

Chapter 1101

Ouyang doesn't seem to talk much. In fact, the old lady is more nervous than Zhang Fan. I am deeply afraid of the confusion of Zhang Fan's orders, the incompleteness of the government's materials, and the lack of cooperation of the doctors in the hospital. To tell the truth, Zhang Fan is more tired to be a team leader than herself.

This is a test. It is a sudden test that does not give candidates a little preparation and will not draw key points in advance.

When Zhang fan set out, the municipal hospital was really short of money. Almost all the front-line doctors have been transferred. Ouyang, with his face, has forced many doctors who want to retire to delay their retirement, and then the old with the new. The doctors who have just entered the hospital for a few days have begun to manage critical patients with the old doctors.

The tea vegetable hospital has entered the moment when the bayonet is red. If we can't control it, the number of patients will continue to increase by leaps and bounds, and it is estimated that we can only ask the superior government for help.

There is a saying in the hospital that the more critically ill patients exercise doctors, the more they can make doctors progress rapidly. Yes, but doctors are different. This exercise is too cruel. It's no exaggeration to say it's scary.

Eating and thinking about his patient, why blood gas analysis has not been effective. These days, all the inpatients can't go home at all. They are on standby in the hospital 24 hours a day. Girlfriend breaking up? Sorry, I can't get out.

Therefore, when hospitalized, it's best not to fall in love.

Special period, special treatment. Many doctors may not encounter such a situation in their lifetime, while some doctors can encounter it once in a few years. Many private clinics of tea vegetarians have begun to close, and even explicitly refuse fever patients and children.

Several 120 buses in the urban area of chasu set out, filled with doctors and nurses from the municipal hospital. But without the energy and spirit of the past, the beards of male doctors and female doctors are slightly better, but they are not as good as there.

There was no noise or chatter in the car. Some had begun to doze off against the window, and some had already entered their dreams.

Zhang fan can't sleep. He's still coordinating all aspects. As the leader of the anti epidemic team, he can't relax. Others are physically tired, but he is physically and mentally tired. Sometimes, clearly tell each other that they must be strictly disinfected and treated on site, but many people still run away.

It's like Zhang Fan is a villain. But this villain, no one can do it.

This time, almost all of them are the backbone of the internal medicine of the tea vegetable hospital. After handling the coordination of all parties, Zhang Fan has to mobilize his colleagues. Doctors are also people. At this moment, people in the non-medical industry can think that this is what they should do, but as superiors, they can't think so.

Ouyang's inspiring Dharma Zhang fan can't learn. So far, what he has learned anyway looks like no connotation. It is estimated that it is related to his experience. Zhang fan can't say anything that can make people's blood boil in an instant.

But Zhang Fan also has his tricks.

"Comrades, we are now heading for the epidemic area. Hanggai is not only an epidemic area but also a pastoral area. We must do a good job in self-protection. We must not be careless. They are all experts. I won't explain the specific matters. " Zhang Fan started his encouragement with the walkie talkie in the car.

"In view of the urgency of this support task and the recent fatigue, I decided that during this period, the daily salary of all on-the-job medical staff in the municipal hospital shall be paid three times the normal salary."

Then Zhang Fan paused.

The medical staff in the front and rear 120 cars opened their eyes slightly, estimated the number in their hearts, and their lips turned up a little. Everyone didn't say anything. They were still very happy, and they felt that following Zhang Yuan had a future.

The government officer in the car looked at Zhang Fan admiringly, looked at a group of doctors and nurses in the same car, and kept scolding his mother. Why didn't I meet such a leader? Why didn't I give me overtime pay for three days a day.

They all say that doctors have high wages and that official monkeys have more income. In fact, they all say that doctors and official monkeys have higher levels. For example, Zhang Fan, the leader in charge of

health. Other ordinary doctors, ordinary business monkeys, are just like that.

That is, the house price of tea vegetable is not high, and everyone's happiness is slightly higher. But in recent years, with the rise of tea vegetable city hospital, the house price in other parts of tea vegetable city is OK. But the house price near the city hospital has begun to catch up with the bird market.

The happiness of more than a few thousand dollars a month can still make people feel comfortable. Anyway, this job should be done even if you don't pay money, but if you pay some money, it's better, isn't it?

After a few minutes of astonishment, Zhang Fan continued: "considering that we have been eating and living in the hospital day and night recently, I decided to give on-the-job doctors a meal allowance three times a day according to the meal allowance. Especially for doctors who rush to the epidemic area, a business trip fee will be reissued.

As long as we withstand this wave of infection, money is not a problem! " Zhang Fan's remark is definitely not a boast or a fake big empty. Everyone knows that in the leadership of the hospital, Zhang hospital is absolutely obvious about the speed of making money.

In the front and back cars, the originally lifeless atmosphere became vivid. There are also people who chat and those who tell jokes. This is the effect Zhang Fan wants. Talking about feelings alone is sometimes very fucked.

The government officials sitting in the front car are almost crying. He wants to say, do the municipal hospital want to work? I want to come too.

But because the leaders of the government are there, he can't say it.

When Zhang Fan finished shouting, the leaders of the government frowned and whispered, "the municipal hospital is really rich. What a pity... "

"Zhang Yuan, there seems to be no precedent for such subsidies. If you do this, what will you do in the future? " The leader smiled and said to Zhang Fan.

Zhang Fan also smiled and said to the leader, "there are no regulations to say no to hair!"

Like a soft nail, it choked the leader's smile. The muscles on the leader's face became stiff. He glanced at the officer whose saliva was about to flow down. The leader turned his head and stopped talking. I guess I want to go back and discuss how to standardize this subsidy, otherwise how can the team take it in the future!

Zhang Fan doesn't have such a big macro vision. He doesn't know what to consider for the overall situation and for the future Dean. He just knows that his colleagues are not easy. Now take the opportunity to send some money. No one has anything to say.

Moreover, it's not financial money! This is Zhang Fan's greatest confidence.

Hanggai County, it's a basin. It's a little big. If the tea element area is hung like an introduction on the edge of the sky, Hanggai is the innermost part under the herringbone, with its back against the Tianshan Mountains and its feet on lakes and forests.

Natural resources are quite abundant. Except that it is colder in winter, the timber, mines, animal husbandry and even tourism here are the envy of many counties in the mainland.

However, because it is backed by Tianshan Mountain, the temperature in winter is also quite low. When the people in the tea vegetable city didn't wear down coats, the people here had put on big fur coats. Moreover, the altitude difference of the county area is also quite large, ranging from 3000 to 1200, so the climate environment of this place is quite complex.

A few years ago, people could only travel in summer by relying on the national defense highway. Once October passed, it was like being isolated by the outside world. In the words of rich people, this place is a paradise. In the words of people without money, this is a large prison with beautiful environment.

After 2008, after the state built the expressway connecting the north and south of Tianshan Mountain, the young people in this county suddenly seemed to be released. Those who can go out to work will not stay here. It seems that the natural environment here is not comparable to the high-rise buildings outside.

Therefore, except for some young employees of the government and various institutions, almost all the others in the county are old people and children. Most of the other adults go to work in other places, that is, they return to their hometown like migratory birds for a rest every year.

Maybe people in big cities don't feel this tranquility. It can be imagined that on the huge square, there are only some old people basking in the sun and some children learning to walk. Even the buses in the city move leisurely and slowly like crawling snails.

If it is autumn, people in the county will live in the park. Walking in the street, the red maple leaves will slowly fall. Really, it is like Hokkaido on TV. When Zhang Fan came here to fly a knife before, as soon as he entered the city, he would think of a love TV series of MARUKI country and a love story in Tokyo.

Just as the tranquility and scenery here make his rough heartstrings move. Really, this feeling has never been before.

When the 120 motorcade entered the city, it was like entering an empty city. There were no people in the street. The few small shops and restaurants were closed, and only the dead leaves on the big tree in front of the door were shaky. Occasionally, a gust of west wind blows, and the withered and yellow leaves float away with the wind.

When the motorcade arrived at the hospital, it saw the people in and out, and felt that there were still people here.

Because there are few young people and the elderly take care of children, a lot of knowledge is backward. Children with fever will eat analgin, children cough, and the elderly don't pay attention to their own protection. They give licorice tablets for fear that the nutrition can't keep up with the children when they are sick. Chickens, ducks, fish and geese think that the children can resist the past after eating well.

Therefore, it is often a family. If a child has the flu, almost all the family can have the flu.

In fact, during illness, except for some specific diseases and diseases with high consumption, other diseases only need to meet normal consumption without adding a large amount of greasy food. Because at this time, eating a lot of greasy food often leads to vomiting and diarrhea, and the gain is not worth the loss.

Because of the particularity of the city's population structure, this time also caused the particularity of the disease. At first, the child got sick, then the old man got sick, and then sometimes three people in a family got seriously ill at the same time.

This cross infection is really difficult for doctors.

Lao Ju, an expert in the respiratory department of the tea element area, is the first person to call himself tea element respiratory. He hasn't suffered from respiratory diseases for many years. Whenever a respiratory doctor has respiratory diseases, he will always say bitterly: "how do you become a respiratory doctor? I tell you what to say and what to say on weekdays. You just don't pay attention. Look now, Sick! "

As a result, this time, Lao Ju fell ill. Not only did Lao Ju fall ill, but several doctors in the medical group of the first team fell ill.

Otherwise, people who always have a stiff neck than stubborn donkeys can't ask for help.

When Zhang Fan entered Hanggai county hospital, the Mongolian President of the county hospital rushed out step by step.

The place names of many places in the frontier are transliterated in Mongolian. For example, Kuitun near the bird market is said to be the name shouted by the old soldiers covering their ears. For example, Sailimu is actually Mongolian.

Therefore, there are Mongolian people in many areas, and when they say tea, they often say that their family was the descendant of the golden tent. They used to herd sheep and horses for their family. Really, Zhang Fan doesn't know.

"My Zhang yard, you finally come. If you don't come again, I'll hang myself." The high cheekbones with Mongolian characteristics and the unique red nose of the president of the West County Hospital are drunk.

"Dean Ba, what's the situation now?" Zhang Fan didn't say hello either. While directing people to move materials from the car, he asked Bartel about the specific situation.

It's OK not to ask. When asked, Bartel was almost crying. The originally red rosacea nose is more red and gorgeous. It hangs on your face like a little red fruit.

"There were not many pediatricians in the hospital. When your hospital expanded, several undergraduates got their qualification certificates and ran away without even calling. I can't close the pediatrics in the hospital. As a last resort, gynecologists can only make do with the shift.

Be careful. I didn't expect an accident. You say gynecologists can see several hand, foot and mouth diseases. The gynecologist's own child also got hand, foot and mouth disease, and she herself was infected and hospitalized.

After Dean Ju came, he was knocked down by the flu. It's not that we don't care. This infectious disease is too dangerous. You must speak to us. The government leaders said they would remove me from office.

Tell me, is this what I can resist? The experts in the municipal hospital have fallen down. What should I do as a doorman and say I want to hold our gynecologists accountable? Do you say it's not cold? There was no doctor at all. Will the hospital go on in the future? "

Although Bartel with fruit hanging seems to be a rough man, in fact, the thief is very. He knows that as long as Zhang fan can say a word, it will be easy to do.

If Zhang Fan had been before, he would have been infected by his expression of grievance and tears. Maybe I'll help you say a word.

But now it's different. For Bartel, Zhang Fan still knows.

"All right, hurry and ask your people to move the materials. Let's talk about other things when they're finished."

Chapter 1102

If it is said that ordinary citizens have a cunning life, the official monkeys with a little power at the grass-roots level are absolutely slippery. They don't think they have enough to say if they don't keep their hands. Although he looks simple and honest, in fact, thieves are not ordinary. When Zhang Fan first

entered the city hospital and started throwing knives around, Batu commented on the presidents of several county hospitals.

At that time, Batu said that Batu in Hanggai was a revolutionary wine, drunk every day, and educated youth slept every day. In Bartel's hands, I don't know how many organizations have been sent out to educated young people.

There are five or six Deputy logistics directors in egg sized hospitals. Moreover, many young intellectuals often use this place as a springboard. Anyway, the staffing of county hospitals is insufficient every year. Non-medical professionals enter the hospital, and then look for opportunities. Maybe they can enter the government one day.

People in big cities in the South may scoff at the compilation of something, but many people who can't get ahead of their work abroad can feel the recognition of the compilation in their hometown.

It is said that the right to choose a spouse is a priority for those with a staffing system.

Zhang Fan's luck was really explosive. Can a small doctor with no power and some skills fly knives all over the world in the tea vegetable area? Among them, Zhang Fan's ability to be a man is on the one hand, more is the escort of Ouyang, and Batu's guidance pit is deep and shallow.

Otherwise, just have the technology, press Zhang Fan's crazy brush operation. If you don't have a heel, you will definitely be cheated. Therefore, casual success in the world is in textbooks,

Bartel now wants to pick himself and his subordinates. The leaders of grass-roots hospitals not only have wrist, but also have a certain so-called Jianghu loyalty.

Zhang Fan didn't seem to hear it, or Zhang Fan listened to half of his words, "is the old house serious?"

Bartel's eyes purred. "It's serious. It's not serious. It's hard to talk. I asked the hospital experts to accompany me 24 hours, otherwise it would be more serious. The treatment of several other doctors is the same. Why are they all from the superior hospital? I can't let the experts from the superior chill. "

"Ha ha!" Zhang Fan smiled. This guy has something to say" I arranged the accommodation and meals for the people I brought. I was on my way and didn't drink a mouthful of hot water. You and our president

Chen take them to arrange accommodation first. I'll go to see the old house.

Arrange snacks, in the cold winter... "

"Don't worry, it's up to me!"

"Also, free up a large office and directly set up a front-line headquarters. What do you say? " Zhang Fan turned and looked at the leader in charge of health who had just got off the bus. The leaders of Iveco, which is more than 300 kilometers and 120 kilometers, are stiff.

"OK, you are an expert. All actions are up to you." After the leader rubbed his waist said that, he glanced at Bartel again. Can't scare Zhang Fan or you with a bad nose?

Bartel saw that there was still a God in the crowd. His hands were like hada's, "ouch, ouch, my leader is coming, but I'm looking forward to you. You must decide for me!"

Like gummy sugar, I began to complain and cry when I leaned against the leader.

Zhang Fan took Xiao Chen of the medical department and the director of the office of Hanggai county hospital into the outpatient department of the hospital. To tell the truth, the national investment in medical treatment in recent years is definitely greater than the sum of previous decades.

The former county hospital, a small county like Hanggai, has a two-story building, which is already very good. Many of them are just a large yard with rows of bungalows. But in recent years, the buildings of the county hospital have sprung up one by one. Although the advanced level of equipment can not be compared with that of the tea vegetable city hospital, it has been a change of gun.

However, unfortunately, the hardware is up and the software is running out.

.....

Generally speaking, experts at this level of Laoju will not be infected easily. It is not the golden bell mask of Laoju, but the rich experience. Laoju is absolutely first-class in terms of experience in anti epidemic in tea and vegetable areas. After all, he participated in the national anti epidemic in the capital in those years. How can he be put at this regional level.

Zhang Fan wondered, but he was no longer the director of the office of Hanggai county hospital. He knew he couldn't ask anything.

Bartel didn't lie. They were indeed arranged in the special needs ward. Even the nurses were slim.

As soon as Zhang Fan entered the door, he saw the old house lying on the hospital bed close his eyes and refresh himself, with a morbid flush on his face.

When he heard the news, Lao Ju thought he was an expert from Hanggai county and didn't open his eyes. "I'm fine. Don't stay with me. Go to the clinic more and be sure to explain clearly. As long as there are patients with influenza and hand, foot and mouth disease, they must be isolated. Hey... "

With that, Lao Ju sighed a long sigh.

Zhang Fan has never seen such a decadent old house. When he sees the old house at ordinary times, they are all dressed in suits and shoes. Although his hair is going bald, he is never short of hair wax. Zhang Fan sometimes secretly thinks that this guy is bald. Is it because he uses hair wax and hair oil too often.

And I've always been proud. If Lao Chen is low-key and easy to talk, Lao Ju is proud. He looks at people with eyes and squint. Pride, people have the capital to be proud.

But at this time, like a chicken in the water, the pride of the past was lost on his bald head.

"Dean Ju, is it better?" Zhang Fan asked softly.

Lao Ju opened his eyes. Because he was a little excited, he coughed with his mouth covered and danced with one hand.

If he was a layman, he thought Lao Ju was chasing people, but Zhang Fan understood and immediately put on a mask.

After coughing for a while, Lao Ju didn't know whether it was sick flushing or a little embarrassed blush. He said to Zhang Fan, "Zhang Yuan, I'm sorry, I didn't finish the task. I'm talking big. When you come this time, the city may not be able to open the tie. "

On weekdays, Zhang Fan is most willing to be with Lao Chen. To tell the truth, sometimes Zhang Fan feels that he has a tacit understanding with Lao Chen than with Shaohua.

You are thirsty and want to drink water. Before you lift your hand, Lao Chen will clearly hand over to you whether you want to drink warm boiled water or Tieguan Yin. Moreover, when you are with Lao Chen, you know he is flattering, but it can make you feel comfortable.

However, in terms of medical business, Zhang Fan believes in the proud old house and Ren Li, who is determined to surpass the Affiliated Hospital of Niaooshi.

"You don't have to worry about the hospital. The European hospital has suspended the retirement of several old doctors who are going to retire. At present, the old bring the new, and they can stick to it. The respiratory doctors you train will pull out three or four at the critical moment, so don't worry. "

Zhang Fan smiled a few words of comfort and didn't mention the specific situation here. This matter can

only be said by Lao Ju himself. If Zhang Fan asked in a hurry, he would be a little cold hearted.

"Hey, I always thought that the European hospital was overbearing. You are too strict with doctors, Zhang hospital. Now I understand that there is no hegemony of the European Academy and your high requirements. We are nothing. When I came to Hanggai this time, the doctors were unprofessional, the flu broke out, and large doses of antibiotics were used.

When I arrived, there were no antibiotics available. Many patients, especially many children, I had to go to taineng. They are all children. Now, what will they use in the future?

Moreover, many doctors have not been rotated. They enter a department after graduation. They only prescribe some medicine according to the book. There is a slight change in the disease, and they all have a rest. "

The more Lao Ju said, the more excited he became.

"As a last resort, people on our side can only go around in a row. They go out in the white sky and into the inpatient department at night. In a few days, several doctors were exhausted. "

Zhang Fan understood as soon as he heard it. The guy was so hard spoken that he didn't ask for help, and then he was tired.

In the face of disease, the best treatment is the body's own antibodies. For example, if you have a cold, you stay up late every day. A cold is definitely like dying again, because you don't have enough capital in your body.

The farmer's uncle, who works at sunrise and earns every day, has a cold. At most, he has a runny nose for a few days.

So many times, when you see a doctor, the doctor will say, pay attention to rest, pay attention to rest. Sometimes, the doctor prescribes hundreds of thousands of cold medicine for you, which is not as effective as having a good sleep at home.

If high-intensity work leads to physical fatigue, it will become susceptible instead of susceptible.

Don't the doctors know?

But sometimes the situation is better than people.

In a county, the sudden outbreak of influenza and hand, foot and mouth disease, the county hospital did not operate well, which has made the local people lose confidence. Therefore, when the residents came, they had to engage in fatigue tactics.

Chapter 1103

"Have you heard?"

"What did you hear?"

In the community, old men and women can still play mahjong and landlords fight. The old lady who pays attention to a little wears a mask, but when Hu Pai disagrees, the mask will still be removed and discussed with the other party. There are still some spitting ideas flying all over the sky.

At the peak of the outbreak of tea element flu and hand, foot and mouth disease, several old women and old men gossip on a mahjong table in the community.

"I don't know?" After asking, the old lady who spoke began to gossip with the posture that she was a tea vegetarian stomach.

"You know, hanggaixi county is surrounded. Moreover, they are not local troops. It is said that they are all drawn from the mainland and can only enter without giving up. Tut tut Tut, the 120 motorcade of the municipal hospital has gone to Hanggai. "

Then, the old lady looked around and didn't find a stranger. Then she said, "I heard that those who can't be cured will be directly pulled to the crematorium."

"Really or not, don't scare me. My daughter is a teacher in Hanggai. I just called yesterday and didn't say anything about it. "

The gossip old lady looked down on people: "my son is in the municipal government and your daughter is in middle school. Do you think they can come into contact with a level!"

With that, the old lady of her daughter in Hanggai stopped playing mahjong and couldn't care about the Hu card. She trotted home and probably called her daughter.

This kind of quite unreliable gossip is also very marketable. Not only ordinary old men and women will believe it, but even some old men and women of the Zhang Fan family are worried.

"Father in law, tell me whether we call Zhang Fan or not. It's said that I have a nose and eyes. My eyelids jump all day."

Several old people dare not discuss with Shaohua for fear that Shaohua can't bear it.

Although it seems like nonsense, three people make a tiger. That's why the country directly reported this kind of thing later. Today and yesterday, they told everyone clearly. There is definitely the original intention to prevent the underground propaganda department from publishing in a mess.

What can't be cured is directly pulled to the crematorium. What? A village was run over by tanks. Anyway, it's mysterious.

The person who speaks is like what he sees with his own eyes. The person who listens is like without a brain. He listens with horror. But the government asked them to wear masks. When they arrived at the drugstore, they disliked that masks were expensive. Don't let them get together to play mahjong. When they get up the next day, they still play mahjong. People from the community stop them and have to fight with people in the community. At this time, they are not afraid of crematoria or tanks.

Anyway, I'm angry with the loveliness of the Chinese people.

.....

In the large conference room of Hanggai county hospital, Zhang Fan presided over the meeting and the three parties met. Leaders of the anti epidemic leading group, the county government and various local health departments.

"First, we must implement the mass publicity and science popularization work. Group prevention and group control must be implemented to individuals.

Second, the county hospital and its surrounding clinics must notify unregistered patients at the first time, and must be responsible for one thing. Where there is a problem, the person in charge will be investigated, and there will be no peace.

....."

Zhang fan arranged one by one in the conference room. This kind of thing seems very simple, but it is actually quite difficult. Overall planning was done by top talents in the past, and now two infectious diseases have been added.

To tell the truth, Zhang fanxin is hanging in midair.

He is not afraid of treatment. He is afraid of an carelessness. He didn't expect to spread. This is a troublesome thing. After Zhang Fan finished, the leader in charge of health directly stood up and spoke.

"The plan has been issued, and what Zhang Yuan said was quite polite. Then, I'll put another hoop spell on you. I don't care how you used to work. Is it drinking and dancing at work, but this time, if anyone doesn't pay attention, he won't be responsible. I'll smash someone's job.

No matter who you are, no matter where you are, I'll ruin your job if I try to get punished. Don't take the fight against the epidemic as a play! "

Zhang Fan took a surprised look at the health leader like dough in front of Ouyang. He had a little respect for the dough leader for the first time.

Whether you like power or position, you can be responsible when you encounter things. This is the leadership that Zhang Fan appreciates.

With the tripartite meeting, the anti epidemic work in Hanggai county began to be carried out in an orderly manner.

As a saying goes, I'm not afraid of how difficult it is. I'm afraid the government will take it seriously.

Zhang Fan first took the county hospital as his stronghold in the county city, and then continued to expand to the surrounding township communities. I eat and drink almost in the car all day. I keep patrolling and go to the problem place to solve the problem.

With the assistance of the municipal hospital, the county hospital has greatly alleviated the situation. At present, it can be on duty in turn.

It's hard to say whether Zhang Fan is tired in a week. The mileage of cars alone is almost tens of thousands of kilometers.

Zhang Fan didn't smile this time. He almost came with a black face.

With the arrival of a heavy snow, the number of patients slowly began to fall. Hanggai's primary school has opened. In a few days, the kindergarten also opened slowly.

In the intensive care unit, the beds slowly became vacant,

Influenza combined hand, foot and mouth disease is finally over. On the way back to the city, Zhang Fan chatted with the leader in charge of health. Working together these days, Zhang Fan feels that the relationship between the two is much closer than before.

I used to think this guy was staring at the money of the city hospital, but now I finally recognize it.

.....

In the municipal hospital, the situation is also relatively better. Although many patients in the surrounding counties gather here, fortunately, the municipal hospital developed in Ouyang in recent years has a strong foundation. There are important people, money and equipment.

It's not like before. Being beaten will only cry to the bird market for help.

For Zhang Fan's performance this time, Ouyang is quite happy“ Young people should bear more burden, or they will never grow up. I said, Lao Chen, what's going on recently? My cactus has lost all its thorns. Is the temperature in the office too low? ”

Ouyang has time to raise flowers and watch TV dramas again. Recently, the old lady is also a little busy. She stays in the hospital for 24 hours. She is deeply afraid of something wrong. It's really hard.

This unpredictable waiting is the most painful. You don't know what it fell from the sky.

After returning to the tea vegetable hospital for repair for a few days, Zhang Fan began to send money.

For a time, the tea vegetable hospital was as festive as the Chinese New Year. Especially the little nurses, chattering, while calculating how much they can take, while thinking about whether to buy a rotten apple mobile phone or go out to buy a fur coat.

Chapter 1104

It's actually very simple for hospitals to send money. There is nothing as mysterious back-to-back as a certain field, nor will there be a mountain of cash like a local tyrant, that is, a small note with two fingers more than ten centimeters wide, which clearly says how much money you get for a few days on duty and how much you miss meals. In order to make more money, Zhang Fan even asked the financial affairs office to fill up the usual blank Family Planning subsidies. It doesn't matter whether you have one or a pile of them. Anyway, it's for the sake of making more money. Zhang Fan asked the financial department to think of all kinds of fame.

Although each item costs tens of dollars or hundreds of dollars, there are still a lot of items. In fact, the purpose of calling everyone together is not to pay money, but to summarize and commend the people who made outstanding contributions during the anti epidemic period.

In collective life, organizations still attach great importance to such things. However, for ordinary staff, giving money is more important than honor. The government is quite satisfied with the performance of the municipal hospital this time. In the past, it can be said that in case of sudden and serious infectious diseases, the tea vegetable boss often wondered whether to let Zhang Fan hang a post in the government like Ouyang.

It doesn't matter to others. After all, Zhang Fan is a sanitary mouth. He can't jump out of the sanitary mouth in more than ten years. But the leader in charge of health is creepy. Ouyang is not afraid. After all, Ouyang's age has reached the line. No matter how happy he jumps, he is tossing back and forth in the hospital of the Health Bureau. But Zhang Fan is different. This really makes Zhang Fan hang up. He may be a downhill tiger in the future.

No matter whether Zhang Fan is interested in politics or not, the leader in charge of health must not open his mouth, otherwise he will be too hung up.

"Well, for this anti epidemic, the municipal hospital is a team that can fight and unite bravely. This is not only the credit of the leaders of the municipal hospital, but also the result of the strong support of the leaders here.

Tea vegetable city hospital is indeed several grades higher than before, with advanced equipment and excellent medical skills. But leaders, you don't know. The leaders of tea vegetable hospital are like units outside the system.

Don't say or listen to my suggestions. Their bonuses and their management style are incompatible with us. In the small, they have their own small Treasury. In the big, they have no organization and no chance.

If the following units are the same as them and have their own ideas and methods, how can we command and lead in the future.

This is not a hospital problem, this is a hospital leadership problem. This is the problem that leaders are not strict with themselves. However, after all, they are also meritorious men. I mean, they can give material rewards and awards in terms of spirit and position... "

The leader in charge of health is serious. He is also an expert. I don't talk about the details, but I jump higher from the details, from the perspective of ideology and organization discipline. And leaders have to consider other people's proposals.

Boss Cha Su listened and looked thoughtfully at the leader in charge of health. He didn't say anything.

After the meeting, Zhu Bing's father-in-law said to the tea vegetable boss like chatting, "the municipal

hospital is a little too much. In the past, Ouyang didn't listen to the greetings of the health leaders and relied on the old to sell the old. Now there is a Zhang Fan. It's more exaggerated. He took the hospital to do the operation abroad. It's too unspeakable!"

It seems to be criticism. In fact, the meaning in the words still needs to be tasted. At the beginning, Zhu Bing and Lu Renjia married and Zhang Fan was the one to connect them. Old man Lu can still be a little angry with the introducer who ate his daughter by a pig.

But later, Zhu Bing performed well and his daughter was happy. That's why he didn't have a problem with Zhang Fan. Moreover, he also knew that although Zhang Fan and Zhu Bing didn't move around often, where was the relationship? So today he took the time to help Zhang Fan.

But not too blatant.

"Hey, you can't say that. It's our pride to go abroad. In fact, there's nothing wrong with sending more money. Just don't listen to the greeting. It's a bit of a headache. "

"In fact, Ouyang didn't listen to the greeting. I heard that Zhang Fan cooperated well with the leaders of the sanitary mouth this time!"

"Well, Zhang Fan is still good!" Boss Cha Su doesn't know whether he remembered a word or something. He also thinks Zhang Fan is good.

"What do you think is the reward for Zhang Fan. We can't chill people's hearts, nor can we say that our tea vegetable leaders are stingy. Although we are poor, we are generous to meritorious officials. "

"If you can't, improve your treatment!" The old road is very shrewd.

"What?"

"Didn't the old leader leave tea to go to the capital? A house was vacated in the courtyard. The leaders of all prefectures and counties quarreled about this house. Zhang Fan's level is not enough, but we can pay for our work, even if the organization is concerned."

As soon as boss Cha Su heard this, he thought, "this is also a way. For this matter, my phone has been blown up recently. You can arrange it. I'll just ask. You represent... "

"I understand that this is the concern of the organization, which you focus on..."

.....

After work, Zhang Fan was ready to leave, and Zhu Bing's phone came " You have to treat. "

"What? Are you pregnant with a second child? Your family hasn't been weaned yet! "

"I'll go. Your treat has something to do with my bad second child!" Zhu Bing almost ate the phone.

"Hehe, what's the matter? Tell me quickly. I'm still busy." Zhang Fan smiled. He likes to tease this guy.

"My father-in-law mentioned to me that he wanted to give you a house."

Zhu Bing is mysterious. He makes phone calls as if he were crawling in Zhang Fan's ear.

"What house makes you so nervous." Zhang Fan was surprised at all. He learned about cement piers. A suite in mordu made him owe money to elder martial brother. Now he thinks this thing is useless.

What investment, what catch up with the depreciation rate, Zhang Fan has no vision or thought. His view is that the house is not used to live?

"What do you know, compound 1 on corruption road. Why is it your turn? I think you are blind to such a good house. " Zhu Bing was dying of envy.

After hanging up, Zhang Fan is a little confused.

House, he is not strange, but this No. 1 courtyard is a little said.

Back home, Shao Hua, like a biochemical soldier, wore a hospital surgical mask, a hat, found a plastic bag, a raincoat for summer, and waited for Zhang Fan with disinfectant in his hand. Shaohua was preparing for pregnancy recently. Zhang Fan was afraid that Shaohua would be infected, so he told Shaohua on the phone to prepare some clothes for disinfection and washing.

Unexpectedly, Shao Hua made a replica of a biochemical soldier.

Chapter 1105

"Don't laugh!

I said no, but I didn't want to. I had to dress like this. The neighbor's aunt just saw me and asked me if I needed help painting the house at home! " When Shaohua saw Zhang Fan, he looked sad. Seeing Zhang Fan's tendency to laugh, he immediately made a voice to stop it.

Zhang Fan and Shaohua have a small agreement, because the old people in the family often go to Zhang Fan and Shaohua's home together. Therefore, Zhang Fan's parents, Zhang Fan and Shaohua are called mom and Dad together, while Shaohua's parents are called mom and dad.

Although they didn't mention it to the old people, over time, they also know that when they call their

mother, they call Zhang Fan's mother again. Small habits, but also avoid some embarrassment and discomfort of the elderly. After all, two strange families have become a family. They should tolerate and change each other. Otherwise, the civil war will continue and even go their separate ways.

When Zhang Fan's mother heard that Zhang Fan was coming back, she had to disinfect. Although she loves her son, what she shows is that she loves her daughter-in-law. The old lady doesn't know anything and doesn't look at her heart, but she does things quite well, as if she would be a mother-in-law after giving birth to a son. Shao Hua took a mask. As a result, the old lady didn't know where she heard that she wanted to do body protection.

Then he rummaged through the boxes and found the surgical mask Zhang Fan took from the hospital. He couldn't find his hat. He found a thick plastic bag. After thinking for a long time, he got a raincoat. Originally, the old lady wanted Shaohua to go to her mother's house first and she came to disinfect it.

Shao Hua was funny and sweet at heart. She listened to the old lady's arrangement, because she felt that there seemed to be little difference between her mother-in-law and her mother, and her mother-in-law didn't nag herself. Even when she quarreled with Zhang Fan, her mother-in-law helped her fight with Zhang Fan like an old hen protecting her chicks.

Every time her mother-in-law comes home, Zhang Fan seems to be an outsider, while when her mother comes home, she seems to be an outsider, warm and harmonious. Both families are building this home with their hearts.

"Hey, enough heart!" Zhang Fansheng refrained from making fun of him. He took off his coat, trousers and shoes at the door and entered the room.

After looking at her son carefully, Zhang Fan said, "don't you have an office in the hospital? Aren't you the dean? You can't put more sets and one pair. Don't always toss about huazi. Such a big man, let us worry! "

In fact, what I said before is all smooth talk. The last sentence is the true portrayal of the old lady's heart these days. The underground Propaganda Department spread too much. What army, tank, the old lady didn't dare to go to a crowded place these days. She was deeply afraid of hearing any information that she couldn't accept.

Zhang Fan's father doesn't care. Since he and his father-in-law got into trouble, the old man now seems to be dead. He feels that the parents of his family are Zhang Fan now. It's like he can be a stable head of the family in the past. He even has to apply for pocket money. How can he feel so good about himself.

Most people in Northwest China have noodle stomachs. After cleaning up, Zhang Fan carries a large sea bowl to pull strips. This is made by my mother and Shaohua. Smooth noodles. Zhang Fan eats thin noodles. Thick noodles with chopsticks can bring a sense of fullness not only in his mouth, but also in his stomach.

Although rice can also be full, rice can not bring this sense of satisfaction. It is useless to eat less. Eating more is not a panic that will be satisfied.

"Slow down, I'm worried about what you eat." Listening to Zhang Fan eating noodles, Shaohua felt sorry for this bowl of noodles if he didn't improve his speed.

One mouthful of garlic and one mouthful of noodles are slightly spicy with the fragrance of noodles. Really, as a saying goes, northwest people will be involved by a piece of noodles wherever they go.

"Hanggai eats rice, beef and mutton every day. I'm almost beef and mutton."

"If you don't like eating beef and mutton, I don't think you're hungry. When we were in a hurry, we had a mouth of white flour..."

Lao Tzu Zhang Fan couldn't help saying that the old couple thought that Zhang Fan went to Hanggai to eat or drink. After all, he was not in the epidemic area. As a result, the old man's stomach began to bulge. Bai was worried and began to dislike beef and mutton.

But before she finished, Zhang Fan's mother said, "are you full? Go for a walk when you're full!"

The old man rolled his eyes and went out to play chess.

"The older you are, the more stubborn you are. It wasn't like this before. Now you have nothing to do with me. I didn't know before. Now I finally know why people say, stubborn old man, stubborn old man, that is to say, your father."

"Mom, you're still good. Dad, listen to you more!" Shaohua squinted and looked at Zhang Fan.

"All right, if you're careful, don't tell me. Give me another bowl of noodles." Zhang Fan ate a bowl is not enough, but also a bowl.

The old lady saw that her son could eat and drink, so she didn't get involved in the young couple.

When the old men and women left, Zhang Fan's eating speed slowed down. After all, it was already a

huge canopy, just like an umbrella for all people, which was spread out in the garden, and precious trees were everywhere. There are also various flower beds, peach blossom forest in spring, lotus flowers in small lakes in summer, chrysanthemums in autumn and various competing stamens in the flower bed in winter, so that the garden will never have only monotonous white.

Later, due to the rise of high-rise buildings, although it did not become the office space of the government, it was estimated that it would be better to have a rest because it lived in a place with the perfect combination of humanity and nature, so it became a special community of tea.

And there is also a guest house in the garden, which has never been open to the public.

There have been celebrities and corrupt officials in the garden, but people forget celebrities and remember corrupt officials. Therefore, the road in front of the garden is clearly the road of friendship. As a result, I don't know who gave me a nickname, and it has become the road of corruption in people's mouth.

On the left and right of the garden are either consulates or museums transformed by ancient buildings.

Even the stone lions at the door of others are more domineering than those at the door of the bank.

There are small villas built later in the garden. Although it is called the District, there are not many sets. There are no more than 30 sets, and the distance between each set is quite far. All kinds of ancient trees grow around the villa, just like small gardens. Small villas are hidden in the garden. If you don't look carefully, you really can't see that there are houses here.

Although the armed police are not on guard, cars without special passes can't get in. There is always a traffic police in front of the door to direct the traffic. Many people wonder that there is no cross on one road. Do you still use the traffic police to direct the traffic?

It can be said that here is the essence of the history and essence of tea.

Therefore, when Shaohua heard that he was going to move here, his worry was definitely better than surprise. She would rather live in an ordinary house than put Zhang Fan in danger.

If the earthen pot doesn't leave the well, the general will inevitably die in front of the battle. Before marriage, I hope my lover is a hero. After marriage, I have begun to prepare for pregnancy. I also think that my man should be ordinary as much as possible. It's best to live a little life of ordinary people. Really, this contradiction makes Shaohua uncomfortable. He absolutely regrets teaching his husband to find a marquis.

Shao Hua is not stupid. A doctor, even the dean of the third class in the region, why didn't he enter No. 1 hospital before? Now why can Zhang Fan. It's a great achievement to earn a lot of money. Something will happen in the future. Zhang fan can't go all out!

Really, every family has a difficult Scripture, and the surrogate woman wants to be far away.

But Zhang Fan doesn't care.

.....

Before long, a few days later, a leader from the Government Logistics Service Center specially told Zhang Fan about the move. In Zhang Fan's office, the polite leader looked at Zhang Fan very carefully.

Because he clearly cares about the vacant villas in yard 1. There are only eight or nine without ten. How could it fall on the head of the president of the municipal hospital. Even if the development of the municipal hospital has been the same in the past two years, isn't Ouyang the obvious leader of the municipal hospital!

His rank and position are doomed. He can only wonder.

Ouyang said nothing about Zhang Fan's move. She felt that Zhang Fan had been fooled. Zhang Fan should refuse, and then ask for an officially affirmed reputation. What is it to give the suite, even if the No. 1 hospital can be compared with the official affirmation?

For Zhang Fan, he prefers a suite.

Shaohua commanded the staff of the government logistics center to move. Zhang Fan's mother-in-law and mother-in-law helped sort it out. Zhang Fan's father-in-law and father-in-law said they were helping. In fact, most of them chatted again.

"Father in law, do you think he will be corrupt? How long has it been? He moved again. It's said that he is still a small villa. I can't sleep. "

Lao Tzu Zhang Fan is not a native and doesn't know much about local gossip, so he thinks this house was bought by Zhang Fan. Since Zhang Fan solved the problem of essential oil, Lao Tzu Zhang rarely asked about Zhang Fan. Even if you want to know, you will only ask Zhang Fan's mother.

"Hehe, Zhang Fan, I know that you have educated a good son. Corruption is not serious. This house is rewarded by the government. Just be at ease. When the children settle down in a few days, we'll go to the farm. The wine is good. It tastes absolutely good. Let's bake the stove, play chess and drink our own wine. Hey! "

"Yes, yes, children have their own blessings. We don't worry about it."

With the end of the epidemic in the tea vegetable area, Zhang Fan also moved into a new home. In the heavy snow, Zhang Fan of the tea vegetable hospital poured out the laboratory like water, and finally began to see the money back. To tell the truth, when Zhang Fan learned about it, he was happier than moving to a small villa.

Moving is just a pleasure, and seeing the return money in the laboratory is a sense of achievement, which is definitely different.

Chapter 1106

The couple didn't bother much about Zhang Fan's move this time. They originally wanted to say it after the new year, but the director of logistics was very attentive. They felt as if they felt guilty if they didn't move. To tell you the truth, it is estimated that the lobby manager of a five-star hotel can't reach this level of service.

Zhang Fan doesn't have to worry about moving, just under the command of Shaohua. I thought whether I needed to say hello to the new neighbors around. As a result, I didn't know until I went to the place. There is a long distance between neighbors. Under the big trees, I can hardly see other people.

There are no enthusiastic people like old ladies who come to inquire. It's like it's common for this place to move in and out. In fact, it was an accident that Zhang Fan was able to get the house. He made great contributions and was young, and it was said that he had something to do with the big man. There was also a top Chinese academician who was a teacher. Moreover, several other people who robbed the house had almost no power to anyone. For several reasons, Zhang Fan was finally suitable.

"I don't think this house is as good as a high-rise building with a higher floor." Shaohua was a little worried. Now when he came to see the house, he felt that Zhang Fan should not live.

This kind of honest villa is decorated with solid wood. Even the stairs on the second floor are made of wood. Although it is of high grade, it gives people a feeling of a little gloomy. And this kind of house, Zhang Fan, they only have the right of residence. Even if they want to decorate, they have to say hello to the logistics people of others.

.....

There is a wave of hardware trend in hospitals in China. In fact, it began around 2008, starting with computer office and the popularization of electronic medical records. Then the improvement of various large-scale instruments, although made in China, is always better than none.

For example, in many hospitals in the west, the biggest equipment in the early days was biochemical detection and X-ray films. Some county hospitals didn't even have biochemical instruments, such as X-ray films and ECG. Just like home appliances to the countryside, many county hospitals in Hula have CT and even MRI.

Although there was no significant change in 2008, the tea vegetable hospital completely got rid of several other hospitals in the city at the end of 2009 and the beginning of October. We can't say the hardware is hard. Especially after the cooperation with Marubeni, the first most advanced operating room in the Asia Pacific region was established, and the first respiratory ICU was established. It's different.

At that time, when the ICU for severe respiratory disease was established in the tea vegetable area, the top three hospitals of senior officials in niaoshi were crazy.

"Can they use it? Don't treat the respiratory intensive ICU as a special ward. "

"Why can't it be used? Haven't you heard that other people's respiratory doctors get up every morning to practice oral English?"

Anyway, there are a lot of sarcastic remarks, because I'm not convinced. Why don't our superior hospitals have them, and your subordinate hospitals have them? That is, this department is not paid by the government. If the government pays, it is estimated that several hospitals can play a dog brain with the government.

At that time, the hardware was very popular. Although many superior hospitals were not very optimistic, the doctors in the tea vegetable city hospital also took a breath. Later, Zhang Fan and Ouyang filled the world with silver.

The frontier high-ranking official hospitals are dying of envy. Just as those who made a fortune in their early years despised those who made a fortune later, it is a sentence: what's the use of money alone?

Indeed, sometimes money alone is not enough, but it's really not enough without money.

Zhang Fan and Ouyang take a lot of money to recruit people all over the world. In fact, they are under great pressure. External ridicule and local resistance.

Some say that with so much money, why not send local doctors abroad for further study. Can't you cultivate yourself.

Some said, with this money, why not take it out and build more buildings.

Others say that the tea vegetable hospital has so much money, why not take it out to support education.

It is estimated that the leader in charge of health, culture and Education said this.

In fact, some people are kind-hearted. They are deeply afraid that the people recruited by the tea vegetable city hospital are not familiar, or they can't take the money. Some people are simply envious, jealous and hate.

Fortunately, money is not financial. Ouyang and Zhang Fan withstood the pressure. That is, Zhang Fan and Ouyang combined, otherwise it would have been replaced to preside over the work.

Originally, Ouyang and Zhang Fan discussed a five-year plan, that is, five years of preparation for study, and then made achievements. In fact, one is more administrative and the other is more clinical. They are two knives in scientific research. Fortunately, this plan was not mentioned, otherwise they can laugh to death a group of scientific research dogs.

No, with the pace of winter, after the outbreak of influenza, the scientific research group led by Zhao Yanfang of the municipal hospital gave Zhang Fan a big gift.

Among the original doctors and masters, Zhao Yanfang was the most painstaking researcher of Zhang Fan and Ouyang. Others don't say how far they can go in the future, but Zhao Yanfang's family is already a number one figure in the youth medical circle.

And their teachers are almost the same generation as master Qiu of Zhang Fan's family. If you really want to talk about the generation, people and master Zhang fan are the same generation. Fortunately, the medical circle is not a Jianghu circle and doesn't pay much attention to this. Otherwise, Zhang Fan will shout when he sees people

The girl was hurt by love, and then Ouyang and Zhang Fan took advantage of the loophole. Otherwise, it is estimated that the current status of tea vegetable will not be invited.

On Monday, Zhang Fan stared at the manuscript handed over by Zhao Yanfang in his office.

"Publication compilation of influenza characteristics, prevention and control countermeasures and ten-year experience in tea vegetable area? This is from our hospital?" Zhang Fan asked incredulously.

"When I was looking through the case files of chasu in the past 30 years, I happened to encounter an influenza outbreak. Although I couldn't go to the front line, I always felt that something should be done. Then I looked at the literature in chasu area, which was almost blank. Then I took several young doctors from respiratory department, cardiology department and infectious department, The case files of the city hospital, several branch hospitals and county hospitals in recent ten years have been summarized. "

Zhao Yanfang said it lightly, and Zhang Fan was shocked.

If he didn't think this woman was easy to provoke, he wanted to ask: your compilation wouldn't be copied from Jiangsu and Zhejiang.

No wonder Zhang Fan was surprised.

If this compilation is extended, it can become a medical guide for anti influenza. What is a guide is to divide viruses and patients according to experience and data. For example, runny nose and cough are not only virus 1, but also virus 2.

It looks simple, but it's quite difficult. First, a master should take the lead, then there should be case files, and most importantly, there should be many experienced doctors to identify.

In fact, there are only a few viruses that break out every year, unless you encounter a special virus. And, most importantly, this aggregation is cumbersome. Not to mention the tea vegetable region, there are not many provinces in the northwest that take the lead in doing this, and it is often only rich provinces that do this.

Such as Jiangsu and Zhejiang, such as Yangcheng. After these cities have templates, the Ministry of health will lead the slow development in various provinces.

Therefore, people say that the tea vegetable area is almost blank, which is polite, because no one has done this before in the tea vegetable area.

This time, Zhao Yanfang took the lead. Although the consultation period is very good, it is shorter and the area is narrower, it can almost become the compass for medical treatment and anti influenza in tea areas in the future. Especially in remote areas, this is the existence of sunflower scriptures.

Zhang Fan is not surprised.

"How long did you use it?" Zhang Fan swallowed and spit.

"Not long, just two weeks."

Zhao Yanfang said to Zhang Fan calmly.

"Two weeks? I don't have enough time to turn over the medical records. "

"Well, it's certainly not enough, but we all work overtime. This is an overtime schedule. If you want to, give some subsidies!"

Zhang Fan took the document in his hand and read it word by word from beginning to end.

The more you look, the happier you are.

"Damn it, I finally copied it for a while. This is a baby! " Although this kind of paper can't even be published in the core journals, it's too effective for the local tea plant.

The northwest city is so awesome that it can come up with a local influenza virus Guide.

"Dr. Zhao has worked hard. Aren't you a surgeon? How can you be good at epidemics? " Zhang Fan smiled and asked Zhao Yanfang.

"It's just a summary of more than ten years. There's nothing good or bad."

Well, what Zhao Yanfang said was as easy as drinking water and eating.

Really, experts know whether they have it or not.

.....

"From the environmental background to the core research direction, and finally to the treatment suggestions, it's great, it's great. Unexpected, really unexpected. Our tea vegetable area finally has its own influenza guidelines. Grant money, Zhang Yuan, you must grant money to others to continue this research. It would be best if it could be extended to the whole frontier.

I'm going to the government now. This year's scientific and technological innovation award can't be awarded to our hospital. "

Ouyang couldn't close his mouth.

"Who says we only have money, we not only have money, but also have the ability. It will be sent directly to several bird markets by senior official hospitals. Let them see, let them see you. We are not only rich!"

.....

Good things continued. Li Cunhou, the golden mean, finally returned to China from abroad. He didn't stay much in the capital and killed tea vegetable directly.

Not only Professor Li Cunhou came to chasu, but also the top directors of several major burn departments in China.

For a time, the small cities in Northwest China were a little hot and red in the cold season, especially in the burn medical circle, many people watched.

Because the materials studied by Lao Li finally began to enter the final evaluation stage. If this stage is completed perfectly, it can be said that this new material can be used in a wide range of clinical applications. Therefore, Lao Li brought people directly to Zhang Fan.

At this critical moment, Lao Li didn't expect anyone, so he trusted Zhang Fan.

Moreover, Lao Li is actually very worried now, because several of his division brothers in Jinmao also have similar products.

Chapter 1107

People are different, and the pursuit of medical treatment is to find the same in different, and then find the difference in the same. It sounds like eating too much. For example, genetic engineering, to be rough, is actually looking for the same, and the confirmation engineering is looking for different. And these two projects are still super big projects.

Of course, at present, the tea vegetable hospital can't afford to eat like this. Compared with the top Chinese digital hospital and the golden mean hospital, the tea vegetable hospital is still in the state of no place to eat. Zhang Fan discusses with Ouyang in the hospital how to receive Lao Li.

When Lao Li first came to the tea plant, Ouyang asked the government to directly package the railway station, just like the handsome man on TV in the late Qing Dynasty and the early Republic of China. Later, the tea plant hospital, especially the dermatology department led by Zhang Fan, became more and more important in Lao Li's experiment, Ouyang never moved any other thoughts, because she knew that Lao Li couldn't fly away.

Sure enough, as like as two peas, now they are abroad, especially the burn medical circle and even the beauty circle. They can come back to the first stop on the first trip to China. This is exactly the same as Ouyang predicted. Although the old lady doesn't know much about the things they study now, she knows people's hearts.

"I heard that people from the Ministry of health are coming this time?" Ouyang rarely asks Zhang Fan to talk about work in Zhang Fan's office. In the past, no matter what happened, it was carried out in Ouyang's office. This is mainly because Zhang Fan has been busy recently.

After all, the tea vegetable area is a city dominated by agriculture and animal husbandry. It has just been busy with influenza and hand, foot and mouth disease. Now it has ushered in the tide of medical treatment for agriculture and animal husbandry. No matter the tea vegetable area is like this, it is almost the same in other surrounding areas.

Therefore, the wave after wave of medical treatment reached its peak at this time. For example, if the heart is uncomfortable, many farmers will insist on prescribing some medicine casually in the county hospital, and then come to the municipal hospital system for treatment after the grain is harvested and sold.

Herdsmen are the same. They drive their herds from the grassland in summer to the grassland in winter. Only after they sell what should be sold will they come to the tea vegetable city hospital to see a doctor. So at this time, the busy hospital is definitely different from the busy flu period.

The busy period of influenza requires three axes. All departments of the hospital are serving the fight against influenza. The fashionable point is that the main contradiction is influenza.

Now, all departments are entering the peak period of patients, and no one is the main department. Even cutting bag a skin is a small peak at this time. There are children holding disposable paper cups all over the corridor. That is to say, many children on the side of tea vegetarians have been circumcised to divert some, otherwise more.

In the corridor of the hospital, under the fumigation heating, the taste has long changed. Powerful disinfectant can't beat other flavors in this season. For example, herdsmen who come down from high mountains can't feel it on the grassland or in the breeze.

But in a closed and warm environment, it's a little hot eyes. It's really hot eyes. Beef and mutton are mixed with butter, leather robes and wool, and mixed with the taste of various foods. To be honest, doctors who come to the ward round in the morning must take a deep breath and get used to it.

"Are there many operations?" Ouyang looked at Zhang Fan holding a thick stack of operation signature books, with a slightly gloating tone. Because in the past, Zhang Fan would throw these things to Ouyang from time to time. Now as long as Zhang Fan dares to throw them, Ouyang dares not to come to work.

"Yes, the operating room is a little out of turn recently. Lao Li is coming soon, too. Dean, please... "What Zhang Fan means is, or you can't stand with your hands in your pockets and give you some business.

Before Zhang Fan finished, Ouyang raised his hand and looked at the old plum blossom watch with unknown age on his wrist. "I'll have a meeting in the Health Bureau later, and I'll leave right away. Let's make a long story short. First tell us how to entertain Professor Li. "

Ouyang now makes it clear that he will not interfere in the specific work of the municipal hospital. In the past, he was able to do some work. Since Zhang Fan came out of the flu with his team, Ouyang now

signs on the payroll, regardless of everything else.

It's another way to take money and don't work.

"Oh, all right!" Zhang Fan curled his mouth, but still bowed his head. It's too difficult. This time, Lao Li took several experts from the Ministry of health and other hospitals to make the final evaluation. "

"Oh! What do you say, can our hospital participate in future manufacturing?" Like a thief, the old lady leaned slightly against Zhang Fan's desk and whispered, deeply afraid of being heard by others.

Zhang Fan put down his signature pen, raised his head and smiled at the wrinkled old lady. "You have to do this! "

"Hey, we don't even have a foundation here. Why don't you talk about setting up a manufacturing enterprise here? "

Ouyang, who originally said he would leave immediately and was about to go to the meeting, stayed in Zhang Fan's office for most of the day. He not only told Zhang Fan about Professor Li Cunhou, but also kept mocking the decoration of Zhang Fan's office.

"Why don't you even have some green plants? I'll ask someone to bring you some pots of cactus I raised later. It's refreshing."

Zhang Fan thought, your cactus has even lost its thorn. It's good to give it away!

The old lady is really boring, but it's hard to tell the truth. She felt uncomfortable. Of course, Zhang Fan couldn't be too comfortable, so she talked a lot. Zhang Fan's head was big and couldn't show it.

Not only can not show, but also agree. Zhang Fan wants to call Chen Sheng. On weekdays, Chen Sheng can run ten times a day without calling, but today it's been so long that Chen Sheng's face hasn't been exposed. This guy is also a talent.

Zhang Fan is discussing how to share the stolen goods with Lao Li, and Lao Li brought several special patients when he came.

.....

Ouyang stayed in Zhang Fan's office all morning. Zhang Fan felt much more tired this morning than in the past. In a word from Zhang Fan's heart, it's too difficult to serve.

After finishing work, Zhu Bing called to give Zhang Fan a warm pot. This term is also limited to the Chinese group of tea vegetarians. After moving to a new house, the host will invite relatives and friends to come to have a meal. But later it became a little different. It was often greeted outside the hotel, and rarely done at home.

This relationship is sometimes really a burden. In the first few years of Zhang Fan's hometown, the price of human relations was very cheap. For example, when he married his daughter-in-law at home, a person in Chuang Tzu would take 10 yuan and 20 yuan, and he could have a beautiful meal. Sometimes not only himself, but also several children.

Therefore, in the early years, Zhang Fan's marriage and funeral in his hometown was a great burden in entertaining guests.

There is such a person in Zhang Fan's hometown. No matter who's nearby, he will attend the wedding and funeral. Anyway, it's worthwhile to eat chicken, duck and fish for \$5 and \$10.

People around him really hated his operation, but they couldn't say it. And this man is single, and others can't help him. One year, he built a pigsty. Well, the people in the village finally caught the chance.

He went to his house with firecrackers and \$5 and \$10. He had to eat him. You can imagine how hateful this man is.

Zhu Bing suggested that Zhang Fan thought about it. He thought it would be good to get together with his friends. When he got home, he discussed with Shaohua who to invite.

To tell the truth, there is a good wife in the family, and the husband does not suffer misfortune. Although it is a little feudal, it is quite reasonable.

"Although the house is a small villa, after all, we don't have property rights. It's as if you brought me to see the world and enjoy what a small building is. If we have a chance, we'd better go back to live in a high-rise building. Even if it's a hot pot, it's inconvenient to go in and out. I think I'll just ask some of my best friends to come and recognize the door. What do you say? "

If Ouyang speaks, the eternal rhetorical question begins, and Shaohua follows the rhythm of his hair. Zhang Fan is as comfortable in Shaohua's hands as a little donkey.

Moreover, Shaohua doesn't want to live in this No. 1 hospital. If the government hadn't urged Shaohua to take care of Zhang Fan's dignity in front of the government, she wouldn't have moved at all.

Zhang Fan was right when he thought about it.

The original hotpot has become a simple door. Under Shao Hua's deliberately low-key, several friends brought a few pots of green plants to the door. No one else knew that Zhang Fan had moved.

Zhu Bing and his wife went to the door with their children, Jia SuYue and Wang Yanan.

"I'll go. No wonder you can be a leader. It's too low-key." Two men were chatting on the small balcony. Zhu Bing wanted to smoke and Zhang Fan accompanied him to blow on the balcony.

"It was all Shaohua's idea." Zhang Fan tells the truth.

"Hey, hey, I understand. When leaders shirk, they usually say so." Zhu Bing squeezed his eyes!

Understand a Mao, to tell the truth, how can no one believe it? Zhang Fan is also lazy to explain whether he likes to believe it or not.

In Zhu Bing's eyes, how could Shaohua have such a high political thought? His father-in-law praised him once and said that Zhang Fan was too intelligent and a person who did great things.

In fact, that's not the case at all. It's just like when people are rich and wear fake checkmarks, they are all real Nike.

If the plug-in is Zhang Fan's accelerator, Shaohua is the car's brake. Plug in determines how fast Zhang fan can run, and Shaohua virtually represents how far Zhang fan can go.

Wang Yanan scoffed at Zhang Fan's house. "Zhang Fan has been like an old man in his unit. He trains East and West. This house makes Zhang Fan more like an old man. Huazi, you should pay attention not to let him really become an old man."

Lu Renjia is envious. She knows too well what the house stands for. "Hehe, Ya Nan, don't say that. In terms of tea vegetable areas, Zhang Fan is estimated to be the youngest in Zhang Fan's level. "

Jia SuYue looked at the small villa and the man who was still dark outside. Now she finally knew a word. It was far away.

.....

The next day, Zhang Fan, Lao Chen and the director of the burn department drove 120 to the railway station. Because this is the patient collected in the bird market, Li Cunhou and his colleagues did not come by plane, but took the train from the bird market to the bird market.

Chapter 1108

Lao Li hasn't arrived yet. There's something wrong with the gynecology department of the tea vegetable city hospital. To tell the truth, ordinary people can't touch the accidents in the hospital in a year.

For example, the two brothers drink together, perhaps because they support the elderly, or because of the division of property. The two drunken brothers, the brother broke his brother's head. Then my brother and daughter-in-law quit. How dare you break my husband's head? The brother-in-law and daughter-in-law broke the brother-in-law's head, and then the sister-in-law was unhappy, and then

broke the sister-in-law's head.

Then, the broken heads of a family were sent to the hospital by the police. When they arrived at the hospital, they were like a group of cockfighting with broken heads. One by one, their heads were red. This is not nonsense. Yes, there have been cases. While sewing his head, the doctor sighed that he wanted to see the world,

There are also several old people who love dancing. I don't know whether they have a quarrel when they are young or when they are old, they are estranged because of the aunt in the same square. Several people get together and fight. They are hundreds of years old, but their skills are still extraordinary.

I don't know why. Maybe it's because the aunts were present. One of the old men's ears was bitten off by another old man. The old man with open teeth and mouth was so fierce. I definitely have the posture of talking about being a teenager crazy.

The old man who was bitten off his ear, just like one ear on TV, covered his ear and wanted to take out his ear from each other's mouth!

And gynecological accidents are more common. On Monday morning, as soon as Zhang Fan arrived at the door of the surgery building, he heard the creaking cry of the gynecology department next door. Zhang Fan hurried over to have a look. It turned out that his father beat his daughter.

It's a fight. In fact, it's holding the girl's arm and pushing around.

There are people who like to watch the excitement. In the early morning, a group of masters with steamed buns, steamed bread and milk tea don't hurry to deliver rice to the big belly woman, but stand here to watch the excitement. It's also hearty enough.

It was already cold. A group of people guarded the door of the building. It was inconvenient to go in and out. Besides, the hospital is not a place to quarrel and hit people.

"What are you doing! Let go. " Zhang Fan shouted angrily, because he saw many little nurses watching.

Although Zhang Fan didn't wear a white coat, his momentum was cultivated with the change of his

position. Everyone should do what they should do. In fact, when the little nurse heard Zhang Fan shout, she said when she was running: run, the dean is coming!

The excitement spread, but the middle-aged man didn't stop, scolded dirty words, and still didn't let go under his hands. Zhang Fan hurried slowly. Before he came to him, he saw the young girl covering her stomach and falling down pale.

When I hesitated a little, what I said was not like what I said: "you are like your mother, don't pretend for me, get up."

Zhang Fan looked at it. Although he was not sure, he felt that the girl was not pretending, because the girl was pale and didn't say anything. The pain was too obvious.

Step by step and take a closer look.

"Come on, send it to the operating room. It's bleeding!" The doctor nearby listened to Zhang Fan's cry. Everyone quickly came to help. Push the flat car, press the elevator and press the elevator.

Just got into the elevator, Chen Sheng called.

"Zhang Yuan, where are you? Someone from the gynecology department wants to jump!" Zhang Fan's scalp was numb.

It turned out that it was the bleeding girl's mother who wanted to jump off the building. Really, everything comes together.

The girl goes to a local vocational school. Sixteen or seventeen years old, she can grow tall and big, and her development is particularly mature. It is said that she has more than twenty, and others believe it. It can be said that in the eyes of men, it is the feeling of Gao Baifeng, that is, the place where there is no debt.

The girl's study was average, and the school was chaotic, so something happened.

Many people think that spanking will cry, which means they haven't grown up, and spanking will be wet, which means maturity. In fact, maturity not only represents your secondary sexual characteristics, but also maturity. Maturity is that the brain is no longer a decoration.

The chaos of such students in such schools is sometimes unimaginable.

It's unimaginable that hormones in the body are managed out of control. The dirty and messy B & B outside the school is like their ocean of joy. Say big or small, say small or not, everything is like children's play. What should be understood is not understood, and what should not be understood is fully understood.

You and I are good today, and I will be good with her tomorrow. Moreover, the most important thing is that the street swiftness in society pretend to be the big brother of the society, sneak around here, provoke the girls to fight, but also take the girls to the so-called world.

A few bottles of lethal beer go down, which is called seeing the world. It's all good. Some even take hemp cigarettes and drink small blue pills. A few puffs of hemp smoke or small blue pills will flourish in society.

This girl is also one of them. Unfortunately, she is pregnant, but she doesn't know. When having a stomachache in class, the teacher asked several students to take her to the hospital and inform her parents. When the parents arrived at the hospital, it was like a bolt from the blue, and the girl was pregnant.

Then the girl didn't know who was pregnant.

The child's father was so angry that he slapped his wife in the face of the doctor and said that the child learned all this from her mother. The girl's mother is a very fashionable middle-aged woman. Blindfolded, she asked her husband to slap her in the face in front of the female doctor and said that she has a bad style.

This is a little too much, even surprised and angry, but also endless lost people's child mother, the more she thought, the more she couldn't figure it out, and then stumbled into the wrong elevator and went up to the top floor. Because of the heavy snow on tea, the snow on the roof had to be cleared, so the cleaner didn't close the small door on the roof. The woman with shame and anger went up the roof, and she was still standing on the side of the building.

The long red coat, like the cloak of ancient chivalry, hunted on the roof.

I don't know whether she jumped or not. Anyway, she scared the cleaner half to death.

For a time, there was a mess in the hospital. Chen Sheng organized people to disperse the onlookers and call the police.

Zhang fan can't care, because the girl in front of him is bleeding, so he must operate at the first time, or die here every minute. Lao Chen looked up and was afraid that the female Xia couldn't figure out how to fly down. At the same time, he was busy preventing the onlookers from coming.

"What are you looking at? What should you do?" He was really worried that when he came around to watch the excitement, a Xiake who flew down from above accidentally killed him.

The girl in Zhang Fan's hand doesn't have to guess. Yes, the young girl is ectopic pregnancy, and she is still a ruptured ectopic pregnancy. Zhang Fan and some helpful doctors pushed the girl to the operating room. While running, they asked the gynecologist to prepare the blood for the blood bank.

No matter how many times of rescue, in case of massive bleeding in ectopic pregnancy, the doctor is not afraid, indicating that the doctor is not a gynecologist.

Chapter 1109

The flat car was pushed like a small plane by the doctors in the corridor. If the quality of hospital things is not good, they won't take a few days. For example, the mobile hospital bed, which costs thousands of yuan and tens of thousands of yuan, seems to have similar functions.

But this thing can't be seen at ordinary times. It's different at the critical moment. Earlier, I didn't know whether it was the government's greeting or the dean in charge of logistics who slept with other people's salesmen. Tea vegetable hospital secretly entered a number of high imitation mobile beds that seemed to be produced in Jiangsu and Zhejiang.

The bed is as like as two peas in the same place as the one in the same body. Even the color is better than that of the snail. It is like the conscience of the family, and the price is not even 1/3 of that of sk.

As a result, a fat man of more than 300 kg was pushed to the operating room by five or six nurses because of a cerebral hemorrhage. I don't know whether the patient was too fat or the nurses were too fast under their feet. The Vientiane wheel of the moving hospital bed was folded in the corridor at that time. Think about it. When the wheel of the bed was folded, it was a bit like a general kneeling in front of the battle.

The fat man almost fell down at that time. Since then, the nurses in the tea vegetable hospital no longer dare to use or use the mobile beds. It's too chicken to joke. If the patient fell to the ground at that time, it was really mud falling on the crotch. It's impossible to say. A proper medical accident can't run away.

Zhang Fan and several nurses pushed the pale girl towards the operation. There was no trace of blood on the girl's face in the hospital bed. If it's not a little painful, it's really like it's dead and not buried.

Where is the vitality of young people. Really, when youth is spent on the so-called fashion or something, it doesn't matter now. Maybe she is complacent. It won't be long. She will definitely regret it five years later. When I meet the man I really love, I can't explain the scar on the belly of my clothes.

This kind of operation is a serious emergency operation. Every few seconds, the difficulty of rescue increases by several gradients. Every few minutes every night, the patient needs to input hundreds of CC

more blood. Whether it's the doctors' gallop or improving the speed, there is only one purpose to save people.

Doctors at this time are the most selfless. He won't worry about who the patient is, and he doesn't care whether the girl is unmarried or married. There is absolutely no news interview. The reporter asked the doctor if he was noble at that time. At this time, the doctor's mind is blank. Take off your white coat. In fact, doctors are also ordinary people. At most, their work is a little special.

However, this kind of operation is not easy to rescue. If the nerve is the circuit of the human body and the blood vessel is the pipeline of the human body, these hollow organs are the electrical appliances inside the human body.

To repair a computer, you have to take it apart to know where it is bad. In fact, the reason is the same for the massive bleeding of human organs.

For example, if this ectopic pregnancy is broken, the doctor just knows where the tube is broken, but the doctor can only judge about it.

Into the operating room, LV Shuyan with the little fat girl of the Department of gynecology has been on standby. Striking iron still needs to be hard. This sentence is incisively and vividly reflected in the hospital. Really, I don't know who summed up this. I'm sure I can be a senior consultant.

LV Shuyan was the first master of gynecology. When she first came to the hospital, although the doctors in the Department were very polite, there was a master LV on the left and a teacher LV on the right, but everyone didn't take it seriously. Especially after the Master arrived at the hospital, the hospital gave a set of resettlement room and a resettlement fee of 100000 yuan, which made some undergraduate attending doctors boil in their stomachs in the early years.

Where there are people, there are rivers and lakes, especially in the circle of cultural people. Especially after LV Shuyan had such a little meaning to Zhang Fan, many people said a lot of gossip.

LV Shuyan is also a character. She didn't get close to this group of people and didn't complain about herself, but tried hard with her teeth. One year, eating and living in the Department, it can be said that the girl is really fighting for one breath.

Boyfriends can break up, secret lovers can marry others, and only the sweat time will not disappoint you. Of course, the sun in the three volt days doesn't count.

In one year, LV Shuyan, who was already highly educated, had a foothold in gynecology. There were many female gynaecologists, but these female doctors were not all future neighborhood committee

aunts, and there were many technical masters, such as several directors of gynecology. These people worked hard.

When LV Shuyan's efforts were seen by the directors, LV Shuyan was distressed by the directors. First, the chief director of Obstetrics and Gynecology personally led the group of LV Shuyan. Then, when Zhang Fan started the selection of the general inpatient, LV Shuyan became the general inpatient of Obstetrics and gynecology.

The rapid development of technology is visible to the naked eye. If the flower of Cardiology is the sitting red stick of Cardiology, Ma Yichen is the new generation of red stick of hepatobiliary department, while orthopedics is Wang Yanan and Xu Xian. Urology department is now pushed out by Li Xiong. It's he Xinyi

In obstetrics and Gynecology, LV Shuyan is now the main new generation. So in the hospital, being single can't be provoked. Originally, I didn't see much in my heart. A group of leaders of Shanglv Shuyan have nothing to say now. People eat and drink in the hospital all year. This kind of effort is frightening.

These young people in the hospital are the existence of the great devil.

Therefore, many gynecological affairs are Lv Shuyan has the final say. Of course, many emergency operations were also performed by LV Shuya.

When Zhang Fan made the gynecology ready, LV Shuya rushed to the operating room with several inpatients in her group at the first time.

"What's going on." LV Shuyan asked Zhang Fan who had just changed his clothes.

"Bleeding after ectopic pregnancy, shock state, blood pressure can not be measured, and now surgery is necessary." While wearing a mask and hat, Zhang Fan explained LV Shuyan's condition.

If Zhang fan can roll his eyes at Jia SuYue when he goes up to Jia SuYue, but when he goes up to LV Shuyan, Zhang Fan clearly has no guilt, but it seems that he has done something to abandon empathy.

Now Zhang fan can finally understand why director Li of the urology department is subdued in front of Ouyang. Don't look at women as if they are vulnerable in front of men, but once this man speaks morally and rationally, men are actually vulnerable groups.

"You want to go too?" LV Shuyan asked when she turned and left.

"Well, I'm the first diagnosis, and I have surgery!" Zhang Fan wants to say something, but he doesn't seem quite right.

LV Shuyan's feeling about Zhang Fan now is, what's the cow force? My mother is also very powerful now.

The speed of disinfection and towel laying is very fast. The surgeons had no time to brush their hands because the patients didn't give them time to brush their hands. Conventional hand brushing, three sections and three times, is very kind. It's too late. Just put your arms in the disinfectant.

The hands of surgeons, especially the elderly surgeons, are like tree branches. Because they brush their hands frequently all the year round, their hands have been degreased. It's like Xue Fei doesn't put Vaseline on his hands when he touches his wife at night. Her wife won't let Xue Fei start.

In his wife's words, it hurts after you touch my flesh.

The two barrels are as thin as the tall glass bottles used to buy beer in summer. Zhang Fan and LV Shuya are bent in a row. Their hands are soaked in the barrel with slightly pungent disinfectant. Zhang Fan's head is twisted on the left and LV Shuyan is twisted on the right.

Like an enemy.

Soaked his hands, as if his arms and elbows had been marinated once, with a slight smell of chemicals. This kind of operation, in short, is to open the stomach, and then sew up the ruptured blood vessels. If there is no way to sew up, we can only cut off the ruptured ovaries and fallopian tubes.

"Knife!"

"Give it to me!"

They want a knife at the same time. The instrument nurse took the knife and was stunned. She didn't know who to give it to. Zhang Fan has no ink, "to director Lu!"

This is a gnashing of teeth. All the little guilt before the operation is gone.

LV Shuyan wasn't polite at all. She didn't lift her eyelids.

After receiving the knife, director Lu in Zhang Fan's mouth quickly opened his stomach. Zhang Fan was a help. The two have cooperated many times. They have a tacit understanding and know how to make each other more comfortable.

The snow-white gauze was stained with blood one by one.

When the abdominal cavity is opened, coagulated blood clots and non coagulated blood fill the whole abdominal cavity. The attractor is like drinking red jujube milk tea, constantly sucking the blood in the abdominal cavity.

"Come on, find the bleeding point." Zhang Fan is a little worried.

If the bleeding such as trauma is obvious, the bleeding of abdominal organs is hidden. Because of

traumatic bleeding, where the bleeding can be seen with the naked eye, and the bleeding of abdominal organs may not be found at the first time.

"Zhang Yuan, stop bleeding quickly, or you'll have heart failure." The anesthesiologist was worried.

What is the female reproductive system like? In fact, it is similar to the famous person hanging on the cross.

The body is the uterus, the two arms are the fallopian tubes, and the two hands are the ovaries.

When the gold enters, hundreds of millions of gold, like the army, first remains in the body. This part of the gold has the effect of killing other allogeneic gold, that is, the gold is armed with a bomb. If other people's gold enters these days, The gold in the body will fight with the latecomers like a blocking force.

Therefore, it is better to start first and wait for work with ease. In fact, human reproduction in ancient times is a living art of war.

The most dynamic part is from the body to the two arms, and then to the hands. If they can get eggs, they will get married here. Of course, this is not driving.

But many times, some gold is not energetic enough. It can't swim. It can't swim. It can only stay here in its arms. The egg is very anxious. I've been waiting for a long time and you don't come. Where did I go to find you.

Then they got married here.

But the arm is too thin. When the gold and eggs grow slowly, this place will not be enough, and then the arm will be broken.

In other words, women's development is not good, for example, they are too young, the road from body to hand is difficult, and gold can't pass.

Therefore, from the body to the arm, these places are places where bleeding may occur after ectopic pregnancy. It is conceivable that when doctors open the abdomen, they may not be able to find the bleeding point at the first time.

When LV Shuyan wanted to find the bleeding point, Zhang Fan stuffed it into the blood nest, and then without speaking, he grabbed an organ directly.

When LV Shuyan was about to speak, the anesthesiologist said, "blood pressure is rising!"

What is experience is familiarity, which is experience.

Chapter 1110

Trouble in life begins when you can read, and truth begins when you cherish the present. If the former sentence is about the desire for life, then the latter sentence is about good health in the eyes of doctors. Often many people mature in a short time, almost all because of a serious illness. Of course, lovesickness is also a disease, but there is no medicine to cure. There are many diseases without medicine in clinic! It's not bad.

How did LV Shuyan's maturity come into being? Zhang Fan didn't want to look at it, let alone inquire. Don't provoke, Zhang Fan thinks it's the best way.

But on the operating table, Zhang Fan's professional ethics is still very high. If a woman with a big belly stood in front of Zhang Fan, let Zhang Fan and LV Shuyan judge how many months she was pregnant. Zhang Fan is definitely not the opponent of Dr. Lv.

What, one horizontal finger on the navel is five months, and two horizontal fingers under the xiphoid is about to give birth. This thing still needs to be checked more and touch the big belly woman more before it can be used freely. Zhang Fan knows the data very well, but apart from nothing, Zhang Fan has never used it on Shaohua. You say that even the model is not a big belly woman. Can Zhang Fan be proficient.

But if you judge the bleeding point on the operating table, especially when you can't see the operation field clearly, LV Shuyan is not Zhang Fan's opponent. Whether it is the bleeding of hollow organs or the bleeding of substantive * * officials, Zhang Fan's proficiency is not comparable to that of LV Shuyan.

Doctors who have accumulated a lot are sometimes very nervous. For example, the fallopian tube has different thickness along the way, so it is often easy to break in thin places, that is, the so-called breaking probability. When it comes to probability, the uncertainty is particularly large.

However, when LV Shuyan cut open the abdominal cavity and wanted to check the easiest bleeding according to the probability, Zhang Fan had found that there was bleeding at the bottom of the fallopian tube. There was no reason, no evidence, but a voice in his mind.

This is the so-called intuition, the intuition accumulated by a lot of experience. It is not scientific, but many elderly doctors have this intuition, and often this intuition is no worse than advanced scientific

instruments.

When LV Shuyan couldn't be sure, sweat beads began to appear on the refreshing forehead. Zhang Fan shot and stuffed it into his abdominal cavity, just like a naked child fishing in the mud. It was like nonsense, but he hit it with one blow.

"The blood pressure is rising!" The tone of the anesthesiologist was cheerful.

The difficulty of this operation is not suture or repair. Its difficulty is how to find bleeding before shock and heart failure.

There is no way to practice this technology. We can only rely on personal talent and personal consciousness. Really, sometimes this thing is like a superstition. In the mouth of surgeons, personal consciousness is often mentioned.

The director will point to a young doctor and say, "you boy, if you didn't think you had a good consciousness, you would have gone to the internal medicine department."

But what the hell is this. There are 100 kinds of consciousness in the eyes of 100 directors. The only thing young doctors can ensure is their own efforts and perseverance.

When Zhang Fan pinched the oviduct that vomited blood, LV Shuyan looked up and gave Zhang Fan a deep look. She remembered when they were in the same group of gynecology and obstetrics, when this dark guy was obviously in orthopedics, but gynecological surgery was better than her master of gynecology.

At that time, he cried when he was sad. The deputy director said, work hard, work hard again. After a year or two, he would look up when he looked at himself. LV Shuyan really worked hard. In a year, she clenched her teeth in the operating room.

Today, at the beginning of the operation, the dark guy opposite was surprised by his yanlisuo technique and sophisticated rhythm. If it weren't for the emergency operation, LV Shuya wanted to say: I'm powerful now!

However, after entering the abdominal cavity, Zhang Fan's startled grasp was the same as the dragon's grasp caught LV Shuyan's death, and her tears swirled in her eyes.

It hurts. It really hurts. It hurts my efforts over the past year and my hard work over the past year.

In the past, LV Shuyan saw that Zhang Fan was a little handsome. Now, LV Shuyan thinks this guy is so hateful. It's a disgusting feeling.

When the bleeding point was grasped, the difficulty of the operation was reduced from S to B. It's a little

more difficult than appendiceal surgery. It's almost in the middle of gallbladder surgery.

It's impossible to cry. LV Shuyan can't cry in front of Zhang Fan in her life, but her eyes are sour and wet.

"Director Lu mended it quickly!" Zhang Fan is still a little proud. It is estimated that only their director can catch tea vegetable obstetrics and gynecology.

LV Shuyan didn't lift her head and began to repair it directly.

"Wow! Zhang Yuan is so handsome. It's so handsome to stop bleeding. " I don't know whether to really praise Zhang Fan or flatter him. The little fat doctor brought by LV Shuyan exaggerates to Zhang Fan.

"Tie a knot. You can't even tie a knot. Do you still have time to talk?" LV Shuyan looked at the fat girl.

The fat doctor thought, "can't you stay in obstetrics and gynecology in the future? I'm not going to pediatrics! "

Looking at LV Shuyan and Zhang Fan, the fat girl's heart was broken.

This is the difference between work units and schools. No one will bear for you. There is no absolute right or wrong here. You often don't know how you were thrown out. In fact, they are accumulated bit by bit on weekdays.

There are many ways to succeed, including those who are strong in parents, those who are strong in themselves, and those who are lucky, but most of the people who fail are bad mouthed. There is a saying that it takes three years to learn to speak and 30 years to learn to shut up.

The rest of the operation is quite fast. Zhang Fan's operation style is not good. He was originally a good help. As a result, he became the main knife. Zhang Fan's startling grasp directly disrupted LV Shuyan's rhythm, and Zhang Fan took the rhythm in a daze.

The bystander's anesthesiologist saw it clearly, so when the operation was almost over, he asked: "this hospital, Dr. LV, whose name is the main knife written!"

At this question, LV Shuyan was also alert. She raised her head and said, "write about him!"

"Good!" The anesthesiologist nodded indifferently.

Zhang Fan said politely, "Hey, don't write about me. Dr. Lu did all the operations. Write about me. She doesn't have a 50 yuan main knife subsidy. Write about her. Well, yes, Dr. Lu has made rapid progress!"

Originally, LV Shuyan, who was not satisfied, raised her head and stared at Zhang Fan, "I'm for 50 yuan. I don't make progress. I want you to tell me!" My teeth are broken.

After staring for a long time, LV Shuyan said angrily, "how does Shaohua in your family like you. You should be single all your life! "

"?" What's the matter with this woman? I praise her!

Chapter 1111

After the operation in the morning, Zhang Fan met LV Shuyan at the door of the operating room. One morning, Zhang Fan's head was big. The parents of the girl looking for life and death asked the police and firefighters to carry it down from the roof.

In the hospital yard, on the third floor and the third floor, people around the downstairs were watching the women jumping off the building on the roof. Among the onlookers, there were those with broken heads and white mesh bags, and those with gauze with one eye. They looked at them with their head tilted with another eye. They didn't know whether he was dizzy or not.

There are also those who can't breathe easily in a wheelchair, but they are still carrying an oxygen bag. They are deeply afraid of delaying their watching. There are also those who wear plaster like Golden Rooster independence, and even those who drink Soybean milk while eating steamed stuffed buns.

Police cars and fire engines are filling up the hospital yard.

To tell you the truth, the section chief in charge of the cleaning group was scared soft. As a result, before the firemen went up, the girl's mother came down quickly. Maybe the wind on the roof was too strong and too cold!

If Ouyang hadn't called the government, the reporters would have come.

.....

At the door of the operating room, LV Shuyan rolled her eyes and looked at Zhang Fan. The operation in the morning was very stressful for LV Shuyan, but now she is not the same as before and will no longer hide in the dressing room to wipe her tears.

However, being able to bear the pressure does not mean that you are not angry. Seeing the dark Zhang Fan and a group of old men smiling better than Huadu behind him, LV Shuyan raised her anger inexplicably.

Some people are like this. When they look at it at ordinary times, it's as white and cold as a freezer. LV Shuyan is. Now people are pursued by idle people in the hospital and become a new generation of cold beauty in the hospital. The first generation is Ren Li.

But when I met Zhang Fan, how much anger was pressed and how fierce it was when it broke out.

"Zhang Fan!" Suddenly, she didn't know how this words jumped out of her mouth without thinking. After saying it, she began to regret. Without him, Zhang Fan has been married and is still the dean.

If Zhang Fan didn't have these people behind her, she would shout, but now, such a shout is not only abrupt for herself, but also for everyone else.

As if he hadn't heard it, Zhang Fan continued to talk to Zhao Yanfang, the head of surgical research, "Dr. Li is coming. We must be ready. We can't let Lao Li take advantage of it. Don't look at Lao Li with glasses. He is polite. In fact, the thief is very good. Don't let his appearance fool us. We must not be soft, or we won't have time to cry when we regret. "

When LV Shuyan called him, he didn't move the muscles on his face as if he hadn't heard it.

Zhao Yanfang was also surprised for a moment, and then carefully observed Zhang Fan with a look as if I knew you were at ease. It was boring that Zhang Fan opposite was right in front of him, but he didn't even shake his hair on his face.

"This guy is a thief. Is this also a big scum man who runs away with his pants?" Zhao Yanfang murmured in her heart. She was betrayed by her boyfriend. Well, anyway, she felt that no man who could rise up was good.

If there was a voice over, Zhang Fan would definitely say at this time: look at an egg. I was calm in front of Ouyang. Mount Tai collapsed in front of me without changing my face! Besides, this crazy woman seems to be ill this time. Can I respond to her?

If it weren't for the masks, a group of people would have their mouths open. After seeing Zhang Fan and LV Shuyan, a group of veterans in general surgery, orthopedics and burn department kept sighing: gynecologists are fierce!

Just as LV Shuyan was thinking of saying something about the round migration, Zhang Fan turned his head, and then seemed to see her, "ouch, Dr. LV, why are you so polite? I said, you still owe a little heat for your operation. I can't teach technology. Just invite me to dinner or something! "

Listening to Zhang Fan, LV Shuyan, who had originally found an excuse to leave, was not happy“ You are the leader. Of course, you don't look up to \$50. You don't look up to our \$50. Otherwise, you can invite us all to dinner! ”

Zhang Fan suddenly felt that women's brain circuits were very strange.

"Hehe, what a big deal. Recently, I said that the braised meat in the canteen is good. Let's go. There's still enough money in my meal card, ha ha!"

Zhang Fan smiled awkwardly. Several other old men also smiled with him. Everyone knew the embarrassment of Zhang Yuan. After all, it was not women who knew men, but men.

The director of general foreign affairs didn't wait for Zhang Fan to speak again. He said directly, "Corey has something else to talk about, you talk." After that, he took several doctors from ordinary foreigners and left. Before leaving, Ma Yichen gave Zhang Fan an expression of helplessness. Zhang Fan's teeth hurt, "rabbit, I'll find you a hairy sister next time."

Xu Xian of orthopedics department also followed the director of orthopedics department, but Wang Yanan stood aside and looked at Zhang Fan and LV Shuyan with scanning eyes. Miss, when there is a need on weekdays, master and father are short, but at the critical moment, she is a staunch ally of Shaohua.

Zhang Fan jumped up so fast that he had hardly left time for others to prepare, and he was almost at the height of people who needed the hospital to look up, so his age and gossip were ignored by others.

Today has become a breakthrough. Everyone suddenly feels that our dean is young. Especially Zhao Yanfang, she has less awe of Zhang Fan than others. After all, other people's teachers are not simple. It's really important to say that Lao Xia was almost the same grade as Lao Qiu.

"Oh, how can we go to the canteen when Zhang Yuan treats us? Are we unworthy of Zhang Yuan's attentive treat, or does Zhang Yuan just..."

It is estimated that Zhao Yanfang has outlined a Chen Shimei in her mind. Therefore, it helped LV Shuyan a little.

Zhang Fan couldn't laugh. If possible, he wanted to say: have a relationship with you, have a relationship with you!

The head nurse in the operating room, who didn't know where he came from, appeared with a fragrant wind and twisted his waist“ Zhang Yuan wants a treat. Count me in! It's strange that Zhang Yuan treats. I'll take my girls and go! ”

I don't know whether she's trying to break the siege or to set up seedlings.

Zhang Fan looked at it and muttered in his heart that it was not a good word anyway.

"Let's go. Isn't it just a treat? Look at you. What a big thing. Go, go, go! Count one and go. "

The early winter of tea is not like the early winter in the mainland. People who are lazy in the sun have a feeling of fumigation. Winter here is winter, not so ambiguous. The snow has made the city wear a white coat, just like the color of the hospital.

Zhang Fan originally wanted to take these women to bake steamed stuffed buns and send them away. Although the price of steamed stuffed buns has increased from one to five.

But some people don't, "don't eat steamed stuffed buns!"

"Yes, I don't eat steamed stuffed buns."

"Big noon, so little time, it's too late to eat others!" Zhang Fan not only doesn't want to deal with them more, but also has meat pain.

Some people, who have never been rich, suddenly seem to have changed their style. The big gold chain and small watch want to hang on their body to let others know that they have money, and Zhang Fan is as stingy as ever, because the money is not from the wind, but from his surgery one by one.

Every penny has his blood and sweat, so money will definitely go into the water, such as gambling, such as those who go astray, because there is no sweat in the money.

What he thinks now is, isn't the steamed stuffed bun delicious? What's wrong with the white meat buns? What's wrong with the taste of white nuganjiang steamed stuffed bun? The most important thing is that it's cheap!

Like kidnapping, especially a group of little girls in the operating room, surrounded by Zhang Fan, chirping to eat delicious food.

"Zhang Yuan was stingy before. He invited meat buns as his treat."

"Yes, yes!"

"If I hadn't been for the convenience of surgery before, let alone meat steamed stuffed buns, I wouldn't invite vegetable steamed stuffed buns!"

A group of people, led by the head nurse, came to a mutton shop not far from the hospital.

The store is not big or small, and the hygiene is not much clean, but there are many people. As soon as Zhang Fan saw it, he said: let's go, let's go. There are too many people. Let's eat steamed stuffed buns!

Zhang Fan knows this shop. It has a big name. It has a number one in the tea vegetable mutton industry. In the frontier, cooking well-known is not a skill, but if you can make mutton famous, it's not really a skill. After all, an elderly woman who is casually pulled out by man tea vegetable almost has the ability to make mutton.

Famous, just like the doctor of Throwing Knife, the price is relatively expensive.

Zhang Fan's flesh hurts.

It really hurts.

"It's all right. I know the boss here!" The head nurse's light words broke Zhang Fan's back road.

The head nurse shook and shook into the restaurant. Zhang Fan looked at her waist and wondered, "I didn't see her shaking and shaking when I met with emergency surgery. Why do I have to twist my waist once I'm free?"

After a while, the bearded boss came out in person, "ouch, ouch, the hospital leaders are coming. Please come in, please come in, there is a box in it."

The boss looked at the crowd, his smile and beard were shaking. While inviting, he shouted loudly, "come on, get the hot water towel ready. The doctors of the municipal hospital are coming to our house."

He knows how to advertise.

Now the city hospital, if you're not polite, has become a talk point for the tea vegetable people to boast to their friends in other cities.

Meat pain belongs to meat pain. It's all coming. It's also a knife to stretch your head and shrink your head. I simply don't want to. If only there were an emergency call later!

When Zhang Fan doesn't have an operation, he is actually an ordinary person. He is still an ordinary person of chicken thief.

This mutton restaurant focuses on roast mutton. And it's really a bit of skill to make roast mutton in the so-called barbecue city.

Chapter 1112

Many cities have barbecue in winter and summer, especially at night. The aroma of roadside barbecue is like a test of the perseverance of the army of weight loss. A bunch of mutton and a glass of beer can eat a momentum that other foods can't replace.

This mutton restaurant, which is said to have continued since the Republic of China, has excellent skills in barbecue. Although the boss is wearing greasy clothes, his car is a Mercedes Benz. It can be imagined that the business of this restaurant is really good.

When they entered the box, they didn't need to be greeted by the boss. A group of nurses chirped to wipe the tables, dishes and chopsticks. Zhang Fan, who is a little green in the flowers, sits in the middle like an uncle. He enjoys peace of mind because he has to pay today.

"Don't you eat mutton?" Zhang Fan glanced at the head nurse unhappily.

"I don't eat mutton!" The head nurse rolled her eyes. She didn't understand. She invited them to dinner. Zhang Fan seemed very unhappy. Anyway, we are also beautiful. You don't even have a smiling face, that is, you become the Dean, otherwise

"I don't want meat, but I eat barbecue!"

Zhang Fan looked at the head nurse and immediately felt that this was also very strange.

In fact, from Zhang Fan's meat pain, we can see the difference between private hospitals and public hospitals. If private hospitals, if these people can help the boss make money, let alone eat a meal, even if it is not difficult to manage meals every day, public hospitals are different. To be a leader's treat? He can't wait to take money from his subordinates' pockets to invite himself to dinner.

The restaurant specializes in braised mutton and roast mutton. There are no recipes for both " Let's have 300 yuan barbecue first, and then three kilograms of yellow stew. "

LV Shuyan was hit in the morning. This meeting will turn her appetite into grief and anger.

"Can't you finish it? Not reluctant, waste is not good! " Zhang Fan said after discussion. Once Wang Yanan, who had raised his eyes, stopped, and his face eased. Even if she hasn't been in love, she knows that Shaohua knew Zhu with her eyes! Therefore, Zhang Fan and LV Shuyan have absolutely no problem, otherwise men are the same. They have to be rich and fat when they hit a swollen face.

"No, how can it be wasted? I'm on duty at night. I can pack!"

LV Shuyan said with a smile. She didn't know why. She looked at Zhang Fan's small appearance and Zhang Fan's helpless appearance. Her heart was like drinking a large glass of ice Cola in dog days.

The little nurses are also chattering. They are all little girls. They are not old enough to see the true fire of Sanwei. For example, the head nurse, such as Zhao Yanfang, who came here, can see a little clue. Therefore, experience is very useful for everything.

Even in gynecology, primipara and postmenopausal women, doctors pay different attention.

For primiparas, doctors, like strict teachers, scold them if they don't obey, and invite parents. They are obviously polite to pregnant women!

Before long, the boys carrying the slightly cracked roast mutton entered the box.

Barbecue, many people love to eat, but to tell the truth, the general barbecue feels a taste after eating, spicy with a scorched bitterness.

Zhang Fan seldom eats barbecue. After all, he doesn't drink. Eating barbecue will lose a soul. But this barbecue has its own characteristics.

They don't burn the meat directly. No matter the open fire or the dark fire, the barbecue definitely feels like firewood. If it doesn't rely on the emphasis on seasoning, it's actually no different from eating coal pimples.

When people roast meat, they must first prepare sheep oil, that is, the fat on the sheep's tail or casing. First liquefy the fat in a pot and then freeze it naturally. From solid fat to liquid fat, a large number of fat chains break and become aromatic hydrocarbons.

This is why you take a piece of sheep tail to smell, maybe you can smell vomit, but you can smell a smell of fat by smelling sheep oil.

The refined liquid oil is heated on the barbecue fire to reach the boiling point, and then the bunches of mutton are put into the boiling point mutton oil before roasting.

Raw meat immersed in hot oil, there is no crackling, only zilala, because there is too much oil. Zhang Fan didn't know before. After asking Chen Sheng, Zhang Fan understood that this was to lock the moisture in the mutton.

When the mutton is oiled and then roasted, the surface of the mutton fried with hot oil has slightly

dried but not scorched, the outer skin has solidified, and the expansion caused by heating inside makes the mutton pimple one by one, like popcorn, bigger, and then produce meat seams one by one.

The lamb kebab with great tension is quickly put into the seasoning at this time. At this time, the seasoning is more delicious than other barbecues, only on the surface.

Then, on an open fire, after baking, darling, the oil is mixed with cumin pepper and salt, and the taste is formed in a moment.

To tell you the truth, this kind of baking, not to mention eating, looks like enjoyment.

Braving the heat of roast mutton, eating it in your mouth feels quite rich.

After the greased surface is baked again, it is slightly crispy. When it touches the teeth, it definitely has a clicking feeling. When the crispness breaks, the oil immersed in the mutton explodes in the mouth mixed with pepper, salt and cumin.

Then the locked water comes out vigorously with chewing. To be honest, there is no way to describe the taste.

Moreover, the barbecue here is not as little as the barbecue in the mainland. People with bad barbecue teeth in the mainland eat a bunch and haven't swallowed it yet. It's all stuffed in their teeth.

The roasted meat on the side of tea vegetarians is big first. The meat pieces the size of children's fists are chewed in the mouth and the juice flows. Really, not to mention others, first of all, the food gives the mouth a sense of fullness, which is a kind of enjoyment.

On weekdays, girls with colorful manners will eat faster than one. Eating is like quarreling. The more people eat, the more delicious they are.

Even Zhang Fan accelerated his speed.

It's really fragrant!

While eating, Zhang Fan said to Zhao Yanfang, "I think Lao Li can come here in the evening. It still has our frontier characteristics! "

Zhao Yanfang looked at Zhang Fan. She finally understood why the tea vegetable hospital had such a solid family background. Because a leader is so good at living.

After the barbecue, eat the Yellow stew. After the Yellow stew, one person will have another bowl of clear mutton soup. Be good, and the gods will be treated.

Northern broth is different from southern broth.

Southern broth pays attention to mellow, thick soup, and fish broth to stew the quality of milk. In the north, especially in the northwest, mutton soup and beef soup must be clear. If it is muddy, customers will beat the table and scold their mother.

Bright as boiling water, put some coriander, some green salt, sprinkle a little chopped garlic, and take a sip, just like the real Qi pouring into the whole body. It's warm, especially the mutton soup with pepper.

The meat smell is slightly green and spicy, but it's not the kind of spicy pepper. Really, drinking such a bowl of broth in the cold wind of Siberia really makes everyone Miss winter.

Eat and drink, and pack!

A group of guys have no self-consciousness of eating people with short mouths, just like killing big families.

The cattle all went in, and it was no fun to drag their tail. Zhang Fan met the account in pain.

"Zhang Yuan is so delicious. Let's eat it again in a few days!"

There was a little nurse thinking about the next meal. Zhang Fan rolled his eyes and said, "you can eat so much. Can you find someone?"

In the afternoon, Lao Li met Zhang Fan in the office.

The former Lao Li, Professor Li Cunhou, although known as a professor, gave Zhang Fan the feeling that this guy had some symptoms of anxiety. But this time I saw again. I didn't worry. I looked like a golden mean professor.

Quiet with a trace of pride.

"Hehe, I brought you a present!" Of course, Lao Li is quite familiar with Zhang Fan. This time I came back from the golden Mao country and brought a gift to Zhang Fan.

"It can't be from export to domestic sale!" Zhang Fan weighed the weight of a box and said curiously.

Lao Li glanced at Zhang Fan, "Why are you more and more like Dean Ou!"

Lao Li is afraid of Ouyang.

Chapter 1113

"Look what you said. It was sent to me by a nobleman in other people's golden hair. I can't bear to use it myself. Do you want to, don't give it back to me!"

Professor Li Cunhou was drinking tea. When he heard Zhang Fan's words about domestic sales, he was not happy. He tried to stand up and take it back.

Wine is brave and money is hard for a man. What he said is right. Now Lao Li's taste is definitely different from that of a simple scientific research professor in the past. He is full of self-confidence and speaks more freely. Unlike in the past, he can only say two words of Ingrid except for a little high and sophisticated.

He is different from Zhang Fan. Although he was also a professor in the past, there are too many professors in China, and now the academic community is not simply a place where academia is the king. If you don't come to scientific research funds, you can't get state sponsorship, and so are professors who don't teach.

Zhang Fan is different. Although Zhang Fan's starting point is low, one step is a footprint, and he walks very smoothly. This is because Zhang Fan has hard things, and it is absolutely hard to take them out. Therefore, Zhang Fan gives people the feeling of walking slowly and not in a hurry.

Smiling Zhang Fan opened the so-called reluctant gift in Lao Li's mouth. The packing box is not big, and the surface of the box is also coquettish with a red ribbon rose. Zhang Fan's stomach was in his mind as he disassembled it. Lao Li wouldn't have bought it for Xiao San and Xiao Si. Can I be regarded as incidental?

After unpacking, Zhang Fan found that it was a stethoscope "That's what you brought all the way?" Zhang Fan is not a physician, so he has no love for the stethoscope. Now he takes it into the hospital and makes a big fish jump. He thinks it works very well. No one cares about it anywhere.

In the hospital, there is a saying that a doctor's major depends on what tools he brings, and he can roughly judge his department. The white coat is clean, and there are double headed exquisite stethoscopes hanging in the neck all the time. Needless to ask, this is a physician.

The white coat is yellow and dotted with red dots. This is a rough man in surgery. If he still holds a small stainless steel hammer in his hand, the orthopedic doctor.

"Hey, I knew you didn't know the goods. This is a customized version of 3M. There are only some

academicians in China. Such auscultation areas can't be bought with money. People produce dozens of them a year, and they only give them to some famous doctors in the medical field. Do you want it? Don't give it to me. I'm a little regretful now. "

Although Zhang fan can't pull out the hair like Ouyang, they are all sent to Zhang Fan. If he wants to go back, he looks down on Ouyang too much!

"Drink tea, drink tea, taste it. It's said that there are only three or two teas a year. One or two princes in one or two provinces share a little. The rest of the tea tree boss saved some by himself. I just got a few money by chance. Today is you. I won't take it out. Drink it well and taste it carefully to see if I can drink some artistic conception, Your treatment today can be compared with that of a feudal official.

You too. I don't know if it's good, but I'm not polite to give goose feathers thousands of miles. "

While putting away the stethoscope, Zhang Fan took the reception tea casually bought by Lao Chen and told Lao Li nonsense. Today is not a simple meeting of friends. We have to talk about interests. Zhang Fan has to ask for the stethoscope, but we can't accept it.

Therefore, Lao Li's academician stethoscope was offset by Zhang Fan's vassal tea. Anyway, Zhang Fan has one meaning. Don't laugh at the second brother, boss. I don't know any custom stethoscope, so don't understand my vassal tea.

"People, you must not be a leader. You can eat and drink for nothing and write a white note. Look, how long you have been the president. Now you have deeply accumulated three flavors!" Lao Li's mouth was crooked. The stethoscope hit the dog with meat buns. Moreover, when he just made tea, he clearly saw a large pot of tea. This rabbit is so shameless.

To tell the truth, the stethoscope given by Lao Li is really a good thing. Other things aside, the diaphragm can be suspended and adjusted. If you make an analogy, the stethoscope used by Zhang Fan is an ordinary earphone, and this one is the most cutting-edge noise reduction earphone.

After chatting about their recent situation, Lao Li straightened his expression and solemnly said, "I have reported to the school. It is estimated that in the next few years, my focus of work will be adjusted from the school to the scientific research and promotion of in vitro skin transplantation."

"Resigned?" Zhang Fan asked in surprise. To tell you the truth, although the clinic of the golden mean university is not as famous as other disciplines, it is still a top-level presence in China.

"No, but the focus of work has changed in the future. The school has specially approved some funds to continue the research, development and promotion of skin transplantation materials. How about coming out to help me! "

"You asked me to resign? You get two salaries, but you let me resign. It's good for you! "

Is this about two salaries? Lao Li cried. Now Zhang Fan, the amount of surgery required in the system is like the stars in the sky. He doesn't have the time to follow Lao Li as a drug dealer. Now, although he doesn't have much money, he can spend enough. And his ambition is not here, so Zhang Fan seems to have failed to understand Lao Li's invitation.

"Don't you know how promising there is in the materials you test yourself? If you think about how much your monthly salary is, even if you buy MRI every month and CT every month, you can't get a rebate comparable to the prospect of promoted materials. "

"Hehe, I don't take kickbacks. You can't frame someone's innocence."

Zhang Fan rolled his eyes and thought, "the professor is a professor. He speaks so frankly. Xin Kui, I really don't take kickbacks. Otherwise, I'd be anxious with this guy."

"Well, well, well, even if you get out of the mud and don't dye it, how much do you earn a month? Think about it, you're a tea vegetarian now. If you want to go to the devil and develop in the capital in the future, you can't afford to buy a house. What a pity. I'll give you some shares. Let's cooperate together."

"I have a house!"

"Well, is a small house a house? As long as you cooperate with me, think about it. When our materials are rolled out, you, as a developer, will reach the peak of your life. Open the window and you can see the Huangpu River. How beautiful, think about it! "

Zhang Fan looked at the unqualified lobbyist. With his mouth on his face, he was already very happy: "I already have a house by the river. I can not only see the Huangpu River without opening the window, but also touch it when I open the signal tower. Last time my wife said that the house was big and cleaning was a little tired. Ah, life, there is no pursuit! "

"Well!" Lao Li was said by Zhang Fan. He didn't know what to say next. Just when Lao Li felt hopeless, Zhang Fan spoke.

"In fact, I'm still optimistic about this material." As soon as he said this, Lao Li's eyes lit up. Product development is important, but promotion is more important, and the promotion of this medical device is the top priority.

The promotion of products related to human life must not fail or even make mistakes. Although the material developed by Lao Li is better for burn transplanted skin, the cost is high. If there is a problem in promotion, there is no substitute clinically. The most important thing is that Lao Li's brothers in the golden Mao country also develop the same and similar products.

Moreover, in the trial of all participating materials, only Zhang Fan has not failed. Other doctors do not say that they have done badly, but there are no examples of failure with Zhang Fan's achievements. In order to be safe, Zhang Fan is Professor Li's best choice.

Lao Li can be said to have missed the east wind this time. Money, Lao Li can now say that he is not bad for money. Not only did Shrek of the golden Mao country invest in it, but even the golden mean University was involved. Moreover, although Zhang Fan didn't drink the so-called vassal tea, leaders in several coastal cities have contacted him, hoping that Lao Li can set up factories in their cities in the future.

So, now the east wind is bad, but this east wind is a little difficult to do.

"But I'm not interested in doing business! My ideal is still in the hospital! "

Bright eyes are almost protruding.

"How can we do business? We are a high-tech medical enterprise. I know. Do you want a sense of achievement? Have you ever thought about it? When our products are promoted to the world, do you have a sense of achievement? How many surgeries can you do alone? When our products are accepted by doctors all over the world, how many surgeries need our materials

Just say, how can you help me. Didn't we cooperate very well before? "

Lao Li asked Zhang Fan to speak out his bottom line in a tone of up and down.

"Listen to you, is it really such a thing? But I still like surgery. But it's not impossible to talk about it. "

For a while, he said he was optimistic, and for a while, he said he was not optimistic!

Lao Li looked at Zhang Fan. If he couldn't find a replacement, he wanted to say: return the stethoscope to me. I won't play anymore. Where did the innocent boy go and who taught him to break it.

Zhang Fan felt that the heat was almost the same and said directly, "this can be discussed, but not with me. I have to talk with my superior Ouyang hospital director. As long as you talk well, you are used to promoting wherever you say, not to mention the capital of magic. Even if you go to the mountains and seas of fire, I will listen to you!"

After he showed his knife, Zhang Fan was ready to talk in an instant.

Lao Li looked at Zhang Fan, "ha ha, your boy is waiting for me here. Ouyang is lucky to have a good subordinate like you."

"That's right. I'm not an ungrateful person. I'm a person who rewards the dripping kindness."

This was discussed between Zhang Fan and Ouyang before Lao Li came. Ouyang was a little worried that Zhang Fan couldn't resist the temptation of money. He was deeply afraid that Zhang Fan ran away with Lao Li. In fact, I know my family. My way is in the hospital.

When Zhang Fan took Lao Li to the conference room, Ouyang was ready. Not only Ouyang was there, but also Zhao Yanfang and several doctors were there, not only from the hospital, but also several leaders of tea.

The old lady combed her hair meticulously and specially used a little hair oil. Although her hair was a little gray, she looked very energetic.

When Lao Li entered the conference room, Ouyang's eyes lit up like a discharge. It's really a spiritual old lady. Don't call yourself.

Chapter 1114

The level of this meeting is also quite high. Not only the leaders in charge of health came, but also the leaders in charge of investment promotion. In Zhang Fan's eyes, in addition to swearing, Ouyang's bargaining skills are particularly prominent. Sometimes Zhang Fan also thinks whether the old lady goes shopping for clothes or not. The boss who sells clothes will cry when he sees her.

Zhang Fan doesn't know how big Ouyang's heart is, but Zhang fan understands how fierce his courage is. She originally wanted to cooperate with Lao Li to turn the enterprise manufacturing new transplant materials into a subordinate enterprise of the hospital by taking advantage of Zhang Fan.

Later, after asking, the first phase investment of guangjinmao instrument company was hundreds of millions of dollars. Even the golden mean had several postdoctoral stations to give technical support, Ouyang unfortunately kept patting his thighs.

"The government doesn't work hard, and the finance of a year is so little. Hey, if the hospital had a postdoctoral site, we'd be tough. Now we don't even have a little extra capital."

Ouyang's sad expression at that time was like that ordinary people knew the number of the next five million lottery tickets, but they didn't have two dollars and kept talking.

"If you want to take more shares, let the government give some blood. The hospital can't count on it. Our small Treasury can't support such a large project."

Not being in charge is not only expensive, but now Zhang Fan, like Ouyang in the past, keeps an eye on the small Treasury.

Ouyang looked at Zhang Fan at that time. "I don't know who I learned from! Alas, it's a pity that the number is too large. Not only can we not eat it, but even if we sell tea to the government, it's estimated that we can't. All right, I'll report it to the government. If I have no money, I can only cut off the land! "

Then several departments jointly set up an investment promotion group. The boss of tea vegetable knows Ouyang's good mouth. This time, not only Ouyang is the leader of the group, but also the government has specially formed red head documents and issued them to all relevant units.

Ouyang was proud of the document for a long time. At the department level and the command hall level, can Ouyang not be complacent!

Ouyang is not favored by the government, but tea has no advantages. There is no way to talk about talent and geography. We can only rely on Ouyang to have a try. There may be unexpected gains. If it weren't for fear of being too embarrassed to talk about it, the boss of tea vegetable would have to fight for such a large-scale enterprise or a high-end enterprise.

To Zhang Fan, Lao Li has no choice. But for the local government, Lao Li is still quite qualified. If it weren't for Ouyang, Lao Li would have no problem.

A city as like as two peas in a family, what is harder to do when there is no money, and even a civilized city must be a curse for taxi drivers. For example, tea vegetarians have nothing to talk about when facing Lao Li. It is said that even the emerging online sales are mailed. It is conceivable how poor the conditions can be discussed.

However, in Ouyang's eyes, conditions should be created without conditions. Besides, the old lady knows that Zhang Fan is her trump card, but after all, tea is too weak in all aspects, so she can't be too strong. If you are really too strong, Ouyang doesn't want to break up in one shot.

Ouyang is still a chicken thief.

"Welcome, Professor Li. The people in the West are looking forward to scientists like you, just as they looked forward to the PLA in those days. They really look forward to the stars and the moon. In our cooperation with professors, our tea plant hospital has not only improved the scientific research level by several levels, but also the overall level of doctors in the burn department can not be compared with the

same. On behalf of the tea plant people, especially the patients with tea plant burns, I thank Professor Li for his selflessness and hard work. "

Then the old lady took a group of people and bowed to Lao Li.

Lao Li was caught off guard by Ouyang. Originally, he thought that Ouyang might talk to Zhang Fan and ask a lot of requirements. For Zhang Fan, he was ready to bleed, even a big blood. But once the promotion is mature, it's hard to say.

After all, Zhang Fan only helped to improve the applicability of materials, but did not participate in the research and development of materials.

When Lao Li entered the conference room, he looked serious. He was ready to fight a hard battle today. As a result, the old lady bowed first and directly said what Lao Li said was almost like a saint. The muscles on Lao Li's face couldn't be adjusted. He didn't know whether to be polite or continue to stretch.

"Why did you change the script?" Professor Li Cunhou looked at Ouyang's solemn expression and felt a little hairy.

The old lady who thought of sharp teeth and sharp mouth wanted to straighten with him. As a result

"Let me introduce Professor Li to you. As we all know, he is a top professor of the golden mean University, a doctor studying in Jinmao country, and a writer. The new allogeneic skin transplantation material developed by Professor Li's team can be described as cross era.

This is the person in charge of Investment Promotion... "

Lao Li was introduced one by one by Ouyang's arm as if he had just woke up. Zhang Fan looked at Lao Li with a smile. Ouyang's tactics worked.

That is to say, Lao Li is more or less a scholar. Otherwise, this method of Deceiving a gentleman and meeting a serious businessman will have no effect at all.

Lao Li's negotiation team soon came to the conference room. Lao Li was not attracted by the tea land policy and tax exemption policy. However, when Ouyang took the scientific research team of the tea hospital, Lao Li was finally a little moved.

In the words of Ouyang, if the future research involves ordinary foreigners, the top academicians of ordinary foreigners in China can help.

The orthopaedic research center jointly established by the Department of Orthopaedics, the special hospital of Jinmao and the tea element hospital has broken the ground. If Lao Li can't be moved by ordinary foreigners, the special orthopaedic hospital is different from the orthopaedic research center of

tea element. Burns and skin transplantation often need the help of orthopaedic doctors. This cannot be replaced by other hospitals in China.

Moreover, according to Ouyang, catechin will not only jointly run the hospital with the special orthopedic hospital, but also carry out in-depth cooperation with shuitanzi in the future. The existence of a special orthopedic hospital should not be ignored by Lao Li. Ouyang also wants to be good. After the construction of the Orthopedic Center is completed, she will take this Manchu country to solicit partners. Anyway, the fight is to eat at both ends. Pay attention.

Although there is no achievement in organ transplantation at present, Zhao Yanfang is here. Old Xia's closed disciple, the pioneer of organ transplantation in China, and other old Xia's disciples want simple cooperation. It's too difficult, not only difficult, but people may not have time to cooperate with you. But tea is different. At present, Zhao Yanfang doesn't have a large scientific research project on hand.

Most importantly, Lao Li is very optimistic about the development of the tea vegetable city hospital. At present, Ouyang needless to say, although Lao Li slightly despises the old lady's wild goose pulling hair, the old lady has contributed to the development of the city hospital.

Moreover, now the nominally second in command Zhang Fan and Lao Li have nothing to say, so at present, as long as Zhang Fan wants to continue to develop the hospital in a few decades, his scientific research projects will not have problems due to the change of leadership of the tea vegetable hospital.

These are the advantages of tea vegetable hospital.

After almost half a month's sawing, the most important thing is that Lao Li can't pull Zhang Fan away. Fortunately, although tea vegetables are remote, at present, the conditions given by the local government are the best. This has also offset some of the disadvantages of remoteness.

In Lao Li's words, he can feel moved here.

Of course, the most important thing is that Zhang fan can't pull him away.

Finally, Lao Li and shisaike company will establish a production enterprise of allogeneic transplantation materials in chasu city hospital. Hundreds of millions of dollars of enterprises have entered the tea vegetable market. At the end of the decade, the tea vegetable government is like a Chinese New Year.

If an enterprise of this scale is in a developed city, it may only be seen in the corners of the newspaper, but it is different in tea.

In the words of local tea vegetable people, light industry is a city that makes Nang and heavy industry is a city that makes knife. Suddenly, there is such an enterprise, which can really make the government write a special book. Here is not only the amount of tax to be formed in the future, but also the most important thing is that this enterprise does not simply rely on resource-based polluting enterprises. It is high-end and can create a large number of jobs.

Just when ordinary people are still gossip news, many pharmaceutical enterprises at home and abroad have turned their attention to tea.

.....

"The house is not for nothing! At the beginning, some people said that it was inappropriate for Zhang Fan to live in the gastrointestinal building. Why not? Who can bring such an enterprise to catechin? I asked him to come to the gastrointestinal building. If there is no place, one of all the gastrointestinal buildings from me will be counted as one, and a team will be sent to give talents a place! "

When Li Cunhou arrived, many patients who needed skin transplantation also came to tea, not only patients, but also some experts from major hospitals in China. Some are attracted by the name and some are looking for trouble.

Some people think that technological progress is a general trend, while others don't. They think your success is my failure. Therefore, at the end of the year, a large number of dermatologists and patients poured into the tea vegetable hospital.

Ouyang has become a big business. Now he has become a boss. He has nothing to do all day. He goes to the orthopaedic research center to see the building every day. From time to time, he has to add something. He hardly cares about the work in the hospital. Even if you come to the hospital, most of the time you climb on the windowsill and pour cactus.

The things in the hospital are mainly helped by Zhang fannada, Ren Li, Lao Chen, Lao Ju and Lao Gao. When a group of burn department and University gathered, a small patient came, a small patient who couldn't be looked directly at.

Sometimes Zhang fan can't imagine that human beings are so cruel. When the bell of 120 rang all over the hospital, doctors gathered in the meeting room of the operating room.

Not only the doctor of tea element, but also the experts of skin burn department in many other hospitals.

Chapter 1115

In the early years, the old people in the family, especially Zhang Fan's grandmother, often said to Zhang fan that when his mother became Queen, his father became Queen. Whenever Zhang Fan is naughty and disobedient and makes his mother angry, the old lady with her mouth closed and no teeth will talk to Zhang Fan. Zhang Fan has an inexplicable sense of fear.

Tea vegetable is located in the western regions. Some things lag behind. For example, women in the big

capital don't wear black silk stockings anymore. When they think that only princesses wear black silk stockings, tea vegetable began to be popular. I would say that when I went to the capital, I saw that women all over the street wear black silk stockings.

Therefore, when the mainland has begun to pay attention to pollution-free decoration and light and heavy decoration, the tea vegetable side still stays at home. It must be full. If the ceiling is not carved with dragons and Phoenix, it is equivalent to no decoration. Of course, Zhang Fan is better at this point. Perhaps because of his occupation, his decoration is very simple.

This kind of atmosphere also makes people who come from other places to engage in decoration get rich. In particular, some people in Jiangsu, Zhejiang and Fujian provinces have made a lot of money here. The locals feel that all the workers are migrant workers and have no face. I would rather spend money in the system than let my children do it by themselves.

In fact, people make a lot of money quietly.

Sometimes, it's not that northerners are lazy, but that northerners have too little contact. For example, in the glasses industry, this thing is sold in a city in the south of China. It's not when it can be sold. Just like traditional Chinese medicine, it's about sacks when it's bought, and it's used when it's sold!

Many people seem to think that the people who make money should be ginseng, which has been shaped for thousands of years, and Linzhi, which is the size of an umbrella. In fact, these are gimmicks. Those who really make money are inconspicuous, such as Angelica sinensis, dangshen and plaster, because everyone knows that the price of good things is high, and those who buy goods are not fools.

People in Southern Fujian can definitely monopolize an insignificant industry in cities in the northwest. For example, the decoration industry of tea vegetable is like this. The bosses in Southern Fujian speak a language that only they can understand, so they can't blow the wind and rain in the operation of this market. Just like nature has set up a barrier, I can't even understand words. How can I get involved in this industry.

Therefore, when others are still worried about buying a QQ or a motorcycle, they have considered whether to buy another Mini for their little wife. Tea element has such a general agent of marble. He is from southern Fujian. He was a carpenter in his early years. I don't know how the carpenter's technology is. Anyway, when he was in his early thirties, he already drove a diesel version of the Mercedes Benz.

It can be said that he was young and rich. When he didn't get rich, his wife was a fellow townsman in Southern Fujian. It's not beautiful, but it's better to be neat! After having money, he began to be

capricious. I don't know how much he spent to win tea. A dancer of a county song and dance troupe can come out with long legs, willow waist and a handful of water.

And this man has high means, one house and two women. It's very nourishing. It's a modern blessing for everyone. Sometimes you have to say that the city can play!

Dog waves are sparse, and people suffer.

The boss is busy with business. After all, when he entered this industry in his early years, many things were done by himself. Many building materials not only have formaldehyde, but also some inferior ones may have some radiation. As a result, there were no children. The old Chinese medicine's Liuwei big honey pill was also eaten, and the golden hair medicine to improve the vitality of gold was also drunk, but the first wife at home had been quiet.

As a result, when this one had no hope, the second child of the song and dance troupe was pregnant. He was happy, but there was a problem at home. The East and West Second palaces, which had been calm, began to quarrel endlessly. There was even a fight. One is the original match and the other is pregnant with the next generation. It's really equal.

The child was born. Then, one day, I don't know whether it was the first wife's intention or the second wife's carelessness. The thermos overturned and hot water poured on the child who was not long after birth. It's just blaming each other.

When the child was sent to the hospital, a group of stone hearted doctors and nurses couldn't help touching the softest place in the bottom of their heart. The child was like a little three squeaks in brown sauce. The neck was red and swollen, and blisters were on the young skin one by one.

The dying little mouth and weak crying are like a kitten. Even crying has become a low-level cry. Poor people tremble. Crystal tears are in their small eyes. When they look at the doctors and nurses, they seem to be complaining about their sadness.

"Doctor, I have money. I can have as much money as I want. As long as I keep the child, as long as I keep the child, I can ask for anything."

Marble boss crazy, all kinds of bank cards, kept going to his coat. The dancers in breast-feeding clothes are like entering the wooden man link. They are dazed and don't know what to think about. The breast-feeding curtain hanging on their chest is like a broken scarecrow in the wind.

"Come on, you pay the money. Let the experts from the children's Institute come for consultation. Let Lao Ju and Ren Li come for consultation. Hurry up! Call Professor Li Cunhou, too! "

Zhang Fan met the little patient in the clinic. When he saw the child, his heart was like a manuscript paper rubbed countless times. After that, Zhang Fan shouted to Xue Fei, "contact the hematology department and let them be ready." Then he turned to his parents and said, "go quickly. Your family members also prepare blood for test. Don't linger."

It can be said that this kind of rescue must mobilize the large-scale rescue of all hospitals. Although the patients can palm up with one hand, the experts of the whole hospital must go all out when they can be treated. Otherwise, this kind of small patients will die like a dam breaking the dam.

The child's small mouth opened and closed reluctantly. When the nipple was put into the mouth, it was weak to spit out with a small tongue, and the small head shook gently. Really, the more you see, the more heartbreaking it is.

When Zhang Fan asked his family to test his blood type, the dancer woke up like a dream, "no, the children are like this. The child's father can't have another accident. He can't have another accident. He's in bad health!"

Zhang Fan took a surprised look and muttered in his heart, "is this the woman with heavy wife in the legend?"

Ignoring the woman like a startled horse, Zhang Fan began to organize rescue.

The expert directors of the emergency consultation rushed to the emergency center one by one like a white torrent converging in all directions.

"With the best medicine, money is not a problem!" Men have red eyes and hair like a chicken nest. Where can they look like successful people. Standing outside the door of the rescue room, he shouted at Zhang Fan at the top of his voice. His nose and tears flowed. It was not crying, but it was better than crying.

.....

Skin damage in a large area often brings more problems than just skin problems. Moreover, this kind of injury can no longer be called scald. They all have a general name, burn. Whether it is flame, hot steam, hot solution or chemical substances, tissue damage caused by radioactive substances is called burn.

Many people think that burns are just skin problems, and then there are some topical drugs to treat burns, which are not only misunderstanding, but also commercial factors. For small burns, it can indeed be said that they are superficial skin tissue injuries. They can be treated according to surgical routine. In fact, the effects are the same whether trauma drugs are used or not. Just as the day will be bright when the cock crows, and it will be bright when the cock doesn't crow.

However, if the quantitative change reaches qualitative change after the burn area and depth reach a

certain degree, this is not a single skin problem. This is a systemic disease, the injury is on the surface, and multi system and multi organ have changed.

If divided according to the rescue level, the difficulty of this rescue may not be lower than that of massive hemorrhage. Because this rescue involves too many problems, such as water electrolyte disorder, immune function, nutritional metabolism and visceral damage. If the patient is too old or too young, the rescue difficulty will be increased several times.

It can be said that this is a large-scale battle. Really, fire and water are ruthless, which is reflected incisively and vividly at this time.

"Increased heart rate, weak pulse, low heart sound, shallow and fast breathing, no obvious urine volume. The extremities of the children are cold. " The director of the children's Institute has begun to report the condition of small patients.

All the signs have shown that the child is running towards the state of shock. Now, the first thing doctors should do is to slow down the child's state of shock, then resist infection, and finally complete the skin transplantation.

Infusion, pediatric infusion is a very rigorous mathematical problem. Many small clinics or private hospitals often resist children's treatment, because the risk of children's infusion is no less than an operation.

Often, many parents choose to go for infusion after their children are ill. Really, the parents' mood is understandable, but the parents' brain circuit remains to be discussed. I don't know how many children's deafness and claudication were caused by intramuscular injection in early years.

Now intramuscular injection is less and less, but infusion is more and more. As a saying goes, if you can't take medicine, you can't take medicine, and if you can't give fluids, you must not give fluids.

Especially after large-area burns, this infusion is a very thorny problem. At present, many countries follow the brook formula of the military Burn Research Institute of Jinmao state in that year. Colloidal and crystal solutions are changed alternately, which will change according to the patient's condition.

Therefore, when scalding occurs, you must not be careless. Do not apply soy sauce, flour and toothpaste on it. This thing is not a sauce pig's hoof for the new year, and toothpaste is not omnipotent.

"The child is in a depressed state, and the infection has formed!"

Zhang fantou is big. The two cars of shock haven't slowed down yet, and the infection is driving again. There must be bacteria if there is corruption. The characteristic of burn is that it destroys the physiological barrier of the human body in a large area, and then the patient bursts out with a solution that is just a good culture medium for bacteria.

Sometimes, patients with extensive burns and AIDS patients have the same characteristics, that is, any bacteria can cause fatal damage.

Chapter 1116

The rich class sounds rich and leisurely. In fact, the intrigues and intrigues here are often unimaginable than novels. Justice is said in the mouth, business is in the stomach, and there are countless male prostitutes and female thieves.

Originally used to enrich the spiritual culture of the masses, some groups have often become a way for some people to change their stratum. For example, the head of a TV station can't say many things. For example, a singer who can sing a golden star is one of the reasons why he cut this part from the army later. Among these groups, there are indeed many artists with great skills, but there are also some opportunists who sneak around.

Most people think that including a female student and a young junior are rich. In fact, these are low-end. Many energetic people have special hobbies, such as a Taiwan flower. Even if Taiwan flower is not a national flower, listening to the voice of national news in standard Mandarin may be more exciting and have a sense of achievement. Maybe this can reflect their identity.

Men are like this, and so are women. Many young and beautiful girls have a circle in the early years. Their understanding of society has already surpassed their parents, not to mention others who have just entered the society. Even some old slicks don't see the society clearly.

They gather together and use their public identity to hunt for some wealth or rights. This is the so-called hunting ground. It is not men hunting women, but women hunting men. At this level, I don't know how much more high-end than any group celebrities. This is why people in the system have priority in choosing a spouse. A beautiful face and a special professional identity can definitely hook the constant flow of these people. This is the so-called identity bonus.

Many groups, beautiful girls, fall in love outside and secretly participate in various special meals. Sometimes, when they talk about business and hold meetings, they decorate them like flowers. Then keep looking for opportunities in this kind of party.

This is the family that Zhang Fan met. The marble boss in Southern Fujian met this dancer at a special banquet. It is said that it is a development conference held for the development of remote areas.

At the meeting, the two of them looked at each other. After getting to know each other, men know women's capital, women know men's wealth, and then it's natural.

This woman is not simple. In the words she gave her best friend, her skin was worn out, she just couldn't conceive, and she didn't get a good position. Of course, she had to make a strange move. Then, on a sunny evening, she broke up with her young ex boyfriend. She was still a friend after the sweet talk, and then there was a break-up friendship competition.

Women who count their days don't let men do anything. The man was moved to tears, while beating excitedly and hysterically vowed to stand out. The performance of the two is like a butterfly parting from life and death. It seems that the boss in Southern Fujian is the local tyrants and evil gentry who forcibly robbed the people's women. Afterwards, I don't know whether a man will try to get ahead. I don't know whether a woman will be as nostalgic as at that time. Anyway, she is pregnant.

There is no right or wrong. Men covet women's appearance and women covet men's money. Only children are wrong and only scalded children are wrong. He should not come to this world and should not be punished so cruelly.

As a result, all the preparations broke out at this moment. Minnan boss's blood type is not the child's father. One is a rich foreign boss worth millions, and the other is a local resident with hundreds of relatives and friends. They are not easy to mess with.

Then, the two forces were originally ambiguous. The shouting of brother-in-law and brother-in-law became a scuffle between men and women in the emergency hall. The real thing was chicken feathers on the ground.

"Refund, I want to refund!" His face was scratched like a defeated rooster, with blood strips one by one. There was a strange and absurd sense of joy.

One of the dancer's cousins was still a cousin. He stood beside the boss in Southern Fujian and said to the little girl at the toll gate, "return the money. If you dare to return the money today, I won't break your leg." Then he said to the boss, "if you play with my sister, you'll run away? You think money is everything? Try it today. "

"What are you doing outside?" Zhang Fan is furious. The rescue room is already in danger, but the outside is noisy.

"I'll have a look!" Chen Sheng immediately walked out of the emergency center. The team Standard for large-scale rescue is generally one doctor in charge of rescue, several doctors and nurses in charge of implementing medical orders, and one doctor in charge of contacting, summarizing and coordinating

various departments.

As long as Zhang Fan is responsible for the rescue, Lao Chen is the Royal coordinator.

If it were a young doctor, he might be timid in front of these rich people, but Lao Chen wouldn't.

"What's the noise? What's the noise? Who's the leg you broke? Let me see what you can do." With the people in the security section, Lao Chen stared at the people who frightened his colleagues.

The Security Department of the tea vegetable hospital is not just an external employee for about 2000 yuan a month. There are staffing here, which is estimated to be a frontier feature.

"Refund? Do you think this is a vegetable market where you can change the bad meat? You are the one who calls for money and you are the one who calls for refund. How boring you are. "

After that, Lao Chen looked positive and said quite sternly, "I don't care about your shit. This is the hospital. Before rescue, you signed for the child's father and agreed to rescue.

Now if you continue to make trouble here, 110 will be here soon. Don't think it's awesome to have two money, and don't think you're an underworld. Now get out of here! "

"You, you, you wait, I'll complain to you!" After that, the boss estimated that he couldn't hang on his face. He turned and left. The actor's cousin or cousin chased out with a man on his tail.

In the rescue room, doctors began to rescue in an orderly manner.

"There's not enough money. There is no money on the account. " The little girl at the toll office looked at Zhang Fan timidly and whispered to Lao Chen.

She hasn't seen Zhang Fan's black face. Usually Zhang Fan's face is black, but today it's black. Really, it looks scary.

"Didn't the man pay a lot?"

"He paid 30000 in cash. The card was pressed on the counter and he didn't transfer the money. As a result, he left..."

"Well!" Lao Chen really wants to say, why don't you transfer money.

"What's the matter?" Zhang Fan asked.

Lao Chen said the general of the matter in a few words. Zhang Fan was stunned, bit his back alveolar and said, "apply for a green channel."

"The money for the green channel is not enough. Zhang Yuan, we still have to think of other ways." With that, Professor Li Cunhou floated with Lao Chen's research.

"If it's not enough, we have to find a way!" Zhang Fan was so angry that he didn't notice.

"OK, I'll do it!" Lao Chen did not explain, nodded and went out.

I don't know where it came from. The character of a chief officer absolutely affects a unit. Ouyang stone wanted to squeeze oil. Although Zhang Fan didn't have Ouyang's ability, he was compared with Yan Jiansheng when he pulled.

Therefore, the following people, especially those close to the two leaders, also like them. Eating more and occupying more has become the style of tea vegetable hospital.

Chapter 1117

When Lao Li was a simple Professor, there was nothing special except that several graduate students who had not graduated were polite to him, that is, an ordinary doctor and teacher. If you have to find something special, there is an outpatient number every week in the best university affiliated hospital in China.

In the eyes of ordinary people, it seems that those who are powerful don't want to. In fact, that's it. People he wants to know don't want to know him. If he wants to know him, he doesn't want to know others. Even the original funds for the study of skin allogeneic transplantation came from begging grandpa to sue grandma for alms everywhere.

At that time, when he was about to give up his scientific research project, he met Zhang Fan. Zhang Fan's operation was like a spring thunder, wetting his dry heart. Otherwise, he will not take his own materials all over the world to find people to try.

And the most important thing is that now the skin allogeneic transplantation materials have passed the GMP of the European Union. Now we wait for Zhang Fan to take the lead and work with his own team to conquer the FDA.

What is GMP? In fact, it is a kind of quality certification of China ISO9000. Of course, the gold content of GMP is still relatively high, but without the golden FDA, it still lacks some meaning.

The FDA of Jinmao is actually the food and Drug Administration of China. Although this unit is a food and drug Bureau, it has great power. If a drug is listed without golden hair FDA certification, it will not be able to enter the European and American medical system.

GMP can be said to be "I'll sing the white face. After that, you and your Zhang hospital will sing the red face. After all, we still need people, and we can't do too much. After all, I say I'm the director of the Health Bureau, and the legal person of the hospital is you Zhang hospital, not you.

Just let them know how powerful they are, and the people in your hospital don't have to participate. "

Old Chen nodded and kept saying that the Dean was capable.

This guy was born in New China. If he put aside the ancient times, he is definitely a sycophant.

A group of women's army is also a group of women's army specializing in policy research. Although women seem to be relatively weak in the system, it is because of the general environment. When it comes to the study of policies, women may not be inferior to men, and they are still a group of old women who have been immersed in the system for half a lifetime. They are absolutely powerful.

The effect is obvious. Stryker, which cooperates with Lao Li, is not only fully responsible for the treatment of the child, but also for the future treatment expenses of the child. Not only that, their company is also going to donate some equipment and medical instruments to the tea vegetable hospital for children's diseases.

This is Ouyang. If the leader in charge of health comes, it is estimated that the tea vegetable will have to pay for it. People are different from people.

How was the negotiation at that time? Anyway, Ouyang smiled like a trumpet of tea, and Lao Li's team was as dejected as a rooster who failed to step on an egg.

Both sides didn't say what the specific situation was, but according to Xiao Chen, who served tea and poured water in the medical department, at the beginning, the two sides had a strong smell of gunpowder, and the laws and regulations flew all over the sky. When they poured water in the middle, it seemed that everyone began to be calm. In the end, it was said that President Ouyang also exempted the cost of experimenting with tea!

Later, Zhang Fan shook his head and smiled bitterly. An old family is like a treasure! The old lady is very good at this.

Not to mention Ouyang, when Lao Chen told the emergency center to let go, Zhang Fan thought Lao Chen had opened a green channel.

"Internal balance is stable, blood pressure and heart rate are Kwai tingly controlled. We should operate as soon as possible, otherwise the infection will be more serious."

Ren Li said to Zhang Fan with red eyes.

"Well, prepare for the operation now."

Zhang Fan nodded.

Although Zhang Fan led the rescue, in fact, Ren Li and the director of pediatrics were mainly responsible for the internal medicine balance, and Zhang Fan was in the middle of the command.

Surgery pays attention to cleanliness, while internal medicine pays attention to a sticky balance. To tell the truth, it seems that surgery is difficult to get started, internal medicine is easy to get started, and you can do it after junior high school, but when it is a little difficult, that's not the case.

For example, don't worry about anything else. Just a human acid-base balance can make the head big. Therefore, what physicians pay attention to is a boil, boil their own experience and boil their own set of treatment methods.

Generally speaking, internal and external subjects are not easy to do. They are easy to learn and difficult to master.

As for Zhang Fan's current level, to tell the truth, surgery is not a big deal, because he has not come out of the scope of an surgeon. If he is in internal medicine, his level will deal with a general disease at present.

Therefore, a doctor who doesn't hang up will always spend his career in turbulence and anxiety, just like being a tractor.

And Zhang Fan just walked faster. Even so, he still has a long way to go.

In the operating room, a small patient, lying on the operating table, looked weakly at a group of strange adults with just opened eyes. He seemed to know that these people were rescuing him, making no noise and crying, just like a kitten without a mother, timidly curled up on the operating table.

"Professor Li, are the materials ready?"

In front of the operating table, Zhang Fan's voice is different. If he has to discuss with others when rescuing, here he is the king of life and death.

"Ready. Zhang Yuan, Professor Wang in southern Hunan wants to take the lead. " Before Lao Li spoke, a member of the golden mean University who came with Lao Li broke in.

Lao Li's face changed. I brought these people here to learn technology. I didn't expect to kill a master knife on the way!

Chapter 1118

In the medical circle, there are such a number of people. It's hard to say what their level is. Anyway, they can't reach the top level. At most, they are the deputy director level of a third class hospital, but their reputation is as high as he is a famous national doctor.

Before they heard about the princes, they tried every means to improve their reputation. For example, today's operation is that if the father of the child pays as usual and treats as usual, he doesn't have to think about it. He will never rush for the operation.

But today is different. The father of the child suddenly became an uncle. The hospital was determined to treat him. This kind of treatment cost can not be borne by a third-class hospital in a marginal area, so it must rely on external forces.

Whether it is the local government or various medical equipment companies, this kind of assistance must be publicized. Especially the propaganda of the government, this kind of doctor doesn't ask the people to know his name. He only wants the superior leaders to find himself.

In his opinion, it would be better to know a leader at the director level than to treat 100 ordinary people. This kind of people went to the imperial doctor. Rowing exists in many places, and the imperial doctor level may not be all top experts. Just like time, you can still find gullies and water by squeezing.

Therefore, when he heard about the situation of the children's families, the director of the burn department felt that he had a chance. Zhang Fan, he knows, is known as Lu Lao's closed door disciple. He felt that this is probably the same as what he pursues. Otherwise, a disciple of a top academician would still be closed. How could he get into the frontier?

It is estimated that it is just the slogan he shouted himself. If he is really an academician disciple, he is not in the capital or in the magic capital now? But Zhang Fan is also very capable. He even mixed with a dean under the banner. He is still capable.

However, in his opinion, if you rob the boy's operation, you will rob him. It is estimated that the hospital invited the gunman. After he wanted to understand, he decided to intervene. He felt that his legs were thick in front of Zhang Fan, an expert of the provincial expert database, an honorary vice president of the Southern Medical Association, an associate professor of the University and a deputy director of the Department.

In the worst case, he also thought that even if the boy had something to do with Lu, it was not a big problem for him. He was not a foreigner. So, thinking about it, he was about to enter the operating room. He did it.

When he said he wanted the main knife, Zhang Fan had a question mark in his head.

His idea is still very simple. He thinks the other party is a master. He may think this operation is more challenging, so he spoke when he was about to have an operation. Zhang Fan still wants to be simple.

Zhang Fan doesn't understand, but Lao Li and Li Cunhou are too clear. They are all engaged in burns. He knows exactly what the other party is. Let alone that the child's situation is so dangerous. For the new materials in this operation, if you do three, you have to do two again. Lao Li won't let this one go to the stage.

When Lao Li glared, Zhang Fan said, "Oh, Professor Zeng has an idea about this operation?"

Lao Li also invited a group of people to be strong and powerful at the beginning. When he introduced it, he also slightly exaggerated the achievements of the other party, which led Zhang Fan to think that this is an expert of Yaxiang. In fact, if Zhang Fan experiences a little more, he will understand that the real boss will come to join the fun?

Professor Zeng, according to himself, is a big family in Nanhu. It seems that he is still the younger generation of shaving. No one can tell whether it is true or false. Sometimes this thing is too unreliable. It's hard to say whether he was related to Lao Zeng or not, but with a shod face and a slightly upturned chin, he was very similar to Zhu Laoba.

For burns, although Zhang Fan's operation has been quite good, he did not open the system, and now it is a new material. In the words of great men, the application of this material is to touch the stone and cross the river. There is no clinical guide to query, nor scientific research materials and data to read.

Only with the doctor's own ability to explore a little. If someone has accumulated a lot of experience and technology in this regard, Zhang Fan will definitely give way to the virtuous. This is neither arrogance nor timidity. This is a living life and a child who has just been hurt in the world.

Therefore, Zhang Fan leaned over and said something gently.

"Well, I have some experience!" Professor Zeng, who has a shod face, doesn't look up obviously. At this time, he proudly raises his head. How can he see that there is an impulse to let people roll his chin.

"Well, I'll be your assistant to Professor Zeng." Zhang Fan nodded. He was also worried. The child would be in danger. He didn't pay attention to Lao Li's expression.

There are many people with mixed mouths. Lao Li is hard to say outside the operation door. He was waiting to tell Zhang Fan after the operation.

After entering the operating room, Zhang Fan was busy disinfecting again. He really said he would do it. If he said he was an assistant, he would definitely be an assistant.

Lao Li didn't find a chance and scolded his mother in his heart.

After all the preparations were completed, Professor Zeng was dumbfounded.

"Professor Zeng, ready, please!" Zhang Fan said softly.

Nanya Xiang, the name is too big. This is also a deputy director of Yaxiang. Zhang Fan thinks he should be very powerful. In fact, this deputy director ran out of the back door. In terms of ability, it is.

He felt that Zhang Fan was also a professional leader of such a non professional doctor. He was still wondering why this man was so easy to talk. Was it because my fame was so big that the frontier knew it? I'm still complacent.

When Zhang Fan politely invited him to the stage and really became the master knife, he sat in wax "You didn't invite, didn't invite professional experts, that..." He thought that Zhang Fan also invited Lao Li team for fame, and a group of people came to support him. Generally, this kind of operation has an unknown main knife.

So he felt that he should be able to hang a name. As for who really became the main knife, he didn't care. He just wanted to let him have an operation. He felt that Yaxiang was so powerful that the small yard of the small frontier hospital probably asked him to give him a place.

He was so proud that he didn't pay attention. When Zhang Fanzhen asked him to go on stage, he took a wax. If he was an adult, he reluctantly dared to go up and try. But this is a month old baby. Don't say surgery. It's already very powerful if he can improve the shock.

Now let him really go to this operation and let him really be the main knife, he was stunned. Zhang Fan was a question mark at that time. Now he is a sweat.

He looked at Zhang Fan and Lao Li "Is he really a R & D participant? "

Lao Li turned his head as if he hadn't heard it. Lao Li ignored him. As like as two peas, the parents of the killing parents are the same as the old Li's money. It's illegal to kill people, or Lao Li will definitely take a knife.

"Aren't you a general practitioner?" Professor Zeng's sweat is like goose bumps, with sweat beads on his forehead.

Many burn doctors looked at Professor Zeng with a meaningful smile as if they were watching the excitement.

"I'm actually, actually, actually kidding!"

Peach collar surgical clothes and Adam's apple go up and down, just like the elevator in the mall.

Embarrassing, it's embarrassing.

This industry, especially those who want to take the road of imperial medicine, is like fortune tellers. They can't break the golden body.

Zhang Fan understood at this time! Zhang Fanlian was in no mood to say one more word to him.

"Come on, get ready for surgery."

Zhang Fan drank lightly, and then said to Lao Li, "how can you start to be unreliable!"

Lao Li was told a red face by Zhang Fan.

He knew that when he entered the operating room, Zhang Fan was absolutely unreasonable.

He nodded as if he were wrong and didn't explain a word, but Lao Li hated Professor Zeng.

Lao Li didn't speak, but he had already scolded his mother in his heart. "You old boy, it's autumn wind everywhere. Today it hit me. You wait, you wait." Lao Li was so angry that he was almost foaming at the mouth.

The operation began.

Professor Zeng didn't go either. If ordinary people were changed, he would blush and couldn't stay, but he stood in the observation room like a person who had nothing to do. "Why is he so arrogant as a foreigner? I don't believe he's not looking for a hot hand, MD! "

He hasn't given up yet.

"Prepare sodium bicarbonate injection and stabilize the acid-base balance of the patient. Do a good job in stress prognosis and start omeprazole intravenous drip. "

Zhang Fan, Gu Li, director of Dermatology, and Lao Li, three adults, together, like a curious baby, head to head, facing the patient.

The child is too small to get close and can't operate the operation.

"Baby, the milk hasn't broken. It's pathetic to have an operation." After all, it's a woman's Guri, shaking her head gently.

Zhang Fan looked up and saw that the woman was not so kind to Zhang Fan at the beginning. At that time, a condyloma acuminatum almost made Zhang Fan flaccid.

"Ophthalmic forceps! Director Guri, the operation is over. "

Zhang Fan said dissatisfied. Originally, the operation was relatively large. Now doctors must not have any kindness. Now, even if they feel uncomfortable, they can't have a trace of feelings. Otherwise, when it's time to break, they will do bad things with good intentions.

"OK, OK, I see, adaxi!" Director Guli will wear a mask, otherwise, you can definitely see the pink tongue protruding.

In the tea vegetable hospital, if it is cute, it is not necessarily the little nurses who are cute, but the small number of middle-aged female doctors who are cute. When they are happy, they can sing and dance. If they are interested, they don't hide it. If they say they cry, they will cry. But for the superior, it is not as rigorous as other doctors.

She sometimes sees Zhang Fan in the unit. If she is happy, her brother is long and her brother is short. If she is unhappy, she is heibalangzi. It's hateful!

Zhang Fan took tweezers, Guli took scissors, and Lao Li began to soak the transplant materials.

Chapter 1119

If orthopedic surgery is more open and close, then skin transplantation is embroidery on meat, even finer than embroidery.

The first is debridement, the eternal topic of surgery, cleaning, asepsis and disinfection. Hands are like catkins and skin is like condensed fat. This poem is absolutely not too much to describe children. Normal children are faintly pink under their thin skin, and the light fat makes the skin clearer and clearer.

What skin care products, what beauty, in front of children's skin, there is no way to compare. But after scalding, how delicate the child's skin is now, how can't bear to look directly at it.

The little man's body is now like the crispness just out of the pot. It is covered with flesh colored bubbles without broken bubbles. It is cool like the rain bubbles in the pond on rainy days in summer. The broken bubbles of different sizes are just like used condoms. The thin skin contains gray and dark red mucus pasted on the body, It's really like people with prostatitis run through the red light with hard urethritis. How do you think it makes people feel uncomfortable? How sad is it.

If people with rich emotions go through such operations several times, they can definitely practice emotional introversion.

The little child's body is full of countless such bubbles, large or small, broken or unbroken.

After the cool Bromogeramine solution was wiped, the blood was wiped, but the pus in the bubble could not be wiped clean, just like eating sesame paste and big bubble gum, and then the red lips began to blow out bubbles contaminated with sesame paste.

Healthy skin rarely hides dirt. At most, it hides a little in the belly button and toe seam. After being scalded, the skin directly becomes a Petri dish rich in all kinds of germs.

It is also a very good Petri dish. It needs all kinds of culture media, including protein, fat, amino acids and sugar. Therefore, in less than a day, the child's original white and tender skin is like a piece of moss, with large pieces of dark red mixed with gray and black patches.

Just like when I accidentally fell into the coal ash after taking a bath and didn't take it for three years, the coal ash seeped into the skin. Transplantation is particularly afraid of infection. As long as there is one place where the disinfection is not complete, when the allogeneic transplantation material is covered on it, it is directly the greenhouse in winter, and bacteria can grow into mushrooms. By that time, the doctor had no time to cry.

Therefore, preoperative debridement is quite strict and cruel.

"Brush! Apply a soft brush first. " With a palm sized soft brush, Zhang Fan is like wiping porcelain bit by

bit. She wipes the pus and bacteria with soapy water. The plump Guli stands on Zhang Fan's side and gasps slightly. After the middle-aged aunt becomes fat, the burden on her upper body is too heavy. Not only to load the cup, but also bend over and cooperate with Zhang Fan to wipe it.

Guri's waist is starting to sour. Just as she let Zhang Fan climb close to the black silk woman to observe, now Zhang Fan has to let her bend down and close. This position is too sour.

After the brush with soft hair is finished, the brush with hard hair is visible to the naked eye. This weapon can't be used too much, otherwise it will cause secondary damage to the skin, but it can't be used. It can't be too slow. Really, it's really difficult for doctors at this time.

Fast injury, slow infection.

At the end of the brush, put on tweezers and currettes, piece by piece. Zhang Fan removed the inactivated skin forceps, which are the root of trouble and wealth. Leaving one piece will give doctors a headache in the future.

After trimming the inactivated skin, we should also find a way to break the unbroken large bubble without inactivating the skin.

Really, that is, the child's skin area is small. If the area is a little larger, it's hard to say how Zhang Fan is. Guli can't stand up straight.

Because there is no clinical guide for this kind of operation at present, that is, doctors rely on experience to do this kind of operation, so the postoperative effects vary greatly.

"Record!"

Like eating duck intestines with small chopsticks, Zhang Fan pinched them one by one. At this time, Zhang Fan suddenly said.

Everyone was stunned. It's not rescue at this time. Why record it?

During the rescue, because of the time, the doctor had no time to give the doctor's order and could only orally exercise the right of doctor's order. Therefore, without saying a word, almost all of them will be recorded by nurses or doctors. This is not only a case, but also a file of the life and death of patients in the future.

In the operating room, this is rarely the case.

Just when everyone was stunned, the head nurse in the operating room hurriedly pushed away the itinerant nurses with a pen and nursing record book. While squeezing, she turned over her white eyelids, as if to say, "wood, can't you hear me!" The sharp eyes are really just like the procuress wants to

look good to a girl.

"Zhang Yuan, you said that the record has been prepared." Jiang was still old and spicy, and the young woman's voice sounded behind Zhang Fan.

Although she doesn't know what Zhang Fan wants them to record, she can implement it at the first time. This is professional quality.

She embodies the relationship between doctors and nurses incisively and vividly. She can be the head nurse in the tea vegetable hospital or in the greatly developed tea vegetable hospital. She is really not an ordinary woman.

Zhang Fan didn't open the burn department at first, but he didn't know why. He suddenly realized that, just like a thin film was broken by a bucket, it immediately became particularly smooth. The slightly unfamiliar places were as greasy as lubricating oil.

Zhang Fan is deeply afraid that this is a flash of light, because he has never met a subject that has not been opened and can feel it. Therefore, he was afraid that he would not have this feeling after the operation, so he had to record it.

"When the damaged skin is cut off subcutaneously, it must be ensured that there is an extensible capillary network nearby. Cut the burn of the muscle layer... "

Zhang Fan said and did while doing.

The head nurse in the operating room muttered, "is it almost ready? Is it almost ready? My mother's hands are almost broken."

One page, two pages,... Ten pages.

The head nurse complained in her heart, but she didn't understand what Zhang Fan was doing. The anesthesiologist was curious, but he didn't quite understand what he was doing.

However, Lao Li and Professor Li Cunhou around him were excited and their hair was about to stand up.

If he hadn't been on the operating table, he now wanted to take away the young woman's pen and record it himself. He was deeply afraid of disturbing Zhang Fan. While soaking the allogeneic material, he whispered, "you must record it completely, and you can't drop a word."

He understood too well. His eyes at Zhang Fan showed an attitude of wanting to swallow it.

Zhang Fan is making clinical guidelines for children with allogeneic skin surgery!

How good is this?

It can be said that this is Zhang Fan's boundary for this kind of operation. More popular, that is to say, Zhang Fan is formulating rules and regulations.

Just like playing ball, Zhang Fan is making rules now. If you want to win the championship in the future, you must follow my rules.

The reason why the failure rate of this operation is extremely high is that there are no rules and regulations. When everyone is groping for this boundary, Zhang Fan has begun to formulate the margin.

Lao Li almost fainted with excitement.

If Zhang fan can make a complete plan for children, even if it is not complete, it is definitely no less than the achievement of studying materials.

With materials and no guide, no one can use them. Materials have no future.

Only with materials and guidelines can it be popularized.

not a single one can be omitted.

How difficult this guide is, you can look at the textbooks of Xinhua. The great gods compiled in the first edition and those hanging in textbooks can really be said to be the top existence of Chinese medicine. Even with the development of science and technology, later textbooks made some changes on the basis of this edition.

Not only Lao Li was shocked, but also dermatologists from various hospitals outside the operating room.

"I'll go. Do you want to be so good? Specify the operation guide at the operation site! This is incredible!"

"

"True or false, but I'll go in and have a look!"

As soon as this was said, everyone directly raised eyebrows "I'll just say it, say it. "

Professor Zeng stood in the crowd, sweating all over.

"Fake, it must be fake. He's a hairy boy. It's against the sky to be able to do this kind of operation. He even made guidelines on the spot. Fake, it must be fake!" His mouth was dry and his tongue was dry. Now he began to regret it.

"Lao Li, are the materials ready?" Zhang Fan doesn't lift his head. His head bent slightly is just like fixed in that space. He doesn't move. This is Kung Fu. Kung Fu comes from practice.

"Lao Li!" Zhang Fan's voice is a little hard " I'm so smart. I don't know when it's over. You're still distracted by me. "

Zhang Fan was deeply afraid that this sentiment was like the happy time with Shaohua. He trembled and disappeared, so he said it and found that Lao Li was very angry after he was in a daze.

It's like buying a lottery ticket for two dollars. When I opened it, I went to five million. As a result, the boss who cashed the prize said that the computer crashed. Don't worry!

Lao Li is like waking up from a dream.

"All right, all right." Quickly pass the material with both hands" Zhang Yuan... "

"Shut up!" Zhang Fan interrupted Lao Li's speech like a Tibetan mastiff protecting food.

Little by little, the child is like a ragged doll, and Zhang Fan mends it bit by bit.

Originally a large area of ulceration, slowly became allogeneic transplantation material. When the tourniquet is released, the capillaries, like the rain in spring, slowly moisten the allogeneic materials. The original gray materials become pink and tender.

Large, expensive experimental allogeneic materials were cleverly trimmed into small pieces of various shapes by Zhang Fan and applied to the child.

Lao Li clapped his mouth, not distressed, but excited.

The record continued. At this time, under Lao Li's sign, Lao Li's doctor took over the head nurse in the operating room.

The head nurse in the operating room rubbed her wrist and looked at Zhang Fan with strange eyes. "It's still a long time! After talking for so long, I don't know I'm thirsty! "

"Go, open the glucose, don't open 10%, open 5%, I'll feed some to Zhang Yuan!"

Chapter 1120

This operation, which Zhang Fan did, was quite a bother.

First of all, the children are too young to linger on the line of life and death at any time. And a large area of skin damage, like a child has been bleeding a lot, and a clear liquid child is like a fat man lying on a sauna bench. Tissue fluid is like beads of sweat, gurgling and overflowing from the body. This moment is really no easier than a large blood vessel to expose blood.

The human body is a complex organism. There are many kinds of elements in it. Why does massive blood loss or fluid loss lead to death. In fact, it's very simple. The brain can't hold on to a large amount of ischemia first, because the red blood cells in the blood are small boats that transmit oxygen and carbon dioxide.

When the ship is gone, oxygen can't get in and carbon dioxide can't get out. The brain is drunk first, just like people are drunk, and then the brain is poisoned over time. The loss of fluid is the same. A large amount of fluid loss will first lead to electrolyte disorder in the body.

All kinds of elements in the human body can be balanced to produce various substances, such as energy, ATP, protein and sugar. When a large amount of liquid is lost, the balance is chaotic. What should be produced cannot be produced, and what should not be produced will be produced in large quantities.

For example, ATP was originally produced, but it turned into a large amount of lactic acid. During strenuous exercise, muscles will be sour, which is lactic acid. When a large amount of lactic acid is produced, the electrolyte in the body is more disordered. Many finished products come out without catalyst, and many of these things are toxic.

It can be said that after a large number of test solutions, it makes sense that people poison themselves to death.

Zhang Fan has to discuss the treatment adjustment of children with the anesthesia group of the medical support group as the operation progresses, because the operation is destructive treatment after all, which will aggravate the stress response of children.

It can be said that this treatment will accelerate and increase the probability of children's death. There is no doubt that if one is not careful, the probability of children's death on the operating table will increase with the progress of the operation and the more skin cut by the operation.

Not only should we discuss with them, but Zhang Fan should also record the operation.

If Zhang Fan's operation in the past was the result of a lot of practice in the system, this time is an extraordinary play of accumulation and thin hair. Just as some people are not good at doing a problem in the exam, but the secretion of adrenal hormone makes him suddenly tinkle like brother Hugh, and a

light bulb lights up on his head.

Now can do so exquisite, may not be able to do so exquisite in the future. This is the so-called flash of light, but it is definitely not an epiphany. Therefore, Zhang Fan has to be recorded. As long as he records it, he will go to the liver continuously in the future, and he will keep reviewing this operation in the shortest time, and then this extraordinary play will become a normal level.

Therefore, it's too easy to be a doctor and a doctor for a long time. As long as you are admitted to a licensed doctor, and then find a public hospital to find a relaxed department, you can keep your income in drought and flood. Even if the knife falls from the sky, you can't lose a dollar, and your social status is not low.

But it's hard to be an aspiring doctor. Hard work is the most basic, not to mention talent. Many doctors, after working hard all their life, can only sigh in front of some operations. It's not that they don't work hard enough, it's that they don't have enough talent. This industry, like many technology industries, eats more talent and body when they reach the top.

I know my own things. In addition to being able to bear hardships and being gifted, that is, ordinary people. Although there are plug-ins, this half dead plug-in is fanning the flames and letting Zhang Fan keep having surgery, there is no other help.

Therefore, Zhang Fan had to seize every Changchao play. If you want to go far, you have to pay more than others.

Zhang Fan not only tried to do more surgery, but also didn't put down physical exercise even if he became the dean. Without special circumstances, running around the periphery of the hospital every morning has become a scene of tea. This extraordinary play is the reward of the ascetic monk's life since graduation.

As the operation continued bit by bit, Zhang Fan finally dared to gasp. Just like being a thief, Zhang Fan even controlled his breathing during the operation. If an adult's operation is to dance on an egg shell, then this operation is to dance on an egg membrane.

If one can't jump well, it's a matter of chicken flying eggs.

Although the sweaty slippers are like soaking in water, the operation is slowly becoming more and more stable. Because a large area of skin has been transplanted, Lao Li's material is really good to tell the truth.

Better than any pig skin or Tilapia Skin. Moreover, it has no immune rejection effect, so if this material can not dominate the world in adult scald, it is absolutely a overlord in the field of infant scald.

It can be imagined that for a child at risk, the doctor dared to give the child strong rejection materials,

but there was no such materials.

Therefore, when the child is like patching, the soft and weak trunk, hips and limbs are transplanted with skin materials, the child's life state slowly begins to stabilize.

"Zhang Yuan, blood pressure and heart rate are stable." The anesthesiologist wiped the sweat from his forehead. During the operation, Zhang Fan asked for blood pressure, blood pressure, heart rate and perfusion. To tell you the truth, it's too difficult to follow orders.

Every medication is a risk, but fortunately, I've finally survived now. In his early 40s, he looked at the children on the operating table and the sleeping children. He didn't know what was going on in his heart. He was very proud and pleased. It's like watching your child's mood.

"Good!" Zhang Fan nodded gently. His feelings on the operating table were very single, without excitement or emotion. It was like a lump of meat in front of him, regardless of men and women, old and young.

"Professor Li."

This time Lao Li didn't dare to be distracted again. When Zhang Fan called his name, he responded at the first time " Ah. "

"I need a lot of burn patients now." Zhang Fan is also welcome. Whether he has the ability or not, in a word, I need such a patient now.

"OK, after the operation, I'll contact you immediately." Lao Li's lips were trembling. He saw that Zhang Fan was going to make great efforts to this guide at night.

In fact, where would Zhang Fan think of the guide? After all, his start is too low. He is a medical undergraduate starting in the county hospital. Even if there are academicians and teachers, he is actually studying on his own most of the time. He didn't expect any guide. Now he feels that some details of the operation are beginning to blur. Therefore, in order to win this operation as soon as possible and improve this operation, he needs to do a lot of operations. To stabilize.

"No, let your doctoral students get your materials. You can contact the patient now. You'd better have one in the afternoon. " Zhang Fan was worried, so he directly asked Lao Li to contact him under the operating table.

"It's evening now!" The head nurse in the operating room took a pity look at Zhang Fan whose back had been soaked with sweat and gently inserted a sentence.

To tell the truth, if Zhang Fan dares to interrupt during the operation, it is estimated that she will be the head nurse. After all, when Zhang Fan doesn't rise up again, she will help Zhang Fan either openly or secretly. This is the so-called feeling of incense.

"Oh! It's better to have such an operation tomorrow morning, please! "

"OK, I'll go now." With that, Lao Li got off the operating table. There are tears in my eyes.

Moved, too moved. For his own materials, Zhang Yuan really threw himself down to help. He choked. How many years, how many years, how many years have he never met such a friend. Yes, he is a friend. In the past, he thought Zhang Fan was a helper. Now, he thinks Zhang Fan is his friend.

Zhang Fan on the operating table doesn't know yet. He unknowingly moved Lao Li. If he knew, Zhang Fan would definitely laugh. I was afraid that his perception would disappear. The amount of surgery required by the system is too large. It's too hard to expect to open the burn department early.

This can be regarded as unintentionally planting willows.

In the operating room, the operation has entered the final stage. This kind of long-term operation can't be felt in the operating room, just like a man in love who hasn't taken off each other's pants, the day has passed unconsciously.

Doctors and nurses are still not tired. Really, this is not a lie. It seems that the body knows that this is not the time to find trouble, so it also cooperates. Once the operation is over, the spirit will relax. This long-term operation can definitely make doctors and nurses peel off their skin.

But the observation experts outside the operating room are dead.

Let them have an operation, no problem, but let them watch the operation, it won't work. It's like running a long distance. The driver hasn't said he's tired yet. The driver is about to hang up.

And this long distance also makes them too worried, because none of them wants to Miss Zhang Fan's record. The burn department is a small department, which is also a secondary department. However, this department is small, but there are too many studies on this department.

Not to mention the others, the military Burn Research Institute in Jinmao country is the top presence in this industry, and Jinmao has done too much research in this field. Although they do not participate in the academic community, at present, many burn department treatments are sent out by others.

Therefore, although this department is not as big as General Surgery University and there are no more people studying orthopedics, this department has been solidified long ago. If you want to get ahead, you almost have to have the background of studying in Jinmao country. But now it's different. Although it's children's surgery, it depends on the posture. This is going to give a guide.

One person can't handle a guide, and a large number of people must help. Although they can't get the guide, they still have the qualifications to participate, and in fact, there are not many places to participate.

Therefore, a group of people, eating food from the canteen of the tea vegetable hospital, sat in the observation room, their waist was almost broken, but no one left.

No one talked about surgery, as if everyone came to the operating room of tea vegetable hospital for dinner“ Hey, the braised meat in the tea vegetable hospital is good. Well, horse intestines are also fragrant. ”

"Can it not be fragrant? Zhang Yuan is a gourmet. Don't you know? Last time we had a meeting in modu, Zhang Yuan and I talked about the characteristics of North-South food."

As soon as he said this, the other people looked at him with disbelief, but not a hint.

The self-conscious provoked public anger, "I'm also delicious, I'm also delicious. Without talking about anything else, I talked about diet!"

Expert Zeng was greedy for this group of people to chat. He also wanted to participate, but as long as he passed, the chat ended automatically. He's isolated!

Just when everyone was duplicating, Lao Li came out of the operating room.
