

Chapter 1261

The family, the unit, the treatment that should be handled, the comfort that should be appeased, life is like this. Like beating a hamster, the pit all over the ground and the outcrop should be hit early, and there can be no delay.

After Zhang Fan has handled the relevant matters, Lao Chen and Zhao Yanfang have contacted the Royal Hospital in Mishima.

Originally, Zhang Fan and they were going to make an international flight. Stan tyrant directly took out his private plane and lent it to Zhang Fan.

In the words of local tyrants, it was inconvenient to lend it to you before, because it was considered bribery before. Now we are partners, so it's all right.

Zhang Fan originally wanted to refuse, but Lao Chen said that international flights should be transferred to many airports. After thinking about it, he agreed.

Zhang Fan has many greedy things. But it seems that in this regard, such as limited edition sports cars and large private jets, I don't know whether I haven't seen the world and don't understand the happiness of local tyrants, or what. I'm not too interested anyway.

On Monday, at the tea vegetable airport, led by the leader in charge of health, Ouyang welcomed Zhang Fan and his party.

Zhang Fan, Zhao Jingjin, Chen Sheng, Zhao Yanfang, Ma Yichen, and the head nurse in the operating room slowly got on the plane.

Tea vegetable airport also gave face and brought out the only boarding desk with elevator. The red carpet was also paved, making it look like that.

But think of the following people's explanation. The original scenery visit has also become a taste.

"Come back early. There are a lot of things at home. I don't have a backbone without you. The hospital is

too big now. I don't know what to do. Hey! " Ouyang rarely showed a timid and worried look, took Zhang Fan's hand and said it several times.

Really, to tell the truth, general surgery actually revolves around the liver, gallbladder, pancreas, spleen, stomach and intestines.

The stomach is the most thick skin. Even with cancer, it can still survive after cutting.

Next is the liver. It looks like there are many liver diseases all over the world. What hepatitis A, B, C, D and E? In fact, it shows that people are powerful. So many diseases haven't killed people.

The other gallbladder and pancreas are not easy to mess with.

Cholecystitis and gallstones seem to be nothing serious. In fact, this disease is a cold for the gallbladder.

Try gallbladder cancer. This thing is directly fatal.

The brothers beside him are even more terrible. Pancreatic cancer and pain can kill patients.

So if you want to be strong, you have to bear hardships.

Xin Kui's local tyrant's plane meal is still good. Almost everything you want to eat, just don't want to be too wonderful. People have prepared it.

Zhang Fan ordered a large plate of lobster and steak from Zhao Jingjin. Zhang Fan looked at Zhao Jingjin's food with relish and despised it. He risked blood and water and loved it.

Zhao Yanfang and the head nurse ate other people's cakes and despised carnivores like men.

After eating and drinking, start the rehearsal.

Zhang Fan never found out, so he made a report and even designed his hand movements. Zhang Fan feels superfluous.

But Zhao Jingjin and Zhao Yanfang don't think so.

Zhao Yanfang also despised Zhang Fan: "did you start an international medical conference! Don't interrupt without experience! "

Zhang Fan doesn't know how to refute.

.....

When Ouyang was in the hospital, he said it was pain, foot pain, whole body pain, and he didn't care about anything.

After seeing off Zhang Fan, the old lady immediately asked the driver to drive Zhang Fan's Da Ku Luze and Iveco 120 of the hospital, and took several old men and women who were going to retire from the hospital and old lady Lu, saying that she was going to a free clinic in the depths of the grassland.

They said it was a free clinic. They brought the old, the weak, the sick and the disabled. The free clinic was an egg.

In fact, Ouyang was deeply afraid that Zhang Fan's master would fall ill, but he took the old man and wife alone. They certainly wouldn't go.

Therefore, simply take a group of people who want to retire, even retirement convalescence.

Glacier mountain range, which is higher than the estimated permanent glacier for tens of thousands of years, but at the foot of the mountain is either a lake or a hot spring, grassland lake. It is really a good place. Moreover, this place has not been developed, and it is said that it is not ready to be developed.

The tile blue sky is reflected on the tile blue lake. Occasionally, groups of white swans flying back from the south are sweet.

Overlooking the distant snow mountains, forests and grasslands.

The occasional sheep are just like the clouds in the sky falling on the earth.

The shepherdess's song came from afar. It was really like entering a fairyland.

Soaking in sulfur hot spring and eating light yogurt pimples, old man Lu's face, which was a little white, slowly turned ruddy.

Ouyang said he would never let Zhang Fan worry if he didn't let Zhang Fan worry.

Eat, drink and have fun. Although ouyangping doesn't pay attention to it, in fact, he has been a tea vegetarian for decades. Can't he understand a local vice president of a general hospital!

Old man Lu and old lady Lu went to the grassland. Is there any work in Shaohua's farm now? Shaohua rarely asked Wang Yanan and Jia SuYue to go shopping.

Seeing Shao Hua, Wang Yanan complained, "I want to work hard now, and I want to go abroad. You are all stumbling blocks to my progress now."

Jia SuYue was about to scratch Wang Yanan.

When women go shopping, they actually look at clothes.

Although Zhang Fan doesn't accept red envelopes, he has operated on local tyrants in recent years. People will still deal with each other in return for the Spring Festival.

For example, Huaqing, the boss of bird market, directly gave a card of Vientiane exchange. It's not OK if you don't want it.

"I don't ask you to do anything. I don't expect to go to your hospital to get equipment. What can you worry about? Besides, my level may not be lower than you. What are you worried about?"

Therefore, this kind of consumption card is not young or old in Shaohua's hands.

Watching Shao Hua buy things without money, Jia SuYue envy you!

Zhang Fan doesn't care if she doesn't go abroad, but looking at the colorful consumption card in Shaohua's hand, she is really sour.

Chapter 1262

When Zhang Fan and his party were on the plane.

The Lancet published a heavyweight paper on intestinal cancer.

And it was published by tea element hospital. Previously published papers are important, but they are not big inventions.

Either a small new discovery or an innovation in surgical technology.

This kind of paper is the thick accumulation in the thick accumulation of thin hair. It is not helpful for doctors to hire professional titles, and it can not be promoted to the attention of people outside non hepatobiliary disciplines.

But the paper on intestinal cancer published this time is different.

Marubeni has been cooperating with tea for almost a year.

From the beginning of cooperation, MARUKI first called on patients from their own country. At the beginning of the first wave, tea vegetarians were stunned because they found that there were many bowing people in the street.

Colon cancer is the third largest cancer in the world. Moreover, there are a lot of pill countries. I don't know whether it is a genetic problem or eating too much sashimi. Their country even has this problem in the capital of yuan.

It is said that there is a joke that one year the Prime Minister of Marubeni reported to their emperor. As a result, he first ran to the bathroom seven or eight times in two hours.

The emperor was also curious and thought that the prime minister liked their toilet.

Therefore, when Marubeni saw Zhang Fan's operation level in the intestine, it began to vigorously cooperate with the tea element hospital.

Originally, I wanted to lure Zhang Fan to Marubeni, but after 80, I was in tunnel warfare and mine warfare. Zhang GA, a small soldier, broadcast again and again when it comes to holidays. The generation who grew up is definitely not the same as the one who plays chess.

It's impossible to go to meatball country.

Therefore, Marubeni can only cooperate with the tea vegetable hospital.

But medical research is not expensive in the laboratory.

It's the money for clinical trials.

For example, a new drug needs to be developed.

When developing this thing, the goal is to focus on the cardiovascular system.

First, animal experiments in vivo, and planing experiments.

But animals can't communicate with people when playing. They can only observe the target organs.

As a result, when it comes to the human body, the cardiovascular function is too general.

But doctors were surprised to find that this thing was effective for the third leg.

To tell the truth, if it didn't work on the third leg, Wei Wei estimated that he would have died directly in the first round of clinical trials that year.

These preliminary tests and R & D are not the most expensive.

It is often expensive to enter the clinical trial stage. Many new drugs die here.

First of all, there must be a large number of specimens for this kind of test. This kind of specimen is human, so many pharmaceutical companies go to San Ge for clinical trials.

It's not the third brother's clinical trial, but other people's medicine is cheap.

Hundreds of millions or even billions of R & D expenses are actually spent on several rounds of clinical trials.

Therefore, it is too expensive for Marubeni to bring patients here. Then he encouraged the patients from Outer Mongolia to come.

For a time, after the bow, a group of Mongolian people wearing similar but different clothes appeared in the tea vegetable street.

The local elderly Mongolian people looked at it and said, isn't this the offspring who were herded by us hundreds of years ago.

To tell you the truth, the Mongolian people in China say that they are golden. The outside group used to herd them.

With a lot of investment, we finally saw the results.

Colon cancer is easy to develop and metastasize, and the mortality is extremely high.

This time, the team of tea and pill countries finally found a factor for colon cancer metastasis.

The most terrible thing about cancer is not the growth rate of this thing. According to the current surgical level, how fast you grow can be cut or embolized as long as you are not an important organ.

But the terrible thing about this thing is that it has big long legs. It will run and infect.

When it spreads, it is particularly terrible. The first way is lymphatic metastasis. Lymph is originally the immune system. Once it is destroyed by cancer, it will directly affect the body.

Therefore, when the doctor looks at the touch and listens to the touch, there is one item of touching the

lymph. Especially when the doctor touches your steamed bread, it's not playing a hooligan. It's to see if your lymph is swollen.

Of course, there are scum.

In addition, there are blood vessels where there is meat. Once it enters the blood vessels, there is no chance of surgery. It can only be poisoned by radiation and drugs. Often, the result is that cancer is not killed, and drugs and radiation hang people first.

The third direct invasion, such as rectal cancer, why surgery is terrible, because rectal cancer directly invades nearby organs.

For example, men's prostate, urethra, women's genitalia and uterus, together with levator ani muscle, surrounding skin and bladder.

Therefore, radical resection of rectal cancer is quite terrible. It directly means digging all the organs near chrysanthemum.

In this operation, chrysanthemum looks like a sunflower with a large washbasin, and then all these organs are dug out. What you can see directly is the intestines.

The last one is to plant like dandelion. After cancer cells mature, this thing can swim in the body like dandelion seeds, and settle down wherever it falls.

But what is the reason that cancer factors can run and metastasize.

The trouble is that different cancers have different causes of metastasis.

This time, the team of catechin and Marubeni found the cause of colon cancer metastasis.

Creatine!

Creatine is not only a catalytic enzyme for energy conversion in mammals. It's also an energy buffer.

To put it simply, for example, your wife discovered you were stealing food, and then you began to lie. Your brain was running at high speed. As a result, ATP was not enough, and ATP was equal to the gasoline of the human body.

This stuff is not easy to preserve when it is produced, so it is often stored in the form of fat. When it is stored, everyone says it is good, but once it is used, it will decompose, so when the energy is not enough.

When the brain is about to shut down, creatine is replaced.

For example, many iron rolling lovers want to make their muscles bigger, or make tortoise shells appear on their stomachs.

Just supplement creatine.

The tea element hospital found that creatine is good for normal people.

But in patients with colon cancer, creatine also has a bad side.

This device can promote cancer metastasis by activating the signal pathway of smad23 caused by single-stage spindle.

In other words, cancer cells originally ate leek boxes in the colon. As a result, creatine hands are cheap, or there is too much energy. It shows its ability to open a highway between the intestine and other organs that can let colon cancer run.

It's that simple.

What diseases fear is that they don't know the mechanism and what this thing is all about.

For example, SARS in those years, why was it so terrible, because we couldn't find out what it was.

But once found, there is always a way.

Now, although colon cancer has not found why it appears, it has found how it runs.

Although this can not completely eliminate colon cancer, this discovery has been quite powerful.

If you can cut off its way of running, even if colon cancer occurs, it is also a lamb to be slaughtered. If you are a little disobedient, the doctor can cut off the intestines with lesions.

Therefore, this discovery is quite cow. It can be said that once a creatine drug corresponding to the inhibition of colon cancer is developed, the colon cancer will be directly limited to the colon.

After the success of the experiment of the tea element and pill team, contradictions broke out between the two sides.

This is the so-called common problem. Can we share wealth with wealth.

What Marubeni means is that they are the main force of the experiment.

They even paid for the test tube.

Tea vegetable side, led by Ren Li, of course, can't let go.

After arguing all morning, the two sides finally compromised.

Because there are many research teams around the world, we must send the paper early after success, otherwise it will be too late to cry if the paper spy gives it to other teams.

Then, the first author is a professor of marukuni, but the wonderful thing is that the corresponding author is Zhang Fan, yes, it is Zhang Fan.

Because there is no colon expert and scholar on the top beam of tea. But it was impossible to let go, so Zhang Fan stood up.

Moreover, because the early operation directly depends on Zhang Fan, although Zhang Fan has little effect in the experiment, they can't study without Zhang Fan's early accurate separation of cancer.

Therefore, Zhang Fan became the corresponding author.

In fact, the first author of a paper is often very important, but the corresponding author is not bad.

The first author is often the main force of the experiment, the experimenter from beginning to end.

The corresponding author often has an idea, perhaps participated in the experiment or did not participate in the experiment. Therefore, the general correspondents are often teachers or mentors of the first author.

However, he must be responsible for the experimental results and papers. It's good to say that if there is a problem with the paper, the journal does not contact the first author, but the corresponding author.

The second author is the one who has some weight.

The rest, third, fourth, fifth and sixth, are actually members of the atmosphere group.

After the paper was published, almost some famous people from Johnson & Johnson, Roche, Pfizer and Novartis began to pay attention.

In the past, some researchers paid attention to tea element in the research and development of equipment. Now it is different. They directly began to put Zhang Fan and tea element hospital into the library of scholars they focus on.

After the paper was published, GlaxoSmithKline of Mishima learned that Zhang Fan was coming to Mishima. They didn't pay much attention.

Because people are not very prominent in the drug research and development of the liver.

But people can directly represent the highest pharmaceutical level in terms of respiration, gastrointestinal tract, metabolism and anti-tumor.

So when you see the new discoveries of tea and meatball country. They began to pay attention.

The head office directly began to contact the Royal Hospital to inquire about Zhang Fan's itinerary.

Moreover, we should also be prepared to spend great efforts on public relations with Zhang Fan.

Enterprises do not see blood without a knife.

But the hospital in Mishima doesn't think so.

"Do you think Dr. Zhang Fan, who said tea element, is suspected of counterfeiting. It's incredible that a liver and gallbladder expert can publish a world-class colon paper. "

"Yes! He can even become a corresponding author. The first author is also a famous professor in Marubeni! "

In the Royal Hospital, the director and professor of hepatobiliary Department watched the newly published paper together.

"Expand the number of speakers. Involve gastrointestinal experts. " The president of the Royal Hospital said directly.

"However, if Zhang Fan really makes a fake, will it affect our reputation!"

"No, no, no, if he is a fake and is seen through by our hospital, it will give us more honor."

"Good! Do you need to invite from other countries? "

"Do we need experts from other countries for our big three island Empire?"

The Royal professor said proudly.

Chapter 1263

"How much is this trip?" The head nurse finally waited until several doctors had finished their discussion.

To tell the truth, after getting on the plane and eating something, they began to discuss and rehearse. She and Lao Chen can't understand and don't speak. They can't speak yet.

In particular, Zhang Fan's English tastes like potato and egg. She is so depressed that she wants to laugh but doesn't dare to laugh.

I don't want to listen, but the magical sound will go into my ears.

Originally thought of going out this time. Even if it can't be called tourism, it can be regarded as a public expense trip. As a result, she was going crazy when she got on the plane and rehearsed her speech from beginning to end.

Finally, potato English is over.

Zhao Yanfang got up with coffee and continued to study the speech.

Zhao Jingjin is a little old. At this time, he is a little tired and closes his eyes to rest.

Lao Chen and Ma Yichen felt it as if they had never seen the world.

When the head nurse saw that Zhang Fan was all right, she asked in a low voice.

"I don't know. It shouldn't be expensive. If it's too expensive, why does he buy this thing?" Zhang Fan took it for granted with his simple idea.

"That's right. Look at your hands. I've never seen the world. " The head nurse rolled her eyes and looked contemptuously at Lao Chen and Ma Yichen.

"All right, don't laugh at me. You sat on the sofa again and laughed at us!" Lao Chen, an old man, doesn't blush at all. He has to turn over the head nurse's background.

The head nurse's face was not red and wanted to quarrel with Lao Chen immediately.

Zhang Fan quickly stopped.

His brain hurts, too. Never spoke English at such a long length. To be honest, many brain cells died.

To be accurate, there should be no ambiguity, and there should be actions, Niang!

At this time, let the two goods make a noise. He really wants to jump.

"How much do you spend on this trip?" For convenience, the local tyrant is looking for a Chinese Kazakh stewardess on this trip.

"About a million." The stewardess told Zhang Fan gently and politely.

"Dollars?"

"RMB!" People don't know whether they are highly professional or polite. Anyway, they don't show contempt at all.

After hearing this number, Zhang Fan and the head nurse around him looked at each other.

The head nurse doesn't know what to think.

Zhang Fan seems to think that they go back and forth, and a rescue vehicle full of equipment is gone.

Fortunately, it's a private plane. Otherwise, Zhang Fan and others will fly to the capital first, and then fly directly from the capital to London.

Now, taking off directly from tea vegetable is equivalent to saving more than 2000 kilometers and three hours.

When he arrived in London, Zhang Fan felt the capital of Sanchuan.

It was cloudy and chilly when I got off the plane. I didn't feel the feeling of spring at all.

"The lineup is very big. The director of the liver Department of Wellington, the director of the liver Department of Royal Hospital and the director of the liver Department of King's hospital are here. "

Looking at the welcoming crowd, Zhao Yanfang whispered to Zhang Fan.

"Your head is very familiar!" Zhang Fan asked curiously.

"Nonsense, when I was a doctoral student, I stayed here with my mentor for half a year. The earliest liver transplantation in the world was done by the Royal Hospital. These three hospitals, especially Wellington, are the most powerful in terms of liver. "

Zhang Fan probably knew about it when he came here. He thought there was only one hospital. Unexpectedly, he came to the liver Department of three hospitals this time.

"It seems that he attaches great importance to us!"

Zhang Fan has a good attitude. This is mainly because Zhang Fan has met too many big men in academic circles.

My teachers and uncles are all top-notch in the world, so they don't feel as strange as taking a private plane.

This thing is like a family environment.

The children of other people's official families have been exposed to how people deal with people since childhood, while the children of ordinary people often listen to how to earn more living expenses today.

Therefore, sometimes I hear some grumbling people say that those above the department level are inherited from the family, as if there was a trace of truth.

Zhang Fan tried hard to talk about English. As a result, the other party's oral English was too heavy, it sounded too cumbersome, and three or four people didn't seem to speak the same accent.

Zhang Fan realized that this English also has a local accent!

To tell the truth, Zhang Fan studied American English, which was originally half a bottle. Now when he meets British English with an accent, Zhang Fan is in wax.

The heart is not generally annoyed, "Mom, I still can't understand after so much effort!"

But fortunately, they also brought an interpreter, and although Zhao Yanfang usually doesn't look like an old house, his office is like a choir on the grassland in the morning, but when they speak, they say it crisply.

Listen, it's as tall as the old two dealers.

The party got on the bus and went all the way into the city.

Walking, Zhang Fan asked Zhao Yanfang, "it feels like it's an old house!"

"This is not the CBD area. We are going to the west area now. There are almost old buildings over there."

Before Zhang Fan finished, he heard that the head nurse was like a startled horse among the horses: "look, look, look, Big Ben."

Zhang Fan glanced back at the head nurse, "hold on, it's just a big watch. Is it so nervous? Hold on! "

The head nurse glanced at Zhang Fan, but at least she was sure.

After some people go abroad, according to the scenery or landscape that others say, they don't say whether it's good or not, but they feel very excited and must take a picture.

And Zhang Fan, just like the one who came to three islands to pick up hair disease, disliked this one and that one.

Zhao Yanfang, who originally introduced the city to everyone, can't introduce it anymore.

"This is the golden Han Palace with a history of hundreds of years. It..."

"This thing doesn't have our Tiananmen Square bust. It's gray. What do you think of Uncle bald's residence in those days?"

"This is the Thames canal..."

"Oh, it doesn't look as big as the tea vegetable river!" Zhang Fan looked dissatisfied.

Is this bigger than? It's not steamed bread.

Zhao Yanfang stopped talking!

"Ah! Ah! Ah! Ah! Don't say any more. What little sense of expectation you said in my heart is gone. " The head nurse reluctantly pushed Zhang Fan in the front row.

Zhang Fan smiled and stopped talking.

It's not that Zhang Fan has a sense of inferiority. It seems that he can't see anything in developed countries.

Zhang Fan has been running the magic capital and the capital in recent years. After a circle, it seems that the big city of China is younger than that of Sandao. Whether it's people or architecture, it gives him a sense of youth.

Because the airport is close to Cambridge, Zhang Fan's first stop is to Cambridge. There was no grand reception.

The three directors who came to pick up the plane today actually came to solicit Zhang Fan's opinions.

Originally, it was a liver and gall speech. They wanted to add some general knowledge, such as the topic of Zhang Fan's recent paper on colon cancer.

Zhang Fan agreed without much thought.

People saw that Zhang Fan agreed, so they asked the liver and gallbladder director of Wellington and the interpreter leading the team to take Zhang Fan with them. The first thing they came to was Cambridge to visit and rest.

Then he went to the venue to give a speech the next day.

Two cars, one leading the way and the other sitting with Zhang Fan.

The hotel where Zhang Fan is stationed has become a year from the outside. But it's obviously different inside.

The huge chandelier is like a cherry tree hanging upside down on the roof.

I reported peace to my family. After a little repair for a while, several people, accompanied by translators and escorts, transferred to the legendary Cambridge.

White people, especially after the age of 15, you can't guess their age. With a huge chest, a slightly raised forehead and freckles, it is estimated that it would be a mother of at least three children in China.

As a result, people are freshmen.

Whether the school is powerful or not, Zhang Fan doesn't see it, but what Zhang Fan sees is that the school seems to have no fence.

"Going to the bathroom?" Zhao Yanfang looked at Zhang Fan and asked in a low voice.

"No, the school doesn't have a wall."

Zhang fanlue was a little curious.

Such a famous school doesn't even have the money to build a fence.

"First Cambridge University and then Cambridge City, so they don't have a fence."

"What is the logic?" Zhang fan can't understand, but he doesn't tangle.

At dinner, the director of Wellington entertained Zhang Fan and had a classic English meal.

Fish, chips and tomatoes are cut into two pieces, and then baked in the oven. The surface is slightly black, which is a dish.

Beef kidney pie, Royal cream chicken, soup stewed with beetroot.

To tell you the truth, when the recipe was brought up, it was half a person tall.

But the level of dishes, really chicken's bad evaluation.

To tell the truth, Zhang Fan has a good mouth, but this thing looks good. Compared with Chinese cuisine, it's a little insulting to Chinese cuisine.

A round sausage, baked like a circle of black tattoos.

The tableware is very exquisite.

Silver fork, silver knife, porcelain plate.

But the taste of the food, Zhang Fan really can't help it. It was the so-called dessert. Zhang Fan reluctantly ate it.

After dinner, the director of Wellington left.

Zhang Fan and his team took pictures near the legendary apple tree and looked at the back of the surrounding buildings with rings caused by rain.

Zhang Fan and they went back to the hotel.

When entering the hall, an Asian lady came over.

"Hello, Professor Zhang, I'm Zeng Huiyu, President of GlaxoSmithKline Asia. It's a pleasure to meet you today. Hello, experts!" As he spoke, he handed out his business card.

The GlaxoSmithKline family is waiting for Zhang Fan here.

This Ms. Zeng, alone, has the posture of going to the meeting alone.

Black frame, small suit, white shirt, suit skirt, I don't know whether I wear silk stockings or not. Anyway, I look very bright and clean. I'm not very old. Zhang Fan glances at the relaxation of each other's neck and pouch muscles, about between the ages of 35 and 40.

A pair of black leather shoes with a slight slope at the foot.

Although a person, but momentum is not lost, Zhang Fan, they are a group of people.

According to the people's three Islanders, this lady is also a noble. Her ancestors were the one who slaughtered the capital of heaven.

Chapter 1264

Chinese people are not poor.

When you are poor, you are really poor. But there are still some rich people who have accumulated wealth for thousands of years.

Especially some unknown Chinese. It has been said that Jews like to do finance and Chinese people like to manage industry. I don't know if it's right.

Anyway, Ms. Zeng has a stake in GlaxoSmithKline. I don't know whether it is a preferred stock or not, but it is estimated that it is still very fierce for others to become the president of Dahua region.

Technical Zhao Yanfang is responsible for answering questions. If there is anything else, people will help Zhang Fan deal with it.

When it's not technical, it's Lao Chen.

When the lady just appeared to say hello to Zhang Fan and reported her pulse. Lao Chen hid aside to make a phone call.

There are films everywhere, not to mention three islands.

Three island swindlers still exist, and may not be less than China.

Especially this country is weird.

For example, this law breaking obedient water is often used by garbage men to hurt women all over the world except the three islands.

Especially in entertainment places, it is generally men who secretly drugged women and then went astray.

The three islands are not. They are often used by men to men. The country where men wear white stockings and plaid skirts is so strange.

Before Zhang Fan and Ms. Zeng said a few words, Lao Chen stood behind Ms. Zeng's side and gently nodded to Zhang Fan.

Zhang Fan understood that Lao Chen had implemented the woman's identity.

Without being invited to the room, Zhang Fan sat down with Lao Chen and Ms. Zeng at the coffee bar in the hotel lobby.

Zhao Yanfang, Zhao Jingjin, Ma Yichen and head nurse did not participate and went directly back to the dormitory.

"Professor Zhang is young and promising. The hottest name in the three islands medical circle these days is tea vegetable Zhang Fan. This also makes the people who go abroad happy.

So today, although there is a suspicion of abruptness, I still can't help but want to see the medical leaders of my home country. I hope Professor Zhang doesn't mind. "

Women speak well.

But, to be honest, this kind of the emphasis with the a little old-fashioned tone can't resonate with the Zhang Fan. Moreover, when he learned that he was the regional president of GlaxoSmithKline, Zhang Fan began to draft slowly.

Anyway, no matter what you say today, it's useless to say that the moon in the sky fell down.

No bleeding? make fun of!

Anyway, tea is located in the northwest frontier, and there is no mentality of Chinese people.

"GlaxoSmithKline is still very powerful. Among the top three pharmaceutical enterprises in the world, it should be able to enter the top three. Your company's annual R & D expenses are estimated to be a lot. "

Zhang fancai doesn't talk to her about going to the country or not. Her family of this size, even if she goes to the country, will live well.

"Well!" Ms. Zeng was a little embarrassed. First, GlaxoSmithKline is boasting among the top three pharmaceutical enterprises in the world, and it is a little reluctant to enter the top five. Second, she didn't expect that Zhang Fan, who was a scholar, didn't hide his naked face.

"Hehe, we still have experience and market in liver tumor and intestinal tumor inhibition.

Zhang Yuan, since everyone is happy, I won't hide it. Our company is interested in the new research project of catechin colon tumor. Does Zhang Yuan have the idea of marketization in terms of creatine inhibition drugs in the future? "

"Oh, Takeda pharmaceutical has an agreement with our cooperative experimenters. They can participate in part of the R & D. Moshadon is also in contact with us. "

There is a real agreement between Takeda and MARUKI, but Takeda's main business is upper gastrointestinal drugs and respiratory drugs.

For example, pantoprazole and cyclosonide are the leading products of others.

But to be honest, the pharmaceutical market and the arms market are particularly similar.

For example, gold wool accounts for the majority and sells high-quality products, and the rest is eaten by Europe.

The middle end is the more powerful old maozi.

This is all European and American. China also sells some low-end products.

Like pharmaceutical enterprises, there are too few pharmaceutical enterprises in Asia. Almost all high-end pharmaceutical enterprises are from Europe and America.

Of course, the third brother is a wonderful flower and will not be discussed.

Therefore, when Ms. Zeng heard Takeda, her face didn't respond at all, but when she heard mursadong, her eyelids trembled slightly.

But this subtle muscle tremor can't escape Zhang Fan's eyes.

You said that in other aspects, Ms. Zeng estimated that she could fool Zhang Fan. But in the subconscious reaction of the body, there is no way to fool Zhang Fan.

Of course, the connection between moshadong and tea is actually nonsense by Zhang Fan.

"MSD is also very strong, but GlaxoSmithKline is still strong in the research and development of inhibitory drugs for lower gastrointestinal tumors.

"Yes, Ms. Zeng is right!" Zhang Fan nodded his head, as if he recognized it very much. He picked up the coffee, put it down again and asked for a glass of water.

Zhang Fan follows Ouyang these days. It's hard to say anything else. He learns very well in terms of

taking advantage.

What negotiation is nothing more than the reason that you eat more and he eats less.

Anyway, it has been developed now. If other people don't have the data of tea vegetable hospital, let alone others, the time cost and experimental cost are a threshold. Moreover, they may not be able to find a doctor like Zhang Fan who helped a lot in the early stage.

Therefore, Zhang Fan doesn't worry at all. Come and make an offer? It's really not good. I'll have an auction.

Ms. Zeng and Zhang Fan chatted casually. Seeing that Zhang Fan was not a simple scientific researcher, she smiled and left.

Of course, Zhang Fan didn't object. She sent professionals to deal with tea.

Moreover, they also invited Zhang Fan to visit GlaxoSmithKline after he was busy here.

This so-called investigation means a lot. Is actually looking for a chance to blend.

Commercial bribery, foreign play more high-end.

For example, people can operate you to become a member of an association, or hire you as a consultant to other people's company.

Lao Chen and Zhang Fan entered the elevator.

Lao Chen didn't wait for three seconds and began to call moshadong.

Zhang Fan is boasting, but Zhang Fan has face now. Lao Chen can't make others feel that Zhang Fan is unreliable.

After calling, Lao Chen asked Zhang Fan.

"Zhang Yuan, moshadong is very willing, and they will go to the meeting tomorrow. We've all notified one family. It's easy. If you have a little face, maybe we've all notified it. "

"Is that all right? We haven't discussed it yet. Why don't we invite someone else? Besides, Ms. Zeng and I also boasted. "

"Anyway, we'll have to find a partner at that time. It's convenient for you to be in Sandao now. They're not far away from what they can count. The family has notified. It's not good for your reputation, so it's simply open to everyone."

Zhang Fan thought and looked at Lao Chen. "It's still the old way of Chen Yuan! OK, just do as you say. "

Slept all night.

Zhang Fan got up early the next day and looked at the weather outside.

It's cloudy, rainy or not, sunny or not, and half dead, which makes people feel depressed.

Coupled with the surrounding Taupe architectural color, how to look at it, how to make people feel like the city is like people who haven't taken a bath for months. The skin is covered with gray shells, which makes people want to take a bath towel.

They say old buildings are good, old buildings represent the essence of human beings. Zhang Fan thinks what a broken house can show off.

After eating two sun eggs with xilanhua, I'm not used to eating. Xilanhua tastes crispy, just like pandas eat bamboo. It can only drink a few cups of black tea. It's like a big animal drinking too much water.

Do as the Romans do. You can't let others give you a bowl and a note.

Not long after the telephone inquiry, several cars stopped at the door of the hotel.

In the lecture hall of the Royal Hospital. Many experts have also entered the venue.

And many doctors came.

Because Zhang Fan's paper especially relies on clinical surgical techniques.

Therefore, it also interests clinical doctors.

With the development of medical treatment, in recent years, large-scale scientific research projects have long lost the figure of clinicians.

Especially in surgery, almost no one stood up to carry the flag.

Look at the Nobel Prize winners in recent years. They are professional doctors, either engaged in biology or biochemistry, or biochemistry or genes.

Zhang Fan and his party entered the lecture hall. The chief of surgery of the Royal Hospital supported the meeting. After Zhang Fan was introduced, the people in the hall applauded politely.

"Do I use English or Chinese?" It's going to play. Zhang Fan is tangled.

He thought that if such a serious meeting were held in China, everyone would have to speak Mandarin.

When the host made an introduction, he didn't understand it. The other party's oral English has particularly serious local characteristics.

"You speak Chinese. You speak English. It's estimated that you can't translate at the same time!"

After glancing at Zhao Yanfang, Zhang Fan stepped onto the podium of the venue.

"Good morning, fellow scholars. As we all know, the liver is one of the most important organs in the abdominal cavity.

However, there is still a long way to go for the control and treatment of liver diseases all over the world.

Today, I'd like to talk about the problems encountered by our tea vegetable hospital and its countermeasures... "

Surgical speeches often need blackboard writing to clarify the speaker's intention and the listener's understanding.

"The structural diagram of liver, gallbladder and pancreas is well drawn."

"Of course, I heard that one of his anatomical drawings sold for a lot of money."

Many experts under the stage looked at Zhang Fan's first-hand anatomical structure map, and they already felt that it was not in vain. Zhang Fan, a young expert, is not in vain.

This thing is to restore the original body structure.

But the anatomical map, as well as the author's own understanding of the body structure.

Therefore, there are many kinds of anatomy books.

After drawing the anatomical map, Zhang Fan began to talk about his speech on liver, gallbladder and pancreas today.

Pharmaceutical companies are also responsible.

People are trained. When Zhang Fan made a speech in the bird market, he gave a speech to a group of students. At that time, Zhang Fan estimated that his hands were shaking.

But now, Zhang Fan is really handy for this.

Chapter 1265

Zhang Fan's report on the liver, especially on the views of surgical methods, made the experts in the meeting frown.

In many industries, most experts are men, especially in the field of medical surgery. Almost all the top leaders are men.

And most of them are old men. And a match a long old-fashioned and stubborn.

As the old saying goes, it makes sense to follow your heart.

These old people don't look old and frail, but the academic power is in their hands. They even speak loudly in the three island surgical circle.

This kind of old man is not easy to compromise, so it will be much slower to accept new changes. From a positive point of view, they are the leaders of Sandao medical treatment, and even the leaders of digestive surgery in Europe. But in another way, they are also the ceiling of digestive surgery in Europe.

Take off these old men's suits, take off their ties and put them on the edge of the wall. It's no different from the stubborn old man in the sun in Zhang Fan's hometown village. When you see a girl's little daughter-in-law wearing a skirt of black silk, you can run to the other party's house and scold your mother.

"Segmented resection is popular in the world at present. Although it can reduce liver injury and ensure the conditions of postoperative recovery to the greatest extent. However, the biggest disadvantage of this surgical resection method is that it is often unable to completely remove tumor cells.

This is a kind of palliative treatment, which can not be called thorough treatment surgery.

However, central tumor resection in China is the most thorough treatment at present.

First, identify cancer... "

The following group of old men and a group of middle-aged fat men who are about to wear wigs.

"His general surgical approach is too damaging." In front of the meeting, the president of Wellington and the president of King's Hospital chatted with each other.

These two hospitals, Wellington and the king, are the hospitals with the most powerful liver.

"Yes, our hospital has also used the operation method he said. The failure rate is too high and the requirements for doctors are very harsh. There is no possibility of popularization. "

The old man like a king nodded and said to the old man in Wellington.

There are great differences in culture and habits on several continents.

For example, why are narcotic drugs rampant in Europe and America. This also has a lot to do with medical treatment.

European and American people's tolerance to pain can be said that the threshold is quite low. As long as the patient has pain, analgesic treatment will be given.

China, even the whole of Asia, especially East Asia, pays special attention to tolerance. Maybe many people have heard such a sentence.

When you have a fracture, you cry in pain. The doctor will say, "it's okay. Normally, stop shouting. This pain will promote the healing of your incision. "

That's right, but sometimes the promotion is really not worth it compared with painless.

However, with the cultivation of this habit, although there is ice and sea in East Asia, it is not like Europe and America. Even headache powder can get together and have a lie down.

Therefore, in terms of treatment options, when surgical treatment, Europeans and Americans tend to choose more conservative treatment.

Such as gastrectomy.

China and MARUKI countries, even the Bangzi countries that learn from Europe and America, cut the stomach directly from which lower part of the stomach is connected to the spout door.

Europe and the United States are not. They just kill the nerves secreting gastric acid in the stomach, and rarely choose this resection method of Asians.

Whose is better?

It's hard to say. The cause of reflux in China is that when you eat an egg, you may spit it out when you reach the duodenum or even the large intestine.

But not for life.

But in Europe and America, there is a risk of secondary surgery and taking medicine for life. However, people have a higher quality of life.

You let Asian patients choose. Asian patients often don't choose this kind of surgery that may have to be cut or take medicine for a lifetime.

So do Europeans and Americans.

Therefore, Europeans and Americans would rather choose conservative than risky ones.

"However, his tumor resection has not failed so far." The president of King's Hospital spoke with his nose pinched.

White, when he was young, he was very handsome to tell the truth.

But after middle age, it's weird.

Especially some people, who are tired of white hair, have another red nose and red neck. They really look like rabbits and turkeys.

"Yes, I haven't failed. What do you mean? "

"Let's look at his exposition on colon first. I don't want to cooperate with a liar."

"Good!"

To tell the truth, there is quite a sense that Lao Tzu is a developed country and you are a developing backward country.

Many people say that Han girls have married abroad, and then a group of people yell. In fact, few families above the middle class take Han girls.

Although other people's royal family have hemophilia and epilepsy, they think their blood is noble.

Therefore, the people who are difficult for Zhang Fan began to raise their hands.

Some came with academic discussions, and some came with Zhang Fan's skin color and country.

What foreign air is sweet and what foreign people are friendly are fooled by the party leading the way.

No one bothered Zhang Fan about the liver.

Because in terms of liver, Zhang Fan has made great achievements in war. Without mentioning his school, Zhang Fan has undergone surgery. All can be inquired, and all can make them look up.

But the colon, at present, is not good. Even if there is a paper, the number of operations still goes up. So someone raised his hand.

"Dr. Zhang, can you ask me about the colon?" A tall white man stood up.

Zhang Fan took a look. This guy is about the same height as Professor Stan with golden hair, at least 1.98 meters.

"Colon?" Zhang Fan is a little puzzled because there is no such item in the meeting.

When Zhao Yanfang stood up to oppose it.

Zhang Fan slightly raised his neck and held his head high. Like a primary school student who had scored 100 points, he said to the white man, "no problem."

Zhao Yanfang's teeth are broken.

"Zhang Yuan usually plays cards in such an uneasy routine?"

Lao Chen took a look at Zhao Yanfang. "The routine is playing cards. Our hospital is still a regional hospital."

In addition to Ouyang, Lao Chen is definitely Zhang Fan's lineage.

Even if Zhang Fan stood on the podium and danced a strip dance today, he would say that this is a common disease of genius, which ordinary people don't understand.

Of course, this also means that Zhang Fan is fooling around in the medical circle.

If this were in the hands of a Chinese spokesman, it would directly ignore the white man.

If you want to ask questions, follow my rules!

"After colon cancer lesions are removed, the lesions are removed to produce creatine. In your paper, creatine can lead to colon cancer metastasis, which is so certain in your experimental data of only a little over 100 sets. I'd like to ask Dr. Zhang.

Aren't you afraid to mislead other doctors. If there is an accident, can you be responsible for the death of the patient because you believe in your paper? "

"Well!" Damn it, Zhang Fan opened his mouth slightly.

There are such shameless people.

If you believe you can quote a piece of paper without saying anything else, don't use it if you don't believe it. Now some people say so.

Zhang Fan's temper came up.

I don't know why. Every time I go abroad, I go not only to Stan, but also to meatball country.

Zhang Fan's temper is very big. It seems that he is easy to get angry for no reason.

At home, Zhang Fan was famous for his good temper.

Isn't it right to eat and get hungry?

Zhang Fan loosened his tie and said, "who still has colon problems? Let's ask them together."

A doctor also stood up and asked for a microphone.

He said to Zhang Fan, "I'm a doctor in oncology at the Royal Hospital. I doubt some details of the operation described in your paper.

For example, your paper suggests that after tumor surgery, the depth of the edge of intestinal mucosa is 4mm. After tumor resection, if the thickness of intestinal mucosa is abnormal due to edema, how can you achieve such a deep drainage?

In other words, the tumor was not removed completely, but some conservative drainage was done on the lateral intestine at the lesion, but the swollen intestine alleviated the swelling.

Reduce symptoms and achieve what you call therapeutic effects? "

Questions, all questions.

Zhang Fan scolded his mother in his heart, "what's special? It seems that I don't make big moves. You all regard me as a hello KT meow with a headdress?"

Zhang Fan scolded in his heart, but his eyes brightened. Facing the eyes in the meeting, "is there any more?"

It's like saying, no one can fight!

Ten seconds!

Ten seconds of silence.

Zhang Fan pressed the pen, turned his head slightly to the blackboard writing behind him, and said to the people in the meeting: "you won't, doesn't mean I won't!"

Finish and start.

With a fountain pen, I drew three independent pictures on the blackboard.

This is Zhang Fan's specialty.

Others should have a detailed anatomical map of human organs.

Without tens of thousands or even hundreds of thousands of specimens, it is impossible to draw an organ grading map.

Even human faces are similar, not to mention organs.

The same is true of organs.

In ordinary surgery, this is similar and has little difference.

Even if the difference is a few centimeters, it doesn't matter.

But in special surgery, almost is almost.

And Zhang Fan, there is a system.

The anatomical maps of specimens collected over the years are more complete than any three Island Museum.

As soon as the anatomical map is out.

Zhang Fan continues to start with a pen.

"Here, it's a vein. When the tumor does not exceed 5cm and does not infiltrate into the intestinal wall, we can use a sharp knife to free the venous vessels first, and the intestines that lose vascular moisture will not be inactivated temporarily.

But there must be a temperature drop. When the temperature drops, the intestinal wall becomes brittle

and the ductility becomes poor.

At this time, the scalpel can..... "

Zhang Fan began to explain the operation process bit by bit.

Some confused nodes, through Zhang Fan's surgical anatomy, step by step, everyone from front to back, like a sea wave, appeared suddenly enlightened expressions in turn.

"Of course, the difficulty of this kind of operation, you know and you can do, are two different things. But for me, this is very simple! "

After explaining the anatomical map, Zhang Fan threw the water pen.

Look at the people off the court with a little contempt.

It seems to say, "come on. will you come. Two more! "

Chapter 1266

"I'm brother fan in society. I don't have many cruel words!"

Ma Yichen looked at Zhang Fan on the stage with envy. He looked at Zhang Fan on the stage with contempt for the heroes. The pony seemed to see his future. Clenching his fist, he couldn't help muttering.

"Little boy!" The head nurse smiled and patted Ma Yichen. The head nurse not only likes to tease Zhang Fan, but also likes to tease the excellent young male surgeons.

Zhao Jingjin and Zhao Yanfang looked at each other, especially Zhao Yanfang, shaking their heads with a bitter smile.

The two of them are relatively close. They are both capable of medicine and research.

Their bitter smile is because Zhang Fan not only doesn't play cards according to the routine, but also has great destructive power.

Because, looking at the stunned crowd in the venue, they now want to understand why Zhang fan can't integrate into the team of scientific researchers.

If so, what are the things that ordinary people can't forget all their life?

It's definitely not the first love, especially for men. When the two brothers are hot, don't say anything about the first love. It's estimated that the wife can forget it.

Women, however, don't hate animals or things inferior to animals in those days. It's hard to expect to miss and forget.

But when he went to the lottery shop, he found that he was going to buy it yesterday. As a result, his wife talked about wasting money, or he forgot not to buy it. As a result, he is now on the first prize list, naked millions or even tens of millions.

Don't forget, even when you are out of breath, you will look at Yan Jiansheng and talk about a string of more than ten digits. Your wife and family thought it was the password of a foreign bank!

And so are doctors.

Of course, it's impossible for you to expect a doctor to fool around.

The more aspiring doctors are, the more they can't see the disciplines they are good at, and the technologies they clearly understand and can't understand can't be realized alone.

Scratched by a cat, the meat is light.

Therefore, the more thorough Zhang Fan explained, the more despair a group of doctors felt.

They are the most clear group of people. People, people and people are different.

Especially in surgery.

Often some classic surgical methods will be abandoned slowly. It is not that the surgical technology can not keep up with the development, but that the doctor can not reach the height of the original inventor.

When Zhang Fan stood in front of the blackboard and looked at a group of people in the audience with a provocative look, there was an embarrassing silence in the venue.

How spicy it is when asking questions.

How embarrassing it is now.

What else do you say? People say it step by step from the structure of organs and tissues to the steps of surgery.

Even a live video.

The question is, if we look at it alone, if we can solve the problem, will there be more contradictions in the world?

Asians have gastric cancer, and esophageal cancer ranks among the best in the world. Whether it's a country where apples and cabbage are pickled together, a country where meatballs like raw meat, or a Chinese who can stew everything in one pot.

The prevalence rates of these two cancers are almost the same.

But liver cancer and colon cancer have almost become nightmares over their heads in Europe and America.

Therefore, when Zhang Fan has obvious paper support in liver cancer.

The Royal Hospital of big three islands hurriedly invited Zhang Fan to visit.

When Zhang Fan's team issued a paper on colon cancer, almost the world's top ten pharmaceutical enterprises ran to the three islands.

Are they really saints who love life and save patients from fire and water?

Go and ask. It's all money.

Europeans and Americans take wine as water to drink. Jinmao laughs at old maozi's drunkards, and they don't accept it.

Moreover, the amount of meat eaten, especially by Europeans and Americans, is more than that of people of any other race.

In other words, they are still saying day by day not to raise cattle. Raising cattle will cause excess carbon dioxide and raise the earth's temperature.

To tell the truth, while eating half cooked and bloody steak, people in other countries are not allowed to raise cattle.

I don't know how this brain circuit is constructed.

Meat, especially red meat, now has clear evidence that when it exceeds a certain intake, the risk of cancer increases exponentially.

If you bake it again, you don't have to think about it. It's not much different from playing extreme sports.

When song beauty arrived in the Golden State of Mao, after eating several meals of half cooked beef, she found that she was constipated.

Then half a century of enema began. This has become a legend.

It is said that people get up in the morning, stay in bed with their head empty for half an hour, and then slowly call people over for a Chinese massage, pinching from head to toe.

It is definitely not a horse killing chicken in Thailand, nor is it my big sword in the north and East.

Then call the doctor for an enema. Finally, eat some whole wheat bread. When it's noon, if you meet someone who must accompany you.

This is the occasional bloody steak.

It is estimated that when I went to Jinmao country, I was frightened by the colon cancer in Jinmao country.

But he lived more than a hundred years.

But ordinary people in the golden Mao country can't do it, nor can people in the three islands.

Not to mention others, getting up in the morning and lying in bed in a daze for half an hour are extravagant, which can be envied by 70% of people.

So, when Zhang Fan screamed with his eyes tilted.

The people below are not excited to turn Zhang Fan.

But how to let Zhang Fan teach them this technology.

Doctors think so.

Pharmaceutical companies are even more excited.

As long as Zhang Fan cooperates with them to complete the operation and separate the focus independently, they can test and find drugs to inhibit the tumor according to the focus.

At this time, I don't know who took the head.

Applause burst out.

Wow.

From a few people slowly, it became full of applause.

From full applause to all standing up.

Zhang Fan originally thought, and then jumped out a few people.

It turned out like this.

"Why are they so cheap? Why can't they talk well at the beginning? Hey, I still haven't read the gift well!
A country without culture is terrible! "

Zhang Fan muttered in his heart.

In fact, people like him have a character of eating soft rather than hard.

"Can you do some teaching operations in our hospital?" The president of the Royal Hospital, holding Zhang Fan's hand, smiled and felt that the wrinkles on his face had increased by three points.

"I have a request..."

Before Zhang Fan finished speaking, he was interrupted by Zhao Yanfang.

"What our dean means is that the selection of patients must meet the requirements. For example, you can't just be white!"

Zhang Fan listened to Zhao Yanfang's words and looked at Zhao Yanfang as if he had seen a ghost.

In fact, Zhang Fan wants money.

He's not stupid. He's so excited to see the people below. It's not too much to ask for a million units of pound currency for an operation.

As a result, he was interrupted by Zhao Yanfang before he finished his words.

"Not asking is the highest requirement." Lao Chen gently said in Zhang Fan's ear.

Zhang Fan is really worried. What if these things depend on their skin!

To tell the truth, there is an old saying in China that a country is easy to change, but its nature is difficult to change.

What education, what knowledge.

In fact, this is a slight adjustment.

A person's habits learned from childhood are almost difficult to change the day after tomorrow.

It is said that although Zhang Fan has little cash, he has sold his house and achieved financial freedom.

But no, every time he meets this kind of thing, Zhang Fan thinks: how much money can he make today!

Zhao Yanfang may not know how high Zhang Fan's technology can be, but she is too clear about Zhang Fan's habits.

Ask for a fund, just like asking for Zhang Fan's life, dig and search.

Therefore, she is really afraid of Zhang Fan's humiliation.

"Professor Zhang, what kind of instruments do you need during your operation. Our company is fully responsible. "

Ms. Zeng of GlaxoSmithKline seized the opportunity and gave it to Zhang Fan.

Ms. Zeng is really cheap! Don't have too many pharmaceutical companies that want to have a relationship with Zhang fanla!

"Well, I have a set of gastrointestinal surgical instruments specially produced by Olympus. Unfortunately, I didn't bring it! "

"Don't worry, don't worry. Our customized surgical instruments are no worse than theirs. Don't worry! And there is a signature fee. As long as you are willing, you will be given a certain signature fee for each set of equipment produced in the future! "

"Oh..." Zhang Fan is interested. Broke free of the hands of the president of the Royal Hospital. Zhang Fan wants to have an in-depth understanding with Ms. Zeng.

As a result, he was interrupted by Lao Chen again.

"Zhang Yuan, Zhang Yuan, give it to me at this time. How can leaders come forward in person for such a thing!"

"Well!"

.....

The three islands medical circle moved.

Almost some famous hospitals began to select patients.

"Abba, a gastroenterologist from China has come to Sandao. I heard that the gastrointestinal level is particularly high. Now there are three places for Chinese patients. You must stick to it. "

In a Chinese community, a middle-aged man whispered to an old man with white hair lying on his bed.

With that, the middle-aged man took all his family to Zhang Fan's hotel.

In the Chinese rich circle, for these three places, the dog's brain came out.

People say that Chinese are not united abroad.

I don't know whether it's true or not, but this time for this place.

We are really Eight Immortals crossing the sea.

For example, some people find out that Zhang Fan loves antiques. In particular, when Zhang Fan went to the meatball country to operate on xiaomeatball's son, he insisted on a porcelain from others.

It was also heard that Zhang Fan's real estate was released by a director of Mishima bank. At the beginning, his operation was performed by Zhang Fan.

And the white circle is even more wonderful.

People do ranking.

First of all, whoever donated more to the Royal Hospital was given priority.

Therefore, ordinary people are not particularly enthusiastic about the development of private hospitals in Europe and America.

Because it depends on the amount of Cary.

.....

When they first came here, the three islanders were ready to give Zhang Fan a blow, then give him some sweets, and then cooperate.

As a result, Zhang Fan turned the table.

This time, not only the reception party was held quite grandly, it is said that the old lady of Mishima had to find time to meet Zhang Fan.

Chapter 1268

The operation began.

Zhang Fan only saw the patient before the operation and did not contact the patient's family. Lao Chen is particularly experienced in such things.

"Whether there is a pit or not, we won't go." This is Lao Chen's original words.

Zhang Fan feels very right.

The gossiping industry in Mishima is quite powerful. If someone makes the news that Chinese doctors receive red envelopes, Zhang Fan doesn't care, but now, just like people who go out, even if they are poor, they can't open the pot.

But you can't let others underestimate it.

On the first day, I operated on an old white man in the morning. At the age of 70 or 80, the orbit was very deep. After rapid weight loss due to colon cancer, the orbit was deeper. It seemed that it was directly covered with a layer of skin on the white bone shelf.

The old man looks strange, but it is said that his ancestors were really rich. It seems that the throne is still the throne. He was originally a member of his family.

Of course, there are too many things called this thing. Even if it is true, Zhang Fan doesn't matter. After the founding of the people's Republic of China, even animals won't become fine. For Zhang Fan, this thing is dead and not buried.

The operation was done quickly.

This kind of operation is not very difficult compared with the huge tumor of the liver. Huge liver tumor surgery is dancing on the tip of the serious knife.

A bad jump is the end of the yellow egg dew.

Colon surgery is really hopeless. It's great. It's not enough to remove an extra piece of intestines. It's not a big problem. It's not impossible to get you an artificial anus.

However, this situation is too cruel. To tell you the truth, if people choose, most people would rather have a new mouth than an anus.

Therefore, when Zhang Fan's rather delicate surgical cutting, it shows that it is precious.

As soon as others do this operation, they dig a big lump of meat, just like killing a new year pig and taking out water.

And Zhang Fan didn't even use a little more intestines.

In the operating room and observation room, almost the head is next to the head, and there is no space for inserting a needle.

"Asian hands are so small. How can I learn. Shit! " A tall doctor looked at his fingers as thick as carrots, and then at Zhang Fan's fingers as thin as chopsticks. Take another look at the surgical field as small as a fist, and swear out of the observation room.

To tell you the truth, if the Chinese were not born eager for quick success and instant benefit, they really have inherent advantages over other races in the technology industry.

Don't look at the doctor. It seems that he only considers wisdom and knowledge. In fact, at the top level, congenital conditions are also extremely harsh. Apart from others, surgeons can't do heavy physical work by hand, and can't contact too hot and corrosive liquids.

This is particularly important. Let's take a look at a knife in a hospital. People's hands are always dry, almost like a wooden rake.

To tell you the truth, Zhang Fan's ten fingers can be insured by the insurance company. But I don't think anyone answered.

The first day, the operation was finished. The outside world of mansandao entered a strange environment and was silent. No one commented, no one stood up to say anything about Zhang Fan's

operation, and no one commented.

Because the operation is not difficult, but as Zhang Fan said, you know it's the same thing, and you can't do it!

The next day, the operation continued. The number of doctors in the observation room has not decreased, but has increased.

After the swearing doctors went out the first day, they thought about it and felt like they had suffered a loss, and then came again the next day.

Even some doctors from France across the Strait came.

In China, this kind of operation can be recorded on video. Even as long as a doctor goes to study, there is no problem.

But in Europe and America, this kind of knowledge technology or information, whether on paper or on TV, is very expensive.

Moreover, there are talented doctors in Mishima.

Before Zhang Fan's third operation, people had begun to prepare to imitate it on human specimens.

But what about this thing. Just like Chinese people use knives and forks and foreigners use chopsticks.

It looks absolutely simple, but it always means a little less.

If they are allowed to observe hundreds of operations, it is estimated that the difficulties of the operation will be overcome.

However, when none of the three machines arrived, this seemingly simple and difficult operation made the genius of Mishima cry in his heart.

At the end of the operation the next day, suddenly, there were many doctors in Zhang Fan's hotel.

GlaxoSmithKline in Mishima even wrapped up the hotel for fear of being intercepted by pharmaceutical companies in other countries.

Seeing is believing. When the paper talks about hype, they think it's just like that.

But now it's different.

Really, not only is the operation difficult, but also when Zhang Fan has undergone MRI and CTA, he can't see cancer cells at all.

Moreover, the removed cancer cells can directly enter the laboratory for drug sensitivity test without purification at all.

This is the level.

GlaxoSmithKline has almost put all the treasure that has not been opened for ten years on Zhang Fan.

Pharmaceutical enterprises often have a main drug. Such as Johnson & Johnson's immune drugs. Nohe's diabetes drugs.

This kind of enterprise is good at its own field. To tell the truth, it is directly the existence of monopoly.

Other companies, which produce drugs with relatively high efficacy, are among the top 10 companies in the world.

Brother a San is known to imitate all kinds of drugs in the world. However, its drugs, toxic and side effects, efficacy, decomposition in the body of drugs and drug resistance can not be compared with others.

Of course, it can only be said that a plaster that can extract poison is a good plaster.

In China, Chinese pharmaceutical enterprises can't say. If they make a little money, they are busy buying health care products.

For example, a pharmaceutical company near Bluebird. What is the whole specialty of production? Salvia miltiorrhiza injection and ginseng injection.

When you play traditional Chinese medicine, you learn from others' de Mao, make a Ginkgo biloba extract and kill the four sides directly.

But people don't, just make this kind of hanging and hanging medicine and give the doctor a strong rebate. A 30 medicine can give the doctor a rebate of ten yuan.

Then, full of clinical allergies. It seems that all Chinese people are allergic.

GlaxoSmithKline is also a hegemon in anti-tumor.

Therefore, they must catch Zhang Fan and never let other pharmaceutical enterprises get a little contaminated. The money is ready, and people still have two hands.

One is to give money. The other is to give Zhang Fan a title or an honorary academician through the old lady who is quite able to live. Anyway, just one word, at all costs.

on the third day. The operation entered the most difficult one.

The old man who fought against golden hair in China.

Compared with the others, the old man had no systematic and formal treatment.

Abdominal organ damage is particularly severe.

Surgery, almost impossible to enter from the front.

Once it enters, the cancer is removed, but it will cause necrosis because of ischemia.

In this case, it is very troublesome.

Doctors in Mishima began to work out an operation plan.

"Yes, enter from the side abdomen." That's a good idea, but there are too many lateral abdominal organs to pay.

"You can enter from the front, even if it is necrotic, but after all, the cancer cells have been removed." This is specially to raise the bar.

Surgery is to cure the disease and save people. It doesn't matter if you are dead. Where else should you do surgery.

We had a heated discussion for half an hour.

Zhang Fan didn't say a word.

Talking, everyone lost their voice. They all looked at Zhang Fan.

Zhang Fan has a good image. The upstart looks at his poor relatives and everyone who is doing it.

"Lao Zhao, what do you say!" After waiting for everyone to be quiet, Zhang Fan gently asked Zhao Jingjin.

Lao Zhao smiled, "Zhang Yuan is the main knife. I listen to Zhang Yuan!"

"Yes!" Zhang Fan nodded and looked at Dr. Mishima in a circle "The three-level diagnosis and treatment system, have you failed to abide by it? "

With that, the people in the meeting hall were white, with a monkey red face.

Some are unconvinced" Professor Zhang, we said almost all the surgical paths. If you have no special

ideas, please respect us and technology. "

Although others did not support, their expression was that if Zhang Fan couldn't say one, two or three, they would definitely go out and publicize Zhang Fan's domineering.

The president of the Royal Hospital pretended to reprimand his young doctors, but he still wanted Zhang Fan to explain.

"Oh, almost! Can medical say that? Almost, a little. This is human life, not your doll.

Respect, what is this place? This is a hospital. We should respect the health and life of patients more. We don't understand and don't let people say.

If you don't want to hear it, get out. "

Zhang Fan is unusually angry. He scolded out.

Unfortunately, because of English curse, Zhang Fan felt that his level could not reach. After scolding in Chinese, the other party is still in a daze and has to wait for the translator to translate.

This effect is discounted. Zhang fanslightly has no choice, mother. No wonder others say that taking a foreign woman can't quarrel with the essence.

No effect. Zhang Fan didn't think about it and continued to find fault.

Pick up the blackboard directly and start teaching on the spot.

"Watch it!"

Direct the anatomy of a human body in the prone position.

"Enter from the rear, cut off the ribs, release the spine, and then go from the rear to the colonic position. The organs above the colon don't move a needle! "

With that, a group of doctors looked confused.

"It's OK, but I haven't contacted the orthopedic doctor. Now they have no time to discuss the orthopaedic surgery plan! "

Zhang Fan's method is very good, but it's not that others didn't expect it, but because they didn't contact orthopedics in advance, we automatically ignored this scheme.

"Contact orthopedics? No, I'll do it myself! "

"Well!" I thought Zhang Fan's plan couldn't be better.

But when people put forward a plan, they don't have to find any orthopedics. They do it by themselves.

That's a little exaggerated.

Everyone looked at Zhang Fan strangely.

"Oh. Sorry, I forgot to introduce you. Our Zhang hospital is actually an orthopedic doctor! "

Zhao Jingjin solemnly said a word to all of you with a pure London accent!

Chapter 1269

When Zhao Jingjin told everyone that Zhang Fan was an orthopedic doctor with a very gentlemanly expression, rhythm and etiquette. The foreigners below opened their mouths one by one, as if the birds were waiting for the old birds to feed the insects.

The crossing is a little big, and the people under the stage can't accept it.

Modern science and technology, especially in recent decades, has developed very rapidly in the field of surgery. It's hard to be a top doctor in a department.

As a result, the Chinese young man standing on the stage today is proficient in orthopedics and general surgery. Be good ~!

Early surgery, the so-called difficult surgery, is actually a high injury surgery.

Because this thing, after the damage is too high, it often brings more uncontrollable risks. In the early years, Chinese doctors, like the restless society, liked to be thick and strong.

An operation that doesn't shed three kilograms of blood is not an operation. If the patient is still alive after bleeding three kilograms, it can be said that he can be rescued. Darling, the doctor is awesome.

In those days, killing a man on the operating table was like killing a chicken. Family members will not be prosecuted easily.

But this was also the era of the most famous doctors in that era. When did the ancestor of general surgery, the master of women and children, and a knife in orthopedics come from.

It's contradictory.

The difficulty represented by surgery was actually assigned after the 1990s.

One is micro operation. For example, for all kinds of endoscopic surgery, for the same patients, one doctor can do it with endoscopy, while another doctor can only open his stomach and pull his intestines with a knife. This is the difficulty, and this is the generation difference in level.

The other is compound surgery.

For example, lumbar fracture, the damage is the bone on one side of the abdominal cavity. If it needs to be fixed, it cannot be fixed if it enters from the back of the spine. I can't even see a fracture.

At ordinary times, it seems that a beautiful woman's waist is not too thick. Unexpectedly, she can have A4 waist, but if this thing is really broken down, take it in her hand. It can definitely let you hold your hands like eating pig bones.

Therefore, this kind of operation can only let the general practitioner open his stomach, pull his intestines aside, and then hand it over to the orthopedic doctor to put on the nail.

The orthopedic doctor Kaka, after hitting the nail, handed over the operation to the general surgery.

In the early years, in the era of major surgery, this kind of surgery can be handled by a department or even a doctor. Of course, there are not many such talents!

With the improvement of medical level, a department can't really handle this kind of operation.

The modern world's top compound department is only a compound Department of internal medicine. In the early years, the Department of surgery was state-owned. Later, I learned from Lao maozi, and then I had nothing. Canceling a large department is not only bad, but also good.

So far, the medical community has not reached a conclusion whether it is much better or much worse.

In the early years, we paid attention to segmentation, that is, the finer the better, which is just the opposite of men's dreams.

In recent years, some have begun to study how to merge.

Therefore, when Zhang Fan said that he could do orthopedic surgery or spinal surgery in orthopedics, the people under the stage had a rhythm of cheating your mother.

Even if a doctor who is very powerful in liver and gallbladder can perform colon surgery. We also put up with it. After all, they are all under the jurisdiction of ordinary foreigners.

But your head hasn't turned yet. You tell me, you're actually an orthopedic doctor. This is bullying, okay.

Of course, there will certainly be no bragging at this level. Therefore, everyone felt even worse.

Ordinary doctors, it doesn't matter. Anyway, it doesn't matter whether this is a doctor in the Department of sex (a) or someone who specializes in delivering dolls, because they can't do Zhang Fan's colon surgery.

Now they are thinking about how to improve their level by observing and learning.

Although the improvement is not much, it is better than not improving.

But some talented doctors are sad.

This shit hasn't finished the intestines of ordinary people. As a result, this man can be a carpenter again.

It's really annoying.

There was an awkward silence for three or four minutes.

Everyone seems to have collectively entered a state of sleep. They don't know what to say.

Zhang Fan was a little disappointed: "Hey, he is also known as the royal family. He is not even as good as Lao Chen in our hospital. If Lao Chen, he would have started to jump out and hold me!"

When Zhang Fan thought this, he suddenly found that Lao Chen's goods now let him have a dependence on him!

It's really meaningless that there are no people with the same culture to show off.

The result Zhang Fan wanted didn't appear. These foreigners are now collectively mute. They don't even have a flatterer.

"Who has any objection to the operation plan?" Zhang Fan gently picked up old Chen Pao's Tieganyin, took a sip, looked at the people below and asked.

What's the objection? It's beyond their scope.

It's like an exam. It's clearly said to test the mathematics knowledge below grade 6. As a result, the paper came down and looked at the additional questions of grade three. Moreover, the person who took the same test was still a college student in the Department of mathematics!

"You still have to work hard to be a doctor. Don't be proud to have an operation every day. People who think they are cow are all because the circle is too small!" Zhao Jingjin made up a knife in real time.

Then Lao Zhao looked at Xiao Zhao and Zhao Yanfang.

Because Lao Zhao felt that his English translation did not transfer the level of the essence to the following people, he looked at Xiao Zhao.

But Xiao Zhao's face was confused. You asked her to write a professional medical paper. There was no problem at all, but Xiao Zhao couldn't think of that sentence in English for a time.

"Hey!" Lao Zhao looked at Zhang Fan and shook his head.

Zhang fan understands!

Lao Zhao knows!

Lao Chen knows.

Pony knows!

This is the tacit understanding. This is the cultural inheritance of the fetal belt.

The operation began.

This time, I heard that an orthopedic doctor who can perform hepatobiliary surgery and colon cancer surgery should enter the abdominal cavity from the rear.

A group of orthopedic doctors came to watch.

It's a tongue twister, but that's the reality. What ordinary doctors dare not think of actually happened.

In the operating room, Ms. Zeng wore the hand washing clothes of itinerant nurses and showed extra respect for Zhang Fan. Unexpectedly, she bent slightly.

"Professor Zhang, the surgical instruments are ready for you."

Zhang Fan didn't take it seriously. Customized surgical instruments. It took a week last time marukuni

got them.

But not quite. They got Zhang Fan a set in three days.

This is the same as when a good wine man sees Qiong wine hoarded for hundreds of years and a man sees a beautiful thing. Zhang Fan knew that others wanted something, but he couldn't help taking it.

"Very weighty!" Zhang Fan ordered some weight. Obviously, the outer box is made of aviation aluminum alloy., This thing doesn't weigh much.

Open the surgical instrument box.

From suture needle to electric drill, it is directly equipped with surgical instruments that can be used in general surgery and orthopedics.

"In a hurry, small objects, such as sewing needles, are not customized, but they are also the best in our company."

Ms. Zeng looked at the expression on Zhang Fan's face.

She finally saw the heartfelt smile on Zhang Fan's face.

Because the surgical instruments prepared by others this time are too sweet.

For example, sharp knives, tissue scissors and thread scissors are all conventional. Zhang Fan is equipped with iris scissors from large to small.

I really mean it.

"This scalpel is not from your company, is it the snake brand of de Mao? I can't afford this! "

Zhang Fan doesn't mean that he can't afford it, but that patients can't afford it, because this kind of consumables are produced by patients.

For example, the snake brand blade, which is disposable, is extremely expensive. A small blade is close to \$200. To tell you the truth, it's a sin to use this blade for ordinary surgery.

Although Zhang Fan wants to commit evil, the conditions are not allowed!

The drug dealers who can enter the operating room of the Royal Hospital are such big Mac pharmaceutical companies. Other companies don't think about it.

"An expert is an expert. You can see it at a glance. Because in terms of knives, our company really can't do better than snake brand. Therefore, we used snake brand knives. Don't worry. As long as you like,

our company will supply all your surgery and instruments free of charge in the future. And not limited. "

Zhang Fan's heart was really itchy.

"Try it today. Take it to disinfect! "

Ms. Zeng smiled, not afraid that you are not easy to deal with, just afraid that you have no hobbies!

Today's operation is really a super luxurious operation.

Surgical instruments, a specific version of the same color. If this thing counts money, it's estimated that you can buy a cool Luze of Zhang Fan, but you don't have to buy it. It's no exaggeration at all.

The operating room is the latest operating room with the most scientific and technological content in Sandao Royal Hospital.

Even the locker in the dressing room is fully automatic. Zhang fan can't pull it out when he looks at it. He kept asking the president of the Royal Hospital how much the operating room was.

Head coach Zhao's head is so low that it's almost stuffed into loose surgical pants.

"Just like a Tibetan mastiff with a changed face, you can't stand scolding others. Now, like a person who has nothing to do, holding someone else's hand and being intimate is like meeting his in laws. It's shameless! "

Zhao Yanfang can't despise Zhang Fan. She knows that Zhang Fan sometimes doesn't want to be ashamed. She didn't expect to be so shameless.

Four large 70 inch displays, two display preoperative impressions, one display MRI real-time image navigation, and the other is a three-D display.

I won't say anything else. I won't say anything about bedside CT or artificial lung.

Even the special chair of the main knife makes Zhang Fan envy.

This chair is called the emperor chair. This chair can not only adjust the seat angle, but also adjust the height up and down to ensure that the operation angle can pull the tissue at least, so that the operator can maintain a comfortable state in the long-term operation.

More importantly, the front of the surgical garment is equipped with an adjustable hand frame to ensure the stability of both hands. The two foot pedal is automatically connected with bipolar electrocoagulation and grinding drill, and all instruments are placed in the most comfortable position. Sitting in such a position, the chief surgeon is like "God", completing the sacred and life-saving feat.

After looking around the operating room, Zhang Fan made up his mind.

What special honorary academician, what Duke and Duchess, you can't fool me. I must get such an operating room to return tea today!

Chapter 1270

Some people are famous and care about what others say or think. They don't know whether they have inferiority or pride in their bones.

Zhang Fan is not. He was not an excellent student since childhood, and because of the conditions at home, he is actually a bit of a pragmatist in all aspects.

If you don't meet Batu or Ouyang after work, it is estimated that Zhang Fan may like other young people to have a little reputation.

Or like a little vanity.

But after work, that is to say, when Zhang Fan's highlight moment comes, what leaders will he meet.

Batu, as long as it is useful to him, he has no need to win over.

Ouyang, an old lady who can squeeze oil out of stones.

Zhang Fan, who was originally a relatively small citizen, was influenced by the two leaders. To put it better, Zhang Fan is pragmatic!

It's hard to say that you can't get up early without profit.

The president of the Royal Hospital looked at the way Zhang Fankou was about to flow down. The tone is quite polite and the attitude is quite intimate.

But just don't let go.

They are all doctors. How can they not understand doctors.

Because Zhang Fan's greedy eyes can't care about his potato eggs. English is not smooth.

It can be said that Zhang Fan, who was forced, began to lose face.

But this is also the Lord who does not see rabbits and does not scatter eagles.

"Professor Zhang, we'll have an operation first. We'll have a lot of time to visit after the operation. If you like... "

"I like it!" Zhang fandou can't wait for Zhao Yanfang to translate.

"Operation first, operation first!" This is embarrassing, too.

Because it's too expensive.

Expensive, they have only one hospital!

The operation began.

This kind of compound operation is very troublesome. If you find a popular description of this operation, it is like digging a tunnel to the bank to get money, rather than directly breaking through the door to get money.

Although they all take money hard, tunnel diggers should be relatively quiet, move little and detour.

Today's operation, in fact, is to dig a tunnel. It can't collapse or make too much noise for other organs to find.

The chief surgeon Zhang Fan, the first assistant Zhao Jingjin, the second assistant Ma Yichen, the instrument nurse and the head nurse of the operating room. Surgical translator Zhao Yanfang.

Anesthesia is the chief anesthesiologist of the Royal Hospital. The itinerant nurses directly sent six tall, white and fat nurses who stood up and were bigger than Zhang fantou.

The status of nurses in Europe and America is higher than that in China. Even nurses with prescription rights are better than young doctors.

But even so, most of these posts are descended from Asia, Africa and Latin America. There are few traditional whites.

The operation, a one-time out of six tours, but also tall, white and fat. This puts a lot of pressure on the head nurse.

In terms of stature, the head nurse holds her head high in the tea vegetable hospital. But in front of these tall, white and fat, the head nurse was as thin as a flat princess.

Moreover, these nurses are obviously all nurses with prescription rights in the operating room. From their eyes, they can also see that they are picky.

So the head nurse is under pressure.

Although the head nurse teases an excellent young doctor when he is free, he is proud in his bones.

Therefore, the operating room has a taste of competition from the beginning.

The slightly frosted black surgical instruments are neatly placed on the surgical tray in rows. In the observation room, orthopedic doctors and general practitioners all pay attention to Zhang Fan in rows.

The operation observation room of others is different from the observation room of tea.

The observation room of tea vegetable is a video hall, which is observed through the display. Because considering the operation of doctors, sometimes some special operations, the camera can't shoot at close range.

The observation room of Mishima is covered above the operating room. There is an arc-shaped glass cover above the operating room.

The observers are all around the arc-shaped glass cover, so it has a slight condescending smell.

Moreover, this glass seems to have the function of magnification, so it is quite intuitive and clear when the people above see the operation.

After Ma Yichen had eliminated the poison and covered the hole towel, Zhang Fan gently said, "sharp knife!"

"William, GlaxoSmithKline seems to have made a heavy bet. Look at the set of surgical instruments he uses." A young doctor in general surgery and a young doctor in orthopedics whispered.

In large domestic hospitals, the competition among doctors in departments is particularly large, while it is the same in foreign countries. Especially in this top hospital, the position competition is more cruel.

Chinese hospitals still have a staffing system, but foreign hospitals are different. No one can be guaranteed, and they will be replaced by others one day.

Therefore, the relationship between department personnel and other departments has not been good.

"Yes, this is a custom version of the device. This instrument is numbered and has special symbols. You see, the instrument number is 11, and there is a CZF mark. "

"Well, it's estimated that the material of this instrument is better. It may not be better than the general version. "

To tell the truth, the surgeon doesn't envy the owner of the customized version of this instrument. It is estimated that the surgeon himself has a set. Otherwise, it's definitely that the children in the kindergarten don't drool when they see cotton candy? It's good not to cry.

"No, it's easy to use. Our last director had a set in his hand. When he was happy, he asked me to use the scalpel once. It's easy to use. It's like his fingers. The feeling from the blade can be well fed back to your extensor muscles."

The orthopedic doctor named William has an expression that seems to recall that year. And the young doctor of general surgery, looked at it, and then... Friends!

The tip of the knife crossed the skin, although it didn't have the sensitive feedback William said.

However, the blade separation tissue will never give you a little feeling of obstruction, just like touching lubricating oil.

The surgical path is not clear in Zhang Fan's brain.

Therefore, the operation is carried out very quickly.

"Reduce intravenous pressure!"

After entering the skin, Zhang Fan's speed still did not decrease.

Cut the fascia and cut off the longissimus muscle. The fingers are blunt separated in the assembly, and then touch the facet joint.

This set of techniques, Zhang Fan told the truth and did quite well.

The orthopedic doctors at the Royal Hospital, especially some young doctors, went crazy directly.

"God, Holy Mother, he found the weakest part of multifidus at once! My mother, he must have God to help him ~! "

No wonder they were surprised.

Spinal surgery, often muscle is a quite troublesome thing.

This thing, cut the skin, open the fascia, directly is a lump of steak.

This kind of muscle is functional muscle. It is also a cooperative muscle group of the Legion.

For example, bending and side waist need them to complete. Or when men and women fight in bed.

Women raise their legs and men bend their waist. This thing needs a lot of waist muscles to match.

If it is damaged, let alone bend the bow, even wiping your ass is a problem.

Therefore, top spine doctors, when entering here, will look for the weakest place, and then gently separate the muscle groups with their fingers to separate the gap between them.

One finger, through the meat. We should not only break down the gap between muscles, but also damage blood vessels and nerves.

It feels simple to die.

To tell you the truth, it's very difficult. I don't have much strength. It's just one place. It's hard to find.

So when Zhang Fan put a finger in it.

Bursts of exclamation rang out among orthopedic doctors.

Because the speed, accuracy and technique are so beautiful. It's like an old hand taking off a girl's clothes.

The girl didn't react yet. As a result, all her clothes were taken off!

Doctors in general surgery despised orthopedic doctors for a while, like watching a group of two fools enter the city. They have never seen the world.

In fact, this technology is mainly incomprehensible to doctors in general!

Entering the muscle, the incision exposes the spinous process and vertebral lamina.

Electric knife hemostasis.

Not much blood came out.

Then separate the ribs, Ka! Click! Click!

Like a man with good teeth bites a thin skinned walnut.

The ribs were bitten off by bone biting forceps, which was crisp and could not help the general foreign doctors in the observation room to touch their ribs.

Enter the posterior abdominal cavity obliquely.

At this time, it was the turn of the general foreign doctors to marvel.

Because when Zhang Fan opens the posterior abdominal wall, the colon tumor is directly squeezed out of the posterior abdominal wall like the acne on the face of a person with free hands.

Without separation, the tumor was directly exposed to everyone's eyes.

One precision may be luck, two or three times, which is technology.

This kind of tunneling, directly in front of the lesion, does not need to damage a little extra tissue. Really, one more point and one less point can't achieve the effect of cancer hitting the face.

That's a cow.

Really, from positioning to taking the knife, Zhang Fan didn't use bedside CT and C-arm. Direct is blind.

This thing, how to describe it.

In fact, it is to dig out the only underdeveloped melon seed in Seedless Watermelon with a knife. Of course, you can't cut the watermelon in two with one knife. You can only make a small eye.

And Zhang Fan's current operation is actually like this.

"Wipe your sweat!"

The tall, white and fat nurse gently wiped Zhang Fan's forehead with gauze.

"Separate the focus!"

With the exclamation of general foreign doctors, orthopedic doctors looked at general foreign doctors with contempt. Because it's the orthopedic doctor's turn this time.

Pull, hold gauze in your hand, gently wrap it in your intestines, and then pull.

Once, pull it out a little, and then the intestines go back a little dissatisfied like a fat insect.

Then gently pull it out a little and go back a little.

Because the tunnel is too thin and narrow to operate in the tunnel. It can only be pulled out.

"He is really an orthopedic doctor. Although this operation does not need to fix the spine or repair nerves, his operation path is an obvious precision orthopedic spine operation."

The president of the Royal Hospital said helplessly to the president of the king's hospital.

Originally I wanted to go down, but now I can't go down.

"What if he asks for this operating room?"

"Well! I don't think so. Doesn't it mean that Chinese people are very introverted and polite? "

"He probably won't be polite. You saw it before the operation. He touched the instruments in the operating room and was about to kiss! "

Chapter 1271

Although the president of King's hospital didn't wear a smile, the crow's feet slightly spread out in the corners of his eyes showed that the old man was gloating.

The Royal Hospital and the king's Hospital sound like one, but they are not.

The two companies are particularly competitive because they are both in the fields of liver and digestion. It is estimated that Mishima people are not very good at cooking, which leads to many digestive system problems.

Therefore, the two hospitals are actually a bit of a big brother. But the Royal Hospital has the biggest advantage, that is, the family is the illegitimate son of the royal family. Most of the medical donations of the royal family and the rich are given to the family every year.

The king's Hospital also has a name. Therefore, although the king's Hospital also has such an operating room, it is a reduced version.

As for the manufacturing difficulty of medical instruments, some are absolutely no easier to manufacture than some high-precision military equipment.

In the past, China had no money and couldn't afford to buy it. Later, Chinese people became rich, but foreign goods began to be restricted.

Many medical instruments can also be copied by Chinese people, and there are not many things that can defeat Chinese enterprises.

However, people have been rich for several generations. You can't catch up with China in decades and less than a hundred years. For example, there are some bearings in the instrument and some motherboards.

You said the bones were broken into pieces. Zhang fan can spell them, but Zhang Fan really doesn't understand the things in the instrument.

He thinks that you still restrict the sales of things that can save people by seeing a doctor. Why don't you die.

Europe and the United States have a black heart. The Chinese people can't sell CT in those years. What people sell CT has become the gold price. In the hospital with CT in those years, there was no wooden floor in the president's office, but for CT, the decoration was like entertaining the president.

Doctors and nurses have to wear professional dust-proof shoes, not to mention, this thing also has rotational rest. Really, doctors and nurses in those years were not as expensive as this thing.

At that time, Chinese manufacturing enterprises were stuck on some ball in a CT.

When Chinese enterprises overcome this technical difficulty, well, these goods in Europe and America began to sell at a lower price.

It is estimated that people engaged in medical treatment have found one thing, that is, it seems that in the 1990s, suddenly a hospital can afford CT overnight. This is not the kindness of European and American people. It can't be stuck!

Therefore, it makes sense that Ouyang agreed with Zhang Fan to go out and have a look.

Because people don't sell you many things, they don't even provide data.

The leaders outside the operating room are distressed, really distressed.

Not to mention the others, it's a chair for auxiliary surgery, the so-called emperor's chair. It looks like an iron chair for barber in the early years, a swivel chair with a seat.

But this thing is actually a large system, from imaging system to analysis system and stability system.

The biggest function of this device is to stabilize the doctor's hand. If a doctor's hand could have performed a millimeter of surgery, with this device, it can directly improve the precision by almost ten times.

For ordinary doctors, this thing is dispensable. Because of it, you can't do too high-end surgery.

For top doctors, this can fill the doctor's weakness or improve the advantage. It's like a stimulant.

If you run a hundred meters for 14 seconds, you can't get in 10 seconds after taking stimulants.

Therefore, a set of millions of euros is no problem. Moreover, the most important thing is that the output is not high, and almost only one or two companies in the world can produce some bits and pieces.

Just one chair is so complicated, and then the other things add up. Such an operating room is not much cheaper than the whole assets of the tea vegetable hospital.

"Can his operation be replicated?" The president of King's Hospital looked at Zhang Fan's operation and asked.

Anyway, they don't have such an operating room in the hospital. He doesn't have to worry about it.

"At present, very few doctors may be able to achieve it under the auxiliary system, but the operation speed is definitely not as fast as him, so we estimate that we can't complete this level of cancer tissue required by GlaxoSmithKline."

The president of the Royal Hospital was slightly disappointed.

Originally thinking, let his geniuses watch, and then fool Zhang Fan with some certificates of honor, and then teach his geniuses.

What GlaxoSmithKline needs, there is nothing for Zhang Fan.

Unfortunately, the idea is really good, but the following doctors can't do it~

.....

As the operation went on. The cancer focus has been cut off. The surgical instruments given by GlaxoSmithKline to Zhang fan are easy to use, and the surgical equipment is better.

The more Zhang fan does, the more he likes it.

"Lao Zhao, does China have such an operating room?" After working in a hospital with Zhao Jingjin.

The relationship between the two is much closer than before. So I'm not so polite.

"At present, the digital hospital has a relatively complete set of equipment, but..."

"What about other hospitals?" Zhang Fan directly interrupted Lao Zhao.

On weekdays, Zhang Fan and Ouyang of Likeng digital hospital are not soft at all. When he went abroad, Zhang Fan didn't want outsiders to understand some things. Whether outsiders know it or not, they just can't leak it from me.

"The doctrine of the mean" only has an automatic manipulator, and the program is the original foreign version. Xihua dental has a set of self-developed. There are also some hospitals in Mordor, but they are not complete. "

Lao Zhao thought about it and said.

After all, Lao Zhao had a high starting point, and he was born in the top three. Higher than Ouyang's starting point. So I know more.

"What about the meatball country?"

Zhang Fan asked again.

"Marubeni is state-owned. There are several such operating rooms in Jingdong hospital."

"Where's golden hair?"

"Well! There are more golden hairs. There is a hospital with more than a dozen such operating rooms! "

"Well! I see. This surgical instrument is still very useful. " After knowing the information, Zhang Fan immediately began to change the topic.

The operation has begun to close the incision, so it's easy. The doctors in the observation room have slowly evacuated.

Some people feel inspired. At this time, they hurried to find a quiet place to think.

Some feel that they have been lonely for three days. In three days, it depends on the Chinese people below. After a round of surgery, I feel I can't do the original surgery.

This is like learning to walk in Handan. Without a breakthrough, I knocked my original accumulation to the ground.

It's like some mathematicians of civil science who can't think normally in the end.

"Shifu, Shifu, you didn't give me a gift or anything when I was a teacher. Zhao Yuan, do you usually give disciples something, such as a set of surgical instruments? "

As soon as Ma Yichen heard Zhang Fan show off his surgical instruments, he immediately continued to talk. And the bastard knows how to pull foreign aid.

From the beginning to the end of the operation, when Zhang Fan is in a good mood, he will chat when closing the incision. No matter whether you are in a good or bad mood at other times, you won't talk much.

Although Ma Yichen didn't use the scalpel and other instruments in this set of instruments, he used thread scissors and tooth tweezers from beginning to end.

I don't know whether it's psychological or good. Anyway, Ma Yichen is a little greedy.

But Zhang Fan, he knows too well. It's too difficult to want the surgical instruments that Zhang Fan likes.

"Ha ha!" Zhang Fan wants to scold and give you a hammer. But when I think about it, I'm also someone else's master.

"Really?" After thinking about it again, it's not easy for children. At the beginning, he really didn't give others anything. When he didn't worship the teacher, old man Lu gave himself a set of books.

Later, he helped him regardless of return. Now that he is a master, he should also look like a master.

"Yes, I won't choose. Just this one." Ma Yichen would have rubbed his hands if he hadn't been on the operating table.

"This set doesn't work. People have names on it. It's inappropriate to give it away." Zhang Fan is also reluctant.

"In this way, Ms. Zeng will be at the door later. I'll ask her if she can send more sets." Zhang Fan thought and said.

Lao Zhao was worried: "this, this, Zhang Yuan, in fact, I also need it."

Lao Zhao pulled down his face and robbed Ma Yichen. The alliance became an enemy in an instant.

"OK, I'll ask and see what people's attitude is."

"Zhang Yuan, don't worry about this first." Zhao Yanfang objected. Then, disregarding the angry eyes of Ma Yichen and Lao Zhao, he said directly, "this is how much and how much. Can't you open your eyes a little wider. Let's get down to business! "

"Well!" Three men were pushed to the corner by a woman and couldn't say a word.

The three men suddenly felt as if what they were talking about was really trivial.

Fix the ribs, suture the fascia and close the skin.

The operation is over.

Zhang Fan silently recited three sentences in his heart: don't have a general knowledge of women, don't have a general knowledge of women

Out of the operating room, Ms. Zeng held her hands in front of her lower abdomen as if she had been standing at the door. Her posture was absolutely standard.

It's not that people don't have cards, but that Zhang Fan's resources are too scarce.

To be honest, it's too difficult to develop drugs.

That is to say, it takes about ten to fifteen years for a successful drug to be discovered, developed and finally put on the market.

And the three phases before a clinical trial alone will take about 6 to 7 years. When it comes to the market, more than half of the 20 years of patent protection will have passed.

Therefore, if a new drug can be determined to be effective, it can directly make these pharmaceutical enterprises crazy. Other drugs, let alone the God drug of that year, xiumeile. This thing is a medicine for rheumatoid, ankylosis and Crohn.

This one was sold for 7000 in China at that time. A patient needed about 200000 a year. At that time, the cost of the drug was recovered in three years in the Asian market.

If it's anti-cancer drugs, it's more violent. In Europe and America, people have said that those engaged in arms may not be richer than those engaged in medicine.

Therefore, as long as it is clear that new drugs can be produced, this group of people will definitely lose money. Zhao Yanfang and Lao Chen are always worried that Zhang Fan has sold gold as a stone.

Medical treatment, China is now chasing Europe and America, and can already see the hair on the buttocks of Europe and America. Some industries have even waited for the gap between Europe and America.

But the pharmaceutical industry can only look into the distance at present.

In the current world, there are about 20000 new drug R & D, with golden hair accounting for 50% and Europe accounting for 40%. China is barely 3%, and many of them are subsidized with sheep's head covers. Often the professor has changed his wife three times, and the clinical trial is still far away.

This thing can't be said.

When seeing Ms. Zeng, Zhang Fan was not very excited. How he hoped that at this time, the people waiting at the door were Chinese pharmaceutical enterprises themselves.

Chapter 1272

"Professor Zhang, hard work. Your doctor is really noble, saving lives and healing wounds. I don't know if our surgical instruments are easy. "

Ms. Zeng smiled so charming. The head nurse who followed Zhang Fan out gave each other a look.

"Fox!" She said something in Zhao Yanfang's ear.

In fact, the head nurse envies the necklace under each other's neck. Women look at women like precision missiles. Swish, you can find the most expensive pendant on each other's body.

According to Ms. Zeng's position, if she is an ordinary doctor or an ordinary expert, she will never guard at the door of the operating room like a doorboy.

Because their company has fallen from the top three in the world in the early years, and now, although it can enter the top ten in the world, it has no fist products in the sale of drugs.

In the world's top 20 drug sales list, their company doesn't have any drugs.

Pharmaceutical enterprises are actually similar to other industries.

There must be a flagship fist product, and then bring the surrounding products.

For example, the blockbuster Lianhua Qingwen, in the early years, who knew this company, not even health products and injection drugs for promoting blood circulation and removing blood stasis, who knew this company.

But in the year of the flu, Roche sold oseltamivir, the so-called Tamiflu, and the price soared from more than ten yuan to hundreds of yuan. It returned to its original cost in one winter.

That's it. Ordinary people can't buy it! What should we do? In those years, even the flowers were in the forefront of clearing the plague. This is the fist product of other people's company.

Among the top three drugs in the world, the first is xiumeile, the second is kerida, and the third is ruifumei. The annual sales of these three drugs are \$15 billion, and xiumeile even exceeds \$20 billion.

Kerida inhibits cancer cells, such as gastric cancer and melanoma, while ruifumei inhibits bone marrow cancer. As for the first xiumeile, it is almost the last line of defense for rheumatic diseases.

These drugs are macromolecular drugs, not small molecules. The research and development of macromolecular drugs is extremely difficult. And the requirements for technology are also quite high. You imitate a small molecule, according to the current level of China.

It's almost no difficulty, but macromolecular drugs are different. It's almost as difficult as building a Boeing plane.

There is no GlaxoSmithKline in the top three and no GlaxoSmithKline in the top 20. Their main drugs have either passed the patent period or have been imitated by other countries.

So now they urgently need a main product. Just right, colon cancer is their advantage. Now sleepy meets a pillow. Zhang fan can lift the tumor with the most accurate surgery.

This allows the scientists in the laboratory to enter the key node at once, avoiding the most difficult step and creating a normal physiological environment for cancer cells.

There are about three kinds of cancer cells in a cancer tissue, mature, immature, and cells between normal cells and cancer cells.

A drug should not only kill cancer cells, but also organize immature cancer cells to continue to develop, but also organize the cells between normal cells and cancer cells to develop towards cancer cells.

Therefore, it is quite difficult to create an artificial environment.

Zhang Fan's current operation is equal to the diagnosis of the disease. Just like AIDS, why couldn't it be diagnosed in those years? Once diagnosed, once people understand its mechanism, even if it can't be treated, it can also be controlled.

Therefore, the appearance of Zhang Fan Made GlaxoSmithKline start to heartbeat.

That is, at present, China has muscles. Otherwise, it is very simple to die or disappear a few scientists if you don't obey. Just like the so-called science without borders, this thing is brainwashing.

"It's OK, the surgical instruments are OK, and the pill country has got me hands that have been measured..." Zhang Fan thought about getting more sets, not only for Ma Yichen and Lao Zhao, but also for many chief surgeons in tea vegetable hospital. This can be used as a reward.

Therefore, Zhang Fan wants to belittle it, but he hasn't finished yet.

Ms. Zeng interrupted Zhang Fan without a trace of change on her face, "Oh, Zhang Yuan is Zhang Yuan. Our customized equipment is to get all your hand data through Siemens, otherwise it won't take so long to get it to you.

Although the data are the same, our materials and ergonomics are much better than those in Marubeni.
"

After that, Ms. Zeng really smiled like a fox, with a little laugh. That is, women. If they were men, Zhang Fan would be embarrassed.

"Oh, how can I use it so smoothly. It's a pity that there's not even one for this. This set can only be taken back and put up as a souvenir! "

Zhang Fan now has a thick face to catch up with Ouyang. He won't be embarrassed. When you want something, you pay attention to no skin and no face.

"Hehe, OK, I'll ask the company to make some more sets for you."

"Otherwise, don't use my data to make it..."

"OK, it's all customized. It's made by the hand of Asians, but there can't be marks. You don't know, our company has produced 11 sets of equipment with marks. Even the molds are special, one by one."

Ms. Zeng means that the price is very expensive. This thing is a luxury, such as a donkey bag.

But where does Zhang Fan know this? He thinks this thing is made of molten steel. Doesn't a pot of molten steel make him hundreds or thousands of sets!

Ma Yichen winked happily. But Lao Zhao and Zhao Jingjin were full of a sense of loss.

Lao Zhao wondered how he was also a big man in general surgery in the frontier, but when he arrived at Sandao, he found that he was almost the same as Ma Yichen in the eyes of others. This makes Lao Zhao more determined to support Zhang Fan in developing the hospital.

Looking at Zhang Fan as if she was very happy, Ms. Zeng quickly said, "so can tea vegetable hospital cooperate with our company?"

Zhang Fan is not so fast, and he doesn't want to promise each other with a few sets of equipment, so he starts to talk a little mixed with garlic, slowly.

As a result, Zhao Yanfang looked at several men around him and immediately said, "I'm responsible for whether the hospital cooperates or not. If your company has this idea, we'll sit down and talk about it in detail sometime."

Ms. Zeng is a business elite, but Zhao Yanfang is not bad. In terms of scientific research, the biggest problem in China's scientific research is how to ask for money. So people are no less than Ms. Zeng.

"Oh, really! Well, I'll see Dr. Zhao sometime. " When Ms. Zeng finished, she was not reconciled. Someone said, "Zhang Yuan, you have concerns about the cooperation of the hospital. What if our company cooperates with you?"

This is Ms. Zeng's ultimate goal. Looking at the tea vegetable hospital in the northwest, although the volume is even the first row of students, it is just a hospital in the world.

When Lao Chen saw it, he didn't have to tangle with Zhang Fan. He smiled and shook hands with Ms. Zeng.

"How can you talk to the leader face to face about such a small matter? Talk to me when you have an idea, and I'll report to the leader again!"

Zhang Fan immediately began to be reserved. With his head slightly tilted back, he began to imitate Ouyang's forced appearance, leaving his hands behind him.

"Well!" Ms. Zeng is sweating. When you ask for something, you are as polite as your old classmates. When you want to finish something, you turn your face and don't recognize people. Are Chinese bureaucrats like this!

Just lift your pants and go!

The three-day operation is over.

Zhang Fan taught a lesson to his colleagues in Mishima.

What Zhang Fan never forgets is someone else's operating room.

So these days, Zhang Fan kept accepting the invitation of the hospital, giving speeches, observing and even turning around the hospital's laboratory.

"I think we can form a friendly hospital. We can share the research of some disciplines. "

The president of the Royal Hospital and Zhang Fan had a cordial talk.

"Yes, I have the same idea." Zhang Fan said with a smile.

The Royal Hospital, from the director to the government's health minister, arrived today. It's time to shine the knife.

On Zhang Fan's side, although there are not many personnel, there are Zhang Fan in technology, Zhao Yanfang in scientific research and Chen Sheng in money.

Especially for money, Lao Chen and Zhang Fan talked privately for a long time.

Lao Chen means that the operating room can be delayed. After all, the cost of this thing is too high, and people may not agree.

But Zhang Fan was unwilling, "what do you want?"

Anyway, Zhang Fan is bent on the operating room.

"It seems that our goals are the same. Professor Zhang, our college would like you to be our visiting professor. Our hospital wants to hire you as the honorary director of our general surgery. "

"Oh, it's estimated that my time may be a little..."

Zhao Yanfang almost broke Zhang Fan's shoes under her feet, but Zhang Fan thought this thing was a gimmick and useless!

Zhao Yanfang looked at Zhang Fan and almost despised the president who had no insight.

Seeing Zhang Fan's attitude is not very enthusiastic. The royal president looked at the Minister of health and said, "in view of your contribution in medical treatment, I also have the president of King's hospital to recommend you to become a foreign member of the Royal Academy of Sciences."

Speaking of this, Zhao Yanfang was excited. The red face almost stood up and agreed for Zhang Fan.

The highest pursuit of scientific researchers is to reach this level.

However, Zhang Fan thinks this thing is flashy and useless. Compared with the top operating room, a foreign member doesn't have to think about it. He absolutely chooses the operating room.

Now I promise. It's hard to ask for the operating room later.

"Oh, foreign members, after all, are members of the highest scientific research unit in the three islands. I haven't done enough, and my level can't reach!" Zhang Fan politely declined.

Zhao Yanfang looked at Zhang Fan inconceivably. Whispered: "this is an academician in China!"

Zhang Fanbai glanced. "If we have the ability, we can be academicians of China. What kind of thing is this foreign one!"

The president of the Royal Hospital waxed, "this guy sees that he has to go to the operating room."

Chapter 1273

"In fact, our cooperation is win-win. Our hospital has a reputation in Europe. There are countless associations and organizations that make fixed contributions every year. "

"Well, our hospital also has a large number of donor organizations and individuals. For example, our hospital has many loving and rich groups from Stan countries who have donated a lot of financial and material resources to our hospital. There are also Jinmao's orthopedics and Marubeni's intestines.

For example, the bone Institute to be completed this year and the bone Institute jointly established by tea and golden hair special orthopedics, although it can not be said to be the first in the world, it has surpassed many top hospitals in Europe and America.

And our cooperation with Marubeni countries in the field of intestinal cancer has achieved great results. You also saw our paper published on bjm.

As for Stan, although there is little cooperation in scientific research, we have made a series of provisions in terms of rescue. In an emergency, our rescue helicopter can fly directly to any region of Stan through simple reporting. "

You show off, as if I can't show off. Zhang Fan began to show off. In fact, I don't lack money!

In fact, this kind of talks is that the east wind overwhelms the west wind. It's nonsense to see who tramples on who, what politeness and what aristocratic atmosphere.

It depends on who needs who more. In fact, to put it bluntly, it depends on who is big.

It's not naked, but it always depends on strength.

It's naive to expect your opponent to carry forward his style and have a friendship first and a competition second.

To tell the truth, if China were still in the Qing Dynasty, it is estimated that Zhang Fan would be swallowed by these goods.

The director of the Royal Hospital wants to struggle again. To tell the truth, Zhang Fan's purpose is not to say a small fund, which is to dig meat directly. Or the tender meat on the thigh.

If the operating room were just talking about money, they would have got seven or eight. The main reason is that there are many production restrictions here, and there are embargoes.

Zhang Fan looked at the old man as if the constipation patient Kaiselu didn't work well. He has little patience.

"Well, let's contact again for specific matters. The diplomatic officer has urged me to go to Africa for free clinic!"

Zhang Fan opens his mouth and comes. Zhao Yanfang is stupid. When you have this intention, when someone else's diplomatic side has said this, and at this level of meetings, you open your mouth and come!

Lao Chen kept nodding his head as if it were true, and specially said to Zhang Fan, "Zhang Yuan, the time is relatively tight. The president of Congo's Kumgang gob has sent an inquiry whether to send a special plane. "

As soon as he said this, the other Dean couldn't say it. Zhang Fan's serious nonsense, and Zhang Fan's

subordinates were even more serious nonsense.

But you can't cross examine it yet. However, the meaning expressed by others is also very clear. If you can talk, you can't talk.

"Hey!" The president of the Royal Hospital finally realized what it was like to hold a gun against his mouth.

This young man is strong. He can't do it if he doesn't want to.

A hospital, especially one that has reached the peak of an industry, is too difficult to remember if it is accidentally dragged down.

First of all, top doctors don't guard like widows. Doctors under this system usually guard against their position being replaced by others, but once there is a better hospital, they don't hesitate to change jobs.

The second is donation. The world of the rich needs the best in the medical industry. Whether they are suitable or not, the best is the most suitable. Once you become a sophomore, donations will obviously decrease.

"This guy is hard to fool!" The president of the Royal Hospital looked at the minister beside him.

The minister counseled his shoulders, shaking three times like an old cow with lice on his body, as if he could not help.

After estimating how much blood it would take, the president of the hospital clenched his teeth and said, "our doctors need systematic training."

Zhang Fan looked at the old man and his eyes were bleeding. He not only despised him, "the old man is too stingy. Isn't he just an operating room? It's the same as killing him."

"Yes. This is no problem. Doctors in Marubeni have received the most formal training in our hospital. "

Zhao Yanfang looked at Zhang Fan and felt helpless. "It's too special to talk about it."

"Scientific research success sharing." The old man's hands are green. It seems that Zhang Fan disagrees. He must come to a boxing match with Zhang Fan this time.

"No problem. As long as the doctors in your hospital participate and the degree of participation exceeds 30%, they can share."

Zhang Fan looks quite generous. In fact, he plans to borrow chickens to lay eggs. Relying on a group of doctors who became monks on their way to engage in scientific research, he and Ouyang began to be afraid.

With tens of millions of investment a year, papers will enter the core journals of China. It's too difficult for those who want to enter the world platform.

So when he heard that people wanted to share scientific research, Zhang Fan would have jumped up if he hadn't been trained by Ouyang in recent years.

Anyway, one more is one. You can't always lose yourself.

The old man also found something unusual. Why did this boy start to be so generous? But when I think about my operating room, it hurts.

"A contract must be signed, and the contract cannot be less than ten years. The number of trainees shall not be less than 100. "

"Yes."

With that, everyone stopped talking. Zhang Fan looks at the old man, and the old man looks at Zhang Fan.

Just like a pair of love, looking at each other affectionately.

"The operating room will be equipped within one year!" The old man dodged Zhang Fan's eyes.

Zhang Fan jumped up as soon as he heard it.

Zhao Yanfang didn't know whether she had been brainwashed or because she was female. She pulled Zhang Fan's sleeve and whispered, "demeanor, demeanor!"

"Demeanor is an egg!" Zhang Fan went straight.

"When I'm a fool, if a year later they have a doctor who has mastered the technology, turn around and tear up the contract, or wait for some time to change the old man's dean, where can I find someone?"

Then he said to the surprised old man, "OK, don't play with a moth for me. If you can't, I'll go to France. OK, when will I get to the tea plant and when will I prepare it for me in the operating room?"

"It takes time. Many devices are customized by appointment. It makes sense without you." The old man said painstakingly.

As for whether the old man really wants to fool Zhang Fan, no one can say. Anyway, people's hospitals are private. The Council will hold a meeting. Maybe they can change people tomorrow.

"I don't care. If I can't, I'll take down what you're using now, pack it and ship it back. I don't think it's

second-hand."

Zhang Fan is really anxious. These guys really dare to fool people!

.....

Negotiation is like a quarrel. Sometimes when there is a close match, it is really louder than others.

The surgical industry, how to say, is very similar to the flower field. It is an industry in which white heads are not allowed to be seen in the world. If Zhang Fan is 50 years old, people can hold Zhang Fan's head to negotiate.

But Zhang Fan is less than 30, and now he has reached the top in colon cancer and liver cancer. To tell the truth, although such figures are not the same as eggs, they are a national deterrent. But for some individuals, this is a bug with one more life.

So Zhang Fan is qualified, qualified to pat the table and say, OK.

The president of the Royal Hospital was crying.

He hasn't said a word yet. The queen wants to see Zhang Fan. If this sentence is said in advance, it is estimated that Zhang fan can sit on his head and pick up his beard.

He looked at the Minister of health again. He hoped that the Minister of health could start from the friendship between the two countries and tell Zhang Fan not to let the young man be so powerful. He can't bear it. He even has the idea of splitting and packing.

I don't know. I thought it was the mustache team that crossed the English Channel!

The minister is still helpless.

The old man has no basic diseases, otherwise he can really drive Zhang Fan to death.

Once this set of operating room comes out, it's hard to say whether he can keep his position next year. Even if he keeps it, it's unreasonable if his annual salary doesn't plunge.

But if Zhang Fan really went to France, he wouldn't have to mix in this circle.

"Well, my strength!"

"no ! Yes! " Zhang Fan began to speak a foreign language in a hurry.

.....

At the end of the talks, specifically, Zhao Yanfang should take people to fight with them on the terms. As long as the general direction is determined, Zhang Fan will have nothing to do.

"Professor Zhang, our queen wants to meet you."

The health minister smiled and said to Zhang Fan.

Zhang Fan turned and looked at Lao Chen. Before going abroad, Zhang Fan studied the regulations.

You can't meet people casually. Zhang Fan is at least a national cadre now.

"Unofficial, yes!" Lao Chen nodded gently.

"It's unofficial, that is, the queen wants to discuss with Professor Zhang in terms of medical and health care."

Zhang Fan listens to the words of red head and nose, and his heart is very strange. Does the old lady discuss medical health with me? Did the old lady come from a doctor's background and want to compete with someone when she was old?

Back at the hotel, Lao Chen and Zhang Fan have a conference call.

Domestic.

"Don't be rude!"

In fact, what we have to do over and over again is not to humiliate the country or ask for anything.

Now Zhang Fan's reputation for eating and daring to ask has been put on the Ministry of foreign affairs.

The third leader of the Ministry of foreign affairs took the time to talk to Zhang Fan about etiquette, and repeatedly told him that it was necessary to talk about business with others.

In this regard, people were not at ease. They specially asked a first-class or third-class diplomatic officer stationed in the three islands to accompany Zhang Fan to meet people in person.

Zhang Fan's heart is also barking, "it seems that Lao Tzu is a leader of right and wrong. I'm so worried!"

When I called Shaohua, Shaohua went shopping with Jia SuYue and Wang Yanan.

In summer, women always have less clothes in their wardrobe.

Anyway, tea is a Vientiane exchange. I don't know whether it's fun or not.

"Who do you want to see tomorrow?" There was a lot of noise in the mall. Shaohua didn't hear clearly, so he pressed to turn on the hands-free.

"Hey, no one. The queen of Mishima heard that I was high-level and wanted to see me!"

"Ah!" A sharp voice broke the mystery, and then seemed to realize that it was impolite. He leaned close to the microphone and shouted, "Shao Hua, your family Zhang Fan is bragging! Blow all the cattle to heaven! "

Chapter 1274

"Win glory for the country!" After Shaohua finished, he immediately hung up the phone. Because Jia SuYue's soprano has attracted the attention of people shopping in Vientiane Hui. The men who originally secretly looked at three beautiful women are not afraid of their wives. They directly and openly sent seemingly inquiry eyes.

"Win glory for the country? God, why don't you say happy planet! ~ " Jia SuYue looked at Shaohua inconceivably. She thought it was true that Zhang Fan went to the three islands, but it was estimated that she fooled Shaohua by allowing the queen to meet him. Shaohua was happy.

"All right, see what happened to the queen. You make a fuss. " Shao Huabai glanced at Jia SuYue.

People say, the world is what you are. In fact, what I said is a little against my heart. I'm lazy, but the world doesn't agree. I didn't get up until ten minutes before work, but at five o'clock in the morning, someone already got up and worked hard.

Jia SuYue and Shao Hua have different living conditions from small to large. Jia SuYue has good conditions at home. We can say that we have the ability to pursue quality in our childhood life. It can be said that I had a princess dream since I was a child.

Therefore, if Zhang Fan said to meet the Prime Minister of Mishima, she would be surprised at most, but it would surprise her to meet the queen. The queen, princess, Prince and fairy tale world are so yearning.

Shao Hua is different. It doesn't mean that she has no dreams. Her dreams are more practical. She is very similar to Zhang Fan. She is an ordinary person with one mouth and a stable life.

In fact, it's a little difficult to understand. The simplest thing is that your father and mother bought you Nike ADI from childhood. When you grow up, you find that your income seems to be unable to support these two brands. This is the loss of Princess Jia.

"He won't lie to you?"

"Just see an old lady. What can I cheat?"

"Hey, why didn't the orthopedic department invite him this time? It's estimated that Ma Yichen has been showing off for a long time." When Wang Yanan heard this, he was not happy. Suddenly, he felt that shopping was really boring.

"Let's go. Be gone. I'm not in the mood for shopping. Huazi asked us to sing. We haven't sung for a long time. "

Wang Yanan is going to sing.

Since entering the third Department of orthopedics, Wang Yanan has almost no entertainment. At ordinary times, not to mention Jia SuYue, even Shaohua can't make an appointment with Wang Yanan.

"Well, I bled today." Although he was afraid of stimulating Jia SuYue and Wang Yanan, he was still a little proud. "My black stone can be received by the old lady of Mishima! "

Women are so strange.

"Sister, come and sing!" Just arrived at the KTV of Vientiane exchange, the lobby manager jumped out and greeted Shaohua with a smile.

The young man shaved this pair of hair with a cage in the middle. His hair was straight, as if he had been electrocuted. All kinds of dragons, tigers and leopards were tattooed on his arm.

Shaohua trembled slightly in his heart. Although he was not afraid, he always felt frightened.

"Are you?"

Not only Shaohua was frightened, but Jia SuYue and Wang Yanan were surprised.

Not to mention looking down on people, at least the three girls hardly associate with people dressed like this.

"Hey, I was injured in a fight before. Thanks to Zhang Fan and brother Zhang! Later, brother Zhang became the dean. We can't go to the door without skin and face, but we still miss brother Zhang. When you got married, I gave you a gift and left. "

A young man's smile is polite.

"Oh, oh!" Shao Hua doesn't know what to say.

If you are in a bad mood, your voice is louder than anyone else.

The three girls sang the feeling of heaven in KTV. Anyway, there is no outsider, just a word!

At this time, Zhang Fan, not only in his suit and shoes, but also Lao Chen and Zhao Yanfang with him, attended in formal clothes.

Although it is unofficial, there are still many accompanying people.

In a large villa, Zhang Fan and the old lady chatted cordially.

Zhang Fan originally thought he should go to the Han Palace, but he got it on the grassland of the villa. The old lady is wearing a pink dress. On TV, others say, wow, it's so beautiful. But Zhang Fan is constantly flashing a word in his mind: grandma wolf.

Really, the high bridge of the nose and the deep sockets of the eyes are not as kind as the Chinese old lady.

Of course, this thing can only be thought about.

"Professor Zhang, do you have any research on the health of the elderly?"

Zhang Fan wondered if he would like to discuss the health cooperation between the two countries today. If not, he would also like to talk about the future joint form of tea vegetable hospital and Royal Hospital.

When receiving the notice, Zhang Fan also specially looked at the model of hospital development. Even if it can't be a blockbuster, it should have something to say, right? It can't be underestimated by outsiders.

Unfortunately, after meeting, people came with the posture of Zhang Fan as a famous doctor!

Zhang Fan swallowed the spit in his throat and thought a little.

"What the elderly, especially the elderly, should prevent most is muscle loss," he said

As soon as she heard this, the old lady asked, "doesn't it mean that the bone loss of the elderly is the most serious? Are many old people bedridden because of fractures? "

"Oh! The old lady is still ready. If she doesn't get some real skills, you won't treat me as a dish. "

Zhang Fan smiled and said softly, "compared with middle-aged and young people, the physical function of the elderly will decline to varying degrees.

And muscle loss is the fastest. It is faster than that of orthopedics and cardio cerebral function.

According to the research of our tea plant hospital, the elderly with BMI less than 20kgm² will increase the adverse risk.

Muscle attenuation syndrome is the biggest tipping point of decline in the elderly. Slowing down muscle decline is equal to slowing down age decline. "

The old lady's eyes lit up.

It is a consensus that this statement should be put in 2020. In this era, we are still discussing the robustness of orthopedics.

Zhang Fan was also in the system. When simulating the fracture of the elderly, he saw this kind of research and didn't take it to heart at that time.

When asked today, Zhang Fan just took it out and forced it.

To tell you the truth, the old lady's health care team has not 100 people, but also 50 people.

When a top doctor or scholar comes to the three islands, the old lady will meet him and talk about this physical thing.

It makes sense that people can live at such an old age.

"So how to delay muscle decline in the elderly."

"We can start from two aspects and four points.

"Can't donate points..."

"We need to contact our superiors!" Zhao Yanfang quickly interrupted Zhang Fan.

To tell the truth, the Queen's title is not very valuable in this era.

When you are in a good mood, the old lady is like a kindergarten teacher.

For example, many scholars and some rich people in the golden Mao country. Of course, this thing has become a very valuable thing in a street city.

To tell the truth, Zhang Fan really didn't expect the old lady to be so stingy. At least you are also a queen of developed countries. You can give something without money. It's a little

Although it was unofficial, the meeting between the queen and Zhang Fan was reported by many newspapers.

In particular, some media in Jimao country shout that the three islands are a feudal country and the queen of the three islands should fight.

To tell you the truth, the queen has some news. What she pays most attention to is golden hair.

"The queen meets the young Oriental doctor!"

"The queen may have a physical condition. The Oriental anorectal doctor enters the Queen's summer palace!"

"Mainland officials will be decorated by the queen!"

Zhang Fan never dreamed that he would become famous in the Golden State in this way.

Moreover, when Zhang Fan left the villa, the photo of the queen laughing and sending off was magnified dozens of times in the newspaper.

The queen smiled from her heart, and Zhang Fan's face was insulted. She smiled so reluctantly.

In the past, this kind of news would have disappeared in a few days, but now it is the Internet age.

The golden mean of China. Li Cunhou has pulled people out of the golden mean these days. Because there are few researchers here.

"I'll go! Zhang Fan even talked to the queen. " Li Cunhou looked at the pictures intercepted by the domestic media from the golden Mao country.

Shanghai

Master Zhang Fan looked at the picture and said to his wife, "younger martial brother, why are you not very happy!"

"Maybe it's the angle of shooting. Hey, to tell you the truth, you martial brothers, young martial brothers are getting more and more powerful now. Tomorrow I'll pick up Jingshu and go home for dinner. "

"You do it yourself. I don't have time."

Fangdong hospital, "ha ha, this boy is not happy yet. Look at his stubborn donkey face." Master Bo said to his secretary with a smile.

In fact, everyone didn't think of the reason why Zhang Fan was unhappy.

Only tea vegetable Ouyang knew it clearly.

"It seems that your Zhang Yuan went there with passion, lost and returned, and didn't take advantage!" Ouyang sighed a long sigh.

Ren Li smiled and said, "no, our Zhang hospital hasn't reached that point."

"Oh, I don't believe it yet. You'll know when you come back."

As for the award of medals, because there are precedents, China has agreed. Although I agree, I neither support nor oppose it.

After receiving the domestic consent, Zhao Yanfang gave back to the queen.

Zhang Fan is going to give a medal.

This time, the press is even more lively.

Moreover, a grand ceremony will be held this time. It's definitely not that some stars steal the kind of awards.

It is estimated that the queen thinks Zhang Fan is right!

Just when everything is almost ready.

Tea Su made a call to Zhang Fan's mobile phone.

Chapter 1275

The queen wants to award medals. The people of the three islands are very busy!

Zhang Fan is busier.

With this wind, Zhang Fan found many people.

"Do you think my title is a little thin and you should prepare some for me in advance so that the Queen's title doesn't look so abrupt?"

Looking at the man who wanted to tear down his operating room, the professor who said he didn't want at the beginning, and the man who is not a little ashamed now, the president of the Royal Hospital pinched and pinched the pen in his hand, "this is his own pen. He broke it and suffered a loss!"

The president of the Royal Hospital whispered silently in his heart. He didn't dare to think about Zhang Fan. He was deeply afraid that he would be angry and lose the gentleman's etiquette.

Zhang Fan eats the army with broken horse legs! Your biggest gold Lord is going to give me a medal. Can't you give me some names when you are a little brother? If anyone dares to say no, you are going to rebel!

"You don't take our professor's reputation seriously!"

The head of the Royal Hospital spoke with trembling lips.

.....

"I hear you have cooperation with Roche?" After eating the president of the Royal Hospital, Zhang Fan turned to find Ms. Zeng again.

There are few such opportunities. Zhang Fan must not miss anyone who has the opportunity. Since the old lady of Mishima doesn't talk to me about medical administration, don't blame me for showing my ability!

Zhang Fan really thinks so!

Ms. Zeng was surprised. What is this? What is this.

After sleeping all night, the Dean began to fool around.

You can't be such a naked weapon.

"In fact, Roche's colon is not as comprehensive as ours. After all, their main energy is still on endocrine. Zhang Yuan doesn't know what you received.

However, you can rest assured that our company will spare no effort to give you the greatest support for the tea plant hospital in terms of cooperation with tea plant. "

Ms. Zeng has lost the ease of the elite in the past. Because Zhang Fan's words mean that he lifted the table and stopped talking.

"But I didn't see your so-called spare no effort, nor did I see any greatest support."

"Surgical instruments have been scheduled!"

Ms. Zeng said with a dry mouth.

Zhang Fan looked at her as if she were a fool.

Ms. Zeng also knows that this is too small.

"We are going to build a colon cancer laboratory in tea."

"No, Marubeni has been built. It is said to be world-class."

"Well! We can increase investment. "

Ms. Zeng looked at Zhang Fan. According to the feedback from all aspects, this guy loves money and antiques.

"If you want to join the partnership, isn't it the most basic requirement to invest money? Do you want to talk empty handed?"

The old lady of Mishima provoked people. She didn't talk to Zhang Fan about the world's major events. Zhang Fan was quite angry. She was still pretending to be a civilized person. Don't let others laugh.

Now Zhang fan can't take care of it. You don't talk about morality and justice. You don't take me as a dish. I'm still loading an egg.

"Well, you mean!" Ms. Zeng finally understood that none of the people who can reach this point, whether they are academies of Sciences or doctors, are given in vain.

"I heard that you donated the top operating room of the Royal Hospital?"

"Yes, but at that time, small liver tumor inhibitors had been developed. And the patent right of our cooperation with each other is in our hands. "

Ms. Zeng argued, although it seemed so powerless.

"Do you think colon tumors are promising without small liver tumors? Or do you think we can't do this in the future? It seems that I still want to talk to Roche. "

"Zhang Yuan, for the sake of all Chinese, don't ravage me. Just say what you want."

This kind of negotiation is too asymmetric and unprofessional. One word doesn't lift the table and one word doesn't take off his pants. She is really powerless. After being the president of Asia for so many years, she has never seen such a person at this level.

Not a robber, but a bandit.

"Isn't the Royal Hospital already..."

"What's the deposit? We should cooperate with our hospital and let us train doctors in colon. Do you think it's so good to be a teacher? We should not only formulate plans, but also pay attention to the process, and finally be responsible for the trained doctors. It's not easy! "

Zhang Fan has long thought that these doctors have become talents. When they go to tea, they will be used as donkeys. Three island surgery is not as many as Chinese surgery. It happens that a large number of operations are used as teaching materials. Then they not only need to train them, but also need to train lower level doctors for Zhang Fan.

"Oh, we can also support an operating room."

"Oh?" Zhang Fan is not satisfied. When you're about to get angry.

"No, two! No more. It is estimated that these two hospitals will have to compete with other hospitals for food, and the production of instruments will be booked in a few years. "

Ms. Zeng is almost crying.

"Hey, it's not refreshing. Why don't Hunan people have a little refreshing power when they go abroad! Just stare at three melons and two dates and ambush me. "

In fact, Zhang Fan's expectation is one! I didn't expect that I had a talent for acting. Ah, Zhang fan can't

help feeling a little complacent. According to the later saying, it starts with his appearance and is loyal to his talent!

Zhang Fan not only contacted GlaxoSmithKline, but also some so-called personal funds. Of course, the effect is not particularly good.

After all, no matter how powerful the tea vegetable hospital is, people still have a lot of choices, so Zhang Fan originally wanted to go out and make a lot of money, but when he woke up, he lost hundreds of millions of money in his dream!

"I'm still not strong!" Zhang Fan said to Lao Chen.

A few days ago and later, Zhang Fan robbed everywhere with Lao Chen. Some funds will invest more or less, but most funds are polite and have no door to donate. And most of the investors are private funds with Chinese descent.

Zhang Fan really wants to say: now you look down on me, I will make you look down on me in the future! But I just feel a little secondary.

The most important thing is to be angry. Tea vegetable hospital is so unknown!

After talking with Ms. Zeng that day, a foundation consultant who invested some funds came to the hotel to find Zhang Fan.

Zhang Fan doesn't look at other people's investment. It's mainly because they are received by Chinese.

"We still know the level of Zhang Yuan..."

Anyway, the inside and outside meaning is that if you need it in the future, please help Zhang Fan.

Zhang Fan wants to kill him. His mother has invested less than 500000 hard sticks. You want me to be a family doctor for your boss. It's beautiful.

As a result, when they left, they gave Zhang Fan a jade bowl.

Zhang Fan didn't want it, because this thing doesn't look as beautiful as bone china now.

There are little dots on the pale yellow jade bowl. It seems that you haven't washed the black sesame paste for a week.

"Song Dynasty!"

Then Zhang Fan doesn't dislike it. It's better than the glass seed Shaohua bought in the scenic spot.

Anyway, if you don't see a rabbit or an eagle in the future, this bowl will be used as the consulting fee in the future.

After contacting the major bosses, Zhang Fan hurriedly went to the ward to see the surgical patients.

This is a doctor's ethics.

Other things are outside the main business. A hammer is a hammer. If you can knock it, it is necessary to make a postoperative ward round.

Zhang Fan was wearing a white coat, with Zhao Yanfang and Zhao Jingjin, and they were followed by a group of white doctors.

A noisy crowd.

Six patients recovered well. Their intestines have been ventilated, which is the so-called farting.

They have begun to eat. Although they are liquid, once people eat and excrete, they can actually have a big cycle. They can do it for a while and a half. Although they can't jump up and play basketball, they won't hang up inexplicably.

Zhang Fan, the first five patients, had nothing to say. He was weak. Even the locals had to listen to his English for a long time. Zhang Fan didn't ask much. He touched the wound, asked if it hurt, looked at the postoperative examination, arranged the postoperative treatment, and went out.

The last one was the ward of the old man who had fought against golden hair.

Zhang Fan gently pushed open the door. The middle-aged man kneeling at the door of the hotel carefully fed rice paste to the old man.

"How's it going? Is the old man recovering well?" Zhang Fan asked softly.

"Thank you, Professor Zhang!" The middle-aged man stood up excitedly. Zhang Fan quickly pressed down.

Then he looked at the old man.

The old man was weak before the operation. He was almost an adult and didn't have any energy.

Now after the operation, it's OK to say in other places. When you look at it, you know you're a stubborn old man.

"Where are you from?"

Hey, when the old man saw that Zhang Fan didn't say anything, he felt like a life-saving benefactor. It was like looking at a hairy boy.

"Lan Shi people are now in the tea plant. Does the old man know about tea

"Hum! When we went to Bangzi country, there were many Lanshi people. I was from the northwest military region. Why don't tea vegetarians know! "

With that, the old man tilted his head, looked at the gloomy weather outside the window and sighed gently.

"The country is powerful now. Has it been able to train the world's top doctors like you? Is the country rich now?"

In fact, although the old man went to the three islands, he didn't live well. He didn't understand the free TV. He charged for the TV he understood. In fact, the information from the outside world depended on word of mouth from a circle of Chinese.

Moreover, because of the underground living standards, their relationship circle is actually a group of people very similar to them.

I just know that China is very good now. In fact, they don't know how good it is.

Perhaps they no longer worry about China, but the old man is different. He opened his mouth and asked the country.

Zhang Fan doesn't know how. He has a kind of sadness in his heart.

"Don't worry, sir. The country you dedicated in those years is now intact!"

With that, the old man didn't say anything, closed his eyes and waved his hand gently.

It was like letting his subordinates leave. When Zhang Fan went out, he turned around and took a look. The old man had tears hanging from the corners of his eyes, crystal clear!

Just as Zhang Fan was preparing to give a medal, tea vegetable called.

"Zhang Fan, the earthquake happened. The hospital is going into the earthquake area! " The phone call is from Ren Li.

Chapter 1276

Tea element

At midnight, the residents of tea vegetable City obviously felt that their beds seemed to be of poor quality.

It feels a little leisurely.

In an instant, thousands of lights lit up.

Some ran out in quilt and some ran out with children.

In the earthquake zone at the foot of Tianshan Mountain, the tea vegetable area was not allowed to build high-rise buildings in the early years.

Downstairs, everyone chattered in a group, like an earthquake.

But.

In the plateau area 500 kilometers away, Jinshu county was hit by a big earthquake.

Jinshi County, with an average altitude of 4000, is surrounded by mountains and rivers. It's summer for tea vegetarians. People wear short sleeves, and even some little girls show their navel early.

But in this place, a thin fur coat is not enough!

Although the altitude is very high, there are more than 400000 people in the county, and almost all of them gather around the county.

This place is very strange. In an area with such a high altitude, there is generally no county with so many people.

But this place seems to be the birthplace of some Buddha, so it is said that this place is a good place.

So it's for some people. The appearance of the county, if viewed from a high place, is like a sea bowl. Surrounded by snow mountains, the county is like the bottom of a bowl. It can be said to be a miniature basin.

Although it is a plateau, there are big snow mountains around, and several big rivers originate here. It's summer now, when the river is in full bloom.

When there was no earthquake, the county was indeed a good place. Although it was cold, there was not much wind because there were mountains around, and there was plenty of grass because of the river.

The beef and mutton here is always five yuan more expensive than the beef and mutton in other places, because people call their own beef and mutton, drinking mineral water and eating Chinese herbal medicine.

But once there is an earthquake, this thing is like a stone in the sky, and the city will be razed to the ground in an instant.

Moreover, due to the existence of mountains and rivers, the barrier lake is like a naughty god taking out finches and urchins to rush into the ant cave every minute, and barrier lakes are formed one by one.

And the most troublesome time, this place is thousands of miles away from the nearest city except tea.

Even for tea, although the straight-line distance is 500 kilometers, it can be 800 or 900 kilometers more.

"Zhang Fan?" The telephone of the municipal government directly reached Zhang Fan's confidential telephone.

Zhang Fan gave Ouyang the call because he was going to Sandao.

"I'm ouyanghong!" After the earthquake, Ouyang rushed to the hospital early. Although she didn't get much information, years of professional experience let her know that it's best to be fine now. If she has something, she must sit upright in the hospital.

"Where's Zhang mortal?" As the boss of the frontier, he doesn't talk about daily affairs, but he is also busy. The president of a hospital won't think about it all the time.

"Good leadership. Comrade Zhang Fan was invited to visit Sandao." When Ouyang received the call, he immediately sat up straight, spoke fast but not disorderly, and his eyes were shining.

"Why did you go to Sandao at this time, eh!" There was a trace of anxiety in the leader's tone.

"Leading comrades, although Zhang Fan is not in the tea vegetable hospital, please give an order!"

The leaders of bird market don't know much about Ouyang, but although this is a little blunt, just like the old tea cellar, they don't pay attention to the long aftertaste and sweet aftertaste, just one word strong.

But listen, breathe.

It is estimated that after the leader asked the people around him, he immediately said: "ouyanghong informed me that now I order the tea vegetable hospital to set up an emergency rescue team. Ouyang spoke impolitely, but this is not a polite time.

"Comrades, geological disasters have occurred. The people in the disaster area can now count on us. We, our tea vegetable hospital, will go all out. We will not disappoint the people, nor will we disappoint our superiors.

Although our tea vegetable hospital is a small border hospital, our heart is sincere and our blood is hot. Every man is responsible for his country's difficulties. What's more, only we can do it now, and no one else can. Therefore, we must be able to do it.

Today, we go all out! "

"Go all out!"

"Go all out!"

Ouyang said the blood was boiling.

Chapter 1277

Pre war mobilization?

In fact, this is what our ancestors summed up after blood and tears.

As the saying goes, if you don't do it for yourself, heaven will kill you. But people also have selfless conformity.

If there was no good mobilization before the war, half of the original 100 skills could not be wasted, and less than half could be wasted.

For example, there was no mobilization, and everyone disagreed. On the way to the disaster area, a group of people could quarrel.

But now it's different. Ouyang's opinions have been unified.

Now, in this area, we are invincible in the world. Who do we give up! After all, there is still a sense of achievement and responsibility.

Moreover, Chinese people in particular, both men and women, actually have a complex of being a soldier and a leader. Often many people, whether forced by life or pursuing others, have no such opportunities. Once they have such opportunities, they really, ow.

Moreover, if a collective wants to talk about self and personality at this time, it's time to pull the calf. Don't rescue, you'd better find a place to show your superiority.

Under such special circumstances, this team of people who clearly destroy individual ideas is like a condensed sea of people.

Some people say it's not good, but there are always some things in the world that need some people to do.

For example, are rescue, doctors, nurses, military police fools?

So, really, the words said on the Internet are really good. There are no quiet years in the world, but someone carries the weight for you.

On weekdays, this group of rebels may be pockmarked Zhang Sanli Siwang standing on the street corner defecating everywhere, but at this time, they can be called heroes.

The gate of the hospital was wide open, and all kinds of lights lit up the roads of these retrogrades at the same time. See you off. There's nothing to see you off.

Oh, no, there's one, Shao Hua!

Shao Hua stood at the door staring at the motorcade.

"Go back, we have a task!" When the superior didn't say it could be reported, he couldn't say anything.

This is China's urine. Sometimes hate makes people gnash their teeth, and sometimes feel the pride of this country hurts.

However, Shao Hua is the doctor's wife anyway. At a glance, he looks at all the vehicles in the hospital.

Even Ouyang and Zhang Fan's baby can't be in the baby's operation car. They are either rescue or disaster relief. What else can they be.

"Ya Nan, be careful. I'll wait for you to come back!" I don't know why Shao Hua didn't cry when sending Zhang Fan. At this time, I don't know whether he thought of the past or his previous worries. Tears can't stop flowing down.

"Let the doctors and nurses say it to the family." Ouyang didn't get off the bus when he saw Shaohua, but he whispered.

"Forget it, now tell the families that they can't even sleep well." The old residence looks like no strangers at this time. This guy's brain circuit is really different from others.

In a small border town, he insisted that the Department speak English in the morning in the hospital for more than ten years. It doesn't matter in big cities. No one cares and no one comments, but it's not easy for a small city to stick to it.

You say he's a maverick official, but for leaders whose technology is not as good as his superiors or who don't understand medical treatment, he has a disdainful attitude and wants to face up! He has the most awesome posture in the world.

The leaders in charge of health hated Ouyang the most for the presidents of the tea vegetable hospital, "no, we have to go. We have to pack up now. Go ahead!" Zhang Fan began to rush people.

What gentleman, what etiquette, angry Zhang Fan also has a third temper.

"Just one day!" Ms. Zeng looked at Zhang Fan pitifully.

"Not for a minute. This is a matter of our country. It has nothing to do with you. I will bear all the losses caused. All right... "

Ms. Zeng's face was a little embarrassed, but she died in a flash.

"Now that Professor Zhang has decided, don't underestimate people. Our company will prepare the special plane immediately!"

Then Ms. Zeng began to contact.

Zhang Fan is stunned and looks at Lao Chen. Lao Chen holds the phone and opens his mouth silently, which means that Stan tyrant's plane is coming from Stan.

Zhang Fan looked at Zhao Yanfang again. "The company promised, but it can't do today. We must wait until tomorrow. It also takes time to apply for various procedures. "

"Please!" Zhang Fan bows to Ms. Zeng with both hands.

There is absolutely no big husband in his mind. He has only one idea now. This woman has a plane!

.....

As soon as the tea vegetable convoy left the city, it merged with the military vehicles. At this time, the troops of the border sub military regions had started from all directions towards Jinzhi.

The frontier commander was directly appointed as the forefinger of the disaster area. On the frontier farm, all the militia put down their farm tools, changed into military uniforms without military rank, and collectively boarded the green truck.

And all that tea can mobilize has been mobilized.

The colorful tea vegetable rescue plane was at the front, and then merged into the Frontier Road and aviation brigade.

The plane above and the motorcade around, for a time, all kinds of lights shuttle through the Tianshan Mountain in the night.

The earthquake came, not to mention, and then the heavy rain followed.

The heavy rain in the northwest is different from the heavy rain in the south.

Regardless of size, the northwest is even summer. Once it rains, the temperature is obviously like entering early spring from summer, which will freeze people.

In Tianshan, it's hard to say what's under this thing.

It's raining in the urban area. After entering the mountainous area, maybe it's the rain mixed with ice skating. If you go deep into the mountainous area, there's no problem with hail or heavy snow.

The leaders are now looking at the dignified face of the heavy rain. In this weather, some of the wounded can freeze to death. Freezing to death in summer is really not a joke.

The general doctors and nurses looked at the outside curiously. This mentality is very good, much stronger than uneasiness.

"Many military vehicles!" Wang Yanan looked at the motorcade outside heartlessly.

"It's strange to see less!" Xue Fei skimmed his lips.

"You don't see much of a strange thing. You've gone this time. Keep looking for a place to sleep!" Wang

Yanan immediately attacked Xue Fei with sharp teeth and sharp mouth.

.....

In Mishima, the ambassador went out to explain why Zhang Fan had to leave on the way. If people want to leave, they can't be tied up and decorated. It also expressed friendly sympathy for the misfortune of China and deeply concerned about the safety of the people in the disaster areas.

The plane soared into the sky. Zhang Fan found that Ms. Zeng was also on the plane.

"You..."

"Although my nationality is not Chinese, I am also Chinese." With that, Ms. Zeng felt that she was not angry or powerful enough, and said, "I'm afraid Professor Zhang turned around and cooperated with other companies."

"Don't worry, I promise you, the cooperation of colon cancer will only be your company! Your company!"

Zhang Fan seriously gave a promise.

Ms. Zeng was stunned and didn't know what to say.

Take off from sanniao. If you buy a direct flight ticket, the plane will not land in the frontier. You must go to big cities such as the capital.

The charter plane landed directly at the bird market.

Chapter 1278

What is the concept of altitude 5000?

Even if you sit on the ground, you will feel as if you are carrying two people on your back. It's hard to breathe.

After the motorcade Panshan entered the Tianshan Mountain, it entered the high-altitude area. Before entering the disaster area, some people began to get a little high.

To tell you the truth, this thing sounds like nothing. In the early years, some people with a little copper felt that if they wanted to play, they had to play something different.

Then I took a plane to see Potala, then got off the plane and went into the urban area. After taking a look at Potala, I slept in an oxygen hotel for a week. I can say how to get here and how to go back.

The altitude of tea vegetable city is not high, that is, three or four hundred. Therefore, with the increase of altitude, some doctors have some symptoms.

"Oh, I'm a little suffocated."

"I don't feel suffocated, but I have a headache!"

"I'm just a little cold!"

After the convoy started, military coats had been delivered to individuals. To tell the truth, the tea vegetable hospital is not a digital hospital after all, so there is almost no such training on weekdays.

Cold resistance and high resistance are the training subjects of Northwest digital hospital every year. The tea element hospital did not. Although Ouyang claimed to swallow all the tea element hospitals, the president of the tea element digital hospital was shivering in the corner, afraid that Ouyang would really eat it.

However, two other hospitals larger than the digital hospital in chasu city were swallowed, but the smallest digital hospital was protected.

Now the efficacy of others has come out. The combat effectiveness of a large part of doctors in tea vegetable hospital has begun to decrease before they reach the place. However, doctors in digital hospital are stunned and have no response. They are not Superman.

When they trained doctors in clinical practice, they added subjects to adapt to the plateau.

With the increase of altitude, Ouyang's temples also feel sudden. It's like kung fu wants to improve a realm. Something needs to protrude from two acupoints.

But the old lady clenched her teeth and kept in touch with the drivers of various cars.

If we say that there are many drivers who can catch up with the army team on weekdays, even some can run for more than minutes and seconds.

However, in the evening, there are people who can catch up with the army convoy on the undulating roads after the plateau earthquake, which is estimated to be 120 drivers.

The closer it is to the earthquake area, the more obvious the stones on the mountain fall.

"It seems that there are still aftershocks. All units should pay attention and be energetic." The head of a regiment in the tea vegetable station was the first car, shouting with a walkie talkie.

At dawn, the team stopped because the road was blocked and half of the mountain collapsed like a cake, directly covering the road for the rescue team to enter the mountain.

After a night of high reaction, most of them adapt at dawn. Occasionally, some people who can't adapt still don't pay attention.

Ouyang looked at the mountain that collapsed and blocked the way, and asked the head, "what should I do now?"

"We can't be idle, Dean ou, we can't be idle!" With that, the regimental commander began to order, "the reconnaissance battalion should carry the necessary rescue items and protrude from the river!"

"Yes!" The scouts gathered quickly.

There is no trace of fear on the young faces.

"I'll give you the soldier. Be careful on the road, be careful again!" Explain to the battalion commander like nonsense. Be careful not to let others walk along the river. There is no drop of water in the river.

This is a dammed lake. Once this thing breaks, I dare not think of the consequences. However, hundreds of thousands of people are in front of the collapse. As the head, what can he do!

The reconnaissance battalion is gone.

The rest of the people took the shovel and began to open the road manually. At first it was the army, and then slowly doctors, nurses, police and militia also participated.

Like ants, thousands of people lie on the collapsed mountain, pushing forward with their hands in their mouths.

"China Railway 13th Bureau is already on the way. The European Academy should not let your people do it. Now is not the time for them to work. If one is injured, there will be one less who can save people when they go in. Let our soldiers do it!"

"Yes, Ouyuan, let's do it. You have a rest."

"Good!" Ouyang is not hypocritical. She knows that this is not her own battlefield.

In the subzero temperature, the soldiers braved white fog one by one, and the doctors and nurses were ordered to board the car.

Looking at the soldiers like marmots outside the window, to tell the truth, the doctors and nurses have tears in their eyes.

"Ouyuan, Zhang Yuan has arrived at the tea plant! Come and answer the phone." Xiao Chen of the medical department didn't sleep all night. Other doctors and nurses can squint for a while, but she can't. She is now the information center of the tea element rescue team. Because the mobile phone signal couldn't get through here, the army directly installed a large pile of old-fashioned phones on Iveco.

As a result, this thing can really hit and hit!

"Here comes Zhang Yuan!" When the news that Zhang Fan had arrived at the tea plant spread, the doctors and nurses in the hospital inexplicably felt that they had not been abandoned.

"Ouyuan, I'm Zhang Fan. I've arrived at tea vegetable. What's going on now! " There was a lot of noise. Zhang Fan shouted at the top of his voice.

"The road is blocked and can't pass now. The soldiers of the reconnaissance battalion have set off along the river towards the disaster area. China Railway 13th Bureau has also set out towards us. " Ouyang quickly informed Zhang Fan of his situation.

"OK, I see! Wait for me! "

Then he hung up the phone.

To tell the truth, Zhang Fan is quite familiar with the situation around tea. After hanging up Ouyang's phone, Zhang Fan began to call at the airport.

"Mr. Zhao, I'm Zhang Fan!"

"Are you back?"

"I've just arrived. Don't gossip. How many off-road vehicles do you have now? They are in good condition and can cross mountains. They are all allocated to me! An old driver. "

"Good!" The boss of Huaqing directly agreed.

"Mr. Wang, I'm Zhang Fan. I need an off-road vehicle now. The more vehicles in good condition, the better."

"President Li..."

At present, Ouyang is no longer Zhang Fan's opponent in tea vegetable hospital.

When Zhang Fan learned of the collapse, he knew that it would take at least one day to get through half a mountain. This mountain is not an earth mountain, but a stone mountain, with a large amount of work.

For a moment, the whole city seemed to get a signal.

One pass two, two pass three.

"Lao Yang, tea vegetable Zhang Yuan is going to cross-country disaster relief. Didn't you just buy a unimok and lend it to me. If it's broken, I'll accompany you!"

"Please, who do you look down on? Zhang Yuan wants a car, and I absolutely respond! I'll call him myself. "

Then, within half an hour, some cars that don't seem to be seen in the urban area of tea vegetable appeared.

The Wrangler, kuruze, Hummer, Defender of Land Rover and dozens of professional off-road vehicles appeared at the gate of the hospital.

Really, it's like an arrow through the clouds and thousands of troops and horses come to meet.

Not only did the car come, but even the legends of business circles came.

"Here comes Zhang Yuan's car. Don't worry. What else do you need us to do, you said! "

"Thank you, thank you, thank you!"

Zhang Fan kept bowing.

After the team assembled, Zhang fan set out directly with the team who had just got off the plane. There's no time to call home.

"Suddenly! Sudden! Suddenly! " The sound of a plane came from the sky. The doctors of tea vegetarians thought it was their own flower, but they looked up, No. It's a big belly helicopter full of propellers.

"This is airborne!"

Suddenly, people with sharp ears heard the sound like a car. Turning around, they saw a team of off-road vehicles coming in the river.

"European Academy, look, cross-country team."

As soon as Ouyang turned his head, he saw a man standing out of the window. Yes, it was Zhang Fan.

"Zhang Yuan..."

"Come on, European Academy, let the in-depth group get on the bus!" After all, how many times have you cooperated with the old lady? Zhang Fan absolutely knows that the old lady has already assigned personnel.

Zhang Fan didn't get off. Now he's really racing against time.

If you can go in earlier, you can treat earlier and save more people earlier.

Xue Fei and Lao Gao, with in-depth group, and Luo Zhengguo with the second echelon, got on the bus directly and quickly.

"It's too dangerous. There's a barrier lake ahead! ~" The colonel is crazy.

"Aren't our comrades in the reconnaissance camp dangerous?"

"They are all trained and not vehicles. If there is still a chance, you have no chance to escape in case of an accident!"

"It's all right. Give me the walkie talkie. I'll let our hospital's rescue plane pilot in front!" Zhang Fan waved his big hand.

This is the confidence of the fuck. The hospital has not developed in recent years. Where can there be such confidence.

Pilot the plane, darling.

The flowers of tea element flew over, flashed the signal light, circled around and flew ahead.

"Let's go!"

Let's go.

"Take care!"

Like a general, Zhang Fan took a group of tanks and plunged forward along the river.

.....

The paratroopers are ready on the Lufthansa plane.

"Comrades, now we have no vision and no signal below, but the people in the disaster area need us. I order the parachuting squadron to prepare for departure."

"Yes!"

The side doors and tail doors on both sides of the plane are opened directly! Three doors and four routes, four paratroopers at a time.

To tell the truth, a few years ago, in Sanchuan, the national paratroopers jumped one by one. The nearest distance between paratroopers was four kilometers.

But now, just like the tea vegetable hospital, the national army is also different.

However, the danger level is quite high, there is no signal guidance, and there are continuous aftershocks below. Really, to tell the truth, there may not be no people who jump and die.

However, there is no trace of information in the disaster area. Now we can only rely on these people to send signals.

.....

I don't know whether it's a woman's sixth sense or their hearts are in touch. When Zhang Fan entered the tea, Shaohua couldn't help calling Zhang Fan. When the phone got through, Shaohua immediately hung up the phone.

She knew he was coming.

She really wants to tell Zhang fan that you should be careful, but she knows that Zhang Fan is very busy now and has no time to listen to her.

And Zhang Fan took a look at Shaohua's missed call, as if he hadn't seen it!

Chapter 1279

The frontier earthquake, or an earthquake in a plateau county. The county seat, which was hardly known in the country, involved the hearts of many people for a time.

The Chinese people are as like as two peas in this country. For example, when we were poor, in the city around Beijing and Tianjin, China did not want international support or pity from others. Hundreds of thousands of troops provided disaster relief, then demobilized on the spot, and then built after disaster relief.

It sounds silly bubbling, but listen and breathe.

In fact, the Chinese people are the same. When they are poor, they would rather not associate with their relatives than let others have mercy.

But when you get rich, it's different.

Zhang Fan's motorcade just got off the river, and the news media in the border bird city also drove over by helicopter to report the disaster area and disaster situation in real time.

"Dear viewers, dear viewers, now I have arrived near the rescue force. After the earthquake last night, the tea vegetable troops, armed police, border defense, fire fighting and other teams assembled disaster relief materials and set out overnight.

Tens of thousands of troops rushed to the disaster area without using it for half an hour. Please look, the road ahead is unable to move forward due to landslides.

However, the people's army, shoulder to shoulder and hand to shoulder, regardless of the fatigue of starting overnight, risked the risk of secondary falling stones and struggled to rescue the road.

Comrades and friends, it is fortunate that the state has such an army! "

When the female reporter spoke, she choked a little, because the original green great wall below turned into a mud groundhog.

However, the enthusiasm has not changed a bit.

It is estimated that the driver also found the river team, slightly adjusted the fuselage, and let the reporter face the team directly.

"Team, follow up. Follow up and get to the front of the car. The camera must be steady and must not shake. "

The plane suddenly flew past Zhang Fan's front. In a few seconds, the female reporter already knew the nature of the team.

"Please look, please look, because of the landslide, the convoy was unable to move forward. As early as two hours ago, a battalion of our people's army entered the river to bypass the collapsed section. Now, with the support of the tea vegetable hospital and all walks of life, the convoy has directly entered the river.

They want to bypass the section of the landslide. The leader of the team is the president of the tea vegetable hospital. The car behind them is full of doctors and nurses who can save lives.

The place not far from them is the barrier lake. The barrier lake may collapse at any time. Please bless them, bless them to reach the disaster area safely, and bless the barrier lake not to collapse at this time.
"

As the female reporter said, she first burst into tears.

At this time, Zhang Fan popped his head out of the roof and waved to the car behind him, meaning to let the team behind keep up and don't fall behind.

At this time, the camera directly faces Zhang Fan.

In the camera, Zhang Fan was wearing a suit and tie that he had planned to award medals. Zhang Fan felt a little suffocated and had already pulled it and threw it away.

Although the clothes are slightly disordered, the slightly blackened complexion is more and more resolute at this time.

"Please look, please look, this is Comrade Zhang Fan, the president of the tea vegetable hospital. When he learned that the tea vegetable earthquake occurred, he gave up the award, gave up the opportunity for foreign universities to hire him as a foreign professor, and rushed to tea vegetable overnight.

After getting off the plane, Comrade Zhang Fan led the cross-country team donated by all sectors of society into the disaster area.

Comrades, this is the new generation of young people, this is the young post-80s, this is the doctor of China! "

"Call me and ask the silly bird above to roll away. What are you doing around me? I can't hear the people behind me."

Zhang Fan shouted angrily to Lao Chen, the co pilot.

.....

Paratroopers, like mushrooms, were planted from the sky. According to a report among the elderly, the death rate of paratroopers is the highest of all arms.

It can be said that they are really fighting alone. This jump without vision and signal. The following is the earthquake area. Really, I can't think of the degree of danger.

Yun MI, the paratrooper after 80, was the first to jump. I don't know why. When he stood at the door of the cabin, he wanted to shout: please rest assured.

As a result, as soon as he opened his mouth, the wind came into his mouth and only shouted out please. I didn't know that he thought the young man was so polite!

Avoiding the buildings and the erected buildings, Yunmi can be said to have tried his best to let himself fall on the dilapidated streets. At a glance, it is like entering the end of the world. Pull out the signal sign. As soon as the signal was sent, I heard a sound from the ruins.

"PLA! PLA! It's really the people's Liberation Army! "

Suddenly, the cry turned into a painful cry, like the heart in the stomach, like relief, and cried loudly: "the people's Liberation Army (a) is coming to save us. Mom! The people's Liberation Army (a) is coming! "

.....

With the entry of signal vehicles and large instruments.

The first-hand disaster information finally appeared on TV.

"Attention, attention, Xinhua reporters in border areas sent information about the disaster area for the first time,..."

On TV, military vehicles continued along the way, and even in some sections, the army directly shouted slogans, abandoned the car and ran forward.

All kinds of large-scale obstacle removal vehicles set out madly towards the disaster area.

There are also horse teams organized by herdsmen, with some light first-aid drugs and mineral water,

and thousands of horses around the mountain road, spitting white foam to the disaster area.

It's true that one side is in trouble and all sides support!

Especially when Zhang Fan's team appeared on TV, it made the audience in front of the TV worried.

As soon as the picture is finished, the barrier lake has risen like a bowl of milk about to overflow. Downstream, the team led by Zhang Fan started towards the disaster area like eating jumping candy.

When Shaohua saw Zhang Fan, he covered his mouth, "I know, I know. Why didn't he come! Why didn't he come? "

Tears fall like beads of thread.

"A doctor is not only a profession, but also his responsibilities and obligations. The disaster is coming. It's the doctor's duty to stick to his post! I'm proud of him! "

Because of the earthquake, old man Wu and old lady Wu also rushed back to tea. Old lady Wu hugged Shaohua and gently comforted: "it's okay, it's okay."

To tell the truth, Shaohua really doesn't want Zhang Fan to be a hero. Are there any women who want Zhang Fan to become a great hero? Yes, but Shaohua is not. Shaohua wants to live together safely and safely.

However, Zhang Fan's career is not allowed, and Zhang Fan's technology can't let him leave his post. So Shao Hua can only cry and pray silently.

Really, Shao Hua knew when Jia SuYue secretly envied her, but she would never say her worries or tell Zhang Fan about her worries.

Old man Wu also wanted to enter the disaster area, but Ouyang refused. Ouyang probably said in his heart at that time: you can't walk steadily by yourself. Why go to the disaster area!

On the farm, four old people stood in front of the TV. Zhang Fan's mother and mother-in-law were crying gently. Zhang Fan's father-in-law and his father-in-law smoked one cigarette at a time.

Zhang Fan's mother wants Zhang Fan to come back, but she can't say it. She really can't say it.

On TV, young soldiers are soldiers in their uniforms. Taking off their uniforms is actually children. Their young shoulders are carrying huge stones. How can Zhang Fan's mother say it!

But, heartache, it's really heartache.

"I'll go. Isn't this guy on three islands? Why did someone enter the disaster area? " Some college

students who pay attention to Zhang Fan, looking at a firm face, have no envy. To tell the truth, they chose this career.

Just like the army, it will be affected by the commonness of this profession, more or less some heroic complex. Of course, some people only dare to think about it and will never say it.

"I'll go. It's so handsome. The doctor is so handsome! This is the male god, this is the male god with responsibility! "

A little girl looked at Zhang Fan's firm face with tears in her eyes, but she shouted male god.

On the Internet, I'm crazy.

"Majestic our country, majestic our army!"

"Tea vegetable hospital, tea vegetable doctor, good job!"

There was also a discordant voice, "I'll go. The dean of tea vegetable went to the rescue in a suit. Did he think he was going to the ball! Come on, come on, I took a screenshot. Look, this guy is on the show. His suits are tens of thousands of luxuries.

This guy must be a corrupt Dean, so young. The Discipline Inspection Commission doesn't care. This is the doctor of China and this is the president of China! "

He seems to have sent some secret.

Originally, some doctors looked at the speech on the Internet and were not ready to speak. At this time, they couldn't help but watch them slander so much.

A doctor at the director level, who never spoke on the Internet, said, "he, Zhang Fan, should have received the other Queen's medal in Sandao today and the honorary professor of a top university.

However, he learned that after the tea vegetable earthquake, he rushed back by charter plane overnight. This is the doctor in China, and other people's clothes, let alone this one, can't be worn according to the price of other people's surgery abroad. "

.....

Su Province, Sanchuan Province, Shaanxi Province and Xijiang Province, close to Jinzhi, and with a team of plateau rescue and rescue, also set out at the first time.

Four hundred thousand people, really, at this time, just a frontier is not enough.

The army is like fighting a battle. In the northwest military region, all engineers, large state-owned

construction companies and various bridge construction companies set out to Jinzhi.

This is the power of China!

With the entry of paratroopers, information and communication in the disaster area was finally established.

Bad news came one after another, and the whole country was worried.

"Who is the nearest team to the earthquake area now?" In the capital, all leaders have stopped almost all their work and paid attention to Jinzhi.

"The paratroopers have entered Jinzhi, and the large army is a battalion of the chasu border defense regiment and a medical team of the chasu hospital. They are only fifty kilometers away from Jinzhi! "

Chapter 1280

"Is there a serious collapse ahead?"

"Yes, the closer to the disaster area, the more serious the road damage. The motorcade has abandoned the car and walked. "

"Now put me through to Zhang Fan. I want to talk to the president of tea vegetable hospital."

.....

Northwest people buy cars. To be honest, they are not very similar to southerners. Southerners like sports cars more. Northwest people don't like SUVs. If there is a sports car on the street, it is estimated that the girls with long legs are all around.

But if there is a full-size cross-country car parked on the street, the old man will comment with drooling.

Zhang Fan's motorcade, the motorcade contributed by the local tea tyrants, has really made great contributions. If it is compared with the way of primary school students, Zhang Fan's motorcade will be on the river and on the mountain.

This makes the northwest old man see that he must love the car.

Although they are not far from the county seat, Zhang Fan will have a landslide and a landslide. They are all there, but the road is blocked.

At the last ten kilometers, there was really no way. We have to abandon the car.

"All personnel get out of the car and bring first-aid supplies. They work in groups of three, men and women. Xue Fei, you're dead. Comrades, we are about to enter the disaster area. Let's work harder! "

Zhang Fan and his team finally drove and caught up with the reconnaissance battalion that set out in front of them. To tell the truth, thanks to the soldiers of the reconnaissance battalion, otherwise dozens of boxes of normal saline and glucose could let these doctors and nurses rest.

Without these drugs, the doctor can only look at the wounded and cry.

The flowers of tea were hanging in the air. Zhang Fan ordered: "go back to allocate materials, drink water, and inform the European Court to let the European Court find a flat place to start on the spot."

"Yes, please pay attention to your own safety." The pilot on the plane made a military salute and turned away.

Zhang Fan came all the way. It was clear that it would take at least two days for the big troops to come in. There are too many places where the road collapses.

However, these places are national defense highways in those years, which are often built close to the mountain. At any time, in order to prevent the aircraft from laying eggs in the sky and the mountain cannon next door from blowing up the highway, they want to drill into the mountain.

In that year, the engineering technology was not enough. All the roads that could be repaired were at the foot of the mountain, so it would take a lot of effort to repair them after they were damaged.

But the wounded can't wait. If they wait three days, they can bleed to death. That is, the plateau, the environment is dry, otherwise an infection can make doctors' heads big.

After the plane flew away, Zhang Fan and them set out. Thanks to the fact that when waiting for the team in the hospital, Zhang Fan put on his usual running shoes. Otherwise, he would be killed if he wore leather shoes on this section of the road.

If you don't say anything, you have to climb when you encounter a pile of flowing stones.

"Let's go!" At the beginning, the soldiers of the investigation camp also wanted to help the doctors and nurses carry the first-aid kit.

But doctors and nurses, by this time, have been hot-blooded. They feel that they have stepped on auspicious clouds. What is more than ten kilometers!

As a result, it won't work after running. I haven't run for a kilometer. It's like cutting the chest with a knife. It's lack of oxygen in the plateau. Running again makes doctors and nurses who don't have this kind of strenuous exercise directly like fish on the shore, with their mouths open and facing the wind.

Slowly, the equipment turned to the soldiers. The doctors and nurses were embarrassed and had no choice. They were helpless. Really, they were determined to lift their legs and run.

However, Zhang Fan is fine. His daily exercise and physical transformation in the system, with or without, enable him to catch up with the soldiers.

"Zhang Yuan, Zhang Yuan! Telephone, telephone!" Lao Chen panted after Zhang Fan and chased him from behind to front.

"Whose, call at this time." Zhang Fan's lawsuit in the forehead is now a luxurious behavior because of lack of oxygen.

What's the state of this thing? In fact, it's about the state after you finish the 800 meter examination.

Lao Chen tried to pour two breaths and whispered, "leadership!"

Zhang Fan thought he was the leader of tea vegetable and said angrily, "I'm Zhang Fan!"

"Comrade Zhang Fan, Comrade Hu wants to talk to you."

Zhang Fan swallowed and spit. He couldn't say what he wanted to dislike each other.

"President Zhang, this is Comrade Hu!"

"Hello, chief!" Zhang fan stops.

"You are the rescue force closest to the earthquake area now. On behalf of Dang, on behalf of all leaders of China shipping, I am here to say please!"

"Please rest assured that we are only more than ten kilometers away from the earthquake area. We must march in a hurry and enter the disaster area as soon as possible. The hospital behind us is ready to

start on the spot. As long as we go in, we can turn the wounded out. "

"Okay, okay, okay! What difficulties do you have now? "

"Report chief, according to the current situation, it takes three to four days to wait for the road to be unblocked. Most of the landslides here are boulders and granite, and the road is narrow. Even if there are large equipment, it may not be able to start.

So now we need helicopters. After we enter the disaster area, we will build about six operating rooms, but most of the wounded still need to run to the second-line hospital! "

"OK, I know. Don't worry. There will be planes. Finally, on behalf of me, I say thank you. After entering the disaster area, you must protect yourself. We are waiting for your triumphant return! At that time, the state will honor you! "

"Received, please rest assured that the tea vegetable hospital and the tea vegetable military region will complete the task!" I don't know why, Zhang Fan's heart is warm.

Of course, if the local leaders of tea vegetable are around, it is estimated that Zhang Fan will die! I have no credit and no pain! Can't you bring a word about the local government? Aren't we good enough for you. Why do you want hands? I dare not give feet. I have no conscience!

"Comrades, the chief called in person. The chief asked us! We are the first team to enter the disaster area. Come on, just one word, rush! "

One hundred meters, five hundred meters, one kilometer.

I don't know if God is sad or wants to give China some difficulty. It just began to rain with snow, and then it turned into ice.

The closer to the disaster area, the more difficult it is for Zhang Fan to go.

"Come on, I'll carry you!" Without saying a word, the soldier carried the nurses around him. Like men, they kept silent for more than ten kilometers, and even rushed forward when the heavy rain hit their heads.

The nurses who had insisted were carried by the soldiers. They looked at the panting young boys and the children with rain and sweat. The nurses climbed on the soldiers' backs. They didn't know whether it was rain or tears.

Just want to cry, really want to cry.

Sad!

No, there is no trace of sadness in my heart.

There is only one kind of happiness.

No matter how much suffering, if this country has such a group of people and such an organization, this country will not fall.

Xue Fei hung at the end of the line and watched the nurses and the boys run away on their backs. He opened his mouth and drank a few mouthfuls of sleet. He felt as if he was about to boil. He had never thought so about becoming a girl in his life!

Finally, Zhang Fan, they saw the iron plaque hanging on the half inverted flagpole: welcome to Jinzhi County!

The rickety iron sheet Blue brand is like a flag. Although it is going to fall, it still has to work hard to complete its work!

The county is a small basin. Originally, this place was a xiamapo. In the past, Zhang Fan came here and the county hospital came here to meet him.

But not today.

Standing on the high slope, almost all the walls are broken, and only a few other buildings stand completely in the middle of the city.

"Zhang Yuan, look, there are red flags flying!"

"That's hope primary school!" Zhang Fan noted slightly. After waiting for the team behind him, he shouted to the crowd: "comrades, the long march has arrived at razikou. There's only one last step left. The disaster area is ahead.

The people in the disaster area can only count on us now. I'm in a group now.

Dean Gao, you take the orthopedic department I and the surgical team of the emergency center to build an emergency operating room in hope primary school.

Comrade battalion commander, please allocate a part to cooperate in building the operating room.

Xue Fei, you follow me and the army into the earthquake area and look for survivors! "

"Yes!"

"Good!"

Here, the highest level is Zhang Fan, so he has now become the first commander here.

Although Lao Gao is old, his physical quality is better than Xue Fei. Xue Fei's tired tongue wants to spit out like a dog.

And Lao Gao followed up all the way, talking with steel sound.

Really, no wonder there are often some old men after 60 and young men after 80 running around on TV.

When they entered the earthquake area, Zhang Fan found that the paratroopers had organized some uninjured or even slightly injured people to save themselves.

Really, this kind of team is too good for the organization.

In front of some buildings that did not collapse, although the paratroopers did not communicate with each other, they had brought everyone together early.

You help me, I help you.

When Zhang Fan rushed in like a drowned chicken, Yun MI, the young man of the paratrooper, seemed to be liberated.

"Come on, there are many seriously wounded here. I've run out of painkillers. There's nothing I can do. What should I do if you don't come again!"

The boy cried.

When jumping at a height of 5000 meters, he had to be a hero and shout slogans.

When he couldn't see the ground clearly, he didn't turn back and didn't even blink.

However, after entering the disaster area, he used up the painkillers he had prepared for himself, looked at his praying eyes in the crowd, and looked at the time when father and son were humble to each other for a painkiller needle.

He cried.

Men don't shed tears, but they don't reach the sad place!

Tiger eyes in tears, not ashamed, really, not ashamed!

"Leave it to us! Your task has been completed. Now I order you to establish stable external communication immediately! "

Chapter 1281

The flowers of tea fly out of the earthquake area and fly towards the large army.

To tell you the truth, he was originally a spiritual guy and a rich child. He was dressed like a flower girl by Ouyang.

When I was covered with propaganda slogans, the drivers resisted, but it was useless.

"European Academy, Zhang academy, they have arrived in the disaster area! Zhang Yuan asked me to tell you that it is too late for the rescue team to find a wide place and start on site and wait for the road."
"

"Is everything going well on the road?" After all, dozens of people followed Zhang Fan along the river.

Whether it goes well or not, Ouyang has to ask before he can feel at ease.

"Zhang Yuan asked the rescue team to start on the spot!"

The pilot emphasized another sentence.

"What's the difference between unfolding on the spot and staying in tea." Ouyang doesn't quite agree with Zhang Fan's idea.

In the past, to tell the truth, Zhang Fan's idea was wrong and Ouyang's was right.

Not to mention the early years, let's say that in 2008, China was not reborn. Although it didn't want nothing, it was much better than the mountain ponds in that year, but there were still a lot of materials in short supply.

For example, doctors were not the most needed in those years, because almost all large hospitals in China sent doctors and nurses. However, due to the number of patients, the supply of emergency drugs was not available.

In fact, the country of China in those days was like a family. After the age of satiety, when they just

entered the age when they could eat some meat, but they couldn't eat it with their hands. They could only eat some meat. Suddenly, there was a big funeral, and they didn't have enough money left.

But it's different now.

The country is really rich!

It's not uncommon for ordinary people to have many helicopters. Even local journalists can do live broadcasting by plane. In 2008, there was no such treatment except central mom.

At this time, the leaders of the tea vegetable area who came later also came.

Even a leader far away from the bird market came.

"Why can't we expand it on the spot?"

Before Ouyang spoke, Lao Ju said, "this place is unfolded. How can the patient run out and recite it?"

"The superior has photographed the support of the land aviation brigade, and not only the land aviation brigade in the frontier, but also the helicopter brigade in Lianhua base has come this way." The tea vegetable leader finally raised his head proudly in front of several leaders of the tea vegetable hospital.

"The leaders of central and southern China have issued orders to let all the helicopters around them come to support."

The hospital in niaoshi also came. Ouyang thought about it and ordered it to start on the spot.

Give me this order.

Various hospital equipment began to expand.

The linked surgical vehicle donated by the local tyrant is like a bus like four land spaceships and the European star. It is connected tail to tail. Like transformers, a large fork Emergency Center for inspection, surgery and treatment immediately appeared in front of people.

And state rationed surgical vehicles. Ouyang used to eat more and occupy more. Two or three other operating vehicles are already very powerful. The operating car of the tea vegetable hospital is just like a square array, which is directly paved along the hillside!

Before it was finished, the direct water purification system and the simple workshop for the ratio of normal saline and glucose started work directly.

There are also various inspection systems. DR is entry-level, even on-board CT. Speaking of conversation, it's really like showing off wealth. Ouyang stands on the roof of Zhang Fan's cool Luze.

Originally, it was a full-size cart, which looked bigger than the military car at the head level, and hung a red card. It was dazzling. After Ouyang stood up, he was directly like a star. The crowd and team chasing after him looked at Ouyang.

Ouyang holding the microphone, Xiao Chen standing on the pedal holding the old lady's legs!

"Follow my orders and look at my flag. Now check the area. Please level the ground as soon as possible to make room. The operating area must be delimited with red line and white lime, and there must be a rest area and canteen in front of the simple treatment area. "

Ouyang took over the command right here while directing the deployment.

Anyway, she is neither the Secretary of the hospital nor the legal person of the hospital, so now the old lady is more free than before.

The command of tens of thousands of people. To tell you the truth, it is really possible to command tens of thousands of people in peacetime.

The old lady was as excited as beating her adrenal gland.

"Frontier guard 5431's car, get out of my way quickly, send the people on your car down and help level the land and dig stones. Can you dig through an excavator!

The one with a star on his shoulder, I now order you to maintain the traffic. You must ensure that the traffic is smooth so that the later large machinery can enter as soon as possible! "

Ouyang knows that the other party is a leader, but she doesn't know which leader it is. She holds this command and has special experience. Really, it's a dream to let Ouyang delegate power automatically now.

Others were surprised at how the old lady became the commander-in-chief, not a leader and not a soldier.

But listen carefully. This man commanded right and well.

The commander of the border military region stood on the highway with a small red flag and a serviceman, commanding the traffic at the top of his voice.

The biggest leader of the tea was the army and police, which was in line with Ouyang's assignment to fight against the shovel in the first line of leveling the land.

"Inspection team in place!"

"Logistics support team in place, the machine has started!"

"Operation team in place!"

"Diagnostic group in place."

"Emergency treatment team in place!"

In the walkie talkie on the public platform, report and implement one by one.

"The traffic team ensures that the road leads to the collapse smoothly!"

The commander of the military region looked at Ouyang standing on the roof and said to the people around him, "this woman is extraordinary. Tea makes talents!"

Just as Ouyang was preparing, there was a sudden sound in the sky like thunder.

Ouyang looked up and saw that it was like a helicopter battle group, flying over in darkness! Like a flock of birds returning home at sunset.

"The flight brigade should enter the disaster area to operate the wounded, and the flight brigade should enter the disaster area to operate the wounded. Please clarify the treatment points for transferring the wounded in the field hospital, and please clarify the treatment points!"

The pilot's voice came from the public channel.

"The cross marked with lime in the lower flat is the transfer point, and the cross marked with lime in the lower flat bottom is the transfer point."

"Copy that! Yes! "

A group of planes flew past the crowd, and the last plane fell. Then the crew immediately jumped off the plane that had just stopped and ran to Ouyang.

Pop! First, a military salute

Then he said loudly: "report to the chief, the tea element in-depth rescue team now needs narcotic drugs, hemostatic drugs, bandages and syringes. Now please load the materials and we'll take off immediately."

Ouyang never thought that he would be the head of the government today.

Proud and solemn, I don't know what to think. The old lady even gave a military salute and said, "all materials are ready. Please send the list to Dean Zhang Fan."

The crew took the list and then returned a military salute. Turn around and go.

Ouyang, with a loudspeaker in one hand and a small red flag in the other, and a walkie talkie on his shoulder, trembled slightly.

Xiao Chen thought that the old lady was a little cold by the wind, but when he looked up, the old lady's face turned red, just like a little girl in her first love who stole a kiss.

.....

In a few years, not to mention the others, the rescue of Jinzhi and Sanchuan were carried out one by one.

When there was a shortage of drugs, people enthusiastically donated drugs. Most of the drugs that could be donated were antibiotics.

And now, there is no shortage of medicine!

There's no shortage of planes!

No shortage of doctors!

Natural disasters are merciless, but the country is powerful.

She can protect the people in this land.

The aircraft left.

But the roar is still not over.

Here comes the team from China Railway 13th Bureau.

They are really Big Macs on the ground.

Some trucks can't be called trucks. The wheels are as tall as adults.

All kinds of heavy machinery, large drill bits like missiles and shield machines like disks are said to be able to open granite.

Although they walked slowly, their momentum was like an indomitable warrior, and the black smoke

from the truck was like the roar of the country that had been suppressed for hundreds of years.

Moreover, there are mobile linkage and telecommunications. The three Meng brothers are always in focus. They drive all kinds of cars with antennas and start working directly near the hospital.

For a time, where there was no signal, the telephone rang one after another. Really, the old ancestor's words are really right. It's better to have parents than yourself. The backer will fall, and everyone will run. Only yourself is the most reliable.

Ouyang's microphone is useless. The old lady's teeth are broken.

Looking at the arrival of large-scale building instruments, the commander of the military region directing traffic threw down a small flag, stood in front of Zhang Fan's car, also held a loudspeaker, and shouted at the soldiers in the audience: "comrades, land airlines can go in. Although our border guards can't fly, they can go in with their feet.

Comrades, we already have large-scale instruments here. Now we can put down our burden and move forward light. I believe that we will be able to rush into the earthquake area at the fastest speed and when the people are most looking forward to it. "

Then he clenched his fist and roared, "comrades, rush with me!" Then he threw down the loudspeaker, took the lead, jumped off the river and rushed to the disaster area.

"Ouyuan, you can't go with me. Zhang Yuan is not here. Such a big field has been opened. If you go, what can I do?" Xiao Chen looked at Ouyang and seemed to want to follow him. The little young woman was about to cry.

.....

In the earthquake area, when looking at a large number of troops in green military uniforms and white coats, the people in the disaster area are like babies in the moon who see mothers who can feed,

It's sad to cry.

Zhang Fan, none of them had time to comfort.

"Come on, cry a fart. Come on, man, young woman, dry my tears and take us to save people.

High court, come on, you take Wang Yanan and Zhou Chengfu and they leave to start the operation. "

With that, Zhang Fan, Xue Fei and a group of men and young women who had just dried their tears entered the broken buildings with all kinds of first-aid drugs.

To tell the truth, there are few buildings with more than seven floors in a small place. Otherwise, it

would be useless for Zhang Fan to come.

The first paratroopers to jump down and the first batch to enter the army helped Zhang Fan save people while placing signal lights everywhere.

Chapter 1282

A large number of machinery entered the landslide, and the originally hard stones were removed and buried one by one like tofu.

When Huaguo was built after 2008, it can be called infrastructure maniac. It is not very difficult for the collapse of a small mountain road. While opening up the road, the 13th Bureau directly widened the original two-way single lane into two-way four lanes.

Like a simple long legged girl's wordy ice cream, the small mouth opens and closes, the chocolate shell is gone, and there is only cream left.

I don't know where all kinds of materials come from.

Lines of cars lined up. From tents to bottled water, from clothes to food, and even children's milk powder. It's continuous. It's estimated that the team can line up to tea vegetable from here.

Each team has its own organization. Except that the red scarf is not allowed to come, all the names that can be called have come.

Even the March 8th red flag bearer team of tea vegetable carpet factory came!

really

If there had been such a force in those days, the three rivers of China would not have been so difficult.

Don't let the Chinese become powerful. Once it becomes a potential, it can surge like a star.

How foreign history books describe China is not very clear, but the history of China can be seen from the beginning to the end. It feels like a huge giant with great power, but it is so addicted to talking and reasoning with his mouth.

When developed, they live in harmony with their neighbors, and when poor, they are often bullied by small countries. How do you think this country is polite.

But do the Huns around China think Europe is more suitable for milking cows?

In fact, China and Ouyang look very good.

There is a tiger hidden in Mingming's bones. She seems to have a lady's temperament. Looking at the flowers of the director of the nursing department, she also made a row of cactus in the office. To tell the truth, the stall selling flowers at the door of the hospital has changed to selling more meat!

Mingming is a large rescue plane, a muscular man, with rouge smell picked up by Ouyang.

really

When I think about it, I feel like it's too special.

Ouyang is a junior player. He was even more awesome in those years.

It was said that there were three soldiers, just three, and then launched an attack on an artillery battalion of the third brother. Even if I didn't know, I thought it was three brain cripples. As a result, I hit one of the other battalion, threw down the artillery and fled.

Then, when the war is over, let the three men make a report, and they will be honest and say what they have.

"The enemy not only did not surrender, but also dared to fight back at me!"

This is the report made by Pang Xingguo's hero trio to the superior afterwards! I dare not write such a novel.

So, don't let the Chinese get up, but if you can stand up, this country will be able to carry all the sadness and pain, and then make great strides forward.

Motorcade, organized crowd. A team with all kinds of flags.

Really, looking at this group of people, it's cold and rainy, but it's like pouring a donkey after drinking a big mouthful!

.....

"Dear viewers, the latest news is that rescue teams have entered the Jinzhi disaster area, which affects people all over the country.

After a paratrooper brigade first entered China, the tea vegetable hospital organized young and strong technical elites to form a strong rescue team. They were not afraid of difficulties and dangers. In the face of aftershocks from time to time and rolling stones on the mountain.

Because of the support of faith and the trust of the people of the motherland, after the highway collapsed, they braved the barrier lake that could burst at any time to enter the river, bypass the collapse and enter the disaster area in the shortest time.

Please look at the short message from the front line of the disaster area! "

On TV, there was a small clip of video.

The first thing in front of the audience is Ouyang standing on the roof. In the heavy rain, Ouyang's petite body stands on the roof. With gray hair, she holds a loudspeaker and directs the rescue team of tens of thousands of people.

How to look, how to make people feel pitiful but tragic. Some people who are easily emotional have tears in their eyes when they look at the picture.

Then, what appeared was Zhang Fan's half body protruding from the window, leading the luxury motorcade into the river like a bison.

Then it appeared again. The soldier charged with the nurse on his back, with the rain on his face and the cry of muscle burst on his face.

Really, it's like a battlefield.

The picture flashed, the Chinese helicopter group was as dark as a Xiangyun. Even the heavy rain felt much smaller, and the sudden group of aircraft flew by.

Really, it's more inspiring than any blockbuster.

"The motherland is really strong." Ms. Zeng, who was waiting for tea, ignored her makeup and looked at the news. Her face was full of tears. She didn't know whether she was happy or wronged. She didn't know what it was for. Looking at the picture, she didn't know why a kind of regret suddenly appeared faintly.

The last picture is that when the large machinery enters, the soldiers drop their shovel and shout directly into the river, and run to the disaster area directly under the leadership of the regiment leader.

What is cohesion, this is cohesion.

"What can I do for the people of Jinzhi?" For a time, the mayor's hotline of bird city was blasted.

People all over the country are enthusiastic about money, materials and all kinds of.

When the news was released, everyone's original worry and anxiety calmed down slightly.

Because we are not afraid.

In the disaster area, the real test is Zhang Fan and them.

At this time, racing against time is really not a slogan.

"Come on, doctor, there's a child here!"

Under a large stone slab, it was obvious that a young couple were hugging each other. His body has been blurred by stones. Men and women can only be distinguished by the color of their clothes. But under the two bodies, a good baby protected by the two bodies was crying.

Maybe they couldn't suck * * or maybe it was because the weather became cold and the child began to cry.

In the ruins, this cry cut the hearts of the soldiers like a knife.

Xue Fei ran over with the first aid kit. It's really hard to walk on the road. If you come to the disaster area, it can also be called the road.

Here, you can only use both hands and feet.

Holding the baby, Xue Fei untied his clothes and stuffed the baby directly under his clothes.

"Milk powder, 60ml, mixed with a little glucose, the child shows signs of dehydration."

On the other hand, facing a teenager under the big stone, Zhang Fan's scalp was numb.

"Come on, brothers, let's try again. We can't let the child lose his legs! Come on! " A group of men roared, with blue veins on their faces and big mouths.

Zhang Fan lay on the edge of the stone, giving the child an anesthetic while opening the venous channel.

"Uncle, are you jiefangjun? Woo! Woo! Woo! Abba and Amar were pressed inside. When the house shook, Amar pushed me out, but they couldn't get out. Uncle, can you save Abba and Amar? You are

jiefangjun and you can save them. Uncle, please. "

The child, whose legs were pressed by stones, looked at Zhang Fan and prayed for Zhang Fan in a weak voice.

To tell the truth, Zhang Fan has hardly shed tears since the first life he died for him and the policeman.

In the medical industry, tears are the most special and useless.

But today

Zhang Fan was crying.

He doesn't know what to say to the child, he doesn't know what to say to the child.

He can only do his best. He can only do his best to keep the child's legs.

The child has lost his father and mother, but he must no longer have these legs.

The roar was so loud that dozens of men finally lifted the stone. Zhang Fan immediately put his hands under the falling stone slab and the child's unconscious legs.

Come on, come on, come on. Try to get all the tissues of the child's lower limbs out completely.

"Good!" Zhang Fan, with tears on his face, roared when he carried the child out from under the slate.

Then, the nurse quickly injected cardiogenic and helped Zhang Fan run the child to the emergency operating room.

I don't know if it was the child who told Zhang Fan his hope, or after seeing jiefangjun, the child finally relaxed.

The blood pressure of the child who was hanging a breath collapsed.

I want to open my eyes to see this uncle, but I just want to sleep.

It's like seeing your parents in a dream.

doze!

There may be no pain in your sleep, no pain in your heart when a stone falls.

In my sleep, I could still hear my aunt shouting at that time: "Yao'er, run, run, run out! You're going to run out! "

"Don't sleep, don't sleep, open your eyes!" When Zhang Fangao felt his first foot, the pain of the stone piercing his leg could not penetrate his brain.

Now he wants the child to survive and grow up healthily.

"Uncle, don't cry!" The eyelids opened slightly, looked at the uncle, and the child called softly. The little hand was weak and wanted to wipe Zhang Fan's tears, but the child who lost blood was going to shock. How could he lift his arm as heavy as a kilo!

Dry lips, skinned lips, slightly trembling cry, just like the cry of a young beast.

Zhang Fan's heart was broken.

"Uncle doesn't cry, uncle doesn't cry, and you can't sleep. What's your name? Open your eyes, please. Open your eyes quickly. The operating room will be here soon. Don't sleep!

Come on, Lao Gao, come on, open the door of the operating room! "

Really, Zhang Fan is crazy. Come on, run.

The road of tens of meters is as long as a century.

"Come on, step up! Stop bleeding. Prepare for surgery. "

Entering the emergency operating room, Zhang Fan wiped away his tears, quickly took off his muddy clothes, put on his hand washing clothes and surgical clothes.

No matter what today, just for this uncle, don't cry!

The operating light is on!

Cardiotonic, plasma, all four venous pathways were opened.

"Stop bleeding! QingChuang, Wang Yanan left leg, my right leg! You're in charge! " Zhang Fan gave orders to Wang Yanan and the anesthesiologist.

.....

Bird City, hospitals in various provinces, have gathered elite soldiers to bird city.

Chapter 1283

There is a great shortage of doctors in the emergency operating room.

At present, most of what doctors can do is to protect the wounded from the earthquake area when rescuing the survivors.

Bleeding hemostasis, coma fragility, and rescue that can be rescued. As for follow-up treatment, the patient must be transferred to the secondary backup hospital.

Because this operation is not sawing wood. The saw is too slow to use the axe. For example, the operation of thigh and femur fracture is a bone fracture without talking about the rescue of hemorrhagic shock or any other symptoms of the patient. Such operation is not early preparation.

Not to mention postoperative treatment, just one operation time, at least about an hour. Therefore, there are five emergency operating rooms. Even if there are operations, there can be few. Therefore, the operations at this time are actually emergency treatment.

For example, for those with broken limbs, find ways to stop bleeding and protect the broken limbs, and then give the patients symptomatic treatment, and then transfer them out for specific treatment in the second-line hospital.

However, without surgery, people will die. If it is too late to run, we should first consider saving lives.

Medical assistance is very different from other assistance.

Disasters in China are classified into five levels: minor disasters, minor disasters, medium disasters, major disasters and catastrophic disasters.

A thousand deaths are a disaster. And according to the current statistics of disaster medicine, 95% of disaster deaths occur before the victims arrive at the hospital. Moreover, the most terrible thing is that 72% of the incidents in the Asia Pacific region do not have the ability to deal with 50 casualties at one time.

So when a big event comes, onlookers see the excitement, and for the injured individual, no matter how big the snowflake is, as long as it falls on the top of his head, it is a disaster.

Therefore, when I see the protest parade for wearing masks or not, I really don't know what it's like in my heart.

Haven't they been beaten by disease?

In the treatment of large-scale casualties, the first thing is to judge and mark the obvious parts of the wounded: I means immediate treatment, II emergency treatment, III light, 0 death!

The on-site medical personnel are divided into two categories: the evaluation group and the treatment group.

Specially assigned person for evaluation and treatment.

The treatment was divided into four groups: Red Group, yellow group, green group, and then the transport group of group o.

In case of large-scale disasters, it is allowed to assess the light wounded as the heavy wounded on site. Moreover, the principles of treatment for large-scale disasters are as follows:

Help first, then the wounded, first the heavy, then the light.

Therefore, the treatment at this time is often cruel. Doctors consider saving lives and saving lives quickly, rather than carefully considering other aspects.

For example, when a male lower body is injured at ordinary times, even if it is broken, it can be removed only after the doctor passes through the patient, with the consent of his family, and even after consulting with a superior expert.

In a disaster, if there is necrosis, the doctor will gouge out the cow in order to save your life. At this time, there is no chance for you to stand up and say I'm ok.

"Come on, electric knife!"

The child's leg hit the pelvis, slightly damaged the lower legs on both sides, and the femur was like a branch of a green bamboo pressed by a heavy object.

That is, if a child is an adult, it may break even more.

Zhang Fan is the main surgeon. The operation has begun.

Anatomy, hemostasis, Zhang Fan and Wang Yanan cooperate quickly, even without sound, just like two robots.

"Wang Yanan, what about Wang Yanan? There are not enough doctors. Patients with pelvic fractures have massive bleeding. People have been in shock. Come on!"

Outside the operating room, Lao Gao kept receiving patients. He allocated the operating room for patients and the doctor for the first time.

Orthopedic doctors are obviously not enough at this time.

Zhang Fan listened in his ears and was anxious in his heart.

"You go and get the next operation."

Hearing Lao Gao's anxious voice, Zhang fan can only let Wang Yanan leave.

"What to do here!" Wang Yanan was also anxious.

"Bayin, help me!"

Bayin's hand wiping the instrument with gauze paused and looked at Zhang Fan slightly at a loss.

To tell you the truth, let a general attending doctor compare his vision with Ba Yin and his vision of surgery.

Maybe, Bayin is really better. Because Bayin's job is the operating table, she doesn't have to deal with the patient, give the doctor's order, and talk to the patient. She is an instrument nurse.

Moreover, Bayin has not seen 1000 or 800 operations since she became a nurse. Sometimes, when young doctors do simple operations, Bayin can give a word or two! To the point.

However, it is difficult for Bayin to operate as an assistant.

"Come on, what are you doing?" Zhang Fan roared.

Bayin did not refute, put down the gauze and stood in the position of the operating table assistant.

"You live a little, don't be as motionless as wood!" The sadness in Zhang Fan's heart turned into anger.

.....

The rain finally ended and the sun showed his face.

One hour, ten hours.

Twenty hours.

The soldiers kept searching, not to mention people. Even the search and rescue dogs were tired and wailing.

Doctors are also hungry and thirsty. They eat chocolate and drink glucose. I don't dare to drink, because I have to go to the bathroom when I drink too much.

The original sweet chocolate is like eating fat meat. It's sweet and greasy, and it has to nausea from time to time.

"I didn't expect to eat chocolate and vomit one day." In another operation, Wang Yanan frowned and said to the head nurse around him.

The head nurse nodded gently. She didn't feel like talking. If she changed time and place, it's estimated that the head nurse would have something to say.

It's too depressing. During the operation in the hospital on weekdays, we don't talk much except when we are on the same stage with Zhang Fan, but as long as we are not on the same stage with Zhang Fan, we still talk very often.

Today, everyone is silent.

Hold on, hold on, hold on.

What else to say and how to say it.

Now the big troops can't come in. They are a light here. They are working, and the wounded have hope. The light can't go out.

Xue Fei's legs were muddy and bloody. He didn't know whether it was the blood of the wounded or his own.

Wiping his face and looking at the setting sun, he really wanted to find a place to sleep.

really

However, hearing the cries of the soldiers in the distance, he set off again with the stretcher group of doctors and nurses.

It's getting darker and darker.

The helicopter running the wounded again is estimated to be the last one today.

There is no shortage of materials, really, not at all.

"Rotate! In this way, if the doctors are tired, they will delay treatment even more. "

Lao Gao has to raise his legs with his hands when walking.

Into Zhang Fan's operating room, Zhang Fan is already the fourth operation.

The child on the first set was corrected for shock and ran out immediately after fixing the fracture. I don't know if I can hold Zhang Fan's leg in the future. Because the skin damage is too serious, I don't have the opportunity and time to transplant skin for him at this time.

Bayin continued to cooperate with Zhang Fan's operation with tears in her mouth. At first, the young woman was holding tears for the people in the disaster area, and then she was scolded by Zhang Fan.

Tea vegetable hospital, no one has been scolded by Zhang Fan!

Really, the little young woman is wronged. If she were at ordinary times, Bayin would have cried loudly, but not today!

"The superior informed us that we should stick to it for another ten hours. After ten hours, the road into Jinzhi will be opened. If we insist on ten hours now, we can treat patients for ten more hours. Director Gao, you can go to each operating room to cheer everyone up.

Let's stick to it. When we are in the hospital, sometimes there is no one. We are on duty for 72 hours. We all stick to it. It's only ten hours. We can do it! "

Zhang Fan doesn't lift his head. He knows that he can't compare with usual.

Where can the intensity of weekdays be compared with now.

However, there is no way but to insist.

The state has launched a class I response and mobilized experts with experience and means in earthquake disasters to form an expert group. Various hospitals, especially provincial hospitals that can adapt to the plateau operation, have also sent medical teams to Jinzhi.

The operation of the helicopter has really made great contributions.

Many of the wounded were sent to the secondary rescue station.

In the rescue station, Zhao Jingjin is the leader of the rescue team. Lao Zhao is busy with the operation with the doctors. The doctor from the bird market has long been usurped by Ouyang and integrated into the tea element treatment group.

Now Ouyang is the commander in chief here.

Whether you are wearing the license plate of side a or side o, whether you are wearing a white coat or a green military uniform, you should listen to Ouyang's orders here, and the orders of external leaders are not as big as Ouyang's orders.

Because this time is equal to war!

.....

When it was dark, the troops running forward rushed to the disaster area. When the helicopter comes out, it needs to transport patients and materials. They can only rush in by climbing mountains and rivers on the 11th Road.

"Comrades, the paratrooper comrades in arms have gone in, and the helicopter brigade has also gone in. Now only we are still on the road. Work hard, comrades and tea vegetable doctors can run in. Can't our old tiger regiment go in.

Can we promise? "

"No!"

"Yes, we can't promise. Today, before the sun sets, we must enter the disaster area. We are the children of the people. We come from the people. When the people suffer, we have to refuel even if we are tired.

Comrades, are you bitter? Think about the 25000 Red Army. Are you tired? Think about the old revolutionary predecessors! "

In the burst of troops, the cadres kept cheering, and the soldiers' clothes were wet, dry and wet.

.....

In the 13th inning with bright lights, large equipment kept coming and going, and the roaring sound of machines seemed to say to God, "we are not satisfied, we are not afraid!"

The sun finally set, and the silver moon slowly climbed up.

The soldiers with sweat and mud forced their troops 50 kilometers into the disaster area on a 5000 meter plateau.

A group of young doctors have operated continuously for nearly twenty hours.

This is the Chinese traitor!

Chapter 1284

The silver moon hung up. Over the small county town on the plateau, the moon really seemed to hang on the branches of trees. It seemed that you could reach out and pull the moon into your arms. Here, the sky and the ground feel integrated at night.

A pollution-free city can definitely make people feel what it means to have a bright moon and few stars. If at ordinary times, such as Bayin and their forthright young women, had a drink, they might have been singing and dancing.

Really, people in the urban circle of the mainland absolutely do not understand the living state of Frontier people. Although their life is not as convenient as those in big cities and their income is not as high as those in big cities, it is absolutely delicious. It can be said that people living in small cities have richer emotions, while people in big cities have all gone to fight against the pressure of life.

However, this kind of person, who is less stressed on weekdays, can't calm down when encountering setbacks, and even easily lead to collapse.

Bayin has never felt that ten hours are so long in his life. If the superior didn't say to insist on ten hours and have no expectation, Bayin may not feel so long and suffering, but now there is expectation and waiting.

Really, the little young woman stood on the edge of the operating table. Although her upper body kept cooperating with Zhang Fan, she would like to move like this for a while, what to move like for a while, too light for a while, too heavy for a while, and she had to accept a criticism from time to time.

To tell you the truth, Bayin really wants to tear Zhang Fan into parts now. My heart kept complaining: "did I do this job? I want to play with my mother, but I don't think my skills are up to standard. Don't play with my mother if you have the ability. Go find someone else!"

Of course, Bayin secretly turns his eyes on Zhang Fan and stabs the villain in his heart.

The efforts of the upper body to refuel put Zhang Fan in the position he needed, while the toes of the lower body Bayin were like fingers, pulling on the slippers. They were almost pulling out five holes in the

slippers.

Really, it's too expensive!

"Zhang Yuan, there are more and more patients, and the operating room is not enough!" Lao Gao dragged in like a dead dog. He really had no choice, otherwise he wouldn't come in at this time to embarrass Zhang Fan.

Zhang Fan's teeth under the mask bite his lips. His real lips are bitten by himself. Zhang Yuan, Zhang Yuan! Sounds like a breeze, but this thing is responsible.

Faint pain, groans and weeping made him particularly upset.

"One operation, one doctor and one nurse, people can still insist, and the operating room can't be vacated. Now the operation that needs to be operated cannot go out, and many patients can only be treated symptomatically! Consequences... "

Lao Gao spoke in a low voice, and Zhang Fan listened more in a low voice.

The wounded in the disaster area are not a chronic disease in the internal medicine of the hospital. Although symptomatic treatment can not eliminate the disease, it will not cause other major problems.

The wounded are different. Almost all the serious injuries here need surgery, and what's the ghost of symptomatic treatment?

Bleeding, find a way to stop bleeding. It hurts too much. I'll give you an injection of Qiang Tong ding or pethidine, and the rest will be fine.

It can be said that now is tantamount to watching heaven live, really watching heaven live. See who can get to the empty operating room.

Zhang Fan clenched his teeth as if he had caused the disaster, "give priority to children! Give priority to critically ill children! "

It's really heavy. Really, it seems to come out with a word, but the inner suffering and pressure, who says this, who knows.

Because this sentence determines life and death, not a person's life and death. Really, Zhang Fan feels like he has a feeling of being an executioner.

"Ah! Good! " Lao Gao talked for a long time, then reluctantly said, and then turned away.

He is also busy. On the one hand, he is responsible for shunting the wounded, on the other hand, he is also responsible for suturing the slightly injured patients in the green area, and is responsible for debridement and disinfection.

One operation after another, "drink red bull!" After an operation, Bayin looked at Zhang Fan and asked in a low voice.

Because in the operating room, itinerant nurses have long been taken away as instrument nurses or surgical assistants. Now Bayin not only wants to be an assistant, but also an instrument nurse, but also a itinerant nurse, and should be responsible for Zhang Fan's other affairs.

"No!" Zhang Fan said impatiently.

"If you don't drink, how can you have the strength to scold me!" Bayin timidly said a sentence to Zhang Fan.

In a word, Zhang Fan, who was originally upset, suddenly seemed to relax a lot.

"Sorry, today is really..."

"It's okay, I understand, I understand, you talk to red bull!"

While holding the open red bull, Bayin regretted scolding himself, "you worthless work, why are you so cheap! It's not good for him to be tired and foam white! "

In another operating room, Wang Yanan was crying and performing surgery.

Crying is crying silently, because she has been standing for too long, with leg pain and low back pain. The most annoying thing is that it's not time yet. As a result, her physiological period has also come, with faint abdominal pain.

It makes Wang Yanan feel uncomfortable. Many operations and long working hours make the uncomfortable body more uncomfortable. It's like a mouthful of meat and chewing for a long time. As a result, it didn't go into the stomach at all, and it was all stuffed between the teeth.

Then I can't pick my teeth. It's uncomfortable. I can't say it.

The tomboy's Wang Yanan fought with a group of boys in the hospital. She finally had a place in the Department.

Walking into the disaster area on the plateau, she bit her teeth. She didn't let the soldiers carry her back like the nurses. She just walked into the disaster area like the male doctors.

However, now, the original sour and painful body has added a layer of physiological pain. She felt wronged and sad.

"Is it wrong for me to choose orthopedics? Shouldn't I be an orthopedic doctor!" The girl was wronged, but not a word came out of her mouth.

Tears were coming out of her eyes quietly. She turned her head and asked the anesthesiologist to wipe her with a towel.

No one cares about her at this time!

For ten hours, the soldiers stuck to the front line with searchlights, and the doctors and nurses stood upright in the operating room for ten hours.

These ten hours are like the final test, both in heart and body, which is a real test for the first batch of young people to enter.

There is collapse, looking at the endless ruins, looking at his hands and legs, crying, disappointment, really.

"Little doll, don't cry. Without you, we are dying. Come and have a bite of milk skin!" The surviving old aunt took the canned goods hidden in her arms and trembled to feed the milk skin to the crying child soldier.

Everyone in the family except her was buried under it. This milk skin was the last thought she brought out from home! But looking at the soldier who is not a few years older than her grandson, the old aunt coaxed the child in front of her like coaxing her grandson!

Yes, especially when these military nurses put on their military uniforms and coats, they are all military nurses. When they take off their military uniforms and coats, they are children and can act as spoiled children in their parents' arms.

Now, the hard ten hours have made them endure the suffering that their peers can't imagine.

In fact, don't mention Wang Yanan. Even Zhang Fan wants to cry at this time, really! It doesn't matter if Wang Yanan cries, but if Zhang Fan cries on the operating table at this time, the site is estimated to be greatly affected.

After Wang Yanan cried, he felt much better inexplicably. Really, it's obvious that the pain has weakened a lot at once.

To tell you the truth, crying and menstruation are really the best magic weapon for women to keep young. Xue Fei, who followed the soldiers looking for survivors, was really kneeling to catch up with others this time.

In the past, he was a little doctor, and he was still the kind of person who complained about everything, scolded the leaders for being stupid, scolded the peers for being lazy, and said he was a smart man in the middle.

By chance, he became the leader in the debris flow and the deputy director of the emergency center of the hospital. Although he is the deputy director, the director is about to retire. He is the director of the emergency center of the hospital.

Now, his leadership is wise and his peers are hard-working. Therefore, now he should not only be a good doctor, but also set a good example for the following doctors.

The Chinese doctor rescue team is not to rush the president's army and brothers to me. This team is the brothers and me!

Xue Fei is tired and is about to call his mother. He has to work hard as a heart Soother for other young doctors.

He really wants someone to dredge him too! Occasionally, when he could stop to have a rest, he asked himself again, "isn't it fragrant to play mahjong, drink tea and raise a quarrel with old women? Why are you as tired as a donkey now! "

But after drinking the water, he has to continue, continue to look for survivors, and continue to do first-hand treatment.

They are all ordinary people. No one is born a great hero who can save people from water and fire!

At dawn, when the star was hanging in the sky, there was a rumbling sound in the distance.

The people at the treatment point, as well as doctors and nurses, subconsciously wanted to hide. Everyone thought there was another aftershock. As a result, not quite right. The sound is continuous.

"Zhang Yuan, Zhang Yuan, the road is open! The road is open! "

Lao Gao stood at the door of the operating room happily overnight, like a child, with tears on his face, but grinning happily.

"Come, come at last!" The big stone in Zhang Fan's heart finally fell.

The superior said it would take ten hours. In fact, eight paths will pass.

Vehicles, teams and people entered the disaster area.

Ouyang was in charge of the second level hospital, and Zhao Jingjin was in charge of the operation in the

second level hospital. At this time, Lao Ju rushed to the emergency treatment point with a large team of doctors.

"Zhang Yuan, we're here. Give orders quickly. Let's start on the spot or look for other places."

Chapter 1285

The entry of the big army makes no matter how well you publicize blood donation, but no one offers it.

Today, blood donors, old and young, men and women wait in rows.

"Offer three hundred. Although the country doesn't let us go to the rescue, our heart is provoked, and we are also a member of the state of China." An old man said loudly to the little girl in the blood bank.

The old man may have patted his thighs and shouted to be a government mother yesterday, or drank some wine and peed on the street at will. But now, it's really one heart and one mind.

This point of China really makes you unable to tell. Perhaps this is the country and people that people love deeply.

The national expert group has also arrived at the tea plant, got off the plane and drove directly to the disaster area.

"The conditions in the frontier are poor. The capital of the frontier is almost 1500 kilometers away from the disaster area. It is estimated that the hospital in the capital arrived in the disaster area a little late. This injury may be unacceptable! "

In the car, an expert from the South looked anxiously at the long line of motorcade bound for the disaster area.

"The tea vegetable hospital is not far from the earthquake area. They organized a team to enter the disaster area at the first time."

"The strength of a regional hospital is still not enough!"

Just when everyone was worried, the secondary treatment point appeared in front of them.

There are white surgical vehicles on the hillside. Just like the dense tents on the grassland, a small hillside is directly occupied by the surgical vehicle.

"This, this, where does this come from! Why so many! Is the doctor enough? " The southern experts who had been worried were surprised, but they were even more happy.

Pieces of surgical vehicles have directly formed the scale of a class II class a hospital. There are all kinds of other logistics support machinery, even those experts do not have in their own hospital and tea vegetable hospital.

In particular, the camellia rescue aircraft, the world's top rescue aircraft, has attracted more attention. The huge tea vegetable hospital is four words. People all over the world want to know that this is the same as the plane of their tea vegetable hospital.

Then, when the expert group entered the disaster area and saw the emergency treatment point, it was even more shocked. The secondary hospital was enough to surprise people. Here, it shocked the experts.

More than 60 operating rooms are lit at the same time. What is the concept? When there was a tsunami in a country, there were only three operating rooms that could start surgery in the disaster area. And here, more than 60 operating rooms.

This team may be strange to laymen. It's just a number. It's still a small number, but for professionals, this is a miracle!

"Darling, what surgical vehicles do you want people to send? Let the doctors come by plane. Don't bring anything. There's everything here. Come on, don't bring anything. There's everything here!"

The experts are incoherent.

The tea vegetable hospital shocked them too much.

Dignity comes from strength. That's right.

Really, Ouyang has worked hard for many years. I don't know how many people scold Ouyang for being domineering and saying that Ouyang's power is not tolerated. This comment can be said that in the system, it is tantamount to the negation of your leadership by the whole system! It's cruel.

However, this time, this time, people realize that Ouyang's is not easy to come.

The expert group wants to guide the work in the secondary hospital, but looking at the level of Ouyang's

command, the experts are relieved, or no one is confident to stand up and say that it is better than Ouyang's command!

People's growth is not to say that they are mature. This thing needs experience and experience. Ouyang has never seen any big scenes from his youth to his old age. To tell the truth, the old lady participated in small conflicts between countries in those years. Such people are born to deal with emergencies.

"Come on, give way, come on, come on, obstetrics and Gynecology, big belly, people are dying, ouch!" Xue Fei shouted as he ran.

The anxious young man doesn't know what to say. If he was an orthopaedic, he wouldn't be so nervous. If he was outside the brain, maybe the young man could find a way to open the skull to stop bleeding at that time, but he couldn't get pregnant.

In particular, pregnant women who have lost blood not only have blood on their bodies, but also black and red blood flows down between their lower legs. He is really crazy. He doesn't know what to do.

Run! The soldiers are carrying stretchers and running!

"Hurry up, hurry up. Don't bump, don't bump, slow down, slow down!" Xue Fei didn't know how he got through this distance.

A doctor is helpless in the face of a patient, and it is really cruel for a doctor.

Chapter 1286

The soldiers carried the pregnant women who felt that they didn't have much breath in and out, flying towards the operating room.

Not only did Xue Fei shout, but even the soldiers carrying the stretcher didn't listen and shouted: get out of the way, get out of the way, get out of the way.

All the way, blood drips down, and all the people keep getting out of the way.

The idle doctors in the maternity emergency operating room also ran out of the operating room for the first time.

Because it is a disaster area that has just opened the road, old doctors are not suitable to enter. In Ouyang's words, they are: don't you know your own things? You can't walk steadily. Do you go in to save people or be saved.

Aftershocks, high intensity, are really not suitable for some elderly doctors. To tell the truth, doctors, especially surgery, are too chicken to bully people.

Not only bully patients, but also bully doctors. Too young doctors can't. It's not easy to have experience. As a result, their hair is gray and their eyes and hands can't keep up.

The physician can prescribe medicine in three months, but the surgeon can't sew neatly in three months.

Therefore, the scope of doctors who can pull out disaster relief is too narrow.

LV Shuyan is in charge of maternity this time. After the girl entered the disaster area in the early morning, she has presided over several rescue operations for pregnant women.

Among hundreds of thousands of people, to be honest, there are many pregnant women, and it is too difficult to rescue pregnant women, because when a person has a child in his stomach, the human system is actually quite fragile.

The pregnant woman's body is like the original solid ten meter flood control dam. In the rainy season, some soil is piled up and the dam is raised to fifteen meters. It looks high, but this is only prevention. Once there is a small accident, it is the rhythm of collapse.

"Dr. Lu, come on, there's a critically pregnant woman!" The nurse of Department of gynaecology, after probing in and shouting, turned and ran.

LV Shuyan put down her lunch box and turned to run.

.....

After sleeping for more than four hours, Zhang Fan couldn't sleep, because more and more rescue workers came in. They were busier than the construction site. They shouted in unison, smashed stones and helicopters one after another. Moreover, he couldn't sleep because of something in his heart.

As soon as I opened my eyes, I saw Lao Chen sitting on one side with a walkie talkie in his hand and Zhang Fan's special phone. Lao Chen's eyes were red like rabbit's eyes. Look at the tea in the tea cup,

like black cow blood.

Zhang Fan sighed, "didn't you sleep? My eyes are red! "

"When I sleep, when I get old and feel light, I do some chores and I'm not tired. Zhang Yuan, are you hungry? I'll bring you dinner. "

"No, I'll go myself!" Zhang Fan is about to get up. Lao Chen has gone out to fetch dinner.

Zhang Fan simply took the time to wash and gargle. His sleep time was too short. He felt more tired than he didn't sleep. He was drowsy and washed his face with ice water.

After a while, Lao Chen came in with rice. It's very rich. Sea fish, beef, pork and vegetables, of course, are canned, and they are military cans.

"It's steamed in the pot. I asked if it tastes good. Take two bites. I ate some chocolate one day yesterday. I think my stomach is going to twist!"

Lao Chen accompanied Zhang Fan to eat. "Is the operating room enough? Are there enough doctors and nurses? "

While eating, old Chen said, "the operating room is enough. Now there are a lot of helicopters coming and going, and the doctors are enough. Today is much better than last night! "

"Good! Did anyone else eat? Let's not be special. " Zhang Fan looked at five or six cans. There were all kinds. He was afraid of Lao Chen's specialization.

"Zhang Yuan, you can rest assured and eat freely. There are war readiness warehouses everywhere in our frontier. It is said that three or four warehouses have been opened directly this time. The superior leaders also said that as long as there is no waste, open them to eat! Can eat to dry!

Most of the first doctors and nurses who came in are still sleeping. Xue Fei's snoring can spread three miles. "

"That's good!" Zhang Fan nodded and ate with Lao Chen.

This kind of can smells really good. Moreover, if you are very hungry, each bite is quite delicious. It is soft and rotten. The beef is cooked like fish. It can be said that it is fat and rotten enough. However, once you press down the hunger.

It's not very friendly. Meat, big pieces of meat, fat Zhang Fan is about to hiccup. Canned vegetables, looking slightly green, are like a dishcloth sprinkled with a little salt.

Before long, Wang Yanan woke up, washed his face, saw Zhang Fan eating, took chopsticks and picked a

piece of meat, "do you have instant noodles? This is too fat! "

"You dislike meat and vegetables!"

Just about to talk about Wang Yanan, as a result, the herdsmen dominated by mengke also came to the disaster area on horses.

"We're late, Zhang hospital. The doctors in our hospital can't count on it, but our nurses are still very powerful. They can help with injection, disinfection and nursing a patient!"

Except for organized rescue vehicles in the disaster area, other vehicles are not allowed in. But you can't control the wheels, you can't control the horseshoes.

Munk, they came in around the mountain.

While talking, Munk took their mutton, beef and all kinds of dairy products into the emergency treatment station.

"Why are you here? There are aftershocks all the way. What if something happens!" After seeing mengke and the herdsmen, Zhang Fan said a little angrily. Heart is kind, but unprofessional people are particularly prone to accidents at this time.

"Ha ha!" The red faced man smiled and didn't talk much. He began to unload the goods directly " It's all the wounded and yours. You can't get better quickly until you eat well! "

Then he stuffed a handful of milk pimples to Zhang Fan, "take a bite. I made it a few days ago. Fresh! "

Zhang Fan just stuffed the milk pimple into his mouth and just bit the milk pimple to pieces, he heard the call from the Department of gynecology: "Zhang Yuan, come on, there's a critical one!"

.....

Just when Zhang Fan stole milk and got pimples, LV Shuyan quickly checked the maternal and fetus in the Department of Obstetrics and gynecology.

"Come on, fetal heart rate monitoring, ECG! Where are you hurt? " LV Shuyan quickly explained the inspection, then looked up and asked Xue Fei.

"Chest, pregnant women's chest was injured by heavy objects, the right ribs collapsed obviously, breathing difficulties, and lower body bleeding obviously!"

LV Shuyan shouted to the people in obstetrics and gynecology: "come on, draw arterial blood to see the blood oxygen content!"

With that, LV Shuyan took the scissors and cut the clothes and trousers directly from the middle of the pregnant woman's clothes. Then quickly explore the wound.

As soon as she saw it, LV Shuyan began to jump. The right thoracic cavity collapsed obviously and the organs were offset, which means that half of the lungs have no effect. Looking at the weak breathing of the pregnant woman and the uterine orifice with blood, adults and children are extremely hypoxic.

This minute will kill two people.

"Come on, call Zhang Fan! Come on! "

Zhang Fangang put the milk pimple into his mouth. This non commercialized milk pimple tastes slowly. It doesn't look like it is sold in the supermarket. When it is put into his mouth, it is sour and sweet like a little girl's tongue. Just feel a little sour and sweet.

Obstetrics and Gynecology shouted loudly. Zhang Fan threw down his milk pimples and began to run. While running, he vomited milk pimples out.

"Zhang Fan, pregnant women have chest fractures and obvious hypoxia. The fetus is jealous of hypoxia. It has become popular!" When Zhang Fan was still ten meters away, LV Shuyan had already reported his illness to Zhang Fan at the top of her voice.

"Prepare for surgery!"

In the TV series, the topic of "protecting the big and the small" has been fired for many years. In fact, in the hospital, in this case, doctors directly protect adults without asking their families.

Pregnant women, after pure oxygen was directly input into the nasal cavity through the mask, the pregnant women woke up and looked at the doctors in white coats around them, as well as the five-star red flag flying in the distance. The pregnant women cried loudly.

Woo! Woo! Woo!

"Cry fart, there is not enough oxygen. Cry again, do you want to live!" LV Shuyan yelled. To tell the truth, in terms of swearing, people in other departments are really not as good as obstetrics and gynecology.

Pregnant women still cry disobediently. The oxygen saturation that has already come up falls down with the naked eye.

LV Shuyan pressed her broken teeth and shouted to the pregnant woman, "don't cry, the child is dead!"

As soon as she said this, the pregnant woman was slightly stunned, and then her hands touched her abdomen, chest pain and lower body pain, so that she didn't frown.

When she put her hands on her abdomen, perhaps with the connection between mother and child in nature, she obviously felt that the child was getting weaker and weaker in her abdomen.

"Doctor, save the child, save the child, the whole family has no, I only have children, no children, what's the meaning of my life, doctor!"

The pregnant woman stopped crying. LV Shuyan was told by the pregnant woman that she was crying.

Sad, unforgettable sad makes LV Shuyan feel uncomfortable and don't know what to say.

"Don't worry, don't worry, we will try our best to help you. You should also cooperate with the doctor. Don't talk. Your heartbeat is almost 160. You can't be excited anymore, otherwise you will have heart failure. Be obedient!"

Zhang Fan ran to the pregnant woman, "I look at the chest, you look at the lower body!" With that, Zhang Fan began to check.

Frown slightly while checking.

Because after the pregnant woman is hung with pure oxygen by the mask, the oxygen saturation is not up to 90%. Moreover, the skin on the chest obviously feels twisted. This is because there is bleeding in the body, and there is still a lot of bleeding.

"Surgery is necessary! Kwai Chai must open chest and stop bleeding as soon as possible. "

LV Shuyan checked the lower body of the pregnant woman. When Zhang Fan came, she was a lot more secure in her heart. Really, although now in the hospital, after seeing Zhang Fan, LV Shuyan didn't walk around, so she turned the phone and pretended to talk to others. Anyway, if she couldn't talk to Zhang Fan, she wouldn't talk to Zhang Fan.

But now, Mingming hates the black stone, but when he came here, it was a dangerous scene, and it seemed that everyone affected by him was not so flustered.

"Go and call the thoracic surgeon!" While carrying the pregnant woman to the operation, Zhang fan arranged personnel.

"Zhang Fan, you must have a caesarean section. There is a lot of bleeding in the uterine cavity!" LV Shuyan looked up at Zhang Fan in despair.

What is a leaky house? It rains at night. That's it.

Chapter 1287

"What now?" LV Shuyan looked up at Zhang Fan.

Pregnant women have massive bleeding in uterine cavity and chest. It's no use stopping at one place. You must stop bleeding at both places at the same time.

But at present, this condition, hypoxia and blood loss, pregnant women can insist on both. This operation, do, pregnant women may not live, do not do pregnant women must die.

"I can ensure that the minimum amount of blood is lost during thoracic surgery! what about you? If you can also ensure that the uterine cavity stops bleeding at the first time and does not cause a lot of blood loss, this operation can be done!" Zhang Fan looked at LV Shuyan with a serious face.

LV Shuyan was almost crying, and her little white teeth were almost broken. "I'm not sure. Do I still call you! If Shaohua were here today, please, would you say that! Slag man! "

I don't know why. When seeing Zhang Fan's attitude, LV Shuyan somehow thought of Shaohua and compared with Shaohua!

Man, it's too complicated.

The pregnant woman who didn't know so many plays in LV Shuyan's heart looked at LV Shuyan and said weakly, "doctor, please, I don't care. I must save the child!"

"Now I want to inject you with a lot of adrenaline, which may cause the child to lack oxygen!" Zhang Fan said to the pregnant woman.

"No, I don't want, I don't want, I don't want surgery, I don't want surgery, woo! Woo! Woo! I can't let the child go. The whole family is buried under it. You can't do this, woo! Woo! Woo! "

Pregnant women are like injured female animals, struggling to get up and leave. Maternal love is greater than heaven.

"You may die without hormones! Because I lost too much blood now... "

"I want the child to survive!" The pregnant woman stopped crying at this time, with a frightening persistence in her eyes.

"The child is alive, there is no mother, you..."

"It's okay, it's okay. Society is getting better now. As long as children eat some hardship, they can grow up..."

.....

"This is to give birth to children!" Zhang Fan muttered to himself.

"Do it! Zhang Fan, I did this operation!" LV Shuyan seemed to be stimulated.

"OK, go into the operating room!"

To a certain extent, all industries actually have a barrier. Some people swish, feel that they jump over without a little difficulty, and then the technology is uncontrollably improved.

Some people grind and grind like they want to vomit at the door if they don't eat sildenafil. They grind and grind for several years, and then suddenly one day they seem to have an opening at dawn.

Some people can't jump all their life, and their technical level is getting worse and worse, and their courage is getting smaller and smaller. They even dare not do the surgery they could do before.

Therefore, some old doctors often tell young doctors that the number of seriously ill patients is unimaginable for a doctor's exercise. If a doctor sends away 60 or 70 seriously ill patients, such a doctor can definitely fly over qualitatively.

Although this is a bit absolute, the truth is right.

If LV Shuyan today, in this environment, did not dare to pick up the patient, did not dare to operate on the patient, it did not seem to have any impact at the beginning, but in fact, this pregnant woman could become the shadow of her life.

.....

The operation began.

Zhang Fan took the extrathoracic group for thoracic surgery, and LV Shuyan took the gynecological group for gynecological surgery.

Two operations were performed at the same time. Except one anesthesiologist on one operating table, the others were double teams, even the tour and instruments were double.

"Knife!"

"Knife!"

Up and down

The cold light flashed across

One from the right chest and one from the lower abdomen.

"Attention, stop bleeding!" Although Zhang Fan said it to Dai Yuhang outside his chest, he also said it to LV Shuyan. Although he couldn't take care of LV Shuyan during the operation, it's OK to remind him from the side.

Surgery, to be vulgar, is the relationship between girls and young women. I'm not afraid you won't, just afraid you don't dare. Once experienced, a doctor can say that even temperament changes from the inside out.

"Bone biting forceps!" Zhang Fan has cut off his skin and is about to bite off his ribs. LV Shuyan is still dawdling on the muscle layer.

The girl was so nervous that she had to look up every time the monitor rang.

.....

Tea vegetable, in Zhang Fan's villa.

With more and more news and better disaster relief, Shao Hua also slowly recovered from his fear.

A few days ago, old man Lu and old lady Lu coaxed Shaohua. These days, Shaohua and old lady Lu coaxed old man Lu.

"I don't know how epidemic prevention is done. Has the water source been polluted? Alas, Zhang Fan still has no experience. Why don't even the epidemic prevention stations unite and fight their own battles? There will be problems..."

The old man was nagging, nagging, and muttered from the morning, "don't mutter. Why don't people have no experience? How can they get the top ten young people? Do you have this honor at Zhang Fan's age!"

Mrs. Lu couldn't help it, so she choked the old man.

The old man pouted and wanted to go to the hospital. As a result, the phone came. It was Shige's,

"Shige, are you okay!"

"I'm fine. There's an earthquake over chasu. How's the situation? Zhang Fan took the team up? "

"Well, now the situation is basically under control. Don't worry. You're not in good health. You'd better pay more attention to rest!"

"You're not young. You should pay attention to yourself. Don't try to go to the disaster area. When you go, others have to worry about you. You can't do a few operations!"

When others say this, old man Lu will definitely refute it. Why do you say Lao Tzu can't, especially the more close people can't say it? If Zhang Fan says this, the old man can be angry by Zhang Fan.

But when old Wu said this, old Lu still had to listen.

Some people say that the bad habits of this master and apprentice brother in China are bad. In fact, there is a saying that good people use evil methods, their evil is also good, and evil people use good methods, their good is also evil.

After hanging up the phone, old man Lu felt comfortable. Just like this, the more he wanted to be angry, the more he wanted to be bored. He was said by elder martial brother. He was comfortable!

.....

Tea vegetable hospital, tea vegetable hospital is like a vegetable market.

"Secretary Ren, there are not enough surgical people!"

Lao Ren was the master of his family for the first time. In the past, there was Ouyang and later Zhang Fan. No matter what happens, these two people were in front of him.

Moreover, I usually watch Ouyang blow his beard and stare, and Zhang Fan pretend to be crazy. It seems that it can't be simpler to operate a hospital. If there's anything, I'll call and have a meeting. Ouyang will clean up Lao Gao, and Zhang Fan will assign tasks.

Then, all is well.

But in his own hands, the tea vegetable hospital is like a broken sieve. There are problems everywhere.

There will be no blood in the hospital

There won't be enough surgeons for a while.

And it's all things that can't be solved by phone and meeting.

Wan nianbing's secretary was also angry. Now she realizes why Ouyang often gets angry.

"What about surgeons? Aren't all posts reserved for good people? Now at this time, you tell me there's no one. Where can I change a surgeon for you? "

He scolded the director of general foreign affairs.

"The extra beds in the operating patient corridor are full, and even the corridor can't get in. All the young doctors have gone to the disaster area. Now the old guys are on duty for three or four days. I haven't even left the door of the operating room. I sleep for three hours a day.

If I have a little way, can I call you? "

Ouyang can scold Lao Zhao because Ouyang's family is qualified.

Zhang fan can also train Lao Zhao, because Lao Zhao's operation is not as good as Zhang Fan!

But others can't, even Lao Gao can't, but now you, a girl in the internal medicine, scold me like this. Lao Zhao is full of fire.

To tell the truth, people like Lao Zhao would not survive in an administrative unit, but there are too many stubborn donkeys in technical units.

In a few words, Lao Zhao hung up immediately after Ren Li.

Although he complained, he still had to do the work

"You are tired, am I not tired? What did I say about varicose veins in my legs? Look, I can't even wear slippers now. Who did I tell? You're tired for me. If you can do it, get out! "

Lao Zhao scolded like a Tibetan Mastiff in the operating room. To tell the truth, Lao Zhao Xin is also tired. He knows that now the surgeons have almost reached the extreme, but what can he do.

There are many wounded in the hospital. Even if it's a holiday now, can the doctors sleep?

Ren Li was almost crying when she was crowned by Lao Zhao.

"Don't be angry with yourself. The surgeons are all cattle. Contact the bird market! " Yan Xiaoyu also frowned.

She was unable to integrate into the leadership team of tea vegetable hospital at the beginning, but now she can't help but integrate.

"I..." Ren Li has a bad relationship with Bird City Hospital.

"I'll contact!" With that, Yan Xiaoyu began to contact.

"I, Yan Xiaoyu, I need a surgeon now."

"The surgeons have gone to the disaster area. We can't open the bolt now!"

disappointment! However, people always think of ways. No matter how disappointed you are, you have to think of ways.

"Zhang Yuan, there are not enough surgeons in the hospital!"

Lao Gao entered the operating room with his teeth clenched. Zhang Fan was angry and threw away the bone biting forceps in his hand.

"Where's the doctor?"

"Too many patients in the past!"

"Close the international ward of special needs and transfer all the surgeons back!"

"All the surgeons at home have come, but it's not enough! There are too many wounded! "

Tea Element was a small town in the early years. Then a tea vegetable hospital led by Ouyang suddenly appeared. The direct development situation is a small city, which can no longer accommodate the rise of other hospitals.

At present, other hospitals have not developed, and one hospital can't count on it.

Really, it used to be full of contradictions.

"Where's Lao Chen?"

"I'm here. I've been at the door of the operating room!" Like a shadow, Lao Chen immediately appeared in front of Zhang Fan.

"Call all county-level hospitals near the tea vegetable area and say that I Zhang Fan now needs the help of surgical directors. Anyone who can get out of the hospital will come to the tea vegetable hospital!"

"Good! I'll contact you now. "

Phone, Lao Chen took Zhang Fan's private phone and began to call.

"Director Bartel, I'm old Chen tea vegetable. Our hospital Zhang said that now the hospital needs the help of the director of surgery. Can you come to tea vegetable?"

"I've been on the phone these days, waiting for the call of Zhang hospital. Don't worry, I can get to the hospital in the afternoon!"

Brijin first, "Zhang Yuan wants to be the director!"

Coal city hospital, "Zhang Yuan posted a post, and the director of surgery went to take the place of tea vegetable!"

"Disaster relief doesn't care about us, but now the country is in trouble. Zhang yuanteng can't start. We must help this scene!"

For a time, the surgical directors of hospitals in various counties in the frontier gathered at the tea vegetable hospital from all directions.

This is the relationship between Zhang Fan and the north and south of the border in recent years! Without the call of the state, it is too difficult to call these local overlords up by individuals.

But Zhang Fan did it!

Chapter 1288

For a while, it rained heavily and turned into heavy snow. With the decrease of temperature, the mountain changed from the original hairy green to boundless white.

The weather on the Northwest Plateau is really easier to change than children's faces. Maybe you've seen why people in pastoral areas wear clothes and show one arm on TV.

Many people are curious. Wearing fur coats, they are hot and red. Don't they take off their clothes? In fact, it's to prevent God from changing his face.

In the operating room of tea vegetable, because several cars are connected together, the air conditioner is OK. When the external temperature drops significantly, the temperature can't get up. After all, the car is an iron cover.

This thing dies when it's hot and dies when it's cold.

"Turn on the warm air!" Zhang Fan found that the bleeding of pregnant women was obviously slow. In this case, it is not a good thing, because there is no hemostasis. Blood flow will not be significantly reduced by hemostatic drugs alone. Once this happens, either heart failure has no power, or muscle and blood vessels expand rapidly.

All used drugs to constrict blood vessels, and the muscles and blood vessels need to expand, which shows that the patient's temperature has dropped.

As soon as Lao Chen heard this, he went to the backup team to find electric heating. Although the car has its own warm air, this kind of surgical vehicle is too large. Sometimes it needs additional heating when necessary.

To tell you the truth, logistics is the hardest thing to do in rescue work. To be tacky, after the rescue, the honor is the front line of others, and the credit is the credit of all participants. After that, he did a lot of work, and it was painstaking and laborious. He had to think of everything.

For example, now, it's summer, but the temperature is no different from winter. Ordinary people who can think of electric heating.

Take electric heating to rescue and disaster relief. If people who don't know how to see it, they will be laughed at.

But now, when others are helpless, Lao Chen arranges for people to carry electric heating to each surgical vehicle, not only the surgical vehicle, but also the wounded ward at each resettlement site.

Darling, not only the medical staff in the hospital looked at Lao Chen with new eyes, but also the expert group coming from behind.

It's really silly. Since entering the disaster area, the leaders of the expert group have not seen the front-line command of the hospital.

Ouyang on the second line is too busy to catch up with his front foot. Now he has come to the temporary treatment station, and the person in charge is too busy to get out of the operating room.

They can only help outside. When they see Lao Chen's posture of heating, they are really shocked.

"A frontier hospital can prepare so comprehensively that even the heating is ready. Really, I want to

meet the leaders of this hospital. Strange people!"

An expert from the South stood in the heavy snow in May, frozen at a loss. The wind blowing down from the snow mountain made the cold Southern experts snort.

The heavy snow after the heavy rain, and then the wind from the tuyere. To tell the truth, the rain and snow can make people endure, but when the wind blows, the wind blows, and the body temperature drops faster.

In particular, the corners of the clothes and trouser legs of some of the wounded, where the edges are thin, have become hard. The wounded are a little better. They all have temporary tents.

These rescued soldiers, doctors and nurses were miserable. Their wet faces and hands were blown by the wind like a knife. Cracks slowly appeared on the visible skin, painful and itchy. People who have never been to the plateau generally don't believe it.

It's really no exaggeration. That's why the sales of headscarves in plateau areas are particularly high. It can block the sun when it is hot, and can be worn as a mask when it is windy.

In the operating room, "Zhang Yuan, blood pressure began to drop."

"Strong heart!" Zhang Fan said to the anesthesiologist with a hard heart.

"You have to live. If you don't live again, you will give you a tonic, and your child can't be saved. Did you hear that? "

LV Shuyan, who was originally quite opposed, is now on the side of pregnant women. Zhang fantie has a hard face. Although in his heart, he also supports LV Shuyan and sympathizes with pregnant women, in the daily publicity of medical treatment, it is important for a doctor to have compassion for patients and love.

But the serious teaching materials require doctors to maintain a pair of objective eyes. Therefore, why doctors can't operate on their relatives easily? This thing doesn't break everyone's curiosity. It's not worth a little money.

The anesthesiologist took a good cardiogenic, looked at Zhang Fan and the pregnant woman. At this time, the itinerant nurse shouted, "the blood pressure is up, hospital Zhang, Dr. Ma, the blood pressure is up!"

When Zhang Fan looked back at the monitor, the blood pressure really rose. Although the original shock blood pressure did not rise to normal blood pressure, it was going up a little, and the heart rate was slowly falling down.

At this time, the pregnant woman's eyes slowly shed bleeding red tears!

yes

Tears like blood.

"Hurry up, LV Shuyan. She's desperate. If you can't stop bleeding, you won't have a chance to give her adrenaline!"

Zhang Fan finished and accelerated the speed.

In the relationship between people, the relationship between parents and children really can't be described according to convention.

LV Shuyan lowered her head and bit her lips with tears, trying to dissect the abdominal muscles.

Bite off the ribs and open the chest. Zhang Fan found the bleeding point at the first time. The hemostatic forceps were stuck, stuck, and stuck on the bleeding point. The operation was running clouds and flowing water.

"Stitch!" Hang up the thread head and close the hemostatic point with suture after a few times.

"Closed drainage!"

Just after Zhang Fan had stopped bleeding, LV Shuyan also found the bleeding point, "the uterus can't be saved. The bleeding is serious!"

With that, without waiting for Zhang Fan to reply, he first opened the palace cavity and slipped the child out. Children lack oxygen for a long time.

When he slipped out, it was like lifting a doll in a bathtub, covered with yellow, white and brown mucus, tightly closed eyes and blue skin.

Many people haven't seen children who lack oxygen.

How to describe it? It's like a mass of meat. It's like the kind of green faced beast Yang Zhi, with green hair, black hair and purple hair.

LV Shuyan looked at Zhang Fan and shouted, "the palace cavity is still bleeding. The child can't do it. What can Zhang Fan do?"

If you are in a hospital, at this time, the doctor will be divided into two groups, one for pregnant women and the other for newborn children.

And now, where can we divide people. LV Shuyan held the child in hand, just like holding a rabbit. One

hand was stuffed into the palace cavity and pressed to bleed!

"Blood pressure dropped, blood pressure dropped, people will die!" The alarm of the busy monitor sounded like chasing a thief, and the anesthesiologist hurriedly began to give drugs to pregnant women. He didn't know what drugs to give now.

Dilate blood vessels. Uterine bleeding will increase. If you don't give drugs, your heart will fail.

Zhang Fan's scalp became numb. I can feel goose bumps all over my body. Even the hairs stand up one by one.

"Dai Yuhang, closed drainage is up to you!"

With that, he turned around and quickly grabbed the child after changing positions with Dai Yuhang "You go to stop bleeding and rescue, and I'll deal with the child! "

Zhang Fan assigned the task at the first time. Zhang Fan now goes to rescue pregnant women. LV Shuyan may not be able to rescue the children. LV Shuyan's strengths lie in gynecology rather than pediatrics.

After receiving the child, Zhang Fan put his index finger directly into the child's mouth, inverted the child, emptied the amniotic fluid meconium in the child's mouth, stretched out his middle finger with another hand and began to massage the child's heart.

"Take off the mask!" As soon as the itinerant nurse listened, she pulled off the mask on Zhang Fan's face directly and quickly. The strength made Zhang Fan feel that his face was broken by the mask belt.

There was no time to speak, flattened the child, massaged and pinched the child's mouth. Zhang Fan opened his mouth and covered the child's face all at once.

The size of the child's face is probably a big peach, and Zhang Fan's mouth should cover not only the child's mouth, but also the child's nose.

One mouthful down, Zhang Fan's heart is really mixed.

Many people will say, oh, the child is so tender. The child has milk fragrance.

In fact, it's all bullshit. For a newborn child, smell it carefully. It's still a mixture of urine and feces.

I can't care. Even if Zhang Fan spits out his gallbladder after he's finished, I can't care now.

One bite, one bite, the little boy didn't respond, and his hands and feet began to cool down.

Zhang Fan listened to LV Shuyan's situation while rescuing " Blood transfusion, force! "

"Do you really want to send away the mother and son today?"

Zhang Fan's inexplicable heart began to feel uneasy.

With Zhang fan blowing violently, the child's heart beat again.

"Come on, mask!" Car oxygen is sent directly to the child's lungs. For general rescue, the doctor blows two mouthfuls first, and then carries out oxygen blowing after the nurse installs the mask.

Really, to say a bad word, an obstetrician and gynecologist who has not licked the meconium on a child's face is not a qualified obstetrician and gynecologist.

Therefore, in a quarrel on weekdays, obstetricians and gynecologists often get angry when they hear someone scold. If you eat shit, it's like you can do it or not!

Hang up the hood and your heart will recover! The rescue of this newborn is simpler than other rescue. Effective is effective.

Once effective, blow the mask a few times, and the child can remove the mask once he recovers his breathing cycle.

After the breathing cycle of the child with a mask is established, he closes his eyes and starts crying! WOW! WOW! WOW! Zhang Fan breathed a sigh of relief. After the child was picked up by the nurse with a package.

Zhang Fan turned his head and began to face maternity again.

The blood in the palace cavity made the nurse wear a mask, and Zhang Fan and LV Shuyan began to stop bleeding and cut the palace.

The blood stopped and the uterus was cut off.

However, although pregnant women have heartbeat and breathing, they can't respond to external stimuli.

All kinds of wake-up, all kinds of stimulation, pregnant women are like entering deep sleep.

"No, we must find a way to stimulate her now, or she will be a vegetable in the future. She exhausted all her potential for her children. It can be said that she changed her life for another life. She hurt herself for her children! "

The anesthesiologist looked at the data on the monitor and turned his head with a choking voice.

"I hurt her!" LV Shuyan muttered to herself.

"You mumble a fart. Hurry up. Remember that you are a doctor now, not an idle person. Do you still have time to sigh?"

Zhang Fan scolded LV Shuyan.

LV Shuyan reacted.

Zhang Fan is really afraid that she will get into trouble. This kind of doctor, this kind of female doctor with high morale, is particularly easy to immerse in a state of being unable to extricate herself.

Zhang Fan's stick drinking curse made her and Zhang Fan start to stimulate pregnant women.

Medication, physical stimulation, physical stimulation. Half an hour, if you can wake up, pregnant women are no big deal.

If you can't wake up, you probably won't have a chance to wake up in the future.

Chapter 1289

Exciting! Zhang Fan and LV Shuyan began to stimulate pregnant women under the attention of a group of doctors and nurses.

I don't know if mammy Rong really stabbed a few chicks, but the doctor really dared to stab the patient. Especially in some special patients, the doctor said, don't worry, it's okay, it won't stab you, it won't stab you.

As a result, he blinked and was stabbed.

Now acupuncture is ineffective for pregnant women. The other party doesn't even have muscle contraction. LV Shuyan looked at Zhang Fan with a pillow.

"Go and shout what is inside and outside God!" Zhang Fan looked at the needle in LV Shuyan's hand and thought it wasn't a thing. If he wasted any more time, he really couldn't wake up.

Xue Xiaoqiao outside God and Xu Yan inside God arrived soon after being notified by the nurse. Inside God and outside God chat together. To tell the truth, other departments stand aside. Because I don't understand! Don't mention those who don't do this line. Even doctors in other departments in this line may not understand it.

"Autonomous muscle movement and spontaneous breathing exist, the induced reflex becomes weak, brain stem activity exists, PVS (vegetative) symptoms are obvious, and the use of auxiliary ventilator is needed when necessary..."

After a long chat, Zhang Fan became impatient " I need deep stimulation now. If you delay her waking up again, you will be delayed. Come on, is there any good way? "

Xue Xiaoqiao skimmed his mouth. He really admired Zhang Fan, especially Zhang Fan's surgical skills, but for Zhang Fan's diagnosis, he can only skim his mouth, and he can't say yet, because his surgical skills are not as good as others.

Surgery is different from internal medicine. There are too many bosses who can't diagnose diseases, but there are too many bosses who can do it if you tell them what to do.

Xu Yan in God is not happy.

Although the development of tea vegetable hospital is much more powerful than before, in comparison, internal medicine can't compete with external medicine.

Look at the surgery department, the burn skin research institute, the hepatobiliary Research Institute, and the Pediatric Surgery Research Institute. Now the orthopedics department is going out of the Research Institute.

But in the internal medicine department of Tang University, except for the respiratory intensive care department entrenched by the old residence, one of the other departments can be counted as one, even the cardiology department can't.

Therefore, when the surgeon saw Zhang Fan, he was respectful and respectful. Zhang Fan was not happy. It didn't matter to scold them.

But internal medicine was not good. When Xu Yan listened to Zhang Fan's words, she immediately said to Zhang Fan like a stabbed female cat: "without diagnosis, without finding out the reason, how to treat it, how do you ask me to give medical advice? Our department doesn't even have enough EEG machines. You think we are slow for a while and we don't have means for a while.

You let us live or not. "

Originally, there were many patients, and the doctors were under great pressure. Xu Yanjie's Zhang Fan couldn't open his mouth.

"What should I do now? I invite you to consult. What should I do now? I won't talk about these useless things." With that, Zhang Fan directly said to Xue Xiaoqiao without waiting for Xu Yan to speak: "you are outside God. You say, what is your conclusion now."

"Well!" Xue Xiaoqiao sweat all came down " I'm so easy to bully! But a woman, put the muzzle on me, can't you raise three feet and don't take me as a target! "

Xue Xiaoqiao whispered that his mother was dying.

"Drug stimulation!" After Xu Yanjie finished, Zhang Fan felt comfortable, so he began to give medical advice directly.

Physicians now complain a lot about the hospital, especially Zhang Fan. It's like they agreed to pee and play with the mud together. As a result, when you turn around, you don't play with the mud anymore. You go to make an aeromodel and a Segoe. Can you not be angry!

Minute by minute, the medicine enters the body, just like a cow into a mud pit. It doesn't even have any water spray, so it disappears quietly.

"It's no use!" Zhang Fan looked at his life state and EEG and said directly.

"It's useless. It seems that chemical stimulation really doesn't work. The dosage is very large, but there's no feedback. There's only physical stimulation."

Stimulate, stimulate, stimulate! Zhang Fan now thinks of various means in his mind. Really, even the picture of sheep licking the soles of their feet appears in his mind.

"Stimulate the mammary (a) gland!" The anesthesiologist, like a child without a mother, hid in the corner and whispered for fear of being beaten when the voice was loud. He whispered and hesitated.

tell the truth.

In hospitals, those in internal medicine despise surgery, those in surgery despise internal medicine, and those in internal and external women and children despise anesthesiology.

Really, it's no exaggeration.

Moreover, among the gynecologists and obstetricians inside and outside the gods, he is really afraid of being despised. But what other anesthesiologists do is exciting work, so it is also effective from the side.

"Hey, why am I so stupid!" LV Shuyan patted her forehead and said, "within four hours after delivery, prolactin will reach its peak. Now stimulating the milk (a) room has the best effect, fast! Zhang Fan, come and stimulate with me! "

Zhang Fan and LV Shuyan started to stimulate the mammary (a) gland alone. To tell the truth, this stimulation method is quite special.

In fact, to be vulgar is to put a soybean between three fingers, and then quickly pull it out with a little force.

Then xiaodoudou, like a naughty child with a rubber stopper, pulled it up, put it down, pulled it up and put it down, just like a small meat ball with a spring.

"EEG fluctuates, EEG fluctuates, come on, continue, continue!" Xu Yan in God yells.

"Bring the child in!" Zhang Fan pulled it out and suddenly felt that such stimulation was definitely not enough.

Then he looked up and shouted to the itinerant nurse.

The baby who was born less than an hour ago was tossed by Zhang Fan for a long time because of lack of oxygen. At this time, she was very weak. Even her cry was as small as a little mouse, without feeling a trace of strength.

"Put it in the mother's arms, come on! When will you start pulling like this! Come on, hold the child and let the child stimulate. "

Born with a natural reflex.

The most obvious is the hug reflex, foraging reflex and sucking reflex.

When the child is placed on the maternal body, the child is weak and slowly, the small arms and legs are chaotic and want to be held, and the small head is hard to find everywhere.

Originally weak, the people watching at this time are even more uncomfortable.

Really, even the itinerant nurses who see the wind on weekdays can't bear to see it.

WOW! WOW! WOW!

The little doll struggled to find it.

Finally, I found my mother's milk (a) room, and then slowly, slowly put my small mouth together.

He opened his mouth hard and tried his best to suck.

"The fluctuation is bigger, the fluctuation is bigger!"

Crying, and the touch of children's skin, the stimulation carried in this gene is the biggest stimulation.

What kind of acupuncture, what kind of pulling and kneading peas, are all heresy.

"Come on, your child is going to fall. Come on, open your eyes and have a look. He's hungry. Come on, you hold him and feed him. You're his mother!"

Brain waves continued to fluctuate, but there was still no movement in the maternal body.

LV Shuyan was really crying.

At this time, what everyone didn't notice was that a tear came out of the corners of the maternal eyes, a tear of helplessness.

Maybe she's exhausted everything.

Really, a woman who raised the average state of life by about 30% exhausted everything to protect her children when the earthquake came, and gave birth smoothly.

This may be the mother is strong! So is the great love in the world.

And now, she's really tired. She wants to sleep.

But listening to the cry of the child in my ears, and the feeling of holding her body with small hands.

Really, worried.

The born child sucks his mother's

But because the parturient has exhausted her whole body before operation, and now she does not secrete enough hormones, the milk (a) juice can not be secreted.

The child struggled to suck, looked up and cried once, cried once, and sucked again.

Really, what is the love abuse film of Bangzi country, and what is the most miserable and beautiful love in the world.

At this time, they are all brothers.

Just when everyone felt that there was no chance, just when everyone felt that there was no hope.

Seeing the brain wave falling again, suddenly there was a peak in the brain wave.

Then, I saw the maternal hands slowly, slowly raised.

Slowly and gently hugged the baby on his body.

"Wake up, wake up, she's awake!"

Really, she wept with joy, and LV Shuyan wept with joy.

.....

Looking at the mother and son snuggling together, Zhang Fan's heart is sweet.

"I want a child, too!" I don't know what's going on, LV Shuyan said softly.

Zhang Fan heard it clearly, but it was as if he was absorbed in his ears. He looked at the mother and son on the delivery bed motionless. To tell you the truth, I didn't even move the tip of my little finger.

.....

"Hard work!"

"It's not hard. We should."

After the operation, when Zhang Fan was pretending to be petrified, old Chen quietly came in and said to Zhang Fan, "the expert group is coming, and so are the leaders!"

"OK, I'll go out now." With that, Zhang Fan turned and left without looking at LV Shuyan.

Behind him came a long sigh.

Zhang Fan knows himself. He doesn't talk about loyalty or specificity. What Zhang Fan knows is that Shaohua at home is definitely waiting for him in tears.

The leaders of Central South China came and looked at the surgical treatment area standing in the disaster area and groups of soldiers.

The leader said with emotion: "thanks to you, otherwise the loss will be greater. How's it going? Is there any difficulty? "

Gollum! Old Chen on the side was excited. Really, he followed Zhang Fan to see the leaders of Central

South China. It was a lie to say he was not excited. Now the leader asked, Lao Chen didn't know what to do.

"Chief, don't worry, we have no difficulties now!"

"Good, good!"

.....

"Don't tell the European court!" After watching the leaders comfort the soldiers, Zhang Fan turned to Lao Chen and said seriously.

"Dean, I don't say, but I want to be on TV. Don't you see? Has the reporter of gangyang mom been shooting at you?"

"Ouch! I'll go! "

Chapter 1290

With the arrival of leaders, the rescue work has reached a peak in the hearts of Chinese people. In fact, the peak has passed early. Generally, the golden time is within 72 hours, while the consumption on the plateau is higher than that on the plain. Coupled with heavy rain and snow, the golden time is within 48 hours.

Phone, Zhang Fan's phone was blown up.

A classmate, Zhang Fan, a classmate of their age, doesn't have a first name or last name in their respective hospitals. Not to mention hospitals, they are outstanding in their respective departments.

Moreover, the pressure of getting married and buying a house is greater and greater, so there is almost no contact on weekdays. But since Zhang Fan came out, people who used to be like the dead now talk more frequently.

Often after three sentences, it will be brought to Zhang Fan.

"Zhang Yuan, our director wants to invite you to fly a knife, or Zhang Yuan. Our hospital has a topic recently. Are you interested?"

At the beginning, Zhang Fan said politely that he was busy and politely declined. Once Zhang Fan spoke, there were more people chasing Zhang Fan to chat in the group, especially those who didn't know who said it. Zhang Fan was in this group, and even some students from other departments of other grades came in as medical representatives.

Therefore, slowly, Zhang Fan hardly spoke in the group, and even did not log in to this wechat. It was not Zhang Fan's arrogance. If it's a big hospital, the director of the Department will contact Zhang Fan directly. The medical circle is a little bigger. Do you use three or four to connect? No, the director of a large hospital usually directly signs up on the phone.

And small hospitals do not need to invite Zhang Fan, because small hospitals have superior hospitals, there is no need to invite throwing knives, and even there is no qualification to invite throwing knives across provinces.

Zhang Fan didn't speak in the group. Some students who were familiar with before and contacted later began to contact Zhang Fan on the phone. This so-called network of contacts has actually hurt many people.

Really, contacts, if you can't match each other's ability, to be honest, big things can't be done, and small things don't pay. Just a familiar face.

You can't miss this call.

Also, when entering the disaster area, Zhang Fan borrowed a car. The bosses who couldn't catch up with Zhang Fan in the past thought of visiting Zhang Fan when he came back. As a result, the central mother's webcast gave Zhang Fan and his leaders an interview lens of nearly seven or eight minutes.

Darling, I'm kidding. It's great for CCTV. What's more, the leader has been holding Zhang Fan's hand from beginning to end. There was a rumor that Zhang Fan was born extraordinary, otherwise a young man would become the dean at once.

It also built a frontier hospital more powerful than the third-class hospital in bird city. What instruments are expensive and what instruments to buy? Even Jinmao and Marubeni countries have come to lick Zhang Fan. Isn't this a generation of properly rooted Miao Hong!

As soon as the CCTV broadcast, these bosses couldn't sit still. Originally, most of the bosses in small places have reached the bottleneck period and always want to improve their business to a higher level. Today, they finally have the opportunity to know the legendary generations. Don't worry!

In fact, this is a common problem of small local bosses, not to mention the past. More than a decade later, when the network is so developed and the information is so smooth, there are also bosses worth hundreds of millions or even billions who have been cheated by the so-called generations.

Really, it's no exaggeration to let some charlatans deceive others as if they were a fool, even though each boss has sprung up in his own industry and instructed rivers and mountains.

"Zhang Yuan, ouch, I'm Lao Zhou from helgai coal mine. Ouch, my horse herder is not working well. Watching TV says it's snowing heavily in the disaster area. I think the facilities in the horse herder are too simple and not insulated. I'll send you a ride. Although it's off-road in the city, it's good for you to hide in it when it rains and snows.

Looking at your cold hands and feet, I look distressed. All right, don't refuse, that's it! "

After receiving the phone calls from the bosses, Zhang Fan's brothers also called.

"Is the old man all right? Your boy won't take the old man to the plateau. The old man is in his seventies!"

This is the elder martial brother in the capital.

"Are you busy? No, I'll send a medical team all the time?" This is the master brother of mordu.

"Young martial brother, you've been on the news. You have a number in the leader's heart. Brother, I've begged for half a lifetime and haven't seen a leader several times. But you're really generous. When the leader asks you to ask, you don't mention anything. Smart, smart, no struggle is struggle. You're born to be an official. Take it easy. What's the old man doing recently, If you don't answer the phone, won't you take the old man up the mountain? "

This is a senior brother who has changed his career and entered the system as a leader.

Tea vegetable downtown, not only Zhang Fan has many phones. Zhang Fan's mother has a lot of phones.

"His aunt, is Xiaoshi on CCTV? The village secretary and the village head have all come to visit. You can go back to your mother's house when you have time. Grandpa and grandpa stone are gone, but his uncle is still there! "

My sister-in-law and sister-in-law don't have much relationship. The relationship between Zhang Fan's mother and her sister-in-law is general. In the past, Zhang Fan's aunt and Zhang Fan's mother were not easy to deal with. In fact, because they were poor, everyone had to take care of their own home.

As a result, today, my sister-in-law called in person. Although Zhang Fan's mother said it politely, what

she went in is a picture, and what she mixed in the border is not good. Anyway, it's the same meaning. My family Zhang Fan is not good. You must not come to Zhang Fan for business.

Being a mother is different from being a father. It's really different. Zhang Fan's mother said she was not happy now. She put her son on the network and said she was happy, but she was really not happy.

Zhang Fan's father is different.

"It's OK for stone to be the president of the largest third-class hospital here. Anyway, what's the level of the villa given by the state? Now my stone is at the section level. Even now there is no man or woman, alas! "

In fact, the old man didn't know anything about the level. He felt that no matter how big Zhang Fan's hospital was, it could be bigger than his former state-owned factory? The director of the state-owned factory is a deputy section level. Therefore, he thinks that Zhang Fan is estimated to be at the same level as the former director. In order to have face, he privately promoted his son to a higher level.

To tell the truth, the old man and the old lady have completely different views on outsiders. Zhang Fan's mother is deeply afraid that others know that his child is powerful, while Zhang Fan's father is deeply afraid that others don't know that his son is not powerful.

In the urban area, Shaohua is annoyed when he sees the phone.

First, the bank where she used to work, or the head office of bird market, called directly and said it was sympathy. Shaohua wondered why I resigned and what else to comfort.

Then there are relatives, relatives of dogs pulling sheep intestines. Some children immediately graduated from medical school and wanted to find Zhang Fan to go through the back door. Some are family children who have graduated from nursing school and want to find Zhang Fan to arrange work for them.

There is also the relationship between the client and the doctor who wants to find a ward in the tea vegetable hospital.

Anyway, overnight, Shaohua knew the power and authority of Yang Ma.

In the past, Zhang Fan was also very famous in tea, but generally speaking, everyone was not so eager. But now it's different. It seems that after Zhang Fan shook hands with the leader, Zhang Fan also became a big leader.

To tell the truth, Jia SuYue would come to Shaohua's house to accompany Shaohua every time under special circumstances. She knew that every time she was jealous, she was about to cry, but she couldn't help it. She knew that she would be stimulated after she went, but she just wanted to hear the news.

When outsiders talk about the tea vegetable hospital, as long as Shao Hua is away, she can't help feeling proud for a while.

When Zhang Fan went to the disaster area, Jia SuYue stayed with Shaohua in the villa for a few days. When Shaohua cried, she scolded Zhang Fan. Then when Zhang Fan went to the central mother, Jia SuYue felt like he was suddenly stabbed.

.....

Zhang Fan's call is probably ignored in other industries, but it is absolutely authoritative in frontier hospitals, especially county-level hospitals.

A phone call, North and south of Tianshan, the directors of some famous county-level hospitals came. Especially in surgery, one is counted as one. As long as they can move, they all come.

For a time, the tea vegetable hospital was full of surgeons.

But the problem came out.

With the arrival of these directors, there are more and more contradictions.

Because the tea vegetable hospital is now headed by a physician, Ren Li had a soft face. After a few days of happiness, she was angry by a group of local overlords and couldn't sleep.

"Listen to me. I should be allowed to do this operation. I have been the director of our county for 30 years. How long have you been the director. When I was the director, you still wrote the medical record with a pen! "

To tell the truth, the director of surgery of the county hospital, if he is not too old, who doesn't want to be transferred to the tea vegetable hospital now, so one counts one and works hard.

There are too many contradictions, and Ren Li can't help it. "This is the rhythm of bullying orphans and widows!" Vice President Yan Xiaoyu was also angry, and the meat on his chest began to shake.

Really angry.

"What should I do? Zhang Yuan can't get out at all now. The European court doesn't even answer the phone. What should I do? "

Ren Li, like a bullied little girl, has red eyes and can't help it.

"Yes, isn't there a God in Zhang Yuan's family? Come on, come on! "

"Zhang Yuan told us not to bother the old man." Ren Li knows that this means master Zhang Fan.

"If you don't let the old man have surgery, you can be the leader and let him be the door god. It's okay. Don't worry. You won't be tired."

Helpless Ren Li listened to Yan Xiaoyu's idea and called Shaohua.

The hairy old man Lu, who is idle at home, carries a hammer every day. If he has nothing to do, he finds a Zhang Fan's house to repair things.

What screw is loose? What door opening shaft makes a sound. If Shaohua hadn't pulled it, the boring old man would have cleaned the glass for Shaohua's house.

This kind of person who has been busy all his life, locked up at home and not allowed to go to the hospital, is actually like a prisoner in prison.

As a result, after hearing the call from the tea vegetable hospital, the old man didn't let Shaohua send him. He trotted out of the villa and went to the hospital.

Chapter 1291

There are many patients, family members cry, children make trouble, and doctors quarrel. Obediently, the tea vegetable hospital has directly become a vegetable market.

There are also some old men and women with chronic diseases who lean close to the side, squint, look at it, and give back the causes and consequences of later introductions.

Really, upset.

There is an old Chinese saying that borrowed cats don't catch mice.

What Zhang can't imagine is that the borrowed cat is too awesome and awesome for all the strength.

If you can't live in the town again, it is estimated that the county-level leaders in northern and southern Xinjiang will have to form a team to compete with each other.

To tell the truth, the tea vegetable hospital is climbing too fast now. If it is a general class III hospital, these county-level overlords may not want to go. After all, they are still a little powerful on their own one-third of an acre.

But now, as long as people in this industry know, several other hospitals in niaoshi can't hold down, because this time, you see, the medical teams sent by several major hospitals of niaoshi hospital for rescue and disaster relief are all under the leadership of others' chasu hospital.

Moreover, it is also said in the Jianghu that Ouyang Niu robbed the position of the second-line commander-in-chief. What's the rhythm? This is the tuyere. This tea vegetable hospital is going to take off!

I was originally the director. How can I have the level of senior deputy director when I come to this place.

Then he will publish several papers. He will be a proper provincial expert directly. If he is lucky, he will hang a name on any scientific research.

Darling, this is a famous provincial expert. When he retires and goes to a private hospital, his income is not comparable to that of the county director.

Therefore, with this opportunity, all county-level leaders who have some pursuit will fight directly.

How many operations? No, we can be in the operating room all day.

what? Nanjiang robbed the operation. Mother, do you despise Beijiang?

In two days, the two groups made the needle point to the wheat awn.

Ren Li, who is now in charge of the tea vegetable hospital, has no good way to surgery.

These local overlords look down on the tea vegetable hospital.

I think the tea vegetable hospital is just like this. I can be the director if I come!

Of course, the Dean didn't dare to think. Zhang Fan hasn't done much else in recent years. It took a lot of effort to brush the flying knife in each county.

North and south of the Mantian mountain, as long as it is a surgeon, who dares not to call Zhang Fan, Zhang Yuan!

Therefore, these county-level overlords still respect Zhang Fan. This is as like as two peas in primary school. Who fights badly in the class is very clear in my heart.

"What are you doing, noisy, wearing a white coat? Look at yourself. Do you look like a doctor?"

The old man was in a hurry. He didn't even go to the administrative building. He came directly to the surgical building. As a result, the two county-level surgical leaders quarreled like a red necked Rooster because of who operated first.

Eyes to eyes, one bigger than the other, and the nose is almost on the other's nose!

Two bearded and strong men, like bears, stand against each other. Darling, the scene is too scary. No wonder even the old man with a urine bag looks inside on tiptoe.

As soon as old man Lu scolded, the two strong men were unwilling. Does Temo tea vegetable hospital still say that about us?

All the directors are gone. The director of general surgery is in surgery. Now who dares to say this.

Even if you are a senior doctor in the tea vegetable hospital, I am still the chief physician.

They look like cannibals and turn around!

Look ~!

Look again!

They changed from anger to surprise, and then to bow their heads and shame!

Those who stand directly are like schoolchildren, and those whose feet are even are even than pacesetters.

"Everybody, everybody, hurry to see the doctor and take the medicine. It's all scattered. There's nothing to see. I said, "old brother, your urine bag is about to fall off. Doesn't it hurt?"

"Well, it hurts. I just didn't feel it! Why are you pulling my pee bag! "

"I'm excited, too! Ah, this is a urine bag! " An old lady looked at the old man with a urine bag and smelled her hand. "What a Sao!" With that, the old lady, like a sportswoman, swished and disappeared into the crowd.

"Go, go, all scattered!" Seeing nothing to see, everyone dispersed.

Old man Lu turned his head and looked at the two doctors.

"Why don't you quarrel?" Although the old man's face was not serious, the two men opposite him were really nervous.

To tell you the truth, academicians of medicine, this thing is too strange in the field of not doing it.

But for those in this line, especially the old men of the fur department, it's not God for surgeons, but they are definitely treated by teachers.

Not to mention the others, surgeons have read textbooks from school to specialized books on surgery. If they are ordinary foreigners, who hasn't read books compiled by others.

.....

"Old Lu is here. Today, two more doctors ran to the hall to grab the patient and quarrel. When old Lu came, they just had a terrible quarrel!"

Xiao Wang of the medical office came in quietly to report to Ren Li and Yan Xiaoyu.

Although Ren Li is now the parent of the hospital, Ren Li has never worried about anything other than business in the Department in her life. If there are any difficult and complex problems, she will go to Ouyang. Therefore, she is also a trumpet played by Ouyang!

There are many examples of this kind of waste raising. For example, many military sister-in-law who married a soldier just after graduation, and then lived in the courtyard with the army all the time. After entering society in middle age, really, their husbands don't say whether they miss the army or not.

They really miss that group.

There are organizations and collectives in everything. Even when they buy vegetables, in order not to let the soldiers who defend the country worry about the rear, the logistics people go directly to the vegetable market to buy vegetables, melons and fruits, and then sell them.

Really, how meticulous it is.

Children go to school and old people die. They don't have to deal with other people in society, because they are organized. If there is anything, just find an organization.

In this small environment, I'm really very happy. People live like a pure child.

And Ren Li was raised by Ouyang.

If you want to talk about the professional level of internal medicine, Ren Li stands up, not to mention

Lao Ju. Even Yan Xiaoyu from bird market has to sit down.

But you let Ren Li deal with the personnel relations in a hospital. She can be fooled by the little doctors.

Now she began to worry that old man Lu was angry.

"Ouch, now I finally know why you couldn't stay in the hospital in bird city. You're too simple.

Tell me about your mood and attitude if an old clock or an old Hu in the internal medicine department suddenly kills himself at the tea vegetable hospital today. "

Yan Xiaoyu touched her forehead and was very jealous. What kind of women are spoiled like this? The spoiled ones are silly, white and sweet. She can also be the Secretary of a class III General Hospital. It's so happy. Really, this woman is the son of God!

"I must be respectful! But the doctor below... "

"Whether it's above or below, the premise is that doctors and surgeons. Look, Lu, if these bandits still make trouble, I, I don't make up for a year!"

.....

"Old Lu, I'm wrong!"

"I'm wrong, old Lu, you criticize me!"

"No, you are not wrong. The country owes you. Although they are a little tired and bitter when they go to the disaster area, they will have some glorious achievements in the future, but you, those who leave their homes and businesses, come to the hospital 24 hours a day.

It's dark in the operating room. Who knows? Who would know? I heard that a doctor had swollen legs and was still working overtime in the operating room.

Really, I feel sad! They all study medicine and become doctors. I understand your pain! "

There was no one. The old man looked at the two men with their heads down and said a few words gently. The eyes of the two men were red.

Can an old man who has been the president of a ministerial hospital for decades not have a little level.

"Let's go and meet you. I'll mention my students who don't know the importance and bow to you."

"Ouch, ouch, old Lu, just slap me in the face, ouch..."

When old man Lu entered the tea vegetable hospital, which was originally noisy, he was as peaceful as everyone was a base friend.

"Yes, unexpectedly, you, the director of a county-level hospital, have a little taste of surgery. It would be better if you control the details again!"

The old man didn't do surgery either. He walked around the operating rooms and said a word casually. The doctor who was promoted was so excited that he was about to cry.

This feeling, to tell the truth, really, people who don't do this industry will never realize it.

.....

The emergency treatment station will be evacuated because large machinery will be excavated and the prime time has passed. It's no longer interesting to stay here.

Although there were many rescues, none of the doctors and nurses were happy, because there were still many wounded, and there were no opportunities for rescue

"First withdraw to the secondary station. Let's stay at the secondary station for three days and evacuate the disaster area after three days!"

"OK, Zhang Yuan, I know!"

Lao Chen went out to arrange.

Zhang Fan felt tired, not only physically but also mentally. Lying in the car, he didn't want to open his eyes, let alone look out of the window.

Zhang Fan's state is similar to that of other doctors and nurses. Even the careless Bayin lies down bored.

When ordinary people encounter this kind of thing, there is a psychologist to dredge it, but they, ordinary psychologists can't dredge it.

This is the more people understand, the more they can't be persuaded.

Therefore, they can only sort it out by themselves.

.....

Secondary station, secondary rescue base. Since yesterday, there have been fewer and fewer casualties, and Ouyang has lost his spirit.

That kind of meeting and war and the gathering of thousands of people are no longer available. The

original energetic old lady did not know whether she was cold or tired. She fell ill and caught a cold. She lay in the base for a while moaning and listening to the outside. It was fine yesterday.

As a result, the old lady felt tired and lay down today. People who don't know think the leader didn't come here to comfort her. She's not happy!

The old lady like a cat lay on the simple bed and sighed!

Chapter 1292

Idol, really, this thing is like a fat middle-aged man who doesn't understand that a girl like tender flower gudu screams more than when she sees a baby dog, and Xiaohua gudu doesn't understand that greasy man can be so respectful when he sees an old man.

Old man Lu sits in the hospital, which can really be called sitting. In the operating room, a group of heavenly bosses from prefectures and counties, the Department Directors of my second child, walk on tiptoe like a cat hiding from a big dog.

And flattery, really, men flatter, no worse than temptress.

From academician Lu to Professor Lu at the beginning, and now they all call teachers.

"Teacher, I got you some local honey to soak Golden Cherry. You can taste it. It's really effective after drinking it! I drank too much some time ago, and then I didn't urinate well. This effect is particularly good! I have an operation tomorrow. I've been thinking about the technology you said last time for a long time, but it's a little different. Hey, hey! "

"Teacher, I got you a Tan sheep. It grew up eating grass and snow. The meat is tender but not fat. A handful of salt is enough when cooking. Don't put anything in it! There will be an operation later. You stand on the platform for me. I can't find the key point you said. Hey, hey! "

A group of old men who laugh are called ambiguous. Really, they can be described as miserable.

The old man has never been so happy to receive gifts in his life, but this time in the tea vegetable hospital, the old man let go of his hand.

The old man smiled happily. In fact, he was very sad.

They are a group of doctors in their thirties and forties. Because of the limitations of times, regions or conditions, their surgery can only be said to be sufficient, far from being used.

The old man gave lectures to the doctors of the tea vegetable hospital and went to the free clinic in the pastoral area. He always felt as if he couldn't find the key point. Now the old man finally found the second spring of his career.

Surgery, now there is Zhang Fan. He doesn't have to cut again.

Engaged in scientific research, he felt that he could not keep up with the rhythm of other students.

But the experience of this life is useless. The old man is really uncomfortable. Now the old man found out that this is what he should do.

It's really a kind of enjoyment to enjoy the group of alternative children!

.....

Secondary treatment station, "European hospital, European hospital, Zhang hospital and President Chen are here. The team is already on the top of the mountain!"

Sister Chen of the medical office, chirping, ran in. In the years of President Ouyang, if you dare to do this and don't scold you half to death, you can't show Ouyang's eloquence.

Now, with entering the era of Zhang Fan, the old lady doesn't swear easily. She turns her eyes and looks at Xiao Chen, and then says, "I'll come when I come. I'm just tired!"

In fact, the old lady is in a state of retired leadership these two days. What do you mean? When the road was impassable, the old lady stood on the roof, darling, really asked me to stand in the strong wind. I wish I could swing all my heartache!

But with the smoothness of the road and the reduction of the wounded, when the old lady stood on the roof again, there was a feeling that no one in the world could understand me.

In fact, speaking of people is the feeling that no one plays chess with the leader when he retires.

"European hospital, European hospital, our hospital is on TV, or CCTV!" These days, we are so busy that we can't wait to run with both hands, feet and four feet to the ground. We can't care about any news or gossip.

Now I'm free. I have nothing to do with my mobile phone, watch the news, eat melons and so on. But these days, because of the Jinzhi earthquake, there are no melons.

Only the news. As a result, Xiao Chen saw the clip of CCTV news. So Xiao Chen came to report happily and saw Zhang Fan's team on the way.

Xiao Chen thinks these two good news should make the old lady happy!

Alas, people are still too young, which would not be the case if Lao Chen.

Then, Xiao Chen took the fruit mobile phone with a missing mouth issued by the hospital and ostentatiously brought high technology to Ouyang.

"Let me see!" In fact, Ouyang wants to see if there is her in Yang Ma's report!

It's human. Who hasn't got a hobby yet? No! Ouyang loves to be in the limelight. His nature!

"Leader, leader, big leader!" Xiao Chen pointed to the leader chattering in his mobile phone, and Ouyang nodded his head, "well, the leader is old, and he has white hair on his head!"

"Zhang Yuan, Zhang Yuan!" Xiao Chen is chattering again. It's not Xiao Chen silly. Xiao Chen is trying to make the old lady happy. He deliberately pretends that he is a little girl. In fact, he hasn't seen anything in the world and how old he is.

I've never seen any big scenes with Zhang Fan in recent years. I don't know that the local tyrant's special plane has been taken several times!

Looking at Ouyang, who had turned up his mouth, was unhappy.

Because she's not in the video!

Look, look, the old lady was angry, "this leader doesn't come to us to inspect!"

Look, look, the old lady almost fainted with anger.

"This black sheep, this black sheep!" Ouyang heard Zhang Fan's awe inspiring refusal of the opportunity given by the leader to make demands.

Ouyang couldn't sit still. He was tired, tired and ill. It's a fire.

Without her in the original video, she was already very unhappy. As a result, Zhang Fan was still arrogant and righteous, risking his stupidity, which made the old lady feel that it was over and that the number was abandoned.

Really, it's no exaggeration.

"Why don't you have some money? It's not three melons and two dates. It's a big leader, my God! Even if you don't want money, you can order land. Look at our hospital. If there were not two branches now. There's no place for the instruments you got.

Now the tea vegetable government is like a wolf waiting to sell us land. If you open your mouth and ask him for hundreds of mu, I won't believe it! "

Zhang Fan originally thought that when he came, he would find a chance to drive and run. To tell the truth, when the leader asked him what he wanted, he really opened his mouth and came. Although there was a little meat pain behind him, he didn't regret it.

If you don't say anything, you'd rather take it straight rather than seek such words from music. In which environment, in which city with ruins all over the mountains, in which soldiers all over the mountains, Zhang Fan really couldn't open his mouth.

Really, it's no exaggeration. People are absolutely influenced by what environment they are in.

Zhang Fan didn't get lost after he became a doctor. Really, he went to the countryside for free clinic, threw knives around, and provided all kinds of disaster relief. Although it seems nothing, in fact, this is not a kind of spiritual purification.

But his feet got into the car. When he heard that Ouyang was ill, he couldn't go if he wanted to go.

For Ouyang, Zhang Fan's feeling is quite complex.

Zhang Fan's feeling for the old lady is absolutely different from that of Lu Lao and Wu Lao. Most of Zhang Fan and Ouyang are learning from Ouyang, but there is also a small part of resistance.

Yes, it's resistance. Zhang fan can't learn from his philosophy and attitude towards life, such as Ouyang's vengeance. For example, Zhang fan can't learn the rhythm that Ouyang wants you to die while you are ill.

Moreover, Ouyang has sheltered Zhang Fan from the wind and rain in recent years. Even at the most critical moment, to tell the truth, Ouyang would rather go to the municipal government to be a shrew, rather than have a little black spot on Zhang Fan.

Therefore, sometimes, this complex feeling is mixed together. Zhang Fan is actually more friendly to Ouyang than old man Lu.

Really, it's an inexplicable feeling.

Perhaps this is a relationship where master is not better than master. Zhang Fan has this kind of leadership, really, just like he opened another link in the workplace.

"Ouyuan, what's the matter?" Zhang Fan couldn't care whether Ouyang was angry or not. As soon as he heard that Ouyang was ill, he hurried to see Ouyang.

As a result, Ouyang is already preparing for Zhang Fan.

"Are you sick? The sound is the same as the sound of steel collision!" Zhang Fan looked at Ouyang with a smile. Lao Chen was laughing with him!

Do not explain, do not defend, Ouyang said what is what, this is Zhang Fan's experience in dealing with the old lady in recent years.

Lao Chen looked at Ouyang's face and said quickly, "it was right for Zhang Yuan not to speak at that time!"

"Hum!" Ouyang looked at Zhang Fan, then at Lao Chen, turned his eyes, and said, "anyway, you're in charge now. When you're short of money and people and have no place in the future, see how you cry!"

As soon as he said this, Zhang Fan knew that the old lady was relieved. In fact, Ouyang's main anger was that Yang Ma didn't report her!

The old lady is jealous! This jealous ah, really regardless of size, women love to be jealous is really no solution.

Seeing that the old lady's anger had passed, Zhang Fan said to Ouyang, "Ouyuan, you don't look well. Why don't you go back to tea first? I'll do it here!"

"I'm fine. I'm a little tired these days. You're in the emergency rescue team, and I didn't bother you. The woman you brought back from Mishima jumped up and down recently. She went in under your banner in hospitals, research institutes and laboratories.

You should be prepared in your heart. I don't look good at this woman! "

Ouyang deliberately said it was vicious. In fact, he was still uncomfortable. Really, what the old lady pursues all her life is not to carry forward the tea vegetable hospital and let this system give her the greatest affirmation!

"What is she doing?" Zhang Fan frowned. Does the woman want to go back? Zhang Fan thought again that after spending such a high price, he should not go back now. Do you want to raise the price? Damn

it, the goods have arrived at the land and dare to raise the price. I really don't know how I became the boss of such a big company! No wonder GlaxoSmithKline is like a weasel.

In fact, Zhang Fan thought too much. Although Zhang Fan didn't learn Ouyang's vengeance, Zhang Fan learned the habit of taking advantage of his bones. However, if he got less money, his flesh was uncomfortable.

Ms. Zeng, this time, she directly donated millions of disaster relief funds. Because of this factor, not only tea, but also the leaders of the bird market met her.

Then, through the government, she went to the tea vegetable hospital for investigation. Originally, she wanted to find out the leaks and fill the gaps. After all, she was also worried about the poor foundation of the tea vegetable hospital. As a result, Ouyang and Zhang Fan were deeply afraid of other people's price increases.

Ouyang directly asked the tea vegetable hospital to shine the best side to Ms. Zeng. The more she saw it, the more frightened she became.

Not to mention that Ms. Zeng was not surprised. If Ouyang and Zhang Fan knew that they were coming to find out and fill the vacancy, it was estimated that the old and young could cry with their heads in their arms. This would be a waste of money.

.....

"I suggest that the three island government set up a site above the level of consular agency on the tea vegetable side. We must do everything to cooperate with the tea vegetable hospital!"

Ms. Zeng called the chairman of the board of directors with a serious look.

Chapter 1293

The gap between people is sometimes bigger than that between people and dogs. It's no exaggeration at all. When you think malt milk is the most delicious thing in the world, others have eaten the fat milk of high-quality grass.

For example, Zhang Fan, he really doesn't have much love for things such as private planes and super sports cars. Say a bad word, you give him a sports car, if you can't change money, he will refuse.

Because people are such a thing, it is very difficult to change the family environment and social environment they have been exposed to since childhood. What is the war between women and men? Is it really to compete for the dominance of how much money to spend a month? Is it really a competition for who is the boss of the family?

In fact, it's not. It's living habits!

Zhang Fan heard that Ms. Zeng was jumping up and down to see his old background. He didn't worry about going back. I'm so worried about going back now!

He and Ouyang, one old and one young, even Lao Chen were not allowed to participate. Just their mother, they discussed countermeasures in a kostrel that was expropriated by Ouyang's hard students from the government.

"First of all, do we need to cooperate with Mishima and Glaxo? Is there a substitute enterprise?"

"Not at present. The three islands have gone downhill in recent years, especially in terms of tumors, which is different from Jinmao. But they are more powerful than Chinese pharmaceutical enterprises. Therefore, if you want to cooperate, they are the best, rich and weak! "

Two people unexpectedly came to a way of asking and answering!

"Can we have a profit surplus?" Ouyang continued.

"No, in the future, the stalls will become larger and larger. Almost all the scientific research laboratories can't go out. This one is a big money eater, and there are many equipment updates. In particular, we have now established an international medical center.

The equipment must not fall behind. The local tyrants are not fools, not only are they not fools. It's strange that they didn't find experts from ten hospitals to consult before they went to hospital.

Therefore, in the next ten years, we will endure for some time! "

They stayed up for half a night, and their eyes were dark. Finally, they discussed a countermeasure.

Perhaps this is the epitome of the Chinese government at this time, and this is the sadness of the Chinese nation in this era.

The hooligans in a street, with a horse, can easily coax away a large amount of money in the hands of the local government, not to mention some international swindlers of the old maozi of the golden pill country.

Really, in those years, although the music continued, the dance continued. In fact, China hangs like an egg. Once it can't jump well, the example of Lao maozi is in front of us. Once you can't jump well, you have to lie flat and move your rhythm.

To tell you the truth, when you hear the roar of high-speed rail, when you hear Chinese diplomacy pointing at Jinmao and saying you are unqualified, really, the tears in your eyes are so easy to flow out.

How many years, how many years, how many years has China never made such a strong voice of steel? When Kou can go and I can go? Or when the Anxi capital guard pulled out his sword and stopped the western power in Congling? Or when the old handsome said he would get eggs when he became a pants?

Now the tea vegetable hospital has no confidence, yes, but not much.

What you want is nothing. Really, Zhang Fan hangs there like an egg, but often at this time, people don't play with you. I don't dare to beat you now, but I don't play with you. I reject you.

Therefore, Mishima is weak and Glaxo is weak. This is a breakthrough.

.....

The troops slowly withdrew. When they came, they came in clean and tidy green military uniforms, one by one.

Now that their task has been completed, what remains is the government's infrastructure. Slowly evacuated, rumbled, walked quietly, and even some people fell asleep. As a result, they found that all the troops were gone.

Zhang Fan, they will also withdraw with them. Of course, compared with the troops, Zhang Fan, they are a lot of chaos. Yell and yell. For a while, this outfit is inappropriate, and for a while, there is no place to put it.

Mingming was fine when he came. As a result, he has to go back now. He can't fit anything! Zhang Fanqi doesn't know what to say. Because this thing is not a broken fragment, how can he install it? Loading this thing is really a knowledge.

When he came, the young men of the army installed it for the tea vegetable hospital. When he left, they had to dress for him. Zhang Fan looked at a group of young men with tired faces and was embarrassed to bother others.

As a result, there is a problem with loading now.

Zhang Fan is really doing nothing!

Soon, I saw a lot of people pouring out of the disaster area.

"Are you leaving?"

An uncle with a group of people.

"Yes, sir, now we have to evacuate, and we can't help with the rest. If you have a patient in the future, you will be sent directly to the tea vegetable hospital! "

"Thank you, thank you, relatives, you are relatives, jiefangjun, you are relatives!"

Zhang fanlue is a little embarrassed“ That's what we should do, sir! "

As he spoke, the old man would kowtow to Zhang Fan and them. Ouch, tiger's Zhang Fan quickly caught the old man. Old Chen looked and hurried to help.

Not to mention that people's white beard has reached the waist, this rescue is the obligation and responsibility of medical workers.

"Sir, you can't do this. Get up, get up, you're going to break my birthday!"

"Thank you, old man. All six members of the family are buried under the house. Your hands are full of blood all night. If it weren't for you, I wouldn't have a chance to stand here today. It's a pity that the old woman's son Fu Bo was already out of breath when she came out. "

As he spoke, the old man couldn't stop his tears flowing down.

"Sorry, we did our best!" Zhang Fan doesn't know what to say.

"Young man, what's wrong with you? There's only one old woman in a family of six. Everyone else survived. Thank you! Thank you! Villagers, we can't let the children go empty handed. This is not the character of our grassland people! "

As they spoke, a group of people, with surviving sheep, bacon, cheese and even cattle, had to send them to the car.

"Sir, no! That won't work. "

Where can you persuade me? For a while, the sheep barked and the horses hissed. It was very lively.

Zhang Fan looked at this is not a thing, but also prone to accidents“ Lao Chen, go to buy, no money, we

don't want sheep! Remember to buy only sheep, not other large animals. "

People don't want money. Really, we can see such a scene in this era. Really, to tell the truth, it makes people feel warm. The tired doctors and nurses are like living at this time, pulling this and that.

Really, money can't buy friendship!

You tore me for more than half an hour, and finally the people in the disaster area compromised. Hundreds of sheep were bought.

"What can I do?" Zhang Fan looked anxiously at the instruments on the ground and Baa Baa sheep.

"What's the matter with you, balangzi!" Although the old man has a white beard around his waist, his eyes are still bright. He knows that Zhang Fan is the leader here. Looking at the sadness on Zhang Fan's face, he thought Zhang Fan's flesh hurts.

"Ouch, the car can be loaded when it comes here. When it goes back, it can't be loaded. Now there are a group of sheep. I'm worried about how we can go back!"

Looking at the old man with a worried face, Zhang Fan doesn't dislike humiliation or embarrassment. Anyway, as long as he is not embarrassed, it's really not embarrassed.

"Hey, what a big deal I thought. You wait. "

When the old man finished, he trotted to find someone.

"If you put it like this, you'll have to knock it all down after three steps!" Lao Chen also looked at the car sadly. He had no choice.

Before long, I watched a group of men with arms coming.

"Which can't be pressed and which can bear the load, just tell us and ensure that it's stable for you!"

A middle-aged man who looked like a village head or grass-roots leader in a pastoral area said to Zhang Fan with a white tooth smile.

Really, the original messy equipment is as neat as building blocks in their hands.

Not only that, but also a group of sheep were steadily stuffed in. When I came, I had medicine. Now I'm out of medicine. I just made room for the baas.

Zhang Fan looked at the loading of a group of men, just like watching a blockbuster, "can this work? Is it true that the art industry has a specialty? "

The motorcade finally set off. On the bumpy road, a group of people sang a farewell song that Zhang Fan didn't understand. The distant tone echoed on the grassland and couldn't dissipate for a long time.

.....

When the team came, they ran with more horsepower. They were afraid of running slowly. They were not so anxious when they went back.

In the car, a group of doctors and nurses can't care about their personal image. Sleeping in a disorderly way, some of them are noisy, some drooling, and even their noses are bubbling.

Bursts of snoring came and went in the car.

Really, too tired.

A week's time, really dry boil, boil out.

Now, they feel at ease. What they can do has gone all out. What they can't do can only be buried in their hearts.

.....

Zhang Fan has no intention to drive himself. He and Ouyang sit in Koster together. Although the old lady is tired, she is definitely not as reckless as a young doctor.

Although the hair hasn't been washed for several days, the old lady doesn't know where to get the hair cream or moss. Anyway, each hair is set up with an oily and smooth face. Although her face is tired, her clothes don't even have a wrinkle. Even when I sleep, my waist is upright.

Zhang fan can't see it. It's no exaggeration to say that it's like a pig rolling in mud and water.

.....

When you go, the lights are bright, and when you return, it's really like waving your sleeves without taking away a cloud. The motorcade quietly entered the city and the hospital.

It was as if nothing had happened, as if the doctors and nurses in the hospital had organized a team to go hiking.

Chapter 1294

Just like the Chinese people, when we go to disaster relief, we are really United. Even if it is convenient to go to the bathroom, it is collective, as if the medical team of hundreds of people has become one person at this time.

It's convenient to get off the bus. Men are left and women are right. On the left side, they stand in a row and spray water. On the right side, they brush in a row with their faces inward and their hips outward. Even the sound of coming out of the water seems to be walking in unison. It doesn't bring a little clutter.

Orders and prohibitions. Really, everyone's mental state is different at this time. Even the various physiological functions of the human body are collectivized into a commonness.

But it won't work when you come back. Like sheep without shepherds, some walk slowly, and some have to taste wild flowers on the side of the road. Anyway, it's very casual. When I came, I walked all night, but when I went back, it was still daytime. I didn't walk much in the morning.

Especially when we are far away from the disaster area behind us, everyone seems to be alive. One will go to the bathroom, one will get carsick and throw up! Some people even quarrel because of each other's sleeping position.

Especially near noon, Zhang Fan meant to eat some unfinished war preparedness dry food in the car and continue on his way.

This is like poking a hornet's nest.

"God, Zhang Yuan, are you going to make me vomit? The war preparation dry food is sweet and salty. I'll throw up if I eat it again. I think I've developed irritable bowel syndrome. This is an industrial injury. Zhang Yuan, please spare me and let me have a hot meal! "

Several little nurses in the operating room, especially Bayin, jumped the most. Many people have been cleaned up by Zhang Fan these days. Doctors, especially surgeons, are embarrassed to say anything, but although these little nurses in the operating room dare not retaliate openly, they can still find some trouble.

Really, Zhang fantou is big.

He felt guilty about these little girls. Really, they are not hard hearted people. Look at these little girls. It's time to come. They are white and tender. They can run water when pinched. Now, their faces are rough like the heels of an old man, and their ruddy lips become dry and cracked. Only those big eyes are still so bright.

There are only three counties along the way from Jinzhi to Chasu. The southerners in the northwest don't understand.

For example, for hundreds of kilometers, it is estimated that they can leave the province in the south, but in the northwest, especially in the Gobi desert in the plateau area, there is no town.

After walking all morning, Zhang Fan and others had just reached the edge of Jinzhi County, a place at the junction of three counties.

When this kind of place was stable in ancient times, it was a post station for soldiers and horses. In the era of war, this place was the place where the Mountain King Tiger roared dragon plate.

Now, this place is a multi-ethnic gathering area. Because there have been people in this place since ancient times, and the eating habits in this place are different from those in the border areas. Really, there is no place with the same eating habits in the northern and southern border areas.

Local people have a habit of hemp, that is, they like to eat pepper. Sanchuan people are greedy and like to eat pepper, but they are spicy. And this place is pure hemp.

When the motorcade arrived, a group of Hula people got out of the car and dispersed. Zhang Fan wanted everyone to find a bigger hotel for collective dinner, but no one responded.

Because it is a traffic fortress, on both sides of the road in this small town, there are either small restaurants or small hotels and carts for 30 yuan a night.

Seeing a team of hundreds of people, the owner's wife of a small restaurant and the waiter carrying dishes, they are in full swing soliciting customers and dancing like a bird uncle dancing at the door.

Zhang Fan looked at it. At a glance, it was almost the same characteristic traditional pockmarked noodles! This reminds Zhang Fan of the joke about the gas station that Dadongzi said.

I haven't eaten a hot meal for a week. To be honest, Zhang Fan's saliva will flow down when he sees a pot of hot noodles.

"Ouyuan, eat this one?"

"OK!" Ouyuan is not as particular about eating and drinking as Zhang Fan. She just needs to be clean.

stood on the little golden Magnolia lace. It was really: the shadow fell into the sky, the early moon was cold, and the evening wind of Xiangsheng was weak.

"Hua Zi!" Zhang Fan jumped out of the car and looked at Shaohua who had lost a lot of meat on his face. He really felt uncomfortable.

Hold it in your arms and smell the faint fragrance. The wind blows, and Shaohua's hair caresses Zhang Fan's face.

This is care, this is home, this is your own woman!

Old man Lu went to the hospital and became addicted. He had to start the daytime county-level doctor training these days. He was busy and went home.

Mrs. Lu was worried and went to the hospital.

So there are only Zhang Fan and his wife in the family.

Shaohua cooked the most delicious braised fish, braised shrimp, big crab, and a table of dishes. Shaohua was busy from morning to evening. Finally, the man in his life came back unharmed.

They chatted while eating. It was very warm.

Zhang Fan has a habit that whenever he comes home, he will never tell Shaohua anything dangerous or sad. He can only talk about happy and happy, such as eating hemp noodles!

Shao Hua didn't understand at first. Slowly, Shao Hua also understood that between men and women, they will never be partners, but partners.

Partners can share, but partners always have to take care of Zhang Fan's man's card.

Shao Hua didn't tell Zhang fan that he was frightened at home and had a nightmare at night.

Because it's all over!

"I've packed all the things you checked back from the three islands. Why did you get a gray bowl all the way! It doesn't look like porcelain. "

"Sugar coated shells, you put them away. They should be worth some money."

"There's no shortage of money at home. Don't do anything stupid!"

"Well! I don't trust you! "

"Of course I don't trust you!"

"I don't trust you!"

"Go take a bath, you stink!"

Just like children, they start fighting when they are full.

.....

In every corner of the city, families evacuated from the disaster area are the same as Zhang Fanjia, and similar things happen in this kind of thing.

No words all night!

The next day, when magpies chirped around outside the window, Zhang Fan also woke up, looked at his watch, it was only six o'clock, and wanted to sleep a little more, but after many years of biological clock, he couldn't rely on a bed.

Get up and run. With the cool wind blowing down from the snow in the summer morning, Zhang fan runs slowly.

Early in the morning, a group of doctors and nurses came to work in high spirits.

The government has also issued a commendation meeting. The hospital will first hold it by itself, and then select excellent personnel to go to the tea government, and then the tea government will select personnel to go to the bird market.

The hospital wanted to choose Zhang Fan, but Zhang Fan refused. Moreover, Zhang Fan opened the small Treasury without meat pain and began to pay money in the form of high-temperature subsidies.

"High temperature subsidies, a little early?" Ouyang doesn't like it.

"My European Academy, as long as the meat is rotten in the pot, there is no need to be harsh on our own people." Zhang Fan makes tea for Ouyang with a smile.

"But didn't you say that the hospital will be difficult for some time in recent years? Turn around and you start paying money again."

"This money doesn't help the hospital much. It doesn't matter whether it's there or not, but it's different for our employees. In a week, our families are afraid and throw away their homes. We can't let everyone feel cold.

European Academy, times are different. You can't just talk about feelings, not welfare! "

The old lady stopped drinking tea and got up and went to the government. What do you want? Always find a loss inside the wall and a profit outside the wall!

For those who enter the front line, the subsidy is 2000 a day, for those who enter the second line, the subsidy is 1500, and for others, the average subsidy is 1000 a day.

For a time, Zhang Yuan's reputation rose sharply.

Of course, this is a high-temperature subsidy. Now the special tea element is less than 25 °C, so it begins to give high-temperature subsidies!

After handling things in the hospital, Zhang Fan looked at his old man. Old man Lu was ruddy and confident to train surgeons in prefectures and counties.

This kind of training is particularly good for the old man, as if the old man had returned to the peak of that year, with a group of students and subordinates honestly looking at him with admiration and longing.

Seeing Zhang Fan, the old man was impatient, "go, don't bother me if you have nothing!"

Looking at the old man's health, Zhang Fan was relieved.

Then, when Ouyang came back from the government, he was ready to meet Ms. Zeng.

"Three things. First, it is said that the government will give Zhang Yuan a reputation. Second, the government of the three islands sent an inquiry letter to set up a consulate in the tea plant, and the roll call was set up to cooperate with our hospital, which was rejected by the government. The government made us mentally prepared. Third, the decoration of the bone Institute is finished! "

At the meeting, Ouyang said the most important things in recent days, and then everyone looked at Zhang Fan.

Chapter 1295

Looking at Ms. Zeng in front of him, Lao Chen felt that the woman was as weak as a chick when she was in Sandao. Zhang Yuan trembled when her voice was louder.

But just a few days after she came to China, it seemed that chasu had become her home. They all had the courage to wink at Zhang Fan in front of Ouyang and Lao Tzu.

Of course, in different people's eyes, Ms. Zeng's realization is different. In Lao Chen's eyes, this woman is

winking at Zhang Fan.

In Ouyang's eyes, this woman is too seductive.

In the eyes of Ren Li and Yan Xiaoyu, because Ms. Zeng is about the same age as them, they think the woman is too flirtatious.

As for Lao Zhao and Luo Zhengguo, it seems that this is an old woman and should know men very well. As for Lao Gao and Lao Ju, they are not qualified to participate in such team level meetings for the time being.

However, in Zhang Fan's eyes, he felt that this was Ms. Zeng's deliberate weakness, just like the scattered dogs in the alley. The group of dogs who are the eldest and the second are very clear.

When the boss inspects, these dogs all lie on the ground with their stomachs facing up, and then pull their hind legs. Both parents are like this. It seems to say to the boss, look, look, boss, I don't have a gun, or the gun can't work!

But once the boss is dead, these dogs lying on the ground can tear the boss. So Zhang Fan attaches great importance to it. I'm afraid the woman will bury some killing moves.

This expression, in Lao Chen's eyes, is bursts of worry. He is now a proper party of Zhang Fan. The next step he can take depends on which step Zhang fan can take. Therefore, he is particularly nervous about Zhang Fan.

He is not afraid of others, such as what to close and greedy. He knows Zhang Fan too well. He won't worry about this. As for surgery, he doesn't worry. What he is most worried about now is that Zhang Fan is cheated by the woman to untie his belt.

If this happens, it's a time bomb. Therefore, he looked at Zhang Fan's attention and said, "it seems that we have to find a chance to talk to Zhang Yuan. Mature women are like experts. What you know and don't know, others will!"

In fact, before they came back, Ms. Zeng wanted to establish contact between the government after seeing the tea vegetable hospital (can't write, it will be blocked!).

But after all, Ms. Zeng is Chinese. She knows how to deal with Chinese people. Directly began to stop the pharmaceutical factory that Glaxo originally planned to set up in Tieless City, and then found the tea vegetable government with the contract.

Darling, the tea vegetable boss, the second, the third and the fourth, count one. His eyes are green when he looks at such a big contract.

Moreover, people don't mention ten-year tax exemption or land gifts. On one condition, let the tea vegetable hospital cooperate with their company.

At this point, the tea vegetable bosses nodded without a hole. Therefore, Ms. Zeng actually looks at Zhang Fan with a small sample to see how you run.

Looking at the people and horses on both sides who don't speak, they fight with their eyes. The boss of tea vegetable is also very worried. He is deeply afraid that the two sides will hook up the sky, thunder and fire, go to the head, and then clap and disperse, which will cause trouble.

Moreover, although the tea vegetable hospital is now stationed in tea vegetable, and three of the team members are under the control of tea vegetable, he knows very well that if Zhang Fan really doesn't do it, even if the team members are all tea vegetable, he can't do anything unless he changes to be the president.

But what did people come all the way for? Was it for the aroma of tea and mutton?

"Cough! Cough! Cough! Zhang Yuan, Ms. Zeng has traveled thousands of miles to support her hometown. We should learn and encourage this spirit. People are guests from afar. We should be, be generous! "

Zhang Fan was stunned. When did tea vegetable become his hometown?

Boss Cha Su's face is not red. Really, not only is it not red, but the muscles on his face don't beat more. Really, if there is a trace of jitter, he will be regarded as a loser.

"In the early years, there were few tea vegetarians from the two lakes? Isn't General Liu evidence? Moreover, Ms. Zeng found some relatives and friends of her family in tea vegetarians!

So, how can it not be my hometown! "

"Well!" Zhang Fan opened his mouth a little and thought to himself, just where you say it is. Then he looked at Ouyang and thought, "it's not easy for the old lady. It's not easy to grab food from such a big man!"

Zhang Fan was a little distressed for the old lady in an instant.

"Ms. Zeng, the conditions we said at that time in Sandao are actually the best conditions for both of us!" Zhang Fan gently glanced at Ms. Zeng. In fact, there was no way in his heart. Tea vegetable was too poor. People had money and said that home was home. Especially, people said that tea vegetable used to be people's main house. It is estimated that the bosses can find evidence!

"We should deepen cooperation. After coming to tea, the blood in my body beats faster than usual. I must deepen cooperation for the sake of my hometown."

"You're afraid it's high blood pressure!" Zhang Fan muttered in his heart, and his eyes couldn't stop turning up.

Ouyang looked at Zhang Fan, and his triangular eyes moved two or three times. Although he didn't speak, Zhang Fan actually understood: look, whoever comes is not good!

"In fact, GlaxoSmithKline was not our first cooperation goal at the beginning. As we all know, your company's development in recent years is not ideal and has a slight downward trend. Later, I was also moved by Ms. Zeng's tireless spirit. You sent a plane directly for the country at that time, and I decided to cooperate with your company.

So... "

Before Zhang Fan finished speaking, Ms. Zeng interrupted directly.

"This special money, the momentum is different." Zhang Fan thinks others want benefits. They think Zhang Fan doesn't take her to play more for a while. Because this is not the time to sign a formal contract, but to negotiate in advance.

So now it's the hemp pole that beats the wolf. Both ends are afraid.

"Overtaking on the curve can reflect the strength of a company. Indeed, our company is going downhill this year, but Zhang Yuan should understand the details of our company. We are a company with overtaking on the curve. Speed up straight, it's a personal city.

Therefore, at present, our company's idea is that on the platform of colon cancer, we can add funds, or even all the funds will be paid by our company.

However, once the drug is developed, within ten years, the sales right in Europe and America will be ours, and Asia will be a tea plant hospital or a laboratory established by you. As for other continents, we can also sit down and discuss.

As you know, the research and development of this anti-cancer macromolecular drug is far beyond the

capacity of an ordinary company, and even some small countries can't afford it.

Zhang Yuan, choosing to cooperate with Glaxo is definitely your best choice. "

"Shh!"

"Shh!"

Ouyang and Zhang Fan seem to see each other wipe the sweat on their foreheads.

It was deep cooperation. I thought it was a big deal. I thought you came to rob my steamed bread!

Really, Ms. Zeng's menacing arrival made Zhang Fan and Ouyang, who were born in a small family, unable to sleep.

As soon as boss Cha Su saw it, he knew what people do and specialized in cadres.

A look at the look of Zhang Fan and Ouyang, he knew that there was no problem. Then he said to Zhang Fan and Ms. Zeng, "how can we randomly designate the laboratory? This is the honor of tea element. This is the honor of our frontier. How can the laboratory bear such a great honor? We must focus on tea element hospital.

This is the success of generations of efforts. Brother comrade, we can't forget history. Forgetting history is betraying history... "

Eight characters didn't even skim. Boss Cha Su was very nervous and was afraid that Zhang Fan would make a trumpet to make money by himself.

The laboratory of tea element hospital has been at a loss since its establishment. Zhang Fan originally proposed that if the government should not be burdened, it should be separated and the tea vegetable hospital should be responsible for its own profits and losses.

At that time, both the leaders of the bird market and the tea plant gasped for breath, because these laboratories were more powerful than gold eaters. When their legs diverged, their mouths would cost millions.

Moreover, millions can't even see a splash.

When Zhang Fan said this, everyone was very happy. They were afraid that this thing would fall into their own hands.

But today, when Ms. Zeng said this, boss tea vegetable's heart almost jumped out of his throat. It's his turn to wipe his sweat this time.

Then in an instant, he decided that he must hit a nail to make a mark, or he could really make other colleagues laugh to death.

At the beginning, Zhang Fan didn't think so, but it doesn't mean that others don't think so. Really, to tell the truth, he scared boss tea vegetable.

As soon as the words were said, everyone became a fellow townsman from a hostile moment.

.....

Because Zhongnan wants to give a reward to Zhang Fan, which is like a flag. The bird market should also give Zhang Fan the honorary title, and so should tea.

In the conference room of the hospital, Zhang Fan, Ouyang and Lao Chen were discussing together.

"I want it from the central government, but the honor of bird market and tea vegetable will be separated. I don't go to disaster relief alone!"

"Well! Yes, it's good to have this idea. In terms of honor, we can't eat more and occupy more! " Ouyang nodded. The main reason is that the military and civilian areas have three aspects. On the one hand, the central government only gives an honor. Therefore, Ouyang still doesn't look up to the honor of bird market and tea.

Lao Chen thought: "I have an immature idea. It's like this. Since our leadership Zhang hospital has accepted the honor, it means that our whole team has accepted the honor. Therefore, I think this honor can be more inclined to our grass-roots medical staff!"

What Lao Chen said is awe inspiring. Anyway, you can't find a little fault.

Zhang Fan looked at Ouyang, who pretended not to hear and refused to comment! The old lady is now less than three-thirds, and she doesn't talk much unless she has equipment and funds.

"OK, I think it's feasible! It will be put forward at the team meeting later, and everyone will discuss it. Chen Yuan, do you have a place for doctors and nurses? "

Zhang Fan asked.

"Hiss!" Like a toothache, Lao Chen took a breath of air-conditioning and thought hard.

After a long time, he said, "I think everyone is very good. After all, I have been out of clinical for many years. I really don't see who is better and who is better. It's up to you two leaders to decide!"

Zhang Fan glanced at Lao Chen and didn't say much. Lao Chen, an old guy, is a thief with a little hair than a monkey. He knows how to be measured.

Zhang Fan looks at Ouyang.

"Ouch, I remember. I'm not here these days. A cactus in the office seems to be flowering. Alas, I'd better serve it. Ask around the hospital. Whose cactus can bloom?"

The old lady raised her ass and left.

Chapter 1296

Zhang Fan has gone home. There seems to be no difference between one more person and one less person in such a big house. But after Zhang Fan came back, Shaohua obviously felt that this was a home and this was his nest. Looking at Zhang Fan lying in a daze on the sofa after work.

Shao Hua felt that when he was cooking, there was no reply. Just one person, lying there can make people feel at ease.

Especially at dinner, if Zhang Fan is not here, Shaohua can mix a bowl of rice for a day. When Zhang Fan is there, in the sea bowl with a large head, Zhang fan pulls strips with spicy skin. Zhang Fan eats snoring, pulls strips, garlic, garlic and meat.

Darling, Shaohua has an appetite. After eating a bowl, Shaohua also wants to hold some soup. He drinks it slowly and accompanies Zhang Fan to dinner.

This is the feeling of home.

In summer, the farm is about to enter the lavender flowering period. Shaohua will drive to the farm during the day after Zhang Fan comes back. No matter how busy, Shaohua will come home before Zhang Fan gets off work. When Zhang Fan gets home, Shaohua has already cooked dinner.

I don't know when Shaohua began to feel more and more attached to Zhang Fan. On the farm side, it has stopped a lot this year. Last year, everyone planted Lavender like fried futures, especially Lao Tzu Zhang Fan and his father-in-law.

The two old men sat carelessly for a while. They didn't know whether they were domineering or not, but it was very clear that they would be blamed by their wife. So this year, the people on the farm are trying to let the two old men sit on the farm.

But the two old men have learned to be smart this year. Whether you call me boss or my leader,

anyway, they won't be in charge this year. I'm really afraid! When the two old men did not take the lead, Shaohua became a flag.

Anyway, what Shaohua does this year and what the people on the farm do with him. For example, recently, Shao Hua is busy cleaning up the farmhouse, making some decorative props conducive to taking photos, and then the people on the farm clean up the farmhouse and busy with the big windmill on the farm!

The small farm of Shaohua has become a local scenic spot inadvertently!

Especially for some wedding photos, because large botanical gardens and various decorative props, such as cartoon scarecrow, antique windmill, accompanied by blue sky and white clouds, forests and snow mountains, can give people a feeling of entering the fairy tale world.

.....

In the tea vegetable hospital, the selection of advanced figures in earthquake relief and disaster relief was held today. The bird market has given a quota to the tea vegetable hospital, and the tea vegetable government has also given a quota to the tea vegetable hospital.

"Why can't you give more!" In the orthopedic office, Zhou Chengfu muttered to Wang Yanan. Looking at Xue Fei, the younger martial brother of the same school, who is now pulling in two or five hundred and eighty-one, he has begun to learn the posture of leadership. Obviously, he has a monkey face and has to work hard to learn the solemnity of leadership.

Zhou Chengfu just couldn't see Xue Fei like this, so he felt that he didn't have much hope in this selection, so he complained that the quota given by the government was small.

"Make you beautiful. You think it's sugar beans. It doesn't matter if you give one more or one less!" Wang Yanan glanced at Zhou Chengfu and ignored him. Because Zhou Chengfu and Wang Yanan are also competitors.

In the next ten years, whoever gets good grades will be the academic leader of the three bone subjects in the future. In the past, Xue Fei and Zhou Chengfu competed secretly. Now Wang Yanan competes with Zhou Chengfu.

In the hospital, after the recommendation of the leaders, it was actually decided by Zhang Fan. After the democratic election, there were two advanced figures, one doctor and one nurse.

The doctor gave the first batch of Wang Yanan who ran into the disaster area and was still a woman! Zhang Fan elected Zhou Chengfu and Wang Yanan. As a result, after a round of democratic elections, Wang Yanan surpassed Zhou Chengfu.

At this time, the advantages of female doctors come out. Even if a group of old surgical men can't eat grapes, they will vote for grapes! This thing is

The nurse is Bayin. Originally, this quota should be given to the head nurse in the operating room, but Zhang Fan has decided to directly promote the head nurse to the role of head nurse after the head nurse retires. After learning that Zhang Fan really wanted to let her sit in the office, the head nurse in the operating room almost didn't kiss Zhang Fan!

Of course, it must be Zhang Fan's strict refusal that didn't let the head nurse succeed!

What is the difference between the director of the nursing department and the head nurse in the operating room? According to the current view, that is, the director of the nursing department is half a grade higher than the head nurse.

In fact, how to say this? According to the previous saying, although the head nurse takes a head nurse, she is actually a team leader, and the director of the nursing department is already a cadre and is qualified to be a hard sleeper.

After the democratic election, the commendation meeting is held immediately.

When Wang Yanan's happy mouth couldn't close, Zhou Chengfu's mouth was crooked. When he knew that Zhang Fan recommended him and Wang Yanan, he felt that the opportunity had come, and now it was like this!

Wang Yanan came to the stage with a cool and heroic appearance. A man had short hair, a delicate face, and then put on the doctor's white coat. What do you think? How do you feel like a woman's heroism.

Especially when shaking hands with the leaders from the bird market and the local leaders of tea and vegetable, you are generous.

Bayin is another style.

In life, Wang Yanan is cold and blunt, but he is definitely not as lively as Bayin. In fact, Wang Yanan is more introverted. Bayin is not. When she can laugh, she absolutely laughs. She is born with the cheerful nature of a grassland woman.

If you drink some wine, people will go crazy. But on the rostrum, in front of the leaders and the meeting hall of thousands of people below, Bayin directly became a little daughter-in-law who had just entered

the door. His face turned red and he walked with hands and feet.

Moreover, the frontier government also rated the tea vegetable hospital as a model unit for disaster resistance, with a collective third-class merit. Although this seems like a name, it is actually quite important in the system.

In the past, even if the tea vegetable hospital was upgraded, it was the last one listed in the government report or at the regular meeting.

For example, in a certain unit, there are the first hospital and the second hospital in niaoshi... Finally, there is a tea vegetable hospital.

Now, with this name, it's like changing a bench into a chair. Now the tea vegetable hospital has ranked third.

This also represents the inclination of policies and funds. Tea vegetable hospital ranks third in the frontier.

"I heard that the head nurse of the operating room is going to be the director of the nursing department. It seems that Bayin will be the head nurse of the operating room after that."

"Well, I've also heard. Do you know that when Zhang Yuan was angry in the disaster area, no one scolded, just scolded Bayin. At that time, many people were gloating. Including me, I think Bayin is really unlucky. Now I've come back. If I don't value you, Zhang Yuan will scold you? "

"Who says not? Did you hear that Yin Meimei chased Zhang Yuan?"

"Cut, all the nurses in the operating room who were single didn't care about Zhang Yuan. I ate meat buns with Zhang Yuan! It's a pity that one of them didn't succeed. It's just Bayin thieves. Don't look crazy. It seems that you don't have a brain.

In fact, people are the smartest. At the beginning, people and Zhang Yuan were brothers! "

The other subconsciously looked at the breast of the nurse who had eaten meat steamed stuffed bun with Zhang Yuan!

"Bah, where do you look? Your thoughts are too dirty!"

"No, but I think you've grown up again recently? How did you get it? "

Several little nurses had been chatting, but they became gossip.

.....

The negotiation with Mishima is slow and the intention is established. The specific content of the negotiation is too complicated. Moreover, not only the two camps of tea and Glaxo, but also the doctrine of the mean and pill country, which can be said to be four groups.

It will take several months for such negotiations to achieve some results. It is estimated that it will be a year less after they are implemented. Originally, the tea vegetable government also wanted to participate in the negotiations, but Zhang Fan didn't promise. The main person in charge of the negotiation is Zhao Yanfang.

Because no one else has this experience, and there is too much chance that laymen will be tricked into negotiating in the field of scientific research.

With the arrival of May, the tea vegetable hospital also began to prepare new recruitment activities for several years this year.

These are jobs with mature experience, and now the most urgent work is the bone Institute. After the decoration, it will be put into use.

Jinmao special orthopedic hospital has really paid off this time. Professor Stan, the dean of others, sent a team of engineers to tea vegetable in advance, a team of hundreds of people.

At the beginning of the decoration, Ouyang was still wearing a white helmet and wanted to tell others what to do, but the decoration of others' golden hair seemed different. Ouyang couldn't understand it and was embarrassed to tell others what to do.

When it's ready to be put into use, Jinmao sent a team to debug it. Ouyang is even more curious. These gadgets won't get us any mechanisms. If there's a problem with cooperation in the future and people close the mechanisms, we'll have to rest?

Therefore, although Ouyang wants to raise flowers and vegetables, he runs every day.

The commissioning of Jinmao is very formal, from circuit to communication, from equipment inspection to radiation isolation, from stable operation together to accidental dredging.

It took a whole week for the Institute of orthopedics to pass the examination, and then it was ready for use.

Ouyang picked a special auspicious day, and then she wanted to invite many people to watch the ceremony. The old lady's idea was that it would be hard to be rich and dignified.

Zhang Fan didn't agree, and the angry old lady went on strike again.

Zhang Fan felt that it was unnecessary, and when he put it into use, there were a lot of things, especially the early running in between his doctors and Jinmao doctors, which was quite troublesome.

In particular, Zhang Fan, the head of the bone Institute, has a headache and has to be put into use. Zhang Fan doesn't have a suitable candidate in his heart.

If it's a general department, the tea vegetable hospital can just find a more mature chief physician. It's really impossible. How can it be done if you throw Lao Gao over.

But this bone Institute is different.

Chapter 1297

"Is orthopedics moving?"

"Well, all the three orthopaedics departments have moved, and I heard that there will be no division after that. They are all bone research institutes!"

"How did the directors get it? How did they arrange the three departments plus or minus six directors?"

"In the future, orthopedics will become spine, joint surgery, orthopedic trauma, sports medicine and muscle orthopedic tumors."

Two little doctors met at the gate of the hospital and chatted. When they heard this, one of the little doctors looked around and whispered, "this time, the directors hung up. I heard that Zhang Yuan sent a hero post and selected academic leaders all over the country.

Later, bone Institute, each group is academic leader has the final say, the separation of administration and profession!

"No!" The other one is a little skeptical.

.....

In fact, this is all hearsay. The Chinese people's love for gossip is really like a man who is a teenager until he dies. There is no way to change it.

The establishment of the Institute of orthopedics means that the original orthopedics has become a scientific research institute integrating therapeutic research and teaching.

There are still directors, but the current director can no longer adapt to the Institute of orthopedics. Moreover, several disciplines are not groups, but centers.

For example, the spine surgery clinical center includes the scoliosis correction center, which is actually equal to integrating first and then subdividing. The whole is more comprehensive and the classification is more international.

The problem caused by this classification is that Zhang Fan finally realized that the demand is very strong, but he just can't stand it.

"You can't let all the golden people be the director, can you?" Ouyang looked at the director's request from the golden hair in Zhang Fan's hand, looked at Zhang Fan anxiously and said.

"Cheap is hard to take!" Zhang Fan is equally worried.

"Yes, it's not easy to take advantage of it!" Ouyang also made a sigh without God.

Originally, when the Institute of orthopedics was built, it seemed that the budget was not enough. Dean Stan of Jinmao special orthopedics meant that the two families shared the extra expenses equally.

Zhang Fan and Ouyang uphold their fine traditions. They always feel that you have spent so much money to get home. I'm afraid you'll run away? Toto is the means of China Merchants. When you don't come, China Merchants is a grandson. When you invest, China Merchants is the king of the mountain.

Zhang Fan and Ouyang quit, and they didn't talk much. However, in the future, academic leaders should compete fairly and can't accept their orders. Zhang Fan and Ouyang didn't take it seriously, including the whole tea vegetable leadership team.

Now, I can't pull out any of the directors on my side who can play.

Academic leaders can't compare with surgery, that's more than papers and scientific research achievements. Theophylline orthopedics has an egg research achievement.

Orthopedics in major hospitals in every place are not only large departments, but also popular departments. Especially in recent years, with more and more cars, orthopedics in major hospitals are delicious.

Making money is making money, but scientific research didn't keep up.

Zhang Fan just began to worry about the responsibility of the Institute of orthopedics. When it was put into use, he found that there were too many places for him to worry.

If he is a general foreigner, Zhang Fan doesn't worry much. With a phone call, he can introduce one to his senior brothers, uncles and uncles all over the country. Zhang fan can pull up a very powerful team.

But, orthopedics, no!

This is the advantage of having a master and inheriting the school.

Thinking of the director of shuitanzi making a call, he picked up his mobile phones and put them down again. Because of the old goods of shuitanzi, Zhang Fan is really not sure.

"What should I do? Is such a good facility really given to Jinmao? Ouch, how did the industry that I managed to buy become someone else's? "

Ouyang was distressed. At this time, he didn't say he was reluctant to give up.

"I'll find a way!" With that, Zhang Fan went to orthopedics and thought slowly as he walked.

.....

When Zhang Fan left, Ouyang remembered something. The old lady wondered if she was going to hide for a few days, or she would be a little embarrassed when Zhang Fan found out.

Because a few days ago, Zhang Fan opposed the big operation when the Institute of orthopedics was put into use. Ouyang felt that it was like a mouse marrying a woman, but now there was no way. He was the head of the family. You can't make a big deal, but Ouyang is unwilling.

After thinking about it, I sent an invitation letter to several hospitals in bird City, which means that our world leading bone Institute is about to open. Do you need to learn.

At that time, Ouyang Jue could let the group of people in the bird market have a look. Now it's a little regretful and a little too simple, so Ouyang sent invitations to several hospitals in the bird market.

Now when I think about it, I'll be laughed at! The old ladies are eager to go home with their bags!

.....

"Are you still in touch with the director of shuitanzi recently?" In the office of the third Department of orthopedics, which will disappear soon, Zhang Fan began to ask after finding Wang Yanan.

Wang Yanan looked at Zhang Fan suspiciously. He didn't know how many circles he had turned in his head, and then said, "it's not very connected!"

"Is there any connection? Make it clear!"

"Well! Yes, but don't worry, not much. Don't be jealous. I didn't say I wanted to be his apprentice. He said it himself! "

Wang Yanan quickly began to explain.

Zhang Fan was crazy. He covered his forehead and was about to speak.

Wang Yanan said again, "don't be angry. I know I'm wrong! Besides, you didn't take me to Sandao! "

"You don't even apologize sincerely..." Zhang Fan thought it was wrong when he said it, and then turned his head and said, "what do you think in your head all day? I'm the kind of person with a small belly and chicken intestines. Can you also bring some brains? He's the director of shuitanzi. Why don't you contact more!"

"Well! In fact, there are many contacts. I thought you knew what he scolded you, so... "

Fortunately, Zhang Fan didn't think much. This man can't communicate sincerely!

"OK, you call and say that you failed to apply for the clinical director of the Institute of orthopedics of the hospital. You feel very bad. Then tell him that Jinmao's orthopedic doctor is too powerful! "

"You want me to be the clinical director?" Wang Yanan heard this, and other estimates didn't go to his heart. A look of joy, if Zhang Fan answered in the affirmative, it is estimated that the girl can jump up with her feet off the ground.

"Why are you so beautiful!" Zhang Fan looked at Wang Yanan, and then said, "to pretend to be lost, do you understand?"

Zhang Fan didn't go either, so he waited and asked Wang Yanan to call. Wang Yanan pursed, "isn't this a lie?"

"Come on, don't ink. Do you really think you're better than the people from Jinmao?"

Zhang Fan said impatiently.

Chapter 1298

Looking at Wang Ya's grievance, Zhang Fan saw goose bumps all over. Really, let a female man pretend to be a little girl with deep resentment, just like an adult man playing coquettish, cold shivers came out.

Who is Wang Yanan? He has been competitive since childhood. In primary school, he can catch up with the little fat boy in the class who calls his mother. The conditions at home are good. Don't say wronged. There is a fly on his nose. He can catch up with the person who breaks the fly to the corpse. How can he pretend wronged.

"All right, hurry to the ward round!" Zhang Fan waved to drive Wang Yanan away.

"The ward round has long been finished!" Wang Yanan won't go.

"Then write the medical record and change the dressing!"

"Now the doctors below have done this little work. Where can I use it?" Wang Yanan has a strong chest, which means I'm powerful. Your eyes are not wrong!

"Ouch!" Zhang Fan's teeth hurt.

Wang Yanan didn't let Zhang Fan go. The girl was serious, "clinical director..."

"Save it, my ancestors. You can't hear your bad words!"

"Scum man, bah!" With that, Wang Yanan slammed the door and left!

After a while, Lao Zhao of shuitanzi called.

To tell the truth, among the three people, Wang Yanan believed it and felt that he was qualified to be the clinical director.

Lao Zhao probably thought with his toes and wouldn't believe it.

Zhang Fan actually took advantage of Wang Yanan to make Lao Zhao soft and beg for mercy. If he calls himself, Lao Zhao is expected to intensify. It's better to be gentle now. After all, he doesn't kill too much!

"I'll say you have a lot of heart and mind. Sure enough, your heart and mind are playing on my head!" Lao Zhao called angrily.

"Isn't there really no way? You always have prejudice against me. I can only have the cheek to beg for mercy."

"What's going on?"

He knew about the cooperation between catechin and special orthopedics, but he didn't pay much attention to it. After all, he didn't cooperate with shuitanzi.

And Zhang Fan jumps over the pool and cooperates with special orthopedics. The old man is also very delicious.

"The building is well equipped. As far as the current equipment and instruments are concerned, it is estimated that no orthopaedics department is more advanced than the tea bone Institute in China.

But Jin Mao is not stupid. He set me up. Now discipline leaders want to compete for posts. The tea vegetable family background is too thin. None of them can take it. Wang Yanan is a general among the shorties. I thought you were old.

As long as you do it, the special orthopedic hospital will not be a problem! "

In order to stop the old man's mouth, Zhang Fan hurriedly said: "especially in bone tumors, the equipment here is too complete. Unfortunately, shuitanzi is the benchmark of Chinese orthopedics. Otherwise, the cooperation between shuitanzi and special orthopedics is definitely better than our cooperation.

But now people come to tea, which is actually tantamount to cooperating with shuitanzi. After all, you are our superior leader, aren't you! "

Director Zhao laughed angrily " Go, go, go, I'm not your superior leader. You're higher than me. You're also interesting! "

The tone is obviously much better, without the surging when I just called.

"Hey, I'm bluffing people who don't know what to do. Those who know what to do know. You don't care about this. If you really care, I think it's the most appropriate for you, the boss of the Ministry of health!"

Zhang Fan touched his face while making a phone call. He hasn't been a dog lick for a long time. He doesn't adapt to it for a while. He's a little on his head, and the temperature on his face is a little high.

"The problem is that the distance is too far. You say it's short-term. I'll lend you a few people. It doesn't

matter. But you're a bone Institute. It's useless to lend you people for a short time. It's useless to send people for a long time. You say it's a little standard and can stand in the capital. Who is willing to go to your tea vegetable."

Director Zhao pondered for a while. He went over several suitable doctors in shuitanzi in his mind. It's really hard to find someone.

To say a bad word, just as Miss Ma said in those years, she would rather cry in a BMW than laugh on a bicycle. Now many people would rather insist in the basement of the capital than live in a villa with tea vegetables. This statement is absolutely not exaggerated.

"It's all right. You just need to send someone to pass this level first. As for those in the back, I have no ability to keep people."

Director Zhao pondered for a while. Compared with Ouyang, Lao Zhao is a scholar completely "I helped you. If our hospital needs your laboratory in the future... "

"Look at what you said. Shuitanzi wants to borrow the tea element laboratory. I said that there is light on my face. I also talk about whether to borrow it or not. You can use it as long as you use it. There are not enough hands. There are still some people doing chores here.

Director Zhao, let's make a deal first. That's it. We can't have another accident! "

Zhang Fan hurriedly said.

"Hey, you are really crying, crying Lord Liu!"

"What?" Zhang Fan didn't react.

"Crying and playing rogue!"

"I faxed the equipment and instruments of our bone Institute. Take your pulse and see if Jinmao fooled me!" Then Zhang Fan hung up.

He said and laughed, and Zhang Fan threw the bait. He didn't believe that Lao Zhao was not jealous. Zhang Fan could have his last name.

.....

Jinmao special hospital.

"Don't worry, doctor. I've touched the bottom of the orthopedic doctors here. The most powerful one is Zhang Fan. We can let him be the director of the Institute of orthopedics, but none of the following academic leaders is qualified for tea.

After the competition, we began to improve the anatomical map of white people and test the immunity of white bone tumors. He has nothing to say. Even if he opposes, he has no one in his hand and no one can carry out relevant experiments. "

"OK, wait for your good news." Dean Stan of Jinmao hung up with satisfaction. Then I looked at the globe in front of me and inadvertently smiled at the corners of my mouth!

A group of doctors and scholars with considerable academic level set out for the goal of tea.

The capital Shuitanzi hospital, under the coordination of director Zhao, the orthopedic corps also set out.

In fact, although Lao Zhao complained that Zhang Fan didn't choose orthopedics, this is an internal contradiction. Now that Zhang Fan is in trouble, it is impossible for him to stand aside and laugh, especially this high-end research project.

Any project may be several years, and Jinmao's idea is to use Zhang Fan's level to complete other people's things.

Therefore, Lao Zhao personally led the team this time, not to say that he was greedy for Zhang Fan's equipment. The most important thing is that the Chinese people stress unity and friendship. They should unite with the outside world and can't let Jinmao succeed.

People really don't envy Zhang Fan's equipment. Although Zhang Fan has been staring at his fax since he got on the plane, he doesn't envy at all. Really, he doesn't envy at all.

Shuitanzi's orthopaedic Corps set out.

Director Zhao, who leads the team, doesn't say his surgical level. It depends on other people's experience!

As the first batch of graduates of China's double doctoral degree system (Doctor of medicine, doctor of Science), director Zhao has published more than 60 SCI papers in authoritative magazines such as rheumatology, Journal of boneoncology, qjm-international Journal of science, endocrinepractice, spine, eurospine and so on as the first author and corresponding author in recent years; Published more than 20 papers in Chinese core journals; 15 utility model patents were approved. The team has won the second prize of medical scientific research achievement of the Ministry of health.

This thing doesn't engage in medicine. Generally, it can't be seen as powerful.

Then look at what ordinary people can see!

Lao Zhao's double doctoral degree, the regular time for studying double doctoral degrees in medicine

and science is 11 to 12 years.

There are two ways: enter the laboratory after completing preparatory and basic medicine courses in the first four years, carry out 3-4 years of scientific research training under the guidance of doctoral tutors, complete a high-level thesis, and then complete 4 years of clinical training. The excellent will be awarded a double doctoral degree at the same time;

The second is to enter the laboratory after completing the 8-year course, carry out 3-4 years of scientific research training under the guidance of the doctoral supervisor, complete a high-level thesis, and the excellent will obtain the double doctoral degree at the same time.

Only two of the first batch of double doctoral graduates in China! One in the capital and one in the magic capital.

In addition, the spine and joints are almost the top orthopedic doctors in China.

Zhang Fan lay on the boss's chair and looked at the completed bone Institute in the distance. His heart was sweet like his own child.

"Zhang Yuan, several directors of bird City orthopedics are coming!" Lao Chen gently opened the door and saw that Zhang fanru was obsessed with the scenery outside the window.

Lao Chen didn't think much. After finishing what he should say, he was ready to close the door and run.

He knows that Zhang Fan doesn't love this kind of thing, so don't even think about it. Who invited the directors of the bird market! In order not to affect the fish in the pond, Lao Chen wants to run.

The old boy is really slippery.

"Wait, who..." Zhang Fan understood with a slight thought "What about the European Academy?"

"The European Academy said she was a little uncomfortable recently and went home. I haven't come to work these days! "

"Hey!" Zhang Fan knows as soon as he hears it. The old lady is hiding. Now she can't call the old lady, otherwise she will be ashamed and difficult to get in!

"OK, you and me, director Gao and president Zhao Jingjin, let's take the guests around. I haven't dealt much with orthopedics in bird market. President Zhao is familiar with it. "

"Good!"

.....

"Tut! Tut! Tut! This is the 7.0T NMR? "

"I'll go, dual source CT. We have tea vegetarians in China now?"

Along the way, it was mainly introduced by Lao Gao and Zhao Jingjin. Zhang Fan is polite to take the road. To tell the truth, Ouyang should actually come for this kind of thing.

She likes it. Unfortunately, the old lady doesn't dare to disturb her now!

When I entered the operation floor, darling, a group of people were silly.

The dome superimposed operating room directly fooled a group of Frontier doctors.

It's so special. Where is the operating room? It's like a science fiction film in a movie.

The biggest feature of this operating room is to observe the operation and the backup team, and you can see the operation process more intuitively.

Most operating rooms in China are transmitted through cameras.

The operating room that Jinmao made for tea vegetable this time is directly the dome. The first floor is the operating room, and above the operating room, an oval special glass cover.

There is a platform around the glass cover where people can stand.

Moreover, this kind of glass can enlarge the operation, that is, the observer or the operation support team directly watch the operation from a commanding position, and it is still an enlarged version. The doctor's operation can be quite clear for the observer and the support team to see clearly.

Really, this kind of operating room is very convenient for teaching or major surgery.

So, when I saw the operating room, the orthopaedic directors of bird city were stunned!

Chapter 1299

Man is a very strange creature. For example, a beggar has a high probability of not being jealous of an emperor, but those who sell meat buns will definitely be jealous of those who sell big white steamed buns with particularly good business opposite. I wish no one would eat each other's big white steamed buns.

When Zhang Fan took a group of directors of the bird market to see the bone Institute of tea vegetable, the directors of the bird market didn't have many smiles on their faces. Those with self-restraint will be

silent, and those without self-restraint have made strange sounds.

"It's a pity to put such good equipment and facilities on tea. The population doesn't even have 600000. This kind of equipment can't be used three times a year!"

That's pretty bad. In fact, it also shows from the side that people still don't get the tea vegetable hospital at the same level as them. I don't know where I came from.

"Why don't you take it apart and pack it for you? Can you use it? " With that, Zhang Fan shook his hand and left. He didn't want to receive him. Unexpectedly, he licked his face and stuck it on hemorrhoids. His mother licked the dog, licked the dog, licked everything!

Zhang Fan scolded and left. That is, Zhang Fan. If Ouyang were here, it would be these directors who would swear and leave. Sometimes, in the workplace within the system, it's really not good without a little banditry and a trace of hegemony.

Because there are always some strange people in this world.

.....

The expert team from the golden Maoist country also came. Ouyang doesn't pretend to be dead. She can't stay at home. Even Bangzi TV dramas are not popular, because for a while she is worried that Zhang Fan has no experience, and for a while she is worried that Zhang Fan has a soft face and is stained with gold wool.

So I stayed at home for a day and went back to the hospital. Ouyang personally took over the reception of the golden hair expert team, as if he were apologizing to Zhang Fan, and took the initiative to work. Of course, I won't say it in face. I'm wrong!

"Your stall is getting bigger and bigger. We haven't gone through your road. How to go in the future depends on yourself."

Not to mention the jealousy of the directors of the bird market, even after old man Lu visited Zhang Fan's bone Institute, the old man was silent for a long time. Because of the equipment here, let alone the bird market, even for the old Qingniao Affiliated Hospital in Shanglu, Qingniao is a generation or two behind.

Moreover, this is a large-scale and in-depth cooperation. Like finance, China's medical market is basically open to you.

Many people think it's good to let go. After letting go, we can enjoy higher-level treatment under globalization.

In fact, this is a lie. The savadika next door to China is very open. It's flat chested and breast exposed. It's almost separated from the thighs. What's the result?

Finance is the same, so is health care.

Why not let go? Because people are different. For example, you have a headache when you catch a cold, and his nose is stuffy when he catches a cold.

But once your country's genetic targets are controlled by others, the right medicine is quite terrible. This is why it was reasonable that China did not let Jin Mao come to China to collect genes.

.....

The next day, there were no colorful flags, nor gongs and drums, because Zhang Fan didn't agree, and there was no big action in the tea vegetable hospital.

"Isn't it said that Jinmao came to cooperate with the tea element hospital today? Why didn't you see the flowers of tea element flying all over the sky?"

"Who said no, did the plane run out of gas?"

A few wealthy aunts in the tea government got together to gossip.

"Our tea vegetarians are becoming more and more powerful. In the future, we'll see doctor Jinmao. It's said that doctor Jinmao is tall and big!"

"Are you going to see a doctor or a doctor? The effect of Liuwei Dihuang honey pill in your family is not good? "

"Go, I see your husband's tea cup is full of black wolfberry recently!"

.....

Although there was no big operation, some people were invited to participate in the investment ceremony, such as several orthopedic directors of bird city hospital, Ms. Zeng in tea vegetable and

intestinal experts from meatball country.

"Zhang sang recently put his interest into orthopedics. He hasn't operated on us for a long time. Do we want to protest?"

"Well, wait a few days to protest. Zhang sang is too angry. Orthopedics is such a simple department. Why waste his good youth in this department?"

Zhang Fan also invited old man Lu, but the old man didn't come.

The conventional shooting and cutting of silk are also very compatible with the golden hair on the surface, as if the horse is following Zhang Fan. In fact, everyone is grinding scissors and forks behind their backs, ready to black each other.

Chinese people's affairs are often bad in the party leading the way.

It's true that Jinmao has made a lot of money. There are not only white experts, but also several who went to Jinmao after graduating from eight major medical colleges in China.

"I looked at the venue. There were no big men in the Chinese Orthopaedic industry. The most powerful one was Zhang Yuan. The others were average. The third from the left in the first row was the orthopaedic director of the Second Affiliated Hospital of niaoshi, who was good at spine.

Although it is a little famous locally, it is not among the top ten in the northwest. The sixth on the left side of the second row is the director of orthopedics of niaoshi Central Hospital, who is good at joints. The level is average. If the difficulty coefficient is relatively high, foreign doctors should be invited to fly the knife.

As for the eighth place, he was the former director of the second Department of orthopedics, specializing in trauma orthopedics. But he was the earliest Bole in Zhang Yuan. We won't let go of tumors, joints, spine and sports, but we can't take them all, otherwise they will be angry.

It's better to leave the trauma to them. "

"Well, that's it!"

.....

Hello, I'm good. After everyone is good, let's start the speech. In the middle of the first row sat Zhang Fan. Because it was an orthopedic meeting, almost all the participants were orthopedic doctors. Looking down from the podium, a group of men, all the same, without a cross legged.

Very few female doctors were interspersed in the middle.

Because Zhang Fan didn't advocate big operation, other TV stations didn't come, so tea vegetable TV station came.

"Zhang Yuan seems unhappy. He looks serious! So young, sitting in the middle of the crowd, with a stiff face, makes people feel so stressed! "

A host of tea vegetable whispered to his colleagues.

"Of course, because he is young, he has to pretend to be older. You can't hold people down with a playful smile. It was the same when I took the group! "

"Really!" The host didn't say it. He despised it in his heart. As a group leader, do you mean to compare it with the dean at the level of deputy (a) hall?

.....

Although it is a live broadcast, in fact, the tea vegetable people don't watch tea vegetable TV. To be honest, most people don't even watch the local news, or even the local weather forecast.

But on the farm, a group of people gathered around the TV, "this is our son-in-law, really energetic!"

A group of farm workers who had never met Zhang Fan, endured the meeting they didn't understand and flattered Zhang Fan's father-in-law!

"Yes, yes, very spiritual, but a little serious."

"Can you not be serious? Your dog egg is not serious. Can you be on TV? They are leaders! "

.....

"Dr. Johnson, doctor of Duke University, is good at bone tumors. Especially this year, he has made outstanding contributions to the gene expression of TGF- β 1, BMP-2 and IGF-1 in the shadow process of bone tumors..."

"Dr. Davis, doctor of the University of Maryland, is good at joints..."

"Dr. Miller..."

Say a doctor, the orthopedic doctors at the venue take a breath. Say the doctors at a meeting take a breath.

.....

"It is estimated that it is difficult for the tea element hospital to control this bone Institute. You see,

except for the trauma and orthopedics department, there are several other bone tumors, sports, joints and spine. Although they are not the world's top scholars, they are almost the middle-aged generation.

Hey... "

Several directors of the bird market gathered together to chat. From jealousy at the beginning of the visit to hearing that so many doctors have come to Jinmao, I feel a pity. It's a pity for the tea vegetable hospital.

To tell you the truth, psychological activities are really complex.

Moreover, when chatting, they will also side their heads and quickly observe Zhang Fan.

"Zhang Fan doesn't look well!"

"Yes, can you? I worked hard to pull up the team. As a result, I looked back and was disarmed. Otherwise, according to the urine quality of tea vegetable hospital, I wouldn't call orthopedic doctors from all over China to attend the meeting? Look how small this time.

Such an advanced hospital has brought so many doctors, and all of them are frontier doctors. Alas, it's a pity that these equipment can only watch Jinmao do other people's research in the future, and our doctors can only work in vain! "

Everyone looked at Zhang Fan's face and felt a little lost. After all, a hero can't break the ceiling of this industry.

The golden Maoist team, especially those leading the team and some leading parties, have a smile of victory on their faces.

"Next, let's invite Zhang Yuan to speak on the stage."

It's my turn to speak. Surrender or disarm. Anyway, that's what I mean.

Jin Mao felt that Zhang Fan had given face. At least in terms of trauma orthopedics, people didn't find anyone.

Zhang Fan arrived at the podium in a few steps.

"The experts of Jinmao are excellent. I am very pleased and look forward to cooperating with these excellent experts."

With that, the Chinese doctors in the meeting lowered their heads. People with inferior skills can only talk about the scene.

And the golden hairs began to clap with a smile.

Zhang Fan, with some serious faces, suddenly smiled!

Dean Stan, who was far away in the golden Mao country, trembled when he saw Zhang Fan's evil smile.

"But! This is far from enough. After all, the Institute of orthopedics is a collection of the most advanced equipment in China and Jinmao. Of course, the technology should also be the most advanced. Ordinary doctors are not competent. "

Are these doctors ordinary?

When I looked at Zhang Fan, I felt that Zhang Fan was hysterical. In front of such a strong lineup, dare to say: that's it?

Looking at everyone's cute face, Zhang Fan smiled again.

"His smile is so annoying!" The doctor led by Jin Mao looked at Zhang Fan's smile and couldn't hold his breath.

Chapter 1300

"Originally, I thought there were more experts in special orthopedics, and their technical strength was slightly stronger than that of tea. There should be scholars and experts who could brighten my eyes, but I was a little disappointed.

Comrades, we can't play with such advanced equipment and such a large-scale center. " Zhang Fanbian's words are sincere and sincere! If you change your head to Ouyang, it means Ouyang is on it!

"The establishment of the tea vegetable bone Institute is not only the painstaking efforts of all the staff of our tea vegetable hospital, but also the painstaking efforts of President Stan on the other side of the ocean. It is not easy for president stan to wait all night for this meeting, comrades." Speaking, Zhang Fan looked up and waved to the camera.

Dean Stan, on the other side of the ocean, was already tired. When he saw Zhang Fan greet with a smile, he really wanted to close the video. He always felt that stealing chickens could not be * *.

In the big screen, it's Stan's turn to be depressed. Stan, who used to smile, becomes serious. He looks like you all owe me 500 oceans.

"So, comrades, for our common goal and common ideal, I have paid blood this time. Really, I have paid blood!

Now, let's invite Professor Zhao Wenyong, honorary director of tea vegetable orthopedics! "

Zhang Fan said that when he paid blood, Dean Stan on the other side of the ocean couldn't sit still. He wanted to jump out of the video and slap Zhang Fan in the face. Do you call blood? Add some money in the later stage of decoration, as if it would kill you.

I've never seen you so stingy!

Then, Zhang Fan put down the microphone and began to applaud.

In the hall, all the doctors were stupid. Not only the directors of the bird market, but also the doctors of the golden Mao country were stupid.

Each industry has reached a certain level. In fact, everyone knows who it is.

For example, Professor Zhao Wenyong, doctors who don't engage in orthopedics don't know who this is. If they don't know, they think they are a martial arts coach.

But those engaged in orthopedics are all here. Lao Zhao is now a big winner of muscle and bone tumors in China.

If everyone's doubts can be shown, now all the doctors' heads are full of question marks. When did Lao Zhao change his job to tea vegetable? He is an honorary director. Zhang Fan is shameless, shameless!

Dean Stan, on the other side of the ocean, was angry.

For tumor, spine and trauma, Zhang Fan prepared three experts here, which was discussed with Lao Zhao. Take three on your side and leave two for golden hair. For example, sports and spine are left for golden hair.

It's not that Zhang Fan is not cruel, but that Zhang Fan is afraid of provoking the other party and he quit.

For example, sports orthopedics, including Europe, including China, and dozens of countries sitting in the front row all over the world can't do a golden special orthopedic hospital.

To what extent do people force themselves in sports medicine. In this way, the top athletes of several sports that can make a lot of money in the world, such as football, baseball, tennis, basketball and ice hockey, contact others immediately after injury.

Moreover, major insurance companies cooperate with special orthopedics.

At present, there are also great differences in the spine, especially in orthopedics. The long-term treatment results, people's special orthopedic hospital has a set, such as Forrest Gump in the film. After orthopedics, he can be an athlete. Even those who roll the ball with both hands are athletes. If they slow down, they can be killed by others.

Therefore, Zhang Fan left the two best players of special orthopedics to each other.

After that, Zhang Fan smiled at Dean Stan, meaning: you see, if you want to pit me, you will give me a wound. If I stand up for justice, I will give you my spine and sports. Just smile.

Although academician Stan was very angry about Zhang Fan's practice, he didn't lift the table. He really didn't expect that the Chinese people didn't want face, really didn't want face!

.....

"The director, the director and the leader of the bird market let us record the whole process and say that the bird market should be broadcast!"

"I see. What a big thing, making a fuss!"

Although the head of tea vegetable TV station made a fuss, he was still very proud. If the superior unit wants to use my things, it's still the capital TV station. People are big stations! If you see my work, you might want to transfer me to the bird market to be the director of that channel!

"Director, director!"

"What's the matter? Can you be a little older?" He was interrupted by his subordinates, which made the director of tea vegetable very dissatisfied.

"Yang Ma, Yang Ma, Yang Ma said she also wanted our whole process video. We had to broadcast it at night, and we had to broadcast it at night."

"I'll go, if you don't say it earlier. What to do, what to do, pay attention to all units, pay attention to all units, don't come forward to interview without authorization, don't come forward to interview without authorization, you must make the clearest and most complete recording in the whole process. Whoever

is not obedient, you won't have to come to work tomorrow. "

The director is crazy. His hands shake like Parkinson's!

.....

"Master Zhang!"

"This young man, the way is deep!"

A group of orthopedic directors in the bird market have been convinced, but they can't refuse. This guy, Shuitanzi, has been pulled to be the tea vegetable director. Can you refuse.

There are three catechins, tumor, spine and joint, two golden hairs and joint. Although they are not very satisfied, they can make everyone hold back.

This is the art of leadership. Lao Mao said that loving each other is all about the east wind overriding the west wind.

If the Institute of orthopedics can make achievements, this cooperation can continue. If it can't make achievements in three or two years, there will be some lawsuits at that time.

Of course, at the beginning of cooperation, we can't see such signs. Not only can't we see that both sides should make the first shot for the bone Institute.

First of all, Zhang Fan made a lot of publicity in the state of Stan. Generally speaking, Stan is still poor, and orthopedics can be treated locally if it is not serious, and it is easy for the rich to be injured if it is serious.

So the effect is very general.

This depends on Jinmao's special orthopedic publicity.

Jinmao special hospital also has a certain inclination to the bone Research Institute of tea element.

For example, some athletes, not top class athletes, who need to queue up in the special orthopedic hospital, will directly arrange for surgery in the tea element special orthopedic hospital.

Although these athletes are not very satisfied, they can only accept this arrangement.

The opening of the door of the Institute of osteology, the first operation, began in this case.

Sports hospital, although a branch of orthopedics, is different from traditional orthopedics.

In traditional orthopedics, small injuries are often pursued, and the therapeutic effect has been achieved when functional reduction is achieved.

What does it mean that as long as the injured bone can function as normal, even if the treatment is completed, it will not pursue perfect fit, nor will it pursue where to come from.

Sports medicine is different. It pursues higher, and often the injuries are not very common in daily life. Moreover, the super large training intensity of competitive sports exceeds our physiological range, which will inevitably lead to a kind of sports injury due to serious wear and tear of some joints, organs and parts of the body.

For example, the fifth metatarsal fatigue fracture of the right foot, which will not occur when the normal person's foot is broken, but athletes or soldiers often have this kind of fracture.

Also, for example, swimming shoulder, this thing often discards an excellent swimmer, and this treatment is very troublesome. Often after one treatment, the athlete's performance will decline significantly.

Therefore, there are some cruel athletes or coaches who give the athlete a closed needle to make him feel no pain, and then continue the competition. The end result is that after the athlete finishes his career, he can become a semi disabled and can directly declare for the Paralympic Games.

This is no exaggeration.

Among the patients assigned by the Department of special orthopedics to the tea vegetable bone Institute this time, there are several players playing baseball and football.

It's all meniscus damage.

Baseball, which is popular in Jinmao and Marubeni countries, is not very popular among Chinese. Although it is not a sport that won't let people fight directly, it is also a sport with a great amount of exercise. Especially for some athletes, meniscus injury is very common.

Meniscus, this thing is very delicate. Let alone athletes, even ordinary people often have injuries in this place.

What the hell is this.

It is quite difficult for ordinary doctors not to take a mold to explain to patients.

But to explain it in popular words, just have an old Zang who writes novels.

The meniscus looks like a horseshoe, and the closer it is to the edge, the thicker it is, just like the lips of sexy women in Europe and America. The more it faces outward, the thicker it is.

Usually we eat the meat of bovine calves, which is particularly fat. In fact, it is this meniscus that goes down one mouthful of oil.

This thing doesn't have much blood supply. Life depends on the saliva secreted by the knee joint.

Although I didn't eat well, I worked a lot.

First of all, it can stabilize the knee joint. The largest joint of the human body is the knee joint, which is a connecting link between the preceding and the following. It can not only bear weight, but also adjust the imbalance of both legs.

When people grow up, the length of their legs may not be the same. At this time, the meniscus has a great adjustment function. It's hard for you to let the bone adjust, but the meniscus can be adjusted like a sponge.

Just like some people, when they were young, their legs were good, and they didn't walk lamely.

But once, after damaging the meniscus, it suddenly became a tie Guai Li, walking one by one, which was caused by the loss of meniscus regulation.

Some girls lift their feet and put one foot on the man's shoulder. In fact, at this time, the meniscus of the other leg is under serious stress. After they were happy, the man suddenly found that the girl walked with her legs tilted.

I'm very happy and think I'm fierce. In fact, it's amorous. Maybe people have seen something bigger than you, but today's meniscus is deformed due to pressure and ischemia.

John King, a black base runner, is also a little famous in the golden Maoist Baseball League. If there is no accident, he may become a big star after technical training.

Unfortunately, there's something wrong with this guy's meniscus.
