agriculture in the border area, some second-class traffickers who dominate the market have slowly emerged.

It's actually pressing goods. Of course, these bullies dare not fry the main cash crops and staple foods. For example, big meat, who dares to dominate the plate, does not say whether to break the law or not.

If you dare to fire, the national war preparedness cold storage will release a little, and you will lose all your money.

In the early years, some people hyped mutton in the frontier. As a result, the frontier people ate mutton for more than half a year that year.

Therefore, these people hype some marginal ingredients. Even without these ingredients, people can live as usual, but they just lack a little taste.

For example, mashed garlic is cruel, and Jiang Youjun. Of course, the level of this local tyrant is very high. It is said that it starts with 100 million units.

In the border areas, the scale is not so large. They also dominate the plate, such as sheep skin and sheep intestines.

In 10 years, because of Shaohua manor, many people around followed suit and planted lavender.

Why is lavender in China not famous. First of all, this thing has no mass base in China. Because it's too blunt, Chinese people don't like it very much. Many people sneeze at the smell.

But European and American people like it. Even the essential oil of this thing is called liquid gold in Europe and America.

Imagination is enough. How much body smell it needs to be suppressed with this thing.

In the past, no one used to be the dominant dish of lavender. First, the output was too small to pay. Second, I was afraid of losing money. If foreigners don't want this thing, it will really fall into their own hands.

As a result, unexpectedly, the production of lavender abroad was reduced this year. At this time, the people who dominate the market were excited and could make some money. So I hurried to the farm.

Upon inquiry, the Shaohua family bought all the essential oils.

Can you bear it?

They think the old farmer has no channels and no funds. After stretching him for a few weeks, they can eat the old farmer's belt and bones.

Therefore, big dealers and small dealers began to reduce prices and reduce prices uniformly.

This thing is not a traditional Chinese crop, and the state will not intervene at all. And such a small amount is too small for the country.

But for an ordinary family, it is a disaster without top.

.....

When people get old, most of them love money and children, just like Zhang Fan's father-in-law and father-in-law.

Although Zhang Fan's income is very good in their eyes.

But the two old men still have ideas.

For example, Shao Hua's father thinks that his daughter doesn't work now, so he thinks about how to make some money, so that his daughter can't be too dependent on her son-in-law.

It's not that the son-in-law is bad. It's also a natural sense of crisis among Chinese people.

And Zhang Fan's father, in fact, is almost what Zhang Fan's father-in-law thinks.

My son has a family now, but his old girl is far away in the magic capital. The cocoa of a girl's family has no place to stay.

And with Zhang Fan having a house in magic, the old man felt he could do it and buy a suite for his old girl.

After this shooting, the two old men decided to buy it.

When the farm was filled with lavender, everyone was full of confidence, but looking at the mountains of lavender, everyone was very nervous.

As soon as the two old men are willing to buy, it goes without saying that everyone is more positive than one. Because I haven't planted this thing for many years, I'm worried about whether it can be sold or not.

Anyway, Lao Shao is a farmer, and his son-in-law is still the president of the municipal hospital. He is not

afraid that Lao Shao will run away. So everyone sold them all.

It's really a pity for parents all over the world.

If it weren't for the children, they all had wages. Although they couldn't eat and drink, they still had no pressure on survival.

At the beginning, the two old men were ready to make a fortune. As a result, when the barrels of essential oil were moved into the house, the two old men were a little nervous.

Then he hurried to find the second dealer who bought essential oil.

As a result, the second dealer cut the price in half. I asked a lot. The price was lower one by one. It was really a bolt from the blue.

Old, old, let the old man feel as heavy as a thousand.

Two people settle accounts, millions.

To tell the truth, the old men have lost a lot of weight these days. Really suffered.

Don't talk about the position of parents. Let your old woman complain every day and watch Shao huaman run around the world.

Really, it's too late for the old man to cry.

"All sold to France." Shaohua and Zhang fan are talking in the bedroom.

"Can't you digest it on the border?" Zhang Fan asked puzzled.

Because Lavender ads seem to be available at stations and airports. Isn't it very good!

"Hey, less than 10% of the domestic digestion is used by Uighur and Kazakh people. Han people can buy some dried flowers as pillows at most."

"Oh, so it is. I'll do something. Don't worry, everything has me. " Zhang Fan wanted to ask some bosses of the bird market to see if they had any way.
