

Chapter 1141

I bought almost all the gifts for returning home. Shaohua's uncle and uncle and Uncle Zhang Fan's bought some small gifts, and Shaohua also brought gifts for Zhang Fan to his colleagues. At the end of 10 years, online shopping in the frontier is still underdeveloped. To tell you the truth, ten years later, special border areas do not include mail!

"You go and be busy!" Zhang Fan said to the translator, which means, don't follow us. As a result, the translator looked embarrassed and said, "I was your assistant before you left marukuni!"

This is someone else's job, and Zhang Fan won't force it. It's not idle people's house that hinders things. It's mainly that Shaohua and Jingshu steal a glance at others when they are free. One is a border girl and the other is a college girl. She is a little wary of this white-collar workplace. Zhang Fan understood at a glance, so he said such a sentence.

Although no one left, Shaohua and Jingshu didn't glance at this sentence. This is actually Zhang Fan's life tips. At noon, Zhang Fan had a good meal with Shao Hua and Jing Shu. Zhang Fan didn't care much about wearing mobile phones and watches that young people can barely wear, or even pursue.

However, for eating, Zhang Fan particularly cares. A restaurant that is said to have been handed down for four or five generations. To tell you the truth, the seafood in meatball country is better than that of Bluebird. Moreover, the eating method is also different. The seafood of bluebird is often similar to the disorderly stewing in the three East cities. A large pot of all kinds of shrimp, shellfish and crabs are cooked in the pot. When they are served, they use super large plates. Not to mention anything else, this momentum alone is quite shocking.

The meatball country, like their country, eats seafood very small. The sushi of tuna and the balls fried with various fish are like a small sacrificial tray. Zhang Fan is a little restrained when eating.

Because he turned his head and looked at the others around him. It seemed that he ate very little. A bowl of rice the size of a wine cup. A man in a ball country is ready to put chopsticks after eating. Zhang Fan seems to be a rice bucket. He's embarrassed to order more.

Finally, Zhang Fan also ate a bowl of pig bone noodles from the meatball country. After dinner, Zhang Fan Balabala " Better than light! "

"The price is not cheap." Shaohua knew that Zhang Fan didn't feel comfortable, but when he thought that this thing would cost hundreds of dollars, he felt a little cheated.

Shao Hua and Zhang fan are almost the same. After having some money, they feel like the richest man. Raising a dog sells rotten fruit mobile phones. Their biggest expenses now are actually the house of mordu and the truck Shaohua bought because of the farm.

For other consumption, what was it like before and what is it like now? Shaohua will never be soft when it's time to bargain. Maybe their childhood life is like this. Someone who has never seen the world.

"Buy Jingshu a watch. The watch here is good. " Shaohua whispered to Zhang Fan when it was convenient for Jingshu to go.

"Well, buy one, and you can buy one. I don't want it. I have an operation. It's inconvenient to take it off and take it up, and... "

"I'm not going to buy it for you. What are you doing?" Shaohua said angrily.

"Ha ha!" Zhang Fan smiled and didn't think about raising the bar.

In the past, Chinese people who came to Marubeni usually bought large items, such as televisions and refrigerators. Later it became small pieces, such as watches. Now most people come and buy cosmetics. Who knows that in the next few years, Chinese people will come here to buy either rice cookers or toilet covers!

I didn't eat well at noon, but I had to buy something, but there was a big meal in the evening. Zhang Fan was looking forward to it.

Although he didn't eat well, Zhang Fan still had to accompany two shopping demons around Tokyo, "take a break and find a place to sit for a while. My legs are broken! " Zhang Fan began to beg for mercy. To tell you the truth, Zhang Fan didn't beg for mercy in a contest with Shaohua or whatever he did.

It seems that humans, like lions, can only ambush cats in the corner. Mobile warfare still won't work. This is caused by genes, not men's laziness!

West iron city, Seiko, Casio. Jingshu wants a Casio, or a pink one. She says she can measure altitude, soak in water and be a thermometer. But Zhang Fan looked at it. What he looked at was an electronic watch. "Buy a mechanical watch. It's all big girls. It's not appropriate to buy a toy watch."

"No, I want this. My sister-in-law bought it for me. You don't understand." Jing Shu's relationship with Shao Hua is quite good.

Shao Hua bought a couple watch for her and Zhang Fan. It is estimated that she was deceived, because the Chinese who sold the watch said that this watch is an electric light meter. As long as you get in the sun, you don't need to wind up or change the battery. But Zhang Fandian always felt that this thing was an electronic watch.

.....

In the evening, Zhang Fan took Shaohua to the local tyrant's banquet "Do you want to dress formally? There's nothing particular about meatballs. "

Zhang Fan asked the translator.

"It's a family dinner. Don't be too formal."

The translator answered with a smile.

Zhang Fan, wearing the suit taken care of by Shao Hua and Shao Hua with light makeup, set off as a car sent by the local tyrant. Zhang Fan thought that such a big local tyrant must be a villa or something. As a result, people didn't live in a villa but an apartment in Tokyo.

It is said to be the most expensive apartment in Jingdong. Anyway, one set is about half a billion in RMB. It's a retest. There is no legendary tatami. It's like the house is full of soft packaging.

The ground is thick beige carpet.

"Zhang sang, welcome!" There is a modern decoration in the room, but the director is wearing kimono and the tyrant's wife is wearing clothes with pillows. It looks young, but it's elegant.

There are not many people invited to the family banquet, not counting Zhang Fan and his wife, but also three people.

One is a doctor in marukuni, the other is a Chinese who came to marukuni in the early years. He is also a doctor, and there is a doctor in Bangzi. These three people are the leaders of the local tyrant's private medical team.

Perhaps they thought that their peers had a common language, perhaps the local tyrant felt pressure on his personal doctor, or for other purposes. Anyway, the eyes of the three people looking at Zhang Fan were not so friendly. Ordinary people don't understand the tyrant's world.

This kind of friendship in front of people is nothing, mostly interests. Cruel and ruthless, no problem at all. Don't laugh, maybe you are not satisfied with your personal doctor.

After a few greetings, the local tyrant took Zhang Fan with them to have tea first. Specially invited tea ceremony masters to perform tea art. After watching for a long time, Zhang Fan didn't drink out with a cup. What's good. He thought he might as well drink Tieguanyin himself.

"Which university did Zhang sang graduate from?" The Chinese asked first.

He came to the meatball country when he was a student. When his family had some money, he followed the tide of staying in Japan caused by Lao Nie playing chess and came to the meatball country. He worked in shuntiantang hospital in marukuo to the middle level, but there was always a ceiling. Later, he changed jobs and became a private doctor for local tyrants.

What do these people say? After returning home a few years ago, they felt superior to others. As a result, they slowly seemed to find that if they didn't come to meatball country in those years, they might be better than now. Therefore, for China and the Chinese people, they have a special mentality.

Maybe I feel like I'm powerful, but I can't make the Chinese feel powerful. So I'm a little eager to show off.

"Lan medical college!" Zhang Fan has no big chauvinism, and he really comes for a big meal. So it's peaceful.

"Oh, I haven't heard of it. I guess I'm ignorant."

"Ha ha!" Zhang Fan smiled and didn't follow. But this Chinese American has a trace of contempt on his face. He has definitely heard of it!

"I heard that Dr. Zhang is an orthopedic doctor?" The doctor of Bangzi country also spoke.

"Yes!"

"Our country is good on the spine. Dr. Zhang doesn't know whether he has cooperated with Chinese spine experts. "

"Oh, No."

"What a pity!" He said it was a pity, but his face seemed to look down on people.

In fact, the local tyrant praised Zhang Fan in front of several people. These private doctors felt like they had lost their beloved concubine. They were full of jealousy. They thought Zhang Fan was also coming to rob bones.

Therefore, the three people, who were not harmonious on weekdays, put aside their prejudices and agreed to go abroad.

"Zhang sang, thanks to your action this time, the dog is in a hurry. It's no respect to prepare a simple meal!"

Although the local tyrants in Marubeni speak strange Chinese, which makes people sound like watching old-fashioned Anti Japanese TV dramas again, they are still very polite.

After chatting a few words, the feast began.

The local tyrant is the local tyrant. The tableware of the big meal looks very good. The sky blue orchid plate. All kinds of bright plates.

A slap in the face oyster. Zhang Fan is so good. He is welcome. After eating, he picked up oysters. Zhang Fan complained: "won't you put some minced garlic? No more seafood sauce! The drenched soup spoils all the ingredients. "

If it weren't for the fact that this thing is really big and fresh, Zhang Fanzhen wouldn't want to eat it.

The so-called golden black truffle in mushrooms is served on the wooden plate, dotted on the and cattle like snowflakes. Put a little butter on the iron plate and fry gently. The slight oil smoke smells very good.

When Zhang Fan came, he was also worried about the local tyrant's human feast.

Sea urchin lobster caviar, especially this thing, also needs to be drenched with a little grapefruit juice when eating. The sweet and bitter taste of plants is mixed with the fishy smell of seafood, which can stimulate an alternative delicacy. To tell the truth, the compound flavor of food is not as perfect as that of China, but what people pay attention to is a fresh one.

The last big dish is bluefin tuna, which is mixed in the fattest place. The puffer fish and the processed crab meat are decorated with white truffle and slightly stained with mustard. When the spicy mustard opens the mouth and nose, the protein in the meat overflows in the mouth.

The juice in the fresh meat overflows, just enough to make the taste buds burst into unspeakable enjoyment.

Shaohua doesn't eat much. She can't stand the smell of the sea. It's too strong. And Zhang Fan really enjoyed it.

Finally had a full meal!

Chapter 1142

Drink. Zhang Fan certainly won't drink.

Zhang Fan didn't even drink this kind of sake with few degrees in Marubeni country. I'm kidding. You can't spoil this meal.

After dinner, the local tyrant took Zhang Fan and several of them to see his collection room. This time I played the piano to the cow.

Zhang Fan and Shao Hua, to put it better, they have no artistic cells. To put it worse, they were ordinary people before and didn't have time to punish this thing. Can a person who can use glass as jade in a tourist area expect them to understand art?

"This is the porcelain of Bianjing official kiln in the Song Dynasty." The local tyrant introduced Zhang Fan and Shao Hua boastfully. Originally thought that Zhang Fan and Shao Hua were not shocked, at least they should have a little surprised expression.

But Zhang Fan was not only surprised, but also slightly skimmed his mouth. Local tyrants thought Zhang Fan had seen or had better, because doctors at Zhang Fan's level should have a wide range of knowledge. In fact, Zhang Fan's rise is too fast. He has never seen it at all.

The local tyrant didn't know. Zhang Fan said in his heart, "it's just a bowl! It's still a cracked broken bowl. What's the show? "

The local tyrant then said, "this is a cold food post imitated by China's great calligraphers."

Zhang fanleng didn't recognize a few words.

Zhang Fan didn't respond at all from beginning to end. The local tyrant was really shocked. This is a man who has seen the world!

"Don't Dr. Zhang think it's beautiful?" Chinese doctors don't call Zhang sang anymore. They call Dr. Zhang directly.

Zhang Fan tilted his head, "Oh, it's OK. Although I was born in a poor province, I have seen a few pottery pots, bronzes and various antiquities handed back by Chinese and Western cultures for thousands of years. "

Zhang Fan lightly pretended to force. He didn't know where he had been to the museum or in which direction the door of Lan City Museum opened. Yiwu mall, which sells homemade instant noodles, has a clear door.

"After all, it is a millennium power. There is still some inside information." Tu haolue said in an emotional tone.

"Zhang sang, I'd like to give you a porcelain from an official kiln in the Song Dynasty. Although it's not exquisite, it's also an antique with an age."

The local tyrant then said. He originally wanted to surprise and shock Zhang Fan, and then took out a gadget to make Zhang Fan grateful. Unfortunately, the abacus was wrong.

"Oh!" Zhang Fan was slightly surprised. I'm really surprised this time.

And the three family doctors looked angry.

"I know it's disrespectful to invite you with money. The last time was in a hurry. I want you to come to Tokyo regularly to review my children. Please be sure to take it! "

"Well!" Zhang Fan said in his heart, give me a broken bowl and want me to work for you? You give money!

Zhang Fan knows that this antique is valuable, but he really doesn't know how valuable it is. In his understanding, this thing is amazing. It sold for tens of thousands of yuan and died.

So, he thought, "I have a public office. It's inconvenient to go abroad."

"In fact, we can also replace Dr. Zhang." The man in the private doctor finally spoke. Since Zhang Fan entered the door, he didn't say a word to Zhang Fan after he nodded and greeted Zhang Fan at the beginning.

At this time, when he saw his boss take out such valuable antiques, he was not calm.

"Yes, after all, Dr. Zhang was operated by other doctors in the United Nations at that time, especially the golden mean and Professor KuoDa of the headquarters of Jingdong University. As for Dr. Zhang, I think it still needs to be honed. After all, Lanshi medical college is not very famous in China. "

The Chinese doctor also spoke. I'm kidding. I've served for many years. The local tyrant didn't give him such a precious gift to Zhang Fan. He would rather give it to the people of the ball country than to the boy.

Zhang Fan smiled and did not fight for steamed bread for breath. If he is in China, he really doesn't care. This kind of dispute of sentiment is too childish. But this time it's different. When you go abroad, you must not let these dwarfs look down on you. It's really not for this broken bowl.

"Hehe. What kind of surgery are you good at?" Zhang Fan didn't lift his head while looking at the broken bowl. It can be said that he is very disrespectful.

Shaohua gently pulled Zhang Fan's clothes. The girl is still too kind.

"I am an orthopedic doctor. I am responsible for the bone problems of the president and his family." The doctor of Bangzi country said proudly.

To tell you the truth, in orthopedics, especially spine surgery, Bangzi country is really superior. Jinmao's top spine surgery is almost dominated by people in Bangzi country.

"I am a general foreigner. It was one of my most proud choices to give up Chinese schools and study medicine in maruzi. "

"I'm in urology." The doctor of MARUKI country said a simple sentence.

"Oh! Why is there no physician?" Zhang Fan raised his head and asked the local tyrant.

"This time I invite you to dinner. I think there should be a topic between you surgeons." The local tyrant didn't seem to recognize the smell of gunpowder, and he still had a polite smile on his face.

There is nothing wrong with this saying that people die for wealth and birds die for food.

"I'm not for this bowl. However, since you think China's medical treatment is not good, I'll try my best to let you see the medical level of China. I'm leaving Tokyo the day after tomorrow. I don't have much time. I have to go shopping with my family tomorrow.

Now I'm full and drunk. You can arrange several operations for me to eliminate food. "

what the hell!

Several private doctors were angry in their eyes.

It's too big for a chicken.

"Are you sure you want to have surgery in three disciplines?"

Asked the doctor of MARUKI.

"Can't you contact the hospital?" Zhang Fan said softly.

"OK, President, please forgive me. I'll prepare for the operation now." The doctor of MARUKI bowed to the local tyrant.

"It's not necessary. Zhang Sang's medical skills are very good." Local tyrants are like persuasion.

"Please!" Now, the other two doctors bowed.

"Hey!" Zhang Fan smiled in his heart. These guys are too crutches. How can they be like children.

In fact, he doesn't quite understand the industry of private doctors in Marubeni.

This industry can't afford to lose. Because local tyrants have money. In their perception, they are not the most expensive, but more expensive. Everything needs the best!

Therefore, when the local tyrants showed their respect for Zhang Fan, these people were not calm.

The operation was scheduled quickly. Local tyrants are shareholders of Shun paradise. Surgery is a telephone thing.

"You take my wife back to the hotel first." Said a sentence to the translator.

Then he turned back and said to Shaohua, "go and have a rest, and then I'll take you to see the night scene at night!"

Shaohua didn't speak much, but gently squeezed Zhang Fan's hand.

Zhang fan understands!

However, not for this broken bowl, Zhang Fan also wants to shine his sharp teeth.

Two small countries and a man who didn't study medicine in his mother tongue, he didn't see it.

Chapter 1143

These three people are not stupid.

Zhang fan can do extrathoracic surgery. They must know that this person's level is not low. At least in the field of thoracic surgery, it is estimated that it already exists at the director level of the National Hospital. But sometimes things in the world can't be carried out according to your wishes.

For example, although the local tyrant didn't say it clearly, he pursued Zhang Fan so much in front of the three of them. If the three of them really don't stand up and say something and do something, the local tyrant's job will be really bad in the future.

Local tyrants actually want to see how high Zhang Fan's level is. This in-depth cooperation, the medical industry represented by him will make a lot of money. Therefore, we must be cautious. Since you touch Zhang Fandi and can beat your personal doctor, don't think about asking for more money day by day. We can also determine whether we should pay much or not.

Three birds with one arrow. To tell the truth, it's not a simple person who can make countless money. Even if you inherit your family, it's really not a simple person to keep such a large amount of money.

Although they looked angry, they were actually quite cautious.

"Orthopedics is not good. I called my senior brother. My senior brother is in the special orthopedic hospital. Said he was good at the spine. My senior brother suggested that we should not choose spinal surgery! "

The doctor of Bangzi country said to the other two colleagues.

In fact, my senior brother said directly that stan in special orthopedics is not Zhang Fan's opponent. Just wash and sleep.

"Yes, you can't choose outside the chest." The doctor of meatball country nodded and said. Zhang Fan has lit the murder weapon outside his chest. It's very powerful and hard, so he can't find a hammer with a walnut.

"Not in orthopedics, not outside the chest. What about urology? " The Chinese doctor threw the pot over.

When three people are in the house, they are quite tough. But when I got out of the house, I began to calculate the atmosphere.

The doctors of Bangzi country directly took out their senior brothers to speak. Their senior brothers are the mainstay of the spine department in the special orthopedic hospital. The Chinese also don't want

Zhang Fan to undergo general surgery, because no matter win or lose, it seems that the cost performance is not high.

Even if they do better than Zhang Fan's operation, they have bright teeth outside their chest. If you lose, will you still have the face to carry others' local tyrants' bowls in the future?

To tell the truth, private doctors, especially the private hospitals of top local tyrants, are really hard to do. They don't say what confidential contracts they sign. The most important thing is to prevent their peers from grabbing jobs. To tell the truth, this kind of position is actually a rich civil servant.

There are no less intrigues than those within the system. Moreover, they have separated from the free and easy of the doctor's profession. Once you leave the local tyrant, the local tyrants of the same level will never invite them.

So, standing on the mountain, they really feel the cool wind rustling.

"Hehe, I suggest general surgery!" Doctors in Marubeni are not stupid " Urinary surgery is too simple for him. It's too difficult to find a suitable patient for a while and a half. It's better to have surgery for gastric cancer. What do you say? " He didn't ask Chinese, but Dr. Bonzi.

"Yes, good for general foreigners! You won't have no confidence! " The doctors in Bangzi country forgot their timidity at the beginning and turned to ridicule Chinese Americans.

"Well! There is no suitable operation for ordinary foreigners. Don't you know that major colleges and universities cooperate with tea to study gastrointestinal tract? " Chinese doctors also say.

"Choose pancreatic surgery!" The doctor of MARUKI country fixed the tone directly with a hammer.

"Well!" The other two looked at him with a cruel expression.

"I just contacted Shuntian hospital. There happened to be a patient with pancreatic tail cancer!" The doctors in Marubeni seemed not to see their faces.

Pancreatic surgery can be said to be the existence of the top boss in general surgery. Even many doctors believe that this disease is the king of cancer. Not to mention anything else, the one who invented rotten fruit was this disease, and a big man surnamed Huang in China was also this disease.

When the three went out, they dug a big hole for Zhang Fan, which they thought was very big.

Pancreatic cancer, first of all, does not mention cancer. This disease, without treatment, has a high degree of pain.

Many people believe that pancreatitis in China in the early years was caused by pancreatic blockage

caused by bile duct problems. Later, slowly with the progress of society, people's living standards improved.

Like Europeans and Americans, this thing has changed from a bile duct factor to a dietary factor.

In particular, some people overeat. Fat elbows can eat one and a half mouthfuls. They look like they have a super strong appetite. As a result, after eating, they suddenly have pain, vomiting and rolling. They can cry like dolls in the moon.

And drinking a lot. A large number of people drank a big meal. They were so drunk that they didn't even know their parents. As a result, pancreatitis came out. Originally, there was a drunk cat. As a result, he woke up in an instant when it hurt.

What is a pancreas?

The body's largest alkaline manufacturing organ. If gastric juice can be compared with hydrochloric acid, pancreatic juice is a strong base.

Once this thing is blocked, it is the existence of corpse powder directly. At least there is a layer of gastric mucosa as a shield.

But there is no pancreas here, so when pancreatic juice is secreted, it will be neutralized with gastric acid in the duodenum. Once blocked, this thing is really God blocking and killing God. The devil blocks and kills the devil. Turn your head directly and dissolve the pancreas.

Pancreatic cancer is even more frightening, just like the pancreas secreting pancreatic juice is a spit, and some cancers begin to stimulate the pancreas to produce a large amount of secretion. If the amount becomes larger, it will not stop secreting.

This is like pouring a piece of sodium hydroxide into a person's intestines. Therefore, patients with pancreatic cancer cannot do without anaesthetic. Many patients become drug addicts in the late stage.

After seeing Shaohua off, Zhang Fan came to shun paradise with the local tyrant.

A lot of people have come to the hospital, all of whom are the ears and eyes of local tyrants.

Zhang Fan looked at it and scolded in his heart, "these people in the special meatball country are cunning."

Zhang Fan thought he had been busy all night and his speech was very successful. As a result, when he went to the hospital, he knew that these people were the owners of rabbits and eagles.

"Zhang sang, I can help you." The director of Jingdong general foreign affairs also came.

"Zhang sang, I can help you too!" The director of general foreign affairs who grows rice also came.

"Thank you!" People are so polite, and Zhang Fan won't be so polite.

"May I ask them to be assistants?" Zhang Fan asked. Although he asked three private doctors, he actually looked at the local tyrant.

"Yes, yes. I still believe Zhang Sang's level! "

"Good!" Zhang Fan nodded.

He said in his heart: "wait, I not only want the bowl, but also your vase when the operation is finished! You can't give it! "

Chapter 1144

A black fat dwarf in China said that bicycle repairers would not hate to sell cooking cakes. Because he can't hate it. Only peers want to die.

If we add another country to this condition, it will be more prominent. Don't look as if everyone is civilized. To tell you the truth, the simplest thing is that many magic doctors in China go to Jinmao country for further study. I can't get into the most high-end operating room of others. They don't know, but you just can't get in. Why can't Guanghua people go in, nor can other people who are not nationals of Jinmao country.

The same goes for MARUKI. In those years, a group of marubian doctors who went from marubian to China later achieved what was not called the golden mean hospital, which made the later marubian particularly alert to Chinese medical treatment. This is also one of the reasons why Chinese people abandoned marubianism and studied Jinmao later.

So later there was a saying that science has no country, but scientists have country.

The Chinese people look down on the people of MARUKI country, and so does Zhang Fan. Despite the cooperative development with the people of Marubeni, in the past six months, Zhang Fan, in addition to his daily work exchanges with them, said to invite them to dinner and invite them to come home for a seat. Zhang Fan didn't do it once.

Zhang Fan and Ouyang are very similar in this point. It is estimated that they were willing to be educated when they were children. After all, the generation who watched tunnel warfare, mine warfare and soldier Zhang GA grow up, even if they don't say it, they are still small balls in their hearts, shouting.

Moreover, Zhang Fan has no idea of communication with the local tyrants of Marubeni. For example, the emirate, he and Zhang Fan call and send text messages from time to time. Although the emirate shows off to Zhang Fan most of the time, Zhang Fan never feels that each other is superficial.

Another example is the son of the Stan tribe, who from time to time came to China with money to spend. He came to Zhang Fan several times.

But for the local tyrant of Marubeni, Zhang Fan is really naked. He pays and I deal. This time, if it weren't for the deep cooperation (asking for money), Zhang Fan wouldn't come to meatball country. Two million is a one hammer deal. What else do you want? There are no doors.

Therefore, some industries pay attention to a boy's skill. In fact, education is not a boy's skill. Learning after growing up is definitely utilitarian. For the sake of money and girls, only childhood education can be serious as a brand. For example, in the movies I saw in those years, all kinds of resistance to meatball countries, although I feel as if it is inappropriate when I grow up, there is always a villain shouting: meatball!

The Chinese people look down on the pill country, and the pill country looks down on the Chinese people. Business is in full swing, but in fact it has not generated much friendship. Therefore, Chinese people especially despise Chinese Americans who go to Marubeni.

In the operating room of Shuntian, Zhang Fan entered the operating room with an extremely calm contempt.

He thought, Marubeni, where can he go?

In the observation room of the operating room, many people came to marukuni. Not only the chaebols, but also a large number of scientists came here. The most prominent is Ben Shuyou, the immunology leader of Marubeni, who also came to the observation room.

"Very young, doctor." Ben Shuyou whispered to the Minister of Shuntian medical department.

"Yes, but his gastrointestinal skills are almost successful."

"Really? I don't know what his skills in pancreas are like?" Ben Shuyou asked softly. The old man was like a pile of rice. He always seemed to whisper.

"Why, your research needs..."

"Yes, my current research has reached a bottleneck. If there is an operation expert to help me, I don't think I need to cooperate with Jinmao country in my research. The operation of the pancreas is too difficult. A little mishandling will lead to significant changes in the experimental data."

The old man's face was wrinkled into chrysanthemums.

The old man's research direction is cancer therapy. Many times, he thinks of it, but he can't do it. Because cancer therapy in living surgery is like bullets and guns. But without a marksman, the bullet couldn't hit where they expected.

Zhang Fan entered the operating room and frowned slightly, because he felt uncomfortable. He didn't feel that he could control the operating room. In the operating room, no matter the nurse or the doctor, he was talking. He couldn't understand.

Just like driving a car, he clearly can drive, but all the data are words that Zhang fan can't understand. Although it doesn't affect driving, it will always make Zhang Fan feel uncomfortable.

Female translator, choose these words that need to be translated to Zhang Fan.

This is like eating a meal was chewed, and then mouth to mouth to feed him, Zhang fanslightly a little upset.

"How did you do with this operation?" Tu Hao looked at Zhang Fan in the operating room and asked a Chinese doctor without looking back.

The Chinese doctor swallowed and spit, and then said awkwardly, "this kind of operation is more difficult."

"Oh!" The local tyrant nodded. They are all people in the Chinese character culture circle. He understood as soon as he heard it. His personal doctor couldn't do this kind of operation.

Speaking of the Chinese character circle, there is a strange place, such as the pill country. People really affirm that their culture comes from the Chinese country on the other side. They keep emphasizing that their culture is authentic, and then they even think that there is no China after Yashan. The Chinese culture has been broken, and they are the successors.

The Bangzi country in another Chinese character circle is different. It not only does not recognize their cultural traditions, but also tries to deny or change their culture. Finally, the names of the people all over the country are read the same way. This is the difference between the two countries.

Disinfection, the operation begins.

In the early years, China did not pay much attention to the pancreas. Since ancient times, pancreatic patients in China have not been particularly high, which is the difference in dietary structure. For example, in Europe and America, these guys love drinking since ancient times, so Europeans and Americans know more about back pain.

Pancreatic cancer is even more frightening. This is a common tumor. Male patients with this disease are common, and the age of onset is often up to 40 years old. The most terrible thing about this cancer is that it is not easy to find, that is to say, it likes to hide and pretend.

Once diagnosed, not only resection or chemotherapy, the prognosis is quite poor. The 5-year survival rate of resection patients is less than 5%, ranking the fourth in the mortality of malignant tumors. Most of these things are pancreatic duct cancer, and they still occur frequently in the head of the pancreas.

Therefore, when patients are diagnosed at the hospital, pancreatic cancer patients often develop into cholangiocarcinoma, pancreatic cancer, even lymph node metastasis and liver metastasis.

What is the pancreas like? How to describe this thing.

It sounds like a maple leaf. The head of the pancreas is the tail of the maple leaf. This place merges with the cystic duct and opens together in the duodenum. The stomach is connected to the duodenum, that is, after gastric acid comes out, it will converge with the solution discharged from the gallbladder and pancreas.

However, there is a little distance between the stomach and the opening of the gallbladder and pancreas. This place is particularly prone to twelve intestinal ulcers, because this section of duodenum directly receives gastric acid, which is why young people are prone to duodenal ulcers. Young people secrete more gastric acid. If the diet is not fixed and they are hungry and full, Absolute duodenal ulcer can't run away.

Because gastric acid secretion is the same as the ebb and flow of the tide, regular. You don't eat at noon, but whether you eat or not, it secretes gastric juice as usual at 12 o'clock, but you don't eat, the concentration of gastric acid is very high, because there is no dilution of food.

Then the stomach acid stayed and the intestines burned. So many young people feel abdominal pain when they are about to eat. It's different to eat some food. Don't think about it, this is twelve finger ulcer!

Gastric ulcer, duodenal ulcer disease can be found early, it also symptoms, and pancreatic cancer, there is no specific symptoms directly, so often are good people, nothing is inappropriate, the result of an attack, we do not understand, people will be gone.

At present, evidence-based medicine shows that if people over forty years old, if there are unexplained weight loss and abdominal pain, what is the case, they must be admitted to the hospital for examination.

Once diagnosed, the first treatment is pancreatic cancer. What kind of prescription and what specific drug should be considered? What can be said is that there is no specific medicine at present. World class millionaires are hanging on this disease. We can imagine how terrible this disease is.

"Start!"

"Start!"

Zhang Fan thought it was too awkward. The operating room was like a repeater. He said it himself, then translated it, and finally the nurse repeated it.

It's also a pity that the female translator is a medical translator, otherwise the conventional translator is expected to cry.

"Supine position, head high and feet low, disinfect your chest and abdomen below the level of your head, including the sides." Zhang Fan decided to disinfect once and began the operation.

"Knife! Select the center position for operation. " Fortunately, although the assistant is not a member of Zhang Fan's team, he has cooperated with Zhang Fan a lot in the past six months, so there is still some tacit understanding. When Zhang Fan finished speaking, others had begun to enter the state.

The principles of tumor surgery are different from those of ordinary surgery. For example, cholecystectomy, even if the stomach is cut, can actually reduce the opening area, so reduce the opening area, in order to reduce damage and unnecessary damage.

So ordinary surgery, doctors do very uncomfortable, a small hole can only be inserted into one finger, but doctors must do things with two hands, so skills are very important.

Tumor surgery is different. It can be opened as large as it can, because after entering the tumor focus, doctors have to explore whether there is tumor metastasis around the tumor.

Therefore, this kind of operation is often a median operation, that is, like the opening of a pig, it is directly opened from the middle of the patient's stomach, from top to bottom.

The intestines will show up next time.

Chapter 1145

The human body is strange. Small organs often represent big trouble.

For example, gallbladder cancer, the size of the gallbladder is the size of a larger purple grape. And with the increase of age, the higher the risk of cancer.

Where is the highest incidence of cancer in the world? Kangaroo country, while Asia, pill first and stick second, China can't get into the top three. It seems that China is very powerful, but in fact it is not, because these countries in the front row have a long life span. But look at the death rate of cancer. China is among the top ten in the world! The Marubeni country can't find the top 50.

Zhang Fan's speed is very fast, because his assistants are also very powerful. It can be said that these assistants can almost represent the highest level of ordinary foreigners in Marubeni.

Doctors and medical researchers are actually slightly different. These doctors are almost all clinical doctors, and have cooperated with Zhang Fan in tea for many times, and the tacit understanding has been cultivated. Especially this kind of high-end doctor, although he can't say to do pancreas, when he is an assistant, he can't do any surgery.

Just like in China, some doctors will say that under the vice high school, no doctor in the capital is better than me. But five years later, he became a vice high school, and he would never do that again.

Why, it is difficult to make further progress.

Laparotomy, pancreatic laparotomy, this kind of operation is rarely seen. Because it is difficult, ordinary hospitals will not do it, but in large hospitals, small doctors can't enter the operating room. Therefore, since the camera was not developed in the early years, this kind of operation has a sense of mystery like a beauty under the veil.

In fact, if you really want to say that this kind of operation is the same as killing pigs, there is little difference. Many people think it's easy to kill a pig with one knife. I don't understand. Pigs are killed to eat, and there are a lot of feces in pig intestines.

Therefore, when butchers kill pigs, they must not damage various organs in the pig's abdomen. A knife can only pierce the heart, and must not hurt other organs. The same is true after opening the belly. If you break the gallbladder, the pork will not eat. It will become bitter. If you break the digestive tract, the pork will stink.

Therefore, Zhang Fan is actually doing this now. After opening his stomach, he doesn't move his pancreas first, so that his pancreas sits quietly there like a quiet virgin.

First, turn the intestines one by one. First look at whether there is tumor metastasis on the intestines, then look at the liver after looking at the intestines, and look under the peritoneum after looking at the liver. It can be said that this operation is like a butcher killing a pig.

The patient, if the field of vision is in the shadowless lamp, can see that the patient's stomach is greatly open, like a large blood hole, and various intestinal organs are constantly turned with blood and water in the abdominal cavity.

If it's made into a video, it's a horror film.

After reading the abdominal cavity, this time is the serious face of the pancreas.

"No abdominal organ metastasis!" Zhang Fan looked up at the two assistants.

The two assistants also nodded and said, "no metastasis of various organs in the abdominal cavity!"

That's for sure.

In medicine, terms confuse ordinary people. Seeing and not seeing are two different things.

No, if metastasis is found after operation, it only shows that the doctor's level is not enough, not the doctor's operation error.

If not, the patient found tumor metastasis after operation, which is not a technical matter, this is a misoperation.

Therefore, it is very difficult for ordinary people to file a medical lawsuit. When the regulations on cases were first formed in this industry, a set of avoidance methods had been formed.

Therefore, ordinary people, except those with energy, of course, don't go to see Du Niang discuss with the doctor before the operation. If you really think the doctor can't, change the hospital to see a doctor and find more outpatient experts.

Some patients, after seeing Du Niang's treatment plan, argue with their attending doctor, "why did you give me omeprazole, or imported, do you want to get a rebate? I'm a hemorrhoid operation. You give me medicine for stomach pain. Do you think I'm a fool? "

The doctor said, you sign, this medicine is not needed. Then the patient has gastrointestinal bleeding due to pain!

Because treatment is actually the same as flying. You can't control your own life. You can only pray that the pilot is professional. This is as like as two peas.

The pancreas, as like as two peas of fat meat, lay on the edge of the intestine, white, greasy and greasy. It is exactly like the meat maggots.

On the tail of the meat maggot, like the skin scalded by boiling water, there was a meat bubble. The pancreas is called the pancreatic head at the opening of the duodenum, and the middle is the pancreatic body, and the tail of the pancreas swings in the abdominal cavity.

If the tumor is at the head of the pancreas, the operation is more difficult, because at this time, it is not only a pancreas, but also a gallbladder, including the liver, which is a large-scale composite operation.

"The tumor did not break or infiltrate." Zhang Fan looked at his pancreas and said what he saw on the operating table.

This is part of the surgical record.

Surgical records, in fact, is why to do an operation, then the process of the operation, then what the doctor saw and did during the operation, and finally the result. This record is signed by the chief surgeon, assistant nurses and even anesthesiologists.

Knife, why is it difficult to operate on the pancreas.

This thing says that it is a solid organ, but it is different from other solid organs. It is like a honeycomb, all kinds of grids, and then all kinds of white fillings in the grid.

When eating meat, many people may eat a small piece of things that think fat meat is not fat meat, bite it open, and then feel that they are fat free like eating a piece of soap.

In fact, the pancreas is just like this.

Once the scalpel accidentally destroys the internal structure, it will remove all the surrounding connected tissues. Otherwise, it will cause pancreatic juice to flow out. The patient can only roll all over the ground and cry for his father and mother in pain.

The knife and sharp knife are in Zhang Fan's hand.

Although the pancreas has no perception, the pancreas also belongs to general surgery, which is a skill in the system. Although Zhang Fan has done less pancreatic surgery, there are many deficiencies in the system.

Accurate, just like a greedy child eating ice cream, the food is particularly beautiful and will not be wasted bit by bit. The knife is like an ice cream spoon in a child's hand. It gently scratches the edge of the pancreas, as if there is no empty knife. However, a thin layer of discolored and bright tissue on the blade clearly tells everyone that the knife scrapes the pancreas.

In the observation room, the ordinary old rich owners of the consortium can't see anything, but Ben Shuyou has seen it.

"It's too powerful. This knife is too powerful."

Chinese private doctors are crying. He thought Zhang Fan was powerful and chose the pancreas, but he didn't expect Zhang Fan to be so powerful.

"I made a mistake. You can let the police punish me. Why did you send you to torture me. What's this called? "

He can't learn this technology even if he reads it. This is the real torture.

Chapter 1146

"How was his operation?" The tyrant can't understand. He had diarrhea with a knife and tossed his hands. Even if he didn't know what Zhang Fan was going to do, he also knew what Zhang Fan was doing. But now it's different. It's like scratching the air with a knife. It doesn't understand. So he asked.

My personal doctor is now a consultant. Of course, the object of inquiry is Chinese doctors engaged in general foreign studies.

"Well done!" The Chinese doctor said with a pepper in his back alveolar.

"Compared with you?" The local tyrant didn't ask implicitly.

"Well, I, my main direction is not the pancreas!" He felt that his job was going to be broken, but he still kept a trace of luck in his heart. Although he was angry, he still had to bite his teeth to explain this rude problem to the local tyrant.

"Yang Jun, you have to refuel. I heard that Zhang sang is an orthopedic doctor!"

The local tyrant looked back at his private doctor with a slightly ironic look. Sometimes when rich people talk, they are also quite angry. Although others say the truth, they feel particularly uncomfortable when listening to them.

For example, when I make friends, I never look at each other's money. Anyway, I don't have as much money as I do.

Local tyrants at this level have no scruples about ordinary private doctors. In his eyes, if the doctor can't reach the level he needs, he will abandon him. Money and no service?

.....

In the operating room, Zhang Fan scraped his pancreas bit by bit with a knife like a pear. Tumor surgery pays attention to a thorough. That is, the tumor tissue seen by the doctor should be cut off as much as it can be cut. Therefore, during the examination of tumor surgery, the doctor will tell the patient that the tumor is small, that is, three or four centimeters.

Then, after the operation, the doctor took a large lump of meat, almost ten kilograms of meat, and told the patient's family. Look, the tumor has been cut off.

The family members are stupid. Isn't it three or four centimeters? It's almost ten kilograms.

In fact, tumor is like ink dripping on white rice paper. When the instrument is checked, it can only determine the place with the most ink, but this thing has already extended a large area. Moreover, the doctor cannot determine whether the black and gray place belongs to the tumor, if there are no large blood vessels, large nerves or important organs.

It is often better to kill the wrong than let go.

This is a bigger organ, and a smaller organ. Like the pancreas. The patient's tumor is on the tail of the pancreas.

Although Zhang Fan cut more than half of the pancreas, the part close to the pancreatic body still can't guarantee whether he has been infected by the tumor. This thing can't be checked with any instrument. Either wait or rely on the doctor's experience.

Therefore, when close to the pancreatic body, Zhang Fan was not soft. According to his practice in the system. This kind of operation must be cut like a radish, so that the catheter in the pancreas can be

closed only when it is clear and normal.

Ben Shuyou looked at Zhang Fan's operation and his frown stretched " I think we can cooperate with Dr. Zhang! And still deep cooperation. "

Many chaebols listened, although they didn't speak, they already had a bottom in their hearts. Who is Ben Shuyou? Although the old man has not yet reached the top, he is much more famous than the old man in the medical field of Marubeni. Of course, the old man later lived up to the people of Marubeni. Eight years later, this guy won a Nobel Prize for cancer treatment.

This award is absolutely heavy. Unlike the Nobel Prize in medical physiology in other biological fields, he directly improved the level of cancer treatment. Among the top scientists, marukuo can really laugh at China's.

How old was Mrs. Tu when she won the prize, and she could work for a few more years, but there were too many people in her fifties who reached the top of marukuo. In the field of scientific research, the age of 50 is still golden.

When Ben Shuyou spoke, the private trio on the local tyrant's side was stupid " Isn't he an orthopedic doctor? "

"Yes!" The one from Bangzi country also wondered.

"I don't know. I didn't expect him to have pancreatic surgery!"

The Chinese is crying.

"Don't you know?" The chat of the three people was heard by a doctor who went to cooperate with the tea vegetable country. Jingdong University, rice growing universities, and many universities have brought doctors cooperating in tea to observe Zhang Fan's operation this time.

"Know what?" Asked the MARUKI doctor of the private trio.

"Although he is an orthopedic doctor, he is the third generation disciple of Qiu sect in China. Do you know Qiu sect?"

The doctor has a great interest in telling them.

As soon as these words were said, the three people looked at each other, and they could see each other's expression of being a fool in their eyes.

Choose around, choose a person's ability to be the doorman.

"How could he be a disciple of Qiu sect? Didn't he graduate from a primary school in a remote area of Northwest China? Aren't all the Qiu sect disciples in the south? "

Chinese private doctors really want to cry.

When the tumor is removed, the operation is much faster because the difficulty is over.

"Dean Zhang, your level of pancreatic surgery is also very high." The assistant smiled and said to Zhang Fan.

Several people haven't spoken since the operation, because they know that Zhang Fan is like a tyrant. He doesn't speak and doesn't let others speak. After half a year of tea, they have been used to this Zhang style surgical atmosphere.

At this time, the operation is almost over, and everyone is living.

"Hehe, not yet! The liver, gallbladder, pancreas and spleen are not separated. My master also said, "let me work more on the pancreas."

Zhang Fan said modestly.

Seeing that Zhang Fan didn't want to do any research on the liver and gallbladder, Lu suggested that Zhang Fan develop towards the pancreas. But there are too few patients with catechin pancreas. It doesn't mean that the northwest people have good eating habits. The main reason is that the population of catechin is too small, and there are relatively few such diseases.

"Oh, ha ha!" Jingdong's director doesn't know what to say.

.....

"Zhang sang, hard work!"

After the operation, Zhang Fan accompanied the patient to the intensive ICU. After the doctors treated the patient for postoperative recovery, he came out of the ICU.

At this time, the local tyrant found Zhang Fan with an old man.

"No hard work, no hard work, there's nothing hard about it. During the operation, I suddenly felt that your bowl was very good! "

"Well!" The sweat is coming down. I've never seen such a naked doctor. Even if his personal doctor is no matter what, he is not so bright and generous, and there is no way to convergence.

"Hehe, don't worry. Don't worry. I'll have you packed and sent to the hotel later. Then you can be

invited to the meatball country later... "

"In fact, I'm a good talker. You don't understand. When you understand, you'll find that I'm easy to deal with. The cost of this operation will be covered with your bowl. I'm really busy. It's inconvenient to come to Tokyo in the future. If you really want to invite me.

Well, I think the vase in your house is also good! "

The local tyrants think the Chinese people are too black hearted.

"This is the chief scientist of cancer in our country, Mr. Ben Shuyou. He wants to talk to you." The local tyrant quickly interrupted Zhang Fan. He can give money, but he really can't bear to collect those things.

During the war years, some people counted that the best batch of antiques flowing out of China went to Marubeni. Although his family is not a top antique, it is also a second top. For example, the bowl was used by the imperial court in the Song Dynasty. The vase Zhang Fan called is even more unusual.

He began to regret that he took Zhang Fan to see his collection. He really couldn't figure it out. Obviously, a doctor who didn't understand anything chose the most expensive one in his collection.

In fact, Zhang Fan didn't know that it was expensive. In the idea of not suffering losses, the vase he asked for was big, so he thought it should be more expensive if it was bigger!

.....

Ben Shuyou smiled and watched Zhang Fan cut down the local tyrant. At his level, he can see through more things. There are not many things you care about.

In his eyes, a doctor of this level can do nothing too much.

"Hello, Dr. Zhang! I'm a professor of medicine at Kyoto University. " The old man bowed slightly.

Zhang Fan quickly bowed back. To tell the truth, he couldn't stand such an old man bowing to him after his childhood education.

"Hello, hello." Zhang Fan doesn't know much about the old man, because the old man is now a scientist in meatball country.

Just like the local tyrants, although they are all local tyrants, everyone is familiar with the richest man, but the local tyrants below the richest man are not particularly worried. Who wants to know if he eats with a golden bowl.

"Mr. benshuyou has won the honor of foreign academician of the Academy of Sciences of Jinmao country, and is also the head of the Kyoto Medical Chemistry Research Office. He is currently working

with scholars of Jinmao country to study the treatment of negative tumors."

The director of Jingdong University, the first assistant of Zhang Fan's operation, quickly explained to Zhang Fan.

During the half year cooperation with Zhang Fan, he was also confused. Zhang Fan's level was really high, but he seemed to be a lame, a clinical Superman, but in scientific research, he was a master's level, which seemed a little flattered.

Therefore, sometimes, the director is confused. Is this his talent, or does he pretend to be a pig and eat a tiger?

Zhang Fan doesn't know whether to treat negativity or positivity. Because this has reached the genetic level, he has not even entered the scientific research door, so he generally doesn't pay attention to this top research.

It's no use trying. He doesn't understand. At present, the basic clinical disciplines of the system have not been fully opened.

However, he knows that this old man is awesome. If Qiu always has a divine presence in the clinical field of China, this old man is estimated to be the top presence in the ball country in terms of scientific research.

"Oh, oh, old man, nice to meet you." How brilliant Zhang Fan smiles.

He took the old man's hand and shook it like a little wolf dog when he saw a meat bun.

The old man is also lovely. Seeing that Zhang Fan is so enthusiastic, although he is not used to it, he still lets Zhang Fan hold his hand.

"Zhang sang, I'd like to ask you a favor."

"You're welcome. Just call me Xiao Zhang. I'm not qualified to be a student in your position in the scientific community. You're too polite. If you have anything to tell me."

Zhang Fan's smile is not a passion. The local tyrant standing on one side scolded his mother "I give you millions, millions, you don't even have a smiling face! I don't have a card! "

Director of Jingdong University, looking at Zhang Fan's smiling face at this time, he remembered the old lady who was far away in tea.

This smiling face is too familiar to him.

Because in the tea vegetable country, they let the old lady be a donkey. They not only have surgery, go

to the laboratory, but also go to the clinic, but also take students. Even every pill doctor who goes to the tea vegetable country has to give lectures regularly.

Chapter 1147

If the medical level of tea element falls into an average level, it is about the top level in the provincial capital.

Zhang Fan's credit is to shake people. He is just like a big chrysanthemum in autumn. Just bloom, and then pull Li Cunhou of the golden mean, Lu Lao of the green bird, Wu Lao of the magic capital, and the doctor of the pill country to tea.

The rest is Ouyang's. Ouyang is looking for an opportunity to let these big guys go to the tea vegetable clinic. To tell the truth, whenever such a big man goes to the clinic, Ouyang almost stops all hospital activities, and then asks a large number of young doctors to follow these big men to the clinic.

Sometimes, a big man comes to the door, and there are more doctors than patients. A pile of white coats in Wuyang are standing in the outpatient room. Sometimes patients are afraid to enter the outpatient room. What is this!

To tell the truth, it's really valuable to stand around such a big man and learn other people's technology. Sometimes, some small details of the big man can benefit ordinary doctors a lot.

Therefore, whenever Zhang Fan meets a top medical scholar, he wonders whether he can get tea.

This time, Zhang Fan paid attention to Ben Shuyou. His heart is big enough. Although his level in the pill country has not yet reached the peak, he is still a figure in the national treasure level. It can almost be compared with the level of Wu Lao in China.

Li Cunhou, director of Jingdong general foreign education, doctors at this level are like a child in front of others.

"I can't afford to invite you!" The old man smiled and said to Zhang Fan.

"You see what you said, can we still talk about this between doctors? You look down on people too much." Zhang Fan said quite generously that his black face was not red at all, as if he had not done what had just happened.

Anyway, Zhang Fan didn't feel embarrassed at all. Ouyang has already practiced his face. Sometimes people, it's really important to have a good master!

The old man invited Zhang Fan to a small conference room in Shuntian.

.....

"You talk to him. I need him to come to Tokyo regularly to review my children. One million yuan at a time." The local tyrant felt that he was a layman and suffered too much when talking to Zhang Fan. So in line with the idea of waste reuse, he directly asked his Chinese American private doctor to talk about it.

Chinese doctors are really crying this time! He really wanted to say: can I not go. But looking at the local tyrant Tieqing's face, he thought he'd better go.

"How's it going? How's the assessment going?" The chaebols are also meeting.

"After evaluation, I think we should increase cooperation with the people's Hospital of chasu City, but at present, we are a little passive.

Because the current mode of cooperation is very disadvantageous to us. All the initiative is in the hands of tea vegetarians. Our simple and passive investment is not conducive to us. If we want to deepen cooperation, we must let tea vegetable give up some power."

Medical professionals in charge of investment began to explain to the chaebols.

"The two heads of the people's Hospital of chasu city are too strong." Director Jingdong, who went to Marubeni to lead the cooperation, touched his forehead and said sadly to the audience.

In the past six months, he has learned the skills of Ouyang and Zhang Fan. It's delicious and delicious. It's for you. Even the rooms where the government entertains the leaders have become the regular houses of these experts. To tell the truth, he's really not so busy.

"We can recover capital and even assist in construction, but we must master some rights. It's not too late. When President Zhang returns home this time, I suggest sending a professional negotiation team. At present, the chasu hospital has reached a bottleneck. Their infrastructure and even the equipment of some departments need to be updated.

The city where they live can never afford this fund. This is their weakness. Without advanced equipment and abundant funds, they can't retain talents. We can even start from this point, bite this point, and they will definitely let go. "

People in Marubeni are not stupid either. They see the shortcomings of the tea vegetable hospital at present.

"Can president Zhang come to our country?" Asked one of the chaebols.

"This is more difficult. China is no longer the era when it would run out if it had the opportunity more than a decade ago, and this generation has a stronger sense of pride and self-confidence."

"You can try." Capitalists are capitalists. They think they must try if they can exchange the least cost for the greatest benefit.

.....

"At present, my research has entered the stage of clinical trial. There is too much difference between human body in vivo test and animal in vivo test. Our current drugs often fail to reach accurate delivery, so the experimental data are not very good. I think you can try, such as drug delivery to target organs, and each time it is delivered at the same location and at the same quantity, which requires too much surgical technology. I hope you can participate. "

The old man explained to Zhang Fan the purpose of the research for more than half an hour.

To tell the truth, from beginning to end, Zhang Fan heard it in fog and water. It's too difficult to understand, from the manufacture of macromolecular drugs to the evaluation of molecular level. This thing is too difficult to understand. When medical students go to school, they are afraid to take an examination of a subject, not internal medicine or surgery.

But biochemistry, as everyone said, biochemistry is especially a myth!

Fortunately, at the end, Zhang Fan understood. They need a master to deliver their drugs to the target organs accurately. And every time the error can not be hit.

That is the so-called fixed-time quantitative fixed-point. Because of this thing, sometimes experimental drugs are different from the human body, and then the error of drug dosage at another place leads to the error of effect, and then magnified to the error of data, there is no way to find the really needed data directly.

Therefore, the old man is now equal to the experimental data card.

After observing the operation, he felt that Zhang Fan might meet the requirements. So the old man is

very polite.

Zhang Fan thought, this level of experiment, whether he wants to participate or not, he must want to participate. But he doesn't want to come to MARUKI.

"Great, this experiment is great. I think this experiment is definitely a cross era experiment! It can definitely improve the survival rate of patients." Zhang Fan seemed to understand. What he said to the old man was quite exciting.

The old man nodded happily.

"But I am an official of China! You know, it's really inconvenient for me to go abroad. This time is a special case. It's a little difficult if I go abroad frequently. You know I'm also a hospital director. My work is really busy.

We have established a national level laboratory in tea, especially the laminar flow aseptic laboratory, which can be said to be the top in Asia. Moreover, the special orthopedic hospital has sent us several state-of-the-art MRI, which is absolutely the best in tumor stratification... "

Zhang Fan is good. Ouyang taught him that negotiation is actually the same as war. You must not let people lead you by the nose. He hits him and you hit you. This is the best.

So Zhang Fan began to show off.

"And, my teacher, you know. It is the most powerful general foreign doctor in China and the top leader of the general foreign Association. As long as we need, thousands of top general foreign doctors participate in our experiment.

You can think about it. If there were 100 doctors at my level, would your experimental progress be greatly improved? "

The old man thinks Zhang Fan treats him as a fool! A hundred? Is this Chinese cabbage?

Chapter 1148

Zhang Fan looked at the old man as if he was frightened, and muttered in his heart, "is this old boy so ignorant? Are you frightened by the scale of the tea vegetable city hospital? It's also a figure at the academician level. Why are you so ignorant! "

Zhang Fan slightly exaggerated the scale of tea element. What sounds good is fame, and what doesn't sound good is boasting. The special orthopedic hospital has indeed cooperated with tea element, but the top equipment started from Jinmao country. It is said that Stan spent a lot of effort on this matter.

Many officials in Jinmao country oppose the export of this high-end equipment to China.

Because your copy skills are too powerful. Although you can't do the best with the talent of full industrial points, you don't have any problem painting a tiger like a cat. Therefore, the orthopedic research institute was three stories high before the equipment started.

As for the laboratory, it's hard to say. The equipment is single. Zhang Fan only wants to buy when he is doing something at present, so the things inside are like rural canteens. You can see huazi, but you can't see Lotus king. There are at the top, and then directly to the low end, but not at the middle end!

The old man looked at Zhang Fan, slightly opened and closed his lips, and finally said, "you are not very similar to your master!"

I don't know if the old man is surprised. Zhang Fan is really surprised!

What's this called? I don't dislike your old age even if I suffer some losses. I want to associate with your peers. Unexpectedly, you touch it like I'm cheap!

Although the doctor is not an old literati, he is also a cultural man, and he thinks of arrogance at the level of others. If you can say something like or not from your mouth, it definitely has a special relationship with your master. At this level, sometimes in order to avoid suspicion, they even know it clearly, but they say they don't understand it.

Just like old Zhou's swearing in those days, what he looked like from a distance and what he looked like from a distance, all the things in his bones were unattractive and unconvinced.

"Well, are you familiar with my master?" Zhang Fan really wants to hear that he is not familiar with each other. If he is really familiar, his knives are raised. He is really embarrassed to cut them off.

"In the 47th year of Showa, I was a visiting researcher at NIH (molecular genetics research in the golden Maoist country) in Jinmao, and your Master Lu Lao was a researcher at the Department of liver diseases. They are all Asians. In those years, we could be regarded as fellow townsmen in the European border, so the relationship is good. Think about how many years it has been, and his students have now become experts! "

The old man said slowly as he remembered.

Zhang Fan looked at the old man and thought he was a chicken thief“ It's too cheap! " To tell the truth, Zhang Fan is not satisfied with the situation of tea vegetable hospital.

The current situation of the tea vegetable hospital is that there is no money. We wait for Zhang Fan to go out and find a local tyrant to kill. After killing, he will go home for the new year. If he can't find a local tyrant, the research of the hospital will slowly crawl forward like taking a slow medicine.

This is because in the high-end field, tea vegetable hospital can be said to be blank. Zhao Yanfang and several doctors who joined later, even if they were covered with iron, they could hit a few nails. Therefore, Zhang Fan is really worried about the lack of high-end leaders.

Seeing the old man, Zhang Fan is really a knife and a hoe. If he can't dig, he'll bleed. Anyway, we should get some benefits from both sides. As a result, there is no way now.

Think about it and you will understand that if Zhang Fan digs old man Lu from Qingniao to tea, it is estimated that the government of Qingniao will put Zhang Fan on the blacklist and will not give him air tickets to Qingniao in the future.

On this thought, Zhang Fan was no longer interested in greeting the old man. There's nothing to talk about with a bad old man. I don't understand what you said!

"Oh, that's nice!" Zhang Fan began to be perfunctory.

The old man hasn't noticed yet.

"In fact, I have seen your master's operation in those years. When he was your age, his knife technique was definitely not as accurate as yours. Even if I haven't seen your master for a long time now, I think you should be superior in the operation.

My current research, are you interested in giving it a try. If the research results are better, there may be a possibility of a high probability of making a promise. "

"Blow, you can blow hard. This guy is a charlatan! "

There are few doctors who have won the Nobel Prize. Except for the Swedish doctor k who invented the K-type operation in his early years, the others almost rely on Physiology or biology. It is almost impossible to rely solely on clinical treatment. In fact, according to the current doctors, Lao K's technique is not difficult, that is, separating the duodenum and pancreas from the side. And this hometown was acquired in 1909, almost in the 19th century.

In modern times, when you say that a biologist has won a Nobel Prize in medicine, everyone believes

that you say that a chemist, brother Huo Nobel, also believes that if you say that a clinician has won a Nobel Prize, everyone does not believe it. Because in the era when the human body is rotten, it is impossible to find a big invention and discovery.

It's probably only neurology that can be expected.

The old man told Zhang Fan for a long time, but Zhang Fan didn't understand. The old man studies tumors. In fact, he develops drugs. Zhang Fan's main business is tumors as an old man.

"Oh, tumor, I'm not very interested in scientific research!" Zhang Fan is impatient. If you can't get cheap, it's strange to be patient.

"Hehe, I can invite you to see my laboratory." The old man doesn't give up. He also wondered, shouldn't the relationship between Lu and Lao be further released? Why does this boy seem to suddenly refuse people thousands of miles away.

However, he felt that if he showed the young man the laboratory, he might be like other young talents. He could not say goodbye to the Buddha. He always couldn't refuse his invitation.

"Inconvenient!" Zhang Fan thinks this rejection is obvious enough. You can understand when you're a doctor.

In medicine, there are a lot of slang. In fact, it is not slang, that is, in special circumstances, the words between doctors in order to avoid unnecessary trouble.

For example, a doctor received a patient, and then the superior doctor said to the subordinate doctor, "this is boss Wang. He has a wide network and has a big business." Then, the lower level doctor nodded clearly. The patient is also happy, hey! The doctor praised me. Let the junior doctor take care of me.

In fact, it was not the superior doctor who asked the subordinate doctor to lick it. Instead, tell the lower level doctor that this guy must be tested for HIV.

In addition, for serious patients who need to be taken care of, doctors at higher levels often say that bed 9 should do whatever it takes. If the lower level doctor is serious, he will ask you the next day when the higher level doctor comes to cover his face. Once you can't answer, just

You can do whatever you want. In fact, it means that this person takes care of it.

For example, this man is a teacher, this man's family is a policeman, and this man's brother is our colleague. The superior doctor seems to get close to the patient in front of the patient. In fact, it's not. This is to tell the subordinate doctor to pay attention when talking and don't talk nonsense.

"Convenient, convenient, nothing inconvenient." The old man was very enthusiastic and made up his mind to pull Zhang Fan.

Zhang Fan thought for a while and had to tell the truth.

"The main reason is that I have a lot of research projects, and I'm very tense in time. Even after seeing your laboratory, I don't have time!"

"Well!" As soon as the old man heard this, why did the young man wait for a while.

You have time to operate on local tyrants. Why don't you have time to come to my laboratory. Is it money? No, Lu's Apprentice doesn't value money so much. Yes, he must be.

The old man followed his own outlook on life and felt that Zhang Fan should be like this, otherwise he might not be able to achieve such a high level of surgery by relying on talent alone.

If Zhang Fan knew the old man's idea, he would definitely despise him. How old are you and how old am I. You can't eat anything. Can I compare my age with you!

After talking with the old man for a long time, both of them were happy at the beginning, but they were not satisfied after talking.

Not long after Zhang Fan went out, master called.

"I heard Professor Ben Shuyou invited you?"

Zhang Fan's heart clattered, "the old man looked shaky, and the complaint was very sharp."

"Yes, the little old man invited me, but don't worry, I'm not a traitor!"

"Hehe! I want you to go, and people will like you!" Zhang Fan laughed at the old man in a word.

How many old Lu students, who are like him, open their mouths and talk nonsense.

"I don't like him either. Open my mouth and say he can win the Nobel prize!" Zhang Fan continues to black old man with the phone.

"Ah! They may be really good!" Lu sighed. At Lu's level, to tell the truth, the old man can't do surgery. When it comes to scientific research, it's really a long way from the Nobel Prize. So for the acquaintances of that year, they also had a lot of emotion.

"Really?"

"Well, I mean, if you really have time, it's a long experience to participate."

"You said, I invited the old man to tea, but you said it might not." Zhang Fan's heart is hot.

"How dare you think!" Although the old man said so, he still said to Zhang Fan: "visiting professors were not bad at that time, but your tea vegetable college only has animal clinical science. You can't let others be a professor of animal clinical science!"

"Oh!" Zhang Fan's heart is really itchy.

"Professor Ben Shuyou has quite high attainments in oncology. I suggest you find time to study." The old man also knows that Zhang Fan is busy now. However, he felt that the executive dean was empty, and it was important to learn high-end scientific research.

After hanging up, Zhang Fan thought in his heart, who knows if it's ok if he doesn't try?

While Zhang Fan pondered over his old capital, the Research Conference on Marubeni's side was also over. Chaebol and major universities in Marubeni have decided to carry out in-depth cooperation with the chasu hospital.

.....

"Is the operation finished?" Back to the hotel, Shao Hua and Jing Shu's face were covered with the mask of meatball country, lying in bed chatting.

"It's done. You're a beauty group! Have you packed your things? " Zhang fanle said.

"Packed up. Someone just came and gave me a gift. I opened it and saw how the bowl collected by the local tyrant came?"

"Huh? The vase didn't come? " Zhang Fan wondered.

"There's no vase, but the giver said, come back and let the translator contact."

After Zhang Fan gave a sound, he took the bowl and looked carefully. He's not appreciating. He can't appreciate it. He was looking to see if it would be swapped. Although he couldn't see how good it was, he remembered the crack of the bowl when he was at the local tyrant's house.

Chapter 1149

There are many addictive things, which also shows that people can't stand temptation from another side. For example, there are all kinds of drugs (a) that are strongly addictive, slightly less, such as cigarettes and alcohol.

Especially alcohol. Many people think that the state does not allow the production and sale of high

alcohol because they are afraid that everyone is drunk. They want everyone to drink more bottles of low alcohol wine and spend more money. In fact, the state is not afraid that you are drunk, but that you are addicted. The higher the alcohol level, the more addictive it is.

Severe alcohol addicts often have no more mild symptoms than drug (a) addicts. They often have been drinking for many years. When they don't drink, their hands shake like Parkinson's. If they don't drink, they seem to be drunk. Take a sip of wine and live. His hands stopped shaking, then he spoke clearly and walked straight.

You don't have to smoke. It is estimated that many smokers will have the experience of lying on the ground and searching for cigarette butts in the house one night or when they have no money in their pocket.

Once again, for example, eating sweets and chili peppers can be addictive. Some people don't eat hot pot for a few days. It seems that life has no meaning. At this time, you have to pay attention. You may not be greedy for hot pot, but greedy for pepper.

In fact, it is the same for collection. Some people are completely addicted to collection. For example, the local tyrant of Marubeni is very addicted. The porcelain bowl given to Zhang Fan. To tell you the truth, the meat hurts. If it weren't for your son's illness, would you give you antiques? make fun of!

In fact, he doesn't know Zhang Fan. Giving money may make Zhang Fan happier than giving antiques.

Zhang Fan wants his vase. It's killing him. Therefore, in line with the idea of waste reuse, he sent Zhang Fan as a lobbyist.

He just said, can you use money? Don't worry about my vase.

The Chinese doctor was unlucky. He really wanted to say to the local tyrant that I am from the meatball country and I quit! But think about the high college tuition of his two sons and his little daughter-in-law. He can't say that.

After taking someone else's things, Zhang Fan has to meet someone else. After the translation contact, a look, ha ha, fan you! What is courteous before and after, that is. Chinese doctors are very polite, which makes Zhang Fan feel that this man has suddenly returned his temper.

When we first met, the man's head seemed to tilt 45 ° upward. When we looked at Zhang Fan, it seemed to use the corners of our eyes. But now, the standard ball bow is so polite and smaller than a small ball.

And looking at Zhang Fan's eyes, I really want to say that sentence in the legend. I don't know where it comes from and go deep.

Zhang Fan really wants to say: Yo, you have learned the etiquette of the meatball country.

But fortunately, Zhang Fan is not like that.

"What? have you got anything to do? Will you take me to get the vase myself? " Of course, ridicule is impossible, but it's sure to ask where the vase goes. If the local tyrant doesn't want Zhang Fan to see his son again, the bowl will never be delivered. Now that the bowl comes, the vase should not be far away.

After the Chinese doctor's teeth were broken, the little expectation in his heart made Zhang Fan's words noisy. When Zhang Fan showed his technology, he felt that Zhang Fan was an expert, and an expert should have the style and bearing of an expert. As a result, it was still a lie in the world!

Why is it so difficult to deal with people? Has China let all the new generation of young people look at money? Have the Chinese forgotten being docile, courteous and kind?

However, even if he is angry inside, he still has to maintain his demeanor and bearing on his face. It's not his high quality. He's afraid that Zhang Fan will turn around and go.

"Zhang sang, please accept my respect!" Then another bow came.

"All right, all right. If you have something to say, we can't do this. " Zhang Fan actually didn't finish. He let the other party bow around. He felt like a black-and-white photo was hung on the wall.

Zhang Fan looked at him and really wanted to say, why did you know today. If you had been a little kinder, would I treat you like this today. Anyway, you are also from China. If you don't love each other, at least you are from the same root! Will I embarrass you for no reason?

Lao Zuo, who recovered tea in those years, said that he was sharp when he was humble and cautious when he was rich. But in the world, there are many humble and cautious fighters, and many arrogant and powerful villains. When looking at him, Zhang Fan thought of a spy film he had seen when he just graduated. The scene that shocked him at that time was not that he envied Lao Yu for sleeping in Cuiping, but that Lao Yu was surprised when Luqiao mountain was in trouble.

Chinese people pay attention to chasing the high and stepping on the low, but the scene at that time really shocked Zhang Fan.

"I won't invite you to your room. There's a coffee bar in the corner of the hall. Let's go and talk. I came down in a hurry and forgot my wallet. "

"Well, I brought it, I brought it, please, please!" The Chinese doctor looked at Zhang Fan in surprise. He really didn't think there were such stingy people in the world. Normally, doctors at Zhang Fan's level should not be short of money, but this is really a strict student.

In fact, he didn't know how terrible a doctor with a mortgage was. Confiscating his chat fee was already quite painful.

Ordered a cup of so-called cappuccino, and Zhang Fan stirred the coffee. Zhang Fan seems to have the same quality of life as his parents, not like a reformed person. For example, tea, he never drank other drinks since he took a sip of Tieguanyin in Batu's office for the first time. He thinks this is the best.

As for coffee, he thought it was too sweet with sugar, and it was too bitter without sugar.

Although he is still in the leading position, he has hardly changed except to taste better. He keeps up with the fashion. To tell the truth, if Shaohua hadn't pressed him, his haircut would have been solved by the hairdresser in the hospital.

Perhaps this stubborn or boring character can make him brush surgery again and again in the system.

"Zhang sang, in fact, according to your level, staying in China will only be a waste. After all, China is still very poor. You can come to meatball country or even go to Jinmao country. Let's say that you will be honored as a guest of honor when you come to the meatball country. The air here is good and the environment is good. There is Mount Fuji on the head and cherry blossoms all over the mountain on the head. And the quality of life is also very high! "

The Chinese doctor looked at Zhang Fan and said with a smile. Although he feels that Zhang Fan's youth makes him angry, technology is technology. This thing is real. So he said what he thought.

If he had Zhang Fan's skills, he might have gone to the golden Mao country.

To tell the truth, if Zhang Fan hadn't been for the vase, he really didn't want to talk to this guy. This thing probably hasn't received a little patriotic education.

"Hehe, didn't you also say that the guest of honor is also a guest of honor. There is no freedom to be a master. As for the environment you said, ha ha! Not to mention other places in China, let's talk about my tea element. There are flowers in spring, months in autumn, cool wind in summer and snow in winter. I want to see the original forest in the forest. I want to see that the grassland is not much smaller than your meatball country. Want to see the lake with Sailimu. Why should I go to other countries! "

Zhang Fan began to get impatient.

"Say, why curse!" The muscles on the Chinese doctor's face jumped. But I still pretend I don't understand. But he also saw Zhang Fan's impatience.

"Zhang sang, actually, I'm here to give you money."

"Oh!" Zhang Fan finally raised his interest.

"As long as you like, you can get 300000 each time you come to maruzi country. The president has promised. " In fact, the president of the company said one million yuan. He decided to save money for the owner and directly set 300000 yuan.

"Oh?" Zhang Fan thought, "do you mean the vase is not given?" Zhang Fan still didn't forget the vase.

It's not that he likes antiques, but that he thinks they are worth more than 300000. Anyway, the vase is also Chinese, and we have avenged our country.

"In fact, antiques are not so good." The Chinese doctor hid his words and dared not look at Zhang Fan.

"He is a profiteer. If he knows anything, antiques should be collected by those who know!" Well, Zhang Fan suddenly became an antique group!

With that, Zhang Fan was completely impatient.

China's medical treatment, the main medical treatment is non-profit. If the other party is a Chinese, Zhang Fan wants people's heart and flesh so quietly, it is playing with the law. But this non-profit does not include foreigners!

Zhang Fan doesn't have so much love to save the world.

He simply felt that the vase was more expensive than 300000, and the Chinese doctor also lifted a stone and hit his foot. If you see Zhang Fan and speak a million directly, Zhang Fan will never say that there is no vase.

"Zhang sang, Zhang sang!" You can't call Grandpa. You're all foreigners. Zhang Fan is a little tired after the operation. There's nothing to talk about with this two devils. He left without looking back.

.....

"What, a vase? fuck! Can't you add money? " The local tyrant is going crazy. He has made up his mind that he will never show off his collection again. Touching the vase with tears, I thought about my son and touched the vase. While thinking about his son, he touched the vase.

Finally, the vase was entrusted to Zhang Fan.

"Why do you want so many bottles. It's hard to take it. " Shao Hua looked at the half man tall vase and its head was big. It's really hard to carry.

"What do you know? This is culture. What do you know!" Zhang Fan looked at the half man tall vase. In fact, he had a headache and a little meat pain. He regretted that the local tyrant didn't increase the price. He really sent the vase.

Really, stock speculation has become a shareholder. Of course, now Zhang Fan's mouth is hard, and only his mouth is hard.

Shao Hua and Jing Shu revolved around the vase.

"Sister-in-law, I think it will dust at home. Look, how deep it is!"

.....

On the return trip, Zhang Fan was a family when he came. On the return trip, the consortium directly sent an airliner to fly directly to tea vegetable. Of course, it was not to send Zhang Fan specially. Although people said to send Zhang Fan specially, it was actually because of the negotiation team.

This time, the consortium sent a professional negotiation team of almost 50 or 60 people, from medical treatment to scientific research, from law to accounting, and directly filled the big plane.

"Back? Your Zhang Yuan is back. Come on, come on, come on, get ready, get ready. You Zhang Yuan brought 50 or 60 people to tea, all of which came to give money. You must treat them well, you must treat them well!"

"I'm going to the government now. It's such a big thing. " Ouyang's excited face was rouge red.

The tea government really doesn't know, but the Ministry of foreign affairs has notified the bird city government. A large medical negotiation team from Marubeni went to tea!

Chapter 1150

Zhang Fan's plane hasn't taken off yet. Tea Su and even the frontier government are alarmed. If the Yangcheng sheep fair can attract the attention of the world, the bird fair in the frontier bird market can only attract a group of tin bottle stans selling carpets, plus old maozi selling minerals and chocolate.

Sometimes, high-tech enterprises really want to move their factories to the northwest. Unfortunately, too many talents can't be retained here, so it's over. This time, it's different. The top universities and top pharmaceutical enterprises in Marubeni country organized a group to tea vegetarians. It's a joke. It's too

scary.

Just like one day, the golden mean united with Shuimu to pull three horses to invest in a poor small county in the country, the county leaders are estimated to be excited and worried that they can't sleep. They are deeply afraid that after waking up the next day, this matter will become a rumor.

"Quickly, organize an evaluation team to evaluate the people's Hospital of chasu city before the team from Marubeni comes to chasu. If it meets the standard, I think the hospital should be upgraded and managed by the province. If we slow down a little and the Ministry of health comes and takes charge of it, we will have nothing to do. "

In a word, the chief of the science, education, culture and Health Department of niaoshi finance department is the God of wealth. He is specially responsible for funding, and the Department of health has the biggest leadership directly, because the evaluation of hospitals, especially senior official hospitals, must be evaluated by the Ministry of health, but niaoshi is deeply afraid that the tea vegetable city hospital will become a cool hospital directly under the Ministry of health, So they are prepared to invest first and then apply as long as they meet the conditions, just like getting on the bus first and then making up the ticket.

If the Ministry of health really wants to be directly under the central government, it must be a lawsuit. A big Niutou motorcade started from the bird market and went straight to tea vegetable.

.....

Of course, the bird market did not want to inform the Ministry of health, and certainly will not inform the tea government. On the side of the tea vegetable government, there was jubilation from top to bottom. In particular, the boss of chasu, this is a naked political achievement. The groundbreaking chasu has such a scale and level of investment group to come to chasu. He is not proud. He is already very standard.

Some people will also say that this is the efforts of others' tea vegetable city hospital, which has something to do with you. But at this time, people have something to say " I give the most initiative to the people's Hospital of chasu city. Without my enlightened governance, how can there be such an active scientific research atmosphere in the people's Hospital of chasu city? The oil city next door is richer than us. Their hospital is about to be merged by us! "

But relatively speaking, the leader in charge of health has a slight discomfort in his stomach. How to say, nominally, he is the superior leader in charge of the people's Hospital of chasu City, but in fact, because

of the indulgence of the boss of chasu, he has no dominant power in the finance of the people's Hospital of chasu city and no way to speak about the personnel power.

When Ouyang just took office, it was OK to get an undergraduate into the tea vegetable hospital. When Ouyang stood firm until Zhang Fan became a legal person, let alone an individual, it was even troublesome to contract a canteen. Although the tea vegetable city hospital is successful at present, he also has credit, but it seems that there is a little feeling of being strong. If you can't move, others will move by themselves.

.....

In the urban area, it's like being robbed. The broken houses along the street can be demolished, and the ones that can't be demolished are painted with white powder. On the streets, the original gardens in winter are full of snow. In order to reflect the double increase of tea and people's material and civilization, a large-scale ice sculpture was made.

To tell the truth, the civil servants in the system are about to scold. For ordinary civil servants, it doesn't matter whether they come to the boss or not. But now they don't have a boss at the weekend. They have to work overtime. In cold weather, they have to wipe the iron railing in the middle of the road with a wet rag.

Of course, there are also happy. It is said that the boss of an art company specializing in ice sculpture is crazy with laughter. This frontier is different from the three cities in the East. The three cities in the East do ice carvings every year. It is estimated that there are historical factors. Tea can't do this here.

The boss of the art company was thinking about withdrawing the stall. Unexpectedly, the business was going yellow. As a result, pie fell from the sky and ate it all at once.

On Zhang Fan's plane, Shaohua rolled her eyes. In fact, Shaohua wouldn't do this if she didn't have Jingshu or her parents, but now she can't. my sister-in-law sat aside and tried not to smile, but her face hasn't completely taken off the baby's fat face, and her flesh is shaking.

Because Zhang Fan is sitting in first class, it is impossible to lie down. He holds the vase. Shao Hua, like a treasure, carried a porcelain bowl with both hands.

Originally, this thing had to be checked in, but the airport didn't do it. Fortunately, it was a special plane, so I reluctantly agreed to get on the plane. When she got on the plane, Zhang Fan had no choice. She was like a doorman leaning on a bronze pestle. She was like a pregnant woman with a big belly in October.

"Don't laugh, it's a treasure. When I get back to China, I'll sell it. Just be greedy!" Zhang Fan said to Jing Shu.

"Hey, hey, are you tired?"

"Tired, come and help me for a while. If you really want to sell at a good price, I'll buy you one..."

"I'll help my sister-in-law!"

"OK, help your brother for a while. I'm not tired." Although I turned my white eyes, I still love my husband in my heart.

Jingshu wrinkled her small nose and helped Zhang Fan hold the vase.

In fact, Zhang Fan has no bottom in his heart, because if this thing is valuable or not, he is afraid that it was only burned by experts in China last week. Just as in the early years when tea exporters fooled Lao maozi, China has experts.

In line with the idea that he could be a household item when he took it back, Zhang Fan held his teeth for several hours. To tell the truth, Zhang Fan regretted that he didn't take 300000. That's how people are. What they can't get is the best, and the drowned child is the most obedient.

.....

"I disagree!" The boss of tea vegetable is almost mad. He has hatched eggs for nearly two years like an old hen. He sees the chicken coming out. That's good. The superior leaders are picking peaches.

"Brother comrade, we must sacrifice when we should sacrifice for the development of the frontier." The leader of the team is the frontier stomach, one level higher than the boss of tea. He also knew that the frontier government did a little rough this time, but time didn't wait. He wasn't rough, and the Ministry of health didn't wait for him.

"This is the common struggle of our 300000 tea vegetable people. We can't take it away!" Boss tea vegetable is going crazy.

"Comrade XXX, please pay attention to your mood and attitude. Did we move out of the tea vegetable hospital?" The leader was also angry "We are to speed up the development of tea vegetable city hospital. You are like holding a golden egg. When others look at you, you are anxious.

But is this really good for the development of tea vegetable hospital? In a corner, financial subsidies are not enough. This is a crime. Do you know it? You are irresponsible to the tea vegetable hospital and the tea vegetable people. You are also a cadre who has been educated as a class for decades, and a cadre who has spent countless efforts on education and training.

Do you know that you are a hilltop! "

"I can't figure it out! Our whole team can't figure it out. "

Of course, the superior leaders would not tell him that they were afraid of being taken away by the Ministry of health.

"If you can't figure it out, you should also implement it. If you can't figure it out, take your time. Now lead the evaluation team to start the evaluation as soon as possible. This is not a consultation with you, this is an order! "

"Yes!"

The tea vegetable eldest brother was extremely unwilling to lead the team into the tea vegetable city hospital.

"Can't you resist again?" The leaders in charge of tea vegetable culture, education and health are stupid!

Chapter 1151

If it is based on the past, subordinates should at least preach without criticism. But both of them are in a bad mood today. How can we say that the leaders of the tea vegetable government, especially the eldest and the leaders in charge of health, are now like waking up from a night's sleep. The eldest son is going to be the richest man. As a result, he suddenly made DNA and found that he was not his own.

This feeling is very special. Although it is still in front of us, there is already a separated membrane in my heart. Even the leaders in charge of health are the same. In the past, I thought Ouyang was domineering and Zhang Fan couldn't provoke him. It seemed that he was wronged. Obviously, he was a superior, but he couldn't go to the living room. Tea vegetable makes plans at the beginning of the year by informing him, and will never ask him for instructions.

But suddenly, the hospital will not be controlled by his own business in the future. Now he really feels that Ouyang is domineering and Zhang fan can't afford it. But there are real achievements. Nominally, I'm still responsible for it, but now it's really the chicken that flies and the egg is broken.

Listening to the subordinate's almost praying tone, he couldn't bear to criticize, "the will of the organization still needs to be reflected. Even if it belongs to provincial management in the future, after all, the hospital is still in tea. We still have to work hard in this assessment. After all, we also have credit and face for the emergence of provincial hospitals in an area. "

The leader in charge of health can only nod. They looked at the busy sanitation workers outside the window with emotion and in vain. Boss Chasu suddenly said: "since it is an inevitable upgrade of Chasu hospital, we, as former leaders, should be generous. We should make up for the money we owed in the past."

Although Ouyang and Zhang Fan are more serious in their work, we can't be stingy! " The boss estimated that he would say strong or bad words, but he changed the words when he came.

"They don't lack..." in the past, the pressure on funding was mainly that the tea element hospital was very rich. Of course, this was for other enterprises and institutions of tea element. Second, the leader in charge of health and Ouyang are at the top of the cattle. Although he said he wouldn't give it, in fact, Lao Gao works as a money collection Commissioner in the government every day, but he can actually get some back in a month. Just like squeezing toothpaste, although it is given slowly, as long as it takes a long time, it can come after all.

But now, to be honest, the leaders in charge of health really don't want to pay.

"Is there any shortage? We still have to give what we owe others. Don't make us lose even a little incense and fire because of a little special funds."

"All right."

"Also, let Ouyang go back to the hospital from the Health Bureau. The old lady has been in the hospital all her life. If she is promoted, she will not be able to work part-time at her age. I guess it will probably let her leave the hospital directly. Push Ouyang back to the hospital before his superiors pay attention. "

"Zhang Fan is already a legal person. Now let Ouyang go back... It's too late for the public opinion evaluation."

"The business leadership remains unchanged. The president is still Zhang Fan. Let Ouyang be the Secretary and let her form a team with Zhang Fan. Let him serve as the Secretary of the health bureau and the Discipline Inspection Commission of the hospital. Dr. Ren Li is a famous expert in frontier cardiology. Her superiors will not let her be a full-time administrator. Be quick. Is Ouyang on duty in the hospital? "

"Well, when Zhang Fan was there, Ouyang was usually in the Health Bureau. When Zhang Fan went out,

Ouyang returned to the hospital. They looked at the hospital in turn, just like watching the home... As if they were afraid that we might steal something from the hospital!" The leader in charge of health is really angry. It's really oppressive to be a superior to these two people.

Boss Cha Su glanced at his subordinates and sighed: "the pattern is not enough!"

"Well, I'm still happy about it. After seeing Ouyang, he gave money first and gave all the money owed to the hospital to the old lady who was a financial fan. Then we'll talk to her about personnel changes. She estimated that she was reluctant to give up the money she got, and most likely would agree! As long as she cooperates, Zhang Fan will cooperate. As long as Zhang Fan cooperates, even if the superior is not willing, he will suffer a loss, and then the matter will be solved. "

The leader in charge of health is like a little fan looking at an idol. His eyes are straight. It's hard to say whether he pretends, but he really admires his monitor" Alas, the retreat leader is different from my pragmatic one! "

Although the superiors took away the hospital, the leaders of the hospital really couldn't move. Ouyang is old and can't become a provincial management cadre again. Moreover, Ouyang's reputation in the municipal hospital can't be replaced by the superiors.

As for Ren Li, once she is part-time secretary of the tea Vegetable Health Bureau, although she actually has no rights, she is nominally promoted by half, and her superiors will not mention it again, because it does not comply with the time regulations for cadre promotion. Zhang Fan is now in the right place and has only been promoted. It seems possible to be promoted again. Moreover, the most important thing is that the position of president can only be Zhang Fan's.

Therefore, after this set of combined boxing, the hospital has nominally become a provincial management, but the main leaders are all municipal management. I don't know what will happen in the future. Anyway, in recent years, the province has no way for the time being. After all, tea is also a sub provincial unit.

Although this is not a face, but the inside is good, the benefits are still there. The main thing you have to do is to take the tea has the final say. Look on the left and right. It seems that you have suffered a loss.

The situation is stronger than people. That's the only way.

.....

Ouyang is crazy now.

"Clean up the dead branches and rotten leaves quickly. What is the shortage of manpower? You are stupid enough to invite the property company. If one is not enough, please two. If two are not enough, please continue. We must make the hospital look new. In addition, you make it clear to the thick old

men in surgery that I should wash my white coat a little. If I can't, I'll put on a new one. The white coat is dotted day by day. If I don't know, I think it's a cook who kills pigs. " Hung up Lao Chen.

Then he called the general nursing office.

"Don't be in the office now. Hurry down to the Department, let the male doctors tie up my neckties, and let the female doctors and nurses draw light makeup for me. Tell the little girls in your hand, if anyone gets me a big red lip and big black eye, be careful. You are in charge of the spirit of the hospital. You must have vitality. Do you understand?

Let the general affairs office open the warehouse and put on the new white coat from top to bottom. The old yellow photos and old profiles hanging on the wall have been replaced by our achievements in recent years. what? Not enough, just introduce the instruments that have been changed in recent years to me, what is expensive and what is advanced.

Remember, I've cleaned up all the soft advertisements of drug dealers and equipment dealers in the corner of the hospital these days. "

"OK, European Academy, I'll go now." The chief nurse took several head nurses who had left the clinic and began to patrol various departments.

I hung up and felt uneasy. Then he called Lao Chen again.

"Let Lao Gao, Lao Ju, be the Secretary of all departments, Lao Gao is on duty for surgery, Lao Ju is on duty for gynecology, pediatrics and dermatology... Then be the Secretary of internal medicine. If you are in charge of the medical technology department, you must be sure to keep an eye on me. You must not be careless. Whether to have a big meal or drink the northwest wind in the future. Just for a few days, don't fall off the chain. If you let me know, I'll smash the job of whoever smashes the job of the hospital. "

The whole hospital is like fighting a war. The atmosphere up and down dare not breathe.

We all know that Marubeni countries will come to negotiate and bring a lot of funds.

In the emergency center, Xue Fei commanded the emergency operation vehicle and emergency 120, just like a queue.

In obstetrics and Gynecology, LV Shuyan took the young doctors to clean up the office. The cases that had been placed everywhere were also regulated clearly, and the white coats of off-duty doctors hanging on the chairs were also cleaned up. Originally boring office, also put some green plants.

Such a scene is going on in various departments of tea. And the most obvious thing is that doctors took out all kinds of thick books. These books were read and locked by themselves. This time, in order to show the learning spirit of the hospital, they all took them out and put them in the open.

The head nurse in the operating room said, "hair, put it in. Where's your net cover? Is it lost? You don't want to do it. Run. I'll give you three minutes and clean up your hair for me. How to be a nurse in the operating room. "

Just two or three hairs were found by the head nurse, and the little nurse quickly ran to clean up.

Lao Gao wandered around in various surgeries. "Your boy is smoking secretly again. It's going out. I don't want to see what time it is. "

I live in a small department. "Have a good attitude. Can't you laugh? Do you need me to show you. Kind and amiable, do you understand? "

Ren Li is in the internal medicine. "Your antibiotics are high. Your examination is incomplete. Why not analyze the abnormal signs?"

Everyone has his own way of leadership, but everyone can see that the leaders of the hospital attach great importance to it.

Ouyang hung up the phone and walked in circles like a grinding donkey in the office. He thought about the matters needing attention in the hospital again and again.

The warm sun in winter passes through the window, and the cactus on the windowsill seem to have a little spirit.

"Dean, here comes the leader!" The director of the security section informed Ouyang at the first time.

"It's burning. What are they doing?" After hanging up the phone, Ouyang said something gently, but he went out of the office to meet him. On weekdays, if the leaders come, they either plan in advance or ask the Secretary to inform in advance. This time, if Mimi comes quietly without any news, it must be bad.

Ouyang cheered up, gathered his slightly disordered gray hair, and got off the elevator.

"Good leader, I'm late!" Didn't say that the leader didn't say hello, just said he was late.

"Hehe, it's not easy for the European Court to speak soft words!" Cha Su laughed and said.

Ouyang is not stupid. Now is not the time to prick.

"Let's go to your office." Boss Cha Su walked ahead of him, and Ouyang frowned slightly.

Chapter 1152

Boss chasu set out in advance. He asked the organization cadres to prepare with the evaluation team sent by the superior, and then he rushed to the hospital with the leader in charge of health at the first time. Anyway, there was not much time.

After entering the office, he didn't greet each other. He asked the health leader in charge to close the door of Ouyang's office with his eyes. He didn't speak yet.

Ouyang said, "leader, you are really helping in the snow. It's the end of the year. It's really difficult for the hospital this year. It's almost impossible to uncover the pot. Professor Li's experiment, Li Cunhou's promise, and there is no return money. Just for the cost of this skin experiment, director Zhang is about to toss the bottom of the hospital.

There is also the bone Institute jointly built with special orthopedics. The budget of the professional supervision team sent by others has been raised again and again. I am worried now that the building will not be uncompleted. You can take time out of your daily work today. Can you give me a note to exempt the expenses of the municipal hospital in the Government Guest House? "

At the end of the year, rich provinces are spending money in a hurry, or even spending money in a surprise manner. Tea element, a frontier city, is like a single dog. It is a rich man at the beginning of the month and can't eat steamed bread at the end of the month. Ouyang is afraid that the government will pay attention to the investment of the pill country. It is not uncommon to take the investment money to fill the hole.

Therefore, before the leader explained his intention, Ouyang had begun to cry for poverty, and the big move had not been released. They all said that this was up. If the leader really wanted to ask for money, she was ready to talk about it and press the money of the hospital.

As for the leader in charge of health, she didn't expect it. Anyway, they are enemies now.

The leaders in charge are now relieved. They have changed from insiders to outsiders. They see much more clearly than before. They used to calculate the gains and losses of one city and one place with Ouyang's cattle. Now they are different“ This woman has very good teeth. If it weren't for the appropriation, she would be able to dip the leader in soy sauce. But look at the monitor. I feel very useful. Hey! Life is like a play. It all depends on acting. "

"Hehe, look, look, they are the monitor of our largest tea vegetable hospital, but why do they care so much about three melons and two dates. All right, I'm not here to ask you for money. What's the money in the guest house! I'm here to give you and Zhang Yuan a lot of money today. Although it is difficult for

the government this year, the wages are all loans, and the investment promotion is not ideal. All countries always want to sell things to us, but they have no money to buy ours.

However, even if we can't open the pot, we can't be poor in medical treatment and education! " Although the time is tight, we can't see the shadow of a little worry on the leader's face. This is called Qi Nourishing Kung Fu. If Ouyang could smell the smell of two points, it would not be so easy to kill.

The leaders in charge of culture, education and Health said in their hearts: "the sunshine wages of teachers have not been settled yet."

Ouyang was stunned.

Things didn't seem right. She looked at the leaders carefully and turned around to look at the leaders in charge of health. But I just can't see anything. There is a warm spring breeze on the boss's face. The leader in charge seems to be more natural today. Unlike before, when you look at each other, both sides can see the sparks in the thorn.

"Don't worry about it first. Let's get the money first. No matter how changeable he is, if he gets the money, he will promise everything. Anyway, I'm not a legal person!" As soon as Ouyang thought about it, he came out with a smile.

"Look at me. I didn't pour water for the two leaders. My fault, my fault." No one was asked. Ouyang made tea for the leader himself.

"Hehe, the tea of the European Academy has a rich taste. I must drink it today. You can taste it. Who can afford to buy two cups for two or three million yuan? And I can't drink it at ordinary times!" Tea vegetable boss smiled and said to the leader in charge of health.

The leader in charge of health didn't say Ouyang was domineering through the topic, but smiled and didn't talk much.

"Hey, something really happened." Ouyang smiled as if he couldn't understand. He brought tea and poured water.

Anyway, in a word, you have your Zhang Liangji, and I have my wall ladder. If you don't see a rabbit, don't scatter an eagle. If you can't get the money, you'll have nothing to say.

"The hospital has developed rapidly in the past two years. I'm glad that if the tea vegetable government is poor and the hospital develops faster, we didn't do well as parents. It's time for self-examination!"

The boss said with a sigh after drinking a mouthful of tea.

Well, not to mention ordinary people, if it was Zhang Fan, it was probably moved by the other party. But who is Ouyang? Is he the one who rubs the sand in his eyes.

"The leader is wrong. If it were not for the far-sighted guidance of the leaders, we would have today. Ask around the world, which area of the hospital has such a large administrative power, which is the capacity of the two leaders! "

Not yet? Anyway, I boast. I can't understand your difficulties. The of the government is not easy, nor did I cause it. It has little to do with me.

Like two masters of Tai Chi and eight trigrams, he pushed his hand for a while.

The boss spoke and asked the finance department to go to the government later to hand over the full amount of this year's appropriation.

"OK, I'll let the director of the finance department go to the government now!" Ouyang doesn't have to wait. He calls directly.

The boss of the tea vegetable government smiled, and the leader in charge of health, as I knew, smiled and looked at each other with his monitor. They looked like experts.

Ouyang didn't think much. Anyway, let's get the money first.

Waiting for Ouyang to call, boss tea vegetable smiled and began to say something.

Ouyang doesn't care much about this meeting. This woman is the one who doesn't admit it after eating and drinking. She was thinking about how to send them off, and she had to go and see if there were any omissions in the preparations.

There is definitely a ruffian in her temperament.

When the tea vegetable boss finished the matter, "the evaluation team is estimated to have started!"

Ouyang regretted for a long time. She wanted to call the people from the finance department back. To tell you the truth, the provincial governor doesn't like her now. If only she could manage the Department directly, but Ouyang thought it was impossible.

The odds are slim. Many times, the city can't resist the province, but the provincial resistance department is still quite powerful.

Since it's all like this, Ouyang is also single“ I obey the organization! I promise the hospital won't have any ideas. "

"Not only can not have ideas, but also implement them as soon as possible."

The tea vegetable is nailed on the old board.

"OK, I'll talk to someone now. Leader, let's try again, several deputies... "

"Hey, it's already over the line. It's not like being greedy anymore!" Ouyang Tan rate, the tea vegetable boss also paid the bottom.

Before long, the evaluation team entered the people's Hospital of chasu city. Although I didn't come to Koster, they were all big bulls, and this level was also very high.

A group of people from the number of hospital beds, scientific research achievements, infrastructure, doctor titles, full speed to carry out a preliminary survey. Then I got the evaluation report out as quickly as possible.

As a general rule, this kind of assessment should be conducted at least once a month, reported at the beginning of two or three months, and the results can only be produced half a year or even a year.

But this time is different. Special affairs are handled specially. A report will be issued in one day. It is estimated that it will be handed over to the Ministry of health in about a week.

"The number of hospital beds is not enough, the scientific research results are OK, and the doctor's title is barely touching the line."

The bird market's intestines and stomach listened to the report and directly ordered, "aren't the financial gods also coming? Since there is a branch of tea vegetable, the payment item shall be allocated as soon as possible to make the data look better. The organization department also set a tone to freeze personnel first. "

"Yes!"

Ouyang meat hurts. It really hurts. This time I picked up sesame and lost watermelon. Because watching the posture of bird city leaders, it is absolutely promising to rush into the Department to manage the hospital. But now

Medical units, how to say, are slightly similar to police units and are subject to the jurisdiction and supervision of the local government and higher-level health organs. For example, the third class hospitals include municipal third class hospitals and provincial third class hospitals. The level of provincial third class hospitals is really high.

For example, many first-class hospitals in the capital have academicians as presidents, and then the level is directly the Deputy ministerial level. The provincial third class hospitals are often the main hall.

Therefore, when you go to the provincial level-3 hospitals, the Department of health often only supervises, but cannot guide the management.

Therefore, it is very troublesome for ordinary people to understand one team and two sets of management. If the hospital is under the management of the Department, autonomy and funding are not the same thing.

When the organization director of the bird market freezes personnel, others have already done these things.

.....

Plane, the plane in red meatball landed at the airport of tea vegetable. Tea vegetable airport is a small regional airport, not an international airport. There are almost no foreign planes, so when the party comes down, the airport lets the beautiful sister on the ground line up to welcome with flowers.

When he got off the plane, Zhang Fan became the host from the guest. When he was in the meatball country, Zhang Fan not only did his job, but also wondered how to change the money. When he got off the ground, he would take responsibility.

"Zhang Yuan, hard work!"

Lao Chen is waiting at the airport with several government cars. These cars of the tea vegetable government are easily not dispatched on weekdays, but they are well maintained. Ouyang and Zhang Fan have great face, otherwise ordinary enterprises and institutions can't borrow them.

"Not hard, not hard. How's the preparation at home?"

Zhang Fan shook hands with Lao Chen.

"It's hard to say!" Lao Chen sighed slightly " But you can rest assured that there will be no problem with the reception. "

"That's good. Go back to the hospital first and talk about others." It's not the time to say that Zhang Fan invited the Marubeni team to board Koster and set out for the tea vegetable hospital.

.....

"Finally home." The four old people are sitting hard.

"The Golden Nest and the silver nest are not as good as our own kennel. It's better for us to have tea. It's very comfortable to breathe! "

Shao Hua didn't care about the feelings of the old people. She took Jingshu: "your brother, too. It's hard to take this thing. If it's really broken, your brother will be distressed again."

Chapter 1153

On the way from the airport to the hospital, Lao Chen sat next to Zhang Fan and quietly told Zhang Fan about the hospital.

"The hospital will be incorporated by the provincial government. The tea vegetable side feels a loss, and then makes a surprise appointment to let the European hospital come back as the Secretary, and then let him be the Secretary, the full-time Discipline Inspection Commission and the Secretary of the Health Bureau. Now in the hospital, doctors and nurses are looking forward to your visit to the negotiation team.

The middle and high levels are all kinds of Eight Immortals crossing the sea. It is said that if we are managed by the province this time, we will be upgraded to department level units, so many people want to take advantage of this east wind. The section chief of science, education and health of the finance bureau wants to come to our hospital. Thanks to the freezing of personnel... "

After listening to the recent situation of the hospital, Zhang Fan also heard the anger in Lao Chen's heart. If the hospital is not upgraded, he will boil slowly and one day he will be able to boil an eyebrow, but once upgraded, his vice president will not be appropriate, so he is very nervous.

"What do you think? Do you want to be alone?" Zhang Fan asked. To tell the truth, people are emotional animals. Lao Chen doesn't take the professional way. It's hard to say whether the promotion is good or bad for him in the future. If the platform is higher, there will be more gods. So taking this opportunity, Zhang Fan asked.

After all, people are so old, what's the picture in front of and behind them. A vice president is like Zhang Fan's secretary.

"I..." Lao Chen looked at Zhang Fan and stopped talking.

"You can rest assured that the president of the Municipal Hospital of traditional Chinese medicine will take turns. If you have an idea, say it earlier."

Lao Chen knows that Zhang Fan really wants to help him, but he is quite tangled. To tell the truth, few people who enter the system and engage in administration can resist the temptation of being a chief official. Unfortunately, I understand that if I really go to the traditional Chinese medicine hospital, I may not be nourished now.

At present, there seems to be nothing to go to in this position, but although the above two are not easy to serve, he has found out the temper of the two leaders, especially Zhang Fan, who is directly responsible for the general direction and hardly cares about small things.

If he really wants to go to the traditional Chinese medicine hospital, it has become a provincial hospital. In the future, the traditional Chinese medicine hospital can only be worse and worse than the tea vegetable city hospital. Therefore, he pinched like a bride on the Kang. He pinched a few times, just like a confession, and said to Zhang Fan: "Zhang hospital, look at what you said, I don't have the ability to be alone, It's up to you to show off. I'm afraid that after the promotion, I won't have a chance... "

Lao Chen understands this kind of thing very well. If you really want to go, you can hesitate and consider it. If you don't want to go, you can't procrastinate. You should make a statement at that time, otherwise some hard work in the past can be wasted.

"Oh, you!" Zhang Fan shook his head and smiled. Although I know Lao Chen is suspected of flattering "All right, don't worry about it. Let's see it then! "

"Hey!" Lao Chen's smiling mouth cracked. He knew that there was no one above him, just Zhang Fan and Ouyang. In the past, any one was enough for him to walk sideways in the municipal hospital. Now he can't. If the municipal hospital is really upgraded, he must drag Zhang Fan, otherwise the vice president may be gone one day.

.....

At Zhang Fan's house, Shao huajingshu and four old people finally went home. There are also many relatives at home.

With Zhang Fan's position in the tea plant, relatives who had little contact with Shaohua's family began to contact slowly. Zhang Fan's family is also here. Although there are no relatives here, with Zhang Fan's status, there are many more villagers talking with Zhang Fan's parents.

Zhang Fan's mother once said to Zhang Fan's father, "XXX is good. This fellow is very good!"

His father said, "it doesn't matter what you chat about. Don't promise Zhang Fan to help her. I don't

know whether people are good or not. When you were a housewife, why didn't you see such a good person! "

The old lady almost ran after the old man, but she listened.

"Wow, this is Shiseido. Huazi is so kind that he didn't let his aunt hurt you in vain." Shaohua bought a set of cosmetics for her sister-in-law. She bought a dress for her second aunt. Anyway, Shaohua, a closer relative, brought gifts. People are strange animals, such as this cosmetics. Anyway, several aunts of Shaohua think it is good abroad. Even the second aunts who can step on the pulse of the times all the time think it is good abroad.

Zhang Fan is sometimes curious. Do you want to make up now?

.....

After the convoy arrived at the hospital from the airport, Ouyang at the gate of the hospital led the convoy with a group of nurse girls holding plastic flowers. Zhang Fan looked at Ouyang outside the car and wanted to cover his eyes. Like all the leaders, the old lady wanted the little nurses to put on white silk stockings and stand at the door. The helicopter also circled over the hospital. The flowers were as fancy as a big butterfly.

Really, if all kinds of instruments could not be put out, Ouyang could put them at the gate for the negotiation team of Marubeni country to show off. He wanted to hang all his value on himself.

How to say this kind of thing? Anyway, if Zhang Fan was at home, he would never let the nurses stand at the door. They came to be nurses to treat patients and save people, not to be a welcoming lady, and would not let the helicopter hover over the hospital. This may be the difference between the post-1980s and the era from which it came.

After Zhang Fan arrived with the MARUKI team, the evaluation was also suspended.

After the experts from Marubeni were arranged to have a rest, the evaluation team, tea vegetable leaders and hospital leaders all met together in the large conference room of the hospital. At the beginning, the leaders lined up to praise the struggle of tea vegetable in recent years.

After boasting, the bird market's stomach suggested that the assessment team should also participate in the negotiations“ After all, the inside information of tea vegetable city hospital is still a little thin. Our team has leaders from large hospitals, who are relatively more familiar with this international negotiation. "

The starting point is good. But it just makes people feel uncomfortable.

Zhang Fangang was about to speak, but Ouyang quit. Ouyang, who pulled Zhang Fan and didn't let Zhang Fan speak, stood up directly: "leadership, the negotiation meeting is scheduled in three days.

These three days are to make people familiar with our hospital. As for negotiation, you're right. We don't have much international experience.

However, I don't think the experience of international cooperation in frontier hospitals is richer than our estimation! "

The leader's face is blue, and the medical experts of the evaluation team together don't look good. If Ouyang is wrong, everyone may not care, but Ouyang is telling the truth. Sometimes the truth hurts people!

The leader in charge of health took a look at the leader and Ouyang. He was taken. I really used to think Ouyang was domineering and disobedient to the leadership. Now he knows that this is not domineering. This is an iron and blood Stormtrooper!

Boss Cha Su quickly put his hands on Ouyang and said, "you can't say that. It's too absolute, too absolute. After all, the bird market is the capital, and the experts and scholars in the capital still have experience. " He couldn't suppress Ouyang and didn't want his leaders to be defeated, so he began to fight with the mud.

In fact, I don't know if he is laughing in his stomach.

Ouyang can't be honest and obedient now. If he doesn't grasp the power and dominate the negotiation now, who knows what can be talked about in the later stage.

Therefore, Ouyang said, "yes, the leaders are right. After all, the frontier lacks such international cooperation. Therefore, we have invited Lu Lao, the green bird, and Professor Li Cunhou, the golden mean. If necessary, we can also invite old Wu from mordu! The moderation director of orthopedics University and the director of extrabrain university can be contacted. "

Ouyang said that from the leadership of bird market to the experts of the evaluation team, they stopped talking. What else can you say? Open your mouth, a top academician, shut up, an old monster, what else can you say. Can we have a pleasant meeting. This is a direct slap in the face.

Ouyang also wants to. You can remove me from my post and even kick me out of the medical circle, but she will never let me out of this dominant power. What peaceful coexistence and harmonious coexistence are deceptive. What she believes in is what old Mao said: either the east wind overwhelms the west wind, or the west wind overwhelms the east wind.

After Ouyang finished, there was a short quiet period in the venue. It's so embarrassing to be quiet for more than ten seconds. Ouyang doesn't feel at all. People are serious. What is it? I'm not embarrassed. It's you who are embarrassed.

In fact, the Second Affiliated Hospital of Frontier Medical University wants to merge the tea element hospital, and then pull the cooperation of Marubeni to the Second Affiliated Hospital. After all, tea is too

marginal. As a result, Ouyang cut off his head before he opened it.

Sometimes, there is nothing wrong with this position decision-making. If the meatball country goes to the bird market, it will be more conducive to the development of the frontier, but it will be effective for tea.

"What about the opinions of other comrades?"

"I agree with the European court!" This time Ouyang didn't hold Zhang Fan. Zhang Fan spoke directly without waiting for others to speak.

As soon as Zhang Fan opened his mouth, the meeting couldn't be held. Although Ouyang's office is hung with the word sent by the leader, the stomach of the bird market is clear. This word is given to Zhang Fan. Moreover, we all know who is running to the pill country. It's definitely not that you think there is Tianshan in the border, but that you miss Tianshan.

"Oh, yes, yes, I'm glad to see that the team of tea vegetable hospital is so united!"

The meeting really can't be held.

"The leadership of the hospital should strengthen learning, strengthen organizational discipline and strengthen local education." Back to the tea government, the tea leaders were unlucky and the bird market leaders lost their temper.

"Why don't you let president Zhang Fan and the president of bird city hospital change their positions? Although it was their collective resolution, it would be better to change the Dean! " Boss Cha Su seems to have made an idea out of public interest.

The eyes of the president of the Second Affiliated Hospital are bright. It doesn't matter whether the bird market or not. If he can really be the president of the tea vegetable hospital, he is confident to rush to the academician. As a result, the leader of the bird market looked at boss teasu with a black face.

"Speed up the assessment and submit the report to the Ministry of health as soon as possible!"

.....

Chapter 1154

The top talents of Jinmao are all on Wall Street, and the top talents of China are all within the system. I don't know whether it's accurate or not. Anyway, it's not a fool. The leaders of the bird market felt that things could not be done, so they directly sat in the car and left. However, before leaving, the bird market order was also issued, and the investment group of Marubeni must be left.

When the leader left, it is estimated that only the leader in charge of health can feel the mood of the bird market leader leaving. But I don't know why, he just felt a little proud. It is estimated that he fell into the puddle and was annoyed to death. As a result, he saw that others fell into the puddle and wore shoes that were more expensive and new than his. He suddenly felt that he was not annoyed.

Although the leader left, the of the assessment mission still joined the negotiations of the Marubeni countries. Of course, they just sit in.

If you talk about trade, the European Academy probably doesn't understand anything, but when it comes to hospital development, how can you make people cheap? This is a top-notch expert.

As the saying goes, ten can say, but one is nonsense. You said that the infrastructure of the tea vegetable hospital was not good, and Ouyang looked for a plan for the future. Marubeni said that the overall scientific research level of tea element did not go up, so she said things with various laboratories to be built.

Anyway, if you dislike poor infrastructure, you can do it yourself. I have prepared the land for you. If you dislike poor scientific research, you can pull your own equipment. But if you think I'm easy to fool, I'm sorry. She took Zhang Fan to say something.

It's definitely that you're still coming. I'll just say one word!

On the first day after the negotiation, Zhang Fanxing attended the meeting, wearing a suit and tie prepared by Shao Hua. He didn't even wear a thermal underwear for his good figure. As a result, after watching for a long time, Zhang Fan understood that this was a quarrel with a referee.

.....

"Hey, why don't you wear a suit today? Don't you want to negotiate with Marubeni? " In the morning, after breakfast, Shaohua always felt that the vase was not suitable anywhere. This kind of thing is usually either in pairs or put in a glass cover.

If you put this one in the corner, you really can't see what valuable antique it is. Seeing that Zhang Fan was wearing a down jacket, he said casually. Then, without waiting for Zhang Fan to reply, he said, "today, I have to go to the ceramic city to see if there is anything similar to this vase."

"I haven't entered the operating room for several days. If I don't enter the operating room again, I will have a baby. There is an European Academy in the negotiation. I can't speak when I go. The sharp toothed and sharp mouth of the European Academy generally don't need our help. The rest of us are spectators. Just listen to the European Academy!"

Zhang Fan wants to laugh when he thinks about the momentum of Ouyang the day before yesterday.

The evaluation of the tea vegetable city hospital was sent to the Ministry of health in three days. They also said that they should quickly upgrade the tea vegetable city hospital, otherwise they would have no confidence in talking. Although the leaders of the bird market have eaten shriveled tea, the reason why the meat is rotten in the pot is still clear.

If they don't hurry up and wait for the negotiations to come down and let the Ministry get involved again, there will be nothing to do in the bird market. And he also saw that the tea vegetable side was more inclined to the Ministry. Therefore, the stomach urged the bird market boss to go to the capital in person.

The negotiations are going on very slowly. Like a big saw, it takes a lot of energy to pull a little today and a little tomorrow. Lao Chen, who participated in the negotiation, had blisters on the corners of her mouth, but Ouyang was different. The more she talked, the more energetic she became.

After a week of negotiations, Lao Chen seems to be ten years old, while Ouyang seems to be ten years younger. This makes Zhang Fan really believe that career or rights are the lives of some people. This thing is more effective than eating Liuwei Dihuang pills, honey wax pills, insects in winter and grass in summer.

.....

"Zhang Yuan, hehe, are you busy?" Xue Fei pushes open Zhang Fan's door and sees Zhang Fan reading documents. He asks with a smile.

"Busy!" Zhang Fan looked up at him and directly told Xue Fei that he was busy.

Although the boy was smiling in front of Zhang Fan, he already had the posture of a director in front of others. At least he was serious.

"Ha ha!" It's like I didn't understand Zhang Fan. Find your own tea and find a cup to pour your own tea.

Then sit on the reception sofa and touch this and that for a while. He doesn't talk much. Anyway, he will make a little noise for you from time to time, so that you can't work at ease.

"Tell me something quickly. I'm busy. Let's talk first. Personnel have been frozen. There's no chance for people in and out. Don't talk. I can't help you. "

When the evaluation team came in the morning, the people knew that the tea vegetable hospital would be upgraded in the afternoon. Zhang Fan is really bored to death these days. Many kinds of people want to take Zhang Fan's way into the city hospital. Even some bureau leaders want to go to the hospital.

He looked at Xue Fei's flattering face and thought that this guy came to strike the wooden clock, so he didn't give him a good face.

"Don't look down on people!" Xue Fei looked humiliated and stood up "What kind of person am I? Ah, that's what you think of me? "

"What do you think!" Zhang Fan knew at a glance that this guy didn't come for people, so his face warmed a lot.

"Hehe, I want to invite you to dinner."

"I dare not eat your meal. It's delicious and difficult to digest. Say something! "

"My daughter-in-law's brother didn't live well in Sanchuan. Her parents and I have left. Not only did I say that the old man was sent away by others, but my daughter-in-law followed me thousands of miles for me without filial piety in front of bed. Now people have asked me to come to my door, and I can't ignore it. "

"What?" Zhang Fan put down the document and looked up at Xue Fei "The hospital supermarket and the hospital restaurant have no place. "

"Hey, how can we make trouble for younger martial brother?" Xue Fei saw that Zhang Fan was happy. He climbed up the pole.

"Say it or not!"

Zhang Fan is impatient. This guy is too sticky.

"My brother-in-law opened a small restaurant in Sanchuan, just opposite the hospital. It will open tomorrow. You can pull some people to try it. "

"Across from the hospital, next to the Frenchman's hotel?"

"Yes!"

"Your boy has taken a lot of kickbacks in recent years!" The scale of the French hotel is very large. It is very difficult for an ordinary people to contract the hotel. First of all, the rent is not affordable to

ordinary people.

"Don't slander me. I gave all my kickbacks to the old women on the card table. Now I don't want to take them back. Several bosses cooperated with my uncle. "

"You know how good it is. After work, I'll go after work! "

This face must be given to Xue Fei.

"I invited master and some orthopedic doctors. Can you invite President ou, Secretary Ren, President Chen and President Ju?"

"Tea vegetarian stomach, shall I invite you?"

"OK, anyway, there are a lot of ingredients!" Xue Fei didn't feel embarrassed at all.

"OK, I'll take my daughter-in-law and invite others yourself!"

After driving Xue Fei away, Zhang Fan thought about it and left the office. He couldn't stay in this place. One by one, he came to intercede. Anyway, Ouyang is in the hospital now. He can quit administration without administration.

Chapter 1155

The upgrading of tea vegetable hospital has become a hot topic in the streets of tea vegetable for a while. It was said that "it has become a provincial hospital. In the future, we will also have the treatment of bird market people, so we don't have to go to the capital to see a doctor. It's nice to have a provincial hospital at the door! "

Some people say it's not good, "change the soup without changing the medicine. This is a group of white skinned people thinking about raising the price. There is no excuse. They made an upgrade. More than ten years ago, no matter what disease they entered the hospital, no matter how good the doctor was, they would prescribe a few cents of medicine. It would be good to eat it. Now the hospital is getting bigger and bigger. If a cold goes in, you can't think of it. Hey, kill! "

In fact, for ordinary diseases or some healthy people, the current municipal top three hospitals are actually enough. No one will be okay. It's not a good idea to play sick as a date. But once this thing encounters a more serious disease, it will definitely be good.

To see a doctor in a different place is not as easy as traveling in a different place. Not to mention going to super large cities such as the capital of Mordor, even going to a slightly larger city around to see a

doctor can make people peel off their skin. Therefore, after the medical reform in that year, the leaders were dissatisfied and the common people were dissatisfied.

After Zhang Fan left work and went home, his family was overcrowded“ Oh, my son-in-law is back. Have a rest, have a rest, I'm tired in the hospital this day! " Shaohua's little aunt and father-in-law are extremely enthusiastic.

Zhang Fan knew at a glance that there must be something. If they see a doctor, why don't they take Zhang Fan with them? They directly go to Shaohua. Although they are much more polite to Zhang Fan than before, they always mean that I am a cadre. But today, such enthusiasm is really rare.

"Oh! You're all here. Mom, please fix a restaurant for your aunts and uncles. I have something to do today. I have to let Shaohua and Jingshu accompany me out later. "

"Good, good, good, you're busy, don't worry about us!" The uncle took his aunt with a bad face and said to Zhang Fan with a smile.

Zhang Fan squeezed his eyes for his mother-in-law and pulled Shaohua and his sister out of the door. To tell the truth, my father-in-law is just like my father-in-law. As an old saying goes: people who will never dig the corner of socialism. I don't have many minds, so my mother-in-law is similar to Zhang Fan's mother. Although it didn't hurt people's heart, it didn't suffer.

Took Shaohua and Jingshu out of the door“ Oh, my face hurts! If it weren't for Jing Shu, I would be tired to lie down today. "

"Brother, I heard that your hospital is going to be upgraded? Will you be the same as the room chief in the future? " Jingshu asked curiously. The girl is a sophomore now, and the baby fat on her face is not much.

The girl's feelings for her brother are very deep, just like the older one with the younger one in her early years. When her parents go to work, Jing Shu is Zhang Fan's follower. Later, when her parents were laid off, Jing Shu was still ignorant, and her brother stood up. After growing up, Jingshu knew very well that if her brother didn't stand up, her family's life really didn't know what it would be like.

In the past, there were many students who grew up together in the old community. There were not

many who went to the vegetable market with their parents to pick up vegetable leaves. Therefore, in front of Zhang Fan, Jing Shu is also happy to pretend to be a little daughter.

"You little official fan!" Zhang Fan didn't explain. Instead, he said to Shaohua, "Xue Fei said that his brother-in-law opened a Sanchuan restaurant and invited us to try the dishes today. It is estimated that he is a major shareholder and his brother-in-law is a long-term worker. "

"Do you need a gift?" Shaohua asked.

"Here, after all, you can't eat for nothing." Zhang Fan gets on the bus and is ready to leave. The weather of tea vegetable has entered the period of freezing dogs. But even if it snows heavily, it can't resist the desire of tea plain people to eat.

In the winter of tea, although there are relatively no varieties of fruits and vegetables in spring, summer and autumn, there are a lot more meat and dairy products. For example, there are oily thick cloth curtains hanging in the streets and alleys, and there is a marching iron pot at the door. They are all horse meat shops.

These stores are rented by herdsmen. They rent them in the winter months to buy horse meat and intestines. Horse meat is generally not cleaned up well by the Han people. What do you say about the horse meat cooked by the Han people? It's like a wooden stick sprinkled with salt. It doesn't move or talk, and it also stuffs its teeth. After eating, it feels like it doesn't taste anything except salty.

But what other herdsmen make is delicious. Especially the horse intestines, a tea cellar, the old cellar, Gan Liang, the horse chewing, the more chewing the more fragrant, the beginning of the entrance, the smell of fruit and wood mixed with a little smoke, similar to a mixture of tobacco mixed with tobacco flavor, like a night beauty. When fat emanates from horse intestines, the mixture of fat and protein is the delicious food in the world.

However, people who haven't eaten this thing can't eat more. When Zhang Fan ate it for the first time, he lay on the bed in the dormitory after eating. He was hot all over. He knew that it was a slight allergy caused by abnormal protein, and soon began to have nosebleed.

In addition to horse meat, there are dairy products, from all kinds of yogurt pimples to milk (a) leather and milk tofu. It can be said that the street is filled with a faint milk flavor.

In earlier years, before the people of Sanchuan entered Xinjiang, traditional food dominated the world in winter, including horse intestines, noodles, lungs, spicy sheep hooves, and all kinds of ball soup. After the people of Sanchuan came in, the catering of tea will be divided into three parts in the world.

Some are still traditional food in the frontier. The other part is hot pot and Sanchuan fried vegetables. Later, not only were they from Sanchuan, but they opened a fried restaurant or hung up Sichuan food. No one entered. But there are not many good ones.

For example, the xiaosanchuan fried restaurant at the back door of the tea vegetable hospital, if it is not that more oil and meat can attract some single young men, it is estimated that the rent will not come out.

.....

Zhang fan drives to the Sichuan restaurant next to the hotel opposite the hospital. The facade is not small, but also specializes in the architectural style of Western Sichuan. Xue Fei and his daughter-in-law have been waiting at the door for a long time.

"Ouch, I'm going to pick you up in such a heavy snow!" When Xue Fei saw Zhang Fan, the fake model came forward and said nice words.

"Whoo! President Shao also came. Rare guest, rare guest. " Xue Fei smiled.

"Sister in law!" Shao Hua and Xue Fei's wife said hello.

"This is my sister." Zhang Fan introduced it.

Xue Fei, the bastard, kept boasting: "Oh, my sister is so beautiful and white. Now I understand why your brother is not white. It's all for you."

Nonsense keeps coming out. Shaohua and Jingshu were welcomed in by Xue Fei's wife. He also grabbed Zhang Fan's arm and said nonsense.

Zhang Fan wondered, "go in and say no. who else do you want to meet in such a cold place?"

"If I don't welcome anyone, I can welcome anyone. Just my card now, I will welcome you. Who else can I welcome!" That said, the bastard seems to be waiting for someone.

After a while, the people who came out of the hotel saw Zhang Fan " Zhang Yuan! "

"President Wang!"

"Zhang Yuan!"

"President Chen."

Because it is a new hotel, and it is also a five-star hotel of international standard, the bosses with a little status of tea have changed places. They don't go to the general hotel and come here.

"Are you?"

"I came to dinner. My friend opened a Sichuan restaurant." Zhang Fan introduced it with a smile. Only

then did he know that Xue Fei had advertised himself. Zhang Fan thought for a moment. He won't give this bastard a gift later.

After entering the box, I found that Lao Gao and his wife had arrived early.

"Director, when did you come. You didn't say either. I said I would pick up the director. " After Zhang Fan asked Lao Gao, he said Xue Fei. Lao Gao can't drive and doesn't have a car.

"No, it's not far. Just a few steps. " Lao Gao looked at Zhang Fan with a smile. Xue Fei really didn't invite anyone today, so he invited Zhang Fan and Lao Gao. Even Wang Guofu didn't invite them. It's estimated that there are only nominal brothers left.

It wasn't long before the food came up.

Although they are common Sichuan dishes, they look really good and smell delicious.

"Aunt, uncle Gao, Zhang Yuan, sister Shaohua, sister Jingshu, have a taste. Look at my brother's craft. " Although Xue Fei's wife has a low education level, she can win in her sincerity. Moreover, she recognizes a person and makes great efforts to communicate.

For example, Lao Gao and Lao Gao's daughter-in-law really took Xue Fei's daughter-in-law as their own girl. Xue Fei used to play mahjong. Xue Fei's wife couldn't help it, so she went crying to find Lao Gao and Lao Gao's daughter-in-law. Let them clean up Xue Fei.

Zhang Fan tasted some dishes and really felt good. Sichuan cuisine, no matter what kind of food, is blindly pursuing a spicy flavor. Anyway, Zhang Fan seldom eats Sichuan food outside.

But this table is really good today. Some dishes highlight a hemp flavor, while others highlight a spicy flavor, especially a dish of pickled cabbage fish, which is really good. In winter, a pot of warm pickled cabbage fish will sweat a little, which is absolutely enjoyable.

After dinner, several women visited the hotel. After all, there were no formal business and no guests. Zhang Fan and Lao Gao Xue Fei sat together and began to chat.

"This promotion, I heard from my classmates in the Department of health that the directors and vice presidents of several provincial capitals are interested in tea. Don't be careless." For Zhang Fan, Lao Gao really appreciates it. When Zhang Fan was quarking, he wanted to take Zhang Fan away. When Zhang Fan entered the city hospital, it was Lao Gao who made the radish pit, but before Lao Gao took care of Zhang Fan, Zhang Fan himself had taken off.

"Master, don't worry about him. Give the doctors in the provincial capital three courage and don't dare to figure out the position of the dean. You should pay more attention." Xue Fei talks while eating peanuts.

Lao Gao glanced at him, "I really want to be a director of the Department!" Lao Gao is absolutely telling the truth.

Xue Fei turned his white eyelids and muttered, "if you go up, you still want to come down!"

China is like this. If you really want to go up, it will take you a lot of trouble to come down.

.....

In the bird market, Zhao Jingjin looked at the bookcase on the wall in a daze in his study "Go or not? "No or go?"

The local doctors haven't felt much about the upgrading of tea, while the vice presidents and department directors of major hospitals in niaoshi began to tangle.

It's really a stone that stirs thousands of waves.

Chapter 1156

Choice, sometimes choice is more important than effort. When faced with choices, many people either choose casually with their eyes closed, or throw steel bars by fate, or their heads are hot and choose with the so-called unreliable intuition.

In fact, people don't have many opportunities in their life. Be careful and you will never lose. Just like chasing a girl, the success rate of taking off someone's pants is definitely higher than your brother's hot impulse.

Although Zhao Jingjin is a River scholar, he can only be a vice president because there are too many great gods in the provincial court and too many people who don't know the foundation. After all, it is the provincial capital. Who knows which cloud comes down from, there are too many people like his brother-in-law.

If you continue to stay in the provincial hospital, it's hard to say whether you can reach the president, but the academic height will come to an end. Although the level of the provincial hospital is the same as that of the hospitals of several affiliated universities next door, the academic level is much worse.

Several other affiliated hospitals are either strong in surgery or internal medicine. Their provincial hospitals are strong in veteran cadre wards. No, they are now called special needs departments. Some people may be scruples when they are on the stage. Once they land safely, to be honest, they really

doubt his quality and how to be a leader. A large part of the funds of the provincial hospital are spent on this department.

If you go to tea vegetable, don't even think about the position of dean. He knows Zhang Fan too well. Although he smiles like a newly graduated college student on weekdays, he is polite to everyone, and even the little nurses in the hospital dare to call him black balangzi.

But there are all nurses in internal medicine, nurses who have not had surgery, nurses and doctors who have had surgery with Zhang Fan. Who dares to shout, Zhang Fan in the operating room is like a tyrant. Now the young man doesn't care much about his rights. If he gets a little older, it is estimated that when the operation level reaches the end, he will definitely

Although not at the administrative level, there is hope in the academic aspect with the addition of tea. Zhao Jingjin sighed and sat in the office. He didn't know what to do. Looking at the sunset that was about to fall out of the window, Lao Zhao suddenly seemed to figure out something, "you have to pursue something, don't you!"

.....

Xu Guangwei, President of the first affiliated to the bird market, and Luo Zhengguo, director of brain surgery, sat together. Although they said they would drink tea again, the tea has been put for a long time and no one has moved yet.

"Xu Yuan, the organization asked me if I wanted to go to tea. Do you think I should go or not? "

"Where?" Xu Guangwei is a general foreign born.

"Vice president."

"The first vice president?" After asking, Lao Xu seemed to think it was impossible, and said: "the development of tea vegetable hospital is too fierce. I read the evaluation report. The current equipment volume of others has exceeded that of the provincial hospital. If Zhang Fan continues to stay in tea vegetable, it is estimated that he will surpass us in a few years.

They are not very good outside the brain. Now there are few people except Xue Xiaoqiao and Dai Yuhang. I know their director outside the brain. Their level is average. "

"Should I go?" Luo Zhengguo asked.

"As a friend, I suggest you go. As the Dean, I certainly don't want you to go."

"OK. I got it! Thank you, Xu. "

.....

The leaders of the bird market have suffered a loss in tea, but they will certainly not give up. Of course, he won't find a chance to scold Ouyang again. This is not a child's family. You think the tea vegetable government can arrange troops in advance. Can't I be indifferent to the bird market?

I'm kidding. A hospital with an annual income of more than one billion and assets of more than one billion has opened its mouth to win. If you want to do it, do it thoroughly. First of all, Zhang Fan's files were transferred directly. People from the bird city personnel office didn't ask Zhang Fan's opinions, so they said hello.

"Zhang Yuan, your salary card needs to be changed, and it will be sent back to the people's Bank of China in the future. In addition, the medical insurance card has also changed from municipal medical insurance to provincial medical insurance. When you have time, go to the bird market and go through the formalities. "

Zhang Fan woke up and became a Provincial cadre. When I graduated from college, the Organization Department chose to work. When I was full of clinic, I chose two people, still a couple. At that time, everyone wondered how the young man was elected because he was less famous than Zhang Fan when he was at school?

Later, Zhang Fan understood. What he admires is not the young man, but the young man's girlfriend. Between freshman and senior year, all kinds of handsome guys revolved around. The fifth year suddenly changed from explosive head and smoked makeup to her at the same table, and then

Zhang Fan was managed by the province, and then Lao Chen was the president of the First Affiliated Hospital and Lao Ju was the president of the Second Affiliated Hospital. Although Lao Gao didn't move, it is said that the province has begun to let the coal city hospital agree to the merger. Although the evaluation report has not been passed by the Ministry.

However, the personnel order also follows. President Zhang Fan is in parentheses (the department level enjoys the treatment of deputy department level). When Zhang Fan received the document, he felt strange, as if he was about to retire, and the leader gave him a consolation award.

Many people don't know what the level of treatment means. In fact, to put it bluntly, they pay a little more money. The most important thing is to see the play and sit in front of the meeting and get on the podium. Of course, the meaning of this sentence is definitely not literal.

The Dean was Zhang Fan. As a result, the secretary was a department level veteran directly sent from the province. He said he was about to retire and helped Zhang Fan and Ouyang before retirement. Ouyang was promoted to half a level and became the first deputy secretary. Ren Li was also promoted to a half grid, became a full-time senior discipline official, and no longer holds the post of secretary of the Health Bureau.

Then Zhao Jingjin became the first vice president of chasu, Luo Zhengguo became the second vice president, and a director of the Second Affiliated Hospital was the third vice president. It can be said that the former team of catechin was dissolved directly. Only Zhang Fan, Ouyang and Ren Li can enter the team meeting. In the past, Lao Gao couldn't join the team. It can be said that they have changed from the top of the hospital to the middle of the hospital.

On the tea vegetable side, I think Ouyang will make trouble, because in everyone's eyes, Ouyang won the first place in power. However, this time Ouyang didn't make trouble, and even took office quite happily. Ren Li doesn't care. In her words, she just needs to be relieved of her director of Cardiology.

The idea of the superior is also very simple. The team meeting is three to four, and the organization's intention can be well reflected. And Zhang Fan is still at the department level. Others are at the department level and deputy department level. You can't go too far, can you. In fact, the organization personnel in the province have simplified the hospital and the doctor.

Although the hospital is a public institution, it can also be regarded as an enterprise. It depends on technology! The Ministry hasn't passed yet. The Secretary has come to work.

In his fifties, everyone can laugh and hold each other's hand for a long time. The flabby muscles on his face are like an old lady. People came to work with their secretary and reported to Zhang Fan at the first time.

Zhang Fan and Ouyang are talking in the office, "Ouyuan, I've wronged you this time. Why don't I talk to the leader again? You pick the big head and I'll follow you."

Ouyang glanced at Zhang Fan. "You think this is a child's family. I'm very satisfied with the result this time. Do you think it's easy to hold a meeting to top the intestines and stomach of a province! OK, I'm old too. While I can still move, I'll beat the drum for you and open the door. The road ahead still depends on you. "

"Zhang Yuan, European Court, the secretary is coming!" Old Chen Feng shouted angrily. No one came in, but his voice came first.

Zhang Fan and Ouyang looked at each other, and they quickly stood up and prepared to meet.

According to the truth, the secretary is the number one. It is clearly written in the regulations. The secretary is in charge of personnel and the president is in charge of business.

But the hospital, this thing is mainly business, ah, department directors, can not be appointed casually. Therefore, in fact, the head of the hospital is the president. Of course, later, small hospitals became shoulder to shoulder, and large hospitals became secretaries to manage business.

But it hasn't changed yet.

"Ha ha, ouch, I'll report to the dean. Zhang Yuanhao! Hello, President Ouyang! " The Secretary stepped over Lao Chen and came in. With a kind smile on his face, he quickly stretched out his hand and held it to Zhang Fan.

"The superior was worried that you experts and scholars were tired. Before the work was handed over clearly, he urged my old horse to tea vegetable. Although I am not a doctor, I have spent half my life in the medical system. I understand the rules. In the future, I'll take care of all the miscellaneous things, and you'll be at ease to see a doctor and save people! "

Ouyang stood on one side and his triangular eyes stood up.

Zhang Fan held his hand and smiled, "it's hard. Sit down! "

If it was in the past, Lao Chen had come in early to make tea. This time, I don't know whether Lao Chen was a little uncomfortable or something. Anyway, he didn't come in.

Zhang Fan made tea and poured water himself, but Ouyang didn't leave. She wanted to see what this guy said.

"The leaders attach great importance to it this time, and the team is highly qualified. Professor Zhao Jingjin, Professor Luo Zhengguo and Professor Yan Xiaoyu took the first step because their work had not been handed over clearly. "

The Secretary's name is Lu Bingnan. The old man has rich working experience. In his early years, he worked in the love Health Association, then went to the medical administration department, finally turned around and returned to niaoshi to become the Secretary of the Medical University, and then turned around and became the Secretary of the tea vegetable city hospital.

As he said, although he is not a doctor, he has been dealing with doctors all the way. He has rich work and struggle experience from small doctors to large hospitals.

This is also a skillful person selected by the leaders of the bird market. Find a young one to gild. Don't even think about it. They won't be bullied by Zhang Fan and Ouyang to cry for their mother. They can treat Ouyang as a good person.

It's not possible to find a doctor. In Ouyang's words, it's really difficult to find a doctor better than Zhang fanniu in the bird market.

Therefore, this old man with thorns and needles in the mud is the best candidate. Leaders feel that several vice presidents from the bird market should naturally approach Lu Bingnan. In fact, Zhao Jingjin called Zhang Fan before he went below.

He said he would come to tea vegetable to be Zhang Fan's assistant. At that time, he said: "you boy, you are good enough. I wanted to dig you, but I didn't dig. Now, I don't have to dig. I'll have tea by myself. You can do it later. If you don't get me an academician, I won't finish with you.

Do you know Lao Lu? I've dealt with a very old man. When he was young, everyone called him a smiling tiger... "

It sounds like Lao Zhao is quite angry. In fact, this is the bottom. I'm here to be an academician. Luo Zhengguo of the First Affiliated Hospital made a phone call from Xia Wen " Zhang Yuan has been appointed. I think a bedside CT should be equipped outside the brain of catechin. Look, orthopedics has a bone Institute. What is orthopedics? A better carpenter can do it.

And outside the brain is the Pearl of surgery! You can't be eccentric when you are the monitor! "

Only Professor Yan Xiaoyu of the Second Affiliated Hospital didn't call, nor did he contact tea vegetable. When will he take office.

Chapter 1157

Lu Bingnan sitting on the reception sofa is facing Ouyang on the other side, while Zhang Fan sits in the middle. When Lu Bingnan said he would be responsible for chores, Ouyang was already angry. This is power, this is a demonstration.

The Secretary of that unit is diligent. If you let the superior know, even if Zhang Fan is reasonable, they will inevitably be reprimanded, and hygiene is the easiest to find problems. Just like the popular network language, it is not very harmful and insulting. So at the beginning of taking office, many leaders, regardless of others, start with a wave of cleaning, find problems in the cleaning, uncover a little, and then open one side. It seems dull, but it is very destructive.

Lu Bingnan looked at Ouyang and Zhang Fan, and his heart frowned slightly. "The relationship between these two people is really the same as what the superior said. This is a teacher and apprentice!"

"Hehe, look at what you said. You are the leader sent by your superior. How can you be responsible for logistics. As it happens, I'll hand over these personnel and instrument documents to you. " Ouyang said and took out a thick stack of documents that needed to be signed by the leaders from his bag.

These documents were originally Zhang Fan's business. In order to be lazy, Zhang Fan pushed it all to Ouyang, who now turns to Lu Bingnan.

Ouyang seems very generous. He gives Lu Bingnan the power of personnel and finance. In fact, Ouyang has a lot of small 99 in his heart.

Personnel rights, the directors of hospital departments, especially the directors of clinical and medical technology departments, generally will not be replaced unless the director wants to retire or the director is arrested for taking bribes. To tell the truth, there are some directors who can't be removed even if there are some problems in the relationship between men and women. Especially in small places, the smaller the place, the more precious this technical authority is.

If a government leader has a problem with the relationship between men and women, it is directly equivalent to the end of his official career, and the technical unit is different. Therefore, I have seen government leaders promote female subordinates, but I have not seen government leaders divorce. Hospitals are different. Department directors in many hospitals often bring young daughter-in-law with them.

It can be said that there are many people who can be officials, but not many who can be directors.

Therefore, there is little difference between this kind of personnel power and not. The director of a department is appointed. Many times, the hospital president is changed, but he may not be able to appoint several directors. Other positions, such as logistics, security and even procurement, are inferior in hospitals.

As for the purchase of equipment representing hospital hardware, it is a big pit. For example, an imported CT needs at least four or five hands from the customs to the gate of the hospital. With so much money allocated in a financial year, if you can't buy good instruments and don't mention others, several leaders of the hospital can break your head.

But if you want to buy it, it's not so simple. Say hello, approve notes, and even if you don't buy someone's things, you can't get the appropriation down. Therefore, hospital leaders are often not caught because of building, but often because of buying nuclear magnetic CT.

Zhang Fan is tired of such things, but if you want other people's money, you have to look at other

people's faces. Therefore, whenever there was a chance, Zhang Fan pushed the matter to Ouyang. As a result, now, Ouyang pushed the matter to Lu Bingnan.

If it is other hospitals, this one is definitely the fat meat watched by several presidents, but the tea vegetable hospital is different. Does the equipment of the tea vegetable hospital need to be a gift or brought by the cooperative enterprise? In fact, this one is not only unimportant, but also troublesome. The money for tea is actually in the small Treasury. Of course, Ouyang and Zhang Fan will never let others point to this small Treasury.

Lu Bingnan turned his eyes, "the legendary Ouyang and Zhang Fan shouldn't be so easy to talk!" Although there are doubts, he will not give up the right of two to the mouth. However, he will never let Zhang Fan and Ouyang lead by the nose.

Thirty years in the health care system is not in vain.

"Ouch, with the cooperation of such good colleagues, I am absolutely confident to do a good job! In order to share the worries of the two experts and meet the negotiation, I decided to pay attention to the health of the hospital. Although the health of the hospital has been very good, people will relax if they don't get on the string, and people will have problems as soon as they relax.

In a unit where human life is vital, any little negligence is fatal. The government has made such great efforts to improve the national health security. We can't ruin the achievements we have struggled for decades because of some small things. We should follow the pace of XXX and pursue hospital harmony and the harmony between medical care and patients. Where does this harmony start? I think we should focus on the big picture, For example, cooperation with Marubeni countries should start from small areas, such as health. More efforts should be made to improve the overall service quality of tea vegetable hospital! "

A few words are well grounded. Zhang Fan and Ouyang have no way to refute them. People are following XXX's footsteps. If they object, it is not a matter of way, but a matter of thought.

"Where do you think our service quality is not good!" Ouyang grabbed his little tail and began to refute. I agree with your harmonious hospital, but I also agree with your follow-up steps, but you have to say specific questions.

"I haven't found it yet, but do you change it if you have something and encourage it if you don't!" After Lu Bingnan got the financial and personnel rights, he was a little careless. He felt that Ouyang and Zhang Fan, a woman and a hairy boy, should not be as terrible as the legend. Even if the technology is high, but high technology does not mean that you understand policy and politics. You see, they foolishly called out both personnel and finance. Personnel is both politics and finance is both power! I didn't work hard, so they disarmed!

As a result, Ouyang became angry with a little carelessness.

"Since the founding of the people's Republic of China, our tea vegetable hospital has been established. After several Adobe houses in those years and the hard work of our tea vegetable medical staff for generations, we have today, high-rise buildings and research institutes of various disciplines.

Do you think we're lying here waiting for this? This is the hard work and sweat of our generations, and this is the merit of our generations.

It's nice of you to say that when you get out of the car, you let us bear great grievances. Is that how you lead? Ah, is that how you become a secretary? What does a secretary do? Is a secretary like you just talking nonsense without investigation?

I tell you, if you don't recognize the glorious history of the hospital, you are not qualified to lead the hospital. Is that how I taught you? Is it for you to play bureaucracy? Did you go to the Department for research? Do you know how many departments, doctors and nurses there are in our hospital? Do you know how many gates there are in the tea vegetable hospital? "

PA, Ouyang slapped him on the table. Lu Bingnan's green and trembling lips almost jumped up. One hand held his chest, the other hand trembled. His eyes looked at Ouyang for a while, his mouth was open and he couldn't speak. He looked at Zhang Fan for a while and wanted Zhang Fan to say a word.

He thought of the domineering of Ouyang and Zhang Fan. He didn't expect to be so domineering and difficult. As soon as he entered the door, he said a few routine words. As a result, he covered his face. A strong wind and rain made him bored. Who am I and who am I? Who am I?

"You're the Dean, you comment, you comment. Is there such a subordinate? " Lu Bingnan was almost crying and took Zhang Fan's arm. It was like a child fighting and looking for parents to judge.

"Take it easy, take it easy. Ouyuan, sit down and have a drink. " In the past, at this time, Zhang Fan shouldn't talk. But now it's different. Zhang Fan is already the monitor. He must speak.

Zhang Fan didn't think about it. He opened his mouth and said, "it's all for work. Our hospital has always been adhering to the practical and realistic working attitude. In work, one is one, and two is two. As secretary Lu said, the hospital is a place where people's lives are at stake. We should have reason and reason for anything we say and do. This place is not a place to talk casually.

Secretary Lu has just come here and is not from a medical background. Although he is also a cadre in the medical circle, Secretary Lu has been working in higher-level units, even at the national level. The general direction must be experienced and visionary. Without grass-roots experience, it is understandable! You should also be considerate of secretary Lu. However, we are a grass-roots hospital after all. The object of our service is the people. We are a front-line unit, not to study policies and policies!

Although we are grass-roots hospitals, our words and deeds represent the whole leading group. We should be cautious about some words. We can't increase the salary of medical staff, but we can always

make the grass-roots medical staff comfortable, can't we?

Of course, if Secretary Lu can greatly improve the income of medical staff, this is still feasible. After all, Secretary Lu came down from a superior unit. I've seen the world and gone through great storms! "

This is naked contempt. You are not a medical background. You have been practicing and don't understand anything. Don't talk nonsense first. You have a harmonious hospital program, and I have a realistic standard. You start from the big aspects, and I start from the big aspects.

Don't take doctors as cadres. I've also studied the policy! I don't just want to talk about you, I have to give you a task! If you have the ability to be a secretary, you have the ability to change money.

Ouyang directly hit his face and Zhang Fan criticized in circles. Ouyang burst and Zhang Fan wilted.

Lu Bing trembled with masculinity.

"OK, OK, OK, I'm not feeling well. I'll have a rest first!" Lu Bingnan didn't know how to get out of Zhang Fan's office.

Out of the door, the Secretary hurried over, "Secretary Lu, what are we going to do next? Do we need to talk to the middle-level of the hospital one by one?"

"Talk nonsense!" Lu Bingnan finally broke out. The secretary was scolded as stupid. What's the matter? When he came, he was happy. Why is it like this now

Lu Bingnan sat in his office with a phone in his hand. He thought for more than ten minutes and didn't call out in the end " Wait, wait, wait. When other deputies come, I see what you say. It's too bullying! " The more Lu Bingnan thought about it, the more he felt that he had been insulted.

.....

"This man is not a good stubble. If we don't destroy his prestige, he thinks we are easy to bully and will make waves. Now it's a critical period for the hospital, and we can't relax. Let him preside over the bidding in a few days. In the past, the city allocated funds. Those people made my head three big. Now it is the provincial allocation. The princes in the province will definitely give him a headache.

We must not let go. If we want to buy the best equipment, otherwise... "

"Well, if the equipment can't pass the unanimous consent of the department directors, I won't sign. You can rest assured!"

It didn't take them long to make a policy.

Grill it on the fire, so that you can claim power as soon as you enter the door, and let you put an official

voice as soon as you enter the door. If you don't know it, you really don't know in which direction the door of tea vegetable hospital is opened.

Lu Bingnan didn't sit in the office for long. Wave after wave of equipment manufacturers and wave after wave of drug dealers went on Lu Bingnan like a running mat.

Lu Bingnan is really afraid. This is not a note with so and so, which is so and so's nephew. Lu Bingnan's hands began to shake.

Chapter 1158

In those years, there was a leader who worked almost from the most grass-roots village Party Secretary to a high position. He went through all levels of the Chinese system. Then, many leaders in the system said that this man was too powerful. Why? Because no one can fool him, and no one can endure step by step like him. People with resources are not easy to endure.

Because he has experienced it, when he reaches a high position, it is different. The book comes to a shallow end. I absolutely know that I have to practice it. In fact, many things are like this. When the superior conducts research, he often places an old Youzi from the grass-roots level in the research group.

He is not familiar with others, but his business. When experts fool people, they are just like fools. Professionals as like as two peas in the leadership are actually just like experts who fool the common people. Even coax and frighten. When the leaders react, they have achieved their goal.

For example, hospital bidding, greeting from various forces, playing again and again, who wants to know which force wants to go abroad, who wants to know which force's boss has cancer and wants to get the last one. If everything is promised, in a few days, people will have to manage the meal at the designated place at the designated time.

Another example is the simplest vitamin. There are hundreds of thousands of dollars a bottle of Australian American vitamins, as well as OTC vitamins that can't exceed five dollars. Thousands of vitamins are packaged well, with various anti-counterfeiting marks on the packaging box and various laser bar codes.

And a few dollars of vitamins, simply a small plastic bottle, just like counterfeit products. But for the unity of a product, thousands of are like children's play, while a few dollars are almost the same. So

sometimes, you can't just look at the surface. This is why county leaders may not be good village officials.

Just like the financial and personnel rights of the tea vegetable hospital, it seems that these two are very important. In fact, these are two big pits.

In Ouyang era, the tea vegetable hospital was not outstanding. Even if you buy instruments, the one-year appropriation of tea vegetable can't buy anything. In the era of Zhang Fan, there was more money and more greetings. Ouyang's Taiji Bagua massage hand was shown. All kinds of delays, all kinds of excuses. When Zhang San came, she said what happened to Li Si. When Li Si came, she said what happened to Zhang San.

Just like the aunt who picked right and wrong at the entrance of the village, she let these forces fight before entering the hospital. After deciding the outcome and entering the hospital, she said there was not enough money. Where was the money? Misappropriated. All forces were hung on the hillside by Ouyang.

It has cost a lot to evacuate. If you don't evacuate, you can't make a lot of money. Anyway, Ouyang is like an oil monkey. This is the experience of fighting at the grass-roots level for a long time. Without the experience of running the first political yuan and the past of the grass-roots level, Lu Bingnan, who has been acting under the orders of his superior units, was angry.

He wants to listen to this force, and he wants to answer the boss's note. He can imagine that in the future, he will wear blue and white clothes and sing iron window tears. When a hospital secretary, the most difficult thing is often not the internal affairs of the hospital, but the external affairs of the hospital.

You have to deal with all kinds of forces. Without the ability to dance on the tip of the knife, you can't deal with these relationships. You can only be like Ouyang's rubber stamp. When people raise their hands, you raise your hands. When people get angry, you frown. You don't even dare to have your own ideas. Because you have no authority, because you can't work, you are an idle person with a position.

In the workplace, there is no pity. You have to kill each other as soon as you make a move, or you will raise a tiger. Who is Ouyang? He's already angry. Can simple make you relaxed? impossible.

These are people who can't wait for dawn for revenge. The next day, Lu Bingnan didn't understand the relationship between various agents, so Ouyang organized people to start the last bidding at the end of the year. The government subsidies for tea, the surplus funds of the hospital, and the bidding of millions

of dollars are like a freshly baked cake, attracting large and small bees.

Ouyang also said well. Spend the money quickly. If you don't spend it, the appropriation will be reduced next year.

Lu Bingnan was almost crying. He had never been in charge of the first house of government. When he first received the appointment, he felt that he was several years younger and could rise in the morning. As a result, Lu Bingnan, who had not much hair these days, is losing weight day by day.

What should I do? It's like a chain buckle, one buckle after another. The hospital urged him to spend money to buy one, as if the hospital would be closed if the instruments could not be bought. The pharmaceutical companies of various forces also urged him to spend money, and some even promised him to buy a bird market house as long as they signed.

He's scared to pee. It's not a gift. It's just a bullet. I wish he would die early.

There are also many chores in the hospital. Because of the entry of the marukuo team, Ouyang advertises everywhere. Tea vegetable TV stations and radio stations are just like those selling cranial brain platinum. Taxis, buses and even the aunt of the neighborhood committee keep shouting with a small horn: xiaomaru has come to the tea vegetable free clinic. Anyone who has a headache can go to the tea vegetable people's hospital to see a foreigner, No money to see a doctor!

The tea vegetable government also helped quite a lot. The government came forward directly and spread all kinds of official advertisements. The envious president of the hospital of traditional Chinese medicine has lost his teeth“ Just a few small balls. There's nothing to show off. So are the leaders. Follow Ouyang and Zhang Fan. "

On weekdays, there are only one or two thousand outpatients, which has suddenly increased several times. In the surrounding counties and cities, there are old patients for many years, some who want to go to the bird market in the mainland to see a doctor, and those who have given up but have a glimmer of hope, like ants, have gathered to tea from all directions.

Ouyang even advertised all countries. Advertising in Stan is like buying God oil. All kinds of exaggeration. The strongest medical scholars in Asia gather tea to treat all kinds of difficult diseases and infertility.

When the negotiation team entered the hospital, the number of patients in the people's Hospital of chasu city also increased suddenly, as if they came to the hospital to get lunch boxes. There was an endless stream of people.

"Yaoxi, this hospital can already radiate the surrounding area locally. Have all the doctors gone to the clinic? " The leading Marubeni chaebol asked his assistant.

"Yes, they all followed your instructions. They were deeply afraid of the fake tea vegetarians. The doctors personally went to the front-line clinic to investigate whether the doctor's number was fake."

"Yes, you must feel it clearly."

Whose children who love, who earn money who cherish, this is right. The team of Marubeni started to evaluate comprehensively from all aspects, and even investigated the source of drinking water.

There are many patients in the hospital, so there are many and complicated things in the hospital.

Ouyang is in charge of hospitality, and Zhang Fan is in charge of surgery and laboratory. Ren Li is responsible for the clinic and ward. The three members who can enter the team have tasks, and Lu Bingnan can't be idle. For a while, the private car at the gate was blocked for 120, for a while, there were not enough translation nurses, for a while, the capacity of the blood bank was bottomed out, for a while, the outpatient doctors had surgery, and the outpatient patients made trouble.

I don't know if the staff of the hospital were not convinced that Lu Bingnan was still intentional. Anyway, things went one after another, one phone after another.

"What did you do before?"

"Before? In the past, the Secretary and the president gave orders. How they give orders, how we do it! "

Lu Bingnan really couldn't open his mouth and asked what orders they had given before.

Like a firefighter, he ran eight times a day to the outpatient building. Sometimes there were many patients and he couldn't get on the elevator. He had to be afraid of the stairs. Like walking a dog, not to mention Lu Bingnan, who was in his fifties, even more than 20 secretaries were slipped out of their tongues.

"When you take office, your superior has issued the letter of appointment. You must come in advance. I don't care how important you are, you must report to the hospital tomorrow. Yes, that's not just what I mean, it's the degree of responsibility for this profession. And your sense of mission. "

Lu Bingnan really can't hold on. He wants to make a retirement report. He took the phone and began to urge several deputies. He felt that they were his people.

.....

"After the summary of clinical data and animal experimental data, we showed that the success rate of colon cancer induced by 1,2 dimethylhydrazine was 93%."

Zhang Fan took the negotiation team of Marubeni and the evaluation team to the most advanced laboratory of chasu hospital. He took the materials made by Zhao Yanfang and gave them serious data. The leaders of the assessment team and the negotiation team were confused.

But in this way, I have to pretend to be able to understand, not only understand, but also listen with interest. It's really difficult to tell the truth.

"Has dimethylhydrazine been used in human body?" A young ball girl of the consortium asked a question. After all, she was still young. None of the other old foxes asked. She couldn't help asking. Although people are beautiful, their legs are a little circled.

"Oh, no, how can we use carcinogen inducers on human body. The human body is mainly data collection, and inducers are mainly used in experimental mice. "

Zhang fanle. If it is an expert level question, he may not be able to answer it. He is most willing to answer such a layman's question. Of course, although he is not an experimental expert, Zhang Fan will not be serious with laymen.

To tell the truth, a professional level person and a layman argue about professional issues, which is absolutely full.

"Oh, so what is this substance?"

The experts of the meatball team couldn't help but directly interrupted her sister and said to Zhang Fan, "how much time do you need for diagnosis?"

Zhang Fan straightened his face. "On average, 60% of patients need more than 3 months."

"Oh? Improved so much? " The experts in Marubeni also changed their faces.

On the current diagnostic level, from the onset of symptoms to clear diagnosis, the diagnosis time of patients is often half a year or even longer.

Because medical treatment can't be diagnosed as soon as you get sick. Sometimes doctors are not good enough, or doctors are negligent, and sometimes patients do not pay attention. The tea element can be increased to within 3 months, which shows that the medical level of tea element hospital exceeds that of most hospitals in intestinal tumors.

Chapter 1159

Where there are people, there is Jianghu. Where is no struggle? Moreover, most of the struggle is a struggle of spirit, not a struggle in any direction. Therefore, in the following years, in order to reduce this internal friction, in grass-roots units, there are generally no double chief officials, often one shoulder to shoulder. The salary is double, and no one quarrels when there is a problem. Good and bad are your own.

Of course, at the level of tea vegetable city hospital, it's impossible to shoulder it. Because tea vegetable hospital is not only a simple local class III hospital. This thing has become an influential and high-level hospital in a province.

It is not only responsible for the medical treatment of tea vegetable people, but also needs the participation of tea vegetable city hospital in rescue and disaster relief, handling major accidents and responding to emergencies.

Ouyang is happy to let the expert team of Marubeni participate in the outpatient service. Although the main task at present is to retain the investment of Marubeni, in fact, in the long run, it is still for local medical treatment, so this kind of thing will never be opposed.

Zhang Fan is busy taking people to investigate. Ouyang doesn't have the consciousness to be the third leader. She should still give what orders, what orders. modest? impossible.

Just when the tea vegetable city hospital was busy dealing with the evaluation of the superior and the negotiation of the pill country. An enterprise employee in coal city suddenly had a large number of patients with nausea and vomiting. Just like a person who ate half a belly of soybeans and drank half a belly of pickled cabbage water to go on a blind date, he didn't dare to fart for a long time. As a result, he couldn't hold it. He sprayed excrement residue through his pants.

The leader of the bird market changed his face angrily“ Why is there no warning? Why is it not reported? What does he eat for Wang Xuyang? I'll remove him! ”

It's too late to say anything now. Because it's almost the end of the year, ordinary Chinese people pay attention to not getting angry or quarreling in the twelfth lunar month, and end the year safely. Of course, the leaders of an enterprise or even a city think so, or because the next year is the election year.

Coal city is owned by the country because of oil. Of course, some experts can get involved. For example, when an oil well was drilled, it was rated as a poor oil well with no exploitation value, and then 500 thousand were sold to experts. Of course, this kind of expert is a minority after all.

The coal city not only has oil, but also has coal mines, especially coal chemical industry. Just like intensive enterprises such as home appliances and textiles in the south, coal city has a large number of resource intensive industries. This kind of enterprise does not say anything else first, the management of an employee is quite difficult.

I wonder if the leaders of coal city enterprises also learned from Foxconn and directly came to a set of closed management. That is, eating, drinking and Lhasa are all in the living area, not the factory and living area on weekends. Anyway, a large part of the money earned by employees should be consumed by the tertiary industry companies in the enterprise.

Resource-based enterprises are originally troublesome enterprises. Not to mention anything else, the fighting between a coal mine and a coal mine is not capable of ordinary people. So often this kind of private enterprise is like the confluence of various armies.

Big heads make big money, small heads make small money. The big boss earns money from minerals and the small boss earns money from workers' consumption. Just like the copy room and small supermarket in many units, it is said that it is for everyone's convenience, but the price is not so convenient.

The price is inconvenient and can be tolerated, but sometimes, the little leader thinks he makes too little and makes black money. This is terrible.

The largest coal chemical gas enterprise in coal city, this thing is to turn coal into combustible gas and sell it for money. There are several bosses, including those who pay, those who show face and those who make efforts. There are more small bosses, and the canteen is contracted by a small boss who works hard. This guy is a local bully with many brothers.

In order to make more money, the little boss did not know where to get a pile of cheap seafood. He said it was seafood, but it smelled like it had been frozen from the refrigerator for more than ten years. It's a special smell anyway.

In order to cover up the taste, seafood with heavy seasoning and spicy taste, in order to pursue freshness and tenderness, came out of the pot at random. The coal city is located in the northwest. This kind of thing is rare. The workers who have left work gather in the canteen, a canteen with thousands of people " Hey, good stuff. There are spicy shells. It's so cheap! "

"Recently, everyone has produced a lot of coal and is tired. I'll add food for you. There's not much seafood. You should try it! One person can only play one! " The boss was deeply afraid that this pile of seafood would hit his hand and played a hungry sale.

To be honest, after the establishment of the state of China, the sanitary conditions have been greatly improved. In particular, the four pests in the year were good and bad, but in general, the control of plague and malaria is quite beneficial.

However, even so, there have been several diseases that have shocked the whole country. In the 1980s, tens of thousands of people in the magic capital had diarrhea, and in the 1990s, the whole country took

Radix Isatidis orally.

But some people may not know, or pretend not to know. The canteen owner did not know how to get a lot of seafood without food quarantine to the canteen. It's terrible to think about it. How did you get all the way from the seaside to the northwest inland?

Then, in a factory area, tens of thousands of people, at the beginning, several people had diarrhea, vomiting and high fever. The doctor in the factory clinic thought that these workers had caught a cold, so he casually prescribed some cold medicine and sent them off. But one night later, dozens of people suddenly had a fever.

The boss was still lucky. As a result, on the third day, dozens of people became tens of thousands of people with fever and cold. This time, the boss was afraid. It was reported to the leaders of the coal city. The leaders of the coal city were scared to death. It was really a disaster. I didn't think about it. I called you bird market.

Bird city leaders dispatch appropriate medical teams while pursuing responsibility. Because this is not the illness of hundreds or dozens of people, it is a man-made disaster of tens of thousands of people. If there is death, the consequences are unimaginable.

"Annex I and Annex II, have the rescue teams of the provincial hospital set out?"

"Let's go, but we're definitely short of manpower. Let's give orders. If we don't give orders again, the consequences will be unimaginable."

"OK, please ask the general office to let the army in. Also, send out all the medical teams that can be sent out. There is also the screening of the main responsible persons of the local government. " The leader of the bird market was suddenly ten years old.

"Only the tea vegetable hospital near the coal city has this ability, but they are still in the critical period of negotiation..." the Deputy hesitated a little. The billions of negotiations can really make the leaders of bird City hesitate. After all, it is the northwest.

"There are no more people. Why do you worry about this now! Come on, call and ask the tea government to send someone! "

"The hospital has been managed by the provincial government. They have been handed over to the bird market, although there is no following at present."

"Just give orders and let them go."

.....

Good things don't come in pairs, bad things don't go alone. After the bird market gave a direct order,

when Zhang Fan and they were ready to start, there was an angry news from Haihe port. The instrument that the special orthopedic hospital gave to tea element from golden hair was held in the.

It is said that this large-scale nuclear medicine equipment can not meet the use conditions in the frontier. The equipment can only be installed after inspection and appraisal, and the personnel can only take up their posts after unified training by the Ministry of health.

The meaning is also very simple. In other words, the basic construction of tea element is not in line with the installation of this equipment, and the medical technicians of tea element can not reach the height of using this instrument.

But what if they brought all the instruments? Go back? Of course not. As a result, this time, a professor of the Nuclear Medicine Research Office of the golden mean medical department said: "don't say tea element. Even if demons use it, it's a bit wasteful. This advanced instrument can only be put in the capital to give full play to its maximum efficiency. I suggest that we let the instrument enter our laboratory. In advance, we can send someone from the tea plant to study. When they learn, they can participate in our research. Of course, we will also subsidize the tea vegetable hospital.

We are also for the medical cause of this country. No, we are also for the pursuit of better technical means, no! "

It sounds good!

The fire burned to the eyebrows.

"What should I do?" Ouyang had blisters on his mouth all morning.

"Instruments are important, but infectious diseases in coal city are more important. My opinion is to take it off, drag it and let the port press the equipment, and wait until we finish dealing with it. As long as the instrument is not installed, it's never too late. We can't be in a hurry! "

Zhang Fan thought for a moment. Although he hated his teeth, his words were quite broad-minded. He is the chief officer now. He can't throw things to Ouyang as before. What's more, it's too big this time. The price of the instruments sent by the special orthopedics department is not mentioned first. I just want to buy them. There's no place to buy them.

"Good! But we have to send someone over. Let Lao Chen pass! "

"Lao Chen can't do it alone. Let's make way for secretary Bingnan. After all, he is a person from a ministry. He is relatively familiar with his head and higher position." Zhang Fan thought.

"All right." Ouyang bit, but he couldn't help it. We can only release Lu Bingnan first.

Lu Bingnan escaped the disaster and flew to Jinhe overnight with Lao Chen and several officers of the

medical office.

Zhang Fan, they also set out.

Ouyang and Zhang Fan, like hamsters, gather equipment, equipment and personnel for the hospital bit by bit. I really can't see it on weekdays, but when the superior gives a dead order, the team is really different as soon as it is pulled out.

There are five operating vehicles that can perform operations above level II, three pure water treatment vehicles that can be used by 800 people, two mobile checkpoints, and thousands of medical staff ready to start at the same time. The largest rescue support helicopter in Asia. There are almost more than 20 120 vehicles.

Hula, hula, directly refers to the scale of a class II class a hospital. The government is also very awesome this time, although the incident is in the coal city, the government of the tea can personally arrange the escort of the traffic police.

"I don't want you to become martyrs. I just want you to return safely. Tea can't live without you!"

On weekdays, the dirty leader in charge of health personally sits in the tea vegetable city hospital, "don't worry, as long as I'm in one day, I'll look after your home for one day. I will wait here for you to come back! "

set out!

Zhang Fan and Ouyang led the team, and the tea vegetable hospital almost poured out. Doctors and nurses in all departments, who are on vacation, must return regardless of your marriage or funeral.

The left behind doctors and nurses are really like the left behind villages. They are old, in poor health and have a big stomach. In the past, these people who were second-line or had been on vacation were pulled into the hospital as the front line. As for other front-line medical care, one is counted as one.

Let's go.

Chapter 1160

Although the altitude of tea is not high, it is located at the foot of Tianshan Mountain. There is no problem for a drunk to freeze to death due to the heavy snow and weather in winter. In front of the outpatient building of tea vegetable hospital, the lights are shining. The searchlights and the car lights of various large special vehicles were all turned on. In front of the building stood rows of doctors and nurses.

Not by men and women, but by departments. Doctors and nurses are wearing green military coats. Male doctors are better. Female doctors and nurses are just like children wrapped in military coats. Extraordinarily petite.

Because of the cold weather, we couldn't find a unified down jacket for a while. The local government directly opened the logistics warehouse of the armed police, and the military coats were pulled by carts to the tea vegetable hospital. Although it doesn't fit, it's better when it's warm and the military coat filled with long staple cotton is not decorated. To tell the truth, it doesn't look good.

"Ouyuan, you come!"

"No, come on. You are now the head of a hospital. The hospital should have your temperament and your responsibility. Go up! "

"Good!"

Zhang Fan took the microphone and gently walked up the steps. When Zhang Fan walked up the steps, the people who had been buzzing, gossiping, chatting and asking for information were quiet. At four o'clock in the morning, blood was slowly floating in the sky. Under various lights, the snowflakes are particularly large.

"Comrades!" Zhang Fan looked at his colleagues in front of him. He wanted to ease the atmosphere with a smile, but, no, he couldn't relax looking at a group of colleagues who were ready to go.

"Comrades, there is an outbreak in coal city. Tens of thousands of people have fever, nausea and vomiting. The whole city was in panic. Although it is still uncertain what kind of infectious disease it is. However, compared with ordinary people, we are professional. Only we can give people a sense of security.

Yes, the unknown infectious diseases are terrible, but we are doctors. If we don't, who else can we count on? Now, I command! "

Zhang Fan's face was positive and looked at his colleagues standing in the snow“ The rescue team of chasu people's hospital set out immediately. "

"Yes!" Although the answers were uneven, the voices of boys and girls were firm.

Zhang Fan's red card started with kuluze. Zhang Fan turned on the rarely used police light in the

hospital. The motorcade set out, and the doctors of the infection department in the sky set out in advance in a helicopter accompanied by Ouyang.

Lao Gao stood at the gate of the hospital. His eyes were red and waved to the cars passing by. He didn't know whether it was cold or talking about something. His trembling lips couldn't say a word.

Because it is a regional class III hospital, intensive care unit and ICU nursing room of each department, there are critically ill patients, so Lao Gao and the leader in charge of health are in charge at the same time.

Police car, 120, helicopter. Heading for the coal city.

In the snowy weather, everyone sat quietly in the car. There was no noise, no tension, and only a good rest.

At the same time, medical teams from all directions converged towards the coal city. Doctors, the army, like a war, the highway, motorcade in all directions like a fire dragon, winding constantly.

"Zhang Yuan, the current feedback information is that the patient has high fever, diarrhea, nausea and vomiting. The patient broke out yesterday. "

Ren Li took the phone and reported to Zhang Fan.

"Why not give early warning? Why wait until you can't clean up before asking for help from your superiors? Is it clear now, what kind of infectious disease is it? "

Zhang Fan's tone is quite bad.

To tell you the truth, no one will be happy about such a thing. Especially without any useful information. Only the superior kept urging, come on, come on, come on.

"The hospital doctors in coal city also went down."

"So contagious? Notice that once you enter the epidemic area, you must all wear protective clothing. "

"Yes!"

"Call the European Academy and let them arrive first. Be careful."

Unknown infectious diseases, Zhang Fan's heart cluttered. To tell the truth, this unknown is the most

terrible.

Because of the unknown, doctors don't know how to deal with it. When racing against time, this unknown is the most terrible.

"Can it be an infectious disease of respiratory tract? A flu?" Zhang Fan drove the car and asked after Ren Li called.

"I don't think so. Respiratory infectious diseases, no matter how fast, won't happen to tens of thousands of people overnight. I think they are from the digestive tract. Maybe it's fecal oral transmission!" Ren Li frowned and said her guess in the dark carriage.

"You mean water pollution?" Zhang Fan is awake.

"The big probability is. Although there is no reliable information at present, I think it will be water pollution. Otherwise, there would not be such a large outbreak. "

"Where's the next stop?" Zhang Fan raised the walkie talkie and shouted.

"The next high-speed exit is the boundary of coal city, but the warehouse of COFCO storage is 20 kilometers away." The captain of the armed police detachment with the team reported the position at the first time.

"Come on, stop the high-speed intersections, let COFCO store how much mineral water and send how much mineral water to the high-speed intersections. Pay attention, pay attention, it must be bottled unopened water."

"Received, execute immediately!" The leader of the armed police squadron immediately repeated and replied to Zhang Fan's order.

Although before the team set out, it was not determined who was in charge. However, many times of rescue and disaster relief have led to a tacit understanding between the armed police of chasu and the Municipal People's Hospital of chasu.

Twenty kilometers, known in an instant. The employees of China Grain Reserve piled up the mineral water like a hill early.

"Report, 15 tons of unopened mineral water are ready, please give instructions!" The section chief of the security section of the grain storage company reports to Zhang Fan.

"Load the truck immediately, and tell your leaders how much you can take, and immediately enter the coal city with water and clean food."

"Yes! Our leaders are already preparing. "

"OK. Hard work! "

Fifteen tons of mineral water was quickly loaded into the truck by a group of armed police boys and officers of the security section of China Grain Reserve.

Some doctors of tea vegetable also want to help. But it was stopped by these boys“ You have a good rest now. We'll do this hard work. We'll have to rely on you later. "

The hands are frozen like carrots outside the Great Wall. Frostbite on the ears and back of the hands flows cool tissue fluid, but the head is as white as possessed.

The sensible little nurses looked at the great boys outside the window and said sadly, "let's go down and disinfect and bandage them!"

"No, pay attention to discipline. Our task now is to have a good rest. All of them. Close your eyes and have a good rest. Your battlefield is not here. "

On the SPACESTAR land spaceship bus supported by the tea element bus group, he led the team to the old house and seriously asked the nurses and doctors to forcibly close their eyes and rest.

The motorcade full of mineral water continued to set off quickly.

"Salute!" A group of young people in black security uniforms meticulously gave farewell gifts to the team.

The snow is also like coming to join the fun. It's getting bigger and bigger.

"Zhang Fan, it's hepatitis A! Water pollution of hepatitis A, coal city's tap water system has been afraid to use. I've reported to my superiors where you went and bring more water if possible. " Ouyang shouted at the phone.

"OK, I see! The vehicle has been equipped with 15 tons of mineral water. "

To tell the truth, let Zhang Fan guess the disease in this little available information, he will never guess. But Ren Li can, this is a physician, this is a focused internal medicine expert.

The motorcade got off the highway and went straight to the downtown area of coal city.

It should have been the roaring urban area of factories, only the street lights are bright! Everything suddenly became so quiet.

When they entered the city, Zhang Fan's convoy was also found by aid teams in other areas of the coal city hospital.

"Darling, where's the rescue team. Such a bull ~! "
