

Chapter 1041

"Dean, I know this Smith. When I went to study, many top athletes were their member customers. Once they were injured and needed surgery, they would find their team for treatment.

This team is very special. Most of them are white doctors. Among the peripheral doctors, only a small number of doctors from Bangzi and Marubeni have changed their nationality.

In terms of surgery, especially fine surgery, it is definitely the world's top team.

Zhang Fan's level is really powerful, but after all, a tiger can't defeat wolves. I mean, no, I'll take a few people there. It's not far anyway. "

Green bird, not long after Lin Cong returned to the Department, Lao Lin saw the news about Zhang Fan and old man Jinmao. He came to old Lu's office again. He's going to Lianda, too.

Old man Lu's anger was not over yet. Zhang Fan made such a moth again.

Although he was angry with the bastard, the old man wouldn't agree if others bullied Zhang Fan.

"OK, take some directors with you!"

Lu nodded and looked at his mobile phone. He was also worried. He was deeply afraid that Zhang Fan had difficulty calling and didn't receive it. Zhang Fan is now the executive director of a class III hospital.

But in the old man's eyes, Zhang Fan seemed not to grow up, and among all the students and disciples, he had thought that the last disciple would be better in the old city.

As a result, I didn't expect that this bastard could toss more than the disciples in front.

Really, the old saying is right. When people get old, they love money and children. The old man didn't pay much attention to money, but he attached great importance to his disciples, especially Zhang Fan.

Tea vegetable, in the Municipal People's Hospital, the finance department also has the bidding office, and the equipment department has been adjusted by Ouyang.

"Just sign it for ten years! Our orthopedic instruments will be invited for bidding in ten years. "

The old lady stood in front of a row of people. It's really cheap, son of a bitch.

"Dean, five years is the longest. If you grow any longer, you will make a disciplinary mistake."

"I confiscated the rebate. You didn't take it back, and Zhang Fan didn't take it back. What are you afraid of? What's terrible? If the people from the government come, you say it's me. Let them come to me! "

Ouyang doesn't make sense at all.

"Dean, we are still safe to take advantage of five years. We have signed too many contracts. If Johnson & Johnson really doesn't perform the contract, we will lose the lawsuit."

The chief of the equipment department persuaded Ouyang with a bitter smile.

"What's this called?" Ouyang reluctantly shook his hands and left. I can't get cheap! And the old lady has to go and see if the orthopedics people have cleaned up.

Xu Xian, Wang Yanan and Zhou Chengfu, led by Lao Gao, were ready to set off for the airport. When Chen Sheng called, the tea vegetable hospital was a sensation.

It's not because Zhang Fan wants to duel with old man Jinmao. After all, the frontier is a frontier. Although in the information age, the talent exchange is still a little poor.

There are not many doctors here and doctors in other cities. Medicine is actually a relatively conservative discipline in China. Each province has its own medical college, some even more than one. And medical students are also one of the least subjects to go abroad.

It can also be regarded as self production, self marketing and self reproduction!

Tea vegetable hospital is a sensation because Zhang hospital is going to have an operation outside. The most important thing is that Zhang hospital is shaking people again.

What does this mean? It means that doctors can go out and get the money again.

Zhang Fan has gone out for several operations, which has set several examples for the tea vegetable hospital. Now there is a saying in the hospital.

Listen to Zhang Yuan and be rich! In the past, several surgical directors were a little resistant to Zhang's entering their own department.

Because unlike other hospital leaders, Zhang Fan came to the Department symbolically to check the

room to see whether the water, electricity, doors and windows are safe, whether the nurses are beautiful, and whether the doctors take more kickbacks.

Once Zhang Fan stares at a department, it won't take long. The authority and prestige of the director are declining in this department. This is all blood experience.

Zhang Fan entered the hepatobiliary department. The hepatobiliary department was finally separated from general surgery. As a result, Zhang Fan created a hepatobiliary Research Institute and merged the hepatobiliary department and general surgery at once.

The director of the liver and gall had no place to cry. After fighting for more than ten years, he finally pulled out the people and horses and became a mountain. As a result, Zhang Fan lightly destroyed his efforts for more than ten years after he was in power.

But there's no way to fight. Besides, except for several directors who were unwilling, other doctors quite supported Zhang Fan's decision. After the merger of departments.

Other than scientific research, it's old and powerful now. Not to mention domestic, but the cooperation projects of a meatball country have made everyone full of energy.

This kind of research, once successful, is money.

This is like, in the original department, the director will say to his opponent, work hard and marry you a sister-in-law next year. Now, I will work hard to marry a wife next year.

Therefore, it's no use for directors to cry and no one supports them.

Just as now, Zhang Fan asked Chen Sheng to make a shaking phone call.

Not only the orthopedics department, but also Xue Fei in the emergency center shouted to go: "I'm also an orthopedic department. I'm also an orthopedic background. Zhang Yuan and I still..."

As a result, Ouyang arrived at the scene. The old high pressure couldn't stop people, but Ouyang has been different since he came. When Ouyang came, everyone had no voice.

Ouyang squinted at Xue Fei.

Xue Fei immediately understood: "Corey still has several patients. I'll go and have a look. You've cleaned up. I'm relieved. When you go to the place, you must bring a word to Zhang Yuan. Take care of your body and don't be too tired. If we're not busy, aren't we still there? "

Xue Fei smiled and said two words to Lao Gao. Although he still wanted to go, Ouyang came. Ouyang's eyes were: get out of my mother! Roll on all fours!

He dared to quarrel in front of Lao Gao. He was sure to let Lao Gao take him, but he didn't dare to borrow his two courage in front of Ouyang.

Chen Sheng had never informed Lao Gao. Lao Chen knew that the European Court was pressing Lao Gao. But when Ouyang knew about it, he called Lao Gao back from the government.

If you're going to a meeting or something, just send Chen Sheng to follow Zhang Fan. Chen Sheng can cope with all aspects, but he can't compete with Dr. Jin Mao today. Ouyang didn't even think about it. He directly sent Lao Gao to lead the team.

"What is fame? Fame is blown out by others, just like the things in advertisements. How good can his golden doctor be?"

Can a good doctor come to China? So don't be afraid. There's nothing terrible. I hope that under the leadership of Zhang Yuan, everyone will show the style of our Chinese people, the momentum of our tea vegetable people and the reputation of our tea vegetable people's hospital.

Comrades, do you have confidence? "

"Yes!" Several people shouted out in unison. Ouyang likes it. Whoever doesn't cooperate at this time can let anyone put down their luggage and go to the Department to work!

"Hehe, good, good mental outlook. Let's go! " Ouyang stood above the steps, one hand on his hips and the other waving, just as the people's Liberation Army crossed the Yangtze River. Just recite a poem: don't sell your name and learn from overlord!

Shuitanzi's departure. Lao Zhao has two purposes. First, we can't let golden hair orthopedics publicize in China, because he thinks that Chinese orthopedics must be the leader of shuitanzi. Second, we should educate Zhang Fan by the way.

The green bird set out. Lin Cong led the team. They were not only to help Zhang Fan. It would be good if they could play the name of green bird orthopedics on this occasion. Moreover, he had to ask Zhang Fan.

In the third class hospitals, if they are not specialized hospitals, orthopedics are generally affluent households. Not only doctors but also departments have money.

Several affiliated hospitals of Harbin Medical Buddhist College said, "Hey, I can't be absent from the northwest. If he can't do it in the northwest, we'll go up and let Jinmao not be arrogant. "

The northeast also set out. Under the banner of helping boxing, they are thinking about asking Zhang Fan if the anatomical map is still available!

Haihe orthopedics department across the bathtub will also come. It's not far anyway.

When Zhang Fan and Jin Mao fermented more and more than surgery, the orthopedics departments of Bangzi country and Marubeni country next door also knew about it.

Especially when the decomposition of the spine is released, the two countries are more concerned.

Orthopedic orthopedics is about orthopedics anyway. Whether it's bone or meat, teeth or face, people's Bangzi country is also very powerful.

But they never made any achievements in the fine spine. They talked with Jin Mao for a long time and couldn't get it, so when they learned that there was a fine picture at the Johnson & Johnson annual meeting, they also came.

Moreover, in order to catch up, the ambassador of Lianda directly found the government of Lianda, which means that we should also participate in such things.

The sticks are coming, and the balls won't be absent. They are all Asians with similar body organs, so they don't have to think about it. The Ministry of foreign affairs of maruzi or some organization directly greets Chinese diplomacy.

These doctors are here to show their skills. Therefore, it must be reported to the Health Bureau of Lianda.

At the beginning, it was the tea vegetable first, and then the capital. Not long after, Qingniao, other cities in the northeast, Haihe, and even MARUKI and Bangzi came to report.

And only orthopedics. The officers of the health bureau are afraid. What do they want and what do they want to do when so many foreign doctors come here?

Therefore, in order to avoid problems, they directly reported to the Ministry of health. The leaders of the Ministry of health thought and sent a driver cadre. They don't know what to think. They want to send a driver? Come and drive?

Jin Mao's co chairman felt that there was something wrong after the fire went down a little. Therefore, he immediately sent Zhang Fan's decomposition diagram to his previous team.

Then he informed the team leaders of Zhang Fan's challenge to authority.

The fine spine team at Jinmao's side looked amazing. This picture is almost catching up with their research results. No, such people must be folded in their own hands.

That is, China is now a big force. If it is a small country, it is estimated that they will threaten it. Hand over someone or I'll kill you!

After discussing with the spine team of Jinmao country, they contacted Johnson & Johnson.

Johnson & Johnson's regional manager is glowing these days. He has done many things that his predecessor wanted to do but failed to do.

Looking at the list in hand, these are all doctors who have set out to come to the annual meeting of Johnson & Johnson orthopedics.

He has read this list more than ten times. Looking at these doctors he wants to invite but can't, really, his saliva is splashing!

Chapter 1042

When the driver level cadres came, many people began to pay attention.

For example, some so-called orthopedic experts do not sit in hospitals or teach in schools, but they can be named on various textbooks and professional materials.

They often walk in various journals and magazines, or speak when other doctors are promoted, or raise their hands when others have scientific research achievements to select awards.

Anyway, the hospital can't stand, can't teach masters and doctors, and disdain to take undergraduates, but others are famous. An ordinary business card can't hold people's names.

What the Ministry of health means is to see if there is an opportunity to make this kind of meeting a normal one in China.

When an industry reaches the top, it is highly competitive and quite confidential. If there is no gathering of top experts, it is very dangerous to be unable to participate in the rules formulated by top experts.

People will play with you when they are happy, but they won't play with you when they are not happy. There's nothing you can do. For example, when the Baiyao factory in the South entered the harbor, many people questioned it from top to bottom.

You have carcinogenic materials in this! There are toxic and side effects in your medicine! Drugs must write the materials clearly! Then the party leading the way also began in China. Drugs are related to

human life and health. We must let go of materials! This is our right, this is the obligation of the pharmaceutical factory!

The noise is earth shaking. Really, to tell you the truth, what is this medicine for? The little devil didn't get the prescription after much deliberation. As a result, the guide almost overturned the car.

It's just like asking Jinmao to release the manufacturing technology of anticancer drugs. Is it possible?

Ah San claims to be able to imitate drugs all over the world, but what he does is the same as what others do?

Therefore, many times, China is also a chicken thief. I try to quietly participate in it, and then try to dominate it. With this in mind, the Ministry of health sent a leader to have a look and see if there was a chance.

Of course, there are many people who can see this opportunity, such as those who are thinking about their official career. So when a group of doctors set out, a large group of famous experts also set out.

The regional manager of Johnson & Johnson was originally only responsible for sales in China. As for finance and personnel, others were sent by Johnson & Johnson. If the sales performance is not good, he will carry the pot. If there is a problem with rebates, he will also carry the pot.

There was no way before, but this is an opportunity!

He wants financial power first. It's hard to say how much he spends, but if he wants to make a report, apply, budget, time and mobility are much worse.

Now if you don't give it or not, it's estimated that this meeting will not be successful. Anyway, Dr. Zhang said, he likes to let me make arrangements, you see!

As soon as this meaning was expressed, Johnson & Johnson headquarters probably wanted to think about it, so they reluctantly gave part of the financial power first, but they also wanted to be good, and let go of the mill and kill the donkey!

The regional manager wanted to test it. As a result, he was really coming. He was not a fool. After coming, the first idea is to closely follow Zhang Fan.

What should we do? Simple, spend other people's money on your own!

Waves of doctors poured into Lianda from all directions, at home and abroad.

Johnson & Johnson has also started a large-scale publicity. The gathering of spine orthopedic doctors around the world will bring good news to Chinese spine patients. Patients who hope to take over top expert surgery, please register and apply on our platform, and our company will select patients within two days.

This is even more amazing.

The patients who have relationship find relationship, and the patients who have no relationship burn incense and worship Buddha, hoping to be selected. Even some patients came to Lianda from their own cities.

With the accumulation of the two effects and the accurate publicity of Johnson & Johnson, more orthopedic doctors and more orthopedic patients also began to come to Lianda.

For a moment, the city, which had already declined slightly, suddenly wanted to be lively.

Even the big government was worried that it didn't care much. Darling, if this wave of scholar wind continues, if this kind of conference headquarters is located in our company, darling, it will be too powerful.

Sanitation and traffic control all got on the road for a while.

Zhang Fan didn't expect that it was originally a dispute of sentiment, which turned into a grand event.

Let him talk, he's probably a little scared. If you let him have an operation, he'll have nothing to fear. It is said that almost all spine experts in the world are coming. Zhang Fan is still looking forward to it.

.....

When Zhang Fan first came to Lianda, he stayed in a five-star hotel. I don't know why. When things got bigger and bigger, Zhang Fan was directly invited to a guest house run by the government.

Zhang Fanting wondered.

It turned out that even the general manager of Huaguo knew about it after it became big.

People's view of problems is different from that of Zhang Fan. Although I didn't contact anyone directly, the general office still explained it to Lianda.

Please take good care of Dr. Zhang Fan's life during the meeting!

Then Zhang Fan was invited to the guest house. The hostel is not only closed to the public, but also has guards at the door, guards with guns.

Although the facilities of the guest house do not look as magnificent as the five-star hotel, the artistic conception is definitely not comparable to that of the hotel. Several simple blue cloth sofas, simple wooden desks and wooden bookcases make it much higher in an instant.

As a telephone said, the boss's chair of the big class platform is a trading company.

.....

"Zhang Yuan, you see if this is appropriate!" Sitting on the reception sofa, Johnson & Johnson manager looked at the environment of the guest house with prudence and carelessness, and didn't even dare to tilt his legs.

What he gave to Zhang Fan was the anatomical map sent by Zhang Fan and the conference draft of his speech at that time.

Zhang Fan turned, "very good, bother!" Zhang Fan didn't talk much. He saw that these people are not hard hearted. They can treat you as a fool.

He didn't speak, just waiting for the other party to say. The manager wanted to talk, but a dignified waiter in uniform knocked at the door and came in.

"Chief, your Tieguan Yin!"

The general manager's tongue is almost knotted.

Sleeping with guards and looking like this is the life secretary?

He looked at Zhang Fan with different eyes. He used to think that Zhang Fan was a young and highly skilled doctor. As a result, today, he found out.

What Dean, what doctor, these are people's disguises. Now, people don't pretend and have a showdown.

The general manager raised the chips several grades in his heart, and made up his mind. As long as Zhang Yuan didn't tell the secret himself, he would never reveal it. Maybe people would love such a tune!

"Because your hand drawings and speech reports are of great scientific research value. We have arranged for our researchers to publish a professional paper on your.

Of course, the copyright of the paper is still yours. We just want to... "

The regional manager looked at Zhang Fan, swallowed and spit. Zhang Fan seemed to have no

expression, and then said, "we just want our company to hang on your paper. You can rest assured that we have polishing fees and labor fees. "

"Oh?" Zhang Fan didn't expect them to do so. Zhang Fan thought they just wanted to make a picture and send it out. He didn't expect people to think so much.

Zhang Fan took the material and thought again in his mind, "what paper can this thing publish! Great is a little skill, a little summary, what can I do! "

As a result, Zhang Fan's thoughtful expression makes the regional manager feel that this is unfathomable!

"The labor fee is 500000, and we give up all the benefits generated by the paper."

.....

People from all directions gathered in Lianda.

"Hey? What's the name of the doctor? We all came and didn't show up. " Several mouth gun experts came to Lianda. Followed by a group of unknown doctors.

Chapter 1043

Sometimes parents' arrangement may not be a good thing. When Zhang Fan chose orthopedics in quark, it was because other local surgeries were furnishings, that is, orthopedics was a simple, intuitive and profitable department.

Then, after entering the tea plant, Ouyang directly asked Zhang Fan to transfer them from one department to another, which gave them an intuitive understanding of work and even medicine.

Some people say how about five years of college. In fact, undergraduates, especially medical undergraduates, are just looking at flowers in the fog. If you don't enter the actual work, you really can't be regarded as a person in this circle.

Not only undergraduate students, but also many doctors later. They don't enter the actual field to enter the industry. They go to the hospital every day for exams, experiments and degrees. As a result, they won't ask for anything after graduation.

There is no way for the country, and there will be three more years of training.

Zhang Fan's operation is gradual. Generally speaking, it comes step by step according to the market demand and professional demand. Although there is a system, Zhang Fan really practiced what surgery the hospital needs in the system.

It can be said that Zhang Fan is in clinical practice, and because he pays more, he has more perception and understanding than others. This thing is the conservation of energy. If you pay more, you will definitely gain.

However, the experimental paper is different.

The door didn't enter, so it was arranged. It was tall to start. I couldn't get the walker, so my master asked Zhang Fan to start F1. As a result, with the help of his brothers, Zhang Fan seemed to drive very well.

In fact, it's all illusions. Zhang Fan is driving smoothly now, but he doesn't know what F1's slow in and fast out and what lateral acceleration is borne by his trunk.

Therefore, if Zhang fan can have scientific research literacy, this is nonsense.

But the only advantage is that Zhang Fan's starting point in clinical practice is too high. One is too high, so high that thousands of people admire it too much, but at least others don't dare to be jealous.

But the other one is too short for ordinary researchers to see.

When the golden Maoist team arrived at Lianda, the atmosphere was serious and reached a climax. This team is so powerful. Just look at the composition of the staff.

Almost all the members are from Harvard. Although there are a few words less than Harbin Medical Buddhist College, this school is too powerful. Just one health science and technology has created many Nobel prizes.

Jinmao's school is very contradictory. It can produce kind and distressing scholars and experts, as well as ruthless experts who cut leeks with their IQ and knowledge.

In fact, it is the same in medicine. Some people really take a career to serve mankind, and some make

money with this career.

This time, even the larger team is the latter. They serve almost all the super rich, politicians, celebrities and top athletes.

When they arrived at Lianda, the atmosphere was really different.

They are all people in the circle. Who doesn't know who! Especially those at the top of the industry. Many Chinese doctors are crazy.

Polite and humble, as if the other party can pull him into other people's team.

He always talks with his back bent.

Taking photos, exchanging business cards, my head is almost stuck in someone's arms. I want to recognize a dry father.

"How do you handle things? Let out the best room. He is the best doctor in the golden Mao country and the most powerful orthopedic doctor on the planet."

In particular, one of the mouth gun doctors who manage some journals and the promotion of doctors... Generally speaking, these mouth gun doctors, serious and powerful doctors, stay away from them and don't provoke but don't make friends.

When facing golden hair, the mouth guns have a face of humility, politeness and sincerity.

But he turned his head and immediately blew his beard and glared at him. He didn't know that he was the Minister of the Ministry of health!

Johnson & Johnson's regional manager received Zhang Fan, and other leaders found corresponding doctors and experts to contact them. As for doctors in the golden Maoist country.

To tell you the truth, they are not particularly interested, because they are a large region of China, and doctors in Jinmao country have their own business managers, so it's useless to work on their own.

Therefore, some reserve cadres were asked to receive experts from the golden and Maoist countries.

"Sorry, president Zhang has been admitted to the presidential suite!" Most of these reserve cadres have the experience of studying in Europe and the United States, or have family ties.

Or young, or foreigners see more, or don't care. Anyway, he spoke politely with indifference.

As a result, Dr. mouth gun quit. I'm kidding. Who is it? Don't you see the experts and scholars you invited retreat from us when they see us?

"What? Why did Zhang Fan leave the room empty when he was not there? " Being domineering is like catching someone else's little tail.

"Is that how you work? Do you know who I am? Do you know who these foreign experts are? Call your leader. This matter must be dealt with seriously! "

I don't know their temperament. I thought they were hospitable, righteous and able to defend others against injustice. Knowing their temperament, they left the scene long ago.

"Sorry, I'm the person in charge of reception!" Neither soft nor hard.

"It doesn't matter, it doesn't matter. As long as the room is clean and quiet, we're a little tired now, so sorry, please take us to the room!"

Jinmao people can't see it anymore. They come quietly to observe or deal with Zhang fanlai. Can these goods enter the village quietly when they quarrel! So, I didn't give the mouth guns a good face.

"Well! This Zhang Fan is too ignorant! " After the golden hair experts went away, these people hated Zhang Fan.

"Who of you knows this Zhang? Come and inquire!"

"Frontier, I have read the brief introduction in his report, the executive president of Frontier tea vegetable City People's hospital."

"What title, is it going to be Jin Zhenggao?"

"I don't think so. I'm still in hospital!"

As soon as he said this, several people's eyes began to turn.

I definitely thought again, "it doesn't matter if a 20-year-old doll can be the executive dean. Maybe his parents are very powerful in the local area, but it doesn't matter if they are outside the frontier.

But it's unusual for a resident doctor to come up with an anatomical map that his peers envy and startle top foreign experts. "

One of the group seemed to take the lead and said, "we all know the routine. Look for acquaintances and ask about the specific situation."

As soon as you say this, everyone understands.

In addition to their oral Kung Fu, these people also rely on their relationship. Before long, a man said, "I

found someone who is familiar with Zhang Fan. Wait for me to ask. "

Then press the number and turn on the handsfree.

Lao Chang, who is far away in the southern magic capital, has been doing well recently, because no one has inquired about Zhang Fan for a long time, and he is now slowly integrating into the local life and work.

I had a good life.

After the operation, Lao Chang hummed the newly learned magic capital song. In order to integrate into the magic capital, he wanted to apply for a magic capital dialect class.

As a result, the phone rang and looked at the capital!

Vaguely, he felt as if there was a black cloud floating from somewhere on his head!

"Hello, I'm Huang Yusheng, the capital!" Just sign up and don't talk much.

"Oh, ah, are you director Huang? I bought a set of your book a few days ago. It's too deep. Ouch, for me, it's really a day to see the sun... "

Lao Chang knew who this man was when he thought about it. In the past, when he was in a public hospital, he was not afraid of director Huang. Now he is in a private hospital. To tell the truth, I really dare not provoke him.

So a good word is often sad" If I hadn't turned over the boat and had to come to the south, who knew you! "

"Well, OK, let me ask you something. I heard you are familiar with Zhang Fan of tea vegetable. Tell me about this man!"

Lao Chang's eyes are almost cracked by gas. The real blood is bursting out on his eyes. Holding his mobile phone, his breath is like a cow, and his heart is almost 180!

"Villain!"

"What?"

"No, director Huang, I'm not talking about you. I'm talking about Zhang Fan. Zhang Fan is a villain. He controls Frontier Medical Treatment by his skirt..."

With that, Lao Chang hung up the phone and was proud, "I want to be promoted, hey hey, I'm sorry, who let others hear about me!" But after thinking about it, it seems that what I said is a little explicit?

Lao Chang was in a dilemma again.

Really, I have the heart to be a villain, but I don't have the courage to be a villain!

Because it was hands-free, the guns heard it.

"Hehe, this doctor Chang is not a good thing, but he can see the whole leopard from a glimpse. After all, it is a small place. We should take out our own measures. I heard that the state attaches great importance to this meeting. "

Needless to say, everyone smiled knowingly.

.....

In the hotel, Lao Zhao of shuitanzi, the capital, read Zhang Fan's speech report summarized by Johnson & Johnson over and over again.

The directors of the other pools in the room were also one by one, sitting and studying carefully.

"Let's talk!" Finally, after everyone put down the documents, Lao Zhao had a long talk.

It seems that there is reluctance, but also a loss.

"Director, I have something to say."

"Well, you say!"

Professor Chen, who graduated from the University of California and is now the director of the first Department of shuitanzi spine, put down the report, thought about it and said, "director, these summaries are very powerful.

However, not all can do it! I think several of his summaries need to be discussed, as well as the decomposition diagram, which I think is a little strange.

Combined with his study and work experience, it is undeniable that it is a very powerful research report.

But on the whole, I am skeptical. After all, there are no data or cases in his report. It is all composed of language and has no persuasion.

I don't know whether he is deliberately hiding himself, or... "

Then he looked at his director and said, "I didn't expect to meet the team of Harvard fine spine this time. If Zhang Fan has a problem, please fight for it and let's go to the stage."

Everyone can see the eager look. He was unconvinced, unconvinced by the people at Harvard.

Chapter 1044

If Johnson & Johnson's annual orthopaedic meeting was just held, it was full of completing tasks and perfunctory.

The doctor who makes the report wants to go on stage and say a few words casually and then take the money to leave. Those who listen to the report want to take gifts and leave after a meal.

Johnson & Johnson, which holds the conference, actually wants to spend less and sell more goods from top to bottom. Out of the accident that Zhang Fan was serious about communication, almost no one took it seriously.

As a result, when experts and scholars from all directions poured in, they didn't really want to take it seriously, and there was no chance.

The person who presided over the meeting became the gun mouth doctor, and Johnson & Johnson became the one who paid for it. However, as long as the brand of Johnson & Johnson is hung, it doesn't matter who supports them, because at this level, it's impossible for these bosses to advertise their brand of Johnson & Johnson.

They are also willing to give up the initiative on the premise that other device manufacturers are not allowed to come in.

For those who want to make another report, except the joint old man Zhang Fan and Jin Mao, others are disqualified, especially the one from Gangwan Maria. They feel bad and abandoned in an instant. I felt like I didn't even have a friend.

Jin Mao ignored him, and he didn't want to communicate with Chinese. As a result, he was embarrassed.

Because they already know Zhang Fan, they think this boy has a slightly higher level of surgery. He is nothing else and doesn't know anyone.

Therefore, they are ready. The protagonist of this stage must not be Zhang Fan. Such a good platform, such a good chance to be famous, what a good thing to be famous in front of the world's top orthopedic doctors.

And now China is getting richer and richer. Coal bosses and all kinds of stars, even if they don't operate on these people and do some consulting for matchmakers, darling, this money will definitely make a lot of money, and it's still a knife!

Therefore, we must do a good job in this meeting, and we must not let the hairy boy annoy others. What Zhang Fanzhi didn't know became a victim.

Jinmao's fine team is also annoying, because China seems to be in trouble. From leaders to experts, and then the heads of various associations.

They are so upset that they can't get angry!

In order to show their ability, after the leader's speech, they came to the stage. The whole English speech was still golden and hairy.

If you talk about something technical, it's OK and everyone can accept it. But you just want to express how much you admire each other and how much you want to make friends with others. You don't have to pull a group of doctors to stand here.

Lao Zhao of shuitanzi, Lin Cong of Qingniao, Lao Yang of Haihe, and many people who came to find fault and help boxing this time, their mouths are almost crooked.

But I still have to bear it, because they are not alone. Many doctors need others to speak for their promotion.

"Where's Zhang Fan?" Lao Zhao of shuitanzi wrinkled his eyebrows and asked Lin Cong next to him.

They are people of the same era, and their level was similar in those years, but later Lin Cong was not as good as Lao Zhao.

The relationship between them is not good or bad. They are better than strangers, but they are definitely not friends. They all have the meaning of comparing and secretly competing with each other.

"Take his hand down to the health bureau and report it." Lin Cong looked at the dancing on the stage. The gongs and drums were noisy, and the guns were as disgusting as eating flies.

"Tell me about these people. This is clearly a war between the orthopedic circles of China and Jinmao, which makes these things a welcome meeting. We don't even have any momentum on our side.

Zhang Fan is getting more and more oily. Did he know this situation long ago and find an excuse not to come? "

Lao Zhao feels bad for himself, but it's even worse when Zhang Fan doesn't come. Why should I be angry here? You bastard won't come.

If there are annoying people engaged in technology, they are definitely not specialized in system, but some half hanging people. These people, relying on their early debut, standing in front, or talking and coming, then stand on the right to speak or control some, such as the distribution and review of resources.

They are not comfortable with technology, but rely on technology to mix the system, so this kind of person is particularly annoying to those who specialize in technology. You say he understands. In fact, he knows something.

You say he doesn't understand. He has the right to speak, so sometimes he can't do anything, but bad things are definitely a headache.

And Zhang Fan, in fact, the report is really an excuse, because Johnson and Johnson took a look at the meeting procedures, and he didn't think about going to any welcome party again.

The podium was full of people he didn't know, and the content was all about warm welcome and sweeping the couch. So Zhang Fan simply didn't attend.

With this Kung Fu, he will arrange some operation plans with Lao Gao, Wang Yanan, Xu Xian and Zhou Chengfu. It's a preoperative discussion.

When Wang Yanan ran to the hostel from the five-star hotel, Wang Yanan returned to old Chen and said, "Chen Yuan, you are too wronged by our Zhang Yuan. We all live in five-star hotels. Let Zhang Yuan live in this hostel with few windows! "

"Hey, hey, you little girl, what do you know about the film! You think you can live in this place with money? Have an inner vision, not always look at the surface.

Young people just like beautiful things. It's not good! You know, if you want to live here, you have to have a level. For example, if you want to live here, you can't! "

Old Chen pretended to show off. In fact, he can't, but when he came in, he was really shocked.

They were really shocked when they entered the guest house. Not counting the guard at the door, as

soon as he entered the door, several words written by the old leader of that year were written on the wall of the guest house: tension, unity, liveliness and preciseness.

This kind of word is generally the talent of the public security organs and the law. As a result, not only did the small guest house have it, but it was written by the old leaders themselves.

Then he turned his head and entered Zhang Fan's room. Everyone was even more surprised.

The reception hall can almost be used as a banquet hall, even if it is large. There are imitation fishing halls on the walls, and oil paintings of the Great Wall several meters long.

It raised the momentum by N grades in a moment.

Except Lao Chen and Lao Gao, the three young people dare not step on the carpet five centimeters later.

The main reason is that even the university is bored this time. What's the origin of this Zhang Fan?

In fact, the general manager of Huaguo also wanted to take this opportunity to normalize the annual meeting of orthopedics in Lianda, but he didn't talk much before he saw hope.

But just in case, he picked Zhang Fan out early and directly isolated him from the idle people. The leader has been working from the Secretary General to the general manager. He has never seen anything.

In the small conference room of the guest house.

"Director, you have rich experience. You help us stand on the stage and take charge of touring anesthesia. And I estimate that this operation will definitely be broadcast live. You are not only responsible for the interpretation of the critical moment, but also responsible for providing us with each other's information.

This is not a simple operation! Therefore, you have the most tasks and the heaviest burden! "

Zhang Fan began to assign tasks to several in the guest house.

"Hehe, don't worry. I will be a good sentry for you." Lao Gao solemnly said to Zhang fan that although there was no trace of expression on his face, he was still a little lost in his heart.

It's really a dream for technicians to fight with top experts and experts who have been at the top of the mountain since they started their business. It's a pity that they are old!

After arranging Lao Gao, Zhang Fan looks at Wang Yanan, Xu Xian and Zhou Chengfu.

The three men raised their chests at the same time. Especially Wang Yanan, although thin is thin, he still pressed Xu Xian and Zhou Chengfu.

"If it's a spinal fracture, Zhou Chengfu is a help. You two are at random."

Zhou Chengfu was obviously a little proud.

In the past, he knew that Zhang Fan was too powerful and went to the third Department of orthopedics early. As a result, Chen Qi's affairs had a great impact on him. Xue Fei was the deputy director. He also lived with the president of the hospital. For some time, he gave up on himself.

This kind of person with a little talent is actually very vulnerable. If it weren't for Zhang Fan's bluff, the young man would be useless. After waking up, Lao Zhou seemed to have changed.

It's peeling and reborn again.

Wang Yanan twisted his mouth!

"If it is spinal facet joint disc injury, Xu xianyizhu."

"Good!" Xu Xian nodded gently. The young man was good at everything, but he didn't have a sense of competition. Especially after establishing a relationship with that flower, he thought about Lao Gao's direction.

How to say this character? It's good or bad. It's too old and not particularly suitable for young people. Fortunately, Zhang Fan is also a snake player. He's lucky.

When both Xu Xian and Zhou Chengfu could help, Wang Yanan's eyes were round.

In the past, I would definitely pat the table and stand up to cross examine. Now the girl has grown up and is sensible.

"If it's spinal nerve, Wang Yanan will help!"

Then someone looked at Lao Chen "It's going to be hard these days. Chen Yuan is responsible for our logistics. Eat, drink and Lazar, and I'll ask the Chen Yuan. "

"OK, Zhang Yuan, don't worry!"

After arranging the operation, Zhang Fan began to explain some main matters on the spine.

Johnson & Johnson is not only busy with reception, but also responsible for finding the right patient.

To tell you the truth, there are many people. If this annual meeting is held in a city like Ijiapo or local tyrant Dubai, you can't even find a suitable patient at the critical moment.

Here, even the operating room of the First Affiliated Hospital has been empty. Not only the operating room is empty, but also the anesthesiologists and nurses are fully equipped.

Just waiting for the expert to enter the operating room for surgery.

As like as two peas, the patient's condition is not the same, but what is the same type is almost the same in terms of difficulty in operation.

Moreover, in order to make a quick decision, Jinmao's team must find those who have seriously damaged nerves and blood vessels through the orders given to Hua Guoqiang by Johnson & Johnson headquarters.

In the five-star hotel rented by Johnson & Johnson, Jin Mao was almost bored by the mouth gun doctors. He spoke on the stage one after another and made endless speeches.

Finally, after all the speakers had finished, the golden wool experts left the meeting for the first time.

They decided that they must not give old faces to these people ~!

Chapter 1045

A group of mouth guns after the welcome party are busy contacting various media. They are ready to let everyone know through the media that they are similar to the top orthopedic doctors in Jinmao!

At that time, after seeing Zhang Fan's anatomical map, they hurried to see if they could get some benefits. As a result, they didn't expect others to come.

This time, they threw Zhang Fan away and began to focus on Jinmao. What they didn't know was that Zhang Fan and Jinmao were engaged in a war, rather than communicating with the amiable.

But the mouth guns don't understand clearly. They think it's exchange, um, academic exchange. So while constantly publicizing and introducing Jinmao, he introduced himself on the side of refueling.

In terms of the wide range of contacts, people are absolutely powerful. They don't even need to say anything about the big daily and evening news. They even called Yangma's health column.

To tell you the truth, if Johnson and Johnson were allowed to do it, they might not be able to invite others with money.

When the media with long guns and short guns entered the first affiliated university of the company, the sweat came down from the dean's head. Johnson and Johnson gave him something, and he agreed modestly.

As a result, I didn't expect that the small bargain caused so much trouble. It would really worship God and Buddha. I want this meeting to end quickly.

So in order to avoid his hospital being caught by others, he asked surgeons not to participate in it at first time.

When seeing these media and doctors at home and abroad, shuitanzi's Lao Zhao smiled and said to the director around him, "Zhang Fan's life is too good! It's true that blessed people don't have to be busy, and those without happiness break their legs. "

Lao Zhao saw Zhang Fan's operation with his own eyes. At the beginning, he knew that Zhang Fan was too talented, and his talent didn't need Bole to dig.

At the beginning of Zhang Fan's operation, it seemed a little astringent at first, as if there was no lubricating oil in the casing and piston.

I know how to operate, but it makes people feel a little uncomfortable. But before Lao Zhao wanted to replace Zhang Fan, Zhang Fan became more skilled and felt more on the operating table.

Just as technology is visible to the naked eye, it is improved in a surgery. Although Lao Zhao knew that such a thing was impossible, Zhang Fan gave him the feeling.

Therefore, although these directors under his command were unconvinced, he didn't say it, but he was still optimistic about Zhang Fan from the bottom of his heart. However, in order not to undermine his people's confidence, he did not make more introductions.

Really, how can you be the chief director of the top orthopedic hospitals and departments in China without any means and brains? How can you rely on technology alone.

"Hehe, I think Zhang Fan is afraid. No one else showed up at today's welcome meeting. Won't he run away?"

I don't know Zhang Fan. The director of the third spine department who came back from studying in Jinmao country is working hard. He wants to take over Lao Zhao after Lao Zhao retires.

So many things rush very hard.

Lao Zhao turned to look at him and smiled. He didn't say anything, but what he thought was: this boy probably made a tactical backward tilt to show the enemy's weakness? Old man Lu doesn't seem to have so many minds?

Yes, old Lu doesn't have many eyes, but look at who Zhang Fan has led him since he entered this industry.

Ouyang, who is afraid of losing money because of taking advantage of death, converged a little when Zhang Fan didn't stand up. When Zhang Fan stood up, it can be said that Ouyang is invincible in the field of tea medicine.

With a good mind and a good mind, not to mention the means, Zhang Fan even smoked a little in two years. She taught us to convince people.

It sounds a little unreasonable, but this thing really works well and smells good!

Then look at the people who Ouyang rationed to Zhang Fan. Ouyang never worried about technology. She knows that she is not technically at the same level as Zhang Fan.

But in other aspects, I can still be a teacher. Therefore, Lao Chen, who has been the director of the medical department for ten years among doctors and managers, has a lot of heart and mind.

Lao Chen taught what harmony is.

Let's look at the people Zhang Fangang contacted when he was quarking. To be honest, the level of a handle map is a little lower. If it is higher, it is really a character.

So although no one taught and no one took Zhang Fan to know the society, in fact, these people are teaching by example, so that Zhang fan can go a little smoother in the future.

Really, if a newcomer can have such three teachers, to tell the truth, it is really lucky.

After all, there is not all sunshine in society. As Uncle Mao said in those days, there is no peaceful coexistence. Either the west wind overwhelms the east wind, or the east wind overwhelms the west wind.

Zhang Fan doesn't have to think much about general surgery. He doesn't have to say anything to tell the truth. He can settle everything by showing his master and uncle. Moreover, in terms of seniority, the major surgical directors of many hospitals are students of his brothers. He stands up at the level of

uncle.

But not orthopedics.

Although orthopedics is a group of carpenters, this subject is too rich. What golden eye, what diamond dentistry. It's all wrong. The orthopedic department in major hospitals is not arrogant and arrogant, and let the doctors in other departments gnash their teeth.

Even in recent years, there has been a lot of noise outside the chest. The clavicle belongs to the outside of the chest.

Therefore, what welcome party, what seminar, when people who eat by mouth come, Zhang Fan directly is a technical evasion. put up or shut up

I don't conflict with you. It's like I don't know how to respect the elderly. I'm waiting for you here!

In fact, Chinese Orthopaedic experts from all over the world, as long as they know the inside story, are all of this attitude. OK, you're awesome, you host. Everyone is just like a group of people who sincerely watch the excitement, watching not far or near.

The driver of the Ministry of health doesn't understand. He's not technical. He still thinks these mouth guns are powerful. Because every meeting of the Ministry of health, their seats are very close to the front.

So the leaders at the driver level also let it go.

Finally, everything is ready.

Even the operation lounge of the First Affiliated Hospital of the University was also arranged as a venue.

The huge screen is divided into four partitions because there are four more patients today. The driver level leader of the Ministry of health thought that everyone would do it together, so he made four screens.

The leaders are in place, not only from the Ministry of health, but also from the University. Their views are unified, so that meetings at this level can find ways to become permanent.

People came from MARUKI, Bangzi and Mishima. As guests, they don't favor anyone, but they don't support anyone.

"Who released the exploded view?" The doctor in charge of fine spine in Jinmao country looked at the doctor like China and asked the chairman a of the joint meeting around him.

"Not yet!" The old man searched for a long time and didn't find Zhang Fan.

"Shit!" I don't know whether this man scolded Zhang Fan or the old man. Anyway, his mood is not very good.

But think about it. In a business with tens of millions of dollars a year, can a person who jumps out to lift the table not be angry? Now all the knives have been put forward, but this person doesn't show up. He is in a bad mood now.

I thought it could be settled by spending a little money and giving a little interest. Now it's such a big scene. Look at the media behind you and the experts from other countries sitting around.

His white faced egg turned red and red, his neck was like a faded turkey neck, and the red goose bumps were particularly obvious.

He looked at several Chinese mouth guns in front of him. He hated them and ate them. These few people don't jump up and down. There's no such multimedia.

These people came to show their skills last night. He almost couldn't help roaring: what's the matter with you here!

Zhang Fan didn't come, but after several guns here took over the chairmanship of Johnson & Johnson, they didn't give Zhang Fan notice directly, that is, they didn't give Zhang Fan notice when they had an operation this morning.

They think it's such a good opportunity for the president of a small northwest hospital to join in the fun and treat the president well. Let's do this kind of thing with long face and Yang Guowei.

General academic exchanges, even if there is observation surgery, are to find conventional surgery, and then everyone shows off their technology, and then praise each other. Everyone is happy.

So, they think, well, they're best at this kind of thing.

Therefore, Zhang Fan was not informed.

Other doctors know that this is Zhang Fan's challenge, and others are facing it. Therefore, everyone seems not to know, just like coming to participate in academic exchanges, quietly watching the mouth guns jump up and down.

Except Lin Cong and Lao Zhao, who are familiar with Zhang Fan, want to help Zhang Fan, others don't say they want to help Zhang Fan, but the anatomical map released by Zhang Fan, so they can't help Zhang Fan.

Therefore, no one stood out in the meeting. They are all waiting, waiting quietly.

In the hostel, Wang Yanan and Xu Xian finally enjoyed it. It's not that the conditions here are much better than the five-star conditions. The enjoyment here is sensory.

You think, people who come in and go out will say to you with a smile: Hello, chief. This feeling, this taste, seriously, it's so comfortable.

In Zhang Fan's mobile phone, the information has come: Zhang hospital, the patient number has been in place. Because of the strong requirements of the golden Maoguo, all the patients are patients with spinal cord injury.

These patients have been identified in other hospitals, and they are all patients with spinal cord syndrome, so the operation is very difficult.

The manager of Johnson & Johnson China sent the patient's information to Zhang Fan.

Zhang Fan frowned at the patient's information.

It's really difficult. He didn't expect that the orthopedics of Jinmao country has been so strong.

If orthopedics has not sublimated before, Zhang Fanzhen is not sure about this operation.

But now it's different.

Although difficult, for Zhang Fan, this is not a super outline problem.

.....

At the meeting, we finally got the patient's information.

Lin Cong and Lao Zhao took a breath directly with the information in their hands.

The people of MARUKI, Bangzi and Mishima were excited from their eyes.

They know that this kind of operation can be done by the golden Maoist country, and they are not allowed to observe it. This is really a good opportunity.

Chapter 1046

When the patient's information was in hand, the mouth guns discussed who to go to. Suddenly one of the youngest felt bad.

"Listen to me a little first."

"Xiao Li, give up this time and let you go next time."

The oldest mouth gun directly interrupted the other party's words and joked. How many people did it take to make such a big scene this time? Can you pick peaches?

When he said this, the youngest shut up quietly and pretended to be very angry. He put down his patient data and left his seat!

"Next time we have to think about it. Don't drag anyone in. We must find some people who understand!"

Looking at the distant companion, the mouth gun boss stared at each other's back with cold eyes, but for a moment, and then opened the patient's information as he said.

As a result, just as the rooster who just stepped on the hen and raised his head happily to sing was pinched by his master's neck to kill, the sound squeaked and disappeared.

His face changed from ruddy to white, and finally, as if frozen, his face was green.

Several other people also saw at this time, "how can this be done? How can this be done? Can this operation be done? Didn't you say good academic exchanges. Didn't you agree to make friends? "

Several of them turned to look at Jinmao. At this time, Jinmao's eyes were like knives and slowly shot at the doctors in the meeting. As if to say again: come on, come on, come on!

This is technical rolling. You can't, really can't, and you won't say you can fool it.

"Well, please prepare for the operation."

The female manager of Johnson & Johnson, dressed in a one-step skirt and dressed up elegantly and solemnly, stood up, smiled and worshipped at the doctor who was going to have surgery today.

The mouth guns need surgery, and the golden hairs need surgery, so they all sit in the position of surgeons.

When this sentence was finished, other doctors turned their heads in unison in the meeting room, just like the peer attention ceremony, and everyone looked at them in unison.

What's special in your eyes is banter.

Who says that those who engage in technology are honest and upright. They are so bad that they can't be prevented. Really, they are wilting. This is a typical example of knowledgeable subordinates bullying inexperienced leaders.

I said you wouldn't listen. I'm too busy. OK, I won't say it. I'll quietly look at the real force and watch you loose.

The leaders also looked over with a kind of eyes full of expectation, hope and encouragement.

If today is an ordinary operation, these people will definitely stand up bravely with high toes, and say a few words and awe inspiring words before entering the operating room with the spirit of sacrificing themselves.

But not today.

This operation can't be done. If other things are OK, if the patient dies on the operating table, so many experts, domestic and foreign experts, don't even have a way out.

Really, my pants are pissing.

Especially in the eyes of the leaders, sitting in the position of the surgeon, they all feel as if they are naked.

Embarrassed, nervous, unable to swallow saliva.

The most irritating thing was the shameless golden hair leaning up behind him. At this time, he even began to urge: "we don't have much time, please!"

Really, if time could go back, they would never come to the meeting.

But now, it's too late to cry.

"Experts, please, all the equipment and expenses are provided by Johnson & Johnson. Now please applaud and give them to the experts again with our warm applause, to the experts who save the lives and heal the wounded."

The hostess flashed the atmosphere in the meeting.

She also wondered what happened today.

The leaders in the front row are normal.

But the doctors in the back row were all gloating, while the surgeons seemed to hide their eyes as if they were thieves.

Didn't you highlight their importance? But it doesn't seem right.

The hostess wondered, mainly because her level is not high. Don't you see that today's high-level people are hiding!

"This, this, this, this operation needs dehydration, otherwise it will cause secondary and more serious damage to the edematous spinal cord. Therefore, now I think we should dehydrate and detumescence, and then operate after the edema subsides. "

The leader of the gun finally breathed. People are more or less experts, so they made an excuse at the first time, but it was very rigorous and scientific.

The mouth guns have thought well. As long as they pass today, they will go back to the capital and never come again.

I was so famous that I almost fell into this puddle.

When the boss of the mouth gun finished, several other people also looked at their boss with admiration.

Escape from death, really, nothing in the world is more fortunate than this.

Just when a few people were lucky to escape from death, the hostess looked at them with a very puzzled and strange look, and then said, "they have been treated and their swelling has subsided, so they are waiting for the experts to have surgery!"

"Well!" It was a bolt from the blue, really. A few people, you look at me, I look at you.

"I doubt the level of your country. That's why we Europeans and Americans don't accept medical education in your country. You are so unprofessional.

You copy other people's achievements and use them as your own. I want to protest to who! "

The golden hair expert couldn't help it. He was in a bad mood. Now he even put himself together with a group of clowns.

As soon as this was said, the leaders quit.

"What the hell is going on!"

The driver cadre was angry.

Mouth guns, this is really urgent“ I, we, we don't... ”

At this time, Lao Zhao spoke.

"It was Dr. Zhang who took the lead. I don't know why. Dr. Zhang was disqualified and didn't even notice."

Drivers and cadres can kill people when they look at their mouths and guns.

Really, I didn't say a word to them.

Turned around and looked at everyone here quietly.

"I don't care what's going on between you, but today is not the time for you to compete, nor is it the time for you to be motivated. Now they have hit the door.

Who can stand up, who can come next. "

The leader was also angry, and the flash flashed.

Originally, the leaders wanted the media to go out. As a result, there were foreign ones.

He had the heart to kill these mouth guns. It was originally a show of face, but now it has been revealed.

Lin Cong looked at the information in his hand and wanted to stand up. As a result, Lao Zhao pressed it down“ I also want to have surgery, but today's thing can only win but not lose. "

Lao Zhao's level is here, and he stands high and looks further. Lin Cong is unwilling to sit down.

Indeed, he's really not sure about this kind of operation. As long as 40% of them are willing to have this operation, he's not for others, just to prevent these golden hairs from arrogant.

"I'll contact Zhang Fan!" Lin Cong suddenly said.

"No, I've asked Johnson to pick it up. It should be here soon. "

Lao Zhao squeezed his eyes, then turned around and said to some of his men, "how sure you are."

He knows what he is asking. He works together every day. Who doesn't know whose length and whose depth.

But he just asked.

Sweat, really, this sentence is like a whip beating the heart.

It sounds like consultation. In fact, it's torture, torture of the soul. Really, especially a group of people who came back from the golden Mao country.

Seems to be asking again.

People will.

Why don't you.

It is often said that the golden Mao country, the golden Mao country. Now let you do it, but

Technology is sometimes like money. Yes, yes, no, No.

It's impossible to lack a little, and there's nowhere to borrow it.

really

The meeting was silent.

The face of the driver leader of the Ministry of health has become the bottom of the pot.

There is no fire, and people point to their noses and scold, and a group of media who are not afraid of big things.

The of the golden Mao Kingdom looked at everyone and there was no movement. Jinmao's shouting is fierce.

They are here to attack Chinese orthopedics this time.

They believe that as long as the crackdown continues, it is estimated that China will not be able to slow down for several years.

Really, the more Jin Mao talks about it, the more powerful he is. In addition, he began to wantonly say to the media that the Chinese stole other people's scientific research results.

Doctors in some countries such as MARUKI, Bangzi and Mishima shook their heads in disappointment. I

was going to watch it and see if I could talk to someone who sent out the anatomical decomposition map.

As a result, it turned out that it had stolen other people's achievements.

Hey!

They looked at each other and stood up ready to leave.

They won't be involved in such shit. They are almost top orthopedic doctors. They won't be like idle people watching the excitement in the streets and alleys.

The media are also whispering.

Yang Ma's people have seen the world after all. One of them came quietly and said, "come on, find a way to public relations. If it's really sent out, it's ok..."

The driver broke his teeth.

Especially for no reason to provoke a coquettish.

"The Chinese are thieves who have stolen our achievements!"

When Jinmao raised his fist and roared at the camera, the door was pushed open.

Too hard, everyone looked at the past.

At this time, Johnson & Johnson's regional manager and deputy manager bent down and opened the door to Zhang Fan.

Zhang Fan stands in front of the door.

Just then, the morning sun penetrated through the window and shone on Zhang Fan standing at the door.

The slight morning light is not dazzling.

However, Zhang Fanzhao, who is standing in the dark, is very tall.

"Here he is!" Shuitanzi's Lao Zhao looked at Zhang Fan, who was illuminated by the sun like a spotlight, and talked about it in his mouth.

"He's here at last!" Lin Cong looked at Zhang Fan and finally replaced the shy shadow in his mind, standing at the door.

Standing at the door, he didn't say a word quietly, but Zhang Fan with momentum.

Chapter 1047

If there is no golden hair, Zhang Fan will definitely stand at the door with a smile, a shy smile, and then find a familiar person to sit together.

Absolutely like the brother next door, he is shy, introverted, sensible and honest.

But Jin Mao said he plagiarized, which is unbearable.

You can say I don't understand scientific research.

You can also say I can't operate.

But you can't say I copied.

I work hard in the system day and night. During the meal, I take time to work hard for a while. I work hard before going to bed and after going to bed. Even if I can't forget after all, I have to work hard.

As a result, by your word, I gave no to my hard work. So Zhang Fan with a frosty face stood at the door, in the light.

"Zhang Fan ~! Mr. Zhang, he drew the exploded view. Old Jinmao is too shameless. "

"This is Zhang Fan?"

Those who knew and supported Zhang pointed to Zhang Fan in a low voice and said to those who didn't know him. I didn't know him until this time. Oh, he is Zhang Fan!

I think Zhang Fan is too young to study anatomy. Look at Zhang Fan, look at her golden hair, frown tightly, pursed her mouth and didn't speak. These are all thoughtful. They don't want to help Jinmao, but they don't want to be unconscionable. That's why this is a Chinese doctor, a Chinese doctor with skepticism.

But this time there were more young people. When they saw Zhang Fan at the door, many people stood up, "teacher Zhang, Zhang Yuan!"

Zhang Fan looked at Jinmao. He saw at a glance that one of the middle-aged blonde men was the core here, although he didn't shout at the camera.

But the eyes confirmed that it was him.

Like women's sixth sense, those engaged in technology also have this feeling. Maybe they have the same temperament.

Zhang Fan looks very accurate. A middle-aged man like a potential assassin hiding in the golden hair team is named zakstan. His beard hanging from his temples looks like a goat. Deep eyes look at everyone as if they are staring.

The ancestor of zakstan is said to be German, but there is a stan in his name. I don't know. I thought it was one of several Stan countries around China.

Almost all of their families were in finance, but he became a doctor. As a result, the doctor took an unusual path. When he was young and his level was not good, he organized a group of high-quality doctors into a closely connected team.

What are you doing? It's not for the appeal of faith, nor for the president. No, he's just for money. He's been struggling for more than ten years.

It can be said that they have rounded up the operation at the top of the orthopedic department.

Basketball, football, football, tennis, boxing, golf, as long as they are rich sports, almost all have their shadow.

In fact, there are only a few people at the top of each medical discipline. This thing really depends on talent. Being an average doctor, strong body, hard-working and hard-working spirit, a platform for you to give full play to your talents.

This is necessary, but if you want to go to the top and the peak, these conditions in front are auxiliary conditions, and the most important thing is to have talent.

Zakstein was one of the people who reached the second peak of the orthopaedic spine. This guy's brain circuit is different from others.

For example, when you reach this level, you should at least be a professor, and then make a book and a biography, and bring several orthopedic journals.

Let a group of orthopaedic carpenters look up and worship.

When I'm free, I take a few blonde female students to make a speech around. Isn't it very fragrant?

But zakstan didn't. He really sneaked into the village. Don't shoot.

Journals are not distributed, professors are improper, and medical circles are not mixed. He took a group of people to make money in a low-key way. To tell the truth, many people in his team are more famous than him, but he is still unknown.

It's also wonderful!

"Plagiarism?" Zhang Fan came in gently, followed by Wang Yanan, Xu Xian and Zhou Chengfu. If Wang Yanan changed into a big man in the northwest.

Darling, the momentum is even more fierce. Think about the strong men in the northwest who are up and down one meter eight,

Think about it, a group of big men look at Jinmao with a kind of cannibal eyes.

The original shouting voice of Jinmao was several tones lower.

I can't scare him!

Zhang Fan entered the conference room with his voice.

"Put my exploded view on the display." Zhang Fan's face was cold.

Anyway, there is no master or uncle here. The most important thing is that these yellow hairs completely erase the fruits of their labor!

When Zhang Fan finished speaking, Johnson & Johnson's Regional Manager quickly ran down the steps and ran to the projector. His fat body was wearing a black suit and white shirt. He looked like a Tuanzi. He didn't know how he ran so fast and agile.

Soon three hand-painted exploded drawings were printed on the big screen. The projector with tens of thousands of pieces was really good. The pictures on the screen were very clear.

Zhang Fan went to the front and looked at zakstan hidden in the crowd without looking at others.

"As we all know, the spinal branches of Caucasians are often semi-circular, while most of the spinal branches of Asians, especially Chinese, are integral.

You said it was your scientific research achievements. Do you have any data? Where did you study the whole ring structure. This is clearly an anatomical map dominated by Chinese people.

When did you start a large-scale anatomical experiment on our population? Is there a phase artery map? Is there a pattern of blood supply to the spinal cord? "

Zhang Fan rarely asked in an aggressive tone.

Johnson & Johnson hostess is also a talent. She even translated such complex professional terms.

Yelling golden hair, speechless.

He did not dare to refute, nor did he dare to ask for data with Zhang Fan, otherwise he would be lying.

If you really want it, Zhang Fan really can't give it. Because Zhang Fan didn't either!

"There is no need to discuss these. All studies are set up for surgery. China is also a country with a large population. All of us here are top Chinese scholars and professors. Doesn't anyone dare to stand up and do this operation? "

The co chair quickly began to pull the topic away.

When it comes to surgery, Zhang Fan is not afraid at all.

"Hehe, how can you kill a chicken with an ox knife! It is said that you are the top spine team in the golden Maoist country. Today, our tea vegetable hospital team in the northwest frontier of China will meet you! "

Especially when talking about the tea vegetable hospital, Zhang Fan spoke quite accurately and loudly in front of the camera in the back row.

"OK, let you choose first! We can do any one! "

The rain stopped and the sky cleared up. You think you can do it again! The golden Mao Kingdom screamed the most fiercely. The guy who just let Zhang Fan say nothing jumped out again.

"Are you the master knife?" Wang Yanan was angry. Although the girl was a lot softer now, she couldn't help it. Now she finally had a chance to antagonize others. The sharp toothed girl jumped out immediately.

Zhang Fan didn't do the operation well. He quarreled with others and let him half a body!

Ask the soul! The yelling golden hair was stunned.

"Well!"

Ask this guy again! In full view of the public, he was asked twice to end his tongue, and he was almost crying. At least I used to be a doctor in mace. At least I'm a famous doctor.

As a result

Why ask questions I can't answer? Why, why!

"Hehe, as guests, can we choose first?" Zakstan looked at the watch on his wrist and gently pushed away the yelling golden hair.

Wang Yanan hasn't been so cool against people for a long time. When he saw another one coming out, he was ready to go forward and continue to fight against him.

As a result, Zhang Fan gently pulled her arm.

Zhang Fan looked at zakstan, "OK. A guest from afar! "

Jin Mao chose the oldest patient. Although the difference was not much, they didn't make any tricks.

After the election, like the waiter holding the plate, he shrunk his head and raised his hands, "it doesn't matter. We choose the oldest!"

I'm really capable and can say that I'm really sorry for them if I don't get rich.

Zhang Fan also chose one.

"Please take it!" Zhang Fan means, go into the operating room!

"There are still two patients. Isn't none of the doctors below a warrior?"

That's the fatal word.

Many doctors below have turned white.

"Hehe, it's not my teacher, it's my predecessor. Surpass me first and say something else! "

Zhang Fan stood up.

"Hehe, good!"

Then they went into the operating room.

Zhang Fan turned and nodded to the people he knew.

Lin Cong wanted to stand up and help Zhang Fan, but he didn't stand up in the end.

Lao Zhao stared at Zhang Fan and nodded slightly.

Then Zhang Fan took Wang Yanan and them into the operating room.

Mouth guns, looking at the long guns and short guns in the back row, "we invited them with human kindness!"

Look at the angry driver leader and company leader, "Zhang Fan, Zhang Fan is definitely intentional. He didn't come early or play. When we couldn't get down, he came. Absolutely, absolutely! "

"Leadership!" The highest position in the mouth gun hesitated to come to the leaders of the Ministry of health and the company University. Now, let's not think about anything else, but explain it to others first.

The driver leaders of the Ministry of health are angry. If there is no Zhang Fan today, how can they step down today? If there is news, they have to carry the pot!

When Zhang Fan appeared, Lao Zhao of shuitanzi quietly told the leader about the matter.

At this time, Zhang Fan looked like a thorn in the flesh.

And the leaders look at the mouth gun is a thorn in the eye!

The driver leader of the Ministry of health turned his head, as if there was a picture of a lady bathing on the white wall.

Holding his arms in his arms and crossing his chest, it is obvious that I am angry and strangers are not allowed to enter.

The guns trembled, trembled, and did not know how to enter the crowd.

This circle says whether it is big or small. They don't have to think about it. It is estimated that their embarrassment has long been sent to various QQ groups.

There's no place to cry. It's a lifetime's effort.

Several people looked at Zhang Fan's team who had begun disinfection on the display screen, and their teeth were broken!

Chapter 1048

The two operating rooms are displayed on the display screen at the same time.

The cooperation between the two teams is very good.

And what is particularly similar is that the two teams hardly speak, just like a mime.

The doctors in the meeting hall can understand it. Even if the doctor of the operation doesn't speak, he can understand it.

But the leaders are different. I saw a group of people walking around in blue-green clothes in the operating room. I didn't know what they were doing.

Johnson & Johnson wants to find someone to explain, but the difficulty of this operation is definitely beyond the ability of ordinary doctors.

Just when the leader sat on the stool in a daze and the regional manager of Johnson & Johnson wanted to find the expert to explain.

Chen Sheng whispered to Lao Gao, "the high court, it's your turn!"

"Good!"

Lao Gao nodded and looked at the doctors in the meeting. At this time, Lao Gao realized how cruel the competition in the high-end field of technology was.

He got up, took the microphone, nodded to the hostess and began:

Team Zhang Fan, Dr. Xu Xian has gone to wash his hands. Generally speaking, hand washing doctors are generally three AIDS.

On the other side, a doctor in the golden hair team went to wash his hands.

Neither of the two teams discussed the details of the operation. It seems that they are confident.

Lao Gao is a bit of a gentleman and his explanation is impartial. If it were Ouyang, he would definitely pick a bone in the tofu. But fortunately, Lao Gao, if Ouyang explains, maybe the people in the venue will laugh at Zhang Fan and them.

Xu Xian washed her hands and disinfected them. Zhou Chengfu and Wang Yanan put themselves in position. Zhang Fan looked at the patient's MRI and X-ray carefully.

Disinfection is as important as postures before surgery. The sterilization standard is unified, and 15cm around the incision must be disinfected three times. And there is no standard position.

There is a saying in the teaching book that the patient must be kept in a proper position before operation.

Why emphasize posture.

This is very important. One operation, especially a large operation, can take as short as one or two hours and as long as five or six hours. Even longer.

After anesthesia, the patient stays motionless on the operating table. If there is no suitable position, long-term compression will lead to necrosis of the compressed body.

Especially this kind of operation in which patients lie prone for a long time, we should pay special attention.

"Zhang Fan's team padded the patient's iliac bones on both sides with a small pillow. oh The golden hair team only padded one side. It seems that they are preparing to tilt the operating table. "

Lao Gao is still professional. The leaders finally understand. Otherwise, they thought the doctors would take a small green pillow and they thought they were looking for a place to squint for a while.

After disinfection and anesthesia, the two teams began to lay sheets.

The preparatory work in the early stage is similar, that is, there are slight differences in details.

For example, there is nothing to say that China first shops its own side, while others shop below the

patients first.

After the operation preparation is completed.

Zhang Fan went to the operating table.

"The master knife is in place. Zhang Fan is already in place. He began to check the electric knife and the suction device. The master knife of Jinmao is also in place. Well, their master knife is the chairman a of the joint meeting!

OK, the operation begins! "

Jin Mao's family zukstan didn't even go to the operating table, just watching the patient's various examinations.

He has confidence in his team. As for Zhang Fan, if he doesn't do as well as his own men, he doesn't have to say anything. As long as he gives Zhang Fan a little temptation, he can definitely settle it.

The operation began.

Although Jin Mao's 60-70-year-old man is not young, his kung fu is still there.

The scalpel and electric knife did not tremble in his hand. This also shows that the old man is still very abstemious in life. Otherwise, at his age, he would have become a Fortune Cat if he picked up the scalpel.

Zhang Fan is even more agile. Not to mention the others, youth is really a huge advantage before reaching the spine.

The incision of the spine is quite huge, almost the same as buying pork in the meat case. He made a long knife from the back, and then the white leather was exposed, and the latissimus dorsi and erector spinalis were exposed layer by layer.

People's back muscles are also quite rich, and there are more muscles in the back than in the chest.

The muscles in front of the chest can be seen, that is, the pectoralis major. There is nothing to talk about except the pectoralis major.

But the back is different. There are too many muscles, and the functions are complex.

This means that women pay attention to the muscles in the chest and men care about the muscles in the back.

For example, this erector spinalis muscle is the longest muscle in the human body. Almost from the back

of the head to the root of the tail.

Serious tenderloin actually refers to this muscle. This muscle has more functions. It is necessary to bend and straighten.

Many people always feel that their waist is not good. They do back and forth S-line movements on their waist and hips, and start to feel sour after moving back and forth several times. Then, looking around, some pig kidneys, sheep kidneys, and some even want to get some medlar to soak deer whip.

In fact, they deceive themselves. If they are greedy, they will be greedy. Don't let their waist be bad to carry the pot.

If you really want to exercise waist strength, there are many methods. The simplest one is that you don't need to find any professional coach or professional equipment, as long as you have a bed.

Shoulder back handstand, as long as you can stick to it, you can definitely practice a male dog waist like a little wolf dog.

Zhang Fan moves very fast. On weekdays, Zhang Fan has an operation. If it is not an emergency operation, Zhang Fan will not deliberately pursue time.

Quick surgery has the advantage of reducing exposure time, reducing the probability of infection and reducing injury. But often in this way, Zhang fan can stand it, but the assistant may not be able to stand it.

Moreover, rapid surgery, no more, two can make other assistants except Zhang Fan have little energy this day.

Just like the relationship between men and women, before that, men wanted to see bones like little dogs, with saliva and a sincere smile on their face.

Once you enter the sage time, don't laugh, the expression on your face is not worship. Is he tired? I'm definitely not tired of moving bricks all day, but I just can't.

This is a truth.

But today is different. Since you want to let the other party see it, you should let the other party see it.

Zhang Fan is very fast, because it is the operation of the spinal cord, with the help of Wang Yanan.

Zhang Fan everything to the end, Wang Yanan's attractor is also one to the end. The attractor is like an old man and hot tea. It looks like it has little power, but no blood can come out.

The knife crosses the skin and the pliers cross. Zhang Fan blessed the skin on Wang Yanan's side, and

Wang Yanan blessed the skin on Zhang Fan's side.

Then they put their hands on the pliers and the skin was torn apart. Then, the electric knife into the meat, zilala, zilala, in the misty smoke, Zhang Fan and they entered the muscle layer.

At this time, you can't use an electric knife. Zhang Fan's fingered knife is like a loach, drawing gaps between muscles.

What Zhang Fan has done is flowing.

Jinmao also does it freely.

As the operation entered, the difference slowly began to appear.

If you make a popular description of surgery, especially spinal surgery.

In fact, it was a Jianghu game in the early years.

One person, separated the five fingers, and then played the bull force. He began to take the knife and cut continuously between the four fingers. The faster the speed, the more bull force.

And spinal surgery is actually like this.

Because the spine protects the spinal cord. Why the brain can control the body is that the spinal cord extending from the brain changes countless nerves that are not much thicker than hair into the body.

Whether it's the intestines you can't control, or the pectoralis major muscle you can control. In fact, it is controlled by nerves from the space of the spine.

These nerves are like human fingers, and they are covered with several layers of flesh.

If doctors want to achieve their goals at the point of injury, they must pass through these nerves.

But how many nerves are there?

At this time, the importance of anatomy came.

Just like fingers, some people have five fingers and some have six fingers, so the more detailed anatomy is, the more helpful it is to the operation.

It's a little rough. We all know that people have five fingers, but what if they mutate one? What if I accidentally cut off the sixth finger with a knife?

Fortunately, this extra finger controls few muscles. At most, the patient will have long-term chronic pain

or a muscle atrophy and collapse.

But what if this extra finger is responsible for assisting the small head and assisting breathing?

After an operation, people's waist really doesn't hurt, but they don't lift it. It's not impossible for people to cut doctors with a knife.

To tell the truth, sometimes the mutated nerves are not found when the knife is cut. If it is more serious, it can kill people on the spot. The patients are all dead, and the doctor is still wondering.

Is this swollen?

So when entering the muscle layer, the speed between the two surgeries is obviously different.

Moreover, in the operating room on Jinmao's side, the doctor's operation is quite obscure. At the critical moment, an assistant probe will reach out in front of the camera.

The mouth guns also came to the spirit at this time: "look, you see, this is the gap, you see other people's surgery, you see other people's surgery ~!"

Although we can't see who has done well in the operation, the mouth guns are willing to take the rhythm. People don't show them the key steps, and they still can't stop the mouth guns from licking.

Really, it's better to give foreign enemies than domestic slaves!

At this time, in the quiet operating room of the operating room, Zhang Fan began to speak.

"Note that there is often a variant nerve here, especially in Asians, with a probability of 23.5%."

After entering the grass-roots level, Zhang Fan began to speak. He was not as afraid of others to learn as Jinmao. He was not only afraid, but also began to teach on site.

Bit by bit, where is important and where needs attention, Zhang Fan keeps giving advice.

In this way, the operation is no slower than the golden hair next door.

"Attention, here, when you are here, you must put gauze on your fingers. Because of the position, there will be congestion and block your sight..."

While talking and doing, it is to let the doctors in the meeting understand that the level is too high.

The doctors at the meeting began to take out their notebooks and start recording.

At this time, a young doctor in Mishima suddenly shouted, "shit, cow force!"

Foreigners call me shit. I guess they don't think selling dogs is shocking enough.

Chapter 1049

Dr. Mishima, I don't know whether it was intentional or what it meant. Anyway, it was his voice. Damn it, it not only surprised doctors in several other countries to look at him.

Even the reporters in the back row realized that China is in the lead in the current operation process!

From the beginning, everyone came here to interview with human feelings or forced by their superiors, but they still didn't feel good.

Unexpectedly, there was big news soon after entering the door. The leader's face was crooked with anger.

It is estimated that many people have made a good abdominal draft: on the gap between Chinese medical care and Europe and the United States.

As a result, another tea vegetable Zhang Fan was killed on the way. There were no ups and downs, but there were twists and turns. Most importantly, China has taken the lead.

It's not news. In addition, the manager of Johnson & Johnson has said that he will offer it after the meeting, which excited a group of media people.

It seems that everyone likes to expose the incomplete and backward side of China, because there is nothing exciting to publicize. In order to eat, we can only find events that shocked UC and attract people's attention.

But it's different today. China is very strong today, and Chinese doctors are very strong today. Although I can't understand where the cow is, it's enough to talk about it step by step.

What is the sense of substitution, what is empathy, this is.

On the display screen of the same size, there is no more attention on Jinmao's side. In addition to scolding Jinmao's failure, all those who know or don't know are staring at Zhang Fan's side.

Zhang Fan did it very smoothly. His explanation is to prove his skills and let Jin Mao see. Not everyone is like you. If you have an anatomical map, you can hide it.

Second, in fact, it is also to slow down the operation so that Wang Yanan and they can keep up. Zhang fan can't stop deliberately. All the people present are experts.

We can't make everyone feel that the tea vegetable team is just the same.

Therefore, Zhang Fan explained while performing surgery. At the beginning, Zhang Fan seldom gave such a large explanation during the operation. From the beginning, it was a little dry. Slowly, what Zhang Fan did and said matched perfectly, and his tongue said it was full of saliva!

In fact, Zhang Fan thinks too much.

When Zhang Fan began to explain, experts were almost looking at his hand and the operation under his hand. Because what Zhang Fan said is too detailed, there are often some important points. When he said it, many people suddenly realized.

"Oh! It turns out that this place will mutate a nerve with a small probability. No wonder I finished the operation for the patient. The patient always said that his urine was like a shower! "

Medical problems are really like math problems. Think it through and understand. It's not worth a penny, because people are waiting for you everywhere. You just can't think of it and can't see it.

But if you can't figure it out, a difficult point that can be solved by a doctor all his life may not be solved.

Therefore, this is why the success rate of surgeons is low and flying knife doctors are so popular. Because people want to know more than ordinary doctors.

This is the ability!

Cut open the back and separate the erector spinalis. During the operation, many muscles can not be cut off without cutting off.

When a muscle is cut off, it is like taking glue and sticking it together after a rubber band is broken. Generally, there seems to be no problem, but once it reaches the limit, this place will break.

Therefore, in surgery, doctors use a finger or a row of fingers, a Yang finger or six pulse sword to

separate the muscles.

How?

This is not only boring but also difficult to understand according to the serious operation sequence. In fact, most adult men understand it.

For example, when talking about objects, other girls don't want to. Adult men talk all kinds of sweet words, but other girls defend very seriously. If it's really strong, it's estimated that it can get a girl's slap in the face.

And the key places are heavily guarded!

What to do? The IQ of men at this moment is definitely as high as that of old love.

While saying insincere sweet words, he pulled the girl's dress collar as big as the crotch, then squeezed his hands and eyes, and finally saw and touched the white

In fact, this is how the fingers divide the muscles in surgery.

Really, as like as two peas, it's just a few more hooks.

When the muscles are separated, the operation on both sides can be seen by people who are not in the industry.

Zhang Fan is obviously more powerful than the one next door. He is afraid of comparison.

If you just look at Jinmao's operation, it's really powerful. Can be put together a comparison, golden hair is not good.

In the operation next door, the blood is quite obvious in the surgical field of vision. The thick fingers of the golden old man turned over in the organization like carrots stained with tomato sauce.

Zhang Fan's side is different. Zhang Fan's anatomical and surgical accuracy is not comparable to that of old man Jinmao. If it weren't for Zhang Fan's assistants and Jinmao, it would be interesting.

It's definitely crushing the next door. Even now, it's still the trend of hanging.

In Zhang Fan's operation field, there was almost no blood, and his slender fingers danced on the muscles, nerves and blood vessels like elves.

With Zhang Fan's explanation, it's true that the operation can be made into an art that can be watched by laymen!

There are two doctors in Mishima who can understand Chinese. They listen to Jingjing with taste.

Doctors in Bonzi and MARUKI countries don't understand. The anxious people scratched their ears and cheeks.

Bonzi country and Marubeni country don't know much about other industries, but the medical academic circle really despises China.

Chinese orthopedic medical circles are crazy.

When it was determined that the team from the golden Mao kingdom would come to China, everyone didn't believe it.

Now, QQ circle of friends, University Renren, and even Tianya gossip, everyone is paying attention to the operation.

A group of young doctors who had the honor to participate in the operation directly came to a live text broadcast.

"The tea vegetable team is mighty, and Zhang Yuan is mighty. Judging from the current progress, the doctors of tea vegetable are really powerful, especially Zhang Yuan. The knife technique is accurate and unique.

It is said that Zhang Yuan is the third generation disciple of the ancestral family. "

Tianya and Renren are beginning to interact.

"I'll go. Will you brag and force me to learn? Don't make common sense mistakes. The ancestral family is a general foreigner. You say an orthopedic doctor comes from the ancestral family. Are you kidding? Are you a doctor?

I'll go. Everyone is scattered. This is an lzsb. The appraisal is over! "

There are also young disciples who call themselves ancestors. They don't know whether they are five or six generations. They also speak in the Forum: "Zhang Yuan is a disciple of ancestors. It's my little master! Don't talk nonsense if you don't understand. Zhang Yuan is powerful. Can I test your graduate student? The general foreign affairs director of our hospital is your nephew! Ask Zhang Yuan to pay attention! "

This is a little inside information.

"I'll go. What do you know. Orthopedics, people's golden hair is the most powerful, followed by Germany. Orthopedics in China? Orthopaedics in China is still undergoing bone setting massage. Shit, a group of sailors advertise to a group of quacks who receive red envelopes! "

After a while, the building was crooked, and even the guy who broadcast the text also participated in the quarrel. From orthopedics to the national system, whether human nature is good or evil.

From Hu Zixi to the golden lame president, and then from Lao Si to bald head, it's earth shaking anyway.

Finally, Tianya couldn't carry it. She sealed this post directly. But the administrators also remembered a name, tea vegetable Zhang Fan!

A group of network experts who didn't argue about winning or losing didn't stop. I'm kidding. We're not allowed to speak on such a big thing. Then, go to Du Niang post.

Zhang Fan didn't finish the operation. Du Niang had a post.

The post bar of tea vegetable vs casino is on fire. Within half an hour, the maximum number of follow-up Posts reached tens of thousands, and the number of new posts exceeded 3000. Directly crushed all kinds of star posts at that time.

Unexpectedly, someone opened the plate in the post bar. Tea vegetable vs golden hair casino, 1:12, but this was deleted in an instant.

What Zhang Fan didn't expect was that his own operation led the topic circle.

Of course, most of them are watching the excitement here. None of them are professionals.

What is really discussed is the work group, colleagues group and classmates group of colleges and universities and hospitals.

In several top medical groups in the capital, "Hey, what's the origin of this tea vegetable Zhang Fan? He suddenly wanted to be popular overnight. I just looked at it. Baidu has his entry, but it's very simple. I can't see anything specific.

But I didn't see orthopedic Zhang Fan in the literature data network. I was unwilling. I went abroad to check again. I really think there is no such person in the orthopedic industry?

Which big man will popularize it and kneel down! "

This group is almost all the top medical students in the Chinese capital.

"Hehe, I know something about it. Zhang Fan, graduated from Gansu Medical College, participated in the western support and went to tea. Later, he worked with Professor Li Cunhou of the golden mean to study skin allograft and free skin grafting.

You can see this paper, which is quite level.

In the same year that the paper was published here, Zhang Fan and Professor Zhao Jingjin, a River scholar of niaoshi Medical College, jointly published the feasibility report of Liver Center tumor surgery.

It can be said that this paper is an extension of Mr. Wu's paper. Orthopedics doesn't seem to have found it. But doctors who can do spinal surgery are experts of a generation. "

The questioner clicks on the avatar of the answer and looks at it. Darling, doctor of medical confirmation and methodology in the capital!

First, the top group said Zhang Fan wave by wave. Some wonder, some wonder!

In their views, Zhang fan can be divided into three types: Genius, backstage and not alone!

But this can't stop some people from showing off. Despite the top groups, there are big guys and small transparent ones. Not everyone is at the same level.

Some small transparencies are often silently peeping at the screen in the top group. Even if they speak, they will be cautious and deeply afraid of becoming the topic terminator.

However, leaving this group, in other groups, he became a big man.

For example, in a group of college students.

"I'll go. My God, Zhang Fan, who is this big man. It's so awesome. I can compete with the fine orthopedics of the golden hair country. " That's all he knows.

Then a female classmate asked, "Zhang Fan? For what? "

A group of licking dogs began, "goddess, I'll ask you."

"Beauty, why are you bubbling today? Are you free tomorrow weekend? "

At this time, the little transparent in the top group spoke.

"Oh, are you talking about Zhang Fan? I know a little... "Then I modified what I saw in the top group to become his insight!

"Wow, Xueba is Xueba. It's different to go to the capital to study for a doctor."

"Is there a pendant missing from the thigh?"

Little transparent smiled and turned off the group chat with satisfaction.

.....

Even the big operating room.

When Zhang Fan has started stitching, the golden hair next door is still competing with the spine.

The phone in zakstan's hand trembled slightly. He gently took it out and saw a message in the phone: Zhang Fan's operation is over!

After reading this one, zuckerstein smiled gently. Then he turned and left the operating room.

Chapter 1050

"Interesting!" Zakstan came out of the operating room and entered the small meeting. He looked at Zhang Fan on the screen. But the appreciation in the eyes is still obvious.

Because when he was Zhang Fan's age, his level was definitely not as high as Zhang Fan. He thought it was a talent, an orthopedic genius.

Even if he didn't see the whole process of Zhang Fan's operation, he can look at the time and the operation time of Zhang Fan. In his own team, that is, the second echelon.

But how old is Zhang fancai!

In fact, he didn't know. Zhang Fan waited for his assistant while explaining, but didn't give it a go. He can be the boss of others because he is responsible for his men.

If you know that Zhang Fan didn't do his best, it's estimated that he would have to find a way.

After seeing Zhang Fan's operation, if there was a voice over, zakstein would probably say: time for a truedi play of skill!

It's not that zakstan is too confident, but that others have this strength. His teacher's teacher was penkov's staff at the University of Vienna during the moustache era.

On anatomy, people can say that there is no precedent and no future! The existence of the world.

And, most importantly, he hasn't seen such a young surgeon for a long time.

Seniority is particularly serious in the medical field. Not only at home, but also abroad.

His team is a little out of touch now. Older doctors, because of the formation of technology, are hard to cultivate and are not easy to master.

The training process of young doctors is too long. His favorite thing is to pick peaches and want him to plant trees. This kind of work is almost done by others or other countries.

Therefore, when he saw that Zhang Fan's surgical level was better than that of the old man who had withdrawn from his team, he thought in his heart that this young man could be pulled into his team.

To tell you the truth, if he gives word, his team will be very important. It's really not guaranteed that there will be doctors of any level to take refuge in.

When Zhang Fan's operation is finished and waiting for the patient to wake up. Wang Yanan looked at Xu Xian and Zhou Chengfu around him and said, "I'll do spine in the future!"

Xu Xian skimmed his mouth! He studied joints as a graduate student, so he won't change to get the spine. Wang Yanan is a bright knife, and Zhou Chengfu is the one with the right tip.

"Hehe, take what you can. Look at you. Your hands are shaking slightly!"

The operation went well and everyone was in a good mood. Wang Yanan, in particular, has a little pride.

But today's operation is really the limit of a girl.

Although Zhang Fan deliberately slowed down, for Wang Yanan, he should not only focus on not saying, but also prepare Zhang Fan's next step in advance.

I'm really tired, but this kind of high-intensity surgery with one help really makes the girl feel different.

This is just like a guy who has just grown muscles. He suddenly feels like he is already a man and wants to swear his own chassis.

Zhou Chengfu had already passed this stage, so he immediately pointed out that Wang Yanan's hands

were shaking.

"Well, well, Asian men cooperated well today. After more than a year, the growth rate really has to be impressive. All right, take a break. It will be up to you to fight with others later! "

Zhang Fan catches up with Wang Yanan who wants to come forward.

Listening to Zhang Fan's words, Wang Yanan proudly glanced at Zhou Chengfu, and then patted Xu Xian, "Xiaoxian, how are you doing today!"

Looking at the harmony of the team, Zhang Fan was also very happy.

When Zhang Fan and others walked out of the operating room, the venue was boiling.

"This boy can! I thought he went to general surgery. It seems that he is still an orthopedic doctor! But you are the orthopaedics of Bluebird... "

Shuitanzi's Lao Zhao said to Lin Cong with a smile and looked at Lin Cong's eyes. The meaning was also very clear, just as Lin Cong delayed Zhang Fan.

Lin Cong was almost stunned by his anger. He had seen Zhang Fan's surgery several times when Zhang Fan was studying. At that time, Zhang Fan was a mess in the operating room and didn't focus on orthopedics.

No, why do you say I can't do green bird orthopedics. Lao Lin sat up straight and wanted to swing the dragon's gate with Lao Zhao.

Others, especially the media who are not knowledgeable, are excited. Chinese doctors beat the operation team at the top of golden hair. They are too excited and angry.

When the young doctors at the scene looked at Zhang Fan, especially at Wang Yanan, there were stars in their eyes.

Beautiful, tall figure, put on a white coat, a pair of proud eyes, it's so attractive.

Someone even raised his hand to ask Zhang Fan to accept graduate students?

Looking at the hot atmosphere in the venue, the hostess of Johnson & Johnson was even more exaggerated. When her bright lips were opened and closed, she praised the equipment provided by her team to Zhang Fan!

Zhang Fan smiled gently and looked at zakstan standing on one side.

Although there is no exaggeration to the spark between eyes. But Zhang Fan's desire to win is absolutely

like fire.

Zhang Fan had an operation and looked up. It turned out that it was the old man with golden hair who was operating. The old man with golden hair was about one meter nine or almost two meters tall.

The originally strong fingers, when magnified on the display screen, are more like a carrot.

"The master knife is this old man!" Zhang Fan felt a little lost.

At this time, the driver of the Ministry of health directly stood up and walked towards Zhang Fan.

"Hard work!" Holding Zhang Fan's hand, the leader looked at Zhang Fan carefully. I didn't know he thought he was looking at his son-in-law.

Not only the leaders were happy, but also the young doctors in the back row were very happy, as if he had done the operation.

"Penny, look, look. See, Mr. Zhang is powerful, Mr. Zhang Fan's surgery has been completed, and the golden hairs are still in the operating room. See, China is mighty! "

Not only sent text, but also sent a fuzzy photo. Behind Zhang Fan is the display screen, in which the golden hair is still undergoing surgery.

After all, it's a cell phone pixel, and it's far away. It's not very clear.

"I'll go, chinese cow! But this teacher Zhang, how dark! "

"What do you know? It's wheat color and healthy complexion. Zhang Yuan is not only an orthopedic doctor, but also a good athlete. Only sports can make Zhang Yuan so powerful. I am a fitness coach. If you want to exercise, please add qqxxxx! "

He said everything, but he was happy on the whole. Although I don't understand how Zhang Fan won and what he can do after winning, it doesn't prevent everyone from being happy. After all, we won.

But disharmonious people also have, "will it be good soon? It's estimated that the organizational structure is not clear. Alas, the medical treatment in China depends on such people. I think it's hopeless.

I'd better take the TOEFL test and go to Jinmao country to enjoy advanced medical treatment as soon as possible. This black coal ball is left to you losers! "

For a time, it was fried into a ball, but fortunately, we are not discussing whether Zhang Fan's is black or wheat.

Cha Su said, "my God, huazi, come on, come on, your black briquette is famous. Come on, come on! "

Jia SuYue exaggerated to call Shaohua. Shaohua has been in a mess recently. He originally expected Zhang Fan, but Zhang Fan went to a meeting.

"What's the matter?"

Shaohua asked weakly.

"Go online, go to tianya.com or Baidu Post Bar. Your family Zhang Fan's operation has surpassed the main a seat of the golden Mao country. Good boy, great!"

Shao Hua hung up the phone and hurriedly looked for a computer to surf the Internet.

Jia SuYue usually likes to surf the Internet, look at stars and gossip. As a result, he actually saw his acquaintances on the Internet today. At first, she was very excited, as if she was famous.

After the call, I felt a little uncomfortable.

After reading it, Shaohua turned off the computer angrily and said, "who are these people? What's wrong with the stone in my house? Why is it ugly? How is it ugly? How is it a black coal ball? I'm so angry!"

It's really special. The brain circuit is different. Shouldn't we pay attention to Zhang Fan's win?

In Ouyang's office in the people's Hospital of chasu City, Ouyang is wearing reading glasses and standing next to the director of the hospital's computer center.

"Why are there so many two dogs? Nobody cares? Delete this one for me, that is to say, the one with no future for Chinese medical care! "

The old lady's angry eyes hung on her nose. Roll your eyes and look at the director of the computer center.

The director of the computer center is sweating ~" You think this is the hospital forum of the hospital. You can delete whichever you want! "

When everyone is angry or happy.

Zakstan, who stood aside, said, "Hello, my name is zakstan, former director of Mayo spine. Now lead the team to study spinal kinematics.

I think your operation has reached a bottleneck. Do you want to improve in the past? "

Zukstein said with a smile. After that, the translation of their team came over at the first time.

In fact, Zhang fan can still understand it now, but he just needs to be slower.

"Oh?" Just when Zhang Fan wanted to talk.

Zakstein continued, "it seems that you know English. It's better. I'm sure your research fund will not be less than five million if you like. This is US dollars.

Moreover, I can set up a separate laboratory for you, focusing on you. You can bring an assistant you think is excellent. Like this beautiful lady!

Let's talk about our team's achievements. I heard that you Chinese like basketball. Yes, it's the NBA. Many top NBA players are members of our team! "

Zhang Fan was stunned. It was not strange, but this guy said too much this time. Zhang Fan was still translating what this guy said in his mind.

But there are too many people who are better at English than Zhang Fan.

Many people, many people who used to be happy, can't be happy anymore.

Transpose and think about whether you would refuse the hydrangea thrown by others if you were Zhang Fan.

Just promise, an independent laboratory, five million dollars. Really, this condition is great!

"It's over, it's over! Jin Mao invited Zhang Yuan, five million dollars, and set up a laboratory for Zhang Yuan... "

On the Internet, there was instant silence!

Yes, it's silence!

A few seconds later, no matter the post bar or Tianya, they are all prompting "XXX, quit Zhang Fan!

XXX quit Tianya gossip, tea vegetable vs golden hair paste! "

Although everyone on the network is an ordinary person and a simple netizen, they can smash the keyboard and support without sleep for their own people.

But they are often the people who originally supported, supported and supported, and they have become people of the golden Mao country.

Again and again sad, let everyone feel that Zhang fan can not avoid vulgarity.

In the meeting hall, young doctors and middle-aged doctors all looked at Zhang Fan quietly.

The mouth guns at the meeting were stupid.

"I'll go. Why don't you invite me? I'm better than him. I'm more famous than him!"

After a long time, Zhang fancai reacted.

He smiled.

When I saw Zhang Fan's smile, everyone's heart crashed.

Zhang Yuan is going to surrender to the enemy! Even the driver leaders of the Ministry of health were anxious. They looked at the media in the back row and Zhang Fan in front of them. He doesn't know what to say. He doesn't know whether he should let the media turn off the machine first or turn around and talk to Zhang Fan!

In fact, when Zhang Fan smiles, he feels very strange.

"What's the matter? I dug people into Lao Tzu."

Chapter 1051

After all, he is not his mother tongue, and there is no language environment. Zhang Fan thought for a long time before he reacted.

During this meeting, the mouth guns were jealous, and the doctors were jealous many years ago. Many people begin to think blindly. If they get so much money, should they buy a sports car or a young model first? Is it better to get a white one or a yellow one? Alas, it's tangled!

People who were not optimistic about Zhang Fan on the Internet said, "aren't you cow force? Cow force continues. Zhang Fan is estimated to be happy and stupid! Ha ha, it's still the freedom and strength of the golden Mao country!

I will also work hard to reach the other side of the sea as soon as possible! "

Many people who support Zhang Fan have lost their energy. They didn't expect that Jinmao should take a drastic salary. It's too shameless. As for Zhang Fan, they already think he is a foreigner.

However, some people, especially some little girls in school, are still optimistic about Zhang Fan, "Zhang Fan, don't go, golden haired women have body odor!"

When Zhang Fan translated it in his mind, he was not excited, angry or yearning.

He is very sad now!

Yes, it's melancholy.

Because Zhang Fan thinks he has worked hard enough and always feels that he should be able to enjoy the treatment of amazing talents now. Unfortunately, he feels good and others don't think so.

This is just like in college, the girls with the largest number of chases are often a combination of wisdom and appearance. But they are not the best.

Often the best girls are short of no one to chase, because everyone will feel inferior in front of her. They only dare to look far and dare not go forward.

Zhang Fan feels that he is also the best now. As a result, others regard him as an ordinary and excellent.

Can this work?

Zhang Fan is really melancholy.

Does the paper mean everything?

At least he is also the president of a class III hospital. Although the hospital is a little remote, his own hospital is also very powerful. How many rescue helicopters are there in China?

Besides, isn't your operation done well?

Unfortunately, these are not as famous as papers.

Really, Zhang Fan watched zakstan's sadness in his heart.

"You have a team, don't I? Why did you dig me? I didn't dig you. Didn't I have a face? "

Zhang Fan looked at zakstan. He originally wanted to speak a few words of Northwest accent english, but on another thought, he seemed a little timid. He immediately said in Mandarin with northwest accent: "Mr. Stan!"

"You can call me Zach!"

"Especially, Lao Ju let me break it off. You don't want it!"

Zhang Fan ignored the translator and continued, "Mr. Stan, in fact, I also have an idea. Why don't you come to our team. We not only have orthopaedic laboratories, but also an orthopaedic research center. Most importantly, we have internal medicine and general surgery research centers to support orthopaedics.

Our project funds are still abundant... "

When Zhang Fan began to talk in vernacular, although everyone felt that Zhang Fan was a little whimsical, they felt that he was a little relieved and a little proud.

The elderly doctors in the meeting hall were better, and everyone was very stable.

But the young people in the back row are different“ oh oh oh Mr. Stan, promise him, promise him! "

Those who watch the excitement are not afraid of big things, just like those who propose on the street. Anyway, no matter what the situation is, everyone says they promise him. As for what this man does, he doesn't propose to himself anyway. It doesn't matter what he does.

Zakstan's face is green.

At this time, their faces are black, "too ungrateful, too ungrateful, lose the face of China, can't he have a little demeanor? Look at Dr. Zach. He's so gracious and polite. How can he do this? How can he do this!

Such a person, even if his technical level is high, is also a person who is harmful to society! I don't know how his leaders educated him! "

The other one next to him nodded his head and said, "yes, he's drunk. He drinks a few dishes like this! People think Dr. Zach is kind, but he is so... Too ignorant of heaven and earth! "

Zhang Fan didn't promise. In fact, they were very happy, as if their toys hadn't been robbed. They were still a little lucky!

However, now they also understand that Zhang Fan is not a little doctor they can teach and accuse in

front of drums and gongs!

When Zhang Fan's words were directly sent to the network by young doctors.

Darling, the students who were beaten by the shepherds are alive again. The surging amount of Posts posted by Zhang Fan turned out to be a topic of the day.

"Dr. Zhang, there are two patients. For the sake of fairness, how about we operate on them tomorrow? As for the chairman a of the joint meeting, he is just an ordinary doctor who has been eliminated by our team. "

"Oh, no, tomorrow. For the sake of patients, for the sake of early recovery, surgery can be performed now!"

Zhang fan does not give in. It sounds like Stan is thinking of him. In fact, he is digging a hole for Zhang Fan.

Don't think Jinmao is honest. These guys are actually serious and shameless. Some Chinese are shameless, do something unconscionable, and have a little psychological burden. And these guys, after doing shameless things, said it to the chanters in the small black room, and nothing happened. Keep doing what you should do. So

"Hehe, OK, see you after the operation. I hope you will carefully consider my suggestion! For example, the lady behind you, if you promise, you can take her and your other partners to our country! "

Zakstan had to disturb the morale of Zhang Fan before the operation. Since you want to compete, you are the enemy. What competition second, friendship first.

It's all fake. People believe in the law of forest preservation. They only believe that it's stronger! Moreover, this operation represents real gold and silver, which must not be neglected.

With that, he looked at Zhang Fan, got up directly and took his assistants into the operating room. Then their figures appeared on the display screen.

Although the patient hasn't entered the operating room yet, zakstan has begun to arrange surgery in front of the lamp viewer, "my main knife, one help John and two help..."

When he began to arrange, as he said a person's name, the people in the meeting room were like collective ventilation. Let out a cool breath "hiss!"

Say a name, collective hiss, say a name, collective hiss, Zhang Fan wondered. Is this swollen?

Although zuckerstein is not famous, his assistants are more and more famous.

A help to John, not to mention the hospital he used to work in, the university he studied in, let everyone look up to his most famous achievements.

John, the chief surgeon of NBA star Paul, the second assistant, and the chief surgeon of san dao star Beckham.

"So he is the boss of New York special orthopedic hospital!" It was only this time that we found out that this brother is the boss of the special orthopedic hospital.

How powerful is this hospital? It can be said that the charges can definitely rank among the top three in the world.

If the orthopedic medical profession is compared to the school of Xiaobao in the Jianghu, some orthodox hospitals such as Mayo and shuitanzi are like Shaolin and Wudang. It is famous, has inside information, and leads the wind direction of the Jianghu.

The New York special orthopedic hospital is the sunflower treasure book and the spectrum of evil fighting sword. The sword is not only at the wrong edge, but also at the peak. They don't accept regular emergency in this hospital.

For example, in Chinese hospitals, no matter how large you are, if they are sent in by 120, you must find a way to treat them.

However, the New York special hospital is different. The regular 120 doesn't receive at all unless you have money.

Moreover, how awesome this hospital is. In this way, the father of joint orthopedics comes from this hospital.

It can be said that it is a hospital piled up with money.

When zuckerstein began to arrange assistants, everyone suddenly realized that this is the real big man. What co chair a and what director Mayo are the heroes of the generation in others.

When we didn't introduce these people, we didn't know. After all, doctors are not stars. They thought they were ordinary golden hair orthopedics doctors. But when people reported their names, as long as they were in the orthopedic circle, they were silent.

You can question people's morality, their fees, and even despise their character. But you can't underestimate other people's technology.

Special orthopedics, fine orthopedics, others hold an ox's ear!

"Master, I, my hands are shaking badly!" Wang Yanan has already consumed a lot of physical strength

and energy in the previous operation. Again, he is the president of special orthopedics in New York.

She couldn't hold her breath.

When Zhang Fangang wants Xu Xian or Zhou Chengfu to be a helper.

Lin Cong stood up: "Zhang Fan, the little girl is tired. Isn't there still me?"

Zhang Fan looked at Lin Cong and smiled, "director!"

Zhang Fan, the director of further education in that year, still used the previous title.

"Ha ha!" Lin Cong smiled and nodded.

No words.

"Ya Nan, how can he be your master? What does he know. If you're tired, go and have a rest. I'll replace you! "

Shuitanzi's Lao Zhao also came out. Although he didn't talk to Zhang Fan, he was still very enthusiastic about Wang Yanan.

Zhang Fan looked at Lao Zhao in shuitanzi. Although he was ridiculed by Lao Zhao, he greeted with a smile: "Teacher Zhao!"

"Hum!" Proud and charming, Lao Zhao proudly waved his head! That means, don't get close. I'm helping Wang Yanan. I don't know who you are!

Zhang Fan doesn't mind at all. This old man has a strange temper, so people can't get angry with him.

Lao Zhao of shuitanzi and Lin Cong of Qingniao are much more famous than Zhang Fan.

The media in the back row kept flashing lights.

Chapter 1052

In both operating rooms, doctors are on standby.

The chief knife on Jinmao's side is Professor zakstein, President of New York special Orthopaedic Hospital, Professor John and Professor Sam. they are not only doctors of New York special Orthopaedic Hospital, but also orthopaedic professors of Jinmao's top universities.

On the Chinese side, Professor Zhao, director of orthopedics department of Shuitanzi University, is the best in the Chinese orthopedic housekeeper library. He is good at spine surgery and has participated in and presided over many major rescue operations.

Second assistant, Professor Qingniaolin, doctoral supervisor of Qingniao Medical College. He has published many papers in the Lancet and natural journals, and is also a nominee for academicians in China.

Chief knife, Zhang Fan, President of Chasu People's Hospital. Learn from academician Lu! Chasu People's Hospital is one of the first three-level hospitals in China's border areas.

At present, the equipment is advanced and perfect, with top MRI and

The media can't let people quit, because the mouth guns not only invited professional newspapers, but also invited some online media. The leaders of the Ministry of Health thought about it and simply let them report.

Yang Ma's reporter is racking his brains to boast about the doctors in China, but the reputation of the main knife is too small. There is no way but to boast about the hospital!

Finally, the details of the event were reported on the major networks for the first time.

"I'll go. Where's tea?" The geography blind sister asked in confusion.

"Oh, tea, in the frontier, it is a sub-provincial unit in the frontier, located in China..." immediately a geographical emperor came out to introduce her to her sister.

Tea element, many people pay attention to the news.

This is the first time that the tea element outside the border pass mountain has been reported on major websites with science and technology.

Although Shao Hua has been worried recently, Zhang Fan is still very happy when he is on the news. Although Zhang Fan has only one sentence in the news, he is also very proud. He will call his aunt later and call his aunt later. Anyway, he is very happy in his heart.

At the tea vegetable hospital, Ouyang proudly looked at the news of jiuLang.com, "the official media is the official media. Look at the quality of others and their professional ethics. Do not highlight the individual, highlight the collective, this is the level! "

The director of the computer center almost stayed in Ouyang's office with the technician for this time. The technician heard that Ouyang said it was the official media and just wanted to open his mouth. The director of the computer center directly said, "Xiao Li, go to see the power supply and be sure to ensure the safe operation of the computer!"

Little technician, with his mouth curled, muttered in his heart, official media! Make sure a computer runs. My God, I don't know which signal center I'm in!

Inside the tea vegetable hospital, some people also watch the news. Although it is a 3G mobile phone, you can be a little patient and still have a look.

"Zhang Yuan is too powerful!" These are the little nurses in the operating room.

"Ah! It's unstoppable. " These are senior directors.

"There's nothing to be proud of!" This is LV Shuyan. It's too slow to brush the news on her mobile phone, which makes Dr. LV angry.

Qingniao, Lu Lao looks at the news on the computer and becomes more and more ashamed of Zhang Fan.

"Look, look, don't listen to me. It's on the news now. I don't even have anything to introduce. Ouch! Ouch! "

The old man didn't want to see it, but he couldn't let it go. Look, but there was an unknown fire in his heart.

Even so, someone kept calling in: "Lao Lu, even the big one is very fierce, but how can I look at it? Which young seems to be your closing disciple?"

I really don't know. My status is similar to that of old man Lu, so I called to inquire.

Old Lu couldn't explain. He taught an orthopedic expert by a foreigner!

There are also intentional.

"Old man Lu, why is your closed disciple an orthopedic doctor? You have gone to Lianda to attend any meetings. Don't you go and have a look?"

"Fuck you!"

Anyway, Lu always decided to teach Zhang Fan from the beginning when he was free.

In fact, most of the news focuses on orthopedic doctors, because ordinary people don't know much about the status of special orthopedic hospitals, just as Chinese people don't know shuitanzi very well.

"Darling, this time Mars hit the earth, and Zhao of shuitanzi also shot!"

This is an orthopedic doctor who has nothing to do with himself. It's very pertinent.

"I hope we don't fall too far behind!" This is a pessimistic orthopedic doctor, and it still accounts for the majority.

"Shuitanzi's Zhao doesn't take the lead. It's really not good. The green bird's Lin can also. Hey, Zhang Fan, a tea vegetable, is still young after all!"

There is an unruly rule in the medical circle. For example, a person is very famous.

When people in the industry chat with each other, they often don't name their names. It's like slang.

For example, "Lao Zhong recently changed one of the clinical breathing guidelines. It is said that Lao Hu is not happy."

People in the industry, especially physicians, know who they will discuss as soon as they hear it. Because they are the pinnacle of China, a surname is a person.

And laymen really don't understand.

Zhang Fan doesn't have such treatment yet!

In the spotlight, the operation began.

In the display screen, the operation to contact the main a seat has been removed. The old man probably doesn't know. Zhang Fan's operation has already been completed.

Now on the screen, Zhang Fan and zakstan start the operation at the same time.

Because the diseases are the same, the actions of the two operating rooms seem to be neat and uniform.

Zhang Fan and zakstan's actions are almost the same.

Cut the skin.

Lift the whole flap to expose the fascia. Just like breaking a grapefruit with your bare hands, when exposing the fascia, the fascia pulling silk was lifted out.

Because of the change of assistants, whether Zhang Fan or Jin Mao, the operation process is very fast.

Director Zhao of shuitanzi and director Lin of niaoshi are assistants. The biggest difference is that they have a deeper understanding of surgery.

It can more orderly reduce redundant actions and reduce the waiting time of the main knife.

If you use a tall word to summarize, it is that their surgical entropy is reduced.

The doctors in both operating rooms are quite powerful. There was almost no bleeding in the surgical field.

The movement is consistent, just like four masters playing mahjong.

The card cutting and the card playing seem to work independently, but they don't give people a messy feeling, just like a kind of practice for countless times.

Really, it has become an art to achieve this situation.

The main knife was cut with a steel knife, bleeding, and the blood hasn't come up yet. Yizhu has gently touched the bleeding point with the electric knife. The spark of the electric knife hasn't dissipated, and the suction device of Erzhu has sucked the smoke away.

That's it.

There was silence in the meeting hall!

Chapter 1053

x

In orthopedics and major surgeries, it looks like a strong man who looks very vulgar. Open his mouth and shut up. But he is rich. If he doesn't agree, he will bring a gold chain, and if he doesn't agree, he will dazzle the gold essence.

Although many doctors say that orthopedics is not up to standard, they are envious of the orthopedic doctors who are drunk every day.

In fact, the operation is not very difficult from the steel plate to the screw drilling.

However, once it involves the spine, it's difficult here. It's not that an orthopaedic expert can do the spine.

Many, many people have various discomfort after spinal surgery, from low back pain before operation to various complications after operation. The pain is simple for life.

For example, what is retrograde gold ejection? If this complication occurs, it can really make men cry with their eggs covered. There are also abnormal neurological damage, intestinal obstruction and confusion, too many.

Anyway, all kinds of symptoms, unexpected symptoms will appear.

Why are there so many complications?

Because the structure of the spine is too complex. Intuitively, when eating mutton, whether it's lamb leg or sheep in the water, as long as it's cooked, pick it up and chew it, and you can eat a mouthful of oil.

But sheep's brain and spine are not good. You should not only have skills, but also have tools, otherwise you can only suck dry bones and talk about your fingers.

It can also be seen from this point that it takes so much effort to cook and eat, let alone repair it. The spine is not only a bone that protects the spinal cord and blood vessels and nerves.

This thing is also responsible for running up and down and stabilizing the left and right. Generally speaking, it is actually a stack of chess that should swing back and forth.

And protect the fragile blood vessels and nerves in the column when swinging.

What's more, there are small joints between these chess and chess. For example, if you want to twist your ass forward and backward, you need to force your waist at this time.

For example, the small joint between the spine and the spine is damaged. Not only doctors will ignore it, but even patients themselves can't find it.

But over time, slowly, slowly, a person who was originally straight turned into a willow, and his waist would swing when there was no wind.

In fact, there is a problem with the small joints, and the spine begins to twist for a long time.

It can be said that the spine is the place where orthopedics is accomplished. Under normal circumstances, spinal surgery can not be done without doing it. Do not listen to how powerful the doctors in a hospital in a certain area are.

If surgery is necessary, it is best to find the most powerful doctor in the spine. This is not an exaggeration. This operation is not breast enlargement!

When many genetic scientists question whether humans evolved or not, the human spine is one of their evidence. Even if a person does not bear weight, degenerative lesions of the spine will occur under gravity.

There is an old Chinese saying that an old leg grows old first, but it is not particularly accurate. It should be added that a man's waist grows sour first.

The tissue and joints of the legs can be replaced now, but so far, there are too few substitutes for the waist. Therefore, take care of your waist on weekdays, so that when you get old, you can dance with whose wife you want to hug in the small square.

What do you think? It's all arrogant!

Otherwise, you can only sit in a wheelchair and watch others dance around your wife. How do you look? How do you look green.

The actions of the doctors in the two operating rooms are strangely consistent, as if they were playing a video again. There is little difference, although it doesn't seem to be very fast.

However, in the operation steps, there are almost no redundant actions, which is like walking on the main road, but the victory lies in stability, there is no road robbery, and there are no wild flowers to pick, step by step.

The operating room is a team work. One God with three pits, or three gods with one pit is not the right way. Serious, it must be that the level of doctors on the operating table is similar.

Only in this way can the operation be particularly smooth and stable.

When you lift the muscles, lift the muscles of the back and enter the sphere of influence of the spine.

At this time, Zhang Fan's actions are more light.

It seems that there are no big blood vessels here, that is, a little bone and muscle. In fact, this place is the place where there are hidden killers. Often many doctors have problems and will not be in the spine, because in the spine, doctors are highly concentrated.

In the spine, a little carelessness can highlight the problem on the spot. But even if something goes wrong in this place, I can't find it for a while and a half.

When they found it, the patients used nets to find doctors desperately.

Cut, the cutting here is quite exquisite. There are countless nerves like meat tapeworm hidden in the tenderloin. If you are a little careless, don't say you cut it with a knife. Even if the muscle is slightly involved, the nerve will automatically break in two unknowingly.

Wait for the doctor to cut the muscle: "Yo Yo, this nerve is broken ~!"

Whose is this?

Only the patient's!

Maybe some people think the doctor is too crazy. In fact, all walks of life are similar. Those in the industry fool those outside the industry, and the veteran fool the novice.

Therefore, there is a saying that it is not easy to meet a good doctor.

When Zhang Fan entered the tenderloin, the meeting hall, especially some doctors who had known each other on the spine, opened their eyes.

Separation, gentle, blunt separation, this is too difficult to describe. A piece of meat, the doctor must take out a gentle action to separate it than a lover. The doctor gently the external mold outside the muscle, not to mention the use of instruments. His fingers dare not use more. He is deeply afraid that the muscle will pick up and hit people.

Three fingers, slowly, open the small hole with the middle finger of the thumb, then insert the index finger into the mucosa, and slowly peel off from near and far.

The viewer is anxious, just like a piece of plastic pasted on a person's face. The pasted person is almost suffocating. The person taking the plastic puts a finger between his face and the plastic and props it up little by little.

It's really worrying.

But it must not be fast here.

Just like falling in love, from holding hands to hugging, from hugging to kissing, from kissing to stuffing clothes to solve people's small clothes with complex structure, we must not try to be fast and omit steps.

Anxious in exchange for either a slap in the face or a kick in the crotch.

Lao Gao's live commentary was also stopped by the doctors in the venue. The explanation here must affect the thinking and perception of professional doctors.

Lao Gao's explanation is the same as that of adults feeding children in the past. Chew it again and then feed the children. Don't say whether it tastes good or not. First of all, this can't make these experienced people unhappy.

The leader had no choice but to sit in the meeting and stare at a piece of red meat and a piece of white bone on the display screen. Can't sleep, can't look left and right, really, this concentration, this composure is not what ordinary people can have.

Moreover, with the gentle exclamation of the doctors in the venue, they also nodded to show that although they are not doctors, they are also knowledgeable.

The mouth guns are stupid, because what Zhang Fan and zakstan do is equal. Even now the operation is over, they will not be able to stand down.

Many people don't understand what the mouth gun is for.

It's a long story to say that children have no mother.

In the early years, because of people's innocence, all kinds of industries had to be divided into left and right.

For example, if there is no left or right on the main road, there will be an accident.

But some industries can't be divided, such as medical treatment. The simplest thing is that in the early years, China's attitude towards Chinese medicine almost abolished this Kung Fu.

But the leaders don't understand. Is this thing useless or not? Then find some so-called scholar leaders in the medical industry and let them preside over the work. Slowly, slowly, with the development of society and science and technology.

These scholars have led several generations to reproduce. They have long separated from the status of scholars and become standard leaders.

But the medical industry is a technical unit. Therefore, as long as these leaders mix in this industry, they

must have a coat, the coat of scholars. Without this coat, they can't stand.

For example, the state allocated 10 yuan to the medical industry this year.

Has the final say has the final say? It is not the doctor's final say, nor is the hospital's final say, nor is the Ministry of health has the final say. Ten. The money is planned by experts and leaders, and then let the following doctors and hospitals spend money.

The power here is not ordinary. In the early years, there was a joke that several old academicians surrounded a section chief who lent money. It sounds very funny, but when you think about it, it doesn't seem so funny!

What does the Ministry of health do? The Ministry of health is monitoring.

Monitor whether the hospital and doctors spent the money according to the plan, whether they went to get the wallet, junior, or take the money to build a luxury bath center.

But since 2008, many things have changed in China.

All walks of life began to revolt. Is to be independent, do not want these leaders to manage. That's great.

The superior leaders are still hesitating, and these expert leaders have begun to worry. If the hospital and doctors are really independent, why are they going?

Can they go back to the hospital?

impossible.

So in 10 years, this matter was the most serious. The expert leaders took the doctor's title as their handle. If you don't obey me, I won't give you a title.

Doctors and hospitals rely on technology. Anyway, it's fun. Finally, the brains of the dogs hit by both sides came out, and the superior couldn't see it anymore.

In the next article, foreign capital can enter the medical market with limited.

This is like Zhang San and Li Si quarreling. The teacher couldn't see it anymore. He called Wang Wu to his side and gave him a sugar. He said you were obedient!

Separated from the muscles, the human body is like a child playing with a bad remote control robot. If the line is exposed, there is almost a spark. If there is a spark, it is really like a broken transformer.

At this time, Zhang Fan and zakstan's actions began to be different.

Chapter 1054

There are some traditional habits in the medical treatment of various countries. Of course, these traditions are some countries with historical traditions, such as Li Jiapo.

Their cultural foundation is Chinese, but their growing trunk is European and American, which is a bit of a combination of Chinese and western, but the integration is strange. I don't know why.

MARUKI is the better place for serious integration.

Jinmao, although the founding of the people's Republic of China has a short history, many people's habits come from the three islands. For example, anorectal surgery, in China, patients often face up to the sky, and the anorectum is like a gun barrel facing the doctor.

Jinmao and Sandao think it's not good. It seems that it's said to be a god similar to them. It seems that this posture is. Therefore, golden haired anorectal patients are often prone with their hips up.

When entering the spine, golden haired zakstein did not use the conventional operation, that is, he did not use the operation published in the orthopaedic Yearbook.

Internal medicine Yearbook, surgical Yearbook, and then there are small yearbooks of many disciplines under these yearbooks.

For example, the Yearbook of internal medicine is actually an academic report formed by collecting the most powerful papers in some papers and journals in the world that year.

To put it simply, although the name of the English medical journal, the boss of clinical medical journals, is Sandao, in fact, people are serious in Jinmao country. It can also be seen from this point that Jinmao's medical treatment was born in Sandao.

Most of the papers and journals included in this yearbook are from the English journal of medicine. As for internal medicine in China, how many can go to the internal medicine yearbook?

According to last year's proportion, Chinese papers accounted for 0.02, which can be said to be almost negligible. China's basic medical care has caught up with that of developed countries.

But there is still a certain distance at the tip.

What the hell can this yearbook do. In fact, it is to guide the development direction of medicine.

The most terrible thing is that many top-level medical methods, whether they are Sandao or Jinmao, will also hide. Even if you publish a paper, it is also published in the form of data, which will not let you see the specific way of others.

For example, the spine surgery, which zuckerstein used, is not in the Yearbook. How can people get rich by this way be put in the yearbook.

So, when zuckerstein operated in a way that we had never seen before, many people who had made achievements in the spine began to think.

"How can the president of the special joint hospital use this way? Doesn't it say that the operation method in the Yearbook is the most reliable? "

A spine doctor asked his mentor quietly.

"Hey, the most reliable may not be the best. People like them are medical geniuses. They must have their own suitable way."

"Why didn't he publish it and try to win a Nobel Prize?"

"Ha ha!" The tutor turned his head and looked at his students. He gave a sneer. Although he didn't say anything, he was more clear than he said.

While everyone was talking.

On the other side of the display screen, Zhang Fan also used an unconventional surgical method.

This is the fryer.

It's like being in the Jianghu. Everyone knows one move and two moves, and the moves are more conventional. For example, the size of Hongquan is different, but the foundation and root are from the medical Yearbook.

That is, who plays more skillfully, who has higher talent and whose platform is more powerful. That is,

the comparison is actually in a defined direction.

Just like the boxing ring, you can't use your feet or teeth!

But today, suddenly, we found a bad thing.

Other experts have their own Kung Fu to press the bottom of the box. They don't find it out by themselves from the Yearbook, but find another way, develop it by themselves or pass it down from their own school.

That's great.

While everyone was talking.

Zhang Fan spoke in the operating room.

"Director Zhao and director Lin, the other is from a special orthopedic hospital, so we can't use the conventional operation today. I have groped for it myself. You will listen to me later! "

Zhang Fan raised his head and said to shuitanzi Lao Zhao and Qingniao's Lin Cong.

"OK!" They nodded solemnly. We all know that Zhang Fan is not an unreliable person, and this is not a routine operation. At a young age, this is an operation for Zhang Fan to determine the status of orthopedics in the Jianghu.

Generally speaking, this is an operation on the face of Chinese orthopedic doctors.

"OK, thank you!" Zhang Fan nodded.

Shuitanzi's Lao Zhao skimmed his lips. He thought Zhang Fan was cheap and good“ This bastard will fool people. He said he was studying general foreign, but now he turns to orthopedics, and he has made a name for himself. It's so annoying! "

If Zhang Fan continued to engage in orthopedics, and did it in general, Lao Zhao wouldn't be so angry, but I didn't expect him to do so badly now. Isn't Lao Zhao enough?

In orthopedic surgery, especially spinal surgery, doctors usually ask themselves three questions when performing surgery: "first, the patient takes a nerve and is damaged. 2、 Where is the prominent relative intervertebral space, spinal canal and nerve root. 3、 Which approach can provide the best surgical vision and operation, and the damage to the surrounding tissue is the least. "

No matter how the surgery changes and how serious the injury is, these three problems are just like the program of surgery.

In fact, the root of these three problems is still in anatomy.

Zakstan has the human anatomy map obtained in World War II, while Zhang Fan has the system.

Zakstan is in his forties and almost in his fifties. The number of operations in the special orthopedic hospital is definitely in the forefront.

Zhang Fan is even more terrible. In the system, he has boiled countless orthopedic operations regardless of field and time.

In terms of experience, it's hard to say who is powerful.

On the surface, Zuckerstein seems to have many times more operations than Zhang Fan. It can be imagined how much this amount is after 20 years of one operation a day.

Therefore, when Zukstan came up with a new surgical method, everyone was surprised, sighed and tried to learn.

When Zhang Fan came up with a new surgical method, the crowd immediately divided into three categories.

Supporting Zhang Fan, especially some young doctors, turned themselves into Zhang Fan. After 30 years in Hexi, they have finally arrived in Hedong.

A group of young people, excited and inspired! They even fantasized about what they would do if they were Zhang Fan.

This is also a very bad phenomenon in the medical circle. When I was young, I worked hard in this circle. I didn't have much money or many names, so I expected my superiors to share a little.

It would be much better if I met a generous superior. If you meet a strict supervisor, to tell you the truth, it's too difficult to do this business.

The simplest thing is that a doctor is almost at the top in other industries. Although he is not at the top, he has reached the top in general.

Medical treatment is different. Only after graduating from a doctor can you be qualified to work in a big city. If you don't have a doctorate, let alone work hard, you don't even have qualifications.

Therefore, if we want to do a good job in medical treatment, we must endure hunger and have a late childbearing.

Therefore, when a young doctor suddenly stood in the top ranks, everyone seemed to see the mist, saw the hope and the goal of struggle.

It's like he can. He's so young and powerful. Why can't I? I have to work hard!

A little older looked at Zhang Fan's new operation with a skeptical or distrustful attitude.

As for some people who have mastered the right to speak, some experts who have degenerated shake their heads.

"People have a world-class platform. The special orthopedic hospital is almost the same as the God of sports orthopedic medicine. The president of people dares to come up with a new operation method, which is refined by how many operations.

If you are the president or the executive president of a small third-class hospital in SHANGUAN overseas, you should also come up with a new surgical method, still in the field of spine.

Do you think you can do it yourself, or do you think we can't do it in other large third-class hospitals? "

Many people think so.

Your good surgery is your talent and your right to do enough surgery.

A person who does large-scale surgery will do three in a day. You have good physical strength and energy.

At this level, the size of the platform doesn't matter. No matter how big the platform is, you can't do more surgery.

Therefore, when Zhang Fan's routine operation performance is amazing, many people who master resources are not surprised.

But when Zhang Fan, like zakstan, has his own spinal surgery. People don't calm down.

New surgery, this thing is not eating dumplings, you can cook it in an iron pot.

This requires a large platform. After many years of running in and refining, and there are many talented people in many industries in this platform, they dare to try innovation.

The strength of China now lies in training ordinary experts.

There is no rival in this way of training in the world. For example, we need doctors who can perform spinal surgery. With a hula, China can call on many doctors.

But once you need a doctor with a pointed spine, it's difficult.

Therefore, many elderly doctors with some resources began to send a message to the driver leaders of the Ministry of health: all right, it's time to have a rest! Don't wait here.

The head of the driver of the Ministry of health was waxed. He really hesitated whether to go or not.

Let's go. At that time, Zhang Fan will really win. It's estimated that his purpose will not be achieved. Maybe you'll be criticized when you go back.

No, if Zhang Fan loses, he will be responsible.

He really hesitated. Looking at Zhang Fan's level, he seemed to be very good. Cutting meat and bones was very sharp!

He thought about it and finally got up and went out.

"Hehe, look, the leaders can't help leaving. I don't know the height of heaven and earth. I want to see how you step down." The guns are happy.

In the meeting hall, the most nervous person was not others, but the regional manager of Chen Sheng and Johnson & Johnson.

The two men looked at each other and saw panic in each other's eyes.

"Oh, Mr. Wu, I'm Li Qiang from the Ministry of health. Ask me something, Zhang Fan... "

The leader of the Ministry of health thought twice and thought it inappropriate to listen to these orthopedic doctors in the field, because his peers are enemies.

It's even more unreliable to rely on one's own feeling. One's own level is to see the meat cutting level of selling meat in the vegetable market.

Therefore, people directly called to ask Uncle Zhang Fan.

Just when the mouth guns began to atmosphere each other and prepare to hook up with each other, waiting for Zhang Fan's operation to embarrass Zhang Fan.

The driver leader of the Ministry of health came in again!

"Well, why is he here again!"

Chapter 1055

With the development of the times, the level of leadership is getting higher and higher. In the early years, to tell the truth, when the superior sent personnel to the unit or subordinate department, the

leader sent by the superior would be a fool if he was not an expert.

There is a joke in the medical circle that a hospital bought some equipment and spent less money than others. The hospital suddenly changed from the state of a crane tail in an area to a local benchmark.

The leaders were happy. They spent a lot less money than other regions to build benchmarks, and then sent people down. The leaders of the hospital are delicious and serve the people sent by their superiors.

As soon as I asked, I began to report data. What is iss900 and what is the international standard? Anyway, the paper data is quite good. The people sent down ate well and drank well. They took the hospital to mix up his materials and went back to celebrate.

As a result, the device manufacturer was arrested in other areas, and then implicated the hospital leaders here. When asked, I knew that the data can be pieced together.

People buy stick things, and the data are even much better than those in Germany and marubenia, but this thing is used in two ways.

This is to eat unprofessional losses, and you can't help others. Therefore, many leaders later assigned the position of authoritative consultant. Moreover, in the subsequent procurement, we should not only clarify the model and data of machinery and equipment, but also determine the trademark, for fear that the following people will fool the leaders.

The leaders in the meeting hall were really at sixes and sevens when they were fooled by a bunch of guns. They finally climbed to this position. To tell the truth, it's not too cautious.

Therefore, he doesn't want to be around the mouth gun that starts from time to time, nor does he believe in the technology he sees with his eyes. He went to ask Uncle Zhang Fan.

He knew that the mouth guns might deceive him, and his eyes might deceive his brain. But Mr. Wu can't, and Zhang Fan is still Mr. Wu's nephew. If something really happens, Mr. Wu is also a shield, no!

Is this technology difficult? Difficult, really difficult, but mixed within the system, even more difficult. The driver leader of the Ministry of health immediately found a way to advance and retreat in a few minutes, which is beyond the imagination of ordinary people.

A scholar in Jinmao once joked about the differences between China and Jinmao, saying that all the top talents in Jinmao are on Wall Street and all the top talents in China are taking the public examination.

After getting the affirmation of Mr. Lu, the leader returned to the meeting. A few seconds before sitting down, he stood in front of the position, turned his head with a contemptuous look, and fired a group of mouth guns, as if he had learned about medicine and would never be fooled again!

King's contempt?

On the display screen in the venue, Zhang Fan and zakstan have entered the critical moment of surgery. Binding a rabbit also uses tiger power, not to mention that neither of them treats the other as a rabbit.

Vaguely, Zhang Fan's treatment of zakstan is like that of China's treatment of golden hair. The more he looks at it, the more he looks at it.

Zakstan, who is golden, pays more attention to the recovery of spinal nerves. In fact, relying on the detailed anatomical map that others do not have, we try to repair the nerve and spinal cord to the original state of the patient after the injury.

Most treatments are. In orthopedics, there are two terms, physiological anatomy and functional anatomy.

The physiological anatomy position means that this thing of others was originally here. Like many children's little JJ, it is crooked. This is the physiological anatomy position.

The functional anatomical position is, for example, when a bone is broken, the doctor directly comes to a manual reduction. Although the healed bone looks a little crooked, at this time, it does not affect the function of the patient's bone at all. This is the functional anatomical position.

Is physiological anatomy better or functional anatomy better? This requires specific analysis of specific situations.

If open reduction, physiological and anatomical reduction is needed as much as possible, but the damage is quite huge.

Many people know that a broken bone needs a steel plate. But few people know how the steel plate is put on, and the doctor won't explain it in detail.

First of all, when the bone is broken and cut, first explore whether the surrounding blood vessels and nerves are good, damaged and can be repaired. If they cannot be repaired, they will be ligated at the first time and damaged. Once the nerve is not completely damaged, it will always be like residual neuralgia hit by electric current. If this symptom is on the body surface, A second operation is required.

If it is deep in the body or in important organs, it is a disease that can never be cured. Patients need to take painkillers all year round.

When the rotten meat, blood vessels and nerves around the broken end of the fracture are cleaned, the bone should be treated.

First of all, bones have no blood vessels and nerves. Don't look at this thing. It's a stick based on calcium carbonate. In fact, this thing also needs to eat and drink.

It eats and drinks against a layer of periosteum on the surface of the bone. Large blood vessels are hidden in various gullies of bones. In order for bones to better protect them, they need to pay protection fees.

The protection fee is that a lot of small capillaries like spider webs are separated from the large blood vessels and crawl in the periosteum. Then they nourish the bones against these small capillaries.

After a fracture, a steel plate is needed. The steel plate needs to be tightly attached to the bone, otherwise the patient will break it with a little force.

Therefore, in order to make the steel plate stick to the bone, the orthopedic doctor needs to take the bone chisel, yes, the chisel for chiseling stone, and then start to remove the periosteum on the side where the steel plate needs to be placed.

Hiss! Hiss! Hiss! The white periosteum like wax is scraped clean.

This periosteum is actually like the bark of a tree. Once you scrape too much, even with the steel plate, there will be bone nonunion and bone atrophy, because there is no cook!

Quite cruel. This is the price of reaching the physiological anatomy position!

Some doctors do surgery, see X-ray beautiful people look happy, the steel plate is like originally grown on the bone, while some doctors do surgery, the steel plate is like barely hanging on the bone.

At this time, the beautiful may not be better than the ugly effect. Maybe the ugly doctor has better efforts.

But now, many doctors scrape the periosteum especially clean for their reputation and to satisfy the half understood patients, and then the X-ray looks particularly beautiful.

This is the typical treatment of film, not people!

Zakstan, the way to go now is to reduce the injury, and then let the injured nerve and spine reach the original anatomical position. This is very difficult.

Just like an old Chinese saying, it's very difficult to be a thief because you want to get something for nothing and don't want to be beaten.

Looking at zakstan's subtle techniques, we really saw the gap in our hearts. Apart from others, a vascular repair made many people who are known as experts ashamed.

"Hey, there's still a gap! It seems that I have to go to the special orthopedic hospital for further study! " Looking at zakstan's technique in the display screen, the directors of many large class III hospitals quietly planned.

This kind of thing must not be said, even if it is obvious, it can not be said. Then, China has formed an irregular rule. If a doctor wants to compete for department directors, graduate from a doctor, and have excellent surgery, these are the basic rules that everyone puts on the surface.

There is also a dark rule that we never say, that is, we must have the experience of studying in Jinmao country! Therefore, many doctors in big cities have really made all kinds of strange tricks to get a place to study in the golden Mao country.

This study in China needs to give people money!

When everyone looked at zakstan, Zhang Fan slowly let some people with higher technical level find his difference.

"Hey? Doctor Zhang seems to change the shape of the nerve again! "

When the surgery came to the fork, Zhang Fan and zakstan took a different path.

Zach repaired it for repair.

Zhang Fan has found many different surgical methods because of a large number of experimental operations in the system, and there are many surgical methods that have more advantages than the original operation.

This time, he showed one of them, diversion!

Repairing the original nerve needs to destroy a large number of surrounding tissues. Zhang Fan directly used the new operation he found in the system to directly let the nerve keep its original function and took other ways.

Whose operation is more difficult? It's really hard to say who's more difficult. It's not easy to rebuild or repair.

But if anyone's operation method has less damage, of course, Zhang Fan's operation is the first.

However, Zhang Fan's operation also has disadvantages, that is, it requires a large number of surgical tests. To be honest, if it was simple, why couldn't so many orthopedic doctors around the world think of it?

Some people may think, but the idea is to achieve perfection. It's not just a matter of time. All kinds of relevant laboratories and experimental products are all money!

So, at the beginning, everyone was amazed at zakstan's operation, "Wow, it's so exquisite."

"Cow! What a cow! "

"Hey, after all, it's a top orthopedic expert. It's great!"

When we haven't finished feeling from zuckerstein's technique, the higher level doctors in the meeting stopped talking and didn't see zuckerstein's operation.

These people all concentrated on looking at Zhang Fan. Don't talk. They didn't even blink. They stared so carefully. They were afraid to reveal a little bit of Zhang Fan's details.

Then, others slowly found that the experts were watching Zhang Fan's operation!

"I'll go. What's this for? How did Dr. Zhang pull out people's nerves. God, Doctor Zhang, don't make trouble. This thing is not used to roll! "

Young doctors don't understand!

But this also can't stop some young people who take Zhang Fan as an example, "shit, Zhang Yuan's cow forced them to pull out their nerves intact. This is to check?"

When the chief surgeons in the two operating rooms walked in different directions, the venue was lively.

Some support zakstan.

Some support Zhang Fan.

However, we all understand at this time that no matter who wins or loses, they are the objects we look up to!

Chapter 1056

When materials and technology reach the bottleneck, what they spell is actually the doctor's ideas and technology.

Just like Zhang Fan, their general surgery department, secretly performed foreskin surgery on children. This kind of thing is also turned a blind eye in the hospital.

A foreskin operation, in a certain field hospital, from entering the hospital, they have to think about how to spend your money, what vascular repair and what function improvement. Anyway, it is a foreskin operation.

It can be said that he will spend as much money as you have in your card. It's no exaggeration to give you one set after another.

In hospitals, such as county-level hospitals, there are only a few hundred dollars.

It's a little more expensive when you get to the third class hospital.

Many people, who don't want to spend more money and don't want to go to county-level hospitals, go to a familiar doctor. In the past, any general practitioner took the knife and did it.

Later, the Department of general surgery purchased an electric knife by itself, which was bought with the money of its own department, and then handed it to the head nurse. This is to avoid doctors doing private work.

Of course, otherwise the doctor can do private work, and the Department can do private work.

For example, a foreskin is made in the Department of the third class a hospital. It is the kind that does not register and directly gives the head nurse 500 yuan, and then the head nurse arranges the doctor to do it for you.

The money went into the small treasury of the Department. In particular, when a student is on holiday and a retired soldier returns to the city, five hundred and one, five hundred and one, watching the little doll holding a disposable paper cup and walking with his legs tilted like a crab, the head nurse smiles and doesn't know his last name.

There is no harm without comparison. With the same equipment and the same dressing room, some doctors make a foreskin, infect one foreskin and infect one.

And some doctors, almost no infection.

Over time, this is what makes doctors rank.

This is the importance of technology.

This is the compactness of technology.

Once the technology of doctors in the Department obviously lags behind other doctors, the next thing is marginalization. If you can't be a man again, you will not only be despised by other doctors, but also by nurses. Life is really like suffering.

When Zhang Fan started the construction, and then slowly, we found that Zhang Fan's technique is really good, but the difficulty is also really good!

Zakstan's operation is not simple, but also requires detailed and detailed anatomical drawings. It can be said that if you want to really study, let alone see an on-site operation, even if you see it every day, without the explanation of the chief surgeon or the explanation of the chief surgeon, you will see flowers in the fog. When you do it yourself, it looks like God.

In the operating room, zakstan's team.

"Hehe, the operation is almost over. We'll go out later. It's estimated that the Chinese boy is still decomposing the muscles next to the spine. When his operation is over, we'll all be in New York."

A young doctor who was qualified for surgical disinfection and leg lifting was not qualified for surgery. Seeing that the operation was almost over, he looked at zukstan and said jokes.

The other doctors laughed and didn't know where to laugh.

But instead of smiling, zakstan stared at the steel plate in his hands and said slightly, "don't underestimate the genius of any country!"

"Oh, well, Zach, you're too cautious!" As a assistant professor, he said reluctantly that in his eyes, zuckerstein is good at everything.

Professional and dedicated. It's just too cautious. It's always like a missionary in Judaism. It's not funny at all.

The main a seat of the contact meeting finally finished the operation and walked out of the operating

room with a smile.

In the corridor of the operating room, he imagined that once he appeared in the meeting, he would definitely surprise everyone, "Wow! The operation is done fast and well. It's too powerful! "

Then he proudly waved his hand to show that it was nothing, and then told Zach that he was not old and could eat half a pig for a meal!

Then Zach happily welcomed him back to the team, returned to the special orthopedic hospital, and raised his salary.

The more the old man wanted to be beautiful, the more he thought that he could go to the naked party on the beach again in a while! The more you want to walk under your feet, the lighter you walk. It's a little like a waltz.

When the old man opened the door, he looked at the meeting with a slightly restrained but obviously trying to surprise everyone.

The display screen is next to the operation channel. The old man hasn't seen the display screen yet.

Indeed, the old man opened the door with too much strength. Everyone was really attracted by the old man.

When he saw everyone's eyes coming together, the old man raised his hand, just like the golden soldiers who landed in the European world, just about to speak, just about to say his feelings.

He found something wrong, because everyone's eyes didn't stop on him, just like looking at a stranger, looked at it, and then floated to the distance.

The old man's neck was red with anger, like an angry Turkey. With a thick red neck, the old man shouted in his heart, "is that how you meet your hero!"

Just when the old man was furious, he found the display screen in the corner of his eye!

In the display screen, Zhang Fan's operating room has changed from No. 1 to No. 4. And not only the assistant changed, but also the types of diseases changed.

The old man was poured with ice water on a hot day, or when he was excited to the extreme and looked forward to the extreme, he found that the result of the other party was thicker than himself!

The old man is going to cry. No matter how stupid he is, he knows that when one operation is finished, the second operation will soon be over“ What a bully! It's so annoying to bully an old man like me. You're out of step with zactan. As a result, you came to bully me! "

There were tears of grievance in the old man's eyes.

It seems that China will not make money in the future!

The mouth guns are quiet at this time. They are more powerful than people. If they jump again, they will really be slapped.

The atmosphere in the meeting room was getting better and better.

The young doctor who can't understand the operation, although he can't understand the subtlety of Zhang Fan's operation, he always knows that Zhang Fan is better than zakstan. Even if he can't surpass zakstan, he doesn't lag behind.

On the Internet, renren.com and tianya.com, at this time, he was like a leader, chasing and beating shepherds with a group of people.

"Facts speak louder than words. Doctors in China have caught up with doctors in the golden Mao country, and they are still the top doctors in the golden Mao country."

.....

At this time, the medical department was like a hotline. One phone rang after another. Just after receiving a phone call, the phone had not been put down, and another phone called in.

Chapter 1057

In this world, there are too many smart people. Those who are more intelligent than a hundred people are called outstanding, those who are more intelligent than a thousand people are called handsome, and those who are more intelligent than ten thousand people are called English. This is also why many people feel that they are treasures in school in junior high school. The teacher likes it and the students get close. In high school, I seem to be an ordinary person, and I'm still a little lost.

As a result, when I relaxed a little in college, I couldn't even catch up with my girlfriend. I thought it was very sad. As a result, I found that people who are smarter than myself have a layer in the world.

In the meeting hall, none of these people who can make achievements in their own hospital and walk ahead of others is a fool. When Zhang Fan's operation was just advanced,

Many doctors who are the backbone in the hospital have started when others are still lamenting the operation level of Zhang Fan and zakstan.

Although we all agree that we can only promote the director and compete for the director of the Department after going to Jinmao country for further study, but now Zhang Fan's surgical level is not bad.

Although it sounds a little low to study tea vegetarians, technology is really something, so it's better to have a bird in hand. Although Zhang Fan is not famous, he doesn't even have a paper in orthopedics, but neither does zakstan.

Of course, their platforms are different.

But it doesn't matter to the intermediate doctors in these hospitals.

After checking tea vegetarians and learning technology, Xiao Chen stole out with a smile.

Ouyang sat in the boss's chair and touched the phone for a long time. Finally, he bit his teeth and didn't call out. "Young people still have to experience. It's rough. If you inform me earlier, I should at least let the leaders of the government come over. Why should I have a friendship meeting.

Hey, why didn't I have so many resources when I was young? Why didn't I let him try too? He was so poor that he had to suck the oil flowers on his fingers! "

While nagging, I read the documents. I don't know whether it's annoying or happy. Anyway, the old lady doesn't want to work. She picked up the kettle and began to play with the cactus on the windowsill.

"Why not blossom? Lao Chen said he was going to blossom a few days ago. Why can't he hurry these days? Less fat? Less water? "

The old lady who hasn't worked with flowers and plants in her life began to fertilize and water.

While the old lady was nagging, Zhang Fan finished their operation.

Almost in no order, the surgery of Zhang Fan and zakstan was completed. The originally noisy venue was quiet at this time.

As the patient was slowly awakened by the anesthesiologist and pushed into the ICU, Zhang Fan and zakstan also came out of the operating room.

In zakstan's team, except zakstan, other people's faces have a winning expression, and zakstan is lack of calculation in his heart.

When the electric door of the operating room opened automatically, Zhang Fan's electric door also opened automatically.

The surgeons of both sides met face to face in the aisle!

Several of zakstan's assistants looked at Zhang Fan and them with incredible expressions.

What cheating, what failure, they have not thought about, this level of surgery, simply can not find someone to replace, also can not talk about failure.

There is only one possibility. The other party is so strong that he can't crush or win!

"Are you interested in watching the operation playback and making a comparison?" Zuckerstein said it quite easily, and his expression was also very friendly.

There is absolutely no domineering or childless performance at the beginning. Now zakstan looks at Zhang Fan like a friend for many years, with eyes that are not lovers but very similar to those of lovers. Look, look, just look away from the corners of his mouth.

In fact, zukstan's heart is like glass falling on the ground. His heart is broken to the ground.

Compared with this young man, don't say that he and he had a draw. Even if he surpassed each other slightly, he would be regarded as losing.

Now he can't guarantee that his playback can be better than the other party, but he doesn't have a good word to say. Don't you know each other?

"Oh, yes, please!" Zhang Fan thinks the other party is very elegant.

Zhang Fan is ready to fight. Unexpectedly, when the door opened, people were not only polite, but also quite polite!

Zhang Fan didn't rush out first. There's no need. People are comity. Let's be modest! So Zhang Fan let zakstan and them go first.

Although zakstan and his team walked ahead, when they passed Zhang Fan, zakstan's team, including Zak, all looked dead!

It's like being forced to open chrysanthemums.

.....

When Zax and they passed.

Lao Zhao smiled and said nothing. It is the duty of the Chinese people to help with the operation, and it is also the time for Chinese doctors to share a common hatred.

But now that the operation is over, I don't think much about instructing you in the medical circle. I'm not your master!

Lao Zhao looked at Zhang Fan. During the operation, the old man was still serious. Methodical. After the operation, turn around and look at Zhang Fan. The nose is not the nose and the eyes are not the eyes.

"Are you qualified as a mentor? Has the state education commission given you the qualification of tutor? You have a brain of paste yourself, and you have to teach others? "

Zhang Fan was dumbfounded. The old man turned his face faster than the dog. When he was in the operation room, he was all right, with words and phrases, and the operating table was like a person who would bite.

"Well!"

"The operation is good, but he is also an surgeon. Do you have any papers? Don't mistake people's children, Wang Yanan. I think he's quite angry with me! "

"Hi!" Zhang Fan smiled bitterly.

It's to dig people!

Chapter 1058

When zakstan came to the meeting after leaving the operating room, the first thing he saw was the tearful co chair a. the old man would feel much better.

People are like this. When they are beaten, their legs and stomachs are cramping. But when they turn around, people who are stronger than themselves are beaten again. In an instant, the pain is much less, and they seem to be able to stand it.

After taking a look at the co chair a, zakstan saw such a heavy feeling in the old man's eyes. This time, zukstan felt bad.

He doesn't care whether his former employees are gloating or whether the old man is full of sympathy. What's hard for him is that he really didn't win.

Although he was quite frustrated, he couldn't see it on his face. He couldn't let his ideas show. This is probably one of the abilities of others to lead a group of top experts.

Many people do have the ability. When something happens, they think of all kinds of ways and ways. There are many such people in the hospital, and Zhang Fan has seen and dealt with many.

For example, when the two children fight, there is nothing wrong, but the parents have to go to the hospital. At this time, either the parents have the ability, or the parents know the capable people.

At this time, it is the performance of such capable people. You know Jianghu Xiake, and I know the police. You know the police, I know the leader.

Anyway, if both sides are hard stubble, it depends on who knows the dean in the end.

There is another kind of people, although they don't have much ability, they can deal with what happened in advance and calm down in the bud.

Zakstan is such a person. He had planned to take the lead at the beginning, let the chairman a of the joint meeting shine, and then deceive Zhang Fan into taking back the anatomical map in his hand.

Unexpectedly, CO chair a didn't play, and he began to solicit again. And heavy bets.

The first two moves, which ordinary people can take, are quite rigorous and gracious, which brought the annual meeting to the academic level.

After all, most of the people in the meeting hall are engaged in technology and academia. After listening to what zukstein said, everyone began to wait quietly.

The video starts playing back.

As like as two peas, Zhang Fan and CHAC were almost exactly the same.

Just as the video was replayed to the spine, zuckerstein paused the video.

"Colleagues. This is the most standard approach for spinal surgery. I don't need to say more. Now please see what is the difference between Dr. Zhang and me after entering the spine. "

With that, the video continues.

In fact, zuckerstein was already feeling " This guy is great! If you give him a few more years, he will definitely not be his opponent. "

After entering the spine, Zhang Fan and zukstan's operation is like a big tree with two branches.

Zakstan's branch is the original branch of a big tree. It seems to have reached the point of lush branches and leaves.

Zhang Fan's branch is just like the one grafted. Although it has not been completed yet, the fruit of his branch now looks more attractive than zakstan's.

But now it's really hard to tell who has a powerful branch.

When the video was finished, zakstan tried to adjust his state of mind. He understood that Zhang Fan was still too young. In a few years, he would have nothing to do with what special orthopedics and what monopolized the market.

Because this Zhang Fan has risen slowly.

What should I do?

That is, he has no army. Otherwise, he really wants to destroy Zhang Fan.

As long as the academic environment of Jinmao country is good, as long as they are comfortable with research, they don't have to consider other things. All Jinmao scholars are obsessed with research.

In fact, it's nothing to talk about. The golden Mao country does have its advantages. People can lead other countries, and there is indeed something to be praised. However, if the golden Mao country is described as a paradise free from worldly strife, it's either a time of evil intentions or a genius to the point where others need your leadership.

No way, the golden zukstan knows that now he really has no way to Zhang Fan.

However, I know that now I am the peak of the golden period of surgery. But the other party may still be halfway up the mountain. He beat everyone else halfway up the mountain

So, zuckerstein tried to adjust his state of mind. When his tooth was broken, he had to swallow it in his

stomach.

"Hehe, let's talk about our views on these two simultaneous operations. Let's make progress together!"

Indeed, zuckerstein seems to have brought the annual meeting to academic level.

Many people began to express their opinions and opinions.

It's said that zuckerstein's operation is perfect.

It is said that Zhang Fan's operation is more prospective.

Finally, the mouth guns spoke: "Dr. Zhang's operation is really wonderful and imaginative. I can do such a degree of operation at such a young age. To tell the truth, it's beyond my imagination.

However, surgery still needs the test of time. The invention of a new surgical method must be verified by time in order to prove its effectiveness and safety.

After all, we are treating people and operating on them. Therefore, necessary caution is still necessary.

Next, let's talk about Dr. zuckerstein's operation. If we say spinal surgery, Dr. zuckerstein's surgery has been a great success.

Forensic medicine has also proved that Dr. zuckerstein's operation has the least side effects, and we can see that the safety is also the best.

I suggest you not to be in the limelight for the sake of being in the limelight. We should be responsible for this profession. Ingenuity often leads to nothing.

Therefore, in order to improve the level of orthopedic medical technology in China. I suggest that orthopaedics departments in major hospitals go out more and have a look more. Don't stay in their own hospitals. The outside world is still very big.

Now let's invite Dr. zakstein to comment! "

The words of the mouth guns really don't taste in everyone's heart.

But it seems that I can't find a problem again!

Chapter 1059

Or because of the long history, many things in the system have practices, even for hundreds of years or thousands of years, which is very surprising. It seems that this thing is the exclusive attribute of the mixed system.

For example, retreat is not pragmatic. This is what the mouth guns are now. Moreover, you have no way to others. It sounds like it is also very important to pay attention to thinking and research.

But it sounds like a bit of a wheel.

The most important thing is to be ambiguous. You can understand it like this, and it still works like that. Anyway, there are two ways to change his religion, sawing arrow method and mending pot method.

The pot didn't break, smashed it, and then mended it for you. The arrow is in the meat, but people saw off the arrow pole, and then said that the thing is finished. Go to the doctor in charge of the arrow in the meat. Therefore, there has been a saying since ancient times that the positions above bailihood are inherited from the family.

In fact, it is not the official position, but the way of being an official. You let a common people think about it. It's interesting when you think about it. As a result, people are old and should retire, so

These words of the mouth guns make people uncomfortable, especially young people feel as if they can't go up and down. But if Zhang Fan really succeeds and becomes a famous doctor in the future, people will say that he was optimistic about Zhang Fan in those years, and specially reminded Zhang Fan to pay attention to collecting medical evidence.

If he fails, he will say, you see, I made it clear that he can't, and my vision is OK! Anyway, this kind of thing has every line of work, and there is no shortage of every line of work.

Most importantly, the mouth guns should make zakstan feel that they support zakstan.

When zactan took the microphone and smiled at the audience, especially Zhang Fan, he also observed "Hehe, I'm still a young man! "

When Zhang Fan heard what the mouth guns said, he was still uncomfortable. He hasn't cultivated enough to be surprised by honor or disgrace and worship the general, so his face looks very serious.

Everyone who knows Zhang Fan knows that Zhang Fan is angry. Because when he is not angry, Zhang

Fan always smiles and looks as if he is always harmless.

Many times, if you don't work hard, people have to say, OK, you can't, can't others say? But you work hard, someone is still chirping and picking on problems.

So many young people often fall not in front of difficulties, but under the skin of others' mouths.

Zhang Fan was not happy. As a result, Lin Cong on the left pressed Zhang Fan's hand, the High Court on the right pressed Zhang Fan's right hand, and Lao Chen behind him gently patted Zhang Fan on the back.

They were worried that Zhang Fan would jump up and fight with others. To tell you the truth, what mouth guns are most afraid of is fighting with you. He uses his strengths to make your weaknesses. Can you win.

Zhang Fan nodded gently, indicating that he was fine. Zhang Fan really hasn't been so angry since graduation. To tell the truth, if he hadn't had the experience of poverty and struggle in college, he might have jumped up to fight with these people now.

No matter what they say, it's better than a little girl rolling her eyes and asking Zhang Fan if she has money to open a house.

Therefore, sometimes the immediate suffering may be the element of success in the future. Life is very long. Who can say it?

Zakstein took the microphone and patted the Mike gently to calm the already chaotic meeting place.

Many people are particularly frustrated. My sister, my people are obviously very powerful. On the contrary, people with some status in our side are not optimistic about their own people. What can we compare with outsiders? Just admit defeat directly!

When everyone's eyes gathered, zuckerstein smiled and began to talk. When he came out of the operating room, he smiled at the mouth guns and made them mistakenly think they had agreed to their requirements.

All this, in fact, is for now. If Zhang Fan doesn't come at the right time, can he find the mouth gun for these Chinese people to smile? If it weren't for Zhang Fan, would he need to come to China!

Needless to say, the Chinese market is really large. You can't do it yourself. Sending a co chair a has already amazed the Chinese.

So he's going to perform now.

The president of a successful top-level international hospital is definitely a successful actor.

"Spine surgery, the flower of the future in bone science. With the improvement of living environment and human pursuit of self-health, the treatment of spinal diseases will be higher and higher.

The disease of the spine has its special characteristics. In orthopedics, those who can do the spine are the best among the excellent orthopedic doctors, and the doctors who can create new spinal surgery are the geniuses among the geniuses. "

Although this sentence was spoken in English, almost all the people present could understand it, that is, Zhang Fan and some leaders reacted a little slowly.

In this regard, Zhang Fan's pace is absolutely consistent with the pace of leadership.

Other people's surprised mouth almost closed. Zhang fancai translated it in his mind, oh! It was a compliment.

But this slow beat made zakstan improve Zhang Fan's position in his heart.

Their faces were blue, and a feeling of being dug and buried alive came to their hearts. In particular, the driver leaders of the Ministry of health looked at them intentionally or unintentionally.

"Young man, he is really calm! It seems that we still have to pay for it. "

Zukstan thought in his heart and continued: "China's medical development is very fast. It has almost caught up with the golden Mao country and has almost surpassed many countries in the world.

However, as you can see, there is still a part of Chinese medical treatment that needs to be improved. As Chinese experts said, Chinese evidence-based medicine is still in its infancy.

If the delay of advanced treatment methods is caused by the lack of evidence-based medicine, I think it is irresponsible to the genius and patients.

Today's operation is wonderful, especially Dr. Hua Guozhang's operation, which has found another way, although the perfect operation and safety of this operation can not be fully determined.

However, our special orthopedic hospital is willing to give full support in this regard, so as to make this operation a perfect operation as soon as possible. "

With that, the people in the meeting, especially the young people, were encouraged.

Applause, raindrops of applause rang out.

"This is the expert, this is the scholar's demeanor!"

Many young people talk to each other.

However, although many doctors who already have status are applauding, the expression on their faces is very indifferent.

Although the medical subjects in China are not commercialized, most of them have been to the golden Mao country. They know their temperament too well.

The more top medical care, the more money.

For example, in China's top hospitals, if you say something bad, although ticket dealers have doubled the price of outpatient numbers, generally speaking, ordinary people have the opportunity to see doctors in top hospitals.

Although the larger the hospital, the more unbearable the attitude of doctors and nurses.

But in the golden Mao country, it is very different. Mayo, why is a private hospital so arrogant? Because this kind of hospital is like the underworld a society in the past. This guy collects protection fees.

For example, a billionaire doesn't donate scientific research funds to the hospital every year. Once you need to see a doctor, I'm sorry, please make an appointment and line up.

This is still a rich man. Ordinary people don't even think about it.

Therefore, we can see on the news every year how much the local tyrant donated to Mayo. In fact, the money is for tickets.

Why don't you see him donate money to public hospitals!

Therefore, for zakstan's words, he will fool ordinary young doctors and inexperienced leaders. For those who seriously understand the medical industry, he will not be moved at all.

This kind of person will definitely receive ten points for one point.

However, it is now certain that Zhang Fan's operation is really powerful, and the special orthopedic hospitals that have been hit are beginning to bow their heads.

If we compare the special hospital, it is shuitanzi orthopedics in China, which is even more authoritative than shuitanzi in China.

When people stretched out an olive branch, the driver leader of the Ministry of health finally dispersed the clouds on his face and the sunrise. He looked at Zhang Fan and wanted to promise for Zhang Fan.

The leaders reacted, and of course Zhang Fan has translated it in his mind.

He smiled.

When zakstan saw Zhang Fan's smile, the stone in his heart finally fell to the ground.

"It's too difficult. It's not in vain. I set up a game to make my mouth stand out and perform myself. Finally moved the boy. Hehe, when you get to the golden Mao country, you can't help it. "

Zakstan smiled more sincerely. His brown eyes stared at Zhang Fan as if he saw a little white rabbit.

When soliciting Zhang Fan before the operation, many people were envious, but there was always a feeling that they shouldn't go, but now, zakstan's performance moved too many people.

Many people are thinking about such a good thing. Why can't I turn it!

Don't talk about others. Even Lin Cong is a little tangled. After all, it is the world's top hospital. If we can really get the support of this hospital, we can imagine how broad the future development prospects are.

"Sorry, our hospital has set up an orthopedic research center. Thank you for your kindness."

Zakstan is ready to get off the podium and hug Zhang Fan.

As a result, Zhang Fan won't go!

Not only zakstan, the people in the meeting were like zakstan, and their eyes were falling off.

"Look, look, this partnership is too disrespectful."

A mouth gun wants to go up and replace Zhang Fan. It's a pity that people don't want him.

"Well! No, you don't understand what I mean! " Zakstan instantly changed his already ferocious face back.

"I mean, seamless cooperation between our hospitals. Just like the pilots in our country, how about it. That's all right! "

With that, zakstan looked not only at Zhang Fan, but also at the driver leadership of the Ministry of health.

Chapter 1060

Medical matters, not to mention laymen, even experts overturn a lot. In fact, not only at home, but also abroad.

Moreover, it is particularly strange that whenever a genius or hero is born, a group of people who can't beat him often unite against him.

In 2003, I didn't know whether it was greedy to eat the pit digging aphrodisiac armour or the Yin replenishing civet. There was an accident that year. Then an old man advocated a treatment method, which was combined with various antiviral agents under the impact of high-dose hormones.

To tell the truth, before 2003, almost 99% of all antiviral drugs bought on the market were placebos, that is to say, you had almost the same effect with or without them.

Take the most, that is, you can cheat yourself. Oh, I'm sick, but I'm taking medicine. I should be fine.

In this case, a large dose of hormone shock has miraculous effect and can save people, but we all know that the sequelae is quite serious, femoral head necrosis. What do you mean, that is, the place where your thighs and hips are connected will shrink and die, that is, there is a high probability of becoming lame.

At that time, a group of experts in the capital also had a set of treatment methods. The sequelae was small and mild to patients, but the cure rate was too low. It can be said directly that the life is big, and the point is back hanging.

The old man treated a lot and saved a lot of people. On this side of the capital, although not many people have been saved, there are also some. Then, ten years later, some people saved by the old man had sequelae, femoral head necrosis.

On the capital side, no one had a major sequelae, followed by a crusade. To tell the truth, the thoughts of the medical circle were chaotic at that time, and everyone was very confused, just like the old man on the street fell to the ground. Can you help him?

Because there are too many afterthoughts, and leaving aside the discussion of this matter in the general environment at that time, I can make the round one flat for you. What can you do for me.

It can be said that if the old man had a bad state of mind or a weak character, he would probably be angry to death. There will be no old man who later became a God.

In fact, under the circumstances at that time, to allow patients to choose by themselves, it is estimated that a large number of people would choose hormone shock, because although this thing has sequelae, it can survive.

Is there any choice of palliative treatment? Absolutely. After all, there are many brave warriors in the world who dare to gamble their lives.

Therefore, everyone envies the first to eat crabs, but not everyone can be the first to eat crabs. Such people must first have a strong heart.

Zhang Fan's confidence is not that he has or does not have a strong heart, but that he knows the result. He has made a lot of comparisons in the system. His operation is definitely a new direction of medical development in the future.

Therefore, he doesn't care, let alone feel how precious zakstan's invitation is.

Moreover, seeing a doctor to save people, if Zhang Fan just wants to be famous or just for money, he can find a senior brother or a coastal hospital, won't he smell good?

But Zhang Fan doesn't want to. How can he spend enough money now? Moreover, the most important thing is that saving the dying and healing the wounded brings him a sense of achievement, which is definitely not comparable to making dozens of dollars a day.

This sense of achievement is addictive.

When Zhang Fan refused to cooperate with zukstan personally, zukstan quickly said that he would cooperate with Zhang Fan's hospital.

Originally, everyone had some reservations about Zhang Fan's technique because of the comments of the mouth guns. After all, people can represent the official. As a result, I didn't expect that zakstan was so urgent.

Everyone is not stupid. When you listen to this, it will be different when you look at Zhang Fan.

Zakstan's eyes are about to jump out.

Because he saw that the doctors in Mishima were ready to move.

Don't look at Mishima now. It's hard to say in other industries, but people's medical treatment is still very powerful. Others don't say, just say the Yearbook of internal medicine. Although it is a medical journal of the golden Mao country, it still hangs the name of the three islands of others.

Zakstan felt his heart almost jump out of his throat.

Because Zhang Fan smiled again!

Before the operation, he thought he could hold the little young man. He thought that if he gave some money and some profit, he would definitely cry and shout for his father.

As a result, whether Zhang Fan is not controlled, he is still thinking about digging zakstan!

Then zakstan thought that after the operation, he should be able to subdue the angular doctor!

As a result, zukstan's heart was bleeding because he had never fought!

He opened his mouth and said that when he cooperated, Zhang Fan smiled. In zakstan's eyes, Zhang Fan smiled with expectation and willingness.

As a result, zakstan cried again. Zhang Fan said he didn't cooperate!

Now, zuckerstein is eager for cooperation between hospitals, and even he looks to the leaders of China.

It's not how much zukstan loves money, nor how urgent zukstan is for medical progress. To tell the truth, if Zhang Fan hadn't almost smashed his pot with a hammer. He wouldn't be in such a hurry.

Genius, genius, people have seen a lot. He would rather the spine discipline be like this forever, not develop, and then make a lot of money.

But not now. Even if you can't control Zhang Fan, you should also participate in the research and development of Zhang Fan's new technique.

Although he stabilized doctors in China and other countries with a bunch of mouth guns, everyone is not a fool. After watching the video several times at the end of the meeting, everyone understands everything.

Moreover, the most important thing is that Zhang Fan, a Chinese doctor, is bent on research. He is not only bent on research, but also ready to spread this technology. Isn't it life-threatening!

Before Zhang Fan spoke, the leader gently turned his head to look at zakstan, and then said to Zhang Fan, "president Zhang, if there is no participation of special hospitals, how long will your technology take shape?"

Zhang Fan thought a little "It won't take long to form, but without the support of forensic medicine, the specific level of data can't be collected, and it can't be popularized in a large area! "

The leader thought and asked, "I can apply to the superior and let the medical experts focus on your

project. How long do you think it should be?"

When asked, not only Zhang Fan was embarrassed and didn't know what to say, but also zakstan on the podium looked at the two people and whispered.

But he dare not be angry.

"It's all right. There is a saying, you can rest assured and boldly say, "I know your martial uncle and your master." The leader smiled gently.

It is estimated that he was infected by Zhang Fan at that time.

"Well, there are only a dozen people in our country who are full-time evidence-based medicine, and they are jointly organized with the golden Maoist United Nations, so..."

Now it's the leader's turn to be embarrassed.

As I said, what was evidence-based medicine in the past.

In fact, generally speaking, it is a discipline responsible for medical measurement units.

When there was no such concept in the past, the treatment of a disease often depended on the experience of doctors, that is, the so-called empirical medical treatment.

Whether a patient has appendicitis or not depends on the doctor's experience.

Evidence based medicine is to collect a large number of preoperative, intraoperative and postoperative patient data, and then form a quantitative treatment, such as what degree must be cut and what degree cannot be cut.

This is what this subject has to do.

For example, Zhang Fan's technique was invented. If there is no quantitative data and paper and others have no experience, do you have to rely on Zhang Fan to bring it one by one?

Impossible, so the importance of evidence-based medicine is highlighted.

When Zhang Fan said this, the leader said awkwardly, "it seems that it is imperative for us to cooperate with Jinmao?"

Zhang Fan said: "if you want to succeed in a short time, you must cooperate!"

"Good!" The leader nodded.

Then he looked at zakstan, "we agree to cooperate in principle, but we still have to talk to president Zhang.

The annual orthopaedic meeting was very successful. Everyone expressed their views and competed on the same stage. There was a revolutionary spark between experts. This is the purpose of the annual meeting.

Instead of the so-called everyone on stage to talk about the past and casually talk about their achievements, it is even an annual meeting.

Therefore, I propose to normalize this annual meeting and make it a grand event of orthopedics in China and even the world. I think Dr. zuckerstein will strongly support it. "

With that, the driver leader looked at zakstan, just like Zhang Fan's smile, and looked at zakstan kindly and amiably.

Zaxtan Khan is down.

"Yes, this proposal is very good. On behalf of the special hospital, I promise that there will definitely be heavyweight doctors to participate in the annual orthopaedic conference in China every year!"

With that, zukstan looked at the driver's leader.

I helped you, you have to help me now!

"Oh, president Zhang, I think we can talk with the special orthopedic hospital!"

Zakstan put down the microphone and went to Zhang Fan. He thought to himself, "your leaders have agreed. You shouldn't refuse now!"

Unexpectedly, Zhang Fan smiled again.

Zach Stan is crying.

"In principle, I also agree with this matter. After all, it is still possible for strong alliances to be mutually beneficial."

Zhang Fan said that not only shuitanzi's Lao Zhao but also Lin Cong did.

"This boy doesn't know anything. He's thick skinned and shameless!"

If you let Zhang Fan say that his level is similar to that of zakstan, Zhang Fan will be embarrassed and won't open his mouth, but let him say how strong the tea vegetable hospital is, he can definitely say it.

With that, before Zhang Fan could wait for zakstan to grin, Zhang Fan said, "but I'm just an executive dean, responsible for clinical treatment. As for cooperation or not, you have to talk to our dean in person!"

Zach Stan wants to tear Zhang Fan up!

However, the situation was pressing. He clenched his teeth, shook hands with Zhang Fan and said in a low voice, "when will Zhang Yuan return to tea vegetable? I will go to tea vegetable with you in person."

At this time, the media finally let go, and the flash is like the flash grenade of CS.

Finally, after the shooting, the leader was sent away. Zhang Fan also wanted to have a rest. After all, today's two operations were still very tired.

Just after this time, Johnson & Johnson's China Regional Manager immediately ran over and looked at Zhang Fan with enthusiasm, just like his long lost father.
