

Chapter 1231

Man is a strange species. If Zhang Fan didn't do this super large liver tumor surgery, even if his teacher was an academician, his uncle was a cow's no good generation overlord. Unfortunately, in the eyes of some big guys, who is Zhang Fan and who is Zhang Fan.

This is also related to the difficulty of becoming a talent and the difficulty of becoming a top talent in the medical industry, because many promising talents don't know where to go when they walk. For example, there were a large number of young women in eight medical schools who didn't know where they had gone.

Occasionally, when I see their names again, they have become international friends, especially those in the mountains. Why does the capital magic capital even have medical treatment in large rural areas? Why does the medical treatment in Yangcheng seem to be a little inconsistent with their economic status in the whole country? If it were not for the respect of Lao Zhong, it would be true

Of course, before Zhang Fan's operation, people clearly knew him or had seen him perform the operation, but in front of the leaders with the same top status, they didn't know what the reason was. It was as if they pretended not to know this person and were afraid of being ridiculed by their peers.

But now it's different, when Zhang Fan finished the world-class difficult operation.

The mouth said that Zhang Fan was swollen, Zhang Fan was arrogant, and there was no one in Zhang Fan's eyes. But when receiving Zhang Fan's invitation, one replied faster than the other, and some even prepared to arrive at tea vegetarians one day in advance.

It is called to meet Mr. Lu and Mr. Wu in advance, but in fact, it is to occupy a pit early in this mobile Research Institute of rare and regional diseases.

What are the two old men to see! There are no flowers on his face.

In fact, this not only represents that Zhang Fan is recognized, but also represents that there will be another person in hepatobiliary surgery in the next 40 years or more! When the next edition of the textbook is to be changed, especially the chapter on liver and gall, people will certainly come to Zhang Fan for a look.

This is status, this is authority. Many doctors have more authority than professors in medical universities because they have become big winners in clinical practice.

Of course, if doctors are compared to athletes, Zhang fan can now be regarded as the overlord of the Paralympic Games. Because he really can't do well in his paper.

Like many directors, he has written countless papers. He can call him director, but he can't call him professor. In medicine, anyone who can be called a professor is a director. The director may not be a professor.

Therefore, Zhang Fan's own affairs are very clear.

If you want to grab meat from those medical and academic valves, you must pull out a pile of soy sauce parties waving flags and shouting.

It's just like the strategy of old Mao in those years. We should support Heida. At that time, it's good for Heida not to mention helping China. But with these soy sauce people, the lame side will be filled up naturally.

Therefore, even if the bald head ran into the sea, he would never change his mouth.

Zhang Fan got off work and stood at the gate of the hospital early waiting for Shaohua. Because it's a treat today. It's no fun to get the hospitality wine from the hospital. Zhang Fan loves money, but he has made a good profit in recent years. There is no need to take advantage of anything cheap.

Zhang Fan stood at the gate of the hospital, and the medical staff who went to work after work looked curiously at his own Dean "Dean, where's chagang!" Those who ask such questions are usually mature doctors in charge of certain affairs in the Department. If Zhang Fan takes the lead, they should follow up.

"No, no, wait. Is it the night shift today?"

"Zhang Yuan, is this the beginning of standing guard for us?" This is the same as Li Hui, who went to the hospital with Zhang Fan in those years. Their group of people are particularly proud in the hospital because they are more familiar with Zhang Fan. They were transferred to another department and became younger brothers together in those years.

It can be said that I made friends in the micro, so I speak more casually.

"Go, don't make trouble, busy!" Zhang Fan drove the goods away with a smile.

"Zhang Yuan, how handsome! Remember me on your next date! " This is the operating room nurse who was interested in Zhang Fan.

At the beginning, several nurses who were interested in Zhang Fan watched Zhang Fan get married. Although there was nothing to say, they didn't want others to know that they wanted to sleep with Zhang Fan. But with Zhang Fan's uncontrollable all the way, he directly became the boss of the hospital.

Well, all qualified nurses in the operating room, whether they disliked Zhang Fan before or were really interested in Zhang Fan, now all say that they had a crush on Zhang Fan in those years! I seem to be saying that although I didn't win Zhang Fan, it's a technical problem, but my vision is still powerful.

"OK, hurry to pick up the children. Isn't your family going to transfer jobs? Director Wang has promised to let your husband report next week."

"Ouch, Zhang Yuan, I love you so much. You don't look up to me when you say to give you money. I'm a common people, and there's nothing I can do, but you..." said while deliberately winking at Zhang Fan.

In fact, everyone knows, "Hey, hurry, your head nurse is coming! Don't pick you up again! "

Zhang Fan frightens each other with a smile.

In China, the relationship between doctors and nurses is very strange.

When I was young, doctors flattered nurses. When you get old, the nurse flatters the doctor!

Many people will be curious. In fact, when they were young, nurses could see their heads almost all their life as long as they didn't leave the hospital. This is the so-called future. That's it. Different from doctors, the chief inpatient, deputy director, director, vice president, President, or even further, may have a chance.

All aspiring doctors flattered nurses when they were young. He can't compare with nurses and care about the length. His reputation in all walks of life doesn't matter at ordinary times, but it's very important at the critical moment.

Therefore, doctors not only tell jokes to nurses, but also buy some snacks for nurses. Moreover, if you flatter the nurse, your patient will also be taken special care of. So many patients feel that doctors like to lick nurses. Of course, it doesn't count. After all, when nurses participate in work, they are much younger than doctors. The collagen face makes the hospitalized dogs drool a lot.

Be careful, the doctor who licks may be the dean in decades!

When doctors have no future to run, at this time, both qualified nurses and junior nurses have to curry favor with others. Because it's too easy for doctors to find nurses. A verbal doctor's order can make nurses break their legs. A simple blood pressure measurement, once every half an hour, can give the

nursing group a headache.

Zhang Fan smiled and greeted the people who came over and talked casually. At this time, Shaohua drove a car to deliver wine and cigarettes to Zhang Fan.

The big pickup truck stopped steadily in front of Zhang Fan. Zhang Fan, like a thin dog, swished and ran over.

Shaohua saw Zhang Fan: "did you have another operation today? Look at your dry mouth. I soaked you some water according to Shiniang's prescription. You'll drink more later." Zhang Fan doesn't drink or smoke, and Shaohua doesn't have anything to explain.

But you can't ignore everything, so

"Two pieces of raw pulp and one red snow lotus. Your classmates are here. Is it a little low grade?" Shaohua looked at Zhang Fan with a smile.

"Silly girl, as soon as you smile, I know what you think! Male classmate, I mainly invite other people's teachers. All right, hurry home. How are the two old men? Have they come to relax? If they are tired and sick in tea, the teachers and brothers may eat me! "

"As far as you are concerned, am I such a person. The old man and the old lady are very good. Their parents slaughtered a sheep to feed the old man. In the evening, we cook cooked rice, regardless of you. I'm leaving! "

"OK, go!" Zhang Fangang took the cigarette and wine in his hand. Lao Chen is like falling from the sky.

"Oh, let manager Shao send it." While saying hello to Shaohua, he took the wine from Zhang Fan. At the gate, Lao Chen wouldn't say anything about taking the hospital's hospitality.

"Dean Chen, you look good recently! With a red face, is there anything good? " Shao Hua smiled and said, Shao Hua is polite, while Lao Chen thought a lot. What does manager Shao mean? It's about me joining the team. Zhang Yuan told manager Shao?

Around the tea vegetable hospital, it is now the most prosperous place in tea vegetable city. The five-star hotel is still foreign, which also makes many tea vegetable young guys and some greasy greedy men beat their thighs and swear at their mother, because it seems that it is popular to say that if you love her, go to the five-star hotel!

There is also the largest underground supermarket, and the surrounding house prices have risen a lot with the naked eye. In cities where the average price is less than 2000, there are more than 6000 houses within one kilometer around the tea element, and there are no existing houses.

Therefore, the tea vegetable hospital has virtually raised not only the house price, but also the cost of

eating secretly and before marriage. For a time, the male and female atmosphere of tea vegetable has improved a lot, especially the men are reserved. Even if they go shopping, they will choose a place far away from the tea vegetable hospital to date.

Zhang Fan and Lao Chen chatted while walking. Crossing the road is the hotel. As soon as Zhang Fan and Lao Chen crossed the road, the lobby manager ran out with people.

After taking things from Zhang Fan and Lao Chen, "Zhang Yuan, the box is ready!"

To tell you the truth, Zhang Fan hasn't really been here since the hotel was opened, but the manager of other people has long written down Zhang Fan's photos to the people below. As soon as Zhang Fan arrives, the general manager of other people will receive a call.

After entering the box, Lao Chen made a cup of Tieguanyin for Zhang Fan. Lao Chen brought his own tea. He knew what Zhang Fan liked to drink. As soon as the tea was poured, Lao Chen saw Zhang Fan's thermos cup.

Lao Chen took a special look, and then took a look at Zhang Fan. Although he didn't say anything, he was quite puzzled " Zhang Yuan didn't bring much tea cups before. Is it that people have to soak medlar in a thermos cup when they are middle-aged? Or is manager Shao dissatisfied?

But... No, it seems that I want Xiao Wang to buy some medlar in their office! Get some more Cistanche!
"

Unexpectedly, because of the dry lips, Shaohua sent a glass of water, which made Lao Chen Fu want to dance together.

Zhang Fan and they had just sat down. Yang Yongcun came with two students. Before they entered the house, laughter had already entered the door.

"Ha ha, when I came to the hospital, I told the hospital that my younger martial brother was absolutely powerful. The vice president muttered when he gave the money. How, how, he called me directly yesterday and said that it could be added. Moreover, he was embarrassed to tell me that he also wanted an invitation from his younger martial brother!"

"Elder martial brother, thanks to you. Otherwise, many of our experiments will go on strike again. You're all open your mouth. I'll let you fax the invitation letter now."

After greeting Yang Yongcun, Zhang Fan greeted his classmates and Lao Yang's doctoral students with a smile.

Chapter 1232

When Zhang Fan saw his classmates, in order to avoid embarrassment, Zhang Fan immediately opened his mouth. As a result, people were even better than Zhang Fan immediately“ Little martial uncle, there were several class flowers in the previous class. We have to take a group photo today! Thanks to you for a long time, I will show off in front of my classmates today! "

The boy's mouth saved several people's embarrassment!

"Hey, how can I make you spend money? I should invite you. Unfortunately, Shifu and uncle are too tired."

"Yes, yes, little martial uncle, we should entertain you!" The doctoral student looked at his master brother and a classmate for a while and a martial uncle for a while! Damn it, the boy who commands on weekdays has such an awesome classmate.

Hey, I really should have heard that old saying. I can't see how soon it will rain under the clouds! Fortunately, there is no big contradiction between me and him! Although the doctor smiled on his face, he regretted for a while. This kind of student is terrible. He doesn't say to deal with him. Just say it casually in front of his boss. Your doctoral student is a little high-minded, and the graduation difficulty can be several grades higher!

Therefore, he made up his mind, not for anything else, just for this little martial uncle, he should unite with his classmates!

"Sit down, sit down, look, see the outside." Zhang Fan then took his classmates and his elder martial brother's doctoral students to their seats.

In fact, he can't stand this kind of dealing. Unfortunately, life is like this. It doesn't mean that anyone who has a hang can hang everything.

Old Chen smiled and looked at their confused brothers and classmates. After they were polite to each other, old Chen spoke now.

"Professor Yang still has face. We Zhang hospital seldom entertain. This time, we not only have to treat, but also bring good wine!"

As soon as he said this, Lao Yang had more face.

In fact, when working in China, it is often Mao Wujian. There are few tens of thousands of xxoo. It is also very rare to see the so-called Raffi in the 1980s. Especially, the older they are, the more popular Mao Wujian is. Of course, some wonderful flowers are not excluded.

Otherwise, the boss of the wine dealer in the bird market can make a fortune by producing Raffi!

After a few greetings, Lao Chen asked the waiter to start the dishes.

To tell the truth, Zhang Fan and Lao Chen don't like the dishes of the hotel very much. In terms of appearance, the dishes of the hotel look countless times higher than those in the fly restaurant in the Jianghu. But this thing tastes really good.

The name is generous and the appearance is high-end. You are tired of eating more and hungry less. Anyway, it's like a seasonal fruit tree on the table. It's just a plate. Maybe the hotel here can't!

Of course, it's not without highlights. In the specialty dishes, a dish of litchi meat is quite standard. In Zhang Fan's words, a dish of more than 1000 yuan is worth some money, and everything else is wasted.

If northerners can use salt and pepper, such as barbecue, experts sprinkle some salt and pepper. The smell of barbecue can make you suck your fingers several times.

Southerners use sugar mysteriously. It's obviously a piece of pork. With some sugar, they can really taste fruit. It's also very powerful.

After the hot dishes were served, Lao Chen began to drink instead of Zhang Fan. Most people think that doctors don't drink is an illusion. Experts don't drink or smoke more, and there are many doctors of tobacco and alcohol among ordinary doctors. In the early years, there were doctors who took a pulse while smoking. After that, they told the patients: you're going to quit smoking!

Yang Yongcun usually drinks, but that's a small drink. Without Zhang Fan, it is estimated that Lao Chen's wine will not dry in one mouthful. But with Zhang Fan, although Zhang Fan doesn't drink, Lao Yang doesn't care. He works when the cup comes, which is quite forthright.

The teachers are so forthright. Zhang Fan's classmates and doctoral students were fooled and drunk by Lao Chen early. There are many excuses for clinking glasses and drinking anyway.

Who's Lao Chen? The two chicks don't have all their hair. After a while, one entered the table and the other began to grin foolishly.

"Hehe, let's move to Zhang Yuan. The teahouse here is also good."

"Elder martial brother, have some tea?"

"OK!"

After they went out, Zhang Fan stopped giggling and the one who drilled the table came out.

"The key is to wake up the soup. The liquor of tea is too strong!"

"Just like drinking gasoline!"

Neither mentioned anyone else.

In the teahouse, after Lao Chen soaked for two times, Zhang Fan said, "elder martial brother, I'm worried that this research site for rare and endemic diseases will be poached!"

"You can't dig it out. You have made a scientific research personnel mobile, so you are afraid that others will make your scientific research point mobile. This year in tea, you will go to the south next year and look back the next year! "

Yang Yongcun thought about it, understood it, and directly pointed out the key to Zhang Fan.

"Yes, elder martial brother still sees better than me. What do you say I should do!" The work of the Chinese people in the early years was actually very simple.

Eat first. If people don't come, they will think of other ways. If someone comes and makes a statement at dinner, for example, there is something wrong with this matter, but it is not a big problem. This is the signal. If you should send Mao five swords, send Mao five swords.

Many people think that we should talk about things at the dinner party. In fact, the dinner party is to express our position. The details are after the dinner party, and the second game starts. This is also the sentence of earlier years. You can't go far without drinking. The second important thing of others hasn't started yet. You lie down on the toilet and compete with the toilet early. How can you integrate into others' circle of talking about business!

When Zhang Fan said this with a smile, Yang Yongcun already understood Zhang Fan's meaning. Zhang Fan didn't come for an answer. He came to find help.

"In fact, it's not impossible. If you can let the martial uncles endorse, it's no big deal!"

"No, master, they are old!" Zhang Fan shook his head.

Yang Yongcun smiled and was happy. If the old man came out of the mountain, he would wave the flag and shout. Even waving flags and shouting may not have a place, but if the old men don't go out of the mountain and the younger martial brother takes the lead, he will become a big man. It's still natural.

"That's right. In this way, I've contacted some of our generation these days. I'll make this matter firm for younger martial brother. It's not easy in the frontier. It's not easy to have such a platform. We must let the platform stay here. "

In a few days, Zhang Fan invited many such experts.

Of course, for example, his own elder martial brother Zhou Hongyi and elder martial brother Tang Zhenghao, Zhang Fan doesn't have to be so troublesome. He has something to say directly. Then he had to leave after the operation, so he can only stay in tea.

"He takes the lead. OK, he will be in charge this year and I will be in charge next year!"

"Hey, this guy has a sharp eye. He just wants to set up an international research institute. It is estimated that the people in the capital will jump up and beat people. Let's go and have fun. "

Many people are not optimistic about Zhang Fan's team.

Because after all, tea can't become a cultural center. This thing says the center. Many people don't understand what it means. In fact, it is a right to speak.

Just as everyone was ready to eat melons and see how Zhang Fan, a tea vegetable, could support the cow, the latest issue of BMJ (Sandao Medical Journal) exploded all over the world.

"I'll go. Is BMJ ready for dinner? Tea is so awesome that a regional hospital directly dominates the liver and gall! "

"Can you wait until you finish reading it? Does this quality paper cost money?"

This surprise is only in the hepatobiliary sector, but this time the effect is different from the past. In the past, that is, most doctors in China were surprised. This time, foreign countries, especially developed countries, began to pay attention.

People are afraid of being famous and pigs are afraid of being strong. That's right.

When foreign doctors began to pay attention, although it was a hepatobiliary circle, it also attracted the attention of the media.

There is a historical origin. I don't know when the problem of drinking water began. When everyone understood that clean drinking water was very important, different results appeared in the East and the West. European and American people turned to drink wine and ice, while Chinese people began to drink boiled water with a teapot.

Don't look at this lifestyle difference, magnification in clinical directly, resulting in the incidence rate of

liver cancer almost all the world's most developed countries in Europe and the United States, and China's esophagus cancer is also very serious.

Therefore, we will pay attention to what we lack.

However, Europe and the United States found that a hospital in China is still a marginal hospital. Many of them can publish so many papers on liver cancer. Now, I'm not happy.

In particular, the Reuters society, no matter who the doctor was, and whether the experiment was true or not, first began to question.

"My God, the Chinese people are going to cover the largest and most historic periodicals in our country! Tea element, barely entering a fifth tier city in China, was able to publish so many papers, and our editors didn't know how much interest they received, so they published them all at once.

I suggest banning the tea element and the surgeon! They can't do this kind of operation. It is said that no one in our country can do it at present. And tea vegetable, a small frontier city, isn't that a joke? "

Well, it was originally the news within the industry, but it has become the focus of ordinary people.

"Hey, the education in China is too chicken. You have to write a paper. Look, it forces people's tea vegetarians and small border cities to go to the Sandao water journal!"

"You don't understand. Don't talk nonsense. Is this an educational paper? It's clearly from someone else's medical system. It's terrible to have no culture."

When Reuters in Mishima made irresponsible remarks, many people who did not know the truth in China began to stand up and scold.

In particular, I don't know when to start, China's network has no circle of friends, no microblog, and has ruling power!

On some microblogs, especially every day, some experts and scholars who say that eating bananas can defecate and drinking water can defecate also joined the excitement and began to crusade against tea.

They think this is the real hammer, because Reuters will be reliable.

Chapter 1233

In the technology industry, especially the technology that we don't know much about in our daily life, not many people know it. However, Reuters argued that after the paper of China's tea vegetable hospital involved fake rowing, I don't know whether it was for timeliness or deliberately.

First of all, the news of Mu Island, a street city on China's side, caught up. It jumped badly and screamed. No one on the three islands could do surgery. A border city even produced five surgical papers, which made the world a big surprise. The medical level of China is worrying. They finished all our HPV vaccines, and our own people can't get it! For the sake of our women's health, hard (a) road should be blocked, and they should not be allowed to come and get vaccinated!

To tell the truth, when people here went to play HPV in this city, they really felt like they had gone abroad. It was as if they had gone to a hostile country. Finally, China got it out in a few days.

Twists and turns also shouted loudly. They checked the data slightly. The medical treatment in the mainland has regressed for 30 years. They have regressed to start cooking cold rice. They have started writing water papers. Dr. Wu has successfully done this operation 30 years ago. Now the mainland has no technology to say, and then they take out the technology 30 years ago to start cooking cold rice.

Major health experts also began to question on the microblog. Under this intentional or unintentional hype, ordinary people also looked at tea.

Tea vegetable suddenly became a hot spot for this reason.

In fact, people say these words with a purpose. Many ordinary people were rocked into the express of these old drivers.

"Zhang Fan's operation was done by Wu thirty years ago?" In the university group, someone suddenly asked.

"You're stupid. You're also a doctor. After Mr. Wu did it, did anyone else do it? This kind of operation is the existence of the hepatobiliary ceiling in general surgery. Now Zhang Fan has done it. At the technical level, it means that our classmate Zhang has reached the peak in the field of hepatobiliary surgery."

"I'm engaged in family planning. I haven't been in contact with clinic for a long time. I'll just ask. You see, you're worried. Zhang Fan didn't say anything. What's your worry!"

Doctors don't know much, let alone ordinary people.

In particular, some boring people don't know whether they have eaten too much or what. They specially went to the official website of catechin to scold people. As a result, the official website of catechin is a decoration. I can see. I want to speak. Sorry, I don't have this function.

The big media hasn't started yet, but the small media blew the pot.

"Shao Hua, Shao Hua, what are you doing? Open the microblog and have a look. Many people will scold Zhang Fan again. It seems that there are professors and experts. Tell your Zhang Fan and find a way quickly." Jia SuYue meets Zhang Fan on weekdays. It's not about the tip of a needle to Mai Mang, but it's definitely unfriendly.

You can see that Zhang Fan was scolded like shit on the Internet. She was also worried. She ran to explain to others. As a result, she was scolded miserably.

Shaohua inexplicably, click to open the microblog. In fact, people use this thing very often. Zhang Fan hasn't used it, but Shaohua has registered, but he doesn't use it much.

She has to worry about Zhang Fan's food and deal with the things on the farm all day, so she doesn't have enough time.

Even Shao Hua knows that Zhang Fan and tea vegetable hospital are being scolded on the Internet. Shao Hua knows it, and Ouyang must know it.

Shaohua was told by Princess Jia, while Ouyang was more formal. It was directly notified by the leaders of the propaganda mouth.

"Is your paper suspected of fraud?" The leader of the propaganda mouth is very serious.

"No! We don't have to cheat! " Ouyang was more serious. After that, Ouyang said reluctantly, "is that how you work? People have hit the door, and you are still hesitating here. Are you going to give up this propaganda position? "

Ouyang looked dissatisfied. She was half a space lower than the other party, and she had not dealt with much before. The leaders of the propaganda mouth were stunned.

"How dare there be such a notice and question our work? It seems that the legend is true, comrade... "

After thinking for a while, he was not ready to compete with Ouyang. There was no need.

"The superior asked me to implement the work of tea vegetable hospital, but I just implemented the work. I know that your tea vegetable hospital is developing very well. You are all comrades with achievements, but you are separated from each other. Just as I don't know how to see patients, Ouyang notice may not understand the particularity of publicity work. "

Then the leader left.

Ouyang was dumbfounded and stunned for a long time. Although the leader in charge of health sitting on one side had no expression on his face, his eyes bent and corners of his mouth turned up. He endured very hard.

Ouyang turned his head and said, "why did you change 120 this year, and the traditional Chinese medicine hospitals changed them? Why didn't you change them for our hospital? Do you mean to exclude the tea element hospital from the tea element government system?"

The head of the health department had a direct MMP rise in his heart.

Ouyang is definitely not the kind of person who doesn't anger others. She will be angry when she is angry. This character is not good for others, but it is really good for yourself. People like Ouyang will send out anger when they are angry. When they are angry, they will not find others, such as thyroid gland, depression and breast lump. Therefore, women sometimes have to release.

Zhang Fan has also been asked " Dean Zhang, is your paper suspected of fraud or irrigation? "

People's level is very high. A leader of Zhongxuan asked directly through the leaders of the bird market.

"No, our papers can stand verification and time. I can use my caution to guarantee!"

Zhang Fan told each other firmly on the phone.

"Well, I'm relieved. Comrades work at ease and do a good job in scientific research. You don't care more about the noise from the outside world. Our propaganda comrades will do a good job of escorting you. "

Then he hung up the phone.

Zhang Fan is still wondering, "is it swollen?"

After a while, Shaohua's phone came in: "I'm so angry..."

Then, Wang Yanan's phone also came: "I'm so angry..."

LV Shuyan's phone also came: "there won't be any big problem..."

Ma Yichen is here too!

After a while, almost all the people in Zhang Fan's department called to care.

Zhang Fan felt that he should go to see the news, open Du Niang, enter the tea element hospital, and

then smoke away from various private hospitals, such as painless people (a) flow, polymer precision chemotherapy, and the latest equipment in the golden Mao country. Anyway, there was no serious news.

"Du Niang is useless!" Zhang Fan closes Du Niang with emotion.

Just after the emotion ended, Ouyang wind came.

"I'm so angry!"

Zhang fantou is big.

"Look, look, these people, look what they say about us!"

Zhang Fan took Ouyang's smartphone, which he didn't know where to get from. The microblog interface was opened on the mobile phone.

In 2011, Nokia still had afterglow. PHS was still standing on the tea element. Of course, rotten fruit was also popular. Of course, most of the rotten fruit used in hospitals were young people.

Zhang fan fixed his eyes and said, "eh!"

If someone scolds you, you won't be happy. "What should I do?" This is the first time Zhang Fan has encountered this situation.

Originally, I thought that my hospital could now rely on this wave of surgery to attract a few more high-end talents to establish a high-end scientific research point. Unexpectedly, before people pulled it or built it, it was already a smelly street.

That's nothing.

"I also read the newspaper of Mishima and the newspaper of Jinmao talking about us." Ouyang said, holding the recently popular translation as Haoyitong!

"What should I do?" Zhang Fan really had no choice for a while. With the overwhelming news and foreign news, he can't say it alone.

Depressed Zhang Fan is in no mood to work.

Back home, the two old men said with a smile that the sky could not fall! Zhang Fan thought about it, and that's right. It's estimated that we won't scold in a few days!

When Zhang Fan felt that there was no way, the propaganda of China began to work.

When Du Niang is doing worse and worse, it's like being a super top three foundation. As a result, she has made a field. Her left hand is responsible for abortion and her right hand is responsible for pregnancy!

The new Japanese newspaper is still awesome. The next day, they started to fight directly. They didn't seem to quarrel with street shrews, scold their mother by pointing to the three island newspaper, let alone pointing to the ordinary people.

People first talked about the history of the tea vegetable hospital, starting with how the tea vegetable hospital started from several soil embryo rooms, then talked about the development of tea vegetable, and then began to list the rescue and disaster relief of tea vegetable in recent years.

Then, suddenly, I began to talk about the current situation of tea element, from the most advanced intestinal laboratory in Asia to the joint orthopedic research center of special orthopedics, and then there was special skin transplantation, which began to be listed one by one.

When people thought that there was such a powerful hospital in the northwest, they turned around and began to talk about doctors. First, they said Ouyang, who had been rooted in the frontier for 20 years, and then Lao Gao, Lao Chen, who had made meritorious contributions to SARS.

Then began to say that Xue Xiaoqiao who gave up employment in the capital, Zhao Yanfang who gave up big cities

Finally, Zhang Fan's name finally appeared, starting with Zhang Fan's branch, until Zhang Fan became a disciple of his ancestral generation, and then received the most difficult surgery for liver and gallbladder.

When the newspaper of the day was sent to the tea vegetable hospital, Ouyang took the newspaper and his hand shook. He didn't know how to do it. "Zoom in, zoom in, be sure to zoom in, I want to mount it!"

The hospital changed from being scolded to jubilant.

Some health experts on microblog, who don't know what to think, even began to question and say that Xinri newspaper just had a meal!

Just when everyone was ready to scold, Sandao Royal Brompton Hospital sent an invitation to Zhang Fan.

And they put the invitation on their official website.

This time, the world is quiet, especially in cities with curves and one street. They seem to be out of hearing and out of sight!

Chapter 1234

A new day mother's article is called, lies can't change the true image. It made tea vegetable and Zhang Fan famous directly.

Where is tea?

Do you need to make an appointment to see a doctor?

May I have Zhang Fan's throwing knife, please?

Zhang Fan finally realized why even in garbage time, stars have to go to the Spring Festival Gala. It's too powerful!

Of course, ordinary people will not chase Xinri's mother every day, but they can't hold the forwarding of other media.

Other media are less implicit.

"The great God of liver and gallbladder in China is tea!"

"Shocked, there is such a figure in the frontier!"

"The young Chinese boys who have shocked the world!"

"Miracle doctor! miracle-working doctor! Reproduce the miracle doctor! "

This time, Zhang Fan is completely famous. On weekdays, people constantly scold the headline party, but every time they click on the news, the first one is actually the headline party article.

"God, people's new day newspapers have come out to Zhang Fan's platform. They still make a fart!"
Several microblog bosses in China looked at the contents of the new daily and felt waves of regret.
Public opinion platform, this place is the most unable to go to the standard.

In particular, some super big V, trivial and bullshit things can click hundreds of millions.

No one can say whether it is just rice with private life or to see the essence of things, but there are definitely more people who just rice with private life than those who see the material essence. In fact, often these people, that is, the high-end Navy, talk to them. It's simple. Who can give just food and who can he talk to.

However, when the Xinri newspaper spoke, okay? Originally, chasing and scolding the water paper of the tea vegetable hospital ruined the reputation of the country. Chasing and scolding the big V who cheated Zhang Fan was a collective pretending to be dead.

Ouyang didn't give up, but this new type of communication media directly made the old lady out of order. In the past, if the tea vegetable daily dared to talk nonsense about the tea vegetable hospital, the old lady could call the office of the Secretary of the newspaper.

But now, where to find someone, you can't bring a lawsuit for a sarcastic remark. Therefore, the old lady had a kind of rhythm. She clenched her fist and didn't know who to beat.

Zhang Fan is indifferent to the Internet and doesn't pay much attention to the invitation of Mishima. Even if the foreign emperor calls, it's useless. His basic plate is tea.

The operation made the colleagues of liver and gallbladder know themselves. The emergence of the new daily made him more famous. He can't care about anything now. He will take advantage of the east wind of the new daily to achieve his goal.

The Royal Hospital sent an invitation to Zhang Fan. They felt that if the invitation was released, Zhang Fan would not be able to report with his feet flying like a doctor in which street!

As a result, I waited for two days, not to mention Zhang Fan himself. Even the tea vegetable hospital didn't respond.

Hi!

At this moment, the Gaul chicken was happy, the golden hair showed its teeth and smiled, and even the Berlin poodle began to see jokes.

Although other countries have a few words about which old lady in Mishima is fine. In fact, they are envious at the bottom of their hearts. So, you've seen golden hair suppress Gallic chickens and poodles, but have you seen other people's golden hair media often and frequently ridicule these two countries?

Very few, but Jinmao's response to Mishima, to be honest, Jinmao media is almost a abnormal state of mind. I don't know why. Was it because the ancestors of these goods were driven out by the queen.

Anyway, the old lady with a head flower, the golden hair media can analyze a large heart play content.

In recent years, people in China have always been benchmarking against the golden hair, and other countries don't pay much attention to it.

In fact, when it comes to military, perhaps golden hair can dominate the world, but in other industries, golden hair may not be the boss.

For example, Dolly, the world's first cloned mammalian embryo sheep, was made by Mishima. Gaul chicken is also quite fierce in medical treatment, especially in the field of biopharmaceutical. Apart from others, the high-end market of beauty cosmetics is almost monopolized by Gaul chicken. Don't underestimate these lipstick enterprises. Once these guys shake their body, they can become pharmaceutical enterprises, and they are definitely not comparable to pharmaceutical factories in China that can only send drugs to the countryside to sell Dali pills.

Berlin poodle doesn't say. People are almost beaten with golden fur on the medical examination instrument.

Therefore, when Sandao Royal Hospital invited Zhang Fan and hung it on the official website, there was a posture waiting for Zhang Fan to come and worship. As a result

"The three islands have invited you. Are you not going to go, or what do you think? Why don't you reply?"

In Zhang Fan's wechat, almost all the students talk about such problems privately. Zhang Fan was very upset. At the beginning, Zhang Fan was very enthusiastic. But chatting feels wrong, but fortunately Shaohua has a way to get Zhang Fan a head portrait of a wedding photo, which is much better.

"Female masters are terrible!" Zhang Fan finally realized the power of this sentence.

With the forwarding of major media, the tide of medical treatment came together with experts. Zhang Fan's first large-scale meeting after taking charge has also been put on the agenda.

In the conference room of the hospital, the middle-level and above leaders of the hospital gathered in the conference room, "comrades, tea vegetable hospital and golden mean University signed a strategic cooperation framework agreement. We should take this Agreement as the starting point, face people's health, seize the opportunity to jointly apply for scientific research projects..."

Zhang Fan sat solemnly in the chair and said officialdom. In fact, it was very simple. That is: brothers, come on, apply for scientific research projects, otherwise the agreed funds will be occupied by the golden mean!

After saying these things, Zhang Fan entered the main body of the meeting and established a scientific research workstation. From standing committee members to resident experts, Zhang Fan spoke out one by one, and then we discussed it internally. How can we improve the internal and external skills of tea vegetable hospital through mobile experts.

Don't underestimate the local disease, just a liver hydatid, which is almost a very serious disease. It can be said to be cancer in the parasitic world. Not to mention China, there are quite a lot of this disease all over the world, such as Austria, which sells ore, a country that fights with three Islands for one island, and a little new orchid.

These are countries with high outbreaks of hepatic hydatid.

Each country has its own way. But each has its drawbacks. Is there cooperation between countries? Yes, but not for a long time, so Zhang Fan's workstation, if it can be long-term, is definitely a good thing to achieve results.

"Why didn't you invite the leader of the tea vegetable government?" Ouyang looked at Zhang Fan's invitation list and whispered to Zhang Fan.

"Do you need to ask the government?" Zhang fanlue was a little confused.

Money, I have. Now I'm not the little temple that used to be around for alms, and I don't belong to the tea vegetable government now. Besides, I didn't even invite the leaders of the bird market. Is it necessary to invite tea?

"Hey, why are you so careless? A meeting without leaders is not a serious meeting. Now you don't think it's necessary. If the work site develops in the future, you need land and policies, will you ask others for it?"

Even if we don't belong to the tea vegetable management, the current management is better than that of the county magistrate. There will be a lot of places to deal with in the future. If you invite them to meetings at this level, it will not only cost them nothing, but also let them share the meeting expenses.

What they need is face, what they need is face. They don't want your workstation. They can also be bodyguards. Do you understand? "

Ouyang looked at Zhang Fan.

"Hey, with you, I really don't have to worry about anything. You are the dinghaishen needle of tea vegetable hospital!"

Zhang Fan licked the old lady.

It's not that Zhang Fan really thinks the old lady should pay attention. In fact, Zhang Fan wants the old lady to do more work. In the past, there was no need for Zhang Fan to flatter. But now it's different. The old lady doesn't work anymore. Especially in administrative business, I don't do anything naughty.

Zhang Fan flattered. She did a little. If Zhang Fan didn't flatter, the old lady shook her sleeve and went to

watch a Bangzi TV play.

Zhang Fan is also sad!

Indeed, but after Zhang Fan sent the invitation to the tea government, the leaders attached great importance to it.

"Why didn't you say it earlier? Now we are very passive, very passive! You see, there are four or five academicians. The golden mean vice president must be the deputy department. Since the tea vegetable hospital can invite so many experts and scholars, our tea vegetable government must not lag behind.

First of all, I decided that from now on, we should welcome these experts and scholars with the most beautiful, tidy and clean city.

Second, we must let the provincial and even higher media participate, and we must create the Pearl of our frontier and even the northwest. Comrades, we had no chance and conditions before, and we were unknown.

But now it's different, comrades. We have a king fried in our hands. We must not break the deck of cards in our hands. "

The leaders of the tea government attach great importance to it!

The sanitation campaign has started in the streets and alleys. The benefits are real. The stupid, big, black and thick garbage stations have become beautiful. In the past, public toilets can not be found all over the streets, but now there are.

All kinds of miraculous doctors on the electric poles in the streets and alleys were also cleared away.

Ouyang was proud, because the tea vegetable government was responsible for the meeting expenses, which was a package of food, drink and shelter.

Zhang Fan's martial brothers, especially the third generation, almost gathered tea. Several of the second generation also came, but they all came under the banner of chatting with old man Lu and old man Wu.

They do not participate on the surface, but in fact, they are for Zhang Fan to take charge. After all, the second generation is old. Among the three generations, Zhang Fan may be able to carry the flag in the future. So the old guys came one by one.

"Master, martial uncle, martial uncle, don't you hang up your name?" Zhang Fan looked at a pile of old men and women sitting at home. He was also very proud.

If this guy comes, the courage of China and even ordinary foreigners can go back 20 or 30 years!

The old men drank Zhang Fan's good tea and ate the fried eggs of Chinese toon made by Shaohua. There are few such opportunities to get together on weekdays.

"Go! Go! Go! What should we do? Don't bother us! "

Chapter 1235

Patient 9, Zhuang Dongliang, please come to see a doctor in room 3 in ten minutes. Doctor: Wang Xuxu, deputy chief physician of Tongren Hospital of Nantong University.

Patient 211, please go to the clinic on the 17th in ten minutes. Doctor: Li bingru, deputy director of Xiangya Hospital of nanzhong University.

.....

The tea vegetable citizen is a cow.

Doctors at this level, if they go to their local hospital, may not be able to be experts from nanzhong Xiangya. After they come, Ouyang hung a long banner at the gate of the hospital, "warmly welcome Professor Wang XX of nanzhong Xiangya to come for inspection and research!"

Just like the plaques and flags of ancient officials, hanging one represents the big man!

"I'll go, nanzhong's coming!"

"Want it, want it, we're here!"

"The biggest one in our universe has also come!"

"Day (a) shit, why can't you see it in LAN city!"

Tea element is a mixed city. When supporting the border, 100000 young people came to the border from Hainan Island, the northeast forest, the siheyuan in the capital and the alley in the big magic capital. The young people of that year were not young anymore!

At ordinary times, people speak Mandarin and can't see who is who. Today, people who came to tea vegetarians in the green years have white hair and difficult steps. In the past, when they missed their hometown, they could only drink a cup of hometown wine. Even if I go back once in a while, I seem to be an outsider.

But in my heart, it's still hard to leave my hometown.

But today is different. In the tea vegetable hospital, colored flags are fluttering. The colorful flags with the names of experts in their hometown fluttered in the frontier hospital, as if their mother's family had come to support them.

The original old patient was sick on weekdays. He felt a little windy and had to lie down. But now he is different. He seems to be healthy. It's like eating gailigai. He has menstruated when climbing qiaogori peak!

"See, see. Your uncle wants to see the doctor. He has been registered for a week. Today, the expert came to tea vegetable! Go and hang up his number for me! "

"Dad, you have high blood pressure. People see surgery!"

The daughter looked at her old father with an incredible look, "the old man is becoming more and more stubborn!"

"No, I have a stomachache. Go and hang up. I just want him to show me today! Listen to his local accent! "

The people who didn't come to the tea vegetable hospital in their hometown scolded their mother. They felt as if they were a head shorter than their former colleagues. They didn't know what to say.

Here comes the South Central! Xihua's coming! The southeast is coming! The devil is coming! Here comes the capital!

A group of retired old men and women on the farm pointed to the flag one by one, talking in their mouths, with tears in their eyes. It's like they used to sit in a donkey cart, lie on the snow and climb the ice.

"Leadership is leadership. It turns a professional meeting into a sport and a sport that makes tea vegetarians proud! I admire you! "

Zhang Fan stood on the top floor of the tea vegetable hospital and stood with Lao Chen. Looking at the crowd with heads in the yard, he had to say something to Lao Chen with emotion.

There are some things that can't be done without admiring the old lady. In this kind of meeting, Zhang Fan wants to be tall, while the old lady wants to be grounded!

However, judging from the effect now, it seems that there is no effect of grounding gas in tall buildings! Not to mention anything else, first of all, the patients in several northwest provinces have now been recognized as tea vegetable hospitals. In the past, they had some serious diseases, either in Sanchuan Xihua or roujiamo West Province.

But now, liver and gallbladder diseases and burn diseases come directly to tea element, which can not be realized by other hospitals. However, several top three hospitals in bird city are about to cry. Many families get through 120 and call for tea element! Directly ignored the hospital in bird city!

Lao Gao has already let Lao Chen and Ouyang give him a black hand and go to the devil's meeting. Therefore, Lao Chen has been very tight with Zhang Fan these days. Let alone follow suit. Anyway, when Zhang Fan arrives at the hospital, Lao Chen is always about three meters away from Zhang Fan.

Lao Chen also knows that the leader Zhang Fan said is Ouyang. He is certainly not the leader of tea in charge of health, nor the leader of bird city in charge of health.

"It's mainly because you have a broad mind. Otherwise, can we show off this opportunity to appear in front of others? No, you can't. look at Dean Ju's suit and shoes. His oily hair can be split by flies! "

Lao Chen never comes in front of Zhang Fan. He doesn't say Lao Gao or Ouyang, but he doesn't have to think about Lao Ju. He takes the opportunity to apply eyedrops!

"Ha ha!" Zhang Fan smiled. Lao Chen and Ouyang beat Lao Gao to the magic capital. Zhang Fan didn't notice at the beginning, but Zhang Fan understood when his superior asked Zhang Fan to recommend candidates for the team.

But I can't tell.

"In the future, you should be responsible for the comprehensive business of the hospital. My future focus will slowly shift from the hospital!" Zhang Fan is still satisfied with Lao Chen. It is estimated that Lao Gao will be very difficult to hand over the comprehensive business to Lao Gao. It is better to hand it over to Lao Chen.

"Zhang... Zhang Yuan, you, you want to leave tea?" As soon as Lao Chen listened, his heart exploded like a bomb. He couldn't help calling Ouyang with the phone in his hand!

"Pull! I'll leave the tea plant. Will you inherit my position? " Zhang Fan took a look and didn't say it, it doesn't mean he didn't knock“ In the future, I plan to establish several more research centers of this kind, and then use the research center to drive the hospital. The hospital takes the routine medical treatment, and the research center plays a leading role. "

"Oh! Oh! " Old Chen wiped his sweat uneasily. He glanced at Zhang Fan secretly. He felt that the little Dean was becoming more and more unfathomable now" You can't make small moves in the future! "

At the gate of the hospital, Ouyang took the lead, with Zhao Jingjin and Lao Ju as assistants.

The old lady is wearing a small black suit and red lipstick. She has a small flower on her rare head. It is estimated that the head nurse in the operating room cleaned it up.

Lao Ju and Lao Zhao wear very solemn clothes. The head nurse of the general nursing office, with the selected nurses in white coats, greeted the experts from afar at the gate.

Originally, Zhang Fan thought he was young and should meet him. Ouyang said: I'll go. Now you have your card. When you have dinner in the evening, remember to call the leaders of the government in person. Today, people are awesome.

The government of the tea party has really given power to the awesome official media, and almost one of them has been almost placed in front of the tea hospital. In a word, everyone must listen to Ouyang's command today!

Before each expert entered the hospital, the reporters of tea vegetable daily and tea vegetable TV station all turned off the lights and didn't want money!

Not only are there many media reporters, but also the citizens are enthusiastic. Whenever a local expert comes, the old men and women from that place are almost enthusiastic about dancing Yangko. The enthusiasm really makes the doctors uncomfortable!

"After being a doctor for half a life, this is the first time I feel a kind of star treatment. Hey, really, today I really have an illusion, as if I have been working for decades. Suddenly, I have been recognized in tea. Thank you, President Ouyang!"

The deputy director of general foreign affairs of Xichuan, Sanchuan, grabbed Ouyang's hand and felt as if he had seen a bosom friend.

No one! Who doesn't want to be distinguished, who doesn't want to be respected!

In the evening, at the invitation of Zhang Fan, the stomach and intestines of tea vegetarians collectively attended the welcome dinner.

Of course, the hospitality expenses these days are all paid by the tea vegetable government. The five-star hotel of the hospital has replaced the general hotel formulated by the previous government.

In the hotel, the boss of the government stood up and said a few words sincerely.

Really, he didn't even think that a medical team of this scale could be held in tea vegetable one day.

There are too many doctors. Other things are not troublesome. Eating is particularly troublesome.

The horse is coming up! At the warm invitation of the leaders of the local government, the doctors ate a piece of cucumber with chopsticks!

Because horses have no gall bladder, horse meat is rich in a lot of cholesterol. Even if it is delicious, these second top bald experts are polite not to eat.

The characteristic braised pork of tea vegetable wild pig and home hybrid came up. The leaders warmly invited, and the guests politely ate a piece of cucumber with chopsticks!

Purine is too high!

When kavas came up, the leaders warmly invited everyone to have a drink, and everyone politely ate a piece of cucumber!

The fried came up and everyone politely ate a piece of cucumber.

If it's a group of young doctors, or a few doctors, it's better to say, but the dishes on the table are like those served for everyone to see.

The leaders of the tea vegetable government are worried and crying. What should we do? What should we do?

Chapter 1236

It's not good to marry a doctor or a doctor.

If you want your partner to make some achievements in your career, you have more to offer. However, there is no labor law in any slightly larger hospital, just as leaders go to meetings at any time.

The other half is a doctor, which has obvious benefits. As long as it is a human thing, you can ask the other half about it. Even if your cat is too strong in spring, the other half can sell some medicine to treat it.

Of course, there are good and bad, and the bad side is particularly obvious. If you don't have time, don't say anything first. Just one living habit can make the other half crazy.

Especially the other half of the female doctor. To tell you the truth, if you are not crazy, you are lucky.

For example, wipe her ass from front to back. She has to force her husband to do the same. And for washing hands before and after meals, female doctors want to take a brush to brush their husband, not to mention when they are just in love, there are many people who take hand disinfectant to disinfect others in the third article!

And even going to the bathroom and flushing the toilet can make her mother-in-law feel wronged that the doctor's daughter-in-law despises her. For example, when many people go to the bathroom, they think it's too smelly and smelly, and then flush the toilet. At this time, the female doctor will jump out, point to the toilet cover and scold: it will be infected!

It sounds like female doctors are a little neurotic. In fact, this is quite scientific. Many people, especially girls, haven't even held a man's hand. As a result, they found urinary tract infection! After checking around for no reason, she accidentally found that she had the habit of flushing the toilet on the way! The urology department of Marubeni has done an experiment. If you flush without the toilet cover, the aerosol of feces can rush out six meters away. You can't lift your ass six meters away, so……

In addition, when the child has a fever, the mother-in-law holds the dog skin mattress to cover the child and sweat for the child, while the female doctor takes off the child's clothes, bares the child's ass and opens the window for ventilation.

Alas, the old lady at home wants to chop her daughter-in-law into meat stuffing and wrap it into dumplings with a kitchen knife. Isn't the experience handed down from several lifetimes not as good as your little doctor?

In fact, this is like a joke in the hospital. It is said that a patient has diarrhea for three days because of eating inappropriate food. He is hospitalized because of dehydration. After treatment in the hospital, the patient has spirit the next day, and then he discusses the treatment plan with the doctor in front of the doctor with a dictionary as thick as a sea of words!

In fact, this is the doctor, the doctor in the family. When a group of doctors were at the party, it really made people gnash their teeth. I dislike everything, I dislike everything!

The boss of the tea plant originally wanted to take advantage of this wave of wind to bring his own wine into the country. As a result, when he just said how many kinds of trace elements there are, doctors began to popularize knowledge for him, especially doctors in the Department of liver diseases, who wear colored glasses for wine!

It's like when a certain black medicine produced a so-called super hemostatic toothpaste, and then a group of doctors argued with the pharmaceutical factory on the Internet, saying that the toothpaste contained hemostatic drugs. What's more terrible is that tens of billions of companies can't fight the battle, and even began to want to learn the old methods of a pharmaceutical distillery!

Of course, today's doctors in chasu can't be bothered by the boss of chasu distillery even if they say that the drinks are rubbish.

Tea vegetable's intestines and stomach accompany old Wu and old Lu and their martial brothers. Of course, Ouyang still has a seat here. Zhang Fan is accompanied by several experts who are old, highly skilled, but one generation shorter than Wu.

But the pollen cheese cake of tea vegetable is very popular.

"Elder martial brother, you must take one of the standing committee seats tomorrow!" Zhang Fan talks one by one and has no time to work one by one in private. Moreover, this is not the division of rights, but the assignment of tasks.

Moreover, although Zhang Fan is young, he is a big teacher. Therefore, as long as he is not of the same generation as Lu, it is absolutely no problem for Zhang Fan to call elder martial brother, and the other party is quite happy.

Ancestral disciple, are you kidding!

"I'll take a member of the Standing Committee. Lao Li may not be convinced!" A professor of liver diseases at Central South University, holding boiled water in reserve, was like carrying 60 degrees of tea essence. He said he didn't want to, but he grabbed Zhang Fan and wouldn't let him go!

"Hey, you should win a Nobel prize when you find that glycoproteins have new antigens in the immune response of parasitic proteins in human liver. I'm afraid you can't see this small pool! "

"Ha ha, you kid laughed at me. You were really short of money and material resources. If you continue to study, eh, the glycoprotein variant antigen won the Nobel prize! OK, you have spoken to Zhang Yuan. This standing committee member, I want one! But we don't have a lot of money! "

Although Zhang Fan said the most proud achievements of others, it seems that everyone understands Zhang Fan's habit of grasping people for money.

"Elder martial brother, you will be one of the Standing Committee members for the meeting tomorrow!" In front of an expert in Central China, Zhang Fan whispered while pouring tea.

"Don't you laugh at me? On liver surgery, can I still see it in front of you!" The old man is very reserved!

"Hey! You bully me, liver transplantation, my martial uncle said, the younger generation, he will take good care of you!" Zhang fanle poured water for the bald old man.

"Teacher Wu really said that?"

"Look at you, where your own level is, liver transplantation, who can go around you! Are you afraid that you and I will ask for money and funds? Elder martial brother, it's not good for you to do so. Everyone says that Professor Hu of central China is the most atmospheric in the liver and gallbladder department. Isn't this a rumor? "

After talking to two or three people, Zhang Fan found that it was too difficult for these guys to ask for money, so he changed his strategy!

"Hey, hey, you smelly boy, you are not big and greasy! After this wave, your work point is expected to become a climate. How many standing committee members are there now, and how many fate have been changed? "

"More than 20 members of the Standing Committee can raise about \$5.6 billion. How much can you give, elder martial brothers, and how much we can give! Elder martial brother, be generous. Don't let Jianghu legends become Jianghu jokes! "

"You, OK, I'll pay 20 million this time, but the project should also be put here. When the laboratory comes, it's not enough. I'll trouble you!"

Ouyang accompanied the leader, "leader

Not only did the tea vegetarians laugh, but even the leaders in charge of health heard Ouyang's mouth open, so they immediately stood up and took the wine cup to find someone to toast ~!

They're really scared!

The next day, the meeting began!

The huge five-star hotel is full of Chinese experts and scholars in hepatobiliary department.

Chapter 1237

Tea element held a liver and gallbladder meeting of non liver and gallbladder Association. Listening to the detour, it is actually that tea element hospital did not pass other people's liver and gallbladder Association and made a relatively large liver and gallbladder meeting by itself.

Although the hepatobiliary association is unofficial, it is more official than the government. Many

rotating presidents are very hard to speak.

Therefore, although Zhang fan can pass through his master and his martial uncle, Zhang Fan thinks it makes no sense. After all, at this point in the future, he will never let out his main positions for rotation. He simply pretends that he doesn't know that there is an organization such as hepatobiliary Association.

This shameless behavior makes old man Lu very dissatisfied. He feels that his students are not modest gentlemen. At least they will not be so thick and black. Unexpectedly, they are old and the youngest closed door disciple is so naughty!

However, naughtiness is naughty. Among all the students and disciples, the black boy who closed the door is also the biggest and most powerful. Don't see whether the old man is right or not one day, just point to Zhang Fan and teach him a lesson. In fact, if the old man doesn't really like Zhang Fan, people will come to tea vegetable?

Won't people go to the sanatorium under Leifeng Tower? Even if you don't go to Leifeng Tower and Qingniao sanatoriums, you can't? How comfortable it is to look at the young girl in skirt with the sea breeze!

In the words of old man Wu, the tigers in the zoo can't beat the tigers running all over the mountains in Daxinganling. Of course, this kind of words will not tell Zhang Fan. A group of old men seem to boast and chat at home all day. From time to time, they have to be picky and say that Shaohua can cook too few meals and can't even make a tile fish!

Shao Hua was amused when he watched the old men fight one day. Old children, old children, are really right. For example, old man Wu and milk tofu made of tea vegetable and fresh milk made by Shaohua. As a result, the old man ate up and pulled for two days. Shaohua was scared and almost called Zhang Fan. As a result, the old man was greedy and wanted to eat when his stomach was good!

Although they seem boring.

In fact, one and a half of these old guys' eyes are staring at Zhang Fan.

The meeting was held in the five-star hotel opposite the tea vegetable hospital. The Host Zhao Jingjin, the leader of the responsible group at the venue, the boss of tea vegetable, the second of the Deputy group leader, the executive group leader, Zhang Fan, President of tea vegetable hospital, and the executive deputy group leader. Anyway, all the leaders from the public security bureau to Chengguan town have been arranged.

You can tell at a glance that this kind of big pen is from Ouyang. The old lady also specially made some unique breast flowers for these leaders. Other participants in the meeting hung red cards on their chests, and the deputy leaders of these groups were just like the bridegroom. They hung breast flowers, pink, which were said to be apricot flowers, as if they were the city flower of tea.

It is estimated that Ouyang's brain flashed out of the city flower.

Don't think this flower is easy to bring. Except that Zhang Fan was forced by Ouyang to bring flowers, the others are either out of pocket or out of others. No money, no one, not even the door!

Anyway, the security of the meeting was heavily armed police, which surprised the experts attending the meeting. The leaders of tea vegetable paid too much attention to medical treatment!

The tea vegetable boss took the mineral water produced by tea vegetable himself and came in like a housekeeper or doorman. An expert specially sent a bottle of water and a notebook printed with tea vegetable scenery.

"Comrade Ouyang went too far. We paid money and people. As a result, we even had a position on the podium..." the leader in charge of health seemed to be quite angry and said that Ouyang was not right to his own leader.

"Although I paid for it, even though I didn't have a seat on the podium, I'm happy. Do you think I was arranged here by Ouyang today? No one has arranged for me yet. I want to do this job myself.

Comrades, is tea lack of resources? No shortage! What is lacking is talents. Look inside, what is full of talents. I also talked with Zhang Yuan. As long as it starts this time, it may not be impossible to rely on this platform to create a few high and new technologies in the future.

Really, I don't want the leaders of other cities to see me anymore. They laugh at me and say that our tea vegetable heavy industry is a knife and our light industry is baking Nang! "

Zhao Jingjin started his opening remarks with a microphone in high spirits. Lao Zhao has a red face, which is exciting.

If he hadn't come to tea vegetable at that time, now he can only be an audience in front of the computer. This step is not wrong!

The meeting was broadcast live on tea vegetable TV. Of course, it was not on satellite, that is, a large local video hall. Ouyang originally wanted to find a CCTV station to broadcast it live. As a result, people

didn't take care of it. Your meeting didn't have much ratings!

But fortunately, there are many new media now. For example, clove.com and medical education.com are also broadcast live.

"I'll go. This is Zhang Fan! It's too young for me! " An uninvited doctor touched his withering forehead and looked at Zhang Fan's dark hair with bursts of emotion.

"What's special? I graduated in the same year as me. Now I have become an expert. I still wipe the patient's ass with a dressing change plate every day!" The doctor in the anorectal group of general surgery thought that the more he looked at Zhang Fan with a dressing changing bowl, the more he felt.

"Dr. Wang, the patient's suture is popping again!"

"Don't you keep him from exerting himself? My mother, this is to cure the disease! " The doctor took the dressing bowl to change the dressing before he finished feeling. When he was about to go out, he looked at Zhang Fan in the computer. He made up his mind that he would not dry his anus and intestines in the future and would never wipe the patient's ass again!

"I heard this is your classmate? Very handsome! Once you put on a small suit, it looks like a clothes rack. You didn't talk to him? " If the gossip of a female doctor is really open, people in other industries often have to bow down.

"Lao Chang, Lao Chang, I'll go. You are a cow in the frontier. You see, apart from the liver and gallbladder Association, you can directly hold a conference of this scale, that is, there are no foreigners. If there are several foreigners, it can be called an international conference.

Hey, are you familiar with this guy. It is said that the most powerful of the three generations of Qiu sect disciples. So young! "

Lao Chang, the deputy director who left the frontier and went south to collect gold, now lives well. Zhang Fan, who hasn't been called to ask him about tea for a long time, almost forgot this place. When he forgot this person, suddenly at work, a group of people watched the computer in the director's office.

He was still muttering in his heart, did the rebate of this month come down in advance? Or is there something wrong with the drug rebate and rechecked on the computer“ No, this can't be without him. Don't be fooled! "

As soon as he entered the door, he vaguely heard the word "tea vegetable". Suddenly, like his daughter-in-law's sixth sense, he turned and was about to leave. What rebate, what review, it doesn't matter.

As a result, he was shouted by the deputy director before he went out.

"Come, come, come, Lao Chang, it seems that this man is from your previous hospital, Zhao Jingjin. You are familiar with him. His life is good. It is estimated that he will attack academicians in a few years!"

Old tea's big hand holding the door handle trembled a little. He cried in his heart: injustice! It's really an injustice!

Lao Chang almost left tears of jealousy. The head nurse looked at Lao Chang's excited expression from the nurse station and said to the little nurses around him: "look, doctor Chang still reads the old love. When he heard his former colleague and the dean of tea, Lao Chang was excited and almost cried! Ah, a man of temperament! "

.....

There was a heated discussion in the tea hall.

The leaders of catechin have left, but the leaders in charge of health must stay.

In fact, this kind of meeting is quite good for professionals. We can pool our wisdom and directly call it a brainstorming meeting.

But for interprofessional people, these people don't ask for work. They boast here and make a difference.

For leaders who hardly understand medical treatment, this is especially suffering. Looking at the hot atmosphere in the meeting, he can hear every word he says clearly. However, these words and words are difficult to put together in a foreign language!

For three days, the working point was finally established.

Half of the capital is invested by the tea element hospital, and the other half is jointly invested by the hepatobiliary laboratories of major hospitals. The tea element government is responsible for the relevant follow-up work.

In this way, the working point of liver hydatid disease was established, which is the largest working point in China and even in the world and has the most doctors and scholars involved. In particular, the research direction is flowering on all sides, not a single surgical treatment.

But from the three aspects of immunity, prevention and surgery.

Although the scale of the work site is not small, after all, it is a specific and single disease of liver hydatid. This report was released abroad as a quick news with the lancet.

Other countries are a little better, but kangaroo o said sour, "without their participation, the research of tea vegetable Zhang is a face project ~!"

Of course, in this case, tea has no power to hurt. It will not have a little impact on Zhang Fan.

After this meeting, other departments are hard to say, but in the hepatobiliary department, Zhang Fan is Liwan. It can be said that in the past, Zhang Fan was at the level of big brother at most. As we all know, old man Lu had a student with excellent surgical skills.

Now, as long as they are engaged in liver and gall, they probably know that among the liver and gall bosses, there is Zhang Fan!

At the closing of the meeting, the leaders of all families should be ready to leave.

The tea vegetable hospital received a rescue request from the next country.

Mongolia, this country is very interesting. When we talk about this country, we all think of commander in chief Yu. Although there is no port in this country, people have a very good relationship with xiaowanzi.

But the wonderful thing is that as long as there is something, they don't think about the pill country, they don't think about Lao maozi, but China.

On the side of Mongolia near the border, there is a city. The cities of Mongolia are not very good except ulamba.

In spring, these cities are like drinking high alcohol. Not only people are drunk, but also the roads are overturned.

Because it is a grassland, once the foundation of this kind of place is not good, the asphalt highway laid last year will become slurry this year.

So at the end of spring, the city was busy building roads. It was the same every year. The road roller pressed it casually, and then the asphalt poured out. We'll repair it next year.

Just as they were paving the road, a little doll rode a phoenix second-hand bicycle in China, a teenager like the wind. As a result, the wind like teenager rushed into the asphalt pavement. He was so immortal that the little doll fell on the asphalt pavement just poured into the ground!

Chapter 1238

"It's estimated that there will be another operation today. If you don't come at this time, you don't have to wait for them for dinner!" Mrs. Lu is chef Shao's assistant these days. Originally, the government sent a special cook. The result was pushed by Shaohua.

Shaohua said to Zhang Fan at that time, "it's our business to serve Shifu. You get a special cook to let the old people think. I'm very concerned about this when I'm old. All right, don't worry. Just a few old people's meals can embarrass me?"

Shaohua develops strengths and circumvents weaknesses, and cooks frontier specialties for old men and women every day. To tell the truth, frontier food is not suitable for the elderly.

Heavy salt, heavy oil. Of course, it's not all like this. Shaohua just started making large plates of chicken and mutton. When eating, Shaohua looked, okay? The old men and women can't keep down, so Shaohua changed his strategy and the food is mainly dairy products.

Just like the hot pot in the capital of Sanchuan, there are many kinds of tea vegetable dairy products. In a few days, chef Shao's reputation has risen in the liver and gallbladder circles of China. Everyone said that Zhang Fan has today's surgical means. It is estimated that he is so powerful because he eats chef Shao's food every day!

Shaohua was praised by the old men and women. He felt that he could be a chef in Diaoyutai!

In Mrs. Lu's words, these strange old men are normal as long as they are not in the hospital or on the operating table.

Shao Hua and old lady Lu looked at the plates of dishes in front of them and sighed sadly. They were not worried about Zhang Fan and the old men. What they were worried about was what to do when the dishes on the table were left!

Zhang Fan and the old men are actually on standby in the hospital.

.....

Asphalt, many city people at most know an asphalt road. In fact, when Zhang Fan was young, there were many such things in small towns. Paving roads and building houses are of many uses. In those days, there were few people and toys, and the asphalt paving could become children's toys.

Asphalt must be heated before it can be used at will. In the past, when building houses or paving roads, a large iron trough was often placed on one side, under which burning coal mines or wood were placed.

Gudu, gudu, the asphalt iron trough is like cooking a pot of black rice porridge, gudu, gudu. But it doesn't smell good. The most appropriate description is that after this thing is boiled, it is the same as a large number of plastics are burned!

When boiling asphalt is still fluid, workers will quickly spread it on the road.

How hot can this thing be?

To tell you the truth, a few years ago, when China's infrastructure was in full swing, there was a rumor that eating pig head meat would cause cancer. Moreover, it is also vivid. This rumor was actually because of asphalt.

In those days, not to mention natural gas, even liquefied gas didn't matter. It was quite troublesome to remove the hair from the pig's head. As a result, I don't know which marinated meat genius found a good way.

Is to pour the pig's head with boiling asphalt, and then wait until the asphalt temperature drops down, gently pull it, and the asphalt is pulled down like a mask. Whether you are a black haired pig head or a white haired pig head, you become white, tender, white and soft in an instant, and even your hair is gone.

Moreover, the asphalt can be used many times. When you need it next time, continue to boil it. The previous pig hair burns before the asphalt is boiled. To tell the truth, the boiling smell of pig head asphalt can never be forgotten in your life.

Therefore, in those years, the pig head meat, which was originally a Chinese dish, was made so that everyone dared not eat it.

The asphalt at this temperature can whiten even the pig's head. It is conceivable that it is too terrible for people.

A boy with the same wind and fire, riding a bicycle from a high slope, like a small plane, his feet are like stepping on the wind and fire wheel, that is, the 28 bicycle has no wings. If he had a wing, he might really take off.

The boy is a little Shami, wearing his professional clothes and revealing half of his upper body. If he wears their national leather robes, it is estimated that it will not be too serious. After all, in Inner Mongolia, there is a saying, old Outer Mongolia who can't die!

Unfortunately, no leather robe!

The little monk flew into the newly paved asphalt road, and the bicycle plane turned over. The little doll, who was originally smiling, suddenly seemed to fall into an oil pan. The severe pain made him lose his strength to shout.

Boiling asphalt poured on the road, emitting Miaomiao green smoke. If there is no pungent taste, the road with white smoke in the grassland and blue sky can become a scenic spot!

The naked side of the little doll fell into the asphalt, just like the beach on the beach. The child directly fell into it. Thanks to the fact that Mongolian outsiders don't use much asphalt to pave the road, the thickness is also general. If it is thicker, they don't dare to think about it.

The doll was as hot as a meat bug, twisted and struggled as it was illuminated by a magnifying glass.

There are workers next to Xin Kui. If there were no workers today, the little doll would be scalded into Shami meat! The workers ran quickly over the boards on the asphalt road.

The child has been defiled by the devil's magic. The black asphalt hangs on half of his face. The ticking black asphalt solidifies quickly on the child's face and slowly drops on his chin.

The child wants to cry, but the strength of asphalt solidification has made the child's connected muscles unable to twitch and cry. At this time, it has become a luxury action!

The arms and chests without clothes are even more terrible. The delicate skin is like being pulled together by some black thing. It becomes tight. Children are like being tied together by rubber bands in a few minutes. People are like dehydrated and shrinking carrots.

The workers shouted and ran over, pulling up the child. The asphalt adhered to the body and the asphalt adhered to the ground is just like the child was originally growing on the road. The amount of asphalt is large, it is not easy to harden, and the amount is small, and the hardness is fast.

Just like men, little dolls can face the sky when they wake up, while old men want to face the sky. It's hard to say if they eat too much in West Africa, but it's for sure!

Three or four strong men made great efforts to pull the child out of the asphalt pavement.

After a closer look, the sand mixed with asphalt on the face of the child is just like the toad's skin. It has a bumpy knot. The sand in the asphalt mask is like a burr.

The child is unconscious! I didn't even cry!

The men outside Mongolia took the children to the local hospital by motorcycle.

The baby's parents and master also rushed to the hospital.

Treatment, doctors find a way to remove the asphalt.

This thing, just like plastic lighting dripping on a person's body, is definitely not like a candle dripping on the body. If a candle drips on the body, it is at most a red piece. When this thing is on the body, it directly burns the tissues near the body and then adheres together.

It's like a person who can't cook fried meat. Like a chef, he thinks that in the fire, meat and oil smell meat with the fire! As a result, the meat went into the pot and didn't do anything yet. The meat has been pasted on the bottom of the pot and made a zizilala sound. Bump fart. Quickly shovel the meat with the pot shovel and shovel the meat. The meat has left a mark on the bottom of the pot!

In fact, asphalt is the same. It is very difficult to remove the sticking on the tissue.

You can only use a knife to cut it first, and then lift it bit by bit. One careless thing is that the meat falls down with the asphalt. After all, the layer of a man without a pig can be the thick cuticle of a leather shoe.

The little monk was treated in the local hospital for several days, and his condition was not good. Then prepare for transfer.

Thanks to a good master of the little Shami, the big monk studied in China, and there were also classmates in the Confucian school.

There are big men in the school.

"The liver function of the child scalded by asphalt is dying, and the renal function is not very good. The most troublesome thing is that the child is still in a coma."

A phone call reached Baotou city.

Mombasa Nairobi province is very funny. In the early years, everyone knew the city of Baotou. In the later years, everyone knew ULS. Later, the whole country knew Ashan, who was driven by many men and women. For decades, he just didn't know where the capital of Mombasa Nairobi was. Just like Dazhuang, he was wronged and hid in the shadow of the Beijing Tianjin line.

The hospital with its head wrapped up can't catch such a serious patient.

"Go to the capital!"

Before he finished speaking, the president of Baotou city suddenly said, "don't go to the capital. You are very close to the frontier. Go and contact the frontier. Go and contact tea vegetable. The tea vegetable hospital has a liver and gallbladder conference these days. Almost all the experts in China are in tea vegetable.

Whether the child can be saved or not, only tea vegetarians can have a chance. Come on, don't waste time! "

For a time, the sister cities outside Mongolia were connected with the sister cities of China, and the city with many friends in China was connected with tea!

Sometimes I can't help feeling that the network of people who chant scriptures is still very vast!

"Whatever you can do to save the child! There are tens of thousands of sheep and thousands of horses at home! "

There is really no hatred and love for no reason in the world!

Tea vegetable hospital has also been ordered. Can you save it?

"You can try!" Zhang Fan said to his superior on the phone. "

"Well, I knew that Zhang Yuan has courage!"

Although the Navy outside Mongolia can't get into the sea, helicopters can still be used. Although Soviet style planes are stupid and thick, they are very resistant to operation.

A plane flew directly from Mongolia to chasu.

"Elder martial brothers, there is an international rescue. The patient will arrive at tea vegetable soon..."

"I'll go, international rescue?" The students of the teachers were surprised.

For international rescue, ordinary class III hospitals dare not answer it at all. After this thing is cured, we can say that this hospital is cow driven. If it is not cured, sometimes there are a lot of troubles.

But these bosses don't think so.

Everyone looked at each other with an eager look in their eyes!

But he didn't admit it. "Tea is poisonous. Zhang Yuan is poisonous. You can't leave when you come. The plane tickets are booked!"

"Hehe, I'll push it off!" Lao Chen said with a smile.

China's bold leaders really seem to say that they can't walk away!

Chapter 1239

"What operation! You are all on standby. " Li Cunhou knew it was scalded, but he knew it and deliberately showed it in front of Zhao Jingjin.

These days, Lao Li is experimenting with tea vegetarians. He will also go to the venue when he is free. As a result, it seems that Zhang Fan has become a vassal, and some well-known experts are around him. Lao Li rolled his eyes and said that Zhang Fanchou was showing off, but he was also very envious in his heart.

Like the child king, boys have never dreamed of being a child king!

"Finally it's my turn!" Li Cunhou proudly glanced at Lao Zhao. Lao Li thought that Zhang Fan's actions were all crooked.

Of course, the most important thing is that Lao Li is now like an ancient man. He was originally the first wife of tea vegetable. When he came, Ouyang almost wrapped up the tea vegetable railway station. There are a large number of people. Professor Li on the left and director Li on the right are so kind.

But now, although Ouyang is also enthusiastic, he eats, lives and drinks as usual. But looking at Zhang Fan's attitude towards ordinary foreigners, it seems that Zhang Fan suddenly empathizes and falls in love. In terms of mentality, it seems that he is not valued. In fact, this is a feeling of being out of favor.

Although Zhang Fan and Ouyang didn't reach the point of opening the door to welcome guests and closing the door to kill guests, they always came back and said that if the goods arrived at the ground and died, if they want to reproduce their brilliance, they can't eat a set of R & D until they die!

.....

None of the directors of hepatobiliary circle left tea. When I first came here, one by one said where to make an appointment for flying knife tomorrow and where to go for surgery tomorrow. Anyway, it seems that one by one has been too busy to attend to it.

But when the workstation has been established, we see the advantages. Not only is there a concentration of diseases, but what's more, there are almost a new generation of middle-aged and young hepatobiliary doctors all over the country. At this level, money is not a big problem,

The hardest thing is people. People are particularly troublesome. A person's goal is one, and a hundred people's goals and objectives can be less than 1000, which is quite good.

However, one of the biggest advantages of tea is that there are a large number of liver hydatid diseases, and the operation of liver hydatid has existed since ancient times. So far, there is no best treatment. If you compare it, this disease is at least like the goal of financial freedom of many ordinary people.

Although we have many ideas, there are not so many hydatid diseases in other places, so now we have a unified goal.

Moreover, they also found that the tea vegetable hospital really has the posture of an international hospital!

After Xiaoshami entered the tea vegetable hospital, Zhang Fan entered the observation room of ICU with the treatment group. Because there are too many people, I can only go in and check it in turn.

Among all diseases, scald is really a timid disease.

Watching can make people have nightmares at night.

What children jump into the boiling water pot and what dolls are accidentally fried by the oil pot. To tell the truth, sometimes such patients are worse off than dead when they are in the hospital.

This pain is absolutely unbearable. Sometimes the medical staff can feel the pain when they look at it.

The little monk was placed in the ICU. Although Huang Jiao was not as good as before, his family was still very rich. The little monk's master made a bracelet. It is said that this bracelet was invited back by rich businessmen in Hong Kong.

Therefore, although the little Shami master didn't come, he spoke. Is there enough money to make another one! Sometimes, the arrogance of others makes Zhang Fan feel that he has never seen the world.

Comrades in the United Front were still thinking about what to do, but the money came! It's easy to have money.

A batch of doctors also put on protective clothing and entered the ward for examination. When they came out, their faces lost their previous self-confidence.

"The treatment method is not appropriate. The child is young and the liver function has reached its limit. The problem now is that surgery may not be able to save it. However, without surgery, conservative treatment is hopeless! So now we have to give a treatment plan on the spot. "

After seeing the child, Zhang Fan began to discuss with the doctors of the expert group.

There is an unwritten rule in China's medical system, which is generally unknown to small doctors. For example, a patient is treated in a lower level hospital, but the effect is not particularly ideal, and then goes to a higher level hospital for treatment.

Higher level hospitals generally rarely comment on the work of lower level hospitals.

Only young doctors will rashly say that the lower level hospitals are wrong, while old doctors won't say at all.

Therefore, it is often impossible for ordinary lawyers to file a lawsuit with the medical profession. Only doctors who change jobs to become lawyers are a little methodical. Ordinary lawyers can't do it at all.

Of course, if it is foreign, the doctor will find fault!

After seeing the patient, a treatment plan should be made on the spot. If at other times, this is difficult. But now it's different. Almost all the middle-aged anti Liang workers in China have come to tea. Now they can't give a treatment plan. So let's close down.

"While debridement, reduce the burden on the liver and directly carry out liver repair. Both operations were performed simultaneously. Liver toxicity is too serious! "

We looked at the patient's examination report, and the preliminary operation plan was directly designated in the observation room of ICU.

Ouyang's eyes turned red.

That's great. One person put forward the operation suggestion, the other found out the operation risk, and several others cooperated to improve the operation plan at the first time.

This is the team Ouyang dreamed of. These doctors, although bald, have strange tempers. You really have kung fu in your hand!

Lao Li waited for Zhang Fan to call him. As a result, he waited for a long time and the phone didn't move.

He was angry. "This guy won't be afraid that I will steal his limelight. Do his own skin." The more you think about it, the more likely it is.

Without waiting for someone to invite him, he went directly to the ICU.

As a result, skin grafting is not available yet.

There are two kinds of asphalt, one is petroleum asphalt, the other is coal asphalt.

It looks black, like sesame paste, but the two are very different. In particular, coal tar pitch is more toxic and has more so-called aromatics. What is this thing.

In short, barbecue is carcinogenic, that's it.

Why does smoking cause cancer? It's not nicotine but tar that causes cancer.

Petroleum asphalt is relatively less toxic. This is also why those who wear headscarves are rich enough to flow oil.

What little Shami met was coal asphalt.

This kind of operation can't wait. After the operation plan came out, we were ready for the operation.

Prepare blood, prepare protein, and prepare various drugs.

"The operation is divided into three waves."

Zhang Fan looked at the expert team and continued: "the first wave, debridement diversion, the second wave, reconstruction, and the third wave, skin grafting.

Ladies and gentlemen, today's operation is the first operation in our workstation. Whether you can stand up depends on this operation. "

"OK, Zhang Yuan, don't worry. No problem! "

Everyone spoke in support.

What Zhang Fan wants is this concerted effort. During this time, Zhang Fan is thinking about how to unite with everyone, which is much more difficult than the staff of the United hospital!

Everyone is ready.

Although this operation is a bald little monk, it is definitely not a short time. It is estimated that Zhang Fan has encountered the operation that takes the most time in history.

"The Chinese hepatobiliary surgery group is ready for the first operation."

In fact, the domestic media don't pay much attention to it. After all, the doctor's news is not interesting. It's not only not interesting, but also disgusting sometimes.

The real concern is some medical related media.

Like dingxiangyuan.

Before the closing ceremony of the conference was over, everyone encountered a difficult operation, as if God had to weigh the gold content of this workstation.

"Can you succeed or not? What if you fail!" Out of the child's parents, the most tangled success and failure is the leadership of tea.

If this fails, the early-stage investment will really draw water from the bamboo basket.

"Ouch, why is it so difficult! Can't you let me easily make a name? "

Chapter 1240

"Cut the liver!"

"Remove the poisoned liver!"

"Immediately remove the poisoned liver!"

Team, a team of this level, to be honest, no country in the world can do it, even golden hair.

A wave of rational analysis, a doctor, a Chinese doctor, a five-year undergraduate, three-year rotation, eight years can be regarded as entering the door, and then another ten years can be regarded as being tough in a specialty.

This kind of doctor, in every hospital, is just a crowd of people. Whether you have a doctor's degree or a master's degree, you have no achievements and are all from the background party.

Doctors who can speak loudly in a hospital or even in an area are the ones who choose the best among the best. They not only have achievements, but also stand out after carrying the waves. Many geniuses died on the beach before the war because of their own factors. For example, China's largest fishing village and the largest private hospital.

The professors here, depending on their academic qualifications, are not doctors. They are not big turtles returning from the ocean. But before the war, they have died socially. Then they left the public hospital and ran for money.

So let's not talk about anything else. Just counting the time, becoming such a doctor is not much different from the chance of winning the lottery. Therefore, there are more than 20 such famous doctors who gather at the tea vegetable hospital.

The formulation speed and execution speed of this operation plan are terrible!

Before the inspection report came, these goods should have guessed and thought about.

"If every department has such a team, do you think I can be a minister?" After Ouyang watched a group of bald experts work out a feasible plan in a few minutes, the old lady was a little hysterical.

"Well, in fact, even if there is no such team, you are qualified to be a minister!" As soon as Lao Chen turned his eyes, he immediately thought of his words and praised people. What a simple thing. Anyway, he didn't break the law.

Ouyang glanced at Lao Chen, "keep a low profile!"

As if he had suddenly understood, Lao Chen nodded his head and whispered quite cooperatively, "OK, OK, you can rest assured that I will understand what you mean!"

Surgery, in addition to tumor surgery, general surgery can often cut less, because organ tissue is not leek, cutting and growing. For example, after the skin is broken, let alone a big hole, even a small hole, there will be no new skin. The body is often fooled by scar tissue formed by collagen.

The liver is different. In all normal organs, the growth of normal cells can exceed that of tumors, only liver cells. Three quarters of a liver can be cut off and return to its original size in a month. At this time, liver cells replicate faster than cancer cells.

Therefore, many liver patients finally die because of liver failure, which has to cherish the liver.

For example, doctors in general surgery, especially those in hepatobiliary department, rarely eat melon seeds and peanut butter, because these two things are the biggest enemy of the liver.

Many diseases can also make the liver fall down at the first time. If the skin is the forefront of the human body's defense line, then the liver is a little Death Squadron behind the line of fire. All kinds of toxins that the skin can't defend will go up and decompose.

It's like a desperate general. He has become successful and famous. He continues to drink and flirt. Childe Wang is a treat today. If it fails

Roughly speaking, the liver has two functions: producing necessary components and discarding useless components. In fact, it is synthesis and detoxification.

The little monk's internal environment is directly disordered because of the asphalt toxin entering the body and the stress response caused by scald. If we say that the ultimate return path of tumor disease is to completely destroy the internal environment, resulting in consumptive death of the human body.

What is the internal environment? To put it simply, it is a state of balanced movement composed of various electrolytes and solutions in the body.

For example, the stomach is also composed of tissue cells. Generally speaking, it is actually meat, but why can it carry gastric acid? Gastric acid is actually hydrochloric acid. No matter how thick your skin is, you can't stop hydrochloric acid, and your stomach can.

This is because the stomach has a layer of liquid mucous membrane of sodium bicarbonate. Without this mucous membrane, gastric ulcer will appear first, followed by perforation, and then encounter blood vessels, which is massive bleeding. Look, this mucous membrane is the simplest internal environment.

When the skin absorbs a large amount of toxic substances such as aromatics, all the bodies are trembling. At this time, only the liver.

Therefore, after many children have a fever, they don't know which miracle doctor their parents heard from.

Directly wipe with alcohol. As a result, the skin drinks too much and a large amount of alcohol enters the body. The high fever didn't come down. The child had a small cold and turned into liver failure. People hung up!

This is the same as poisoning. Although the skin is not open, people will eat.

Therefore, if the child has a fever below 38 degrees and 5 degrees, don't do anything to wipe himself with high alcohol. Maotai keeps a drink for himself, lifts a small towel and puts some warm water on the child's head, which is much better than the fever relief paste made by huawang for tens of dollars.

The operation preparation is very fast, Zhang Fan, the first wave.

This wave is the most important. Whether it can prevent blood from continuing to enter the liver depends on this wave.

Zhang Fan, Tang Zhenghao, Zhao Jingjin is the first wave. This operation is different from the previous

one. This operation helped a lot of doctors, especially after publishing a paper on bjm, which made a group of worried graduating doctors with liver and gallbladder baldness interested.

In the last operation, everyone was still reserved, but looking at the doctor who helped Zhang Fan at that time, he had already joined the post, and now he began to act as one help and two help on the operating table, and the published papers can be firmly displayed in the position of the second author.

This mother's family has become famous in the bold Jianghu in a few days since she was a bald doctor.

We all know that we can't compare with Zhang Fan, but we can compare with others. Therefore, the powerful backup team of this operation is suffocating.

"Liver anatomy of macromolecular substances after 48 hours in vivo!"

"Organ damage of aromatic substances in liver decomposition!"

A group of doctors have really met a good project. Just as the demolition office likes to deal with state-owned units, this biochemical paper is their best.

One is more serious than the other, helping in the operating room. By the way, I thought about the paper to be published after the operation.

Medical papers are generally divided into experimental research, which is generally experimental research on etiology, pathology, physiology, biochemistry, pharmacology, biology, parasites and epidemiology. This kind of paper is not easy to write and is almost basic, that is, the so-called research direction.

For example, the immune direction of liver hydatid is the paper of experimental research.

The second is clinical analysis, which analyzes and discusses the etiology, clinical manifestations, classification, treatment methods and curative effect observation of a certain disease case (more than 100 cases are preferred), summarizes the experience and lessons, and puts forward new suggestions and opinions to improve the clinical curative effect.

This kind of paper is the most time-consuming and not necessarily successful, so it is usually related to clinicians such as tuberculosis and diabetes. Is to find and summarize.

The third is curative effect observation, which refers to the use of a new drug or new therapy to treat a disease, the observation and research of the treatment method, effect, dose, course of treatment and adverse reactions, or the establishment of a control group to compare the curative effects of new and old drugs or therapies, and compare the curative effects, advantages and disadvantages of therapies, types and degrees of adverse reactions, And put forward evaluation opinions on whether it is suitable for popularization and application.

This kind of paper is the most expensive and time-consuming. For example, for the research and development of new drugs, there must be clinical analysis papers. Therefore, most doctors can't do it. There is no money and no one. Sometimes they will be greedy by their tutors!

This paper is actually a case report. This kind of paper is the simplest and easiest to wait for a larger medical journal, but this disease can be encountered and can not be found. To tell the truth, the meat on the doctor is laughing and reported back at a low cost.

Six hours later, the first wave of the operation ended. Zhang Fan finally completely temporarily throttled the blood flow of the liver and successfully built the external circulation system.

The first step of the operation was successful!

"Elder martial brother, it's your turn!" After the successful establishment of cardiopulmonary bypass, Zhang Fan smiled and said to the deputy director of East China attached No. 1 waiting by the operating table.

Zhang Fan is young and shameless. Now the top hepatobiliary scholars in China are his elder martial brother anyway, as long as they are not experts of Qiu school regardless of seniority! Moreover, there was a tenderness when calling. Don't look at that. It's like a senior brother who doesn't want money.

But virtually, the bigwigs who had a little opinion and taste about Zhang Fan obviously reduced their dissatisfaction with Zhang Fan, and they can't say Zhang Fan, because Zhang Fan is a younger martial brother!

"Good! Go and have a rest. I'll take care of it next. " The deputy director of Huadong took the operation with the experts of Huadong film.

Rotational cooperative surgery is not much in medical treatment. Yes, there are also some super large operations, and it is almost rotation cooperation within a team.

Because of the discontent between the big guys, there is no way to exchange this thing with money or anything else.

However, Zhang Fan has an advantage. His own school is powerful. Now he has built a work point that other experts need. Therefore, the cooperation between teams has finally been established.

It is estimated that the operation will take about 20 hours. If Zhang Fan bites his teeth, he can actually do it. But Zhang Fan is not going to do this today. He needs everyone's participation.

Zhang Fan needs to worry about too many things when he does it alone.

When we cooperated, the best anesthesiologists in East China were asked by East China film to support anesthesia online. The best laboratory in the capital took the patient's blood for quantitative analysis at

the first time

It would be too difficult for Zhang Fan or tea vegetable to contact!

Not only Zhang Fan, but also the Ministry of health!

"Their cooperation began. Three teams took over the operation three times!" The Secretary of the ministry gave feedback at the first time!

Chapter 1241

The first heavy rain in spring finally came. In early spring, although there is also rain, it is not very refreshing. It is either a little or mixed with snowflakes. When the wind blows, it is applied to the face, half stained and half non stained. It is as cold as sticky phlegm falling from the sky.

But now the wind and rain, continuous rain and flowers fall, it makes people feel that they have entered the real spring. The little swallow in evening dress also rowed in the rain. On the north slope of Tianshan Mountain, hazy clouds billowed down from the top of the mountain.

Rain, fog, clouds, grassland, cattle and sheep eat grass quietly on the grass slope. From a distance, it is a beautiful landscape painting.

Of course, it's not unusual to see the locals. And rare people call fairyland.

Ouyang's room for experts and doctors, especially the doctors she wants to win, can be seen by opening the window. To tell the truth, let a group of people who claim to be in a big city. When you open the window, you can only see a group of bald men brushing their teeth in the next building. A group of doctors have changed from science men to Wen Qing.

Unfortunately, there was no amazing quatrain in my stomach. I could only look at the cloud mountain and fog sea in the distance and talk melancholy. I don't know if I think of the future, or recall the past, or equivalent to the green deskmate of that year.

This kind of person who has worked hard in the book and the laboratory for the first half of his life is filled with emotion at this moment. From another aspect, it shows the scenery here.

"Don't sigh. Today is the last day for sure. What do you think! "

Dr. Wang and Dr. Li knew each other and lived next door. Early in the morning, the two gathered together.

"I discussed it with my family yesterday. My wife is willing to support me, but my parents seem a little unwilling. They always think it's from SHANGUAN overseas. It's like hair distribution. What about you? "

"I, ha ha, a bachelor. I'm going to talk to President Chen today. Where to do is not to do. If you don't say anything else here, just look at this scene. It can make people happy."

In fact, it's because the hardware of tea vegetable has reached the level that makes him interested. Moreover, Zhang Fan is young and uses a large group of young people. At least there will be no room for improvement in a short time.

"OK, I'll see the operation later, and then I'll talk to President Chen."

Ouyang and Chen Sheng are in the office. Lao Chen hasn't been home for a week. At the beginning, I was busy with reception, and then there was a busy meeting. Seeing that the meeting was over, another operation came. The operation is not over yet. Today is the day for these doctors to make a decision.

So Lao Chen is tired enough these days. But I'm still very happy. Other people don't have a chance to intervene. For example, Lao Ju, who wore five people and six a few days ago, was sent to the branch to watch the door early these days.

And Lao Gao, hey hey! Lao Chen looked at Ouyang.

Although the old lady seems very calm sitting in the office, in fact, picking her eyebrows can make old Chen understand that the old lady is not calm at this time.

After a cup of tea, Zhang Yuan likes to drink Tieguanyin. The old lady doesn't like it. If it's black tea, the old lady can drink more. This is what Lao Chen observed. Take the black tea and gently put it in front of Ouyang.

"You also have a rest. It's easy for people who don't have to have surgery this week." Ouyang sighed softly. He continued: "Hey, I haven't slept well these days. In fact, the operation is not a problem. If there is a problem in the operating room, do they still have the face to leave the operating room?"

What I'm worried about is how many people can come today. You said if there were only one or two or

none, what would you do. After supporting such a big scene, there was no last one. Hey, I'm still not tough.

If we're tough, we're still so nervous about finding it. "

The old lady has no bottom in her heart.

Lao Chen did not dare to guarantee that many people would come. So they sat silent in the office for two or three minutes.

"Otherwise, let Zhang Yuan..." Lao Chen felt that this silence was not a way, so he chose a topic.

"He, if he had been worried earlier, he wouldn't have made us worried here."

Ouyang's triangular eyes stood up. Lao Chen just wanted to explain.

The old lady said again, "it's not easy for him. Although we're nervous here, his stall is not easy. It's enough for him to drink a pot of intrigue wherever a group of people are, not to mention surgery."

There's no topic again. Lao Chen, turning his eyes to beads, thought for a moment.

He said to Ouyang, "the managers of major medical devices have called me these days to help. I'll call you tomorrow for the final public relations of the operation. I urge you every day these days. I went to Zhang Yuan yesterday. Zhang Yuan was busy having a meeting with experts and ignored me. You see..."

"Device company?" Ouyang glanced at Lao Chen and asked a little puzzled.

Ouyang wondered if Lao Chen had stepped in.

Ouyang is not suspicious, because general surgery is the mainstay in major hospitals. As long as you are a surgeon, you can not transfer to other departments, but if you want to engage in surgery, you must transfer to general surgery.

Therefore, general surgery is almost the cradle of surgeons. But compared with other departments, this cradle is short of milk.

For example, in the early years, everyone quarreled that doctors had high wages, good income and non-stop collection of red envelopes.

In fact, the salary is just like that. Unless the patient has a matchmaker in a large hospital, the general people don't want it at all. Salaries are pocket money for doctors in large hospitals. Serious income is in equipment and drugs.

The common foreigner is a stepmother. He is the most tired and takes the least money.

Because ordinary foreigners are all manual work, there is no equipment to use.

For example, in orthopedics, a total hip arthroplasty and a set of foreign instruments, the income of a surgical instrument can almost set the salary for half a month.

Let's take a look at the intervention department. The intervention in that year was directly the platinum department, one card for ten thousand, one card for ten thousand, one small artery and one set of stents. The doctor didn't even want his life. That's why the intervention caused so much radiation injury, and the doctors went one after another.

In the early years, orthopedics was the hardest hit area because it needed steel plates. Domestic steel plate enterprises do not love themselves. They were acquired after they gave a little money. A few years ago, people in the industry had an impression that the presidents of major hospitals were from orthopedics, which makes sense.

Then the intervention Department became gold again. Hold down the embolism of one leg

What remains unchanged for ten thousand years is the general foreign language.

Therefore, general surgery is not very popular with instrument manufacturers, and the opening annual meeting of general surgery often cooperates with some antibiotic manufacturers! Three melons and two dates are also a matter of face. There is no way. Look at the annual meeting of orthopedics. Darling, they are all buffet meals. The best buffet for ordinary foreigners is instant boiled mutton. The orthopaedic buffet is abalone.

Therefore, Ouyang cannot be suspicious.

Lao Chen is a man who comes and goes in the oil. If the hospital can't develop, this guy may be able to move his mind, but now people with a clear eye know that the tea vegetable hospital will go far in the future, so he won't go astray.

"They just want to advertise on the last day of the operation and put several advertising pages inside the hospital. I didn't agree. I said that this matter must be approved by the European Academy or the Zhang Academy. Gave me two boxes of tea and I threw it out. Look down on who! I'm still short of tea? I want to drink tea. There is no tea in the cabinet of Zhang Yuan! "

"Really not interested? You are no better now than before. " Ouyang nodded, but asked more.

In this place, the hospital is most afraid of being unclear with drug dealers. This thing looks like it can make people jealous. In fact, this thing is a time bomb, which can explode at any critical moment.

"I'm moved, but I also know that the scale of the hospital is not the same as before, so even if I'm moved, I can resist it."

When smart people talk, they don't pretend to be smart and say some tall words to the bottom of their heart. What do they think and say? Ouyang has been a leader since he was young. Who hasn't seen. Lie, truth, she doesn't know?

Ouyang nodded as soon as he heard it. It was useless to say more. After all, the road is your own.

"What kind of enterprises are they?"

"It's all big companies. I'll give it to small companies directly, and I'll give it to any Dan. It's just a few multinational companies. People still want to buy their surgical data, so I'm not qualified to veto it. "

"Oh, this thing." Ouyang pinched the bridge of his nose and thought, "in this way, the advertising page can put the data and let Zhang Yuan talk about it by himself. In this regard, we are not experts. It is easy to deceive people by taking gold as a stone.

But we can't relax about the advertising page. Set a buy it now price and start with 500000. Come if you want, don't come. "

"OK!" Lao Chen took out his notebook and pretended to record it. In fact, Lao Chen can remember these words when he was drunk, but what others want is this attitude and this way.

Before long, the first doctor came in.

Ouyang finally put down the stone in his heart. As long as someone comes, it's not too embarrassing.

Ouyang and Lao Chen may have fallen behind in technology now, but Bai Hu has no problem with several doctors.

Ouyang got up and was as enthusiastic as the doctor's grandmother. The wrinkles on his smiling face were particularly obvious. Lao Chen personally brought tea and poured water, implicitly asking for warmth.

"Family work? No problem, the hospital will arrange it! "

"Children's school? What a big thing, the primary school directly under the government, the class can pick it at will! "

"Housing is simple. If you want to live in the urban area, you can have a suite directly in the family hospital of the hospital. If you want to live in the suburbs, you can give a villa directly."

After some dialogue, the medical doctors suddenly felt that there was really no golden house in the book.

Wave after wave, Ouyang was not worried at last. His face also blossomed, and he smiled like a sunflower, all facing the sky.

.....

In the operating room, the second wave of doctors finally came down, and it was time to finish.

Chapter 1242

After the first wave of operation, although Zhang Fan got off the operating table, he did not leave the operating room or squint in the rest room of the operating room. Not worried, but because there are too many experts guarding at this time. Even if he sleeps for ten minutes, others are uncomfortable.

When they got off the operating table, it was three or four o'clock in the afternoon. Zhang Fan didn't eat their lunch yet. Doctors can earn more in the early years, but to tell the truth, the money is not so easy to earn. Doctors have a particularly high divorce rate.

It's not what happened to doctors and nurses, nor to drug dealers. It's mainly that doctors can't take care of their homes.

Simply put, for example, a doctor acted as the main knife on the operating table. As a result, his father couldn't do it and rescued him on another operating table.

The doctor really can't leave the patients on the table to see his father. This is not how noble he is, because he eats this bowl of rice.

It's clear that all sentient beings are just for a job.

Such a big thing is still so, let alone a small thing. What girlfriend has a stomachache when she comes to her holiday, and boyfriend in other industries also says to eat some hot water and install a warm treasure. In the eyes of doctors, this is a normal physiological phenomenon.

Without company, people are prone to accidents. Moreover, many doctors, especially those with excellent surgical skills, are energetic when they are in office and can't see their old age at all. But once they retire, they don't see them for half a year. Once they see them again, they will have a hunchback

and can't walk. I don't know what kind of leader they thought he was in those years. In fact, he is just the director of a department.

It's hard to say in other industries. When most doctors are on the job, they should have talent and good health. If they don't have a good health, they will definitely stay ill. It's often the end that people don't spend all their money.

For example, when it's time for lunch, Zhang Fan and his family can't stop the operation first. Let's eat with chopsticks first.

Therefore, it was three or four o'clock after the operation, and then we had lunch. That is, Zhang Fan was the president. The canteen of the hospital was deeply afraid that it could not serve the master well, and there was a clamor for bidding. Therefore, we always prepared ready ingredients.

It would be nice for an ordinary doctor to have hot water to warm you up. You are a doctor in front of patients. You have a position. You are a worker in the hospital. So this kind of living habit is nothing for a day or two, but for ten or twenty years, there is no ulcer in the stomach. He despises people's acid in the stomach.

"Zhang Yuan, the food in our hospital is very good! If you put the plate, you can at least say it's four cool and four hot! "

Dr. Hua Nan, who has been appointed to tea, records in the operating room. He only eats at this time. Looking at the ingredients, he was a little surprised.

His master's degree is in the golden mean. His doctor is in South China, which is also regarded as the top hospital in China. To tell the truth, if you don't mention anything else, tea vegetarians stand up and say first. It is estimated that hospitals across the country will quietly.

"Hehe, some people just eat. We can't boast about it. It's taboo. The above repeatedly said that the problem of working meal is that there is no wine. If there is wine, it is estimated that it will be checked! " Tang Zhenghao, Zhang Fan's master brother, looked at Zhang Fan with a smile.

"That's not the case. The logistics on our side is separated from the main body of the hospital and is responsible for its own profits and losses!" Zhang Fan knows what old Tang means and pretends not to understand it. People won't come to the hospital operating room to inquire about this kind of thing, as long as you don't shout.

After dinner, Zhang Fan didn't leave, so he and old Tang stared at the operating table in the operating observation room.

"I have to go. The hospital is calling. If we don't go again, it's estimated that our local government is not happy. "

Old Tang was chatting with Zhang Fan. Although it was a chat, my eyes didn't leave the operating table.

"Oh, are you willing to go after such a big operation? With so many experts together, can you meet them in the West Lake? I can't. Don't listen to your local government. It's useless. You see, our old Dean, except for listening to the government when asking for money, won't even let the government in when he gets the money. "

"Hehe, you have a good life. You can meet such a leader who blocks things for you at the beginning of your work. It's really enviable!"

"Who said no, why don't you come to our hospital and I'll give you the position. Our brothers... "

"OK, I'll report later!"

"Ha ha!"

From these two operations, the relationship between the two is closer. Although one is Lu Lao's disciple and the other is Wu Lao's top beam disciple, they are all craftsmen. After being familiar with them for several times, they become closer to each other.

They also know that Zhang Fan is joking. If you don't say anything else, Zhang Fan will now apply to hospitals in other provinces. Try it. If you don't say Ouyang, first of all, the bird market won't pass. Just like academicians, although they don't show their mountains and dew on weekdays, if an academician saves another province for no reason, not others, even ordinary people have to ask why.

Sometimes, reading seems useless. If you don't read, you'll make a lot of money. But when the book reaches the top, it can take a big step forward in a certain field or industry, not to mention a nuclear bomb.

Doctors are the same. Why was Hankou so powerful in medical treatment in those years? Even the compilation of Chinese medical textbooks were mostly from Hankou. But when the first generation of Hankou, they died and walked. Now open the teaching materials and see how many Hankou came out. Some of them are not up or down, and they are embarrassed.

The second wave of surgery reached 2 a.m. and finally completed their task.

"What signs are stable and the patient can continue the operation!" China's top anesthesia team gave unanimous opinions and can continue the operation.

"The inspection report has determined the toxic substances and even the scope of the types of

antagonistic drugs."

Although Zhang Fan pulled these experts for surgery, it seems that the experts are getting cheap. In fact, the support behind this team can almost be said to be the top medical support in China.

From testing to anesthesia, from anesthesia to imaging, these experts pull two, two and four. It can be said that the most advanced part of Chinese medicine is now pulled into the operation team by Zhang Fan.

Although there are differences between depth and depth, once you get on the phone and have a contact, you can use Ouyang's means to at least cooperate frequently in the future.

Moreover, Zhang Fan himself knows very well that no matter how high his technology is, he can't compare with the whole cutting-edge medical team in China.

The connection of the operation was very accurate. As soon as the second wave ended, the experts of the third wave came on stage. These experts rest in advance and are expected to take over the operation one hour before they are invited to the operation.

This is the legendary surgeon, who can eat and sleep, can sleep and wake up at any time. As we all know, being called up on the way to sleep is the most dizzy. So the proportion of surgeons smoking is particularly high.

In some hospitals, smoking is banned in internal medicine, which is easy to implement.

Surgery is not, and hospitals often turn a blind eye. As long as you don't stand in the way of the dean and the patient's face-to-face smoking, everyone defaults.

Otherwise, let's go to the rest room of the surgeon's duty room. Especially when the shift is handed over in the morning, there is smoke. Open the window, and the smoke comes out of the window.

The third wave was brought by Yaxiang's experts.

In fact, Zhang fan can also cut the liver. But after all, no one did the first wave of surgery better than Zhang Fan. Zhang fan can only go to the first wave, and now he has been boiling for nearly a day and night. It's a little arrogant for Zhang Fan to be tough.

Moreover, Yaxiang medical college is similar to Nanhu province.

On the inside story, there is no comparison between Yaxiang and the golden mean. The first university in China to have a computer is the golden mean medical school.

Yaxiang, on the other hand, is really doing great things quietly with the local hospital of Nanhu.

For example, if you eat chili, it is estimated that what comes out of your mind is either Sanchuan or Xijiang.

The place of Nanhu seems unknown. Sanchuan spicy looks at the red pepper flying all over the sky, and the fried green pepper in Xijiang makes people's tongue knot.

The South Lake is hot. It looks white and clean. There is little water. There is no red pepper or green pepper. But in those years, a bowl of sour and spicy female soup from South Lake was hot. Zhang Fan stretched out his tongue and ran three stops against the wind.

But people's ancestors of Nanhu were really rich, just as Yaxiang hospital was better than the golden mean, people were really rich.

Even if we put aside the capital and magic capital now, people also exist in the top three.

Especially in terms of reproduction and genetics, it is absolutely first-class in the world.

And in terms of liver, although it doesn't look like a mountain without water leakage, it's actually quite powerful.

The third wave of surgery has been done at dawn. A group of doctors guarding the operating room are like gamblers who gambled all night. Their clothes are a little untidy, red eyes and yawning.

Finally, the monitor on the operating table is cut off. It is as stable as turning off the machine. It is quiet and stable.

"Yes! The operation was successful! "

Although it is not said that excited men hug each other, there are still some whispers.

Zhang Fan's heart also fell.

"Just open the door!" Zhao Jingjin, who has been cooking with Zhang Fan, pinched his fist and whispered to Zhang Fan.

"Yes, finally. Our working point is stable!"

A group of experts were also very happy, as if everyone had succeeded in the uprising together.

"Rest first, rest first. The next work will be handed over to the tea vegetable hospital. Everyone rest first, rest first."

Zhang Fan asked everyone to have a rest. Zhang Fan couldn't stand it anymore. After sending the big guy, he was also accompanied by Lao Chen and ready to go home.

"Has everything been arranged?"

"Well arranged, they are extremely quiet houses. Don't worry about anything. Zhang Yuan, let me take you home. "

"No, just let the driver take me. You can eat more snacks in the hospital."

As soon as he finished speaking, Zhang Fan went out of the surgical building and couldn't close his mouth. He thought he was dazzled.

Outside, there were colorful flags and red banners hanging the names of major experts. The yard was full of advertisements like green trees and red flowers. There was a hospital full of foreigners. There were not even cars parked in many parking spaces. They were all advertisements.

What all titanium joints, what titanium clips, what insulin, what acarbose. Almost all of them are advertisements for drugs and devices.

"This ~ ~ this ~ ~ this ~ ~" Zhang Fan was surprised. Did the hospital change color after an operation?

Zhang Fan points to the advertisement ranking and stares at Lao Chen.

Old Chen pinched like a big girl, "I originally reserved several parking spaces, but I thought that in just two or three days, such a high price would become an advertising space!"

Chapter 1243

Zhang Fan looked at the colorful advertising ranking in the yard and looked at the ambiguous smiles of several foreign experts around him. There was only embarrassment left in his mind.

Look at the tea vegetable hospital. The rescue plane made Ouyang stick like a flower girl. There was no sign at all. After flying during the day, the publicity plane rented by the real estate agent who sold the house flickered at night. Coupled with his flower clothes, I didn't know that aliens were visiting tea vegetarians in flower flying saucers.

I don't want to talk about it, but today's advertising in a yard is exclusive. I really want to enter the forest of steles. Most medical advertisements have human bodies in various postures.

Really, I don't know. I think it's the same as entering the selling market!

"Well! Let's go to the canteen first. The canteen has prepared dinner! " Zhang Fanna is an

embarrassment. In particular, several experts who are not familiar with them are embarrassed to laugh when they want to laugh. When they go a little farther, Zhang Fan is in no mood to eat.

"This....." Zhang Fan didn't get angry with Lao Chen. Lao Chen is still reliable“ "From the European Academy?" Although Zhang Fan's tone is interrogative, in fact, he has already affirmed it in his heart. This is definitely Ouyang Nong's. Others don't have this talent.

Looking at Zhang Fan's embarrassed and unable to say, old Chen hehe smiled and secretly said to Zhang hospital, "the welfare of our hospital came out in the second half of the year."

"So many?" Lao Chen said that Zhang Fan understood that these cards were ugly to death in the hospital, but they could have income.

"Well, half a million cards for three days."

Zhang Fan's original embarrassing feeling disappeared“ The administration building is so big. Why didn't you contact a pharmaceutical factory or equipment company to sell it? Anyway, it takes three or four days. "

The money came too fast. Facing the administrative building facing the street, Zhang Fan thought that if he sold it for a few days, he could make a lot of money.

"Yes, we and pharmaceutical companies agree that people, municipal administration and environmental sanitation are not good! The European Academy went to the government to quarrel yesterday. It's useless! "

Zhang Fan is right to think about it. It would be a little too much if advertisements were hung on the administrative building of tea vegetable hospital.

"Forget it, I won't eat with them. If I go to the canteen, I won't be laughed to death. I'm home. You, Lao Ju and president Zhao Jingjin will accompany you to eat. The food must be better. "

Zhang Fan explained a few words and hurried home.

You can ask for money, but sometimes it's not good to be laughed at.

Moreover, martial uncle is estimated to be leaving. He has never been a tea vegetable. Zhang Fan has never been with the old man. Although he is busy, he can't explain it.

Back home, the house used to be next to the hospital, but now it's a little far away. Usually in the morning, if the weather is good, Zhang Fan usually runs to the hospital, but not today. Even if he drives, he is a little tired.

Lao Chen wanted to send it in person, but Zhang Fan didn't let him. The full-time drivers arranged by the government have now become 120 drivers. Although he didn't say anything, he saw Zhang Fan. The injustice on his face was like an abandoned woman seeing a heartless man.

At home, the family was full of laughter and bustle.

Shao Hua and old lady Lu are in the kitchen. Old Wu and old Lu get together and chat.

Listening to the happy voices of the old men, Zhang Fan's face was tired. At this time, he was not tired.

"Hehe, what are you talking about?"

"Is the operation finished?" Old man Lu nodded to Zhang Fan. Hearing the sound, Shaohua also came out of the kitchen. Originally, old man Lu was like a mountain king to meet little diamond wind. When he saw Shaohua, old man Lu stopped tensing and became a smiling face.

The old man is alive and well. When meeting Zhang Fan alone, the old man hardly praised Zhang Fan. When there were outsiders, the old man was also business to Zhang Fan. But as soon as Shao Hua came out, it was different.

Heaven and earth are big, not as big as Shaohua's face.

This face is for Zhang Fan!

Zhang Fan smiled at Shaohua. Then quickly say hello to some other old men.

"How's it going?" Old man Wu also asked. The old man has been greedy these days. The grassland milk is too pure. He drinks it again and again. He is also greedy. Shaohua is afraid to drink bad for the old man, but the old man said it's all right. He can have desensitization treatment.

Greedy is greedy. What kind of desensitization treatment do you want? What kind of technology do you like to eat and play.

"Can it not go well? I've received a call from the Ministry, saying what's the matter with tea element. Liver and gallbladder experts all over China went to tea element, one without reporting and the other without asking for instructions. Want to rebel? "

Another martial uncle of Zhang Fan said to Zhang Fan with a smile.

This is to remind Zhang Fan, although he doesn't say much.

The matter belongs to the matter, but the words should be said gently, "martial uncle, I didn't expect so many people to come. Now in the operating room, a group of doctors are perfecting their papers. "

"Just go well! All right, don't worry about other things. Don't listen to Uncle Li frightening you! "

Old man Lu was not happy to watch his apprentice talk to his apprentice. This is the advantage of having a serious and good teacher.

Zhang Fan smiled and said nothing. Outside, he is Zhang Fan. In front of these old men, he is a hairy boy. If he talks more, he may be criticized and not worth it.

After Zhang Fan came in and washed his hands, he went into the kitchen.

"Shiniang, I smell it before I enter the door. It's so fragrant. You've made my mouth tricky these days. How can you let me eat in the future?"

The old lady couldn't close her mouth with a smile. "She didn't do anything. It was mainly done by Shaohua. I'll start while I'm fighting. Look at your exaggeration. Lao Lu used to say that the little disciple was stubborn. I thought he was really stubborn. As a result, it turned out that he was stubborn. Look, Zhang fanduo can speak! "

"Of course, in terms of vision, my master is different from you in several levels!" Zhang Fan said as he rolled up his sleeves to help.

Braised hairtail, shredded carrot with red heart, lamb chop made by Shaohua, Chinese toon eggs in spring, and milk pimples.

There are several kinds of tea vegetable milk pimples, such as dry milk pimples, just like ordinary ones sold in supermarkets, and wet milk pimples.

Dry milk pimples look like noodles used to make steamed bread, dry and chapped all over the body.

This thing can be eaten by ordinary people. Because it's not too much.

Wet milk pimples are different.

First of all, high appearance value, like fast lubricating milk ice cream, you have an appetite when you look at it.

But this thing, ordinary people can't stop, sour and astringent, with an original cow flavor. This taste is really hard to describe.

Like stinky tofu, people who like to eat love to death, and people who don't like to eat can vomit in one bite.

"Why do you have this thing? That's right. Although the old men are old, they can eat a lot. Let's get something that they can't eat."

Zhang Fan joked to Shaohua.

"You love nonsense!" After Zhang Fan slapped Zhang Fan, someone said, "Shibo estimates that he drinks buffalo's milk in the south. The grassland milk here is not used to drinking. He has diarrhea once. But Shibo likes dairy products. I bought some wet milk yesterday. Unexpectedly, several elders like it. "

"What's the taste!" Zhang Fan rolled his eyes.

To tell the truth, after coming to the frontier, Zhang Fan really had no obstacles in diet because he was from the northwest.

But I really can't eat this wet milk pimple. When others eat a little, they can feel the delicious semi fermented protein with their eyes closed. As soon as he takes a bite, he can squat on the side of the road and vomit. Moreover, he can't drink grassland milk.

It's too pure. I have diarrhea as soon as I drink it.

"All right, go and have a rest. I've had surgery for several days. Look at your tired face. Here are Shaohua and me. Go! "

Shaohua was hard to say. Old lady Lu pushed Zhang Fan out of the kitchen.

Zhang Fan really can't do it.

He's better. The doctors who have been in the operating room for two days haven't finished work yet. It's really not easy to get ahead in this industry.

Zhang Fan went out of the kitchen and thought. Just call mengke in the grassland.

The old people finally came to the frontier. It's not too much to eat something strange.

It's hard to say in other frontier areas. Dairy products are like mutton, which can make people in the League angry.

"Anda, what are you doing?"

Zhang Fan calls the president of the grassland health center.

"Shearing cattle and sheep, anda, will you come to the grassland free clinic this year? There are not enough hands, and the wool can't be cut! "

Meng kehaoshuang's voice came out on the phone.

The dean is a part-time job. His main task is grazing. Although there are few contacts, anda is also one of the few people in the Frontier Medical System who can hold Zhang Fan and drink hard. After all, when Zhang Fan was still nothing, when he went to the grassland, people killed cattle and sheep for Zhang Fan.

Now Zhang Fan has become the president of the largest tea plant hospital. He is very popular, but people never go through the back door to say that he can transfer a job or get a promotion. So the relationship is quite good.

"You take the salary of the state and work for yourself."

Zhang Fan smiled and scolded " OK, I won't tell you more. Do you have camel milk? Get me some. The old man comes home and can't drink milk. "

Lao Meng heard, "what a big thing I should do. Wait for me to get some buckets for you now."

"I'll have someone get it!"

"All right, leave it alone and wait for me." People hung up without waiting for Zhang Fan to speak.

Zhang Fan said hello to some old people and went to the bedroom to squint for a while.

In a daze, I heard what was happening outside. Zhang Fan listened carefully. Old Meng came and looked at his watch again. It was more than eight o'clock in the evening.

Lao Meng hung up and ran this way.

Zhang Fan rubbed his eyes and came out to have a look. Darling, this goods. There are white hADAS hanging around the necks of several old men. This meeting is carrying a bowl and singing a toast song!

Several old men and Mrs. Lu smiled brightly.

"Old immortal, we must go to our grassland next time. We are looking forward to the stars and the moon, and we are looking forward to you coming to our grassland!"

Zhang Fan thought it was flattering some old men. As a result, he walked in and looked at it. It was

flattering old lady Lu.

Don't look at the simple and honest face of this goods. To tell the truth, this kind of person is really a person with a pig face and a clear heart.

Chapter 1244

"Zhang Yuan, brother, I have to say something about you!" Lao Meng had a little plateau red face. After drinking two mouthfuls of wine, he turned red. When he saw Zhang Fan, he had to pick on Zhang Fan.

"Hehe, what's the matter?" Zhang Fan smiled.

"Look, these are people we don't dare to invite. You don't tell me in advance, otherwise I must find a way to kill horses for all the old men and women today. Look, the fish with thick chopsticks on the table will never see meat again!"

"It's not that Zhang Fan doesn't get it. We usually don't eat much at night. Zhang Fan hasn't been home for two days. We'll eat with him today, otherwise we won't eat at night." Mrs. Lu was deeply afraid that Zhang Fan's friends had an opinion on Zhang Fansheng, so she quickly explained.

"He won't tell me..." Lao Meng brought some mutton and camel milk. He hurriedly felt that he didn't bring enough gifts today. He was a little unhappy.

"Have the sheep on the grassland finished shearing?" Zhang Fan smiled and despised him. His Dean really worked for himself at home with a salary. To be honest, rural hospitals in pastoral areas have fewer patients than those in agricultural areas.

Sometimes there are no more than ten patients in a year. Sometimes they come, but they can't find doctors and nurses. That is, a man with a red cross to buy medicine. Their functions are quite complete. They not only see a doctor, but also a postal point, but also a fixed telephone point. They can also help herdsmen look after their children when they are busy. It is really a small comprehensive enterprise integrating medical communication and education!

The main business is a little

"No, just start! You won't go to the free clinic! "

"Why, are there many patients?" Mrs. Lu asked with concern.

"No, no, I'm kidding him."

It was said to be dinner. In fact, several old people made a gesture with chopsticks. Old man Lu likes to drink carrot juice, which is a specialty of the frontier. Old man Wu likes to eat milk pimples, while the others eat green vegetables. Only Mrs. Lu can drink cava.

Lao Meng doesn't like fish very much. He always thinks it's too unpleasant to eat. It's not like eating beef and mutton.

Zhang Fan doesn't care. He likes to eat fish, especially sea fish.

"Why, after eating the meat, I still want to eat something crisp and watery?" Munk ate crispy cucumbers and asked Zhang Fan.

This stopped Zhang Fan.

Zhang Fan has more or less claimed to be a question about people. He can almost answer a little, but he really didn't think about it.

"Hehe, I know to do surgery every day. Don't you understand?" Old Lou is happy.

A group of old men are happy.

Good teacher, not to mention the level of people, even ordinary people are good teachers.

But for Zhang Fan, old man Lu now feels that he can teach less and less. Sometimes the old man is angry, but this time, he really has a chance to teach Zhang Fan.

"Well, master, I've been studying hard recently. I don't know how many journals I've read." Zhang Fan pretends to be a little two and makes a group of old men laugh.

Shaohua looked at Zhang Fan's rare expression and smiled with his mouth covered.

In Shao Hua's eyes, Zhang Fan is hard enough. Every night, she listens to English for half an hour, reads periodicals for an hour, and then spends more than an hour looking at various classic medical books. To tell the truth, in Zhang Fan, she sometimes feels that this medicine is so difficult.

As a result, there are still people who don't understand. It's terrible!

"You have no intention..." as soon as old man Lu spoke, old lady Lu was unhappy. "Well, when you were Zhang Fan's age, you were not as good as others. How old you are and how old they are."

The old lady rolled her eyes.

"Well, hehe, actually, whether this person is hungry or not is determined not by the capacity of the stomach, but by the brain. The mechanism of gastrointestinal peptide will let brain neurons pass..."

The old man spoke for more than ten minutes.

Other people don't care. They are all engaged in medical treatment. Shao huamengke heard the fog at the head. What did he say?

Although mengke is the president of the township hospital, he is not from medical background!

Looking at the fog at Shaohua's head, Zhang Fan smiled and said to Shaohua, "master's meaning is that people's brain will not only absolutely consume food, but also choose the diversity of food. Just as you eat a pile of meat, although it is not greasy, you always want to eat some crisp green vegetables when you are full.

Or when you finish a table of salty food, you always want to eat dessert, which is controlled by the brain. It will make you choose to eat more food. Not a single intake."

Then he asked the old man again, "master, do I sum up well!"

.....

After a sleep, I was extremely tired. Then I lay in bed. When I woke up, I felt that my body was light and could jump to the roof.

I was going to run. As soon as I got up, I was pulled into the quilt by a lotus root like arm " Fight! Put your horse here! "

Played for a long time and drew. Zhang Fan thinks he should find time to do squatting exercises.

Shao Hua, with a red face, looks like a cat. And the body is not honest in bed. The legs are close together and the hips are too high. It's like only the feet, shoulders and head are in bed, and the other bodies are suspended!

"Well, what are you doing?"

"It's easy to get pregnant!"

"Well, no, it's generally because the gold is not energetic enough..."

"Go, go to work."

Shaohua was a little embarrassed and drove Zhang Fan away.

Zhang Fan went out with a smile.

As soon as I went out, I saw that the full-time driver had cleaned the car in the yard. Zhang Fan was a little funny. He wanted to run to the hospital, but everyone came to the door.

Early in the morning, Zhang Fan didn't go to the clinical building today, but came to the administrative building. Today, there are many big guys going back. We have to arrange to send them off.

"The first batch of experiments have begun, and several experts in South and West China have let their doctors enter the laboratory."

Zhao Yanfang reported the work of the recent laboratory to Zhang Fan.

Listening to Zhao Yanfang's report, Zhang Fan was really happy. If it hadn't been for the shameless and Ouyang's invitation, one of so many experimental projects could have shut down Zhang Fan and Ouyang's laboratory these days.

This thing is a combination of experiment and clinic. In fact, it is two ways.

No matter what kind of clinical trials are, they are all fooling people.

"The paper is coming out now? Three days after the operation, they made several? " Zhang Fan asked Zhao Yanfang in surprise.

"These are all reports of special cases. Why is it difficult. But there are a few things that can be studied in depth. Another thing, the invitation from Mishima, what are you going to do? "

"Invitation?"

Zhang Fan almost forgot this thing!

Chapter 1245

"Impulsive, ah!" In the morning, Ouyang didn't participate in the ward round of the hospital or even the administrative meeting of the hospital. He carried a pink watering can and tossed cactus in his office.

When Lao Chen entered the office, Ouyang said a word with his mouth.

Lao Chen thought that the hospital was dressed up in fancy. Ouyang was said to be a little embarrassed. After glancing at the cactus, he said to Ouyang, "we have no cost for nearly two million a day. People who say you are jealous."

Ouyang curled his lips and said to Lao Chen, "is that what I mean? I mean, I still haven't seen a lot of money. At that time, I thought there was a lot of money. Unfortunately, I was impulsive. I should sign a contract for a few more days. You see, when they clean up the billboard, I feel heartache. Hey, impulsive! "

Lao Chen can't speak! Ouyang is reluctant to give up such income. Unfortunately, the meeting is over, and other equipment manufacturers and drug manufacturers are not stupid.

"You said it would be nice if you let Zhang hospital hold meetings like this every day. After one year, our hospital can build the first branch and the second branch. The hospital has been upgraded, but more and more funds are needed. Hey, you Zhang Yuan are a big spender again. This family is hard to be! "

"Yes, yes, without you, it is estimated that Zhang Yuan has no money to buy anything he wants."

Lao Chen looked at Ouyang as if he was in a good mood, so he handed the document in his hand to Ouyang " Ouyuan, this is the document Zhang Yuan said to show you! "

Ouyang turned around and saw that it was all documents to be signed and things to be coordinated. Ouyang's head was big.

"The new year's recruitment is about to begin. Zhang Yuan thinks you are still very good at looking at people. So... "

Ouyang said reluctantly, "ouch, I really want to have something at home." Ouyang wants to run. As a result, Lao Chen took Ouyang's hand and said, "Zhang Yuan is estimated to go abroad, so..."

"Going abroad? Throwing knife? Is there another tuhao operation? " Ouyang's eyes are bright.

For Zhang Fan, she just feels a lot of things now. Zhang Fan's progress has slowed down and doesn't

want to be so serious as before, such as personnel recruitment. For the recruitment of general doctors or nurses, Zhang Fan generally pushes it to Ouyang.

90% of the business of a hospital is actually ordinary business, that is, the so-called routine diagnosis and treatment, and only a few need special doctors. Zhang Fan doesn't pay much attention to the recruitment of general doctors and nurses.

Especially the recruitment of nurses, with the upgrading of tea vegetable hospital and the improvement of the reputation of tea vegetable hospital. Now, the nurse position of tea vegetable hospital is not as casual as before. Now it can be said that tea vegetable hospital has been a top-level existence in Frontier Province.

In ordinary cities, nurses in a top hospital, especially those with some qualifications, don't look at the average income, but to tell the truth, such people have a wide range of contacts. Moreover, sometimes when there is no hospital bed, many people are preoccupied with asking doctors for help.

In fact, this is equivalent to sparing a circle and going through one more procedure. The management of beds in many hospitals and departments is the responsibility of nurses. For example, if there is no ward, patients have to make an appointment. This record is recorded by nurses.

To find a doctor, the doctor has to find a nurse or head nurse for help, and to find a nurse often has better results.

Therefore, the position of nurse in tea vegetable hospital has become a position no worse than that of ordinary civil servants. Many senior nurses who have graduated from niaoshi will choose tea vegetable hospital, while nurses who have graduated from colleges and technical secondary schools want to work in tea vegetable hospital.

It's time for the eight immortals to cross the sea.

Zhang Fan is annoyed by various immortals.

Simply threw the burden directly to Ouyang and the nursing department.

"No, this time it's not flying knife. Several hospitals in Sandao have sent invitations to Zhang hospital. Director Zhao Yanfang suggested that Zhang Yuan go and have a look. "

Lao Chen explained.

Ouyang glanced. "It's not a throwing knife. What can I see. What did you Zhang Yuan say? "

For Ouyang, this kind of invitation without money is playing hooligans, which is too unprofitable.

"We are now some pharmaceutical enterprises and medical device manufacturers pay more attention to us. In fact, we are far from good. Not to mention others, some medical research funds and some sponsoring associations don't pay much attention to us now.

Do you know why the golden mean is so powerful? This year is not given by the state. Other funds and associations can buy our hospital at will or all over the place. It's because we can't do it now in the academic field.

Therefore, this is also an opportunity for us to make a public appearance. "

Lao Chen said as if he were an expert. Ba Lala said it for a long time, and Lao Chen was quite a little. It was all a small gesture.

Ouyang was stunned, his eyes turned and asked, "who did you listen to?"

To tell the truth, grass-roots hospitals, let alone contact the Fund Association, can't even see the leaders of larger pharmaceutical enterprises. After all, people sell drugs and sometimes don't need the consent of the hospital! So Ouyang didn't pay much attention to this before.

But just because she doesn't pay attention doesn't mean Lao Chen will know

Old Chen smiled awkwardly, "director Zhao Yanfang told Zhang Yuan. I listened to it while I was there!"

"I said! Director Zhao means that if you go out more and look bright, you can be good at the market? "

"Although director Zhao didn't say it clearly, that's what he meant."

"Oh, I can still play like this!" Ouyang took the document thoughtfully and sat at his desk in the office, flipping through the documents in front of him.

In fact, when Zhao Yanfang and Zhang Fan talked yesterday, Zhang Fan's expression was almost the same as that of Ouyang, looking down on people. Do you always feel like accepting the invitation of Mishima? As a result, he was despised by others. He looked like you didn't even know, which made Zhang Fan a little embarrassed.

Lao Chen showed off to Ouyang, but Ouyang found out!

Ouyang took the documents thrown to her by Zhang Fan and came to Zhang Fan with Lao Chen.

"Why are you so worried. I don't care about going abroad to become famous. I have to worry about it for you. " As soon as Ouyang entered the door, he began to look for trouble. Lao Chen stood at the door with an embarrassed face. He didn't enter or not. It made him look like a villain.

"Sit down, leader sit down, Chen Yuan, get the kettle and I'll make tea for the leader." Zhang Fan smiled

and threw his work to Ouyang. Zhang Fan was still very happy.

"You have to check the recruitment this year." Zhang Fan sat on the reception sofa and said soft words to Ouyang.

"You let Zhao Jingjin and Luo Zhengguo do it." Ouyang is ungrateful.

"They can't do it yet. In terms of personnel, I don't trust anyone. Only you can help me." Zhang Fanke's shameless flattery to Ouyang.

To tell you the truth, Lao Zhao and Lao Luo are not good either, they just don't know whether they can resist. To tell the truth, Ouyang and Zhang fan can carry the tea.

Ouyang is now just without desire. There is no hope of promotion. He is old enough. And Zhang Fan, needless to say, the boss of tea vegetable will not embarrass him. Other people are different. People always have to have some demands in the world. Isn't it sometimes very difficult.

"Are you really going to Sandao?" After listening to Zhang Fan's flattery, Ouyang began to talk about business.

"Well, I didn't want to go, but Zhao Yanfang told me that I still think I should go."

Lao Chen brought the tea with a smile.

"It's good to go, but the list of the team should be reported in advance." Ouyang looked at Zhang Fan and Lao Chen.

"Why don't I do something else first?" Lao Chen pretended not to care and said to Zhang Fan.

"Well, let's make a record and invite some other team members to come over and let's talk a little. Just report it. It's not me. I was too busy a few days ago. Ouyuan, I mean let Lao Chen join the team. He has no credit or hard work with you, and it's not easy for him to worry about this stall. It's more convenient to work with a hat in the future. "

Zhang Fan disclosed to Ouyang in front of Lao Chen.

In fact, Lao Gao was sent to the magic capital. Zhang Fan knows what Ouyang means.

And he also thinks it's good to let Lao Chen into the team. Simply gave Ouyang this favor.

To tell the truth, Lao Ju and Lao Gao can actually join the team.

Lao Gao joined the team, but others didn't say that there was a little resistance on Ouyang's side. Compared with Lao Ju and Lao Chen, the relationship between Lao Chen and Zhang Fan is relatively

close, and there are already three internal medicine leaders in the team. If there is another internal medicine leader, it can only overlap.

Surgical leaders include Zhang Fan, who also has three team leaders. Therefore, it is also appropriate for the logistics, general affairs and medical office to enter one.

Lao Chen blushed and looked at Ouyang.

"Don't talk with me. If you think you can do it, you can't do it. You have the courage to be the master." Ouyang gave Zhang Fan a white look.

"OK, let Lao Chen Jin."

Lao Chen looked at Zhang Fan and Ouyang gratefully. He didn't know what to say.

"All right, please invite the leaders quickly, otherwise the people who will perform the ward rounds will be out of place again."

After a while, several leaders came.

For this kind of personnel work, in ordinary enterprises or hospitals, if you join a team member, it is estimated that the meeting can last for several months or even longer.

But it's easy in the tea vegetable hospital. Now Zhang Fan doesn't cover up the sky. Anyway, he still has some prestige.

The three leaders of internal medicine, Ouyang and Zhang Fan, are together. Although Zhao Jingjin and Luo Zhengguo are latecomers, they have demands on Zhang Fan, so they are also together with Zhang Fan.

Ren Li almost won't fight or rob, and she is Ouyang's Qianlima excavated that year. Although Yan Xiaoyu has a little objection, she can't stand alone.

After the personnel meeting decided, Zhang Fan said another thing about going to the three islands.

"Form a small team. We should be capable and have combat effectiveness. When we visit this time, people must show our skills. We can't use their people." Zhang Fan looked at several team members and said his ideas.

Chapter 1246

It is estimated that people who experienced the tide of going abroad had some influence. At that time, the country was not rich, and another wave of people wanted to go to the other side of the ocean indomitably. When the capital people were in New York, they really played a lonely.

In Zhang Fan's generation, he is not too concerned about going abroad. You can go out to see if you want to go abroad. Anyway, Zhang Fan doesn't do it. So Zhang Fan really didn't take Sandao's invitation to heart.

When Zhao Yanfang analyzed it, in fact, he clearly told Zhang fan that fame can make money. Zhang Fan thought about it. He was going to see it. It was not that he loved money, but wanted to communicate with doctors in other countries and broaden his horizons!

The truth in this is that the Chinese ancestors have long said that everything in the world is for benefit, and every day is for benefit.

An industry may be noble, but this thing can't just point to the noble. If it all depends on the noble, the industry will soon die.

The list of going out for a walk was soon released under the comprehensive consideration of several leaders. Zhang Fan leads the team. Zhao Jingjin has to go to the three islands. If there is no operation, Lao Zhao and Zhang Fan cooperate, unless it is an extremely difficult operation, there is no problem with a general operation.

Surgeons also need to bring a young one. This is tissue culture. Don't underestimate this. The system pays great attention to this problem. Most of the time, alternate generation culture is not just talk.

Of course, Zhang Fan is young enough, but no one treats Zhang Fan as a young man. In the younger generation, there are many options.

Although Zhang Fan has not been particularly worried about the popularization of tea, with the improvement of Zhang Fan's reputation in recent years, the speed of updating doctors has also increased a lot. Therefore, the selection of this young generation has been discussed by a group of leaders for a long time.

Finally, Zhang fan fixed the sound with a hammer and took Ma Yichen out.

Other masters can only wait for the next time. Who let the pony enter Zhang Fan's door early. Wang Yanan of orthopedics department, Ma Yichen of general surgery department, is known in the tea vegetable hospital. These two people Zhang Fan had been carrying before he showed up.

Now they are exposed. Although they are still ordinary doctors, their status in the Jianghu is different from that in the past.

Of course, Zhao Yanfang also has to go. In the field of surgery, Zhang Fan is not afraid of anyone, but in the field of scientific research, he is a little timid. When this thing is at home, nothing is a matter. Even if others laugh at Zhang Fan as an surgeon, Zhang Fan doesn't pay much attention.

But I'm going out. I can't lose face. It's not just my own business. Just like changing relatives, even if you don't earn a few Liang silver this year, you still have to wear the best clothes. Not everyone loves face. It's called one breath.

People, don't they live.

Finally, Ouyang brought Lao Chen out and said that he could help take care of Lao Chen when he went.

Zhang Fan was also happy that someone handled some trivial things, so he nodded.

The doctor is sure, and the nurse needs someone.

If Zhang Fan goes on behalf of himself, it doesn't matter, but this time Zhang Fan feels that he wants to visit on behalf of the tea vegetable hospital, so he can't leave the nursing part.

For the accompanying nurses, we need to refer to the opinions of the nursing department of others. To be clear, doctors and nurses pay equal attention to the medical industry. To be honest, Jinmao has done quite well.

There is room for improvement in nursing. The ceiling is very high. In particular, a nurse with prescription Rights gives Jinmao a lot of room for nursing growth.

In Chinese nursing, there is little difference between one year of debut and ten years of debut. Moreover, once a middle-aged nurse can not become a head nurse, her position in the Department is particularly embarrassing. Run, but a little nurse with a collagen face.

Technology accumulation can not be compared with doctors, and with the medical reform, more and more staffing is biased towards doctors, so there are few nurses over 40 in a hospital, whether public or private.

Therefore, if doctors compete for opportunities, then nurses almost compete for opportunities.

This thing, sometimes an opportunity represents how the back of the body lives.

For example, there are nurses in a third class hospital, which is the envy of ordinary people.

"Chen Yuan, please invite the director of the nursing department." Zhang Fan said to Lao Chen.

The hospital has a three-level clinical diagnosis and treatment system, including director (deputy director), attending and inpatient. In fact, administration is divided into three levels.

Department, medical department (Nursing Department), hospital leadership.

The director of the nursing department didn't know who he went in his early years. He became the director of the nursing department in less than 30, so his qualifications are absolutely old.

After Zhang Fan took office, he originally wanted to replace her, but he retired in another two years. After Zhang Fan talked with Ouyang several times, he didn't do it again.

After all, although people don't take credit, they don't make mistakes. That's what makes leaders tangle. If they don't make mistakes, they don't stand out. Sometimes they can't say people without measurement standards.

"Zhang Yuan!" The director of the nursing department trotted into Zhang Fan's office, nodded with several leaders and sat aside.

Before Zhang Fan spoke, he took his reading glasses, took out his notebook, put his legs together, opened his notebook and began to prepare to take notes. Zhang Fan couldn't say this attitude.

"Well, director Yang, the Royal Hospital of Mishima invited our tea vegetable medical team to visit, and the nursing department also offered a quota. Do you have any suggestions?"

Zhang Fan nodded and said to the director of the nursing department.

Although the director of the nursing department is older than Ouyang, he can maintain better than Ouyang.

Ouyang's face is wrinkled, and no wrinkles can be seen on other people's faces. The face under the big waves uses cosmetics that are estimated to be better. The light outside the window is reflected, which is vaguely shining.

"If it's a simple visit, in order to reflect the mental outlook of our hospital, I suggest letting old comrades go. After all, old comrades can feel the mental outlook of our hospital and..."

The old lady means that she wants to go.

Moreover, what people say is right.

Zhang Fan pinched the bridge of his nose. They are all human spirits.

"This visit is an academic exchange, not an exchange of mental outlook. There will be surgery at that time. It's a problem for old comrades to thread. Therefore, let young people go."

Lao Chen looked at Zhang Fan and immediately stood up as a white face.

You can't let Zhang Fan be a villain.

Some people may say that Lao Chen licks the dog. In fact, this is a matter of position. Don't underestimate this position. Sometimes people's leaders look at your position.

The director of the nursing department blushed and turned her eyes. In fact, her income in this position is also good. She still has a lot of money for all kinds of nurses in and out of a year.

But after looking at Zhang Fan's face, she knew that she couldn't take private goods. "If there is an operation, let the best skilled nurse go. The nurses in the operating room are not old and their skills are more comprehensive. "

"Well, yes." Ouyang nodded.

Other leaders are not responsible for nursing, so they have nothing to say.

The list of personnel visiting the three islands has been determined.

Zhang Fan, Zhao Jingjin, Zhao Yanfang, Ma Yichen, Lao Chen, and the head nurse in the operating room. After the list is determined, it must be reported to the municipal government.

If you eat people's food and serve people's bowls, you have to listen to people's words. At Zhang Fan's level, if you want to say hello to the bird market when asking for leave, this kind of visit should be reported for review in advance.

.....

Bjm editorial department, "boss, the tea vegetable hospital has contributed again."

"Or liver? If it's still liver, please postpone the publication this time. " While cursing the weather, the editor in charge of general surgery looked at the replies of various medical experts.

Medical journals, ordinary medical journals, for example, can let many doctors and nurses go to water.

The editing of such journals is not important. After all, even the teacher's mother is very beautiful and can be at the level of papers. In fact, it's not a big problem whether to edit or not.

The most important thing about this kind of journal is to have a journal number, and then a large number of salespeople. What do you want the salesperson to do? Just call. Then keep calling doctors in various hospitals.

I'm not afraid you can't write papers. As long as you want to publish, whether it's your intervention department or anorectal department, you can get you a paper that can be published and have credits, as long as you pay.

Therefore, a large number of papers on the promotion of professional titles of doctors and nurses. Among the ten people, they all said they bought them with money, which is a little wronged, but they said eight were bought, which definitely missed the net.

The core journals and such top journals are different. People's editors are almost all big men in the medical field.

Although not full-time editors, these part-time editors often pull out top doctors or professors in the industry.

For example, the person in charge of the review of liver and gallbladder papers of *bjm* is the director of liver and gallbladder surgery of the Royal College of medicine.

In Mishima, the medical director is equal to the professor.

Therefore, many large hospitals now do not recognize the papers published in China.

It's all jokes.

"This time, not only the liver and gallbladder, but also the inducing factors. I think this paper on inducing factors is very bright."

"Really? This hospital in the frontier of China is really powerful. Send it to me and have a look. "

At the beginning, the chief editor didn't pay much attention to it. How can a hospital have more powerful papers published continuously? It is estimated that the first few papers were accumulated by them.

The result is different.

"From clinical to research, it's amazing!" The editor in chief still has considerable skills.

Just like many people, they know that the thing in front of them is fun, but they can't say what's good.

Therefore, he directly sent the paper to the director of the liver and gallbladder audit department. That is, the hepatobiliary director of the Royal Medical Hospital of Mishima.

.....

Zhang Fan's report did not set off any waves in the bird city government. After all, there are a lot of overseas exchanges every year.

But in the frontier medical system, it's different.

Chapter 1247

A city, not to mention the super large and general city like the capital of magic, is often an affiliated hospital. Provincial hospitals look down on provincial hospitals. Provincial hospitals don't look up to municipal hospitals. Women and children never participate in their disputes over general hospitals.

Traditional Chinese medicine hospitals are often shivering waiting for government funding to live.

The bird market was in this state when it didn't get up in the tea vegetable hospital before. In the academic demonstration of the hospital system at ordinary times, once the leaders of the affiliated hospitals speak there, the Municipal Women and children are silent.

Moreover, the experts in the expert database are often the doctors in the Affiliated Hospital who can fix the sound with a hammer.

Or the examiners of various enrollment exams. If there is no Affiliated Hospital, the gold content of this exam seems to have dropped a lot.

Therefore, when there is any meeting or invitation from hospitals in sister cities, almost all doctors in affiliated hospitals choose the rest to other hospitals.

Now, at the invitation of the top hospitals in Europe, the government has given all tea vegetables, which can be done.

Almost all the doctors who know Zhang fan are surgeons. This time, no matter the First Affiliated

Hospital, the Second Affiliated Hospital, the central hospital or the Third Affiliated Hospital, the doctors qualified by the surgical system did not speak.

Because they had made trouble before, they found that tea vegetable Zhang Fan was an existence they couldn't afford.

But internal medicine and maternal and child, I don't know.

It's like those who are in the heart can't look at those who are breathing.

Internal medicine and surgeons look at a hospital and a unit. In fact, they know little about each other. The larger the hospital, the stranger it is.

As for doctors in other hospitals, do you know what they use? We are already the top presence in the frontier.

Moreover, the bigger the hospital, the stronger the competition. How could Ren Li not be excluded from even one position.

Especially where people of this culture gather, he doesn't know how to crowd you out, but works hard for you behind all kinds of scenes.

Especially in internal medicine, when we meet on weekdays, my kiss my flesh looks like a loving sister.

In fact, in private, it is proper interests. It's pediatrics to tell others that this level is not good. It's wrong for the other party's family.

Moreover, with the development of the hospital, now there is an unwritten rule for the Department Directors of a large class III hospital. Whether they have the experience of studying abroad or not. Although this unwritten rule is often unwritten, it is the iron rule of solemnity.

Therefore, many doctors often start to struggle when they arrive at the vice high school, whether to rush to the position of director or not.

Once you are ready to charge, you should do three things: first, take down the hospital level leaders; second, be ready to study abroad. This quota is just like a local hospital going to the capital for further study. You should not only pay for other hospitals, but also have a quota. 3、 If the charge fails, find a good home.

Sometimes think about it, the competition of hospital directors is a bit like Kowloon seizing the line!

If the competition of other units fails, you can change another unit, but in the hospital, once it fails

Because the industry is too narrow.

Moreover, I don't know whether it's human inferiority or something. Good things are hard to spread, and spending money may not spread.

But gossip, privacy, who sleeps, who's daughter-in-law, can quarrel in the circle in a few days. Moreover, people don't necessarily care who succeeds, but if anyone fails, people in the circle are willing to listen.

Is this learning method?

Therefore, when everyone heard that there were invited places in the tea vegetable hospital, all immortals began to fight and pay attention.

"Ha ha, Zhang Yuan, add a place! Anyway, it's all at public expense. One more and one less, no one will be serious. "

A from the niaoshi health system wants to add his sister-in-law to the team of tea going to Sandao.

When the application report was called, Zhang Fan, who was harassed by this kind of phone, was eager to throw away the phone.

Lao Chen found this problem early, so when Zhang Fan was going crazy, he took Zhang Fan's phone. This phone is a life phone. Of course, ordinary people don't know Zhang Fan's special phone, okay.

Many people are opportunists. Anyway, they harass Zhang Fan with the mentality of maybe success.

"Sorry, our hospital is operating?" Lao Chen took Zhang Fan's phone and opened his mouth. In fact, Zhang Fan gave people away in the yard at this time. Experts from all walks of life began to leave one after another. Of course, a few remained, because they had carried out experiments in the tea element laboratory.

"The list has been reported and can't be changed. I'm Chen Sheng from the tea vegetable hospital! " Lao Chen doesn't care whether he is guilty or not. Anyway, his attitude is euphemistic and firm.

Xiao Chen, director of the No. 1 branch of tea vegetable hospital, came to the general hospital to help these days. Because the experts wanted to go, Lao Chen couldn't care about it, so he called Xiao Chen to help.

Xiao Chen, the former director of the medical department, has now become the director of the medical

department of the branch hospital. Although Xiao Chen learned from Lao Chen when he was in the branch hospital, when he arrived at the general hospital, Xiao Chen was still so modest as to be a student in front of Lao Chen.

"Director, aren't you afraid of offending people like this?" Xiao Chen looked at no one else in the office and quietly reminded him.

"Ha ha!" Lao Chen smiled and didn't talk much.

In the evening, Zhang Fan's family held a banquet to see off the two elder masters who were leaving.

Qiu sect disciple, when Zhang Fan didn't show up, Wu was always the core, and the two master brothers were the secondary core.

Now, Wu's core position is slowly handed over to Zhang Fan, and the two masters are still the secondary core.

But people's help to Zhang Fan is really interesting enough.

Therefore, the elder martial brother is leaving. Zhang Fan and Shao Hua hold a banquet at home to thank the two elder martial brothers.

The guest of honor is senior brother, and several senior brothers from afar are also invited. Lao Chen and Xiao Chen also came to help be the owner.

Because Zhang Fan doesn't drink, while several other senior brothers drink.

"Elder martial brother, stay a few more days."

"No, my family is urging me. If I don't go back, I think my family will send a letter to the tea vegetable government."

The two elder martial brothers smiled and said to Zhang Fan.

Some relationships, no thanks. One look can represent everything, so there is a later saying that true love is gay.

Zhang Fan is not stingy to entertain his elder martial brother. The wine is the national wine sent by the boss of bird market winery for more than ten years, and the dishes are cooked at home by the chef of the government reception office.

Because old men Wu and Lu were all there, the party was very lively. All the martial brothers kept toasting the old men and women. The old men didn't drink. Lao Chen represented that Zhang Fan and the martial brothers had a lot of drinks. "

After a few days of operation, the division brothers who had already been scattered became closer again.

"There is liver surgery. If the hospital is inconvenient, come to me." Zhang Fan smiled and shook the car to dig people for his martial brothers.

Although I know it won't work, how can I know it won't work if I don't try?

Lao Chen drank a little too much. Zhang Fan wants to send it, but Lao Chen won't let it go. Finally, Xiao Chen took the initiative to take over the task of sending Lao Chen, and patted that she needs to stand up to know that she is a female chest. He assured Zhang fan that he will send Lao Chen home safely.

"Director, are you all right? I'll buy you a bowl of noodles in sour soup?" Xiao Chen drives the car and looks at the drooling old Chen in the back row.

"Oh, no, no, Xiao Chen, I'm optimistic about you. You're smart and smart." Xiao Chen didn't know if Lao Chen was drunk, but she couldn't be Lao Chen, so she hurriedly said, "director, don't worry, I'll stare at the stall in the branch for you. I'm your person. I know it very well in my heart!"

This girl is also a smart man.

"Hehe, good!" Lao Chen smiled and said, "in the morning, you asked me if I'm afraid of offending others. Now I'll teach you once."

As soon as Xiao Chen heard this, he quickly stopped, handed Lao Chen his tea cup with both hands, and then stared at Lao Chen, waiting for Lao Chen's following.

"Office director, what is an office director? Everyone says it is a connecting link. We have to smile at everyone. In fact, it's not. Our real smile is only at one person.

No matter what the leader tells you, you should take it seriously, especially what the other party says casually. Others can not take it seriously, but we must take it seriously. After you finish what the leader says casually, report to the leader. The leader suddenly realizes that when you think of this casually, you will look at you differently. This is a qualified office director.

Also, we must pay attention to the weaknesses of leaders, such as the European Academy. What are the weaknesses of the European Academy?" Old Chen looked at the apprentice in front of him with drunk eyes.

"The weakness of European Academy is technology compared with Zhang Academy."

"Right!" Lao Chen pointed at Xiao Chen with his fingers, looking like a child to teach.

"Which hospital's weakness?" That is, Lao Chen said it only after drinking a lot of wine today. Otherwise, it is estimated that he will only say it to his children in the future. This is also an experience. Xiao Chen copied it, so at this time, Xiao Chen's brain rotates rapidly.

"Entertainment?" Xiao Chen looked at Lao Chen and said.

"Yes, do you think I like drinking? No, Zhang Yuan doesn't drink. Then, I will arrange for Zhang Yuan in such small matters as dinner, ordering and checkout, so as not to bother Zhang Yuan. What is the weakness of leadership? If you can meet the difficulties, your position will be more and more stable.

Now several executive presidents in the hospital are not as big as mine. Why? It's because I'm irreplaceable.

And... "

There were sparks in Xiao Chen's eyes. As a result, Lao Chen fell asleep with saliva~

Xiao Chen hesitated for a long time, and finally didn't dare to shake Lao Chen up.

However, these words of Lao Chen have benefited Xiao Chen a lot.

The next day, Lao Chen was lying in bed, thinking of what he said to Xiao Chen last night, he beat his head angrily: "ouch, it's cheap for this girl film. Ouch, drinking will spoil things!"

Chapter 1248

Although the golden Maoist country is now known as the world's first in medical science and technology, it is not completely the first. It is fully recognized as the first, mainly in orthopedics, heart and cardiovascular. The world's first row of cardiovascular angiography and cardiac stents are made by the golden Maoist country. They are quite fierce in this regard.

While Mishima, like marukuo in recent decades, looks like the younger brother of Jinmao. In fact, people's inside information is also quite powerful, such as liver transplantation. People's Royal Medical College ranks first in the world. In large organs, people's more than 100 years of information is really not bluffing.

Sometimes, unless you meet the kind of talent you never see in a hundred years, whether it's science and technology or research, it's actually similar to wealth. This thing needs to be accumulated.

"It's good to go out and have a look. In terms of liver and gallbladder, we started relatively late.

Although we have made great progress in catching up with ordinary liver and gallbladder diseases in recent years, we still have a certain gap with Sandao."

Old man Wu and his martial brothers left together. Zhang Fan wanted to detain others. As a result, the leader of the magic capital army called three times a day, just like asking for an account. Zhang Fan's hair stood up. I'm kidding. Now, who doesn't know whether Zhang Fan wants to build a liver and gall center or international liver and gall loyalty.

This kind of center is really not good without an academician. Therefore, everyone is actually on guard. No one is stupid. If Zhang Fanzhen deceives old man Wu to the frontier, it is estimated that the leadership of the magic sea army will have to be replaced!

Old Wu is gone, and old Lu and old lady are still at home. In order to make old man Lu unable to leave, Ouyang took old lady Lu into the grassland yesterday and left old man Lu. Ouyang is absolutely a genius in this respect. The old lady is too talented to deal with people.

That is, old man Lu closed the knife last year. If he didn't close the knife, he was detained in tea by Zhang Fan. It is estimated that the leaders of Qingniao will sue the central government.

Zhang Fan came home early after work these days and didn't go to the laboratory. He was worried that the old man was lonely, but unexpectedly, he was home. The old man came and came back half a day later. It turned out that the old man got out of the clinic in the morning and went to the general foreign affairs department to see the doctors' business study.

The old man is also a restless man. In terms of surgery, the old man doesn't rank high among Qiu sect disciples, but he is still very good in teaching and research.

So, the old man talked about liver biochemistry at the hands of ordinary foreigners today. Once a group of thick old men of tea vegetarians have seen the sky, be good, and speak the biochemical energy to the level that the patient can understand. This is really not what ordinary professors can do.

Biochemistry is like a myth. Many medical schools, let alone students, often young lecturers don't understand it. Every year, a biochemistry and a nerve are the stumbling blocks for students, and the two subjects that fail most.

These two disciplines not only need talent, but also have good teachers to lead them in. Otherwise, relying on themselves, a tricarboxylic acid cycle will confuse many students.

Zhang fan understands, but not thoroughly. Compared with old man Lu, he is just a beginner. To tell the truth, diagnosis can be accumulated over time and practice, while physiology and biochemistry are really difficult. Let's not talk about the others. Look at the Nobel Prize in the past 50 years, either physiological or biochemical.

"OK, I will study with an open mind." Zhang Fan replied to the old man. To tell the truth, he wouldn't have gone to the three islands if he hadn't been famous and attracted funds and various scientific and technological investments. In just a few days, Zhang Fan seems to be able to learn a fart.

Just think about it for yourself. What if you can't tell the old man or annoy the old man to death.

Zhang Fan didn't want to be angry with the old man, but the old man didn't want to let Zhang Fan go.

"It's a pity that your English has gone. It's lucky that you can understand half of what others say. It's estimated that half of what you say can't be understood. This time, if people ask you Dr. Zhang Da to come on stage to talk about liver hydatid, I think what you should do."

Zhang Fan rolled his eyes. "Master, my oral English has made rapid progress recently!"

"Hey!" The old man looked at Zhang Fan and didn't know what to say.

Before they could talk, Shaohua began to call Zhang Fan to serve the dishes.

The government heard that old man Lu and old man Wu came and specially assigned cooks to the two old men, which was rejected by Shaohua.

As a result, the ingredients sent by the government these days really made Shaohua want to invite the chef back again.

Deer meat and tea are specially sent to the deer farm at the foot of Tianshan Mountain. It is for the old academicians to make up for their health. It's not demanding. I just want to take a picture with the old men.

At the beginning, many old men were reluctant to be fooled by others with photos. In this regard, many of them have suffered losses.

But Zhang Fan has been to the countryside and knows how difficult it is to raise here. Moreover, deer is not like cattle or sheep. Although this thing is artificially domesticated, it is not only wild, but also extremely timid.

A little fright can make a deer run crazy. After running, they don't eat. But when it comes to estrus, this

thing is more savage than a bull.

Often in spring, if you don't pay attention to it, the big male deer may die in the deer farm with blood. Therefore, this is why venison is rare on the market.

Venison to tell the truth, it's not good to deal with. It's really not delicious. Even Bayi, who used to be rich, just ate venison.

It's hard for others to say, but Zhang Fan, his master, can still persuade him. Therefore, Zhang Fan asked old man Lu to take a group photo. He can help a little. Then, people directly pulled a handled deer.

This makes it difficult for Shaohua.

"Master, today's meat is not ready." Zhang Fan carried a large plate, followed by blushing Shaohua.

"It's okay, it's okay. Just eat some vegetarian at night. The meat is very good!" Old man Lu said to Shaohua with a smile.

"I can only smell it. I've pressed the pressure cooker for a long time, but it's still not soft and rotten." Shaohua said shyly.

It's a pity for the girl that such good ingredients make her leather. It tastes like eating a cork of a thermos. It's full of slag. The meat is too firewood.

A plate of venison looks very good. It's cut into meat pieces of the same size, mixed with tomatoes and various mushrooms, a circle of potato pieces around and fresh coriander at the top. How do you think it looks like it's in bud.

And it smells really good.

There was no outsider, and everyone was welcome. When he picked up chopsticks, old man Lu found a very small one. Zhang Fan gave Shaohua face, picked a large one and took a bite.

Really, Shao Hua is not modest at all. This thing can only be seen and smelled. It tastes really bad.

The old man also wants to give Shaohua face, but he can't keep it down.

Shao Hua was a little embarrassed. "Master, why don't I fry mutton."

"Oh, no, no, I like to eat your dry fried spinach. You young people eat meat!"

After a few mouthfuls of rice, old man Lu asked Zhang Fan, "how can I make this meat without firewood?"

Zhang Fan didn't think much, "I don't know!"

As a result, the old man said, "Hua Zi doesn't understand. Is this someone else's practice of medicine? As a doctor, you don't even understand this?"

"Cooks and doctors wear white coats, but cooks can't do surgery! Do doctors have to be able to cook? " Zhang Fan was stunned. Although he muttered in his heart, it was easy to fool the old man with Ouyang's bowl of wine at the bottom.

"Master, do you know?"

"You, this is the reason why the foundation is not good. You should only focus on the operation. The foundation is also important. The composition of muscle is protein, right? The protein will be partially dissolved in 3% sodium chloride solution, while in 5.5% sodium chloride solution, the muscle filament will break, and 20% water will be lost in the cooking process.

So before cooking, just like soaking meat in salt water in advance, it can not only reduce the difficulty of biting, but also increase the water capacity of muscle cells, which is about 10%. Therefore, although my cooking is not as delicious as huazi.

However, I understand the principle. This is the charm of physiology and biochemistry! " The old man saw that Zhang Fan was going to the three islands. He was deeply afraid of Zhang Fan's humiliation. He even educated Zhang Fan at the dinner table.

Well intentioned.

Zhang Fan is stupid. The old man is really knowledgeable. He can even think of the laboratory when eating meat. Zhang Fan is worried to death.

It's really the difference between learning bully and learning slag.

Shao Hua looked at Zhang Fan with a smile, as if to say, you still have to work hard!

In the past, Shaohua felt that Zhang Fan not only studied hard, but also had profound knowledge. Now, he makes a comparison in front of the old man.

Really, it's not very hurtful and insulting. The old man is so hateful!

In an instant, Zhang Fan felt that he had eaten a mouthful of pepper and had no taste in his mouth.

In the morning, the light rain in early spring drips and falls. Because tea is close to the snow mountain, it often rains at night and in the morning. The cool light rain brings a little spring wind, making the rain flowers like dandelions shaking in the air.

"The wheat harvest rains in March!" Wearing sportswear, old man Lu followed Zhang Fan and ran slowly towards the hospital.

Although the old man also ran when he was a green bird, it was a pity that he was too famous, but it was inconvenient. Now he came to tea and was accompanied by the youngest disciple. I don't know whether it was because of people or the good tea climate. The old man's spirit is getting better and better.

Touching the rain and the breeze on his face, the old man was still very happy.

These days, Zhang Fan has worked hard to mend the foundation. Before, he didn't know where there were defects. He always felt that he should be very powerful. Now finally, under the guidance of the old man, Zhang Fan's progress is more obvious.

This thing can't be seen in ordinary times, but after a few days of the old man's training, Zhang Fan feels that his diagnosis is much better than before. Really, he doesn't have a good sentence. At the level of basic knowledge, it can't determine how fast you go, but it can certainly determine how far you go.

Chapter 1249

Going abroad is very simple for ordinary people to go abroad. Just have money. But at the level of Zhang Fan and Zhao Jingjin, it's not very simple.

Zhang Fan, in particular, is not only an expert in the frontier expert pool, but also a reserve cadre. Moreover, although Zhang Fan is just the president of a hospital, the level is actually high enough. Especially after the hospital was upgraded, it was different.

Moreover, with the joint efforts of medical staff under the leadership of Zhang Fan and Ouyang, the tea vegetable hospital has become the only hospital with a large medical laboratory in the frontier. It seems that the government doesn't pay much attention to Zhang Fan.

In fact, Zhang Fan has been listed. His overseas information is directly reviewed by the boss of bird market organization in person.

Therefore, the materials of several others, even Zhao Jingjin, a big river scholar, have been reviewed successfully, while Zhang Fan's has not come down yet.

Lao Chen runs to the bird market three times a week.

"The upgrading of the hospital also has disadvantages. In the past, the European hospital didn't have to let people run in person when we called the government. Now you see, now, it makes people run the bird market!"

Lao Chen said something he didn't want to, but he was still proud when he looked at the special pass hanging on the windshield of the car.

"Director, if you go to the bird city government, you will have more face. They will organize the deputy leaders to meet you in person." I'm too busy these days. Xiao Chen came to the tea vegetable general hospital to help.

"Hey, this is looking at Zhang Yuan's face. Where can I have face?" Lao Chen said modestly.

Of course, Zhang Fan doesn't worry about this kind of thing, nor does he need to worry about it. After all, Zhang Fan takes technology, not administration.

On Monday, there was no ward round this week, so there was a hospital affairs meeting in the morning. When the hospital grows up, the ward round is usually once every two weeks, because Zhang Fan is the technical Dean, not like the executive dean. Going to the Department is a form, and you can't ask anything. The most is to ask whether the window of the ward leaks or not, and whether the sanitation in the Department is clean or not.

Zhang Fan's technical ward round is a serious joint effort with other experts to solve the problem. This kind of ward round takes a lot of time, so when there is no ward round when the hospital grows up, the hospital is a hospital affairs meeting on Monday.

"By comparing the data of previous years with that of this year, the number of recent patients in our hospital has increased significantly compared with that of previous years..." in the absence of Lao Chen, vice president Yan Xiaoyu became the host of today's meeting.

In the spring of previous years, the hospital visit rate will drop precipitously. This time is also the time for hospital doctors and nurses to get married and visit relatives, but this year is different. Although the number of tea element local patients has decreased, the hospital patient visit rate has not changed significantly due to the increase of foreign patients.

The leave of doctors and nurses can not be forcibly refused. Therefore, the staffing of the hospital was

obviously tight.

As soon as the manpower is tight, it is easy to make mistakes, and medical mistakes are not a small problem. So everyone had a bad expression at the hospital affairs meeting on Monday.

"In the third Department of orthopedics, the teaching doctor was irresponsible on the night after the spinal surgery, which led to the intern's wrong removal of the patient's suture.

The pharmacology department of the hospital has repeatedly warned several orthopedic departments that the drugs exceed the standard, and it has been found that improper antibiotics are used in cleaning surgery for many times.

In the first Department of general surgery, even patients are listed in the operation list without discussion.

The third Department of general surgery performed circumcision in the dressing room without registering in the Department.

Three doctors in the anesthesiology department went to the outside hospital for anesthesia treatment during working hours.

In obstetrics and Gynecology, patients complained to doctors and nurses for many times, with a bad attitude. More suspected of accepting red envelopes.

.....”

One question after another came out. In fact, there are some problems, such as the problem of private circumcision in the third Department of general surgery.

When Zhang fan rotates, he not only knows, but also does less. A prepuce operation, registered, came down for more than 2000, and was looking for a relationship. In the dressing room of general surgery, it was solved for 500 yuan.

Moreover, this kind of thing is not a single doctor's thing, but a collective crime committed by the whole department. From department director to head nurse, from doctor to nurse, almost everyone participated. Say big, is to dig the corner of the hospital, say small, in fact, there is no hospital.

But this kind of thing can be done but can't be said. You can do it. Don't be found. Once found, the hammer will never be light.

Ouyang's face was blue. In her mind, this shameless thing was indulged by Zhang Fan.

"Must warn, director Li, what's the matter with your department. Do you have any discipline or organizational concept? This time, even... "Zhang Fan held it high and was ready to put it down gently.

The general third department is the gastrointestinal department with the least oil and water, the most disgusting and tiring operation. Sometimes, doctors who can dig feces have no appetite for three days because of a fat man's intestinal obstruction. So Zhang Fan is going to give a warning, which means, Lao Li, you should be careful next time. Don't always bother me with such a bad thing.

But before Zhang Fan finished, the leaders of the Department of internal medicine were unwilling. Not only Ouyang but also Ren Li and Yan Xiaoyu were unwilling.

"This time, we will deal with it seriously!" Ouyang immediately followed Zhang Fan's remarks and interrupted Zhang Fan's intention to release water.

"Yes, I agree with the president of the European Academy!" Yan Xiaoyu looked frosty.

"I... I also support the European Academy!" Ren Li looked at Zhang Fan with embarrassment and smiled.

Zhang Fan was also helpless. He glanced at the director of the third Department of general education who had made a big red face.

"Fine, circulate a notice of criticism in the hospital." Zhao Jingjin handed Zhang Fan a knife at the first time.

This kind of thing can be big or small. The hospital will circulate a notice of criticism, and the fine is actually a big deal.

Ouyang took a hate look at the director of the third Department of general education and didn't say anything.

In the morning, the departments of the hospital are like a moving machine. Sometimes the screws need to be tightened from time to time, but they can't be tightened too much, otherwise they will slip.

After the meeting, Ouyang wants to get angry with Zhang Fan. She thinks Zhang Fan is a little eccentric. In fact, people are the same. There is no absolute fairness. Before the old lady opened her mouth, Zhang Fan hurriedly said to Ouyang, "there is something wrong with the decoration of the orthopaedic research center. Go and have a look. We don't understand the rest of us. Maybe we were cheated.

Jin Mao came here to make the operating room into a leap layer, and countless talkers need to be installed on each floor. Go and have a look. If you don't look again, I estimate that the decoration cost is more than the money for building the building. "

Ouyang had no time to get angry. He took the white helmet reserved in the office and went to the orthopaedic research center.

Sometimes the gap between people's habits and ideas is too big.

According to Zhang Fan, the decoration is fancy. It's better to add more practical equipment.

But Jinmao doesn't think so.

The operating room is thermocone. The first floor is the operating room. The top of the operating room is not an ordinary roof, but a roof like an egg shell made of hardened glass. Then a circle of observation positions are built on the transparent roof like an egg shell.

Although a hardened glass makes a roof, in fact, this glass is said to be super expensive. Because the orthopaedic operating room is often a little similar to the kitchen, when the electric knife is turned on, the oil fume of fat is not enough to rely on the attractor alone.

Moreover, because the patients in the operating room are undressed and naked, the indoor temperature should be high, so this transparent glass must be anti atomization, anti oil smoke and high transparency.

At this price, can't you get some observation rooms and put some cameras? Simple and crude, the price is also cheap. In fact, Zhang Fan is not simply reluctant to give up money. The most important thing is that the camera is not simple!

But Jin Mao didn't do it. They thought it would never be better to look directly through the camera, so the doctor supervising the project here would talk to Zhang Fan if he had nothing to do.

In addition, the device of communication equipment means that a contact center like a central processor is set in the building of the orthopaedic center. When necessary, information is sent directly from the contact center, and information can be heard in all rooms and floors of the orthopaedic center.

In fact, it is a radio station, but this radio station should be fully computerized, and every doctor and nurse should be equipped with a special walkie talkie at that time.

This set down millions, even tens of millions.

What Zhang Fan means is that he has to spend the money to solve the problem that can be solved by phone for half a day.

With this money to buy more operating beds, doesn't it smell good?

Zhang Fan was not in the mood to quarrel with Jin Mao, so he let Ouyang go.

He thinks Ouyang is more powerful than him, and he should be able to win.

As a result, Zhang Fan received a call from Ouyang after a major gastrectomy.

After the golden haired people didn't know what ecstasy they had given the old lady, the old lady agreed with others.

"Don't you think it's a luxury for the European hospital to decorate the operating room on the first floor with millions and tens of millions?"

Zhang Fan doesn't understand what Ouyang thinks.

"I think people are right. I watched the video sent by people's hospital. As soon as the surgery was decorated according to people's appearance, I thought it was advanced. We can't save the money we should spend. You'll come and see the video sent by others later. It's really good. "

Zhang Fan was not in the mood for surgery. He went out with several orthopedic doctors and went to Ouyang's office.

Because these operating rooms are mainly used by orthopedic doctors in the future, their opinions are the most important.

.....

After the communication between the leaders of bird city and the leaders of the Ministry of health, Zhang Fan's application report was finally passed.

However, the original one month trip was compressed into half a month.

Busy, Stan came to a patient, and also named Zhang Fan for surgery. People's mouth is full of gold teeth that can shine blind people's eyes, and their momentum is also quite sufficient.

When I first came to the tea vegetable hospital, I wrapped up the special needs ward of the second branch.

Chapter 1250

Rich people, to tell the truth, the rich people Zhang Fan has met don't know how they are in front of others, or how they pose, but in front of Zhang Fan, they are approachable, amiable, or generous, but they hardly hit people with money.

For example, the winery owner, after Zhang Fan finished his operation, although people also sent wine and cigarettes, they gave them well, and they wouldn't feel insulted by money.

But the boss is different this time.

It is full of money.

To tell the truth, Zhang Fan actually likes the boss of this currency style, and he doesn't like money. In fact, it's because Zhang Fan likes others' directness!

Stan, the full name is free medical care. In recent years, there has been a lot of quarrel between free medical care and paid medical care.

Not to mention that China's medical care is perfect, not to mention free, it is quite satisfactory.

Free medical care, how to say, if the country is super rich and has few people, such as northern Europe and countries that rely on banks to make money, it can.

But once there are a little more people and a little less money, there is really no way to say this free medical treatment. In the simplest way, some middle-class families in Jinmao do not dare to make medical rescue calls anyway, because not only the cost of visiting is expensive, once they make an emergency rescue call, all the later treatment expenses are not reimbursed, which makes people very timid.

People are not dead, money is gone, not only Chinese people are afraid, but also foreigners.

And Stan, who has less money and more people. Compared with China, their population is not enough, and they don't have much money.

No money can be made for selling minerals and gas. Even glucose solutions are exported by frontier pharmaceutical factories.

Don't look at frontier pharmaceutical. It's just Xuelian injection for rheumatism. It's a little famous. It seems that there are no other famous drugs.

But people's annual income is also good, because the drugs of several stans around, especially the public drugs, are almost covered by the frontier pharmaceutical factory.

A country that even imports glucose and normal saline does free medical treatment. Anyway, it just coaxes its nose with its eyes covered.

In the past, the super rich people in this place often chose to see a doctor at laomaozi, and then went to Europe.

Since the boss here donated a rescue plane to Zhang Fan and signed a medical visa free passport with the frontier government, many middle-class people have come back to tea vegetable for medical treatment.

After all, people's former capital was less than 400 kilometers away from tea, and Ouyang had a group of Kazakh nurses waiting for them in order to make money. Therefore, even after language is not a problem, tea vegetable hospital has directly become the first choice for others to see a doctor.

This is also the backbone of Zhang Fan and Ouyang.

After all, I can earn foreign exchange, no!

When Zhang Fan had several operations in Stan, the reputation of tea vegetable hospital became even greater. Therefore, many big bosses who can see the light don't invite them. They come directly to tea vegetable for medical treatment. Anyway, they have a lot of money.

The boss with a mouth of gold teeth is the descendant of Bangzi state. He is the third or fourth generation. Anyway, I don't know how to get there, one in the East and the other in the West.

This guy doesn't know whether he is not mixed completely or not. Anyway, he gathers the appearance characteristics of the stick. He has narrow eyes, small nose and small mouth, but he has a big face, like a full moon. It's like the eyes and mouth grow to half, but the face continues to grow.

Not to mention, short hands and short feet, coupled with a unique magnificent body of West Asians, are really weird. So this guy seldom wears a suit. Most of the time he wears a robe!

This guy doesn't rely on mines, but his capital is no less than that of people with mines.

As everyone who has been to stan knows, Stan's gambling industry is relatively Mazu and golden hair. It's called a wild game. To what extent, it was almost the same as that in northern Myanmar. The Ministry of foreign affairs had to send a letter to announce that Chinese people who went to stan should not gamble there!

So this guy, the money is real. And they have an official identity.

There is a joke in Stan that Lao Tze is the president and his son is the boss of the black astringent society. His father governs the country during the day and his son governs the country at night.

It's said that this guy has something to do with the people in charge of the night. Therefore, it's strange

that there is a congressman Stan on him. People at night have official positions during the day!

Because people have identity, they can see the light. After coming to tea, they directly asked Zhang Fan to see a doctor. They also said that they wanted to package the branch hospital for safety and privacy.

How can this work? Even if Zhang Fan and the European Academy are willing, the government does not agree. No matter how big your boss is, you can't contract a public hospital, even if it's a branch. This is the same as leaders can't keep mistresses. If people know this, they can't scold to death.

Therefore, Zhang Fan discussed with Ouyang, "isn't the International Medical Department of the second branch just renovated? Doesn't he dislike our bad environment and poor security and privacy? Let him pack it!"

"The special needs section of the first branch is also empty, or let him pack it!" Ouyang said a little reluctantly.

No matter foreigners or Chinese, they all like to take advantage.

Since the tea vegetable hospital became famous in Stan, too many Stan people came here to see a doctor. At the beginning, everyone was very honest and afraid of making an appointment to a month later, so everyone tried hard to go to the faster special needs department.

But later, slowly, people also had experience. If you don't go to the special needs department, you can hang up the general outpatient service. What's more, people don't go to the registration office specially set up for foreigners in the branch hospital. They directly look for some Kazakh speaking college students in tea vegetable University.

Give me a hundred or ten yuan a day and go directly to the tea vegetable general hospital to see a doctor. It's a lot cheaper. Sometimes, you can not only see a doctor, but also find a daily girlfriend!

At the beginning, Zhang Fan and others hadn't found out, but there were more people doing this, and there was no one in the special needs section of the first branch. Zhang Fan and others came to understand.

Therefore, you must take your ID card to see a doctor in tea vegetable now. This was simply forced out by a group of smart people from abroad.

If there is no ID card, it will be charged according to the treatment of foreigners.

At the beginning, Zhang Fan was afraid that tea vegetable patients would swear. Unexpectedly, this move made tea vegetable Chinese feel superior!

"Well, even if it's a branch, people are not stupid for several kilometers!" Zhang Fan is embarrassed.

Since the decoration cost of Jinmao is more and more expensive, Ouyang now looks like RMB. Lao Gao goes to the magic city meeting. She goes to the tea vegetable government every day. Not only does she go to the tea vegetable government to make trouble, but also asks Lao Chen to call the bird city government every day.

Nothing. In a word, it needs money.

Ouyang's generation knows too much about crying children

Therefore, when she asked for money, she didn't care whether the hospital was upgraded or not, that is, there was no money in Chengguan District, otherwise it was estimated that she would send someone to Chengguan District for alms.

The International Department on the first floor has 60 wards. One ward costs 400 yuan a day. This is the fixed cost.

Rational calculation, if only this ward fee, the hospital will really close, because the salaries of doctors and nurses recruited in these two branches alone are not enough.

The cost of ordinary ward and hospital ward is three people, 15 people a day for one bed, 30 people a day for two people and 30 people a day for one bed. However, the two people are often used to exchange human feelings, and people without social energy can't live.

Therefore, the cost of the hospital is not calculated in this way.

"Four nurses are fixed in one ward. He has to pay for nursing. Our beds are fixed. There are four girls in one bed!"

"Nurse!" Lao Chen, who came back from the bird market, quietly reminded Ouyang.

"Yes, one bed has four 24-hour caregivers, and the nurses who rotate the caregivers are equipped with a special interpreter. Provide a tube bed doctor. Calculate how many doctors and nurses it takes. "

Ouyang shameless algorithm, Zhang Fan is embarrassed to open his mouth.

The new team members were even more surprised. They were surprised that someone in the ward could cover the first floor, and the two monitor of the hospital even agreed. Not only agreed, but also calculated how to get more money here.

Really let several new team members see the sky.

Lao Zhao, Lao Luo and Yan Xiaoyu really understand why the tea vegetable hospital is so rich. The original account can be calculated like this.

The nurse doesn't say. One bed has one doctor. Even if the interns in the second branch are counted, there are no 60 doctors on that floor! But Ouyang was lying. She said there was something!

"And the accompanying fee for each bed, the nursing fee. Wear and tear... "

"Let's forget the wear and tear fee. If we report the bill, we have no face to mix!" Zhang Fan interrupted Ouyang.

Although it was the first time to pack a hospital, Ouyang didn't feel strange at all. It was as if the old lady had rehearsed before. It was not disordered at all.

"Oh, you're still young. Forget it, don't count it. But the security officer of our security office is really a stick boy from the army. Let alone Military Boxing, capture boxing is very powerful. How many years has our hospital recruited thieves? Isn't our security strong!

The security fee has to be calculated. Our security office is no better than their bodyguards! "

Zhang Fan covered her forehead. The old lady thought about it in her mind when she was absolutely fine, otherwise it would be too skilled.

What's more, those people in the security office are really great guys from the army. They have been great guys in the last few years, but with the growth of retirement time, they stand up one by one. Where they are called boys, they are all uncles.

"Why are you not shy when you spend money? You dislike me at this time. You know how to be ashamed at this time. What do you know? Do people care about your three melons and two dates? They have a special need. Do you understand it? If it was put in the past, it must be

OK, OK, people are rich. They only buy expensive things but not the right ones. If you want less with people, they won't come next time they get sick. I don't understand. Ouch, I'm so worried! "

Seeing Zhang Fan covering his forehead, Ouyang was scolded and laughed angrily.

Chapter 1251

To tell the truth, the tea element hospital is now the leading hospital in the frontier in terms of liver and gallbladder, gastrointestinal, orthopedics and burns. If it is not that the reserve force has not been cycled, that is, one radish and one pit have not replaced personnel.

If it were not for the talent shortage, it is estimated that the whole northwest, including the city that dug the subway, such as digging the tomb, could also become the leading brother of these departments and tea vegetable hospitals. Unfortunately, the talent limit is too obvious. I can only yell at Stan.

Now we can't scare large hospitals in China.

However, there is already a saying in the Jianghu that the great frontier is limited to flying. In the past, doctors from the general foreign hepatobiliary department and the capital, Xihua and Shaanxi province came to the frontier to fly knives. There's no route right now.

Even if the frontier hospital is reluctant to contact Zhang Fan, it can invite ordinary Throwing Knife doctors. Those who are a little famous don't come to the frontier anymore.

This thing is very much like between countries. Your country has no eggs. People even come to your house at your door and take out cows to pee at your sister. But once you have an egg, well, everyone is civilized. You must wear formal clothes and ties. You'd better wear a tuxedo. If there is a misunderstanding, we can sit down and negotiate.

Therefore, the frontier, hepatobiliary surgery, almost can not hire a bit of coffee flying knife doctor. Moreover, the patients in the frontier now know that in case of liver and gallbladder diseases, they don't have to go to the bird market and go to tea.

The cost of tea vegetable hospital is also cheaper than that of bird market. It doesn't mean that the treatment cost is cheap. They are all class III hospitals and provincial hospitals. The prices are the same. However, tea vegetable is not the capital. Eating, drinking and Lasa are relatively much cheaper than that of bird market.

For a time, just like the spring rain of tea vegetable in the evening, many houses in tea vegetable cities were slowly rent-seeking, and small houses were more popular. The most obvious thing was all kinds of small fly restaurants. Suddenly, the business was much better than in previous years.

"The tourist season hasn't come yet. I'm so busy these days that I can't even breathe. I haven't smoked a cigarette all morning."

The Kazakh uncle selling milk tea on the tea vegetable Street complained to the fat aunt.

In the early years, when the railway had not been connected with tea, the living state of tea was like this. There is no restaurant guard before 11 a.m.

Only when the sun came out did the breakfast shop slowly put down the door. The aunt slowly took out the milk skin and waited for the milk from the grassland.

Tea vegetable milk tea is salty, and it is two varieties of milk tea in big cities. There are many fancy things in a cup of milk tea worth more than ten yuan in a big city.

The milk tea of tea element is very simple. Put brick tea into the teapot, put some grass and fruit, put some pepper, and then boil it. When the tea is like red wine, filter out the tea, then half a bowl of hot milk, half a bowl of tea, a spoonful of green salt, and finally put some milk skin.

There is no fishy smell of fresh milk in youyou milk fragrance. There are more plant spices and tea fragrance. The milk skin that can be chewed by your teeth is definitely an enjoyment after getting up in the morning.

There is no burden of big fish and meat on the intestines and stomach, and there is no instant hyperglycemia caused by steamed stuffed bun rice porridge. Therefore, after Zhang Fan came to the frontier, he didn't really want to eat beef noodles, and he didn't have diarrhea after drinking milk tea.

The whole city is slowly waking up in bowls of milk tea, and the pace of life is extremely slow. On the street, Uygur people played chess and Han people played chariots and horses. The snow capped mountains in the distance are so comfortable.

Because the house price is cheap, the pressure on the tea side is really small. The streets are full of restaurants or hotels, or hotels or entertainment places with all kinds of small door curtains.

Often, although the entertainment here is not tall, it can really be envied by people in big cities.

Seven or eight friends sit together, order meat and vegetables, and then drink happily, sing and dance. One night can start from 7 p.m. to 2 a.m.

Therefore, the suddenly busy business makes the vendors here a little uncomfortable.

To tell the truth, a hospital can drive the economic vitality of a city, which is unexpected.

This is what ordinary citizens feel.

There are also high-tech zones, where factories have sprung up. In the past, there were development zones, free trade zones and even provincial offices here, but most of them were leather bag companies or tax avoidance companies.

The largest enterprise in the development zone is the yogurt factory, and the yogurt is sold locally.

There is no shadow of tea. It is said to be an enterprise, but it is actually a workshop.

Now, it's different. In the high-tech zone, various pharmaceutical enterprises and equipment companies have sprung up.

They all came to the tea vegetable hospital.

Citizens may want a slow life, but the government doesn't think so.

Therefore, although the current tea vegetable hospital has been upgraded, it is a leading enterprise in the eyes of the tea vegetable government.

The tea vegetable hospital, which has been separated from the tea vegetable control, can still receive the frontier subsidies sent by the tea vegetable government. Ouyang has nothing to do but ask for money and land.

In the second branch hospital, most of the patients are from Stan. The locals now go to the tea element hospital, which is no longer seen by other hospitals.

One is: go to the tea vegetable hospital. Where are academicians. If there is not enough milk, we should find academicians. It is also the pride of tea vegetarians.

In the second branch, the guards were wearing Yishui's new uniforms.

"Stand up and cheer up one by one. Our bonus this year depends on these days. If anyone drags back, I'm welcome. Take a positive step in the yard in the morning. Good slogan! "

The section chief of the security section is mobilizing his security in the yard.

Zhang Fan, with a group of doctors, came to the second branch hospital. Looking at the guard in the yard, he shook his head and smiled. He either said it was bad, or he felt a little deductive.

"Zhang Yuan! Hello, Hello! " People in Stan, especially those with some status, used to speak two languages, one is Lao maozi's words, and the other is Stan's language. Not many people can speak Chinese.

And this one, in fact, can say so many words in Chinese.

Zhang Fan looked at the local tyrant with strong and small eyes in front of him, and also greeted him with a smile. It is estimated that the translation English of tea vegetable hospital needs to find Zhao Yanfang, a doctor like them, but it is much easier to translate Stan's language. Just pull a minority nurse and you can be a translator.

In this regard, Ouyang also claims to be a professional translator invited from tea vegetable college.

Hundreds of translation costs a day.

Once you don't want your face, you really have nothing to do with people.

Physical examination, in order to show the importance of the tea plant hospital, Zhang Fan's doctors, from young doctors to middle-aged doctors to the last experts, started physical examination.

It's already a grand slam.

"Diarrhea, bloody stool, unexplained low fever, ineffective antibiotics." Zhang Fan looked at the patient's past medical history.

"Prepare colonoscopy and pay attention to diet."

After explaining a few words to the doctor in charge of the bed, Zhang Fan smiled and said to the local tyrant, "you can't eat spicy and exciting recently. You should quit smoking and drinking."

"Can't you drink a little?" Tu Hao said, which is one of the few sentences he can speak in Chinese. Stan people speak Chinese and often like to say inverted sentences.

"Not at all!" Zhang Fan also replied with an inverted sentence.

After explaining to the patient, he left the ward. Although there was no colonoscopy, several experts actually knew it.

"It is estimated to be an autoimmune disease." Zhao Jingjin said with the medical record.

"Yes!" Zhang Fan nodded and then said, "check it first!"

Self immune disease, the name sounds very soft, like a sister next door, petite and clever. In fact, this disease is particularly troublesome.

Besides, there is no specific medicine yet.

For example, the famous systemic lupus erythematosus, rheumatoid arthritis, hard dermatitis and ulcerative colitis.

In fact, these are autoimmune diseases.

This disease, if it is a case, directly depends on Biochemistry and immunity. Doctors in general departments can't understand this.

In fact, even the doctors in the endocrine department can't figure it out.

If it is more popular, it is actually the guards in cells. Some tissue factors that can kill bacteria and cells attack normal cells in the body.

To put it more simply, for example, lupus should actually leave some traces on various organs for the mutated factors. At this time, leukocytes and mast cells take the army. Seeing such traces, no matter 3721, is a hammer.

Then there is a large area problem of the system.

Therefore, this disease is often alleviated by hormones. The more the dosage is used, the more the patient seems to be beaten. His face is also kind, and his body is swollen, just like being blown a balloon.

Before Zhang Fan and his family had gone far, the local tyrant Stan sent his personal secretary to find Zhang Fan.

"Dean Zhang, can you solve our boss's constipation first. He hasn't had a bowel movement for more than ten days, and the effect is not obvious after the private doctor gives him an enema. "

"OK, I see. I'll have someone deal with it later." Zhang Fan nodded.

"No wonder he threw a lot of money when he came. It seems that this is really uncomfortable."

Zhao Jingjin smiled at Zhang Fan and said.

The pain of defecating for a long time is usually less than that of the human body.

This feeling is like a sun Walker in his stomach. He jumps out and hurts from time to time. Moreover, his stomach is empty and is about to emit sour water, but he just doesn't want to eat. This is just like why Princess Iron Fan wants to borrow a fan for sun monkey.

Sometimes patients want to put their hands into the back door to take out.

This is why there is a saying in the Jianghu that eel can defecate and drink oil to clear the intestines.

.....

"Crohn!" In the afternoon, the digestive endoscopy center called. After enteroscopy, the tyrant made a direct diagnosis.

After the call, Zhang Fan directly asked the doctor of Gastroenterology to give conservative treatment first.

Chapter 1252

Zhang Fan handed over the medical treatment of Stan tuhao to Ren Li and Yan Xiaoyu. The next thing is up to time.

If the disease can be suppressed by medical treatment, there is no need for surgical intervention. If the medical effect is not good, there is only surgery.

Moreover, the surgical treatment of this disease is actually quite rough. Cut wherever it is inappropriate. The intestines are disobedient. There is almost no reason to cut the intestines.

After the explanation, Zhang Fan left Lao Chen and went into the operating room with a group of young doctors.

In general hospitals, most diseases are actually routine diseases. Especially in secondary hospitals in some areas, there are few difficult and miscellaneous diseases. Patients are not stupid. Although a person doesn't have much medical knowledge, he still knows the priorities when the disease comes.

Go to the clinic with a cold and to the general hospital with a high fever. Once you feel wrong, go to a large class III hospital. This seems to be a natural skill of ordinary people.

Often, the most difficult problems in hospitals are sudden onset diseases, such as car accidents that lead to the death of patients, and high blood pressure that leads to cerebrovascular explosion.

This is the more intense work in the hospital on weekdays.

Therefore, this also led to the nervous tension of hospital doctors.

For example, there are very few doctors who take the initiative in gynecology, obstetrics and pediatrics. Why? It is because there are too many nervous diseases.

There are many nervous patients in cardiology, but why do many doctors have to go to cardiology when their heads are broken.

It's not that the doctors engaged in cardiology are handsome, but that the income of Cardiology is high

for other departments. Some drugs in the heart in the early years are almost expensive imported drugs. Later, tens of thousands of stents were involved. To tell the truth, orthopedics, orthopedics is the younger brother in front of cardiology.

And now to tell the truth, there are not many operations that must be performed by Zhang Fan.

Because there are too many experts in tea, some doctors have been recruited, and some doctors who are not recruited but are in the tea laboratory have also been dragged into the operating room by Ouyang.

These doctors in the beginning laboratory don't want to. Ouyang also had a clever way to send consultation fees to these doctors, which was called inviting experts from other hospitals to consult.

It doesn't matter whether it's money or not. It's the name of inviting experts from other hospitals that really makes these doctors complacent.

In the hands of their boss, it sounds good to be a doctor, but it doesn't sound good to be a tool man.

When he got to tea, the head got up immediately and became an expert.

People at work are nothing more than money and ideals, since tea is so comfortable.

These doctors are less resistant to going to the tea element operating room.

Ouyang Nong is quite powerful in this silent means of spring rain.

.....

Moreover, now, because of the arrival of Lu Lao, many doctors who had hesitated have also signed work contracts with tea vegetable hospital. This star effect can not be underestimated.

In the past, the quota of special talents introduced by the tea vegetable government to the tea vegetable hospital was five or six a year. Of course, the standard was graduate students and above.

This quota is often to go to major universities and bring back graduate students from several major departments. Although it is the introduction of special talents, it can not be called the pillar of the Department after arriving at the hospital.

Therefore, the previous establishment can sometimes not be used up.

But now it's different. The establishment is not enough.

Especially this year, the recruitment season has not yet arrived, but there are already several doctors in

hand.

This kind of person can't delay. Sometimes if he delays for a few days, he may become a bird and fly away.

Although it seems that people use tea as a tool for the boss, once they get some results, they are in hot demand.

Moreover, with the upgrading of tea element hospital. Local hospitals, such as the traditional Chinese medicine hospital, which has been upgraded to the top three, dare not blatantly treat Biao tea hospital, but there are still some.

For example, several doctorates in hepatobiliary surgery of catechin contacted privately before the preparation was determined.

Ouyang certainly knows this. Therefore, Ouyang took Mrs. Lu to the grassland, returned to tea and immediately went to the bird market.

It is said to be equal pay for equal work. In fact, there is a great difference between having a staffing and not having a staffing.

For example, doctors without staffing will not be the director of the Department, let alone the dean.

There are also some benefits brought by the establishment, which can't be seen when they are young. The older they are, the more popular they are.

Ouyang went to the bird market. Old lady Lu was not idle when she left. Ouyang arranged a living for her.

She took the gynecologists to study business and appointed LV Shuyan as the old lady's business secretary.

In the early days of the tea vegetable hospital, general surgery, orthopedics, cardiology and obstetrics and gynecology were the local tyrants.

Especially obstetrics and gynecology.

Now, with a large number of graduate recruitment, obstetrics and gynecology is even more cattle, which suppresses the nearby maternal and child centers and wants to move.

The traditional Chinese Medicine Hospital of catechin is an example. Those suppressed by the catechin hospital had to go to the high tech Zone.

Now women's and children's hospitals feel the same.

For example, giving birth to a child is clearly a natural second child, but pregnant women and their families have to go to the stairs of the gynecology department of the tea vegetable hospital to add a bed, and they are not willing to go to the bright maternal and child hospital.

This is very uncomfortable for doctors in women's and children's hospitals.

It was a high-rise building, but there was no patient.

This is the siphon effect.

Tea vegetable hospital is developing too fast. When it comes to maternity and children hospital and traditional Chinese medicine hospital, it can only recruit undergraduates. Even some excellent undergraduates are unwilling to come here.

Because there are no patients.

"Zhang Yuan, your materials have passed the examination." At noon, after Zhang Fan came out of the operating room, Lao Chen found Zhang Fan.

"Finally passed. I thought I couldn't pass." Zhang Fan looked at the information handed over by Lao Chen.

"Well, let's confirm the itinerary for Mishima when." Lao Chen is so hot that he wants to go out for a walk.

"Don't worry. Take it easy first. The local tyrants of the second branch hospital will send them away."

Invited to visit is very face-saving, but Zhang Fan is a pragmatist and can't delay his business because of face.

.....

In obstetrics and Gynecology, old lady Lu looked at LV Shuyan on the operating table. Although the old lady doesn't have much surgery, she still has a good eye.

"There are hidden dragons and crouching tigers in the tea vegetable hospital. Apart from Zhang Fan, this little LV in the Department of gynecology has been amazing. You see, the operation is almost at a high level. "

"Hehe, they are all hospitals in Zhang hospital. The doctors in Zhang hospital are very powerful. Zhang Yuan of surgery, Wang Yanan, Zhao Zipeng of anorectal department, Li Hui of respiratory department, and Yang Hong of gastroenterology department. They are all top business. "

"This is probably the front effect!" Mrs. Lu now finally knows why Zhang Fan has such great ambitions.

When old man Lu talked to old lady Lu, he hated the closed disciple for not coming to Qingniao.

As a result, within two years, the old man himself was fooled into tea by his little apprentice.

At first, the old lady also wanted to travel around. As a result, she was quickly caught up by Ouyang and Zhang Fan.

The original leisure retirement life is busier than before.

Now the old lady understands. The old man's closed door disciple is still very worried.

.....

In the second branch, the local tyrant lay on the bed.

Sometimes, if you go to the hospital, you can really understand the national two-child policy. Because it's not easy for a person to grow up.

All kinds of diseases, all kinds of risks, all kinds of accidents.

For example, many diseases are not difficult to treat, but difficult to diagnose.

A child has a fever, cough, virus infection or bacterial infection. Sometimes it's not clear without blood culture.

This is the way to see a doctor. Doctors with low level treat viral infection as bacterial infection. The more treatment, the more serious it becomes.

At the end of the treatment, the child opened his mouth. The white hair in his mouth didn't kill the virus. As a result, he became an antibiotic fungal infection.

And there are some diseases, where people are. At a glance, even interns know the diseases. You just can't help them.

Such as self encouraging diseases.

If we say that cancer and colds are caused by the outside, in fact, it is the internal changes. To be more popular, it is the external enemies who kill in. As long as we diagnose and treat early, it is not a big problem, that is, cancer. If we can diagnose early, in fact, the harm of this thing is not high.

Self encouraging diseases are different. This thing is the rebellion of their own cells in the body.

You can't take medicine. Often the treatment of this disease is inhibition and suppression.

This treatment of raising soup to stop boiling will one day be suppressed or uncontrollable.

And Stan's local tyrant is now in this situation.

Intestinal obstruction comes and goes, comes and goes. The one with a stomachache doesn't know where it hurts.

Sometimes there is perianal infection from time to time. Originally constipation, the result is perianal infection. To tell the truth, every stool destroys the local tyrant like the criminal law. Every forced defecation is like a knife across the intestinal tract and the perianal infection and ulceration.

The local tyrant, who is in pain, hovers with his hands on his hips. He wants to massage chrysanthemums with his hands. It hurts too much.

Moreover, because he had to do colonoscopy, after drinking hypertonic drugs, he was afraid of the bathroom.

"It's been three days. I can't pull it out. I'm dying!" The local tyrant howled in the bathroom.

In fact, this time, it's really not constipation, but the intestinal emptiness caused by taking laxatives.

And he felt like defecating.

In fact, the large intestine is roughly divided into three sections, one is the ascending colon, which is connected to the small intestine, and the other is the parallel transverse colon. What is this? This is the raw material of the fattest brine large intestine we usually eat.

This section has the most fat. Another section is the descending colon connecting the anus.

On weekdays, when we defecate, what we empty is actually the most descending colon, and then defecate once. It takes about a day to fill this period of time, which can make people have a sense of defecation. This is also the principle of defecating once a day.

Of course, people who eat more don't count.

The laxative directly empties the upper colon, transverse colon and descending colon. If you need to fill these three sections, it will take about three days. Therefore, this is the three-day law of doctors prescribing laxative. Only three days, not more.

The local tyrant of kestan has no effect after conservative treatment, and the symptoms have worsened.

This is more troublesome.

Not in medicine, surgery.

And now this guy has entered a manic state.

So the operation had to be performed.

In the second branch hospital, physicians handed over Tu Hao's case to the surgeon.

Surgery was also scheduled.

Chapter 1253

Many people don't understand how uncomfortable a woman's menstrual period is.

If this discomfort increases the pain level, it is actually the discomfort of Crohn's disease, and the menstrual pain can be relieved, and this schedule is fixed.

For example, this month is the first, and the deviation will not be too large next month. Of course, you may not take the emergency contraceptive.

Moreover, the disease can be said to be more expensive than diabetes.

Suffering from this disease, I can hardly concentrate on my work. For example, I finally made an appointment with a sister. The head was washed, and the perfume was sprayed. When the mood was agitated, the stomach began to ache and had to go to the bathroom.

And this kind of going to the bathroom, like a big cock, has to walk all the way, squeeze all the way, every ten minutes, every ten minutes.

It's still light. It's still after formal treatment.

There is another kind. After regular treatment for a long time, patients clearly eat a lot, but just like anorexia, they can see the bone frame in the deep eye socket.

Zhang Fan holds Stan tyrant's colonoscopy report. Now he finally understands why this guy has big head

and small facial features, like a person who is not well developed. It wasn't born, it was a complication of Crohn's disease.

What's the gut for.

In terms of absorption, the small intestine is the place to absorb protein, fat and most trace elements, and the main absorption function of the large intestine is water.

Many people feel constipated, so they refuel and drink water. They feel a little hiccup when they see anyone. As a result, he was still suffering from constipation the next day and wanted to look back.

This is the function of the large intestine. There are also some vitamins and electrolytes, which are the function of the large intestine.

The main sites of Crohn's disease are the terminal ileum and the right colon. That is to say, this thing is easy to get sick in large and small intestines.

If only the small intestine is affected, the patient has obvious malnutrition.

If only the large intestine is sick, because it causes the absorption of water, it is aseptic diarrhea. Because there is too much water in the intestine, the large intestine can't keep this slippery feces. It can't do without diarrhea.

When Stan's tyrant was in the medical treatment of tea vegetable hospital, he said he was uncomfortable without saying a word. He didn't say anything about the doctor's treatment plan at all.

In fact, people have seen it and treated it in many countries.

It didn't work.

In fact, the tea vegetable came to Zhang Fan for surgery this time.

But they didn't say.

After a set of treatment, Tu Hao handed the previous treatment plan to Zhang Fan.

"Well, you've had this treatment in France. Why don't you say it?" Zhang Fan is a little embarrassed.

"Maybe your level is high. Cure it for me and I won't have to operate!" The local tyrant's shrewd eyes flashed this light.

"Thank you. I will give you the best operation."

Zhang Fan looked at the other party and nodded.

"Oh, I know, so I came to you!"

People are really different from those who can bear it.

For example, some people, who have just made some achievements or are about to be promoted, but have not yet followed, happily publicize all over the world, and then find someone to hold a banquet to celebrate.

As a result

And some people, such as Stan tyrant, when dealing with him, you will naturally pay attention to others.

Money is on the one hand, and on the other hand, it is a kind of respect given to doctors by others.

"Look at me. I can eat roast camels in the robe of a horse and drink the spring water with gold foil. But I can't even control going to the bathroom... "

"Well, we will certainly improve. Don't worry."

Zhang fan can't take over.

Out of the operating room, several nurses chattered together.

"His robe is Hermes's!"

"My God, it's so beautiful!"

"Have you seen his bag, limited edition."

"All right, I'll stare at people's decoration all day and hurry to change the dressing. The alarm bell will ring." Zhang Fan shook his head and drove a group of little girls away.

"We should pay attention to the service quality!" Lao Chen looked at Zhang Fan's face and said this sentence for the first time.

"Well, I didn't want to clean up these little girls. After all, people who haven't seen them are curious. I heard that a local tyrant contracted a first floor hospital came. Who isn't curious. Just don't delay the treatment. After all, we are not private hospitals. "

The next day, the operation began.

This kind of operation is too time-consuming and must be done in the morning.

The local tyrant's Crohn has both small intestines and large intestine, which leads to alternating constipation and diarrhea.

Just like ice and fire, you can't touch the anus of diarrhea today. If you have constipation tomorrow, you can't wait to let the back door open.

That is, they don't use toilet paper and only use water. If they use toilet paper, they are estimated to have anemia due to wiping their hips.

Many people think it's not good to use toilet paper, and then go to buy a set of toilet in meatball country. This can reduce the incidence of hemorrhoids.

In fact, this thing is a fake advertisement made by xiaowanguo.

Why do they sell toilets and TV advertisements never say to reduce hemorrhoids?

In fact, after humans evolved to walk upright, hemorrhoids and intervertebral disc herniation are two diseases brought about by evolution.

However, the toilet aggravates the incidence of hemorrhoids.

Squatting is uncomfortable, but squatting will not cause hemorrhoids.

Sitting and defecating is comfortable, but sitting and defecating can lead to hemorrhoids because of the aggravation of abdominal pressure. Therefore, if you have hemorrhoids, in order to prevent recurrence, you can try squatting.

Moreover, squatting can't look at the mobile phone for a long time, because its feet are numb after squatting for a long time.

For intestinal surgery, the tea vegetable hospital has no special high-end surgeons except Zhang Fan.

Intestines belongs to general surgery, but now the general surgery department is divided into many sections, especially the more difficult the operation is, the finer the division is. In Marubeni, intestines doctors can be divided into several sections.

For example, some doctors in general surgery in China are engaged in gastroenterology, some doctors are engaged in liver and gallbladder, and some doctors are engaged in blood vessels or double glands.

There's a big difference. So don't look at Zhang Fan now with his liver and gall. Now there is a piece of

intestines with problems. Zhang Fan doesn't have a particularly excellent assistant.

What's Crohn's disease.

It can be said that it is a disease that can't be cured and can't die.

It is not only because of the poor effect of medical treatment, but also because of the difficulty of surgical treatment.

First you have to cut off a piece of intestines.

But the establishment of the intestine, regardless of the small intestine more than ten meters, each meter has its own function, and after changing the physical structure, the first thing to consider is that the patient will not have long-term severe constipation caused by surgery.

Also consider whether the patient will have to solve the problem of big hands after eating for half an hour.

Although some people have to go to the bathroom after dinner, the old man will scold the chicken belly.

In fact, this is not irritable bowel syndrome. What you pulled is not what you ate half an hour ago, but what you ate yesterday or even the day before yesterday.

This is just a problem with the mutual control of the brain and intestine.

But if the structure of the gut is changed, to be honest, whether the brain can continue to effectively command the gut and whether the gut can continue to obediently accept the command of the brain are unclear factors.

Therefore, this kind of operation is not easy to do.

In the operating room, look at the people who are going to operate today.

"Gastroenterology, we need to find someone!" Zhang Fan sighed.

With the help of Zhao Yanfang, Zhang Fan pulled the family from the laboratory to the operating table.

This kind of operation, from the beginning to the end of the operation, to tell the truth, doctors with inadequate technology may not be able to find problems in the operation.

Only after the patient has been operated, breathed and started eating will he know whether there is a problem.

After many of these operations, the doctor was complacent, and then after a few days, the patient was

allowed to feed liquid food. As a result, a bowl of rice paste had not been fed, and complete rice grains had flowed out from under the patient's buttocks.

Moreover, once this operation is completed, there is no chance to improve it.

Therefore, often after the operation, the immortal is difficult to save. That's the kind of operation.

Zhao Yanfang's family is a transplant family, so she is good at this kind of intestinal nerve.

Second assistant, Zhao Jingjin, although he is engaged in liver and gallbladder, there is no more qualified surgeon in the Department.

Three help, Zhao Zipeng! This is an anorectal.

That is, the captain of the chrysanthemum protection brigade in the tea vegetable hospital.

Although they belong to the intestinal tract, others make the lower three-way intestinal tract.

However, Zhang Fan still needs to rely on others' experience in intestinal tract and give some suggestions during operation.

Now ordinary surgery, tea vegetable hospital, can easily pull out several teams.

But the difficulty was a little beyond the outline, and the team immediately became a patchwork grass-roots team.

Therefore, Zhang Fan now particularly understands Ouyang's desire for talents.

it's too hard.

Disinfection, in terms of disinfection area, this kind of disinfection is estimated to be higher than that of whole-body burn skin transplantation.

The first is abdominal disinfection. The first layer of iodine tincture disinfection, especially in the eyes of the navel, should be taken special care of, because the original intestinal flora has long become a swarm of bees because of the use of various drugs. If you bring an ectopic colony from the skin surface, it will be more troublesome.

After disinfection of iodine tincture, alcohol deiodination. Then apply iodophor.

It's not over yet. We have to disinfect near the anus many times.

No one can guarantee how many intestines need to be cut off after laparotomy.

If you cut too much and can't connect, you can only rebuild the anus.

Therefore, when this kind of operation is started, it should be considered in the worst direction.

The more perfect you consider, the less passive you are in surgery.

Zhao Yanfang seldom has surgery.

In fact, she is mainly in the laboratory, mainly knowledgeable in theory.

Let her pull the hook and pull the strings. In fact, it's not a big problem.

However, if she was asked to make a deep abdominal hemostatic knot, it would be difficult for Lao Zhao's hands to tremble.

Can't let her help, otherwise she can't see the art field, she can't give Zhang Fan advice.

Therefore, Zhang Fan is also quite tangled in this operation today.

"It's hard to make money!"

In Lao Zhao's disgusted eyes, Zhang Fan didn't say disgusting words.

Chapter 1254

"You did a good operation!" Open the abdomen, enter the abdominal cavity, stop bleeding and expose the surgical field of vision. Although Zhao Yanfang's level in surgery can not reach Zhang Fan's best assistant, his position in the hospital is no worse than Zhao Jingjin.

Moreover, the surgical vision may not be inferior to that of Zhang Fan. After all, people have made an intraoperative evaluation according to how many hospitals they have gone through and how many difficulties they have given. If it is not for their bad character and the blow of emotional change, how can Zhang Fan and Ouyang pick up the leak.

It has been said that there are more deans of tea vegetable hospital than donkeys, but there is only one experimental instructor, and almost all of them can take all the experiments, from clinical to scientific research. They can take everyone and give everyone a hand.

To tell the truth, that is to say, he was born after transplantation. If he was a little special, he couldn't be the head of tea research.

Therefore, in the tea vegetable operating room, although people come less, they still have a high status. Moreover, her words to Zhang fan are very casual!

Zhang Fan is very disgusted with this kind of chat on the operating room stage.

But you can't be cruel to others. First, although women say that men and women are equal, they still have to take care of them. After all, men also have men's pride. Second, now hospitals treat people as donkey envoys, and they are embarrassed to speak stiffly.

In fact, the main reason is that people are women and do not contribute. Anyway, they also pay wages to this house.

But Zhang fan can't let her continue to say that this thing is a habit.

"Zhao Zipeng, why don't you take your surgery seriously? Look at you. What's the name of this hook? How did you take it when you were in your department? Was it the same when you were facing chrysanthemums?"

Zhao Zipeng is in a bad moment. Who the fuck am I provoking! How to pull the hook? Wang Zipeng rolled his eyes in his heart and quickly pretended to adjust the direction of the hook.

Most modern industries stress human rights, but in surgery, it seems that it is still relatively backward. Master said apprentice, said it, said it wrong, and said it wrong. Apologize? Is it possible? Maybe, but not much.

Moreover, just like a joke, the leader farts, and the leader says that his subordinates, you can't digest well, but you have to say, I didn't fart, and then when you are promoted, the leader doesn't want you. In a word, you can't afford big farts. What's the use of you!

Although vulgar, the surgeon's heart should not only be careful, but also broad. Moreover, Zhao Zipeng almost couldn't get into the surgery in those years. He entered the anorectal department and was oppressed by the director, but can he not be wide for people who bite their teeth and come out.

Moreover, surgery is actually the most particular about one duty. So when Zhang Fan was in a small hospital in a small county, he had a chance. Otherwise, in a third-class hospital, you were still thinking

about doing major surgery. When you can rush to suture is not certain.

In addition, Zhao Zipeng also knows that Zhang Fan is what he said. Can such a bold person have no brain!

Zhao Jingjin, hehe, smiled and said nothing, but patted Zhao Zipeng's hand.

Zhao Zipeng looked up at Zhao Jingjin. It didn't matter. He smiled and didn't say much.

Zhao Yanfang bit her lips. This kind of person has a high IQ. In fact, people don't understand EQ, but they don't want to agree.

Three Zhao on the operating table, like a mute, quietly cooperated with Zhang Fan's operation.

Zhang Fan's surgical style is too overbearing, which was slowly cultivated by Zhang Fan from rush surgery. Once people's habits are formed, it's too difficult to change them.

Otherwise, even rivers and mountains can change color, and character can't change.

Therefore, in the system, smokers suddenly quit smoking. If they hadn't been seriously ill, others would have prevented you. You can quit smoking. There's nothing you can't do.

No one spoke. In the operating room, there was the sound of ticking instruments and the collision of instruments measured by instrument nurses.

The intestines were slowly broken down in the sound of the electric knife. Although the intestine is coiled in the stomach like a snake, in fact, people's upper and lower parts are connected by the mesentery, which is full of blood vessels and nerves.

Because of the mesenteric link, the intestine will not become numb because of knotting.

If this thing turns into a twist, it can be said that people who can hurt roll in the end. If others don't say, it's just an intestinal obstruction, which can make people cry for their parents.

After opening the abdominal cavity, Zhao Yanfang's ability was shown at this time.

If there is no doctor Zhao Yanfang who is very powerful in biochemistry, physiology and cases, ordinary doctors often make a small opening at the place where the disease is most likely to occur.

It's like buying watermelon in summer. I know they are all cooked, but I'm still worried if I don't look at them.

Zhao Yanfang may not be very good at it, but her eyes are too poisonous. People can really see whether there is any disease. She can only express her ability. Zhang Fan always feels that she has a feeling of

hiding it.

For example, old man Lu can, but he can't teach. He can only read more books, read more specimens and feel more.

To tell you the truth, I feel it in front of a large intestine. Really, people who don't know think they are facing a large intestine and mustard.

This thing really can't be taught, because people's eyes can't see through, and everyone has his own opinions on subtle changes, just like the three brothers watching the lights in the first month.

"The cecum and colon are diseased." Zhao Yanfang touched her intestines as she looked, just like a blind man, touched her intestines and told Zhang Fan.

Zhang Fan also stretched out his hand to touch it. To tell the truth, about the sensitivity of his hand, Zhang Fan felt that Zhao Yanfang was not as good as himself.

But others can feel the abnormality, and Zhang Fan feels that the lymph on the mesentery nearby is a little big.

"Are you sure?" Zhang Fan doesn't believe it.

Because I didn't touch it!

"Sure, you touch it carefully. Do you feel it? The mucosa in the intestines has a slight feeling of eating braised fat intestines and biting fat particles?"

Originally, the intestinal surgery of the human body is often unable to completely clear the intestines. Moreover, because of inflammation, after opening the stomach, what comes to my face is a smell of Sao Qi and slight fever.

Now Zhao Yanfang asked Zhang Fan to recall the feeling of eating large intestine. To tell the truth, the doctors had nothing to do. The head nurse who had just entered the door rolled the throat and turned out again.

"Unexpectedly, it's disgusting to talk like a female surgeon ~!" The head nurse said to the middle-aged nurse who came across.

The middle-aged nurse smiled. She didn't know what the head nurse had just done, but hiccup saw it. The smile on her face remained unchanged, but she thought, "the head nurse has? Am I looking for my uncle? Tell me about the position of head nurse! "

In fact, when people eat fat Intestines on weekdays, people's chefs turn the fat intestines over. In other words, when you pick up the chopsticks and put them in your mouth, the surface is smoother than a

woman's skin.

This is not the outside of the large intestine, but the inside of the large intestine.

This large intestine is natural and normal without disease.

If you find that the surface of the intestines is bumpy and full of small bumps on the surface, the intestines will have disease.

The intestinal surface caused by Crohn's disease is actually like this, the original smooth surface, because all kinds of cells fight in this place.

They didn't decide whether to win or lose, but the battlefield had been destroyed like a middle-aged man with a pimple on his face. The large intestine was originally smooth, allowing food to swim freely in the intestinal tract like fish. It became like cutting corners when paving the road, with less asphalt.

Then the stone came out.

General inflammation often affects one or two layers of tissue, and more than three layers become cancer.

For example, the lesions of gastric mucosa can't be forced by *Helicobacter pylori* cattle. One third of the people in the world have *Helicobacter pylori*, but it is no longer cattle, that is, it makes trouble on the surface of gastric mucosa.

It is not it that causes the ulcer, it causes the destruction of the mucous membrane, and then the gastric acid corrodes the base of the stomach.

This is bacterial inflammation, that is, pathogenic bacteria can be found in the focus.

Crohn's is aseptic inflammation.

You can't find pathogens in the inflammatory lesions.

This thing is some cells with knives in blood vessels. They are drunk and go crazy in a restaurant.

The smashed restaurant is rotten.

Bacterial inflammation can be treated with antibiotics.

As long as it's not that kind of super bacteria, the effect is still good.

Aseptic inflammation, in addition to hormones, is anti immune salicylic acid drugs. To tell you the truth, the effect is average. It works well when you first use it. After a long time, it's like taking some drugs.

The amount of alcohol increases.

Therefore, only surgery is difficult to treat.

After confirming it three times, Zhang Fan began to cut the intestine.

The cut intestines can't be seen, just like the high loess slope with thousands of gullies.

There are undigested food residues in the grooves.

In addition to some foods that the human body can't help, such as *Flammulina velutipes*, the human body can't digest. When some people eat *Flammulina velutipes*, they swallow them in a hurry for fear that others will eat them.

As a result, when I was defecating, I looked back and saw that there were *Ascaris lumbricoides*. I was so anxious to pick this thing to go to the doctor. The doctor looked and said that I should chew and swallow carefully in the future.

The food in the small intestine can still see a little of its original appearance.

For example, a mouthful of rice, a mouthful of fried eggs with leeks, and then the appearance in the small intestine is about yellow paste attached to the fragmented leek leaves.

Like the food that the old man chewed when feeding his children before he died!

But the food in the small intestine doesn't smell.

Because there is no *E. coli* and no fermentation in the small intestine, some people don't like to eat the small intestine and feel that the small intestine doesn't taste like that of the large intestine.

It doesn't smell, but it looks disgusting.

After Zhang Fan opened it, he asked Zhao Yanfang to wipe it with gauze.

"Count, count, don't try hard. This is not a specimen! "

Zhang Fan deliberately said that you can wipe this as you wipe your ass, but the other party is a woman!

Zhang Fan doesn't care. This thing really can't use force. It's too hard. It's edema. Edema is not terrible.

But the terrible thing is that after the edema, it can't be sutured. It has to be sutured. After the edema disappears, it leaks back to the side.

Chapter 1255

When the intestines were abandoned, Zhang Fan looked at the intestines and had a little resentment against Li Hui. If the bastard hadn't always tempted himself to smoke when he was quarking, he wouldn't have smoked a cigarette in his life.

Smoking seemed harmless at first.

It's dangerous to drink. If you're drunk, it's easy to have an accident. But smoking doesn't seem to matter. Even if the sister has bad breath, the green arrow can still do it.

But looking at the intestines, not only Zhang Fan, but also Zhao Zipeng, who has not quit smoking, began to tremble.

Because Stan's local tyrant likes to smoke a cigar.

In fact, if self encouraging diseases are really controlled with drugs, as long as there is a reasonable treatment plan, patients can be controlled with good cooperation.

For example, there is a story in the Ninth Hospital of mordu that a patient has lupus disease, and her attending doctor is the same age as the patient.

The patient quite cooperated with his attending doctor. The doctor said not to expose his skin when the sun was strong. The patient never wore short sleeves or skirts again.

As a result, many years later, the patient lived well, and the doctor finally went to another world early because of abnormal sleep.

As for the life of local tyrants, people who can make a lot of money should have strong self-discipline.

But this one, cigars don't leave his hand.

Many people say that cigars are fine, cigars are not harmful, and cigars do not enter the lungs.

In fact, this is a lie.

There was a famous man who smoked cigars and took out oral cancer.

Because the oral mucosa can not only kiss, but also absorb.

The absorption of many drugs is often taken under the tongue, because this speed is the fastest and the fastest way to enter the heart.

For example, nitroglycerin is the kind of life-saving medicine installed in Chinese porcelain gourd.

Why not swallow it? It must be taken.

Because this way of taking makes the drug enter the heart the fastest, even faster than intravenous infusion.

Nitric oxide, carbon monoxide and various macromolecular substances in cigars can enter blood vessels through oral mucosa.

Then hit the blood vessel wall.

The intestinal blood vessels of patients like Crohn have long been a mess.

But he doesn't want to smoke a cigar.

As a result, the disease worsens and drug control has no effect at all.

Therefore, only surgery.

Zhang Fan threw away his intestines, which was just like a child peeling the coat of ham intestines. The metal at the top of the ham couldn't be removed, and the child was not stupid. He bit a small mouth from the side, and then pulled it with his small hand, and one of the ham was exposed.

And Zhang Fan's current operation is actually like this.

First make a small opening in the middle of the intestinal lesion.

Then in this small mouth, start holding scissors up and down.

How to diffract.

Scissors!

To stop bleeding, first ligate all the surrounding upper and lower blood vessels.

Ligating the black thread one by one is like burning the ring scar on the intestines with a lighted incense head.

The long pink white intestines are covered with black dots. It looks as if the pig's large intestine is covered with black worms, wriggling with the peristalsis of the intestines.

People who see it can't wait to pick it all with their hands. People with obsessive-compulsive disorder can be forced to die on the operating table.

Zhao Yanfang knotted Zhang Fan while touching the lesions on the inner wall of the intestine.

"Don't send all the diseased tissues that will be cut down later to the pathology department. Leave a section for me. I think our laboratory is alive."

As soon as Zhang Fan listens, this matter is not gossip.

"What?"

"This is an atypical Crohn's disease and we can study it further."

Zhang Fan was stunned. He thought that what else could be studied about this thing had been digested and studied all over the world. Since 32 years ago, many European and American experts have rushed here, and there were no results in the end.

It is also strange that this disease is not much in China. This disease tends to occur in European and American people. In Europe and America, this disease is particularly common.

"You don't understand!" This time it's Zhang Fan's turn to be defeated.

Zhao Zipeng originally looked with relish. He could see the taste of anus and intestines, not to mention the small intestine and large intestine.

But when he heard that Zhang Fan was wronged, he immediately raised his head and looked at Zhang Fan.

This is not provocation.

This is a step for Zhang Fan. Let Zhang Fan say a word to step down.

Sometimes people can succeed or stand out in a group of people. It's really not for nothing.

If it was someone else, even if he didn't laugh, he might lower his head and look like I didn't do anything.

And others, directly to Zhang Fan steps.

This is the ability.

Zhang Fan smiled.

The operation was slowly cut along the intestines.

Intestinal solution is mixed with mucus secreted by infection.

Enteric solution is slightly thicker than saliva.

The fluid secreted by infection is similar to yellow phlegm.

And because of the secretion of intestinal flora, green liquid appears.

There is also the destruction of intestinal mucosa, in which blood is also mixed.

Zhao Yanfang took a piece of gauze and Zhang Fan cut one centimeter. She had to wipe one centimeter.

Darling, even with a mask.

You can also feel an extremely disgusting smell.

It's like a herring can being trampled to a paste, and then falling down with its nose close to the paste.

Absolutely uncomfortable.

How to say this feeling, just like a man entering a woman's bathroom.

It's not only smelly, but also a rather unpleasant taste.

After wiping, pieces of gauze were used up and quickly put into the tissue bag for sealing.

"It's a little long. I don't think the length of the intestine is enough." Zhang Fan looked at the small intestine and large intestine and was a little scared.

This kind of operation, to be honest, is too simple.

Holding scissors is like eating braised pork intestines. Just cut them.

The difficulty is the later contraposition suture.

Although the large intestine and small intestine are intestines, the effects of these two gadgets are different, resulting in different tissue structures.

For example, many people like to eat large intestine. Why, not only does it have a slight odor, but also because the large intestine is soft and rotten.

The small intestine is different. It costs teeth.

Because after gastric acid rushes out of the stomach, the first thing to enter is the small intestine.

Pancreatic bile rushes out and enters the small intestine first.

They have a neutralization reaction here. However, acidic and alkaline liquids become neutral liquids.

Therefore, the small intestine should be thick.

The large intestine is different. The large intestine is much thinner for me first, and it is quite thin because it needs to absorb water.

This thing, if the acid and alkali directly enter the large intestine, the reaction has not been completed. It is estimated that the large intestine can be corroded into holes first.

Even if it is not corroded, the length of the small intestine is too short, which can lead to large intestine injury.

This is called stump cancer.

Like gastric cancer.

Many people know that as long as the lesion is cut off, patients with gastric cancer can often survive for a long time.

Five years of survival is the beginning.

Some even haven't had a problem for 30 years.

But some doctors finished gastric cancer, the patient had stump cancer in a few years, and then hung up.

This situation is sometimes the problem of doctors' surgical techniques.

Therefore, Zhang Fan looked at this section of the intestine a little worried.

If you say, ordinary doctors may pull it and sew it together. It's not intentional, because sometimes if

there's no way, the body can only make up for it.

For example, after a fracture, the steel plate was sewn tightly. After taking a film, the layman looked at it and said, darling, the operation was well done. It was like sticking a steel plate without a fracture.

And the insiders smiled and became unknown. Because this method damages the bone so much that the periosteum on the bone is scraped clean.

What is the periosteum? Bones eat by this thing. Blood vessels and nerves pass through the periosteum.

Therefore, without the periosteum, the bones that could grow well in 100 days would have to be half a year. It's all good luck. If you look at it in two months, the bones will shrink.

When the intestinal tract is pulled and sutured, patients will have a high probability of cancer and stump cancer.

But if you don't pull it, after loosening the intestine, it will increase the injury in the patient's intestine, and the patient will have prone intestinal obstruction.

This aggravated damage may not be able to do well sometimes.

The difficulty of operation has increased a lot.

Therefore, one is that there will be hanging diseases. If the stump cancer comes out, there will be no chance to cut the intestines again.

It can increase the injury and reduce the injury, which will cause the patient to hit the ground painful intestinal obstruction from time to time.

To tell you the truth, this choice is really not easy.

In this case, ask the patient's family, and there are few that the patient's family can understand.

Ask the patient what happened to the patient.

What to do? It's up to the doctor to choose.

"Continue stripping!" Zhang Fan bit his teeth.

"No, let me see." Zhao Yanfang stopped Zhang Fan.

Zhang Fan glanced at Zhao Yanfang.

"Let me see, let me see." Zhao Yanfang frowned and thought carefully.

Zhao Yanfang's eyes lit up when Zhang Fan and his family were ready to continue their decomposition.

"Ice, warm water, come on."

The operating room is always carrying distilled water and ice frozen with distilled water.

The itinerant nurse came quickly with ice and warm water.

Zhang Fan looks at Zhao Yanfang.

Not only Zhang Fan, but also Zhao Jingjin don't understand, let alone Zhao Zipeng.

"I read a case paper on bjm. The paper said that the small intestine will develop easily at minus 15 degrees Celsius, while the large intestine will slowly extend when the temperature exceeds 40 degrees Celsius.

The small intestine is composed of annular orbicularis muscle. It has four layers. After freezing, there is a temperature difference between the four layers, which will make the link side of the tissue longer! And the large intestine... "

Zhang fan understands this truth.

However, intestinal tract is not afraid of knife cutting or needle pricking.

But this thing is particularly sensitive to pull and temperature.

During abdominal surgery, senior doctors often say, be easy, be light, and don't pull.

If you are not careful and pull too much, the intestinal tract will often lead to heart failure.

The temperature is the same. When washing the abdominal cavity, it is often about 37 degrees of water.

The simplest thing is to swallow a hot ball in one mouthful, and then it hurts from the tongue to the stomach.

So, this method is really dangerous.

"If you can guarantee that the suture will be completed within three minutes when the temperature changes, I don't think it will be necrotic.

Tissue cells will not necrosis in such a short time.

Now let's see if you can finish stitching in three minutes. "

Zhang Fan nodded.

Then gently groped with your fingers along the intestinal ring, and estimated about how many stitches it would take to complete the suture.

Lao Zhao and Zhao Jingjin looked at the head of the large intestine and the head of the small intestine and gently shook their heads.

It's too difficult.

Zhao Zipeng looks at Zhang Fan!

Chapter 1256

Looking at the broken ends of the two large intestine heads, Zhang Fan sighed deeply as if he had been hit by a shot put and a chicken bleeding from a tube into a flat. This thing is too difficult to say. It's simple to say.

Stitching is very difficult. In the past, there were three difficulties.

The first difficulty is arterial suture. In the early years, arterial suture was relatively difficult. This thing took a short time and required high requirements. People who did not sew for three times hung up. Therefore, the requirements for doctors are relatively high.

The second difficulty is nerve suture. In the past, the equipment was poor, and the difficulty of suture was much lower than that of artery. After all, nerve doesn't bleed!

But it's different after suture. You can see whether the blood vessels leak or not at that time.

But the nerves are different. We can't see them until they recover for several months. They often grow into neuromas without efficacy. Patients with pain smoke one by one, just like Nicholas Zhao Si's face.

The third difficulty is gastrointestinal suture.

Now there's another facial suture. In the past, facial sutures and other things could be thrown to disciples to practice. Not now. If the sewing is not good, the patient has to work hard with the doctor with a knife.

Of course, this also reflects the progress of the country. Otherwise, the people can't eat enough. Who wants to worry about whether there are scars on their faces.

Now the research and development of surgical equipment, especially the improvement of microscopic equipment, and the suture of nerves and vessels are not as difficult as before.

There's no need for doctors to grab a dog and break his leg, and then find a way to sew and practice. The yellow dogs on the street ran crazy when they saw those in white coats.

But gastrointestinal suture has made little progress since 30 years ago.

Because the human body is strange. For example, cancer, as a saying goes, the outcome of inflammation is either cure or cancer.

Another kind of cancer is metaplasia.

This thing, how to define it, is that a mature cell wants to become another mature cell.

And this change is often at the junction of two organs. In short, it's like a man who was raised as a girl when he was young. When he grew up, he felt that he wanted to change, and then had an operation.

To tell you the truth, once you change, you have everything you should have. The tube becomes a hole, but life is consumed and the body is hollowed out. He was young and hung up early.

The same is true of cells, especially at the junction of organs and organs. Not only do people want to become another gender.

The same goes for cells.

But this change is often controlled and determined by innate genes. If you want to change, you are equal to fighting the whole body. You are rebellious.

Body organs can let you go?

All kinds of immune cells come directly with guns and guns. This is inflammation. When it comes to fighting, it's all kinds of pain.

This kind of inflammation almost starts quite frequently when people are over 30 years old. From time to time, there is an ulcer or something inexplicably, such as oral ulcer.

Especially in some specific age groups, such as 35, 49 and 74, outbreaks are particularly frequent.

According to the old folk, the king of hell didn't ask himself to go in 74 and 85. In fact, the decline of human function is not linear. This thing is jumping. From 30 to 35, the decline rate was slightly faster than that in his twenties.

But not much.

But at thirty-five, he went straight down the cliff, then slowly down again, and at seventy-five, he went down the cliff again. For example, in his early thirties, he can run seven times a night. At thirty-five, he is chased all over the ground by his young wife.

Before the age of 70, you can stand and pee your upper, but after 75, it's often difficult to take it out. It's a hero not to pee your crotch!

This is a sign of a marked decline in function.

The obvious decline of human function often leads to the decline of immune system.

Then the immune cells suddenly failed to fight these rebels who wanted to rebel and turned into other cells.

At this time, the rebellious cells appear metaplasia and want to become other cells.

As a result, the transformation failed and turned into cancer.

For example, the cancer of the orifice at the junction of the esophagus and stomach occurs mostly in people aged 35.

For example, the junction between the cervix and the guide, cervical cancer.

Duodenal gastric cancer at the junction of stomach and intestines is a high-risk population, that is, people aged 35.

There are also places where hard bone and cartilage connect, and there are bone cancers caused by this metaplasia.

Therefore, most cancers, especially malignant cancers, often occur at the junction between organs.

People want to change sex, just like cells want to metaplasia, the outcome is not very good.

Just as the taste of eating large intestine is obviously different from that of eating small intestine, meat and meat are different. It's too difficult to change.

The same is true of intestinal suture. If the suture is not good, the cells connecting the large intestine and small intestine would be restless. If the suture technology is not good, the cancer will not run away.

Therefore, there are too many steps for Zhang Fan to suture the intestine.

First, polish.

That's right. Polishing is the same as repairing a broken inner tube of a bicycle wheel. First, polish the broken place to make the edge of the rubber surface hairy.

Then you can stick it firmly.

The suture between intestines is almost the same.

First, destroy the capillaries at both ends of the intestine, not the large blood vessels. The big blood vessels are destroyed and the intestines are directly necrotic. Please.

After the capillaries are destroyed, their tissue structure is destroyed.

Then suture. When they heal, they will discuss with each other and finally reach an agreement to form unified cells and blood vessels.

If the microstructure is not destroyed.

After suture, the small intestine grows and the large intestine grows. Finally, two different cells appear in the same place, and then you don't have to think about it. After time of fermentation, this thing becomes metaplastic cancer.

Moreover, it is catalytic. For example, if there is an ulcer in the mouth, the doctor said not to smoke or drink.

The patient promised face-to-face and ignored him. He should drink and smoke. He also said that my grandfather lived 99 years smoking and drinking.

Then, when tobacco and alcohol stimulated, the festering cells and blood vessels didn't think of metaplasia. As a result, they were seduced and changed. Those without cattle also had cattle.

Suture is another kind of catalysis.

Therefore, this kind of suture of small intestine and large intestine needs considerable attention.

Like a craftsman, Zhang Fan rubbed between his two intestines for several minutes.

Zhao Yanfang is going crazy.

Because Zhang Fan rubbed too much.

Although she is not married, she has been in love.

Looking at Zhang Fan's technique, she seems to think of something

In fact, Zhang Fan's mind is simulated in the system.

"No, it's overtime!"

"No, my intestines are rotten!"

After trying again and again, finally, Zhang Fan opened his eyes.

If it weren't for his bright eyes, head coach Zhao really thought Zhang Fan would become a sage.

"Can you ensure that there is no intestinal necrosis within three minutes of freezing, and that the intestinal tract can be extended?"

Zhang Fan stares at Zhao Yanfang. Where is the sage? It's clearly the look of the downhill tiger. It's going to eat people.

Head coach Zhao is quite strong against Zhang Fan on weekdays. Moreover, Zhang Fanning knows that his scientific research is not very good, so he is a little reluctant to head coach Zhao.

But now, with big bright eyes and obviously strong male lion like perseverance. The head coach Zhao was stunned.

"Yes! But you have to be fast. "

"Don't worry, I'm fast enough. Start! " Zhang Fan has operated a successful suture method in the system.

Medical treatment has a template when it comes to ordinary diseases. Collect the medical guidelines of various departments compiled by major experts every year.

In fact, it is to tell the doctor what is the latest and best treatment for common diseases. You don't have to grope by yourself. I told you.

But at the high end, let alone the guide, even if the doctor who compiled the guide came, there may not be a unified treatment.

Therefore, the more high-end the doctor is, the more attention is paid to the differentiation of personal treatment.

Zhang Fangang spoke. Lao Zhao and Zhao Jingjin grabbed Zhang Fan's hand with sterile gloves.

"Think twice. The time is too short and the difficulty is too high. Once this frozen suture begins, there is no turning back. If there is necrosis, there is trouble. "

"Well, I see!" Zhang Fan looked at Lao Zhao and nodded.

Lao Zhao obviously disagreed.

Zhang Fan added, "don't worry, I'm sure. You have to help me. Dr. Zhao is still a little lacking. "

"OK! Go all out! " Now that Zhang Fan has decided, Lao Zhao will help the field even if he doesn't agree.

This is the surgical team.

Zhao Yanfang wanted to talk, but didn't say it!

Heaven has a good reincarnation. Who has heaven spared!

She despised Zhang Fan before, but now she is despised by Zhang Fan. She can't explain it!

Frozen ice and heated warm water, the patrol nurse took them to the operating table and handed them over to the instrument nurse without contact like a handover bomb.

Freezing begins.

When ice is put into the small intestine, warm water is close to the large intestine.

Zhang Fan and Zhao Jingjin are like demacia hiding in the grass. They wait for each other to hand over their skills and come out of the grass with a Hallelujah.

The frozen small intestine is like a snake molting.

The outermost layer shrinks slowly and the inner three layers stretch out slowly. If this thing fast forward, it's really like a congested chicken. It's no exaggeration at all.

The large intestine was originally broken like a pocket under the application of warm water, which widened the opening.

Even the originally ischemic and a little stiff tissue has changed with temperature, and the color has become pale and soft.

"Start!"

Zhang Fan quickly polished the broken end of the large intestine with gauze.

Instantly, the two broken ends seem to be rubbed red

It's starting to get a little congested and edematous.

Micro tissue destruction completed!

That's the effect.

Start stitching!

Zhang Fanyi holds a needle and a toothed forceps in one hand. The tray of the instrument nurse is full of needle holders hung with sutures.

This kind of stitching can't keep up now.

Zhang Fan's suture was fast. It felt as if he had directly inserted the needle into his intestines.

Lao Zhao, with his hands knotted, danced like Jiu Mozhi playing with the six pulse divine sword.

Zhao Zipeng took the scissors and cut the thread.

At this time, no one can make mistakes.

Intestinal suture, layer by layer from inside to outside.

Once you make a mistake, you often have no chance to sew again.

Four people on the operating table dare not breathe.

Chapter 1257

Zhang Fan also has his own style for the requirements of surgery.

Because his accuracy and hard work have been honed in the system to a certain extent.

Therefore, ordinary surgery often requires that there is no blood in the operation field. It can be said that even among the several elder martial brothers, there is no cleaner operation than Zhang Fan's operation field.

In the words of master brother Zhou Hongyi, Zhang Fan has abnormal requirements for surgical vision! In fact, this is also the pot of the system. The surgical simulators given by the system to Zhang fan are all surgical fields without blood.

Over time, Zhang Fan operated in reality and felt that the operation here should be the same as in the system.

Of course, ordinary doctors can't do it, but Zhang Fan is different.

But today's operation, if according to Zhang Fan's previous operation style, he is directly bloody and rotten.

The head of the large intestine and small intestine, when sutured and turned over, the blood danced. Although it didn't seem like rain, it could occasionally throw up one or two blood beads.

It's not that Zhang Fan doesn't have time to stop bleeding. It's really troublesome to bond the two ends.

Take people for example, men and women have no problem with short-term kissing, as long as they look at each other.

But even if there is a very close relationship between men and women, you let men use women's toothbrush, or let women use men's toothbrush. See if it's OK. For a reason, so are these organs.

Although everyone is a comrade in arms in the trench and drinks the same tube of blood, in fact, although the two sides hold hands and the meat is next to the meat, once they cross the line, they must let the other party know the depth.

Therefore, it is quite difficult for Zhang Fan to sew.

Like tying a pocket, the city people probably don't know this way of stitching. Growing up in the countryside may understand.

After harvesting grain every autumn, the sack made of linen is the kind of sack filled with grain, leaving only a little mouth. It should not only be tied tightly with rope, but also ensure that it can not slide when moving.

If time is not considered, this kind of suture can be done by many people. After more than ten years of governance, they can sew beautifully and perfectly.

Definitely not the kind of condom that deliberately pierces a few holes.

But if this kind of suture can be done in three minutes, it is estimated that the world will be the leader, not to mention China.

This thing, sometimes the world is too cruel. The more you get to the top, the more you pay attention to talent.

With high-speed operation, Zhao Jingjin knotted his head with sweat,

The knotted wrists are starting to sour.

For many years, Lao Zhao finally realized the wrist pain brought by the left and right spiral.

It's Xiao Zhao. Zhao Zipeng is not very tired. Anyway, just stare at the knotted hands. He leaves his hands. Xiao Zhao will be finished with a click. Don't cut the intestinal wall or the end of the thread.

Just like the deadly golden scissors, anyway, it's clicking. Looking at Lao Zhao's trembling wrists, Xiao Zhao finally understood a word. There are really tired cows in the world. There is no dry field. It's really easy to clip scissors!

One circle, one circle, just like taking the ring subway, there is no thick pipe, which makes Zhang Fan really work hard.

Ligation, closure, hemostasis!

Zhao Yanfang holds ice in one hand and warm water hot compress in the other. She enjoys the double sky of ice and fire. One eye is staring at the timer and the other at Zhang Fan's hands and tube. She also wants to remind Zhang Fan at the time node.

To tell you the truth, it's too difficult. It's not so thrilling to follow her Master Lao song tou for transplantation.

Moreover, she put forward the plan, and the pressure in her heart can be imagined.

One hand is cold, just as time is coming to an end and the intestines are not closed.

One hand was warm. When she saw that the color of the intestines was still pink and hadn't turned black into agaric, she could be more secure in her heart.

A minute and a half, "it's half past!"

Zhao Yanfang took the time to look at Zhang Fan's face.

She has no bottom herself. She wants to see if she can see some information from Zhang Fan's face.

People, especially wonderful, like fortune telling, often many people go to fortune telling with answers in their hearts.

Then spend some money to let the other party say what they think and they don't want to admit it, as if they can confirm it when others say it.

But this time, Zhao Yanfang is really bottomless. She hopes to see Zhang Fan's expression and give herself some comfort.

As a result, Zhang Fan, who was wearing a mask, had no emotion except for his bright eyes. It was like he didn't hear the time reminder. Let alone his eyebrows. He didn't even move his eyebrows.

Zhao Yanfang wanted to remind him again, but looking at Zhang Fan's black and bright eyes, he seemed to eat people, so he didn't speak again.

On the edge of the operating table, the instrument nurse Bayin refuelled the needle. To tell the truth, the girl is usually careless and heartless.

But people's technology in the operation is almost the same as that of the head nurse in the operating room. Moreover, because the little girl is young, she is threading needles and even depends on the speed of her hand. Her work by eyes has surpassed that of the head nurse.

After all, the profession of nurse, especially the nurse in the operating room, is often the peak in her twenties. After 35, like female stars, the road is getting narrower and narrower.

The itinerant nurse and anesthesiologist stretched out their neck and tiptoed into the operating table. They wanted to see the results and were afraid to disturb the doctor's operation. It was like a dead auto show. The uncle ran at a BMW and tried to bend down and pick up the tickets to see what color the chassis of the luxury car was. They were deeply afraid of meeting acquaintances and saying they were not ashamed. They were as evasive as peeping.

Zhang Fan, Zhao Jingjin and Zhao Zipeng, the captain of chrysanthemum protection, can't take care of time at this time.

This thing didn't turn back at the beginning.

Now, even if there is not enough time, can you tear it down and not sew it up?

Therefore, the great God of surgery in ancient times said a word.

Before the scalpel was pulled, the doctor was like the Duke's wife, a lady or even a queen.

But once the scalpel is pulled, it succeeds. The queen can be the queen. If it fails, she becomes a slut. God can't help it.

Therefore, now Zhang Fan and others are running in the direction of one step emperor and one step slut.

If you run fast, even if you walk out of the operating room with your stomach and crabs, you can make people say a word, a knife.

Running slow

So, at this time, where can we take care of time? Zhang Fan hates that his two feet will fork his fingers to sew with a needle holder.

Suture, the inner layer of the intestine is good, and the outer layer is good.

The middle layer is different, because freezing causes the upper layer to shrink and the lower layer to stretch out.

The inner layer should set the tone, and the middle layer should follow the tone.

Often it is either a strong part or a short part. It's like an apple bitten by a person with rotten teeth.

In two minutes, Zhang Fan finally stitched to the outermost layer.

This highly stressful operation is definitely more tiring than ordinary operation in three minutes.

For example, routine appendix surgery and gallbladder surgery. Zhang fan can do it easily without sweating for a day.

But this kind of operation can come at most once a day. If it comes more, whether it succeeds or not, people are directly like a big cock among a hundred hens, or the kind that is kept in captivity and can't

run away, and the crowns on their heads are drooping.

Finally, when the minute hand of the long leg was still hesitating at the middle interval, Zhang Fan's suture was completed.

"Come on, remove the ice and invigorate!"

Zhao Yanfang waited for this sentence. After quickly removing the ice, she immediately took the warm normal saline and quickly poured the normal saline into the interface between the small intestine and the large intestine.

Then, for the first time, grasp the two ends of the broken end just sewn with both hands, turn the suture mouth to the frozen side of the small intestine and start rubbing.

Zhang Fan was scared to death and his eyes were about to burst.

Generally speaking, he did this kind of work himself. Unexpectedly, Zhao Yanfang did it. He's really worried about the other people.

Although this thing looks like a small job, if it doesn't work well, it will crack the suture with three rubs and two rubs, and he has no place to cry.

As a result, Zhang Fan was relieved after Zhao Yanfang and coach Zhao began to operate.

"Girls are more suitable for this job!" Lao Zhao, Zhao Jingjin also gasped for air, and then said to Zhang Fan.

Zhao Yanfang didn't have time to talk, but she glanced at Lao Zhao.

Lao Zhao was a little embarrassed. He seemed to understand something. "I said it was a girl's gentle hand."

"Well!"

Zhao Zipeng and Zhang Fan didn't pay attention to this explanation. As a result, they both looked at Lao Zhao.

"No, I mean, director Zhao is highly skilled!"

Lao Zhao is like slapping his mouth to let you talk when you are idle!

In fact, this is very simple.

It is to pick up the frozen intestines with both hands and, under the lubrication of warm normal saline,

start from the proximal end, slowly knead and knead while rubbing towards the distal end.

And not again.

It has to be repeated many times. If the head direction is said to be high and the feet are said to be low, the lying Stan tyrant's intestines are actually rubbed up and down in Zhao Yanfang's hands.

Moreover, the most embarrassing thing for Lao Zhao is that because of the lubrication of warm saline, there will be a voice between the intestines and Zhao Yanfang's rubber gloves that makes women blush and men want to hear.

This kind of sound, especially like the air in the sausage with plastic gloves when filling the sausage when cooking at home.

Lao Zhao probably wants to be that way!

Of course, he also hopes Zhang Fan and Zhao Zipeng think so.

After about ten minutes of activation, the temperature of the intestinal canal finally came up. The original pale gray white slowly turned ruddy.

Because of the skillful and gentle manipulation, there was no edema in the intestines. Because the blood vessels were unblocked, the intestines were not congested and swollen. At present, it seems that the operation was successful in blood vessels.

Because at the time of the operation, Zhang Fan was against Zhao Yanfang. Zhang Fan wanted to ease the relationship, so he said, "yes, director Zhao's technique is still powerful."

"Well!"

It's Lao Zhao's turn and Zhao Zipeng's turn to see Zhang Fan.

Zhao Yanfang ignored Zhang Fan.

Chicken, Zhang Fan doesn't think he will boast on the operating table in the future.

"Enema, look at the side leak!"

Zhang Fan quickly said to the itinerant nurse.

The itinerant nurse brought me a smile and came over with a pillow enema.

The enema bag is definitely slightly larger than an ordinary pillow, and this is not a child's, or a pillow for fat people.

Hang it on the infusion stand, then take out the infusion head, and the itinerant nurse gets into the surgical cover and puts it under the patient's towel.

Because the number of operating tables is sterile, they can't be opened and can't be higher than the surgeon's waist.

Therefore, the itinerant nurse can only squat and get under the towel.

The size of the towel is the same as that of a double bed on a single bed.

The itinerant nurse dived in, just like into the quilt.

Holding the infusion head, the itinerant nurse said.

"I did!"

"OK, plug in!"

Zhang Fan, Zhao Jingjin and Zhao Yanfang held a piece of gauze. It was like picking up something with a white paper towel. The three people surrounded the broken end of the suture with gauze.

Another nurse stood on tiptoe, grabbed the enema bag with both hands on the pillow and squeezed it hard, just like a man who has been hungry for three days pinching steamed bread.

Because the pressure is not enough, if you don't pinch it, the enema liquid approaches too slowly.

With the entry of enema liquid, the gas in the intestine first runs from below to above, Gollum!

It's like summer and dead house water.

Finally, the enema liquid passed through the large intestine and slowly flowed through the suture broken end.

Zhang Fan waited as if there was no exudation.

Then pick up another piece of clean gauze and gently wipe the broken end of the intestine.

Take a closer look, "yes, there is no leakage!"

With these words, Zhao Yanfang was relieved at last.

The next operation is much faster.

"What did you just say? What skills do I have? " Zhao Yanfang looked at Zhang Fan who was closing.

"Well, nothing!" Zhang Fan was slightly embarrassed and scolded his mother again. "I didn't say it alone. Lao Zhao also said it. Why do you ask me alone!"

"I have some ideas about this Crohn. You have to match me and give me money. I want to set up an experimental project team. Tea vegetarians have always wiped your ass. at least I'm a little famous doctor of medicine, okay.

It's been a long time since I got any results! "

"Well!" Zhang Fan not only scolded his mother in his heart this time, but also had reluctance on his face.

Can't this person be more honest when dealing with people? It's a virtue passed down from ancient times to the present.

A person with such a high diploma really doesn't study in vain. He will really pick the time to ask.

Zhang fan can't refuse.

"How much do you want? You can't have too many people, especially not many doctors. If you want more doctors, you have to stop other projects."

"Five million starts, the more the better. I'll find someone myself! But the laboratory should have one for me! "

Zhang Fan is almost crying.

This is so cruel.

Several laboratories are used by other project teams in rotation. She opened her mouth and asked for an exclusive one.

Zhang Fan said, "you look so beautiful."

"Money can also be discussed. It's special for the laboratory. Absolutely not. You can't kill me!"

Zhang Fan refused without hesitation. Put a face on your nose.

"All right, five million! I'm in charge of the laboratory anyway! "

"Well! I said, "shall we be honest in the future?"

"Is that ok? Aren't we honest? "

Zhao Yanfang looked at Zhang Fan innocently!

Chapter 1258

According to the length of this operation, this operation is not a super long operation. Not to mention anything else, even the time of general gastrectomy is not comparable.

But this operation is more unexpected. There are more small intestines and less large intestines. The spirit is as tight as marshal Jin's pants and belt. It is not only tight, but also mentioned above the navel and almost to the chest.

After cleaning up her intestines, Zhao Yanfang was just about to relax and take a comfortable breath. Zhao Yanfang was caught off guard in the dark.

Zhang Fan regretted that he didn't speak during the normal operation. It cost five million to speak today. It's not too much to say that his lips are inlaid with gold.

I don't know the price of firewood, rice, oil, salt, soy sauce, vinegar and tea. Now that I'm in charge, I should not only think about making so much money, but also think about how to save. To tell you the truth, it's really annoying.

Zhang Fan watched Zhao Zipeng push the patient out of the operating room and send him to the ICU. The current ICU of catechin has also begun to separate.

In the past, when the emergency department became the emergency center, especially when Xue Fei became the deputy director, everyone looked at it as a joke.

As a result, Xue Fei followed Zhang Fan, there were planes, and there were emergency operating rooms. More than 10 emergency operating vehicles stopped at the door of the emergency center.

To tell you the truth, even in the northwest, there is no such a heroic parking lot without talking about the frontier.

In Xue Fei's boastful words, if our emergency center goes out independently, it can become a third-class hospital!

Although these devices are not personal, more devices can attract doctors, and more doctors can receive more patients.

The salary of the hospital is divided according to the professional title and working years, but the bonus is not. Seeing that the emergency department, which used to be many yards worse than the ICU, has now become a pastry. Income strides ahead.

The ICU doctors can't sit still.

Lao Huang, the director of ICU, was born in respiratory medicine in the early years. Later, with ICU, he became the director of ICU.

Originally he was not born in a professional ICU. Now the hospital is developing so badly. Sometimes, Lao Huang is a little afraid of patients except breathing.

This makes some new doctors from ICU unable to see it. Everyone mutters!

Old Huang feels bad, and so does the new doctor.

Finally, we had a meeting and separated.

Anyway, the new building of the hospital is large enough.

Then, ICU is divided into burn intensive care unit (bicu). Relying on Professor Li Cunhou in the capital, this department has become a business partner with other people's moderate burn ICU and burn science and Technology University.

There is also the respiratory intensive care unit (RICU), which was built with the assistance of Marubeni. Now it is the heart of Lao Ju. Looking at the old house running towards this department 70 or 80 times a day, when it's all right, go to the respiratory intensive care unit.

Zhang Fan suspects that the ICU is breaking up. Is it behind the old house.

Neonatal intensive care unit (NICU), obstetric intensive care unit (OICU), pediatric intensive care unit (PICU), family and obstetrics and Gynecology, pediatrics have become a trend.

The Department of gynaecology and pediatrics of the tea element hospital were originally a flower in the border areas. Even LV Shuyan now walks in the hospital and straightens up her small chest. He is

now the academic responsibility of five departments.

Although there was no grade, it was almost a vice president in the past.

The direct effect of this self combination is that all systems are connected from eugenic education to child birth.

If there is a problem, you don't have to go out of the maternity operating room and directly send it to the corresponding relevant department from the operation.

After subdivision, the treatment is clearer and faster. This is what Zhang Fan likes to see. Originally, there were many doctor-patient disputes in gynecology and pediatrics. Now, first of all, many children's parents waiting for the outbreak have lost their irritability.

Internal medicine ICU (MICU), Cardiac Surgery ICU (csicu), CCU (coronary heart disease ICU), Renjia and Ren Li's Department of Cardiology and cardiothoracic surgery have become a group. The direct effect is that patients with myocardial infarction don't have to wait in line with patients bitten by dogs.

Of course, there are both advantages and disadvantages.

The disadvantage is that the tea vegetable hospital has developed slowly, and some disciplines have become small and transparent.

For example, the nephrology department is not good at all, and the nephrotic intensive care unit (uicu) is even worse. There are no two birds every day.

When I met a patient, the doctors and nurses were enthusiastic and wanted seven or eight doctors to turn around a patient. Especially when patients come to the door, the original two minute consultation time of the Department can become half an hour.

Not only ask the patient, but also ask the health of the patient's family, "urination is not abnormal. I get up several times a night."

The patients are hairy.

But this kind of unit in the hospital, not other units, has poor benefits, and it will be over if it is cut. Just as people say that China Hospital, you don't even have an emergency department. What are you called the top three! I don't want to be my business, but you can't do without it.

Therefore, Zhang Fan sometimes has a headache. This division is not simple. We can divide the tables, chairs and benches.

This division requires investment.

Millions of equipment lie in the empty ward, and Zhang Fan's flesh hurts when he thinks of it.

In the operating room, they also set up an anesthesia intensive care unit (AICU) and a surgical ICU (SICU) with the surgical department.

Now nominally, Lao Huang is the director of ICU. In fact, the small heads of each small department have calculated the cost separately and reported the financial report separately.

The old yellow man is honest. He is in the name of the director and has no reality of the director.

Of course, to tell the truth, China's transitional treatment is also excessive, especially in anesthesia intensive care and surgical town care.

In the past, ICU had no beds and patients had to wait.

Now there are too many vacancies in ICU in many departments. These surgical goods began to send patients. appendicitis?

Send!

What did the leader say when asked?

That is, appendiceal perforation, serious infection, there is a probability of systemic infection, leading to systemic poisoning symptoms, and there is a probability that it will become bacteremia!

Bacteremia what disease, minute by minute deadly disease!

A group of big Lords have even figured out countermeasures for the heckles of their superiors.

If you meet a layman Dean, you don't know when he was sold by the people below. When he committed the crime of dereliction of duty, he doesn't know what he did!

Therefore, Zhang Fan had a black hand for some time. He punished you directly and fined you a bonus. If one month is not enough, he will punish you directly for half a year, which will hurt your flesh.

In fact, only with a good system can there be a good industry. It depends on high integrity. Why don't you tease the dog with meat buns.

Of course, to tell the truth, whether it is the former comprehensive ICU or the ICU of each separate small department, the price of this thing is really expensive. It is not that the hospital asks for the price indiscriminately, mainly because the cost is too high.

Lying next to the ICU and looking at the surrounding instruments, not to mention the instruments, even if you count the various consumables of the instruments, you feel that they are more expensive than

driving a luxury car for maintenance.

Moreover, there is also a doctor who has been trained for ten years and a one-to-one nurse.

Of course, Stan's local tyrant doesn't matter. If the local tyrant didn't wake up now, Zhang Fan wanted him to contract the vacant beds.

After all, tea is not the capital, not the magic capital. There are fewer patients with difficult surgery, and fewer need to enter the surgical intensive care unit.

Therefore, internal medicine and Gynecology make money in their separate ICU, and the proper thing for surgery is to lose money to accompany Zhang Fan until he goes to bed at night.

.....

Twenty four hours later.

Stan tyrant's life state has been stable. Under normal circumstances, this situation can be transferred from ICU to general ward.

The personal assistant of kestan tyrant said that the tyrant didn't want to be transferred to the general ward and stayed in the ICU.

To tell you the truth, the vacancy rate of ICU in tea vegetable operating room is too high, otherwise, money will not work.

After all, this thing is a life-saving place, not a place where your prince pays all the bills.

Zhang Fan and Ouyang are very similar in this regard. It can also be said that Ouyang has cultivated well.

Love money but not be left empty.

It can be said that Ouyang has reached the state of maintaining himself and pursuing selflessness.

Of course, now the ICU is vacant, which is another saying.

Zhang Fan's visit application report has been approved by his superior.

However, the time was strictly limited, and Zhang Fan was asked to report to the Chinese Embassy in the three islands first.

Moreover, this time, Zhang Fan was clearly told that he was the focus of the government among the frontier experts.

Zhang Fan received a call from his superior and told the truth in his heart.

To be recognized by the government is not only your excellent personal skills, but also your recognition.

To tell the truth, it is difficult for the Chinese government to recognize a person.

If it's not for recognition, Zhang Fan calls the wind and rain in tea, it's so easy, even if Ouyang makes trouble again.

Why didn't Ouyang make trouble before.

And now there is a posture of making trouble in the bird market.

Ouyang is not stupid. Thieves are.

In frontier words, the old lady is old-fashioned!

Because he will go abroad for a period of time, Zhang Fan must first be responsible for his surgical patients.

Anyway, the first suffix of Zhang Fan's name is not the Dean, but the doctor.

Therefore, on Monday morning, Zhang Fan directly informed the medical department of the surgical ward round.

Generally, this kind of ward round will be determined a week in advance.

But there is no news from the government, and Zhang Fan is not in a hurry. Now that he has written, Zhang Fan will immediately prepare some work before leaving the hospital.

The first one is orthopedics, because tea vegetarians first knew Zhang Fan, who was still in orthopedics at that time. Therefore, in the tea plant, the local people often train the dog to pull the sheep's intestines and let Zhang Fan operate.

If Zhang Fan has time, he generally won't refuse. After all, surgery is not done. Anyway, the system also needs the amount of surgery.

In the early morning, a group of people entered orthopedics. In order to cope with the situation after the establishment of the Institute of orthopedics, the former three orthopedics vigorously recruited people. Now orthopedics is growing and developing very rapidly.

Even Wang Yanan is now qualified to perform operations in the Department, such as soaking medlar and raising her legs. Because there are many new doctors, she has entered the state of chief doctor in advance and does not need to write medical records.

Zhang Fan came today with a black face.

Because I have to leave the hospital for a few days, just like the parents' warning before going out, don't watch TV, do your homework well, and come back obediently to buy delicious food.

Orthopedics, general surgery, Cardiology... It's already noon.

After Zhang Fan called Ouyang, he went directly to the surgical ICU to see Stan tyrant.

It's a postoperative ward round.

Ouyang Feng rushed to meet Zhang Fan.

"You promised Zhao Yanfang five million yuan for the experiment?"

"Hurry up..."

Zhang Fan is a little embarrassed.

"Look at what you said. The head of your hospital should have his own authority and promise. Although there are a little more cards, where are the cards of others. Hey, how can I find more money. In case of five hundred, the decoration of our Institute of orthopedics is excessive. "

The old lady affirmed Zhang Fan's extravagance, but her heart was also a mess.

Money is such a hard headed thing. If you have it, you have it. If you don't, you don't!

Chapter 1259

Ouyang and Zhang Fan walk towards ICU, but they are also helpless.

Money never seems to be enough. In the past, when Zhang Fan was a small doctor and Ouyang was the president of an ordinary third class hospital, he didn't feel so embarrassed now.

Now Mingming hospital's income has increased a lot than before, but Zhang Fan and Ouyang feel that the hospital is now full of holes and lack of money. Zhang Fan sometimes thinks whether the money has depreciated!

In fact, if this is popular, it is consumption upgrading.

In the past, the tea vegetable hospital was full of hospitals, not to mention negative 80 degree refrigerators, not even negative 40 degree refrigerators. They often took ordinary refrigerators as organizational refrigerators.

But now, not to mention the laboratories that burn money, even the current laboratory can't see the two brothers in pants. They have to get a professional refrigeration equipment.

This thing doesn't look like a refrigerator, but a refrigerator with a minus 40 degree is close to 100000, and a refrigerator with a minus 80 degree can directly cost a small million.

Moreover, the hospital is not a small shop. It's enough to buy one. It's often dozens of units. To tell the truth, at the beginning, the tea government did not strongly oppose the upgrading of the tea hospital. It is estimated that there are also factors that make Zhang Fan and Ouyang spend money and fear the flowers.

You son of a bitch, the stalls are getting bigger and bigger, and the total assets are nearly 10 billion. If one day the tea vegetable hospital can't get the bolt, it can really make the tea vegetable government bankrupt.

After entering the ICU, Ouyang and Zhang Fan changed their earthy appearance in front of them. Even if they had no money, they could not be looked down upon.

Stan tuhao recovers quickly. Because it is an intestinal operation, he needs to get out of bed regularly, otherwise he will have intestinal paralysis and intestinal obstruction.

Therefore, when entering the ICU, the local tyrant took a walk with the help of the nurse.

"Adasi!" Although the local tyrant went to the ground, he was still very weak. When he saw Zhang Fan smiling and greeting, he was as weak as a person who hadn't eaten for more than ten days.

"How's it going?" Zhang Fan smiled and helped the local tyrant, feeling the strength of his hands and lower limbs.

"It still hurts a little. The nurse is too powerful. She will criticize me if she doesn't get out of bed!" Stan tuhao translated again and again.

"Hehe, just recover slowly. I want to tell you something. Our hospital needs to leave some of the intestinal tissue you cut off for attention. I don't know if you want to. "

In the hospital, when people's tissues and organs are cut, there is a process, that is, they must be seen by their families or patients, and then sealed and destroyed.

Often many people have seen it. The nurse shows the family members the bloody appendix like a big earthworm. This is not a disgusting family member, which is called the patient's family member's right to know.

If you need to do experiments, you must also be authorized by the patient or family members.

This is called ethical right.

After hearing this, the local tyrant turned his eyes.

Zhang Fan thinks this guy doesn't want to, for example, cut off ordinary organs, appendix and gallbladder, and the patients will be treated by the hospital.

But if there is something special and particular about it, deal with it by yourself.

For example, the placenta is often not handed over to the hospital and must be taken away and buried by themselves. Women know women. They are afraid that things falling out of their own will be used as tonics by other women.

Of course, intestines and the like are safer. In the heavy mouth, you can't take this thing to braised it. But if the local tyrant doesn't want to, Zhang Fan has no choice.

How to say the relationship between doctors and patients? Say close, very close. But it's not close. In fact, if people are cured, they won't have much contact with doctors.

Before the treatment, the local tyrant contracted the floor and made a lot of money. After the treatment, they had nothing to say according to the routine.

"I have a condition!"

Ouyang doesn't look very well.

Zhang Fan hasn't changed much.

Although the old lady Ouyang seems very enthusiastic about Stan local tyrants, in fact, the old lady really despises Stan people.

Their generation was very dirty with Stan and several countries. So there are prejudices in the bones.

But Zhang Fan's generation is different, because the country is strong. Starkish countries no longer dare to reach out. Then, just like the national propaganda, regard each other as friendly countries.

"Although the part of my body has gone bad and gone wrong, it is also a part of my body!"

With that, Stan tyrant gasped.

Then he said, "you can study, but I want to take shares. Moreover, if the research results, such as specific drugs, I have the right of first refusal. After all, my body has helped you a lot. "

"Well!" Zhang Fan thought to himself, as soon as you open the gambling block, do you understand high technology!

Zhang Fan is hesitating. How to say this? Even if his children are no longer good, his children are not.

His own laboratory now only spends money. Although he doesn't make money, Zhang Fan doesn't want others to intervene.

After all, Zhang Fan is not a businessman but a doctor.

Ouyang's originally ugly face cleared up.

It's not to see money, but to respect successful people who are enthusiastic about medical undertakings.

"Yes, but in terms of price, you know that foreign capital is generally not allowed to enter this kind of high-end. However, the relationship between our two countries is different. You see, the planes in our hospital are donated by your country, aren't they!

In fact, as long as... "

Ouyang turned into the spokesman of the Ministry of foreign affairs and the main person in charge of Gao jingduan.

If you want to get involved, you can donate some money first, and then we're talking about the price!

Ouyang is more practical than Zhang fanlai. For the laboratory, it can't produce results. Even if it does, it may not be market-oriented.

Because of the research and development of new drugs or new technologies, the cost of this piece is not much cheaper than the research and development of a new aircraft.

"Plane!" The local tyrant was a little tangled in his heart. Ouyang just cut him in the heart.

People are businessmen. Even if they open gambling gear, they are businessmen, not government officials.

He thought about this kind of donation, but didn't answer Ouyang's words.

"Six million, I have the preemptive right in the future!"

Although Zhang Fan despises Ouyang's style of asking for money and planes.

But his face didn't change at all. In fact, he was already happy.

Sister, it's good to make an extra million from this turnover.

To be honest, small business and big business are really not the same business. Zhang Fan's talent in commercial housing is still at the point of buying and selling instant noodles.

He thought he had made a million, but Ouyang didn't think so.

Let's not say if we fail. If we succeed, this guy will make a lot of money.

Therefore, Ouyang said directly, "we have to think about it."

Stu tyrant knows Chinese too well. Even if people string seeds, they are still East Asians.

Foreigners who know Chinese people are either ball countries or stick countries.

"Dollars!"

Zhang Fan, who was originally calm on his face, couldn't help touching his nose at this time.

The local tyrant knew at a glance that this little move was in place.

Ouyang doesn't do it. She wants more points.

"You see, we are a public hospital. It's really troublesome for foreign capital to enter. If you really want to, can we give gifts to each other as friends like the chiefs of your country?"

"Euro, more, I think I should let my body go back to my motherland!"

"Good!" Zhang Fan made a quick decision.

He's really afraid of chicken flying eggs.

Euro, that makes a lot more money.

Out of the ICU, Ouyang looked contemptuous, "just this money to send you away?"

"If you really want to run, let alone the euro, there is no RMB. And we've been under great financial pressure recently. The government doesn't give us a chance to speak like a dog. "

Zhang Fan thinks he has made a lot of money.

"You, you can only be a dean. All right, I'm so angry! "

Zhang Fan estimated that Ouyang didn't want to get to the plane or anything. He was not happy and left.

Zhang Fan hurried to catch up and please the old lady.

"I'll tell you, it's a seller's market now. He's a bad gambler. What's the matter with money? Why doesn't he go to Europe and America to enter this medical market.

So ah, even if he wants to double the price, if he really wants to enter, he can bite his teeth and pay. "

"But we may not succeed. Crohn is not easy to treat! "

"You think I don't understand. What does it have to do with us? If we become the best, why don't we use his money to train troops, build buildings and buy equipment?"

Zhang Fan was stupid when he said this!

Zhang Fan looked at Ouyang and stared round. "It's too dark. The old lady is really too dark."

"Hum!" The proud little old lady held her head up.

Zhang Fan's heart is a little bleeding. Every time my sister pretends to force me, why do I always rank second! It's nothing if you don't have money. You just feel fooled.

After entering the conference room, Zhang Fan informed several presidents of his family to come to the meeting.

He has to hand over his work.

The hospital can't go without a person in charge all day. Zhang fan leaves. Whoever is in charge during this period should be reported.

As a rule, the boss went to the second.

But today, Zhang Fangang asked Ouyang to take charge of the hospital when he left.

Ouyang directly said that she had a headache and wanted to rest recently.

It's still angry.

Zhang Fan has no choice. He knows that Ouyang will never take over unless he takes over.

Who is responsible?

Lao Gao, Lao Ju, Yan Xiaoyu and Luo Zhengguo all looked over.

Normally, Lao Gao and Lao Ju are not qualified.

But inviting them here shows that Zhang Fan has this idea.

"What's the matter with the high court and the municipal government? They sent several ophthalmic laser knives to the First Affiliated Hospital. Why didn't they come from us?"

When Zhang Fangang was about to speak, Ouyang asked Lao Gao.

Lao Gao didn't know about it. "I don't know. I'll ask later."

"All right, don't inquire. Go directly to the bird market. You can rest assured and make trouble with them. Why don't you give us an attachment? Don't you treat us as children."

Ouyang looks very unhappy. In fact, she just doesn't want Zhang Fan to hand over the responsibility of these days to Lao Gao, even if it doesn't work for a few days.

"All right!" Lao Gao nodded.

Lao Chen smiled and Lao Ju sat up straight.

If you have the responsible experience in these days, when you enter the team, it is all qualification. Don't look at it for just a few days, even a few hours.

Zhang Fan thought for a few minutes and finally said to Ren Li, asking Ren Li to be responsible for these days.

Others say that Lao Ju's eyes are foggy. Lost yo, I can't speak Chinese clearly.

Lao Chen kept a serious record.

In fact, I've been happy for a long time.

Lao Gao and Lao Ju are his strong enemies!

After explaining the things of the hospital, Zhang Fan has to go home and explain the things at home.

This is not to go to the bird market. Go back the same day. Now there is master and Shiniang at home. Zhang Fan also wants to explain.

Chapter 1260

Zhang Fan is going to skip work in the afternoon. After all, he wants to go far away and want to go home early. As a result, before the person left, Stan tuhao's private team came to negotiate the acceptance of funds with tea vegetable hospital.

"Rich people are too headstrong!" Although Zhang Fan wants to go home, he can't rest assured that such a large amount of money is not implemented.

So, with a group of hospital accountants and government officials, they went directly to talk about money with other people's teams.

Fortunately, there was a free trade zone between the two countries. Moreover, when setting up the laboratory at that time, Li Cunhou of the capital strongly suggested that Zhang Fan's burn laboratory be registered in the free trade zone at that time.

At that time, Zhang Fan felt that Lao Li did more. Later, with the increase of laboratories, Zhang Fan simply registered with Lao Li's burn laboratory.

Fortunately, I listened to Lao Li at the beginning, otherwise the money would be in and out of trouble.

So listen to people and eat enough.

Some people say that the retail industry is cash flow. In fact, the serious cash flow is gambling. Six million euros went to the tea vegetable hospital every minute.

Zhang Fan looked at a long pass of figures, and he didn't feel unreal.

"Money, can't flood." As soon as he arrived, Zhao Jingjin said something to Zhang Fan.

Although there used to be laboratories for catechin, generally speaking, the family is not rich. Buy something, introduce some talents, pay resettlement fees for new employees and welfare benefits for old employees.

Look at more, in fact, there is not much left. Because the operation of the hospital needs money.

But this time is different. I used to be a hungry man, just like a man who just fell in love. I didn't have enough, because I didn't eat enough before and owed too much.

At present, it is different. It seems that there is a lack of money, but this is a hole in the future, not an existing pit.

Therefore, Zhao Jingjin is afraid that Zhang Fan will give the remaining money another bonus.

In this way, although everyone is happy, but in the long run, the motivation for doctors will be insufficient. If people are not enough, everyone will pay the same money. Why should I work hard.

"What do you mean?"

"Fixed staffing and posts. The money for the experiment will be given to the experiment and to others. According to the normal coefficient, it can be high, but not too high. This is the driving force. "

Lao Zhao Yi said that not only Ouyang, but also other presidents agreed.

"OK, let's work out the system before I leave."

In fact, as long as Zhang Fan agrees, this system has a model.

Once the system was released, the surface of tea vegetable hospital has become calm and calm, but the underground waves can be turbulent.

The biggest one in the system is that the accounting of laboratories and tea vegetable hospitals will be separated in the future. The loss and profit of the laboratory are the business of the laboratory, which has nothing to do with the tea element hospital. Tea element hospital no longer subsidizes laboratories.

The capital source of the laboratory mainly depends on social donations, fund support and policy preference. The income is also divided into three parts: giving back to the society, purchasing instruments and consumables, personnel rewards and salaries.

It seems that those wronged in the laboratory have no fixed income.

But everyone is not stupid. The tea vegetable hospital looks at an income of almost 5 billion yuan a year. In fact, it barely makes ends meet. Moreover, once the government does not give subsidies, it will have to lose money.

First of all, the biggest expenditure is the cost of medicine. It sounds like an independent bidding for medicine in the hospital. In fact, this is a circle drawing, just like sun monkey's painting the ground as a prison. You can toss in this circle. Even if you stand upside down, no one cares about you, but you can't go out of the circle.

Therefore, the revenue and expenditure of the tea vegetable hospital are almost balanced for a drug fee, a salary and a capital construction. If you want to do something more, you need Ouyang to go to the government.

Unlike the laboratory, this thing is not a non-profit organization. It can be regarded as an enterprise directly. Moreover, it used to be a tea vegetable hospital. It can also be said that Zhang Fan wanted to do it himself.

Now it's different. Foreign capital has entered. My brother has to settle accounts.

So direct stripping.

Doctors can still go to the laboratory to do experiments, but their future income depends on the profits of the laboratory.

Looks like a lot of risk.

However, we are not stupid. Six million euros have entered. Such a large number can be supported by ordinary doctors.

Therefore, in the past, many doctors who did not pay much attention and did not pursue self-improvement are worried now. In the past, it can be said that the laboratory was a big pot of rice, but now it is more work and more pay.

Moreover, at present, the Crohn laboratory is the largest cheese.

As soon as Zhang Fan got home, the phone came.

A look at Ye Jing, a cardiologist and attending doctor, but Nian took Zhang Fan's inner heart teacher.

It can be said that if the cardiology department is a combat unit, Ye Jing is a strawberry soldier.

She will never fight or rob. She is very Buddhist. Moreover, with Zhang Fan's position, everyone doesn't force Ye Jing. After all, if you don't look at the monk's face, you should also look at the Buddha's face.

So Ye Jing was very comfortable, but with the stripping of the laboratory, she couldn't sit still. She seldom calls Zhang Fan and can't sit still.

"Mr. Ye, why did you think of calling me? What's the matter? Do you want to ask for leave?"

Zhang Fan answered the phone with a smile.

To tell the truth, although Ye Jing doesn't want to make progress, she has a compassionate heart. Therefore, Zhang Fan still respects Ye Jing.

It's not like a respiratory teacher. He only has money in his mother's eyes.

"Zhang Yuan, I don't ask for leave. Hehe, I want to ask something. "

Ye Jing is still happy to hear Zhang Fan call her teacher as before, and she doesn't play an official tune.

Although I dare not say it's Zhang Fan's master, it's not the one who took Zhang Fan.

"You say, what's the matter?"

"I have some ideas about experiments recently. I heard that Dr. Zhao Yanfang needs a cardiologist. Would you please tell me? I'm afraid I went to Dr. Zhao..."

It turned out that when Zhao Yanfang became rich, she began to spread invitations. She wanted to make a big deal. Anyway, when she was rich, the gut was thousands of miles away from her heart, but there was still a dark connection between the two.

In the past, doctors felt that the heart had little to do with the intestine.

For example, the imbalance of intestinal flora in patients with heart failure, and the reduction of *faecalis przewalskii* is a basic feature of intestinal flora in patients with heart failure. The study also found that those intestinal microbial genes encoding proteins involved in lipopolysaccharide synthesis and proteins necessary for the production of intestinal metabolite trimethylamine oxide increased significantly, which may lead to the pathology of heart failure.

Anyway, he has money, and the laboratory has been stripped off. Zhao Yanfang smashes people with money. Anyway, the first one selected now can pay more than 10000 yuan in labor fees a month.

If you only have 10000 yuan, maybe not many people are interested, but there are 10000 yuan every month, and it's still an extra money after work.

That's different.

Even young women like Ye Jing are moved. It can be imagined how many people are greedy.

"OK, no problem. Don't worry, Mr. Ye. I'll call when I say hello. If you call, I'll help you talk, but I can't tell if it works. It's said that Dr. Zhao wants to be assessed. If you really want to go, review more."

Hung up Ye Jing's phone.

I haven't had a word with my family's Shifu, Shiniang and Shaohua. The phone came again.

Zhang Fan looked at Li Hui's.

"What's up!" For Li Hui, Zhang Fan is more comfortable.

Open your mouth and ask anything.

"Hey, hey, I heard you're going to Sandao. I found a good restaurant to see you off today. All the dishes are ready. You can't come without me. "

As soon as Zhang Fan listens to the phone, the child cries. This guy is definitely at home and not in any restaurant.

"OK, hang up. I'm going to immigrate to Afghanistan. Let's talk after dinner."

Li Hui's ass moved, and Zhang Fan knew what he wanted.

"No, no, no, the lab, the Crohn lab is looking for someone. Who's going? I'm not going. Tell me. I want to go, too."

Ye Jing, Zhang Fan has to give face. After all, he was his teacher.

But Zhang Fan is not polite to Li Hui.

"All right, you are an undergraduate. What do you do in the laboratory? People open their mouth and shut up in English. Do you understand. People find someone to assess. You think you'll take the money when you go. You're blind. "

"I'll go. You wait. Tomorrow I'll take the postgraduate examination. When I get the postgraduate examination, I'll go to big cities and won't be exploited by you!" Li Hui laughed and scolded and talked

nonsense with Zhang Fan and hung up the phone.

He knew that Zhang Fan would not refuse to do what he could do, and Zhang Fan would say it clearly.

Old man Lu looked at Zhang Fan, smiled and said to Shaohua, "look, it's not finished yet. He's already started to walk. It's time to strike the wooden bell. Later, you should watch this boy closely. I don't trust him. I still know you. You're a good girl."

Shaohua was happy and said to Zhang Fan, "did you hear that? I have Shangfang sword!"

.....

Things at home are relatively simple. Their parents don't come to the city when they come to the farm. And master's side is to hold the old man down. Don't let the old man run away.

Nothing else.

In the evening, Shaohua pestered Zhang Fan.

Forty women are like wolves, and forty men are like worms. Although I'm not that old now.

But a woman who wants to be pregnant, if not a wolf, is at least a Tibetan mastiff.

"No, really no, all the rest is urine!"

Zhang Fan is not afraid, but mainly pity his wife.

"Why don't you think I'm pregnant? I've been taking folic acid vitamins for a long time!" Shaohua lies down beside Zhang Fan and asks a little wronged.

The posture of just raising her legs made the girl's muscles a little sour.

Zhang fan can't say that folic acid and vitamins are not dizzy food, but to prevent children from neurological diseases.

But this can't be said in bed.

You can't say it when you take off your clothes.

"This matter should go with its nature and not be forced. When it should be, there will be."

Although he said so, Zhang Fan wondered. Although he was busy with his work, he was also very hard-working.

Is there radiation in the system that will kill you?
