

Chapter 1161

"Do you still need to think about it? Of course, it's the city hospital of tea. With rescue helicopters flying in the sky and various vehicles running underground, can there be a second home in the frontier? They are enough to burn. You see, even buses are land spaceships. They are too rich. "

The doctors in bird market came earlier. When they saw the team of tea vegetables, if they were not all comrades in the trenches, they would definitely shout at the top of their voice that it was unfair.

Indeed, there are no regional hospitals in the provincial capital hospitals of a province. Can you say it in the past?

Of course, most of the young surgeons who looked up, left and right were young surgeons. Because they are not the main force at this time.

The mighty motorcade entered the coal city. Although the momentum was turbulent, the wind still couldn't cover Ouyang. In the sky, Ouyang was sitting on a helicopter, holding a loudspeaker, and had begun to command. Although the superior did not appoint Ouyang as the commander in chief.

However, knowledgeable people don't have the right to get on the plane, and those who have the right don't know the right to get on the plane. This thing doesn't take advantage. Who dares to come forward rashly about tens of thousands of people? If the command is right, it should be. If the command is wrong, it is dereliction of duty.

Ouyang is welcome.

"Annex I, raise your flag, pull the line in the northeast, separate the crowd, and don't mix with Annex II. Isolate a passage among you. Come on, the old man in Annex I says you. Move!

Provincial Hospital, don't stand still. Now start isolation and disinfection. Don't look up. What are you looking at? Listen to me. Do you hear me? This is not a party. This is a war. Put on your masks, that little young man. Do you also want to vomit and diarrhea? How did you become a doctor! "

After seeing the team of catechin. Ouyang commanded the plane to fly over the tea vegetable hospital“ Zhang Fan, Zhang Fan, now order your subordinates to start on the spot, start all instruments and equipment on the spot, let the armed police inform the people in charge of public security, and send the mineral spring underwater. Pay attention, pay attention, don't be polluted. "

Zhang Fan looked up. Ouyang was tied by his seat belt and hung at the door of the plane. The cold wind blew. The old lady's face was frozen red, just like a red apple killed by frost. But the old lady's spirit is particularly excited.

"This cow can command all the top doctors in a province. His life is not in vain. This must be the level of ministerial leadership! "

Lao Ju stood beside Zhang Fan and looked enviously at Ouyang overhead.

"Ouyuan is so handsome! No wonder director Li of Urology should face east, and Lao Li will never face west. " Wang Yanan looked at Ouyang above his head like a flower maniac, and his words didn't go through his brain.

The voice was not loud, but a group of directors and a group of doctors gathered around Zhang Fan. Lao Li was a little worried when he looked at the old lady overhead. As a result, Wang Yanan said that his face was much darker than Zhang Fan.

Besides, it's hard to say.

Ouyang's love affair with Lao Li was an open secret of the hospital, and the two parties felt that few people knew about it. In fact, gossip is the same in all units. They have long been dressed all over the world. When the internal medicine department is on duty at night, the superior doctor will tell the subordinate doctor mysteriously.

In the operating room, the surgical boys would secretly point at Lao Li and mutter.

But no one has ever said that in person!

Lao Li was suffocating his internal injury. The others wanted to laugh. They were embarrassed to laugh, and their faces changed.

In fact, when I first started, both doctors and nurses were very nervous. Anyone who is not afraid of death can't help wearing a white coat. Who would like to come here without this white coat.

After receiving Ouyang's feedback, everyone was not nervous. After all, what is known is more reassuring than what is unknown, just as Chinese people are afraid of ghosts. Now that I know it's hepatitis A, the atmosphere has eased a little.

"All right, let's start on the spot. Pull the cordon and make the passage back." Zhang Fan also wanted to laugh, but he couldn't laugh, otherwise he could embarrass Lao Li half to death.

.....

To be honest, China has experienced diseases of this scale. Other diseases, infectious, may be more intense than this, and the intensity may be stronger than this, but the speed is definitely not as fast as this kind of digestive tract.

In earlier years, more than 300000 patients in the magic capital ate contaminated clams and then polluted the water source. According to the old doctor of that year, there were feces floating on the Huangpu River like egg flowers. There are too many infected people, and many doctors are vacated in the surrounding hospitals to support the magic capital.

Then China raised many levels of food quarantine, but this disease is a worldwide disease. We must not underestimate the disease. At present, four billion people in the world are threatened by the disease.

Therefore, some people who often travel or often have to eat out must remember to get vaccinated. Because the ingredients may be guaranteed to be recommended, but the cook doesn't wash his hands carefully after going to the toilet, or the running children put the thumb of the toilet into your noodle bowl for you because of your bad attitude.

Maybe you'll do it. Because almost 90% of the people in China have anti hepatitis A antibodies, what does this mean? It shows that you or I have been secretly infected. Just didn't show it.

In recent years, China's overall medical level has improved, much better than the era when more than 300000 people took over the magic capital. But now there are new ways of transmission. In the early years, it was spread by fecal mouth. This fecal mouth didn't mean eating directly.

It's a diet contaminated with infected feces. Now, because men are true love, there are new ways of communication! It's like eating that or something.

The terrible thing about this disease is its mode of transmission, especially water pollution. When you get caught, you really don't know.

Coal city is actually spread by water. The water supply of a city is very complex. To put it simply, disinfect and filter the water, send it to the water tower, and then send it to thousands of households from the water tower.

The water supply of the coal city is handed over to the enterprise. An enterprise is responsible for the nearby residential area, because many enterprises in the city are larger than the city, and several people in charge of the water tower also ate the contaminated food. As a result, one did not pay attention, the water tower was polluted, and then there was a chain reaction. The people in several communities who rely on the enterprise's draft won the prize.

Therefore, in the rescue and disaster relief, why sometimes, what is lacking is not food but drinking water. An old man who won a Nobel Prize said that sixty or seventy percent of human diseases were related to drinking water.

Although what he said was a little exaggerated, because he was sitting on the table for 3m to sell drinking water filters. But generally speaking, water source is the first batch of things to be solved in rescue and disaster relief. And the most troublesome thing is that this disease can only be prevented, and there is no specific drug.

Generally speaking, when you don't get sick, you can find ways to resist it, such as vaccination. Once you get this disease, you can only treat your stuffy nose and your fever like a cold. As for the cold virus, I'm sorry, there's no way.

Therefore, the treatment at this time is actually based on prevention and supplemented by symptomatic treatment.

First, isolate the sick people. According to the three color principle, the patient is divided into three areas from light to medium to heavy. Light patients, the fastest time to inject gamma immunoglobulin, the sooner the better.

In the area of mild patients, tents were quickly set up by the armed police. Military tents, like green flowers, are in full bloom one by one in the square of coal city, and all materials are urgently transferred from all directions.

The frontier in winter is too cold.

Although the little nurses wear thick military coats, they can't wear gloves when injecting. Moreover, because the number of people is too large, to tell the truth, there are tens of thousands of people, boundless. Especially the mild disease area, which is the place with the most people.

In the weather of minus 20 degrees, the biggest difference between the tent and the wild is that there is no wind. But the temperature has not changed much. The little nurses' white and tender hands were red with cold before long, and some even suffered frostbite.

But there's no way. There are too many people. In this way, nurses have to maintain law and order while injecting.

"Don't squeeze, don't squeeze. The medicine is enough. What about you? What's the difference? Don't you see others lining up?"

"Call me first. Fuck your sister. What are you squeezing. You're welcome to squeeze me again. "

"Yes, he did. So young, how shameless. "

Mild disease area, how to say, the patients are still energetic. The armed police and nurses should separate part of their spirit to control everyone's mood.

In the moderate symptom area, it's different. The patients are lying on the hospital bed. The nurse is busy with infusion while wearing protective clothing to clean the dirt vomited by the patients at any time or the egg soup pulled out.

In particular, patients with diarrhea have emptied their stomachs for a long time because of one night's diarrhea, but there are still some tissue fluid. They don't pay attention to it for a while and puff. They thought it was fart. As a result, they bang a leg and a butt of light yellow liquid. The liquid may be mixed with some leek leaves that are not easy to decompose and digest, or it may be pure mucus, It's really like the thin egg soup sold by profiteers.

In this area, the most tired is the nurse. Because there is nothing to treat, it is symptomatic treatment. If you pull too much, just rehydrate. The doctor gives a good doctor's order and give regular infusion. A big man with a beard turned red.

Because he pulled his pants again. The anus was polished with sandpaper for countless times. The pain was burning. I didn't say it. I had electrolyte disorder due to diarrhea and vomiting. My whole body was like eating cartilage powder. I didn't have the strength to raise my hand.

Nurses at this time don't have a good attitude and temper. If you think about it, it doesn't matter to wipe the children's ass. Can you be happy to wipe the buttocks of a man with a beard? And it's good not to hit people after wiping countless such buttocks in the morning.

A nurse carried the man's two legs, and another nurse, holding an alcohol cotton ball and oval pliers, holding a fist sized cotton, shouted to the buttocks of the beard: "hold it, I'll disinfect you. Don't give me a chance at this time. Use your strength and lift your ass up. I'll change the middle order for you. Then, while the man uses his strength to the waist, quickly squeeze the alcohol cotton ball into the anal (a) door with oval pliers! "

"Oh, yo!" High cries filled the area, as if a nurse had something wrong with him.

With Ouyang's command in midair, the patient was finally slowly divided and slowly gathered in various areas.

The leaders of bird city finally came, and Zhang Fan and his team took the most powerful doctors and the most skilled nurses into the severe area.

Chapter 1162

If the mild illness area is lively, they not only have the spirit to quarrel, but also have the spirit to be meritorious. Anyway, they feel that they are victims at this time. At this meeting, many people have gathered to discuss how to find the company boss to compensate.

In fact, they knew that the boss of the company had long been caught. His nose and face were almost scared to death. He slept all night. Then he opened his eyes and was frightened. Outside, there were people all over the world looking for toilets with pants and stomach.

Then the police controlled him the first time. It is estimated that we can eat a big pot of rice for several years.

Patients in mild disease areas have the most things and do everything. And the feeling is with a trace of black humor. The doctors and nurses shouted for more rest, but there were always people who got together to fight the landlord or boast. Anyway, they wouldn't lie there honestly.

When you get to the symptom area in the ward, it's different. The patients here can be described as half dead. If fever makes people depressed, then diarrhea and vomiting with fever can definitely make people dying.

Especially those who have been pulling all night, let alone stand up. Lying in bed are shivering, because the symptoms of these people are relatively serious. They should not only deal with fever, but also deal with diarrhea and vomiting. Therefore, in the ward here, there is a sudden stuffy cry in silence, just like someone who is suddenly ill in his sleep. When he cries out, he becomes a bear.

Especially some male patients, they really suffered. Because dehydration can't go to the ground and the stool can't stop, the urination doctors have to find a way. Catheterization, especially when men are awake but unable to resist, is terrible.

The man as weak as noodles looked at his brother, and then a plastic semi-rigid pipe slightly thinner than the 2B pencil was inserted.

To tell the truth, this kind of pain is not as painful as heart, nor as painful as renal colic, nor as painful as a woman giving birth to a child. It is sour and painful, just like an insect pulling your egg and trying to drill in.

If you meet a novice doctor, really, this pain is like pulling out your intestines by hand.

In the severe area, there was complete silence. On the rows of hospital beds, the patients' faces were waxy yellow. I didn't know that they thought they were all wax statues.

Liver virus, generally speaking, although the virus of hepatitis A spreads more fiercely, its power is not too strong. This disease is a self limiting disease. What does it mean? It will be good whether you treat it or not. Generally, there are few cases of chronic hepatitis A. hepatitis A is like a young man.

Everything you do is urgent, but you just go up three times, hehe hehe, and then it's over. This is not as good as its two brother, hepatitis B.

Hepatitis B is like an entangled middle-aged man, who never dies.

Of course, this does not prevent it from infecting.

Therefore, in the severe area, doctors are mainly protecting the liver, that is, protecting the patient's liver from being invaded by the virus.

Hepatitis A can be recovered, but liver injury cannot be recovered.

"Can't you even see hepatitis A? How did you become a doctor? " The leader of bird market walked from the mild disease area to the intermediate diagnosis and rehabilitation area with a smile. When he turned his back to the masses, his face was livid.

China has such a tradition that big leaders are generally easy to talk in front of the common people. But when you are a cadre, you will understand what official authority is. Looking at the coal city leaders in sick clothes, the bird city leaders asked.

"When it was delivered, we thought it was flu. We all lay down before the test results came out!"

The leaders of the bird market are going crazy“ Do you know, you, you think, how much loss this has caused, do you know? "

Then he ignored the leaders of coal city hospital. Turning to the person in charge of the coal city, "what should I do now? Ah, you tell me, what now? The superior has sent a working group and will come to the frontier soon.

Just wait, wait! "

With that, he took people away, and the leader of coal city was great. I don't know what to say. What else to say now.

Even the temporary epidemic prevention team didn't let them participate. What does this mean? It means that the organization has distrusted them, and it means that they are about to end class.

"This is president Zhang Fan, the people of chasu city..." the leader of the Health Pavilion introduced Zhang Fan to the leader of bird city.

"I know, I know. Zhang Yuan, hard work. " When facing Zhang Fan, the leader became kind again.

"This is what we should do." Zhang Fan smiled because he was wearing protective clothing and didn't shake hands.

"Is there any difficulty now? The people of the coal city are counting on you angels in white. "

"It's just that there are not enough people. Many doctors and nurses have been working all day. It can be said that there is no drop of water."

"The surrounding hospitals have given full support. There are really no staff."

"OK, I see. We can stick to it." Zhang Fan nodded.

What else can we say at this moment? What can we say. Even leaders can't change into medical staff.

At this time, Ouyang also got off the plane. The old lady's nose felt big when she was frozen.

"This is Comrade ouyanghong, Secretary of the people's Hospital of chasu city. She was the first to lead the team into the epidemic area and the first to diagnose infectious diseases. Moreover, she has been conducting in the air. The patient can be divided into sections so quickly. Secretary Ouyang here is indispensable. "

The Secretary introduced Ouyang at the first time.

"It's hard, Ouyang told me. It's hard. This is the cadre to be, and this is the cadre with responsibility. "

Ouyang blushed unexpectedly!

At this time, Lao Chen and Chen Sheng, who were far away in Jinhe, called.

Ouyang frowned and said to the leader, the leader has a work phone. I have to answer it.

"Come on, you pick you up without delay."

A group of leaders smiled and watched Ouyang answer the phone.

"Ouyuan, no, the instrument will be moved away." Chen Sheng is crying.

"What about Lu Bingnan? Isn't he organized?"

"The person who came here is said to be the leader of the health system and his immediate boss in the past. When people talk, he doesn't even dare to resist. Secretary Chen and I are almost lying under the wheels. Ouyuan, Zhang Yuan's phone can't get through. Hurry up and find a way to get rid of it. I really don't have a move. They say that our border areas are poor and it is a waste to use this equipment. "

Ouyang's hair stood up when he heard this.

"Leader, you have to decide for us!"

Chapter 1163

x

"What's the matter?" The leaders of the bird market frowned. He thought there were uncooperative people in the epidemic area. To tell you the truth, people have aura. For example, some people erase sparks in their eyes as soon as they meet, and then become enemies for a lifetime. It's estimated that it's a way to try again.

Also, I think the other party has a good impression at a glance. Of course, this kind of good impression is not between men and women. The good impression between men and women is too unreliable. Wear less and have more meat. Men will like it as long as it's not too ugly.

This kind of good feeling is that the other party's behavior is very recognized. In particular, Ouyang was not only the first doctor to enter the epidemic area of coal city, but also the first doctor to diagnose the disease. The two firsts not only let the leaders of the bird market breathe a sigh of relief, but also made the backup team prepare accordingly.

Among tens of thousands of diseases, there are thousands of infectious diseases. If there is no pertinence, how to prepare. Moreover, when the bird market hears that tens of thousands of people are infected, the leaders can't help asking their superiors for support. The consequences of doing so are clear to the leaders.

Therefore, when seeing Ouyang, the leaders of bird market feel very complicated about Ouyang.

"The superior sent a secretary to our hospital. Although he didn't come from this industry, he was sent by the superior after all. We won't let him come during the disaster relief. The team decided to let him

at home. But because a batch of our instruments were detained by some leaders of the Ministry of health and the golden mean, it is called for our good.

As a secretary of the tea vegetable hospital, he not only didn't help us speak, but also didn't refute his former and current leaders. He watched the other party pull away our instruments. These things make us doctors and ordinary people work hard. Now... "

Ouyang took the opportunity to wear small shoes for Lu Bingnan. Ouyang had already thought that he would let you provoke his aunt! Women are what you can mess with? I've been a tea vegetable for many years. You dare to break ground on me. I'll show you what's powerful today.

To tell the truth, if Ouyang can't grasp this opportunity, it's not Ouyang. In Zhang Fan's eyes, Ouyang does not claim power. In Ren Li's eyes, Ouyang is the best leader. In Chen Sheng's eyes, Ouyang is an iron lady. In Lao Ju's eyes, Ouyang is an unreasonable woman. In Lao Gao's eyes, Ouyang is an unreasonable and careful mother.

In Ouyang's eyes, Zhang Fan is the continuation of his political and career life, and Ren Li is Zhang Fan's helper. As for Lao Gao, this guy always thinks of himself as Zhang Fan's Guide. Zhang Fan still recognizes that how to do this is the most dangerous. We can't let the old man affect Zhang Fan. Anyway, as long as Ouyang is in one day, Lao Gao won't think about going into clinical practice.

Lao Chen, this is a master of chores. Ouyang can trust him in dealing with all aspects. And Lao Ju, if it weren't for Zhang Fan's support, he would be proud of his mother if he was full of HA accent english?

Lu Bingnan, in fact, represents coming to pick peaches. This is absolutely endless. Compromise and peace? They are all false. Unless one party completely admits defeat and gives up, the struggle will always exist. It's not about right or wrong.

After listening, the leaders did not hesitate, "don't worry, none of you can take it away! You can treat the patients at ease. You can't live here without you. "

Then he said to the Secretary, "call the Ministry and ask them whether the frontier is still Chinese. No, ask the Ministry whether the frontier people are still Chinese. We are here to provide disaster relief, whether natural or man-made. In the absence of medical treatment, we can not only unite as one, but also unite as one.

And what are they doing? They're busy digging at the foot of the wall! When it was already a great disaster, they even made it worse. Tell them that no one can move the instruments wherever they are.

Otherwise, I will not hesitate to bring this lawsuit to the prime minister and the Secretary!

By the way, tell that shit Lu Bingnan. He is a cadre in the frontier, not in the Ministry of health. The frontier paid him and told him to leave if he can do it. "

The leader is angry. He's been under a lot of pressure these days. This time, I finally had a chance to get sick.

Ouyang's triangular eyes narrowed like a cat who ate dried fish, "leader, don't worry, we will ensure that infectious diseases will not spread for one day. Even if there is nothing, we have to kill this infectious disease here when we fill in. Although it is infectious, we still have experience. 300000 people in the magic capital were infected in that year, and they were still controlled for a short time under the conditions of that year. Now our level is higher.

So, please give orders! " When Ouyang reassured the leaders, he took the opportunity to ask for power.

"Well, I'm really angry. If you do, I'll be relieved. To tell the truth, my heart is hanging these days. Tens of thousands of people are infected. This is not a children's play. But I'm relieved to be here. Because our medical workers are confident and capable, not afraid of sacrifice and hardship.

Now, on behalf of the organization, I appoint ouyanghong notice as the deputy leader of the rescue team of coal city to command all personnel and team units in coal city to fight infectious diseases. I personally served as the team leader to assist Comrade Ouyang.

I am here to say that the epidemic situation will not retreat, I will not retreat. If you don't go, I won't go. Comrades, as long as we unite as one, there is nothing we can't overcome. As long as we cooperate with medical workers. This is nothing.

There's nothing in the world that can help us, isn't there? Do you have confidence? "

"Yes, yes, yes!" The boys in the army shouted with momentum.

Ouyang was ordered to summon the heads of major hospitals at the first time. She began to exercise the right of her team leader. Although she was a deputy, in fact, she is now the first commander in chief on site.

The presidents of the First Affiliated Hospital, the Second Affiliated Hospital, the provincial hospital and the major hospitals in niaoshi were called together, and seven or eight provincial presidents became Ouyang's subordinates. To tell the truth, the presidents of several of the largest provincial hospitals were angry when they looked at Ouyang.

Really envy envy hate.

It's so annoying. This woman is not a good person!

Some things pay attention to a convention. In the past, tea vegetable hospital was a regional hospital and a brother in front of major provincial hospitals. Even if the name is big, it still can't be on an equal footing. Where is the relationship between superiors and subordinates.

Now it's different. The tea vegetable hospital is under provincial management. Although it hasn't been officially followed, it has become a fact that the tea vegetable government has taken off management.

As soon as the tea vegetable hospital was under provincial control, Ouyang seized the opportunity to become the commander-in-chief of the frontier anti infectious disease, which directly dominated the situation. Once something similar happened in the future, Ouyang was the first candidate. Moreover, such candidates do not need to be discussed at the meeting. As long as Ouyang does a good job this time, no one can replace Ouyang in this kind of thing in the future, because others have achievements. Unless Ouyang gives up.

This is the convention!

"How much does the immunoglobulin of Annex I bring?"

Xu Guangwei in attachment 1 has a good relationship with Zhang Fan. He is a general foreign born. He has a little relationship with Zhang Fan's school, so he gives Zhang Fan a lot of face on weekdays. At this time, although he was unwilling to Ouyang, he still cooperated quite well.

"Team leader Ouyang, we have 3000 immunoglobulins." He answered Ouyang's question at the first time.

"What about attachment two?"

"Our hospital is similar." The leaders of Annex II are more resistant. He is not stupid. He can't come openly at this time. Coming openly at this time is like committing a crime against the wind.

But unexpectedly, this woman is so hateful.

Grab the conversation and start cleaning up.

"Almost?" Ouyang's triangular eyes stood up "You're a doctor and you're a leader. Give me something similar. What's almost? This is saving lives. This is shovel. I want to go by the head. This is not the difference between your home digging radish and a shovel two spade. This is human life, just because one of you is almost the same. Who is responsible for the injection error at that time?"

Can you shoulder this responsibility? Are you able to shoulder this responsibility? I tell you, don't think you are a provincial hospital. Don't think you have a high position. This special thing will exempt you from even reporting. You don't even have to go through the program.

Now, run and recheck the approved quantity for me. I don't want to hear anything about it for the second time! "

The leaders of Annex II are sweating down. He didn't expect that this woman was so strong and powerful. I was scared to death. If this woman took the opportunity to go crazy, she might be exempted from even reporting.

He immediately got up, wiped his sweat and ran out of the tent. In fact, the data is in his mind. How could he not know this moment? He just played a little bit! Who can't have a little temper.

All the supplies, all the medicines were put together. Ouyang unified deployment. Now Ouyang doesn't hesitate to take Zhang Fan's red card kuluze, because the fancy rescue helicopter of tea vegetable has become someone else's car.

I don't know how the old lady fooled her leadership. The cost of direct flight is all tied to the special emergency department of the government. The so-called government pays and hospitals use it. And the emergency department can't command the rescue plane yet. Because the crew of the rescue plane is attached to the border forces.

This time, Ouyang was proud. There is no need to grind the skin with the tea vegetable government every day for a few barrels of oil.

After Lu Bingnan, who was far away in Jinhe, received the call, the sky collapsed.

He wanted to be a good man, not to provoke the Ministry of health or mediocre experts. Anyway, I stopped him, but I didn't stop him. It's just like when you are a doctor. My ability is not enough, not that I don't pay attention.

As a result, old Chen Wannian's petty officials were much more playful than him. He passed on a phone and put him on the air.

Chapter 1164

x

Sometimes, the imagination of holding a group in the province is particularly serious. It is said that in order to sleep well, Kublai Khan suddenly thought of a way. For example, he went to a temperate zone in Jiangsu and Zhejiang, and he went to Suzhou to celebrate.

In modern times, the situation of mutual blackout in provinces is very obvious. The province with the most balanced development in China, Hesu, is called big bulk. Xiangyang said that Jingchu culture cannot be represented by your provincial capital. There are also some villages in the north. As soon as their people open their mouth, they don't want to stay in the name of big farmers, either into the capital or into the Jinhe River.

Of course, this can only be done in developed provinces, because everyone is rich, and the gap between the eldest, second and third is not serious. One is unconvinced.

It's different in the northwest.

The northwest is not rich, so there is no black or not. The province is relatively close to each other. When the bird city leaders heard that the hospital instruments in their area had been amputated. Whether dealing with comrades or not, we all share a common hatred at this time.

Moreover, it's good to make a fuss, maybe make a fuss, and let the superior understand that the frontier medical treatment is too poor. This accident is because the medical treatment is too poor. After all, children who cry can eat. Moreover, the relationship between provinces and ministries is sometimes united, but sometimes it is also top cow.

For example, in the petrochemical industry of coal city, the provincial government originally wanted to move to tea element. After all, tea element is too backward. There is not even a larger enterprise, let alone industry. Even the income of tea vegetable city hospital can be the boss, and there is no one.

As a result, the provincial government thought very well. When we arrived at the Ministry, I'm sorry. You can move. We don't pay for it. You pay for it yourself. There's no money in the bird market. If you don't do it well, you'll have to pay tens of billions. It's not enough to be pants.

Then the two units began to quarrel. Later, they said in the local newspaper that you polluted our sky. You must move or not. The people in the Ministry are not afraid. They say in their own newspaper that the equipment here is aging and we want to withdraw from the frontier. Where the ass is, the head is.

More than 3000 medical personnel were stationed in the coal city in the border winter. God, sometimes it's fair. For example, the oil and natural gas coal mine in coal city can not have a good weather in coal city.

The winter of tea is not dry and cold. The warm and humid air from the Indian Ocean mixed with the cold air of Tianshan Mountain, gathered here, and it snowed in three days and two days. Under the heavy snow, with the air blown out of the virgin forest, people's nose is a kind of enjoyment. The smell of pine is particularly comfortable with the air evolved by the heavy snow.

But it's different when we arrive at the coal city. Although it is separated by a Tianshan Mountain, the

climate is directly one Tianshan Mountain and one underground.

In winter, the strong wind next door blows. There is dust in the dry and cold air. Taking a breath can make people shut up, and the strong wind blows on people's face like slapping in the face, which is still continuous.

Ouyang is the first commander, and the presidents of major hospitals have become the second commander in no order. Don't think about being lazy. How many times has Ouyang participated in such rescue and disaster relief? Overall planning is definitely her strength. You are on duty today and he is on duty tomorrow.

The leaders are patrolling with people at night. When the medical staff and armed police comrades established the isolation area, what they are afraid of now is not hepatitis A, but someone running away.

"What's the matter with you? Why did you run out?" The armed police on patrol caught a patient. He was a patient. The armed police really couldn't do anything to him.

"I want to go home, so I come here to talk about business. When I came, I was fine, but I couldn't go back! My family thought I was caught playing. My wife is going to divorce. "

A man who seems to have some assets, with snot and tears.

The disease is slowly under control, but it still needs to be isolated. It must be observed for about six weeks.

"You didn't wipe some oil or anything. Look at you. Your face is almost open. Are your hands okay? Don't freeze your hands."

Ouyang came to Zhang Fan's small tent.

Ouyang has been very popular these days. She can be said to be the temporary top leader of the city. The old lady likes the feeling of embracing and speaking.

"It's all right. My hands are all right. I wear gloves every day as long as I go out." Zhang Fan smiled and looked at the old lady's spirit. He admired it. Other people didn't sleep well these days. They were all depressed, just like the cactus in Ouyang's office.

But although Ouyang looked a little tired, his eyes were shining.

"Call Ren Li and Lao Ju and let's have a little meeting!"

Before long, Ren Li and Lao Ju came.

"The superior decided to restructure the hospital in coal city. In the past, they were still hesitant. This time, they were iron hearted. Even if they resisted again, they couldn't live. This is good news, but the bad news is that several hospitals in the provincial capital have ideas about this coal city hospital. We have to start first. "

Ouyang often reports to big leaders these days, so he knows more information.

"Haven't we started negotiations?" Zhang Fan asked in wonder.

"People see us flying in the sky, running on the ground, and from abroad. A little envious, so in order to catch up with us, they began to step in. It's too rude to talk about martial ethics. You can't see others carrying big bowls. "

Ren Li, Zhang Fan, Lao Ju and Ouyang sat in a small tent and tried to find a way. The leaders of coal city hospital don't have to think about it this time. Those who retire early and those who are dismissed will never be soft hearted. That is to say, hospitals around the country have provided quick support this time. There are no dead people. If there are dead people, this is not the case.

Didn't you see that the leader in charge of health in bird city turned white? It's estimated that he is also dangerous. The regulations of the state of China are very strict. Although they didn't seem to say anything at that time, they were removed from office when things were over. People who don't worry don't know.

"If you want to merge, you can only affect the leaders of the bird market." Zhang Fan thought and said.

After saying this, everyone looked at Ouyang and Zhang Fan.

At present, these two people can influence the leadership.

"It's hard! The leader can give you some benefits. After all, we have credit, but we won't try our best to make your hospital bigger! "

Ouyang saw it thoroughly.

Just as several people were about to pull out their beards, the negotiation team of Marubeni came to the coal city. They applied to enter the epidemic area, and their statement was also very good. We are partners of tea vegetable hospital, and we have the responsibility and obligation to help our partners.

In fact, they just want to see the details of tea vegetable hospital dealing with this kind of thing. After all, money doesn't come from the wind.

The leaders of the bird market are very tangled. They are deeply afraid that there is something bad to let these small balls see, but they are not allowed to enter. It seems that they are guilty of being a thief.

After receiving the news, Ouyang patted his thigh and smiled, "God is helping us in the tea vegetable hospital, ha ha, God is helping us. You want to grab meat from me, no way. "

Jin He, Lu Bingnan is talking these days“ Why did I go to the tea vegetable hospital? Why did I come to Jinhe again. Oh, my God! What the hell is this for? "

Lao Chen took people with him, and now he doesn't listen to him. He stayed in the warehouse every day for fear of being moved away.

Because what the superior units say is also good, the cooperation of tea vegetable can't be carried out without our consent. The people of the golden Mao country were almost fooled.

Chapter 1165

"Leaders, in fact, this time is an opportunity to publicize our frontier." Ouyang smiled like a little mouse. If it was Lao Gao, he absolutely knew that Ouyang's expression was malicious.

But the leader of bird market didn't know. He thought the old lady was a simple medical expert or an aggrieved expert. After the hospital developed and was picked, her own position did not follow the promotion, which is also an injustice of grass-roots cadres.

Therefore, the leaders of the bird market are particularly good at talking to Ouyang, and it is a special period. If Ouyang wants to report to him on weekdays, it is a little difficult, because the gap between the two is too large.

As people often say, hey, the big leader is so amiable and lovely. Just like my uncle, he is more lovely than my grandfather. But if you ask leaders at the provincial or ministerial level to talk about whether big leaders are amiable or easy to talk, the answer is definitely different.

So when Ouyang smiles and Mimi reports to the leaders, the big leaders also laugh“ Tell me what you think. " He was so kind that he had to pour Ouyang tea.

"I don't understand anything else!" Ouyang first affirmed that he didn't understand anything, and I didn't understand anything.

"But I still know a little about medical treatment." Well, the old lady's rare modesty, if she meets the leader in charge of tea hygiene, it is: what do you know?

"Ha ha!" The big leader of bird City motioned Ouyang to continue.

"You see, Marubeni is determined to cooperate with us this time. Now there is a little need to discuss the small details, but generally speaking, it is a matter of certainty."

Ouyang said with great certainty. In fact, the old lady wanted to deceive the big leader at that time. She originally wanted to take Zhang Fan with her. She thought it would always be good to shine in front of the leader several times, but Zhang Fan was reluctant to come.

When the angry old lady said, "you're older than me now. You don't listen to me, do you?"

Zhang Fanna is called a rout. The old lady is difficult to serve. She used to be a power, so she can't go without it. Now power doesn't use much, and she even starts to act coquettish!

But finally let Zhang Fan go, because the severe area is inseparable from Zhang Fan. And Zhang Fan also wants to improve his internal medicine. To tell you the truth, the improvement of surgery depends on the constant practice on weekdays. Generally speaking, it is surgery.

Internal medicine is different. First of all, this thing pays attention to a solid foundation, even from the foundation to biochemistry, then pays attention to a thinking, and then pays attention to a careful thinking. Therefore, internal medicine is a good entry, but difficult to master.

Surgery is difficult to get started, but it is easy to be proficient by diligence and platform, but it is especially difficult to be proficient. So medicine is a very troublesome subject, let alone to the peak, even with the big stream is quite troublesome.

"What are the main aspects that need to be discussed? Is there anything we can help you. To tell you the truth, I used to pay attention to several hospitals in bird market. Unexpectedly, you have developed very rapidly in recent years, and the effect is quite good. I'm very pleased. What does this mean? It means that the adjacent leading group and all medical staff of tea vegetable hospital are qualified. "

The leader said positively. He really wanted to help Ouyang. From his observation over the past few days, he found that the overall medical group of tea vegetable was different from other groups, although they didn't have the professional and neat down jacket like the bird market, and wore the military coat slightly behind the times.

But their temperament is different. In the camps of other hospitals, doctors, nurses and hospital leaders can be said to be completely different. The team of tea vegetable hospital can't see who is the leader and who is the staff. What surprised him most was that the leadership team of the tea vegetable hospital was particularly young. The black faced boy is almost surrounded by young people, and Ouyang is the oldest.

What does this mean? It represents Chaoyang, which means that the tea element hospital is still improving. Therefore, in the minds of leaders, there is also a region with Tianshan Mountain as the line and the major hospitals in bird city as the medical center, radiating the surrounding area.

Then it radiates the surrounding regions and even surrounding countries with tea as the center. This is a strategy, so when Ouyang speaks, the leaders are very serious.

With several intentional and unintentional opportunities, Ouyang has room to play.

"The main problem is that they dislike that our hospital is too small. Because if future cooperation, the final is not in the equipment, not in the equipment, but in the people. If our size is too small, there are not only fewer doctors and nurses, but also fewer patients. This is the so-called medical ceiling. Our ceiling is too low.

Because of our factors in this regard, they are trying hard to keep down the price. We still need to be hard to make iron. We can find ways to find relationships around the world and trust people to get instruments and equipment, but talents and patients can't do it.

We can't go to colleges and universities to pull medicine, nor can we go to the streets to pull patients! Leadership, it's hard for us! Yes, it's too difficult. In the past, our hospital let the government go bankrupt at any appropriation from the tea government. In order to allocate funds to us, the tea government lent money to civil servants last year! "

Ouyang's work is absolutely perfect. What he created for the leaders is that if the volume is not expanded, the pill country will get big and cheap. If he does not help the hospital, the hospital will slowly decline. Now he is sailing against the current, and if he does not advance, he will retreat.

"Hehe, wasn't the economy of tea vegetable good last year? It used to be the countdown of Xinjiang. Now it can enter the top five, especially the infrastructure of tea vegetable. It's very good. There are few five-star hotels in bird market. There are three top-ranking hotels in tea vegetable, and the two are joint ventures. Also, what are the benefits of allowing the medical expert group of Marubeni to enter the epidemic area? "

The leader asked with a smile. He was not stupid.

"Well!" Ouyang's cold sweat came out. It's hard to fool this guy! Then he began to complain about Zhang Fan, "this bastard, I said two people come, two people come, can't two people say one? Just don't come,

just don't come, ouch! Looks like it's over today. "

The old lady thought she came to quarrel!

"To be honest, there are few experienced countries in the world. Like war, this is all precious experience gained with human life. We can let them come in and see how much our country and our government attach importance to health care. How high the quality of our medical staff is. "

"Don't you worry about being learned by them for free? Do we have a hard experience?" The leader looked at Ouyang and stopped smiling. His tone changed.

"Hehe, if you look at it, you can see the experience, and it's useless to hide it. Medical affairs can't be learned, just as you go into the epidemic area yourself. Can they do such things? I can't.

Why not show our atmosphere and our muscles. Let them have a look. If they don't cooperate with us, they will make mistakes. After they see it, they have to make excessive demands again, and I can hit them in the face! "

"Ha ha!" The leader smiled " Well said! "

"Scared the hell out of me!" Ouyang wiped his forehead.

"However, what you said is also true. If a regional hospital cooperates with the top universities in developed countries, it will certainly be restricted by others. It's strange not to restrict it. But they dislike our small size, which can't be forgiven.

As it happens, the comrades of my team and I are also hesitating about the reform of coal city hospital. We can't do without reform. Look, none of hepatitis A has been diagnosed. Can this still be a hospital? The clinic is unqualified.

Through your words, I think it is also a good choice to let you merge the coal city. How about, have confidence? "

"Yes, yes, yes!" Ouyang's eyes are bright.

It's really another village.

"Well, just have confidence."

When Ouyang went back, he walked three hundred times and walked out of the momentum of the black astringent meeting " How's it going, Dean? "

Lao Ju asked hurriedly after seeing Ouyang.

Ren Li also looked at it curiously.

"Where's Zhang Fan?" The old lady drifted away and stopped calling Zhang Yuan.

"I'll call!" Lao Ju also saw that the old lady wouldn't say if Zhang Fan wasn't there. Ouyang's face was as calm as water.

"Hey, the Jianghu is lonely. Lao Chen is not here. These people don't even have anyone who can flatter!"

The old lady has settled. Although the bird market hasn't been held yet, the big leader promised that it is almost certain. At this time, Ouyang's mood is not sweet.

"Hehe, what am I talking about? The veteran will take the lead. As long as the European Academy is willing, there is nothing it can't do. How about the European Academy? Is the coal city ours? " Zhang Fan answered Lao Ju's phone and came over at the first time.

As soon as he entered the tent, he saw that the wrinkles near Ouyang's triangular eyes were three points heavier. He knew that things were done. Ouyang was trying hard. Ouyang practiced this observation. At that time, Zhang Fan found the old lady really difficult to serve.

But slowly, Zhang Fan found that he was more and more comfortable when dealing with people. It's not as green as before. Li Hui, who graduated at the same time, is relatively green and astringent. They all come from the same place. Why is the difference so big? It is because Zhang Fan has a special person with him, who is still a master.

Can it be bad?

"Count on you, cauliflower has failed. OK, the leader promised, and you also have a number in mind. How can you completely merge the coal city? You must not let the people in the bird market get cheap, especially some senior doctors in the coal city. This is wealth.

Tomorrow, the Marubeni team will enter the area we are responsible for. At present, disease control is very effective. Zhang Yuan, will you go to Jinhe in a few days or will I go to Jinhe? "

"You go!" Zhang Fan came without thinking.

"You'd better go! I'll look after your house. " Ouyang thought about it and rejected Zhang Fan's proposal. The old lady knew very well that she was better than Zhang Fan in the frontier, and who knew her when she was out of the frontier. So only Zhang fan can start.

Moreover, this time is also a more troublesome thing. At present, there are really no nuclear medicine talents in tea, especially the certificates of using large nuclear medicine instruments. This is also a headache. What if people get stuck here.

Chapter 1166

Whether the leadership of a unit is important or not, we feel that the people on the stage talk about comrades in front of them and young ladies behind them. In fact, good leadership is important. Waste firewood leadership will only make a unit from thriving to a big man who is all eating and waiting to die, and can also make a united enterprise become a mass of loose sand.

The tea element hospital is relatively better. Although Lao Huang's hand was not as powerful as it is now, Lao Huang's development of surgery with his teeth gave the tea element hospital a foundation and let the tea element hospital slowly get rid of the traditional Chinese medicine hospital. Then Ouyang came to power and made drastic reforms to change the oppressors. She oppressed them to death. Even let the secretary who worked with her have doubts about life. Internal pressure deputy, external pressure tea element, several other hospitals.

She takes big money and selects talents. She can reach out to other people's hospitals. This is the inside information. I have the inside information of my achievements.

Under Ouyang's overbearing code of conduct, many leaders who did not meet the requirements were eliminated by Ouyang. Then Zhang Fan came to power. Zhang Fan is different from Ouyang. He wants to go further, so he can separate the executive power, but he must follow his ideas.

Therefore, hospitals have moved from regional hospitals to provincial hospitals. There are the efforts of three generations of leaders of chasu and Zhang Fan's own persistence. For example, without a small Treasury, how to attract some high-end talents such as Zhao Yanfang, and how to carry out scientific research without a small Treasury.

And Zhang Fan is more approachable. It's like the first generation is a little looser, the second generation is a little tighter, and the third generation is a little looser. In this way, the hospital will have more and more prospects for development. It's like after making a million, the money will follow.

It can be said that the tea vegetable hospital was lucky to meet Zhang Fan with a hanging at the right time, and Zhang Fan was also lucky. After hanging, he met such a good platform and such a good leader who can give him a ride. This kind of luck is no greater than the chance of hanging.

Without this platform and such leadership, Zhang fan can indeed develop, but the hardships and

difficulties along the way are not the same treatment as uncle now. Now, Zhang Fan's treatment at the tea vegetable level is really uncle level.

Say a bad word. Sometimes when boss tea vegetable acts, he has to consider many factors, but Zhang Fan is different. He drives a red card kuluze and salutes the traffic police. Once retrograde, directly send the mounted police to open the way without asking the reason.

This trust and recognition can never be measured by money and power.

As soon as Zhang Fan heard that Ouyang didn't go, he looked at Lao Ju. Although Lao Ju is proud and charming, he is not stupid. If he is a fool, he can't survive in Ouyang's hands. He also said with interest that he made the management of respiratory department popular.

"Zhang Yuan, it's winter now. I can't leave!" Lao Ju doesn't say he doesn't want something. It's too bad.

After hearing this, Ouyang didn't say it. He despised it for a long time: if he didn't dare to go, he didn't dare to go. He said it with a high sounding voice. It's not stupid.

Of course, if she doesn't go to the old house, Ren Li doesn't have to count on it. It's estimated that she will be bullied when she goes. The third in charge of the hospital, taifo department. However, Zhang fan can't help asking. This is a question of respect or disrespect. For example, Ouyang doesn't ask. Other people's qualifications are put here. And Zhang fan can't.

"Secretary Ren..."

"Ha ha!" Ren Li didn't speak and smiled at Zhang Fan.

Zhang Fan also smiled and understood. Everyone didn't use words. This is the tacit understanding of a team.

"Well, your job is your job. Don't let others work for you all day. Do you have to call Lao Gao! What to do next. What do you think of the arrangements for the people of the Marubeni country?" Ouyang looked at Zhang Fan's cheap smile. She couldn't stop getting angry.

"Ha ha!" Zhang fanlue smiled slightly embarrassed“ The people of Marubeni came. This time they not only came to inspect our working ability, but also wanted to steal teachers. After all, it's strange that they don't learn such a large-scale anti epidemic means.

I mean, if you want to come, you can, but you must enter our system. Don't be like the inspection of higher-level leaders. If you can't help, don't say anything and add chaos. Let them participate in our work. Just treat them as ordinary front-line medical staff.

The more professional talents like them are hidden, the more bad it is. Let them see our advantages and let them see our shortcomings, which is also good for future cooperation. After all, with a long life, hiding can't be hidden. "

After Zhang Fan finished, he looked at some of his deputies.

If it was Ouyang, it would be ordered directly.

Zhang Fan is different. He is not afraid of taking responsibility. He feels that he must discuss when it is time to discuss. After all, one man is short, and all are long. Of course, this is mainly because Zhang fan can suppress others technically, otherwise

Marubeni's expert group entered the coal city.

Among the major hospitals in niaoshi, one by one, the hospital leaders who came to participate in this task envy tea vegetarians more and more. Even the leaders of Annex II want the leaders in charge of health in niaoshi to come forward and let experts from marubenian countries participate in their region.

Of course, it's not that they like small balls, but because they bring money into the group. Who doesn't like such high-quality customers. But at this stage, the leader in charge of health is still hanging a knife that doesn't know when it will fall. Where can we take care of these. He is now a Bodhisattva in the temple. He only listens but doesn't speak.

No one leads. Experts in Marubeni don't pee too much. It's really the envy of major hospitals in bird city. Why can't they meet such loyal guests and partners.

These experts in Marubeni are quite proud to tell the truth. Even Ouyang doesn't pay much attention to them. Looking at the continuous bowing, but his eyes are full of disdain. In Ouyang's words, if you didn't come with money and talents, I wouldn't serve you.

Of course, they still have great respect for Zhang Fan.

Zhang Fan said a word and entered the group according to the doctor of tea vegetable. There can be no special treatment. Everyone has no objection and is always polite. Zhang sang has a mind. To tell the truth, there is a shortage of staff now. Many medical staff are running around and are getting tired.

There is a big winter. If you don't rotate, you will get sick.

When international friends came, the leaders paid more attention to the area of tea element. The leaders of bird market sent a team here to express their condolences.

This makes the major hospitals in bird city more jealous.

"We should also pay attention to the world. A regional hospital can do it, but can't the Affiliated Hospital in our provincial capital do it?" The dean of Annex II lost his temper.

He was born in internal medicine. Of course, he despised Zhang Fan who was born in surgery.

Now he is Zhang Fan of tea vegetable to Biao, because the affiliated provincial hospital has been ambiguous with tea vegetable. On the way up, Zhang Fan is definitely his enemy.

It's true that people without foresight must have immediate worries!

"Zhang sang, you are so experienced in this field!"

The experts of Marubeni looked at the tents divided into three squares and countless squares and said to Zhang Fan with envy.

"Where, where!" Zhang Fan is welcome.

Ouyang was not happy: "it's not that our country has many infectious diseases, but that our country attaches importance to it!" The old lady doesn't know whether she heard a voice over or something. Anyway, she usually acts as a red face when she matches the balls.

When the snowstorm came, there were not many patients in the ward. The isolation that should go home, the isolation that should heal.

The number of tents in the square slowly began to decrease.

Of course, there are many severe patients in Meicheng hospital, including liver disease and kidney disease. If you treat it, it will not be treated well for a while, and it will not kill you for a while. In this way, it will deplete the patient's life value bit by bit.

Often the final outcome of patients with liver disease and kidney disease is a matter of talent. This time it is hepatitis A, if you encounter the hepatitis B outbreak in the South River, it can only be two tears of relatives.

After the major hospitals in niaoshi were slowly evacuated, the Second Affiliated Hospital's plan to annex the coal city also failed. According to the explanation given by the leaders of bird City, the tea vegetable hospital is relatively close, and people have helicopters!

"What explanation is this? What explanation is this?" The leaders of Annex II were sad. In the past, they could say that the tea vegetable hospital was a regional hospital. Now they don't even have the last excuse. They watched Zhang Fan cheerfully see everyone off at the gate of the hospital like his master.

The leaders of Annex II have a feeling that new people come in and old people cry secretly.

None of the leaders in the coal city have been left. Doctors are better. They can be doctors if they can't be leaders, but those with administrative backgrounds, especially the elderly, are uncomfortable. Under the leadership of Xiao Wang of the medical office, tea vegetable put all these people under the hands of Xiao Wang.

Xiao Wang, an official, straightened his chest and saw that Zhang Fan smiled sweeter than before " Hei hei, Xiao Chen followed Lao Chen to Jinhe and showed it back to me. When she comes back, see how I show it to her. I'm not a soldier now. I'm a leader now. I have men! "

Lao Ju led the reform of coal city hospital. In this regard, Zhang Fan is still quite at ease. Although Lao Ju's eyes are long on his forehead on weekdays, no one can see it, but this guy's integrity is also quite good. When I was a doctor, I was arrogant and didn't take kickbacks. When I became a leader, I was a leader and I didn't need money.

That's good, and you don't have to worry about economic problems. Because no matter the enterprise or the country, this chaotic time can make some people rich.

Zhang Fan returned to the tea plant, arranged a job and was ready to go to Jinhe. Because this matter can't be delayed, three delays and two don't. It really makes people take one away, and there's no place to cry.

Chapter 1167

If according to the past, Zhang Fan will definitely go directly to Jinhe and ask, why do you want to detain our things. But after more than a year's dean career, Zhang Fan knows a lot. To tell the truth, leadership positions really exercise people's Eq.

It's hard to say some things. If Zhang Fan asks directly, people don't say they want more advanced instruments, and they don't say they don't have them. They say you don't have qualifications at present. This statement can make you half dead.

Moreover, many times, some people just can't do it, and you don't want to do it. Moreover, their greatest skill is to expand things, and finally lead to the end of local provinces and ministries. As a result, the tea vegetable hospital will suffer in the end.

Therefore, if we want to do this kind of thing, we must quickly cut off the mess and cut off the hands of all parties. Otherwise, once it gets big, it will be very troublesome. Zhang Fan has no mind to entangle with them day by day. How many surgeries can you do with this Kung Fu.

At present, the system is not even open for surgery.

So Zhang Fan didn't fly to Tianjin River first, but went to the capital. Isn't he just a gangster? Ouyang has taught this thing many times. If he hasn't learned it yet, Ouyang will be angry.

"How did you get to the capital?" After the little officer of the medical office met Ouyang, Ouyang asked whether the round-trip air ticket had been bought.

The little clerk said that the plane ticket to the capital had not been bought yet, otherwise Zhang Yuan. Ouyang wondered, "how did you get to the capital?"

Of course, the little officer doesn't know. At present, the medical office has no big head collar and small head collar. Xiao Chen and Xiao Wang are not at home now, so the medical office has become a decoration.

According to Ouyang's idea, if Zhang Fan doesn't fly directly to Jinhe River, at least he should go to Qingniao or magic city. To go to Qingniao is to find Lu Lao, and to go to magic is to find his martial Uncle Wu Lao. As a result, Zhang Fan went to the capital. Ouyang frowned.

Of course, Zhang Fan also has his own ideas. Now he is not the time to just graduate. He has more or less friends and contacts. In the past, Zhang Fan could only go to the green bird to wave the flag. Now it's different. The old men are old and it's time to come out and head the door by themselves.

When Zhang Fan goes to the capital, he first goes to shuitanzi.

If we say that the major top hospitals in China, the first digital hospital with poor relationship with the Ministry, then the Affiliated Hospital of the top university, and then shuitanzi, which has reached the peak in a discipline.

Although the boss of the Department can often be on TV, if he wants to see the president of this hospital, he has to make an appointment in advance. It's no exaggeration at all. A few years ago, the Ministry of health of the people's Republic of China sent out an outsider. At that time, everyone was surprised that their mouths could not be closed.

In fact, the boss refused to accept the second, and finally got a person who everyone didn't think was

dangerous. After he went up, it was inconvenient, because he couldn't call the big men underground. Finally, there's no way. Please, if you don't listen to me, I don't expect you.

Although this department seems to have no industrial and commercial scenery, this department is definitely the top priority. The previous leaders stopped talking. They all came out of the red school. Then there was a major general directly, and then there was an iron lady's deputy general manager. This is definitely the Department where the meat is not on the pleat.

The current old man had no choice. In a few years, the old man took people around the grass-roots hospitals in China, and then went to the European and American student union after leaving office. Finally, the Ministry of health changed its name, so it's not bullshit

If you want to fight in the challenge arena, of course, you need to find some people with equal standards.

The president of the golden mean university doesn't know, but the director of Shuitanzi's orthopedics University and the director of the golden mean's extrabrain can still be invited. The president of the digital hospital can still see one side, and the old man still owes Zhang Fan a favor. At this time, he doesn't collect debt and will be blind when he retires. It's impossible to suffer losses. I didn't see who Zhang Fan's born teacher was.

When Zhang Fan got off the plane, someone came to pick him up. Shuitanzi's director of orthopedics, darling, is not much worse than Shuitanzi's dean. Just give the director an explanation, and all the equipment manufacturers in the director's hand will do it.

"Zhang Yuan, hey hey, Hello, I've heard of your reputation for a long time. This is the first time to see a real person. I'm the regional manager of Ge. I'm mainly responsible for North China. I heard you were coming this time. I was scrambling to pick you up. This is my business card. If you have something to say in the future, you can't do big things. Just knock it for errands. "

The visitor drives a low-key four lap car, but the horsepower of the car is really big. It starts like an airplane. It is said that the price of the car is particularly expensive. Generally, the company is dedicated to receiving VIP guests.

"Oh, thank you. Is the director at home? " Said the director, they both know who they are talking about.

"Yes, yes, yes, I heard that in order to wait for you, several special instruments of our company have been pushed away. It's the first time I've seen you. You have a lot of face. "

It is estimated that this is the old capital. He speaks like crosstalk. He is particularly useful. He is really a successful person engaged in equipment.

Near the hospital, Zhang Fan got out of the car and went back to the car. To tell the truth, this kind of car is too conspicuous in the hospital. Zhang Fan doesn't need to give people trouble. Don't you see a

sign at the gate of many hospitals: refuse medical representatives to enter! Whether it's true or not, Zhang Fan thinks he's true.

The manager was also polite and did not forcibly send Zhang Fan to the hospital.

After entering the pool, Zhang Fan looked at the patients who came to the hospital from all over the world and said that it was absolutely false not to envy. What is this? This is ability. Why don't patients go somewhere else? Because people don't trust them.

"Don't be your mountain king. Why are you here. What can my old man do for you? " The old man looks like a judge and takes revenge on the little old man.

Zhang Fan said with a smile, "you are an orthopedic master. I have something. If I don't find you, who else can I find?"

"I'm not a big shot!" That said, the old man's attitude has eased a lot. Zhang Fan is proud to be called a big winner.

"Here's the thing. Didn't I cooperate with special orthopedics?" As soon as Zhang Fan spoke, the old man turned black again!

"How can you be the same as Ouyang? If you say you change your face, you change your face. Is it a wolf dog?" This dead old man is so damn.

"Don't worry, I think we will be eaten sooner or later if we cooperate with each other." The other party didn't receive him. Zhang Fan got off the plane and talked to the manager for a long time. He was already thirsty. While talking, Zhang Fan got up and rummaged around looking for tea.

"You are such a big director. Why don't you even have Tieguaoyin. What is this? " The more impolite Zhang Fan is, the more useful the old man is. People are like this. The more high they are, the less young people are rude to him.

"Don't mess up. Don't throw it away. You know an egg. This is the best tea that people give me. You know, there are only a few such tea leaves by a lake in the south." The old man's flesh hurt. Zhang Fan, like a young garbage collector, rummaged in his tea cabinet.

"Do you believe it? You go with me to the tea house full of tea vegetables in the streets and alleys. There are such legendary tea leaves. " Zhang Fan turns his eyes and quarrels with the old man.

"You know something. Tie Guanyin, I'm not used to it. I'll give you some. Don't turn it over, don't break it. Ouch! Are you the dean! Wang Yanan has been spoiled by you. "

The old man looked at Zhang Fan's bull like Hu fan. He was so heartbroken. Tea is precious. The ceramic pot for tea is not ordinary!

"Bring the better Tieguanyin here quickly." The old man picked up the phone on the desk and began to call.

Zhang Fan deliberately made trouble for a while, and they were able to speak calmly at last.

"You're not afraid that the special hospital will eat you. You're afraid that several people in the Ministry and the golden mean will eat your equipment!"

"Hey, no wonder people are old and refined. The operation is well done and the brain is still good. How do you let us young people mix up in the future. Is it particularly difficult to be your subordinate? "

Zhang Fan flattered each other.

As he spoke, the director of the first orthopaedic spine Department came with Tie Guanyin. When he saw and heard a little young man with a body on his back in the office arguing with his big director, sweat came down. Where did this come from? I didn't hear that the director had a grandson. Isn't there only a granddaughter? Grandson in law? Not right!

After entering the door, take a closer look, "Hey! Who should I be? Why is Zhang Yuan here? "

The spine director greeted Zhang Fan with a smile " Shouldn't you go to Jinhe again at this time? Why did you come to our director? " He is an honest man. He doesn't talk like the chief director.

"Hey, you know all this?"

"I'm kidding. There's no one in Manchuria. Just show off your family. Who doesn't stare with their eyes open."

Chapter 1168

Zhang Fan was even more urgent when he heard what the other party said. But there was no worry on his face " Try it. First try director Wang's good tea. "

"Hey, no wonder I can get up in the tea vegetable market so young. I can't catch up with it with this determination." Director Wang of the first spine Department smiled and said.

"Hum!" The chief director of shuitanzi is not such a fool as the director of the first spine department. If Zhang Fan is really so steady, why come to shuitanzi " Let's talk about how to cooperate. Say it first. Don't expect to run away after eating dry and wiping clean. We have given you enough training opportunities. But you and I want to be a student. You hesitate and hesitate. It's not as forthright as the northwest people. "

Zhang Fan smiled and took a sip of tea. "If you can't give the establishment, you have to be a graduate student and a doctor. Even if you graduate, you may not be able to stay here. This risk is too big. If you don't give someone a suite, you may have nothing to hesitate. I'm also responsible for my colleagues, no! "

That's what Zhang Fan said. Man Huaguo inquired. As long as it's an orthopedic doctor, the old man said to recruit students. It's estimated that even those who are directors can leave the position of director to find the old man.

Seeing that the old man's face was bad again, Zhang Fan stopped teasing. The old man can't afford to play, so he can say others, not others.

"I think so. In the past, we were a regional hospital and couldn't get a lot of things. Now we are a provincial hospital. Now we can run hospitals jointly with hospitals outside the province. Aren't we going to set up a bone Institute.

To tell you the truth, without the participation of shuitanzi, the bone Institute is known as. I think that we will go out of the territory to provide equipment and basic doctors, Jinmao country will provide funds and technology, and shuitanzi will also contribute funds and technology. Then we will unite the top three to build a first-class bone Institute in Northwest China! "

"Hehe, what you think is beautiful. I paid for it. Why don't I cooperate with others? Ask. Even if I don't pay, how many people are rushing to cooperate with us. "

The old man glanced contemptuously at Zhang Fan. Now he is happy. He thought that he had stretched out his hand to pull Zhang Fan. At that time, how crazy this bastard was. I am a foreigner. My master is Lu Lao. Cow! You're finally in my hands.

"Why can't your spine handle golden hair?" In a hurry, the old man's ass turned up in the sky. Zhang fan can't get used to his problem. Zhang Fan doesn't talk about joints, because in terms of joints, China has been powerful since ancient times. Even when the country can't, the joints are quite cow.

There was a story in the early years that the general manager of foreign affairs had joint problems and couldn't walk. The hospital in the capital city has no choice. It says it wants surgery, but there will be a very important meeting the next day. What should I do. Old man Zhou mobilized the masses to find

experts. An old lady went and was pinched back. Although it was not completely cured, she could let the general manager of foreign affairs walk to meet. This is the ability.

When it comes to the spine, it lags behind. Although the joints are also difficult, compared with the spine, this thing needs too many things, from spine mechanics to advanced instruments. Because this thing is just like the beam of a car. It's a little crooked. It doesn't seem to matter, but it can't load. Once it's loaded, it's a big problem.

"You..." the old man was angry with Zhang Fan.

"Zhang Yuan, what do you mean?" The director of spine I asked.

"What I mean is simple. Don't you want to use other people's equipment when you go to Jinmao country for further study every year? Now, I have my own, put it in the tea, put the capital, you have to queue up, put tea, I has the final say, let's unite, catch up with the special department of orthopedics of Jin Mao kingdom as soon as possible! "

"Can't you put the capital? More talents and greater advantages? " The director of the first spine Department asked in wonder.

"This is learning, not business. Just those instruments can only be used as experiments. If you really want to see a doctor for treatment, they will be broken in less than a year. Let's consolidate the foundation first. How useful are you without the foundation? There's absolutely nothing wrong with listening to me. Look at my tea vegetarians. Now the intestinal tumors cooperating with MARUKI country are greedy, to tell the truth, even the golden mean.

Cooperation, not cooperation, can only be cheaper. "

The director of spine department I was shocked" Director... "

"Hey!" The old man sighed, "you, you, how old are you? Even if you don't cooperate with him, can he run out? Now, let the bastard scream again. All right, let's talk about the details. I still have surgery. " The old man wants to run!

"What kind of surgery do you have? Surgery happens every day. You have to go to Jinhe with me!" Zhang Fan pulled the old man's arm and didn't give up.

"You still depend on me!"

The old man is done. When Zhang fan leaves, he even takes away the tea in the old man's legend. If the old man is not really anxious, Zhang Fan wants to take away the old man's tea jar. That's how relationships get along. After all, the old man is too old. Zhang fan can't have a round of brothers with the old man. Of course, if so, the old man will oppose it or not. Old Lu probably won't.

Zhang Fan is young and shameless anyway, and he has high technology. He always has some privileges.

NMR, such as 7.0 or 3.0, especially 7.0, may not be much better than 1.5T in general hospitals. But the more it reaches the peak, the more it is used for difficult and complicated diseases or early tumors. Of course, there must be a good doctor.

The radiology department generally has three kinds of staff, technicians. For example, when people meet in the hospital, they arrange you to lie there in various positions for photography. The other is sitting behind lead glass and staring at the computer. This is the diagnostic doctor. There is also a nurse who injects or injects all kinds of soup into your blood vessel or esophagus.

Technicians are easy to train. College is enough. What is really difficult to train is the diagnostic doctor in the radiology department. Because this department has no extra money, it used to get rid of some materials for photo exposure to subsidize the family. Later, it became digital and lost another piece of income.

Therefore, many doctors don't like it when they are doing it. They are playing hooligans when they have no money to talk about feelings. Therefore, in China, diagnostic doctors are not valued and others are capricious. Anyway, there is always a sentence in the diagnostic report that everything is subject to clinical diagnosis, which means that I am not responsible for my diagnosis.

But high-end diagnostic doctors are powerful. After all, this is not an intuitive observation, so the structure of the human body should be quite clear, not only clear, but also after cutting into pieces, you should know what this place originally grew and whether there is any abnormality now. To tell the truth, just like a fast meat cut into pieces, can you tell where blood vessels and nerves are? Not easy.

A good team, such as a non famous hospital, a hospital specializing in kidney transplantation, whose color Doppler ultrasound is done by a team of clinical doctors. If a kidney color CT and color ultrasound are done, the eyes are poisonous.

This is also why many people specialize in physical examination, what Kang and what year. Don't look at the bright publicity outside. In fact, the equipment is eliminated by large hospitals. Doctors are ordinary doctors. It's not very reliable to go to such places for physical examination anyway.

High end MRI is often the favorite of brain surgery, joint and spine department and oncology department. Shuitanzi's doctor travels to the golden Mao country countless times a year. Is he going to study? No, I went to rub other people's instruments.

Moreover, it is often this kind of instrument that you have to queue even if you pay.

Now, the golden Maoist country has cooperated with tea. After finishing shuitanzi's major orthopedic director, Zhang Fan kept running towards the golden mean. The mediocre extrabrain director and Zhang Fan had a little incense. They rescued soldiers and had surgery together.

And later, because of Xue Xiaoqiao, the mediocre extrabrain director had a good relationship with Zhang Fan. In the capital, the doctors in that department have the greatest authority. It's not a profitable orthopedic department, nor is it a nephrology department with a good relationship with cross.

It's breathing inside and outside God and inside the heart.

Often many elderly people have never been to the hospital in their life, but the final outcome is to explain in these three departments.

Therefore, doctors in these three departments in the capital are particularly easy to be hospital leaders. Just like the rumors in the Jianghu, the Department of surgery in the magic capital and the Department of internal medicine in the capital.

And the mediocre extrabrain director also contacted in advance. It's also very easy to talk. Once Zhang Fan wants to cooperate with the golden mean, people don't ask for anything. As long as Zhang fan can let go of the household equipment in the future.

To the digital hospital, Zhang Fan is not so easy. There are guards with guns here. The vice president of the family was waiting for Zhang Fan. As a result, there was a meeting on the way, and Zhang Fan had to wait. In the afternoon, I finally met the vice president who had been to tea vegetable.

"Sorry, sorry, Zhang Yuan. I was waiting for you, but I suddenly informed the meeting. I'm sorry! Have you eaten? Let's go to the canteen first. "

An old man with a star is very polite. You're welcome or not. The main force of their burn department is now tea.

The old man took Zhang Fan and ate a legendary meal. Taste is not easy to describe. It's better to have more patterns. A long slip of various ingredients. From heaven to earth, from the river to the sea, there is everything.

Zhang Fan was eating shrimp and kept saying in his heart: what is this!

"How about several military hospitals? Our canteen is the best." The old man is quite proud.

"What are you? Go and have a look at tea vegetarians. The doctors you go to are getting fat."

The old man smiled awkwardly. He didn't expect that Zhang Fan was the legendary person who put down his chopsticks and scolded the cook.

"Our tea vegetarians take special care of people who go out of our hospital. People are responsible for their daily life. They eat three meals a day and don't bring a heavy sample in a month. So that they can experiment and work at ease. How much effort have we made! "

Zhang Fan began to show off. Otherwise, the dry finger stained with salt is embarrassed to speak. After all, he is the leader of the army.

The old man thought Zhang Fan came here to ask for food.

Finally, Zhang Fan said that at the beginning, people from abroad strongly protested against letting the digital hospital intervene in the new materials for burn transplantation, but I photographed the table, and I was biased towards our digital hospital from beginning to end. Are we ourselves?

What can the old man say? He can only nod his head and say that he is the closest person to him, but the old man is crying in his heart. You have emptied our burn department. Now come and sell.

"If it's my own, I'm welcome ~!"

The old man looked at Zhang Fan and found that the young Dean was shameless. That's it. You're welcome.

"You have to accompany me to Jinhe. My equipment has been detained. If you can pull the team and take the gun, which is the best!"

The old man looked at Zhang Fan like a fool

However, no matter what he thinks, he can't get away with Zhang Fan's job.

Zhang Fan came empty from the tea plant, and then made a circle in the capital. Got a convoy, several four laps. Digital hospital black glass Koster on the road, and then straight to Jinhe.

Chapter 1169

As the director of shuitanzi spine Department said, some famous hospitals in China are paying attention to this matter. Because the equipment given by Jinmao to Zhang Fan is too special, it makes people jealous.

"Dean, why don't you call Zhang Fan and lend it to us for two days? They don't even have a qualification now!"

Lin Cong, director of orthopedics in niaoshi, and director of brain surgery are in Lu Lao's office.

"Well, you still care about other people's equipment. Take care of your radiology director first. I've heard that Zhang Fan has paid a million yuan a year, and he also said that as long as he is the academic

leader of the radiology department and directly set up an experimental group, there is no bottom line for the experimental funds, there are as many as they want. "

Lu Lao looked at his two subordinates from the reading glasses and said with a smile.

"He's bragging again. He can't get so much money." Lin Cong doesn't believe it.

"You ask me, I ask who to go. He recently called my wife every day. Today he said that the weather of tea vegetable was good. Tomorrow he said that he had got me a forest villa. I wake up early in the morning with singing birds and fragrant flowers, and sleep at night with bright moon and few stars. My wife is a little excited. Sleep is the wind blowing the rustle of pine leaves.

She, who had never worried about my work before, began to urge me to retire! "

Lu can't say anything about his little apprentice. I'm satisfied. I'm really satisfied. Only his master and elder martial brother can compare their career and surgical level at this age.

However, he is also quite dissatisfied. Up to now, when he came out and was forced to study as a graduate student, he didn't pay attention to general foreign studies anymore except that he wrote a few general foreign studies papers to fool himself.

Sometimes, he really doubts whether the throwing knife is not fragrant now. Or the disciples are too competitive.

"Ah, greedy!" When Lin Cong thought about it, his mouth watered. Originally, he wanted his dean to help Zhang Fan. All of a sudden, Lin Cong wanted the Ministry of health to buckle Zhang Fan's equipment. It's not a thing. I take you as my brother, and you miss my back garden.

.....

Xihua, the old man's office in respiratory department. While the old man was lying on the table approving the test data, Xihua's brain surgery director came in. Outside the brain, the powerful are in the magic capital and the capital, but in the west of China, the most powerful team is still in the west of others.

"The old man is busy?"

The director outside the brain is usually very proud, but he is still very modest to his hometown.

"Hehe, why did the chief director come to me?"

"I heard that the dean of tea vegetable is familiar to you? You lead a line and build a bridge. I want to buy his equipment. "

"Well, if you really want to use it in the future, he Zhang Fan will not be stingy. You really want to buy it. It's estimated that you can work hard with you. This is the only one or two in the country. It's interesting for you. Wait, there's no end to this lawsuit. "

.....

Mo Du, Wu Lao also silently watched Jin River. What is the school? The school is to preach, dispel doubts and teach you knowledge, and can stand out when you are bullied. He was waiting. When he really wanted to pull the instrument, he went to have a look with old man Lu. The two old men discussed it in private. They can't intervene too early, or let others say they are overbearing.

Zhang Fan's brothers are also watching and calling Zhang Fan to give advice. Anyway, they just say a word and open their mouth if they want to help.

Unknowingly, Zhang Fan has a number one in China's medical system.

Jin He, after the motorcade arrived, looking at Zhang Fan who came down from Koster, Lao Chen was about to cry, just like the broken (a) milk baby who wanted to cry when he saw his mother“ You are here. If you don't come again, I will become a sinner of tea vegetable. Lu Bingnan is just a piece of wood. When he comes here, he not only doesn't help us, but also wants to please the Ministry of health. "

Lao Chen has suffered so many grievances. It's unreasonable not to sue black at this time.

"Where is he?" Zhang Fan doesn't look good. With the salary of tea vegetable, I even funded the enemy. Although he hasn't been paid yet, he is a traitor.

"I'll come right away. I said I got the documents of what unit. I'll take the equipment to study..."

"Nonsense!" The leaders of digital hospitals are not happy first. China's nuclear magnetic equipment also has secondary high-end machines, especially the 1.5T. Almost all of these models are used in digital hospitals, but some things, like making aircraft, are stuck. People don't buy you, and you can't get them out.

In particular, this kind of high-end nuclear magnetic resonance does not mean that you want to study it,

because the key steps have not been taken once. Even if you dismantle 100 sets, you can't get them out. Therefore, as soon as the vice president of the digital hospital listens, he knows what the other party's idea is.

The leaders of the Ministry of health also came. Zhang Fan looked, hey, it's an acquaintance. It's the officials and doctors he met when he was fighting with Jinmao in Lianda.

"You have no qualifications! Moreover, in order to meet the increasing medical pressure in China as soon as possible, we think these equipment should be placed in the most appropriate unit. For example, our subordinate hospitals, such as mediocre hospitals, such as digital hospitals. "

He looked at the man shaken by Zhang Fan and felt very difficult. He didn't expect that Zhang Fan could pull so many people. So I made an idea of killing three helpers with peaches.

"We don't need it!" The vice president of the digital hospital said impolitely.

Here, Zhang Fan doesn't know much about other aspects, but on some key points, other hospitals, such as the golden mean and magic capital, can pursue the world's most advanced instruments, and even give priority to the world's most advanced instruments.

But digital hospitals can't. digital hospitals are at key nodes. Even if Chinese made ones can't, they must use Chinese ones, because they are the last fire line of Chinese medical treatment. Never let foreigners get stuck.

When the vice president said this, a group of doctors and officials were embarrassed.

And they can't control others. To put it mildly, even if there is a lawsuit between patients and digital hospitals, the court session cannot be held in the district court. And they also have their own medical management system. If I don't bird you, I won't bird you. You don't have a clue.

Zhang fanle! But you can't always let others be pioneers. It's not authentic.

"Why are we unqualified? Why are we unqualified. Does the state give you the right to talk nonsense? "

Zhang Fan was not polite either. He stretched out his hand. Why are you polite.

"Little comrade, if the operation is done well, it belongs to the operation. Don't be arrogant. In terms of medical management, you are still too young."

"I'm not young. Whether I can manage or not is a matter of our province. You say we have no qualification. Why do we have no qualification?"

Seize a point and never love war. This is the of Ouyang religion.

"Do you have equipment qualification for large-scale nuclear medicine?"

"Yes, of course we do. Unlike you, I abuse my power for personal gain. " Put the black hat on him first, with or without it.

Speaking, Zhang Fan handed over the qualification of shuitanzi to the other party.

Several doctors and officials look at Zhang Fan. It's really like looking at fools. Do you think we are illiterate" It clearly says shuitanzi hospital? How can you be so playful? It's a fraud! "

The other party is not a man. You can wear a hat, too.

"We have jointly run the hospital with shuitanzi!"

Rogue, rogue! Zhang Fan is serious about things he hasn't heard of.

Chapter 1170

There are some things that can't be said and some things that can be said and can't be done. For example, Zhang Fan now pulls the tiger skin and the doctor's official hardtop. Didn't others think of this? Can Lu Bingnan really not stand it? Does a department level cadre not have a little energy?

No, it's not how difficult it is, it's asking for something. The premise of Lu Bingnan's work is not to provoke the superior leaders, because he still wants to be promoted and can go to work in the future. And why Zhang fan can do it, because Zhang Fan doesn't want to be promoted at all.

There are many people to take care of in one part, especially the doctor officials, especially the health officials who form a system in a group. The energy of the health system should not be too small. These people seem to have little power, but when they can be combined, they are a huge force.

In particular, some people in the personnel department, the finance department, the system reform department, the medical administration management department, the comprehensive supervision department, the health care Bureau and other seemingly sesame big positions should not have too little energy. It's hard to say how big things you can do, but they can really ruin big things for you. A sentence that doesn't comply with the regulations can crush you to death in a hospital.

There was a saying in those days that the real power section chief of a department of system reform would not be changed to a minister.

That's it. You have a big direction. I have a small rule. Moreover, technical officials and full-time technicians are naturally opposed. If I don't give you strict control, it seems that I'm not skilled enough to engage in administration.

Therefore, if you succeed in breaking the hidden rules of the industry, * * * is an example. If you can't break through, you are thousands of greasy middle-aged men who lamented that they were young and didn't know what a rich woman was.

When Zhang Fan brought the main force of the major hospitals, many people came to the major hospitals in Jinhe. This is the relationship between Zhang Fan flying knives and flying out everywhere. For example, the director of general surgery and the director of orthopedics in Jinhe firmly stood behind Zhang Fan.

It can be said that Zhang Fan's death represents a doctor who focuses on technology, while the other side is a doctor who is not excellent. Therefore, the contradiction between these two kinds of people is more serious than that between ordinary technicians and administrative officials.

Technicians look down on technical officials, but their professional titles and even scientific research funds are all in the hands of technical officials. Technical officials want to be recognized by technicians. Although their technical achievements are higher than others, they feel that they have high vision. Therefore, it is often impossible to communicate harmoniously between the two.

Zhang Fan not only presented the oral cooperation agreement with shuitanzi, well, it was oral. Then presented the oral cooperation agreement with the golden mean brain.

Several doctors and officials were confused by Zhang Fan. This guy doesn't talk about martial ethics and doesn't do personnel" Not even a word. You say cooperation is cooperation? Are you not afraid that things will not pass the examination? " Zhang Fan was angry about the accent of old lady Zhao in Tangshan.

"Why doesn't it count? Doesn't what I say count?" Not only the digital hospital, shuitanzi's director of orthopedics and the mediocre director of extrabrain came out to endorse Zhang Fan.

This is embarrassing.

"I don't care what your bullshit cooperation is. Today this instrument just can't be pulled away! " Look at

Zhang Fan playing rogue. People also began to play scoundrels. I won't say that we have studied it, but I believe that you have no qualification.

"President Zhang, in fact, we should listen to the arrangement of our superiors. We can't have the consciousness of small units. We should obey the organizational discipline and the overall arrangement of the organization. After all, leaders stand high and look far, which is not what our grass-roots staff can achieve. "

Lu Bingnan didn't know what to think. Maybe he felt that he had provoked the frontier and simply took refuge in the past.

"Your team doesn't have a unified opinion. I doubt the control of your leader. Comrade, don't make a speech. This is not a feudal dynasty. "

Zhang Fanqi's teeth are broken.

It's hard at this time. Zhang Fan has no executive power, and they don't have much reason. After all, chasu hospital is still a hospital within the system, not a hospital in a certain field.

As for these people, they have no reason to have administrative power, because the medical system has no explicit provisions on the use of foreign instruments, so they speak with Zhang Fan's qualifications. Moreover, the most uncomfortable thing for Zhang Fan is that he jumped backwards!

It's hard.

Just when Zhang Fan was thinking about what to do, several low-key red flags arrived at the port. To tell you the truth, although this kind of car is rotten, on some occasions, driving this car is no better than Rolls Royce.

There is a rumor in the Jianghu that in the capital circle, all four circles are small leaders, and outside the capital circle, all four circles are big leaders.

Zhang Fan looked at the red flag coming and slowly stopped in front of him. Then, I saw the dick of the bird market get off the bus.

"Dean Zhang, why hasn't the equipment been loaded yet? Tens of thousands of people are waiting for you in the frontier. What are you doing here? Do you know that these instruments are life-saving now? If you delay for one minute, the sick people will lose one minute of treatment time. Is that how you become a doctor? Isn't being a doctor putting the patient's life first? "

Get out of the car and face Zhang Fan.

Zhang Fan had an expression of extreme grievance on his face, and his heart was full of flowers. "Mom, when he was in the frontier, this one always smiled. I didn't expect that this is the performance boss.

Too chicken has a plan."

"It's all my fault. I am willing to be punished. " Zhang Fan directly chased the voice of the second son of the bird market and began to ask for punishment.

As soon as these words were said, several medical officials, as well as pulling the side frame, were scared of male urine. If we say that the dispute between them and Zhang Fan is a difference in understanding the administrative practice of the two teams, we can hold a meeting to study it.

Now, this thing is the law. When people get off the bus, they ignore everyone and follow Zhang Fan's law. What does this mean, the lice on the bald head? It's clear that they have pulled out their guns. If you make trouble again, I'm willing to tear my face and talk to you about the law.

The matter was so serious that doctors and officials couldn't laugh. China, in special times and special moments, it is unreasonable. I don't care how you are the leader. Once the disaster relief is delayed, the fight against the epidemic will be delayed.

You've thought about it!

"In fact, I think it's also appropriate to let these instruments try tea vegetarians. After all, the northwest is remote, so it's appropriate to improve the local medical level!"

Embarrassment is not embarrassment. Why do you know today!

The second son of the bird market ignored these people, and these people didn't dare to go forward to chat up. Like a group of pinched little girls, they left with a skirt.

Lu Bingnan is crazy. What should I do? What should I do now? I didn't expect to lead out such a big boss. He couldn't cry. I'm kidding. This is a feudal official.

"Zhang Yuan, load the car quickly. We are worried about your suffering. I just came to report. I came as soon as the report was finished. I want to criticize you. Don't you believe our border government so much? Don't you believe in leadership? "

Although it was criticism, his face was quite good.

The leader was praised for this report. Although there are defects, the disposal is powerful and decisive. Just these two comments, think about how much glory it is.

Then, when he became a port and saw Zhang Fan, the leaders felt that Zhang Fan was amiable. Of course, people in this position can't open their mouth and say: get closer to me in the future.

"Leader, I know I'm wrong. It's my fault that I didn't report to the leaders in time and didn't tell them our difficulties in time. I'm thinking about small things. Don't always disturb the work of leaders. "

Zhang Fan didn't smile, but said with a straight face.

"Right, that's right. You're still young. Sometimes, can you report to us more. After all, I'm older than you. Life experience and work experience can be discussed! "

Looking at the people in charge of the major hospitals around, the second brother of the bird market motioned Zhang Fan to hurry and finish the work. He was waiting for him in the car. Because this is not a frontier, it's not good for him to bow his head and say hello. He can't do it and it's not in line with his identity, but it's not good for these leaders to take the initiative. So he got on the bus ahead of time with a smile.

"Hehe, you are not authentic. A woman marries a hundred people!" The vice president of the digital hospital looked at several hospital leaders around and scolded Zhang Fan with a smile.

When we came, we were in the same group, all comrades in arms in the same trench. Because this instrument is too scarce. Rather than let the Ministry of health take it away, it's better to let several companies occupy it. It's all good stubble anyway.

When the field was beaten away, the civil war began.

"Yes, this boy is the least authentic. He told me to cooperate with our orthopedics department. Because it was sent by special orthopedics. Our departments have set up teams. " The director of shuitanzi can't give way.

"In fact, this is the best equipment on the brain. Your orthopedic can be replaced by other equipment, but on the brain... "

Zhang Fan scolded his mother in his heart. When chicken got on the bus, why didn't you say that there were other hospitals and you didn't cooperate. It's starting now. Zhang Fan's head is big. Really, people are old and refined. What's the face? impossible.

Several people are not only the boss of the bird market, but also the second in the bird market. Anyway, today we will give them a larger share. If there is less, grandma! After the recovery, we also shed blood and strength!

Zhang Fan, gnashing his teeth, negotiated with several old men. It was the same as when buying vegetables. "No, you occupy three days a week. Let's not do it again."

"Why don't we spend half a year alone?"

"OK, the first half year of our hospital!"

Zhang Fan finally had to sign the port agreement.

"Why, I'm not very happy to see you." Zhang Fan sent away a few old men who had got cheap, and went into the red flag of the second son of the bird market. Looking at Zhang Fan's already black face, at this time, he was black and red. The second son of the bird market asked jokingly.

"Hey, leader, I was robbed. Lose power and humiliate the country. We don't have enough scientific research strength, and they take up most of the time of using the instruments. "

"Hehe, it's all right. Be brave after being ashamed. I'm very optimistic about you. strive. The future can be expected! "

Zhang Fan originally wanted to sit in the co pilot's position, but he was pulled behind by the leader. The two chatted with each other.

"If you have something to do in the future, come and report more!"

"OK! Thank you for your leadership. "

After seeing off the leader, Zhang fan arranged for Lao Chen to start loading.

The loading of this instrument is also quite troublesome. Ordinary cars can't be installed. We must have professional cars.

Zhang Fan asked Lao Chen to arrange others to escort the car. Lao Chen was unwilling and had to escort the car himself.

After Zhang Fan instructed Lao Chen, he took a plane and left. Lao Chen sat on the truck with a chrysanthemum smile on his face.

Lu Bingnan was directly dismissed on the spot by the leader because he was a secretary and didn't even have to hold the people's Congress. He was directly dismissed on the spot. Can Lao Chen be unhappy. Because there's room!

Chapter 1171

If one day, after you leave, you meet the leader of the previous unit, the leader is particularly polite to you, with enthusiasm in his bones. There is no doubt that he absolutely knows that you are doing well now, even better than him.

After Lao Chen pressed the instruments and equipment into the tea vegetable, obediently, the tea vegetable boss led the team to the tea vegetable people's hospital to comfort the comrades of the hospital. In particular, the leaders in charge of health in the past are now showing a sense of kindness.

"Zhang Yuan is at the end of the year. According to the leaders, our health system should be inspected. I mean, you and the European Academy are experts in the frontier expert database. You should also go to the inspection this time. Otherwise, only people from our government have no authority. "

The leader of the government in charge of health found an opportunity to sit with Zhang Fan and whisper. I didn't know that they thought they had a particularly good relationship. In the past, although the leaders in charge of health were not too targeted at Zhang Fan. But it's not a good relationship, because he also knows that the relationship between Zhang Fan and Ouyang can be regarded as a teacher and apprentice. Even if he dug out his heart for Zhang Fan, it's not as useful as Ouyang's words.

So he won't be humble to please Zhang Fan. After all, the contradiction between him and Ouyang is irreconcilable. The east wind must prevail over the west wind. But now it's different. Ouyang and his colleagues have jumped out of the tea vegetable circle. The contradiction is gone. Of course, they should be enthusiastic.

Zhang Fan is not used to it, but Ouyang has already changed. They sit around the leader in charge of health and speak with a smile. Zhang Fan looks at Ouyang and then at the leader in charge of health. My heart kept sighing: I didn't choose the right person for the Oscar every year! Did they graduate from professional acting?

Throughout the year, there are many things. Zhang Fan has to deal with all kinds of superior inspections. Now he has become a provincial supervisor. Although he has not officially followed, tea vegetable has been let go early. Tea vegetable can't be independent. Therefore, whether your ministry agrees or not, the frontier will correct the standards of other provincial hospitals in the province and tea vegetable city hospitals.

In the past, the superior came to check. Ouyang is like the big Tibetan mastiff guarding the door. She doesn't give face to the government at all. The other party raises a question. She is like an old cat with a thorn. Don't you understand? Do you understand or do I understand? Don't talk nonsense if you don't understand! Speak responsibly. So the previous inspection was just a formality.

Now it's different. People in the bird market expert library directly draw lots for inspection, and they have to avoid when they meet their own hospital. Therefore, Ouyang began to avoid leisure. She also knows that in small places and small units, if you are not tough, you can bully everyone.

But in large units and places, if you don't follow the rules, you will be punished. It's Ouyang's old business to watch people serve their dishes. Don't think Ouyang is stupid. Ouyang sells everything he thinks is stupid. Therefore, if Ouyang doesn't work, Zhang Fan and others will be too busy to touch the ground.

Zhang Fan turned around several groups assigned by the president at the bottom of his hand, and after his superior dismissed Lu Bingnan, he didn't say to appoint a new secretary. It is estimated that everyone in bird market knows that the Secretary of this hospital is a pit and is not very enthusiastic.

Think about it. I originally wanted to earn some qualifications and raise a level. It wouldn't be worth it if I went to the place where tea vegetarians are not familiar and let one old and one small pit. It's better not to go than to be so dangerous. So this position is empty.

The leaders of the bird market also seem to forget this matter and don't ask. In fact, people are also waiting for news from the Ministry. Otherwise, if you toss around, you really want to let the old and the young pit another one, and they don't look good in face, so let's do it first.

The inspection team, negotiation team and evaluation team, the tea vegetable hospital is really an inspection year. Lao Gao and Lao Ju are responsible for the daily work and investigation of the negotiation team. After all, both of them are from clinical background, so they won't be too weak when talking about their majors. And Ren Li, Zhang Fan originally wanted Secretary Ren to receive the inspection team. After all, Ren Li was born in the bird market and was relatively familiar with the inspection team.

You can let Lili shake her head. Asked why, Ren Li did not say, anyway, she just didn't go. Zhang Fan also had no choice. "The old and the young women in the hospital are more difficult to deal with each other!"

Finally, Ouyang said to Zhang Fan privately that Ren Li was excluded from the Second Affiliated Hospital of bird market and tore her face. Otherwise, could Ouyang have picked up director Miao like Ren Li?

Looking at Secretary Ren's face, with a blushing expression in his pale face, Zhang Fan said to Ren Li, "Secretary Ren, you have to help me in the next stage!"

Ren Li bit her lips and looked at Zhang Fan. To tell the truth, Ren Li, a woman in her early 40s, is more pitiful than Ouyang. It's not age, but personality.

Ouyang can only make you feel that this woman is not a good person. You'd better not provoke her. Don't get close to her. You'd better walk around. Ren Li gives the impression that this woman is our comrade in arms and can't let her get hurt again.

Not only men think so, but even Ouyang thinks so.

Zhang Fan looked at Ren Li and said, "now the hospital is big at one end and small at the other. There will be problems. Starting next year, we should also pay close attention to the development of internal medicine. You are an expert in this area. How hard you have to work. You don't have to worry about this kind of reception on weekdays! "

Ren Li looked at Zhang Fan. Zhang Fan's face was serious.

"Thank you!" Ren Li lowered her head, whispered, and turned away. To tell the truth, the injury was quite serious for a woman. The resignation forced by the department leads to divorce, that is, there is a tenacity in the bones, otherwise it is estimated that they can be depressed.

Ren Li can't receive the inspection team. Zhang fan can only do more. He asked Lao Chen to receive the inspection team and evaluation team. Lao Chen has been walking around the dinner table these days, and he drinks too much every time. Although he gets drunk every day, Lao Chen's taxi spirit is still high.

Seeing that the inspection team and the evaluation team raised their exemption cards today, he hurried to Zhang Fan's office to report.

"Zhang Yuan, is there no operation today? I'm so busy these days that I can't take care of your schedule. Alas, I'm derelict! The tea leaves are almost gone. How does Xiao Wang work? " After entering Zhang Fan's office, he first inspected his territory.

Zhang Fan touched the tea jar and mineral water bottle to see if there was any dust on the corner of the table. Then he made tea for Zhang Fan as he spoke.

People are really easy from difficulties to extravagance. In the past, others gave Zhang Fan special water to make tea. Zhang Fan felt embarrassed, but he didn't let others pour water, whether it was a small officer or Lao Chen, with a look of grievance.

He let it go. But slowly, now Zhang fan can't remember to drink tea. This is what Lao Chen is used to.

"Well, you don't look well. You're tired these days. Sit down and I'll make you a cup of tea. " Zhang Fan is ready to get up.

"Hey, if I can have a leader, I'll be proud even if I drink and vomit. I'm lucky. The leader is considerate of me! " In the past, Lao Chen had a little taste of helping Zhang Fan, but now the old boy talks to Zhang Fan differently.

Rush to make good tea for Zhang Fan. Lao Chen sat opposite Zhang Fan's desk and made a cup himself“ As you know, in our hospital team, it's reassuring for me to deal with you. Let director Gao and Lao Ju receive the inspection team and evaluation team. I'm really afraid they will fight in a few words. In particular, Lao Ju's eyes are higher than the top. I don't know. I thought he was sent by his superiors for

inspection. "

Zhang Fan knows what Lao Chen likes to listen to. For subordinates, sometimes such kind words are more effective than anything. Especially in this position. If you can't give people a place, you should give them comfort.

"Ha ha, Dean Ju is a professional after all!" Lao Chen's smile is absolutely sincere.

"Xiao Chen and Xiao Wang in your hands are both good, and you have done a good job. When you have a chance, you look at the right place to put it out. It's not small. It's not good to follow you all the time. "

"OK! The medical department of the second hospital and the medical department of the third hospital are short of directors. They are released together, aren't they... "

Lao Chen thought about it and said. He didn't know that Zhang Fan was more optimistic about that, so he didn't choose it himself.

"Let's go. They've been running around with us in recent years without any complaints. While the provincial government has not thought of it, it can release one grid. Moreover, I am not at ease that the position of the medical office, which connects the preceding and the following, should be handed over to others. The people you bring out have a taste of you. I'm still relieved. "

"Thank you! Zhang Yuan. " Lao Chen drank tea with his head down and stopped talking. I really have a feeling that scholars are bosom friends.

"Also, you've been urging the European hospital these days. Don't worry about anything all day. Here are some documents for you to take to her. I'll have an operation." Then Zhang Fan got up and left.

Lao Chen was still moved. As a result, when Zhang Fan said this, his eyes widened and looked at Zhang Fan's back " Leadership is leadership. Progress is so fast! "

In fact, the hospital team, now really want to say, in fact, there are only three people, Zhang Fan, Ouyang and Ren Li. Others are not team members.

Zhang Fan is busy with surgery all day. Ren Li is not only busy with cardiology, but also responsible for other internal medicine. Ouyang is now paid by water and doesn't care about anything.

Old Chen entered Ouyang's office with emotion. Ouyang doesn't even install it now. In the past, no matter when I entered Ouyang's office during working hours, I always looked at documents and called again with reading glasses.

But now, as soon as I entered the door of the office, I saw Ouyang watering the cactus. Seeing Lao Chen entering the door, I said, "do you think it's too cold recently and there's wind in the crack of the window? The cactus can't work."

Fish are fed to death and flowers are watered to death. Lao Chen is busy entertaining these days, regardless of Ouyang's cactus. It's strange if he doesn't die.

"Ouyuan, today's improvement looks good!" Lao Chen didn't answer the question. He knows what Ouyang wants to hear. If you really bring up flowers for the old lady, it's strange not to scold and go out.

"Hehe, let's talk about it first. I've been getting better since I haven't worked recently. Don't bother me with broken things all day."

"I took the potted flowers you sent me home. Is my wife a flower keeper? It's strange that the iron tree can let her feed to death. A few pots of flowers in my house are competing for beauty. " Lao Chen seems to have Alzheimer's disease. His words are wrong.

"Is your house hot?" Ouyang frowned.

"The ground is warm. You have to wear half of your sleeves when you go home, or you will sweat." Lao Chen opened his eyes and spoke with a beard.

"I say, I have to. It's the weather." Then he put down the shower.

"Ouyuan, you have to help. The experts of the inspection team and the evaluation team are too difficult to deal with these days. When I came home, my wife said I was ten years old. "

"Why don't I see that I'm not getting old with all the red light on my face. But the other party's oil is hard. You are better than me in terms of receiving people and materials. Just stick to it. When they leave, I'll let you Zhang Yuan give you a holiday. You take your wife and children to travel. "

Ouyang comforted his old subordinates.

"You are still considerate of me."

"Look what you said."

Well, finally, Ouyang's face is smooth like a cat. After chatting for a while, Lao Chen teased Ouyang to smile for a while, and handed the document to Ouyang " This is a few bidding. You have to look at the European Academy. If you don't start this matter, no one can lay it flat! Not even Zhang Yuan. "

"That's right. Bring it here. I'll see which immortal is coming." Ouyang took over the document.

Lao Gao and Lao Ju are also tired these two days. It's really hard to get the money for small balls. People have to go to see places you can't think of.

From time to time, I have to talk to a doctor or nurse at random, and then keep saying that this is not

good and that is not suitable. Anyway, it can't be anywhere.

If Lao Gao hadn't dissuaded him, Lao Ju would have left.

Chapter 1172

Since work, although Zhang Fan is tired, the most is physical fatigue. Instead of being tired, but these days are different. I'm tired. Because after the equipment and instruments of special orthopedics entered tea, people from Jinmao special orthopedics also came.

Ouyang and Zhang Fan wanted to build the building like this, and the leaders expected to build it according to their ideas. One or two is like building blocks for children in kindergartens, trying to make things happen.

The leadership of the government, especially the leadership of tea, wants to make the hospital a landmark. Fooling Zhang Fan to build a skyscraper. Zhang fan can disagree. The hospital is not a shopping mall office building. As a result, Ouyang agreed, and then asked for money from tea vegetables. Ouyang said he didn't count.

The government almost sent troops to destroy Ouyang. Skyscrapers are impossible, but Ouyang directly wants to get the money out of a burn research center in Western China. She said to the leader of tea element: give me more, give me more, I'll get a burn research center in China, right Biao digital hospital. This money can only be from the West. If you want to give some more money, it's definitely first-class in China. It's more eye-catching than any skyscraper. Than skyscrapers.

The tea vegetable government did not complain before, because the tea vegetable hospital is its subordinate unit. But now it's different. You don't do anything with money. It's a fraud. Laugh back and fight again when fighting. The leader in charge of health went down to the bird market to complain at the sign of the boss of tea vegetable, saying that you were engaged in fraud in the health unit of tea vegetable, and you didn't care.

The leader of the bird market didn't have much to say, so he gave a part of the tea subsidy, and Ouyang was proud. After a series of operations, the construction funds are not enough.

Even the health system in bird city is not happy“ How many years can a region get benefits from such subsidies? ”

Not poverty but inequality. However, the bird market leaders clenched their crowns. In fact, tea is the bridgehead to enter the Middle East. The leaders of the bird market stand high and get more information, so they can take precautions. Of course, they don't know this information yet. I think the bird market is a superior unit after all, not like tea su.

Internally, the government wants the atmosphere of the hospital. The hospital itself wants the hospital to be generous and cheap. Therefore, quarrels are commonplace. When holding a meeting, it becomes a quarrel field when it is open. There is a small quarrel in three days and a big quarrel in five days. Zhang Fan is about to be quarreled with endocrine disorders.

In the past, when he wanted to participate in this kind of thing, he didn't want to participate in the operation. He didn't even answer the phone, but now it's different. He's the chief officer. He has a big head to make up his mind.

Besides, there are golden ones. These yellow hairs are harder to serve than small balls. No matter what, even if it is hypocritical, the surface is a little decorated. These yellow hairs are completely unreasonable. If they don't agree, they apply for arbitration.

Zhang Fan sometimes wants to scold his mother and arbitrate your grandmother's leg. Because of the construction of the bone Research Institute of tea element, part of the money is paid by the government, the other part is paid by gold wool, and some hospitals such as shuitanzi and the golden mean pulled by Zhang Fan have also invested.

But the money is still not enough. Zhang Fan was fooled at the beginning. Jin Mao said that the Asian Development Bank loan was issued quickly and had no interest.

There are just a few small conditions. At the beginning, the poor in the tea vegetable hospital quickly became pants. Zhang Fan should be cheap for such a good thing. As a result, it is not possible now. When undertaking the construction of the main building, people need public bidding all over the world and ADB's personal supervision.

Design is also a worldwide bidding. Ouyang can't get anything by himself. Because ADB paid. So now with a little objection, Jin Mao shouted for arbitration.

"Zhang, we have an agreement. You can't do this." The executive director of Jinmao special orthopedic hospital raised his hands like a plate and shrugged his shoulders. He disagreed.

Zhang fan can see that when these yellow hairs are beneficial to them, they don't mention any contract

or agreement. Once it doesn't meet their interests, they will start to agree with you and your contract.

In Zhang Fan's office, Ouyang, Ren Li, Lao Gao, Lao Ju and Chen Sheng are all there. "Ouch, the original design drawings looked very beautiful. How can they be built now? The more they look, the more they look, the more they look like a basket of eggs in the yard."

Ouyang felt his forehead and stood outside the window looking out.

It's not that there's a problem with the architecture, but the architecture is a little advanced, which makes these earth cannons of tea vegetable a little uncomfortable.

The main body of the building is OK. When we get to the top floor, the building of the Institute of orthopedics is like the head of the Buddha, full of pimples. Jin Mao said that since it is new, it is necessary to build the Institute of orthopedics into a world-class one, which is more advanced than the special orthopedic hospital in Jin Mao.

Money is like the tea vegetable River, splashing out day by day without pause. Ouyang and Zhang Fan both have meat pains.

"Do you think it is necessary for them to build this operating room like this? The floor is eight meters high. Is this the second floor in the operation?" Ouyang asked Zhang Fan reluctantly.

In fact, Zhang Fan doesn't know that he has also been to the advanced operating room in China, Marubeni, and even Dubai in the Middle East, but he has never seen such a high-rise operation, and he has seen the bidding drawings, but after all, he is not a person in the construction industry. In fact, he doesn't have much concept.

Of course, although Ouyang said so, he was actually proud. She can say it herself, others can't. The world-class operating room, world-class equipment and even the parking lot are said to be high-tech parking lots that do not exist in the northwest. Can she not be proud.

"I called you here today to discuss the work arrangements of other leaders. They will come tomorrow. Let's discuss it first. Then welcome the new comrades with full spirit. "

Zhang Fan took a sip of tea and waited for Ouyang Aojiao to finish the meeting.

As soon as this was said, everyone sat down and stopped chatting.

Lu Bingnan waited for a long time. Before he could help, he was sent away. Now the hospital is actually a shoulder to shoulder.

"European Academy, tell me your opinion." Zhang Fan smiled and asked Ouyang to speak first.

In this regard, Zhang Fan especially respects Ouyang. He originally asked Ouyang to speak last. If Ouyang

didn't do it, Ouyang could only speak first.

"I mean, hospitals are getting bigger and bigger. You can't scratch your eyebrows and beard as before. The leaders from various departments are responsible for the relevant departments, and Zhang is in charge of the general manager. "

"You are the Secretary, you should..."

"I'm the Deputy Secretary!" Ouyang gave Zhang Fan a white look. Interrupted Zhang Fan's words. She knows Zhang Fan too well.

"I agree with the European court!" Ren Li raised her hand with a smile. Several other leaders looked at each other and quickly raised their hands to agree, especially Lao Gao, who was excited.

Because of Ouyang's intention, he may be in charge of orthopedics. He really doesn't want to go to the government and the people of the government to grind their mouths for trivial things day by day.

The others didn't join the team. It's hard to say anything. Ren Li didn't say anything.

Zhang fan can only say it himself.

"My idea is that Zhao Jingjin is mainly responsible for surgery. He is a River scholar, which is also a very good sign for future cooperation with outside the hospital. We don't have academicians. It's also good that we have river scholars.

As secretary, he will be in charge of Cardiology, neonatal obstetrics and Gynecology and respiratory department. These associated departments can no longer fight alone. We don't have the ability to carry out comprehensive large departments, but we have the ability to let the leaders focus on forming the unity of various departments. Whether it is future work or research, the combination of various departments will be the trend in the future.

Vice president Luo Zhengguo is an expert in brain surgery. My opinion is to let him be responsible for internal and external nerves, endocrine and vascular surgery. Our goal is to build a team of nerves and blood vessels up to the domestic advanced level, and achieve the goal of no tea element for patients with nerve and blood vessel diseases within three years.

In addition, it is also necessary to allow patients from neighboring countries to flow to China rather than Europe, and even to divert some of laomaozi's patients to China. Especially for foreign medical treatment, we must be high-end. That is, the goal of horizontal high-end and charging high-end.

Only in this way can our tea vegetable hospital enter a virtuous circle. Otherwise, we can't support the current scientific research and experiment only by relying on state subsidies. "

Zhang Fan's remark is that he wants to make money from foreigners and then develop the scientific

research of tea vegetable hospital. Because the tea vegetable hospital is a non-profit unit in China, it is hard to say for foreign medical treatment. According to the standard of a certain field, we can not charge by disease, but treat by card.

It's hard to say whether the technology of a certain field has reached the world advanced level, but their fees have reached, such as a foreskin operation, which is known as free. This is not the case when you get on the operating table. Anesthesia needs money. Do you want no pain at all, or half pain and half no pain.

Finish the operation, and then fool the patient into a chicken spa. It is said that it can strengthen blood vessels, achieve the effect of strong muscles and never fall with a golden gun. And this is still treated by stages, one stage at a time. Anyway, you can get as many stages as you have. A foreskin can make the price of changing organs come out.

After arranging Ren Li, Zhao Jingjin and Luo Zhengguo, Zhang Fan said to Ouyang: "European Academy, there is a new president. Are you familiar with Professor Yan Xiaoyu?"

This is Yan Xiaoyu, director of the Department of Gastroenterology of the Second Affiliated Hospital. In ordinary hospitals, Gastroenterology, cardiology and respiratory medicine are relatively the pillar departments of the older generation. Even gastroenterology often has more patients than cardiology.

However, at the provincial level, the Department of Gastroenterology gradually lost its strength in heart and breathing. Not even endocrine. It's not that there are fewer patients, but that the patient's identity has changed

Professor Yan Xiaoyu was selected as the one thousand person plan. Can never enter the leadership of the hospital. This time, when she was upgraded to tea vegetable, she was assigned to tea vegetable.

Ouyang doesn't know such people. What she knows is that she can't get along at the provincial level, and there are capable people. She usually doesn't worry about the chief director of each department because she can't dig it.

Chapter 1173

"Professor Yan Xiaoyu is 47 years old. In the early years, she was the director of the Department of Gastroenterology. Later, she was the head of the endoscope center. If the frontier hadn't vigorously developed surgery, she would have become a leading member of Annex II.

Moreover, Yan Xiaoyu is still unmarried so far. Strong character! " Ren Li came out of Annex II. She knew Yan Xiaoyu's situation. As she said, Ren Li secretly took a look at Ouyang.

"Look what I do. I'm not a matchmaker. Should I be responsible for her marriage?" Ouyang said

reluctantly.

"Well! It is also our job to care about the lives of comrades! " Zhang Fan hurriedly interrupted Ouyang's words.

"In this way, the laboratory of Gastroenterology and laboratory will hand it over to Comrade Yan Xiaoyu, and we will discuss it in detail after they report. As for several affiliated hospitals, at present, coal city hospital also belongs to us. These hospitals are our forward positions and cannot be abandoned.

My opinion is that we must control it well. President Ju, the first branch, the second branch and the coal city branch, I'll leave it to you. Do you have confidence? "

When Lao Ju first heard that there was no him in the internal medicine department, he still had a gap in his heart. If it is Ouyang, Lao Ju will definitely argue, but Zhang Fan knows that he can't fight. But when Zhang Fan heard that he was going to hand over the three branches to him, his listless spirit was different. The flushed face almost said that adaxi was relieved.

"Director Gao, you have to help me take charge of the laboratory." Lao Gao most wants to go to orthopedics, but Zhang Fan knows that he can't go, because Ouyang will definitely think of a way not to let him go. But it's too wasteful for Lao Gao to go to the government to whet his mouth.

"OK!" Lao Gao then subconsciously glanced at Ouyang. Ouyang was not very satisfied, but he didn't say anything.

"President Chen, you should be responsible for the medical department, personnel department and medical insurance office of our municipal hospital and three branches."

"OK, Zhang Yuan!" Lao Chen was satisfied.

Now it's not as fast as before. Zhang Fan is walking faster and faster. The fast Ouyang can't catch up with him. In the past, it was everyone's discussion, because everyone was a platform and a grade. Now, although it is discussion, it is actually arrangement. That is, Zhang Fan gives face and remembers old feelings. Otherwise, whether to hold the meeting or whether they need to attend the meeting is a question.

.....

With the tea element weather getting colder and colder, every family also began to slowly prepare the ingredients for the new year. Tea is no better than that in the mainland. For example, in Shaanxi Province and Shanxi Province, even in winter, there is a steady flow of green vegetables in greenhouses near the city.

But tea is not good. Here, winter is really called winter. When a heavy snow comes down, regardless of the temperature, the plastic shed can definitely collapse, so it is not very popular in tea and plastic sheds. If you want to eat vegetables in winter, or eat them transported from other places. Or eat in a glass shed.

Of course, the price is objective. Often when beef and mutton are forty or fifty a kilogram, spicy eggplant and garlic seedlings are almost the same as meat.

Therefore, there are many kinds of pickles in tea. To tell the truth, Bonzi is known as the country of pickled vegetables. In fact, it pickles a cabbage. It's sweet and spicy. It's really not delicious. There are too many pickles in China. Of course, it's not recommended to eat more, especially if there are old people and children at home.

Because it's too salty. Sometimes, a mouthful of pickles is often enough salt for a day. Eating too much is bad for the heart of the elderly, but bad for the kidneys of children.

Zhang Fan said to let the family eat less, but looking at his mother-in-law and my mother, he pickled the ground in pots and pans, and there was no way. It's like the family is not reasonable. You can't say it. In fact, Zhang Fan also likes to eat a kind of pickle.

It's the screws pickled by her mother-in-law. Zhang Fan doesn't know what it's called, but her mother-in-law makes it really good. The screws in soy sauce color are crisp and raw. They are scorched red outside and innocent inside. They are a little spicy in acid. They are made of milk tea with pure milk and milk skin, a mouthful of milk tea, a mouthful of hot bag, and then butter and screws.

It's delicious anyway.

In the morning, Zhang Fan had breakfast and chatted with Shaohua. She and Jingshu are going skiing. Zhang Fan doesn't understand. They say they are going skiing. In fact, they are going to make car wheels. The tea vegetable ski resort is absolutely natural.

The slope is steep and the snow is thick, but they can roll down by themselves. Although the technology is not good, but the equipment is complete enough, sunglasses, windbreaker, gloves and snow boots. Zhang Fan looks at them and talks.

He smiled and said, "yes, it has reached the level of national athletes!"

"Hum!" Jingshu twisted her nose. As long as her brother is there, Jingshu always feels as if she doesn't grow up and doesn't worry about anything. Now there is another sister-in-law, let alone her. Eat, drink, wear. Never treated her badly in this regard.

"Are you going?" Shaohua asked Zhang Fan.

Zhang Fan rubbed his waist. He's been a little busy recently. Shaohua is unhappy. He had a fight last night and almost didn't fight. Zhang Fan thinks he's going to increase his exercise recently.

"No, I can't leave. The company has done a lot of things recently. "

Before he finished, Zhang Fan's phone rang. But the brick sized secret phone rang. To tell the truth, since the provincial administration, Zhang Fan has added a red telephone record book, not only with the number, but also not even Ouyang. The tea vegetable hospital gave Zhang Fan a copy.

"Dean Zhang Fan, where are you now. There was a serious car accident in guogougou. The wounded have been sent to your hospital. You must make sure that the wounded are treated at the first time. If you have any requests, ask them now. "

"There is no request, we go all out." Zhang Fanyu stood up with a.

"Good! Please. " Then the other party hung up.

The general office of bird city.

Zhang Fan has no time to talk to his family. Pick up your clothes and start running out. Running and talking on the phone.

This person, sometimes really, can't say. The development of the frontier is slow, and the income of ordinary people, especially some young people with low education level, is not high. In order to help them, the frontier contacted enterprises in developed cities.

Then send them out batch by batch to make money.

At the end of the year, these people came back with a year's money. Then I took a long-distance bus to my hometown in the bird market. Because the frontier is too big, many cities and cities are hundreds of kilometers away, and the high-speed cost is a lot.

The long-distance driver began to think about how to save money. Because now we don't allow overloading. One person at a position. If there are more than one person, the traffic police won't be soft when they catch it. Take the low speed. If the guests don't want to, they can only take the high speed.

But the high-speed fee is too expensive. Some experts here thought of a way. When they were close to

the exit of the high-speed, they destroyed the barbed wire on the roadside of the high-speed, and then the car got off the high-speed and took the sidewalk.

How big is the snow in the frontier? Sometimes when a snow falls, the car can be buried directly. In the past, could tea vegetarians seal the city with heavy snow in winter and couldn't get out. It's better to have high speed.

But the driver thought he was an expert and brave, and then pulled more than 60 people into the sidewalk. The detour of tea vegetable is walking inside Tianshan Mountain. Twists and turns do not say, and there is a river between the two mountains, and the snow will not melt until April and may of the next year.

In the past, there were not many high-speed vehicles. The snow was porcelain solid. Now everyone takes the high-speed, and the snow here can't be porcelain solid.

The two drivers drove in rotation all night. Originally, they were tired. As a result, they took the sidewalk for hundreds of dollars and were about to leave the valley. As a result, the wheels skidded. The bus carrying 60 people slid into the valley.

With a drop of more than ten meters, the bus just fell off and rolled to the river valley. The herding Kazakh uncle was stunned. He kept calling the government. The armed police stationed near the bridge went down to the valley at the first time.

Fortunately, without the grazing master and the armed police stationed on the highway, the car people would soon freeze to death in the weather of minus 20 degrees.

The armed police went crazy and hung people from the river valley. Three people died on the spot in the car. Because the three people didn't wear seat belts, they flew around in the car like dolls. When they flew to the river valley, they had become ketchup.

.....

"Come on, let all the doctors at home stand by at the emergency center." Zhang Fan called Lao Chen. Lao Chen informed us the first time.

Then you can see that the traffic police are standing at the intersection to keep all the roads leading to the tea vegetable hospital unblocked. Doctors and nurses are not allowed to leave.

Cars of doctors and nurses entered the hospital from all directions of the city.

"What's the matter? What's the matter? " Ouyang also came.

"There was a car accident. There was a major car accident in guogougou." Zhang Fan explained while directing the doctors and nurses to stand by.

"All rescue drugs are ready." The director of the pharmacy department has taken all the rescue drugs and narcotic drugs in the warehouse to the emergency center.

"Plasma is ready." The director of the blood bank is also on standby.

"Xue Fei, take all the surgeons and stand in line. The minimum high seniority is to take a team, vacate all operating rooms, and stop all operations except non emergency operations. "

"Yes!" Xue Fei began to line up with surgical doctors and nurses.

Five or six people in a row, five or six people in a row, standing in seven or eight rows. Everyone has changed their hand washing clothes, and then they wear a thin layer of disposable surgical clothes outside the hand washing clothes.

Physicians and nurses are also on standby, but they don't have to wait in line. Just make sure you show up as soon as you need it.

After everyone lined up, they waited quietly, and only their breathing could be heard in the air. Before long, I heard the alarm of 120 and the police coming through.

"Ready!"

The gate of the hospital has been opened to the maximum. The security section pulled the boundary line and let all pedestrians and vehicles go through the side door.

"Femoral fracture, massive bleeding!" More than a dozen explosion-proof vehicles flew into the hospital. An armed policeman with the Red Cross jumped down in blood and shouted at the doctor of tea.

"Orthopaedic!" Just as Zhang Fan shouted, Wang Yanan of orthopedics department, with five medical staff, ran out at the first time, and the rescue vehicle was stuffed into the back door of the explosion-proof vehicle at the first time.

"Head injury, massive bleeding, people have been in shock." Then the doctor outside the brain came forward.

.....

Chapter 1174

Except for some special occupations, ordinary people rarely see the scene of collective rescue. This kind of scene, really, I hope I don't meet people I haven't seen all my life. In addition to leaders, such scenes are often ordinary people with special occupations, such as police, soldiers, firefighters, and people engaged in dangerous fields such as coal mining and chemical industry. To tell the truth, it's not a good thing to see such scenes.

In the individual rescue, it seems that the emergency room of the hospital is very chaotic. Doctors shout and nurses shout. In fact, it is not. It is just to prevent some useful details from being omitted. Looking at the medical staff running around, in fact, it's not chaotic at this time.

We often see that the doctors are in order. At this time, we need to worry about whether something has happened.

And now it's in order. Medical treatment is a group of seeking common ground while reserving differences. When personality or characteristics are not obvious, it is the time when everyone is most worried. Like many things, you can play a little temper or even a little temper on weekdays, but when it's dangerous, try one.

Waiting, especially when a large number of patients are about to enter the hospital, the mood of doctors is really hard to describe, but if you look for an example, it may be similar to a blind date or going to the bath center to find a sister, but the blind date or sister has not yet appeared.

At this time, men are generally nervous and excited, excited and depressed. This is a complicated state of mind, and so are doctors. The younger the doctor is, the less he has experience in such a large-scale battle, the more complicated his mentality is.

In my mind, I imagined that I could become a superman and come to a critical patient. When everyone was desperate, I jumped out and saved the patient. But my hands with rubber gloves and my legs wrapped in a white coat betrayed him or her in a slight trembling. He or she was just a first brother. This doesn't count. Sometimes the first brother would feel that his urine was surging. He only peed ten minutes ago.

However, people like Ouyang, Ren Li and Zhang Fan have already passed this uneasy and excited stage. At this time, they are just accumulating adrenaline, waiting for the moment of outbreak. In fact, all work needs passion. Often this time is the highlight of the doctor's career.

If they are divided into segments, Zhang Fan is already a segment with code in their eyes and no code in their hearts.

When the patient enters the hospital, usually, the individual emergency department, that is, several nurses. If the patient is in critical condition, at most, there are more doctors, and then they rush forward, just like a group of big white geese released from the goose pen to look for food, rushing to the little tadpole of the toad.

When there are a large number of critically ill patients, it is different. It must be orderly. There are four or five doctors in a row. There are about five or six columns in front and back. The queue cannot be short or long. If it is short, it will cause scene disorder, and if it is long, it will cause inconvenience to move.

It's a bit like the Musketeers in line to shoot. With the command of the commander, one row is finished and the other row goes forward.

"Male, about 27 years old, left femoral fracture, massive hemorrhage, shock! Pelvic displacement is suspected, and the venous channel has been established!" The health soldier who got down from the explosion-proof vehicle shouted out the patient's general confidence at the first time, which was during the handover.

Zhang Fan immediately shouted, "Wang Yanan, orthopedic operating room 1!"

"Yes!" Wang Yanan quickly pushed the flat car with several orthopedic doctors and nurses. Several people sang one, two and three in unison. Then the patient was translated to the flat car. The nurse checked the venous channel while Wang Yanan and their doctors ran while checking.

This division of labor is practiced through constant practice on weekdays. Wang Yanan examined the lower body of the wounded, another examined the upper body of the patient, and a doctor examined the patient's brain, such as light emission and other basic vital signs.

"Xue Xiaoqiao, No. 3 operating room outside the brain!"

"Xue Fei, emergency department, operating room 2."

Patients who need surgery are shunted one by one. Those who need immediate surgery in critical cases go to the general operating room of the hospital. Some mild diseases that still need to be treated are arranged in the emergency operating room of the emergency department.

To tell the truth, this kind of command must have a good understanding of the hospital, be particularly familiar with doctors, and be confident of various diseases. Otherwise, you can't command such a scene.

Let alone ordinary doctors, some senior deputy directors may not be able to command.

The command at this time is almost always to say the command at random, otherwise the rescue will stop and the rhythm will be disturbed.

Don't look at Zhang Fan standing at the gate of the emergency center one by one. It seems very easy, but he not only needs to arrange the patients in front of him, but also needs to have a number in his heart. He should reserve an operating room. Once there are critical patients, he doesn't have a number in his heart, and the operating room can't turn around, which is a sin.

Therefore, it is not easy for a leader in a special industry to do it, and it is even harder for a layman to be a leader in a special industry. In the past, he thought Ouyang had a bad temper and raised his triangular eyes when he said something wrong. Now he finally realized why Ouyang had a bad temper.

When the patient is in front of you, but there are not enough doctors or enough operating rooms in your hand. When you see the patient dying, there is no way, this feeling of suffocation is very uncomfortable. A lady will become a bitch.

"Zhang Yuan, the patient's right arm was crushed and had ischemic necrosis..."

What does that mean? It means amputation. During the car accident, this kind of crush injury is the doctor's number one enemy. Although the bone stubble of thigh fracture is exposed irregularly like dog teeth, the wound is big enough to be stuffed into a doll.

However, this kind of injury, as long as it is sent to the hospital before the shock reaches organ failure, the doctor can sew you like a building block, and the patient can be straightened. And crush injury, especially ischemic crush injury.

Obviously, the limbs are intact, but the doctor has no choice but to cut off the necrotic limbs or organs as soon as possible, otherwise once necrotic infection occurs, the consequences are unimaginable.

"Have you contacted your family?" Zhang Fan's hair stood up. He should not only direct the rescue of personnel, but also be responsible for the decision of important issues.

For example, now is the removal of an organ, but also the removal of important organs. The patient's family members will not be able to contact for a while and a half, and the time can't be delayed too long. What should we do?

"I don't know. I'm busy now. I give priority to saving people. Other things haven't been carried out yet." The traffic police can only say so when they answer Zhang Fan's inquiry.

In medical malpractice, when patients lose consciousness or cannot contact their immediate relatives, hospital leaders and even doctors themselves must have the obligation and responsibility to choose the best treatment for patients.

Moreover, in this special case, everything focuses on rescue, and almost everything goes through the green channel. From the cost of treatment to the cost of rescue, it is an afterthought.

"You are his attending doctor now. You have the right to choose the best treatment you think!" Zhang Fan has no doctor number and can only delegate power. Because he can't care, he can't care.

"Come on! She can't. The window frame of the car was inserted into her chest. " When more than a dozen patients had been shunted, the most critical patient came. When rescuing, almost one is saved and one is sent.

Armed police cars are not enough. They are requisitioned directly on the highway, giving priority to official vehicles and public transport vehicles, followed by private vehicles.

Some are reasonable. Seeing this situation, they save people without saying a word. Some are unreasonable. They are afraid that their car will be contaminated with blood.

A young woman was unlucky when her car rolled down the valley. Her seat was just the first place to touch the ground. The window broke instantly, and the metal of the window frame broke.

Then the metal frame was inserted into her chest.

When the patient appears, it can't be described.

A thin young woman was lying on a stretcher, four people carrying the stretcher, and seven or eight people holding an iron frame half a person high.

"You can't move. If you move a little, blood will come out. We can only cut off the car windows. Come on, help her, there's still gas! "

Several young armed police with faces and even beards are children who have not yet grown up. They hold tie kuangzi with blood all over their body and hands. They worked hard to keep the metal window motionless all the way. Without them, even nine lives died on the road.

Zhang Fan took the lead and ran over.

The down jacket worn by the wounded had long been invisible. Under the right chest, a fist thick window frame was inserted into her chest like an iron pestle. The blood all over the body is mixed with countless glass fragments like blood diamonds.

In the early morning sun, flashing a little red light, it looks particularly strange. It's like a dress with a red diamond.

Fortunately, the glass of this window is not shoddy. After it is broken, it is full of small particles.

While touching the carotid artery, Zhang Fan ran with the flat car towards the operating room. Now there are many special and good departments, as well as many general departments, such as cardiothoracic surgery. A hospital department, especially some high-end departments, has not developed for a few years or even decades. Relying on a short blood transfusion, he can't see any improvement at all.

Now, the patient, Zhang Fan, has no one to send. Because of this difficulty of cardiothoracic surgery, in the tea vegetable city hospital, almost no one can do it except Zhang Fan.

Zhang Fan accepted the patient.

Ouyang stood in the command position with an iron face. The wind blew in the winter morning, and the gray hair moved slightly on Ouyang's forehead.

"Call and ask the medical staff who can be drawn out from the first branch and the second branch to quickly gather in our hospital. Contact the regional blood bank. Call the direct flight team and ask them to hurry up immediately. "

Ouyang knows that the later the patient is rescued, the less he can delay on the road.

Chapter 1175

Zhang Fan stood on the side of the female patient with iron in his chest. While running, he checked the patient's vital signs and secretly touched the iron. When he put his hand on the iron of the car, Zhang Fan knew that although the quality of this thing was average, it could not be handled by the instruments in the hospital operating room.

The orthopaedic instruments in the operating room are reduced versions of sophisticated carpenter tools. For example, an electric drill, a DC electric drill made in Germany, costs tens of thousands of yuan. It is absolutely first-class to drill bones, but it is not very good to deal with steel.

The flat car was about to enter the elevator. Zhang Fan stood at the door of the elevator and shouted: "armed police boys, take your cutting tools and come some experts to the operating room with me."

Boys, look at me, I look at you. Finally, three guys with cold faces like red two regiments chased up with a huge cutting machine from their truck. The leader of the armed police branch was worried and asked the instructor to follow him to the operating room.

In their hearts, how precise and precious the operating room is. Don't you see that the army has stationed a team in the tea vegetable hospital? We have to pay for the food for the hospital. They won't let the armed police come if they want, because the armed police of tea vegetable can't fly a plane.

For Zhang Fan, his military police relationship with tea vegetable is quite good. For example, in the traffic police system, although Zhang Fan has not reached the level, his red card kuluze is at the intersection, and the traffic police will definitely salute.

In the past, when there were some things, such as letting the traffic police command the traffic at the gate of the hospital, they had to report to the superior, and then the superior ordered. Now Zhang Fan directly calls the traffic police brigade and people apply for it themselves.

Therefore, the current tea vegetable hospital is almost the same as the government gate. During the day, there are almost three or four traffic police shifts directing traffic.

Moreover, because the buildings opposite the hospital were demolished and built hotels by capitalists. The police station had no place. Zhang Fan thought about it and directly asked the police station to get a row of houses next to the gate of tea vegetable hospital.

As for the army and the armed police, Zhang Fan is also very familiar with them. Some time ago, Ouyang urged Zhang Fan to grab the recruitment physical examination work directly from the tea vegetable digital hospital. Zhang Fan called the garrison boss and grabbed it directly. Ouyang thought it was not enough and wanted to let the tea vegetable garrison designate the soldiers' medical treatment in the tea vegetable hospital.

As a result, the president of the tea element digital hospital went to Zhang Fan's office for three days. Finally, Zhang Fan couldn't get down to the killing hand. This makes old lady Ouyang dissatisfied with her boss.

With the great development of tea element hospital and the continuous improvement of Zhang Fan's status, although his level is nothing in big cities, he is really comfortable in small cities and tea element. If you are in bird market, which hospital president can force you to have a direct dialogue with the local garrison, and which hospital president can force others' traffic police and police to work in his own hospital.

However, in tea, Zhang fan can do it.

Moreover, with the surrounding Stan supplying a large amount of natural gas to China, tea has become a node, and the state has begun to pay more attention. The leaders of bird market pay more attention to it. Tea hospital has made efforts in advance, and now it has become a monster of tea.

.....

In the operating room, the young female patient has been in shock!

Doctors and nurses completed preoperative preparation almost as quickly as possible. It can be said that there is almost no time to do any examination. In modern medicine, the most taboo is that there is no perfect examination before operation.

Because surgical treatment is irreversible. For example, appendicitis, say a bad word, how many appendicitis cut by mistake? No one can say, especially the diagnosis made by some experts after ward round is often a one sentence thing.

For example, some people often have paroxysmal pain in the right lower abdomen, which can be said to be suspected of appendicitis, but can not be diagnosed. If you are a young doctor, you may be a little conservative. When an expert doctor looks in the morning, he will most likely say that it is appendicitis. Talk about surgery with your family.

The family didn't understand, and then went to the operating table. As a result, when I opened my stomach, appendicitis was as tender as a beautiful little finger, swimming in my stomach quite healthily.

What should I do?

Cold! Grasping the appendix is like rolling something. Rub it up, down, left and right for a few times. The appendix is red and swollen!

These are some things that have improved the examination, and some operations that have not been examined at night.

In particular, some related households feel that they have a way. When they enter the hospital, they feel that they have returned to their own home. They are particularly capricious. It seems that if they don't, they can't reflect their superior posture.

If you know the Dean, urge the director. If you know the director, urge the competent doctor. Anyway, it's like the earth is about to be destroyed. He wants to finish the operation as soon as possible to save the earth.

Doctors who work are helpless towards such people. In fact, they are similar in hospitals and other workplaces.

Yes, but not many.

Often, the superior doctor said surgery, no examination. If the subordinates were smart, they would let the superiors sign. If they were not smart or their position was not firm, they would arrange the operation in a stuffy voice and did not let the superiors sign.

If there is no accident, it is often the doctor in charge who is unlucky. So sometimes, especially in some humble places, we prefer to temporarily lose some money and stick to our position, otherwise it's comfortable to drift with the tide, but maybe we'll be broken one day.

In the early years, tea vegetable had such a thing. A section chief's child got drunk and rode a motorcycle. Then he flew too low and hit the fence. He dressed his left kidney like a roast kidney. When he was sent to the hospital, the section chief didn't know how to invite the then leader in charge of health.

Anyway, in a word, we should go all out to have an operation.

The then president, Lao Huang, personally took the team to the operating table.

The left kidney was hopeless, and then it was beautifully cut off. As a result, people were born with a kidney. Because they were young, they didn't get any disease and didn't go to the hospital for examination. This is great.

The section chief's wife almost scratched Lao Huang's face. Anyway, where's the child's kidney.

No preoperative examination, no evidence. After the operation, Lao Huang was almost crying. Flattered the hemorrhoids.

Finally, the section chief has great skills and doesn't know how to find the source of kidney.

.....

"Come on, ventilator! A lot of gauze, hurry!" Zhang Fan gave orders and prepared to start the operation.

In the operating room, everyone was busy and prepared.

The nurses in the operating room act as instrument nurses in person. Because of this situation, hospitals have long been rehearsed, and the head nurses in the operating room are waiting for the most difficult patients. Because of this operation, there can be almost no mistakes.

At this time, we should not only have good technology, but also have good psychological quality. In particular, not everyone can accept the scene of car accident patients and burn patients, and not even all doctors and nurses can accept it.

If you go to the vegetable market in the evening and look at the rotten tomatoes in the corner and some leftovers of pork, beef and mutton, the red, white and yellow will run away with wind under your feet, and even cover your mouth and nose, otherwise you will vomit.

That's what happened in the operating room.

Especially in the emergency, because there is no preoperative preparation, it is common for patients to have involuntary incontinence at the time of great shock.

So in this case, some people with poor psychological quality will have problems.

For example, today is.

There was a slight white smoke on the red jeans, as if it had opened the second pulse of Ren Du.

With this reddish brown blood, there are all kinds of white fat or yellow fat or even group tissue involved by iron tools. Look, it really makes you feel the unfriendliness of the world.

The blood is mixed with the snow water, contaminated soil, stones, crystal clear glass particles, and the rising stench.

Especially because of the weather, when the stool skin is frozen quickly and the internal temperature is still about 30, it can be said that the odor is wrapped in it like a steamed stuffed bun skin. After entering the operating room, the temperature rises. I can't say it. Some people don't believe it and think it's exaggerated.

Chanel, the head nurse in the operating room, couldn't hold it. The nurse grew up with a layer of fog in her big eyes, "I'm here to get through the robbery today!"

"Less nonsense, wipe and disinfect quickly!" When Zhang Fan spoke, he forcibly pressed the hiccup in his throat. He drank a little more milk tea in the morning. Zhang Fan decided not to drink milk tea in the morning.

Disinfection, the patient's systemic disinfection. Under the burst disinfectant, the smell is finally normal.

"I now extend along the wound. If this instrument cuts off the large blood vessels, it can't be taken out at the first time. I need you to cut, and I can't cut too much. Can you do it? "

When Zhang Fan was holding a knife, he asked several strong guys "Can do it! " Although they were wearing disposable surgical clothes, a group of armed police boys were as awkward as wearing barbed underwear.

The operation began.

Blood, like on the battlefield, every time you cut, you don't know where a flower of blood will appear, just like a bomb detonated.

Extension, continuous extension and deep excavation. Finally, I saw the position of the iron in my chest. Fortunately, it didn't pierce the aorta. But the iron is too thick. Looking at the blood accumulation like a small pool, Zhang Fan knows whether the main artery is, but absolutely no less than three or four named arteries have been punctured. At this time, you must not take down the iron ware rashly.

Do human arteries have names. No, if they all have names, it is estimated that medical students will be bald before they graduate, and they don't have to wait for treatment.

Blood vessels with names are often as thick as the oil pen core we used in the early years. Only blood vessels with such a thickness have names.

"Cut!" Zhang Fan looked and couldn't hesitate any more.

Chapter 1176

"Zhang Yuan, blood pressure dropped and heart rate increased!" When Zhang Fan and the young men of the armed police cooperated in cutting, the life monitor made a harsh sound.

In hospitals, especially in ordinary wards, nurses usually turn off the sound of patient monitors. Because this thing will alarm. The alarm sound is long and sharp. In the general ward, it doesn't matter whether you turn it off or not. Anyway, most of this kind of monitoring is a prevention. Or if the medical insurance exceeds the standard and you can't use drugs, use some instruments.

But in the operating room, this thing can't be turned off. There were two types of bleeding in all operations, dominant bleeding and invisible bleeding.

"Whole blood 500cc, dexamethasone into the pot, chest opener, no bleeding found, cutting caused the iron to move, so that the compressed bleeding broke out. Come on! " Zhang Fan's scalp began to numb at this time.

What do you fear? You are already a patient with massive hemorrhagic shock, and your breathing has not been fully established. Now there is a new massive bleeding, that is, the patient is young. If you were a little older, this bleeding would have heart failure.

Gauze, a large number of gauze, like stuffing cotton into the belly of a doll, keep stuffing, and still need pressure.

This kind of packing is the so-called compression hemostasis. A large amount of gauze is stuffed in to form pressure to make invisible bleeding compress hemostasis.

In fact, there is a red line for human injury. About when any organ is not at the lowest end, all injuries are controllable.

Once the failure of any organ occurs, so many bone Nuo effects will come out. The later, the faster the damage, the greater the harm caused by the damage.

If doctors can't stop or break the chain in time at this stage, the more problems they need to face in the later stage.

The spreader is like a metal chicken skeleton, which is directly placed into the patient's chest, and then the ribs are opened to expose all the organs in the chest.

"Come on, come on." As the patient's condition became more and more serious, all the top doctors in the hospital were replaced.

The chief knife is Zhang Fan, the first assistant is Dr. Zhang Yanfang, the second assistant is Dr. Li Guanghai, and the third assistant is Dr. Xu Yan. All doctors above the deputy director level outside the chest are on standby in the operating room. Anesthesiologists are the two directors of the Department of anesthesiology.

The instrument nurse is the head nurse of the tea element operating room, and the itinerant nurse is two old nurses who have stayed in the operating room for almost 20 years. Young nurses can't get into this operating room.

It can be said that this operation is almost the most powerful medical team in the whole tea vegetable region and even the whole frontier.

"Zhang Yuan, while hemostasis, it's best to go through the C-arm to clarify its depth." Zhao Yanfang is a help to Zhang Fan.

Zhang Fan also hesitated slightly for a second or two, nodded, "time is running out, we can only sacrifice!"

Everyone understood Zhang Fan's words, and even the anesthesiologist didn't refute them.

The head nurse in the operating room said, "Zhang Yuan, take a picture. We are all old women and don't have children anymore. You young people are a little... "

As soon as he said this, Zhang Fan felt sad.

With the development of modern science and technology, many inspection equipment have been miniaturized. Such as X-ray and CT machines. A few years ago, this kind of equipment couldn't fit in a big room.

But now, X-ray can push and run alone, and CT machine has been reduced to be used on operating table.

But these things are radioactive.

It doesn't matter to eat radiation twice at a time, but it's a problem for a long time. This thing, the radiation of this intensity does great damage to the glands of the human body.

For example, women's mammary glands and men's testis (a) pills are irradiated more often. What is the result? The first is canceration, and for example, after male Jingzi is irradiated, he may produce a polyploid, and then produce a Superman with a beard as soon as he lands on the ground!

Therefore, radiologists will retire a few years earlier than ordinary doctors. In normal times, doctors and nurses would hide in the lead room early.

Even if someone has to hold the patient, they will wear protective clothing.

But not today. There's no time.

After everyone takes off their surgical clothes and puts on protective clothing, after irradiation, they brush their hands and put on their surgical clothes. The patient is estimated to be cold.

Therefore, we can only act in a hurry now, but it is unfair to doctors and nurses.

Card, card, card. After three doses of radiation, remove the C-arm. Everyone looked at the iron on the monitor.

"Zhang Yuan, can't cut!" Zhao Yanfang and Xu Yan looked at the iron tools inserted in the organs in the display and said with dry mouth and tongue.

"Yes!" Zhang Fan didn't expect the iron to be inserted so deeply.

As if she was deeply afraid that Zhang Fan had lost her confidence, Zhao Yanfang said, "it is a tragedy for trauma surgery that the damage to critical life has not been found and handled in time."

In fact, Zhao Yanfang will not comfort people. If she can comfort people, she will not learn from famous teachers. She is a very powerful doctor, but she can't stay in major hospitals. This woman is too straightforward and rational.

Moreover, it is estimated that in her early years, her language and thinking were quite sharp because of her boyfriend's injury. Her boyfriend didn't know what reincarnation was. He could sleep with her for almost ten years.

Although what she said was ugly, it was true.

In medicine, we should pay attention to a golden time, that is, when patients are traumatized, in the shortest time, most injuries with major problems should be diagnosed and treated at least temporarily.

But actually?

In fact, most patients in the world, no matter what level of hospitals, patients with such major injuries, can make most doctors think about what causes this guy to die.

Textbooks are textbooks because the reality is complex.

Different doctors, different environments and different patients make it impossible to reflect the most classic knowledge in the textbooks, and even more than 70% of the textbooks.

"What should I do?" Zhao Yanfang looked at the monitor and then looked at Zhang Fan. Her inner idea was actually to give up.

This is the difference between doctors who prefer scientific research and clinicians. Because her mind is almost digital. With a high probability, continuing the operation will accelerate the death of the patient. When this happens, it is often to give the last care to make her go more painless and calm.

Looking at Zhang Fan in a daze, Zhao Yanfang bit her lips. She didn't expect that this person could still be in a daze at this moment. Who is this.

In fact, Zhang Fan kept repeating the patient's surgery in the system.

The sweat beads on the temples slowly came out.

Breathing is also more rapid.

In just a few minutes, the doctors and nurses in the operating room were suffocating.

The patient's life is slowly lost over time.

The alarm on the monitor keeps flashing, reminding: hurry up, your uncle, she's going to hang up.

What should I do?

Almost everyone except Zhang Fan thought again about what to do.

"There's a way!" Just when everyone's heart was about to explode, Zhang Fan spoke.

His eyes were red, because the brain used a lot of oxygen, resulting in a temporary lack of oxygen in his surrounding organs.

In these few minutes, Zhang Fan finally found a way in the system.

Zhang Fan in the system keeps copying the patient's situation and looking for various methods.

"What?" Zhao Yanfang doesn't believe it. The blood pressure is almost gone. If the heart beats for a while, it is estimated that it is definitely disorder and failure. What else can we do now.

"Comrades! I need your help. In the next five minutes, I need you to make sure that the iron doesn't move, and when I say it rises, you should make the iron break away quickly. Can you do it? "

Zhang Fan looked at several armed police soldiers.

The soldiers wore winter training clothes when rescuing. The winter training clothes in the frontier are not comparable to those of the armed police in the mainland.

The legendary long staple cotton is estimated to have seen few people, and even fewer people have used it. In the early years, folklore said that this kind of cotton was used to make cotton trousers for the big men.

In fact, this kind of cotton is used in all plateau troops in the north and northwest.

In the wild, this long staple cotton is warm and comfortable, but in the operating room, this is fine.

A group of young men are frozen like chickens outside, and now they can squeeze three kilograms of water out of their hot underwear.

"Yes! Zhang Yuan ordered it. We can do it even with our lives. " The instructor looked at Zhang Fan for the first time and answered Zhang Fan's request.

"OK, please!" Facing these men, Zhang Fan has inexplicable trust.

"Start!" Then Zhang Fan picked up the electric knife and said to several men with a plastic filler in one hand.

With that, the faces of several men with masks were like Guan Gong. It can be said that the strength of feeding has been used. Without them, the operation could not be done today.

Like Zhang Fan, he began to connect the current blood vessels around his lungs. Bit by bit, time flies.

Five minutes, five minutes of broken end. Zhang fan can say that he has never had an operation so fast in his life.

Eye to hand, hand to knife.

The blood is still coming out.

Gauze, white in, red out, used gauze on the nurse's instrument table, like a hill, a red hill.

"OK, get ready, get up!"

Zhang Fan whispered softly.

Like a gambler's cry before opening a treasure.

Several young children, with all their strength, should be fast, fast, fast, like pulling a radish. With a puff, the sound of a sharp sword into the meat, while they are pulling a sword.

The negative pressure of tissue muscles is close to iron and pink lung tissue, just like when lovers kiss, the tongue is sucked out by men, or just like

The pink lung tissue followed the iron and turned out inside.

At this moment, the blood was angry.

Zhang Fan's electric knife made a stab, and then the filler was quickly inserted into the gap.

"Inflate!"

Under the operating table, several middle-aged doctors, holding spherical balloons, began to pinch, puff, and the stuffer quickly grew in the sinus.

"Drop! Drop! Drop! " The rapid instrument exploded, slowly became smaller from the sharpest, and then disappeared!

Sweat, Zhang Fan's slippers are full of sweat.

"Is it done?"

The armed police instructor and several children were still carrying iron tools and looked at Zhang Fan eagerly.

Chapter 1177

First aid and rescue, especially when there are a large number of wounded people, this kind of rescue takes into account the overall level and cooperation level of a hospital and its TCM nurses.

If one or two critically ill patients, often ordinary third-class hospitals, go to the hospital. Because of the medical strength of the whole hospital, domestic top three hospitals, even regional top three hospitals, are also very powerful.

After all, if a hospital wants to upgrade to the top three, in addition to equipment, the superior should also consider the software level of the hospital. Often in some cities, if senior officials don't fight and fail, deputy directors or even vice presidents will go to other local hospitals if they don't want to change cities.

This competition has a bad side. It is to increase internal friction, but on the other hand, it can greatly improve the level of doctors in the shortest time. This is another reason why throwing knives are popular in China. It is a local hospital. As long as it is a top-3 hospital, it despises or despises the experts of other local top-3 hospitals.

Fighting alone, the whole country is a hero. I don't know how the south is. Anyway, it's a hospital in the north. Doctors at the same level and in the same hospital rarely meet together to cooperate in scientific research. Therefore, once there is a large accident, it is often rare in local hospitals, only in digital hospitals.

Although hospitals are more strict than other units, no matter how strict local hospitals are, they are not as strict as digital hospitals. Your superior is too harsh. I won't serve you anymore. I'll take my certificate and resume and leave.

In the digital hospital, it is different. If an undergraduate doctor wants to go to graduate school, he can go only with the consent of the Department Director and the president of the hospital. This repression

seems cruel. In fact, it ensures the last line of defense of China's medical system. If everyone developed freely without a strong rule, they would have scattered their stalls as early as SARS.

In fact, the outbreak of the outbreak of hepatitis A in demo and the outbreak of plague in the league are not a test for the Chinese medical treatment. Because the diagnosis is clear, Shanghai is going to be a great one. But during SARS, it was serious and a medical test for this country and for this country.

Because it is not diagnosable and highly infectious, we, including major experts, can not determine what this thing is in the end within half a year.

The situation at that time was, can you go up? If you did, you might die, and it might not be useful, because you didn't even have a clear diagnosis, you didn't even use drugs, and Lao Zhong was almost overturned, because the treatment ideas were too chaotic at that time.

Each has its own tricks. Anyway, it can't be diagnosed. No one's method can be called a clinical guide. Really, it was really dangerous. If you don't, you can escape and live. Therefore, at that time, there was a fire for this industry.

Unable to diagnose within six months, which is quite a terrible thing in the case of large-scale infectious diseases. Finally, the doctors and nurses of the digital hospital entered the isolation hospital in the capital with a will. Although the epidemic situation later or in the future was also serious, the country made a clear diagnosis in a few days.

It's hat disease. Symptomatic treatment is OK. It's over!

Therefore, the SARS was actually the test of life and death. There were shouts from the outside. Several small countries around the country resisted China all the time, even on their own island. If the Chinese medical system really couldn't resist it that year, it was estimated that

Therefore, in 2003, there was the subsequent year of 2008, and there was also a later Chinese diplomatic spokesman who pointed at president Jin Mao's nose and scolded. This was put before 2003, dare you? I dare not. When the Chinese leader held the prime minister's hand, he smiled so painfully and his mouth was crooked.

But later, I ignored you and met a fart!

The tea vegetable hospital, on its own, took out Zhang Fan, other doctors, that is, an ordinary expert.

However, if you join Zhang Fan's whole tea vegetable hospital, it will be like painting a dragon and making eyes.

In the early morning of the ninth day of winter, the tea vegetable hospital was brightly lit. The searchlights inside the hospital, the headlights of various police explosion-proof vehicles and the tea vegetable hospital are the same as holding a concert again. Zhang Fan is in the operating room.

Ouyang in the emergency center is the protagonist at this time.

"I don't care. Now the patient is lying there. Now you tell me that the blood bank has no blood. Why don't you prepare in advance? Is that how you become the director of the blood bank?"

"At the end of the year, the students have a holiday. I think the new year is coming soon. There won't be a large number of patients. I'm ready to go after the beginning of spring..."

"You think, you think what to do now, are you a pig? If you want to kill it for the new year, won't you live? " Ouyang pointed to the director of the hospital blood bank and yelled.

The director of the blood bank is almost crying. The stock in recent years is a little more than that in previous years, but what can he do in case of this.

Blood is not tap water.

This kind of thing is just like a kindergarten teacher teaching children. If you have something to do, go to the police and the army.

.....

While rescuing patients at the tea vegetable hospital, the bird market was also quarrelling.

The Ministry of health did not pay attention to the tea vegetable hospital, not even the general attention. Even if Zhang Fanxiang is a little famous now, it is because of the relationship between old Lu and old Wu that he gives others a high look. In particular, Zhang Fan's relationship with doctors and officials in the Ministry is not so friendly.

However, when the special orthopedic equipment is transported in, it is different. To tell you the truth, the Ministry wants this equipment, because China doesn't have it. Moreover, rich people don't sell it. After such a rendering by the doctor officials in the Ministry.

The tea vegetable hospital came into their sight, and then they checked, hey, how can the regional hospital become a provincial hospital, and made a report. Does that work? Moreover, the hospitals in this region are too large. The general foreign language laboratories and instruments are Asian or even world-class.

The burn department has obtained the procedures for allogeneic transplantation in phase III clinical trial, and the burn laboratory has a nose and eyes.

The construction of the Institute of orthopedics will be completed immediately. Look at the cost and equipment. This is a Chinese version of special orthopedics.

Look at the children's Institute. The Department of pediatric surgery and the Department of pediatric orthopedics have begun to prepare for the training of medical staff.

The emergency center has the largest direct rescue flight in Asia, which is specially provided by the road and aviation brigade of the PLA.

Is this a regional hospital or a hospital directly under the Ministry of health in the capital? It's too big. In terms of equipment, this is the standard of hospitals directly under the Ministry. How can I give you provincial control!

The Ministry refused and refuted the provincial report.

The province doesn't like it. Why don't you agree. Why don't you agree.

The Ministry doesn't say anything, nor does it say that it is greedy for the body of the tea vegetable city hospital. In a word, it can't even be affiliated with an affiliated university. Now you are delaying the development of the tea vegetable hospital.

Let's hang up now!

No, it's late!

The quarrel between the province and the Ministry is not the matter of who makes who, nor is it the matter of who convinces who. Finally, the lawsuit went to the boss.

The boss thought about it. There was a black boy in his mind and an old lady who wanted to take advantage of the law.

"In this way, the executive power is in the province. After all, tea vegetable city is the bridgehead in the west of China. The tea vegetable hospital is not only responsible for the treatment of domestic people, but also for the medical treatment of surrounding countries. After all, some things are not very familiar with the coordination of the Ministry. Let the province take care of it, and the tea vegetable city hospital won't be bullied, will it? "

"Ha ha!" The leader of the Department smiled awkwardly. Who let the leaders of this ministry have a weak voice.

"As for affiliation, my opinion is that since we undertake the international medical task, we should make

the tea element hospital look higher. Scientific research and teaching are linked to the golden mean medical department, and your department is responsible for this part. How's it going? "

The boss thought about it and said.

"Leadership is level!" The boss of the bird market is happy.

"Well, it's good not to complain."

.....

With the boss's instructions, the tea element evaluation team withdrew after receiving the order. Then, the steps of upgrading the tea vegetable hospital began after the bird market issued an order.

In the operating room, Zhang Fan looked at the patient monitor.

Blood pressure, high pressure from 60, slowly rising, bit by bit, finally, the high pressure exceeded 90mmHg, "success!" The anesthesiologist shouted first.

Zhang Fan finally took a breath, nodded and whispered to several armed policemen, "it's successful!"

"Mom, it's more frightening than holding a dud!" A little soldier couldn't help touching his forehead.

During the operation, they were more flustered than anyone.

The doctors were busy rescuing and had no time to worry and panic.

But they have time. They watch it for a while, and then it's bad again. It stopped bleeding and sprayed blood again. Their hearts are like riding a roller coaster. They come up and go down. To tell the truth, it's really uncomfortable.

In a car accident, more than 60 people were injured in varying degrees.

Most of them have been saved, but more than a dozen people have lost their precious lives. Some closed their eyes forever on the way to the hospital, and some closed their eyes on the operating table.

For a time, many shrines were set up in the backyard of the tea vegetable city hospital. Especially parents who have lost their children.

Crying is tearing the heart and cracking the lungs.

"My child, I made you your favorite ball soup and your favorite sheep bones, but why did you leave so ruthlessly. How do you let your mother live? "

The sorrow of life is nothing more than the loss of a mother in youth, a wife in middle age and a son in old age.

The expressway from catechu to niaoshi was rectified, and the responsible of the highway section and the boss of the automobile transportation company got off the horse this winter.

However, what can never be saved is a dozen young lives.

Taking a shortcut is sometimes not necessarily a shortcut. It may be a desperate way!

Chapter 1178

The hospital is the place with the most emotional outbursts, and it is also a place without feelings. Death and rebirth happen all the time. In the morgue next door, the mother was crying to death, while in the newborn room on the other side, the child's red eggs were stuffed by the young father when he saw the one in the white coat, laughing like a fool.

There are a lot of Doggerels in hospitals, such as eating, drinking, obstetrics and Gynecology, which are right at all. There are many disputes in obstetrics and Gynecology, but there are also many patients. Therefore, if a hospital has the most drinks and snacks in its wardrobe, it will be known by the little nurse in obstetrics and gynecology. Therefore, it is estimated that the cost will be a little higher if we chase the little nurses in obstetrics and gynecology.

The peak and trough of patients in obstetrics and gynecology are rare. It's not like orthopedics.

Orthopedics is big at both ends, with the most patients in summer and winter. In summer, almost all of them are young people, young people working on construction sites, all kinds of accidents. In winter, the elderly fall on the ice skating. Therefore, orthopaedic patients rely more on doctors, and orthopaedic doctors in various departments are more moist.

After the rescue, the hospital entered a normal working state that day and will never change because of someone's will. The working life of doctors and nurses also entered the formal stage the next day. No matter what their heart is, life will continue after all.

With the end of the year, the weather of tea vegetable is getting colder and colder. The winter of tea vegetable is characterized by a lot of snow, because it is in the place where warm and humid air flow

converges, and there is Tianshan air conditioner. There is a light snow in three days and a heavy snow in five days in winter.

The heavy snow caused the slow pace of urban life. People in the mainland can't imagine the happiness of tea vegetable life when it snows. Of course, the premise is that it's okay to eat and drink. Zhang Fan doesn't like snow very much. It's estimated that he hasn't seen much snow since childhood. He doesn't catch a cold when he gets up to sweep snow every morning.

The task of sweeping snow in the long street outside the hospital has been contracted out. Eight thousand a year, no matter whether it snows or not, and no matter how many snows. Snow sweeping is implemented in the frontier. It doesn't look like the mainland. It all depends on sanitation workers.

Early in the morning, Zhang Fan went downstairs and saw half the car and half the body in the snow. He hesitated for a long time and chose to walk. Walking in the snowy weather, the bus slows down and the pedestrians walk slowly, as if the time has slowed down.

The hair color of the pedestrians turned pale. Zhang Fan suddenly doesn't know how to think of a poem he doesn't know who it is: the most important thing is that the autumn wind meddles in his own business. He has a white head with maple leaves!

When Zhang Fan was intoxicated that he could even watch white snow recite poetry, suddenly a hateful voice broke his intoxication and meaning (a) adultery, "I'll go, Zhang Yuan, you walk to work yourself?"

Needless to say, it's Xue Fei's hateful voice!

Zhang Fan glanced at Xue Fei and his wife, "what if I don't walk by myself?"

"Your current position is a little sorry for walking by yourself. We tea vegetable hospital. Even if you don't take a car, you have to come to work on your back. If you walk by yourself, you lose points!"

"All right, just talk a lot. Zhang Yuanhao! " His wife angrily pushed Xue Fei.

"Hello, sister-in-law. What are you doing? Send director Xue to work in person? "

Zhang Fan asked curiously.

"Of course, I'm a director at least. Although I'm a deputy, someone should take me to work!"

Xue Fei is like this. If you ignore him, he can talk to you for half an hour. If you interrupt, it will be endless.

"I'm going to obstetrics and gynecology." Xue Fei's wife said a little shyly.

Xue Fei and his wife have been married for several years. If there is a relationship, it may be a little history. After all, people have been hooking up since high school.

But although they were fighting, Xue Fei's face was scratched by his wife from time to time in the past, like a cat fighting during estrus. But their relationship has been tested by the rich and the poor. Earlier, Xue Fei was in orthopedics. Because he often ate rays, he didn't have children first.

When I got to the emergency center, I stopped eating the rays and closed the mountain for afforestation for nearly a year, but now it's OK. The children don't seem to see much movement.

Xue Fei was not in a hurry, but his wife didn't want to. Last night, they talked for a long time. Xue Fei's wife got up in the morning and wanted to check what she said.

The doctors in the hospital are actually very sad. When I was young, I was energetic and wanted to be a little teddy all day, but I couldn't help it. After five years of hospitalization, all the passion in my body disappeared.

Wait until the attending, a little better, want children, the problem comes. During the day, facing the patient, you should let it go. You have no problems. Go home and have a good rest and eat more zinc supplements, such as dried fruits.

When I came home at night, I was dragged down by my wife. Eating walnuts and bataki was fragrant and bitter.

"Call me if you want help. I don't have many operations today." When he came to the door of the hospital, Zhang Fan said something to Xue Fei.

"Good!" Although Xue Fei was coquettish all the way, his mood was still much lower inadvertently after he entered the hospital. To tell the truth, some people don't want to have children all their life, while others don't want to have children all their life.

Xue Fei's wife saw Xue Fei's nervousness "It's all right. You can eat and sleep. Maybe it's US recently... "

"The skin is almost worn out!" Xue Fei seemed quite nervous to lift his pants!

Infertility, relatively speaking, women are easier to check than men. Women generally do color Doppler ultrasound to see the situation of fallopian tubes and uterus, whether there is adhesion, whether there is infection, etc., while men are different. Measure vitality and quantity.

Therefore, Xue Feilue was embarrassed, especially in a hospital. On weekdays, who doesn't joke about who, but the measured quantity or vitality is not enough, so he doesn't dare to joke about others in the future.

Zhang Fan went into the office with a head of snow, and Chen Sheng came. Although Lao Chen didn't join the team, he could manage the medical offices of three branches. Even if he didn't have the right to raise his hand, he still couldn't be absent from the meeting, so he now felt that he was a head higher than Lao Ju.

"Ouch, Zhang Yuan, why didn't you take an umbrella? If you catch a cold, it's terrible. Next time it's snowing heavily, I'll ask the car class to pick you up. The cars are in the garage and it's convenient to get in and out."

Lao Chen is busy looking for a towel for Zhang Fan.

"OK, don't be busy. I'll do it myself. Is there anything today? I'll have an operation."

Ouyang is becoming more and more disrespectful now. Although she was not in charge before, she can come to work on time. She can be found in the office. Now she is late and leaves early. Today's weather is estimated to be bullying her old man at home by watching the stick opera. It's a little difficult to let her come to work.

Therefore, Zhang Fan has no one to rely on for many things now. He must do it himself.

"It was announced the day before yesterday that today's comrades in the organization would send three vice presidents to take office. They were too busy to report to you two days ago. It's such a heavy snow today. I don't know whether they will come or not, but there's no further notice. The European hospital is not at home. You have to go to the operating room again. Secretary Ren is not very talkative. Look... "

Lao Chen also said a little embarrassed. Lao Chen is really a little embarrassed.

Almost all the stuff in the hospital has the final say, so it is really a big deal. But there are quite a lot of difficult times. Although the hospital has not been upgraded, the tea vegetable government has ignored it.

Now we are dealing with our superiors. He is a person who has not joined the team. Sometimes, he often asks the superior leaders, "how did you report it? What about the main person in charge and leaders of your hospital?"

What can Lao Chen say? Can it be said that the old lady watches the Bangzi opera? Young master Zhang doesn't care about you in the operating room! Therefore, he can only report his work with a smile.

But not today. If people from the organization come and receive them themselves, it will become a political accident. There's a saying, okay? A meeting without leaders is not serious. The old lady is not a

good stubble. He can't provoke him. He can only catch Zhang Fan.

Zhang Fan sighed slightly in his heart. I can only put down my white coat and sit in a chair and wait.

That's the thing. Now he really wants to do what surgery, but on the other hand, he also has responsibility.

There is no delay in sending new teams to the bird market because of the heavy snow. After all, this level sometimes forms issues. Even if there is a knife in the sky, they have to come on time. The motorcade set out from the bird market and entered the Tianshan Mountain, and the snow became heavy.

"The snow in the frontier has fallen to tea!" The boss of the Organization Department sent people in person.

You can't do it without sending it away, because the former Secretary has dismissed the second son of bird market in Jinhe. Although happy, it also means the selection of bird market leaders. Therefore, this time, considerable attention was paid. When passer-by C came, the boss of the organization didn't come forward.

"After all, tea is a small south of the Yangtze River in the frontier, and the climate is still good. When the place is, the leaders can rest for a few more days and breathe the tea air after the heavy snow, which is much more comfortable than the dry air in the bird market that makes people nosebleed. "

Zhao Jingjin said to the leader with a smile.

When he came, two bull headed bullies opened the way, followed by Coster. They all sat on Koster.

"Well, Professor Zhao is a little familiar with tea vegetarians, and he has cooperated with tea vegetarians a little more in the past. The hospital of tea vegetable is very complicated! After you go, you should first lay a good foundation with local comrades, and then display your ambitions.

At the beginning of getting off the bus, he said something he didn't pay much attention to, so he asked the leaders of chasu hospital to... "

The boss of the organization took a breath and said to the three people, "the superior has great expectations for you. Tea vegetable hospital will be a bridgehead for the outside world in the future. You are all from the regular army. You must adhere to the training of the organization for many years and can't follow them.

Do you know that the coffers of tea vegetarians are richer than government appropriations? Why don't they hand it over to the government for overall planning? Therefore, close to comrades and colleagues in life, but you must have your own ethics in your career. Don't make a tea vegetable hospital like... "

The leader of the organization is very dissatisfied with the failure to fully appoint the leadership position of the tea vegetable hospital. What does this mean? It means that the tea vegetable is not investigated by their organization, and their achievements have nothing to do with their selection.

So

Lao Zhao ordered like a chicken eating millet. In fact, he had butterflies flying in his heart. What did he come for? He didn't come to grab power and position. With this idea, he fought with the president in the Central Hospital of bird market.

He has a purpose. He came to impact academicians in the future.

Professor Yan Xiaoyu in Annex II looked out of the window and didn't know what to think. It seemed that she didn't hear what the leader said.

Luo Zhengguo, who was born in the first affiliated school, wondered how to make the development of tea outside the brain better and how to connect more closely with the golden mean of the capital.

Therefore, before this team came, it was tantamount to taking refuge in tea early. It's probably a little difficult to count on them now.

The organizational leaders of bird City, this time, not only send people, but also change the brand and name of the hospital.

The central government has agreed to upgrade the tea element. Now it is inappropriate to continue to use the name of the municipal hospital.

Chapter 1179

The Chinese state attaches great importance to this. It is not correct in its name.

For example, children's names are quite exquisite. If the conditions are better, find a local gentleman to name the child. For example, Zhang Fan's sister was given by the iron mouth God under the iron bridge for two yuan. Of course, when Zhang Fan was born, the conditions were not good, but his grandfather thought of the name and gave it all night.

For example, in recent years, many young couples have given their children names, which are more distinctive. It seems that such promises made by Xu Xia are not uncommon. Therefore, when the tea vegetable hospital wants to change its name, it is a big event for the doctors and nurses of the tea vegetable hospital.

"The leaders of the European hospital took office with several vice presidents. You..." when the organized team entered the hospital, Zhang Fan motioned Lao Chen to call Ouyang.

Ouyang has some opinions about the bird market because of Lu Bingnan's business, so he won't come this time" Ouch, tell you Zhang Yuan that I'm not feeling well. My head is dizzy, my eyes are dazed, and my feet are not sharp. I want to rest for a few days! "

Ouyang, holding a remote control in one hand and a napkin in the other, opened his mouth and lied. Anyway, I just didn't think of leaving for the hospital.

Lao Chen said in his heart, "is your voice sick? I heard oba on TV! Ah, women, no matter where they are or how old they are, they fantasize about love! "

Lao Chen hung up helplessly and reported to Zhang Fan, "European hospital is uncomfortable!" Lao Chen reported with a frown. Zhang Fan knows what happened at a glance" You go to the European hospital and say that the name of the hospital will be changed, and the superior will confirm it today. "

"Good!"

"What are you doing? Why are you calling again. I'm on sick leave. What else do I have to do? Do you want someone to live? " Ouyang answered the phone and asked impatiently. Because on TV, it seems that the man is suffering from cancer and wants to break up with the woman. The woman doesn't want to. They are kissing goodbye.

"The hospital is going to change its name!" Lao Chen took the phone about half a meter away from his ear and said to the phone.

"Oh? I'll come right away. Forget it. You asked the car class to pick me up. I didn't wash my face! " Then he hung up the phone.

"This is Comrade Zhao Jingjin, a scholar in the frontier river. I really can't bear to let him come to tea! Zhang Yuan is young and promising. We must unite with each other in the future. " The minister personally introduced. The bird market also attaches great importance to the problem of tea vegetable team. It can be said that if there is a problem once, it can be said that if there is a problem twice, it is not a thing of the past.

"Welcome, Lao Zhao!" Zhang Fan held Zhao Jingjin's hand and said with a smile.

"Hey, when I asked you to go to the bird market, you didn't go. There's no way but me." Lao Zhao held Zhang Fan's hand and felt a lot of emotion.

When Lao Zhao spoke, the boss of the organization took a special look at Zhao Jingjin, "this is hopeless!" He doesn't count on Lao Zhao anymore.

"This is Professor Luo Zhengguo, an expert in brain surgery. A knife outside the frontier's head! "

Luo Zhengguo didn't wait for the leaders to finish the introduction. He immediately said, "I dare not call a knife outside the frontier's head in front of Zhang Yuan! Zhang Yuan, tea is not very good outside the brain. There is a bone Institute in orthopedics. You are a little eccentric! "

"Ha ha, welcome, welcome. I wish you were here. The train needs to be brought by the locomotive! "

"Shit, I haven't left the division yet. I've lost two-thirds of my troops!" The boss of bird market organization is also sad. Originally, I chose an old comrade who had experience in all aspects of the health system. I thought he could come here to stabilize. Unexpectedly, he was old and made an opportunist mistake.

I also thought about sending some top technical experts from the bird market. Anyway, the literati are inferior to each other, and the technicians are also literati. The results are not quite. They didn't leave. The people they brought have begun to worship the mountain. He's not in the mood to introduce.

"It will take a long time to talk about it after work. This is Comrade Yan Xiaoyu. I used to be a professor of endocrinology in Annex I. " The boss of the organization has no strength to compete. For Zhang Fan, he still knows a little.

Not only did he sign up with the boss of the bird market, but he also heard that the second son had to ask him to report often. What's more terrible is that this guy doesn't know what branch he's walking, but he has something to do with the big manager. Mother, I don't know if this young man's brain is not suitable. With such a strong background, he came to the tea vegetable border as the dean. Isn't this a hooligan!

"Professor Yan, hard work. You are welcome to work with tea vegetarians. " For Yan Xiaoyu, Zhang Fan is not as familiar as the first two.

"Thank you!" Yan Xiaoyu said faintly and shook hands with Zhang Fan gently.

Zhang Fan originally thought it was hard to serve him. He knew it by looking at his face. If Yan Xiaoyu is

ten years younger, it is not too much to say that she is a courtyard flower. Her white and exquisite face is mixed with a faint pride brought by the book. It can be said that it is like her own protective ring, which makes people feel alienated.

If Ren Li is naturally cold, this is the cold brought by her own superiority the day after tomorrow. Of course, if compared with Ouyang, Ouyang is not cold or overbearing.

But Zhang Fan holds Yan Xiaoyu's hand, and Zhang Fan is relieved. Because Zhang Fan felt the hand of a medical expert. Dry, even if she uses the best hand cream, she can't hide the degreasing effect brought by frequent use of hand sanitizer for decades.

Hands, dry and warm, but definitely not soft. This is a doctor's hand. Even if a person is difficult to deal with, he has definitely made a lot of efforts in medicine. As long as he is an expert, Zhang Fan is not afraid to deal with.

The boss of the organization doesn't expect these three people to do anything. So there's not much patience.

"Are all the members of your team here?" As soon as he looked, he knew that Ouyang, the most unreasonable person in the tea vegetable hospital, was not there.

"The first branch has several special patients. The herdsman was injured for some special reasons. The European hospital went to check the room in the morning. One of our three team members turns to check the room every day!" Zhang Fan is also talking nonsense.

However, as soon as he said this, the organization leader stopped talking and nodded "You have a lot of right and wrong at the border. You should not only pay attention to unity, but also pay attention to your own security. I heard that your first branch will be equipped with armed police to stand guard? "

"Well, after the plan, the branch is a special hospital, mainly for foreign affairs." Zhang Fan accompanied the organization leaders as they walked towards the conference room and explained.

The tea vegetable side is also sad.

Foreign businessmen are either tycoons or some white-collar workers from abroad. On the tea vegetable side, tycoons are tycoons, but tycoons with guns are still very troublesome.

When he got to the conference room, Lao Chen put the nameplate in the conference room early.

Ouyang was also fast. He came in less than half an hour. Of course, Lao Chen had already unified his caliber with Ouyang at the door and fooled a layman leader, just like playing.

"Sorry, I'm late." Ouyang apologized to the organization leaders.

"It's all right! It's all right. Work matters. How's the patient? "

"Hey, the patient can recover, but the infrastructure there is too poor. The windows are not double-layer, and the temperature insulation layer of the building has fallen off. If we really want to set up a foreign hospital in the future, I think people's patients will turn around and leave as soon as they enter the door. "

The boss of the bird market organization didn't know what to say. He had heard that Ouyang was difficult to deal with. He didn't expect it to be so difficult. He asked casually. The man went to the pole and began to complain. He made it clear that as long as he asked again, she would ask for money.

The power of organizing this area is really great. All officials from top to bottom have the right to investigate and recommend, but they are relatively poor in terms of money. Looking at Ouyang, his heart was sweating“ Comrades, hard work! Sit down and I'll tell you a few things. "

When Ouyang heard this, he curled his mouth! He sat down.

Do not work, do not give money, but also want us to be obedient, beautiful you!

The organization boss came, and the tea vegetable boss didn't come long ago. The tea vegetable hospital is now quite special. The hospital is nominally assigned to the bird market, but except Zhang Fan and the three vice presidents of the bird market are in the bird market, the cadre files of others are all in tea vegetable, and the scientific research is also in the charge of the Ministry of health.

It sounds like there are many mothers-in-law, but these mothers-in-law are little wives and have no main responsibility. Now it's who gives money and who speaks hard. The tea vegetable hospital is about who you want to listen to. If you don't give money and want to whore for nothing, there's no door.

"The comrades of niaoshi are very pleased that the tea vegetable hospital can be upgraded and mentioned to provincial units, so before I came this time, several main leaders asked me to comfort the staff of the tea vegetable hospital and say to you, it's hard!"

Applause, Zhang Fan took the lead in clapping. The doctors and nurses who were not in the responsible class of the day came. Except for some serious business studies, the other meetings were the same as everyone. The people on the stage were very enthusiastic and serious, and the people under the stage were all kinds of water.

"Hey, you said the uncle said we were upgraded. Will the salary increase a little? I heard that several hospitals affiliated to niaoshi have 500 more wages than us." Several nurses who have become mothers get together to talk gossip.

"It should be higher, or it's not a white upgrade! What, are you going to buy tonics for your husband again recently? Take it easy, too. Don't let you spoil your husband's physique. "

"Fuck you, you just ruined your family."

Several people laughed at the chicken thief. The young doctor wanted to listen to it, so he was pushed by the nurse nearby, "go, go, go, come and listen to the old women's chat without growing hair. I'm not afraid I can't sleep at night!"

The doctors also gossip, "look at Lao Chen, his face is wrinkled. This promotion, he didn't join the team. It's estimated that he cried badly at home."

"That's OK. He's a serious inner manager now. The medical offices of three branches and one general hospital are under his control. The directors below are soldiers brought out by him. Although they don't join the team, they have more power than ordinary vice presidents. You should be careful that he has trouble finding your cases every day. "

Looking at the people below chatting, they didn't take the leaders on the stage seriously. The organization leader's face is blue, but he can't help it. He knows this kind of technical unit very well. Except for a few provincial cadres, he really can't help others.

People don't eat on official career.

"Pay attention to the discipline of the venue. Wang Yanan, you still laugh!" Zhang Fan said with the microphone. The following is too much. The sound is almost louder than the microphone.

Wang Yanan rolled his eyes, stuck out his tongue and hid his head in the crowd.

"Leader, you continue!"

Zhang Fan said to the organization leader with a smile.

The leader also said a fart. The people below didn't take him seriously, and he didn't want to continue.

"If the hospital is upgraded, the name of the hospital will be changed. You can brainstorm! "

In fact, when he came, the leader authorized him to decide. He thought and asked everyone to brainstorm. It is estimated that no one stood up and said. Because at ordinary times, whose employees worry about this thing.

As a result, he was polite and bad.

Xue Fei stood up first: "I think our hospital is backed by Tianshan Mountain. In the future, it will be called Tianshan hospital. Don't demons have a Shanhua? We are Tianshan Mountain, which is more atmospheric than him."

"Well, good!"

"No, call Kunlun hospital directly. It's more aggressive than Tianshan." Someone came out to argue.

More unconvinced, after all, Xue Fei was a little tricky when he was the deputy director. Many qualified people didn't go up and targeted Xue Fei, young and old.

"Not at all. You think it's a zoo. Why don't you say Huaguo Mountain!"

That's a challenge.

The leader of the organization turned green. Why is a hospital so unreliable? The old ones are unreliable, the small ones are unreliable, and even the staff are unreliable.

He coughed for a long time and didn't stop the quarrel below.

Chapter 1180

It is absolutely nonsense to say that a unit is united from top to bottom. Three people can invent a land where landlords fight. Where is it possible for everyone to unite? The general direction of unity has been quite good.

For example, when I was in the emergency department, I didn't want to go to the emergency center. Emergency department, infection department, pediatrics and pathology department are known as the four cold palaces by the hospital. When leaders scare residents, they will say, be obedient. If you don't, I'll take you to the infectious diseases department.

In other words, the doctor's qualification certificate has not been admitted for several years, or the score is too low. At this time, if there is no background, they often get these departments.

The emergency department is busy and has no money. There are still many disputes and will be beaten from time to time. The infectious diseases department is dangerous because it has no money. Because many infectious diseases are treated for the first time by the state for free. Moreover, many anti-infection drugs are monopolized by the state, and there are almost no kickbacks. Therefore, no doctor is willing to rush to do it.

Pediatrics, don't mention it. In the early years, there were fewer children and many kinds of trees, resulting in a child's illness. There are often seven or eight adults coming. If you say a word to me and ask the doctor, there will be a contradiction. So this department is not easy to do.

As for the pathology department, it is simply because there is no money. The consumables of the pathology department are a little dye and glass sheets. How much money can there be? This money is not enough for the director of pathology to take alone, so doctors don't like to go.

But with the establishment of the tea element emergency center, this thing is different. Xue Fei bragged when he was free, "what's great about your orthopedics? Do you have a plane? Have you ever been in a helicopter? There's no platform for my roof, otherwise I'll fly to and from work, a group of woodlouse! "

The emergency center now has six operating rooms alone and all kinds of equipment. It can almost be said that it is the condition to form a Class A and class II hospital. With more equipment, more patients are intercepted. Why does Xue Fei always like to ridicule orthopedics.

Because the bastard intercepted the orthopedic patient without being. He stopped all the emergency operations. This made the orthopaedic quite dissatisfied. With Zhang Fan's attention to the emergency center and the complete staffing of other surgeons, this boy almost stopped all surgeries.

So Xue Fei has quite a lot of enemies now. As soon as he stood up, other people who didn't want to get involved had to stand up and express their objections. They didn't say that they had different ideas, but they just raised a quarrel with Xue Fei.

It doesn't matter. As a result, the organizational leaders can't stand down.

"Well, hehe, comrades are very enthusiastic!" The organization leader looked at Zhang Fan and said awkwardly.

"Well! Yes, yes, usually there are few such opportunities! "

DUT is embarrassed to talk. The leader said that everyone was enthusiastic and took it seriously. The leader was embarrassed.

For a long time, the leader said, "everyone's ideas are very good and have their own characteristics. Do you think it's ok? It's called bird city sixth hospital!"

Now, the people below are boiling.

I don't know the bald boy shouted in the corner, "the city sixth hospital in bird market is a psychiatric

hospital, and the provincial sixth hospital is a psychiatric provincial sixth hospital!"

Ouyang glanced at the leader. She knew who the yeller was, but she pretended not to know.

In fact, what does the tea vegetable hospital say? In the eyes of the leaders, it is a bit like sending out children. As a result, the children have developed decades later. Now when they go home, the parents are embarrassed and the children are embarrassed. After all, I didn't grow up with my own eyes.

No feelings are false, but it's hard to say how many feelings there are.

Ouyang whispered to old Chen, "go and call Professor Li of the golden mean and several experts from the golden mean Medical University, as well as the people from the golden Mao country who came to supervise the work in the special hospital, and the professors from the Marubeni country."

Lao Chen nodded and walked away. Ouyang is now, who gives more money, who kisses. It doesn't give a good face to the golden mean, and it is not very friendly to the golden Maoist country, because the special orthopedics department has a strong intervention in the Institute of orthopedics. A word does not agree to arbitration, which makes Ouyang quarrel every day for the past few months.

As for the meatball country, Ouyang is still friendly, because the meatball country gives a lot of money and gets a respiratory ICU, which is the first in the frontier. Extracorporeal ventilator, calculated by man frontier, only tea element has.

How to say, it's not impossible if we really call it by this name, but if there are any grants or scientific research projects in the future, we should take turns. First down, second down, third, this can't run away.

Ouyang was reluctant to be affiliated with Frontier Medical University. In the past, people's Frontier Medical University could not see the tea element hospital, but now the tea element hospital could not see the Frontier Medical University.

With the arrival of moderation experts and international friends, everyone is more and more happy and enthusiastic. People are like this. At the beginning, if it's cold, it's really cold, but if it's warm, it's not easy to be cold in the back.

Xue Fei, the warm-up little prince, was targeted too much. He sat down quite angry and said, "a group of red eye diseases, a group of red eye diseases, are jealous of Lao Tzu and turtle son!"

Finally, the meeting broke up when everyone was dissatisfied.

"A group of uneducated. What do surgeons know? They can't even write their own names! "

On the way back to the Department, several active female internal medicine doctors constantly despise the men in surgery.

"Some of the internal medicine are too talkative. I can't even talk. " Several young men in surgery said reluctantly.

This kind of thing can't get together. Anyway, no name is suitable. In the end, it became a quarrel.

This is to let the organization leaders see the world, "comrades are very lively!"

Zhang Fan is very embarrassed.

The European Academy doesn't matter.

Zhao Jingjin, they haven't officially joined the post, so they don't say much.

In the small conference room.

Ouyang strongly opposed the proposal of affiliated with the Frontier Medical University. Finally, he got around and got a tea vegetable joint teaching hospital of the golden mean University. Moreover, we should not only hang the brand of the golden mean, but also the brand of the Ministry of health, because people say they know the scientific research of tea element.

Simply put up the sign of provincial hospital in the province.

Ouyang Le is broken.

After setting the name, Zhao Jingjin and they joined the post.

Ouyang won't watch TV at home. He hurriedly asked Lao Chen to formulate a plaque. The plaque in this system can't be obtained by looking for an advertising company. "Go and order it, or people will have a holiday for the New Year!"

We all know Ouyang's love of face.

"President Zhao, president Luo and President Yan, I'll take you to an administrative ward round tomorrow morning, so that you can know the departments of the hospital and the comrades of each department can know the new leaders."

Because of their names, the three presidents were not introduced, and the meeting ended. That's all we can do now.

.....

"Is your hospital going to return its name?" Back home, Shaohua asked Zhang Fan curiously.

"Well, three names, the mean, the Ministry and the province. I'm worried that there's no place to hang the plaque. " Zhang Fan said to Shaohua.

"Hey, hey, who doesn't know that your old yard has a good face? Now you have to show off. Do you have time tomorrow? "

"What's the matter?" Zhang Fan asked.

"It's Chinese New Year. Tomorrow Jingshu and I will go to Vientiane exchange to buy clothes. Are you going or not. You have no clothes for the new year. "

"Lao Zhao, they have taken office. I will take them to various departments for ward rounds tomorrow. Go ahead. Your eyes are much better than mine. I like to wear everything you buy. "

Zhang Fan flattered Shaohua.

"Well, you are busier than the prime minister!"

Shao Huabai glanced at Zhang Fan.

Zhang Fan smiled and didn't care. At this time, what he said is wrong, but he can't help his woman say it. Of course, at night, let her know how powerful it is, and then he won't say it in three or four days.

The next day, Zhang Fan still didn't drive. Because Shao Hua wants to use a car, her pickup truck is a little ostentatious in the urban area. At present, there is only one full of tea. It is often said that she is the junior of the mine owner. Shao Hua hardly drives a pickup truck in the urban area. Because it snowed, the old man's two cars couldn't work. They didn't know what to think. They didn't move the motor car in winter, so there were no snow tires.

So I can only open Zhang Fan's. In the winter of tea vegetable, the car must change a softer snow tire, otherwise the car can slip five or six meters away by stepping on the brake.

Early in the morning, Zhang Fan got up quietly, moved Shaohua's leg and broke her hand. One night, like octopus, Zhang Fanlao had a nightmare. Put on your clothes and go out quietly. On weekdays, Shaohua gets up to make breakfast for Zhang Fan.

But she lost the fight yesterday and didn't get up.

In winter, especially in the early morning, it really takes perseverance to go out. The cold wind drilled into the collar.

Zhang Fan trotted into the hospital. After seeing cousin Shaohua's steamed stuffed bun stall, he hesitated and went to buy some steamed stuffed buns.

Shaohua's cousin and sister-in-law's business is very good. They crowded out the steamed stuffed bun stall that used to wipe their nose and take steamed stuffed buns. They are also sensible people. They never do anything under the banner of Zhang Fan. I didn't accept Zhang Fan's money before, which embarrassed Zhang Fan. But this time, people still accepted it. They also know that Zhang Fan is now the dean and should pay special attention.

Administrative rounds began.

Zhang Fan started rounds with a group of people. This kind of ward round is not a business ward round, so Zhang Fan rarely carries out administrative ward round. Because this kind of ward round is a face project, or the president takes a group of administrative personnel for a walk in the clinic.

The most you can ask is whether you are tired at work. You have worked hard. You should pay attention to water, electricity, doors and windows and your attitude towards patients. They are all done by non-medical presidents.

"This is the director of the Department of Gastroenterology. Our department of Gastroenterology now cooperates closely with the Department of general surgery. Scientific research cooperation between the two departments is still very frequent. " Gastroenterology, the worst of several major internal medicine departments.

In the past, the director wanted to retire. Several doctors qualified to be the director bit everywhere. Finally, they hired one, but they couldn't hold down people. Anyway, the development of the Department was relatively slow.

After the introduction, Zhang Fan said to Yan Xiaoyu, "Dean Yan, you'll have to take more trouble in gastroenterology and endocrinology in the future."

"OK!"

Along the way, Zhang Fan introduced the directors, doctors, nurses and several vice presidents, and then arranged the specific work of the vice president.
