

## Chapter 1021

Doctor, it seems that I know a lot of people. People seem to be very extensive. In fact, an ordinary doctor, that is, an ordinary person, may not be better than others.

For example, when an energetic person comes to see a doctor, people don't look for an ordinary doctor, they go directly to the dean.

However, when it comes to the position of a knife, whether it is a knife from the municipal hospital or a knife from the county hospital. Once outstanding, the situation is different.

This is the time for quantitative change to qualitative change.

As for Zhang Fan, needless to say.

However, Zhang Fan doesn't think about how to find a relationship. Zhang Fan won't do things that are difficult for others. He knows that as long as he gives out the wind, let alone his own essential oil, it is estimated that the whole tea vegetable essential oil can sell at a high price.

But it's against my conscience. And it doesn't pay!

"Ha ha, brother, what are you doing recently?" Zhang Fan calls the winery owner in bird market.

"Zhang Yuan, ha ha, I'm not busy. What else can I be busy, either in the vineyard or in the winery. What's the matter? "

"Do you know the manufacturers of lavender flavor?"

"Well, there are a few tea vegetarians, but they all make a small fuss. The quality is average. Do you want essential oil? I have some better ones. If you don't want much, don't inquire. I'll have someone send them to you. "

"No, I'll ask. A relative in my family has some essential oils. "

Zhang Fan didn't say he had essential oil. When it comes to their own essential oil, it is estimated that they will accept it directly.

"Hey, you asked the right person. My French partner is engaged in this. The essential oil used by my wife is sent by others. Wait, I'll call and ask. "

After hanging up, Zhang Fan said to Shaohua, "OK, I heard. People know France. Wait for the news. Don't worry."

"I'm not in a hurry, mainly the two old men."

Out of the bedroom, Shaohua told the two old men about the situation, and the two old men felt a little better.

.....

Bird market, "the quality of Chinese essential oil is not good. Our essential oil is distilled from flowers. Your essential oil is distilled from flowers, leaves, flowers and poles.

We don't usually accept Chinese countries unless we really lack them. When did you get involved in essential oils? "

The French partner said to the winery owner.

"OK, just go and have a look. If you can take it, take it. If you can't take it, I'll pay for it."

"Who, the relationship between the government?"

"No, just an iron man. All right, go and have a look. Just do me a favor. "

Zhang Fan called before they had finished their meal.

The winery owner was very efficient. Soon, he called Zhang Fan back. Said someone would come to see the goods tomorrow.

Lao Tzu Zhang Fan's eyes on his son are different. I want to boast, think about the trouble I caused, want to admit a mistake, and think again that I am his father.

So the old man and Zhang Fan drank an extra glass of wine.

It was Shao Hua's father-in-law who was very guilty and wanted to say something. As a result, Zhang Fan interrupted, "it's all one family. This is what I should do."

"Yes, yes, who does it if he doesn't!" Lao Tzu Zhang Fan continued.

Although it is said that my heart is sweet and astringent, I really feel that my son is old and I am old.

.....

Big heat and small heat kill mice.

Chinese ancestors summed up the life experience of various integrity early.

Quark County, the county where Zhang Fan assigned jobs when he just graduated.

Zhang Fan, they can even arrange work after many years of distribution, which can be regarded as a bragging talk.

There are many hydropower stations in the mountains of chasu County, including state-owned, enterprise and even private ones. When someone told Zhang fan that the hydropower station was private, Zhang Fan didn't believe it.

Several days of heavy rain, flash floods. Before the rainy season, it is said that relevant departments reminded these power stations to reduce the water volume in advance. But several private hydropower stations promised verbally, but actually they didn't discharge water.

The government's officials did not know whether they were busy or what was going on, nor did they implement it.

As a result, after continuous heavy rain, the small power station is afraid and can't stop it. Let alone make money, the dam may be destroyed. It's like pushing the multi bone NOMI card to the first card.

Everyone began to discharge the flood. Originally, the hydropower station had the ability to resist floods. As a result, when the disaster turned into a man-made disaster that day, the disaster was amplified.

The people downstream were unlucky.

In the early morning, everyone went to bed early because of busy farming. The old man who slept lightly seemed to hear horses coming down from the mountain, rumbling, and the bed board seemed to be shaking.

The more you listen, the more wrong you listen, "no, the flood is coming down."

The shoes were too late to wear. He pushed his wife around him, shouted to the children in the next house, and ran outside the house.

The newly harvested wheat and the houses near the river are like paper paste. In front of the flood, they

are fragile and can't even enter the paper shell.

When the sky was slightly bright, the villagers stood on the highlands and watched their homes turn into swamps. It was too late to cry.

Grassroots cadres, shuttling through the crowd, kept shouting: "look, look, look, everyone in their own family is not here, everyone is gathered together, look after the children, take good care of the elderly, and don't walk around. The rescue team is coming soon. Don't be afraid. Everything is under command!"

Crying and shouting are like boiling water in the crowd.

To be honest, there are few floods in Northwest China, but the government holds drought and flood prevention meetings every year before summer.

But this time, everyone did not expect that the rainfall that should not have been a flood caused a flood.

While everyone was celebrating their new family, there were bursts of painful groans in the crowd.

"Erhu's daughter-in-law is going to give birth. It's all red!" The older woman shouted to the grass-roots cadres in the distance.

The heads of grass-roots cadres are big.

"Can you hold on, the rescue team is coming!"

When the village head is looking forward to hearing what he wants to hear.

However, what came was a curse: "can your ancestors and those who gave birth to children persist? Do you think it's Farting! Do you want to hold it back?"

"Who will deliver the baby? Who will deliver the baby?" The village head, college student and village official shouted in the crowd like crazy.

However, no one will. Although some women and children have three or four, they are all delivered in the hospital. This thing really can't.

Moreover, this is a village, not a pastoral area. If you say something bad, sometimes in the pastoral area, you are really not afraid of this thing.

But the planting area is different.

"Ah, it hurts me, ah! Tiger, I can't!" The pregnant woman's original due date has not yet arrived. As a result, she was scared and red.

A pregnant man, sweat on his head. Trembling hands holding his wife, his eyes full of anxiety. The endless flood can't get out.

"What to do, what to do!"

"The road ahead was cut off, and the rescue team who would be there for a while and a half couldn't get in. We have to find our own way! "

As a result, another pregnant woman in the village was fine. When she saw the situation of Huzi's wife, her stomach began to ache.

One wave of injustice, another wave.

Let the already chaotic scene become more chaotic.

Tiger son gnawed his teeth and wanted to hold his wife to the hospital, but there was a vast ocean in front of him. How could it be!

"Come out a few men and I'll take the lead. Anyway, these are our children. Whether we lift or resist, we should also find a way to send our two big stomachs to the township health center."

The village head stood high with his teeth clenched and shouted.

Before long, several strong men stood up.

Although the men's families don't want their men to go, they can't say how they want to stop the pain of the tiger's wife.

Can only keep telling their own men, be careful, be careful.

Tiger's mother knelt in the mud and kowtowed to the rescuers.

Two door panels, eight or nine men carrying pregnant women chose to save themselves.

It takes a lot of trouble to put your feet in and pull them out on the muddy road.

Really, on the narrow sheep farm path, several men really walked forward on their stomach.

After turning over two mountains, the path in front of us turned into a swamp.

To tell the truth, sometimes, in times of crisis, the precious of human nature can be revealed.

The village head took the lead in jumping into the water.

The men clung to the door panel and walked against the water like lifeboats.

"At present, the people in the village are high and there is no danger, but now there are two pregnant women who are about to give birth and must be sent out."

The leaders in charge of rescue are big. It's really fatal.

"What should I do? What to do! "

"Come on, there are helicopters in the city hospital!"

.....

In the early morning, the stars are still falling, and Zhang Fan is still sleeping. The phone rings!

## **Chapter 1022**

The phone call in the early morning is the most disturbing. If it is related to pregnant women, it is even more worrying.

When Zhang Fan got on the phone and heard that two expectant pregnant women couldn't move forward and backward in the water, his heart began to bang.

In the past, when he was not the Dean, he was a conductor of such things.

What are you going to do. When to go, how to go and who to let go do not need to be considered by yourself. Even if you send yourself out, you don't even have to worry about surgical instruments.

In fact, it is not easy for grass-roots presidents, especially in troubled places.

For example, tea is an eventful place. Since Zhang Fan became the Dean, he realized why Ouyang's face was wrinkled and why he was like the grumpy prairie Flathead. He was either quarreling or on the way of quarreling.

Because the region is too special.

It is not only on the border, but also has a vast territory and complex geographical environment. There are many famous families and many occupations.

From hunters who have no fixed place to herdsmen who live with water and grass. There are border police who don't even have license plates.

Ordinary diseases don't matter, but these people who didn't see them in the past often will give birth soon in their mothers, and then ride a horse to suddenly jump out and bring you a painful rolling pregnant woman.

What are you afraid of? Obstetrics is afraid of accidents.

That sounds contradictory. Can you set a specific time for having a child?

It's true that we can't determine the specific time to have a child, but it's because having a child is the biggest accident. In order to change this situation, the state from pre marital physical examination to subsequent pregnancy examination, and even Monday examination, is to reduce all kinds of accidents.

However, many people may be due to income or cognitive problems, that is, they don't do pregnancy tests and don't come to the hospital until they have a baby. It's hard not only for yourself, but also for doctors.

To tell you the truth, this thing is not buying lottery tickets. You can't just choose a machine. It's a matter of one corpse and two lives.

It can be said that this is deaf and dumb students, which is more dangerous than drunk driving.

"What's the name of the pregnant woman? How old is she? Is she from the pastoral area? Have you done the pre pregnancy examination?"

Zhang Fan shouted to the phone while dressing.

"What's your name and age? Don't worry, just two pregnant women. They won't admit it wrong! Hurry up, if you let the water flush..." "The caller didn't know whether it was intentional or not.

As soon as Zhang Fan heard this, he was almost foaming at his angry mouth. What a fucking layman.

If you have a name, you can take a look through the medical record of pre delivery. If the fetal position is correct, how is the child's development? The most important thing is to see if it can give birth naturally.

If there is no pre delivery inspection, at least we can predict whether we can have a smooth delivery from the age.

As a result, someone said, you can rest assured!

Moreover, he thought that everything would be fine if the plane flew over and connected the pregnant woman. No matter what he did, life or death was the matter of the hospital.

Can Zhang Fan not worry! In the International Forensic Medicine report, it is clearly stated that when the female reproductive age is 25 ~ 29, the maternal and perinatal mortality is the lowest.

Moreover, you can't touch pets during pregnancy, because many parasites on pets can lead to fetal malformations and stop development.

Zhang Fan now asks whether it is a pastoral area, which is the problem.

To be honest, these words contain a lot of important confidence. You let a layman be the leader. Either the leader was scared to death, or the doctor was killed.

One has to die anyway.

"What's the matter? Is there an emergency?" Shaohua was also awakened by the phone. Vaguely, she had to get dressed and get up.

"It's all right. You can sleep a little longer. I'm leaving! " Without enough time to talk, Zhang Fan went out with his pants.

While walking, I called the emergency team in the emergency center.

"There are two pregnant women. The specific situation is unknown, but the environment is bad. Who is the second-line obstetrician now and is ready to make a rescue plane."

Zhang fan arranged while running.

"Second line obstetrician, deputy director Li!" The general leader on duty gave the main information back to Zhang Fan at the first time.

"Who else?" Zhang Fan hesitated a little and asked again.

It's not that director Li's level is not enough, but that director Li is too old and in poor health. If he is in obstetrics in the hospital, people sitting in the Department is a sea god needle.

If you move your mouth and command the young doctor, you can make mother and son safe.

But this kind of emergency, too old, even running with bumps, whether the old lady can save others is a problem.

"And Dr. LV Shuyan, she has just had an operation!"

"Don't worry about it. Let Dr. Lu get ready and start right away. Let the operating room and obstetric center send several male nurses. "

Before long, the superior called.

The helicopter has started. After Zhang Fan shouted and shouted back a few times, the plane flew towards the location of pregnant women under the driving of soldiers.

Aircraft is no longer an expensive means of transportation for ordinary people. Sometimes, air tickets are cheaper than train tickets.

If the plane is bigger, it will feel a little uncomfortable when taking off and landing. It's still comfortable when flying flat.

But helicopters, and military helicopters, are not comfortable.

First, there is noise. When you talk face to face, you look at the opposite mouth moving. You don't know that she eats gum.

There are bumps. There are excuses on the road that the road is uneven. Is there uneven air in the sky?

If the plane hadn't been parked in the hangar of his own building, Zhang Fan suspected that these goods had stolen his new plane and replaced it with an old one.

When the sky was a little fiery red that day, Zhang Fan and they finally arrived at the place of the incident. The rescue plane looks big outside. In fact, it is decorated with rescue. In fact, it can't do a few people.

Because of the first rescue, Zhang Fan was worried and got on the plane.

Looking down from above, soldiers in orange life jackets rushed forward against the water in the vast ocean, like sitting on leaves.

To tell you the truth, there are too many things for soldiers in the frontier. We should be able to swim in summer, recognize avalanches in winter, and throw stones accurately at ordinary times.

It's really hard.

People who have been to the frontier know that once they enter the Tianshan Mountains, it is too difficult to build roads. Many sections are one-time. Therefore, the third brother is most afraid of building high-grade highways and large reservoirs in China.

Once we can gather quickly and rush down from a high place, the truth is the same in both modern and ancient times. Also, opening the gate to discharge water, or intercepting and diverting the road can scare him to death.

Therefore, the Chinese nation is not afraid of the old three. Sometimes they don't even care about quarreling. It makes sense to talk about the past seven or six years.

Especially on the north side of Tianshan Mountain, the poor countries on this side have become pants, so the roads are general. Once the flood flushed, there was no way to leave, let alone run the car.

But there are people inside. They can encounter debris flow at any time. What should we do.

If the Chinese medical can stand up and scold, but the Chinese Army really can't scold!

"Send a team to pick it up! We must not let two big bellied women have an accident. "

The local army leaders gave orders directly.

That's the northwest. If it's in the south, it's estimated that the door panel can't stand.

It's hard to walk in the river.

Where the water is deep, the soldiers must take a boat, and where the water is shallow, they have to jump into the water and carry the boat.

The flood like yellow mud soon turned a group of boys into clay figurines.

It's really difficult. The boys shouted and walked forward. Whenever they wanted to cross the shoal, the veins on their faces and blood vessels on their necks would burst immediately.

Moreover, as they tried to move forward, there was a sound in the walkie talkie.

"Speed up, big belly. They're stuck in the mud. Come on, speed up! Time is life, come on! "

I didn't ask whether your way is easy or not. Can your boat go forward.

In a word, a command to speed up!

"Go!"

The platoon leader took the lead in shouting. Although there were only a dozen people, their momentum was no less than a thousand troops.

When Zhang Fan and his men arrived at the scene of the incident, the troops also arrived.

The villagers pushing the door dare not walk in the middle of the water. They can only walk along the water flow on the side of the mountain.

As a result, I got stuck in the mud halfway. I couldn't walk, climb, climb out.

On the two door panels lay a woman who didn't moan very much. The dark red blood stimulated everyone.

Really, to tell the truth, what is really called "not every day" and "not working".

Especially erhu, his wife reacted strongly. The pain twisted on the door panel. She couldn't curl up together because her stomach was too big and her sweat was like rain.

"Er Hu, help me, Er Hu, it hurts. Mom, help me!" There was no trace of blood red on the woman's pale lips.

Holding his wife's hand, erhu can only cry helplessly. He could only say in a tone that he didn't believe: "hold on, hold on, we'll be in the hospital right away. Just hold on. "

When a touch of orange and green appeared in front of them, to tell the truth, not only the two tigers, but also other villagers felt like they had escaped from death.

"The people's Liberation Army, we are here. Let's stay here! "

Soldiers just waved, because marching in the mud, the air sucked in was like a knife, cutting the lungs.

I really saw my relatives. There is no more pro color than this touch of green.

"Come on, glucose, drink some glucose first. Hold on, the doctor will be here soon. " The army health worker came with a first-aid kit.

The voice fell, and the sound of the propeller rang through their heads.

The plane with flashing lights finally arrived.

Unfortunately, there is no place to land.

"Pregnant women have obvious bleeding. One of them has broken amniotic fluid. I won't deliver the baby!"

The health workers cried at the walkie talkie. He could do gunshot wounds, blast wounds and knife wounds, but he couldn't deliver children. He couldn't wait to slap himself. He regretted that he didn't take a good turn in obstetrics and gynecology at the beginning.

"What now?" Zhang Fan asked the pilot while telling the health worker about rescue in the walkie talkie.

"Pregnant women can hang up by hanging!"

"No, they can't help it now. We must go down and make a decision after seeing the situation. "

"Use the droop implement. I guess you won't either. You can only be tied and hung down. "

"OK, hurry up and find a way to send us down."

After Zhang Fan finished, he began to prepare first-aid drugs and small oxygen cylinders.

At this time, no one found that LV Shuyan's face was pale, her legs trembled slightly, and her eyes tried not to look down.

### **Chapter 1023**

After the safety rope is tied. He turned his head and saw that LV Shuyan, like a patient with endocrine disorders, had no popularity on his face.

Looking at LV Shuyan with a blue light on his face, Zhang Fan shouted, "what's the matter? What's the ink? Get ready quickly. What are you doing here? "

In China's medical industry, there is a saying that women are men and men are donkeys. Especially under special circumstances, who cares whether you are a woman or not, and who cares whether you are coming for a holiday.

What to do, what to do, not so much attention.

"I'm afraid!"

As soon as Zhang Fan listened, he looked down and saw the surging river. To tell the truth, he was also afraid!

But the pregnant women who roll and beg below are afraid of what to do. Right now, don't you go down if you're afraid?

It's no use. Who made her a doctor.

If it's a trauma, she doesn't have to go down, but in obstetrics and Gynecology, Zhang Fan really doesn't dare not let her go down. The technology industry specializes in people's words. Whether Zhang Fan's obstetrics and Gynecology system is turned on or not is not a joke. One corpse has two lives.

If normal childbirth, Zhang Fan must have no problem, but this kind of unprepared childbirth, but also because of a frightened pregnant woman, a careless massive bleeding, really even if there is a rocket, it's too late at this time.

"It's okay. It's safe. It's safer than making a roller coaster. There are so many people and soldiers below. Even if the rope is broken, people can catch you!

"I'll go first and serve you as a meat mat! "

Zhang Fan was worried and began to talk nonsense. The crew turned their eyes to Zhang Fan and said to LV Shuyan:

"Don't worry, it's all right. It's a matter of closing and opening your eyes!" In fact, this one won't persuade people.

No way, just a gynecologist. She can't do without. Shaking like a chicken with a plague.

Tie LV Shuyan firmly like a pig. The tears on the girl's face are left quietly, just like the lotus with dew in the morning. It's really pity.

Zhang Fan pretended not to see it. Gritting his teeth, he said to the crew, "I'll go down first. She must go down!"

With that, he couldn't care whether there were sad eyes behind him. He closed his eyes and grabbed the rope. What he thought was more heroic, or more exciting, more heroes.

Just like on TV, the special forces dropped rapidly from the plane. How handsome.

Zhang Fan is also ready to take a breath and be brave. Don't be too ashamed to shout out.

As a result, it's not exciting at all.

Directly took a simple elevator, and the crew on the helicopter slowly hung Zhang Fan down.

Then, I heard a sharp cry like killing a pig, "ah, ah, ah!"

LV Shuyan was also sent down.

In fact, fear is that at the moment of leaving the cabin, the plane is very stable in the air. After all, it is a world-class helicopter.

Getting off the cabin is no different from taking the elevator. It's just a little wind and water.

But LV Shuyan really shouted from beginning to end. When he was about to reach the water surface, Zhang Fan saw the girl's eyes closed tightly and her face leaning against the rope, just hanging her voice.

I don't know. I thought it was something.

When Zhang Fan and the villagers came forward to help LV Shuyan land, the original scream increased several tones. Zhang Fan's eardrums are buzzing.

It's a pity not to be a soprano.

"Landing, landing, you're safe, don't shout!"

People around looked at the female doctor with surprised eyes. If the situation was not urgent, it was estimated that some people would have stood up and doubted her medical level.

When LV Shuyan opened her eyes, she was put up by several people, because her legs curled up and wished she could curl up into an egg.

Maybe I feel embarrassed, maybe I think Zhang Fan is hateful. When my feet fell to the ground, I twisted Zhang Fan's arm hard.

Screw it, who makes himself the Dean! You have to take responsibility.

The male nurses in the back were much more agile and came down one by one.

After LV Shuyan went to the ground, she made a slight adjustment and began to check.

Childbirth, this thing is very difficult to explain. If you drop your schoolbag, it will fall.

In fact, if it is popular to say, childbirth is actually a child who has to pass through a narrow iron fence.

The iron fence is the pelvis.

Some children first run their heads through the iron fence, then their shoulders, then their bodies, and finally their hips, and still curl up together, just like a way of yoga.

Hold your hands together and curl your feet together like a small meat ball. This is the first exposure. This kind is relatively easy to produce.

But there are many kinds of head first.

For example, if a little fart child is dishonest, his face rises, just like looking up at the stars in the sky. This is the first to show his head, the first to show his face.

There are also those who show their foreheads first, just like those who lie on the wall and peek at other people's big girls.

A formed by pelvis and uterus is actually like an elongated rubber pipe with a metal buckle stuck on it.

The uterus is a rubber tube and the pelvis is a metal buckle.

Generally speaking, as long as the child's head can pass the metal buckle, he can have a natural birth.

This is why the doctor does not measure the biparietal diameter of the child during the physical examination. In fact, it is to see whether the size of the head can pass through the metal buckle of the pelvis.

At this time, the mother is also preparing. The pelvis will be stretched and the ligaments at the pubic symphysis will be elongated. That is why after a woman gives birth, her hips are particularly round rather than young hips.

The child is also preparing. He seems to know that if he changes his place to mix, his body will shrink together, and then he has to aim at the direction. With the wriggling of the uterus from inside to outside, the child is squeezed out with a breath.

If children who grow up in rural areas are expected to realize that the moment a hen lays eggs is actually quite like childbirth. This is smooth.

Some people say that children who give birth naturally have a strong sense of direction. It is estimated that they also come from this place. You can't aim. No matter how you induce labor, you can't get out in the wrong direction.

For example, if the face comes out first, sometimes it will damage the child's cervical spine. At this time,

the doctor will put his hand in and press the child's neck back in the birth canal.

It seems that the face wrinkled into a small rag is still showing off? Then the little boy shrunk his head and gave birth naturally.

Some little children don't, they lie on their back. And stubborn, I will lie horizontally, and I will come out horizontally. If you don't adjust the position before delivery, you can only have a caesarean section.

There is also a little fart child. He is also in a good position and has a suitable body size. If he doesn't learn well, others are dragons around his waist and he is dragons around his neck.

When the child is in the mother and fetus, he transmits nutrition by the umbilical cord. His lungs do not expand. In fact, he swims in it like a fish.

Fish have no hands, but little children have hands.

He felt boring in his mother and fetus, kicking his belly and scaring the doctor with his hands. What do you want to play? Then he took the umbilical cord and began to wrap it, wrap it.

Some of them are not one lap, but three or four laps. I don't know whether he wants to get a bib with a cold neck or just looking for trouble to scare his family.

Some kids are even more powerful. They either stretch out an arm first, as if they were polite, and shake hands with the doctor, or stretch out a foot, as if they were trying to see if it was cold outside. Can you go in when it's cold?

"Come on, you go to the pregnant woman in the back. She can give birth naturally. I'll take this. It's a little troublesome!" At this time, the command was in LV Shuyan's hands.

Zhang Fan didn't bring the male nurse of his own hospital, so he took the company's health worker away. Open the venous channel, oxytocin and oxytocin come one by one.

Although the health workers can't deliver children, venipuncture and binding pregnant women are more sneaky than the nurses in the hospital, because there is no fixed place, a few pig hoof knots are particularly beautiful.

Zhang Fan doubted whether this guy was a hygienist or someone who specialized in cleaning the battlefield and capturing the enemy.

Simple tarpaulins, soldiers and several villagers are like pillars, carrying oil steps on their backs.

This is an oasis of life.

"Come on, work hard, come out, come on, come out, the child's head is out. Come on!" At this time,

Zhang Fan put his hands under the pubic symphysis and anus of the pregnant woman.

This is to prevent the pregnant woman from using too much force, resulting in tearing.

In fact, at this time, what Zhang Fan did was the midwife,

And LV Shuyan is in trouble.

"Cry, cry, you just know to cry, cry again, don't talk about you, your children can't live. Shut up. Listen to me. When I say take a deep breath, you take a deep breath. When I say your anus is hard, you give me hard work.

If you understand, nod to me! "

LV Shuyan roared like a roaring dog. Then she turned her head and saw a tearful man standing next to the pregnant woman.

"What are you doing? What are you looking at? Get out of here!"

You're welcome at all, but the effect is particularly good. For a while, the scene is calm.

"Try and bear it! Hold on, I'll tell you now. If you don't hold on, I just want to give you a caesarean section, and I can't do it. Now I can only rely on you, someone, and press her for me! "

What is cruelty? LV Shuyan has a hand. Even if she is a woman, she is also an adult. One hand and arm are stuffed into the soft birth canal, and then she keeps trying to change the child's position.

As long as we try to get the child's head out first, it's safe.

But this transformation is really not easy. First, the uterus is full of amniotic fluid.

This action is actually that you want to fix the ball floating in the bathtub with one hand in the bathtub. The action can't be too big. It's too big for pregnant women.

Little boy, I don't pay attention to you at all.

Although LV Shuyan kept roaring in her mouth, she knew her mood from the sweat on her face.

At this time, to tell the truth, the life and death of adults and children are all in her hands.

She didn't think about anything. She didn't think about anything. She just thought about how to give her head to him!

**Chapter 1024**

I'd rather die an official father than a beggar mother.

This is absolutely reasonable. Although there are many people who marry late and have children late, they give a man a baby. Even if there are all kinds of milk powder, he may not be able to take it.

Let's not say that in October of pregnancy, the bone opens ten fingers, but that feeding once every two or three hours every night can make men crazy.

The originally gloomy sky slowly became thicker and thicker.

The woman's original high cry of pain was also fully weakened. It was not that it didn't hurt, but that she could hardly cry out.

You can imagine, for example, if you are constipated, you will feel uncomfortable if you plug a mannitol, or simply let others put their thumbs into your nostrils.

The reason is the same. It hurts very much, and it's not the special skill of cutting, and it hurts as if your intestines were pulled by someone.

"Husband, husband, I can't! I'll give you the Lin family. You must treat my children well in the future. " Women feel as if they are on the verge of death, with pale lips and eyes trying to find their own man.

Two tigers squatted in the water with their mouths covered outside, crying like dead leaves in the wind.

"Pass on your mother's eggs. You haven't been born yet. It's no use calling your husband. Now you can only rely on yourself.

Come on, the baby's fetal position is right. Come on, come on, work hard. "

At this time, on the door plate not far from the next door, the maternal finally gave birth to the child. It was meat. From head to foot, it was like a slightly purple child, like a lotus root, which was dug out by Zhang Fan.

It is estimated that human babies are the most vulnerable mammals in the world except giant pandas.

First, clamp the umbilical cord connecting the child and the mother with hemostatic forceps, and then quickly clean the meconium and fetal fat in the mouth like a candle.

Then the little boy probably felt uncomfortable and began to cry.

Cut the umbilical cord and tie a knot. A beautiful little flower appears on the baby's navel. If someone's navel doesn't look good, it's definitely the level of tying by a midwife or doctor. Navel paste piaji a paste.

A green surgical towel! Although Zhang Fan hasn't brought any children, he still does it very quickly.

LV Shuyan has not been in the operation dressing room for a long time, because she can't compare with Zhang Fan who secretly cries. At this time, although she was sweating on her face, she insisted in her eyes and her steadiness was definitely a qualified obstetrician and gynecologist.

"No, she's out of strength. Zhang fanlai, come and press her stomach!"

LV Shuyan also heard the baby crying next door, so she shouted loudly.

Zhang Fan ran this way and said to the male nurse, "pay attention to heat preservation and observe the placenta."

And while running, he took off his bloody gloves.

Entering the delivery room blocked by the tarpaulin, Zhang Fan and LV Shuyan looked at each other. LV Shuyan's eyes were full of anxiety.

"Come on, the child is out. Work hard." After finishing talking to the pregnant woman, Zhang Fan gave LV Shuyan a firm look.

In obstetrics and Gynecology, when the conditions are not good and the maternal is out of strength, there is another auxiliary way, that is, pressing the stomach.

Although rolling the belly with a rolling pin in TV or novels is a little exaggerated, pressing the belly is also a way of auxiliary production.

Above the navel and below the mammary gland, there is just a depression in this place when the pregnant woman holds her stomach.

When contractions begin, the midwife stands on a table slightly above the ground, then his hands intersect, his fingers cross, and his fingers stick to the raised belly. The big fish muscle and the small fish

muscle sink in this depression.

"Come on, I asked the doctor to help you. Let's work hard. The pregnant women next door began to feed their children. Soon, you're the only one left. Come on! "

Then Zhang Fan carefully observed the pregnant woman's expression. Uterine contraction is actually like a wave. Wave by wave, there are peaks and valleys. When the valley is low, the pregnant woman's pain will weaken.

When the peak, the pain will intensify.

When pregnant women feel pain, Zhang fan starts to press down hard. How strong is this? Zhang fan can say that almost the weight of his whole body is here!

"Ah! Ah! " The pain of tearing below and the pain of stomach above. Finally, when the woman was about to take off, the child's head like a beer bottle was finally seen.

"OK, OK, take it back. Zhang Fan, pull it off quickly. Don't pressure."

There are about three stages of normal female production.

Slow fetal movement, this time women will have pain.

Then enter severe pain, at which time the uterine contraction accelerates.

It's like a car on the highway from the city.

Then, when the child enters the soft birth canal and is about to be born, the uterine contraction immediately begins to slow down.

In the old days of midwives, this was the most dangerous time. Midwives who didn't have more than ten children dead absolutely didn't understand. She will definitely shout: "come on, come on, come out, the last time, come on!"

As a result, the child came out, and then the maternal bleeding instantly.

Because of the strong force, the placenta fell off like tearing human skin, and then the blood vessels on the placenta and uterus flowed out like a fountain.

At this time, it should be slow, slow, and then the placenta is still attached to the uterus. It is normal for the placenta to slide slowly like the soil on the label after the child is fully delivered.

LV Shuyan pushed the child's stick head with one hand and the pubic symphysis of the pregnant woman with the other. So, squeeze and squeeze, finally, when the child's shoulders come out.

Just like a fish, it slipped out smoothly.

Because the labor process is relatively long, compared with the child next door, the child is like a purple radish, "lack of oxygen!" There's no time to tell, and there's no need to tell.

Zhang Fan clamped the umbilical cord with a pair of pliers, and LV Shuyan pulled off the mask with her index finger like a hook and stuffed it into the baby's mouth. Then LV Shuyan bowed her head and wrapped the child's nose and mouth.

Another two finger knife, press directly on the child's heart and press gently.

After three mouthfuls of oxygen, the child finally relaxed. The limbs dance like fat lotus roots.

When the first golden light came out of the sky that day, the child cried, the child's mother cried, and the child's father cried more.

The soldiers standing in the water nest quietly blocked the wind and rain for the born child with their solid backs.

"Saved! Saved, two pregnant women successfully gave birth to two healthy babies! " In the county government, there was a lot of jubilation.

It's really a joy from the bottom of my heart. If one dies today, the board will play from beginning to end.

Other things, such as missing, can be conditional, but it's an iron rule that matters to pregnant women and newborns.

Shi Lei, President of quark county hospital, looked at a group of big men with envy and said softly, "it's a pity we don't have a plane!"

## **Chapter 1025**

The morning sun was so warm that Zhang Fan and LV Shuyan, who had been soaking in the water for several hours, felt a little cold at this time. In particular, the white hair sweat after tension, when the wind blows, feels like wearing a plastic suit.

"It's finally better now. I've just frozen to death. I have to take a hot bath before I go back to work!" LV Shuyan didn't look at Zhang Fan either. She just seemed to be talking to herself.

It's estimated that she was still angry. When she got off the plane, Zhang Fan yelled at her. But now he is

a hero, and Zhang Fan doesn't care much.

After the two pregnant women were fixed on a stretcher, two male nurses couldn't come up and there was no place.

Zhang Fan looked at the crowd under the plane. In fact, he wanted to say, "we can take a bath and rest now, but the children below are still soaking in the water. I don't know how long it will take."

A group of green faces, slightly like bean sprouts, remind them that they have just come of age.

But after turning around to see the greedy sucking child lying beside his mother and the loving maternal face, Zhang Fan also felt very proud.

People, in fact, that's it. If you don't pay attention to her, she's still worried. When you pay attention to her, she will despise you.

When Zhang Fan looked at the children, LV Shuyan sitting beside him didn't know what to think. He whispered, "are you hungry, too?"

.....

Early in the morning, when Zhang Fan and his colleagues entered the sky over tea, the people at work were already on the way to the unit. The car called for people to shout, which made Zhang Fan, who had just returned from the mountains, immediately feel that they had entered the world.

Xue Fei also saw the helicopter in the sky. If she couldn't see it, it wouldn't work. It was too big. It was half full of color bars. Moreover, Ouyang strongly asked to stick the name of the hospital on the plane. The old lady didn't know what to think at that time.

Are you worried that the government will borrow it and not return it, or are you worried that the pilot of land airlines will run away? Anyway, the plane is flashy, just like a big Mercedes Benz, S-class, which feels very long when you go back to your hometown in the new year.

Originally, he was a domineering president. As a result, the owner, like Ouyang, was deeply afraid that others would not know that the plane was hers, and then hung a couplet directly on Mercedes Benz.

That's the feeling of tea Su's plane!

Xue Fei also bought a car now. He bought a Tauren Highlander. Now he is closely following Zhang Fan. Ku Luze can't afford it, so he bought a Highlander.

Of course, even if you can afford it, you can't buy it!

"Look, look, look, this is the plane of our department. Look, it's more than the plane of the 20th division, that is, our plane is not armed!"

Now he drives to work by himself and brings along the neighbors of other units across the hospital. Of course, the fare still has to be paid. This guy plays very well.

Several people had to, pretending to give face, raked on the window and looked at the plane.

"Where is the plane?" Asked one of them!

"Oh! I let them go out and fly around. It's bad for the machine! " Xue Fei's Cowhide is blowing. In fact, he also muttered in his heart, why did he go? Why didn't anyone inform me in the Department!

In other words, several people around us are kind people. If you encounter a mean person, in a word, my relatives will get married next week, can you let the plane fly!

Back to the unit, Zhang Fan took a bath. He was a little dizzy and didn't sleep well. After fighting with Shaohua for a long time, he slept a little late. As a result, he was called up in the middle of the night.

But he can't slack off. There are a lot of things today. First, he has to sign a contract with the hospital in coal city.

In the early stage of negotiation, Ouyang took the people of the government to negotiate with the leaders of coal city, but now the signature must be handwritten by Zhang fanqin.

Also, the anorectal laboratory seemed to have found something a few days ago. Zhao Yanfang proudly informed Zhang fan that the main meaning was actually to want money.

Zhang Fan also wondered, "why don't you ask for small balls? You don't have a brain. How did you get admitted to the doctor?"

There are still a lot of things to worry about. When he was about to leave work yesterday, director Li of the Medical Insurance Bureau called Zhang Fan and said implicitly: "Zhang hospital, the drug ratio of several departments is a little too high!"

This is for Zhang Fan's face. Zhang Fan has to deal with this matter today.

"Lao Chen can't. this guy will only help the doctor cover up the evidence. Director Gao, director Gao is going to the government meeting today. Let's forget Secretary Ren. It's a little too heavy for the second leader to come forward. Let Lao Ju go! He loves doing such things, too. "

Zhang Fan is doing what he wants to do today one by one.

Before long, Chen Sheng came, "Zhang Yuan, why didn't you take a rest? I just learned that you had an emergency again last night."

Chen Sheng said as he made tea for Zhang Fan.

Normally, a vice president makes tea for the executive president every day. It's estimated that the vice president will be disgraced. But Lao Chen is not. It's nothing.

As soon as he said it, he would say, what Dean? My boss gave me a hat. In fact, he is still the director of the medical department!

Lao Ju can't learn from him.

"Zhang Yuan, I have another thing to tell you. The international annual orthopaedic conference was held in Lianda this year. I sent you an invitation. On August 1, if you go or not, I'll give them a reply."

"In previous years, they were all abroad. How did you choose Lianda this year?" Zhang Fan wondered.

"It's estimated that the big guys are like eating even big dumplings!"

Lao Chen smiled and amused Zhang Fan.

"Even if it's abroad, it's too far. Since it's at home, you can reply to others for me and I'll participate."

"OK!" After making tea, Chen Sheng took a notebook to record.

Don't go after recording“ What else? "

"You can also bring an assistant. Originally, you wanted to let the president of the high court go. You also know that the government is inseparable. You brought other orthopedic people, and President Gao felt uncomfortable!"

"Hey, what do you mean!"

"I'll go with you!"

.....

Cheer up, Zhang Fan has been busy all morning. I also went to the urology department to have a prostate operation.

In the afternoon, it was almost time to get off work. Zhang fancai remembered saving two pregnant women in the early morning.

He turned to obstetrics when he was going home.

Hospitals, all departments, have no vitality in obstetrics. Really, people's feelings are particularly obvious.

Don't look at the little nurses yelling in the obstetric corridor, "nine beds, say you. Let's hurry up and walk after you lose your fluid. Where do you sit?"

"Can you feed? You choked the children." An unmarried little nurse grabbed the child and taught a pregnant woman who had just given birth how to feed her!

However, both patients and their families are listening attentively.

Young dads who have given birth to children, carrying milk bottles, can't help smiling from time to time.

Young husbands who have not yet given birth either listen to their wives' scolding, or get told by the nurses, or rub their hands outside the delivery room and listen to the screams inside.

However, this environment made Zhang Fan calm for a moment.

This is full of vitality.

"It's all right. You go and help yourself. I'll take a look at the pregnant women admitted to the emergency department this morning." Although Zhang Fan said so to the doctor on duty.

Of course the doctor on duty doesn't take it seriously.

"Very good. It was windy and rainy in the morning. After the two children went to the hospital, they didn't even cough. They ate, slept and ate, but they were healthy!"

"That's your good work. With such a serious and responsible attitude, I'll tell your director and give you some bonus!"

Zhang Fan also said something funny.

Although Zhang Fan spent a short time in his time as a little doctor, he also experienced it. He knows the

heartache and suffering of the little doctors, so sometimes what people care about is not what their superiors are like, but one or two warm words.

Zhang Fan learned this from Lao Gao.

Not only the doctor, but also the nurse accompanied Zhang Fan to the ward of the Department. Before long, the deputy director of Obstetrics and Gynecology also rushed back. She just got off work. Before she got out of the hospital, the people in the Department called.

"Director, the dean is here. Here comes Zhang Yuan! "

The first deputy director of gynecology and the second deputy director of obstetrics are in charge of the four departments. The chief director is usually in the outpatient department. Then the two deputy directors change their roles every six months.

"Zhang Yuan, both children and adults are very good!" The deputy director hurried over.

"Look at you. Why are you back from work? I'll take a look. Go home and cook for your husband and children."

Zhang Fan said to the deputy director who came.

"Hey, look at what Zhang Yuan said. Take a moment and stand at attention. I still understand. The child is at Grandma's house, and the couple of my family make their own living in the canteen. I usually eat some fruit at night without surgery. "

"Hey, it's also difficult for you. Some families can't care about it, and some children can't manage it."

Really, Zhang fan can only say so. He can't help anything.

In her position, only by doing everything possible can she get to the top. Several deputy directors, who spell the best, who has the best chance to climb to the top. Otherwise, years of efforts will be wasted.

There are always several hurdles in medical treatment, from interns to residents. It is always a hurdle whether you can be hospitalized from inpatient to attending.

A ridge from the subtropical high to the positive high. If everything goes well and you get on the position of deputy director of the Department, then this is the time to worry for a lifetime.

Really, this position is too difficult. You should not make the director feel that you are a threat to him.

Zhang Fan chatted with the deputy director and went into the ward.

It was a double room. Erhu's wife struggled to get up when she saw Zhang Fan.

"Lie down. How do you feel? "

"Everything is fine. Thank you, doctor. If it weren't for you and Dr. Lu, our mother and son would be fine." The woman's eyes turned red.

"This is our dean Zhang!" The deputy director immediately explained.

"This is what we should do. If we want to thank those soldiers who helped you keep out the wind and rain!"

"Also thank the government. Our hospitalization expenses are given by the county government!" Erhu touched his head and smiled. People are happy, and the young man smiles more and more happily.

"All right! Have a good rest. " Zhang Fan saw the child and was ready to leave.

Pregnant women can't see it. The deputy director is there.

"Dr. Zhang, oh, no, Dean Zhang, I want to thank you. You must give me a chance! "

## **Chapter 1026**

Give me a chance!

This kind of words, whether a man says to a woman or a man says to another man, have a slight flattery and humility.

However, when Erhu said this today, there was no resentment in his heart, not only no, but all sincerity in his eyes.

Special events, but also special luck! Therefore, he felt that he must thank and repay these children's life-saving benefactors. The PLA can't find it, but the man in front of us can still express his mind a little.

When Erhu said this, the deputy director of Obstetrics subconsciously wanted others to go out and close the door! It seems that eating, drinking, gynecology and obstetrics are right at all. They have subconscious actions to drive people.

If Chen Sheng came today, the old guy would be a man. Not only would he not cover up for Zhang Fan, but also let the people of the hospital newspaper write a report on how clean Zhang Yuan is.

Because he knows very well what ordinary people like erhu can give, so he doesn't have to worry at all. There is no need to cover up. He knows Zhang Fan too well. Therefore, instead of covering up, he might as well give Zhang Yuan a good name.

Zhang Fan looked at the deputy director a little nervous and gently pulled her arm.

"I understand your intention. We will try to complete what we should do. We should also try to abide by the rules and regulations we should abide by."

Zhang Fan smiled and said to erhu. After that, he also saw obstetric doctors and nurses.

In all departments of the hospital, only the obstetrics department clearly receives things. For example, when someone gave birth to a child, he sent a basket of eggs wrapped in red paper and gave birth to a healthy fat child. When the parents were happy, they sent a box or two of Red Bull.

What other eight treasures porridge and flowers are known by the hospital management, but they can only turn a blind eye. If such a thing happens in other departments and is known by the director, he will definitely point to the doctor's nose and scold: are your eyes so small?

"Don't worry, hehe, I know. I'm a cook. My cousin works as a cook in xiaosanchuan at the back door of the hospital. I want to cook a meal for you, some doctors and Dr. Lv.

Don't dislike it, and don't dislike it, doctors. "

As soon as Zhang Fan listened, he wanted to refuse. As a result, people said, "this is my little intention. I hope you don't..."

To tell the truth, there are not too many people who want to invite the dean to dinner in a class III hospital, one of the top hospitals in the region.

However, looking at erhu's simple and honest appearance and sincere expression, Zhang fanslightly hesitated.

At this time, the pregnant woman also said: "Dr. Zhang, you can't see other things we send, but the child doesn't have you and Dr. Lv. Today, our mother and I are both..."

After that, he wiped his eyes, and then said, "my husband's cooking is still delicious. He can cook when he works as a cook in Chunjiang tide in the south.

Let him cook a meal and thank you for me and the children! "

After a while, LV Shuyan also came in. She lived in the dormitory. Originally, the Department called and she didn't want to come. As a result, she hung up somehow. She didn't want to do anything.

When she came to the door, she heard the words inside. It seemed that Zhang Fan didn't want to. She didn't want to " Director, our department hasn't invited the dean for a long time. How can we let it go this time! "

People don't arrive, the sound comes first!

.....

Xiaosanchuan restaurant, Zhang Fan hasn't come for a long time. When he was single, he often came to dinner with Li Hui. How to say this restaurant? It pays attention to a big fat and meat. It's fun to eat once in a while. To tell the truth, it's hard to eat every day.

At this time, erhu was already busy in the kitchen. He said hello to his cousin early, and the ingredients were ready.

In fact, he is a cook in the south, and the restaurant he works in is large enough. However, he only cooks one dish, lion head, that is, big balls.

It is not easy to live in the capital, nor is it easy to work in the cities where two tigers work. The house price is one price a year.

Therefore, I originally thought that I would go back to my hometown to have a rest by having a baby this time, and then open a restaurant in my hometown. Just in time, today I have the opportunity to let the doctors in the hospital taste it and see if there is a market for their own products here.

After all, when his lion head was in the south, it was a middle-grade dish.

.....

Zhang Fan felt inappropriate with a group of women's army. Doctors and nurses in obstetrics and gynecology are tough on weekdays. They can't be alone at this time.

So he informed Chen Sheng.

"Sounds like you're making ingredients like balls!" Chen Sheng listened to the voice of the kitchen and

whispered to Zhang Fan. In fact, I don't think so. What's delicious about the balls!

If Zhang Fan is a foodie, Chen Sheng is a foodie. There are several seasonal dishes on the table.

Before long, bowls of lion heads were brought up.

When the lid of the bowl is lifted, the heat comes out with the aroma.

In the small soup bowl, a green bamboo shoot was pasted on the lion's head slightly larger than his fist.

"Eh, your practice is also novel. You don't see any oil and water." Chen Sheng said curiously.

"Hehe, please have a taste and see if it suits your taste!" Erhu was slightly restrained, wiping his hands with a towel.

Lion's head, big balls, to tell the truth, there are practices everywhere, but Zhang Fan doesn't like it very much. This thing is actually steamed stuffed bun filling.

When Zhang Fan picked up chopsticks, erhu said, "Doctor Zhang, this lion's head is convenient to eat with a spoon."

"Well, you can sit down and the owner is standing. Our guests can't eat well!"

When Zhang Fan picked up the spoon and dug into the lion's head, he felt a little different.

Feel, Zhang Fan's feel can't be fooled. He said that his taste buds can be fooled, but the feel can't be fooled. Let's not say whether it's fragrant or not. First of all, the feel is different from other balls.

Because when Zhang Fan's spoon touches the lion's head, the first feeling is soft. Like tofu, it is definitely not as tough as meat.

When a spoonful of big balls came into his mouth, Zhang Fan knew that erhu had some skills.

The slightly hot balls went into the mouth, and the light soup brought a delicious smell from the tip of the tongue to the root of the tongue. Then, after going up, the meat bullet and glutinous rice made a particularly perfect combination.

There is absolutely no greasiness of ordinary balls, and there is no sticky teeth of ordinary balls.

In fact, this lion head is very exquisite. Because it's an ordinary dish, it's not easy to make special dishes. Big balls, to tell you the truth, people with children are expected to do it.

But erhu's is different. The choice of meat must be tender pork, seven thin and three fat, and there must be no tendons entangled in it. Many people can't do this first step.

People think that without meat tendons, there will be no strength. In fact, it is not.

The second step is to chop meat, which is also quite exquisite. Most family members make meatballs with meat grinder. People cut more and cut less, that is, they cut meat very little when they cut it, and they don't have to cut it with a kitchen knife in both hands.

The main ingredient is meat, and the auxiliary ingredients are also quite exquisite. We must add fresh ingredients.

Then there is the meat ball. The meat ball can't be together without starch, so many people pour starch melt water into the meat when making balls.

The prepared balls are torn and torn like cheese pizza without saying anything else. They are pulled constantly. It tastes like a word, sticky.

It's very simple for people to group meat. Adjust the starch water, gently dip a little on the palms of both hands, and then try to group meat. At most, there is a little starch on the surface of the balls, but there is no starch inside.

Pinch the ball, flatten it slightly, fry it gently in the pot, and it is slightly yellow.

Then there is steaming. You must put some bamboo shoots in the bowl, which is not only good-looking, but also heat-insulating.

Steam over high fire. After an hour, half a bowl of oil and water will float in the bowl. Use a large straw to absorb oil and water so that there is no trace of grease in the bowl.

Then comes the pot.

To tell the truth, this kind of ball is really delicious. It is as tender as tofu, but it is more fragrant than tofu.

Not only did Zhang Fan eat delicious food, but even the chattering female doctors and nurses stopped talking. Because it's delicious. This kind of soft tofu like meatballs with clear meat grains is not greasy in the mouth, but it can make you feel the full burst of fat and protein.

"Zhang Yuan, if the boss wants, we can open a window in the canteen and let him be a lion head!"

Chen Sheng is addicted to eating, which makes a big eater think about it. It can be imagined that this lion head really has real kung fu.

In fact, to tell the truth, these people don't know that the restaurant where erhu works is actually very famous in the large rural areas of the south.

.....

Shao Hua is preparing to receive French essential oil businessmen at home. The girl is also worried. There are French translators in the halls all over the world. Of course, Zhang Fan doesn't worry about these things.

Because he is ready to attend the world orthopaedic annual meeting. Such invited experts should prepare their own speeches.

Maybe we'll have an observation operation. Zhang Fan is also a little itchy to compete with orthopedic giants all over the world. In fact, he didn't particularly expect the annual meeting of ordinary foreigners.

First of all, the international general foreign affairs annual meeting is generally not held in China, and foreigners are also chicken thieves.

For example, outside the brain, such as outside the heart, people will come. But ordinary foreigners will never come.

Because the Chinese nation is too strong.

There is a reason why Zhang Fan has no expectations. For Zhang Fan, the general foreign affairs annual meeting is like a school party. On the podium, either uncle or uncle is a teacher. Most of the bosses below are senior brothers. Even if they are not senior brothers, they can have a relationship with their own school.

So, there's really no novelty.

And orthopedics can't China?

In fact, it's not. Orthopedics in China is also powerful, but it's not the most powerful in the spine, but China uses a lot of orthopedic instruments and consumables in a year. This kind of annual meeting is not organized by a hospital or several doctors.

These are organized by large equipment manufacturers or manufacturers.

Zhang Fan wants to be bad this time!

## **Chapter 1027**

He often travels on business or has sharp eyes. For example, in the mall, he can judge any young woman who passes by him. Such a friend will definitely find one thing.

In airports and high-speed railway stations around the world, especially in the golden season of tourism, there will be better. Either they are young and beautiful, they are students at first sight, or they are more active little girls among students, or workplace beauties will hold a sign that says, XX Science annual meeting.

Of course, there are no railway stations in general!

Annual meeting, many industries or units have annual meetings. After a year's hard work, the boss gave some money to make everyone happy and happy.

The annual meeting of the medical industry is different.

Such annual meetings are often based on regions. For example, East China and South China. Of course, big cities such as the capital and magic capital are just like cities under separate planning. People are from their own cities and play by themselves.

Holding such meetings requires money and scale. They are generally sponsored by major pharmaceutical enterprises at the world level, and the whole process is five-star standard. Even the students who pick up at the airport are those who study well and grow well in major medical colleges. If they can enter large hospitals in the future, their wages are about 300 yuan a day, which is also considered to warm the stove in advance.

The invited doctors are almost all department directors or academic leaders of the hospital.

The sponsor will contract a hotel in advance, and those with rich money can even contract a scenic spot. It's no exaggeration.

Can the annual meeting at this level produce any results. It can be said that 90% of them are bragging.

Gold owners boast about their products and doctors boast about their level.

Zhang Fan doesn't know. He's famous too fast. He hasn't waited for everyone to reflect. Zhang Fan has become a figure on the podium. According to his normal age.

At his age, he went to the meeting with his mentor or director at most. Then sit at the bottom of the meeting and applaud others and listen to others' boasting. Some credits at most.

I haven't experienced it, so Zhang Fan still attaches great importance to the international annual meeting of orthopedics. It sounds like the name is particularly big. In fact, in recent years, the name has been worthless. Anyone who has some money dares to make a global international, that is, no one has been found on the alien planet. If someone has been found, people dare to call the whole universe.

Zhang Fan also wants to listen to the reports of orthopaedic experts from various countries. So, and I began to prepare materials.

In the past, it was too difficult to prepare this information.

After all, it is a grass-roots hospital. Many papers are issued. Because of the professional title requirements, you can't get a professional title without a paper. Of course, in terms of water papers, China's medical industry may not be worse than other industries.

There may be SCI, none.

So, if you want to ask, no one can ask. It's different now. Don't talk about others. Zhao Yanfang is the boss here.

Zhang Fan wandered out of the office to the intestinal tumor laboratory. Of course, this woman can't see that she's begging her.

Others are good teachers. This woman is a good mocker. If you go to consult, her eyes and tone make you feel that you shouldn't be human.

However, if you pretend to discuss with others, if what you say is wrong, she will point it out to you immediately. If you think what she says is wrong, she can explain it to you quite seriously, from beginning to end.

And in order to convince you that you can listen to her, she will never despise you. It's so strange. In Zhang Fan's words, is this the hobby of intellectuals?

In fact, Zhang Fan also concluded that if Ouyang was brother Pingtou of the grassland, she would be the third brother of the grassland. Anyway, she is not a good person to meet.

The anorectal laboratory is much more lively now than before.

The pill country made a lot of money on tea. When Zhao Yanfang didn't come, the doctors in the pill country were laughing secretly.

Because they have gone to China more often. It's too early to say. After the normalization of the relationship between China and Marubeni, these grandsons cheated many things handed down by the Chinese ancestors with a little money.

When they just sent a small number of doctors to tea vegetable, they and Zhang Fan had several operations and immediately proposed to expand the research. Not only expanded the research, but also added funds, and the affiliated hospitals of Jingdong University and the University of Tokyo also sent scholars to participate.

In China, there are two or three kittens. Ma Yichen is the one who knows the experiment best. So MARUKI is very happy.

Technology, which gives you an achievement and allows you to apply it, is different from every step from failure to success.

In order to paralyze the tea doctor, Ouyang asked for the equipment of a top-level department, which was promised. Ouyang asked for a lot of money, which was also promised.

When Zhang Fan and Ouyang thought they were taking advantage, marukuni didn't know how to celebrate.

As a result, Zhao Yanfang came! Now the meatball country quit. They think this is Ouyang and Zhang Fan's plot.

At first, he assumed that he didn't understand anything. Then he cheated the money and equipment, and turned to an expert. Meatball countries are crying. How can people do this? Can't they be more honest in their dealings!

Marubeni protested that Zhao Yanfang was not a doctor of tea element. At the beginning, the contract clearly stipulated that non tea element doctors and Marubeni doctors should not participate in the experimental project.

Just then, before Zhao Yanfang could decide whether to stay in the tea vegetable, xiaowanzi made trouble.

Then sign the contract!

Talking about science and technology and experiments, Ouyang is indeed not the opponent of Marubeni and Zhao Yanfang.

However, when talking about personnel and contracts, these people in Marubeni and Zhao Yanfang are not Ouyang's opponents.

Change hands, Zhao Yanfang's eight-year contract is coming! Then, in order to reassure the pill country,

it signed a contract and said that it would only be the existing tea doctor to participate in the future!

Meatball country is almost crying. Because of this, Ouyang doubled the number of people who went to Marubeni for further study.

Technicians, the income of attracting technicians depends on research, but it is the contract that binds the management of technicians. Otherwise, top technicians are really difficult to manage.

As soon as I entered the laboratory, I heard Zhao Yanfang argue with the people of Marubeni country again. It turned out that they had differences on the specimens.

Marubeni advocates using Marubeni people as specimens, while Zhao Yanfang advocates using Chinese people as specimens.

From the number of disease sources to the population base, Zhao Yanfang said that the other party was speechless.

But they also made Zhao Yanfang roll her eyes from the source of funds and the advancement of science and technology.

When Zhao Yanfang didn't come, Zhang Fan generally didn't care in the laboratory. The other party found the patient, he had an operation, and then the other party informed him of the experimental results in time.

As for the process of the experiment, he seldom worries about it.

Just when the two sides couldn't talk, Zhang Fan came in.

Marubeni wants to see his mother and cries to Zhang Fan. Zhang Fan is not stupid. He knows that he was almost cheated before. But the strength of our own hospital is not good, and the region is not developed.

Otherwise, you need to cooperate with Marubeni!

Zhao Yanfang also looked at Zhang Fan. She also wants to be good. If Zhang Fan is a traitor, she will keep the experimental results in China even if she files a lawsuit.

"What a big thing. Half each! Half of the patients in Marubeni and half of the people in China. "

Zhang Fan solved the problem with a gentle wave of his hand.

"Zhang sang, that's not the case. If each takes half, we will double the number of experiments! "

The experts in Marubeni are almost crying. Why did they meet such a mallet!

"It's all right. It's just an operation! Are people who open hospitals afraid of more operations? "

Zhao Yanfang smiled!

"China's experimental expenses must be paid by tea!"

"You are looking for trouble! What did you say? " Zhang Fan is unhappy.

Give Zhao Yanfang a composition. This guy will spray Zhang Fan's face, but they will be really nervous about the composition of the pill country! Because the core of the operation is Zhang Fan's surgical technology.

The experts in the meatball country are going crazy. Why are tea vegetarians so difficult to deal with? Isn't China known as a state of etiquette? How can people meet like this.

Ouyang said everything about the contract and took advantage of everything. When the contract was not conducive to them, the old lady didn't appear and Zhang Fan came directly.

Oh, my God! The experts of Marubeni really want to say: give me the ball, my mother won't let me play with you!

But they dare not. They know the most about intestinal diseases in their own country. Now they can only do so, because they can't do the current total resection and clean operation!

After balancing the two sides, Zhang Fan pretended to look at the experimental data and research.

I didn't dare to talk more. I'm afraid I'll show my feet. Once the surgery became data, Zhang Fan began to have a headache. From cancer factors to intestinal properties, from cells to race, from symptoms to DNA and RNA, Zhang Fan's head was big.

"I think if we wait for more detailed data, we can hold an annual conference on intestinal surgery!"

After pretending to read it, Zhang Fan shook with the report and said to the experts of Marubeni and Zhao Yanfang.

"No!"

"No!"

The two sides unanimously rejected Zhang Fan's proposal.

"I think so. Can we invite experts from all over the world to discuss it. Nothing bad! "

The experts in Marubeni are crazy. Looked at Zhang Fan with an incredible look and thought, "what does he want to do, and what equipment do they like!"

But Zhao Yanfang looked at Zhang Fan with a fool's eye "Is he stupid, or is he really selfless? He doesn't look like modern Bethune! "

"First of all, the annual meeting is not a forward-looking meeting..." Zhao Yanfang finally couldn't help but start trying to convince Zhang Fan.

She thinks her eloquence and knowledge can explain this!

Zhang Fan actually thinks so.

Half an hour later, Zhang Fan understood!

"Do you think it is the most appropriate operation for our hospital to improve its popularity? Since intestinal tumors are not suitable, let's say a simple one, such as orthopedics!"

"Orthopedics? Well, let me see. In fact, at the annual meeting of orthopedics, there are only three big pieces to say, trauma, spine and joints. Since you want to improve your reputation, trauma is necessary, which requires a lot of data and return visit data support.

Just talk about the spine and joints. I also have some data in this regard! "

"We can also provide data in this regard. We have a lot of data!" Experts from Marubeni also hurried out and said.

"Oh, let me think! But I think you have a point! "

Zhang Fan nodded and left with satisfaction.

Experts from Marubeni and Zhao Yanfang looked at each other and finally had a feeling that heroes cherish heroes!

## **Chapter 1028**

After Zhang Fan made a turn, he knew what to prepare for the annual meeting of orthopedics.

Now he has also found that almost all those who have a little research in the technical field are relatively strong. Stronger than women in leadership.

However, women in the field of technology are easy to fool, while women in the field of leadership are

difficult. The two quotients are higher than each other.

Leave the lab. He was also thinking on the road. Depending on the situation, the intestinal laboratory would have made achievements, otherwise they wouldn't be so nervous and wouldn't refuse at all.

Although he is not the main participant, as the leader, he is also a bit like an old hen laying eggs. He wants to sing and show off.

However, my heart is still pressed. The most uneven thing in the world is the scientific experiment. Maybe I blew the cow today and the experiment failed, which is a shame.

Now it's a bit of a card, especially in the general foreign system. If you make an oolong, the martial brothers of Guangshi school can laugh at themselves.

Orthopedics has strong popularization, and the operation is also difficult. Nothing is more difficult than joint replacement or spinal fixation. If a reasonable analysis is made, in fact, the difficulty of spine is slightly higher than that of joint.

In China's own annual orthopaedic conferences, trauma orthopaedics is often the main focus, whether it is children's trauma or adult trauma. Because in the current device market, trauma, joint and spine are the three fast, only the manufacturing of trauma devices is not dominated by foreign manufacturers.

The top three orthopedic device companies in the world are Johnson & Johnson, Stryker and JM. Their patents are like a moat. The development of instruments in other countries is too difficult.

Moreover, orthopedic instruments are also the most monopolized line of doctors. Often an orthopedic flying knife doctor will travel with an instrument nurse and an instrument supplier.

This is different from other departments.

Although Zhang Fan is not as famous as ordinary people in orthopedics, several manufacturers want to cooperate with Zhang Fan, but Zhang Fan didn't promise. After these things, Zhang Fan has another thing to arrange.

In midsummer, a group of tea vegetarian doctors are retiring.

The director of the digestive department, the deputy director of Endocrinology, Xia Yonghong of anesthesia, and many old doctors are retiring. These people can be said to have come through the most difficult period of the hospital.

In a popular word, these people are meritorious to the hospital. It can be imagined that when the train running in the frontier had no heating and was still burning firewood and briquettes, these doctors from the mainland finally arrived.

In the past, when they were wearing white coats, they couldn't feel that they were old people. But suddenly, they took off their white coats and put on colorful clothes. Their silver white hair and slightly raised body showed that they were old.

Many old doctors have been home for half a year. The hospital chose a farewell party in the summer.

Hosted by Ouyang, there is no previous severity, but more warmth. The Yellow photos were enlarged, and the earth wards that had already been demolished were slowly placed like slides.

Like telling stories, Ouyang told the young doctors that it was not easy in the hospital and how the predecessors struggled.

"At that time, our ward was not enough, and there was a flu outbreak in the winter of that year.

The doctors and nurses let out all the dormitories and offices and lived in tents. Comrades, when it was 30 degrees below zero, I remember dying. Dr. Xia Yonghong had an operation all day. After work, he had to help the pharmacy burn a fire and get distilled water.

You think it's a joke now. Comrades are not funny at all. Let's see. This is the photo of Comrade Xia Yonghong burning a fire in those days! "

In a black-and-white photo, Xia Yonghong's young face was reserved.

Ouyang took advantage of the farewell party to give the young people a lesson to remember their hardships and think of sweetness, and to win over the retired doctors.

Don't look at these people retiring, but many private hospitals probably contacted them early. Now the price of retired doctors in tea vegetable hospital is very high. A private boss gave a message. I'll give you twice as much as the tea vegetable hospital gives you.

Although the educational background of these people is generally not high, the experience of practicing medicine for 30 years is really not a simple educational background, especially this kind of grass-roots clinic.

A good and experienced doctor can definitely make patients suffer less.

Listening to Ouyang's sensational words, Zhang Fan was moved. Now he knows where he didn't learn well. Ouyang is too sensational.

The young doctor may not feel much, but several old guys on the stage secretly wiped their eyes.

Chen Sheng on one side has already prepared the reemployment contract.

Ouyang also prepared big red flowers, certificates of merit and bonuses.

Xia Yonghong seemed to go to the top and went down while touching her eyes.

As a result, walking, ordinary one fell to.

The young doctor nearby quickly picked up Xia Yonghong, but when he helped the old lady up, everyone found that the old lady was in pain.

"Legs! The leg hurts. "

Zhang Fan also hurried down from the rostrum.

"What's the matter, Dr. Xia? Where did you fall?" Before I finished asking, I saw the bright red blood slowly seeping from the white trousers that the old lady had deliberately changed.

Don't ask. Zhang Fan looked and immediately said, "stretcher! Come on! "

Stretchers and wheelchairs are the most indispensable in hospitals. When there is no meeting in the general assembly hall, they are usually places for nurses and doctors to practice their professional skills.

Xue Fei quickly put old lady Xia on a stretcher with a group of in the emergency department.

"Scissors!" There is Zhang Fan. Generally, no one dares to do surgery, and he is still a colleague.

Even the delivery of scissors is at the head nurse level.

Zhang Fan quickly cut up old lady Xia's trousers. The new white trousers were hinged from his ankle to his knee like a cheongsam.

When the pants were twisted open, several young female physicians screamed " Ah! "

Ouyang looked at him like a knife: "get out!"

The low voice is like a threatening Tibetan mastiff.

On the tibial surface of Xia Yonghong's right lower limb, that is, just in front of the lower leg, the bone stubble was inserted out, with muscles and fascia as if it had been pulled out alive.

Even the shredded meat hung on the sharp bone stubble.

Xia Yonghong was already in pain and even moaned weakly.

"Come on, go into the operating room now!" Zhang Fan's face turned blue when he checked it.

"Good!" A group of young male doctors quickly and gently lifted the stretcher and ran to the operating room.

"Dean, the situation is wrong. Call your family!"

Zhang Fan said softly that only he and Ouyang could hear.

Ouyang's face became more ugly. He looked at Zhang Fan and didn't say a word more.

## **Chapter 1029**

Many people, especially those in the system, are in two states whether they retire or not.

For example, a section chief is not a big official, but he manages many businesses. Although he is in his fifties, he has dark hair and rich collagen on his face, just like a young daughter-in-law, he can run water when pinched.

Others, who had no status in the unit and didn't have a post, bent slightly at work and looked like seven old eighty-one.

Can retire, get a salary, call friends in the community, suddenly seem to be much younger. If there are retired leaders of the same unit in the same community.

It's even more different. After retirement, those who don't have official positions don't play with the leaders. Even if the leaders want to see them play chess, he can withdraw the chess stand.

This is a good attitude.

Often many people are in good health before retirement. As a result, as soon as they retire, they begin to get sick without taking a few days' retirement salary, with serious and minor diseases.

It's like peeling off the skin. Suddenly, people are open and soft, just like they really become old men and women.

If he couldn't get through it, he directly took a lunch box and went to another world to eat.

Man is a very strange animal. His mood and mood will definitely affect his body.

It's not scary at all. Open the book of internal medicine, there is a saying in the treatment of most diseases. Pay attention to maintaining a good attitude.

To tell the truth, an idea of diet and a good attitude are not ordinary people who can do these two points!

This is the case with old lady Xia Yonghong. Young doctors are eager to retire tomorrow. The old lady has been used to getting up early and returning late for decades. Whenever she feels that she has to dance in the square with a fan every day, or sit in the sun and chat with parents Li's family, she panics.

Look forward to time being slower, slower. And with the shortening of retirement time, she found that her right leg hurt a little, but she didn't take it to heart. She always felt that she was old and short of calcium.

Bone tumors have a variety of forms and types. They may be sick from young children to the elderly.

Moreover, the earliest symptom of the disease is pain.

Many people feel their wrists hurt, and then rush to the hospital. The doctor says it's okay. Go back and have more rest!

He doesn't like it yet. How can he be all right? Wrist pain, sore.

The doctor couldn't help it: "can't you change your hand!"

Although it's a joke, many people just don't understand it. For example, the pain can be relieved. It hurts on the first day, it's light on the second day, and it's all right on the third day.

If it hurts the first day, continues to roll at night, and still hurts the next day, first let your wrist rest for a day.

If the pain is not relieved for a fixed time or after rest, you should pay attention to it at this time.

For example, tomorrow night, when you go to bed, it will start to hurt. This kind of pain at a fixed time, whether it's your wrist or ankle, you should pay attention. It's best to go to the hospital for examination.

There are also body tumors. Of course, the pimple of youth on your face is not a bone problem. Especially some tumors near joints, we must pay attention to them.

"Dean, inform the family quickly!" When Xia Yonghong pushed forward the operation, Zhang Fan turned out of the operating room and said a word to Ouyang.

"Bone..." Ouyang looked at Zhang Fan's face and didn't say the word cancer, but she guessed the expression, but she always looked forward to it in her heart and thought to the good, "osteoporosis? Bone atrophy! "

Zhang Fan nodded gently.

"Ah! I'll get in touch! " The moment Ouyang turned around, it seemed that his legs and feet were not working properly. He took two steps and helped the wall.

Before long, the doctors who had not attended the meeting came to the corridor of the operating room.

"Zhang Yuan, what do you need us to do?"

"It's hard to say now, but blood will certainly be used. Don't eat lunch first. Then..."

"Good!"

Things hurt their kind. Many female doctors have red eyes“ Teacher Xia is such a nice person. Everyone laughs and speaks warm words to the patient. I didn't expect... "

At this time, Lao Gao, who quarreled with the government, came, "is it confirmed?"

Looking at Zhang Fan from a distance, Lao Gao asked.

Zhang Fan nodded.

"Count me in, I'll do it for you!" Lao Gao whispered.

"Good!" Zhang Fan didn't say much.

Then, director Wang of the second Department of orthopedics panted and ran in. When he saw the people in the corridor, he also understood and diagnosed!

"Zhang Yuan, count me as a colleague for many years. It's hard not to do something for Lao Xia!"

"Yes!" Zhang Fan still nodded gently.

Zhang Fan stood in the middle of the operating room, waiting quietly, with doctors on both sides. The old directors of orthopedics have understood the rise of Zhang Fan, and the era of Zhang Fan has come.

"Zhang Yuan, count me in! I can go in and pull a hook. " At this time, Chen Qi, who was sent to the clinic, also came.

This guy didn't say soft words. No matter he didn't say soft words, he always looked for opportunities to wait for Zhang Fan and Ouyang to make mistakes.

But today, Chen Qi softened, not for anything else, just to give his colleagues for more than 30 years. Zhang Fan looked at Chen Qi and nodded gently.

"Zhang Yuan, take me!" Xue Fei also spoke.

"Zhang Yuan still has!" Wang Guofu also stood up.

"Zhang Yuan, and me!" Wang Yanan also came out.

Almost all the orthopedic doctors stood up.

Zhang Fan did not refuse, this is friendship, this is the cohesion of a unit.

Before long, Ouyang came over with the phone. "Dr. Xia's girl is still out of town and has gone to catch up here by plane. Her wife is in poor health. I didn't inform her!

Her child has been crying and can't decide anything on the phone. Now... "Ouyang wanted to speak, but he didn't say it in the end.

Instead, he said, "you decide! After all, you are the dean. The employees have no family members. You are the family members! "

"Good!" Zhang Fan nodded gently.

Looking at the doctors around me.

"Wang Yanan, print the operation notice and condition notice immediately, and I'll sign it.

Dean Gao, you help me, director Wang, you help me! " With that, Zhang Fan looked at Chen Qi.

Chen Qi looked straight at Zhang Fan without blinking.

"Dr. Chen's three assistants, Wang Guofu's four assistants and Xue Fei's five assistants

Secretary Ren is on standby outside the operating room. If you need blood, please organize our doctors and nurses to draw blood. Dean Ju, you should coordinate the internal surgeons and set up a postoperative recovery team.

President Chen is ready to receive and appease Dr. Xia's family. Let me emphasize here.

Today, we are not rescuing a doctor Xia, nor are we operating on a doctor Xia. But for ourselves. I hope everyone can make a strong contribution and someone can make a difference.

Doctors who have worked for 30 years must not be allowed to lie cold in their own hospitals. Can you do it? "

"You can do it!"

The neat reply made people get goose bumps on their bodies, but their hearts were hot.

Zhang Fan took a pen and signed his name on the condition notice. At last, it was clearly stated that if necessary, the patient will be amputated during the operation!

When Xia Yonghong fell and cut open her pants, Zhang Fan's heart began to ring.

It was a wrestling without a gap that broke Dr. Xia's leg. This is abnormal.

Bone cancer, what is it.

There are many kinds, the most common and easy to describe, such as the crispy pancakes we eat in the morning.

Bones originally had no nerves, only nerves lying on the surface of the bones.

Therefore, when the fracture occurs, as long as the brake is applied, the patient will not have obvious pain. It only hurts when there is movement.

Bone cancer is like bubble gum lying on the bone one by one.

At the beginning, it will mutate at a certain point, and then begin to grow. When it grows to a certain extent, it will begin to spread around.

While spreading, it corrodes the bone. The original white jade like bone slowly appeared a tooth yellow bubble on the surface.

It's as like as two peas are blown down in the pan. The size of the bubbles is different from each other, and it is directly round and crisp.

Then, the bone is like a piece of paper. If there is a little external force, it may break and fracture.

After signing, Zhang Fan took the doctors into the operating room.

In the operating room, almost all the people in the anesthesia department have arrived. Zhang Fan opened his mouth to catch up, but looking at everyone's expectant eyes, Zhang Fan swallowed his words.

"Zhang Yuan, the equipment is ready!" The head nurse in the operating room went to the operating table in person and became an instrument nurse.

"Zhang Yuan can be anesthetized!" The director of anesthesiology department stood next to Dr. Xia, holding the old lady's hand tightly.

Zhang Fan gently walks to Dr. Xia " Old lady, look at you. You don't exercise at ordinary times. Now your bone is broken! Hehe, don't worry, I'm the main knife today. The orthopedic directors of the hospital are all on the stage. Anesthesia is your big apprentice, and the equipment is the head nurse in the operating room.

You can't enjoy this! "

Zhang Fan smiled and said to the old lady, although he smiled again, Zhang Fan's heart bled again, really! Such colleagues are better than relatives.

"I'm sorry to trouble you, but I'm getting old. As a result, I still have to go to the table last time. Don't worry, I'm not afraid. I can finally be a person lying on the operating bed. Zhang Yuan, let it go!

What it should be is what it should be. Human life is doomed. Don't be too hard for yourself! "

The old lady must know her disease in her heart. Zhang Fan pursed her mouth and couldn't speak!

"Start, prepare for anesthesia." Zhang Fan gently patted the old lady's hand and turned to order.

When the mask was buttoned on Dr. Xia's face, old lady Xia finally passed out with a smile.

"Wash your hands!"

The operation began.

## Chapter 1030

In the face of tumors, to be honest, doctors have not made great progress in the past two or three decades. There is no such leapfrog development as in earlier years.

For a simple analogy, in the face of tumors, surgeons dig meat, physicians prevent poison, and radiologists roast! For Biao, there was little change decades ago.

That is, there are more kinds of drugs, a little more surgical methods, and the measurement of radiation has changed. Most of the outcomes are that the tumor cells have not been killed and the patient has died.

Therefore, the old ancestors of China have made clear the most important issue of medical treatment a few years ago. Bian que written by Han stammered made it clear when he saw King CAI.

Disease treatment, prevention is greater than cure!

However, bone tumor is different, just as its material is different from most other tissues of the body, and its disease mechanism is also different from most other tissues.

In medicine, when a doctor is faced with a disease, there are often four in his mind: 1. Etiology (how does this thing come from), 2. Symptoms (the performance of this thing), 3. Treatment (whether to dig meat or take medicine), 4. Results (cured or not).

When it comes to bone tumors, doctors think about amputation? No amputation?

Because how did the disease come from? At present, there is no organization that can explain this matter!

If we say the surgical results of other tumors, the patients may not be particularly clear. At most, they feel their stomach in the dead of night and think: "there seems to be a piece missing!"

However, patients with bone tumors can clearly feel it. The later the discovery, the later the treatment,

the more obvious the feeling! They often touch a missing arm or leg and ask questions like, "where's my leg!"

In the operating room, Zhang Fan is the main knife, and the director of the second Department of orthopedics, Lao Wang Yizhu, Lao Gao Erzhu and Chen Qi Sanzhu, can go on the stage. It can almost be said that all the doctors with the highest level of orthopedics in the tea vegetable city hospital came.

Lao Gao and Lao Wang stopped talking. Chen Qi, the director of the old brand, didn't underestimate it. Although he thought about RMB day by day, the level was not Xu Xian, and Wang Yanan could compare with them.

Under the table, Xue Fei prepared all kinds of equipment. This kind of operation requires a lot of instruments, from hammer to electric drill, from bone biting forceps to bone spoon like ear digging spoon, with an instrument table.

Wang Yanan, Xu Xian and Zhou Guofu have all washed their hands and are always ready for support.

There is no need to talk about the lineup of the anesthesiology department. All the apprentices from the director to Dr. Xia came.

Nurses, all the little nurses from the chief nurse to the operating room are on standby.

Do you need so many people? unwanted! However, everyone felt as if they were holding a pain that they couldn't swallow or spit out.

Always wanted to do something for Dr. Xia.

The operation began.

Zhang Fan took a knife and began to extend along the wound protruding from the bone stubble.

The blade crossed, like a red line, across the old lady's leg. Originally, there was not much meat on the leg, just like the trendy wearing a red thread tight yellow autumn pants.

"Make the cut as big as possible!" Zhang Fan doesn't know whether to say it to himself, to others, or to Dr. Xia, who has been numb.

The blade slipped, and the blood slowly overflowed from the incision.

"Electric knife!" Under the curl of smoke, Dr. Xia's right lower limb was like a down jacket, and his underwear was exposed.

Broken bones can't be seen.

Normal bone, general fracture, more than three scattered bone blocks, can be called comminuted fracture.

The broken end of Dr. Xia's bone is directly scattered in the wrapped muscle like bean curd residue. The bone is corroded by the tumor like thin potato chips, without a trace of hard feeling.

"Tweezers!" After taking the tweezers, not only Zhang Fan took the tweezers, Lao Wang and Lao Gao and even Li Qi took the tweezers.

The four people, like children eating a banquet, kept looking for sesame seeds in the meat.

For a while, keep clamping out the broken bone pieces between the bloody muscles.

Tumor surgery is a thorough operation. Generally, when debridement is removed, it is often far away from tumor tissue and removed with normal tissue.

This broken bone fragment is definitely carrying tumor cells without thinking. It is just like a seed. It is inadvertently left in the body. Before long, the patient will relapse.

Spend forty-eight, Lao Gao, Lao Wang and Chen Qi are all fifty people. Under the shadowless lamp, the fragments of yellow teeth are really like the chips of potato chips, constantly clamping acridine clips!

Not only the eyes were sore, but even the fingers holding tweezers began to sour.

"High court, let me go!" Wang Yanan gently wiped the sweat on Lao Gao's forehead and whispered.

"No, it's probably the last major operation in my life, and it's still for Lao Xia. How can I stand to the end!"

Lao Gao wanted to smile, but he couldn't smile.

Almost 40 minutes later, the broken bones like potato chips were finally cleared away from the naked eye. Zhang Fan put his hands into his muscles and closed his eyes.

Like a blind man touching an elephant, I touched it from beginning to end.

Holding clean pieces, and hard things. The tumor on the bone is like a house that has not lived for many years. The four walls are full of marks of moisture and mildew.

This kind of thing is the most difficult to deal with. Sometimes it is scratched on the cement surface. It seems that there are still some problems. In fact, bone tumors are similar to this.

Like a carpenter, Chen Qi hugged his legs, and Zhang Fan took Lao Gao and Lao Wang from tweezers to bone spoon. A spoon, a spoon, kept digging the mark of the tumor attached to the bone surface.

This kind of mark is very difficult to deal with. If you use less force, you can't dig. If you use more force, you may break the corroded bones.

Large area with bone spoon, small area with electric drill.

Squeaky, blood foam overflowed in the operating room.

.....

Outside the operating room, Ouyang had chased all the doctors away. The old lady is annoyed at seeing everyone now.

Ren Li coordinated the young doctors to start drawing blood. Who has good physical quality and who can rest recently, Ren Li keeps choosing.

President Ju, with doctors from the oncology department, internal medicine department and radiology department, has begun to discuss postoperative radiotherapy and chemotherapy.

"Miss Xia is old. The radiation is too large!"

"In the early stage, the amount must be larger, otherwise the effect is not good. Please find a way to adjust Mr. Xia's body in the internal medicine, and make sure that the first round of radiation is completed!"

Doctors in the medical oncology department and the radiology department quarreled.

Chen Sheng has been waiting for teacher Xia's daughter at the tea vegetable airport.

Because the tea vegetable hospital is becoming more and more powerful, the relationship between the airport and the hospital is getting better and better. When the leaders here heard that Chen Sheng was going to pick up people, they let go directly.

Let Chen Sheng's 120 enter the airport. If it's on weekdays, Chen Sheng will definitely boast in his QQ group, but today, Lao Chen doesn't have this idea.

It's also stained with the light of tea vegetable hospital. Now many big cities have direct flights to tea vegetable. Unlike before, Mingming took a plane and sometimes spent a night in other cities.

The plane descended slowly and the cabin door opened. Doctor Xia's daughter, her husband and children trotted off the plane.

"Uncle Chen, my mother, how's my mother?" The woman has tears on her face.

Looking at the girl who grew up, Lao Chen felt bad, but he still wanted to say something nice and let her not worry too much.

"Don't worry, don't worry. Hospital Zhang operated in person. The orthopedic directors in the hospital all went to the operating table. It'll be all right. Let's go back to the hospital first!

Why don't you let your husband go home first? "

The woman has cried into tears and can't do anything, "uncle, let's go to the hospital and see my mother first! We are worried when we go home! " A woman's husband is also called Uncle Chen Sheng with his wife.

After entering the hospital, the world will not stop running without one person, although it seems that doctors and nurses in the hospital today have a face of no strangers.

But there are still a lot of people in and out of the hospital.

Doctor Xia's son-in-law holds the child and holds his wife in one hand. The women are almost a pile of mud.

When they got to the operating room, they didn't know whether they remembered the days when they went to work with their mother when they were young, or whether their mother helped buy a house in big cities in recent years. She also had a little opinion because her mother didn't help her take care of her children.

"Wow!" A cry came out. The children around them didn't know why their mother cried so sad. They grabbed their father with their small hand and wiped their mother's tears with the other hand.

"Mom, mom, I'm back, your girl is back! Mom! "

Ouyang was in the lounge of the operating room. When she heard the cry, she ran out.

Originally wanted to scold, but seeing the scene in front of him, Ouyang's eyes involuntarily turned red.

"Yan, stop crying. The doctors inside are operating on your mother. Don't affect them. Don't worry, the doctors inside won't give up your mother!"

"Aunt Ouyang!" The woman threw herself into Ouyang's arms, crying sadly, splitting her lungs and breaking her heart.

Cancer, when non-medical people hear this word, their hearts will probably tremble, not to mention

their mother.

Doctor Xia's wife was also taken to the hospital. Although the old man didn't cry, his beard was stained with tears. It can really be said that he was full of tears.

Time goes by little.

In the operating room, Chen Qi, with his legs wrapped, has a blue face. But he just clenched his teeth and didn't say a word.

The bone has let Zhang Fan repair one hole after another. The round bone is like the rice flower stick eaten by naughty boys when they were young.

He licked his eyes everywhere with his tongue, and called it Xiao!

"The tumor almost reached the knee. Zhang Yuan, protect your legs!" Lao Gao asked softly.

### **Chapter 1031**

Sure or not! In the past, female doctors often asked a man on TV to protect the big and the small. This kind of TV, which is not misleading, has derived a lot of jokes.

For example, before a pregnant woman enters the delivery room, she writes a note in her hand. If there is an accident, you must not give up on me!

This is a very small chance that things can happen, and now the pre pregnancy examination and prenatal examination are so strict that they can hardly happen.

But there are many choices in medical treatment.

Medical research is accurate, but it can be slightly blurred during serious treatment.

Because diseases don't grow according to human ideas. For example, if a tumor grows one centimeter more, the doctor will cut five centimeters more of normal tissue.

This is why sometimes doctors open the patient's stomach and dare not cut it. Because the extended cutting will cut the patient to death on the operating table, so how to open the stomach and how to sew it honestly.

It's no exaggeration.

Zhang Fan is now facing this problem.

The tumor of the lower limb has made the bone like the skin of a toad, full of bone bubbles. This kind of bone can't be left, but can only be cut! And an extended cut.

But cut a little more up to the knee. How to do a little more, cut or not? Just a little more, Dr. Xia became a disabled person.

In other operations, doctors are misers. They can keep as much as they can for patients. The bone residue with large nail cap tries to press it.

However, when it comes to tumor surgery, doctors have become the rich second generation of extravagance. They want to remove even their organs. Because the tumor is terrible.

Zhang Fan hesitated for three minutes, which was like a century for other doctors.

Because of the pause in the operation, especially in this large incision operation, the doctor's pause, not only the capillary rebleeding, but also the probability of infection will increase over time.

At this moment, the pressure of doctors can be imagined. One choice may make patients face different lives.

Wang Yanan looked at Zhang Fan with a small fist. She wanted to help Zhang Fan on the operating table. Xu Xian's tangled mouth was almost crooked. He thought again, what should he do if he was the chief surgeon!

Lao Gao wants to speak, but he opens his mouth and doesn't speak. He believes in Zhang Fan, so he doesn't want to interfere with Zhang Fan's decision now.

Lao Wang tends to amputate directly. After all, the principle in medical treatment is to save lives and then preserve them.

Chen Qi tends to keep it. His gambling is too big!

Chen Qi jumped into the second Department of orthopedics at the beginning, and later fell out with Zhang Fan and Ouyang. They are all alone. Now the orthopedics department doesn't take him to play.

This kind of person is definitely a person who can't eat five tripods in troubled times and can cook five tripods in death.

Just when everyone was choosing in their mind, Zhang Fan had checked the two results of the operation in the system.

Amputation, needless to say, is the safest. The premise is that the operation must be clean.

It was as if Zhang Fan, who had entered the settlement, suddenly said, "Bao!"

"Too dangerous, too risky." Lao Gao spoke at this time.

"Zhang Yuan, our mood is the same as yours, but I think it's better to be conservative."

Although Chen Qi didn't speak, he still said in his heart, "this boy has great courage and responsibility. I don't have a chance!"

"I'm sure, don't worry!" Zhang Fan didn't explain much. He didn't have time to explain on the operating table.

In the words of early leaders: if you don't understand, you have to find a way to understand. Orders are orders!

With that, Zhang Fan said to Wang Yanan: "the operation record is clear!"

There was no sound. This is the word for reality.

"Again, there must be no omission." Zhang Fan said softly. There doesn't seem to be a little pressure.

Zhang Fan then started from beginning to end, that is, his own hospital, that is, Zhang Fan's achievements are placed here, otherwise the assistants will definitely turn over.

In those days, Qiu Lao said that it's not too much to be cautious in medical treatment, but how many people can do this?

After the inspection, Zhang Fan was reassured. There's really nothing wrong with these old guys. The operation is quite clean.

"Zhang Yuan, we have discussed the medical treatment plan!" At this time, Lao Ju came in.

Zhang fantou didn't answer, but simply asked, "have everyone's opinions been unified?"

"No, I finally had to turn to Director Li of the oncology department of cancer university to determine the

final plan!" Lao Ju said embarrassed.

Departments jointly formulate plans, which is such a disadvantage in grass-roots hospitals. Each department only considers its own side. And inexperienced.

"Good!" In fact, Zhang Fan sighed a long time in his heart.

"Truncation!" Zhang Fan doesn't have too much emotion. The reality is like this. He can only work hard.

The itinerant nurse immediately put protective glasses on Zhang Fan and several assistants. Immediately, the doctor became the scientists of the Kesai! It looks like a high-end thing. In fact, it's a windscreen, and it's very tight.

Buckle it on your face and the meat on your face will hurt.

The electric saw, which was debugged by Xue Fei himself, was carried up.

The electric saw on the operating table is slightly smaller than the electric saw for sawing wood, but the sharpness is definitely inferior to the electric saw for sawing wood.

In terms of the surgical cruelty of various departments, if anorectal is the first, orthopedics can definitely enter the top three.

The operation of removing anus in anorectal surgery is probably no more cruel than this.

Although orthopaedic surgery is not the most cruel, but all are so kind.

For example, the moment when the steel plate is put on and the electric drill drills into the bone marrow, blood flowers accompany the bone marrow and bone powder. Under the high-speed rotating electric drill, let alone anything else, the smell of barbecue is unforgettable.

It's better. Amputation is even more terrible.

What Zhang fan does now is to cut off the two broken ends of the tumor directly with an electric saw.

Like King Li, Zhang Fan pressed the trigger with a chainsaw, and then looked at Lao Gao and Lao Wang.

Lao Gao and Wang put the big hook next to the bone to be cut at the first time, which is to protect the patient's muscle tissue. This thing is no joke. Once it touches muscle tissue, it is meat paste directly, and there is no chance to save it.

Like a roaring small sports car, the electric saw was placed on the bone, and the neat port appeared.

Cut off the bones corroded by the tumor. Finally, the healthy bone section appeared, white as jade!

When the operation achieves this step, the most important steps are actually finished.

But there is a missing piece between the bones. The recovery ability of the human body is very strong, but this defect can't be healed.

Autologous transplantation!

What do you mean, people's limbs are actually very similar.

The forelimb has a bone, ulna and radius, and the lower limb also has two bones, tibia and fibula.

The ulna and radius of the forelimb can't move. If there is a problem with these two bones, such as falling and finding a bone setting with two knives, in the end, you can't even use chopsticks.

Finally, as a last resort, let the doctor cut open, interrupt and reconnect. Because these two bones are like a connecting rod, twisting up and down is turning your hand over the clouds and covering your hand with rain. If the two bones are not well connected, even if there is an error of two centimeters in length, you can't get them.

The lower limbs are different. The fibula in the tibiofibula has evolved only the assisting function. When there is no way, this bone will be used by doctors to replace other bones.

For example, the heightening operation, which was particularly popular in previous years, actually broke the tibia and fibula, and then added the bone of the fibula to the tibia to increase the height.

Although it is only an assistance function, without this bone, people's stability is a little poor.

It's not worth breaking the fibula for a little height. But breaking the fibula to keep one leg is different.

Several people cut off the fibula very quickly. At this time, it is actually a simple internal fixation. The most important thing is to measure the length of the leg on the healthy side. It can't be long or short.

Usually others do this kind of operation, it is necessary to measure. Zhang Fan doesn't need it. Zhang Fan's eyes are rulers, and they are quite accurate rulers.

Bone connection, steel plate and fastening screw are used to make clouds and flowing water.

There is a saying in orthopedics that there are no steel plates that can't be put on, only screws that can't be taken off.

Because most of the orthopedic screws are locking plates, as long as the torque deviates a little, the doctor can kneel down and cry when they are taken out.

So, generally, who puts the steel plate and who takes it!

Suture, the operation is over. In Lao Xia's mask, he stretched out his tongue and turned his white eyes. Zhang Fan looked at Lao Xia and felt a little more comfortable.

"You must take good care of it! Check the room more times, Dr. Xia, and I'll give it to you! "

Zhang Fan said to Wang Yanan while taking off his gloves.

"Well, don't worry, you must take good care of it!"

.....

Within a few days of the operation, Zhang Fan and Chen Sheng left for Lianda.

Zhang Fan really doesn't like flying, especially the feeling of total time and space when the plane falls together. This feeling of being unable to grasp life is particularly bad.

But I can't help it. China is too big.

"Zhang Yuan, let's go there by ourselves, or will someone pick it up?" Chen Sheng has never been to Lianda.

"It's estimated that someone will answer!" Zhang Fan feels that his current position should be taken over by a specially assigned person.

When we got to the hall, we saw a tall girl holding the sign of the world orthopaedic annual meeting.

To tell you the truth, girls all over China have their own characteristics in terms of beauty. But relatively speaking, the girls in Lianda are generally tall.

With long hair and appropriate light make-up, you look beautiful barefoot under small jeans, and wear small leather boots at your feet. Darling, how do you look young and beautiful.

Zhang Fan said to Lao Chen, "look, someone answered. Let's go. "

Zhang Fan and Lao Chen walked over with a smile. Before Zhang Fan with a smiling face spoke, the girl turned her face.

Zhang Fan was so embarrassed that he couldn't hang his smiling face, "Hello!" As a last resort, Zhang Fan said to the back of the girl's head.

**Chapter 1032**

As long as he has experienced in the society for such a year or two, he will never give Zhang Fan a back head. Although Zhang Fan is young, what he can wear is not a sour and astringent luxury, but the overall appearance is definitely not street clothes.

And the most important thing is that although he has a peasant wheat color, his eyes are absolutely straight. There is no adult male looking at the aggressive look of a sexy woman.

The little girl at school can study fairly well, and she is beautiful. It is estimated that there are many people chasing after her, so she is still proud. After standing at the airport for a long time, no less than a dozen young men came to ask for a phone call under the name of asking questions.

Zhang Fan is also unlucky, because the plane in the frontier is late and the girl is on the edge of explosion. Although with Chen Sheng, Chen Sheng is definitely a successful person when he is not in front of Ouyang and Zhang Fan.

But in front of Zhang Fan and Ouyang, it's different. It looks a little obscene.

A young black faced young man and a slightly obscene middle-aged uncle are not the Department Director at first sight.

She received so many people, but the director was not dignified and unsmiling. She couldn't laugh at anyone, so the girl felt that this guy wanted another phone at the first time.

"The police are right ahead. If you don't go, I'll shout!" The big girls in the north are quite brave.

Zhang Fan looked at the back of each other's head and really made a big red face.

Chen Sheng was not happy. He had to come forward and make a theory. Zhang Fan caught up because the girl was too beautiful, tall and fashionable. The passengers who came over had already cast their eyes on her.

Several men have been eager to come to the hero to save the United States.

And looking at the girl's posture, it would be humiliating if she really shouted.

"Go, go, go!" Zhang Fan took Chen Sheng and hurried away from one side.

"I don't care, but you..." Chen Sheng looked angry.

"Hey, who makes us nameless? Well, it's not much to go by ourselves."

"Hey, a leader is a leader. I can't compare with this mind. I'll tell them to the organizing committee later."

"Forget it, how old are you? What do you care about with other girls!" Zhang Fan said casually.

Zhang Fan they left, and the girl with the sign didn't take it seriously. The manufacturer representative who went to the bathroom also rushed out, "see director Zhang. I see all the passengers in the frontier coming out! "

"Not yet. I've been standing here!" The girl smiled sweetly at each other. For a salary of 500 yuan a day, her smile was still very sweet.

As a result, the more people waited, the less they saw. Seeing that the passengers had finished, they had not seen president Zhang.

"That's the flight. Why is there no one!" The equipment manufacturer said to himself, took out the phone, dialed and asked, "Xiao Liu, no one came to say hello to you?"

"No, no, no!" At this time, the girl began to be careful.

"Is, is that the black faced guy president Zhang? It's impossible. It doesn't look a few years older than me! " She dared not ask.

"Hello, Zhang Yuan, ha ha, I'm Xiao Wang of Johnson & Johnson. Ha ha, I met you in modu last time. We're at the airport

Well, you've got a taxi and set off! "

After hanging up the phone, Xiao Wang didn't talk much. He took people directly and began to chase them. While running, he said, "Hey, hey, just pee, just pee, what can I do!"

The girl was nervous at this time, "what's the origin of hospital director Zhang!" She whispered.

Knowing that he did something wrong, he began to feel uneasy at this time.

She's not afraid of the equipment manufacturer. Anyway, she's paid 500 a day. It's a big deal to quit. But if she's really an orthopedic expert, if she hates it in her heart, do she want to mix in this circle in the future.

Originally, Xiao Wang, the Secretary of the equipment manufacturer, licked the girl slightly. Who makes the girl beautiful? At this time, he had no thoughts in his heart.

"You can't even keep an eye on individuals. When you go back, you must sincerely apologize to president Zhang. You also study medicine. You know that attending this meeting is an expert. You can weigh it yourself!"

With that, he ran towards the parking lot, and the little girl ran after him wrongly. I wanted to know a big man, but I provoked the big man!

Zhang Fan and their taxi ran ahead, while Xiao Wang and their business chased behind.

Xiao Wang dared not call Zhang Fan again. However, this matter can not be covered up. In order to recover his mistake, he called the regional manager of Johnson & Johnson Hotel early.

The regional manager scolded Xiao Wang, hung up the phone and hurriedly waited at the door of the hotel. While waiting, I was annoyed.

Although Zhang Fan is not well-known in orthopedics, if he is really famous in orthopedics, Zhang Fan is not eligible to participate in this meeting.

Even the dean is useless. How big is the tea vegetable hospital, and it is also a frontier hospital. It is not famous.

But Zhang Fan is a compound expert. Johnson & Johnson is not only in orthopedics, it can be said that as long as it is medical equipment, Johnson & Johnson is involved. As for Zhang Fan, when he went to Pingmo in the first half of the year, he was involved in foreign affairs. What surgery does he have.

That's amazing!

Originally, the regional manager of Johnson & Johnson had to pick it up in person when Zhang came to the hospital, but unexpectedly, the experts endorsed by Jinmao and Huaguo for the meeting arrived. It was unreasonable for him not to receive it.

The chief expert of Jinmao country, with a long title, is the chairman of the joint meeting of orthopaedic doctors in Jinmao country.

Anyway, he's an expert. To be honest, if this guy is only the chairman of the orthopaedic doctors' Association rather than the chairman of the joint committee, it's very powerful.

What can the orthopaedic association do?

In this way, the organization does nothing every year and publishes some guiding opinions on orthopaedic treatment. After this opinion is published, it often changes the orthopaedic medical textbooks in many countries.

Moreover, the annual meeting of others is the largest and most influential annual orthopedic meeting in the world. Almost 50000 experts from all over the world gather here in the gambling city of Jinmao country every year.

Moreover, the participants in the meeting did not have a certain academic level, and they were not received!

But the joint meeting of orthopedic doctors in the golden Maoist country is several grades worse. If we make a comparison, this joint meeting is Li Gui.

Many people think that Chinese people have many means. In fact, their golden means are no worse than those on the Chinese side. It is said that the people of the golden Mao country are straightforward and sincere. They are all kicked in the head by donkeys.

Many orthopaedic experts from the golden Maoist countries will enter this joint meeting when they are unable to stand up in universities, laboratories and hospitals, or when they are too old to fight. And this joint meeting is actually a fake product made by Johnson & Johnson.

In order to make money, doctors and Johnson & Johnson fooled many countries in their early years. However, these experts can also be regarded as a vassal in their heyday.

There is no way to say on China's side. There are associations, but there are no particularly powerful companies on China's side, and doctors fight their own battles. Those in the capital despise magic capital, those in the South despise the north, those in the North despise the northeast, and those in the northwest tremble in the corner.

This time, Johnson & Johnson spent money to call on all the famous orthopedic doctors in China, and then put pressure on Medtronic. Although they are Li Gui, they are better than rich, so their scale is not comparable to that of ordinary annual meetings.

Zhang Fan's taxi hasn't arrived at the hotel yet. The business to pick them up has arrived at the hotel. It is estimated that they are speeding on the road. When Xiao Wang arrived at the door of the hotel, his heart trembled when he saw his manager as a doorman at the door of the hotel.

Foreign enterprises are hard to do, and these Chinese middle-level foreign enterprises are hard to speak.

The regional manager didn't say much, but looking at Xiao Wang's eyes was quite terrible.

Before long, Zhang Fan's taxi also arrived at the door of the hotel.

As soon as the regional manager saw that Zhang Fan was in the car, his smiling face was like chrysanthemums in full bloom. He hurried to the door, opened the door, and put one hand on the top of the door frame.

"Zhang Yuan, our mistake, we went to pick you up and didn't receive you. You must criticize us!"

"It's okay, it's okay. There's nothing to criticize. I'd like to talk about your equipment. The price of your bid in the second half of this year is higher than that in previous years, which is not good! "

Although the smile on the regional manager's face did not change, he began to curse his mother in his heart: "be careful, be careful, there was still something wrong, and although he said nothing, he immediately said the price. This mistake is all money! "

Zhang Fanzhen didn't get angry about picking up the plane, but he really said the price through this matter. Many orthopedic instruments, especially the spine, and Johnson & Johnson are in a monopoly position.

Xiao Wang is crying in his heart!

The girl standing on one side couldn't close her mouth. On the way here, the girl kept saying, "it's not him, it's not him!"

As a result, the good ones don't come and the bad ones come. It's really this one!

Zhang Fan Chen Sheng gets out of the car. Chen Sheng is going to get the luggage in the trunk. Xiao Wang is crazy. He hurried forward, grabbing the luggage and whispering an apology to Chen Sheng.

After greeting the regional manager, Zhang Fan turned his head and took a look. Hey, he saw the girl in his head.

The little girl is like a tree in the wind. She wants to go forward, but her feet are like roots. She leans forward, but her feet don't move.

Zhang Fan still smiled at the girl as he said hello!

The girl was scared to cry when she saw Zhang Fan's smiling face.

Zhang Fan didn't complain. It's unnecessary.

After entering the hotel, a five-star hotel, Zhang Fan was placed in the top of the ranks of doctors.

"Who are they?" After entering the hotel, Zhang Fan smiled and asked the regional manager. He didn't get entangled in the price. Anyway, today they will give Zhang Fan an explanation on the price.

"The United \* \* \* of the golden Mao country has arrived, and several deputy directors of spine surgery and joints of shuitanzi have arrived, and..."

After talking about the participants, Zhang Fan heard that there were few people he knew. Shuitanzi's orthopaedic director didn't come, and Zhang Fan didn't know the other deputy directors.

"There will be a banquet in the evening. You have a rest first. At that time, I'll ask Xiao Wang to invite you!"

Zhang Fan's main purpose this time is to get to know more people. There are his own masters and martial uncles. Sometimes he doesn't need the help of masters and martial uncles. Only a few elder masters have made Zhang Fan a lot more convenient.

Now the general surgery department of the tea vegetable hospital has been set up. Although it is not large, it is definitely the appearance of a three - or four-year-old boy getting up in the morning. Small is small, but it is absolutely hard.

However, at present, orthopedics is still not good, so Zhang Fan thought about coming to Liang's appearance this time, and then it would be better if he could get some fellowship with key orthopedic departments. Shuitanzi is too big and famous, there are too many people staring at it, and the relationship inside is more complex than spider's web.

Moreover, the director of shuitanzi's orthopaedic department is too difficult. Zhang Fan asked Wang Yanan to study last time. The old boy beat around the bush and swears, so Zhang Fan doesn't want to talk to the old boy very much. At least we have cards now. No, you can't say we don't understand anything!

As for other well-known orthopedics, Zhang Fan is really not familiar with them. It's not appropriate to take photos at home. Only at this annual meeting can he be qualified to have an equal dialogue with others.

### **Chapter 1033**

Zhang Fan took a bath and changed into a set of slightly more expensive clothes. Originally, Zhang Fan thought about how to be comfortable. As a result, he was comfortable, but others didn't take it as a dish, so he didn't have enough fame, so he had to rely on his clothes.

Zhang Fan's own clothes have never been bothered by himself. Shaohua's eyes are still positive. Of course, not sure.

"Hang ten thousand on your body. Hey, I don't see how much good it is. You should be careful even when you sit!" Zhang Fan said to himself and cleaned up for a while.

He thought that there must be many big men at the party tonight, so the suit, tie and leather shoes were called bright. Zhang Fan looked in the mirror and found that his tie was not crooked and his clothes were not wrinkled!

Before long, Xiao Wang of Johnson & Johnson came. The young man didn't receive Zhang Fan at the airport. Now he doesn't dare to explain the reception of Zhang Fan to others.

"Zhang Yuan, have you had a good rest? If you have a good rest, let's go. The manager has gone to prepare first."

"Oh, the dinner is not in the hotel?" Zhang Fan asked curiously.

"Hehe, the dinners you ordered are all for others. You entertain them alone."

"Oh, oh, oh!" Zhang Fan reluctantly touched his clothes, as if he had tossed in vain.

There are many leaders at Johnson & Johnson's annual meeting, the most of which are the main doctors in the surrounding hospitals. In fact, the main guests of the banquet are these main doctors, while the boss, Johnson and Johnson, are entertained alone.

Because Johnson & Johnson has been in this business for too long, he understands that it doesn't matter if the main doctors entertain together, and these doctors also like to get to know each other and exchange what they need.

But serious bosses are different. One doesn't like the other. In the face of money, everyone may have nothing at the meeting. If they get together in private, they can hold a protest meeting.

Therefore, people are treated separately according to their level.

It's hard to say what standards others have. Zhang fan can make people feel different.

The place to eat is Lianda tiger mountain or lion mountain. A club built in the middle of the mountain faces the sea seriously. Under the huge trees, water vapor floats around the club, just like it was built in mid air.

The clubhouse is not big enough. It's just a small building, the singing of birds in the mountains and forests, and the sound of waves in the distance. Standing here can definitely make people feel like they are waving. If they have a little literary talent, they can recite some poems. If they don't have any literary talent, they will definitely shout: fuck!

Xiao Wang drives a Volvo off-road. Chen Sheng is the co pilot and Zhang Fan is alone behind him.

"Originally, I prepared Mercedes Benz for you. As a result, a research meeting has been held here recently, so..."

Zhang Fan smiled innocently, but Chen Sheng said, "Volvo is also good!"

At the club, the manager is already waiting“ Zhang Yuan, ha ha, how was your rest? I made some small features. I heard that Zhang Yuan is not only a good surgeon, but also a gourmet. Today, please try the skills of the chefs here! "

The manager doesn't speak loudly. It feels like he has a close relationship with Zhang Fan. Such people are human spirits in human spirits. He is definitely an expert in how to deal with doctors and how to talk to each other.

Zhang Fan looked at Chen Sheng and smiled bitterly, "it seems that everyone knows my delicious problem!"

Chen Sheng smiled and didn't speak.

"Where, Zhang Yuan, you don't know we envy you. You can not only excel in your major, but also taste three flavors in your life. It needs great wisdom! Where, like us, is just to make a living! "

After entering the club, it was not as magnificent as Zhang Fan imagined. On the contrary, it gave people an antique feeling everywhere. When I entered the hall, I saw two women smiling and welcoming me. One was younger and the other was about thirty-five or six.

Zhang Fan is definitely an expert in judging people's age. The more familiar you are with human anatomy, the more accurate you look at people's age. In this age, it's not allowed to look at your face.

Generally look at the neck. The muscles of the neck are difficult to use. Then look at the thickness, that is, the thickness of the body. Especially slim women.

The younger you are, the thinner you feel. The older you are, the fuller and thicker you feel.

"This is Zhang Yuan! God, it's younger than I thought. No wonder manager Zhao said how Zhang Yuan is when he's free. Compared with other experts, Zhang Yuan is too powerful! "

The older woman smiled and stretched out her hands. The voice is particularly good, coupled with the generous manner, it gives people a feeling of spring breeze.

Johnson & Johnson's regional manager Zhao smiled and introduced Zhang Fan: "this is the host of Lianda health program!"

Zhang Fan shook hands with the other party, smiled and exchanged greetings. Then another young woman in her early twenties came over.

"Zhang Yuan, I've heard a lot about it. When you were in the magic capital, I was also in the magic capital, but I was lucky!" The eyes of young girls seem to be able to speak, with a slightly angry and regretful look. To tell the truth, it definitely makes people feel both serious and strange.

"This is the pillar of the provincial radio station!"

"Oh! Nice to meet you! " Zhang Fan's heart tightened and whispered to himself, what does manager Zhao want!

In fact, Zhang Fan thought too much. Manager Zhao entertained Zhang Fan. He can't pull people casually. It's not appropriate to pull men. It's not OK to pull Zhang Fan's peers over. There's no card in their company. Therefore, he pulled the hosts of TV and radio stations to too high standards of entertainment.

Moreover, the two of them actually came to dinner with money and left after dinner, so Zhang Fan thought a little deeply.

After all, I haven't seen the world!

The young lady sits on Zhang Fan's left, the slightly older one sits on Zhang Fan's right, and Chen Sheng sits next to the lady of the TV station. The regional manager should accompany, and Xiao Wang should accompany at the door.

"Zhang Yuan, let's have some Baijiu to help us?"

"I don't drink!"

Zhang Fan smiled“ Experts are experts. They are different from the doctors in the district hospital next to our unit. They drink at noon every day. They blush and have a thick neck! Why don't we have some red wine? "

The lady in the TV station laughed to get out of the encirclement.

Zhang Fan still smiled and shook his head.

Although Zhang Fan said he didn't drink, the wine came up. The white one was Maotai in yellow porcelain bottles. This wine is very rare in the market.

Red wine begins with an R. Zhang Fan knows at a glance that this thing is not Jinmao or Sandao, because there is a dot on one of the e letters!

In fact, it belongs to Romani Kangdi. It is said that this thing has the same status as Maotai in China.

### **Chapter 1034**

There is a saying in the Jianghu that leaders are not afraid to speak principles, but they are afraid that leaders have no hobbies. To tell you the truth, some people really try their best to blend.

Bit by bit, patience is definitely better than when a gentleman faces a sexy woman.

Johnson & Johnson did quite well in hospitality. Those who love playing cards, take them to play cards, like singing and dancing, and take them to magnificent entertainment places. Those who love face try to get even the top clubs. It's just money.

It's really hard to entertain people like Zhang Fan who are delicious and can eat. Sometimes he thought, isn't it good to have small leather skirts and long legs? Don't people all say that young people are anxious? Why is this not in a hurry!

It's really hard to mix porridge with red mud stove and plain hands. It's not only high-grade, but also quality, not only quality, but also characteristics. To tell the truth, it's more troublesome than finding two past stars for this meal.

"What tea will Zhang Yuan have?" Young women in TV stations are as enthusiastic as their hosts and don't fall into kitsch. Those who can master the heat are definitely those who have seen the big world and the big scenes.

In the early years, most of these characters were in various art groups. Later, I don't know why. It seems

that they have moved to some low-key and luxurious places such as TV stations. When the little people were still discussing stars and nurses, they had changed into gorgeous people.

"Our Zhangyuan likes to drink Tieguanyin!" Human essence is human essence. Chen Sheng's worldly sophistication has really reached the point of perfection.

Because he saw uneasiness and resistance in Zhang Fan's slightly inclined body. Zhang Fan's smile at a little girl, such as a girl with a head, can make the girl cry.

This kind of young women who come and go in the wind and rain are different. Zhang Fan was caught off guard by a frown and an anger. If you are a greasy man, you may be able to mix up an affair by pinching your hands and rubbing your thighs in the gag department.

But Zhang Fan is different. Speaking rationally, although Zhang fan does not have a particularly clear development direction for the future road, he is clear about what he can't do. This is thanks to the fact that he pursued others when he was in college, and others gave him a social class early in the morning. Keep this string in his mind.

Even after work, Jia SuYue gave him a good lesson. So this person, ah, can lose face in college and lose everything that should be lost in college early.

Not a few generations have said that people who have really seen and experienced in their youth or who have fallen and then got up in their youth will resist the temptation of honey.

It's hard to say whether it's right or not, but Zhang Fan thinks very thoroughly about men and women, with the female classmate and later Jia SuYue at the bottom of the two bowls of wine.

Chen Sheng put Zhang Fan as the real leader. He knew it was his turn to do it.

This is also the reason why Ouyang let Chen Sheng follow Zhang Fan for the first time after Zhang Fan became the executive president. It can be said that Ouyang and Chen Sheng are really social people, and Zhang Fan is still very young.

After all, the young woman is a young woman. Zhang Fan is really overwhelmed, but Chen Sheng's action is different. He pulls the young woman to gossip. Chen Sheng can say that people who don't touch the body at the hospital affairs meeting are very good at talking.

Chen Sheng pestered the young woman, and Zhang Fan was relieved. It's easy to kill the young girl on

the other side. After all, she's young and tender. She's relatively reserved.

After a while, the tall cheongsam waiter came with Tie Guanyin asked by Zhang Fan. Zhang Fan took the opportunity of drinking tea and bowed his head and didn't talk much. As soon as the young girl around him spoke, he quickly brought the tea cup.

Looking at Zhang Fan's posture, Johnson & Johnson's manager also understood that Zhang Fan was not in the way, so he put out his heart to find a way to reconcile. He also understood that it was definitely not for nothing to be so young and reach such a high level. If any two shells are knocked over, he should really advise the company to be careful.

Therefore, looking at Zhang Fan who keeps drinking tea, the regional manager of Johnson & Johnson is more humble and enthusiastic. In fact, people are like this. If they have some ability, the more they have integrity, the more they respect others.

"Zhang Yuan, I heard that you like seafood. The skills of the chefs in this place are handed down by the older generation. They definitely didn't learn from Dongfang next door. Try today to see if they are true."

The regional manager smiled and said to Zhang Fan.

Zhang Fan smiled and thought to himself, "whose mouth is so broken that the whole world knows that I Zhang Fan is a eater!"

After all, eating goods is much better than rogue doctors.

Before long, the dishes began to come up like running water. And the fat cook and the lobby manager smiled and introduced the dishes in person.

Strange to say, even Daming is the Pearl of the northeast, but many people not only talk like Dongshan people, but also taste like oysters.

Sea cucumber is not a special braised fish in the north, but a small bowl mixed with small fish and shrimp. There is no oil flower in the clear soup.

Black and gray sea cucumber, slightly white fish and shrimp, and a little coriander floating in the bowl look good.

Under the watchful eyes of the fat cook, Zhang Fan originally wanted to use chopsticks. As a result, people said that this dish should use a spoon. Under the suspicious eyes of the fat cook, Zhang Fan gently dug up the sea cucumber with a spoon.

Zhang Fan didn't use the right tools. It is estimated that the fat cook wondered whether the gourmet could be a high imitation.

In fact, in the early years, sea cucumber was not a precious dish. I don't know that since that year, the price of sea cucumber jumped up like donkey skin.

Donkey hide glue, in particular, was actually made of cow leather in the early years. Later, the black donkey skin was conceptualized anyway.

Gently put the spoon into your mouth, huh! It's tasteless and sticky. You can't use your teeth. Your tongue crushes the sea cucumber as soft as tofu.

Zhang Fan's face has changed.

The chef is really a little level. When Zhang Fan's tongue crushed the collagen outside, the endothelium of sea cucumber could give Zhang Fan a crisp and fragrant feeling. When he bit the endothelium of sea cucumber, the taste burst out.

Fresh, the delicious fish and shrimp came out at this time. When Zhang Fan's face changed, the fat cook smiled.

He was afraid that the gourmet who was taken care of by the key could not eat it!

The final dish is a stone headed fish, but Zhang Fan doesn't think there is anything excellent. Zhang Fan's Gourmet was praised by others. But the seafood in the north is really better than that in the south.

Zhang Fan ate a lot of shrimp and crabs, which also made the fat cook feel like a seed tooth hanging when he went out.

The next day, the meeting began. The first speaker is the chairman a of the joint committee. The old man is about 70 years old. Zhang fan can listen to the English speech eight or nine times, but fortunately there is a simultaneous interpreter.

When Zhang Fan came, he always felt that how tall such a meeting must be and how high-end academic issues should be raised by the speakers.

As a result, the first half of the old man talked about his experience as the director of orthopedics in HSS hospital. In the middle, he talked about what level of papers he had published. Finally, he gave you a slide about the surgery he had done many years ago.

It's all Johnson & Johnson's equipment. Although the old man didn't mention Johnson and Johnson when he spoke the report, the sign of Johnson and Johnson in the last huge display was particularly conspicuous.

After the old man got off the stage, Zhang Fan thought to himself, this may be a person like an honorary consultant, or a warm-up person. There should be something behind him.

The second deputy director of Huaguo shuitanzi, who is also the president of any association, has not changed. First blow his own hospital, then blow his own paper, and finally put the slide of his own surgery.

Two warm-up? Zhang Fan wondered. He looked up at the doctors in the meeting room under the main stage. In addition to the last younger, it is estimated that the graduate students brought by the tutor to see the world looked at the speaker on the podium with an admiring eye. The other slightly older ones either looked down at their mobile phones or looked up in a trance. Some even fell asleep. It is estimated that they were too tired last night.

Third, the orthopaedic director of harbor Santa Maria came to the stage and spoke standard three Island English. However, this one talked a little about his scientific research direction, but he also tasted it. It's about how powerful you are.

Zhang Fan is really disappointed. He wouldn't have come if he knew it was all bragging. Did you come so far to practice listening?

Zhang Fan spoke in the sixth position. If he hadn't been on the podium, he would have wanted to go out for a walk. It's so boring.

Finally, Zhang Fan felt that his preparation was neither fish nor fowl.

He wanted to discuss the forward-looking problems of orthopedics with the best of his peers. As a result, others were all bragging.

However, Zhang Fan didn't want to change his speech. It's not too late. It's about doing something and not doing something. Bragging is great, but it's useless.

When Zhang Fan stepped onto the podium for his speech, a burst of whispering began in the venue. In the lecture hall with thousands of people, everyone whispered together, mixing up like a plane taking off.

Because every speaker on the stage will have a brief introduction on the screen behind him, such as what hospital, University, position and paper he has published. At present, he is doing what position in what hospital or university, studying what, and then lists the projects that the speaker is good at.

For example, the golden haired old man is good at the spine.

When the stage was buzzing, many sleepers woke up. I didn't know that another meeting was over.

Some young doctors at the back seemed not as big as Zhang Fan. Looking at the profile on the monitor, they were more and more surprised.

It's not surprising that Zhang Fan became Dean at such an age. It's surprising that the introduction is too simple. No papers, go abroad, No. I haven't even heard of the hospital as president.

That's all. What they can't accept most is that surgery is good at one, covering almost all disciplines of orthopedics, from trauma to spine, from outside the hand to joints.

"I'll go! This is awesome. It's more powerful than the main a seat of Jinmao and the deputy director of shuitanzi ~! "

"Don't you see that he is the dean? It is estimated that large equipment will be imported into their hospital this year. Johnson & Johnson has to lick it! Alas, what's the use of our hard education? It's better for others to have a good father. "

"How do you know they have a good father!"

"You're stupid. You don't have a good father. You can be the president of the third class hospital at such a young age. You don't understand! Brother, you can't just read! "

Most young doctors think so. Because Zhang Fan is too ordinary, too unknown and too young.

Young students have created a distrust of the world.

## **Chapter 1035**

If young people think Zhang Fan has no achievements and no fame. The most important thing is that Zhang Fan should stand on the stage with his skirt, so he is very unconvinced.

Young people are not convinced, but they don't dare to make trouble. For them, what is this place? It's a teacher and the scenery of the Department Director. Even if they feel uncomfortable, it's the most important. Whisper it.

However, some doctors in the middle and back row are not happy“ Why can you go up and let me sit down. The hospital president you haven't heard of is still standing. Why, why don't you stand on the podium in front of so many peers and speak? Why don't you let me go on such a beautiful thing? "

Zhang Fangang came to the stage. He originally wanted to introduce himself. Others introduced him and he was ready to follow the rules. As a result, there was a buzz below, and many of their peers wanted to stand up.

"Hey! Everyone probably knows me. But how can everyone look so serious! " Zhang Fan thinks a little beautiful. To be honest, it is not easy to get the recognition of his peers in the medical industry. Because

the venue is too big and too far away. Even closer. Hearing what everyone said, it is estimated that Zhang fan can be confused.

Fortunately, Johnson & Johnson's emergency measures were also very powerful. Before long, many doctors' corresponding support entered the venue. Some beautiful ladies squatted beside the doctor and whispered something.

If you really according to fame, the number and quality of published papers, Zhang Fan is really a little reluctant to stand here.

However, this place is not a serious meeting of the doctor's Association. Other people's Johnson & Johnson is to sell goods. How powerful Zhang Fan is. Now, in terms of intestinal endoscopy, MARUKI won the first place, and the general manager of Johnson & Johnson China beat the table angrily.

Therefore, this time they want to win Zhang Fan on the spine and joints. Although Zhang Fan has no papers, no fame, and is not a professor of any school, his surgery is too powerful.

This also explains a thing from one side. It is not exaggeration to really understand who is good in the medical circle, not doctors, but these device manufacturers and drug agents.

The beautiful little sister of Johnson & Johnson finally calmed the doctors with sweat. In fact, if it comes to routine orthopedic surgery, none of the doctors sitting here is Zhang Fan's opponent.

Not only the main a seat of Jinmao's show all over the world to make money, but also the deputy director of shuitanzi. In routine orthopedic surgery, none of them is Zhang Fan's opponent.

However, Zhang Fan's current difference lies in diagnosis and Frontier Medical Research, which is his weakness.

Diagnosis is accumulated by countless patients over countless years. Frontier research is made of real gold and silver.

The system can only exercise his treatment of known diseases, but does not train his diagnosis. Because orthopedics is only level I, there is no prospective training in the system.

If we really rely on money to pile up, to tell the truth, let alone anything else, we may not be able to support the tea government's tax by pawning pants. It is a cutting-edge research in orthopedics. Therefore, it is really an unimaginable thing for China to catch up with the first group from a group of barefoot doctors in those days.

Everyone finally quieted down.

The people on the podium also began to inquire about each other at this time.

"Who is this?" Several doctors in China inquire about each other.

"Who is this?" Jinmao and the doctors in Gangwan inquire about each other.

"It looks a little familiar. I can't remember it." The deputy director of Shuitanzi hospital felt his head and thought.

In fact, what he is familiar with is not Zhang Fan, but the name of Zhang Fan, because they are the chief director of, who once said so.

At this time, Zhang Fan spoke.

"Dear teachers and colleagues. My name is Zhang Fan. I'm an orthopedic doctor in the tea vegetable people's hospital! "

To tell the truth, this is Zhang Fan's most confident self introduction.

In the past, in general surgery, outside the chest and outside the brain, he really didn't dare to say it out loud. Every time he was asked by others, there was no way, so he said that he was an orthopedic doctor.

Really, Zhang Fan was embarrassed. His registered orthopedic doctor went to someone else's table for surgery. It was really embarrassing, and he was often found and questioned by others!

Now, finally, I can say loudly that I am an orthopaedic doctor. Today I am here to attend the meeting of the Orthopaedic Association.

When Zhang Fan began to talk, he didn't sleep at all. Because he couldn't get on the stage, he felt that he was no worse than anyone on the stage. Now it seems that there is someone who is obviously worse than him. He doesn't sleep. He stares at his big eyes and must see what the boy can say.

The young doctors are even more attentive. They are more serious than the previous ones. They think that if they can find out some mistakes, and then stand up and point them out to him loudly, they will not only get the praise of the teacher, but also the appreciation of their predecessors and the envy of their classmates. Their imagination is beautiful.

Therefore, one is more serious and one is more concerned.

Although Zhang Fan chose the same beginning as the previous few, he introduced himself.

But he didn't brag. He doesn't think it's interesting. If there is no system, he is an ordinary doctor. With the system, he has honed his technology in the system. To tell the truth, let him boast how powerful he is, he will be ashamed!

Therefore, after the self introduction, Zhang Fan directly opened his notebook and transferred the documents prepared in recent days.

A title appears on the super large display screen behind you!

"A small summary of orthopaedic surgical techniques!"

When the title came out, everyone was stupid! Really, I'm not scared silly, but I think the doctor on the stage, the so-called executive dean, is too shameless! Take yourself too seriously.

In particular, some doctors sitting in the middle twisted and smiled at each other with the people around them.

"Hehe, I'm kidding. Tell us the summary of the operation in front of us. Hey! I don't know how he will step down if he is asked by the eager students behind him! "

"You can step down as you want. Anyway, the president of a small hospital in a small place doesn't know him. What's wrong with him. Take some photos standing on the stage and go back. Maybe from the executive dean to the dean. It's all routine operation, man. Johnson & Johnson has fallen! "

"Yes, I've fallen. What did you say you did! What a shame! Now, this man is too careless! " A deputy director, whose eye blebs fell like drooping something, said in an atmosphere.

He didn't say it last night when he had a glass of wine with his little sister with his 82 year royal salute!

The main reason is that Zhang Fan's hospital is too unknown. The doctors of the previous hospital have not entered the eyes of the foreign equipment manufacturer since ancient times, so everyone doesn't understand. Of course, Zhang Fan doesn't understand.

A serious and arrogant doctor, who will attend such meetings to endorse Johnson and Johnson? They are all doctors who can't go up.

Once Zhang Fan enters the working state, he doesn't care about the external environment at all.

He doesn't care about the brilliance of everyone below, but he must tell what he has prepared.

These are all his own perception and summary when he honed in the system.

"Spine!" A three-dimensional spine appears on the display screen, but for Zhang Fan, this spine can not accurately express his honed technology.

Pull over a white writing board, and then use an oily pen to draw the split surface of the spine on the white writing board without tools.

When Zhang Fan opened the orthopaedics department, he didn't know how many such decomposition drawings he drew on the papyrus. It can be said that he drew bald pen and years.

When Zhang Fan drew the first exploded view on the writing board with his bare hands, the young doctors in the back of the hall not only couldn't help taking a breath.

The painting is too standard, just like rubbing on the writing board. Moreover, what surprised them most is that Zhang Fan's decomposition diagram is finer than that in the textbook.

Front, side, sagittal plane, three exploded views, Zhang Fan took about ten minutes.

In these ten minutes, the young doctors in the back row changed from initial surprise to slow shock. Finally, they took out their mobile phones wisely, Kaka! Just start taking pictures.

I can only take pictures, because Zhang Fan's painting is too detailed and standard. The standard is so detailed that others can't imitate it.

One took the lead and others began to realize it. Some even ran to the front desk of the venue from the back row and wanted to stick it on the writing board.

Someone even whispered, "I'll go. Why did I get a missing apple? Why didn't I bring my SLR!"

The greasy doctor with swollen bags under his eyes said to another doctor: "cut, what's the use of good-looking painting? Find two students from the Academy of fine arts, and the painting is much more beautiful than him!"

He doesn't know the goods, but the one around him knows the goods.

As if he hadn't heard the words of the people around him, he stared at the decomposition diagram of the spine, just as if he were crazy. His eyes didn't move.

"So it is, so it is. It turns out that a slight nerve deviated 39 ° out of the intervertebral foramen. God, why didn't I see this picture in those years."

Human anatomy is the basis of medicine. It can even be said that it is the most basic discipline.

It seems very simple.

In fact, Zhang Fan's martial uncle made an anatomical map of the Chinese liver, just like the atomic bomb explosion in China, and put a mushroom cloud in the medical circle in China.

Why is everyone so shocked?

Because people are different, textbooks and even some old anatomical books, such as the famous knight, are actually the most common anatomical drawings.

And some subtle changes can't be painted at all.

Because this thing is slowly cut and described one by one from the specimen. A muscle, without more than 100000 specimens, does not dare to draw special variant structures.

More than 100000 specimens, or specimens that have not died for a long time, to tell the truth, it is difficult.

However, the more advanced the medical treatment is, the more attention should be paid to nuance. You don't know a variant nerve. If you cut it all at once, the patient will have inexplicable paroxysmal pain.

The doctors are crazy. They have done the surgery according to the textbook very carefully, but how can there be such obvious neuralgia?

Because there are not a large number of specimens for them to summarize.

But Zhang fan does. He doesn't have any specimens in the system.

Therefore, when he drew the nerves that had not been described in the textbook bit by bit, the venue was completely boiling.

The foreigner of the golden Mao Kingdom directly raised his hands and changed his fingers to grasp, just like Lord Wei's Dragon's grasp, "Oh, God, how did he do it? God, he must be the devil from hell, God!"

Three pictures!

After painting, Zhang Fan gently put his pen on the podium and quietly looked at the venue below.

Originally, I wanted to quietly accept everyone's worship. I was finally able to be proud of the discipline I chose for money. I could finally pat my chest and say that I Zhang Fan didn't have only money in my eyes.

As a result, a timid and wronged female graduate student stood on the edge of the podium and

whispered to Zhang Fan, "teacher, teacher, teacher!"

Zhang Fan looked at it with questions.

The girl finally said boldly, "can you step aside a little and let me take a picture? I can't take a picture of the sagittal plane." When she said this, the girl felt like crying.

## **Chapter 1036**

Although Zhang Fan still wanted to enjoy the hot eyes of the people for a while, he smiled and gave way to the timid girl like a little bird.

People who love learning can still be liked, especially learning their own knowledge.

Everyone knows the goods. The higher the level, especially orthopedics and extracranial doctors, the higher the requirements for anatomy.

For example, athletes' Achilles tendon surgery should not only ensure people's sports career, but also achieve the fastest recovery with the least damage. This kind of surgery is not just three steel nails and one suture.

It's true for people in ordinary industries to use this method, but for athletes who often have to break through the limits of physical function, it's tantamount to destroying other people's sports career.

When this happens, the importance of anatomy and fine anatomy is highlighted. This is why so many top athletes' operations are performed by a team of Jinmao, and doctors and even hospitals in other countries dare not think about it.

People spend a lot of money on basic knowledge. Of course, this knowledge will not be told to others in vain.

Doctors who are not nationals of their own country do not sign a contract for half a lifetime, do not sign an expensive confidentiality agreement, let alone learn. This kind of operation will not let you see it.

That's it. Many foreigners are fooling Chinese people. Knowledge knows no borders! You must be selfless!

So when Zhang Fan released three exploded views, red blood vessels, blue nerves and yellow muscles.

It almost includes all kinds of situations in which relevant tissues around the spine can mutate. Zhang Fan writes clearly and speaks plainly, and even the approximate probability of mutation is marked on the writing board.

The young doctors hurried to take photos, copying what they wanted to copy with manuscript paper.

Sitting in the middle, the doctors are worried. I wanted to go and have a closer look, but I didn't think I could save face. How old is this guy on the podium and how old are we.

So just like a needle in the ass, the soft VIP seat is not easy to sit.

With students, look left and right to find their own students to see if their own students have taken photos and copied them.

Seeing his students scrambling to be in front of the crowd, he will sit in a stable position with a smile, as if nothing had happened.

Incidentally, he also slightly despised his colleagues who couldn't sit next to him with the corners of his eyes.

If you can't see your students taking photos, you may already be angry.

Those without students or apprentices scratched their ears and cheeks. I'm afraid of being laughed at by others. It's really difficult.

"Well, please go back to your seats first. Don't affect our teacher Zhang's report. We Johnson & Johnson have made super clear shooting of the pictures on the writing board, and we will go all out to strive for teacher Zhang's authorization to our company, and then our company will distribute them to you free of charge."

A lady with a good temperament and strong ability to control the situation came forward with a smile and persuaded the students to go back. Then he turned his head and smiled at Zhang Fan, gently lifted his right hand and made a move for Zhang Fan to continue.

You don't have to talk. Your eyes are full of stories! The movements are so elegant!

When Zhang Fan stood on the writing board again, everyone looked at Zhang Fan quietly and sat up

straight.

Only the top doctors in the first row are different. They don't talk anymore.

In particular, the deputy director of Shuitanzi quickly sent a text message: "do you know tea vegetable Zhang Fan? Who is his mentor or teacher? Yes, please hurry back! It's urgent! "

He felt that this kind of anatomical map should not be studied by such a young man. Even if he began to study anatomy when he wore open crotch pants and exposed a small bell, he could not have such a powerful research.

Anatomy is not only about talent, but also about quantity.

As for the detail of the drawing on the writing board, even if Zhang Fan is referring to the experience of others.

This kind of anatomical map can never be drawn without tens of thousands of hands-on anatomical specimens. For example, he can't draw it himself.

This thing is Ding Mao and Ding Mao. It can't tolerate any falsehood. You know it, but you can't make it up if you don't know it.

What's more, Zhang Fanyi, President of Northwest small hospital, where can he find so many specimens!

So there is only one answer. He has a very awesome teacher or school. But the Chinese orthopedic community has not done so thorough research in the field of anatomy. Are they university professors? But I don't seem to have heard of it, otherwise it would be famous all over the world.

He was going crazy. If the teacher who worked out this picture could teach him, he felt that he could go further in the fine surgery of the spine, and the surgical level could definitely be improved by several grades.

He is really worried now, because he knows that everyone may be overwhelmed by the picture in front of him at this time. As long as you calm down a little, you will definitely think about the truth in it.

Therefore, he is going to grab in front of everyone now. Resources are so little, slow, slow!

After drawing the picture, Zhang Fan took the electric light pen and began to continue his report. To tell the truth, why do the first few of Zhang Fan like to boast and talk about their past achievements when they stand in Zhang Fan's position.

For money is on the one hand, but on the other hand, who doesn't like to receive the same look from everyone is not a saint. Of course, let Zhang fan blow his achievements, Zhang Fan may blush and can't

say it.

But through their own knowledge, through their own knowledge, let thousands of people in the hall swing left and right with his language and his thoughts. It's so cool.

Look at the stars in everyone's eyes. They are brighter than the flash. Really, Zhang Fan is particularly satisfied. This is another sense of achievement, which is different from the sense of achievement of surgery.

Maybe this is the special feeling of being a teacher! This may be my awesome feeling!

"It's good to have a higher education. After all, your experience is different! There are still people who know the goods! "

At this time, Zhang Fan was also very emotional. When he taught Wang Yanan with his hands, the silly girl asked Zhang Fan in a questioning tone whether he drew wrong? Why is it different from the picture in the textbook?

Zhang Fan coughed a little. With his coughing, the slightly excited crowd immediately quieted down.

Explain? No, this kind of picture is like a movie with mosaic. If you understand it, you will understand it. If you don't understand it, you will not understand it. Everyone is an old hand in watching movies for many years. Zhang Fan doesn't have to talk nonsense in this regard.

If you really don't understand, go and make up the foundation first. Although this kind of report has a strong and pungent commercial flavor, it's still not very friendly to learning slag. If you don't study well, you can't understand the arrogance of the bosses on the podium!

Zhang Fan cleanly and directly enters the theme without procrastination at all.

"Let's talk about the approach of spinal surgery first. Preoperative MRI is necessary, which doesn't need my nonsense. When the spinous process and lamina are stripped outward, we must pay attention to that there is a wedge-shaped muscle here.

It's easy to cut. If you want to repent after cutting, I can't do it, so... "

When Zhang Fan began to talk about the surgical approach skills, the picture of Zhang Fan's first shot at the tea door appeared in the display screen. A picture of a bullet stuck in the cervical spine.

Skill, what is surgical skill? This thing is the experience of doctors who have honed their skills. Everyone has his own skills. This skill rarely appears in textbooks and is almost passed on by word of mouth.

And it is often difficult to buy. Many times, even if you have money, other doctors may not sell it!

But Zhang Fan is not conservative and has no private possession. He is not afraid of others to surpass him, because he has confidence and he also has roaring combat effectiveness.

The young doctors below were so intoxicated that they didn't dare to blink. What's this? It's the experience of blood and life. It's no exaggeration at all.

This is higher than the previous bragging experts. I don't know how many levels.

At this time, they had no idea that Zhang Fan was standing on the podium by his father. Really, there was no more.

Some graduate students who fail to keep up with their good tutors, and the graduate students who wash their socks every day by the teacher, have tears coming out and have to listen on their knees. This is knowledge, this is the teacher, and this is preaching and receiving profession to solve their doubts!

The middle and senior doctors who already have self-level and Self-technical means are different. They are confused! It's really messy. Not only the brain is confused, but also the heart is confused!

"His approach does reduce the secondary injury rate and is definitely better than mine. But this will also increase the difficulty of the operation and increase the operation time accordingly! This, this is really hard to choose! " Just as they meditate.

As Zhang Fan explained the operation into the operation, he began to slowly connect his skills, just like a set of system, slowly presented in front of everyone.

At this time, although the young students and graduate students understand that the young teacher on the podium speaks well and badly.

But they can't understand where it is and where it is. Because it's too hard. Now they can only refuel to memorize by rote, and then with the changes of the sun and the moon, they will experience and feel it in their future work.

At this time, it was all elderly doctors who had soaked in the operating room in the hospital for no less than 15 years.

"Oh, my God, so it is, so it is! What a coincidence, really, what a coincidence. God, why, why, why didn't I think of it? Why didn't I think of it.

The skills I summed up can't be taken in front of his skills! Have I spent so many years in the operating room? "

Really, many middle-aged doctors began to ask in their minds, who am I, who am I, who am I!

When the picture of the bullet stuck in the cervical spine was released, the doctor in shuitanzi almost

jumped up. If it weren't for his usual professional quality, he really jumped up.

Because this picture has a profound influence on him!

"Isn't this the operation case that the chief orthopedic officer of our hospital told us last year? I'll go. Even the photos are taken by our boss. I'll go. This boy is too brave. Where did he get the photos? "

People are different from others. Just as young people look at the opposite sex, they usually look at their faces.

Middle age generally depends on temperament and figure.

It doesn't matter if you are an old man, as long as you are younger than him!

When the boss of shuitanzi orthopedics talked about the operation case, everyone was paying attention to the operation pictures, the difficulty of the operation and the steps of the operation.

As for others, as for who did it and what hospital did it. They don't care.

Because it's not necessary, because as long as they don't count foreign countries, they are the best in orthopedics.

They are kings! Especially in spinal surgery, they are proud of their qualifications.

As a result, today some people show off their boss's photos of his boss in those years.

Is this tolerable? I didn't use it. You, an irrelevant person, dare to use it!

He wanted to accumulate his momentum and sent a message to the director of orthopedics in his hospital, "director, I'm Xiao Li, Xiao Li Mingliang of the Sixth Department of spine.

Someone has plagiarized your operation photos, and openly said that he did it. They all got to the Johnson & Johnson annual meeting! "

After sending the text message, he is ready, ready to fight, and ready to defend the interests of his old boss. It would be better if he could get the anatomical map of the professor who gave the boy by the way!

Both fawning on the big guy and getting what you want, hey! It's beautiful to think about it.

What is opportunity? This is opportunity. How many opportunities can you fly over in life? Really, God is so kind to me!

He can think of his boss. The boss patted him on the shoulder and said: good. Or look at yourself with a

different look!

Really, it's so beautiful. It's so beautiful that his legs are like touching electricity. The shaking can't stop!

He held his mobile phone and waited for the boss to recover. His fingers were blue. He had prepared in his mind how to say, how to poke the boy's lie, and how to let his boss know his achievements.

### **Chapter 1037**

Before long, there were more and more SMS replies in deputy director Li Shuitanzi's mobile phone.

"I don't know. Zhang Fan has never heard of tea! When will you come to Sanchuan? I haven't seen you for a long time!" This is his classmate in Sanchuan orthopedics.

Many people don't know. He doesn't care at this time. He is now waiting for his chief director to send a general attack signal. As for Zhang Fan, it doesn't matter!

Isn't he the executive director of a small hospital? He doesn't even pinch his eyelids.

As a result, the students who were engaged in general foreign studies sent back a message, "you said tea vegetable Zhang Yuan and Zhang Fan. He is a disciple of Qingniao, academician Lu, who is Qiu's disciple in Qingniao.

Zhang Yuan is also a disciple of Qiu sect. He has performed liver and gallbladder surgery very well. He is estimated to be better than blue. Old Wu of Fangdong, the magic capital, especially appreciates him!"

Other experts on the podium also received inquiries from mobile phones. Several people looked at each other and saw that they thought differently from each other's eyes. Yes, they just couldn't figure it out.

Meow, is there a general doctor on the stage? We were frightened by the doctors in general?

Looking at the message sent by the students in the mobile phone, "what and what is this!"

As for Lu Lao and Wu Lao, director Li doesn't care. Anyway, he is not a general foreigner.

After reading the information, he looked up at Zhang Fan. He wondered, "what's wrong with this young man?"

Just when he was wondering whether there was a problem in Zhang Fan's brain, the information from the chief director of his family came. Director Li quickly opened the mobile phone text message.

Lao Zhao, director of Shuitanzi Orthopedics University, sent a text message to deputy director Li's phone. Looking at director Zhao's reply so quickly, he claimed that Xiao Li's deputy director was as sweet as honey. Although he is also known as a director.

But it's still a long way from my senior director.

"Who asked you to attend the annual meeting held by Johnson & Johnson? The hospital has repeatedly stressed that it should not participate in the commercial annual meeting as much as possible. What's the matter with you? Didn't your director convey the spirit of our orthopedic meeting? "

Lao Zhao's information, like a mace with barbs, directly stunned director Li.

"Isn't the point that someone plagiarized your surgical photos?" Lao Li's cold sweat was on his forehead, and he didn't dare to curse Lao Zhao in his heart. When he was thinking about how to reply, Lao Zhao called directly.

Lao Li's frightened mobile phone almost fell to the ground. Looking at Lao Zhao's call, his hands shook.

What's the matter? What's the matter with the world. Doctors in general surgery engage in orthopedics, and their chief director investigates their own problems regardless of whether their surgical results are plagiarized.

God, what's the matter.

He didn't dare to delay any more. He didn't care about the etiquette of the venue. He picked up his mobile phone and ran towards the side door of the venue. The one who runs is called fast, and the one who runs is called desperate.

But everyone was listening attentively to Zhang Fan's report, and no one paid attention to him.

"Director Zhao..." just connected and called director.

The other party interrupted him.

"Tea vegetable Zhang Fan also went to Johnson & Johnson's annual meeting?" Lao Zhao's familiar voice sounded in his ear.

"Yes, yes, yes, Zhang Yuan is making a report now!"

What stood up to pick things up, what stood in front of Zhang Fan to pierce his lies, what looked different, what patted on the shoulder, all turned into ash.

Because when he heard Lao Zhao say Zhang Fan, he had heard it. Zhang Fan was very familiar with his senior director. He had been speculating about the tone of his senior director for some time.

Therefore, he didn't even dare to shout out Zhang Fan's name directly.

He's almost crying. What's all this? If he doesn't take out the dung well, what will he do in the orthopaedic year. I knew I didn't have much to do.

Really? The fox didn't even touch its hair and provoked a coquettish.

"Oh? He gave a report, too! Hey, he's not ashamed of what he can do and what he will do! Isn't he a foreigner now. How many orthopedic operations has he had? "

Director Li seems to hear a strong smell of vinegar from the phone. As long as he doesn't pursue the problem that he doesn't understand the spirit of the meeting, even if his director has the smell of smoking, he doesn't care.

"I'll fax his report to me later. I'll see how he stands in front of his peers and says he's an orthopedic doctor." Then he hung up. Also did not pursue director Li's problem.

This kind of thing is actually a matter of turning a blind eye. Just knock it. It doesn't mean much if you really want to investigate. If he is not obedient in the future, this time it is to clean up his reason. Turning a blind eye is the right way.

Not to mention, Dr. Li came into the meeting sweating.

Lao Zhao, who was far away in the capital, thought of the boy at home. The boy who seemed simple and honest but actually was a thief like a monkey, so he didn't fight anywhere.

Lao Zhao loved Zhang Fan deeply and hated him deeply. At the beginning, he wanted this bastard to be his own student regardless of his old face. As a result, he said he followed Lu Lao.

Obviously, he was so talented in orthopedics. As a result, he said he wanted to be a general practitioner. If he didn't want to be here, he couldn't force people to be difficult. And I can't bear it. Who makes his card less powerful than the ancestors of Qiu sect.

It is not in vain that he can choose Qiu Pai, a general foreigner.

But the bastard turned around, and now he even claims to be an orthopedic doctor. He swaggered all over the world to participate in the annual orthopedic meeting. It's really that the tiger in the mountain is not at home and let a little hairy monkey be the king.

Lao Zhao's rice was not delicious, and the watermelon in his hand was not sweet. He sat on the sofa and didn't do anything. He waited for Xiao Li to pass on the bastard's report and see how he taunted him, making him swagger around the world.

You come to orthopedics as a general foreigner. Hum!

Lao Zhao was gnashing his teeth on the sofa. In fact, there may be a trace of expectation in his heart.

Really, persistent and stubborn cute. This indomitable and serious character is probably one of the qualities that he can make achievements in orthopedics.

.....

The venue of the annual meeting of Johnson & Johnson orthopedics of Lianda University.

As Zhang Fan's report became more and more advanced and skilled, the young doctors in the back row began to listen to the book that day. Some of them with poor talents died of pain.

There are also those who are not painful, because they do not understand, which does not hinder him from showing off.

Taking the photos taken by myself, I chose the middle one, the endless anatomical decomposition of the sagittal position of the spine, and edited it: Well, I'm lucky to listen to Mr. Zhang's report on the spine this time. I really have a lot of feelings! Work hard, come on, love yourself!

Then next to the sagittal picture, I took a picture of myself with scissors. Of course, the most important thing is to take the participation certificate hanging around my neck as if I had accidentally taken it in.

Then click release, and then refresh the QQ space, waiting for the envious reply from the master students who did not read the master's degree and were not qualified to participate in the meeting.

### **Chapter 1038**

In QQ space, more and more people leave messages.

"Big man, awesome!" This is the upper berth of Zengjin University. After graduating from University, I

didn't take the postgraduate entrance examination. I went straight back to my hometown. It is said that I worked as a physician in a county.

"When I went, director Yang began to attend the annual meeting. This makes me wait for the weak chicken to tremble! "

This was a class in that year. It had something to do with my family. After graduation, I stayed in a hospital in a provincial capital city, but the hospital was a third-party B. I didn't think much of Mr. Yang before. Now I'm very polite. I guess I was slapped in the face by the society.

"Wow, how awesome!" This is the reply of the class flower in that year, and then before long, the class flower sent a QQ private letter: I'm reviewing recently and want to test the graduate students in your school. You have to help me. If you pass the exam, are you going to call my junior sister? Finally, with a little heart.

Looking at the reply of my college classmates in QQ space, I was still happy! Especially when he saw the reply of the university class flower, he looked up at Zhang Fan on the podium and looked down at the reply of the class flower. Unconsciously, he felt that Dantian was a little hot. Then, I couldn't help but separate my legs!

However, I still despised a group of students in those years. Learning slag is learning slag. I can't understand such a powerful anatomical map!

After a while, the objects he really wanted to show off finally sent a message.

"I'll go, Lao Yang. Who made this exploded view? It's so high! Can you send me a copy of the full frontal, lateral and sagittal plane? If there are anatomical decomposition drawings of other parts, all of them. I'll invite you to dinner when you come back! "

This is a department, but not a graduate student with a mentor. They have a good relationship.

Yang, who was rowing at the meeting, sent the picture. Before long, more and more graduate students sent congratulatory messages!

"Brother, give me a share!"

"Director Yang is mighty and kneels down for a complete anatomical map.

He was not the only one who rowed, because it was too difficult for Zhang Fan to talk about the back. Skills, what is skills, are all realized by yourself in the operation.

This kind of thing has no certain accumulation, no certain precipitation, and can't be understood at all. So a lot of QQ space is forced.

Qingniao, who is already the deputy chief physician, had an operation and took out his newly bought black strawberry mobile phone. While waiting for the students to sign their medical orders, they bored through the space of QQ friends.

When Zhang Fan went to Qingniao for further study, he was able to string up a lot of things about Zhang Fan's spine, and many doctors thought about what they had thought for many years, and suddenly let Zhang Fan open his mind.

In the meeting hall, the elderly doctors gradually became embarrassed from their initial contempt and disbelief, and then slowly, slowly, a little younger, took out their notebooks, listened and recorded on their notebooks.

The older one starts recording with a pen while listening.

The bragging session became Zhang Fan's major course in orthopedic spine skills.

Backstage, the manager of Johnson & Johnson dada District blushed with excitement.

They also want their annual meeting to be a little high-end, and they don't want to attract these orthopedic doctors just by money. But this is too difficult. This money can't attract real bosses.

Ordinary experts are unconvinced by each other, and no one can crush anyone. Therefore, we can only turn the annual meeting into a bragging meeting and a gift giving meeting.

No one left. In fact, they were waiting for gifts after the meeting. Johnson & Johnson's annual gifts are also quite powerful. Last year it was a laptop. This year I heard it was a popular rotten fruit phone without mouth.

But this year is different. Zhang Fan stood on the podium and immediately raised the force of the meeting a lot. In an instant, the gold content of the annual meeting was much higher.

"Come on, come on, the video is not ready yet. Come on, be sure to record clearly. We'll send a copy of the meeting minutes of Zhang Yuan to the headquarters later. Others don't need them, so we'll send them to Zhang Yuan. "

Johnson & Johnson China Regional Manager rubbed his hands and said, "it's a mistake, it's a mistake, hey, I knew it would be good to spend some money on a live broadcast. Ah, it's a mistake, it's a mistake!"

With Zhang Fan's explanation, there was not only the sound of typing, but also the sound of notes. Some doctors have begun to raise their hands.

The previous Johnson & Johnson annual meeting never had this link. The people on the podium boasted and the people below farted. Anyway, they just fooled around, stood on the stage and took the money.

But now it's different. This Zhang Yuan is really good and doesn't hide anything. It's all real knowledge.

Therefore, whenever there is doubt, doctors will never miss this opportunity and must raise their hands to ask questions. Because this opportunity is too rare.

Johnson & Johnson's officers are also busy. More than a dozen people shuttle through the crowd with microphones because there are too many people asking questions.

"Hello, Zhang Yuan. I'm the chief surgeon of spine surgery of Haihe affiliated hospital. You just said that the damaged intervertebral disc can use the nearby muscle groups to bear a little torque. I don't understand here. Can you explain it in detail. Thank you!"

Then he bowed.

"Well, that's a good question. It seems that you have studied it for a long time.

Now let's discuss it together.

This problem has bothered me for several weeks... "Zhang Fan is telling the truth!"

But the people below are different. When they hear this sentence, their heads are big. It's only a few weeks. My God, I've been working for ten years and haven't figured it out yet!

But look at Zhang Fan's age and listen to others' level. Really, this kind of blow is too fierce. Many people shed tears while listening to the class.

God, I don't want to do orthopedics. I want to change my department. I want to be quiet!

Give me the microphone. I've raised my hand for a long time! Watching the officer walk away with the microphone, he was angry.

If you want to go home, you have to dry your tears. Straighten up and find a way to ask questions!

This thing, just as a good teacher leads a good student, interacts with each other. The teacher inspires the student and the student inspires the teacher.

Zhang Fan is more and more excited, his brain is more and more active, his mouth is more and more smooth, and his thinking is more and more clear. In his lecture, he suddenly realized his vague place.

He learned about the operation of general surgery when he was doing liver tumor. At that time, the operation was a little difficult and the level of assistants was uneven. What Zhang Fan did was difficult. It can be said that he really tried his best.

As a result, after the operation, I realized it! All at once, the operation of general surgery made a qualitative leap.

Orthopedics, although it was the earliest discipline, has not been realized. Zhang Fan is a little skeptical. Did he think I had bad intentions for money?

Although there is a system, there is no perception. The surgical technology seems to be separated by a layer of plastic film. It is always a feeling of imitating the cat and painting the tiger.

Unexpectedly, I realized when I gave a lecture to you at the annual meeting today.

Zhang Fan is more and more excited. Can't he be excited? Now, including ordinary foreigners, he has realized two subjects.

Just when Zhang Fan was proud, Lu Lao of Qingniao looked at the mobile phone in his hand with reading glasses.

The scissor boy probably didn't expect that his photo could be put in front of the academician one day and let the academician take reading glasses to study carefully.

If you know that your QQ space can be seen by academicians one day, it is estimated that the young man will definitely regret smashing his chest. How come they are all photos of form 2! You can't have a picture of studying hard in a white coat!

Put down the phone, the old man pursed his lips!

## **Chapter 1039**

Qingniao, old Lu is no longer in the operating room. The old man has never entered the operating room since he sealed the knife. He was afraid that he couldn't help but want to stand on the stage.

In fact, according to the old man's current position in the Jianghu, as long as he doesn't say it, no one

will care whether his knife hand shakes or not. Under the shadowless lamp, his eyes will spend or not.

Many patients will even come here.

But his family knows that he is not the kind of person who can't go. What's more, it's not a medical bully. In the old man's own words, being responsible for patients is being responsible for himself.

It sounds a little selfish. In fact, this is a serious heart of kindness.

He made a report to his superior long before sealing the knife. The superior leaders agreed with his report on sealing the knife, but did not approve his report on leaving the post.

He has worked as a doctor for most of his life and brought students for half of his life. The old man may not be able to compare with his fellow teachers in academic and surgical skills in his life.

But the old man's vision and ability to teach students are beyond the envy of other division brothers. It can be said that Lu's students are generally stronger than those of other division brothers, not only in technology.

After reading the mobile phone, the old man pursed his lips and became angry. He was not angry because Zhang Fan studied orthopedics. When he first saw Zhang Fan, it was because of Zhang Fan's comprehensive and self-made efforts.

He was angry that he had taught the rabbit for so long, but so far, he didn't even have any scientific research literacy.

You said Zhang Fan didn't work hard. It really wronged him. Zhang fan can finish reading the book list listed by the old man on time. Whenever old man Lu checks, except for the slight dissatisfaction with the old man in terms of oral English, other aspects are really impeccable.

Moreover, he not only read the books listed by the old man, but also extended himself to read more professional books. This really makes the old man very happy.

Sometimes, when I see young talents, the old man will secretly compare with Zhang fanbi. Every time the old man won't be disappointed. Those who work hard don't have talent, and those who have talent don't work hard.

Whenever I call my senior brother and mention Zhang Fan, the old man can steal music.

But so far, it is said that Zhang Fan has surpassed the doctor's level in surgery, but it seems that a little scientific research literacy has not been cultivated.

It's usually a stone. It's hot after so long exposure.

You say you can't send a paper on anatomical research like this? Isn't this a good project for top journals?

As a result, the bastard was forced to boast at the annual meeting organized by the device manufacturers with papers from top journals.

The old man blushed. Thinking in my heart, "is my way of education wrong? I won't go to that kind of annual meeting even if I have a little card face, but this boy went there.

No, it's not my wrong way of education, but my strength is not enough! Yes, definitely not enough! "

The old man bit his teeth and the chewing muscles appeared.

Lin Cong was pulled by Huo Qinghua to pull the sleeve of his white coat. Lin Cong turned back and Huo Qinghua nuzui at Lu laonu, who was in a daze. That means, you see, the Dean seems to be angry again!

In fact, Lin Cong had already seen it, and he thought again: "no, did Zhang Fan steal the achievements of Lu Yuan to show off? No, Zhang Fan is very reliable? And I haven't heard of Lu Yuan's foundation. I haven't heard that old Lu studies orthopedics!

Did Zhang Fan betray his school and engage in orthopedics? No, when I saw Lu Ning yesterday, I also talked to Zhang Fan!

Did they jump the slot together? Then Zhang Fan dumped his master and did it himself? "

Lin Cong broke his head and couldn't imagine that Lu Lao was doubting his own teaching level!

Looking at Lu Yuan in a daze, gnashing his teeth in a daze, and his director's eyes are motionless in a daze, Lao Huo is stupid. What's the matter? Settled?

"Cough, cough, cough!" Lao Huo thought he should interrupt, so he coughed a few times.

Lu Lao raised his head and looked at Lao Huo, "why? Have you caught a cold! Pay attention to your body. "

Then he said to Lin Cong, "I don't know much about the spine. Look at the level of this decomposition."

Lin Cong thought for a moment, organized the language and said, "with regard to the decomposition of the spine, I think Zhang Fan's understanding of the spine is no less than mine."

"Oh?" Old Lu looked up and looked at Lin Cong suspiciously.

"Lu Yuan, I really didn't exalt Zhang Fan because of you. I feel wronged! "

Lin Cong looked at old Lu and pretended to be treated unfairly.

"What?" Lu Laona is bored.

"Although I'm not a general foreigner or your direct disciple, you taught me to sew and tie with your hands.

How long has Zhang Fan been in this business? You are too eccentric. You have unique skills in this field... "

As soon as Lin Cong said this, Lu understood.

People have a definite aim. Old Lu's master brother, old Wu, was able to start a new stove when the country was so difficult. By what?

It was not just the level of surgery, but because under the auspices of old Wu, their martial brothers produced an anatomical map of the Chinese liver. Different people have different body organs.

Different races have greater differences in organs. When old Wu and his colleagues did not figure out the anatomy of the Chinese liver, Chinese doctors could only take foreign anatomical maps.

There is no anatomical map of the race of your own country. It can be said that, let alone research, you can't even do a slightly more elaborate operation.

Therefore, this also shows that Zhang Fan is powerful from another side.

Lin Cong is not without research. In fact, he is also doing this work, but the decomposition diagram he made is compared with Zhang Fanyi, which is the difference between a little brother and a big brother.

He found Zhang Fan's decomposition map, but Zhang Fan found his own.

Therefore, he felt that old Lu was eccentric and came to make trouble today.

"Hehe! You, I asked you to do ordinary work thirty years ago. You don't look up to it. Now you complain.

Yes, there are skills in this area, but I didn't teach Zhang Fan.

It's all my own. You know my skills in surgery. I may not be as proficient as you in this skill. Zhang Fan's skills were taught by my elder martial brother!

But I didn't expect that he really made achievements! "

Lin Cong swallowed his saliva, and Huo Qinghua was almost crazy.

"It's a pity that he didn't want to send a paper, eh!"

"Well!" Lin Cong and Huo Qinghua looked at each other.

"Dean, director, I think I can help Zhang Fan with this piece."

Huo Qinghua answered immediately.

Old Lu thought, "it's OK. You decide for yourself. You know him well anyway. "

.....

Lianda Johnson & Johnson annual meeting.

The interaction continued. The original plan was for an expert to spend 20 minutes, and then the rest was Johnson & Johnson to introduce his products to the doctors, and then give gifts for dinner.

As a result, an hour passed.

The atmosphere at the venue was getting warmer and warmer.

"President Chen, if Dr. Zhang goes on like this, we don't have much time left for today's product introduction. Otherwise, let's implicitly remind Dr. Zhang. "

The person in charge of product advertising copy looked at the water ghost watch on his wrist and was a little anxious. My team has been preparing for today for almost half a year.

As a result, the Doctor Zhang went on stage endlessly. Their time is compressed less and less.

If there is no publicity, my income will be much less this year. Therefore, his technical dogs urged him to ask the head of the region.

"No!" The regional general manager, as if he had been impolite, would jump up, with a sharp voice like a woman and eyes like cattle.

"Don't disturb Dr. Zhang. I'll destroy the company's job today. Who wants to interfere with Dr. Zhang? I'll definitely sue him for losing his fortune! "

I'm kidding. Once this meeting record is formed, if Johnson & Johnson orthopedics can put up a name, it can form a paper or even a treatment guide.

What is a treatment guide? It's just like the standard specified by first-class enterprises. Once you can specify a standard on the orthopedic spine.

Darling, I dare not think about it. In the future, all spine device manufacturers should follow, because this guide is to guide doctors in surgery. Directly specifies the standard from the source.

This is a dimensionality reduction blow to other device manufacturers.

The sharp voice scared the people around me. It was terrible! The bearded man broke out the sound of glass rubbing plastic, and the people who listened stood up.

In the meeting hall, with Zhang Fan's explanation, more and more doctors have begun to think about it.

"You must find a way to get the private contact information of Zhang Yuan later!"

An hour!

Two hours!

Two and a half hours. Finally, Zhang Fan's report ended. Originally, Zhang Fan prepared it for 20 minutes, because the organizer had made the request.

As a result, everyone was too enthusiastic. Zhang Fan's tongue is almost knotted. He hasn't said so many words at one time for many years, although he is tired. But my heart is still very happy.

Man is a social animal. It's great to be recognized, especially by his peers!

When Zhang Fan's report is over, he wants to say something about the ending summary, or say something sorry, because he takes up too much time.

As a result, when Zhang Fan turned off the computer.

In the meeting hall, first from the middle, then to the rear, applause, doctors' applause broke out like raindrops.

Zhang Fan had to stop and bow to everyone slightly.

One Minute!

Two minutes!

Three minutes!

The applause lasted for three minutes. To be honest, Johnson & Johnson has held an annual meeting for many years. It's really not once!

"Thank you! Thank you! "

After everyone sat down, when Zhang Fan was ready to step down from the podium, the chairman a of the joint meeting of the golden Maoist countries in the front row stood up.

"We are all orthopedic doctors, not basic professors in universities! Our battlefield is on the operating table, not on the podium. Does Dr. Zhang think so? "

Chinese people are hospitable. They always feel that the old man is so old and still a master a seat. Everyone is very polite, but at this time, when the old man speaks like this, especially the young doctor almost scolds.

After all, people's energy is limited. There must be strengths and weaknesses. Zhang Fan is so proficient in anatomy. Maybe he does less surgery.

Therefore, at this time, we did not fall into a well, but had an attitude of common hatred!

Zhang Fan, who was going to step down, laughed!

"What?"

"I want to see your operation!"

"Ha ha, as you wish!"

## **Chapter 1040**

The golden old man is angry!

Breaking people's money is like killing parents.

What business makes the most money is not pornography, gambling and drugs, nor is it a tank cannon, but a monopoly.

Once upon a time, some people boast that if they can monopolize, they can sell the richest man in the world. Although they exaggerate slightly, they are not far from things in life!

The old man is an expert in spine orthopedics, although there is no forward-looking research and breakthrough. But his former team was the fine spinal surgery team.

It seems to us that the flying knife doctor in China makes a lot of money. In fact, he makes a little more. But it's different in Jinmao.

Delicate spinal surgery is not only expensive, but also monopolized by a team.

There is such a stem in the Jianghu. De Mao's orthopedics is great. But why is he good? In fact, there is something in it.

In World War II, Dr. de Mao penkov, in order to study anatomy, can be said that his behavior was unjustifiable, just like the digital army of Marubeni, it was really inferior to livestock.

Even novels dare not write like that!

They exchanged more than 100000 young civilian lives for the most accurate anatomy book in the history of orthopaedic medicine. Later, some doctors in penkov's team didn't know how to go to the golden Mao country.

This has created a situation in which orthopedics is the top two in European and American medicine.

And Jinmao was rich and powerful, and finally became the successor.

The co chair a is actually in such a high-end medical team.

Although he has left the team now, in order to keep him confidential, the team will give him a large pension every year as long as he is alive and does not disclose the fine anatomy and surgical techniques of the spine.

But Zhang Fan directly pulled out the anatomical map on which people depend for survival. Although the anatomical map alone can not immediately affect their current team.

Can't hold others to study.

The detailed anatomy is like the first moat they built. The surgical technique is the wall inside the moat.

Now that we can't cross the river, they can continue this fine spinal surgery monopoly. Once we cross the river, your high wall will be broken in no time.

Zhang Fan not only overturned the exploded view of the plane, but also lifted out the surgical method of entering the house. This is like sending the demolition troops across the river. It also points out that the place is weak. Let's dig!

The old man thought it was a conspiracy, a conspiracy against their team. If it wasn't a conspiracy, why didn't the doctor write a paper?

To tell the truth, not only did he wonder about it, but many people wondered about it.

So the old man was angry.

Really surprised and angry. He wants to hit fan's face. No matter how nice he says, he's only a dog's age and how powerful the operation can be. Maybe if you let him fail once on the operating table, maybe everyone thinks his technology is wrong?

May have a broken window effect? The old man fought for money.

People die for money and birds die for food. That's right.

Johnson & Johnson people like this situation.

They hate to brag and force each other to quarrel, but they really like the steel with real knives and guns. If they weren't afraid of the disgust of the doctors, they would have jumped up and provoked each other.

Now, there is no need to provoke. Two countries, one is the first country in the world, one is going to stand up, and the doctors of the two countries are going to fight each other.

Great, this opportunity is great. It's not seen in ten years!

"Smith, don't do this. I know your technology is the best. In the face of the Lord and our company, don't quarrel with Chinese doctors, although they have great technical strength!"

"Zhang Yuan, Zhang Yuan, please. Really, I know your technology is absolutely awesome. Although the old man is old, he has rich clinical experience. He is the chairman a of the joint meeting. Don't worry

about it!"

They are divided into two parts to persuade. This is not persuasion. It is clearly to pick a problem. As long as there is this gimmick, they will play the world's top doctors to operate on Chinese patients free of charge at the invitation of Johnson & Johnson.

This effect is definitely much better than that of inviting big stars to advertise, and it also saves money.

If today is an old man in China, Zhang Fan may really give in. But today, Zhang Fan will never let me go! And orthopedic Zhang Fan realized, not to mention the old man Jinmao. Even if the top orthopedic doctors in Jinmao came, he was not afraid.

"If he wants to come, let him come. He can have surgery on the orthopedic part if he wants to. I'll take it! You don't have to persuade. "

Zhang Fan quietly looks at the regional manager in front of him. With his steady voice and sharp eyes, the regional manager is really a little hairy.

"I'll prepare the best equipment for you!" The regional manager's throat was dry. He felt that today's persuasion was a little wrong, and Zhang Yuan seemed angry.

Zhang Fan just looked at each other without saying a word. In a minute, the regional manager sweated down in the air-conditioned room of the hotel.

"Your bidding price for tea is too high!"

The regional manager was almost crying and thought to himself: Sir, you ate for nothing. I tried my best to entertain you. I thought you were free. As a result, you were waiting for me here!

In the past, they might talk to Zhang Fan about conditions, but today they really dare not. Zhang Fan's report today ignited the whole audience.

Let their chief golden hair doctor sit still. What is this concept? This is the concept of technical rolling.

Others don't know. They know Johnson too well.

Therefore, the district manager, who was biting his teeth and wiping his sweat, bent over and kept nodding and bowing, "we will fall, Zhang Yuan, we will fall!"

Zhang Fan is still indifferent and wants you to die while you are ill. This is Ouyang's unique skill. Although old man Lu didn't teach Zhang Fan's research literacy, Ouyang taught Zhang Fan long ago.

It seems that stick is better than preaching!

"Down to the same price as domestic instruments!" Zhang Fan said coldly, with no expression on his face.

The regional manager is going crazy! His sweaty hands began to tremble.

Zhang Fan did not bow his head when he saw him.

He didn't even give him time to think about it. He directly turned to Chen Sheng and said, "contact the general manager of Mitsui Xerox in China, and say that I Zhang Fan will use their equipment to give a little color to Jinmao's co chairman a today, and let them bring publicity personnel! Give me as much publicity as you can. "

"OK, Zhang Yuan, I'll call now. They called me a few days ago to ask if you have time. They want to see you!"

Chen Sheng opened his mouth and said, "I can't clean up you two devils."

"No! Zhang Yuan, please forgive me. I'll lower it. I'll make a bid now and lower the price of domestic equipment according to what you said. Sir, you are my uncle. Please forgive me. "

Johnson & Johnson's Regional Manager really walked out holding the wall. His legs crossed and were as soft as two noodles in a hot pot. He was almost kneaded by Zhang Fan and almost lost consciousness. It is estimated that tens of millions will be lost if the price drops once every five years.

He doesn't know whether it's right or wrong to collude with Zhang Fan. Now there was a voice in his heart: it was so difficult. The operation at a young age is not good. They are masters at manipulating people's hearts. How can it be so difficult to deal with people!

"Hey, no experience. I think the offer is too low. He promised too happily. You don't round it. Let me go back and lower the price more! Such an opportunity is too rare. They are the strong side. Alas, what a pity, what a pity! "

After waiting for the regional manager to go out, Zhang Fan regretted. Unfortunately, he clapped his hands and talked to Chen Sheng.

"Well!" Chen Sheng's sweat came down. He sighed in his heart: "green is better than blue. Zhang Yuan looked at it and smiled. But it's really going to be a critical moment. He absolutely hates it more than European yuan. A man is a man!"

Although I think so in my heart, I can't say so in my mouth.

"Hehe, let Johnson & Johnson's equipment drop to the price of domestic equipment. No one believes Zhang Yuan! In five years, I estimate that we can save tens of millions of patients. It will be difficult to lower the estimate.

Besides, don't we have face in Zhangyuan? Your face is also very precious. We can't make you lose face for the sake of three melons and two dates, can't we? "

As soon as these words were said, Zhang Fan was happy " You, you, what to say! OK, let's tell the European hospital about this and let the hospital be ready to sign the contract early. If they dare not perform, we'll file a lawsuit.

Also, let Johnson and Johnson prepare to buy air tickets. It's still first class. I'll let the orthopedic doctor in our hospital come. "

"Good! You have a good rest. I'll contact you now. "

.....

"Director, I faxed you all the reports of Zhang Yuan. There was no omission from beginning to end, and I recorded all the questions answered by Zhang Yuan. Director, look, i... "

Shuitanzi's deputy director's tone is like a wronged little daughter-in-law.

"OK, it's not an example. Hurry up and come back, have a good rest and go to work."

"Ah! OK, director, I'll book the plane ticket right away. " The deputy director changed from a dead man's expression to elation. He was about to hang up. He suddenly remembered, "director, Zhang Yuan is going to fight with Jinmao's co chairman A."

"What? What's going on? " Lao Zhao, who is far away in the capital, has not read Zhang Fan's report, so he is very surprised.

After listening to his subordinates, Lao Zhao meditated for a long time. The deputy director waited quietly with his mobile phone.

"Well, don't come back yet. Book me a hotel. I flew by today. Be careful not to use Johnson & Johnson's expenses. "

"Hey, OK, I'll go now!"

"Book three rooms. I'll take your director and the old liang of the fifth section."

"Oh, OK."

Although Lao Zhao said that Zhang Fan didn't know anything, he told everyone that Zhang Fan didn't even know the surgical instruments. In fact, I still appreciate Zhang Fan in my heart.

After hearing that the other party was the chairman a of the joint meeting, Lao Zhao couldn't sit still. Although Zhang Fan didn't recognize him as a teacher at that time, Zhang Fan's talent is too high. Lao Zhao thinks such people can only teach themselves, but others can't! So I always think Zhang Fan is my own.

This is the advantage of laughing at people, being a low-key person and doing things with a high profile. Even before they were young, an old man who passed by jumped out first.

.....

Young people are hot blooded. Many young doctors think the golden haired old man is too impolite.

So they all support Zhang Fan. The most important thing is that Zhang Fan conquered these young people with his own strength.

If you have contact information, send a message to Zhang Fan, "Mr. Zhang, if you need an assistant, Xiaoyang Sanchuan is on standby and goes all out."

"Zhang Yuan, I'm Wang Jun of Haihe River. If you can use it, you can talk!"

Zhang Fan's kind words gave everyone a message one by one.

If there is no contact information, it starts at this time.

QQ space.

"Come on, Miss Zhang. I'm your loyal fan. You will certainly defeat old man Jinmao! "

"Zhang Yuan is powerful, and our country is powerful! Fuck the golden old man! "

Whether they want to attract Zhang Fan's attention or really want to help Zhang Fan, QQ space is in disorder anyway.

Originally, because they sent the spinal decomposition diagram, many people have paid attention to their space. When they do this, many people begin to ask.
