

Chapter 1201

A group of doctors opened their chests carefully around the fat man. It's really like doing the most violent things with the most counseling power.

Usually open chest, bone file, bone knife and electric drill are not missing. The loud voice is like entering the turning workshop. But today, none of this works.

"Fix the spreader and bring the largest bone biting forceps."

"Good!" The doctor and nurse spoke in a low voice.

To tell you the truth, bone biting forceps, especially large bone biting forceps, have not appeared in surgery in recent years, because the current multi-purpose electric drill and putting on the diaphragm is the cutter. However, in the past, I didn't know whether they were not sold to China abroad or couldn't be made by China itself. The anti orthopedic instruments are stupid.

For example, how big is the largest bone biting forceps? The handle is about one meter. Just the big scissors that gardeners use to fix tree branches in the garden. It's a little difficult to lift your body.

Why children are afraid of doctors and nurses is not because the medicine is bitter, but because doctors and nurses have needles in their hands, and adults also have psychological shadow over hospitals and doctors. Now people are because of money.

People in the past were really afraid.

For example, in an orthopedic operation, a hammer, a stainless steel hammer, the whole body is made of metal and a big saw. To tell the truth, patients under general anesthesia do not know anything at all, while patients under semi anesthesia or waiting for surgery at the door of the operating room are the most afraid.

It's really a big fear. When it's impossible to die, when it's impossible to live, and when life can't be controlled, it's the most fearful time.

The itinerant nurse turned on the pager: "head nurse, Zhang Yuan wants the largest bone biting forceps."

"Copy that!" The head nurse hung up the pager. At ordinary times, the head nurse said she knew. Only when Zhang Fan was in the operating room, the head nurse said she received it.

Before long, the head nurse received it with sterile hands and bone biting forceps. It's really like nun extinction holding heaven leaning sword.

The green surgical sterile sheet wrapped the bone biting forceps. Because of the perennial disinfection, the sterile sheet was broken, but it still could not hide its power. When the nurse walked through the aisle of the operating room, some young doctors and nurses looked at it curiously.

Because this is the weapon of Grandpa's generation, it is rarely used now.

"Zhang Yuan, the bone biting forceps are here." The head nurse gently said a word to Zhang Fan.

"OK, open the bag!" The instrument nurse was a little thin and not as plump as the head nurse. She looked at the bone biting forceps and couldn't help biting her lips.

It's too big, too thick, too heavy. She was worried about... Falling out of the instrument table.

The director outside the chest was next to her, "I'll come!"

"Oh, this guy is really heavy. I haven't seen him in years." Then he opened the sterile bag and revealed a long and heavy bone biting forceps.

There was a little cold light on the mottled metal teeth. Today's instruments are matte, but in the past, it was estimated that the technology was not in place. It was really glittering.

"Gauze!"

A piece of gauze wrapped directly around the fat man's ribs. Plug at the seams. A large amount of gauze is the buffer zone.

Zhang Fan pointed the bone biting forceps at the ribs, "have a look, have you occluded the alignment?" Because this thing is too long, Zhang fan can't see the operation surface.

"Zhang Yuan, it has been aligned." After looking at it, the director outside the chest said something to Zhang Fan.

Zhang Fan nodded and took a deep breath. Then force with both hands, which is difficult to apply.

It cannot be broken at once, nor can it be cut around like a blunt knife. In ordinary times, we pursue a decisive, but not now. How can we describe this thing.

In fact, it is different from eating ice cream and popsicles in the past. This is the way to eat in the past, not the way that big girls and little daughters-in-law like to eat with their tongue out.

In the past, when eating popsicles, I pursued a crisp one with good teeth. I had to chew a crisp sound in one bite. When eating ice cream, he slowly bit the ice cream into his mouth with his front teeth, because at that time, the ice cream cost twenty cents, while the ice cream cost only five cents.

And Zhang Fan now wants to eat ice cream like before, slowly and continuously force, so that his ribs break off slowly unconsciously. At this time, it is obvious that there are few female orthopedic doctors.

This tool is for Wang Yanan. Wang Yanan must lift it, but it's really difficult for her to lift it as light as a weight. Therefore, the profession of doctor is sometimes really individual work. Therefore, the doctors on TV are slim like little milk cats.

In reality, doctors are all big and rough, which disappoints many girls. In fact, this is the reality.

Zhang Fan looked at the director outside his chest. The director outside his chest pressed his hands on both ends of his ribs, and his eyes also looked at Zhang Fan.

Two big men with masks, hats and eyes only looked at each other like lovers.

No words, but the director outside the chest nodded gently, and the floating range was not large. At this time, Zhang Fan began to exert his arms.

The muscle fibers began to shrink and become larger. Although they were not like black athletes, like eggs in their arms, the lines were still obvious, slowly visible to the naked eye, and the bone biting forceps closed slowly. There was no sound at all, and the ribs were gently broken.

It's like cutting tofu with a sharp knife. It's silent.

One, two, three.

After breaking three ribs, Zhang Fan trembled on the operating table for the first time.

"Wait a minute. The muscles lack energy and shake a little. Wait a minute." Zhang Fan looked at his hands gently, shaking uncontrollably.

At this time, the head nurse suddenly felt like crying. Yes, these old men never shout bitterness or fatigue, but she can't help feeling distressed.

I really want to put Zhang Yuan's in my arms and rub it for him.

"All right! Stop shaking. Let's go. It was not easy for our predecessors. " Zhang Fan smiled apologetically.

In fact, he hasn't used this thing several times. To be honest, it's really difficult to use.

At this time, the general foreigner's class is on "Locate again! "

Radiology group, bedside CT.

The tea vegetable operating room is really powerful now. If before, this kind of operation, even if Zhang Fan dared to do it, he couldn't do it. Because there is no further location in the operating room.

"Zhang yuanniu, the position has not changed significantly." The director of the radiology department happily reported to Zhang Fan.

"Good! That's half the success. " Zhang Fan is also very happy, because it shows that his operation has hardly affected the fish bones in the fat man since the operation. This is technology!

The general surgery was done. The outside of the heart, layer by layer, like the film wrapped on the sausage, layer by layer, the doctors gently lifted it. We can't destroy it too much, because we'll have to put it on later.

To tell you the truth, it's really hard. Destruction is always easier than reconstruction.

This kind of destruction is too difficult. From what angle, it should not only be conducive to unlocking, but also be conducive to later repair.

Just like buying clothes for your girlfriend, you should not only make yourself look good, but also make it cheaper for other men, so it's too difficult!

Layer by layer, untie.

Finally, I saw the fishbone.

Because this thing has penetrated several layers of tissue, it has been polished by the tissue, just as it is made of jade, with the sharp edge of the tip facing the aortic arch. Zhang Fan looked, "it's already close to it. There are still errors in the inspection. Give me the magnifying glass. I'll see if I've got it. "

At this time, no one dares to pull out the thorn rashly.

The medical magnifying glass is not the kind that the old man holds when reading the newspaper. But the head cover type, just like the robot's eyes, can automatically retract.

With a magnifying glass, Zhang Fan looked at the distance between the fishbone and the aorta from

several directions.

"Shh! It's a big life if you don't get it! Pull out the thorn. "

To tell the truth, everything, a few hours of effort, is for this, not even three seconds, this is too simple. With a gentle pull of the tweezers, the fishbone like the full moon machete was pulled out.

This is too simple. Just like the greasy middle-aged man with all kinds of greedy, all kinds of greedy eyes and all kinds of careless hands and feet, as if he were a steel plate man, his pants fell down.

Pull out the fishbone. Zhang Fan takes it to his eyes and puts the tweezers on the instrument table with the fishbone " I'll show it to my family later! "

"OK." The little nurse was alive at this time " I'll measure how long this is. "

"Do you have a ruler?" Ma Yichen also got off the stage and was bored.

"Stupid, can't I measure with a syringe!"

Then the little nurse took a big needle and put it next to the fish bone, "I'll go, about eight centimeters! What fish does this man eat, sharks? "

Many times, it is easy to take off clothes and difficult to wear clothes.

Zhang Fan, they began to dress the inside of the fat man's chest.

This one, because it's all semi mobile tissue, such as blood vessels.

Blood vessels are not lying motionless. In fact, they are like a condom full of water, bouncing one by one. And the esophagus shrinks. Just be honest.

Therefore, there must be no large adhesion here. Once adhesion, the simplest thing is to swallow a mouthful of steamed bread. As a result, you can't swallow it!

So, layer by layer, Zhang Fan, they began to sew little by little with the smallest needle and the thinnest thread.

It's too hard.

This operation is really like a comprehensive consideration of a man.

We should have strength and patience, patience and courage. Courage is not enough, but also meticulous. Really, Shao Hua didn't take Zhang Fan so seriously.

After more than seven hours of operation, Zhang Fan's eyes were spent when he got off the operating table.

I don't want to drive anymore. For the first time, Zhang Fan said to Lao Chen and asked someone to take me home. I'm too tired today.

Not long after returning home, Ouyang, who had been naughty for a long time, called.

Zhang Fan is really afraid of another operation. Today he is really tired.

"Ha ha, let the finance department allocate funds quickly and decorate our dormitory. We must make it clean and convenient."

"What's the matter? "Here comes the expert?"

Chapter 1202

Earlier, Zhang Fan told his master that he was not satisfied because he hung the sign of the golden mean teaching hospital.

Because this brand is not free to hang, it not only has to pay some fees, but also issue a large number of documents. The qualifications of various doctors have to be jointly reviewed by the Ministry of health and the Ministry of education. To tell the truth, this brand is the most difficult to hang.

At the beginning, Zhang Fan shrank back a little. If Ouyang didn't have to hang this brand to save face, Zhang Fan might have hung up the Frontier Medical University.

But after hanging up, nothing happened for a long time. Zhang Fan thought this thing was really a face project. It cost so much manpower and material resources, but it didn't work at all.

In fact, this is his layman.

After the Spring Festival, after work, the Academic Affairs Office of the golden mean medical college called and said that the internship teaching was about to begin. After the students start school on Monday, there will be a class of fifth graders coming to practice tea vegetable, and please accept tea vegetable.

Medical students, this time is estimated to be the highest light moment. Junior began to intern, only to see but not to move, and the school made that hospital, you must go to that hospital. But in the fifth year, it's different. At this time, students often choose hospitals.

For example, the hospital arranged by the school is not good. He can choose the hospital by himself. At this time, as long as you are excellent, there are many hospitals you can choose, even the best hospitals in China.

But this highlight moment will be different after graduation. No matter how excellent an undergraduate is, the county hospital won't let you go as long as you don't go to graduate school.

However, the medical industry is slightly different from other disciplines. Undergraduates in other disciplines may be able to show their talents. And medicine is very difficult, because you haven't even finished learning the most basic knowledge. No matter how excellent you are, where can you be excellent.

Therefore, there is a sad joke in the medical circle. In other disciplines, even if they can't be used after graduation, they can be an old bird in six months, while medical students have to wait three years to grow hair (rotation) if they want to be an old bird. After graduating from other disciplines, they are almost the top talents in the industry. After graduating from the medical doctor, I have to change the dressing for the patient with a bending plate and start from scratch.

However, several schools are special. Their undergraduate students are often more popular, not that the hospital robbed them, but that their tutors robbed them. For example, there are not many students in Xihua's stomatology and medical undergraduates in Northwest China who can impress the master's tutor, and Xihua's stomatology is one.

There are several military medical colleges and universities in Yaxiang, but these people are self-produced and sold. To tell the truth, many undergraduate students in local medical colleges graduated and scolded their parents. Just like Zhang Fan in those years, they had no place to work.

It seems that everyone is particularly envious of the students in military schools. After graduation, there are units to accept them. Needless to say, the salary is still a lot.

However, in border posts and alpine companies, their figures are interspersed in the middle, and the Red Cross is particularly beautiful in a group of army green. Their development path has been arranged by the state.

After working as a company military doctor in the company, at the age of 35, you can go down the

mountain and leave the post to go to the front-line field hospital. Just like the military hospital of tea element, this kind of hospital does not emphasize how high-precision surgery you can do.

However, it emphasizes that you can deal with battlefield emergencies and your physique. Therefore, the tea vegetable army hospitals can't compete with the tea vegetable hospitals in their daily treatment business. It doesn't mean that they waste national assets, but that the country needs their dedication.

If you are particularly excellent or make meritorious service, you can go to the postgraduate entrance examination. Generally, you can go to a hospital of the general hospital after the postgraduate entrance examination.

To tell the truth, these military doctors run every morning and shoot live ammunition once every six months in the military hospital of tea vegetable. People don't know. People feel that their level is not good. In fact, they were also good universities with high scores.

It's not that they are technically incompetent, but that the country needs them to focus on different directions. This is the so-called silent dedication. Medical students, who doesn't want to be a knife, who doesn't want to be a national soldier like Lao Zhong.

But the country needs them to contribute! Of course, most people don't know these things.

This is also the reason why the tea vegetable hospital has almost robbed the business of the tea vegetable military hospital, and the tea vegetable military hospital will not be revoked, because this is the border.

If a fight breaks out one day, pull up the doctor of the tea vegetable hospital. To tell you the truth, there are not many doctors who can use it. First of all, not many people can pass. There must be many who have passed the battlefield rescue, but how many can pass the psychological quality?

But the tea vegetable military hospital is different. They can't do high-end surgery, but once they fight, they can safely rescue the wounded and escort the wounded down the line of fire.

There are also several special medical colleges, such as the golden mean and Shuimu. Many hospitals emphasize the first degree when recruiting, which is the so-called school after the college entrance examination.

It has been said that Shuimu and mediocre undergraduates are more expensive than masters and doctors. It's really hard to say, but other medical undergraduates are really bullish.

It is difficult for other students to go to digital hospital and intern in golden mean hospital and capital hospital. But they were lying in bed waiting for the school to arrange.

Therefore, when Ouyang heard that the average undergraduate and fifth year students would come to the hospital for internship, it was called excitement and pride.

The old lady went to the dormitory in person, the intern's dormitory.

"Redecoration, no, this condition is not good." In the past, I didn't see the old lady dissatisfied. I also said that the walls should be whiter and the windows should be pressed on the glass. Learning is hard work. I can't insist on this. How can I learn technology from teachers.

Now, the old lady frowned and said that the environment was not good. Chen Sheng has no choice.

"Ouyuan, it's too late. If there is a big change, there will not be enough time. " Although Ouyang is now the deputy secretary, the old people in the hospital still call Ouyang the European hospital, and only jumabek calls Ouyang the Secretary of the European hospital.

The old lady also deliberately called him Dean. And accentuate the word Ju.

"Then change the room between six people into two, install all the air conditioners and complete the computers. You Zhang Yuan still has money in your hand. It's better to do some business than other extravagant spending. Tell me about your Zhang Yuan, whose family will send new year goods in the new year, and the civil servants in a region will go on strike! That's not how you live with money! "

The old lady is still struggling with Zhang Fan's eating and drinking.

In the old lady's mind, don't you think the free vermicelli and free rice flour oil issued by the government are good. Why spend your own money.

"Well, the expert building doesn't have such high treatment. We..." Lao Chen didn't say anything. Who installs air conditioners in our Northwest except hotels!

"People are mediocre undergraduates. If you are a mediocre undergraduate, I'll let you Zhang Yuan install air conditioning for you!" Ouyang has sharp teeth and a sharp mouth.

Lao Chen felt bullied.

Mom, it's quite powerful for tea vegetable to have a moderate undergraduate every year.

.....

Ouyang is busy improving the intern's dormitory, and the students are about to smash the Academic Affairs Office of the medical department of Zhongyong University in the capital.

"Why should we go to the frontier! We're going to practice. Why aren't you responsible? "

Young students are not at all timid about the director of the academic affairs office. The students in this school still have confidence. If they were in other schools, they might not be so bold.

"Students, students, listen to me. Although the tea vegetable hospital is not well-known, it can be said that the equipment of others is first-class in China, nuclear magnetic resonance, the top in the world. Among all hospitals in China, others have the best tea vegetable.

ECMO, there is a critical respiratory ICU in tea element. There are several in it. Our whole golden mean hospital is not as many as others.

Siemens color Doppler ultrasound, experimental color Doppler ultrasound, don't say we are the golden mean. There is only one in Asia, just in tea.

You all know the special orthopaedic hospital. How about shuitanzi? It's powerful, but the director of shuitanzi also needs to go to the special orthopaedic hospital to communicate before taking office. And others tea vegetable directly and special orthopedic hospital jointly run a hospital.

This is not discrimination against you. It is not irresponsible, but the greatest responsibility and trust to you.

With the rapid development of medicine, you can feel the world's most advanced equipment in advance, which is ahead of students in other medical colleges. Students, stop making trouble and get ready! "

The director of the academic affairs office tried to persuade him. In fact, he couldn't figure out when the students of the golden mean needed to practice in the frontier? However, this is the decision of the college. He has to implement it if he can't figure it out, and he still has to find a way to get the students to agree.

"They don't even have an academician. Can they use these instruments?" I don't know which naughty boy shouted in the crowd.

The noise that had just subsided began again.

"Yes, yes, these are all state support for the border areas, and will they use them? Why doesn't XXX go to the frontier? Isn't he the president of the student union of the medical department? "

Boys give advice in the back and girls act like spoilers in the front. Anyway, they just don't want to go.

"First of all, I want to make it clear that you are indeed the favored son of heaven, but now throw you to academicians, what can you learn and understand? My classmates, it's time for you to accumulate clinical experience.

Go to the tea vegetable hospital. The tea vegetable hospital will pay attention to you. Can you practice in the capital? And this time, the personnel are randomly selected by the computer. There is no special target for anyone. I can pat my chest to assure you. "

I don't know which underground organization department spokesman in the Jianghu said that most of the students who said the golden mean went abroad.

I don't know whether it's true or not, but the director of the academic affairs office finally convinced these students by touching the sweat on his forehead.

The students reluctantly took the tea vegetable plane under the leadership of the team leader.

Chapter 1203

The biggest festival in China ended with jumping into the fire. Many people took their suitcases and embarked on a journey year after year.

The strange medical records of hospital diagnosis and treatment seem to have decreased significantly after jumping into the fire. Really, during festivals, hospitals often let some experienced doctors on standby. Although they don't need to come to the hospital to work, they can't drink or leave the urban area during the standby period, and their mobile phones remain unblocked 24 hours.

Because there are few experienced doctors at the director level during the festival, sometimes it is really difficult for novice doctors.

For example, the fishbone operation handled by Zhang Fan and the wrist pricking operation for girls are really difficult for doctors, not to mention novices. Even the vice high school may not be able to guarantee that nothing will happen.

Therefore, when the festival is over, these strange cases will sleep down with the festival and wait for the coming year. Is this not enough medical publicity? There must be some reasons. China's medical treatment is greater than defense.

In fact, this is not the state has the final say, the defense can not get money, doctors do not pay attention to, and treatment is different, the treatment of various kinds of... So, often the higher authorities how to emphasize, is a multiplier thing, anyway, such things are hard to say, also can not say.

Compared with other cities in Northwest China, the climate of tea is quite distinct in four seasons. Three days after the Spring Festival, the weather seems to have changed leaders. It is obviously hot. On the

first day of the new year, Mingming still wears down clothes. Some beautiful girls, such as Jia SuYue, also wear leather pants to show the height of their gluteus maximus.

But after fifteen, it's obvious that it won't work. If you wear leather pants again, you'll realize prickly heat.

The spring rain came with the warm and humid air flow of the Indian Ocean. It landed in the valley basin of tea. Standing on high buildings, it was faintly green in the primeval forest from a distance. The rain in spring is not big. It is cold but not ice on the face. The moisture brought by the rain makes tea vegetarians feel a moist feeling of returning to the earth in spring.

After 15, Jing Shu went to the magic capital by plane. Zhang Fan didn't care to send her sister off. It was sent by Shaohua. On the way to the airport, Shaohua gave Jingshu the key to the house of magic capital. "This is the house your brother bought in magic capital. Don't live in the dormitory on weekends. It's more convenient to take a bath in the house. I've done everything in the house of magic capital."

Zhang Fan didn't explain this, and he didn't care about it. Of course, it's hard for Zhang Fan's parents to say. After all, now Zhang Fan has a family, but Shaohua thought of it.

"Sister-in-law, school is convenient for everything. Besides, you are not in the magic capital. I'm alone in the empty house. I'm still afraid."

Jingshu doesn't want to take the key. After all, it's my brother's and sister-in-law's new house. Even if my brother doesn't live, my sister-in-law doesn't live. What's it to live in first, girl.

"You....." Shao Hua pinched Jingshu intimately, which was not too obvious baby fat. "Your brother and I are only your sister. What are you worried about? Don't worry. Do you think your sister-in-law is so small? I'm sad.

Be obedient. Take it. I know the weather in the south. It's hot. Take a bath and wash clothes at the weekend. The washing machine at home can dry. Without conditions, I can't help it, but with conditions, I have a house and don't let you live. I don't know. I thought your sister-in-law wouldn't be a man. "

"Sister in law!" Jing Shu lies in Shaohua's arms.

After all, they are very old. Shaohua is really taking Jingshu's sister, and Jingshu is also sensible, so it hurts Shaohua more and more to take Jingshu.

But in a word, Zhang Fan's income is very objective. Old people often say that poor couples are sad about everything. Are those haggard women really ignorant? They are really born like this. No, they also

have to calculate their family life. They are old and young, and they also have to eat and drink.

Therefore, sometimes, what makes a person look disgusting is not others, but the responsibility and pressure of life.

After seeing Jing Shu off, four old people in Zhang Fan's family drove their car Santana nonstop and left the city for the farm.

Last year, the two old men vowed to make a career. This year, it was much more stable. Everything was dominated by Shaohua, and they didn't think about how to do it. After being severely beaten by the society, I have gained insight.

Sometimes, every line is like a mountain. Age does not mean experience.

They went to the farm in a hurry. First, when they came to the farm in spring, what should be planted and what should be raised should be raised. In fact, Zhang Fan didn't agree to let the old men and women work so hard, but he couldn't stop it! I couldn't help it. The second is that the old men and women want to create a world for Zhang Fan and Shaohua.

Now, especially Zhang Fan's mother, is eager. Even Shaohua sometimes brushes her teeth and hiccups. Like an eagle flying down from the sky to catch a chicken, the old lady rushes to Shaohua and stares at Shaohua. Although she says whether she is uncomfortable, whether she has a cold, and whether she hasn't rested well, she is eager to look at Shaohua's stomach, More obvious than the urge in the mouth.

Shao Hua actually wants to get pregnant.

Because one of her distant cousins got married at the age of 30 and had children at the age of 33, but when she got old, she was quite tired and the children played. She couldn't stay with her, the children made trouble, and she didn't have energy. Therefore, with the change of Zhang Fan's position, relatives who hadn't contacted before gathered around.

Although the relationship with my cousin is far away, what people say is right. In other people's words, give birth to children early while you are young, and you can play with them when they play. When the children have had enough and grow up, you are not old.

And now, like her, she can't accompany her children to climb a mountain. The child went to a naughty castle. She sat for several hours and felt tired. She had to rest for a day, so it was the best time to have a child in her early twenties. When I was thirty, I couldn't keep my body down.

Zhang Fan also wants a child.

But sometimes it's really uncontrollable and can be controlled. Zhang Fan controls everything. For example, he doesn't smoke or drink. Zhang fan does well. Closing mountains for afforestation is like closing mountains for afforestation. But some things can't be controlled if he wants to control them.

For example, during the rescue, the patient needs CT and X-ray. Zhang Fan is the leader. He can't say, brothers, you go up. I want to close the mountain to raise trees and have children. I'll hide.

This is not the case at all. For example, Zhang Fan is not the Dean, but an ordinary doctor. After greeting the director in advance, at this moment, the director will say: Xiao Zhang, you go and hide.

And Zhang Fan is now the boss of the hospital. No one has sheltered him from the wind and rain. Especially in this kind of loss, if your leaders do not rush ahead, the consequences are often quite incalculable.

Especially in this special medical industry, once your leaders lose their hearts, it will be a big trouble. At the critical moment, you can't even take anyone out.

Because everyone knows that you are the kind of person who works hard and marries you with a leading wife next year.

Therefore, Zhang Fan's opportunity to have children has been delayed again and again. This is also a common phenomenon among many doctors in the hospital, especially in some departments, such as intervention and orthopedics. If you want to make some achievements, you have to sacrifice. If you don't sacrifice, unless your father is the president.

Ray or something, like some decoration things, it's unique to make men's bullets. If you don't pay attention, you can get you a child without * *. It's OK. As for leukemia and so on, they are all small means of others.

.....

There are not direct flights from the capital to tea vegetable every day. In the past, there was no direct flight. Now, because of tea vegetable hospital, it is no longer a small plane. Therefore, the mediocre college students who came to tea vegetable internship this time did not ride a large bus from the bird market as Zhang Fan did in those days, and their waists were about to pop out.

A few hours later flew the tea from the capital, and Zhang Fan took a night's ride from the bird market to the tea tree. Then he was in the dark at the speed of repair. The car smelt all kinds of stink, odour and odour, and then the car was dancing like three.

Of course, the first comers feel that the latecomers enjoy happiness, while the latecomers may not feel that they enjoy happiness.

After taking off from the capital, the more the plane flies to the west, the colder their hearts become. Looking down from high altitude, there are continuous bare mountains. Under the yellow earth, there are mountains except mountains.

"You say, what will you do in the future?"

"Cold, anyway, we mean Ben Shubo's continuous study. We stick to it for a few months and go back. We can't make it too stiff with the school. After all, we have to mix in school in the future. I heard this time that those who go to the West are machine-selected. We're just unlucky."

These are two boys chatting together.

"I said I wouldn't let you come. You have to apply. It's not necessary!" A girl with long hair is OK. It is estimated that she will float like this in college. When she goes to work in the future, she is estimated to be rolled up or cut short. Hospitalized dog, I don't have time to take care of your hair.

"You've come here. Can I not come? I'm a man anyway!" A naive young man vowed to his girlfriend that he was afraid of his girlfriend's hardship or that he could only spiral with his right hand. Anyway, what he said was definitely not what he thought.

It's not hair distribution!

"It's said that there is no water in the northwest. Some people only take a bath twice in their life. What do you say? I don't want to go. I have to go! Is this thing enough? I don't know if there is a supermarket over there. I heard that the hospital will arrive in Stan country 50 meters ahead! "

A little girl, on the other hand, was holding various lipsticks and moisturizing facial mask she bought.

It's 50 kilometers, all right.

"I heard the girls over there are beautiful! Good figure! "

"But there is body odor!"

"What else are you doing? Uncle Qian likes it. Don't you like it? "

These are two talkative single dogs. Although they seem to read countless women, they are now in their fifth year. They are still in medical schools with more girls. They can only fight with no brothers. To put it bluntly, they have great strength in their mouth.

Anyway, there are few optimistic about this internship.

The teacher who led the team was also helpless. He thought that China was really big. If he flew East for so long, he would probably arrive in the capital of Marubeni.

.....

Tea vegetable, Ouyang wants Zhang Fan to go, but Zhang Fan won't go.

Ouyang had no choice but to go by himself.

"It's more and more outrageous now. How can I do it after work? I'm so domineering!" Ouyang angrily scolds Zhang Fan on Zhang Fan's cool Luze. Lao Chen drives Zhang Fan's cool Luze to take Ouyang to the airport.

Now Ouyang feels that he has upgraded his brand. The A4 of old Audi can't match her. Zhang Fan matches her with a car, and she feels reluctant to give up.

Therefore, this time we should save face, and then because Zhang Fan was not obedient, we directly expropriated Zhang Fan's cool Luze.

Lao Chen knows that he can't interrupt at this time, otherwise he will be scolded.

Ouyang is quite a person who stresses specifications, rules and equivalence. This time it was a moderate college student, so the old lady went to the government to borrow Koster, but the government was reluctant to borrow it, because it was a student after all. These cars were not likely to be used by ordinary bird market cadres. They were not expensive cars, but implied value.

But now Ouyang's temper is getting bigger and bigger.

If you scold Zhang Fan in person, it doesn't mean you don't scold the government in charge of cars in person, so the sharp toothed Ouyang took several Kosters and sat in Zhang Fan's cool Luze to meet people at the airport.

Chapter 1204

When the plane flew over the white Tianshan Mountains, the students on the plane began to shout. It's not that they haven't seen the world, but because they were too depressed for several hours. Take off from the capital and fly to the West. It's either desert or next door, or next door or plateau. To be honest, the color of earthy yellow really depresses them.

But after Tianshan, it's different. The first thing that comes into view is a piece of green water, which is inlaid around the snow mountain like a gem. To tell the truth, the last tear of God is not shocking when viewed from the ground. It is just a small lake, that is, the water is blue or green under the reflection of the snow mountain.

But looking from high above, it's really different. It is surrounded by thousands of years of snow. Suddenly, such an eye popping lake emerges from a group of alpine snow. It is really, absolutely amazing.

Then, after crossing the lake, you enter the river valley. Obviously, the color is different. There are green everywhere and the terrain like the mouth of a pot. It's like suddenly entering the fairy tale world and suddenly feeling bright. Or into some high vegetation countries in northern Europe.

All eyes are dark green. Although this color is not as bright as emerald green, it is particularly comfortable in a group of snow mountains. The buildings in the city are like in this lush forest. Although they are not called a metropolis, they just give people a feeling of being outstanding.

"It is said that tea is from the south of the Yangtze River beyond the Great Wall, and there are primitive forests around the city." This is a classmate who has made a strategy.

Everyone was disappointed at the beginning, then saw the despair next door, and finally was a little amazing. It really made people feel ups and downs.

The plane circled and landed at the tea vegetable airport.

After getting off the plane, the feeling from super metropolis to small countryside is particularly obvious.

When in the capital, the teacher leading the team shouted again all the time to keep up with the team, keep up with the team, and those who want to go to the bathroom must say hello in advance. Although they go to school in the capital, to tell you the truth, if one accidentally gets separated at the capital airport, he will get separated.

Because there are too many people.

When it comes to tea, it's different. You don't have to worry about losing it at all.

There are not many tourists. The small airport is not much bigger than the cement basketball court. There is a glass gate in and out of the waiting hall. You can't get lost if you want to get lost!

However, because of the impact of the Gobi desert, young men and girls have not lost much. After all, the air they breathe after getting off the plane is quite good, which can't be breathed in a big city in a dream.

"Wow, look, look, the tea vegetable ground girl is so beautiful. Nice figure! "

"Well, your height estimates that she hugged you. People are almost one meter and seven or so. How tall are you?"

After all, they are young people, and they don't have to stay in tea in the future. Everyone is not so lost as expected.

"Hard work, hard work, tired all the way. I'm looking forward to the stars and the moon in the hospital. Finally, I'm looking forward to you. Get in the car and get to the hospital later. Even if I get to the hospital, I'll be home!"

Ouyang is rare, just like his grandmother, smiling so kindly.

Speaking of people, Ouyang didn't expect that the hospital would be qualified to welcome students of the golden mean to practice.

Yes, these students of the golden mean may not be able to become leaders in the industry in the future, but the probability of becoming leaders from them is absolutely high. What does this represent, this represents talents, and this also represents the current achievements of tea vegetable hospital, which is recognized by the state.

Is Ouyang proud? She must be proud. The proud old lady is no longer compared with other hospitals in chasu city. She is proud of several other provincial hospitals in niaoshi city. Her benchmarking object has become a provincial and ministerial dual management hospital.

Her heart is getting bigger and bigger.

Originally, she wanted to invite boss chasu to speak at the welcome meeting, but boss chasu didn't know whether it was true or false. Anyway, he said he was going to the bird market for an important meeting. The leader in charge of health wanted to come, but Ouyang didn't invite him.

The teacher led the team to Zhang Fan's cool Luze, and the students to Koster. The teacher was shocked in the car.

For the tea vegetable hospital, he took time to read the documents issued by the school on the plane. In fact, he didn't care a few days ago. As the saying goes, good Kyoto people have seen the world.

But when he got to the place, he really felt the power of the tea vegetable hospital in this area.

First of all, the Deputy Secretary of the hospital drove the motorcade directly into the airport. The students still don't realize this. They think that the management of the small airport may be relaxed, but he knows very well what this is, which represents privilege.

Although people's airport is not much bigger than the basketball court, you can tell others not to mention the team. You can't drive a motorcycle. Especially in such airports on the border, you're lucky if people don't beat you into a sieve.

Look at the team's car bright, red card cool Luze. Since the state's regulations on bus management came out, vehicles with red signs can't be seen in the capital. They are either warriors or cheetahs. Where can you let the Deputy Secretary of your hospital hang a red card on the street, and the traffic police salute you.

Looking at Koster, although he didn't go up, he knew when he greeted the students to get on the bus. The decoration of this car is very similar to that of Koster who came to the school to inspect before.

What does that mean?

It means paying attention to them, but it also means that the hospital or the deputy secretary is very powerful.

Therefore, from the beginning of carelessness, after waiting for the bus, the teacher leading the team sat in the back seat humbly and carefully, straight up and chatted with Ouyang in the back seat.

People in the capital, although they are university teachers, they are leaders. They are probably not professors. But people have seen more. They have seen more before they understand more.

The students on the bus are missing. It's a change of people. They're not excited, but even more lost.

"Students, do you think the specification is a little high? Does the hospital borrow Jingzhou's attention under the name of Liu Bei?"

After all, it's the golden mean. If you don't think you're a dish, you forget yourself.

If Ouyang were an ordinary receptionist, they wouldn't think so.

But now, these specifications, this treatment.

Think again, it's just an undergraduate. Why should this leader be like this.

Everyone talked in the car, and some paid attention. If he really wanted to be forced to stay, he would run away and go back to school first.

Children who don't go out of school are children. Sometimes they are mature and terrible, and sometimes they are childish and lovely.

When people think this specification is too high, they dare not speak more when they arrive at the hospital. They are deeply afraid of being appreciated by the leaders.

Between the motorcade and the hospital, a red banner dozens of meters long was hung on the hospital building, "warmly welcome the students of the golden mean university to come to our hospital for internship."

"Warmly celebrate the successful admission of the first batch of interns of the golden mean University!"

The hospital's inpatient department and outpatient building are full of banners. If the administrative building were not too broken and too low, the old lady would have to be full in the hospital building. It's like the capping and opening of the building. The colored flags are fluttering, and it's almost noisy.

When this banner is hung out, the effect is also obvious.

"I'll go. Is the tea vegetable hospital so awesome now? The mediocre students have come to practice. Darling, the tea vegetable hospital is a cow! "

"I'm going to the bird market for surgery. I didn't expect that our hospital is so powerful now. I won't go. I'll go to the city hospital to register today!"

The citizens who came and passed looked at the red banners. For a time, the tea vegetable hospital became the talk of the citizens after dinner. This wave of advertising was steel.

Of course, there are also unhappy.

"There's nothing to show off, just a few students. What's the show? As for you hanging such a big banner. Ouyang must have done this. As for you, she is naked and shows off. She is a villain who gets ahead. She is too special to bully others! " The president of Shihua hospital looked at the large red banners hung up in the tea vegetable hospital in the distance and was almost crying.

Ouyang doesn't know. If Ouyang knows, the European Court will definitely turn its eyes and say: bully people, I don't hesitate to bully you!

"Are you clear? No digital school, are you sure? She has brought all the mediocre students to practice. How do I know? I'll go. That old woman hung all the red banners in the sky. You say how do I know? Ask quickly. In a few days, the students of the digital school will get them for her. Ouch, I have to have a quick fix. This old woman has a black heart and a hot hand. She has to guard against it. Last time, she almost robbed me of all the military physical examination work, How can I be such a difficult Dean! "

The president of the tea element digital hospital called and covered his chest. This ignorance of fear is fear.

At the gate of the hospital, Zhao Jingjin, Luo Zhengguo and Yan Xiaoyu all attended to welcome him.

Really, this kind of treatment is the golden mean. Students in Shuimu school can realize that it is difficult

for other students to enjoy it.

But the moderate students are not very grateful. It's like the single man in the village standing in front of the widow's door shouting: death of drought, death of waterlogging!

Ouyang asked other leaders to speak, and other leaders humbly asked Ouyang to say something.

Ouyang is not modest. He stands on the podium in high spirits. From the history of the hospital to the present of the hospital, he talks about the hype, but the students below don't care much.

The atmosphere was not as warm as Ouyang thought.

When Ouyang felt a little embarrassed, the rescue plane of tea vegetable hospital took off.

This is definitely not arranged by Ouyang. Who is Ouyang? He is the one who will suffer if he doesn't take advantage. How can he do this.

This is a family in the county who made a rescue call, cerebral hemorrhage, and the rescue plane of tea vegetable hospital took off for rescue at the first time.

Ouyang's speech didn't resonate with everyone because the students didn't intend to stay.

But when the rescue plane took off, everyone was shocked.

"I'll go, Agusta 139! That's great. There are so many planes. " Some people who have seen the world burst out the model of the plane in one bite. When this thing came to the hospital where the local tyrant gave tea vegetable, none of them, including Zhang Fan, knew it.

The students don't care to listen to Ouyang. They all looked up at the large rescue aircraft, their eyes full of hot eyes.

"Well, don't worry. They are all students and haven't seen much of the world." The teacher who led the team gave an embarrassing explanation and inadvertently looked at the plane in the sky.

Make complaints about the nouveau riche: "too chicken, the whole family is full of capital. There is one count, which hospital has this, do they raise it?"

Ouyang is proud now, hum! You see, I have details, one by one!

Chapter 1205

Although Zhang Fan and Ouyang step by step to the position of president of tea vegetable hospital, their ideas are actually very different. For example, although Lao Huang and Ouyang are one after another, the concept of Ouyang and Lao Huang is definitely not as different as that of Zhang Fan and Ouyang.

But why can Zhang Fan still get Ouyang's full support? First of all, Zhang fan can almost be said to be the continuation of Ouyang's career life. Why is Lao Gao the most powerful oppressor in Ouyang among several deputy positions? It is not Lao Gao who doesn't pay Ouyang, but Lao Gao who is suspected of robbing her successor.

Therefore, Lao Gao was forced by Ouyang from an orthopaedic expert on an operating table to an administrative cadre who deals and quarrels with the government every day. In the adult world, right and wrong are not important. What matters is what you want.

Moreover, Ouyang and Lao Gao have the same idea. Zhang fan can support the hospital.

As for the working concept, Ouyang pays more attention to hardware. In her opinion, it's easy to find someone, so it's very painful for Zhang Fan to spend money on the staff of the hospital. Isn't it good to buy a color Doppler ultrasound with so much money.

In fact, in other words, Ouyang still didn't come out of the bitter days of that year. She felt that as long as there was equipment, nothing was a problem. In fact, the days when hundreds of thousands of young people went to the border from south to North will never happen again.

After all, times have changed.

Although the students of the golden mean came, they looked at the old lady as if she was picked up and arranged her life in person, and even didn't hesitate to spend money to build a double air-conditioned room. In fact, Ouyang is showing off and flaunting. People have problems, and the old lady's problems are just like those of that generation.

Like the crowd, like all kinds of sports, such as dancing, we should jump out of momentum. This is the brand that people created when they were young.

Zhang Fan is not. Although his family was not rich when he was a child, he has always lived in the working class, but after all, he has been quite rich in all kinds of materials. Therefore, Zhang Fan is definitely not as obsessed with the equipment as Ouyang.

Instead, Zhang Fan pays more attention to software. As for showing off and momentum, Zhang Fan prefers the post-80s generation. On the premise of respecting his superiors, he will also highlight his personality, but he absolutely doesn't like the crowd to do something big.

Why doesn't Zhang Fan pay special attention to the students of the golden mean? It's not that Zhang Fan doesn't love talents, let alone that Zhang fan can't look at others. If he can't even look at the students of the golden mean, he wouldn't have to hang the brand of others.

This is because Zhang Fan and Ouyang have one thing in common, that is, pragmatism. Ouyang attaches great importance to this intern, mostly to show off. If college students in the bird market come to practice, you can see if Ouyang will buy an air conditioner. It's good not to ask for accommodation fees from your school. You also want an air conditioner. Give you a slap. Do you want it or not.

Zhang Fan is not interested in this group of students because he doesn't like to show off, because almost 99% of these students are enrolled in this master's degree and doctoral degree. Even if you spend more time now, it's impossible for others to ignore the moderate master's degree and doctoral degree and come to you after graduation.

When people graduate with a bachelor's degree and a price, this small favor can't move people, so they come in the water and go in the water. I'm not hard. Even if I give you a tofu, you can't break it.

Therefore, when the old and new concepts are enlarged in the hospital, the medical staff in the hospital are actually stratified. Old doctor, although Zhang Fan is the boss now, Ouyang's words are quite weighty among them. The young doctors prefer Zhang Fan.

If this happens in other units, or between two leaders with less harmonious relations, this unit is definitely fighting for the sake of struggle, but it is different in tea vegetable hospital. Ouyang has tried his best to reduce his influence now.

However, where there are people, there are Jianghu. Ouyang's thorough thinking does not mean that others are willing. For example, some old directors think that Zhang Fan's generation is rising too fast. They are not ready for shift handover. These young people can't wait.

For example, Xue Fei, although he is now the deputy director of the emergency center, there is also a female director. But because of Zhang Fan's relationship, he has made great efforts to turn the emergency center of tea vegetable hospital from the affiliated Department of internal medicine to the Department dominated by surgery.

Everyone is right. It's just a difference in the cognition of this profession.

Therefore, after the students of the golden mean came, the old doctors began to look for rare cases.

They always felt that others were the pride of heaven and could not delay others, so they all started to look for rare diseases.

The concept of rare disease is not defined in China at present. According to the definition of the World Health Organization (who), rare disease is a disease in which the number of patients accounts for 0.65‰ ~ 1‰ of the total population. It seems rare and almost negligible, but all kinds of diseases add up to a large number. There are about 250 million to 500 million rare diseases in the world and about 20 to 30 million in China.

And in tea, not much, but can also be found.

"Zhang Yuan, the old doctors in the hospital are asking about difficult and miscellaneous diseases these days!" Chen Sheng quietly reports to Zhang Fan in Zhang Fan's office.

Lao Chen is almost the bag of the hospital. As long as Zhang Fan wants to know, he can almost find out. Sometimes, even if Zhang Fan doesn't ask, he will regularly talk to Zhang Fan about the situation of the hospital.

For example, what topics are popular in hospitals recently, who is getting married and what is the object. Although Zhang Fan goes in the left ear and out the right ear, with the improvement of his status, he has less and less contact with this kind of news. Although it sounds useless, in fact, this is also a basic grasp of the hospital.

"Oh!" Zhang Fan nodded thoughtfully. Interns have gone to the Department. They are all brought by the director himself. The average students still have cards. And these directors also spent a lot of thought, always thinking that these students should not underestimate themselves.

There is more or less a feeling of timidity.

"How many cases have you found now?" Zhang Fan asked after thinking.

"Several cases were found, but the diagnosis was not unified. One department said one thing. There's another one that can't be diagnosed! It's a bit of a joke. " Lao Chen said with a bitter smile.

"Ah! What happened? " Zhang Fan sighed helplessly.

At present, tea element has a place in the treatment of conventional diseases in the industry, but there are still too many deficiencies in difficult and miscellaneous diseases.

Many diseases are often difficult to diagnose. If the principle of a disease is clarified, even if it is more difficult, the doctor will come up with a way to deal with it. For example, at the beginning of the disease, the panic caused in Europe and America was absolutely super.

Especially some so-called nobles, some film and television stars, handsome boys and girls in the singing

world are going crazy. At that time, the HIV test made a lot of money. It was said that there was a particularly famous singer, who seemed to be called the Royal band or the Royal band. Anyway, it sounded tall. As a result, after the uncle died of HIV, it was said that half of the celebrities of the three islands went to do HIV.

When HIV was not thoroughly studied, as long as the diagnosis was clear, it was equivalent to determining the shooting date. But in a few years, there were various treatment methods. Although the price is expensive and can not be completely treated, it can delay life, just as shooting becomes death with a reprieve.

"It was a little girl in her early twenties who couldn't be diagnosed and treated clearly. She was only 60 kilograms, and the rise was only 1.5 meters. Poor appetite, intermittent abdominal pain. The inspection of all departments sat down, but they didn't find the reason. The patient sought by the director of gastroenterology is now uncertain and can't get down. He has applied for a large consultation in the whole hospital! "

The whole hospital has a big consultation. This is in a small hospital. It's nothing. Roar. The directors of all departments came. In large hospitals, it is very precious. A director has two or three such application opportunities a year, because the larger the hospital, the more difficult it is for the expert directors of various departments to get together.

In the past, the whole hospital consultation of tea vegetable hospital was very casual and applied when needed. But with more and more partners introduced by Zhang Fan, slowly Zhang Fan also found that not limiting the number of such applications was interfering with everyone's work.

Many experts have to go to the laboratory after work, so now the tea vegetable hospital is the same. For a large consultation in the hospital, first apply to the medical department, then the medical department asks the business dean to sign, and finally report to the Dean, who signs.

Then the medical department has to communicate with the directors and experts of various departments to determine the time, so it's quite troublesome.

"Are the checks complete?" After listening, Zhang Fan asked.

"Perfect. There is no abnormal examination except malnutrition and dysplasia! "

"OK, let's agree to the consultation, and I'll attend." Zhang Fan nodded and applied for a bookmark.

He is also curious about the disease.

On Tuesday, the whole hospital consultation began. Because the students of the golden mean are all taught by the director, the students of the golden mean are all present.

"What's the matter with you? Do you think the consultation at the tea vegetable hospital is useful? " The

moderate students gathered in the back of the conference room and whispered.

"I don't know. It's probably useless! Hospitals at this level are all political products. A frontier hospital has been promoted to a provincial hospital. Hey, wait and see. It's definitely all wheel talk later. " Another boy with eyes said disdainfully.

The old directors of the tea vegetable hospital missed this time. They always felt that the hospital had been upgraded and should be tall. As a result, they couldn't get down in the air. The students who teach are not as polite as they used to be.

But after Zhang Fan entered the venue, everyone was quiet.

"I'll go. The dean is so young. Funny! "

"You know an egg. He is a student of old Lu and the third generation of ancestral disciples. When I was on probation last year, I saw someone in the Affiliated Hospital of our school and was asked to have an operation!" A girl whispered to the others.

"Really, he was invited to the Affiliated Hospital of our school?"

"Why lie to you!"

Now, everyone has focused on the young Dean.

Chapter 1206

Authority and prestige. It is estimated that ordinary units will have a little prestige to employees because the boss pays wages. But this thing is too thin. For example, various resignation obstacles in recent years are the lack of welfare for employees by the unit or the boss, resulting in lack of authority and prestige. It's like, if you give money, it's always, and if you don't give money, it's an egg!

Hospitals, especially public hospitals, are a little more complicated. When you are the president, you may not have authority or authority. It is often that the directors of various departments have more prestige and authority, so if this result occurs, it is often that either the director is superior or there is a rough on the hospital president. The directors can't move, and then the hospital will be rotten, and then the experts will be lost. In the end, the hospital will become a high-priced pharmacy selling drugs.

Therefore, on the day before a major workday such as an ordinary ward round, the director or the dean will read with a book in the office. Sometimes this thing is not afraid of ten thousand, just in case. And reading is not only to deal with subordinates, but also to find some interesting problems. Of course, this interesting statement is difficult.

Especially when teaching students, doctors at higher levels pay special attention. Doctors and nurses in their own hospitals can't ask questions easily. Even if they ask questions, they won't ask questions when there are many people. The larger the hospital, the more obvious it is. Because in the workplace, there is a saying that the superior can make things difficult for you, but you can't make things difficult for the superior. Opinions should also be put forward in an appropriate and appropriate way. If the way is wrong, it will be a disaster.

The students who teach are different. They want to show that they want the leaders to pay attention to themselves, and then they can enter the hospital in the future. Some people want to be in the limelight. After all, there is still a difference between clinical and basic. Sometimes people can really ask the superior doctor for a side question. After all, students have not entered the workplace and have not been severely beaten by the society.

In the past, the quality of the students taught by the tea element hospital was average, and almost all the students from the medical college around the tea element hospital came to practice. As for undergraduates, they apply for tea vegetable internship alone, and they are still in order to enter tea vegetable hospital after graduation. Therefore, he is more careful.

These students are easy to take and rarely encounter amazing and gorgeous students. That is, when Zhang Fan transferred to another department, the old doctors felt that undergraduates were undergraduates. Because Zhang Fan, they are the first batch of college graduates.

Before Zhang Fan and his colleagues graduated, except for the college students in Ouyang, they were all junior college students. It can be said that the cultural and technological gap caused in those years was quite serious. It seems that there is little difference between undergraduate and junior college.

Other disciplines are hard to say, but there are considerable differences in medicine. The teaching materials for junior college and undergraduate courses are different, and the degree of difficulty is also different.

So when the junior college directors in their early years heard that they would bring the golden mean Ben Shubo continuous study interns, although they didn't say anything, they were still proud.

People, sometimes this thing can't pay too much attention to face engineering. If these old directors lay

a solid foundation for the students, they will not make the students feel that the directors are awesome, but they will not underestimate them.

After all, after many years in clinical practice, basic treatment is still quite experienced. Even if smoked with the "August 4th" disinfectant for decades, it still has the taste of GuZi hospital.

But the hospital has been upgraded, and they also feel that they need to be promoted. Otherwise, they seem to feel that they have lost their sense of existence.

Therefore, this time, the old directors secretly made a collection of difficult and miscellaneous diseases.

As a result, I got myself into the pit and couldn't climb out. Not only I couldn't climb out, but the internship students couldn't help looking down on them.

This is to show your weaknesses in front of your strengths.

Zhang Fan came and Ouyang also came. The old lady looked angry. But she couldn't say it. The old directors followed her and Lao Huang in the revolution. Sometimes Ouyang's heart hurts, but he can't scold it.

Ren Li, chief executive of cardiovascular and respiratory system, Yan Xiaoyu, chief executive of digestive and immune system, Zhao Jingjin, chief executive of hepatobiliary system, Luo Zhengguo, chief executive of extracerebral vascular system, Zhao Yanfang, chief executive of surgical research, Professor marukuo of gastrointestinal cooperation, Li Cunhou of golden mean dermatology and director of digital academy also came. An orthopaedic expert sent by the special orthopaedic department to supervise the work of tea element also came.

Although there are no academicians, the family background of tea vegetable is already very strong. It can be said that these individuals can no longer find the second batch in the frontier.

"I'll go. Dr. Zhao Yanfang is here too?" Several of the interns planned to transplant in the future. When they saw Zhao Yanfang, they were stunned.

Although Zhao Yanfang is neither an academician nor a professor of that university, she is an aunt in the small circle of transplantation, because her teacher is the ancestor of transplantation in China. In the early years, China's scientific research strength was not good, so we didn't pay attention to this one. Now it's different. But Zhao Yanfang has a bad temper. If she has to say, she is a little stubborn and doesn't understand current affairs.

Before she came to tea, other universities loved and hated her. Moreover, other people's senior brothers and sisters are already the peak figures in China's transplantation. Major hospitals really have a feeling that they don't provoke but face up. Anyway, if you want to come, I'll find an excuse to say that I'm not going to do it.

So, when I saw Zhao Yanfang, several people who planned to transplant were excited.

When Li Cunhou appeared dissatisfied, most interns knew him. He is now a leader of new skin materials in China and a big winner of burn department.

"The laboratory is busy. Why did you call me here? I asked you to help in the laboratory. You pushed and blocked. Look at me. I came as soon as the hospital called!" Lao Li was quite dissatisfied with Zhang Fan, but he couldn't live without Zhang Fan, so when he saw Zhang Fan, he had a nose and no eyes on his face.

"That is to say, let you support the field. When I asked them to call you, did I really let you diagnose the disease? What do you know about skin burns? Just sit down and go back! "

"You..." Lao Li glanced at Zhang Fan obliquely and didn't talk to Zhang Fan any more.

"Let's not tell him what he knows! A carpenter, does he know high technology? " The director of the digital Academy was also dissatisfied with Zhang Fan.

Because Zhang Fan is partial to clinic and doesn't care much about skin burns, they are united to give Zhang Fan a face today.

Li Cunhou owes Zhang Fan, but others' digital general hospital doesn't owe Zhang Fan, and Zhang Fan and tea vegetable hospital still owe others' digital general hospital. Therefore, Zhang Fan is quite polite to the director of the digital general hospital. Eating people's mouths is short and holding hands is short. There's nothing wrong with that.

"Ha ha, director, I'll help take some students later. Don't leave these students to waste our tea vegetables!"

Zhang Fan took these people, not to show off, but to let them take students. Although these people now take doctors, have not taken undergraduates for many years, and they are a little overqualified, Zhang Fan doesn't think so. This is the first batch of interns to tea vegetarians.

If the first shot is not done well, as soon as the golden mean University regrets taking the brand, will old lady Ouyang still live!

This is like flying too high, we must excrete more, otherwise falling down will become a tragic story of yellow shit.

I didn't see the colored flags fluttering outside the tea vegetable hospital, so I had to stand on the roof and shout.

To tell the truth, sometimes Zhang Fan doesn't understand what Ouyang thinks.

You said that the old lady, usually do not buckle, do not buckle to a certain level. Welfare, how to save money, how to come, government bargains, when she was in charge, she filled the storage room of doctors and nurses.

In addition, at least he is also the president of a third-class hospital. His car is A4 with four circles from the government. In other words, the shell looks like a car, but sitting in it is like sitting on a tractor.

Moreover, the old lady never eats more and occupies more for welfare housing distribution. In her words, the old man and I have a little girl to come. Why do you want a house? The light of the house is good now.

It can be said that she really doesn't care about food, clothing and accommodation.

But in terms of face, which is the abnormal pursuit.

What level of enjoyment, if your government gives something slightly wrong, such as the annual year-end meeting, her seat is close to her mouth, and she can catch up with you in the general office of the government and quarrel with you.

She has more emergency vehicles issued by the government than other hospitals. If she thinks it unreasonable, she will make trouble by patting the table.

Moreover, for the affirmation of the superior, the higher the affirmation, the more she attaches importance to it. It's like a very vain old lady.

But it is such an old lady who has created a very good foundation for Zhang Fan.

Without Ouyang's style of squeezing three Liang oil out of stones, the tea vegetable hospital has not developed so quickly. Without Ouyang's domineering style, all kinds of administrative workers in the hospital are enough for Zhang Fan to drink a pot.

Now, in the administrative hospital, none of them can resist Zhang Fan, because Ouyang has already sent off those who can resist, the former Secretary has kicked Ouyang away, and several powerful vice presidents have let Ouyang leave the hospital.

All those left are for Zhang Fan. Chen Sheng is now almost Zhang Fan's inner manager. Ren Li, what Zhang Fan says is what. Lao Gao, Zhang Fan's earliest bole, is still angry that Ouyang robbed his Qianlima. Lao Ju, Zhang Fan is kind to him. Although the situation of harmony and unity seems to be natural.

Without Ouyang's arrogance, there would be no peace now. Therefore, Mr. Mao said such things thoroughly. Peace is fought, not sought.

Therefore, in the past, Ouyang sheltered Zhang Fan from the wind and rain.

Now, it's Zhang Fan's turn to give the old lady the scenery she wants.

There is an old saying in China. Thirty years ago, we looked at the father and respected the son. Thirty years later, we looked at the son and respected the father!

The original scene of chattering and laughing in the venue was silent with the arrival of Zhang Fan with a group of people.

Even if you are the pride of heaven, you have no record.

And these big guys in the venue may not be able to reach their heights in the future.

Therefore, strength is dignity.

"Can you say something?" Zhang Fan smiled and whispered to Ouyang around him.

"I won't say, let me say something!" The old lady is the most unhappy.

"Hehe, you still have no confidence in us. What a big thing!"

Zhang Fan is relieved for Ouyang.

Ouyang glanced at Zhang Fan, but he didn't speak.

The old lady didn't speak. Zhang Fan nodded to Chen Sheng, and Chen Sheng began to preside over the big consultation of the whole hospital.

Of course, Zhang Fan won't say anything. There's nothing to say, nothing to emphasize and nothing to understand in this technology conference room.

One is one, two is two, what to do.

Chapter 1207

"The patient, a 22-year-old female with clear mind... Dysplasia and poor nutrition, went to the obstetrics and Gynecology Department of our hospital on February 14 with nausea, vomiting, abdominal pain and abdominal distention. No obvious abnormality was found after the improvement of relevant examinations and physical examinations in obstetrics and Gynecology, so the Department of Gastroenterology of our hospital was invited for consultation.

After consultation with the chief physician of gastroenterology department of our hospital, the patient's symptoms improved after giving antispasmodic and promoting gastrointestinal motility drugs. However, on February 16, the above symptoms of the patient worsened. After giving antispasmodic and promoting gastrointestinal motility drugs again, there was no significant improvement.

Therefore, after the patient was transferred to the Department of Gastroenterology, enteroscopy and gastroscopy were performed. Enteroscopy showed that there was obvious purulent mucus in the patient's intestine. Intestinal infection was considered. After giving anti infective drugs on the same day, the patient did not improve significantly.

Therefore, after three-level diagnosis and treatment, the Department of Gastroenterology decided to apply for consultation in the whole hospital. After reporting to the president, the president agrees, and the approver is president Zhang Fan! "

After Lao Chen picked up the microphone, he began to tell the patient's admission complaint and the diagnosis and treatment process, and the experts present already had a copy of the medical record and examination in their hands.

But with the examination and medical records in their hands, experts have begun to think about the diagnosis in their own mind according to their own discipline.

Ouyang looked at the report in her hand and put it down. In recent years, the old lady has either thought about the personnel structure of the hospital or fought with the contractors on the construction site. Professional cases, especially interdisciplinary cases, can't keep up.

"Have you ever seen such a case? Did you communicate with everyone before the meeting? "

"No!" Zhang Fan looked at the case and said softly.

Ouyang took a breath of air conditioning and his teeth were creaking“ You are too careless. If you can't get down today, you may lose your face and go to the capital! "

Ouyang is worried. After reading the case, Zhang Fan smiled at Ouyang, "it's all right!"

Then, I looked at the experts in the meeting and put down the cases in my hand“ Everyone has seen the

case. OK, now let's talk about it. Since it was first received from the Department of Obstetrics and Gynecology, the Department of Obstetrics and Gynecology will talk about it first. "

Zhang Fan nodded to several experts in obstetrics and gynecology.

The director of Obstetrics and Gynecology gently said a word to LV Shuyan, and LV Shuyan stood up.

"After the patient was admitted to the hospital, my department first determined that the patient was in non pregnancy." Many people are particularly curious when they check in the hospital. When a girl reaches childbearing age and enters the hospital, whether it's a greasy general practitioner or a stout orthopedic doctor, after asking what's wrong with you, she will ask whether you're married or whether your menstruation is normal.

It's like parents urging marriage during the new year. In fact, this is a medical provision. School-age women must ask whether they are pregnant, because many tests and drugs can never be used during pregnancy.

"Although the patient's menstruation is intermittent, various data show that the patient's irregular menstruation is not the direct cause of abdominal pain, abdominal distention and nausea, but the patient's abdominal pain and abdominal distention affect the patient's gynecological system..."

LV Shuyan is practicing. The signs of patients are quite detailed. The gynecological director nodded with satisfaction.

If Zhang Fan is Ouyang's heart, now LV Shuyan is the crown prince of gynecology. At present, LV Shuyan is the director's assistant. Although she does not have the title of deputy director, others are responsible for the current scheduling, business learning and emergency surgery of the Department.

"This elder martial sister is so handsome and cold!" Among the interns, several single dogs secretly thought in the bottom of their hearts.

After the introduction of Gynecology, the introduction of Gastroenterology.

.....

After the departments finished speaking, the experts began: "although I didn't see the patient, I think we can continue to observe. Ward rounds three times a day can be divided into ward rounds every two hours, and clues will always be found before and after her onset."

Experts from Marubeni state expressed their opinions. In Marubeni, the number of doctors managing beds is small. Therefore, they pay more attention to clinical observation.

"Infectious white pus was found in the intestine. Although the specific cause of infection cannot be

determined at present, we can make a definite diagnosis by laparotomy."

Zhao Jingjin enlarges the move.

"No, the patient's current nutritional status obviously does not support the operation. Moreover, at present, the focus of the patient is not the infectious liquid secreted by the intestine, but what causes her obvious nausea and vomiting. "

Yan Xiaoyu opposed exploratory laparotomy.

This is the biggest difference between internal medicine and surgery. Surgery is simple and rough. If you can't, open your stomach and see. Internal medicine pays attention to mechanism and principle.

Internal medicine can't convince surgery, surgery can't convince internal medicine.

"Well, based on your current suggestions, my opinion is that we should conduct another systematic physical examination."

"OK, I agree!"

"I agree!"

.....

"Hey, there is still no master who can make a final decision. If the disease is in our affiliated hospital, the boss of the digestive department can see it at a glance."

"I don't think so. I also saw this patient yesterday. I didn't have a clue at all, that is, I occasionally had irregular nausea and vomiting. My first reaction was pregnancy. After excluding pregnancy, I couldn't think of any other disease. All checks are normal! "

Several students are also discussing together.

Comprehensive treatment is becoming more and more popular in the world. However, the cost is too high. Some hospitals in China have also set up comprehensive departments, outpatient and ward, but the effect is really bullshit.

If comprehensive diagnosis and treatment are combined occasionally, the effect is quite powerful. But once it becomes a normal department, it will be in trouble. Either a group of mediocre doctors in this discipline hang out together, or a group of big winners quarrel every day.

At present, comprehensive diagnosis and treatment is better, that is, it is slightly better in pediatrics, and so is the development of comprehensive diagnosis and treatment in other disciplines.

"Well, at present, the general direction has been determined, that is, the gastrointestinal motility is insufficient. Now let's have a consultation with various departments. President Chen, please arrange a teaching classroom to explain to the patient's family members. We'll let the experts check the body on site. "

"It's ready, and the family agreed." Lao Chen has long been ready. People can become evergreen with this working attitude.

In the large teaching classroom, patients lie on the diagnosis and treatment bed accompanied by nurses.

Although the girl is in her early twenties, her height, weight and development look like a teenager.

Originally, the girl was afraid. Now she looks at dozens of people around her, and there are a group of young guys who look so young, which makes the girl afraid and shy.

To be honest, Chinese patients are really good. If I were abroad, people's patients would ask that I have privacy and can't let so many doctors come.

The little girl, although shy and a little scared, still took off her sick clothes and leaked her white abdomen and chest.

Zhang Fan looked at the girl's body and was filled with emotion. It is estimated that this disease has afflicted the girl for a long time.

Because the girl is a little delicate, she looks obviously like a little doll's figure, and her chest development is not comparable to that of some little fat people.

Physical examination begins.

"I'll come, everyone added!" Zhang Fan originally wanted all experts to show their hands to these interns, but when he saw that the patient was like a kitten, he trembled and suddenly said.

"Don't be afraid. We are all doctors. We will find your cause and make you healthy." Zhang Fan said softly.

The girl seemed to believe it. She bit her lips and nodded gently, and her originally tight muscles relaxed.

"OK, curl up your legs, yes, that's it!"

Physical examination begins

Chapter 1208

When Zhang Fan wanted to have a physical examination, the little officer under the medical department of the hospital quickly took out the SLR camera with Lao Chen's permission. He wanted to take some photos of fan's work inspection, and then write some so-called hospital quality articles.

He frowned when he saw the little officer holding the camera. The little officer hasn't found anything unusual yet, but Lao Chen has understood it. The didn't like to let him take pictures. Although Lao Chen didn't know why Zhang Fan didn't like it, Lao Chen didn't need a reason. He inadvertently stopped the little officer from taking pictures at the first time.

"You all move forward. The physical examination of Zhang hospital is quite standard." Professor Li Cunhou said to a group of interns. Although none of these interns are familiar with, they are all from the same school and have a little familiar face. Moreover, his position is there. Although he is not a direct teacher, he is still a professor of the golden mean medical school.

The interns who didn't care much, especially several students who wanted to develop in burn, quickly gathered around Zhang Fan and the patient for the first time.

In fact, for Zhang Fan, because he is not prominent academically, nor is he a professor, and he is still young, the students are not very convinced. They always think that Zhang Fan, the president of the provincial hospital, is too strange.

Looking at Zhang Fan, they always feel that their future is definitely better than Zhang Fan.

Zhang Fan heated his hands under his armpit for a while, and then came up with a stethoscope specially made for him by Olympus, the ball country.

"Don't be afraid. It's all right. I'll check it for you. It won't hurt." Zhang Fan smiled at the patient.

To tell the truth, doctors now laugh too little at patients. They don't know whether the hospital pays less money or they are cold-blooded.

However, when Zhang Fan faces the patient, he will laugh if he can laugh and laugh when he sees people. Although he is not very handsome, he can make the patient feel a little safe.

Physical examination, the doctor's basic skills. It is always one of the skills that doctors must master, but this thing, once it comes to technology.

Absolutely different.

.....

Old man Wu in Mordor met a difficult thing today. The old man called old Lu, the green bird, "Hey, I'm old. If I were ten years younger, I wouldn't hesitate a little today. "

"Yes, I knew when I shook my hand. It's time to put down the knife. Elder martial brother, what are you going to do this time?"

Why can old man Wu in China be called the second person in the liver and gallbladder department? The first is old man Qiu. First of all, not to mention others, the oldest liver tumor patient in the world underwent surgery. The old man did it. The world's largest liver tumor volume was removed. The old man did it. The Chinese liver map was done by the old man.

Just pick one of them and put it on other doctors. It can blow things for generations. Even now, surgery for huge liver tumors is still not done much, and the death rate is too high. Ordinary hepatobiliary doctors dare not do it at all.

A tumor on the liver. This thing is particularly troublesome. Small tumors and large tumors are qualitative changes and quantitative changes. They often open their stomachs, see the tumors, and then sew their stomachs carefully. For most doctors, laparotomy for huge tumors is a lonely exploration.

Even now, the international mainstream means for huge liver tumors is to use intervention to block all the blood vessels near the liver tumor, and then starve it to death.

However, what is the most thorough treatment that is not thorough is to complete the resection.

Old man Wu received a patient when he went to the clinic on Monday. The patient was young. She was a 15-year-old girl, but when the child appeared in front of old man Wu, she was like a pregnant woman waiting to give birth.

How many hospitals did the family toss around, and how many hospital doctors and experts shook their heads and dared not take over. I didn't know where to hear the name of old Wu, and then the family rushed to the magic capital.

When old man Wu had a huge tumor, he was only about 40, just in his prime. But now, it's almost 90. Seeing the family kneeling on the ground crying and begging, old Wu felt bad.

If Mr. Wu had a little love for feathers in his heart, he really wouldn't take over. But the old man took over.

Really, as long as he shakes his head, he will be sentenced to death for the child. The old man shakes his head whether in China or around the world. Even if it ends, there is no hope.

The old man answered.

The family was crying with their children in their arms. They had been seeking medical treatment for several years. The sadness could not be expressed in words. They were shocked by countless blows, but the child still had no doctor to take over.

Now old man Wu has taken over.

"I tried yesterday, but I can't do it anymore!" Old Wu sighed a long sigh. The old Lu on the other end of the phone was also inexplicably sad.

"I'll ask Zhou Hongyi, who is foreign-related, to help you?" Lu Lao said softly.

"My side is similar to Zhou Hongyi, and there are several students. The talent of surgery is the ceiling. They can go far and far in scientific research, but not in surgery at present!"

Old man Wu's words are not good enough. Who dares to say no if he releases his directors in Fangdong?

"I asked Zhang Fan to come over and I'll call now!" Old Lu listened to his martial brother who had been strong all his life. Now he was like an old wolf hiding in a cave and licking his wound. He felt very uncomfortable.

"No, this kind of operation requires a doctor to give full play to his greatest talent and technology. Therefore, Zhang Fan's coming to the East is not a particularly familiar environment, which has an impact on him. What I'm calling is what's going on in his hospital. The equipment can't keep up. "

"Hehe, elder martial brother, this little rabbit is bullish now. We won't talk about the special orthopedic department some time ago. It's estimated that your operating room is not as advanced as others. The bedside CT used by others is at the laboratory level. It is said that the operating mirror given by Olympus cannot be mass produced within five years.

Lu Ning went to tea vegetable last time. When he came back, he quarreled with envy. If his operating room is not enough, there may not be much he can use. You want to... "

"That's good, that's good. I'm also worried that his hospital equipment is not good. Unexpectedly, unexpectedly. I'm going to leave tomorrow and take the patient. "

"OK, elder martial brother, I'll leave tomorrow. You don't know. This bastard came to Qingniao last time and told my wife about tea like heaven. My family has soft ears. These days, he has been arguing to go around. I'll take my wife around tomorrow and beat the side drum for you. "

"Good!"

Old man Lu called Zhang Fan. As soon as Zhang Fan heard that his master, martial mother and martial uncle were coming, it was no small matter. He didn't let the hospital come forward. But left it to Shaohua.

Shao Hua directly invited the property company to clean up his villa several times inside and outside, and then took advantage of the sun to cover the newly bought sheets with water and expose them to the sun.

This is not enough. In order to welcome several old people, Shaohua drove a pickup truck to a distant flower garden and bought a lot of flowers.

Just as Zhang Fan was checking his body, Zhang Fan's private phone rang. Chen Sheng saw that it was Shaohua's, so he quickly connected it. "Manager Shao, I'm Chen Sheng from the medical department. Zhang hospital checked the patient."

"Oh, martial uncle and master, they are coming. Don't worry about the old man. You have to pick up the patient. I don't know how to deal with it."

"OK, we're ready."

After hanging up the phone, Chen Sheng looked at Zhang Fan. With a little hesitation, he went to Ouyang.

"Ouyuan, Mr. Wu and Mr. Lu have come to tea vegetable. Take this patient! The plane is expected to land soon. "

"Huh? Academician Wu and academician Lu? "

"Yes!" Chen Sheng nodded.

"I don't know. You're going to rebel. You didn't tell me such a big thing." Ouyang was angry.

"No, Zhang Yuan said to keep a low profile and give you a surprise!" As soon as Lao Chen turned his eyes, he began to talk nonsense.

In fact, Zhang Fan was afraid of the old lady and then two old men advertising. Last time the two old men came to tea, they just asked Ouyang to sit in the clinic for two days.

What scene really made Zhang Fan tremble at that time, but after the news that the two academicians wanted to sit in the clinic was sent out, there were a sea of people. The old men and women who danced in the square dance on weekdays stopped dancing. Those with liver diseases around didn't live

in the local hospital.

Then they all came to register. At that time, Zhang Fan asked the police station to maintain law and order.

"Go, go, don't say it earlier, ouch, is my hair messy? I didn't say it earlier. I don't have time to change. You, you, why are you getting more and more useless. " Ouyang complained about Lao Chen as he walked.

In this meeting, she can't take care of the interns.

Sitting on Zhang Fan's red card, kuluze urged, "let 120 keep up quickly. If you can't, turn on the police light and say hello to the airport? Have old Lu and old Wu arranged their accommodation? "

In all aspects, she has to ask all the things she can consider“ No, Shao Hua can't come alone. Let the medical directors of the second hospital and the Third Hospital, that is, Xiao Chen and Xiao Wang, go to your Zhang hospital to help. They have dealt with Wu and Lu, not strangers.

Call the government logistics office and ask the government to provide some cooks. "

"OK, I'll arrange it now! What is the reason for the government? " Lao Chen was talking on the phone while driving, and the sweat came down from his head.

"Why don't I worry at all? Zhang Fan is young. Are you young too? What reason, no reason! " Scold and charge. Lao Chen has good psychological quality, otherwise he can go crazy.

The old lady scolds others for being careless, but she never talks about it herself.

At the beginning of Zhang Fan's physical examination, the interns saw the difference.

After all, they are students of China's top schools. They have seen too many big people for physical examination. But now, they found the gap between themselves and Zhang Fan.

"What a chicken. No, I want to send a circle of friends! "

Chapter 1209

Wiping the sweat on his head, Lao Chen finally drove into the airport with the 120 of the hospital. In the warm and cold weather in spring, the sweat beads on his head are like the chivalrous man who got into the devil in the martial arts action film. They are almost foggy.

To tell the truth, sometimes, this psychological quality is really too important. As for Ouyang's

leadership, if his psychological quality is not good, he can't serve at all. Therefore, ah, when a person has no other advantages, good psychological quality is also very important.

Ouyang also scolded Shaohua after seeing Shaohua. Shao Hua smiled and hung Ouyang's arm around the old lady like her daughter. The old lady was embarrassed to say more. In this regard, Shao Hua is 100 times stronger than Zhang Fan. Haven't you seen that Shaohua has become a member of her school by fooling her father-in-law and mother-in-law!

The plane slowly landed at the airport of chasu.

Sometimes, how much can a doctor trust patients? It's really hard to say, but Mr. Wu said that when he took the patient to frontier tea, the family didn't say a question or even a question. Without saying a word, he went to buy a ticket.

After getting off the plane, old Wu and old Lu, as well as old lady Wu with several assistants, smiled and greeted Ouyang. For the Dean, although medical technology is no more serious than old Wu and old Lu, they really appreciate the dean's work style and life style.

Otherwise, can the two academicians go to the clinic according to her meaning? Why didn't the leaders of other martial brothers let the old men go to the clinic?

"Hard work, hard work. Zhang Fan didn't have one either. I said in advance that the plane arrived and I came in a hurry. Zhang Fan has an open class today, so..." Ouyang shakes hands with Wu and Lu.

"Hey, Dean ou, you're welcome. We are now familiar with the way to the tea vegetable hospital! " Old Wu smiled and said that the old man was definitely not like Zhang Fan. He smiled at everyone. The old man looked very serious. If you wear the military uniform again, you will never be kind.

"Open teaching? He should not mislead people's children! " Old man Lu recognized Zhang Fan's theoretical knowledge, but he doubted the expansibility of scientific research. Class, open class, you can't explain the subject according to the book. You always have to say something about scientific research.

But in the old man's eyes, is Zhang Fan the material? I'm confused. Can I teach people?

"Hehe, it's physical examination, a physical examination of relatively rare diseases." Ouyang answered

with a smile. The doctors and nurses in the emergency center had carried the patient to 120 like kidnapping, then said hello and galloped away.

Because they also saw that the little girl was too dangerous. Her pale face was slightly yellow, but her thin body was hung with a big belly, which looked particularly dangerous.

"Shibo, Shifu, Shiniang!" Shaohua shouted sweetly " Good boy! " Zhang Fan's teacher's wife also likes Shaohua, because the old lady saw her years from Shaohua.

Lao Chen took the luggage with him. Ouyang listened, "Shiniang!" That's good. Old Lu even brought his wife with him. The complaint in his heart has long disappeared. Just like Zhang fanxin, when he got on the bus, he ignored the two old men and took Shaohua to instill in the old lady.

"Spring is the best season here. The wind blowing down from the snow is mixed with the monsoon, which makes the air not dry or particularly humid. When you go through the forest, you can smell the smell of nature in the air.

It's not good here. It's too close to the city. I'll accompany you in my spare time. Let's go to the forest. Where is a sanatorium and natural hot springs... "

Academician Lu and Academician Wu looked at each other, especially academician Lu. They were filled with emotion. How can the leaders of this tea vegetable hospital be as perfect as those who make it perfect! Set by set.

"Old Wu and old Lu, where shall we go first?"

"Go home first. Shiniang's face sees that she is tired. Everything at home is ready." Shaohua grabbed Shiniang's hand.

"You go back first. Elder martial brother and I go to the hospital first to see how Zhang Fan teaches people!" Old Lu glanced at his wife.

His wife nodded kindly. Zhang Fan's Shiniang is really kind. She is definitely not the same as these two old men. At such an old age, she still has a face of deterrence. The law pattern is heavy, just like she is always ready to get angry.

Wu also nodded, "go to the hospital. If you don't explain, I'm not at ease."

Ouyang looked at old Wu, old Lu and old lady Wu. She hesitated. She knew very clearly what Zhang Fan wanted to do. She thought of it if Zhang Fan didn't say it. After all, Zhang Fan's little tricks were taught by her. She didn't have to think about them. She knew Zhang Fan's purpose by moving her big toes and

fingers.

But now there are two academicians and the old lady she wants to take down. Think, think, Ouyang bit his teeth and said to Chen Sheng, "take the two academicians to the hospital. I'll see how Shaohua prepared."

"OK!" Lao Chen gasped in his heart. He carried the pot for Zhang Fan, but Ouyang scolded him miserably.

Ouyang thought, "hum, I don't want to tell you in advance. I won't play with you. I can't keep up with you even if you eat ash!"

Ouyang went to Zhang Fan's house in Shaohua's pickup truck.

After Zhang Fan divided the villa, he called Ouyang several times and wanted the old lady to come over to warm the pot. The old lady ignored Zhang Fan. She was a little jealous and felt that the government didn't pay attention to her. If she didn't have a purpose this time, she probably wouldn't come back.

.....

In the hospital, with Zhang Fan's physical examination, the students became more and more serious. Physical examination, although very simple, can be done by a medical student.

But the gap between people is sometimes bigger than that between people and dogs. Some people's physical examination and instruments can't be checked out. Others can be found out by physical examination, while some people just toss about the patient after physical examination for a long time, and they don't have any points in their heart.

Although Zhang Fan's physical examination is not as good as the once-in-a-century Xihua big man, it is already perfect. Let a group of young rookies see. This is a magic skill!

Someone looked at it and thought it couldn't.

Because the brain can see, but the hand says, I haven't learned your uncle's.

Then take out your cell phone and start recording.

"Don't record the patient's face!" Zhang Fan said, "it's all right, Dean Zhang. As long as you can cure me, anything will do!"

The little girl was not afraid of this meeting. She gently smiled at Zhang Fan and said.

"That won't work."

In medical treatment, there is a general habit that you can learn, but it can't be used for reporting, no matter how you check it.

Video, mobile phone video, recording and recording. I think I want to make my classmates unhappy. Why should Zhang Yuan attack us? I also let others be attacked by Zhang Yuan.

Then the wechat circle of friends moved their fingers and sent out an inspection video of Zhang Fan with a face. While sending it, he said in his circle of friends: "today I finally learned the ancestral examination method. The abdominal examination is too awesome. I have to work hard!" Then he gave another fist.

In fact, in 12 years, wechat was not very popular in the frontier. I don't know how it got popular. But Zhang Fan knows that this will cause family discord.

Because Xue Fei told Zhang fan that a couple shook and shook at home. As a result, they became netizens. Then they made an appointment to meet. As soon as they met, they became a group. Therefore, in this world, sometimes you can't get angry if you don't take a side door!

However, it is estimated that those from the capital do not use wechat to shake and shake.

In fact, the main reason why these interns of the golden mean are particularly reluctant to come to tea vegetable is that tea vegetable has no good mentor.

It has been said that sometimes choosing a mentor is more important than choosing a school.

Therefore, in the capital, if you can lay a good foundation for your relationship with your mentor in advance, or let your mentor favor you, you will win in the future.

Therefore, the people who come to tea vegetable are too uncomfortable. But I can't feel bad myself.

As soon as the circle of friends started, I thought, "hum, although tea Su can't meet a good mentor, I've learned the inspection technique of Qiu sect. Go ahead! "

After a while, many people in the circle of friends sent congratulatory messages. After all, interns are a little easier than hospitalized dogs and can play with mobile phones.

But play with anyone.

Suddenly, several of his so-called good friends who practiced in the capital also renewed their circle of friends.

"Well, today, the director of general foreign affairs personally led us around the ward. There is a full academic atmosphere. I must work hard to stay here for postgraduate and doctoral studies. The director's academic level is my future goal. Come on! Worthy of my youth! "

Several interns who came to tea vegetable, looking at the circle of friends, still murmured in their heart. It's like playing cards. I gave an A and others gave a kid. What should I do? They looked. Although there were Li Cunhou and Zhao Yanfang, they were not the director level of the golden mean after all!

Hey!

Just when everyone pretends not to see.

Old man Wu and old man Lu came in.

The students in the circle of friends rubbed their eyes hard. They were afraid of reading the wrong person, but this is true.

When I went, the boy's excited hands began to tremble.

What is this? Who is this? This is the existence of God.

Really, in the medical field, for example, a general doctor, a doctor engaged in breathing, saw the old clock 21 years later.

In my heart, I met Lao Hu.

In other words, just like fans met Andy Lau.

Popeye saw spinach.

Not excited is false.

Just when the students were about to riot, Lu smiled and pressed his hands, indicating that everyone calmed down and continued to study.

Zhang Fan didn't notice. He thought his physical examination had frozen these people's chickens!

Old Wu and old Lu quietly stood behind Zhang Fan, without words, and looked at Zhang Fan for physical examination.

The intern who has just been wronged infinitely in his heart is happy.

Special, let you guys have a look.

Then, Zhang Fan stood behind him with photos of two great gods. He sent them out, and there was no video, just one photo.

This time, he didn't say anything, just the scene, just the patient, but there were two more people!

Chapter 1210

In the past, Zhang Fan's attention was not very high, and he often did half hearted things. But with the practice in the system, his attention is getting higher and higher. Once he enters the operation and examination, he is very serious and not easy to be disturbed.

This advantage has been envied by many people in the tea vegetable hospital. Some people want to be serious, but they are easy to be disturbed.

Li Cunhou said that Zhang Fan's high level of surgery has a lot to do with his attention. He also tried to train himself. Unfortunately, it's useless. Obviously, he thinks he has been very concerned and serious, but when the nurses tell jokes, he will laugh on time!

Moreover, after this kind of special attention, whether the operation level has improved or not, he doesn't know, but what he knows is that the joke told by the nurse at that time was like a soldering iron, which was branded in his mind and couldn't be forgotten. Once he was in a daze, the joke said by the little nurse's voice came out of his brain.

"I sent a text message to the director yesterday. I wanted to curry favor with the director, but I sent the wrong word. At the morning meeting, the director didn't dare to look at me!"

Another nurse asked, "what are you talking about?"

Bayin was also a crazy person. He was on the operating table and began: "I wanted to send it. Director, you have been on duty for 24 hours recently. You have a lot of wrinkles on your face, but unexpectedly, you were careless and lost a face!"

At that time, Bayin's joke made Lao Li, who specially practiced his attention, almost laugh at the pig's cry. Zhang Fan is different. Once he enters the state, he will hardly be disturbed.

Zhang Fan is now. Although there are pictures and videos of the students in front of him and the peeping of two old men behind him, his brain is completely thinking about the patient's disease.

"The abdomen is soft, there is no obvious tenderness or rebound pain in the abdomen, and there is no mass. Is there really no sign? No, bowel sounds. Although there are bowel sounds, they show weakness. Yes, yes, yes, that is, bowel sounds are significantly weaker than normal people. Combined with routine examination and enteroscopy, isn't this chronic pseudo intestinal obstruction? "

But when the diagnosis came out through thinking in his mind, Zhang Fan was extremely happy. To tell the truth, since the system was established, although he kept honing his technical level, he always had a worry about what to do without the system one day.

Some people are optimists, but Zhang Fan is not. He is originally a pessimist. Moreover, the feeling of being a technology master, just like being a leader, will be addictive. Now Zhang Fan, if you exempt his Dean, he doesn't care at all.

But let's say that his technology will disappear with the system one day. Zhang Fan doesn't dare to think about it. Sometimes he even thinks about it occasionally, and his hair can stand up.

Therefore, this time, he did not rely on the system, but on his own honed technology, which was more powerful than the veteran director, and he was able to diagnose difficult and miscellaneous diseases.

Really, it's great. I can't express this feeling.

Zhang Fan raised his head and looked at everyone. Suddenly he felt someone behind him. Before he turned his head, he heard his master's voice: "after a long time, what's the diagnosis? Don't say abdominal pain needs to be checked! "

"Master, martial uncle!" Zhang Fan turned his head with the sound.

"Hehe, how's it going? How's the diagnosis?" Martial uncle asked happily.

"Chronic pseudoileus!" Zhang Fan said quite definitely that when the diagnosis is uncertain, the doctor will definitely hesitate between several diagnoses, just like having a choice difficulty.

Is it black silk or shredded meat!

But once you're sure, it's like looking at someone in the crowd. You can be sure that this is the one who stole my wallet. That's right. Although he didn't see it when he stole it, the intersection of his eyes told you that he was the one who stole your wallet.

"Yes! Now we can diagnose difficult and miscellaneous diseases. " As Lu said, he also took a stethoscope to listen to the patient's abdomen. Just as Lao Zhao said Lao Fan at the Spring Festival Gala that year, yes, they will rush to answer!

In fact, old man Lu didn't believe that Zhang Fan could diagnose the disease, because he knew that

diagnosis was the weakness of the little disciple.

In fact, pseudo intestinal obstruction is difficult to diagnose because all its symptoms cannot be reflected on the instrument, which eliminated a large number of instrument doctors. The most important thing is that its symptoms are not obvious, and the symptoms at the time of onset are quite not obvious. Moreover, it is a rare disease. Too few doctors have seen this disease. In addition, if the physical examination fails, This leads to the diagnosis of dystocia.

But who is old man Lu? Although he is a little worse than his master and elder martial brother in surgery, he is absolutely first-class in diagnosis, especially in general surgery.

After receiving the stethoscope in Zhang Fan's hand, the old man began to check himself.

"I'll go, I'll go. Academician Lu will give us a physical examination class in person!" The students were more excited. Zhang Fan realized at this time that everyone was excited because of old man Lu and old man Wu, not because of his high physical examination technology!

Lu's physical examination is higher than Zhang Fan, but the general doctor can't see it.

However, this does not prevent students who come to tea vegetable internship from forcing them back.

Before coming to tea, many students gloated over the misfortune. The students they were selected had a brain lawsuit and bad luck!

Now, ha ha, academicians personally give the most basic courses. Do you have this treatment?

"Academician Lu, personally release Qiu Paicha. I have a deeper understanding of physical examination. Thank you, academician Zhang and academician Lu. I will work hard. " Moreover, at the last second of the video, he suddenly popped his head and beat a Y!

With a big grin, he looks so happy.

Then, with a little finger, although Qiu Pai's physical examination showed that he was still confused, he was in a good mood.

"I'll go. You're lucky. Get me an autograph from old Wu and old Lu and come back for two KFC meals."

"I'll go. It's really old Wu and old Lu. God, why aren't they here. I want to be a foreigner in the future! Cry to death! "

"What's the dog's head that came out at the last second? You can even appear in the same mirror with old Wu and Lu. It's so annoying!"

For a time, there was a riot in the student circle of the golden mean.

Especially the students who want to engage in ordinary foreign studies at the golden mean University. How do you think at this time? Why do you suddenly feel that the director of the golden mean is not fragrant!

For a time, the dog head classmate's wechat became a pastry.

"Classmate, I'm from class 7. I'm the one who goes online with you. Ask Mr. Wu if he wants to stay long in chasu. If I can apply for his graduate student, I'll apply for chasu now!"

Goutou looked at it. This guy laughed at me when he hit CS and said that he was more powerful with his feet than me. Ignore him!

"Little brother, little brother, I'm Yang Lili from Class 3. You can ask me, old Wu and old Lu. Do they accept female graduate students? Thank you. Come back and invite you to dinner!" Followed by a little heart.

"Well, it's Lili. It's beautiful. Unfortunately, there is an object! "

Goutou is as happy as the emperor turning over the sign. When he was in high school, he was also a learning bully. How many girls in the front and back rows gave him a wink, but he didn't expect to go to the golden mean. He thought he was hugged by beautiful women.

As a result, the whole class is Xueba. He is the last Xueba. He really becomes it at once. From then on, Xiao Lang is the rhythm of passers-by.

Today, just today, in today's tea day, Goutou's College highlight moment has finally arrived. What class cadre, what class flower and what age are the top ten. In the past, he chased people all over the yard for wechat, humbly like licking.

But today, he is different today. His Zhang Yuan and Zhang are awesome!

Wa Le's nose is bubbling. Fingers quickly click on the mobile phone!

.....

Old man Lu didn't believe it. As a result, he checked the inspector. The old man was also happy. Hey, I didn't expect that his boy had made progress. To tell the truth, he is not worried about Zhang Fan's current operation. What he is worried about is that Zhang Fan has gone astray and become a surgeon.

But today, Zhang FanTai surprised the old man. The old man lowered his head and tried to suppress his smiling face, then raised his body and handed the stethoscope to the elder martial brother "Elder martial brother, listen, listen!" Although his face was serious, his tone seemed to boast to elder martial brother again.

Old man Wu smiled and took the stethoscope.

"You're not guessing. You're right!" While Wu was checking his body, Lu turned to Zhang Fan and asked in a low voice.

"No, I summed it up through diagnosis. Master, I've made great efforts in diagnosis recently! "

"Well, that's good, that's good! Good, good. " As he spoke, the old man patted Zhang Fan on the shoulder.

At this time, the one who knows explains to the one who doesn't know, like the neighbor's aunt: "Zhang Yuan is Lu Lao's closed disciple. Do you know, the kind of preaching."

The interns looked at Zhang Fan admiringly with a kind of longing to pull Zhang Fan down. To tell the truth, but they know that when Zhang Fan became the dean at such an age, they don't envy him. Isn't it a top three Dean in the marginal area.

It's no big deal.

But when Zhang Fan showed his skill, they were just a little envious.

But now it's different. It's naked envy.

Goutou became addicted and turned over the brand.

Seeing old Wu, he also began to check his body.

He showed his shameless big teeth in the video of Lao Wu's physical examination.

"My God, I'm too tired today. Academician Lu thinks it needs to be supplemented after academician Zhang's teaching. Academician Wu thinks it's not comprehensive after academician Lu's teaching. God, I don't have to read the diagnosis anymore. It's really a tired and happy class! "

"Pretend to be a dog!" This is a congratulatory message from his classmates who have no information in his circle of friends.

It's already like a vibrator's mobile phone. It's almost out of your pocket at this time. It's too hot.

Even their counselors sent a message.

Chapter 1211

When Zhang Fan came to the stage for physical examination, to tell the truth, there was no response in the circle of friends of the golden mean University. I don't know. I thought it was a student who was admitted to the university after seven years of Anti Japanese war. Physical examination is like an underground transaction.

If you don't say he knows the people who understand, if you don't, he thinks you're following him.

But when old man Lu did a physical examination, everyone was excited. The goods are the same, but the people who sell the goods are different. When old man Wu comes forward to sell the goods, well, everyone is on top.

Forward, join the fun, for a time, the medical circle of the golden mean University asked for it.

At the beginning, it was: look, Academician Wu and academician Lu taught on site.

The first wave of forwarding everyone ignored the existence of Zhang Fan.

As a result, I felt that the momentum was not enough. The second wave directly became: No, Qiu Pai blew the whistle at the tea plant.

The third wave is to watch the excitement directly, not afraid of big things: it's over, the green bird's attached doctor is over, Fang Dong is over, when the family is dug!

In the age of entertainment to death, melon eaters are always the most enthusiastic. Then, but after Lu and Wu took a video of Zhang Fan's shoulder and were sent out by Goutou's classmates.

Zhang Fan's father became a mystery figure in the golden mean medical school.

"Who is this black boy? Who is his father? "

Of course, these are students who are not even insiders, and serious medical circle people have ideas at this time, especially some master's and doctor's dogs who have not made achievements in general education.

"Old Ben, I don't know. Let me ask you?" Goutou students received the Counselor's information, and the Counselor's information can't be ignored.

"Well, you'd better get the wechat of Zhang Yuan. Please, there are several excellent League members this year. I'll watch for you. You've made great progress this year. If you have this quota, it's very convenient whether you stay in school or further join the party."

Goutou's eyes are red!

At present, his counselor is a doctor who stays in school. If he waits for the promotion of professional title at one level in other ordinary schools, he will be stable in his life. But not in a university like the golden mean. If you don't advance, you will fall back.

Doctor can't graduate in the first year. I'll give you a year. If you don't graduate yet, I'm sorry. Why do you change. Promotion of professional titles is the same. Only two opportunities are given. If you can't get promoted, I'm sorry. Go to other schools.

Therefore, the earliest selling tragedy was not in the entertainment industry, nor was it a starting point to cross the boundary, what happened to the birth and death of both parents, and what happened to the orphanage.

The first ones that really sell miserably are in Colleges and universities. When some doctoral theses can be entered or not, they have to rely on their own bosses to speak at this time, and they have to work hard to sell miserably.

For example, after the thesis defense, the judges should raise their hands. At this time, the boss of the doctor spoke. Although the quality of Comrade XX's thesis is not particularly deep, comrade XX still works very hard in his work, and he is not in good health now. Then he took out the CT of cancer and showed it to the leaders of the judges.

As soon as the big guys looked, forget it, let's go. After all, CT has been brought.

For several years, there was a saying in the doctoral circle that if you want to graduate, you have to take CT!

The situation of Goutou's counselor is similar. He is also engaged in liver and gall. His predecessors have become a routine. The bosses have begun to be a little immune, and liver and gall are very fierce in China, so he wants to find a better scientific research project.

His boss is not too powerful, so the counselor has swam on the edge of being dismissed. But today, he was moved. The tea vegetable hospital is the teaching hospital of their school. Originally, everyone felt that the quota was too reluctantly given. There was even a feeling that the school leaders had eaten.

But now I see the intimacy between Zhang Fan and the top leaders. Some people who don't know now

understand that they have confidence.

Medical circle and medical teaching circle have intersection, but they are different.

Top doctors are in both medical and teaching circles.

They never mentioned throwing knives when they were judges in the medical teaching circle. Therefore, the medical teaching circle is relatively simple.

So Zhang Fan is not famous in the teaching circle.

However, at this time, after inquiring, some middle-level students in the teaching circle knew that the ancestral disciples were actually tea vegetarians!

Not only doghead students were promised benefits, many students in tea have received flying letters from their senior brothers and sisters. One request is to find a way to add it to the wechat or phone of Zhang Fanzhang hospital.

After Wu finished his inspection, he gently said to Zhang Fan, "you can graduate!"

"Where, elder martial brother, he is not good enough. You must not praise him any more." Old man Lu is worried.

"Hehe, I'm talking about diagnosis!"

"Well!" Zhang fanhan came down.

The old man is naughty, too.

After finishing with Zhang Fan, old Wu said, "I brought a patient. Look, are you sure?"

Zhang Fan was going to leave with two old men, but the students quit.

"Zhang Yuan, just look here. Let's learn! We are interns in your hospital. You are wrong! "

A girl directly stood up and pulled Zhang Fan's white coat to prevent Zhang Fan from leaving. That is, students, but also moderate female students, such as students in the bird market, dare not borrow his two courage.

Zhang Fan looks at old Lu and old Wu. After a little consideration, old Wu says to his secretary:

"Go talk to the patient. See if she wants to. "

After all, it's an open class.

When the secretary went to talk, old Wu and old Lu refused each other. Old Lu directly began to talk about chronic pseudo intestinal obstruction.

Medical learning is like this, old teaching and small learning. And it's still hand-in-hand teaching, because medical treatment is too abstract. Sometimes, the descriptions in textbooks are quite grounded.

For example, urine is light red, but how can it be light red? Here comes the textbook, meat washing water!

What do some special cancers look like? Dish pattern!

What does diarrhea dehydrated stool look like, egg flower soup!

After a while, the students can't forget.

Now, when Lu Lao began to explain pseudo intestinal obstruction, not only the students, but also the doctors of tea vegetarians listened quietly.

In the future, if there is another such patient, it will not be a difficult and miscellaneous disease in tea.

The old man explained pseudo intestinal obstruction thoroughly from mechanism, pathogenesis, symptoms, treatment, bit by bit, from shallow to deep.

"You must lay a good foundation and be careful and courageous in the future or in clinical work..."

Before long, a little girl came out with a big belly.

Not to mention the students, even the old doctors of tea vegetable couldn't help being surprised.

It's cruel. A little girl, a girl in junior high school, with a stomach of ten months old, how can it not surprise people.

Moreover, the girl had jaundice on her face and even her eyes were yellow. She didn't have the vitality she should have at this age.

Her childhood was not carefree, but endless pain. Liver cancer is the most painful disease of almost all cancers.

Many people, in the late stage of liver cancer, it can be said that anesthetics are almost useless.

The little girl, when she appeared with severe pain and saw a group of big brothers, big sisters and a group of strange doctors, she tried to put out a slight smile.

Smile so reluctantly, smile so distressing.

"I'm old. I had such a big operation ten years ago. Now I can't do it. Open it and have a look. Are you sure?"

Mr. Wu doesn't care about any honor, nor is he afraid of others saying he can't. In front of patients, he is a doctor who says one thing. There is nothing superfluous on his white coat. It is always so white.

Zhang Fan gently nodded and helped the girl on the examination bed.

Took a deep breath.

Zhang Fan began to check.

"Tough texture, poor mobility, tenderness..."

While checking, Zhang Fan slowly constructed the patient's case data in his heart.

Quiet!

The classroom is quiet.

The young students are looking forward to and imagining how good they would be if they were Zhang Fan.

"Elder martial uncle, I'm not sure, not even 60% sure!" After checking, Zhang Fan looked at the little girl with a little guilt.

Although the little girl doesn't know medical treatment, she doesn't know 60% of Zhang Fan's words. Tears flowed out quietly in the girl's yellow eyes. Maybe she could be free, and her parents could be free.

The child's mother has been sitting on the ground. Really, the disillusionment of hope is more painful than the absence of hope.

The students also inexplicably produced a kind of pity.

Perhaps this class taught them not only medical technology, but also a fear of disease and life.

At this time, Wu and Lu looked at each other.

"Oh, yes, I'm more sure than I was. I believe you. "

"Your martial uncle didn't even have 30% confidence! And at that time, the Chinese did not have a liver

map, not even a bedside CT! " Old Lu said excitedly.

"Yes! What do you need now? " Old Wu smiled and said to Zhang Fan, he didn't read Zhang Fan wrong. This boy is really talented.

However, Zhang Fan didn't laugh and his heart was not relaxed.

This is the fear of life.

"I need assistants, martial uncle and master. For this level of surgery, there must be several assistants who can meet the standard."

"Well, OK, OK, I'm not kidding when I say you can graduate. No arrogance, be careful, your master teaches well! I'll get in touch with your master and be your assistant! "

At this time, the golden mean circle of friends was excited.

The Chinese medical circle has also set its eyes on tea.

Huge liver tumor is even more difficult than the operation done by old Wu! Those who have ideas have begun to move.

The little girl's mother and father, really like a roller coaster, hugged the child and cried silently.

Chapter 1212

No. 1 in the world. Some people say that this kind of thing is the favorite of Chinese people. You have to make a ranking for everything. In fact, in the past, foreigners still liked ranking, but later they always felt that they couldn't rank in this ranking, so they began to play Guinness.

In fact, the Chinese people pursue the first, there is a kind of abnormal in their bones. But once you can't catch up with the first, the treatment and grade of the second and third are obviously different. Just like the former Hong Kong sister, the second is more plump, but the treatment is not as good as the first.

Old man Wu came to tea with the operation of the second young patient with a huge liver tumor. When Zhang Fan told the old man that he wanted to help, huaguopu and the outside world, although the big man looked very concerned, no one said hello.

After all, Zhang Fan is the third generation, and the sincerity of the same age as Wu will not come to join the fun, while the top leaders of ordinary foreigners are almost of the generation of Wu and Lu. There's

nothing to say about being elected. If you can't be elected, you'll be ashamed. So, like a big crocodile, everyone hid under the lake and peeped secretly.

Although the leaders were not very enthusiastic, they signaled their students or apprentices to actively participate. And if there is no big man or his own big man is not very good, he tries to contact Zhang Fan.

"Teacher, teacher, can I add your wechat?" When Goutou saw Academician Wu and academician Lu talking about making a phone call, he came over first and looked at Zhang Fan with a smile.

"What? I don't have wechat! " Because this software is very popular now.

Looking at the flattering look on the face of the strong guy in front of him, Zhang Fan instantly raised his vigilance. What does this boy think? He looks like a craftsman who peddled answers to real questions in school when he was about to take the CET-4 and CET-6.

"Well!" Goutou students are helpless. Originally, I wanted to go to wechat and introduce Zhang Fan to his counselor. By the way, I recommended Zhang Fan's wechat to several beautiful female classmates, and then he went to the peak of his life.

As a result, the guard looked on his face, "as for? I want the wechat of our golden mean school flower. It's not so nervous. Does he have any misunderstanding? I don't have earrings! "

The students of the golden mean not only have high IQ, but also have high EQ, but they don't have to think about it before and after seeing Goutou students. They definitely want contact information.

For a while, many students came forward.

"I really don't have wechat, let alone surfing microblog!" Zhang Fan is ashamed.

"Senior, I'll help you apply! The doctor General of our school wants to contact you. " A girl reached out for Zhang Fan's phone. Like unmarried milk tea, it looks good, but EQ has exceeded IQ.

Zhang Fan didn't think about it, so he directly gave the phone to Goutou.

"He came first, and I think he moved electronic products!" Zhang Fan explained in the same way.

The dog head nodded angrily, and the beautiful female classmate, such as milk tea, was not angry. She just bit her lips and smiled slightly.

Goutou's fingers danced to Zhang Fan to apply for this wechat and microblog, and then he became Zhang Fan's first friend.

.....

"In terms of liver and gall, the younger generation can help Zhang Fan a lot. Tang Zhenghao is one! " Old man Wu's big apprentice, if you count it up, he is a professor in his early fifties. His students are older than Zhang Fan. He has no seniority, and he has no choice.

In the eyes of old man Wu and old man Lu, he is a young man!

The two of them planned the candidates, "well, Zhou Yihong can also. He has cooperated with Zhang Fan a lot."

At this time, Zhang Fangang's wechat application ticked.

"Junior brother, it's hard to add your wechat! Uncle Lu, how are you? I'm Yang Yongcun, the elder martial brother of your capital hospital. It is said that there is a huge liver tumor operation. Please tell me about it. I happen to have some research recently. If three AIDS can't, four AIDS and five aids can! "

Zhang Fan looked at the wechat in his hand and thought in his mind, why hasn't this elder martial brother heard of it?

To tell you the truth, Qiu Pai students were not valuable at that time. But waiting for the achievements of the first generation and the second generation to become greater and greater, Qiu sect disciples began to be valuable.

And many elder martial brothers are divided into many categories. One is to continue in clinical practice in the footsteps of masters. The second category is scientific research. For example, Lu Ning is. Lu Ning's current operation level is poor, but he is not qualified as a director of general surgery, but if he is a scientific research leader, he will have no problem.

The third category is to take the road of half official career and half technology. For example, old Wu is a disciple of the president of the sanatorium in the West Lake, and Yang Yongcun is a graduate student of younger martial brother Lu. After graduation, he went to the capital hospital.

The capital hospital, which is based on technology, is nothing in front of major hospitals in China. It does not compete for scientific research and projects, but many important people are hospitalized here. Of course, doctors invite outside doctors for consultation and treatment.

So this hospital is wonderful. Yang Yongcun is the general director of this hospital.

Not only he, but also many doctors are contacting Zhang Fan. For example, the counselor of Goutou classmate politely asked Zhang Fan if he could take him to have this kind of operation and publish papers by the way.

Zhang Fan thought about it and looked at Lu Lao on wechat.

"Well, Yang Yongcun, I know. My younger martial brother's student, the young man, went to the capital hospital that year and never heard any news academically. However, it seems that his career is going well. I heard that he is already a standing member of the organizing committee. If he is willing to come, let him come."

Old Lu nodded. After all, younger martial brother's face is not big. But I'm sure he won't be operated on. The most is to put a name on the operation record.

"Well, the doctor of the golden mean, I know, is a good expert in scientific research. If he wants to write a paper, let him come..."

Lu Lao arranged several, all of which are strong in scientific research. Mr. Wu also arranged a few. Of course, all the arrangements made by Mr. Wu are strong in surgery.

Of course, the main knife of the operation is Zhang Fan.

"Martial uncle, since you have time and opportunity today, you can talk about this operation by the way!" Zhang Fan said to the old man.

"OK!" The old man thought and nodded.

The mediocre group of interns were very happy. The teacher in charge of the team is also very happy, because if such an item is filled in the internship manual, liver system, Professor Academician Wu, darling, if someone in this group of interns wants to do liver and gall in the future, it will add a lot of points to look at this item.

The team leader teacher can also take this opportunity to move to a relationship with old Wu and them.

Old Wu came to the stage and began to lecture.

"It's so difficult and profound. Academician Wu's liver is too difficult to understand. I recorded it all. I'll read it carefully several times when I go back!"

The display in the circle of friends makes Goutou students proud, and his nose is bubbling!

.....

On the plane flying to catechin, the stewardess are already immune to a group of people who seem to be medical professors and experts. This phenomenon occurs from time to time on the plane flying directly to catechin.

The wording in Yang Yongcun's wechat to Zhang Fan is very polite, just like the little brother next door. But in peacetime, director Yang's card face is still quite large. Which meticulous face, let alone strangers, even his colleagues think Lao Yang is too dignified!

Yang Yongcun took his two students, a doctor and a master. Although he is not well-known academically, he is quite good at employment.

Therefore, for students, the taste of the boss is greater than that of the teacher.

"You see more, learn more, talk less and look at your eyes!" The doctoral student looked like a half boss and explained to the new graduate student, but the explanation was the same as charity in words and expression.

The new graduate student bit his teeth, lowered his head and nodded silently. After all, their boss is a partial official career. In the future, they can go to graduate students and doctors, so in fact, the two are in a competitive relationship. On weekdays, although Yang Yongcun's face is serious, there are not many things, and there are many benefits.

For example, where to rub, rub an academic name, etc. It's also refreshing, but the doctor is difficult for him everywhere, which makes the graduate student feel like eating bird shit. He's disgusted and dare not make a statement.

.....

For patients with huge liver tumors, we need to improve the relevant examination these days. Old man Lu and old man Wu looked at the hospital inside and outside, and their mouths were filled with emotion.

"Unexpectedly, when I came here last year, the hospital was barely a top three hospital. I didn't expect that when I came here this year, the hardware of the hospital has almost always been in the forefront of China. Apprentice, apprentice, I didn't expect the last Apprentice to be so surprising!

In the past, I thought my eldest disciple Zhou Hongyi would go further in the future. Now Zhang Fan has a bigger pattern. Some of my thoughts may fall on him. Elder martial brother, I'm going to live here for a few years. "

"Hehe, did the green bird agree?" Old man Wu smiled and asked his younger martial brother. Sometimes they can't help themselves at this level. If he leaves Qingniao for no reason, other countries will have to ask Qingniao's leadership.

What's the matter? How did you get angry with the old man?

"I don't agree to retire. I said I came here to recuperate. Hey, I'm old and still eat vegetarian food!"

"I can't think so, but it's good for you to come here. Some of your ideas can really be tested here. After all, this is a frontier, and the resistance of all parties is much smaller. It's convenient for me to talk about anything. "

While Zhang Fan was busy perfecting the inspection, Ouyang had a lot of fun these days.

Ouyang asked for a special pass from the government. Then Shaohua was the driver, she was the guide and old lady Lu was the guest.

Then he took government officials to take a dip in the hot spring on the first day. Although the hot spring of tea vegetable was not well developed, it was located in the depths of the mountains. This place did not know why it was covered with a small building and generally did not receive guests.

However, the spring here comes from the foot of Tianshan Mountain. The spring water is rich in a large number of trace minerals and a little more sulfur. After soaking for some patients with skin diseases, the skin itching will be reduced a lot.

There are few people and the environment is beautiful. Ouyang and they are almost private“ Old sister, drink this honey kavas. It's pure natural and beautiful. You can't buy it in big cities. "

"Old sister, eat this broken wall pollen. It's pure natural and beautiful. You can't eat it in big cities."

"Old sister, this is royal jelly. You cover your face and eat some more. It's pure natural. You can't buy it in big cities."

Shao Hua smiled and followed Ouyang to eat and use good food. To tell the truth, Ouyang is not exaggerating. She hasn't seen much of these delicious food before.

Although Ouyang's sharp teeth and sharp mouth are unreasonable on weekdays, it's very simple for Ouyang to make friends with someone.

Within a few days, she had become commensurate with Mrs. Lu's sisters. Old lady Lu really made Ouyang fascinated by the scenery of the frontier.

Ouyang didn't take Mrs. Lu to turn to any cultural scenery. After all, the old lady was not ordinary people, and the humanities were not the characteristics of Northern Xinjiang. She took Mrs. Lu into the mountains and ran into the forest.

Chapter 1213

In the past, Shaohua thought that old lady Ouyang was a serious, old-fashioned and principled leader. But these days, Shaohua is really impressed by Ouyang. She is worried that her black pimples have been sold by the old lady and helps her count the money.

After Shaohua and Zhang Fan were together, she always felt that Chen Sheng of tea vegetable hospital was an expert in entertaining people. But now Shaohua knows that Lao Chen is nothing in front of Ouyang. The old lady is definitely an expert.

For example, bathing in the hot spring is clearly in a gully. Because the transportation is inconvenient, and now it is spring, everyone is busy. It has become an empty facility, but in the old lady's mouth, it has become the original natural hot spring specially used by others' tea vegetable hospital to entertain distinguished guests.

Because in the depths of the grassland, it is inconvenient to buy vegetables. Before wild vegetables grow, herdsmen eat honey and pollen and cheese milk pimples to supplement vitamins and trace elements. But in the old lady's mouth, this thing may not be a good thing to meet at the state banquet. It can not only smooth wrinkles, but also increase collagen!

Even Shao Hua couldn't help eating more.

Because Ouyang can directly describe something that can barely be regarded as a mountain treasure as a fairy pill. She can also give examples, "old sister, look, look, why people are so white, why they are so thin, and why they are so healthy when they are old, that is, they eat uncontaminated ingredients in the mountains every day, drink mountain spring water containing minerals, and soak in sulfur baths that can kill bacteria, Breathing the pollution-free grassland wind, can you not be healthy and live a long life!

This is one of the top ten longevity villages in the world! "

Shao Hua stuffed his head into the spring. It is clear that this is the pastoral area of Kirgiz. He is white. Can he not be white? As for Changshou village, there are a lot of long-lived old people, but outsiders come here occasionally and have a hairy use!

At this time, Shaohua wanted to ask: where is the meticulous old lady?

To tell the truth, people really need to exercise their personality and character. Ouyang's routine is beyond ordinary people's imagination.

Just as they were soaking in the hot spring, the officer of the tea element medical office had taken 120 doctors and nurses to start a free clinic on the grassland near the hot spring.

When the red cross car appeared on the grassland, the nearby herdsmen knew that the doctors from the big hospitals in the city came to see everyone.

At this time, there is no need for anyone to organize. They just call with signals and ride away without signals, just like cavalry messengers in ancient times. Before long, white tents were built one by one on the grassland near the hot spring.

The school in the residential area also had a holiday, and even the shopping vendors came to the hot spring. Before long, it turned into a bazaar. On the grassland, to tell you the truth, the government's call to go to the countryside to help the poor is really not as appealing as the doctors in the tea vegetable hospital.

"Spit sun Jiang, are you here too!"

"Yes, I heard that the big doctor of tea vegetarians came to the grassland here. I took my mother and sheep jar and balanzi to have a look."

When a free clinic team of tea vegetarians comes to the grassland, they usually bring equipment and drugs without tents. Because of the local herdsmen, we directly set up the largest tent on the grassland for doctors and nurses.

When he got to the grassland, Bayin led the team. "Those with cough and chest tightness come here, those with leg pain and waist pain and those with trauma go there."

After hula, the quiet grassland became lively. Small dolls chasing and playing, young men looking for targets, and old women reading scriptures and shaking the scripture barrel.

On the grassland in spring, under the tile blue sky, there are endless crisp grasslands. Although the water and grass are not high, it is really like a thin layer of green yarn covering the earth. Although it is not as deep and higher as the green in summer, it is more comfortable to see the people in the whole white winter.

The snow water on the grassland melts. After the sun's irradiation, from a distance, on the green grassland, a large area of white water vapor floats a few centimeters above the ground. Under the sun, it is more ethereal.

Forests, lakes, grasslands, and the man with the singing Shepherdess and the horse!

Shao Hua, who came out of the hot spring, looked at the little bazaar that appeared out of thin air on the grassland. The girl was dumbfounded. In a fashionable word, it's good when you come, but you can't go back!

Mrs. Lu was a gynecologist in her early years. Compared with her old man, she was not famous in Qingniao. After all, the city is big, there are many doctors, and the old lady gave up a lot in her profession for the sake of old man Lu.

Although the hospital will hire her back when she retires, the old lady knows that this is in the face of old Lu. So the old lady didn't go either. If she has any regrets in her major, she must be sorry. After all, she has studied for half a lifetime, but she can't use it in big cities.

Who is Ouyang? Although the whole tea vegetable hospital is buttering up to her, others are experts. She knows where tickling is most comfortable.

Old Mrs. Lu is old and pays more attention to the nature of the living environment. Needless to say, the tea is qualified. In addition, if old Mrs. Lu stays in the future, she has to find something for the old lady. Otherwise, she will not be familiar with her place for a long time.

Go to the obstetrics and Gynecology Department of tea vegetable hospital. It's estimated that the old lady won't go.

But is tea vegetable afraid of many doctors? These grasslands are enough for the old lady to turn for a long time.

For a moment, old lady Lu had just taken a bath, and the moisture on her slightly red face was not dry. She asked Ouyang to put on a white coat and began to check the herdsmen.

The big girl and the little daughter-in-law are waiting in line for the old expert to have a look. Looking at the eager and sincere eyes of a group of people, Mrs. Lu suddenly became young, just like going to the countryside for free clinic.

There are too many people. Many people surround the old lady like groups of devout believers.

Mrs. Lu didn't dislike the greasy and fishy smell of butter tea. When she was tired, drinking a mouthful of butter tea brought a lot of energy. When she was hungry, she took time to eat a mouthful of milk pimples. She listened to the local herdsmen talk about her discomfort to the old lady.

Ouyang proudly looked at Mrs. Lu, who was too busy to come over, smiled and said to Shaohua, "people, still have a sense of honor! Otherwise, I really can't help it. You should talk to your family's Zhang Fan when you go back. Don't feel that everything can be done with a little money every day.

Look, look at the happy face of our old sister. How much can Zhang Fan spend to do it? "

"Hey, who says no, the leader is the leader. He is far worse than you. Ouyuan, are you going to let your aunt go to the countryside here? "

"Well, I'll accompany you for a few days, and then go to the countryside with tea vegetable medicine! Anyway, the old sister is idle! It's just that the medical treatment in the countryside starts every spring. I have a headache. Who should lead the team? Now you see, there are experts leading the team! "

Shaohua muttered, "after eating a few meals on the grassland and taking a bath, I'll be a strong man! The old lady's meal is really delicious and difficult to digest! "

.....

In the tea element hospital, as the second set of giant liver tumor young patients began to be examined, more and more Chinese experts at the general foreign level flocked to tea element. This kind of operation is too difficult. Although it is rare, what can be seen often can only be seen.

Moreover, the disease develops rapidly, from a little uncomfortable at the beginning, to the huge liver tumor, to the belly of ascites, which is almost two or three years. The operation window is extremely short, so doctors have very few opportunities to learn.

Now, the great God leads the team and sends a message for everyone to come. This time, I think I can learn. It's a little brand of young and middle-aged doctors. In fact, most of them are middle-aged doctors, flying towards tea.

Doctors with this degree of freedom almost have a number one figure in their own hospitals. Of course, these are nominal, because their resume is very important in the medical industry in China. For example, the president of a hospital can't put down an introduction box with many names.

What is the president of the Medical Association, what has been operated on. But if someone really asks him for the operation in the introduction box, he can drive him out of the office.

The introduction of real experts is quite simple. It's just where you come from, who you learn from and what you're good at. It's just three sentences.

This kind of doctor, old man Lu and old man Wu don't choose. One is counted as one. They all agree to tea vegetarians. Everyone knows, "thank you, academician Lu. There are several places for Western support in our hospital this year. You and Zhang Yuan can ask which department experts you need."

"Thank you, Mr. Wu. The ophthalmology of our hospital is still OK in East China, especially the list of further studies this year has not been determined. Would you like to ask Zhang hospital?"

Come and go, everyone abides by the rules.

However, for the doctors who want to have surgery, the two old men choose more rigorous.

Moreover, you should make an appointment with others in advance. If you don't make an appointment, you may not have time. Because they are all doctors, we all know that such workers are not free in time.

Yang Yongcun was the first to arrive at tea. His future path is to be the Dean, and then go to the Ministry of health. Of course, no one came to pick him up before he became a minister. After all, he is not good at technology, he is not high in position, and the capital hospital is a small transparent hospital in the medical circle.

"Ouch, my younger martial brother, many martial brothers say that tea vegetable Zhang Fan is a tripod bearer of our generation and has never been able to see him. Today, we finally met."

Yang Yongcun, with his doctoral and master's students, went directly to the tea vegetable hospital.

Zhang Fan smiled and shook hands with Yang Yongcun. This kind of person, you can't take him as a stranger. When you meet him, you should smile more sincerely and sincerely. In addition, they are all Qiu school students, especially showing a touch of intimacy.

"It's hard, elder martial brother. Look, I'm busy these days, and I haven't..."

"What are you talking about? Look at what you said. Shifu, it's the proper etiquette for them to take it one after another. If you take it from Shige and let others know, won't they scold me for being ignorant? OK, my brothers don't talk about this. Let me introduce your martial uncle to you. "

"This is my doctor Li Hongyuan. I'll ask your martial uncle for something in the future, especially in terms of liver and gall. Now martial Uncle Wu will give his liver and gall to your martial uncle!"

Chapter 1214

When the doctor, who was much older than Zhang Fan, heard his boss's greeting, he hurried forward, "Hello, martial uncle!"

Zhang fanlue was a little embarrassed. "Oh, you're welcome. You're welcome. Come and sit first. Come and sit first."

Before he finished, Zhang Fan raised his head and saw the graduate student behind the doctor.

Well, Zhang Fan was a little embarrassed, but this time it's even more embarrassing.

"Hee hee, Hello, martial uncle!"

Zhang Fan hasn't spoken yet. Yang Yongcun doesn't like it " How can I smile? I usually... "

"Elder martial brother, this is my college classmate!"

Zhang Fan's embarrassment. To tell the truth, how many people have he met in recent years, some with sarcasm, some with indifference, and some with flattery. From the innocence and purity when he graduated to the stories full of eyes now, but there is no wind and frost on his face. Zhang fan can stand here upright and honestly. To tell the truth, he doesn't feel inappropriate at all.

But when the students in those years called their martial uncle with a flattering face, even without a little stumbling, Zhang Fan was embarrassed, really embarrassed. He is not the kind of person who feels good when stepping on someone's head. What he can do is not envy or laugh at anyone.

Zhang Fan was embarrassed, but his college classmates didn't look embarrassed at all. People, really, sometimes compared, there's really no way to compare.

At that time, this classmate was a big consumer of Zhang Fan's instant noodles. He opened a small private hospital at his home. It was not much to say. He was still quite rich to have a sister and play small cards. At that time, he was also a local tyrant in his student age.

To be honest, compared with other comprehensive schools, medical schools have simple personnel. There are not many children of big men. Even if there are, they are also children of relevant industries. For example, Zhang Fan has a classmate in the same class.

On weekdays, people are very stable. In those years, they were like teenagers older than other students. They were calm and gentle with everyone. They didn't say that they had a famous brand, a famous watch, and a rose proposal with a large grassland.

In the eyes of others, it is a child with a family slightly up the horizontal line who can wear Nike and Adie. But when they graduated, they organized job selection, filled the school, the president of the student union, and none of the students who looked arrogant on weekdays, and others quietly entered the job selection team.

Finally, when others said it, they knew that their grandfather was a big man.

Those who really feel strong and rich at home actually have a little more money than ordinary families. Zhang Fan has no money at home. Everyone in their grade knows it.

But now, when the students who felt quite local tyrants saw Zhang Fan laughing with such enthusiasm, it was definitely not like that Zhang Fan's wholesale instant noodles had no brand before. Perhaps grew up, perhaps understand the society.

Anyway, when the boy stood in front of Zhang Fan, there was no trace of embarrassment, and Zhang Fan was embarrassed and dying.

"Ah! classmate? Ha ha, I said this boy has a very good foundation. Your group of undergraduates are too strong. In particular, younger martial brother, if you don't say anything else, in terms of liver, can anyone in Manchuria stand up and point out in addition to our master's area? "

After taking over, Yang Yongcun began to praise Zhang Fan and his master's students. Zhang Fan and his master's classmates were embarrassed.

Zhang Fan's own affairs are very clear. Without a system, his foundation is barely a doctor, and the master's students know better. If the foundation is good, will he apply for Yang Yongcun's master's degree?

"Sit down! Sit down! Sit down! " Zhang Fan sat down with three people. As soon as he sat down, the little officer of the medical office came in and made tea and poured water.

Zhang Fan looked at Zhang Fan's natural appearance. He really couldn't imagine how Zhang Fan sold in the dormitory with braised instant noodles and eggs. Now, when you look at yourself, you are worried in front of your tutor, but when you look at others, you should be careful when you speak in front of others. I really don't know what it's like in my classmates' heart, but my face hasn't changed at all. I've always been excited to see my classmates.

"Younger martial brother, does anyone undertake the thesis for this operation?"

After making tea and the officer leaves. Yang Yongcun began to ask. Originally, he wanted to talk for a while and ask again. Unexpectedly, his master's degree was Zhang Fan's classmate, and the relationship seemed to be very familiar, which was a step closer.

"I'm not sure that some of the mediocre doctors are interested in this aspect, because it seems that master magic wants to participate in this aspect of the thesis, so let's have an operation first. After the operation, how do you want to..."

"No, no, I was wondering if I could name it. You know, the liver of China is too high-end for our teachers and uncles. I can't make any achievements for several years now. Hey, you don't know. It's hard for your old brother..."

Doctoral students and master's students are shocked to see that their boss is so humble, especially the master's students. They can find that the president of tea vegetable hospital is his dealer, and the students are even more shocked.

His teacher also has a number one in the capital medical circle, but he didn't expect to be so polite in front of Zhang Fan, so polite that he began to complain.

With the change of Zhang Fan's status, more and more people are looking for Zhang Fan to do business. In the past, Zhang Fan couldn't black his face and often felt uncomfortable. But with Ouyang's training, Zhang Fan now has long been soft ears.

"Elder martial brother, I can't give you any guarantee now because the operation hasn't been done. You know, although my martial uncle has done it once, there are not many successful operations in the world, so now my energy is all in the operation. After the operation, we'll sit down and talk slowly. Do you think it's ok?"

What Zhang Fan said was also very polite.

After chatting for a while, Yang Yongcun looked at too many people coming to find Zhang Fan and didn't sit for a long time. "Younger martial brother, let's go to the hotel first. Do you have time in the evening? I'd like to invite you and martial uncle to have dinner."

He couldn't invite himself, so he wanted Zhang Fan to invite Wu and Lu.

"Where can I do this? I'll give it to elder martial brother and....." Zhang Fan stumbled. This thing is really hard to talk about.

"Hehe, martial uncle, you're welcome." Zhang Fan's classmates immediately followed the conversation.

"Ha ha, OK, I'll pick you up. It's in the hotel opposite the hospital. Tea is not a good hotel. At present, the hotel opposite the hospital is the best."

Zhang Fan revealed this little embarrassment with ha ha.

.....

"Do you know what Zhang Fan liked before?" Come out, Yang Yongcun has paid more attention to the master's students who were not paid much attention to.

"Well! In the past, in the past, Uncle Zhang... Liked money!" Zhang Fan's classmates thought about it

and didn't say what Zhang Fan had done before.

"Hiss!" Yang Yongcun took a breath, "so direct?" He said to himself that he didn't know if he could send out a watch in his bag.

After seeing off the distant elder martial brother, Zhang Fan was busy receiving several academic doctors. After these things, Zhang Fan called Shaohua.

"Are you back?"

"I'm on my way. The European hospital left Mrs. Lu in the grassland for free clinic! You European Academy are so resourceful. " Shaohua chattered for a long time.

After listening with a smile, Zhang Fan said to Shaohua, "in the evening, I'll invite one of my senior brothers and former college classmates to dinner. You'll book a better private room later. Just a few of us, people without a hospital. "

"Well, OK. I got it! I'm going downtown right away. I'm calling to make a reservation. " After hanging up, Shaohua called the hotel. The hotel opposite the tea vegetable hospital is now the best hotel in tea vegetable.

In the three days, Zhang Fan received several groups to join the fun. On the contrary, it was an operation. If Zhang wanted to invite others to dinner, they said they didn't need to wait until the operation was over.

Finally, after the discussion between Wu Lao, Lu Lao and Zhang Fan, the list of surgeons was determined. The chief knife Zhang Fan, the first assistant Tang Zhenghao, director Tang is the eldest disciple of Wu Lao, the second assistant, Zhou Yihong, the eldest disciple of Lu Lao, the third assistant, and Professor Zhao Jingjin.

As for the four AIDS, there are many people, from Yang Yongcun to several doctors. That is, this operation is not a flying knife operation, otherwise, the doctor's expenses alone will ruin the family. Too many chickens.

On the operating table, Zhang Fan has the lowest education. Others are either professors or doctors. Moreover, they are all level 3 doctors of the golden mean, that is, Ben Shubo is all of the golden mean.

When the list was released, there was silence outside huaguopu. There is no one to jump out and pick things up. The top leaders are unwilling to say their identity. Almost all the sub top leaders have come, and they dare not say anything at the sub level, because the names of the four helpers are so big that people are stunned.

Moreover, not only the name is big, but also there are many people. It's a little worse to help Zhao Jingjin, which makes people want to say, but Zhang Fan has a hard top, and others can't help it.

"Hey, in the past, I was proud of my ancestral disciples in front of my classmates. When I saw Zhang Yuan yesterday, I felt that my old show off seemed very low. But I still feel like I have a card.

But today, when I saw this surgery, elder martial brother, tell me how awesome my classmate is. Almost all the people who can be famous in the hepatobiliary circle came to support it. I used to think our boss was very awesome. I see the world today! Plus Wu Lao and Lu Lao, this is directly the Chinese liver and gallbladder heaven group! "

Zhang Fan's undergraduate classmates are chatting with his fellow doctor.

"Hehe, it is estimated that the technology of liver surgery in Zhang hospital is better than that of the older generation in China, so we should contact this little martial uncle more in the future."

Dr. Shige has been much more polite since he knew that the relationship between the younger martial brother and Zhang Fan was OK.

After Zhang Fan's undergraduate students installed the force, they quietly built a group of students, and then pulled Zhang Fan in.

In the past, when I was in college, my classmates had a QQ group. It was very lively when I didn't graduate. Since graduation, this group was like dead and no one spoke.

Chapter 1215

Whether there are always enthusiastic people in life, maybe, but definitely not many. People often have self-knowledge, especially in front of people who never admit defeat in those years, the more they will hide their little dignity.

For example, the QQ group in the University was the same. In fact, we definitely talked in private, but no one spoke in the group. After all, college is different from high school. The situation of chasing each other is even more obvious. You won a third-class scholarship this semester, and I'll get one next semester. You've found a big long leg. I must find one with a high head and a high chest.

The seemingly amiable classmate love is actually the little beast that is about to make his debut or leave the mother beast. Under the protection of this university, he sharpens his sharp teeth and claws. Although there is no blood, the struggle between them is definitely not to be seen. Therefore, in universities, friends are often not in one class or department, but in other classes and departments.

After Zhang Fan invited Yang Yongcun, the undergraduate students found an opportunity to invite Zhang Fan and Shao Hua alone. Zhang Fan didn't mean to refuse. But all this is after the operation.

The examination of the operation slowly began to improve. It was supposed to be on Monday. As a result, the little girl's holiday appeared again, and Zhang fantou was big.

Women's period is very mysterious. Young women, like men, sometimes hate this period, but with the growth of age, women increasingly hope that the period will never end. To tell you the truth, the advantages of the holiday outweigh the disadvantages.

Before menopause in women, the prevalence of cardiovascular system in women is another species compared with men. Cardiovascular disease is rare in young women. After menopause, female patients and male patients are almost the same.

It can be said that men who drink and smoke account for the majority, but when women have no menstruation, they can't compare with their own bad old men in cardiovascular system. It can be seen how good this thing is.

However, for surgeons, they are as disgusted with this thing as a young man who has to drool. They will never have an operation at this time without certain special circumstances.

Because the hemolytic mechanism of female patients is different during the holidays, and they are particularly prone to bleeding. This kind of large-scale operation, if a little more blood is produced, the difficulty is one order of magnitude higher, and it is particularly difficult to stop bleeding during the holidays.

Of course, if you have to go in an emergency, that's another way of saying it. Menstrual women are like patients taking warfarin.

Talking to people is easy to bleed. Don't underestimate this bleeding easily. During his internship, Zhang Fan met a case that frightened him.

Said, a woman, in her early forties. It's really a time when there are many contradictions at home, and men are relatively weak at this time, but their temper is getting longer and longer. Maybe it softened the body and hardened the heart. Women go out to eat and drink with friends on this day of Goddess day.

I don't know what happened. I drank a little higher at two o'clock in the evening and went home. Maybe

it's because of being drunk. Women are not only a little excited, but also a little messy in clothes. Looking at women in such a state, men are angry.

Then they began to quarrel, turn over the old story and solve the scars. The more the noise, the higher the head. In the early morning, in the room, there was no one to persuade.

Quarrel, quarrel, the man to the woman's cheekbones, is a punch.

After the fight, the woman felt that she was not an opponent and went back to her mother's house with her bag. That night, the woman felt dizzy, thought it was due to drunkenness, and then lay in bed, although there was nausea and vomiting.

But women don't care. After sleeping all night, the next day, the woman was dizzy, but she didn't take it seriously. As a result, in the evening of that day, the woman was in a coma. When she vomited, she threw up on her back.

The family looked wrong. Why have they been drunk for so long? Then they came forward and saw that the woman had a painful face, and she shouldn't call it. At this time, he was in a hurry and rushed to the hospital.

Into the hospital immediately do CT, a look, intracerebral hemorrhage! And because the bleeding time is too long, it has led to brain hernia.

What is a brain hernia? In fact, it is similar to the concept of hernia. For example, the intestines enter the testis (a) pill through the groin, resulting in incarceration and painful men rolling on the ground. Brain hernia is actually caused by intracerebral hemorrhage.

The brain, the general manager of the human body, lives in the castle. Except that the enamel is harder than the skull, there is nothing harder than the skull in the body. It can be said that the brain of the human body has chemical isolation in addition to physical isolation, so the brain is easy not to get sick and ill is not easy to treat.

Intracerebral hemorrhage, small amount of bleeding, large amount of bleeding is also right. There is no way to flow out of the head.

There is only a little cerebrospinal fluid in the human brain. The blood comes in and out of the blood vessels and will not flow out at all. When the blood vessel ruptures, the blood flows out of the blood vessel into the brain, and the brain pressure becomes greater.

Then, the longer the time, the greater the amount of bleeding, the more severe the damage caused, and the essence overflows. It is especially suitable for describing intracerebral hemorrhage. What if there is too much blood? Of course, find a place to do it. Then the place where the brain is connected to the spinal cord is the weakest place in the brain.

Then the blood pressed on the cerebellum and brain stem and squeezed out of here. The structure of the brain is too tight. Where can it go out? After bleeding to a certain extent, Pooh, just like poop when farting.

The brain stem and cerebellum are pressed out of the skull, which is called brain hernia.

Intracerebral hemorrhage, timely rescue is great, just like Uncle Benshan's sketch. Walking one by one has become all kinds of hemiplegia, but once brain hernia appears, this is a fatal thing. Light people are vegetative, and heavy people are directly dead.

When the woman entered the hospital, her mother's family called the police. The man was caught vaguely. He couldn't think of it. He punched his wife out of the brain hernia. Did he have Tyson?

In fact, it's because women are on vacation and have high blood pressure. With an ordinary punch, one dies and the other goes to jail. People are fragile. In fact, it's just a fist.

Therefore, when many people are hospitalized, they feel that doctors are discriminated against and that it seems unlucky for doctors to do surgery on holidays. In fact, doctors are wronged. Doctors are not discriminating, but afraid.

It would be nice not to discriminate against doctors during the period.

Surgery, but also this kind of uncertain surgery, Zhang Fan didn't dare to take risks at all. This thing, sometimes between doctors and diseases, is actually beating wolves with a hemp pole.

The operation can be stopped, but so many experts don't believe it. In particular, old Wu was anxious to rub his hands, but there was no way. If he wanted to stay, he couldn't go if he wanted to go.

Since tea came, the operation also stopped. Well, Zhang Fan began to arrange.

"Martial uncle, please check the ward. When my Master goes to the clinic, you will check it in the general foreign language. We need to be improved."

The old man was helpless and could only promise.

After the two old men took the lead and were arranged by Zhang Fan, other experts had no opinion directly. They were embarrassed to go if they wanted to go. If they were busy, would old Wu and old Lu be busy?

The operation originally planned for a day or two took almost a week.

Some people want to go, but they dare not go, because they may have no place. I can only bite my teeth and stay in tea.

"Director Liu, Dr. Zhao Yanfang and Marubeni have recently entered a bottleneck in the anorectal experiment. Please take the time to have a look!"

"Director Wang, please bring more doctors for general foreigners. I won't arrange tea vegetarian doctor surgery these days. I'll leave it all to you. You bring a doctor alone to help. Even my master and uncle praise your liver hemangioma. There are several such patients in our hospital. Please teach me!"

For a short time, the tea vegetable hospital became the most powerful hospital in China.

If there is a ranking, the tea vegetarian general surgery at this time can definitely rush to the top of the world. Of course, although it can't last long, it's shameless for Zhang Fan to arrange surgery. His behavior of being cheap and not taking advantage of bastards is the same as Ouyang.

"Don't worry about other things these days. Just follow director Liu. I must learn director Liu's strengths in liver and blood vessels!"

Zhang Fan gives orders to Ma Yichen.

"Master, just a few days, I..."

"It's all right. Five operations a day for a week. I think it should be OK. Even if I can't learn, fur is still OK."

The mediocre interns who come to tea vegetable practice are painful and happy.

Happily, those who want to engage in general foreign studies in the future have almost met the second top experts in China these days. In the operating room, in the dressing room, when you are naked, you are even more honest. This understanding is definitely not known at any meeting.

The pain is that some people who want to do scientific research are confused at this time.

Moreover, the current tea vegetable hospital has no time for them to think about other things. I can't finish the operation all day. After work, it's almost ten o'clock at eight or nine o'clock in the evening. Girls, lovers, even craftsmen don't have time to do other things.

Lying in bed, you can go to sleep in less than a minute.

The general surgery department of tea vegetable hospital has been a beautiful scene these days.

"Experts in the capital do the operation themselves?"

"Well, according to my daughter, she is also an expert in seeing big leaders in the capital hospital. Don't believe it. The office efficiency of the tea vegetable government has decreased a lot these days. When you inquire, they say that they have all gone to the hospital for medical treatment, medical treatment for those who are sick and health care for those who are not sick.

I also heard that the general foreign affairs clinic is an academician, and there is also an academician in the ward, darling! "

"Really, I won't buy vegetables. I've had hemorrhoids recently. I'll go to the academician to show me!"

For a time, the tea vegetable hospital could not be described by traffic, because the Security Department of the hospital did not allow any vehicles outside the hospital to enter.

Chapter 1216

Everything in the world is afraid of comparison. Those with good figure dare not compare with those who are beautiful, and those who are beautiful dare not compare with those who are open-minded.

And this medical treatment is actually the same. For example, this large collection of experts is better than the usual Throwing Knife. I don't know how many there are.

It is not only good for patients, but also good for doctors.

Although Zhang Fan is highly skilled, after all, people's energy is limited. He is covered with iron and can only hit a few nails. As for the Throwing Knife experts on weekdays, their main task is to do a good job in the operation and take the money to leave.

As for training, they have no such obligation, and the doctors of tea vegetable are embarrassed to ask more. But this time it's different.

This time, most of the experts are in hepatobiliary surgery. If they just come to fly a knife, they will leave in one day, but this time is different. Many times, the top experts have shown their ability to look after the house in tea. Because there are too many experts and they don't show their skills, they will be looked down upon. Moreover, Wu Laochong was the director of general foreigners, and Lu Laochong was the outpatient doctor of general foreigners.

If you don't take care of your family at this time, when will you take it! Maybe old Wu was happy and got into the door, which made people wake up with a smile. Therefore, the second top experts came up with all kinds of solutions.

Although these doctors are second to the top, they seem to be peas compared with old Wu, but these people are almost big in one region or province.

This excited Dr. catechin. In the past, the flying knife was like watching an old man boast at the starting point. It seemed that he didn't see anything for a long time. In fact, the flying knife was the same. The local doctors had seen it several times, but they always felt that they had seen the chicken.

However, if there is no Throwing Knife, they will never. After all, they may not be able to learn when studying. The flying knife, although it seems lonely to see, can see more times. One day, I can start this kind of operation myself.

It's the same to watch old men boast, such as nausea and jet vomiting.

One day your leader met this situation, and others were panicked and said that he drank too much wine and ate too much, but you suddenly remembered the old man's boasting, nausea and jet vomiting. No, it's not eating too much or drinking too much. It's something wrong with his head.

Then you shout and take it to the hospital! Sure enough, the leader didn't eat too much or drink too much. It was bleeding in the forehead. The doctor said, fortunately, it was delivered in time! Then the family thanked you a thousand times. You are someone else's life-saving benefactor.

Finally, after the leader leaves the hospital, the climax of your life comes. The leader constantly promotes you, and the beautiful daughter also marries you. Darling, that's good. Therefore, bragging things may be used one day.

At this time, the doctors of tea vegetarians also have to study hard. The second top experts vaguely began to compete. After all, there was a comparison.

"Director Yang, in the morning, Mr. Wu said that after the operation, he would explain the postoperative treatment to the inpatient. And ask the doctor in charge!" Ma Yichen said a word to Yang Yongcun who was about to use the knife.

"Really? Well, I see. Start the operation."

After the operation began, Yang Yongcun explained to Ma Yichen while doing the operation, "your Zhang hospital is on the road of opening up and closing up. This way has relatively high requirements for doctors. If the technology is not available, it is very dangerous.

But we have another small means, such as this blood vessel. Why do we have to move it? But when you think it is more dangerous, we can change the route. Although the operation time and injury have

increased, the risk and lethality have decreased.

Look carefully, that's what you do at this time. "

Lao Yang learned that Wu might have to ask questions after the operation. When he was on the operating table, he almost taught Ma Yichen his housekeeping skills. Zhang Fan's undergraduate classmates and Yang Yongcun's doctoral students are not envious. When was his big man so talkative and patient!

But when a group of China's second top big winners came together to compete for technology, the sparks of thought kept coming out.

At the morning meeting.

"This hemangioma, we can remove it all from the side!" One director looked at the other director's operation plan and picked a bone in the tofu.

"Side? The side damage is too big, the gain is not worth the loss! " The director who took out the plan immediately began to refute. In fact, the most important thing is not the injury, but the difficulty of the operation.

Of course, at this time, no one wants to say that it is too difficult and unwilling to try. At this level, if you don't advance, you will fall back. No one wants to admit that he is worse than others.

"Maybe we can try!" Old Wu looked at the patient's examination and listened to the national hepatobiliary directors gathered around him. Old Wu said softly.

"Yes, we can try!" The director who originally refuted immediately said.

"Yes, you can try. Mr. Wu, I'm the chief knife. Can you help me? "

"I think I'm more suitable!"

Old Wu smiled and sighed, "this boy is lucky to pull so many big hands together for surgery."

"I think this operation needs four doctors. Please see, because the section of the liver is not flat. The doctor from the first perspective can be the main knife in the early stage, and the doctor from the second perspective can be the main knife in the middle stage

In the past, I also thought about this way, but it is not difficult, but not easy, to find four young and highly skilled doctors in Fangdong. I think this is an opportunity. Well, which of you would like to. I'll give you a stand. "

Wow. A crowd scrambled to do it. At this time, there is no flying knife cost to talk about. It's all the table

cost with tea, 30 yuan for an operation! However, everyone is scrambling.

This kind of surgery, this kind of discussion, these days, almost every day.

Papers, one after another, followed this kind of large-scale operation, and then slowly published from the hands of doctors who are partial to scientific research with tea.

"I'll go. Chinese people want water papers. Look, these days it's all sent out by the hepatobiliary Department of a hospital in China."

After opening the email, the editor of BMJ kept complaining to his colleagues. Among the world's four top medical journals, medical journals in Mishima are clinical, while several other journals are not clinical, but their focus is actually scientific research.

Therefore, some cutting-edge clinical surgical methods in medicine are often sent to BMJ. Of course, Chinese people, especially in education and medical treatment, are famous for their ability to take water journals in the world.

In those years, there was a joke that Chinese doctors dropped the level of water supply to a journal of Jinmao. You can imagine how high the level of Chinese doctors' water papers is.

Therefore, although the editors of Mishima didn't read the content this time, they all sent it from a hospital. He began to have a headache. "It's estimated that this frontier tea vegetable hospital will be rated again!"

Complaints are complaints, but work still needs to be done. Even if the doctors of tea vegetable write a pair of stools, they have to try a few mouthfuls and then pass!

.....

The operating room of tea Su general is busy.

The expert outpatient service of tea vegetarians is even more surging.

There are too many smart people in the world. Although Zhang Fan didn't publicize that Wu Lao and Lu Lao came to tea like Ouyang.

But the medical staff of catechin knew that they first told their relatives and friends, come on, come on, come on, come on, come on, come on. The top hepatobiliary doctors in China are out-patient with catechin these days.

Then relatives pull relatives. The government came first, the overall situation, the major enterprises and institutions, and then the villages and towns. Finally, the news spread all over the northwest. People from Su Province, Monet, even Lao maozi and several stans came.

"You are a simple cholecystitis. Pay attention to your diet and don't take medicine..." old man Lu said to the patient with a smile.

"An expert is an expert. My God, the tone of voice and kind face. Even the hands touching my mother's stomach are warm and soft. If you can't prescribe medicine, you can't prescribe medicine. If you want other doctors, you can't wait to overwhelm my mother on the bed and stab my mother!"

Just like a few drops of saliva in the oil pan, more people see a doctor.

Like the fire brigade, Chen Sheng personally guarded at old man Lu's clinic, "don't squeeze, don't squeeze, 200 numbers a day, everyone can see it. I think some people want to hang up a general clinic. After the doctors in the general clinic read it, they suggest to find an expert. Can we find an expert again?"

Chen Sheng shouted loudly and made suggestions, but everyone looked at Lao Chen like a liar. "This bad old man is very bad."

Moreover, when a doctor of this level sees a doctor, everyone's eyes are particularly bright. Anyone who cuts in the queue can break his head.

Zhang Fan's wechat group.

"It is said that Academician Wu and academician Lu are studying tea? Who can contact ah? Do me a favor. I have a relative who needs an operation? "

Suddenly, a red envelope appeared in the wechat group.

We are all social people. We all know a truth. We need money to open the way, otherwise no one will pay attention to you.

"Isn't Li Yang in our class a graduate student of Professor Yang Yongcun? When he was admitted last year, he still gave red envelopes in the group. Ask him, isn't Professor Yang Yongcun from Qiu school? Thank you for the red envelope! "

"Yes, yes, director Li Yang gave out red envelopes at that time. The three generations of Qiu sect disciples were so awesome. The saliva I admired at that time flowed out! Ask director Li! "

"Yes, yes!"

Everyone looked at the face of the big red envelope and chatted enthusiastically.

"Li Yang, director Li, call director Li. It's urgent!" In the group, the students with red envelopes began to @ Li Yang.

Li Yang is Zhang Fan's classmate and Professor Yang Yongcun's graduate student. How proud he was then, how embarrassed he is now!

When he was admitted to Professor Yang Yongcun's graduate student, he was really proud of his time, not only proud, but also made a red envelope in the group.

How proud he was then, how embarrassed he is now.

Peeping into the crowd

Chapter 1217

Peeping at the comments in the group, Li Yang's face turned red and white. This is more embarrassing than seeing martial Uncle Zhang Fancheng. In front of Zhang Fan, it has been a fait accompli anyway. He has changed from a classmate to a nephew, but if he was in front of a group of former classmates

"How embarrassing! Why didn't you introduce Zhang Fan earlier? This dealer worries about people at school and more when he goes to class. "

The people in the group haven't dispersed yet, and they have sent red envelopes and specially @ themselves. It doesn't make sense to pretend to be dead.

"Ouch, I was just in the laboratory. It's inconvenient to return information. Recently, I've been with my boss in tea vegetarians. "

"Tea vegetable?"

"Frontier?"

The people in the group are curious.

"It seems that many people went to the frontier to support the border. Didn't the boss get together with his classmates in the past. Maybe you can let your tutor help our frontier students develop. " The classmate also wants to apply for Tutor LI Yang's graduate student, so he sometimes licks both inside and outside.

If at ordinary times, Li Yang would say it politely and modestly. After all, it's still comfortable for someone to lick, but now, the feeling of licking is like a barb on the tongue, and he has hemorrhoids. It's really uncomfortable.

But now there's no way. Even if you lick it, you have to push your martial uncle out with a smile. Who makes your hands cheap, adds others' wechat, and pulls wechat into the group of students.

"Hey, that's wrong. I'm still a student now. How can I compare with your directors at work? Let's tell you good news. Zhang Fan in our class is now Lu's closed disciple and the head of tea vegetable hospital!"

Then @ he asked his classmate for help, "don't you have relatives to have an operation? You find Zhang Fan. In terms of liver and gall, his current position is more powerful than my mentor! "

After that, no matter what the tone was, he was absolutely uncomfortable. He made up his mind that he would not speak in the group until Zhenggao!

When he finished, the dead group was the same. In three or four minutes, everyone had no voice. Because the red envelope was sent in front, everyone was still a little hot. At this time, no one spoke.

There is a doctor who is going to graduate school soon.

Some have joined the work and are still hospitalized dogs.

There are also people who leave medical treatment to become drug dealers and equipment manufacturers.

And I changed jobs and became a civil servant in the Health Bureau.

In particular, some students who had a relationship with being guaranteed and studied in those years were the envy of everyone at that time. For example, a family had a strong relationship with the health system and directly selected the best tutor in LAN city.

Now, looking at the wechat group, the students who had a relationship in those years have a sour and astringent heart. They can't sleep anymore. "Oh, go to bed quickly. They have to send their tutors and children to school tomorrow morning!"

Of course, most students don't realize it.

After all, the graduation time is not long, and the gap between us is still small. It's amazing. You are a

mediocre graduate student and I am a graduate student in LAN city. At present, don't come if you don't want to travel, but everyone has a bit of spectrum in mind. Otherwise, how can the group not be lively.

"Zhang Fan? Who is the student who sells instant noodles? "

Suddenly a girl asked. Clinical medicine is a super discipline in major medical schools. There are many students, such as public health, one class a year, twenty or thirty people. If you play football, you have to find foreign aid, otherwise you can't get together, so you can't have a mixed compilation of men and women.

For example, anesthesia, two classes a year, fewer people and fewer things.

But the clinic is different. In that year, Zhang Fan had almost 2000 people in the clinical department in his grade, and there were almost 200 people in their large class. To tell the truth, there were more people in a large class than in another department.

Therefore, sometimes in school, there are many classmates in the same department who have not spoken.

And Zhang Fan, although he has a general relationship with others, he is still famous. At least he is recognized as a small profiteer selling instant noodles. Because when Zhang Fan sold boiled eggs, he talked about catties at the time of wholesale and one at the time of sale, so Zhang Fan's eggs were relatively small!

However, in any case, Zhang Fan was still a little famous in college!

In the silence of the meeting, after someone finally spoke, the group was more lively than sending red envelopes.

"Lao Li, aren't you drunk, Mr. Lu, academician? This is Qiu's school. In addition to Mr. Wu, you are sure that our classmate Zhang Fan is a student of others?"

Li Yang's heart is in tears. How long has it been? The title has changed. From the boss and director Li, he has become the old Li head next door.

The blood came out, but Li Yang had to smile and confirm: "Zhang Yuan, now it is not only Lu's student, but also the dean of tea element. Wu has a huge liver tumor in his hand. Now he has brought tea element to prepare us Zhang Fan for surgery. If you don't believe it, ask your teacher to see if the directors and experts of puwai are paying attention to tea element recently!"

"Yes, yes, our director said yesterday, but I didn't expect that Zhang Yuan in our director's mouth was really Zhang Fan who sold instant noodles!" This is another classmate. He was a primary school bully at the beginning and is now a graduate student. He is more sincere.

"Those who sell instant noodles are called work study and self-reliance. Ah, I thought that Zhang Fan was more powerful. He could not only earn his tuition, but also his studies. Ah, people can't compare with each other. " This is a classmate who works as a doctor in the general surgery department of the second second general hospital. He has been educated by the society three or four times early.

With that, he immediately looked for Zhang Fan's wechat in the group.

Not only him, there are many smart people. Many people keep looking for Zhang Fan's wechat.

"Excuse me, what's Zhang Fan's micro signal?" Then the students @ looked at Li Yang " By the way, I have time to take a picture with Zhang Fan. I haven't seen him for a long time. I miss him! " It's estimated that she doesn't remember Zhang Fan.

Li Yang was crying, "why didn't you think of him before? When he sold instant noodles, why didn't you think of him? Now I think. You want to be too timely. "

Li Yang vomited and was about to speak in the group.

Suddenly, someone said, "ah! So if we count up, must Lao Li be Zhang Fan's nephew? You see, Lu is always Zhang Fan's teacher, and Lu and Professor Yang Yongcun are brothers. You say... "

This time, Li Yang completely stopped talking. He didn't speak to anyone @ in the group. He completely began to pretend to be dead.

.....

People, sometimes we really can't say. For example, when we all know that academicians are in the outpatient service of tea vegetable, and big guys have surgery on tea vegetable, hula, groups, whether sick or not, go to the hospital.

These days, people who buy all kinds of healthy food and mattresses to treat all kinds of diseases can't even get together. Even if they send eggs, they can't send them out.

At the beginning, Zhang Fan was a little worried about the surging tide of patients. After all, most liver and gallbladder diseases have not risen to the point of being diagnosed and treated by an academician. For example, for a simple gallstone, you said it would be a waste to let an academician diagnose and treat it.

Moreover, now it has developed to find academicians not only for liver and gallbladder problems, but also for children to eat (a) bad milk. They hold the children and let the academicians see them. Moreover, they have to let the academicians touch the children and say that they can make the children smarter!

Sometimes people can't laugh or cry. People in small places finally meet big people, and the novelty is

still very fierce.

But look at the papers to be published.

Zhang Fan's remaining doubts were blown away " How are the old men? " Zhang Fan looked at the paper and asked.

Old Chen wiped the sweat on his head, "old Wu is in the operating room. He has a good spirit these days. He acts as a referee for the Danas every day. I think the old man looks better than when he came. Lu is a little tired, but I have transferred more than 20 doctors from the hepatobiliary department and reincarnation to stay with Lu. Lu doesn't have to do anything except physical examination and consultation.

Moreover, Zhang Yuan, don't worry, I'm not a mediocre intern, and the fat water doesn't flow to outsiders! "

Lao Chen has a serious report. Zhang Fan is embarrassed to say he is.

"Well, I think it's better to let the interns pass by. We can't go too far! After all, the sign of the golden mean is not. Moreover, the golden mean called me yesterday. It is estimated that it will give us some scientific research tasks this year.

Let's not do too much! "

"OK, Zhang Yuan, I'll arrange it right away. Zhang Yuan is right. We did it. The golden mean side is also embarrassed to give us too bad scientific research tasks. Alas, my vision is still short-sighted! " Old Chen immediately said seriously.

Shook his head, Zhang Fan didn't say much.

.....

In the office of BMJ, a bearded editor looked at a paper sent from tea and frowned more and more.

After thinking about it, he stood up and went to the editor's office.

"Boss, look at these papers."

"What's the matter?" The editor in chief glanced at his men.

"I think we need to apply for scholars' review. Although these papers are not the frontier field of the liver, their findings in liver surgery deserve our attention. And these papers were all recently sent from the same Chinese hospital. "

"Huh? Let me see! "

"Well, it's necessary for scholars in liver and gallbladder to have a look in person. I'll apply."

The editors of top medical journals are often people in the medical industry. After the preliminary review, they select high-quality ones and give them to some big winners in the industry. The publication of a paper is definitely not like that of an ordinary Chinese Journal. As long as you make money, people will not care whether you write a beautiful teacher or a brave teacher. Anyway, when the money comes, the paper will be issued.

"I suggest that this paper on Oddi sphincter stenosis and constrictive Vater mastitis (a) of tea element be added to the latest issue. This article is very weighty and helpful to an experiment of the Royal Academy of Sciences!" After reading several papers on tea, a general foreigner of the three island royal family called the editor in chief directly.

"OK, I see!"

.....

More than a dozen magnates gathered together, which was really a great force, and one by one, in order to show their hands in front of Mr. Wu and Mr. Lu, they really broke out the details accumulated for several years. All kinds of difficult and complicated diseases and operations with high difficulty coefficient have been done in tea element hospital.

This makes everyone stare at the tea vegetable hospital more and more.

"I'll go, portal hypertension side key channel, they are beginning to popularize? Only big men can do it in our hospital now. This tea vegetable is too awesome! "

"You didn't see who people are in the hospital these days. Don't talk about the top ones. Look, the deputy director of the golden mean, the deputy director of Shuimu, the deputy director of Xihua liver and gallbladder, the deputy director of Yaxiang, and the deputy director of Huxi. If they stay for half a year, their general foreign doctors of tea have trained. So many mobile phone meetings, hey, I want to see them!"

Two doctors from the fourth hospital in Shaanxi looked at the official website of the tea vegetable hospital and felt depressed.

Laymen watch the excitement. Everyone thinks that the academician of the tea vegetable hospital has come. How face it is.

The experts watch the door. These big winners stay in the tea vegetable hospital for so few days, not just a few days. In fact, they have improved the level of tea vegetable general surgery a lot.

"Hey, come on, the date of giant tumor surgery has been set. You see, it has been published on the official website of catechin."

Finally, the red light ended and the girl's operation schedule began to be arranged.

Chapter 1218

Life, sometimes too helpless.

When I was young, I had physical strength, body and experience, but I just didn't have the courage and thin skin. When the thick skinned and bold, the man who was the most moved in his heart had become a young woman.

Of course, some people thought that this was the pillow man of their whole life. As a result, they went out of the University. When it came to pots and pans, oil, salt, soy sauce and vinegar, they wanted to cover the people around them with towels.

However, most of them regret that they didn't do it at the beginning. After all, there are still a few young and cheeky people. But once you enter the society, to tell you the truth, the speed of growth makes people look afraid. I don't know whether it is the lack of college education or the reason why the society is too complex.

Zhang Fan's mobile phone, like a chicken with a plague, shakes endlessly. Students who have experienced in society, both men and women, hurriedly sent wechat to Zhang Fan. Of course, not all of them can do it. Those who can do it and those who are willing to do it are those who are worried about the current situation.

"Hello, handsome boy, remember me? I guess you've forgotten me. I, Wang Lili, the former study committee member of the class, am now a graduate student in LAN city. It's said that the scenery of tea vegetable is very good, isn't it? It's called little Jiangnan beyond the Great Wall? After a few days off, how about I go to see you for a trip! "

After sending the message, I felt as if I owed something. After thinking about it, this classmate Wang Meili selected several pure and artistic photos and sent them to the circle of friends for summary, and then wrote a paragraph, "I miss the ham and eggs after college and self-study in the evening!"

This shocked everyone. Wang Lili, I'm kidding. There were quite a number one figure in the University, not to mention the students. Even some young teachers seemed to be interested in her. Was the instant noodle seller so good?

Wang Lili's plastic friend quickly called her, "Lili, do you really have an affair with the instant noodle seller in college? I remember he seemed quite strong, didn't he? "

"Bah! I really want to have an affair with him. Now you're going to call me the president's wife! " Wang Lili reluctantly replied, and she really regretted it. Why didn't I find out that the boy was a character!

"Why are you so ambiguous!"

"I'll go. Are you underage or do you think you're a student. Life has let everyone slowly lower their heads, but I'm almost kneeling down to life. I don't want to find a way to wait for wrinkles on my face. Do I really have to face pots and pans one day? "

It turned out that Wang Lili talked with a classmate for several years when she was in college. The other party had a private hospital at home. She was very rich. She loved sweetheart when she was in college. As a result, as soon as she graduated, the child found a graduate student and left.

But she didn't learn well. She can only work in a small hospital in LAN city. She's unwilling. Can she not be excited to find a big crocodile in the group today. After all, it's better to be a classmate than to find an old man who is ten years older than her, although Zhang Fan's appearance has been blurred.

"Zhang Yuan, ha ha, I'm Wei Jianming from your upper bunk. After graduation, I didn't have your contact information. I can't find you. Today, I finally found your wechat. Oh, it's really a hurry. My graduate student will graduate right away. I'm also a coward. I miss you when I have time to talk to my brothers ~!"

Zhang Fan is also wondering why there are so many text messages today? But Zhang Fan didn't see it, because at this time, Zhang Fan had a meeting in the conference room.

There are a lot of people in today's meeting, and several departments have a joint meeting.

Patients with huge tumors are going to have surgery. This is the last discussion before surgery. Because the surgery is special, many people participated in the discussion. There are also doctors from various auxiliary departments, nursing department and some laboratories. Anyway, the small meeting room is full on weekdays.

Many operations, especially those with high difficulty, are like a paper. Many people want to hang their

names. It's hard to say whether this atmosphere is good or not, but sometimes Zhang Fan really can't refuse the benefits brought by others in order to hang their names.

For example, in order to be named, Yang Yongcun directly added tea element hospital to the scientific research project of the capital hospital to the hepatobiliary department. To tell the truth, the capital hospital, if you look at the scientific research strength, is actually enough. Every year, it replicates and experiments some other people's scientific research achievements, which is called independent repeated experiment!

There is no effect. I don't know if I can find the deviation of others' idea, but they have a lot of money. The government can't afford to sell the pants to the tea vegetable hospital for one year's scientific research funds. Even now it has become a direct management unit of the bird market, it is estimated that the frontier can't give so much.

Therefore, the combination of Zhang Fan and Yang Yongcun has a vague feeling of win-win.

There are many win-win situations. Anyway, Zhang Fan doesn't matter. Old man Lu is a little reluctant. He thinks Zhang Fan is not a gentleman, but old Wu thinks it's nothing. Although one of them is in the place and the other is in the army, old Wu sees it more thoroughly.

Don't look at the old man who is famous now. In fact, it was difficult to jump out of the general hospital to be an independent president in the early years, but old Lu was different. In fact, the old man was not very difficult and sad.

Originally, the school was awesome, and then his level of surgery was also powerful, and his scientific research was even more powerful. Moreover, the old man originally pursued less. Unexpectedly, he was pushed up passively after his doctor graduated.

From the director of the Department to the president of the hospital, the old man has been following the wind and water step by step. Even if the president of Bluebird doesn't give it to him, others can't take it away.

Therefore, people's fortunes are different, and their personalities are actually different. Therefore, Lu's requirements for his disciples are more textbook, while Wu's requirements are more mellow. To use an analogy, old man Wu is a little similar to the old man who let lady Mishima kneel down. He rises and falls three times and is tenacious.

Old man Lu was slightly as rich as the Zhao family general for a lifetime. Therefore, the old man is relatively more innocent.

When I first saw Zhang Fan, to tell the truth, Wu really envied his younger martial brother.

In the old man's words, there are such good disciples, and the disciples came to the door with a big flag ~! Old man Lu thinks that he is good at looking at people. Anyway, Zhang Fan has succeeded. Old man Lu

can say whatever he wants, and others can only envy him.

In particular, old man Wu looked at Zhang Fan, who presided over the preoperative discussion. Whether it was the directors of various departments at hand or the experts from other hospitals, they all fell in front of Zhang Fan. Although Zhang Fan is the youngest, his momentum has vaguely risen.

Of course, Ouyang is not here today!

"Let's go over the complications and possible crises of the operation again..." Zhang Fan said one by one with the cases, and then we discussed them together.

In many industries, the impact on authority is estimated to be great. But medical and military are really very similar.

Once the superior cannot control this thing, or the superior doctor cannot crush the subordinate doctor academically or technically, the rebound is also particularly strong.

Either the subordinates overturned the former superiors, or they checked the family background and everyone broke up. There are only a few top-level medical teams in China.

For example, Lao Zhong's and Lao Hu's, I don't know why. They often appear. Once the top team soul withdraws, the team also withdraws. There can't be the second generation of cow force. Then the cow force team is fragmented and has no name in the Jianghu.

After all, after the first generation disappeared, people came out of the second generation, and old man Wu's fame was poured oil on the fire. Now, how did old man Wu rush to the top, and now he has to copy the third generation.

There are only envy, jealousy and hatred left for other bold leaders. To tell the truth, there are definitely a lot of naked jealousy.

Everyone is a cook. Why do you have an heir? It looks like it will continue for three generations. Is it the past!

Although I don't say it openly, I often call old Lu and old Wu these days.

The bosses of major liver and gallbladder centers almost called.

"Are you sure?"

"Are you sure?"

"Is Zhang Fan a little young? Is he experienced enough?"

Anyway, the inside and outside meaning is, can you do it! To tell you the truth, don't let us hang.

Of course, ordinary doctors think differently at this time.

In the past, Zhang Fan and Ouyang looked all over the world. To tell the truth, Zhang Fan and Ouyang didn't come to take it except Zhao Yanfang.

Just like now, Zhao Yanfang is used by Zhang Fan like a donkey. Where there is a fire, where to send it. But today is different. This time, many powerful doctors, or doctors with ability but no chance, don't need to be invited. They come by themselves.

Why, it is because of this operation that Zhang Fan really wants to succeed. The liver and gallbladder system shows that Zhang Fan has ended the mantle of old Wu.

Because of this operation, when old man Wu finished it, it was like the beef tendon meat frozen in the refrigerator. Everyone knew that the meat was delicious, but no one could cook the beef tendon.

I'd rather freeze it somewhere than provoke it.

Once a doctor fails once, especially in such a difficult operation, it's like a famous lady Cheng. It's too difficult to think about it again. Of course, this is for top doctors, ordinary doctors don't care.

At the meeting, Zhang Fan said one thing, everyone passed one, one by one, and no one felt impatient.

The head nurse in the operating room was fidgeting at this time because she couldn't understand. It was OK in the early stage. When the difficulty of the problem increased in the later stage, she couldn't understand it. And Zhang Yuan's phone also bothered her more.

She stared at Zhang Fan with big eyes, which seemed to look at Zhang Fan with ambiguous eyes.

Unfamiliar people also think what happened to the head nurse and Zhang Fan in the operating room. In fact, the woman is complaining about Zhang Fan at this time.

"Surgery tomorrow! Everybody, please!" Finally, the meeting was over. Zhang Fan stood up and bowed gently to you.

At the beginning, Zhang Fan didn't feel anything, but when the telephone of master and martial uncle was like a hotline, and the bosses from all directions called for inquiries, Zhang Fan realized that the significance of this operation was different.

Not only for the patient, but also for him, for master and uncle, we must be beautiful.

.....

Ouyang in the pastoral area doesn't pay much attention to the tea vegetable hospital these days.

After all, Zhang Fan's two academicians and predecessors are in the hospital. If something really happens, her attention is useless. So the old lady really enjoyed herself these days.

Appropriate labor intensity, and then fresh air rich in oxygen molecules, eating pollution-free food, not only Ouyang, but even old lady Lu seems to be several years younger.

Chapter 1219

"Here we go!"

"They have gone in!"

"Old Lu didn't enter the operating room, old Wu went in, but there was no old Wu among the operating personnel!"

"They opened a live broadcast of education within the system of the Ministry of health."

When Zhang Fan entered the operation, almost the leaders of hepatobiliary surgery at the top of China were reminded by their subordinates.

"Show off, naked show off! Old man Wu has done it for decades. Who else has done this kind of operation? Now it's live again. Is this showing off their technology? "

In the capital, a stubborn old man scolded his mother in the digital hospital, but opened the health education network with a sharp hand. In the early years of China, the army was the eldest brother, and the Navy and air force were all pendants on the eldest brother's legs. Then the materials and everything were given priority, but later, the big brother didn't seem to be paid much attention.

Then all the parts on big brother's body trembled at the previous pendant. For example, air hospitals and sea hospitals all over the world. In the early years, they could not even compare with police hospitals.

But later, with the inclination of materials and talents, the air academy and sea academy became more and more powerful. For example, in China and even in the world, liver and gall can't jump over the

Haiyuan where old man Wu is located. Therefore, the relatives of the poor Lu Peng in the past are now even rich to open a live broadcast to show their gold chain.

What's all this! How can the old men in the digital hospital be proud. What a bully.

Other major hospitals and universities are also concerned about the operation.

After all, liver and gall are not anorectal.

For example, there are many operations with high anorectal difficulty coefficient, but few people can pay attention to it. After all, liver and gallbladder are large departments, and a large part of the whole medical community are operating liver and gallbladder.

Moreover, the participation of many doctors this time has directly led to the attention of colleges and universities, even the Ministry of health and the Ministry of education.

"The master knife graduated from our school?" Among the top hospitals in Lanzhou, the president is also a general foreigner. He also watched the live broadcast of the teaching operating room in front of the computer.

"Well, after graduating from college, I went to Western support!"

"Why is Lu Lao's student again? Such a person should stay in LAN city. Doesn't he have a place for my master's students every year? "

The dean's eyes are almost drooling. Like 504 in Lanshi, the medical treatment in Lanshi has almost become a bragging historical capital. It's like people in Mandarin coats despise upstarts. Our ancestors were also rich.

Medical treatment in Lanzhou and industry in Lanzhou are still very powerful in the third tier era. According to the boasting of the geography teacher in those years, if you fight with golden hair, do you think people will blow up the capital? Can you blow up magic city? No, first of all, the first round of destruction should be Lan City.

Of course, I can only say so. After the third tier era has passed, not to mention Xihua, even the mutton bubble next door has come to fly a knife. Just like 504 later selling ice cream, you can only blow the past.

Therefore, seeing such a young doctor carrying the tripod, the president can only lose his temper and

complain that the president of the medical school is incompetent. He should be allowed to serve as the president of the medical school!

.....

Zhang Fan is busy with surgery these days. He doesn't worry about wechat groups. However, the wechat group of Zhang Fan's University classmates has been a little busy these days.

"Students, among our classmates, Zhang Fan has led the trend. He is the first to directly open the operation live on the medical education network jointly organized by the Ministry of health and the Ministry of education. Whether it's a general foreigner or not, let's gather popularity!"

"Good!"

"Yes!"

"What the monitor said is that Zhang took us to support you. I must read it from beginning to end today!" Wang Lili is very enthusiastic. The top words are in bold!

Although it's lively, I don't know how many people will go to see it. After all, can ordinary people see it? If you could have a look, why didn't those under old man Wu stand up and say that he would do it?

.....

"Well, are you ready?" Old man Lu arranged Zhang Fan's hat and mask at the door of the operating room.

"Don't worry, master, you can succeed!"

"Well, I'm sure I can! Come on. " The old man watched his apprentice enter the operating room, but he was worried.

This kind of operation is too difficult.

Although it's live, it's still broadcast. It's not live, just like a party. In this regard, the technicians of the website are still very confident.

Health education has been rolling the simple introduction of the operation and the simple information of the participants of the operation on the Internet.

Chief surgeon: Dr. Zhang Fan, President of the Affiliated Hospital of the doctrine of tea, is good at hepatobiliary, gastrointestinal, spinal and joint surgery, especially in hepatobiliary tumors, liver hydatid surgery, knee and hip joint. He has participated in and presided over many large-scale rescue, participated in and organized rescue and disaster relief for many times, and went abroad to give lectures

and operate at the invitation of international friendly countries for many times, which has made a certain contribution to the good neighborly friendship between China and other countries.

Moreover, Comrade Zhang Fan won the honorary commendation of the top ten outstanding young people of tea in 2009. He is one of the outstanding representatives of post-80s doctors in China.

To tell the truth, Zhang Fan's profile actually has more, but the editors of the health education network dare not write up. What is good at extracranial and extrathoracic surgery? He specially asked his superior, who asked the leaders of the Ministry of health.

Finally, the leader looked at the introduction of a few pages of paper and sweat came down on his head. Unexpectedly, there was such a giant in the frontier. Finally, the leaders considered and limited the disciplines Zhang Fan was good at, just hepatobiliary and orthopedics.

After all, Zhang Fan's teacher is courageous, but his practice is orthopedics. Forget the others. Don't let people who don't know the inside story scold us for being drunk! Just put it out on the surface. Putting too much is a bit of a blow to the confidence of other doctors!

First aid: Professor Tang Zhenghao, President of Jiangsu and Zhejiang Yifu hospital, is good at liver tumor surgery. He has been in the field of liver in China for more than 20 years

Second assistant: Professor Zhou Yihong, President of magic capital foreign hospital, is good at liver tumor surgery. He has been in the field of liver in China for more than 20 years

Third assistant: Professor Zhao Jingjin, vice president of the tea element golden mean hospital, is good at the operation of huge liver hydatid, and in terms of liver parasites in China

Fourth assistant: Professor Yang Yongcun

Special adviser: Academician Wu, academician Lu... After a long list of names, the last one is deputy secretary ouyanghong!

There was a taste of leaders' summary in it. In fact, it would not be broadcast live, but there were too many leaders' attention, so the health education network discussed it and won the consent of Zhang Fan, patients and their families.

However, in terms of the list of consultants, Zhang Fan made a request that the European Academy must be added.

Among the academicians in a row, there is a secretary at last. The leaders of the health network are big, but there is no way. Zhang fan can't provoke him!

.....

When looking at the profile, others are better. After all, they are not familiar with it. Anyway, there are many geniuses.

But Zhang Fan's classmates are not a taste in their hearts.

Because they become a background wall.

"I'll go. I came in with my hands low. You see, the whole chicken here is Professor Zhang Fan's hand, heart plug! "

"Hey, Zhang Fan is not a professor! It's okay, we still have a chance! "

"I'm blind! Doesn't that mean they're awesome? You and I are still doing chores under the Deputy master! "

"He is one of the top ten outstanding young people. Will he be a River scholar in a few years! Does the future have to be an academician? "

No one speaks in the wechat group!

.....

"This is the liver and gallbladder heaven regiment of China!" Doctors engaged in liver and gallbladder looked at rows of introducers, and there was a feeling of blood surging in their hearts.

"If I could have an operation with these gods one day, it would be worth dying!"

Just as the tea element was preparing for surgery, the latest issue of the Mishima medical journal was released, in which two papers on the tea element in the experimental hospital were successively put on the liver and gallbladder.

This kind of thing is so rare that doctors feel that the editor of Mishima journal is drunk!

Chapter 1220

In the operating room, the little girl has been lying on the operating table, and the shadowless light has been turned on. If the little girl is half squatting, I don't know. I think the little girl is going to have a caesarean section because her stomach is too big.

When the girl lay down, she didn't have to lift her head. She could see that her navel was coiled on her belly like two meat worms. Or as the big * * eats too much and feels like he has to push his intestines out of his navel.

If the medical profession is described anthropomorphically, it will bully people. Bullying not only patients, but also doctors. The more people who have worked in this industry for a long time, especially those doctors who have been struggling in clinic for more than 20 years, the more they understand this sentence.

The success and failure of surgery are often determined before surgery. Only a few operations are serious and rely on doctors to turn the tide. Moreover, this depends on the joint cooperation of patients and diseases.

In surgery, there are two unforgivable sins. The first is to do an operation that doesn't have to be done. The second is that a doctor doesn't have the technical ability to complete the operation. Therefore, there is a classic saying in medical treatment: the more you do, the greater the risk.

In particular, some operations without perfect examination, and some anxious patients who are anxious and have the ability to affect doctors and even hospitals, often the more this relationship is, the more likely it is to have problems. Therefore, in some small hospitals in small places, it is a knife in the hospital.

Just like Baijiu in different areas, the brands that you like are changed every year, because they drink too much and are easy to drink. But a knife in hospitals is also the same. The smaller the hospital, the less resistance it is, and the easier it is for a knife.

Yes, of course. Large hospitals are not not bad, for example, a year of pancreatic cancer surgery, the two top master of North and South gathered in the capital hospital, the anesthesiologist is the top, the roving nurse is the top, and the patient died on the operating table.

Then the experts in the north were dismissed, and the competition for the president of the super hospital by the experts in the South became a thing of the past.

There are two words in the doctor industry: one side is to practice thousands of songs and then know the sound, and the other side is to watch thousands of swords and then know the instrument. One side is doing nothing and killing others is the dogma of famous doctors. To tell the truth, most people don't believe the second sentence. Everyone likes the first sentence. After all, who didn't want to fight all over the four directions when he was young.

Therefore, when Mr. Wu came to tea with the surgery that no one had done after he had finished that year, the liver and gallbladder circle looked as calm as an unopened coke. In fact, the coke had been shaken up and down countless times, waiting for the moment when the lid was opened.

Because Zhang Fan is too young, some people may have no hope of killing Zhang Fan. So when there is a strong disciple of three generations in Qiu sect, at this time, everyone is watching and failing. Just as nothing has happened, we continue to live in the past and compare who will live longer.

If successful, many people have figured out what to do. It's estimated that it's impossible to crack down on ridicule. Old Wu and old Lu are in charge. They can't beat and scold. Can they still prevent me from joining? This is also the reason why many people pretend not to see their doctor running to tea.

To tell the truth, Zhang Fan didn't expect that this operation could make such a big noise. In fact, old man Wu and old man Lu didn't expect it.

In the past, old man Wu's operation was completed, and then slowly fermented, and then slowly became a overlord. It's not that his master is not famous. Other masters are known as the first generation hanging king. It's not that the old man's own technology is not high. The old man is known as the second generation hanging king.

But now it can't be compared with the past. In the previous era, people were concerned about what food the next door neighbor ate today, what dishes he fried, and whether there was meat. Nowadays, people may not know their neighbors, but the gossip thousands of miles away is still very clear.

For example, Lao Ke slept with Xiao Lai, and people all over the world celebrated with firecrackers every minute. So the old didn't expect it, and the small didn't expect it.

If Lao Gao hadn't stopped, tea vegetable TV would have wanted to come in for an interview. People outside the industry think this is a happy event, which is the result of Dr. catechin's efforts. In fact, Zhang Fan's eggs were shrunk before the operation.

This kind of surgery, old man Wu was fighting his own technology and gambling on his own future. What for? To get rich for promotion? No, old man, even if this super difficult operation is not done, no one will blame him.

He can still get to his present position step by step. But once you do it and fail, it's not something you can understand with your mouth. Therefore, a doctor should cherish feathers, but if you cherish too much, you won't be a good doctor.

And Zhang Fan, if he doesn't take the operation, even old man Wu can't say anything. After all, the operation is too difficult, and Zhang Fan's gambling is actually the way of the future. Now he actually doesn't need to gamble. Lying on the road paved by Ouyang, old man Lu and old man Wu open the way

in front of him. Just follow him. Yes, once you bet and win, you may not have any big improvement. But I lost. I don't think I can lift my head for decades.

Therefore, people, without pursuit, are actually very moist.

For example, doctors treat ordinary diseases without pursuing them, and they don't worry about other high-quality products. They see several patients a day, prescribe some prescriptions, collect some kickbacks, and pull the zipper of their pants with female medical representatives from time to time. In fact, it's quite good.

Fortunately, if you become a dean, you will be more comfortable. You can zip your pants with the medical representative outside, and you can flirt with the beautiful head nurse inside. That's all the fun of life.

However, as long as there is pursuit, it is quite difficult.

However, the world still needs people to go through difficulties. Everyone zip up their pants, okay?

The operation began.

On the little girl's big belly, waves of iodophor gauze were wiped several times. Ma Yichen is the disinfection doctor of this operation. For this quota, Ma Yichen and several doctors robbed it. Fortunately, this is someone else's land, and the main knife is someone else's teacher.

"Master, all right!" Ma Yichen looked at his young master in a low voice and worried. To tell the truth, Ma Yichen didn't know what he felt. He had both the idea of dissuading master and the idea of being proud of master.

In short, this feeling is very complicated.

"Good!" Zhang Fan nodded and his eyes were pulled out from the patient's CT and MRI. Zhang Fan nodded to old Wu.

"Martial uncle, I'm ready." When Zhang Fan finished this sentence, his temperament was different.

If before the operation, Zhang Fan is a little sheep, and when the operation is about to begin, Zhang Fan's eyes are obviously different, as if I were the boss here.

"Good!" Old man Wu originally wanted to cheer Zhang Fan up, but when he saw Zhang Fan's spiritual head and eyes, he couldn't say what he wanted to say. The old man obviously felt that he was a guest here, not the host.

The owner here is Zhang Fan!

After Zhang Fan finished speaking to the old man, he looked at two elder martial brothers, Zhao Jingjin and a group of assistants beside the operating table.

"The operation begins!" Then he stretched out his hands, and there was a slightly yellow iodophor on his detoxified arm. The head nurse in the operating room put on Zhang Fan's clothes early. Then he gently tied his belt behind him.

Finally, he gently pushed fan's waist with a half clenched fist.

Zhang Fan went on the stage, "turn on the light!"

The itinerant nurse immediately stood on the small bench, grabbed the shadowless lamp and began to adjust the light.

"How about Zhang Yuan?"

"Well, good!"

"Anesthesia?"

"Zhang Yuan, the anesthesia is completed. At present, the patient's physical signs are all normal. The ventilator works well and can be operated on."

"Good!"

Then the hand stretched out and snapped, and the sharp knife was put in the hand with sterile gloves.

"Timing!"

After Zhang Fan said the timing, Tang Zhenghao and Zhou Hongyi immediately took two gauze, pressed it tightly on the opposite side of Zhang Fan and pulled the patient's skin, while Zhang Fan had a knife and gauze in one hand. Zhao Jingjin took a big plastic pipe like drinking milk tea and was ready to suck blood.

Knife, matte sharp knife, across the patient's skin. For this operation, Takeda medicine of Marubeni has a contract with tea element hospital. As long as it is tumor surgery, the first partner is Takeda enterprise.

The pharmaceutical enterprises in Marubeni also have a foothold in tea. All tumors belong to Takeda, all endoscopes belong to Olympus, and Mao ertai is responsible for cardiovascular

Therefore, all the instruments for this operation were prepared by Takeda for Zhang Fan. Moreover, people have specially measured Zhang Fan's palm. It took a whole week to measure it at the beginning. Although Zhang Fan seems to have no particularly obvious advantage, after using other people's instruments several times and using domestic surgery, it seems that something is wrong.

The sharp knife cuts through the skin. Zhang Fan's speed is very fast. The patient's skin is as thin as a translucent plastic in the operation of this huge tumor. What's the same with this thing? In fact, it's really the same as a pregnant woman who is about to give birth.

Moreover, it is thinner than ordinary pregnant women, and the blood vessels are obviously like blue lines pasted on the belly. At this time, we must not be slow. Once slow, great pressure will tear the skin.

Quickly, with a knife, the patient's rib handle is directly drawn to the navel, and then without a trace of pause, an arc turn is made near the navel to bypass the navel, and the blade continues to slide down along the abdomen and directly to the pubic symphysis.

tell the truth. How fast is the speed of this knife? When the blood beads near the rib handle haven't condensed into shape, Zhang Fan's knife has reached the end.

It can be said that this knife directly broke the patient's abdomen from the middle.

This kind of operation would rather be big than small. It is different from other operations. It reduces the strength and wound area and reduces the damage.

This kind of surgery, would rather damage a little more now, but also to open the field of vision and clean the tumor. If the tumor is not cleared, even if you cut a millimeter, it is a failed operation.

"Press!"

Zhang Fan didn't talk much during the operation. Unlike other old doctors, they usually look serious and pedantic. They don't joke with anyone. They are estimated to be serious when playing with their wife.

But when he got on the operating table, he drove up and said that the nurse didn't sleep well last night. Was it too late to play? I'll tell you a story later.

Anyway, Zhang Fan doesn't like this. Even if it's a simple operation, Zhang Fan doesn't talk much. So in tea, nurses don't like to have surgery with Zhang Fan. After all, it's fun to talk and laugh. They can not only learn knowledge, but also gain insight. After all, greasy uncle has seen a lot.

But when Zhang Fan said the pressure, the two elder martial brothers and Zhao Jingjin stuffed their hands into the patient's abdominal cavity at the same time and pressed them directly on the abdominal muscles.

This huge tumor is so big that the belly can't stop it, so once the pressure is removed, it often expands and breaks like a balloon.

Once it ruptures, the liver ruptures, darling, you don't have to operate directly. Therefore, three hands, like six big Pu fans, all ten fingers are separated and climb above the tumor like a net. This force can't be

big or small.

Big, will crush, small can't stop!

Chapter 1221

Once the operation starts, once the first knife goes down, if you want to go back on it, the Jade Emperor can't come.

Therefore, surgery is actually a serious and regretless husband. Of course, this regretless husband is compared.

"Zhang Yuan, blood pressure dropped!" Just entering the muscle, Lao Huang in the anesthesiology department was as sharp as a snake bite his foot. The tone that is lowered but deliberately raised to make people alert is really like the hard friction between plastic and glass to squeeze out a voice that makes people stand up.

Zhang Fan's blood pressure dropped before he put down his knife.

Old man Wu pinched his fists under the operating table, "why is your luck so bad!"

A group of four assistants looked at each other. Some people, especially those who have been oppressed by their tutors or directors for many years, don't have to open their mouth and their eyes are full of words.

"It's over!"

"It's hard to say!"

"It's hard to say. At the beginning, the mutated blood vessel broke. I guess I'll finish the operation. Hey, I knew I wouldn't come."

Some people regret that they are greedy for honor and mixed this mud.

I'm anxious to find a way. I want to give Zhang Fan some advice.

There is absolutely no third category.

After all, they are professionals.

Tumors are very domineering, such as blood vessels and nerves. Even if they are broken and re derived, they grow according to the instructions of the brain. The brain lets it go through the back door, and it will never go through the front door. But the tumor is different. As long as all kinds of immune cells in the body haven't hit it and let it take root.

This thing began to bully the market. It won't listen to the orders of your head. It will let the blood vessels grow as long as it wants, just like a bad uncle with a lollipop seduces a little girl. The blood vessels grow disorderly with the tumor.

How do you describe this thing? The tumor is actually like an unshaven yam, surrounded by capillaries.

It can be said that as many blood vessels can grow, this thing will grow as many blood vessels. If you simply look at the tumor, it is like Ouyang's cactus, and the blood vessels are covered with cactus like thorns.

Generally, when small tumors are removed, a pair of vascular forceps, like the forceps of mutton string, are inserted into the abdominal cavity to clamp the blood vessels, and then ligated one by one. Finally, like eating pink strawberry ice cream, the pink ice cream is scooped out bit by bit.

But big tumors are different. Many blood vessels grow faster than tumor growth. Blood vessels have been pulled straight like fat man's autumn pants tendons. The fat man suddenly jumped. His stomach pressure was great, the pooch tendons broke, and fat man's autumn pants fell down, revealing his fat ass like a millstone.

This is the case with large tumors. As soon as the abdominal pressure changes slightly and the tumor position moves forward slightly, the blood vessels break.

In those years, Mr. Wu didn't meet him. This doesn't mean that Zhang Fan is not as good as Mr. Wu, but that Zhang Fan is not as lucky as Mr. Wu in this operation!

Sometimes, you can't believe in luck in medicine.

"Come on, boost the pressure, speed up and enter the abdominal cavity. Spreader, come on! "

"More spreaders, vascular forceps, large retractors, gauze blocks, hurry up!" After Zhang Fan said the first sentence, he couldn't care to speak. At this time, Tang Zhenghao acted as a conductor.

This is the assistant, this is a powerful assistant. If he meets a novice, he is probably stunned at this time. His blood pressure drops like a roller coaster. His mind is full of falls, can't stop, can't stop.

With a knife in one hand and gauze in the other, Zhang Fan began to March rapidly into the abdominal cavity.

At this time, we still need to pay attention to the level and anatomy. Now is the time to rush. If we enter the abdominal cavity and find the bleeding blood vessels before the booster drugs are completely ineffective, the operation can continue.

If not, the operation will end directly. Zhang fan can only cry in the arms of old man Wu and old man Lu.

Old man Wu frowned and thought. He wanted to wash his hands, but he looked at Zhang Fan and the people around him. The old man decided to wait.

In fact, the old man also knows that in terms of speed, he is not Zhang Fan's opponent for a long time now. His participation can't help much. It's better to help as an outsider.

"Who has more research on shock?" The old man asked.

At this time, one of the four aid doctors didn't hesitate, "old Wu, I'm from Shanzhong Medical University, mainly focusing on liver and blood vessels."

"OK, you can evaluate the patient's bleeding and the next drug treatment. Come on."

"Good!"

On the other hand, a doctor from the first affiliated university of Jiangsu and Zhejiang, who was also in the direction of liver blood vessels, hesitated a little, and he didn't stand up.

At this time, Zhang Fan has nothing in his mind. He worries and hesitates. He has nothing. Now he has an idea. Be fast, be fast, and enter quickly.

So, people can't be forced. We can't make heroes by waiting and relying. We can only train heroes of steel when we are in a desperate situation.

The knife and sharp knife become round knives. Yaguang's knife is like a pair of chopsticks in Taotie's hand. It swims in the abdominal cavity like raindrops. The gauze is soaked with blood one by one. Zhao Jingjin is sweating and holding the tube of the attractor. His eyes are staring at Zhang Fan's knife for a moment.

Where the knife is, the attractor is.

The delayed live broadcast suddenly seems to be disconnected from the network and has been turning in circles.

"What's going on? Tens of millions of funds a year can't even get a network. What does the boss of the Ministry of health do to eat? "

Some attending doctors who climbed in front of the computer wrestled the mouse in their hand. They had the opportunity to see the legendary Qiu sect knife technique, but now they can see Zhang Fan holding a knife.

"Something's wrong!" Some big men frowned and talked to themselves at this time.

"It's still a little tender. It's estimated that the old man will go."

"Hey, the old man is so old. Can he do such a big operation?"

For a time, the hepatobiliary department in China was filled with an unknown atmosphere.

Although we usually think that the old man has occupied the position of the leader of the Jianghu for too long, at this time, the first feeling in our hearts is that Zhang fan can fall, but the old man can't fall.

After all, the old man represents the rising generation of China.

"Grandpa Shi, the blood is bleeding, the variant blood vessels are bleeding, and the blood pressure can't be seen. The patient is expected to hang up. " Ma Yichen ran to the operating room with a crying cavity for the first time.

Old man Lu's original serious face was gray at this time.

Following Ma Yichen, the old man ran to the operating room.

Zhang Fan's knife is approaching the extreme. This kind of knife technique, which does not pay attention to hierarchy and anatomy, is not easy to do. It is hierarchical. It avoids major blood vessels and nerves according to the human body structure, but once it is for speed, it is not hierarchical.

At this time, the doctor should be quite clear about whether there are large blood vessels here and what is the probability of variation.

If you don't have this ability, cut down and make a blood hole, the fast will become slow. Therefore, in surgery, it is often no problem that slow is fast.

Zhang Fan, without a little hesitation, is very fast, just like the strong workers at home chop dumpling stuffing during the Chinese new year, chop, chop, chop, and woodpeckers are at this speed.

Muscles, fascia, peritoneum, greater omentum, poof, the patient's stomach seemed to fart, and Zhang Fan entered the abdominal cavity.

Then Zhang Fan's knife directly crossed the ligament and stuck to the inferior vena cava artery, as if it had been cut on the artery. Then the ligament was broken and the artery remained motionless.

"I'll go!"

This move scared the four assistants around to sweat.

"Hemostatic forceps!" Zhang Fan's voice was dumb, but he who didn't speak was dumb.

"So fast!"

In particular, the doctor who asked everyone to come forward to help with the treatment but failed to do so was even more shocked at this time.

"How could it be so fast! Isn't he afraid to cut the main artery with a knife. Even if you cut a vein, it's even worse now. "

When the vascular forceps were in hand and the blood aspirator in the abdominal cavity was opened to the maximum, they couldn't absorb it in time. Lao Zhao and Zhao Jingjin were anxious to suck it by themselves. The monitor was like going to explode, and the alarm was loud.

At this time, it's time for the bayonet to become popular. If you slow down a little, the patient will be put on the operating table.

Zhang Fan doesn't wait for the attractor. There's no time.

It's not rude to lift a liver tumor. It's just like an old hand in the flower room. The hairy boy doesn't understand. It's fast but not heavy, which is also exquisite.

In the other hand, he directly took the pliers and stuffed it into the pool of blood. He couldn't see it. There was only a Wang of blood floating with fat particles, just like butter tea with more black tea. Yellow fat swirls in the blood.

Zhang Fan's hemostatic forceps were directly inserted into the bottom of the tumor.

Click!

With a click, the vascular forceps closed.

Normal blood vessels, such blind ligation, are the great God level talents who dare to take risks, and this

variant blood vessel has no trace at all, but Zhang Fan has even ligated it.

Click.

Just like the sound of shooting, it hit everyone's heart. Did you hit it or not? Not only the four assistants, but also the other three on the operating table, but also old Wu standing beside and old Lu standing at the door, all looked at the monitor.

One second,

Two seconds,

Five seconds,

The monitor was like a timer about to explode. Suddenly the red light went out, and then the quiet green light began to flicker gently, just like a naughty girl blinking and saying: I'll scare you and see if you have me in your heart!

"Shh!"

At this moment, there is no superfluous words, only everyone's angry voice at the same time. It's too scary.

"What are you doing, sucking blood!" But everyone hasn't slowed down yet. Zhang Fan said something to Lao Zhao dissatisfied.

"Good!" Lao Zhao immediately reacted, and then gently said to Zhang Fan, "cow!"

In fact, after Zhang Fan clicked, he began to be afraid. The real fear was, after all, a mutated blood vessel. He was afraid that he had not predicted the accuracy.

At this moment, there is only one chance. If you can't insert it correctly, don't blame others for rolling up their legs. Really, Zhang Fan's diapers are almost unstoppable.

The assistants in the operating room are like a huge wave in their hearts at this time. It's so awesome. Mutated blood vessels. Don't people have any face? Just click and understand it?

"What's your name again?" Tang Zhenghao was sweating on his forehead, but he still had to help Zhang faner listen to the four directions.

"Yang Yuqi, Yu belongs to the universe..." the doctor who helped Zhang Fan give drug treatment hurriedly began to say his name. He was afraid that there was a duplicate name in it. He wanted to set up his ID card.

"Promote Dr. Yang Yuqi to the second help column!" Tang Zhenghao nodded, interrupted the excited boy, and then said to the itinerant nurse.

"Good!"

Yang Yuqi was so excited that she couldn't swallow her saliva. She didn't dare to think about it. She turned from a passer-by into a protagonist. God, if she wasn't in the operating room, Yang Yuqi really wanted to hold old Tang and say something.

It's too difficult to be a doctor. Not everyone is as lucky as Zhang Fan.

The network is finally unblocked again. "I'll go and drop my blood pressure. It's over!"

Ordinary hepatobiliary doctors scream constantly. It's too scary.

And the bosses slowly put down their tea cups, "this boy has a set!"

Chapter 1222

A pair of pliers, to tell the truth, many times, what high-tech and high-precision are not as happy as this pair of pliers.

The reason why people like to be rough and straightforward is that it is simple and rough, and it has strong pleasure. In fact, it is the same during surgery. When you pull the bedside CT, take a picture of the C-arm, and then let the grinding Da Vinci set the program, it's not as fast as this simple and rough.

Cut the meat into small pieces. Cut it fast. Cut it into an oval shape. Don't you dry it? Damn it, a fist passed, all the oil, salt, soy sauce and vinegar came out, beating gongs and wiping. Is this better than cutting each other's head?

no

Although it's not sharp, it's absolutely cool. Just like the other party scolds you countless times, the result is a slap in the past, and the other party's mouth is crooked! Moreover, he stared and dared not scold. That's cool. Cut off his head. What's cool about a blood gourd!

This feeling is cool.

Zhang Fan is also cool.

Didi's monitor is like an alarm clock in the morning. It can even be called a life-threatening clock. But when Zhang Fan goes down with a pair of pliers, he suddenly finds himself a relocated household. I don't

serve you as a greasy boss. I'm worth more than you. I'll raise your rent for you!

Cool, just one word!

The anesthesiologist at this time is like when his wife jumped from the sky to the head of the bed and was about to open the quilt. As a result, his wife found that she had lost her wallet and had to go back to find it. She escaped from life in death!

The anesthesiologist wiped the sweat beads on his forehead, his trembling hands held the infusion set steadily and gently adjusted the dosage.

"Turtle son, I'm scared to death."

Subconscious swearing, finished and looked at Zhang Fan. However, people don't care. Anyway, when Zhang Fan was an orthopedic doctor, Lao Huang took care of Zhang Fan. Now Zhang Fan has become president. He has nothing to fear. The most important thing is that as long as the patient's vital signs are stable, president Zhang is still easy to talk. Even if you drive under the operating table, people are impatient.

Of course, the drivers are usually surgeons. Our anesthesiologists are still good. They are not those rough men who only know how to turn quickly!

As for wearing small shoes, Zhang Fan hasn't really done it.

Sometimes when you think about it carefully, China is really wonderful. The people in the three provinces of Hunan and Guangzhou are all in front. Then they seriously say that they are big immigrant provinces. These three provinces are nothing. They are really filled with people from Sanchuan and Nanhe.

What about the people from the three provinces of Hunan and Guangzhou? Who wants to know where these old watches have gone.

In the frontier, there are not many descendants of Huguang who shed blood in those years. Only when talking, it seems that their ancestors are near the distant crane tower. Sometimes it hurts. For example, tea vegetarians, Kazakhs shouting Yaomei all over the street, and Chinese commissars all over the street. No one is upset. No one boasts that Lao Tze is a nine headed bird. No one says that Lao Tze likes barbecued pork.

To complain, Lao Zuo listened to his father-in-law Lao Lin's words and made his mother's achievements, which made the young people in the three provinces of Hunan and Guangzhou shed a lot of blood. There was no one shouting in the Khan street. My eyes were red with these words.

.....

Drop by drop... Drop by drop

Although the simple urgent sound has changed into a long tone, the atmosphere in the operating room is different.

This is directly the posture of reopening the banquet. If you can't stop, in a popular word, it's suona blowing!

The revolving network is finally ready.

"I'll go, I'll go, I'll go, blind tie, blind tie, he can blind tie! Uncle Lu, what's the tuition fee? I'll pay double. Please take it in. If you don't learn anything else, just learn this blind bar! "

"I'm a mother. I'm scared of my white hair sweat. My blood pressure falls out of sight. I can save it. I'm convinced. I'm totally convinced!"

"I'll go. People are going to hang up. Come on, old Wu, it's time for you to roll up your sleeves. Go and wash your hands, boss, come on, or you won't have a chance! Old man, why are you stunned? Go and wash your hands. Ouch, mom, your blood pressure is rising! "

"Your mother. You don't know how much money the state gives you a year. You can't even get a sharp network. You will be a minister. No, you won't step down. Let me come! "

The medical education network is also fashionable. There is a discussion group in it. Everyone can speak in secret. In the past, when the operation was broadcast live, it was very neat. If you want it, it is the boss who is powerful. If you want it, does the boss want students?

But this time it was different. At the beginning, everyone focused on blind ligation, then on invisible blood pressure, and then began to urge old man Wu to take over the operation. After all, they are all doctors. After all, they are all doctors in China. They all hope that their motherland can be awesome.

But now, it seems that the cow can't force it. The legendary three generations of disciples seem to have failed. Everyone was anxious and straightforward, and then changed from urging to scolding the minister and the Internet.

Really, a big man said that three sentences in the forum would be crooked. This thing is right. It was originally a secret speech. The minister wanted to let everyone speak freely. Well, speaking freely is a free place, but it directly turned into scolding the minister's mother~

With the rise of blood pressure, everyone gasped.

The more people understand, the more they can bring in, especially a group of ordinary foreigners. Their hearts are all raised, as if they were the main knife.

In the past, why didn't everyone scold when they saw the operation, because there was no sense of substitution. Look at a group of doctors who were in charge of the operation. They were either bald, the head director or the doctoral supervisor of the hospital.

Now, the main knife is a young man like them. Too chicken has a sense of substitution. At this time, everyone felt that they had become Zhang Fan, and they had become the main knife. They were no longer the hospitalized dog with a dressing change bowl and looking at whether the patient's anus was inflamed.

I'm the master knife. What annoys everyone is not the difficulty of the operation, because they don't understand how difficult the operation is, but they don't understand it thoroughly, even if there's a code in the film. You give me a buffer. Can you bear it?

So, whether it's the minister's pot or not, it's right to scold the minister anyway!

The big guys looked at all this calmly. It was not that these goods had no passion, but that these goods knew the fishiness inside.

If it really fails, the live broadcast will end because of technical problems. Chinese people have a perverse pursuit of face, and there is no one on this earth.

Therefore, although it is called live broadcast, it is actually a live broadcast. Although I don't know the result, everyone can guess the result.

The big guys drank tea and watched the operation in front of them.

Although I was not at the scene, I still had a feeling when I saw the blood pressure falling down like the elevator took off the rope.

If it were me, what would I do now. First of all, the aspirator will increase the power, increase the blood transfusion, speed up the liquid input, give as much as you can to strengthen the heart and diuresis, and then find out where the bleeding point is bit by bit.

You can see Zhang Fan's unreasonable pliers go down. To tell the truth, almost all the big guys watching

the video network shake their heads at the same time. This is a mallet!

Conventional blood vessels, because I don't know how many people study them. Your blind ligation shows that you have a solid foundation, accurate positioning and serious reading. In a word, you are awesome. Mutated blood vessels, who wants to know where they can come out. If you go down with this pliers, all good ones will be punctured.

But the mallet was ligated at once! Is this bad luck or foolishness and boldness, or is it the courage of an expert.

After thousands of thoughts, unexpectedly, this lengtougqing dared to blind prick. According to this situation, the tumor at this time is definitely a blood vessel mass. He dared to blind prick.

Think about Zhang Fan's master and Zhang Fan's school. It seems that this should be a bold artist, but look at old Lu, who is about to play at the door. Your sister, you are too unreasonable.

"Lao Zhao, come on, gauze block. The ligation may not be stable. Head nurse, quickly adjust the light, Bayin fishing, and how short the back line is for me."

"Good!"

"Yes!"

The head nurse and bayinliso promised, and Lao Zhao had stuffed the suction device and gauze under the liver.

The amount of blood in the abdominal cavity, if described, is about the amount of a sea bowl.

The attractor is absolutely first-class when sucking a small amount of blood. For example, when you kiss your girlfriend, how much saliva the other party can secrete, you can stick out your tongue and suck it away like a golden hair. You can also pump your mouth. You're eating melon seeds tonight!

But if the other party vomits, it's estimated that you can't eat it.

Attractor is this concept! I can't help those who suck less and those who suck more.

Therefore, this time is to put on gauze, piece by piece of snow-white gauze, just like the bag filled with soil at the mouth of the dam, and keep stuffing it in.

Bayin one, two, three, kept counting and entering a few pieces. The nurse must know in mind, or there will be one left. This is a surgical accident. For example, many patients have a second operation because of the residual surgical gauze.

Many hospitals will say, ouch, we are all human and make mistakes. Please forgive us.

In fact, this is because the laws and regulations are not strict. If you shoot them, none of them will make such a mistake!

The old lady who had been single all her life invented three checks and seven pairs. Is it a decoration. I haven't been married all my life, and I don't have a child and offspring. Won't people make mistakes? If there's no way, you say you're wrong, you can. Your mother, people have invented methods and regulations. You still make mistakes. It's not your mother lying on the operating table. Can you be so careless?

The blood is slowly cleared under the packing of aspirator and gauze.

Zhang Fan gently opened the tumor and saw that the vascular forceps were firmly stuck on the bleeding blood vessels. Not only Zhang Fan, but also Tang Zhenghao, the eldest disciple of old Wu, took a long breath.

The blood is slowly cleared under the packing of aspirator and gauze.

Surgery, what is surgery, this concept, you suddenly ask a hairy doctor, you can ask, he is tongue tied, then slaps the table, then points to the door and says to you, go out. Why, because he was angry, he couldn't explain.

To sum up, surgery often cuts off harmful and leaves useful. It's no exaggeration to say that in fact, most operations are like this. Some people say, ah, medical beauty is not, transplantation is not.

That's why we don't talk. That's what most surgeries do.

The concept of how surgery is done is very broad. Prepuce operation is circumcision, appendix operation room embedding, gallbladder operation is removal, intracerebral hemorrhage operation is decompression and hemostasis.

In fact, a rational analysis of the wave, the operation is all one way, first ligate the relevant blood vessels, then remove the relevant lesions, and finally find a way to make the vacant part form vessels from the road, and then fill in the useful tissue.

This is surgery!

Chapter 1223

The blood stopped, but the operation was just the beginning.

Zhang fan can only turn back and continue to stop bleeding layer by layer. The human body is actually a colorful meat. A layer of skin, a layer of fat, a layer of muscle, and finally a mucous membrane. In the middle, each layer needs its own nutrition. If there is nutrition, there are blood vessels or lymphatic

vessels.

Zhang Fan went to stop bleeding by leaps and bounds, and the blood vessels in these levels, like small fish spitting bubbles, secretly spit blood bit by bit. This kind of bleeding doesn't seem as fierce as that of the main artery. It doesn't seem to matter. In fact, this thing is boiled frog in warm water.

Many doctors with average surgical level don't pay much attention to this kind of bleeding when performing surgery in order to make everyone feel that his level is high. Then, in order to catch up with the progress, what they do is called a hype. The surgical field of vision is like a slaughterhouse, full of blood.

As a result, the operation was completed and the patient was in shock, and the doctor touched his head and said that the patient's physical quality was not good. After such a little time of operation, people were not good?

Zhang Fan is different. From the day when he got the system, although there was no systematic adjustment by the master, he obviously had a core definition of Zhang Fan's subsequent operation after studying in Qingniao for half a year.

When Zhang Fan looked back, doctors on the Internet finally underestimated the shape of the tumor.

"I'll go, I'll go. Is this a stuffed basketball?"

"This operation is not easy to do. If such a large area of tumor is completely removed, I think the patient's age and liver size can not fully support the operation. There is a high probability of liver failure and then multiple organ failure. I suggest multiple operations. I'm Wang Ming from the general surgery department of Nanhe affiliated hospital. If Zhang Yuan has any comments on my suggestions, you can contact me. I will give you full support with enthusiasm! "

After the network was ready, the minister stopped scolding. Because everyone was not attracted by the tumor. Somehow, the atmosphere suddenly changed in the network chat box. There were low-level black ones who played their own name.

"I'll go, Wang Ming. I know you. You do appendicitis and infect one. What do you mean to give others Qiu pie here

Chapter 1224

"Is this true?"

Ouyang trembled with two or three pieces of paper, and his hands couldn't hold it.

"Really, really, it can't be true any more. Look at the European Academy. There is also the logo of secret parts in the system. Dare I fake this!"

Lao Chen's exaggerated expressions and actions seem to have been greatly wronged.

Mrs. Lu took a look and saw that it was confidential. She was no longer curious. She had seen too many of them and had not been curious for a long time. At this time, Shaohua also drove a big pickup truck to pick up the old lady. Ouyang wanted to go to eat and drink with him.

As a result, Ouyang with red eyes was a little embarrassed " You're busy. Don't worry about me. Just have huazi. Let's go to the pastoral area together in a few days! "

Then he left with Shaohua.

Ouyang didn't say anything. The old lady was upset.

Take the document and read it over and over again. After slightly adjusting his mind and calming his slightly choked voice, he said to Lao Chen, "the superior unit is the superior unit. Look at other people's documents. How formal they are.

Such an important thing should be paid attention to. Where is the tea vegetable government? The meeting has not been completed yet. People all over the city know why they quarrel today! "

"Well! Neither, they are very formal! " Lao Chen replied awkwardly.

In the past, the health bureau often sent documents with secret words to the tea vegetable hospital. Even people said that as long as the documents signed by the Secretary and the director need to be sent by special personnel. At this time, Ouyang will get angry and hang a secret word for big farts, holding chicken feathers as an arrow.

This was also spread to the Health Bureau, and the two leaders were embarrassed to death.

There is a saying in China that there is nothing to keep secret about confidential documents at the

county and regimental levels. But the big fart in Ouyang's mouth today turned into a regular one?

"Do you know many people?" Ouyang asked Lao Chen mysteriously.

"Well, it has been opened! After the confirmation of leaders at all levels, it has been published on the Internet. This is the first item in the top news of the Ministry of health. "

"Ouch, ouch!" Ouyang barked his mouth and hurried to the office.

"Lao Chen, the tea vegetable government has a quarrel with the bird city government, saying that the number of members in our team is even, which is not in line with the team establishment. The tea vegetable government wants to push Lao Ju or Lao Gao up."

"Well! They, they, their qualifications are older than me, and they have been directors professionally. No matter who is suitable, I will cooperate with the leaders. You can rest assured. I, I'm fine. "

When Lao Chen said these words, it was hard to say what he thought in his heart, but his face was definitely more ugly than his dead mother.

His age is here. He is not Zhang Fan. He will be a top bull in the future. Now he is slow. The hospital has been upgraded. He still has a chance to fart in the next round. However, even if lost again, there is still no leakage in words.

These are people who come from the oil, go from the oil and roll three times. They must show their lost mood, but they can't disgust the leaders. To tell the truth, this kind of discretion is handled by Lao Chen.

Ouyang turned his head to look at Lao Chen's face, then turned his head and continued to walk, but after taking a few steps, Ouyang suddenly said, "I have given it No. I said that their business overlapped with that of secretary Ren and I. how can such a large hospital without a big housekeeper? Who will be the housekeeper?"

The hospital is not another unit. Any small matter is a big matter. Do you expect Zhang Yuan to take care of small matters? Or do you expect the three sent down from above to work?

How old am I and give it back to their housekeeper? Will Ren Li take care of it? I gave no! I mentioned you. "

This time, it was Lao Chen's turn to be jealous, "Ouyuan, Ouyuan, you, what do you want me to say! Zhang Yuan. "

"He estimates that he can't worry about this time. When he has time, let him also mention you. In a few

days, there will be a dean level meeting over the magic capital. You will be contested with Lao Gao and let Lao Gao go. Lao Gao is gone, and you Zhang Yuan can talk. All right, let's go and let the government send reporters to interview me as soon as possible! People's state-level departments have publicized. Why does our propaganda department have so little subjective initiative!

I have to hurry up to make up. I've been tanned these days. I'm a little haggard on the camera! "

"Not black, not black, not black at all!" Lao Chen walked briskly.

Whether Ouyang is ahead or not, or is he going back? Anyway, Lao Chen's tears are in circles in his eyes.

Some things in the world can't be said. Some people have great skills, but they just can't stand out in the unit. He does more than a cow, but the model worker is not him.

It's really hard to be a man. Some people say that around the leader is licking the dog, but you don't surround the leader. Do you still have the heart of progress?

The heat in here really needs to exercise.

After entering the office, Ouyang's fiery needs to find the publicity department“ European hospital, Zhang hospital's operation is not over yet! "

"What operation?"

Ouyang has been playing off these days. He has become beautiful on the grassland. He doesn't even know the business of the hospital.

"It's a liver tumor."

"I haven't finished yet. Didn't I do it a week ago?" The old lady stood up.

"No..."

"Go, go, go to the operating room."

.....

In the operating room, Zhang Fan took a knife and cut it like a radish. Mr. Lu was nervous and didn't know what to say. Academically, ten Zhang Fan bases couldn't reach the height of the old man, but in surgery, the old man was a kind of brain, but his hands couldn't.

He knew the difficulties, but he didn't understand them very clearly, so he was nervous. The old man was nervous and couldn't speak.

I dare not speak.

Wu laoti will go deeper. After all, he initiated this kind of operation.

"Here, slow down, be sure to slow down." The old man seemed to be talking to himself in a low voice.

But Zhang Fan seems to be different from the old man's way. His speed is very balanced. Every time the knife rises and falls, he is very simple. There is no time to go down and observe again. There is no time to go fast or slow.

His kind,

It's like playing a double game of chess.

Like, last night,

He has already had this kind of operation.

To tell the truth, old man Wu is more nervous than old Lu.

Because this boy doesn't follow the routine.

In a knife, the tumor is really like a placenta, constantly wriggling.

Because the temperature and density inside are different, after lifting it, with the separation of the knife, the tumor begins to creep. The red blood vessel network on the surface is creeping, as if there was a big maggot inside, or a Nezha would break its shell and jump out.

The fat on the surface of the upper layer of the tumor far from the abdominal cavity has begun to solidify, while the lower layer is still ticking some mucus.

To tell you the truth, it's really disgusting. It's like cooking dumplings. It's been cooking for a long time. As like as two peas were set up, they were broken and not broken, and the soup looked exactly alike.

Rotating the knife, to tell the truth, this kind of cutting is really difficult. The strength angle is more convenient on Zhang Fan's side, but when it comes to Lao Tang's side, Zhang Fan's effort is very awkward.

However, this is not difficult for Zhang Fan.

"This boy is really powerful. I didn't learn this kind of side cutting in those years. I thought master Qiu didn't teach and hated him for a long time. Later, when I saw old man Lu's stupid hands, I knew that I wronged him. Ah! "

A big man who ran to the capital from Wuhan University looked at his hands lonely.

Ordinary doctors have long given up copying on the spot.

It's too hard. I'm breaking my wrist.

"You say, can the operation succeed?"

"Nonsense, most of them are about to be cut off. In addition to the sudden drop in blood pressure at the beginning, now the patient's vital signs are stable. How can it not be successful! "

"Zhang Yuan doesn't know if he can take graduate students now. I want to talk to him!"

As soon as I said this, the network was cold. Suddenly, I don't know who said, "he just graduated from graduate school. It's said that he seems to have gone through the back door. The leaders of our hospital scolded Qiu Pai for being shameless and bullying academicians. But look at the operation of Zhang hospital today. What kind of person is he? "

"Yes, yes, such a difficult operation will be done. It is estimated that the bosses in your hospital envy, envy and hate. They are a little villain!"

"Yes, he gave me one less patch (hernia surgery material) for the surgical instruments last month. It is estimated that he will change his wife again!"

"Is his new wife? Is it beautiful? "

Finally, the network manager couldn't help it, "please pay attention to your words!" Large font size appears.

Then the chat group changed the atmosphere from scolding their leaders and began to scold the minister!

It is estimated that the boss of the medical department is really hard to be. Good things are scolded and bad things are scolded!

An hour,

Four hours

Eight hours

Twelve hours

Finally, a tumor slightly larger than basketball was cut off.

Old Lu was so excited that he didn't know what to say.

Zhang Fan's elder martial brother finally let go of the tumor and inadvertently slightly bifurcated his legs.

Both arms are almost out of their own.

This is not the hardest.

The most difficult thing is that the diapers padded in his pants don't seem to wash any more. The leaked liquid stings his eggs and legs.

It's really like someone licked both sides of his thighs and sprinkled a handful of pepper and salt!

Chapter 1225

Zhang Fan sweated out the tumor from the patient's abdominal cavity. The ticking liquid blood is stained on the tumor, just like the pig water taken out by killing a pig.

"Elder martial brother, show me!" The most difficult part of the operation passed. Zhang Fan suddenly felt tired. Really, he became so weak. More than ten hours of uninterrupted surgery, to tell the truth, even if he exercises every day, he can fight with Shaohua and draw.

But at this time, he felt that his legs were really soft.

Zhou Hongyi and Tang Zhenghao put down their instruments for the first time and came together. Because this thing is polluting, it can't be viewed on the operating table, but it can't be far away. Because it is far away, the operator will be polluted by other things, and there is no shadowless lamp.

The head nurse plays a shadowless lamp, just like the police playing a searchlight in Hong Kong films. The branches of her body stretch curved and straight, listening to contradictions. In fact, to tell the truth, you can imagine a plump young woman standing on the bench. Her waist can't lean against the cutting board, but her hand should go through the cutting board to get the things above the cutting board.

At this time, a man will

But no one pays attention to her at this time!

Because, whether it's surgery or medical education online, everyone stares at the tumor. It's really like when my friends chat together, I talk about the object! Women ask each other how they look and what

they do at home.

And men actually just say, did you sleep?

Now, in fact, everyone is the same. They are only concerned about one problem. Has it been broken?

Is the tumor broken? The technician of the medical education network was also stunned. He could not determine whether the operation was successful or not, but he did not dare to disconnect the network again. It is estimated that the minister will be sad again.

Anyway, he didn't disconnect the Internet.

Zhou Hongyi and Tang Zhenghao hold gauze in their hands, just as two in laws see the only third generation born, and like baldness experts looking at porcelain with a magnifying glass, they wipe the gauze slowly and wipe the tumor slowly.

Flesh pimples, big flesh pimples were finally wiped. After that, everyone's necks were straightened, and old man Wu and old man Lu looked at them carefully.

"Not broken!"

Zhou Hongyi had a smile in his eyes. Eyes are the windows of people's hearts. If you cover other facial features and expose a mouth, you can't see whether he is laughing or crying, but the eyes can!

Tang Zhenghao, with a long hiss, "it's successful!"

Old Wu and old Lu finally softened down. They are almost 80 years old. Even if there is a bench, you can sit down for dozens of hours. Now you have finally succeeded. Lu always wants to pat his disciples, but they are all wearing sterile surgical clothes.

I can only nod my head, "hard work!"

"Master, martial uncle, it's estimated that there's no big problem with the next operation. You don't have to stand on the platform. Go and have a rest."

Zhang Fan gently said, to tell the truth, this operation, from the beginning of the thrill, let the two old men relax from beginning to end. How tired Zhang Fan is, the old men estimate that he is twice as tired. Just like their children go to the college entrance examination, in fact, parents are tired. They must be more tired, but they still have to insist and show that they are not tired.

"Well, good, good, good!" The two old men looked at each other with relief in their eyes.

"Head nurse, come on, take the old men to rest."

Zhang Fan looked at the old men's soft legs and quickly called the head nurse.

The head nurse, like his mother sang, who had been waiting for a long time, "Hey! well. Girls, come and help the old men! "

Hula, a group of young, beautiful, collagen faced little nurses came in from the door of the operating room and helped two old men out of the operating room.

On the medical education network, the chicken exploded early. When Zhou Yihong gently said that it was not broken, the doctors in front of the computer did not know whether they should be happy or sad.

I'm glad that the operation of patients with huge liver tumors in the low age group has been successful again on the Chinese operating table, which means that China is still in the field of liver surgery.

Sad, but I didn't do it myself!

"Shit, I only had one day of vacation for several months. I spent it all staring at the computer. My girlfriend was going to break up with me. After watching it for more than ten hours, I finally got lonely. I've seen the knife technique of Qiu school, but now I've forgotten it all!"

"Like, the holiday is scrapped and the mood is low. diligence! In front of talent, it's worthless! I'm almost 40 years old. My boss has to worry about laparoscopic cholecystectomy. But Zhang Fan has successfully completed world-class surgery! "

This kind of speech is made by half old and half bald dogs.

"I'll go. I've finally seen the knife technique of Qiu school. Zhang Yuan, you are my example. I must work hard! Your today is my tomorrow! "

"Zhang Yuan, I think I can also learn. Who recorded this operation and asked for seeds? When I take off, I will return!"

This is the speech of a newly admitted hospital or an undergraduate dog.

There's also the one who remembers revenge, "what's Wang Ming of Zheng Yida? Didn't you say that the operation can't succeed? Didn't you have research? Didn't you provoke Zhang Fan? Come on, come out and take two steps, come on! Don't pretend to be dead! "

Wang Ming looked at @ him in the group and swore and quit the group chat! Anyway, if I don't talk back to you, you have no choice! You can't shake me, can you.

The magic flying ghost dance in the chat box. In fact, for ordinary doctors and ordinary foreign doctors, this is to broaden their horizons and broaden their horizons. Maybe they can sleep, the sky is still blue, the water is still green, and the rebate is still fragrant. As for the knife technique, chicken, that thing is a dream! It's still a nightmare.

After all, not everyone in every industry can casually enter the top class. Especially in the technology industry, this thing is inherently discriminatory. For example, surgery. If you don't talk about others, just talk about hands. Go and see the hands of experts.

The light appearance can surprise you. It's thin, straight and long, especially the belly. It's like a round wangzi steamed bread. People can't wait to suck! This kind of hand, if you go to an insurance company, it is estimated that the insurance company will not accept the order. When you have an operation one day, you accidentally cut yourself. Won't you die?

Therefore, Zhang Fan generally doesn't do physical work at home, because if he does more physical work, his fingers will become thicker! Of course, this thing is mainly what Shaohua believes in.

This kind of hand can make the sensitivity of the hand more sensitive, which is still a prerequisite. Then, after decades of hard work, we should withstand the pressure of life and peer competition, and be sober in the industry.

To tell you the truth, it's not easy! If you want to be a simple super technical dog, you can't. After all, people live in society. Human spirits can take your simple technical dog and eat no hair left.

The bosses looked at the tumor in Zhang Fan's hand, at the two academicians who left slowly, at the elder martial brother around Zhang Fan, and then at the most advanced equipment in the tea vegetable operating room. Many big men sighed a long sigh.

"Teacher, what's the matter? Is there a problem with what he did? Can we find some questions and comment? "

The interesting student came forward and said what he thought would make the teacher happy.

The boss stared at the students in front of him, staring at each other's hair, "you still have to read more books, especially in humanities!"

In fact, what the boss thinks in his heart is: your sister, do you want me to be stupid? That is, I started a

few years earlier! Otherwise, does the liver and gallbladder Department of ordinary foreigners still have the status of Lao Tzu?

Ouyang and Lao Chen stood at the door of the operating room, where the old lady was excited“ Come on, come on, go and help the old men. Do you think we can strike while the iron is hot and find another such operation to make our hospital a higher level? ”

"Well!" Lao Chen felt the sweat on his head.

To tell the truth, how many operations are performed in a regional hospital with extraordinary time and high difficulty coefficient? In fact, there are not many. If you encounter one, you will wait for the dean who gets rich by building infrastructure. This kind of operation is almost impossible. Even if there are appropriate cases, the dean is afraid of accidents, and then he obediently sent to the superior hospital.

He won't take risks. Success won't do him much good. The most is verbal praise from his superiors. If he fails, he is afraid of being taken off his hat or becoming a stain.

Therefore, the regional hospitals in China are almost in the south.

One is a technical problem, and the other is money. For example, many cities in the south, although the urban area is a little larger, in the west, this area is a township, not even a county.

But they have so much money that outsiders can't survive here.

Therefore, there are legends in the Jianghu that in such cities, the rich second generation can be civil servants, because people from poor families can't live as civil servants! For example, there is a city called Jiangyang, which is so awesome that even Su Xi often looks down on it.

Suxi often what level can make most large northern cities tremble.

Other people's hospital equipment can't reach the level of some provinces in the West. As long as this kind of hospital continues to develop, it will definitely have a certain position in China's medical industry.

In fact, most major operations are in super hospitals, so many operations that take more than ten hours or even several groups of doctors rotate will not be carried out in regional hospitals.

However, today, although Zhang Fan took his senior brother and a group of experts outside, the two academicians stood on the stage from beginning to end. However, the tea vegetable hospital has finally become a hospital that can do world-class surgery!

Is this threshold high? If this kind of hospital is kicked out of the capital in the north, it can hardly exceed four!

Now, the tea vegetable hospital has entered, and it has finally come!

Zhang Fan's University group, the originally lively group, slowly subsided, slowly like this group has never been lively.

They used to think that Zhang Fan might be a cow, but he also had a good master. Who wants to know if this master was colluded by traffickers and classmates through the back door.

But now, they understand that Zhang Fanda's height is not what they can envy. Perhaps some people finally remember that Zhang Fan, who looked black and sweaty, carried a large bag of instant noodles and a pot of tea eggs in one hand, was amusing to see everyone in the corridor.

His smile used to make them feel cheap, but now in retrospect, it seems that there is a little dignity in his smile, as if success is not far away!

Chapter 1226

After seeing off the master, Zhang Fan said to the two elder martial brothers, "elder martial brother, go down and have a rest. By the way, talk to the patient's family about postoperative treatment and escort."

"Well!" Lao Zhou looked at Lao Tang "This....." Lao Zhou couldn't speak.

"OK, younger martial brother, let's show our face. Let's go. Anyway, my thigh is almost painful! Hungry and tired, I'm going to eat a roast sheep! Not fat." Old Tang is more forthright.

Zhou Yihong and Zhang fan are more closely connected and think more. For example, he went to the rich country with his younger martial brother. When he came back, he just changed a luxury car. When the princes rebelled in his hospital, his younger martial brother brought people to the door and turned them over.

So, sometimes, he doesn't feel free and easy in front of Zhang Fan.

Old Tang is right. In fact, his thigh root is about to break. In this world, there are too many human beings with good backs. Whether they have corrected the child's hunchback or created a pile of children with spinal deviation, no one can tell now, because money stood up and spoke.

And diapers. When it's hot, it's not for children. It's for astronauts because it has high absorption and wear resistance. And children, young skin, in fact, is not suitable for use.

The old Chinese people insist on using the urine cushion. This thing is troublesome. Although it is troublesome, it has high permeability and the least irritation to the skin.

Not to mention children, just doctors. Even if doctors walk less after using diapers for more than ten hours, the friction of diapers leads to redness and swelling on the inner side of thigh skin, and then they are licked by urine. Urine is either alkaline or acidic.

It can be said that it was originally corrosive. After soaking for dozens of hours, I was shivering and shrinking in the corner, and I was so sad that I had wrinkles on my face!

Although Mr. Wu and Mr. Lu stumbled a little when they left, they at least took a normal pace. When Lao Tang and Mr. Zhou got off the operating table, they just took a crab step. People who didn't know would say, look at big brother patrolling the street!

The sour and astringent taste here is really special. Who tries and knows, so that is, the child can't speak. If he can speak, he will jump up and swear with a pacifier!

In those years, the two caught up with each other. Even if they didn't work together, they looked at each other from a distance! Now, I can't fight, and the back wave is coming, especially those who pursue the peak all their life. They suddenly find that they will never have a chance to rush to the top again. In fact, it's quite cruel.

Because, in their career, they almost have a threshold that they can't rush past. Although this threshold is their own junior brother, do they regret helping? No, I don't regret it at all, but there is definitely some loss in my heart.

In fact, there are such big men in all walks of life, who let the latecomers step on their shoulders and climb to a higher place, while they slowly disappear in the world of mortals.

At that time, the two competitors pulled their legs and helped each other out. The light at the edge of the shadowless lamp finally faintly showed their shadow. The shrinking shadow was like their state of mind, as if they were getting old and shrinking.

However, no one laughed at them. At the door, a group of doctors, a group of masters and a group of young doctors gently stepped aside the channel, gently turned their heads and looked at the back of the

two teachers with admiration in their eyes!

"Elder martial brothers, they are guests. We are welcome. Zhao Yuan, next, we have to stand for a while."

Zhang Fan smiled and said to Lao Zhao gently.

"It's all right! Can stand another night. " Lao Zhao shook his head indifferently.

Lao Zhao said he could fight another night, which made the doctors around him gnash their teeth. Your mother's prostate works so well. Don't you sting?

Zhang Fan seemed to know their hearts. He turned his head and said to the doctor who had helped him during the operation: "are you interested in knotting me? I sew very fast. I don't know how your knotting technology is?"

That said, the doctor started dressing directly! I'm kidding. There's definitely a difference between going on stage and not going on stage, not to mention this level of surgery.

Everyone looked at the doctor with envy, and the one who hesitated at the beginning. The jealous teeth were broken. If there were not many people, he would like to slap himself, "I'm actually better than him, alas! Life, it's all life! "

Then, there is another position. Although it is in the late stage of surgery, Zhang Fan has long grown up. Anyway, he is a hook position. Zhang Fan follows the principle of who pays more and who goes on. As for technology, it is fair or unfair.

Sorry, I'm not a minister. I don't care about this. I can only manage the tea vegetable hospital.

"Professor Yang Yongcun, I heard that you are very good at lymph node dissection. Are you interested in helping? If you're not tired, give me a hand on the stage? "

"Yes, too!" As soon as Lao Yang heard this, he was pleasantly surprised. It changed from four helpers for soy sauce to three helpers for vinegar, but it was so different for him. He could directly tell his superiors that I had been operated at this level!

Should experts fool layman leaders in technology, just as smart people cheat fools?

Moreover, the younger martial brother from afar is too weak to speak. With this sentence, Lao Tzu's dean finally has hope.

When I get back, I'll find a way to get some scientific research funds for my younger martial brother. What his classmates said is too right. This is simple and rough. You can pay for it!

Zhang Fan looked at the four helpers who were eager to try around. He didn't dare to call the abbreviation. He directly called his name and surname. He was deeply afraid of what to do if someone with the same surname fought.

Just like the Spring Festival Gala after 0:00, although it has become garbage time, those who want to go on should be let go, so that they can break their heads.

When the tumor is removed, the rest is ice cream.

Lymph node dissection!

Zhang Fan lifted the curette and began to clean the lymph near the liver.

If removing a complete tumor can save lives, then clean lymph node dissection is to prevent cancer recurrence.

The lymph in the body is like sesame seeds scattered in the abdominal cavity, gathered together in groups.

Moreover, when ordinary people are fine and take a bath, don't stare at the key parts and rub them. If you're fine, just touch the nest above your collarbone, touch your armpit, touch your neck, and lesbian touch your breast. Say something bad. Sometimes it can save lives. If you feel a pimple, get medical attention as soon as possible. Maybe it's a minor disease!

According to the routine, the touch sensitivity of ordinary people's fingers is about 1 cm. This size can still be treated.

Relatively speaking, this kind of removal is not difficult, but it is trivial. It's like how fast you can eat sesame on the table. People with some experience know that you have to lick it with your wet tongue.

Even so, there are sesame seeds left on the table. It can be imagined that the cleaning of the operation is actually very troublesome. So when doing it, we really need a child whose parents control not to eat ice cream, and then the child suddenly meets a strawberry ice cream.

You must want to eat even the paper shell stained with cream.

The curette, once, once, scrapes cleanly. Really, it is mixed with fat, blood, mucous membrane and dotted lymph on the curette. It is really like melting ice cream or fresh strawberries. It is absolutely no exaggeration.

On the side of the abdominal artery, Zhang Fan's speed is still the same. The curette sweeps up and down quickly. Although the curette is regarded as a blunt instrument in the instrument, the strength of this speed is still very hard in front of the blood vessels and will be broken when poked.

However, Zhang Fan did not slow down a little.

Yang Yongcun pulled the hook and looked at Zhang Fan's technique. The mouth under the mask was slightly open. He really wanted to ask, are you in a hurry to urinate, or do you not see the artery? Do people's arteries have no license? Do you look down on people's arteries too much?

To tell the truth, at this time, after the resection of the large tumor, the rest of the things in front of Zhang fan are his brother, hanging and playing.

Two hours

Four hours.

Finally, she came in with a big stomach, her face was waxy yellow, and her eyes were like little girls in the golden Mao country. At this time, her stomach was finally small. Although there was a long suture incision, she had a future. When she recovered, she could laugh, jump and run under the blue sky like other children.

No longer need to take a handful of medicine, no longer need to make parents cry secretly, no longer need to let other children's parents say she has hepatitis, don't play with her. She can say, reborn!

After nearly 20 hours of surgery, although Zhang Fan's upper body is still as flexible as ever, he is skillful enough to make the operation.

However, his lower body, especially his lower limbs, had no feeling at this time. Both legs seem to have accepted their fate.

From rebellion to waiting for death, I don't even have any feedback now.

After Zhang Fan's operation, he wants to get off the operating table. Well, his legs seem to despise him. Now he thinks of me. I can't move!

Numbness, two legs are like sticking to the operating table. Want to lift your legs, strong numbness, numbness to pain, like an electric shock, transmitted to the brain from the soles of your feet, and you are so fast blackened by numbness in front of you.

Zhang Fan grabbed the operating table with both hands, "after going down, the urine volume, blood pressure and liver function within 24 hours must be monitored by the doctor in front of the bed."

"Good!" The director of the ICU waited by the operating table himself.

With that, Zhang Fan glanced at Ma Yichen.

Ma Yichen didn't respond, "master, do you mean to let me go to ICU?"

Lao Huang in ICU is not happy! I looked at Ma Yichen with my eyes. You can't see our ICU too much.

Just as he was about to speak, Zhang Fan was angry. "What about your usual look? You can't stand without seeing me. Help me!"

Zhang Fan is really biting his teeth, lowering his voice and roaring.

"Oh! oh Oh! " Ma Yichen reacted.

Hurry up and hold Zhang Fan. Zhang Fan finally put his weight on Ma Yichen.

The sudden movement made his whole body soft and his head a little dizzy. He knows, it's a little hypoglycemic.

A strong man can endure low sugar. To tell the truth, he can't even think about it. Ordinary people starve for two meals, dig their hearts and lungs, and have acid in their stomach, but he has to concentrate on the operation. Really, it's too hard.

"Bayin, give me a sip of sugar!"

Xiao bayinlisuo opened a bottle of high sugar for Zhang Fan. Surgical nurse, four people have been rotated. Bayin had a sleep and came again.

Zhang Fan took the glucose and took it in his hand. Suddenly, his hand was like Parkinson's, shaking like a chicken. The other hand was soft and couldn't even tear off the mask.

After the operation, he suddenly felt as if all his strength had been evacuated.

weak and feeble.

The head nurse found something wrong, ran over quickly, grabbed Zhang Fan's other arm and tore off Zhang Fan's mask.

Looking at Zhang Fan's cracked lips and his shaking hands with glucose, the head nurse suddenly wanted to cry sadly.

Really, it's been a long time since the hot head nurse's eyes turned red, and at this time, she really feels a little distressed.

"I'll feed you, Zhang Yuan. Slow down and drink slowly. There's enough for you." There was a faint cry in the voice!

Chapter 1227

The degree of fatigue of doctors sometimes does not increase linearly with the amount of surgery. For example, appendicitis, do more than ten sets a day. In fact, after work, the doctor can still catch up with his girlfriend and fall. But if it is a more difficult operation, such as anal reconstruction, intestinal tumor resection and other large operations.

Even if one is off the operating table, it is already in a low desire state. I won't be curious about anything. I just want to take a hot bath, find a softer bed, a quieter house and have a beautiful sleep. What girlfriend, what rich woman, at this time, all are pink skeletons, so it makes sense for doctors to have no friends.

This time, Zhang Fan really lost his strength, especially the accident at the beginning of the operation, which made Zhang Fan hang his heart in his throat all the time during the operation. This high tension for a long time, they are particularly tired.

Just like lying to his wife after the big sword, for all kinds of reasonable reasons, the brain turns faster than the big windmill at this time, but after passing the customs, men absolutely swear that they will never go again in this life.

Zhang Fan drank two mouthfuls of glucose and felt a little better. At least his dizziness was significantly reduced. The human brain has the first demand for oxygen and energy in all organs. Your heart, liver and kidney can't do anything.

People must be fed and drunk before they are distributed to other organs.

Now the information is developed. In the major videos, doctors drink glucose as if they were drinking at the mouth of the bottle. In fact, what they drink may be a real big man or for shooting.

Because someone specially assigned to open the bottle carefully. And the real general doctor is not so particular about drinking glucose.

PA, a pair of scissors went down and cut a hole directly from the neck of the plastic bottle. Monk Lu slapped the jar open before pulling out the willows. When you are hungry and thirsty, when you lack ATP, you can't care about fine.

Of course, at Zhang Fan's level, someone has opened the lid for drinking sugar. After drinking a few mouthfuls of glucose fed by the head nurse, Zhang Fan finally calmed down. But the consumption is too long, the heart is not flustered, and the dizziness is better, but the body is soft, as if it was not awakened after being anesthetized by the anesthesiologist.

"I'll take two steps by myself. I think it's all right." Zhang Fan said to the head nurse. Just because of lack of energy, the body organs are going on strike. After drinking a few glucose, I feel wrong. I smell the perfume of the head nurse in my nose. It's quite advanced, anyway, it's not Shao Hua's taste of lavender.

The shoulders are supported by soft things

"What are you going to do? Come on, go and push the flat car over!" The head nurse stared at the nurses in the operating room and began to give orders.

In the operating room, the head nurse's orders are sometimes better than those of Zhang Fan. The little girls run fast. This is to lift Zhang Fan to bed.

Zhang Fan was almost surprised. If he hadn't been really powerless, he would have jumped up and left. Doctors are particularly taboo about some things in the hospital.

For example, in a flat car for rescuing or transferring patients, if you go to the hospital, doctors and nurses will not sit on the flat car even if they sit underground. Generally, white coats for flat cars are either interns or interns in the hospital. I think it's fun!

Moreover, Zhang Fan was also a little shy. He had an operation and was carried out from the operation. It was too shameful.

"No, no, I'll go myself!" Usually I can't see the red wheat skin. It will be red, yellow, red and yellow. It's like my little sister painted rouge on her face. The result is not even.

Powerless embarrassment!

As a result, Zhang Fan was kidnapped by the head nurse and Ma Yichen and helped out of the operating room.

Outside the operating room, almost all the surgeons came. This is the cohesion of a tea vegetable hospital. Strong men, dressed in white coats and masks, wait at the door of the operating room, and Ouyang stands in the front.

A group of people stood outside the door in silence. Just wait quietly.

When Zhang Fan left the operating room,

Oh!

Dozens of pairs of eyes looked over and looked again. Zhang Fan was helped out.

"Zhang Yuan!"

"All right, Zhang Yuan!"

There was a trace of panic in his tone. To tell the truth, Zhang Fan was really tired when he came down from the operating table, but when he came out of the operating room, he saw a group of colleagues who cared about him. He was really warm and wanted to say something. His voice suddenly blocked up. He couldn't say it.

I want to wave my hand, but my hand is very weak.

He can only bite his teeth and insist on not letting the water flow out, because he can't let his colleagues see his weakness. After all, he is their leader.

"Here comes the flat car!" Just when everyone was filled with sad emotions, Bayin, a girl from the grassland, drove the flat car like a small plane in the corridor of the operating room.

The girl wore slippers and put her arms around her white toes. Her hair showed a small stroke behind her hat. Because she ran fast, her hair was like the tail gas of a human flesh plane.

Zhang Fan's original heart was moved. Seeing this behind the scenes, how do you think it's festive! Some people are like this, born with a sense of joy.

"Why didn't you bring in the ambulance!" Ouyang rolled his eyes.

"Can't get in!" Bayin didn't know whether to pretend to be confused or really confused. Anyway, in a word, the originally low atmosphere became happy.

"OK, just push a wheelchair and get a flat car. You're too mysterious!" Ouyang waved, and the other nurses immediately pushed the wheelchair.

"Come on, I'll push your Zhang hospital to rest. Everyone should go home and be on duty. Now you Zhang hospital has come out and the operation has been successful. Feel at ease and go!" Ouyang drove away a group of big men like a chicken.

"Ouyuan, you've been up all night. Go back and have a rest. I....."

Ouyang pushed Zhang Fan. Zhang Fan was really a little uncomfortable, as if he had done bad things and his parents were staring at him.

"Well, if you're tired, close your eyes and have a rest. I'm not old enough to push my wheelchair. Ah, that's how we become doctors. It's not easy to come up with some results. "

Lao Chen helped Ouyang, holding the wheelchair on the left and the head nurse on the right. He couldn't drive away.

.....

In China and the outside world, it is not calm at this time.

"Chairman, is Zhang Fan of tea vegetable invited to our general foreign affairs annual meeting this year?"

"Invitation? Hold an interim meeting quickly and add others to the Standing Committee. Otherwise, when the meeting is held, people will sit down. Can we sit on the podium safely? "

The president of the Institute of general foreign studies is a rotation system. You are the boss this year and change people's position next year. But the Standing Committee is different. This thing is a lifelong system and an annual treatment guide for general surgery. These people almost say they are monopolized.

If Zhang Fan hadn't had this operation before, the great thing was that he had a good master and a good school. In fact, the bosses didn't take Zhang Fan seriously.

Because Zhang Fan is really too general in his thesis, just like in the Jianghu of competing for internal power, Zhang Fan is just a rookie who has learned from a famous school. It's uncertain whether he will die or live in the future.

But when Zhang Fan finished the operation, it was different. Although his internal power was still not good, he was on the wrong side, just like Linghu Chong learned the lonely nine swords on Siguo cliff. Although he had no internal power, he could use a lot of tricks. He was able to start a mountain and establish a school.

So, at this time, even if you want to pretend to be dead, you can't. moreover, it's enviable to look at the big men standing on the platform.

Look at the wind, it is definitely the specialty of this semi official organization.

.....

While everyone was still reliving the operation, the latest issue of Mishima BMJ journal was also published. In the past, old man Wu became famous for surgery. Because of the technical conditions in those years, we just heard of it and haven't seen it.

God belongs to God, but I always feel like that.

But now it's different. Although everyone can't watch in front of the operating table, the high-definition video has made everyone immersive. The more this is, the more you find that old man Wu and now Zhang fan are awesome.

This kind of operation is too difficult.

"They are a little better at small skills. They are all ancestral disciples, but they can't do scientific research after all. After all, they are small cities in the West. They lack information and can't go far with one leg.

In the future, it still depends on us. In the future, Chinese medical care will look at the south, and southern medical care will look at our big countryside! "

In a super hospital in China's largest rural area, the director of general surgery kept encouraging his subordinates. The lowest educated of these people are all doctors produced locally in China. The rest come back from Jinmao and MARUKI. Doctors are not uncommon here.

Recently, they had to prepare to visit several hospitals in the capital. The surgery and papers were ready. As a result, a super cannon was put on the tea vegetable side.

This embarrassed them. They didn't dare to publicize the prepared papers and surgery. However, although there seems to be no way to compare with tea in terms of surgical technology, the momentum cannot be weak.

Therefore, the director of general surgery, standing in the Department with rich body language, spoke words to improve his ambition, as if he could take someone to extinguish the flame of tea element tomorrow.

At this time, a doctor dog turned the web page bored and looked at major journals. Large rural areas have a weak foundation. Although its house prices are almost more expensive than the capital, it is still much worse in health education.

But they had money. A large group of great gods who fought and lost in the capital city came to the countryside with a group of little brothers. They were unwilling.

The director was still foaming at the mouth and talking about the future. As a result, the doctor dog suddenly jumped up: "director, four papers on tea element were published on BMJ at one time! It's all on top! "

The director couldn't swallow it at one breath and almost choked to death. No wonder he lost the war in the capital. It's strange that others can beat him on this EQ!

.....

In the tea expert building, "what do you think?"

"I don't know. I hesitate. What about you?"

The two doctors talked with the dog.

After the operation, Ouyang pushed Zhang Fan out of the operating room, threw Zhang Fan to the head nurse, and ran away with Lao Chen.

She still has big things to do.

The first time to rub the experience of the doctors, sent a letter of engagement.

Chapter 1228

It's not business that catches up. Ouyang has a deep understanding of this sentence. For example, personnel recruitment. According to Zhang Fan, our development is dignified. If we meet the right talent, do you want it with sincerity? Do you want it with real gold. We always have to pay a head.

Whenever Zhang Fan expresses this idea, Ouyang always tilts his eyes. Although he won't say anything, his heart and face clearly show a kind of: was I blind and stewed my heart? How did I pick up and pick such a fool.

For Zhang Fan's extravagance, Ouyang sometimes looks really distressed. Therefore, when old man Lu and a large number of doctors arrived at tea vegetarians this time, the old lady began to think of ways to spend less and stay more.

To tell the truth, Ouyang didn't become a businessman, which is really a big loss for the business community.

For the applications of doctors, Ouyang was divided into three, six, nine and so on. The best ones were sent letters of appointment, and the least excellent ones were sent letters of appointment. For the not particularly excellent but not very poor ones, Ouyang did not send letters of appointment.

She just wants to cause dissatisfaction in everyone's heart. She just wants to find a way to let these doctors divide themselves into three, six, nine and so on, and then she attacks again and hits it with one blow.

"Academician Lu's wife has to go to the pastoral free clinic these days. I have to accompany her. I'm really sorry for not coming to greet Dr. Wang in time. Are you going back with your luggage?"

Ouyang and Lao Chen were the first to enter the expert dormitory of Dr. Wang, who was about to graduate from international village.

Dr. Wang of international village is not top, but his basic and scientific research ability is quite good. If there is no big change in his future, he is estimated to be a teacher in a less famous hospital in the capital or a less famous medical school around Beijing and Tianjin. If you have a higher EQ, you may be able to be a secretary and president when you are about to retire.

He just didn't receive a batch of tea vegetable job offers. To tell the truth, he didn't care at all about not receiving the letter of appointment of tea vegetable at the beginning. It doesn't matter if he has a hospital outside the border mountain!

I can't stand comparison. I'm a little disappointed to see that someone better than me has an offer of employment, but I agree. After all, where are academic achievements? This thing is a hard indicator.

But when he saw that people who were not as good as himself had letters of appointment, he was not calm. So when I saw Ouyang, I didn't look very well.

"The operation is over, and we won't stay in the way." The bald boy had an angry face.

"What's going on? Didn't I tell you, especially to Dr. Wang, who is a scholar with solid knowledge and no good mentor, we must entertain him well. How do you work? Let Dr. Wang appoint such a person.

At least you, the Dean, are at the level of deputy hall. Why are you so careless! I tell you, we have always been scholars and officials. Finally, don't bring your bureaucracy into the tea vegetable hospital. "

Ouyang stood up and began to scold Lao Chen. If the two fake models are put in front of the tea vegetable government officials, such as the leaders in charge of health, it is estimated that the leaders

will turn around and run away, shouting: Why are you holding something bad to pit Laozi.

But for this bald doctor who spent half his life in school, this is different. He was embarrassed and felt careful. "No, no, the European Academy is very good. President Wang took good care of me, ate very well and slept well. That is, there is a job on the other side of the school. It's time to go back."

This is a typical literati rebellion, but also face, heart is not black, face is not thick. Shaking around, where is Ouyang and Lao Chen's opponent.

"Sorry, I apologized to Dr. Wang. Dr. Wang, you must say what you are dissatisfied with. Otherwise, if you leave, I guess I can't work. You must say your opinion!" Lao Chen seems to be dying of panic.

"Nothing, nothing! Yes, yes, it seems that you don't like my academic skills. Others... "

"Oh, ha ha, this thing!"

Ouyang laughed, and Dr. Wang was angry again!

"Dr. Wang, don't be angry. Listen to me. In fact, those who give employment letters are all for outsiders. Some of them are academic. In our eyes, they are just showy. No matter how powerful he is, can he surpass Lu Lao? Old Lu, do you know that he will settle down in the tea plant and work in the tea plant hospital in the future!

You just don't have a good mentor. You have a good mentor. To be honest, you are the top group. In the future, Lu Lao will be our academic leader!

As for some doctors, you also eliminate them. They are official doctors. Do you still think you are a passer-by with them?

As the leader of the tea vegetable hospital, I would like to pay a personal visit to a doctor like you. Originally, president Zhang would also come, but you know, his situation is really inconvenient.

Although we can't do it, we can still do it. "

"I know, I know. No, you're welcome! Really, this has moved me! " Dr. bald was moved again!

However, it's not enough for people to stay in tea.

Ouyang sat down and started fooling.

"After this paper comes out, it is estimated that you can graduate."

"Yes!"

"Have you ever thought about where to work in the future?"

"Most of them are in some hospitals in the capital or medical schools around Beijing and Tianjin." Dr. Wang said this with a little pride.

In the capital, even if it is not famous in the Beijing Tianjin circle, it can be regarded as a household in the imperial city. In the future, it will be regarded as a person in the capital.

"Oh, what a pity!" Ouyang patted his thigh and said it was a pity.

"What?" Dr. bald looked at Ouyang curiously. He didn't know where it should be a pity.

"Look, is there such advanced equipment and laboratory as tea element in the work unit you went to? Not to mention China, our anorectal laboratory and orthopedic research center can almost be regarded as world-class, are you right?"

When you go to the unit and change these equipment, it is estimated that you will retire. "

Without waiting for the other party to refute, Ouyang didn't give him a chance to speak.

"Look again, our hospital is connected to laomaози in the north and laomaози is lonely now, but people have money and stan in the West. It can be said that our tea vegetable hospital is an international hospital. Zhang hospital is famous in the world. Foreigners say Zhang hospital is a knife.

When it comes to the environment, you can't say what's good about the capital and the Beijing Tianjin circle in spring. Professor Li Cunhou told me a joke that the capital is that the sand crosses the wall after the north wind, and the donkey goes to the house in spring one night. The soil is yellow. What's good.

When you look at tea, you can see green, pink peach blossoms, light white pear blossoms and slight raindrops like moisturizing cream. It's not hot in summer and not cold in winter. There are fruits and melons in all seasons. The edge of the city is either forest or grassland. The river surrounds the city. If you want to eat fish, they are all wild.

Fresh grassland milk. You don't need to supplement calcium all your life. Later, you have children, bask in the sun and eat fresh beef and mutton slaughtered in half an hour on the grassland. Look at you. How old you are. Your hair is gone!

It's all because I didn't eat well and the environment is bad! " Ouyang looked distressed!

The bald man felt his head awkwardly and couldn't speak.

Ouyang then said, "we have no pressure here. As long as you come to the house, can you live in a villa in the capital? When it comes to education, we have low scores in the college entrance examination. Recently, the government and famous schools in the capital have jointly opened branches in tea

vegetable.

Let me tell you, think about it. It's good to go to the Beijing Tianjin circle. It's good to do scientific research, medical treatment and medical treatment here. There's still high room for improvement. Look at us. We are all retiring people, and we're counting on your generation.

Seize the time to start the job. When you train, you may be responsible for my stall in the future. Go and call home and discuss it. By the way, what's your lover's job? "

"She works in a private enterprise as an accountant."

"What, let capitalists exploit? God, how can this work? You are a scientist. How can you let your lover be exploited by capitalists? President Chen, ask the government, the Local Taxation Bureau and the banking regulatory authorities to reserve a seat for Dr. Wang's lover. I'll talk more. What's your lover's education? "

"Graduate student, Tianjin University."

"I can't call the government without giving a section level treatment."

"Well, I'll talk to them and try my best to reserve a section level position for Dr. Wang's lover as a person in charge. But you know, Dean, this position can't stay too long. The competition is very fierce. "

"I don't care. If you find a way, you must leave it to Dr. Wang's lover!"

In fact, Ouyang's ability to pretend to be a tiger is super powerful. Dr. Wang's lover can actually enter a favorite unit even if she doesn't come to the frontier.

However, people are actually like this. In the past, it seemed that they were playing soy sauce. Suddenly, they were put in the position of seed players. It's not uneasy, it's a fool.

Lao Wang is more tangled in bed. Do you want to go or not? No or go? In fact, the balance in his heart has long been trampled by Ouyang. Ouyang and Lao Chen were dazed by the Jianghu society, and the bald doctor lost sleep.

Think about the tight life in the capital and the unreliable mentor in the capital. Really, he hesitated too much.

Ouyang took Lao Chen to almost all these doctor's rooms in an afternoon.

"When the seeds are sown, you will see the harvest of the time." Ouyang sat in his old Audi A4 and sighed at Lao Chen in the front row.

"Dean, those top-notch..."

"Forget those. Your heart is higher than heaven. You can't raise them well when you come. If you serve snacks these days, I may have to accompany Mrs. Lu to the grassland. I don't trust others. You Zhang Yuan can't count on it. If you should be responsible these days, be bold and don't be submissive.

You, I'm still at ease.

Also, these days, let the driver pick him up from work. You Zhang Yuan, he's really tired this time! "

"Well, I see."

Chapter 1229

After a day's rest, Zhang Fan became lively again. The young man slept on the cool Kang and was strong with firepower. And old man Lu and old man Wu are half on strike. In the villa on Zhang Fan's corruption Road, the two old men looked at the spring jasmine, drank the fresh pollen water from Zhang Fan and basked in the sun. It was also very comfortable.

After the news that the two old men came to tea was officially confirmed, they had to ask the old men to go to the government hostel. However, because they came in private this time, the old men didn't go, so they stayed at Zhang Fan's house.

Originally, Mrs. Lu was going to the grassland, but looking at the two old and one small ones at home, she didn't feel relieved to go out. To tell the truth, if Mr. Lu hadn't been served by Mrs. Lu all his life, she would have hung up.

You're right to marry a wife.

"They say they are experts and scholars. In fact, they will take care of themselves at all. When they tell the patients, they do it one by one, but look at them! This steamed stuffed bun, you can't put the green onions into the meat stuffing in advance. If you put them too early, the green onions will stink. You should sprinkle them on the surface of the meat stuffing when you wrap the steamed stuffed bun. "

The old lady and Shaohua are together these days, talking about the past and life experience. To tell the truth, the old lady likes Shaohua very much. She thinks Shaohua is very similar to her and indifferent. She is not like an adjutant's wife.

Two old men can drink royal jelly and bask in the sun in the yard, but Zhang fan can't“ Well, it's just your research direction. Liver and gallbladder parasites are the main, and there are some small general foreign subjects. "

"Hey, hey, the directors of other departments didn't invite?"

"No! I did, and I secretly inquired. "

"OK. Go, book me a ticket, say hello to the hospital and say I'm going to a meeting! Hehe, this boy, what is he going to do? "

Hepatobiliary parasites exist not only in the north but also in the south.

Anyway, Zhang Fan began to spread invitations in the name of his master and uncle and his fame these days.

Chapter 1230

"What about the European Academy?" After entering the administrative building, the staff who came over and saw Zhang Fan had to stand down in a hurry. They wanted to call Zhang Fan and see which polite smile Zhang Fan had. It's different if it's in the surgery building or the internal medicine building.

Often, most medical staff will not stop to say hello to Zhang Fan.

Lao Chen probably looked at it lying on his stomach at the window. When he saw Zhang Fan, he ran down at the first time.

"The European Academy has gone to the government." Lao Chen is very happy now because Lao Gao has been dismissed.

"To the government? Recently, I haven't heard that there are funds and some equipment to support the medical port. " Zhang Fan asked in wonder.

"Hey hey, the European Academy went to the government to ask for a quota. Yesterday, the European Academy contacted me with some doctors. In order to make them feel at ease to come to tea, the European Academy directly tried to solve the work of their families. In addition, there are some villas with small property rights in the high tech Zone. It has been arguing. The European Academy wants to directly pick them up at one time, even the doctor building of our hospital in the future!"

"Well! Pay attention to the taxi. Come around. The old lady still doesn't want to pay. " Zhang Fan is also helpless. You say take advantage of it, but it's really cheap. However, if Zhang Fan wants it, Zhang Fan may not be able to pull down his face.

"Hey, hey!" Old Chen bowed his head and snickered.

"Well, when the old lady comes, we'll have a meeting. I have some ideas recently. Also, you have nothing to do in the evening. If you have time, please accompany me to dinner. I want to entertain several people. "

"If you have time, nothing will happen in the evening." In fact, Lao Chen was asked out at night, but Zhang Fan asked him to accompany the guests. He immediately became all right.

"Zhang Yuan, what level is it in the evening and how many drinks to bring."

"Tonight is a private banquet. You're tired recently. I'll entertain you, and you don't care about other things."

"The drinks bought by the waiter are almost expired. Zhang Yuan, don't bring them at night. I'll bring two from the general affairs office!"

"All right, hurry up!" Zhang Fan smiled and let Lao Chen go.

Old Chen proudly went out of the dean's office. There are some things he can't say. For example, he really took wine from the general affairs office to entertain private people. But there are some things he can say can't do. For example, Zhang Yuan wants to entertain private friends. Old Chen politely said to take public wine. The effect is really different if you say it or not.

Although leaders seem to use trucks to pull more money, those with more wine can open wineries, but they can get cheap. Who doesn't like it? Of course, although Zhang fan can't, he is still very satisfied with it from Lao Chen's mouth. This is an invisible flattery.

People, who doesn't like to hear a good one!

Zhang Fan entered the administration building and signed several bullshit documents. For example, when applying for logistics, he had to repair the back door of the hospital. He said that it was sometimes easy to get stuck in traffic when entering 120 at the front door, and then applied for a fee of 200000.

Zhang Fan knows at a glance that this is a fucking business project. It is estimated that the people below may not be able to stop it before reporting it. However, he is not afraid. I wrote directly. Are there two stone lions at the door?

There are also some doctors and nurses who will retire immediately to recuperate. In public institutions in the northwest, there are often some commonly known agreed rules. For example, in public institutions, work is often not arranged in the year of immediate retirement. You can come to work on time or not.

Tea vegetable hospital can't do this. After all, in this place, women are used as men and men as animals. It's not good not to come to work. However, in order to appease everyone, Lao Huang took a so-called retirement convalescence leave.

Is to go to some so-called sanatoriums along the coast for three months, and then come back and retire.

After reading these reports, Zhang Fan directly contacted the elder martial brother under Leifeng Tower.

"Elder martial brother, how are you doing recently? It's very good!"

"Good, good. Ha ha, younger martial brother has given us face. What's the matter?"

"Is there a room available in your sanatorium? I have several doctors and nurses who will retire soon. I want them to see your high-end sanatorium."

"Yes, you said there must be. OK, send the list directly. You are a busy man, so I won't delay you. Say hello to the old man for me. "

Hung up the phone, called the chairman of the trade union and explained the matter. Looking at the shocked chairman of the trade union, Zhang Fan didn't say much. He changed into a white coat and went to the clinical building.

When Zhang Fan is free, he usually goes to the clinical building in the morning. If there is something on the administrative side, he will arrive half an hour early. No matter whether he can't finish it, he will go to the clinical side to participate in the morning meeting. He can't finish the administrative work. In the past, Ouyang helped him wipe his ass. Now the old lady is so good that she can only count on Lao Chen.

Wearing a white gown, Zhang Fan smelled a smell of perfume. It must have been washed by the head nurse of the operation room. The woman herself used perfume to tell her several times, but she didn't listen to it and gave it back to the white coat. But Chang fan did not deliberately clean up the family.

Yesterday, Zhang Fan remembered that the head nurse shed tears! People, after all, are still people. Where there are people, there are close and distant friends. This thing can't be eliminated.

Zhang Fan went to the ICU first and handed over his shift at the morning meeting. Lao Huang, the

director of the ICU, saw Zhang Fan and immediately said to start handing over his shift. He was waiting for Zhang Fan.

Because of such a big operation, Zhang Fan must come to the ward round, and he also wants to show off. Look, how well we did in the ICU. After one night, the patient recovered well in all aspects.

"After yesterday's operation, the patient..."

The shift handover in ICU is different from other departments. Others, whether internal medicine or surgery, are one-stop responsibility to the end. After a patient is admitted to the hospital, the bed doctor must be responsible for leaving the hospital or dying.

Unlike ICU, ICU is often a doctor responsible for one day.

After seeing the postoperative patients on that day, Zhang Fan listened to Lao Huang show off the treatment plan. Zhang Fan seriously praised how high the level of ICU was. Zhang Fan left ICU and went to several surgical departments.

I read it layer by layer. There are probably several operations today. He must know whether there are critical or difficult operations.

If you don't count in your heart, it won't be long before these goods can raise the dean and give you drugs exceeding the standard every day.

After reading the surgery building, Zhang Fan turned around the laboratory again. The boss of the tea element laboratory is Zhao Yanfang now. Women used to be so proud and charming, but now they are so domineering.

She is as like as two peas in Ouyang's government. It's not money or people, or equipment. It won't leave your mind at all.

Turn around, it's more than ten o'clock. Then Zhang Fan enters the operating room to see if there are any operations that need his help. If not, he will see that there are many surgical rows in that department, and he will help make several.

After the operation in the afternoon, Zhang Fan slept a little in the small lounge of the operating room and left the operating room. Today he will entertain people.

Because there are a lot of sub top experts coming this time, and there are still some papers that have not been completed, so people still go and entertain them one by one. Zhang fan can't take care of it, but he can pick up the hospitality and give it to others. Therefore, in the name of entertaining his classmates, he entertained the big spenders first.

Many times, some things are hard to say when they are not at the dinner table. For example, when you

invite Professor Yang Yongcun to the office to talk about things, you have the meaning of greeting your subordinates. Call and say it, and it feels informal. Therefore, Zhang fan can only invite others to dinner.

"Old classmate, the reception is not good. I'm finished today. Do you have time in the evening? I'll invite you to dinner." Zhang Fan calls Yang Yongcun's students.

"Oh, you're polite to me. I'm alone. I know you're busy. Why don't I invite my boss to dinner today?"

Zhang Fan's classmate is also a personal expert. Although he doesn't know what Zhang Fan wants to invite him to dinner, he understands that he and Zhang fan are just college classmates. In the past, he nodded and traded eggs and instant noodles.

It's not that we despised Zhang Fan in the past, but that Zhang Fan didn't have time to deal with everyone. He was busy making money every day.

Therefore, after receiving Zhang Fan's call, he turned his eyes and understood that he was asking his boss to make excuses for him. He directly handed the steps to Zhang Fan first.

"Old classmates are old classmates. OK, if Professor Yang is not busy, you can invite him. In the evening, you have booked a box in the hotel opposite the hospital, so you don't have to worry. OK, see you in the evening. "

"Elder martial brother, do you have time in the evening?" After Zhang Fan finished talking to his boss, he went to his doctor's elder martial brother's room.

"In the evening, the manuscript of the paper hasn't been changed. It's too difficult. Alas, it's not reassuring for our boss to give it to others. Tell me, tell me, I haven't even gone to the frontier!"

Doctor elder martial brother, as always, began to pretend to be forced.

"Oh. Forget it. My college classmates invited me to dinner. I wanted to invite you, elder martial brother. If you're busy, I can't help you. My level is limited. "

"Hey, hey, no, no, brother, you know, your elder martial brother, my mouth is bad. How can you take it seriously? In the future, if I don't stop like this, I'm this!" His elder martial brother made a dog or a pig.

"Will our boss go too?"

"Originally, Zhang Fan said to have dinner in private. I don't think it's very righteous not to call the teacher or invite the elder martial brother. I invited the boss and you for my old classmates. Just don't blame me for my trouble. "

"Oh, not much, not much! Brother, I thank you! "

"What about the paper?" Zhang Fan seemed embarrassed and said again.

"Hey, brother, you're still angry. Brother, I'll make amends for you!"

Zhang Fan walked out of the door with his mouth tilted. Since he entered the tutor's door, the tutor was a little better, but he was bullied and crippled by this guy. Today, he was evil!
