

Chapter 1301

Dogs protect their mouths and people protect their legs. People's old legs fade first, and chickens have more soft urine first.

In fact, Chinese ancestors had already summed up their experience when Westerners were still thinking about how to bleed. After all, there were many illiterates in the past. Unlike today's college graduates, it's better to be a small worker who moves bricks on the construction site.

At that time, in order to make Lang Lang catchy and acceptable to the people, he made some experience into doggerel. But it's the wrong way to slip. The effect of this thing is different from that of the next little bit. The next little bit may be the urinary tract infection caused by E. coli.

This leg, as the ancestors said, is not a lower limb, not a slippery big white leg, nor the lower leg, but a knee joint.

When the academic leader of the Institute of orthopedics became a fait accompli, Jinmao's family simply did not tangle, and directly began to make money.

After the Institute of orthopedics was put into use, before the Chinese side reacted, several neighboring countries of the Institute of orthopedics became a trend! Just as women like donkey bags made of plastic, rich people around Stan lined up to tea vegetable bone Institute.

Line up to the bone Institute for a physical examination! Tea element hospital was put in the past. In fact, it is the best choice for them when they have no choice.

Although it seems that China is richer than before, in fact, people in several neighboring countries still like European and American things.

Therefore, when the special orthopedic hospital cooperated with tea vegetable, obediently, Zhang Fan was surprised.

The pot bellied local tyrant, with sunglasses and cigars, is as fat as moving half a ton of meat, and then carries a blonde with convex front and concave back, but she is also a chopstick leg. Darling, don't say anyone else. Zhang Fan thinks she's making a movie?

These local tyrants who have not gone out for thousands of years have come to tea!

There are so many local tyrants that the small nurses of the Kazakh nationality can't make an appointment, and Lao Chen has to add a few more.

Xue Fei and Wang Guofu lie on the front desk of the bone Institute. They are not in a good mood. "I bet these people won't eat at night." Xue Fei looked dying.

Wang Guofu was also listless. He didn't want to talk to Xue Fei, but what the goods said aroused his curiosity again. After all, few people understand the tyrant's world, "why not eat? People have money and eat what they want!"

Xue feibai glanced at his elder martial brother, "your poor vision is not good!"

Wang Guofu quit. As soon as he was about to refute, he heard Xue Fei say, "look, how much do you think the local tyrant's waist circumference is? His lordosis is at least 50 cm. Don't say he can't see his brother. I doubt that he can't stand meat bubbles in his hands when he goes to the bathroom!

It's 11 a.m. and the contents of the stomach have almost entered the intestines.

Therefore, his belly waist circumference is not the largest now. If he eats dinner this evening, his waist circumference will be bigger. If he eats too much, how can he talk to the beauty with chopsticks legs around him?

With a belly, the girl is one meter away. Even if he is a donkey, he can't reach it! "

Wang Guofu was full of grievances. After hearing this, the two shameless men looked at each other and smiled!

"Yes, don't eat!"

In fact, Xue Fei and Wang Guofu are wronged for a reason.

These local tyrants are rich.

At the time of examination, those named by others need to use Jinmao to give tea element dual source CT and 7.0 NMR for physical examination.

Money is not a problem! Don't be suitable. It's the most expensive. He's anxious with you when you're cheap.

Of course, the tea vegetable bone Institute is a non-profit scientific research institution internally. Although it is also linked with scientific research institutions externally, the charging standard can not be guided by the price bureau.

All examination expenses, doctor's examination expenses and operation expenses are aligned with Jinmao special orthopedic hospital.

That's great.

For example, in China, meniscus tear surgery can't last tens of thousands in 11 years, and there is medical insurance.

But in the eyes of ordinary people, this thing is too expensive.

The cost of bed is \$300 a day, the cost of nursing care is \$600 a day before operation, and the cost of braking patients after operation is directly over 1000. For the cost of surgery, you can turn the sign according to the doctor's level.

To the dismay of Wang Guofu and Xue Fei, they can't get in.

Although Xue Fei was the deputy director of the emergency center, in fact, his practice certificate was still orthopedics, and because of Zhang Fan, the old boy held the orthopedic practice certificate and did not change it into an emergency practice certificate.

He waited for the establishment of the bone Institute to go in and serve the local tyrants!

As a result, when the doctors of the Institute of orthopedics came down to the standard, the brothers and sisters were like pierced plastic bags for chickens, lying on the front desk of the Institute of orthopedics.

Doctor's standard of tea bone Institute:

The highest level resident doctors are Zhang Fan and Dean Stan of Jin Mao. They need to make an appointment one week in advance. Some doctors from non bone Institute and tea vegetable hospital make an appointment two weeks in advance, such as Lao Zhao of shuitanzi, who is also a first-class doctor.

The second class needs to be at the level of associate professor of special orthopedics, and the equivalent in China is at the level of River scholar. In addition, we should make certain achievements in our fields. We can't speak by seniority, but by achievements.

The regular doctor is a group doctor in the special orthopedic hospital, while the equivalent Chinese country is a senior attending doctor in shuitanzi, with a minimum requirement of doctor.

This makes the orthopedic doctors in the tea vegetable hospital a little embarrassed, because for this standard, the orthopedic doctors in the tea vegetable hospital do not meet the standard!

After all, the local tyrants are rich, and they are not fools. Moreover, for fear that the bone Institute will smash their own brand, the golden Maoist country would rather make concessions on academic leaders than compromise on this standard.

In fact, Zhang Fan also understands.

Routine treatment, including the top hospitals in China, such as shuitanzi orthopedics, in fact, 99% of the daily work of most doctors is doing some routine treatment.

Generally speaking, ordinary students do some ordinary problems that will not surpass the teaching books every day. If the problems are a little more difficult, they still need to learn to do it.

But it's different when you go to the Institute of orthopedics. This place is not a place to solve common problems every day. This place is a place to find problems and solve problems. It's also a place to find some difficult problems, which is beyond the outline.

This place is osaban!

Therefore, the doctors of tea element orthopedics are not enough to see at present. This makes several young and excellent orthopedic doctors uncomfortable.

For example, Wang Yanan, who never took the initiative to ask for leave at work, said today that she was going to take a vacation because of her head fever, and she had to take all her annual and wedding leave together.

Originally, she thought she could be a small subject leader.

When the results came out, the girl didn't even have the qualification to do chores, which made her very angry. Of course, Zhang Fan didn't agree, so he granted three days off.

As for Xu Xian, who plays with snakes, he is a graduate student. He usually doesn't have much pressure in the Department. After all, other doctors are undergraduates.

But today I saw that I didn't even have the qualification to enter the Institute of orthopedics. The young man was under pressure.

Xue Fei and Wang Guofu just came to vent their anger. As for other elderly orthopedic doctors, although they don't say it, they are actually very uncomfortable.

The high-profile scientific research institute was established. Everyone wanted to go in and make a contribution. As a result, people didn't want it! Dislike their level.

In Zhang Fan's office, the younger generation of orthopedic doctors were called by Zhang Fan.

"Xue Fei, do you want to go back to orthopedics?" Everyone looked very serious. They didn't see Zhang Fan laughing on weekdays.

Because Zhang Fan went out from the Department of orthopedics, other surgeons were a little cautious when they saw Zhang Fan, but in the Department of orthopedics, it was like this man was my master brother. Everyone was very relaxed, but today it was different. Everyone was cold and violent against Zhang Fan.

Zhang Fan has been the dean for two years. He has no problem dealing with them, so first Zhang Fan fired on Xue Fei.

"I didn't want to go back to orthopedics, but the bone Institute..." Xue Fei was eating a bowl and looking at the master in the pot. He wanted to be the director of the emergency center and didn't want to lose the benefits brought by the bone Institute.

"If you don't want to go back to orthopedics, you leave and change your registration to me as soon as possible. Or I'll find someone else to be the director of the emergency center! "

Xue Fei turned his mouth, very unconvinced, but he didn't speak. He knows that this is not the time to be stubborn.

"You feel bad. I know I feel worse than you. Such a large bone Institute is on our own territory. As a result, none of our own people can get in.

At the beginning, it was my fault that I shouldn't cooperate with special orthopedic hospitals. I didn't believe that they could put forward such harsh conditions! "

With that, Zhang Fan looked at several people.

Wang Yanan, who had a frosty face, was a little embarrassed at this time. Xu Xian, who played with the snake, moved his steps and hid his head behind Wang Yanan. Wang Guofu's face turned red. As for Xue Fei, Xue Fei has become Zhang Fan's man again. He looks down on these people and hates iron instead of steel!

"But if we do, we must do our best. When I was in orthopedics, the other two departments scrambled for patients with us. We didn't lose. Compared with us, we didn't lose. Can we only fight inside?

If we want to catch up with the world's top hospitals, we must work hard. You can't lie on a little achievement and be complacent.

Brothers, when the times abandoned you, they didn't even say hello. Did you see that when we were

still considering whether we needed steel plates or screws on the metatarsal, people's golden hair had started metatarsal endoscopy.

When we still feel that we have surgical CT, people have been rampant with dual source CT. Although we seem to be booming now, we are all castles in the air. If you can't rise in five years.

The fruits of our previous efforts will disappear. Not to mention comparing with world-class hospitals, even the bird market can get rid of us.

We want policy, no policy. If you want money, there is no money. There are only you. Are you worse than the group of doctors from shuitanzi? Worse than the doctor from Jinmao?

Not bad, you are so comfortable that you don't want to look up!

As long as you are willing, as long as you want to work hard, I will help you. Xu Xian, I heard that you are going to take an exam to study for a doctoral degree recently? "

"I... I..."

"Are you still the one who subdued the dragon?" Zhang Fan eased the atmosphere and was a little heavy. He was afraid that it would hurt everyone's confidence too much.

"Yes! I want to read a blog! " Xu Xian was embarrassed by what Zhang Fan said.

"Well, yes, I have contacted director Zhao of shuitanzi. While doing research, the bone institute applies for a doctor's authorization point, and all the doctoral directors are first-class doctoral directors in China. Come on, brother!"

Out of the office, Wang Yanan chased Xu Xian and asked East and West. The girl was really stimulated.

Wang Guofu listened carefully with his ears. As for Xue Fei, he was thinking that it would be better to study for a doctor or take over after director Xiao of Anwen and other emergency centers Retired!

Theophylline orthopedic doctors are in a dilemma. If you want to catch up with Zhang Fan, you have to keep trying.

When you enter the workplace, it doesn't mean you work hard, because it's difficult to deal with any one of family, life and work.

Chapter 1302

Compared with the operation volume of tea element hospital, the operation of bone Institute is very few.

In terms of orthopaedic surgery technology, Zhang Fan and Dean Stan are actually similar. The difference between them is actually diagnosis and scientific research ability.

But when it comes to playing with money, Zhang Fan is really not president Stan's opponent. This is really the truth.

The doctors of the Institute of orthopedics are divided into three, six and nine grades, because they come to make money. If Zhang Fan didn't want to borrow chickens to lay eggs, he really didn't want to cooperate with these goods. Because of this classification, the pressure on doctors is particularly great. Fortunately, the bone institute does not focus on treatment.

Doctors are graded, and patients are graded. The first level is the continuous annual scientific research donation to the Institute of orthopedics, starting with one million RMB and more than 100000 US dollars. And among these people, there should be grades.

At that time, Zhang Fan asked Stan in the video connection, "do you think someone will donate to a simple bone disease research institute every year?"

People disdain to explain, as if one more word means that they lose, "yes or no, this is a system. We don't have to talk here and see the results!"

I really don't understand the world of the rich.

According to Zhang Fan's own opinion, even if he has money, he won't donate like this. This kind of donation can't even make a name. He doesn't have any friendship. If you donate this year, it's one year. If you don't donate the next year, I'm sorry that the doctor has to make an appointment.

As a result, Zhang Fan was surprised.

In a week, neighboring Stan countries, oil desert countries and even local tyrants of Lao Maozi came to donate.

Ouyang looked at the donation amount of bone Institute, and the old lady couldn't slow down.

"If they don't have problems in orthopedics this year, we'll make the money lying down?" Ouyang's triangular eyes are round.

"It's not lying still. Part of the money is used for scientific research and part for the welfare of doctors. In particular, the expenses of some top doctors are not low. " Zhang Fan feels that Ouyang may not understand his explanation.

"For example, I will perform one of the three operations in the Institute of orthopedics tomorrow. This operation was commissioned by the special orthopedic hospital by the insurance company northwesternmutual. Now the special hospital cooperates with our hospital. They can't perform the operation at this time, so they let the patients come to the Institute of orthopedics.

The cost of this operation is more than \$1 million, but we have to sign a contract to ensure that the athletes' sports ability will not decline greatly after the operation. So we still take risks. "

"No wonder, no wonder they are so demanding of doctors! Hey, be careful, too. If you have something to discuss with us, don't let Jinmao deceive you! "

Ouyang feels more and more that he can't help Zhang Fan. In fact, Zhang Fan walked too fast. Not only the old lady felt that she couldn't keep up, but also the original doctors of tea vegetable hospital felt that they couldn't keep up.

Now in the hospital, only Zhao Yanfang can follow Zhang Fan's footsteps.

Zhang Fan, director of the Institute of orthopedics, and Dean Stan, deputy director, because Stan can't stay in tea for a long time. In fact, Zhang Fan wants Dean Stan to stay in tea for a long time, but people don't do it!

With the establishment of the Institute of orthopedics, GlaxoSmithKline of Mishima has also accelerated the construction of tea Su pharmaceutical factory.

At that time, I didn't know which leader had set up a high-tech park, and then eagerly felt that he could attract high-tech companies.

As a result, there are many companies that want to set up government subsidies, such as what far-infrared spectrum physiotherapy instrument, such as biological graphene to treat infertility! As a result, the infrared spectrum physiotherapy instrument is actually a physiotherapy lamp with a large bulb. Graphene treatment is purely a liar with high technology.

Then, in the large-scale three links construction Park, the grass grows higher than people. Some

herdsmen in the urban area inquire about whether such a good grassland is rented or not. They want to herd sheep! The tea vegetable leaders are almost crying.

Now, relying on the tea element hospital, the pharmaceutical factory has begun to build. Really, when the news reached the bird market, the leaders of the bird market sent congratulatory messages.

Because the athlete's operation must improve the examination, and wait for someone from the insurance company.

So on Monday, Zhang Fan went to work normally and made rounds.

"Research on the procedure of scoliosis treatment and its clinical application" Zhang Fan felt a little dizzy with the title of playing with the snake Xu Xian in his hand.

"Did I encourage too much and let the boy go crazy?" Zhang Fan looked at the application form and muttered in his heart.

"Is this problem a little big!" Zhang fan can't attack his confidence.

"The work in recent years is the same as that of Zhang Yuan. It's so comfortable! I want to put some pressure on myself. I also know it's a little big, but without pressure, there's no motivation. "

Zhang Fan looked at Xu Xian with a confident face. He wanted to tear up the application form and throw it on the face of playing with snakes.

"This topic is very good. If it can be won, I can't guarantee the national scientific and technological progress award, but the provincial (a) ministerial progress award will be won! If you can win this award, I think you're going to be a doctor. Just wait for the doctor to move! "

Zhang Fan is worried to death!

He began to wonder if it was a little big this time and pulled the egg. In fact, this is pressure!

Seeing that Zhang Fan was going to get angry, Xu Xian smiled, "if the title is bigger, can't you have more funds! I have another one for you to see. "

"Experimental Study on proteome related to the pathogenesis and progression of osteoarthritis"

After reading this, Zhang Fan is much more reliable. Relying on the current independent laboratory of the tea element hospital, this topic is still in the first place. Once there is some progress, let alone others, first of all, the medication will be more targeted in the future.

The current treatment of osteoarthritis is mostly hormone and immunosuppression, the effect is uneven, and the side effects of patients after medication are also quite large.

However, the more reliable this is, the more angry Zhang Fan is. Especially, these goods treat me as a scientific research blind, ready to cheat.

There are many doctors under pressure like Xu Xian. For example, Ma Yichen surrounds old man Lu every day and even Zhang Fan ignores him.

This rabbit is thinking about the timing of definitive repair of iatrogenic bile duct injury recently, because laparoscopy is becoming more and more popular, and county-level hospitals have become more and more popular.

But the new technology has also brought new problems. There are some iatrogenic injuries, such as bile duct injury, which has not been studied yet.

At the beginning, he asked Zhang Fan. Zhang Fan felt that this had no future. After all, it was to check the leak and fill the vacancy. But he was unwilling to go to old man Lu. As a result, old man Lu felt promising.

No, this time, the young man followed the master around every day.

I don't know. I thought the young man didn't want to be an apprentice and wanted to be a brother.

In fact, Zhang Fan is very pleased with this effort.

.....

The athlete's examination is perfect. This kind of operation entrusted by the insurance company is particularly troublesome. Many professional doctors in other people's company have made Zhang Fan's head big through preoperative discussion.

First, the preoperative operation plan needs to be discussed, and then a series of agreements should be signed. Really, the preoperative operation notice in China is my brother in front of others.

If it weren't for Zhang Fan's bad face, they would even stipulate the length of the knife edge. To tell you the truth, there is not much that can be done for such a difficult operation.

It is really difficult to complete the treatment and ensure the athletes' sports career. The simplest thing is that you rub a piece of white paper like a steamed bread. Can you recover? It's hard.

In the conference room of the Institute of orthopedics, white doctors invited by several insurance companies discussed before the operation.

"Mr. Zhang, according to the physiological characteristics of the knee joint, you should avoid discoid cartilage under the knee joint and enter the knee joint cavity. After entering the knee joint cavity, you

should test the athlete's meniscus under the endoscope camera..."

At the beginning, Zhang Fan also felt that he needed to listen to the opinions of experts who could work in such a large insurance company.

As a result, Zhang Fan was angry.

They not only made requirements, but also stipulated the practice of surgery, and even set the scope of repair.

This is to look down on people.

Zhang Fan impatiently interrupted them. "When Dean Stan operated, did you make this preoperative scope like this?"

The big nosed doctor was a little unhappy that Zhang Fan interrupted them " This is the most advanced surgical scheme at present, and Dean Stan will generally listen to our suggestions carefully before the operation. "

"Ha ha!" Zhang Fan laughed angrily at what this guy said " Where did you get your confidence? You are the most advanced. You can do this. Come on, this expert, you do this operation! "

Zhang Fan is not used to their problem.

"Well! We are sports medicine rehabilitation scholars. Surgery is not what we are good at, but... "

"What nonsense? You can't do it, I'll do it! According to the agreement, I will reach it! Prepare for the operation. Don't think you've become an expert after you've seen several Stan's operations.

You are not qualified enough. You are just a doctor for postoperative rehabilitation, not an surgeon! "

Zhang Fan is very stressed and unhappy when he looks at the doctors in his hospital these days. He meets a group of chattering and blind guidance guys. He is really comfortable and tempered. To tell the truth, if he swears like that in tea, it is estimated that the doctor can go to Shaohua's house to complain.

The mechanism of knee injury is very complex. A dancer and an athlete are almost all high-frequency complications. There is also a kind of people who like to squat for a long time.

For example, if you don't have a stool to eat, you have to squat on the corner with a bowl. This kind of person's meniscus is also extremely vulnerable, and their injury mechanism is different from that of athletes and dancers.

Moreover, ordinary people are also prone to knee joint diseases. Many people often don't pay attention to them. For example, the knee joint bounces and walks. Suddenly, the knee joint clicks like a wave.

Also, when you soften your legs, especially when you go up and down the steps, there is a sudden tendency to kneel down. Many people think this is kidney deficiency, and then what Liuwei Dihuang Pill concentrated pill, what nourishing yin and Yang tiger whip, once operated, hair grew on their fingers, but they still kneel when it's time to kneel.

There is also the joint noose. When I was walking, I suddenly found that my legs couldn't be straightened!

In fact, these are the precursors of tissue disorders in the knee joint. When this happens, especially those who are overweight, we must go to the hospital for early detection and treatment.

Because many tissues in the knee joint are not particularly rich in blood supply, once there is delay, some tissues will have irreversible damage.

Chapter 1303

Zhang Fan's Insurance Company at the bone Institute called him a God, but they can only shout a God, because they can't find a doctor who is more sophisticated in orthopedics than Zhang Fan in surgery.

When Zhang Fan was so strong, several orthopedic experts of the insurance company quietly stopped.

Really, it's too hard to be hated. What do you say? If others say that you can come, they will feel that their faces are burning badly.

Why, aren't you bullying people? If I can do it, why do I come to you? Aren't you bullying people!

Several medical experts in Jinmao have a look of resentment.

In fact, there are many good aspects and many bad aspects in this society and even the world. Especially in the interest field, it is often naked. For example, if Zhang Fan doesn't stand up today, they will say that Zhang Fan has completed a certain operation under their preoperative guidance.

This is to step on partners to improve your reputation.

As a result, it failed. Zhang Fan is not a Chinese several decades ago. He is not a Chinese general standing on tiptoe to see your broken plane.

To tell the truth, at present, although Zhang Fan has become a little famous in surgery, he is most confident only when he performs orthopedic surgery.

Because he is registered as an orthopaedic practitioner. How to say this? Driving with a license and driving without a license are two different things. Although medicine has reached a certain level, this rule is not suitable. For example, pregnant women have to give birth on the train.

As a result, it was a little difficult to give birth. There was a general practitioner on the train and went to help. As a result, the position was not good and the child's clavicle was broken.

In the early years, this was a blank space in the laws and regulations. If there was no accident, it was a good person. If there was an accident, you couldn't explain it.

For top doctors, such as practicing in different places and treating in different places, laws and regulations are not allowed. If it is really necessary, it needs to be reported to the local health bureau.

But the doctor who flew the knife only reported it afterwards. The bird didn't bird your health bureau in advance. And the Health Bureau doesn't know about blind marriage and dumb marriage. Lie flat and wait for others! Then he called for decades of off-site practice, which is only a pilot.

"Be calm. When I was your age, I gave people a hook. Now that you are a dog, you have reached this achievement. What else do you want?"

The Dean, academician and teacher of the provincial (a) ministerial level third-class hospital is also the open-door school in this country. The operation has become popular and popular. Now others dislike the doctors in your hospital for times, so they don't like it?

What people say is the truth. I'll tell you, you can't be fat in one bite, and other doctors are not freaks like you! "

Shuitanzi's Lao Zhao said two words to Zhang Fan before the operation.

I don't know since when, we have no sincere mutual criticism. For example, the Ming Lord's life conference, criticism and self-criticism are better than Tao's crosstalk. They speak well and move people.

For example, if a subordinate criticizes the superior, you should pay attention to rest. You come early in the morning and go back late in the evening. The stars are all over the sky. The desk lamp in your office

is still on. You are irresponsible for your career. You are irresponsible for our unit with thousands of people. I strongly suggest that you assign a professional female doctor to the leader!

Then led the daughter of an undergrad who graduated from medical school without a diploma into the unit!

Therefore, sometimes it is the people who seriously hope you can criticize you now.

Now that Zhang Fan is in this position, he is no longer the little doctor who asked all over the world about who has a bad waist in Quark county.

Not to mention the tea vegetable hospital, there are few people in the tea vegetable area who can say Zhang Fan with a red face. Of course, Ouyang doesn't count. Ouyang can even raise cactus to death. This is not ordinary people. Ordinary people can't do this!

"I'm really worried. You said that now the Institute of orthopedics has been established. Unexpectedly, Jinmao has set such a condition for me. You go to see several orthopedics departments in the hospital. It's a great blow, and I'm afraid they will slowly catch up with the pace of the tea vegetable hospital in the future!"

"Women's benevolence, who do you think you are? guanyin bodhisattva? Or the Jade Emperor? Originally, this scientific research is an industry where the more people go up, the fewer people. You think you can drag them far without your own efforts.

You just let them into this research institute. What can they do? Will you draw the hook or steel plate? "

In fact, Zhang Fan knows, really knows, but he just can't bear it. After graduation, he is often separated and redundant to get together.

Many, many people who had a good relationship slowly lost contact and became strange.

Are they wrong?

However, the world will not wait for you. Really, Jinmao will not wait for you, and Europe will not wait for you.

Zhang Fan clenched his teeth, "thanks, Lao Zhao, you see I'm so uncomfortable. Why don't you help me for a while? Really, the bone Institute doesn't have a main scientific research force in charge. I'm really afraid they'll sell me one day. I'll still count the money!"

"You don't want to set me up!" Lao Zhao looked at Zhang Fan and scolded his mother in his heart, "I think you are a friend. Do you care about my body!"

"I have a lot of things to do in shuitanzi. I have to work overtime when I come back this time." To tell the

truth, unless such people retire, they leave a unit. If there is no legitimate reason, the industry can shake.

However, Lao Zhao can also feel the anxiety in Zhang Fan's heart. With such a large stall and such advanced equipment, it's really golden hair. Why don't you set some difficulty for you? Do you think others are the great God of Xu Xian's play and give you a baby?

"In this way, we will form a joint mechanism in the future to let your doctors go to shuitanzi for further study, be short and fast, study with problems and goals, once every three months and once every three months. Then, our doctors are also assigned a part. If there is no scientific research project, it will come once every three months.

Moreover, many of your equipment are better than our hospital. In the future, more and more doctors will come to do scientific research. Scientific research can be done, but they must help bring people. "

"Lao Zhao, thank you. You are my uncle. Really, if not, I don't know what to do in the future."

Zhang Fan is excited. The uncle of northwest people doesn't swear, really!

But people in the capital felt that the uncle was abusive, "don't swear! Let's have an operation! "

Lao Zhao smiled and scolded Zhang Fan.

In fact, when dealing with people, there are still like-minded partners.

"I remember you want to take Wang Yanan as your apprentice. In this way, you can take it away when you leave the day after tomorrow!"

"Well, if you don't tell me, I'll take it away. Look at the good seedlings. A female orthopedic doctor can do more delicate surgery. As a result, you take it to let others put on the steel plate and screw down. They have turned a female elite into a female bandit. "

It doesn't matter if Zhang Fan crooks his mouth. He never pays attention to verbal criticism. Let alone a female bandit, that is, a female bandit Zhang Fan is like he didn't hear it. As long as you can get cheap, what you like to say is what, just like how reasonable your money is.

Operating room

Operator: Zhang Fan, the first assistant is shuitanzi Lao Zhao, and the second assistant is the director of shuitanzi sports orthopedics.

Lao Zhao was called by Zhang Fan to help boxing, because Lao Zhao and Zhang Fan had more contacts. The directors of the other two departments were called by Lao Zhao to see how advanced the bone Institute of tea vegetable hospital is.

This thing doesn't matter if you don't look at it, but after reading it, you feel like a cat scratching. Really, it's like you're about to take off a beautiful woman in your dream. You're about to have the last cloth strip, and the alarm clock rings.

Several directors are reluctant to leave. Some of their experts have gone, but they don't want to go yet.

"When I was at Stanford, I always thought that Stanford's orthopedics was very advanced. I didn't expect that the equipment given to me by special orthopedics was more advanced!" Touching the MRI of 7.0, the director of sports orthopedics was almost drooling.

His department relied more on examination, so his eyes turned red when he saw the instrument.

How to describe this thing? In fact, it's like you caught up with the school flower when you were at school. Beautiful. When you hugged and kissed, there was a beautiful woman who was the first in the world. Alas, really, there was a sense of non fragrance in an instant.

The operation began

Knee joint, ankle joint, hip joint, any joint tissue, if the patient is an athlete and has particularly high requirements for postoperative recovery, then it is generally easy not to open surgery.

In fact, all joints of the human body are similar to wool.

The innermost part is the bone, which is wrapped with a layer of cartilage, then layers of ligaments, and layers of muscles around the joints.

Although these tissues seem to be winding up casually, once the scar is scarred after open surgery, normal life will not be affected. Normal people can do everything they can, but they can't do anything they want to put their legs on others' shoulders.

Therefore, this operation must be endoscopic.

Zhang Fan holds endoscopic tissue forceps. Lao Zhao holds his legs, while the director of sports medicine holds the mirror.

Routine surgery, as we all know, takes off the person, puts him on the bed, covers several layers of step lists, and then starts to take him to cut. It's still undercooked like eating steak.

Endoscopic surgery is different. It's more convenient to drill holes first, such as the habitual surgical eye. After you squat, your knee is tight, and then there are two places on both sides of the lower edge of your patella that seem to have no bones.

This place is the place for drilling, and this place is also the place for intra-articular injection of drugs.

For example, sodium hyaluronate, hormones and so on are played in this place.

Zhang Fan holds a knife. Lao Zhao holds his leg and twists the athlete's leg. Lao Zhao holds the athlete's black leg. Fortunately, the leg hair has been prepared. Otherwise, I don't know. I think Lao Zhao Lou has a black pig leg without leg hair.

It's too thick. The quadriceps of the thigh is directly like a meat column. Really, it's too solid! Lao Zhao, who holds his big legs, looks like holding an ass from a distance!

Chapter 1304

At the beginning of the operation, Zhang Fan opened two small openings at the lower edge of the knee patella with a knife. Then arthroscopy was inserted.

How big is the gap? In fact, you pinch your two hands into fists, and then add a sponge paper thinner than that for girls, but thicker than that for men and women, which is about the thickness of two to three one yuan coins stacked together.

Of course, the thickness is not constant, and not everyone is the same. For people with heavier upper body, this space is smaller, such as those with large chest.

so what

In fact, the meniscus of the human body is like a snake in the knee joint. Starting from the upper fist, form an eight character in this small space, and then climb on the lower fist to attach, while the other thread head returns to the upper fist to attach.

It's like a hanging swing.

This is the simplest meniscus.

It can be said that the meniscus and ligament are the intestines of the knee cavity. Such a narrow space usually needs to be inserted smoothly. An orthopedic doctor has to practice for a long time. This thing is different from the relationship between men and women. When men grow up, the hardest step is the first step.

But anyone who can walk steadily in the first step does not need a teacher behind. He is born with a tire!

But arthroscopy is different. After this thing goes in, it is narrow. All kinds of ligaments, joint capsules

and mucous membranes are intricate inside. Then, in order to let the doctor see clearly, the arthroscopy will enlarge the irradiated part.

It takes a long time for doctors to get used to the visual distance error caused by this amplification. Obviously, I felt very far away. As a result, my wrist shook slightly and poked a hole in the joint capsule.

There is a saying in the medical industry that if you can operate with endoscopy, you can complete the operation with open surgery. You can use open surgical means, but you may not be able to use endoscopy.

Moreover, the meniscus sounds like a temporary worker, and its name is not atmospheric. It is definitely not comparable to the full moon machete. Therefore, in the early years, once the meniscus developed, it was often cut like an appendix without saying a word.

When it was just cut off, the effect was quite good. Some situations such as climbing stairs, kneeling, walking, knee joint extension and so on disappeared directly.

However, the later effect is not good. Because the knee joint has no stability, although the meniscus is small, it doesn't weigh much.

Without this weight drop, more than ten years later, a tall, handsome and long legged oba suddenly became a circled leg. The devil of Lao pan came, and the little devil looked like more than ten years after the meniscus was removed.

Moreover, in order to show the operation field, the doctors sometimes don't know that they pull with a retractor and rub back and forth. They can't feel it at the time of the operation. As a result, synovitis occurred not long after the operation.

Chronic synovitis can be quite troublesome. There can be no symptomatic drugs at any time. Because there is little blood supply in this place, there are not many people who can take a ton of drugs here. Therefore, some people often have no problems after various examinations.

But it seems that there is a mouth water dragon in the joint capsule. In a few days, the joint cavity is swollen like a big steamed stuffed bun, and there is no around the joint.

Once the disease is not well treated, it can only be operated twice and there is no other way.

Therefore, once you find a problem with the meniscus, go to a doctor in time and don't remove it easily. If you go to more hospitals and find more doctors, you will always have different views.

Enter, enter, enter again. Zhang Fan is skillful in holding a cavity mirror. Shuitanzi's director of sports orthopedics has to catch up with Zhang Fan while holding the mirror.

Looking at Zhang Fan's technique, the director actually scolded his mother, "why don't you play laparoscopy and come to play arthroscopy?"

They came this time to save Lao Zhao's face, and they actually came for the instrument. As for Zhang Fan's small joint surgery or minimally invasive surgery, he didn't rest assured at all.

He can also be a general foreigner, an academician and a student, and can also do orthopedic surgery. It is said that Zhang Fan taught Lao Zhao a lesson in tea vegetable, a soldier's operation. Now it's pulling a special orthopedic hospital to cooperate.

Therefore, he felt that Zhang Fan must be too greedy to chew. In order to pretend to be forced in front of foreigners, he had to take Lao Zhao and him to surgery. He thought about it and agreed, but he didn't tell. When Zhang Fan couldn't do it, he would take over.

As a result, after the operation, Zhang Fan didn't mean that at all. After entering the joint cavity, the operation under the hand directly makes the sports orthopedic doctors feel sour "You are a good disciple of the ancestral generation of ordinary people. Instead of playing with liver, gallbladder, heart and lung, you come to compete with us for orthopedic surgery! "

Above the operating room of the Institute of orthopedics, there are doctors of special orthopedics and directors of orthopedics in bird city.

In the dome type operating room, open surgery is the best observation, but this endoscope is not so beautiful.

A group of people, from the beginning of whispering to the later stage, no one spoke, all quietly watched Zhang Fan's operation.

This kind of surgery, especially this kind of high demand surgery, some doctors do not say to do it. It is estimated that they will not see it once in their life. After all, it is rare for patients to have so much money and need so high requirements.

Therefore, everyone looked very seriously. The repair of meniscus is not worth a penny. The purpose of this minimally invasive surgery is to suture or repair the cracked or damaged meniscus.

And just like a child eating ice cream with a wooden stick, it will be scraped into a ball and a rectangle.

But it's this kind of scratch. It's not easy to control your strength and play a flower in a limited space.

"My God, who can see how he is ligated? How can I see that the crack of the meniscus is gone as soon as my eyes bloom?"

"No, I didn't see it either. The light in this direction is too fast."

"We can only play back the surgical video. God, I think he did better than Dean Stan. "

These are some golden doctors talking together.

.....

"It was lonely, the last time, the last key, but I didn't see it!" The director of joint surgery of Annex II of bird market has a lot of MMP in his heart.

It's like waiting for a beautiful woman from morning to afternoon. People are all wasted. As a result, when the beautiful woman comes, she shyly takes out a cushion!

"Zhang Yuan, your suture method feels like pulling and inserting in the back. How can you predict that your needle can be fully penetrated?"

Chapter 1305

In fact, there are meniscus and synovitis. For normal people, the treatment method is braking, then systematic functional training, and then rehabilitation training.

This treatment seems to be the best, but many people can't or can't accept this training. Because the operation is fast, most people with this disease are often the main labor force at home. Maybe you can let him lie down for a month.

You let him out of work for rehabilitation training for half a year or more. He can't lie down. If he lies down for so long, the whole family will starve to death. This sounds very crude and disharmonious. However, who knows the bitterness in this.

Therefore, Zhang Fan's method is a new way. The frontal entry is very destructive. The place where the meniscus is thick is not a few centimeters thick, and the thin place is the same as any membrane. This thing, frankly, can't stand tossing.

We are all people with clear eyes. We can see from the results of the operation. The surgical injury is too

small. It's as if there was no operation.

Arthroscopy is different from laparoscopy.

In order to create operation space, laparoscopy will create a pneumoperitoneum in the stomach. In fact, it is filled with nitrogen dioxide or carbon dioxide to make the stomach bulge. At this time, the operation will have operation space.

Arthroscopy is not good. Compared with the abdominal cavity, even if it is cartilage, it is also bone. It's like you can boast, because people are not bones, but pure meat, which can make you blow. If there are bone stubbles, try blowing them!

Therefore, in order to create operation space, a large amount of normal saline will be filled in the articular cavity. In this operating space, once there is damage, such as debris of meniscus, debris of synovial sac will immediately appear in normal saline.

Simply put, in fact, this kind of operation, including when the operator Zhang Fan looks, is like looking at the mermaid in the super transparent FRP. And the lens is magnified more than ten times in HD.

Therefore, if there is any little damage, the debris of meniscus is absolutely like male animals discharging male products in a water pool, which is particularly obvious and not exaggerated at all. The debris of the meniscus enlarges the aggregation of protein, that is, there is a little more calcium in it.

No debris, no damage, but the torn meniscus has been stitched.

There's no way to calm down.

Among these observers, the only one who understands Zhang Fan's operation method is actually the director of shuitanzi's sports orthopedics department. He understands it, but he doesn't understand why Zhang fan can measure the thickness of meniscus. Does he have perspective eyes?

If this thing is stabbed short with one needle, it will aggravate the damage to the meniscus. There is already a crack. If you insert it in the middle, it will be broken directly. It can be poked for more than a few millimeters. In the past, it was the synovial sac, which is the smoothest place in the human body.

This thing is actually the smooth surface between the bearing and the bearing in the car. Once there is a little damage, under pressure and strong friction, it will lead to inflammation and damage.

This place doesn't need pleasure, so there can't be a trace of wrinkles and things that increase the degree of friction. It's too late to reduce friction.

So the director of sports orthopedics is curious.

"To be honest, I don't have a special method for this measurement. After all, it's the rear, and I still can't open the rear. I just have a feeling. I don't know whether you believe it or not. I think it should be so thick."

Zhang Fan said it sincerely.

He is deeply afraid of Shuitan's sports orthopedic director. He doesn't believe it!

In fact, he underestimated the heroes in the world.

"Ah! I know. I have this feeling of indescribable and unknown on my shoulder. It's a pity, a pity! "

"What a pity?" It's Zhang Fan's turn to be curious.

"Last year, why didn't I think of you? Hey, if only you were here for Dayao's operation at that time, it wouldn't cause him to retire now!"

"Oh? Is Dayao retiring? "

"Yes!"

.....

Zhang Fan's chat with the director of sports orthopedics was clearly heard by the observers. We really can't describe the bitterness in our hearts.

When you think you and someone are on the same level, you suddenly find that people and your mentor are discussing whether one plus one will become two. When you talk, there is really no way to explain which one is oppressed in your heart.

After all, you are a tea vegetable hospital. If you are forced by the cow, can you cross the pool?

Unfortunately, although the tea vegetable hospital is a cow, the dean of the hospital is powerful!

MMp !

It's like the hospital doesn't work hard, but the Dean works hard!

In fact, in sports orthopedics, we should not belittle ourselves. China is no worse than any other country in shoulder joint.

Some people have said that the reason why the women's volleyball team is so powerful is that Shuitanzi's shoulder joint is so powerful. Chinese table tennis is so powerful, that is, Shuitanzi's shoulder joint is so powerful. Of course, if someone asks, why can't the men's volleyball team? It is estimated that Shuitanzi will curse and retreat from the group.

"Director Zhao, I think we should carry out long-term strategic cooperation with tea vegetable hospital to let our people come and let their people go."

"Heroes think alike. I think so, too." Lao Zhao smiled.

Zhang Fan scolds his mother in his heart. Isn't that what I think? Why don't you take me with you?

The surgery of the Institute of orthopedics has improved the level of surgery that can be done by the orthopedics department of the tea vegetable hospital by several grades.

And Jinmao's insurance company also recognized the level of solitary smoke lock.

It's really impossible to say that in this kind of enterprise, if you are a little weak, the experts of these insurance companies can sit on your nose and shit. Really, it's no exaggeration. How arrogant it is.

But once you become powerful and powerful, these people will be as polite as they want to be.

And make you think they are ancient civilizations.

.....

After the operation, Zhang Fan felt that the system had changed a little as soon as he entered his office.

To tell you the truth, the semi-automatic system seems to hang up after the first change. If he hadn't been able to train in it, Zhang Fan really thought that this thing was acclimatized and would have risen to heaven early.

This time, Zhang Fan was very curious. He quickly closed the door, sat in the boss's chair and entered the system.

Look at the results.

"Niang, you can finally upgrade."

Zhang Fan is really excited.

Because the amount of surgery required by the system is too large, Zhang Fan slowly changed from eight times a day to three times a day, then three days, then several days, and finally became a tool. He doesn't expect him to upgrade.

Maybe this thing is developed at this level. It can't be upgraded.

As a result, today is finally going to be upgraded.

Zhang Fan doesn't have to think about it. Go on with surgery.

As a result, when Zhang Fan wanted to upgrade the surgical Click to level 3, someone else gave a condition.

Must complete the upgrading of internal medicine level I and level II.

Zhang Fan's eggs are broken.

When you take off your pants, you suddenly become another man. Really, Zhang Fan is in this mood now.

How terrible is human inertia and greed?

Zhang Fan is not in the mood to do any internal medicine now. He just wants to do surgery.

Because of surgery, he has become famous. He wants to continue upgrading surgery.

When Zhang Fan was struggling with loss.

There is a sound in the system:

Health depends on life.

When I enter the sacred medical school, I solemnly swear:

I volunteer to devote myself to medicine, love the motherland, be loyal to the people, abide by medical ethics, respect teachers and discipline, study hard, work tirelessly, strive for perfection and develop in an all-round way.

I am determined to do my best to eliminate human suffering, help the perfection of health, maintain the sanctity and honor of medical technology, save the dead and heal the wounded, spare no pains, pursue persistently, and strive for the development of China's medical and health undertakings and human physical and mental health all my life.

The sound sounded like a Hong LV bell in Zhang Fan's heart. The shocked Zhang Fan suddenly realized.

In fact, people need to reflect on why some people can succeed. There are many reasons for success. Why some people fail is absolutely no reflection.

Therefore, this thing can also allow users to automatically reflect!

Click the first level of internal medicine. The first level of internal medicine system is more than surgery.

Of course, the medical system is more humanized than the surgical system.

Looking at the items, Zhang Fan regrets that he didn't choose internal medicine at the beginning.

Surgery requires the amount of surgery.

But internal medicine doesn't need it. He doesn't need how many internal medicine diseases you have seen, nor how many internal medicine diseases you have treated in reality.

It is to learn one subject, and then automatically produce a set of corresponding medical records for you to analyze and treat. If you pass the test, it means that the study of this subject is completed and qualified, and you can continue to the next subject.

"It's too humanized. It's estimated that the scientists who invented this system are from two teams. Surgery and internal medicine were not invented by the same team! "

Zhang Fan was a little relieved when he saw this provision.

He felt that he should have no problem in the first level of internal medicine.

So, very casual, really, very casual, opened the Department of Gastroenterology.

After all, the biggest surgery in a hospital is often general surgery, which is the basis of all internal medicine, and digestible internal medicine is the basis of general surgery.

In addition, the gastroenterology department of tea element is rotten, so Zhang Fan seems to be casual. In fact, what flows in his blood now is how to develop tea element hospital. This sense of achievement is as addictive as right female sex drug (a).

As a result, Zhang Fan couldn't laugh after opening the Department of Gastroenterology.

In a popular word, you still don't recognize the cruelty of this society!

The medical records in the Department of Gastroenterology are very complex. It seems that thousands of people have been selected to be difficult for Zhang Fan.

For bleeding patients, hemoglobin cannot be confirmed, yellow pupils, shortness of breath, heart rate 120, breathing 22, abdominal swelling, mobile voiced (+), please give the patient symptomatic treatment within three minutes, and then there is a bracket (patient unconditional operation!)

Where the hell are you bleeding? Is it a massive uterine bleeding, a massive gastric bleeding, or a massive esophageal bleeding. To be clear, are you in shock or not? Give me a blood pressure. Are you so poor that you don't even have a sphygmomanometer?

Zhang Fan swears out of the system.

Chapter 1306

Zhang Fan, who came home, was not happy or unhappy anyway. It was a feeling that he found that he had won five million, but he couldn't get it out when he went to the lottery station. People told Zhang fan that you still have to work hard in 996 for decades to make this money.

"Where are the old man and the teacher's wife?" After entering the house, Zhang Fan found that only Shaohua was at home, and neither the old man nor the old lady.

"Is the operation finished?" Shaohua also knows that Zhang Fan is in a slightly bad mood these days. Although Shaohua usually doesn't ask anything, in fact, there is something in the hospital. Even if Shaohua doesn't ask, some people tell Shaohua without missing a little information.

And this time, because it was an orthopedic thing, others didn't say. Wang Yanan came to complain first.

Of course, this is a disadvantage of the Chinese workplace. Many people feel extremely incorruptible. As a result, they come home to find that their wife is the supreme emperor and eats with gold bowls and white chopsticks with elephant teeth. There are many such things, not only because of the mistakes of leaders, but also because of the other ways of his subordinates, such as colluding with his wife!

Shao Hua is certainly not such a supreme emperor.

"Finished, what dinner will you have in the evening?" Zhang Fan also knows Shaohua.

It seems that they don't chat on the same channel. In fact, this is the most tacit understanding and patient. Unlike many families, what is inside and outside is a kind of anxiety. In fact, this is a manifestation of self-confidence and distrust.

"The old man and the old lady went to tuobie county recently. They said that the surgical director of a county took the old man and the old lady to see the back garden of China!"

"Oh." Zhang Fan sniffed his nose, "eat shrimp and fish?"

"Well! Go and wash your hands. "

This is the feeling of home. In a few words, Zhang Fan's irritability becomes peaceful.

"Wang Yanan is going to the capital. Let's send her off tomorrow. The girl doesn't have a boyfriend. Her parents are also anxious. They are so busy that they don't even have a friend."

"It's her own reason. Don't blame the unit. Is the tea vegetable hospital full of singles? How did I get married? "

"Say you're round, you have to roll, isn't that funny?" Shaohua listened to the voice from the bathroom and said angrily.

"Originally, she was as domineering as a wolf dog. No one was afraid of robbing patients in the Department. The director had to call her beauty Wang. Outside the Department, there was an expert attitude of no strangers.

Do you think ordinary young men dare to go up with her attitude? How strong a young man has to chase her, and clean up like a young man day by day. "

Zhang Fan knows that after the exchange of doctors between shuitanzi and the orthopedics department of tea vegetable hospital, Wang Yanan is absolutely proud to spread news all over the world. Don't even think about it. She must be proud now. It seems that the world can't do without her. She is definitely in a state of mind to save the earth.

"Don't talk nonsense. There is no such person who arranges his subordinates. All right, eat. You seem very tired today! "

"Hi. Today, someone complained about our obstetrics and gynecology. I don't know what to say. "

Zhang Fan deliberately didn't say what he was really upset about, but found a more relaxed topic.

"What's the matter?"

"I don't know what to say about the disaster caused by LV Shuyan."

"Oh?" Shao Hua took his chopsticks and touched the fish soup. It seemed that he tasted the fish soup. In fact, it was like a big wolf dog threatening people with his teeth.

Shao Hua deliberately did this. In fact, he also told Zhang fan that I trust you!

"A couple has been married for more than four years and haven't had a husband and wife life yet!" Zhang Fan steadily clamped a chopstick of fish meat, or the fish meat under the fish neck, and then stuffed it into his mouth. People are not afraid of the crooked shadow.

"And then?" Shao Hua is curious. Don't say women are not lecherous, men and women are the same. Really, men and a group of men will talk about a woman with less clothes together, and so will women. Of course, if people don't talk with you, it's not that they are not lecherous, but that their relationship with you is not in place.

And the chat between men rarely talks about the size and time. After all, it is easy to compare who is strong and who is weak in this regard, which is easy to hurt self-esteem. So men often say, what a sexy beauty, tossed all night. Married women, mature women and young women are different.

Their chat is really about length and size!

"Can't men!" Shaohua asked. Married women in this way, often frankly let men feel that the shy she was destroyed by herself.

Zhang Fan took a look, expressed a certain protest, and continued: "men and women have no physical problems."

"Then why? Are men and women forced to marry? Is this man a domineering underworld, or a rich old man? "

"Don't read magazines like confidants. I'll tell you this thing is brainwashing! What do you think all day? " After eating the fish, Zhang Fan continued: "it was a woman who read a novel when she was in junior high school. She said it was this sexual affair. There would be heartbreaking pain, and a lot of bleeding, which was life-threatening.

Then, the girl had a shadow in her heart. After marriage, she didn't want to have a roommate in every way! No, I've been married for four years. I really can't help it. I came to the hospital for treatment. "

When Zhang Fan finished, Shaohua muttered, "it's still a man!"

Zhang Fan was helpless, and then continued: "it was nothing. As a result, LV Shuyan didn't say a superfluous word after listening, and directly said it to the man. If she doesn't want to, you agree. Hold it down. It hurts a little for the first time. She doesn't want to do it for the first time. After the first time, it'll be fine in the future!

At that time, it was estimated that it was a tough tone or something. Anyway, it was a sentence that made the woman who visited the doctor look silly and began to cry on the spot. You say you make a fuss, we can deal with it, but the woman doesn't say anything, just cry.

Oh, Lao Chen of the medical department can't help it. I mediated for a long time and didn't know what to say, and the patient's husband looked at the patient with thoughtful eyes. The patient was crying. Tears are like water guns!

Ah! "

After hearing this, Shaohua couldn't sit still with a smile.

In the evening, Zhang Fan looked at the basic teaching materials in his study. Really, he looked at them from the beginning, just like the practice certificate examination in that year. Internal medicine pays more attention to details than surgery. For example, what do you ask others to write about the medical records of car accidents in surgery?

How big are the logo and wheels? Often the current medical history is just a word. If you are accidentally hit by a car, you can have another part at most.

The internal medicine is different, such as a cough. The first sentence in the medical record is that greed and joy caught a cold 30 years ago! Really, it's no exaggeration.

"Husband, how can I hold it down?" Shao Hua took a bath and lay down on Zhang Fan's back.

As soon as Zhang Fan heard this, he decided to safeguard the dignity of men!

A child, Shaohua impatiently pushed Zhang Fan with his feet, "no, it's bad for your health again. Have a rest, let's have a rest!"

Zhang Fan proudly touched Shaohua's stomach and said, "I can't clean you up!"

In fact, Zhang Fan touched Shaohua's stomach. There is no other idea in his mind. He is practicing internal medicine examination! Really, I don't have any other ideas.

Shao Hua is also curious. How long hasn't Zhang Fan pressed my stomach like this? And it's different than before.

I've been touching it for half a night, and the skin will break if I touch it again.

The butcher's wife can wash intestines. That's right. Although Shao Hua doesn't understand medicine, he has smoked a little since he married Zhang Fan. For example, Shao Hua feels that the body examination and belly touching method is more detailed than before,

This is like an old smoker, because he hid some private money and bought a box of good cigarettes. As a result, his wife slapped him in the face just a few times. Was it that an affair between me and my unit was found? Just about to confess, I heard: did you hide money again, did you hide money again.

The first time in his husband's mind was to scare his father to death, and then it was Mom. The woman in the shop sold me. In fact, his wife felt that his husband's cigarette was a little more fragrant than before~

.....

The next day, after Zhang fan arranged things like the accommodation of shuitanzi's doctor who came to tea vegetable, he turned to the bone Institute, and the research in the bone Institute was on the right track. In fact, when people do surgery, they earn fast money in their spare time. The most important thing is to do research.

After leaving the Institute of orthopedics, Zhang Fan went to internal medicine.

Zhang Fan has hardly participated in the ward round of internal medicine since he took office.

I'm not worried about being asked, but I feel that I can't tell one, two or three when I go. Originally, internal medicine people think surgery is vulgar. If they go often, other people's homes find one or two deficiencies, which can be arranged by physicians like a joke, and it's not worth it.

But not now. Ward rounds are a compulsory course for doctors. The contents of the textbook are comprehensive. But without a ward round experience, you don't know what people say.

If you just read the textbook, memorize the textbook, and talk about the medical records with others, you are in fact a king of mouth. If you give you a patient, you have to pee your pants, such as what is water pulse.

The explanation of the principle in the textbook is clear, and the description of the state of this pulse is also a set, an impact pulse of rising and falling tides. If you don't make rounds and have no clinical experience, you may have to treat shuichong pulse as a happy pulse and congratulate the 80 year old man and mother!

"Here comes Zhang Yuan!"

"I'll go. Zhang Yuan is coming. Hurry up and tidy up the office. Whose tea cup? Do you want it? Don't throw it away."

"Let's put on all the washed white coats. Guli, tidy up your hair for me!" The head nurse yelled in the corridor as if the devil were going into the village.

Originally, physicians pay more attention to image than surgeons. This measure is more spiritual.

When the director of Gastroenterology saw Zhang Fan, he greeted him with a smile, "is there a big ward round in Zhang hospital today?" With a sincere smile on his face and a drum in his heart, "nothing has happened in the Department recently. Why is Zhang Yuan here? The medical department didn't inform him of the assault! "

Chapter 1307

There are great differences between medical treatment and surgical treatment. In the past, the training of a doctor, no matter you are three, seven and twenty-one, is now transferred to the hospital for three years, three months of surgery and three months of internal medicine. But Zhang Fan is a surgeon from beginning to end. From the beginning, he came into contact with this industry, that is, surgery.

Therefore, although the system requirements are not high, but people's fixed thinking is a trouble. The more powerful Zhang Fan is in surgery, the more troublesome this stereotype thinking is.

The ward round of surgery is super simple. Sometimes, the superior doctor takes the subordinate doctor to the ward round without talking about the condition. At most, ask whether you fart or defecate, and then ask whether you eat or drink.

Or look at the wound, "it's time to change the dressing. Don't be lazy!" "It's time to stop antibiotics. You've been using them for a week. Aren't you afraid of mold infection? "

It's all in one sentence.

The ward round of internal medicine is wordy, and the ward round director asks questions. If it is difficult for lower level doctors, it seems that the director is not up to standard.

Moreover, the director of surgery generally does not look at the patient's doctor's advice, that is, he generally does not worry about what medicine the bedside doctor uses, because he already has a big head, and he has to give the lower level doctor some soup. Or there will be an uprising!

Internal medicine is different. When the director enters the ward, he first asks the patient's condition, then looks at the examination results, then looks at the physical examination, and then looks at the

doctor's advice. If the doctor steals the chicken, for example, the director of the department asks him to use domestic omeprazole, but the doctor doesn't know what the starting point is and uses imported omeprazole.

This is very unhappy. The director doesn't know what to say and doesn't object. He starts in front of the patient, from pharmacology to biochemistry, from biochemistry to physiology, from physiology to embryo formation. He won't stop without asking you.

If you have a good attitude, let bygones be bygones.

If you answer smoothly from beginning to end, and my technology is good! Well, your feet won't hurt in the future. I'll take your last name. Therefore, surgical treatment is more direct. If you can't, just carry a knife.

Internal medicine is more tortuous. It is estimated that the interpersonal relationship between disease and hide and seek is also troublesome.

Usually intimate sisters, a popsicle has to be licked by several people, but there are too many experts behind their backs.

When Zhang Fan arrived at the gastroenterology department and saw the director of the gastroenterology department, he gently nodded, "go to work normally. Don't worry about me. I'll follow you on ward rounds. Have you handed over the shift? If you haven't handed over the shift, hand over the shift first, and start ward rounds when you have handed over the shift."

The director of the digestive department quickly called people to start the shift. Before long, Lao Chen quietly took Xiao Chen of the medical department into the office and stood next to Zhang Fan.

After a disaster relief trip, Xiao Chen was directly transferred back to the general hospital from the Second Affiliated Hospital and is now the director of the acting medical department.

The girl has cards now. She is unmarried and looks good. Now he has become the acting leader again. His proud little chest is very high.

Zhang Fan looked at Lao Chen and Xiao Chen and didn't say much. The shift handover of internal medicine also has a level. Doctors can't read the shift handover book. They should be familiar with the situation of patients. These are the requirements of internal medicine, which is generally not said in

surgery.

A shift handover takes about half an hour. Everyone stands. After the doctors, nurses and nurses hand in, the general head nurse has to talk about the major events of the hospital. Of course, when Zhang Fan came today, the head nurse didn't say anything. She also saw that the doctors in the Department were in trouble again.

Otherwise, I haven't heard that Zhang Fan suddenly came to any internal medicine department for ward rounds.

After the shift, ward round and just out of the office, Ren Li and Yan Xiaoyu also came.

Since the disaster, the relationship between Ren Li and Yan Xiaoyu has obviously improved a lot. Perhaps they all came out of the bird market, especially Ren Li's cute pet, which made Yan Xiaoyu unable to afford comparison, and Ren was lucky.

Therefore, if you can't be an enemy, you must become a friend.

"What happened?" Ren Li whispered to Zhang Fan.

Everyone's ears stood up like a group of police dogs in white coats.

"It's all right. Just come around. Aren't you busy today?" Zhang Fan whispered back. Ren Li supports Zhang Fan more than Ouyang, so Zhang Fan's attitude towards Ren Li is with a trace of protection in respect. For example, Ouyang and Zhang fan are pure in respect and protection. They dare not think about it. The old lady will really bite!

"I'm busy. The cardiology department was going to have a big ward round. There are still a lot of things in the laboratory, but I heard you came to the gastroenterology department without notice in advance. I can't come and have a look, but it's OK!"

Yan Xiaoyu almost fainted. "How can this woman live to more than 40? What she can say is small, and what she can't say is big! Can't the director of gastroenterology?" After mending her brain, Yan Xiaoyu glanced at the director of Gastroenterology.

The hospital has an unwritten saying that the secretary does not participate in the ward round. For example, Ren Li wants to participate in the ward round of other departments. The Department records will not say that she is secretary Ren, but Director Ren Li, but the dean is different.

Zhang Fan came. The director of Gastroenterology humbly wanted Zhang Fan to walk in front. Zhang Fan waved his hand, "just think I didn't come. How do you do rounds at ordinary times, how do you do rounds today, and how does the Dean do rounds today."

Zhang Fan doesn't go forward. Ren Li, Yan Xiaoyu and Lao Chen are also embarrassed to go forward.

Then, like several shepherds driving a group of big white sheep forward, the little doctors occasionally look back.

The director of the digestive department is almost boiling in his mind. What's the matter? What's the matter? Recently, I haven't come into contact with any super standard drug dealers. They all follow the rules of Xiao and Cao. How did I do it when I took office? How did I do it! Which goblin of octreotide and I last time

To tell the truth, there is a saying in the Jianghu of medical treatment: if you want to make money early, you should study internal medicine, and if you want to learn technology, you should study surgery. If you want to contribute, infect children's day.

Although one-sided, it absolutely makes sense.

In fact, Zhang Fan is really not in the mood to check these things and say something bad. This thing really needs to be checked. It's hard to say in other places. Ten doctors in the grass-roots hospital lined up to be sentenced wrongly, one for each, and there are definitely omissions.

Wait for the wind. Don't wait for the wind. Don't say Zhang Fan. You have to pretend that you can't see or hear Zhang Fan's teacher. After all, the main business of the hospital is to treat patients and save people.

One morning during the ward round, Zhang Fan heard a lonely story.

The director of gastroenterology is deeply afraid of making the Dean feel bad about his level, and he is afraid that the level of doctors in the Department will make the Dean feel bad.

So, don't look at the bustle of ward rounds. You come and I go. Anyone who answers questions and answers beautifully can be an open class. Then the patients seem to be satisfied that a needle is inserted. In fact, the miracle doctors who are good at everything are acting like. Act directly in front of Zhang Fan!

Zhang Fan sighed helplessly. After all, it was different from before. However, Zhang Fan feels that gastroenterology is not very good. When he prepares for a few days, he must give them a good lesson. Of course, now Zhang Fan just thinks about it.

During the day, Zhang Fan read and studied in the dean's office and worked hard with a book on internal medicine.

In the evening, Shaohua wants to see Wang Yanan off. Originally, Zhang Fan didn't want to participate, but Shaohua had promised. In fact, Zhang Fan didn't want to see the face who was going to save the earth!

The farewell team is not too many. There is more Zhang Fan outside the eternal trio.

Jia SuYue was supposed to eat Western food, while Wang Yanan tended to eat hot pot. Of course, this was rejected by Shaohua, who paid the bill today.

"Western food? I don't know how many knives of Western food are served in this place. Do you think it's delicious? "

Then he said to Wang Yanan, "you are going to the capital. There is no hot pot in the capital. Do you have to eat hot pot here?"

Jia Su asked pitifully, "you don't want to cook for us. Why are you getting more and more stingy!"

"Silly, since you want to leave for several months, you should eat enough of the flavor of your hometown at one time and concentrate on your study when you go to study!"

"It sounds like the chairman's wife meets Huangpu!"

.....

In fact, Shao Huaxuan's place also used his heart. Tea vegetable is a mutton restaurant. It is said that this restaurant has opened three generations of grandparents and grandchildren. The operators range from mutton steamed stuffed buns to all kinds of mutton based food. To tell the truth, it's really not easy for this restaurant to survive for three generations.

First of all, the place of tea vegetable is originally near the pastoral area. There should not be too few people who are good at making mutton.

Moreover, there are many mutton practices in this place. This is time-consuming and laborious. It may not make more money than other families. But it has survived for three generations.

Therefore, it's generally not that old tea vegans don't know this restaurant, such as Zhang Fan.

The three of them arrived first. Zhang Fan drove there after work.

It's really hard to drive in the old street. A car is almost covered with an old street. Looking at the difficult car, Zhang fan can't wait to get off and carry the car.

When you finally arrive at the small restaurant, you can smell the smell of mutton from a distance. In addition, Uyghur people like to plant all kinds of flowering trees. Especially in this season, the aroma of cooked mutton is mixed with the aroma of blooming pomegranate flowers. Really, smell it, it has a different taste.

Zhang Fan is not particularly fond of mutton, but he really likes the taste. He can't describe the aroma.

In the mutton restaurant, there was a lot of noise in the small restaurant, and Shao Hua and the three of them drank cavas and waited for Zhang Fan's arrival.

"I'm starving!" Jia SuYue's face was full of flowers. When he saw Zhang Fan, he quickly picked up a napkin to incite in front of his nose. He didn't know whether it was too hot or he couldn't smell the mutton.

Wang Yanan's face turned to the sky, just like the big faced cat caught the mouse and said plainly: praise me, or I won't finish with you!

Shaohua saw Zhang Fan, smiled and waved, and then hurriedly called the boss to order.

Wang Yanan said reluctantly, "are you sending me or improving the food for your husband!"

Chapter 1308

In fact, the attitudes of Wang Yanan and Jia SuYue towards Zhang fan are somewhat similar. Jia SuYue pretended to force Zhang Fan's feeling, that is, on the stem of memory, who doesn't have, two or three pingting, dressed in emotional flowers, nameless unfolding.

Of course, this is the feeling of cultural people and emotional petty bourgeoisie. According to Zhang Fan's understanding, this is that drowned children are the best children.

Wang Yanan's feelings about Zhang fan are actually slightly similar. She wanted to learn exquisite surgery with Zhang Fan. The more she learned, the more she found that she couldn't keep up. She was a little lost and complained. What she lost was that she was stupid. She complained that Zhang Fan didn't teach well. Being a teacher was more casual than fishing for three days and drying the net for two days.

But now it's different. She's going to shuitanzi for intensive special training, so in the face of Zhang Fan, she wants Zhang Fan to pay attention to her and doesn't want Zhang Fan to think she defected. Anyway, it's very awkward.

It's like a child in junior high school who not only wants the teacher to praise, but also shows that he has grown up and can hold his chest and draw lipstick.

Zhang Fan walked towards them with a smile“ You two wronged Shaohua. I usually eat less mutton. If I

hadn't come to this restaurant today to see you off, I could smell mutton three miles away. No one can overcome this pot of meat in this summer. "

To tell the truth, Zhang Fan's previous requirements for food were fat. When he first came to the frontier, he was short of oil and water in his stomach. When he was on the grassland, he had a sheep tail and trembling white fat. After eating one, Zhang Fan could make another lamb leg.

But with the improvement of living standards, his talent for eating goods has also been excavated. He is not a sea eater. He feels like eating and broadcasting in the Three Heroes game in the annals of the Three Kingdoms game. Now he is tricky.

Perhaps this is the so-called upgrading of the quality of life!

Actually, I'm full!

After sitting down, Zhang Fan looked at the restaurant. How to say, we can't talk about decoration. There is a layer of lanolin coating on the tables, chairs and benches. The light is dim. Occasionally a ray of light comes in, and the tables, chairs and benches can shine.

On the cement floor, there is a layer of lanolin accumulated over the years. I don't know, I thought the floor was waxed.

"Hurry up. The restaurant's business is super good. There will be no food later." Shaohua urged Wang Yanan.

Wang Yanan looked at Jia SuYue. Jia SuYue proudly said that he would move this oily recipe?

"Zhang Fan, be careful! Zhang Fan is a gourmet in the tea vegetable hospital! " Wang Yanan said that when she was a gourmet, she could give people the meaning that what she clearly said was eating goods!

Zhang Fan took the recipe from balanzi with a little black hat.

Look through

From beginning to end, I saw that there was only one big dish of vegetables: spicy red skin, and then the others were all meat from beginning to end.

"Let's start with a spicy red skin and more teeth! Then four strings of red willow barbecue, four roasted steamed buns, two catties of roasted sheep, a leg of mutton bread, and then four bowls of yogurt. Serve these first. If it's not enough, order again! "

Little balang is estimated to be in his teens, but he moves quickly. Before long, he first served four bowls of brick tea. When eating mutton, he had to drink this tea. Compared with Tieguanyin and Biluochun, this tea has the greatest effect of relieving boredom.

"This time, you have to decide a major. You can't hammer and stick on the left. Have you decided whether to learn spine or joints?"

After taking a sip of brick tea, Zhang Fan looks at Wang Yanan.

"Well, I haven't thought about it yet. I want to do it for the spine, and I don't want to give up on the joints." When it comes to business, Wang Yanan is still reliable.

"The spine is really unfriendly to female doctors. I suggest you learn joints. After all, the future development trend is not based on open and close surgery, but must be based on minimally invasive surgery, especially some endoscopes. Now endoscopes can reach small joints.

This kind of minimally invasive surgery has no special requirements on physical strength, and women will have an advantage in detail. "

Zhang Fan and Wang Yanan talk about business. Although Shaohua and Jia SuYue don't understand, they still stare at their big eyes and listen carefully, as if they can understand. Really, they seem to be more professional than Wang Yanan and Zhang Fan.

"OK, I'll listen to you. What does Xu Xian learn? " Wang Yanan asked curiously.

"Xu Xian wants to learn spine. People are originally masters in spine. If you have the conditions, you'd better improve your education. After all, some things are about the threshold."

"I see! I will try my best! "

"OK, don't be too stressed. Everything has me. Even if you really don't like joints, we can learn spine. At least you are also my big apprentice of Zhang's straight to the point, aren't you!"

"Bah!" I don't know because Shaohua and Jia SuYue are here. Wang Yanan is a little embarrassed!

Before long, the lamb leg bread came up first. To tell you the truth, mutton is different from pork and beef.

It's not unusual for someone to eat two or three kilograms of mutton at a meal, but you can't support him if you let him eat two or three kilograms of pork. Although Zhang Fan ordered more, in fact, he

didn't have much. These things make a man with a big appetite eat them all alone.

Mutton bread, this thing, can't be eaten even in the bird market near the grassland. Even if it can be eaten, it doesn't taste good.

This thing must be lamb legs. Sheep can't be more than half a year old. Sheep legs can't carry a little fat. It's all lean meat.

First, cut the crispy and tender lamb leg into pieces. How big is it, just like the size of a small cage bag? Then marinate it one day in advance, with salt, cumin and dry pepper. The most important thing is to soak it in a kind of wild vegetable juice unique to the grassland.

Then put these meat pieces with bones in the form of lamb legs on the dough, which should be thick, sprinkle epithelial teeth, and then pinch the dough into the shape of lamb legs along the mutton and put it into the bag pit.

The pastry is not the pastry for making steamed bread or dumpling skin in the mainland. It is slightly similar to the Leba noodles of laomaози.

The baking time is also relatively long. When it is cooked, it looks like bread in the shape of lamb legs. The skin should be golden and crisp.

And because the gravy was tightly wrapped in the dough, when it was just taken out of the bag pit, it mixed the aroma of wheat and mutton, especially rich.

Three women, a man, work is a man, Zhang Fan holding a knife to cut, cut the moment, the rich soup slowly flows out, fumigated by the hot air, darling, it really smells dead.

When you bite on the dough, it's crisp but not hard. Then the lamb leg wrapped in soup can give you a feeling of elasticity and slip. The taste of wheat mixed with lamb leg can't be described.

It can only be said that the more you chew, the more you can have a taste blooming on your taste buds.

Several girls ate faster than Zhang Fan, because they could only order one lamb leg bread at a table, and they didn't come late. Shaohua spilled the soup from the corners of their mouths.

It's really rare that roast lamb legs can eat this kind of soup.

This is the charm of others.

When the lamb leg bread was finished, the red willow barbecue came up.

It is said that the frontier roast mutton is delicious. In fact, most of them are improved versions, which highlights the fact that there are many pieces of meat.

The real frontier barbecue is red willow barbecue.

The branches of the red willow should be fresh. Because the red willow only exists at the edge of the desert, the government gradually does not encourage it to eat like this. If you eat it again, the red willow will be eaten bald.

After the thin skin of red willow, it will secrete a kind of viscous plant juice. This thing contains Salicylic acid, from which the famous aspirin is put forward.

The unprocessed red willow juice is slightly bitter and poisonous, but after wearing mutton pimples, it can actually regulate the flavor of meat. It is said that Chinese people are not ashamed of eating goods.

The roast meat should not be pure and thin, otherwise it is too hard to eat. It should be smoked and roasted with mutton and fruit trees, and no open fire can be seen.

When the roasted red willow roast meat is brought to the table, the surface of the meat is still slightly bursting with oil. In the slight crackling sound, the fat particles are bursting, so that the aromatic hydrocarbons of oil can be fully emitted.

The child's fist size barbecue bites in his mouth and clicks, just like eating crispy. When he bites the crispy skin wrapped in oil on the surface, the refined meat in the middle is mixed with the taste of willow branches and fruit trees. Really, there is no way to describe it.

The more you eat, the better.

Finally, a plate of papaya rice. The papaya in the border area is not the kind of papaya that is said to be rich and fierce in the south. In fact, this kind of papaya is scientifically called Qie. This thing has strong life. If the fruit is like an apple, it is not very delicious anyway.

But the frontier people make this thing into rice grabbing, darling. Tea vegetarian rice and grassland sheep are mixed with the fruit aroma of the oyster, which can fill the gap of the meat in the stomach.

It definitely gives people a very comfortable feeling of fullness.

A lamb meal is not a big meal. But this is the flavor of the frontier, whether it is the local people in the frontier or the people who have lived in the frontier for several years.

When I come, I will find a mutton restaurant for a meal at the first time.

When I leave, I will have a meal with my bag on my back.

This is the charm of the frontier.

.....

Theophylline orthopedic doctors left in batches. Their destination is the capital of China, the most powerful orthopedic hospital in China, Shuitanzi hospital, where they will make up for their deficiencies. Jinmao doesn't teach. We don't have the ability.

But we won't give up.

Sent away a group of people and ushered in another group. This time, they are the backbone of Shuitanzi. Although they are not famous and frightening, they are all seeds. The top class of orthopedics in China will exist in the future.

After meeting Zhang Fan directly, a group of people were stuffed into the Bone Institute by Zhang Fan.

When we met, Zhang Fan was very heroic.

"I have money. It may not be less than Shuitanzi. You may not be able to make Lao Zhao's research in Shuitanzi, but I can here. As long as you like, I will support it.

I have more equipment. The equipment of the Institute of Orthopedics is prepared for you. In China, other people are not qualified to use it except you.

Comrades, come on, don't let Jinmao underestimate us. And don't let us fail ourselves! "

Anyway, he said good words and didn't pay taxes. Zhang Fan thought that if he could leave three or four doctors after several rounds of communication, he wouldn't suffer!

Chapter 1309

The same doctor, the same insomnia! But their insomnia is different. A group of people can't sleep at night when they go to the capital. For example, Xu Xian looks forward to how to work hard, how to learn and come back, and then get the flower.

For example, Wang Yanan thought carefully: the underwear for washing is brought. Well, it's all four corners. It's too obvious and uncomfortable to change into surgical clothes for triangular surgery. One thing to go out: ask for money, bring your ID card, charge your mobile phone, take the key, and prepare your bank salary card!

The doctors who came from the capital could not sleep that night, especially the married doctors, who were tossed by their wives all night "Go to the frontier and take care of your pants and belts. If you dare to play with wild women, I'll give you a green hat. "

Because there are too many stars in the frontier in recent years, especially female stars, the big girls in the capital are a little under pressure.

"Also, try not to ride camels. Try to eat more *Cistanche deserticola* over there. You're dealing with the job more and more. Is there someone outside?" Pulling a meat strip, the woman the night before leaving just doesn't give up.

Of course, there are also misunderstandings about the frontier. The stem of camel riding is applicable to all Northwest China. The mainland people arrange the frontier people, and the frontier people's mouth is not forgiving. They also arrange the mainland people. What Nanhe big crotch, no basket is needed to buy vegetables, and potato eggs can't be dried just by eating.

The number of orthopaedic patients increased sharply due to the arrival of Dr. Shuitanzi, especially in the four provinces close to the frontier. In XISU, Nei and Qing, many patients' relatives and friends had tea, and after the news passed.

Even monks with bare arms and yellow crowns on their heads came to see doctors from the temple.

The orthopaedics department of tea vegetable hospital is full. Zhang Fan thought that no matter how many orthopedic patients there were, there were no more than the grand occasion when his martial uncle and master and a group of martial brothers came. Unfortunately, Zhang Fan was still young and underestimated the people's mysterious belief in the capital in the northwest.

It's like a restaurant selling roast duck. If it's not in the capital, if it was born in any city, according to its current virtue, it can lose its underpants no matter how thick its family background is, but now it's listed!

However, there are many patients. In fact, most of them are common diseases. The great thing is routine major surgery such as hip replacement, knee joint or spinal fixation. This kind of operation can be done in the third class hospitals in various provincial capitals.

Even in the northwest, no problem.

However, patients just don't know. When they hear that there are not only experts in Shuitanzi, but also experts in Jinmao, they can't restrain their heart towards the West. In fact, this is an alternative siphon

phenomenon.

I don't know what the situation is in other places. The orthopedic directors of several hospitals in bird city are particularly depressed.

"Lao Zhang, how's your department? How many operations are there today? "

"Hey, I had three joint replacements yesterday, but I got up and ran two times in the morning. One said it was a fire at home and the other said it was time to think about it. I saw all the tickets to tea vegetable!"

The joint director and spine director of the Second Affiliated Hospital of niaoshi chatted.

"This is not a thing. I've heard of running from a lower level hospital to a higher level hospital. I've never heard of a higher level hospital running towards a lower level hospital!"

"Well, people's tea vegetarians are not subordinate hospitals now. They are on the same level as us."

"We have to find a way!"

"Yes, we have to find a way."

"If you don't think of a way, you can't. He can be a cow, an academician, or even a chairman, but he can't eat in the bowl and look in the pot, can he?"

"Yes!"

"We are now dozens of people in a department, and we are about to be idle. Why, isn't he making trouble with tea?"

"I hear he's still advertising."

"It's shameless."

In fact, these two directors are newly married. They are not only under great physical pressure, but also under great economic pressure. Is there a doctor who has clean hands and is determined not to take kickbacks? Yes, many, but there are also people who stare at the operation and call every day.

And you can easily find this kind of doctor, such as wearing different watches seven days a week. There was an old clock's son wearing a watch, and then there was an uproar. In fact, it wasn't fart.

You go and see some orthopaedic directors. It's no exaggeration to wear sportswear and watches in line with sports, and suits and formal watches.

In addition, some people who have been on the news say that the superior sent a female leader in charge of bribery to check the orthopaedic director. The orthopaedic director was frightened for a moment. Then the man thought for a long time and finally slept the female leader with money.

Even if he slept, he developed into his second steamed bread! Really, the novel doesn't dare to write like that.

They said that Zhang Fan's shameless advertising to the hospital actually wronged Zhang Fan.

Zhang Fan didn't think of this, but Ouyang thought of it.

The bird city government wanted to borrow camellia to go to the bird market, and Ouyang happily agreed. Then put up a circle of advertising banners for flowers in red and green. The bird city government has a short mouth for eating people, and the leaders will be color blind. If they can't see red, green and yellow, they will recognize it.

This is not enough. Ouyang took some doctors to frontier TV several times. Anyway, it is a soft advertisement inside and outside the words, which means that the tea vegetable hospital is now awesome!

Ouyang would not have been like this, but because this year's Fudan version of the list of Chinese hospitals was published. The old lady was thinking that the tea vegetable hospital is better than the Central Hospital of bird city. Even if it is attached with one, two and three, it's not much worse.

As a result, several top three hospitals in border bird city were on the list, while tea vegetable hospital did not. I can't stand it. I can't beat you Fudan. How many eggs can I beat you? Ouyang doesn't care much about technology and administration now.

Completely retreat! With a group of doctors who have no role in the Department but have great oral skills, they go on TV and radio. Anyway, they increase the exposure. It's hard to say whether the bird city hospital has any impact.

But Ouyang with a group of regular soldiers cried a group of miracle doctors who did health programs on TV. The miracle doctors selling health care products dare not stay in the frontier. TV people also want ratings. Sometimes they have a debate. Doctors on both sides debate. Ouyang takes a group of strong kings with his mouth, even if they have no position in the Department.

But I'm a regular army after all. It's not ambiguous to clean up a group of Jianghu heroes!

For a time, there was a clear flow in the frontier medical environment. Everyone didn't buy Dali pill! The elderly will not call the female expert in the middle of the night to inquire about the brother.

It's an unexpected harvest!

Zhang Fan generally doesn't worry about this kind of thing, nor does he worry about it, because in terms of combat effectiveness, Zhang Fan is quite assured of Ouyang.

.....

In a week's time, Zhang Fan thoroughly went through the foundation again, but no, the system problems are too difficult. Zhang Fan seems to be a layman, which makes Zhang Fan feel frustrated.

However, after a week's study, Zhang Fan felt different, because this time he studied with goals and objectives, and the targeted effect was OK. Anyway, in a word, Zhang Fan didn't like being persuaded to quit the internal medicine system.

"Zhang hospital has come to the Department of Gastroenterology for ward round again!"

I don't know if Zhang Fan has made progress. Anyway, the director of gastroenterology is worried. On the first day, the head of the Department of Gastroenterology had his hair blown up, and on the second day, his gallbladder was broken. On the third day, the skin looked sad, which meant: if you want to kill or cut, that's it. It's too painful.

As the director of Gastroenterology became thinner and thinner, Zhang Fan's level of digestion increased significantly. I don't know. I thought the meat of the director of digestive department was a smart medicine!

"Let's inform the gastroenterology department and make a ward round on Monday!" Zhang Fan calls Xiao Chen of the medical department in his office. Xiao Chen is now the acting director of the whole medical department system of tea vegetable hospital. The girl graduated from the Department of public health.

The Department of public health is a cold door in the medical system, which is more remote than pharmacy. The whole process is called the Department of public medicine and health management. In this department, many students didn't know at the beginning. Just like big hadron, they thought that they could be officials when they went to the National People's Congress.

Many students think that after leaving this department, they will be qualified to be the president of the hospital for a few years. As a result, after graduation, they find that the hospital almost doesn't want you.

Xiao Chen was lucky. When he graduated as a graduate student, he didn't go to the bird market or the big city. He directly came to the tea vegetable hospital, which was not very good at the beginning. He was lucky and followed the right leader. Now it can be said that he can use the knowledge learned in the school in his work.

As for the tea vegetable hospital, it will be difficult for the public health department to enter the

hospital again.

Of course, if there is a way, this department is still very good. Entering the unit is the way of mechanism.

"OK, Zhang Yuan, I'll inform the gastroenterology department immediately. Which directors and leaders do I need to inform?" While answering the phone, Xiao Chen recorded beside him.

The girl has learned everything about Lao Chen. Whatever the leader says, even if it is simple, it should be implemented in the record book.

This is attitude.

"You first ask the leaders at home. You can come if you have time on Monday. If you don't have time, don't force it."

"OK, Zhang Yuan, I understand!"

After hanging up, Xiao Chen's mind turned around "Don't insist? "

"Hello, president Zhao. This is Xiao Chen from the medical department. Are you free on Monday morning?"

Zhao Jingjin said in the laboratory, "I don't have time. I'm going to the surgical ward round on Monday."

"Zhao Yuan, can you coordinate? I'm really sorry. It's my fault. I didn't contact Zhang Yuan in advance. I didn't arrange it for you!"

Apologize first. Right or wrong, Xiao Chen is very low-key.

"What's the matter?" Lao Zhao frowned. Zhang Fan didn't say anything recently!

"Yes..."

One by one, as long as the leaders at home, Xiao Chen Quan has been notified, and the requirements of turning corners must come!

In fact, Zhang Fan really doesn't insist!

Chapter 1310

"Zhang Yuan has finally made a ward round!"

"The boss is going to make rounds!"

"The director of gastroenterology is going to pee his pants these days. Finally, boss Zhang is going to make a ward round!"

When Zhang Fan wanted to make a ward round, the female doctors of internal medicine were as frightened as if they were holding melon seeds one by one!

However, Zhang Fan's rare day-to-day visit in a medical department this week also made others feel something. This time, not only the leaders at home, but also the pill experts in intestinal surgery applied to participate in the ward round.

"I finally remember the internal medicine. No matter how to manage the internal medicine, the tea vegetable hospital will be the tea vegetable surgery hospital in the future.

Do you think this flower is sick? Why did it lie down? Not enough water? Or lack of fertilizer? " Ouyang looked at the cactus in front of him. It was straight yesterday, but how could it be crooked today?

She has nothing to do these days. She waters the flowers when she is bored.

"Ouyuan, are you going?" Lao Chen pretended not to hear Ouyang.

"I won't go. My feet are off the ground all day! " Ouyang said proudly. The old lady is very happy these days.

Because mitima GlaxoSmithKline has established a factory in tea, the tea government is not confident enough to tell the truth to such giants. Not only want to let the other party pay more, but also fear that others will dislike the ugly growth of tea.

Therefore, in order to make everyone more harmonious, Ouyang was invited by the tea government to communicate with Ms. Zeng of sanshima GlaxoSmithKline.

The tea government and Ms. Zeng of GlaxoSmithKline actually want Zhang Fan to be the middleman, but Zhang Fan recently opened a medical department and ignored them. As a last resort, Ouyang was invited.

Ouyang likes this kind of person, the great project of his predecessors and later.

On Monday morning, the weather is good. It rains more at night than during the day. Because of the snow mountains, the temperature is too high during the day, and there is often a light rain or moderate rain at night. The next morning, the air is filled with oxygen ions.

Moreover, the opening of all kinds of flowers in summer makes the tea air fragrant. In the frontier, in the northwest, where almost half of the territory is Gobi, such a city is really very different.

Of course, today at the tea vegetable hospital, I don't know how other doctors are feeling. Doctors in the Department of Gastroenterology are very nervous up and down.

"Are there any patients with bubble disease, those with excessive drugs, and those who stay in bed? Why are you still writing medical records? God, the Dean has hit the door. Do you still want to do it?" The director of Gastroenterology was so worried that his hair would jump up and stand up.

An hour before work in the Department, the staff not only arrived in place, but also made chickens fly and dogs jump. One is in a hurry.

The head nurse took the nurses to check the ward again and again, "clean up the excess things. The ward should be clean. Whose electric rice cooker should be taken away immediately. Don't come to the hospital next time you see it.

Old man, what are you doing? Hurry up and change your blanket into a hospital quilt. "

When it's time to go to work, I hear footsteps in the corridor, and there are many people. The director of Gastroenterology was sweating in the doctor's office " Are you here? " He asked in a low voice.

"Here we are! It's all here! " The nurse stood at the door, took a sneak look and said immediately.

Zhang Fan has come to the ward round!

The leadership of the hospital, except Ouyang, who did great things, didn't come, all the other leaders came.

The middle-level leader, Lao Ju, came with a group of section directors.

The laboratory, the doctor and master who have something to do with digestion, also came.

It can be said that this ward round is estimated to be the largest and most complete talent team in the history of tea.

When Zhang Fan came to the internal medicine building in the morning, he saw a group of people waiting in the hall on the first floor of the internal medicine building. He directly saw a team of no less than 30 people waiting.

"Everyone is not busy today!"

Zhang Fan glanced at Xiao Chen.

"It's been a long time since the ward round. This time, Zhang Yuan spoke. Everyone is very enthusiastic. We can't decouple from business learning!" Lao Chen answered quickly.

"Hehe, why do you think of the big ward round of gastroenterology?" Yan Xiaoyu asked.

She was worried that Zhang Fan was not satisfied with the internal medicine, but she didn't say it. It was most frightening to lead without hair.

"The internal medicine department hasn't come to the ward round for a long time. I'm not busy these days! Since everyone is not busy, let's go to the ward round. Today we should be ready to be hungry. " Zhang Fan said with a smile. I stepped into the elevator first.

All eight elevators were on standby, and Zhang Fan's smiling face couldn't laugh " It's not an example. It's not like the sick man to climb the stairs! "

Although Xiao Chen is not the leadership, she wants to follow the leaders, so after several leaders entered the first elevator, Zhang Fan said to Xiao Chen.

Xiao Chen stuck out his tongue and quickly agreed.

About thirty people entered the internal medicine office.

The director of Gastroenterology looked at Zhang Fan, meaning that the leader spoke!

Zhang Fan waved his hand to him to continue.

"Today's ward round starts from one bed. Please turn off the phone and be responsible for preparing all kinds of cases and materials of patients in their own beds in advance. Now start the ward round."

With that, the director of internal medicine hurried to Zhang Fan and let Zhang Fan go first.

That's the rule.

In any department, when making ward rounds, the discipline leader must be at the front, followed by three levels. Hula, the 30 people brought by the leaders, the original doctors in the Department and the

doctors for internship and specialized training are almost 30 people, and then the nurses are more than 30, almost 100 people younger.

"Three beds, female, 45 years old. He had a history of liver cirrhosis for more than ten years. This time he was admitted to the hospital because of hematemesis and black feces combined with shock ascites. After admission, he was given active treatment to correct shock, improve hemoglobin and control bleeding... "

In the first room, I met a seriously ill patient.

After the bed doctor carefully reported his condition, he looked at all the ward rounds.

This time is generally divided into three kinds. Non professional leaders will nod their heads, look at the patient from a distance, and then ask, "the window should be closed on time, pay attention to ventilation and warmth, and don't let the patient catch a cold!"

Then holding the patient's hand, the reporter of the hospital newspaper took photos at the first time, and then the ward round ended. The doctors didn't take him at all.

The second is professional leadership, but not professional leadership. During ward rounds, I don't ask much questions, but I will read the doctor's orders. Occasionally, I will let the patient lie down and check the individual. After physical examination and medical advice, they hardly ask questions. Chinese leaders are very good at hiding their clumsiness.

The last one is the leader of this major. Doctors and nurses are worried about this kind of leadership ward round.

After the bed doctor reported, Zhang Fan didn't look at the medical record and directly started the physical examination, "ha ha, I'm the president of tea vegetable hospital. I'll do a physical examination for you today. Lie down."

Zhang Fan said with a smile to the middle-aged woman in front of him, and then lifted the patient's coat.

The patients are a little shivering. They are not in good health. Looking at the tube bed doctor who raises his head higher than the big cock on weekdays, she will be like a quail. She is also nervous. She doesn't know what's going on. What's going on.

"It's all right. They are all experts. You're lucky this time. So many people consult you. It's usually difficult to find all these experts." Lao Chen saw that the patient was a little nervous, so he smiled and explained slowly.

"Oh!"

The patients in other beds heard that they were experts or the dean. They hurriedly lay on the bed,

opened their clothes and exposed their belly, waiting for the experts to touch them.

.....

"The liver is palpable under the ribs and hard..." Zhang Fan reported his own data while checking. Doctors in the Department of Gastroenterology took out their notebooks to record, regardless of the tube and bed. Anyway, I don't know what to write, but the posture is put out.

"Is there a primary prevention education for patients before bleeding?"

"Yes, Zhang Yuan."

"After bleeding, did you give the patient a cerclage?"

"It's been nearly a year now."

"What is the bleeding rate after one year?"

"Yes..." the bed doctor couldn't answer!

"60% !" The superior doctor of the bed doctor quickly stood up and answered.

Zhang Fan didn't say anything, but the doctor in charge of the bed was flushed.

"Has renal function been tested regularly?"

"It has been checked regularly!"

Zhang Fan asked in great detail.

In detail, Ren Li and Yan Xiaoyu looked at each other " I'm afraid it's a high level. Doesn't it mean that Zhang Yuan's internal medicine is just a reluctance? "

Yan Xiaoyu was shocked. Is this really the legendary pig eating tiger? So young, my God, with such a heavy mind, Yan Xiaoyu thought and quickly recalled whether he had made any mistakes in business after he came to the tea vegetable hospital.

"Why not add isosorbide mononitrate?" Zhang Fan has taken the medical record and started to give medical orders.

The doctor in charge of the bed was stunned. Yes, why isosorbide mononitrate?

The superior doctor was also stunned.

Internal medicine, how to say, is like a lottery. Before the lottery, everyone was covered with clouds, but once the lottery was opened, everyone suddenly realized that it was so.

It seems that everyone can understand. In fact, this is to start taking drugs according to the symptoms, signs and the development of the disease.

It's well written in the teaching book. This medicine is used for this disease. It seems irresponsible at all. To tell the truth, if it's really so simple, just pull out two high school students and let them familiarize themselves with internal medicine books, they can also give people medical treatment and medicine.

"Oh? Didn't you think? Octreotide is solid!" Zhang Fan clapped the case in his hand.

"Come on, director Li, why don't you use isosorbide mononitrate!" Zhang Fan said to the director of Gastroenterology with a smile.

Today, if the director doesn't know why isosorbide mononitrate is added or not, Zhang Fan is determined to take him.

The sweating director didn't know Zhang Fan's target at this time. Did he come to catch octreotide, an expensive drug, or the quality of cases!

"Although the patient has been cerclaged for nearly a year, the bleeding is not obvious at present, and the patient's liver function is poor. In order to protect the liver, we did not consider using isosorbide mononitrate!"

Zhang Fan listened and looked at the director of Gastroenterology. "The level is there, but the heart is not here!"

The level of director of gastroenterology department still exists.

"When do you think it's appropriate to add it. It's 60% possible to relapse, and she's bleeding again now. You can't spit blood and give octreotide to stop the blood. It doesn't matter. My senior director, will you use dessert?"

Zhang Fan handed the medical record to the director of the digestive department, but did not let go. Lao Li, the director of the digestive department, looked ashamed.

The time is just dozens of seconds, as if it had been a long time.

The ward rounds, especially the surgical leaders, looked at Zhang Fan with panic in their eyes.

"Zhang Yuan is going to do internal medicine?"

Zhang Fan ignored them. After releasing the case, he said, "continue rounds."

Turn around and continue.

Everyone looks at Zhang Fan.

Like the popular saying, I'm standing here. You see, I'm kind of like that year!

While making rounds, Zhang Fan compared them in the system of his mind. Internal medicine is actually more complicated than surgery.

In the short term, some treatments are good to the left and right, but in the long term, they are different,

Maybe there are too few long-term doctors.

So Zhang Fan took the treatment plan into the system and compared it one by one.

Chapter 1311

"To control blood pressure, it must be controlled at 130 and must not exceed 140, otherwise the prognosis is poor!" One patient, one patient, one treatment, one treatment.

Where the doctors in the department didn't pay attention to the treatment, Zhang Fan made a speech to remind them. He directly became the dean of internal medicine.

In the leading group, the latecomers, such as Zhao Jingjin, frowned, because he really didn't understand that Zhang Fan was so strong in internal medicine, but it was clear to think about it. After all, is Zhang Fan a genius! In particular, Yan Xiaoyu, Dean of internal medicine, was supported from beginning to end after opening his mouth! For hours!

Ren Li was really shocked. When Zhang Fan was in the internal medicine department, she was very down-to-earth and in good health. At the beginning, she wanted Zhang Fan to come to the Department of Cardiology. If a cardiologist's body is not good, he will show himself the heart in a few years.

This is not a joke. Look at old man Zhong. He takes off his coat and has pimples all over his body. Which is an 80 year old man?

In terms of specialty, Zhang Fan's internal medicine was not outstanding at that time, so it's frightening

to see that Zhang fan can not say anything in the Department of Gastroenterology and can find out loopholes and fill vacancies.

Just follow the ward round for a week, and it's getting faster and faster? President Ren looked at Zhang Fan carefully. She wanted to see a flower from Zhang Fan's face. As a result, Zhang Fan's face was calm.

"Director Li, the doctor's professional ability is not strong!" Back to the Department, Zhang Fan said to the director of Gastroenterology.

Zhang Fan didn't ask Lao Li. Lao Li's family is also the director killed by a sea of blood. But Zhang fan can't ask Lao Li and the doctor under Lao Li?

Like I can't beat you, I can't beat your daughter-in-law?

Lao Li was embarrassed to die. In the past, Ouyang was in the heart, Ren Li was in the heart, and Lao Ju was breathing. Although the digestive department had no backing at the Dean level, it was also equal to no mother-in-law at the Dean level.

It's comfortable. I want to eat rice and noodles. I don't want to be loose, but in terms of medication and treatment, it's a little too much.

I thought this kind of life could go on until Zhang Fan was not the dean or the dean of digestion.

As a result, I can't live a comfortable life!

Compared with surgery, internal medicine is more difficult to judge the treatment effect. The treatment of some diseases is only a simple symptomatic treatment, or to delay the extension of the disease.

For example, diabetes and hypertension, the treatment of these two diseases is to delay the progress of the disease rather than cure it.

Hyperglycemia will lead to damage to blood vessels and nerves, especially micro blood vessels and nerves. If you do not control blood glucose, sugar is like a shell, hitting micro blood vessels and nerves constantly. Then the consequence is that one day, a discovery of limbs suddenly doesn't feel, or one day, it suddenly disappears.

In fact, to put it bluntly, the mechanism of hypertension and hyperglycemia is not much different. They

all attack small blood vessels. But one is physical and the other is chemical.

For example, some patients with hypertension and dizziness feel dizzy after taking antihypertensive drugs for a few days, and then they don't take the drugs. If they feel dizzy for a few days, they will be treated as if hypertension is a cold.

To tell the truth, this kind of damage to the body is more serious. What the blood vessels fear is that you go up and down, in and out, because this kind of high and low is the most serious damage to the blood vessels and the heart and kidney. In fact, to put it simply, this kind of blood pressure rises and falls, and blood sugar rises and falls, just like popping.

Too often, pleasure turns into pain, and the skin will be worn out!

Although Zhang Fan said it politely and gently, the internal medicine system of tea vegetable hospital directly fried the pot.

"You know what? Zhang Yuan lurked in the Department of Gastroenterology for a week, and then suddenly worked hard. Lao Li in his digestion was depressed. After the ward round in the morning, Lao Li was about to cry in the Department. "

"Shall I go, so cruel? God, do you think hospital Zhang will come to our department next week? "

"I don't know!"

The physicians were uneasy. Ren Li first began to train troops in the Department of Cardiology. If Zhang Fan really wanted to be caught off guard, Ren Li didn't want to. In terms of administrative business, Ren always didn't have a trace of pursuit.

To tell the truth, her current position is actually pushed by Ouyang and Zhang Fan, but in clinical business, president Ren still has quite high self-esteem.

According to the self-examination of Cardiology Department, the old residence of respiratory department is not willing to be behind others.

"Our department is now the best department in the internal medicine of tea element hospital. The equipment of respiratory ICU can be said to have a head and face in the whole country of China.

We can't be complacent and don't learn gastroenterology. For a little petty gain, Zhang Yuan said it was terrible. Do you know that when the ward round in the morning, the directors of Gastroenterology came out holding the wall! "

Lao Ju speaks on the stage!

"Lao Li is going to have a buffet!" Li Hui whispered to Zhu Qianqian.

Department of respiratory medicine, Zhu Qianqian and Li Hui are the big family of tube beds.

A tube bed for children's milk powder and refueling. When Li Hui was the highest, the tube bed exceeded more than 30 patients.

And there are no trainees and interns to help him. It can be said that his treatment is to look at the patient, and then write the case in front of the computer all day.

Zhu Qianqian is not a flesh man. She is a woman and a attending. She doesn't care about anything in the Department. Except for the patient, everything else is indisputable.

She won't go to study.

She doesn't have an idea to evaluate the advanced.

Just concentrate on receiving patients. After a month, the drug rebate can even sell a fur coat.

Whenever I entered the respiratory department, I saw Li Hui and Zhu Qianqian beating the keyboard crazily. I didn't know why I entered the Internet cafe and saw them dancing with Biao!

"Will Zhang Yuan cut us both?"

Usually they don't talk much to each other because they have business competition. Now Li Hui takes the initiative to speak, and Zhu Qianqian quickly asks.

"I don't think so. We've collected less these days, especially you. Others have opinions on you." Li Hui is serious and nonsense. It's hard to say if others have opinions or not. He definitely has opinions.

"You take less." Zhu Qianqian glanced at Li Hui.

Zhu Qianqian is not afraid of Ouyang. When Ouyang really wants to clean her up, she cries. She knows that Ouyang protects her calf.

But for Zhang Fan, although she smiles like Maitreya Buddha on weekdays, when she took Zhang Fan in the respiratory department, Zhu Qianqian felt she couldn't understand the boy, because Zhu Qianqian was famous in the hospital.

However, all transferred doctors are afraid to follow Zhu Qianqian in the respiratory department, and even some transferred doctors have had conflicts with Zhu Qianqian.

No one wants to write medical records for more than ten hours a day, regardless of food.

But Zhang Fan was an exception. He was silent. I will do what you can do. You can climb in front of the

computer for more than ten hours, so can I. what's better is your health.

And he doesn't talk much and doesn't break his mouth. Also special chicken thief. Zhang Fan has learned some small skills of Zhu Qianqian.

It's nothing, but now Zhang Fan is the dean. Zhang Fan really wants to clean her up. Zhu Qianqian can pinch her with three fingers. Zhu Qianqian calls her father.

So Dr. Zhu is a little worried.

endocrine

The endocrinology of the tea element hospital, not to mention the tea element hospital, is a special department, almost all of which are not the endocrinology of the top hospitals.

Because after the reform, the first rich people suddenly became fat. Endocrine diseases are first some businessmen, some rich people, and some energetic people.

Then, because there are many contacts with endocrinologists, slowly, slowly, female endocrinologists marry into rich families and energetic families. With the leader, many girls feel more beautiful.

In college, it's enough to understand that in life, we must eat and drink first, so we often find ways to enter the endocrine system.

Then, goudou might become a rich lady.

The tea vegetable hospital is like this. The city is not big, and the female endocrine doctors are relatively beautiful. They put on small black leather shoes, put on short waist black silk stockings, and then put on a white coat. If they are taking a little taste of small eyes.

It's really beautiful, knowledgeable and technical. What's special is the temptation of uniform.

Therefore, the female doctors in this department are the trend leaders in the hospital.

The broken fruit mobile phone has a new one.

Go and have a look. The most doctors holding this kind of mobile phone are endocrine doctors.

There are definitely some female endocrine doctors, such as donkey bags and Naier bags. To tell the truth, in this department, young doctors who wanted to be wives didn't want to come, and they tried to get in.

The topic in the Department is not the latest medicine or the recent kickbacks, but the skin care, which is rich or fierce, or a spa.

The atmosphere is weird anyway.

After Yan Xiaoyu came, the situation changed little. Because people don't like this salary and rebate.

To tell the truth, Zhang Fan sometimes prefers endocrine doctors to be Li Hui and Zhu Qianqian rather than a group of gossip wives.

After all, if Li Hui and Zhu Qianqian want to receive patients, you have to study drugs. Don't look at how much others manage. Patients never have problems because of treatment. This is a skill!

"Whose bag is this? Why put it in the office? Didn't the hospital give you a locker? "

Yan Xiaoyu's head was a little big when she entered the Department, so she improved her relationship with Ren Li at the first time after she went to the tea vegetable hospital.

She doesn't know when Zhang Fan will come!

.....

Surgery is different. "Oh, my God, Zhang Yuan is tired of surgery and goes to internal medicine!"

A group of rough men in orthopedics, outside the chest and outside the brain can't afford to gossip. Let's listen and finish listening.

In fact, after the ward round, Zhang Fan didn't want to go to other internal medicine, because his digestive medicine didn't pass the exam in the system!

Chapter 1312

Zhang Fan thinks of himself as powerful and the system as simple.

Since the system came into being, Zhang fanjue said that there are no geniuses in the world. Geniuses are all made of effort.

As a result, after entering the internal medicine department, he found himself too young. To tell the truth, Zhang Fan was lucky. When quark chose surgery, Zhang Fan really had a little talent for surgery. If he chose internal medicine, it is estimated that he is still studying the assessment of systemic hypertension in quark.

It's like there's a saying that the grandmaster rewards the meal, but there's another word. When the grandmaster rewards the meal, it depends on his mood.

In modern medicine, it seems that the boundaries within surgery are not obvious. In fact, the more high-end hospitals, the more obvious the boundaries are. You don't know what they are doing across departments.

It's no exaggeration.

Zhang Fan's face was black and blue when he was punched by the system. At this time, he slowly said from the bottom of his heart: there is really no genius in this world!

The tone is a little lost.

This is the first time that he has been bullied by the system. In the past, but in surgery, he opened a department and worked hard for a period of time. It can be said that the technology has improved by leaps and bounds, while in internal medicine, he has trouble climbing the threshold.

In a bad mood, even Ouyang wanted to take Zhang Fan to see Ms. Zeng's groundbreaking ceremony, but Zhang Fan was not in the mood.

Zhang Fan is in a bad mood. The tea vegetable hospital is like a barometer. Everyone is careful.

"Don't be late recently. The boss is in a bad mood. If anyone gets hammered these days, don't let me intercede!" The directors of several surgical departments warned their doctors.

Internal medicine is more cautious. "Recently, we have paid attention. The Department of Gastroenterology has annoyed Zhang hospital. If anyone has a problem, introduce Zhang hospital into the Department to find out the problem. The community resident clinic is short of people recently. Everyone knows!"

In the tea vegetable hospital, there are no doctors who are late and leave early. Even the doctors who are cold and cruel on weekdays will laugh when they see people. The patients who smile to see the doctor are hairy. I just have a cold. Don't treat me as a terminal illness!

"Hey, Mr. Zhang!" In the dean's office, Zhang Fan was working hard with professional books on gastroenterology. There was a respiratory problem. He asked Xiao Chen of the medical office to bring a pile of respiratory professional books from the respiratory department. The vertically and horizontally combined internal medicine made Zhang Fan's head almost big. At this time, Li Hui came to the door.

Zhang Fan looked up and saw that it was Li Hui. He didn't pay attention to him.

Li Hui's thick face doesn't matter. When he saw Zhang Fan turning over the book of respiratory department, his face changed and changed. Finally, I sat down on the reception sofa.

"What are you doing here?" Zhang Fan asked without a good attitude.

Li Hui was not polite. He opened Zhang Fan's tea cabinet and found the most expensive tea. He was not addicted to tea. He doesn't even smoke now, all to save money.

Sometimes, Zhang Fan's curiosity, especially the prodigal son in those years, who didn't have ten yuan, but when he spent money, he felt like Li Hui who was like a 10000 yuan household? But now, you look like Yan Jiansheng.

Maybe this is the reality of growth and life!

"I miss you. You're busy all day. I want to see you. It's good to see you. I'll be fine!"

"Hehe, what made you start to lie?" Li Hui is definitely the one who goes to the three treasures hall without any problems. It's better to say that he wants tea than Zhang Fan. He can't make up for his busy cases.

When Li Hui saw Zhang Fan holding a respiratory book in his hand, he had no desire to speak, but he couldn't come in vain. He didn't drink tea in general.

Just when Li Hui was drinking tea and wanted to ask about the digestive department, he called Marubeni and the golden mean joint laboratory.

"Zhang Yuan, are you busy?" Zhao Yanfang from the laboratory called, in a polite tone that made people nervous.

As a leader of the hospital, to tell the truth, I'm most afraid of the people below being polite to you. It's really no exaggeration. When Kwak's Director Zou was late in his term of office, he said soft words to Shi Lei and said: please, don't have an accident again and let me sleep well. As soon as the phone rang at night, I had an arrhythmia.

"I'll be right there!" After hanging up, Zhang Fan said to Li Hui, "hurry to leave with tea. I'm going to the intestinal laboratory!"

"Go now, go now!" It doesn't matter whether Zhang Fan is happy or not. As long as he gets rid of Zhang Fan's idea of going to the respiratory department, he will be happy. Looking at Zhang Fan's appearance

in the room, it is estimated that he can't remember the respiratory department for the time being.

.....

After entering the laboratory of the respiratory department, Zhang Fan saw a group of people dead like his father, and his face was not good.

"Did you secretly carry out human experiments?" Zhang Fan asked subconsciously.

"No!" Zhao Yanfang gave Zhang Fan a white look.

"If only there were no, if only there were no." As long as it wasn't a fatal thing, Zhang Fan was really relieved.

"What's the matter? Talk. Don't worry. I'll tell you the truth!" With a big hand, Zhang Fan knew that the great thing was that the experiment failed and the money was wasted. Anyway, he didn't expect to turn loss into profit in a short time.

"We found a gene target of intestinal tumor and a serotonin like sensitive point, so we developed a corresponding target chemical. After use in mice and rats, it was found that the drug sensitivity was very high for the first time.

Then we expanded the number of trials, but after the second use of the drug, the drug failed. "

Because it has not entered clinical trials, it can not be called medicine. Moreover, Zhao Yanfang also knew Zhang Fan's scientific research level, and didn't say it in detail.

Although Zhang Fan didn't know which target it was, he knew and expanded the test.

"How many times has it expanded?" Zhang Fan's unconscious voice began to tremble. Is this Providence? I just finished loading in the gastroenterology department. Now I'm beaten in the face, and it hurts.

At this time, Zhao Yanfang stopped rolling her eyes, lowered her head like a shy little sister, and her chest collapsed: "thirty times!"

Experimental mice are really expensive. For example, animal experiments of some drugs are suitable for several mice all over the world.

It's not that this kind of mouse looks like a human, but because they have a complete genealogy, which can be said to be 18 generations worse. The most important thing is that you use other mice, which are not recognized by the EU and Jinmao. Animal experiments are not recognized.

Zhang Fan doesn't know what's different about the mouse, but it's too expensive. One that can check

the genealogy for eighteen generations costs hundreds of dollars.

Rational analysis, a wave of general tests, a batch is often more than ten in a group. This is a tentative test, while Zhao Yanfang and them are qualitative and quantitative analytical tests. At least ten groups at a time.

Although the quantity is small, one hundred dollars, one thousand dollars for one group, ten groups is ten thousand dollars, and thirty times is more than three hundred thousand dollars. This is still the price of mice, not even the others.

If this hammer goes down, it will be more than 1 million, nearly 2 million RMB, and a DR (color Doppler ultrasound) is almost gone.

Zhang Fan's mouth is dry.

"Be careful, be careful!" Zhang Fan felt that his mental strength was almost haggard. While reaching for the test records, he said, "who wasn't proposed by the experts of maruzi country?"

He also had a glimmer of hope.

"I proposed!" Zhao Yanfang admitted it in a big way.

"Hey!" Zhang Fan didn't sigh, but his heart was like being hit by a hammer. It was almost broken.

After reading the experimental records, Zhang Fan tried to relax the muscles on his face, relax and relax, "it's okay, it's okay, who hasn't failed, scientific research is like this, who can succeed at one time. Be careful in the future, and be careful."

I'm bleeding in my heart. This is the money I earned by working hard as labor export for tens of thousands of miles.

But it can't hurt people's confidence.

"Zhang sang, I'm sorry!"

The director of MARUKI bowed.

"How about sharing the expenses between our two families this time? You..." Zhang Fan asked reluctantly.

In the original contract between the two companies, who is responsible for R & D and who is responsible for funding, the other one must go all out in scientific research. At the beginning, the meatball country was afraid that Zhang Fan would not help, so it specially added this one. At that time, Zhang Fan was very happy. Now it's all right. He tied himself up.

The director of Marubeni country ignored Zhang Fan's words and said, "although it has no effect on intestinal tumor genes, we accidentally found that the Xingjiao time of mice is longer!"

Experiments, especially animal experiments, are often male mice, and almost all of the drugs to be used clinically are male mice.

Therefore, when a new drug appears, the target is actually men, which is no exaggeration.

This is an unwritten rule of the biological laboratory. For example, for mice that can check the family tree, the price of male mice is very expensive, but the price of female mice is obviously cheap.

When buying mice, Ouyang didn't stick to the cheap and never gave up. She asked others to give away many female mice. She thought about raising them by herself, but later learned that Ouyang would give up if there was a breeding base and the price could catch up with the best delivery room for tea.

Therefore, Zhao Yanfang was not reconciled to this experiment. After the failure of the male, he also pulled a pile of female mice for the experiment.

The result is still failure, insensitive.

The mice after the experiment generally need euthanasia.

But before they had time, they let the male and female mice mix up.

Then they found a strange phenomenon. These mice have been happy since yesterday and are still happy today.

So they called Zhang Fan.

The happy time in the animal world is only six minutes on average. Some males boast that an hour or 40 minutes is bullshit, or they apply anesthetics on their brother. Otherwise, if you kill him, he won't get more than half an hour.

The mouse is different. It lasts about nine hours at a time.

"What do you mean?"

"Maybe we found another function of this chemical!" The director of MARUKI nodded and bowed.

Zhao Yanfang nodded.

"Don't talk. You mean you got me a Viagra?"

Zhang Fan is going crazy. It's so strange that experts fool people.

"We decided to continue our research!"

Zhao Yanfang said firmly.

"Why are you so stubborn, a woman who is not married and has no boyfriend! What does this have to do with you?" Zhang Fan scolded the street in his heart.

This thing is the same as buying lottery tickets. You spent two yuan and won hundreds of millions. People with normal IQ generally don't look at it.

"They treat me as a fool. This is bullying!"

Chapter 1313

"Ouyuan, intestinal Laboratory..." Zhang Fan looked at Zhao Yanfang, who was as stubborn as a donkey. There was no way, but he couldn't decide alone, let alone hold a team meeting immediately. He called Ouyang first and discussed with Ouyang before holding a team meeting.

Zhang Fan doesn't know where he learned this. No matter what happens, he will raise his hand at the team meeting after privately discussing with the team members in advance. Therefore, usually others look like Zhang Fan's prestige is super awesome, so there is no proposal that is not passed by a unanimous vote.

This is really not Ouyang religion. After all, Zhang Fan's understanding is OK. Of course, you have to criticize the internal medicine system, and Zhang Fan has to withdraw from the group offline.

Ouyang was watching TV at home when he happened to see a stick opera. A beautiful boy had an incurable disease and was crying. Her old man advised: "it's all fake." While fidgeting to hand over paper towels.

Because it's too frequent and crying scenes are too frequent, old man Ouyang should doubt whether the director of Bangzi country has a stake in the paper towel factory!

Hearing Zhang Fan's phone call, the old lady really hung up the phone swearing. She didn't cry for a moment. She entered the play very quickly. The speed made his old man feel whether Ouyang had just

pretended.

After washing her face, the old lady stroked her hair and looked in the mirror to see if any hair was not obedient. When she was satisfied, Ouyang went downstairs and took the car just downstairs to the tea lab.

At the same time, Zhang Fan also informed Lao Chen. Ouyang is to discuss things, while Lao Chen is to deal with the follow-up.

Agreed to invest. There are a lot of things behind. Zhao Yanfang can't decide. Lao Chen helps. He doesn't agree to invest. Lao Chen has to wipe his ass for the final thing.

But when Lao Chen heard that Zhang Fan was going to hold a small meeting, he immediately rushed to the laboratory. He is good at this. His executive power is super cow. The cow makes Zhang Fan have a dependency now.

This is people's ability to survive in the workplace. I don't have great skills, but your leadership still depends on my small means.

Three people were in the lounge of the laboratory, "Zhang Yuan, how much will it cost if we try again?"

After Zhang Fan introduced the situation, Lao Chen looked at Ouyang who didn't speak and asked.

"It's not much in the early stage. It's estimated that there are five or six million people to know whether this thing is effective or not. Or a mouse! "

Zhang Fan said Zhao Yanfang's words in his own way.

Because what Zhao Yanfang said is too high-end. What is the sensitivity, threshold and drug resistance? In fact, to sum up, mice are naturally strong. People spend nine hours.

It is impossible to say whether this increase is a percentage increase on the original basis or not.

If the percentage increases, the percentage of mice in other people increases. It's quite a lot for nine hours, but for humans with an average of six minutes, it's chicken ribs. Take oral medicine and increase it by three or four seconds. It's hairy. How should slow-moving people vomit early or early.

At that time, Zhao Yanfang looked at Zhang Fan strangely.

If Zhang Fan didn't see that she was a woman, she could open her mouth and swear. The look in her eyes was naked contempt. Did I just look at the door and spit?

If you directly increase the time, this will be a bit confusing.

Of course, it's still too early to mention the threshold, anti drugs and side effects. If you directly increase the time, you can sell some money even if you don't take it out later.

"I mean, do it!" After listening for a long time, Ouyang whispered to Zhang Fan. After taking a look at Zhang Fan, he continued: "after all, if you want to improve the hospital, you still have to be ruthless in scientific research. You can't wait to win the lottery without paying!"

"There's only a little money at home. Once this failure, it will hurt the muscles and bones. The graduation season is coming soon. It is estimated that there is a greater gap in talents to be recruited this year than in previous years. If we fail, we can't take out the settlement fee. "

Zhang Fan tells his troubles.

Ordinary undergraduates don't receive much tea now. For graduate students, the cost of settling down is not more than 200000. Will love come or not. Tea vegetable hospital also has a brand.

But a better doctor, who has a project, has a higher price. This kind of doctor is not a clinical doctor, but a doctor of scientific research. A clinical doctor is not very valuable in the hospital. He comes to the hospital from scratch. He should change his dressing and make rounds.

What's really powerful is that, like Zhao Yanfang, everything is money, such as settling in fees, villas and settling down family members. Otherwise, people will come to you for tea. Is your tea vegetarian Nang delicious?

"There are still some ways. You are in charge. As long as you are determined to do it, we will find a way. When I go to the tea vegetable government, how can I make some luck? President Chen goes to the bird market to play the autumn wind. Talk to the moderates. Their family is big and they still don't care about this money. "

Ouyang is running for success.

Seeing that Zhang Fan was still hesitating, Ouyang said, "even if you fail. Will the situation be worse than before? Even if we fail, we have accumulated experience. From beginning to end, if the scientific research is not for others, it is a small fight.

Dr. Zhao finally has a good project. Even if it fails, we must have the idea of making a breakthrough. Otherwise, even if you recruit 100 doctors, it's useless. "

Once this sentence was said, Zhang Fan was transparent.

"Yes, it's great. It's just that I've never made this money. Money, paper, don't spend it, that is, a piece of paper lying there. It's useful to spend it!" Although I think so, Zhang fanxin is still like a rag.

"Try?" Zhang Fan questions!

"Try!" Ouyang's eyes are bright.

Lao Chen looked at Ouyang and Zhang Fan. He didn't speak. Because his is to work, not to decide, this self-knowledge still exists.

"OK, now let's take a look at Lao Zhao's experimental results! Lao Chen, remember to keep it a secret! "

"Well, I know Zhang Yuan."

.....

Zhao Yanfang was very nervous. She didn't know whether tea vegetable had the courage. If not, maybe she would be disappointed to leave this place that made her comfortable. After all, she didn't make any achievements. She was sorry for her efforts to read books alone for half her life.

To tell the truth, she would have left if there were not so many strife and exclusion in this place and people were relatively sincere and simple to get along with.

Not to mention anything else, it is difficult to find more assistants in case of emergency test.

When Zhang Fan appeared, the spirit in her heart withdrew, because she saw Zhang Fan in high spirits.

At first glance, she knew that this guy did it.

"Hum! Man, bah! "

.....

"Come on, Dr. Zhao, let's see the results of your animal experiment. What does marukuni say?"

"They participated in the whole process, and now they can't hide!"

"Oh, they eat meat without paying?" Zhang Fan is a little unhappy. Unfortunately, there is no way. Who asked him to sign the contract himself?

Sometimes this thing looks like a good thing that big steamed buns and big steamed buns fall from the sky. As a result, the steamed buns that fall down are frozen into stones and smash all over the buns!

"Well, call them and have a look together."

However, Marubeni also has regrets. For example, Zhang Fan proposed the treaty, but they proposed the liquidated damages. Now they also feel that the real chicken is at a loss. If they don't have the liquidated damages and this money, they will pull the flag and start a new stove by themselves.

A group of people, men and women, a group of people in white coats, goggles and masks, then turn off the lights and close the curtains. Everyone can't speak, as if they want to create an environment where they can steal things.

Then give medicine to a big mouse.

Laboratory mice eat oily and smooth. They are covered with black satin, pink claws and black eyes. The more they see, the more special they are, which makes people diaphragm.

Really, it's no exaggeration.

Many people think that the experimental mice are white. Zhang Fan thought so at the beginning. In fact, there are black and white, different kinds, and there are many black families of rats used in the experiment.

The greasy mouse really makes people feel diaphragmatic. Zhang Fan has goose bumps. He is naturally afraid of this thing.

Because when he was young, he was three or four years old. The big cat of their family, with a half dead rat in his mouth, went into his quilt to play with him. At that time, Zhang Fan had a psychological shadow.

Laboratory mice are not afraid of people, not to mention taking medicine.

Just like three rats drinking and boasting, rats taking drugs are not afraid of people. She sniffed at the root of the mother mouse's tail.

"Put in a little catalyst." Zhao Yanfang whispered.

Zhang fan understands why people try it out with mice. As long as it's not in lactation and pregnancy, it's not much different from people. When you have enough to eat and drink, you want to do bad things.

The mother mouse reacted and stopped avoiding.

"Timing!" After seeing a medicine man riding up, Zhao Yanfang said softly.

The research dog in Marubeni began to time.

In silence

A group of people quietly looked at the two black mice in a glass cover in a dark environment.

In and out, just watch.

An hour later, the of Ouyang's novel said to Zhang Fan, "no, I'm a little dizzy. I'm going out!"

Then Ouyang left quietly.

Lao Chen looked at Zhang Fan. Zhang Fan's eyes widened, as if to say again, dare you!

Lao Chen smiled, indicating that I continued!

Really, Zhang fan used to think scientific research was very important.

Now I understand that it's so boring.

For example, now, it's very fragrant and gorgeous, but in fact, it's boring and disgusting. Looking at the fat two mice, one in and one out, it's disgusting. Zhang Fan hasn't been so disgusted with intestinal obstruction surgery.

really

Take another look at Zhao Yanfang, just like watching porn, I don't feel uncomfortable at all!

Six hours

Zhang Fanshi couldn't help it. In the lounge outside the laboratory, he didn't want to drink water. When his brain was free, there were two fat figures.

"Don't be nervous!" While talking to himself, Zhang Fan shook his head and wanted to throw out two black shadows.

Chapter 1314

Ouyang and Zhang Fan's mentality may not understand the origin of the rich family. Don't they just have a little money? After losing a lot of money, I went home to inherit tens of millions of family assets.

And ordinary people can definitely feel it.

For example, when you buy a house, you have to take out five or six wallets and all your savings to buy a cement pier. To tell you the truth, if you don't look at the house, you won't be able to sleep at night. I'm afraid there will be problems in the middle and you'll be trapped.

This is the mentality of Ouyang and Zhang Fan.

Moreover, experts generally don't pit people. It's unusual to pit people. For example, if you really want to invest millions in it, the last word from others is that you failed. Ouyang and Zhang Fan had no time to cry upstairs.

The most important thing is that Ouyang and Zhang Fan have been experts in pitching people. They know too much about expert temperament.

For example, earlier on, the state sent a batch of surgical vehicles to various poor and old border areas. Tea vegetable was divided into two. At that time, tea vegetable hospital and renjiahua hospital went hand in hand. Ouyang wanted to eat more and occupy more.

But the president of Hua hospital doesn't give up.

Ouyang began to deceive the leaders. It seemed that there were no two surgical vehicles. The tea vegetable hospital would be forced to close down soon, and it would not be able to operate. Anyway, how serious it was, it really made something out of nothing.

Finally, the tea vegetable government had no choice but to buy Ouyang an extra car, more than two million. At that time, the leaders in charge of finance of tea vegetable were almost broken by the unpaid primary school teachers. Therefore, Ouyang can get money from the government, which relies on bank loans to pay civil servants. Ouyang and Zhang fan are not afraid.

Deeply afraid of Zhao Yanfang and the experts of xiaowanzi, they turned around and gave them such a look.

My ancestors were never rich. It's too special.

Throughout the day, Zhang Fan, Ouyang, Lao Chen and later Ren Li stayed in and out of the laboratory all day.

"It's not over yet! I can't see the mice. I won't let the last two mice die happily!" Lao Chen stealthily touched it and whispered to Zhang Fan.

Zhang Fan is crazy. He is almost out of his bones. In a word from old Chen, Zhang Fan has come to the

spirit again.

"Go and ask Zhao Yanfang. It's not appropriate for me to ask." Zhang Fan pays more attention to this aspect, especially women of the same age. If he can avoid contact, he can avoid contact. Although his face is a little black, it is still charming.

Lao Chen doesn't care. Although his face is white, he has wrinkles. He doesn't know that he thought he covered his face with the white gauze in the operating room.

In the lab, "what's your heart rate and how much you breathe?" Zhao Yanfang sat in front of the computer and asked the experts of meatball country again and again.

The experts of Marubeni country, with red eyes, stared at the monitor, looked inside the glass cover, and stared at the two black mice dressed like Teletubbies.

To tell the truth, it is estimated that the two black mice were happy at the beginning, because they have not seen the opposite sex since they were born.

I thought I was going to open my stomach and feed arsenic, but I didn't expect such a good thing.

After putting on the heart rate breathing instrument, the two mice began.

As a result, this thing is also a hard job. If the mouse can speak human words, it will definitely say: your uncle, pull me to eat arsenic. The skin is broken. Why don't you pee!

"Heart rate is normal, breathing is normal, blood sugar begins to decrease, and glucose needs to be supplemented." Experts in Marubeni now speak very smoothly. If they don't listen carefully, they think Lao Ju is talking.

Once every ten minutes, once every ten minutes.

To be honest, scientific research is more boring than surgery.

The operation is boring. Maybe you can drive with the little nurse, or ask the old nurse to tell you what moths the old man has played at home recently. Does he stare at the girl wearing suspenders or black silk in the street and drool again.

It can be adjusted anyway.

But the laboratory can't do it. Various data, such as this test, sometimes a pair is not accurate, and often dozens of pairs of mice are opened as soon as they are opened. Hey, hey, really, the mice can't cry, otherwise the cry of a laboratory can't be called one

It's terrible to think about it

After Zhao Yanfang finished recording, Lao Chen stopped asking. What he could think of was already complete. Before going out, Lao Chen looked at the mouse whose tongue had been spit out, and Lao Chen couldn't help shaking.

As a male, what he had been looking forward to was so digitized. Really, think again, if he was dressed like this when he was at home with his daughter-in-law, and then stared at, he would get goose bumps all over his body.

"It's their own sugar for the rats. It's said that the purity is several levels higher than that used by people."

"Oh!" Zhang Fan is very nervous now, just like two villains fighting in his head.

One expects the test to be effective, and the other expects the test to be ineffective.

To tell you the truth, he has rarely been so tangled.

What are the benefits? If we really want the experiment to succeed, just buying patents will be enough for the tea vegetable hospital to lie down and eat for several years.

Human beings have made great progress in medicine. To be honest, it feels like rapid progress. In fact, to tell the truth, people have no intention of treating cancer, rheumatism and Parkinson's disease.

This is no exaggeration.

When there was no sildenafil, many hospitals and laboratories were making such drugs. China is no exception.

China's way is a little different, or it's tonic. The Northeast tigers eaten by leaders at all levels dare not come. They all run to Lao maozi. There's no way. Come and cut the chicken. Can the tiger not be afraid!

Or tonifying the kidney. Then many big men ate Liuwei Dihuang Pill concentrated pill. This medicine seems to be a secret recipe. However, if it is a pharmaceutical factory, it does not produce this medicine. It is more popular than Hawthorn pill. It is absolutely no exaggeration.

Some people even eat this stuff and become liver failure. They eat it like sugar beans three times a day. The toxicity of poison accumulates. Who will die if he doesn't die!

In fact, this thing was made by a small pharmaceutical factory in China. After it was made, it was the same as those who sell brain gold in later generations. Advertising is full of temptation. Anyway, if you want the other party to call, you need to foam God oil.

Then post a picture of a yoga monk or an old man with a white beard, which really has a sense of mystery.

This thing was all the rage in those days. Many customers used it in hair salons that had to pull down the iron fence at any time.

What the hell is this thing? To put it bluntly, it's anesthetic. If it's on the head of the gun, I don't know whether it's bright or not. Anyway, it can make people feel less and weaker. It's like the money for beauty hairdressing and shaving. If they have to make each other walk with their legs tilted and don't break their skin.

But the biggest drawback of this thing is that long-term use will lead to really soft. If it is really soft, no matter you blow, play and sing, or seductive stars, you won't win.

To tell the truth, this is the idea of Chinese pharmaceutical enterprises. Fast money, fast money, we must have fast money.

Europe and America, too.

There's a story here. It's true.

In those years, male doctors held a conference in Belgium or Austria. Anyway, it was a small country, gathering many top male leaders in Europe and America. There was no sildenafil in those years.

Then, everyone said their own research results, but they were not particularly satisfactory. The biggest problem of all kinds of drugs was side effects.

Generally speaking, although various drugs can brighten men's long guns, they all have a side effect, that is, after long-term medication, when the drugs become drug-resistant, the long gun that could have provoked a dry towel will directly and completely become unable to pick up even a napkin.

This is why sildenafil became popular all over the world. This thing has no side effect. Although it may cause heart failure, are heroes afraid of death? no

Just when everyone thought that this meeting was fruitless, an old doctor in Mishima, in his eighties, pushed the door and came in.

Then he said: he has achieved results and has no side effects.

Everyone doesn't believe it, because how many people have studied for many years, what can you do as an old man.

As a result, the old man took off his pants

Really, in a meeting of hundreds of people, an old man in his eighties took off his pants. This thing can be on the news.

As a result, people showed their long guns and said proudly, "this is their own achievement."

You don't know the atmosphere at that time. The major pharmaceutical companies were crazy and wanted to drag the old man to ask for the name of the medicine.

Think about it, an 80 year old man, this is not an 18-year-old boy!

As a result, although the drugs developed by the old man are useful, they have disadvantages. They are injections, not intramuscular injections, but vascular injections, and they have to be injected on a long gun. Really, the old man of the three islands also fought hard.

When the old man said the treatment, the hearts of pharmaceutical companies were cool.

Unless it's really a helpless person, no one will give himself an injection in advance. It hurts when you think about it. If you go to the beauty salon in the iron fence, take out the needle and give yourself a needle, and then you can't scare teacher Tony to death!

Although the drug has no side effects, this method of use is too egg shaking. It's really shaking.

However, the drug was still popular for some time, and then there was no drug after sildenafil came out.

These drugs are mainly aimed at ed.

For example, sildenafil, you are a pretty king. After taking medicine, you are still a pretty king. Should you vomit in five seconds or five seconds? It's amazing that you can light up again in a short time.

However, this is already quite good, which makes many people who want to spit out have the hope of having children from generation to generation.

As for the extension of time, compared with ED, it is not so famous.

For example, the so-called third brother is actually the divine oil made by China itself. And it is said that this thing is very popular in meatball countries. This thing can shine on one side and maintain the persistence of gloss in time.

But once there is drug resistance, the consequences can make men cry to death.

In modern medicine, there are about three kinds of drugs for prolonging time.

One is psychological intervention. To put it bluntly, let the patient relax himself, and then don't think about it. Think about the mysterious problems such as why the earth rotates around the sun.

The other is anesthesia, and God oil. The last one is SSRI drugs.

What is SSRI originally doing? Just like sildenafil, it was originally used to treat cardiovascular drugs, and SSRI was originally antidepressant.

This thing has one price for antidepressants and another price for cleaning guns. Really, it's too chicken to play.

When the drug was discovered that year, many patients had poor effects on depression and other diseases after taking the drug, and patients who could try the drug did not return the drug to the doctor. I'm going home with the medicine!

And after the onset of the disease, it was found that although the patient was in a crazy state of foaming at the mouth, the long gun was bright. The doctor turned the patient over with an electric stick, but the other party was still holding the sky high.

So, later, this thing was used to treat premature (a) discharge.

Many people, many men, in order to prolong the time, don't follow the doctor's advice and double eat. After eating too much, their blood pressure drops. They are calm and don't change their face when they see the earth explosion.

Moreover, eating this thing for a long time can indeed change men from one minute to two minutes, but eating too much will induce suicide.

Of course, the market of this drug is not as big as that of sildenafil after all. People who understand this thing naturally understand it, and it's hard to explain what they don't understand.

Anyway, I'm finished, so I won't worry about others!

"Zhang Yuan, you and the leaders go home first. I don't think the meeting will end in a moment and a half."

Lao Chen looked at Zhang Fan's tired face and said.

To tell the truth, Zhang Fan is really haggard. He finally realized why his master put down the scalpel early before he was 80. Scientific research is really tough!

Chapter 1315

At five o'clock in the morning, the eastern sky of tea vegetable gradually lit up. Compared with the mainland, the morning light of tea vegetable is not very late in summer, and the street is bright at five o'clock. However, because there is a time difference of two hours from the capital time.

This time is the most ripe time for serious sleep. Lao Chen wiped his face and called the driver of the car class. After staying up all night, old Chen Xian is very old. He hasn't been on the night shift for a long time. All night, except his mouth, he feels that other limb organs don't belong to him.

I really feel like my waist and legs don't come.

Just after calling the car class, Zhao Yanfang came out of the laboratory with a stack of reports. Lao Chen subconsciously wanted to pick it up, but after thinking about it, he took back his hand: "how about it?"

"The results showed that there was no obvious abnormality in all indicators, and the time of mating (a) increased by 1.5 times. Now inform Zhang Yuan! "

Zhao Yanfang didn't give the report to Lao Chen.

Lao Chen looked at the time and hesitated. It was only five o'clock.

It is estimated that the leaders didn't sleep well last night, and the results came out. What are you worried about now? It's not an emergency.

Lao Chen hesitated. Zhao Yanfang immediately took out the phone and wanted to dial.

"I fight, I fight, how can you be so anxious!" As he spoke, Lao Chen quickly began to call.

Before the bell rang twice, Zhang fan connected the phone.

Zhang Fan's voice was as low as a thief: "the result came out?"

"The effect increased by 1.5 times, and no other adverse side effects were found. Dr. Zhao and I were very worried, so we called you directly. " Lao Chen immediately told Zhang Fan the result and explained the reason for calling at 5 a.m. in one sentence. And Lao Chen's voice is not big. The control just let Zhang Fan hear it in confusion, but it's not too loud. This is the level.

Lao Chen has worked in the medical department for more than ten years. He really has his own way to report his experience. The more important things are, the more the results are said first. No matter good or bad, what explanation in advance or what suffering is, it is a matter of twice the effort with half the effort. If it is not done well, it will also have a negative effect.

People's leaders have their own ideas about what's going on. Don't think all the leaders can be leaders are meat belly. And Lao Chen knows that the final lower limit you can work hard is the bottom of the platform. And if you want a high ceiling, you have to do things well.

"OK, I see. I'll come right away." After that, I was going to hang up. Zhang Fan said, "don't call the European Court first. The old lady doesn't sleep well."

"OK, Zhang Yuan, I know!" Lao Chen has a habit of calling his leaders. He won't take the initiative to hang up until he hears the leaders hang up. It's like licking a dog and calling someone else's girlfriend. He always expects others to say more, while Lao Chen is in case the leader doesn't finish.

Zhang Fan secretly dressed and the light didn't turn on. As a result, the light at the head of the bed came on when he felt for his socks.

"Wake you up?"

"Is there an operation?"

They all care about each other first. Although they have only been married for two years, they already have a feeling of family.

"The people in the lab have done experiments and got results. They all stayed up all night. I'll go and have a look now."

"Oh, you drive carefully on the road."

Zhang Fan gently went out of the door.

The tea vegetable air in the early morning is the best. The waste heat during the day has been reduced to the lowest. The air blown down from the snow mountain can make you feel a little refreshing, which is definitely more comfortable than blowing the air conditioner.

The sanitation workers on the street have begun to sprinkle water, and some uncles, either wearing exercise clothes or holding whips and other exercise tools, are ready to go to the tea vegetable River to

absorb and spit!

Although the community where Zhang Fan lives now is not the best in terms of luxury, the safety standard is definitely the best in terms of tea. There are at most rows of sharp iron fences around other people's community, and Zhang Fan's community has electrified nets on the walls.

I don't know whether it's true or false, but it looks like a prison!

Out of the community, Zhang Fan mentioned the speed. I don't know whether it was because he was young or because the system improved his quality.

No matter how tired Zhang Fan is, he only needs to sleep for a few hours and wake up full of energy.

Never get dizzy. Of course, if I played with Shaohua too long the night before, it would be a little bad. It was said before that the fight between the men and women consumed a lot of energy. Zhang Fan didn't believe it at that time.

When he was a single dog, he felt that giving him a woman could create a race. As a result, now, let alone create race, if you can beat Shaohua and let others have a sweet smile on their face, you have gone all out.

It's OK to drive fast, but be steady. For example, Zhang Fan, the car steadily entered the laboratory.

Although the tea element laboratory has been separated from the tea element hospital and is responsible for its own profits and losses, in fact, the laboratory is in the courtyard of the hospital, and the personnel are mainly doctors of the hospital.

The cost is mainly the tea element small Treasury.

Now that the results have come out, Zhang Fan will not tangle. In those days, his father told him not to cause trouble, but never to be afraid of it.

Once there is an accident, deal with it calmly. You kneel there and cry, and it won't change the established facts.

As soon as I opened the lounge of the laboratory, experts from marukuni, Zhao Yanfang and Lao Chen were all there. Looking at their mental state, I didn't know that they thought they played mahjong all night like Xue Fei.

Lao Chen drank strong tea like cow blood, and several others drank Starbucks coffee. In the past, the cafes of tea vegetarians were all Russian, Lao maozi's coffee and the coffee of various stannic countries.

What's the difference between Russian coffee and Jinmao coffee? Zhang fanjue's stuff is almost the same. Anyway, he has never drunk the so-called silky feeling. That is, sometimes when he really has to

stay up all night or spin around, Zhang Fan will drink some coffee, because tea seems to have a refreshing effect on Zhang Fan.

Shao Hua drinks tea in the afternoon and tosses Zhang Fan with his eyes open at night until the early morning, so usually, don't say Shao Hua doesn't drink tea. Even if she drinks, Zhang Fan won't let her drink. It's mainly because she loves tea!

Seeing Zhang Fan coming in, Zhao Yanfang's mouth tilted slightly and her head held up 45 degrees. I didn't have Zhang Fangao, but I had to look at Zhang Fan with condescending eyes.

"What's the matter with your neck? You can't stand it after a night? Go to the rehabilitation physiotherapy department later. Don't let the muscles leave old wounds! "

Zhang Fan said solemnly, then took the experimental report, sat down and began to read it.

As soon as the report is opened, Zhang fantou is big. He starts with a series of figures. This thing is not a single data, but also a linear function diagram of drug effect decomposition. A variety of formulas. To be honest, Zhang Fan has never seen a function before.

In medical school, physics, chemistry and mathematics are often studied in the first year, but mathematics is more partial to probability, because probability is used more in medical treatment. But this nonlinear or linear function is a little troublesome for Zhang Fan.

But this is related to the main direction of the hospital in the future. Even if you have a headache, you should bite your teeth and watch. You can't be like some people who see netizens. The other party is ugly and wants to run, and then all the gossip is on the news.

Even if you are on your knees, you should accompany others to eat spicy hot!

After reading all kinds of data, Zhang Fansheng spent more than two hours. There are still many people who don't understand“ Is this drug renal metabolism? "

"The liver also has metabolism, but after coupling with liver glycogen, it enters the blood directly and finally passes through renal metabolism."

"Will such a large molecule cause kidney damage?"

Drugs. In the past, drugs were simple, just as people used to like their neighbor's little sister. Many drugs were made directly in the laboratory after symptomatic chemicals were found in various plants and minerals.

But later, slowly, the doctors found that simple drugs were getting worse and worse, just like men. When they understood that holding a little sister like a pushpin was actually too green, they began to empathize and don't love an old woman who liked the rough waves.

Later, the drug molecules became larger and larger, and even some drug molecules were so large that the human body could not metabolize. In fact, the most difficult thing in the pharmaceutical industry is this macromolecular drug.

Like antitumor drugs.

When the tea element hospital first developed it, it didn't run to prolong the time for mice, it ran to fight intestinal tumors.

As a result, although it can prolong the time of mice, the molecular weight is too large.

"At present, there is no data showing abnormal renal function. In this regard, we will focus on strengthening observation." Zhao Yanfang didn't expect Zhang Fan to find this problem.

She originally thought that when Zhang Fan couldn't find anything wrong after reading it, she would be a teacher for Zhang Fan again. As a result

This is why she can only be a scientist, not a director of the medical department.

"Yes!" Zhang Fan nodded. Just about to speak, Lao Chen had handed his Parker pen to Zhang Fan.

Although Lao Chen signs his name now, he still uses a good pen.

Zhang Fan took the pen and directly drew a big circle on the report, and then marked a sentence behind it, which may cause abnormal renal function. Please pay attention!

Instead of being a teacher, he was a teacher! Zhao Yanfang felt that she couldn't hold her chest up for a moment.

After reading the data, directly enter the physiology and biochemistry, and start the analysis from the mouse's breathing. For example, for a period of time, the mouse's breathing becomes faster, which must also be reflected in the report. Otherwise, if you don't analyze the abnormal breathing, you won't pass the test.

"The amount of data is too thin. You don't even have a hundred cases. Are you sure the mouse is excited to the top? Isn't this nonsense? No, do it again! "

Zhang Fan somehow let old man Lu practice on his paper for a long time. You let Zhang Fan write his own paper. It's nonsense. Although it's exaggerated, there are absolutely problems everywhere from format to wording.

But according to the paper, Zhang Fan is still quite powerful. Zhang Fan did not say that he had read a car of papers, but at least half a car of papers.

Zhao Yanfang is going to stand up and quarrel with Zhang Fan. Before the experiment, Zhao Yanfang, who gave money, felt as if she were committing a crime.

The experiment is over. That's good. He began to dislike the lack of detailed data. Is there a person like you.

Had it not been for the later experiment, Zhang Fan would have been expected to take out his wallet. Zhao Yanfang would have won the report and wouldn't let Zhang Fan see it.

After working for more than four hours, Zhang fancai finished reading the report.

"Comrades, it's hard. Although there are many problems, the general direction is right. Let's go and see the experimental mice. "

Zhang Fan also breathed a long sigh of relief. Generally speaking, he had a head.

The mice are so lucky that they can live for a long time. Otherwise, the conventional experimental mice will be euthanized directly once they finish the pharmacological test.

Into the laboratory, inside the glass cover, two mice, one diagonal, are really as far away as they are.

And they are butt to butt. They will never look at each other.

Zhang Fan glanced at the mouse facing the laboratory door.

The black eyes of the mouse also lost their energy. After seeing the people, if it was an individual, it would definitely scold: "your uncle, I can't spit out. Spitting again is peeing!"

Chapter 1316

"How's it going?"

"Very strong!" Zhang Fan praised against his heart. To tell the truth, although Zhang fan can't do this kind of experiment and study such drugs, he doesn't like it in his heart, just as physicians despise surgeons in his heart.

This contempt chain really exists. For example, when Ren Li asked Zhang Fan to engage in internal medicine, Zhang Fan didn't say a word. Ren Li once said: "it's a pity to be a surgeon with such a good body and such a serious temperament!"

Zhao Yanfang looked at Zhang Fan proudly. Zhang Fan looked at the mouse. The mouse bowed its head and wanted to drill into the corner.

"Expand it? I think this is my chance and also the chance of the hospital! Today's opportunity gives me the feeling that it's like the time when my teacher and I successfully achieved lung transplantation without reperfusion injury. The cells on my body are happy and excited. "

She is really worried that Zhang Fan will finally give up R & D because of the prospect or money.

To be honest, there are many such things in China. The insulin of that year was similar to that of anti malaria, but an old lady insisted on anti malaria.

Now Chinese people are almost monopolized by foreign enterprises with insulin. If it continued in that year, it would be possible to hatch an enterprise similar to GlaxoSmithKline in such a large market.

Glaxo is a cow. In its early years, it actually accumulated by relying on cimetidine. This thing is like a snowball. The bigger the snowball rolls up, the faster and bigger it is.

"Is your teacher retiring soon?" Zhang Fan's answer was not what he asked. China's liver and kidney transplantation, if you don't brag, didn't take much time to squeeze into the world-class from blank to now.

But lung transplantation is obviously not good. There are many reasons. The biggest problem is that the biggest purpose of lung transplantation for Europeans and Americans is to improve the quality of life, while Chinese people are to live. In fact, the last problem is money.

Lung transplantation is a double height operation, difficult and high-risk operation, so let alone others. The operation cost and later treatment cost alone make most Chinese stand outside the threshold.

When it comes to lung transplantation, I have to mention Zhao Yanfang's teacher, old Xia.

Academically, old Xia and Mr. Zhang Fan and Mr. Qiu are of the same generation, but they are about the same age as Mr. Zhang Fan. The old man left Hankou Town, the headquarters of Qiu sect, which is a

headless case in the academic community.

Old Xia is not a flesh man. Finally, he stayed in the city where the white lady met her husband, and then let the originally unknown hospital become the most powerful existence of lung transplantation in China. Really, this is also an example of a hospital brought out by a person and a team.

Just like old man Wu to Fang Dong and old Lu to Qingfu, they are signboards.

"My teacher? Save it. You can't even satisfy me. You still miss my teacher. Why are you so worried? " Zhao Yanfang grinned like a little wolf dog with its tail stepped on.

"You? Hehe, go wash your face and tidy up your hair. I'll have a meeting later. See if I can meet you! "

With that, Zhang Fan left the laboratory with the report.

.....

"This must be brought with the government, otherwise we can't handle such a big plate. It's a pity to sell it to foreigners. If it fails, there's nothing to say. It's just a military training. But once you succeed, it's really a pity! "

Ouyang looked at the results of the report and said to Zhang Fan.

"You mean pulling the bird city government in? It's a little difficult. If they come in, do you think they will be strong enough to cause our owners to lose control? "

Zhang Fan has some doubts. If someone sends some leaders who don't understand the business, you will have a big head. Just like the tea vegetable hospital was just upgraded at the beginning, it makes you think about the second leaders of the hospital who abuse power. What do you do.

"Who said the bird market. The bird market is too big for us to serve. We cooperate with the tea vegetable government. " Ouyang smiled mysteriously.

"Let them pay?" Zhang Fan is a little surprised. The poor tea vegetarians are almost becoming pants. To tell the truth, now there is a big boss who says he likes the feng shui of the tea vegetarians building and wants to pay for it. It is estimated that the tea vegetarians government can sell it without hesitation.

It's true that there is no job but no wealth. The tea vegetable scenery is super beautiful, but it's all on the border. It's too difficult for tourists to come. And industry. People around Stan want everything.

But in a place so far away, small commodities are contracted by temperate people, and clothes are for everything. People in Yangcheng have contracted, especially in several towns such as Humen, where there are tea vegetable offices at the border! It's a town!

Too chicken bullies people. When they need the local government, people look for the tea vegetable government. When the tea vegetable government needs them, they say they are subordinate units. Don't wait ~! The tea government is really speechless!

You are a deputy provincial leader and a mayor. You are really ashamed!

Stan's injection drug was contracted by the old watch, and the capsule was contracted by Jiadong Peninsula.

The most tea government can do is to set up a gas station to refuel their big trucks!

Therefore, Zhang Fan thinks that they are poor and suck their fingers. How can they have money!

"You're stupid. The tea vegetable government has no money. That's because the tea vegetable government has no good projects. If there are good projects, the tea vegetable leaders can go to Zhonghai for money!

Moreover, our hospital is in tea vegetarians. We are strong in carrying forward the past and opening up the future. What do you do if you attract the bird market and meet unreasonable people?

But the tea vegetable government, we're not afraid. We don't have to be afraid. He also helps us. If something goes wrong, you will hand it over to the government. "

Ouyang taught Zhang Fan hand in hand.

"Both good and good? Just give him some small cakes? "

Zhang Fan thought and said.

"Yes, if you really want to take this medicine, can you resist it or can I resist it. Look at sildenafil as an example. "

"I see!" Zhang Fan nodded thoughtfully.

Medicine, medicine, it seems that Chinese medicine is very good on weekdays. In fact, like high-end weapon electronic chips, this thing is monopolized by Europe and the United States.

For example, one year when the flu broke out, oseltamivir was known as Tamiflu. What price did it sell? Finally, the doctors who can prescribe Tamiflu in the hospital must be doctors at the director level.

Why, myrrh, it's monopolized by Roche. This macromolecular drug is formulated for you, and you generally can't develop it.

There are also anti-tumor drugs and various anti rheumatic immune drugs. Really, they are all imported.

Many patients can only watch helplessly and can't afford to eat. They can only wait to die.

And Huaguo pharmaceutical factory has studied how to treat colds and strengthen bones. For example, for a cold that can be cured without drugs, you go to the drugstore to see how many kinds of cold drugs there are, and then you look at calcium tablets, how many kinds?

China's pharmaceutical enterprises have four main incomes. The first category is biological drugs. The biggest biological drug is growth hormone.

Then there is the vaccine. If you don't like it, China's vaccine policy is so good that it almost has to be vaccinated. All the vaccines are paid by the state, but you can buy a private plane by relying on the vaccine. If you buy a plane, you can buy it. That's your skill! But don't fake it. One year's rabies vaccine made Chinese people shiver in a cold sweat.

Let the Chinese doctor tremble in a cold sweat! It's terrible, really.

The third kind of income is Chinese medicine, especially those that dredge blood vessels. They can fight when bleeding or blocking. Anyway, they are very high-end.

The last piece is real estate. It is true that the fourth type of income of pharmaceutical enterprises is real estate.

Therefore, there are pharmaceutical enterprises in all provinces, but the pharmaceutical enterprises in all provinces are united, and there is no GlaxoSmithKline that is going to be lonely.

Digital biological research that does not make money can only rely on state subsidies. Their R & D is required by the state, but they may not make money. Sometimes, it's funny.

No second dealer has money in R & D.

.....

In the afternoon, in the dean's conference room of the tea vegetable hospital, almost all of the tea vegetable intestines and stomach came, and even the leaders of the company came.

At the door of the conference room stood young men with guns.

In the conference room, Zhang Fan presided over the meeting.

"Dear leaders, this is the case." After Zhang Fan's report, he took a look at boss tea vegetable.

"Researchers from Marubeni are also involved. Will there be a problem with this confidentiality?"

The military leaders first thought about secrecy.

"I'm not afraid. The main data have been sealed. There is no data for this macromolecular drug. When they improve it, we have registered it. So they can only cooperate with us.

Although there is still time, there is not much time. Therefore, leaders, whether to participate or not, must reply to us today. Otherwise, once an accident occurs, this consequence is not something that a small hospital can afford. "

Zhang Fan is also afraid of long dreams. If the tea government studies it for half a year, the cucumbers will wilt.

"Can the budget be reduced by a generation? Zhang Yuan, you see, in recent years, we have given full support to tea vegetable hospital. You want an operating car, we will find a way to get an operating car for you, you want a building, and we have to build a building for you when we are in debt..."

The \$3 billion preliminary test made the boss of the tea government feel pain when swallowing and spitting.

"Leaders, we don't want much, it's just early investment. We have to take out one hundred million yuan and project testers ourselves. The government must take at least nine hundred million yuan to participate. The remaining two hundred million yuan should be borne by the pill country and the golden mean.

If you enter the clinic in the future, you must join the pharmaceutical enterprises of other countries. And the amount is actually small. "

Zhang Fan's idea is to make fun of himself, and then let the tea government pay 900 million yuan, let them buy tickets and play with them.

"We pay so much money, but the share accounts for only 5%, isn't it? Isn't it a little too little." The boss of the tea government is not reconciled.

"In fact, the distribution has been signed with Marubeni and the golden mean, and this 5% is given out from the share of our hospital."

Chapter 1317

x

I don't know from which year, it seems that there are a lot of places with more money, especially in the south, not to mention the county, many affluent villages can form a large consortium of tens of billions.

For example, in the real estate speculation group, the chicken was actually the aunt in several villages. She felt that mahjong was boring and the male model was tired of playing. Then she swept the land of

China with her grandson and daughter-in-law.

There are also fried garlic balls. Several big brothers on the peninsula think it's too slow to make money as a second-class dealer. Is it right? If the stick and pill countries quarrel with China, they will let the garlic in their hands press the goods. These guys think about it and contract the origin directly.

Before the farmers planted garlic, they gave money and said I would take all this. Then many garlic producing areas do not sell any garlic at the harvest season. After killing the ball country and the stick country, I think this thing is too profitable. Then it swept the land of China.

Regardless of their vision and courage, they have money to play anyway. But in the northwest, especially tea, when Zhang Fan said 900 million, the lights of the whole government building were not turned off all night. To be honest, if the money was put in some rural areas in the south, it can be done for you.

But tea can't.

Boss Cha Su doesn't get off work. Everyone works overtime.

"900 million! Not a small number! " The leader in charge of health didn't know how many cigarettes he had smoked. It was disgusting to smoke another mouthful, but he still couldn't help lighting one.

"Yes, not a small number! Have you paid all the contract fees for each mine this year? " The boss's mind is full of accounts. Have you collected them yet.

"It's all in place, but it's not enough to fill it all into the tea vegetable hospital. Moreover, the flood season will come soon this year, and the guarantee funds of various units must also be reserved." The leader in charge of finance is going bald.

Now, like the leaders in charge of health, he can't listen to the tea vegetable hospital. Once he listens to the tea vegetable hospital, he becomes ill.

"Leader, the capital expert called back." A leader who looked like Lao Chen opened the door and gently said a word to everyone present.

"What did the expert say?"

"Experts say that we should join in quickly, and we should also join in smashing the pot and selling iron. Macromolecular drugs have been formed, and those with a high probability can pass clinical trials."

Not only did the government listen to Zhang Fan of the tea vegetable hospital, but after listening to the report, it found the most authoritative expert organization for consultation at the first time.

In recent years, the government has also become smart. It will not be able to deceive the government's various contracts by opening a broken Mercedes Benz.

"Well!" The boss was lost in thought and the others stopped talking.

"Ask some banks of tea vegetable..."

"Last year's civil servants' wages, young crops subsidies and animal husbandry resettlement loans have not been paid back. Now I call all presidents. They don't answer the phone. They are deeply afraid that we will lend again!"

Those in charge of finance are almost crying. Especially if they follow the enterprise, the tea vegetable government can go bankrupt. There is really no main industry.

For example, the tourism industry of tea is a joke. For example, when wild peach blossoms bloom, the government wants to make money. Then it sets up a fence in the peach blossom forest to sell tickets. As a result, people don't look at peach blossoms and go to see safflower.

Anyway, there are many Taolin forests. You can't set up fences for each one. Many people say that the West Lake doesn't charge, but the city doesn't rely on tourism.

"Why don't we contact the bird market and ask them to give us some support?" The leader in charge of Health said tentatively.

As soon as he said this, the boss gave him a look of contempt from the king.

"Well! Also, when they come, we have nothing to do. " The leader in charge of health seemed to say something to himself.

"Why don't you talk to Zhang Fan? After all, there are two poverty-stricken counties at the national level here. Can we have fewer conditions for joining, or we can do it by stages in the future? It's too difficult to do it at one time."

The leader in charge of finance is smart. Although he speaks well, we all know what he thinks. He wants to play without rabbits and without Eagles! He wanted to eat meat and was afraid to break his teeth

"Why don't you try? Do you think Zhang Fan and Ouyang are good talkers? Comrades, there are difficulties, but you have also heard that experts at the national level support that this is an opportunity. We should break the shackles of thought and seize this opportunity.

Look at the tea vegetable hospital. Don't they just seize the opportunity they should seize? Now they have a position in the whole frontier and the whole northwest. Dean Ou used to come and make trouble with us. Now, look, how long has she not been here?

Why? Is Ouyang good at talking?

No, no, comrades, she doesn't like our subsidy now. So, comrades, we must seize this opportunity.

Now raise your hand to vote and collectively decide whether we need to seize this opportunity. "

It's heroic, but what others say is also good. Collective resolutions and seizing opportunities are not gambling.

.....

I had a meeting all day and pulled the skin all day. Zhang Fan is sometimes wondering why the more he moves towards the high-end, the more he quarrels, there are so many things. For example, several consortia in Marubeni country need additional funds.

The mean also wants to, and even the two families have a feeling of flirting. Zhang fan can't bear such a thing. He immediately said that the cards of the golden mean and Marubeni were not enough. He wanted to cooperate with GlaxoSmithKline and even AstraZeneca. He feels that people of the mean are not down-to-earth. He wants to introduce digital hospitals!

With this hammer, everyone became calm. Marubeni is also going to call a large number of scientific researchers to tea element, because the early-stage personnel are clinical, and now we must have professional scientific researchers.

The golden mean smiled like erha who broke down his house, "Zhang Yuan, don't be angry. We don't mean what you think.

You see, the researchers of our scientific research center have bought all the tickets to tea vegetable. I'd like to trouble you to arrange food and accommodation. Even if we don't cooperate with Marubeni, we can't cooperate with tea. We are friends in a trench. "

The director of the golden mean scientific research center personally comforted Zhang Fan. Although he is a director at this level, in fact, he can be a moderate vice president at a higher level, and his level is still very high.

.....

However, at present, although the experiment has been suspended, the papers of the general surgery department of the tea vegetable hospital have been published one after another.

Originally studying intestinal tumors, we found a sensitive factor, but others are still groping.

However, because of the discovery of symptomatic drugs, some general doctors have specially published papers on fertility.

In particular, several doctors in general surgery published a very important paper and directly invested it in the lancet. The lancet approved the paper with the fastest speed, and published the paper on tea in the most prominent position of the magazine.

"* *, intestinal flora imbalance is related to male infertility!"

.....

"Zhang Yuan, Zhang Yuan, look at the lancet magazine. The paper jointly published by the general surgery and reproductive health department of our tea vegetable hospital has been published." (The latest journal research of the lancet, please pay attention to the guys who often have constipation or diarrhea!)

In the operating room, Zhang Fangang had an operation, and Zhao Yanfang came to take credit. People, once you integrate into an environment, you will naturally pay attention to the environment. For example, when Zhao Yanfang first came, she couldn't get used to seeing anything.

What hospital does not have a little scientific research atmosphere? The upstart of tea vegetable hospital has hit the scientific research unit.

But now, after dedication and dedication, hey, she is now directly the spokesman and leader of the scientific research system of tea element hospital.

In order to get more attention from the hospital, whenever she has a little achievement, she should let her people publicize it and make it known to the whole hospital.

Zhang Fan takes a look and sucks the air conditioner like a toothache.

"If ordinary foreigners do this, they can also publish it?"

Zhao Yanfang, who was originally smiling, was stunned, then grabbed the magazine in Zhang Fan's hand, and said in a rather contemptuous tone: "it's terrible to have no culture!"

Then he left without looking back.

Zhang Fan tilted his mouth and said to several surgeons who watched jokes around him, "OK, you fight for some anger. Can you get some real papers? Let's not let the women compare!"

Zhang Fan's internal medicine system has been opened. Originally, he thought it would be a piece of cake and it should be easy to pass. After all, it's just an examination of various disciplines. How can he pass if he works hard.

Unfortunately, the idea is too naive.

Originally wanted to advance by leaps and bounds, but he lost his chain halfway. Zhang fan can only conquer it slowly.

Moreover, these problems can not affect the surgical operation.

After all, there is a saying that one champion is lost in three years.

Surgery this operation, one day do not do, others do not know, oneself know. Two days without surgery, others do not know, the patient knows. Three days without surgery, so everyone knows.

Therefore, no matter how busy he is, Zhang Fan will perform two or three operations in the operating room every day.

This made many internal medicine doctors gasp for breath.

"Zhang Yuan is back in the operating room again!"

"That's right. A good surgical knife doesn't work. I have to come to the ward every day. I thought I was going to change the director of the Department. So I sent a box of eggs to the deputy director, but nothing happened!"

"If you don't come, let's be quiet and be a rich wife!"

"Li Hui, you didn't receive a patient today. Why did you rob my patient!"

"This is my old patient. Ask him if he was in my bed last time. Don't always pull the old man into your bed, will you? He's my old customer! "

Zhang Fan said to himself, gritting his teeth as he worked hard, "wait, wait, now it's time for you to jump and cry!"

Chapter 1318

"The courtyard is a little deep, willows pile smoke, and the curtain has no weight! Now I understand why ancient people can make such beautiful poems! The whole thing is noisy, sleepless and boring. "

On the early morning of the weekend, Jia SuYue and Shao Hua lay in bed. Princess Jia hugged Shaohua's neck and looked at whether her legs were white, while sighing.

"What's the nerve in the early morning? It's not dawn yet." Shaohua wanted to sleep for a while, but Princess Jia didn't know what was wrong and suddenly began to write poetry.

Recently, Jia SuYue was urged by his family to run away from home. The year before last, her parents didn't worry too much about whether she talked about objects. Last year, grandma and grandma whispered, but this year, it seems that the whole family is afraid that she can't get married, especially her mother began to let her practice cooking.

So he hid in Shaohua's house. No way, Zhang Fan went to bed in the study. Left the bedroom for both of them.

"Hey, can you sleep? I used to envy your big villa. The villa on the corrupt road. God, I can't buy tea with money. My father envies me. It's a symbol of identity.

Unfortunately, when I really came in, I found that it was too noisy. Listen, the birds in the trees outside were like holding a concert. What time is it? It's 4 a.m. it's not bright! "

Jia SuYue was awakened by birds outside. Shaohua's villa is good for everything. Unfortunately, there are too many trees in the yard. All kinds of birds sing here in the morning.

"Don't tell me. I didn't get used to it until I moved in for a month." Shao Hua said vaguely.

"Hey, I think your family has enough details now. You Zhang Yuan, now the wind is rising. As a result, I just went to the bathroom. The lights in your study haven't gone out. Is he reading a book or watching a little porn again! Does he often work all night? "

Jia SuYue asked curiously.

Shao Hua was stunned. He was confused and woke up " Alas, many people can bear hardships. In fact, it is the suffering of the body.

But you let them think alone. He can't stand loneliness. You let him read alone. He can't stand boredom.

You think Zhang Fan was born strong. He's much better now. In the past, he often stayed up all night reading. Even when I was just married, I didn't eat the advanced study after class. After dinner, I continued to be comfortable, one book by one.

I stayed up late reading and had to go to work the next day for surgery. Really, I was very worried about his body at that time.

Medical books are getting thicker and thicker. He probably has read a house of books in recent years. Sometimes I feel bad too. Don't let him spell so hard, but others don't listen. Hey, you'd better hurry home today, or he'll stay up late tonight. "

"No!"

.....

Zhang Fan hasn't worked as hard as before since he became the dean. Really, Zhang fan used to fight very well.

Surgery directly monopolizes the surgery in a region, county, township, and never stops. The massive number of operations in the system has been passed by day-to-day efforts, and reading books, various reference books and periodicals.

He is now at the level of surgery. To brag, it is estimated that old man Lu and old man Wu may not be his opponents. If only surgery, there are few who can be more powerful than him.

But medicine is not a one legged golden rooster.

What's the difference between surgery and internal medicine.

For example, if a patient has a fracture, the surgeon's idea is to cut and fix it. No, why is the fracture, calcium deficiency, calcium deficiency, old age, why is calcium deficiency, and the surgeon scolded and retreated from the group.

The rest is what physicians have to consider.

Why are you short of calcium when you are old.

This is like the difference between archaeologists and grave robbers.

Grave robbers worry about whether there are gold goods in the grave, whether there are valuable ones, whether the bed is made of gold sandalwood, and whether the bed needs a servant girl to push his ass.

Archaeologists think more about why the big bed is so big and why there is a small chair beside the bed. Is it a servant girl pushing her ass or waiting in line to be frightened.

Tomb robbers want to play high-end, want to see which is valuable, they have to learn. Otherwise, it will be used as a sea bowl with a spittoon.

Doctors are the same. Zhang Fan really worked hard to pass the examination of Gastroenterology as soon as possible.

Because now he has too many things. He needs to do surgery. He needs to consider the development direction of the hospital. Now there are more laboratories.

Moreover, what bothered him recently was that many domestic pharmaceutical companies didn't know how to smell the smell of blood. They came to him one by one.

That's what bothers him most.

Especially for a pharmaceutical enterprise, it was a little interesting in the early years, and its name was also very good. God, it's not powerful. But in recent years, have you seen him do personnel? First came a so-called health wine for official reception.

Then he went into Pu'er tea and got a hundred year old tea. I even feel that selling water to make money plays with the concept of small molecule water. Especially an H₂O, you become bigger and smaller. Can people drink it happily? Do you think you're cavernous!

The Ministry of Health warned, but no one paid attention to the Department without guns.

Before the return of Dansheng dropping pills and Gangwan, their old business, they claimed to have launched the FDA declaration of Jinmao country. However, the capital of Temo has held the Olympic Games, and they are still applying. In that year, an academician said that the FDA clinical trial of Danshen pills had failed and had great side effects.

As a result, the pharmaceutical company even took the academician to court, which means that the other party is an academician. Otherwise, it might come to a different place to enforce the law and wear handcuffs.

Generally, if pharmaceutical enterprises come, Zhang Fan doesn't come forward in person. Just let Lao Chen play Tai Chi. Now the laboratory is not out, the clinic is not on, it's useless to worry, and it's useless to talk. Don't look at them in full swing now.

It's like buying a good girl with jinyuanbao, but once there's any bad news, leave every minute.

But this time, they not only found Zhang Fan's distant elder martial brother, but also brought Zhang Fan a gift.

Sometimes, the school is a background, and sometimes the school is a burden. There are also some bad people in senior brother. For example, those who lost the competition for director in the early years, and then angrily abandoned medicine and sold medicine.

In recent years, people think this man has no vision. Being a doctor is better than being a drug dealer.

But in the first few years, many drug dealers made money. Then many female drug traffickers finally wash their hands and turn around to seduce a young male physician to marry. There are many such examples.

Zhang Fan also has to give elder martial brother face. He has to look at Buddha's face instead of monk's face.

The pharmaceutical factory is also very generous. I know that Zhang Fan likes drinking tea. Without saying a word, I directly took out a few grams of tea that was said to have been collected by Lao Zhou, who abandoned medicine from Wen. It is said that it was left from some tree.

Moreover, he took out the price of this tea that had been auctioned a few years ago. A few grams of tea were auctioned for hundreds of thousands, and Zhang Fan's egg trembled.

"You're not inviting me to tea. You're thinking of sending me to prison!"

So Zhang Fan urged Zhao Yanfang to carry out the experiment every day these days. When he can get out of the laboratory, he is going to pull the Chinese Digital Research Institute to do it together.

He is unwilling to give to foreign countries, and he is not at ease to domestic ones. Although there are a lot of things in the Digital Research Institute, and there are not enough sections, people still don't receive you.

But now Zhang Fan has a Duan anyway, and if he pulls in the president of the digital hospital, he will not refuse to enter the door.

The most important thing is that Zhang Fan knows that they can develop but not operate. For this partner, Zhang Fan and Ouyang also want to be blind.

But not all are good.

For example, the drug developed by the digital research institute is difficult to pass the FDA of Jinmao. Jinmao won't give you the reason. In a word, please wait patiently.

But sometimes, you don't admire golden hair's yin-yang face. Your medicine can really make money. Maybe he'll open and close his eyes.

.....

On the tea plain, old man Lu and old lady Lu completely set themselves free. Now the old man's training bandut has hundreds of people.

And it's still like a star, touring. The presidents and surgical directors of many county hospitals are watching at one point. After the old man has finished talking for a few days, they will take the old man to their county.

At the beginning, everyone relied on who had a loud voice and who pulled the old man away. Later, the officer of the tea vegetable medical office made a rule that no one had to fight and no one had to rob.

The task of the officer is to take good care of the lives of the two old people, and to report the physical and mental conditions of the old people to Zhang Fan every day.

It's also strange. When he was in the city, the old man caught a cold and fell ill for three days. Zhang Fan was always worried that the old man wouldn't wake up one day. There is nothing wrong with your body when you can check it.

In the grassland and the countryside, hey, this is different. The mental state and physical condition seem to be ten years younger. Sometimes the old man can perform surgery.

The old man is in good health, so Zhang Fan doesn't worry. He can do whatever he likes. Although we can't do major surgery now, the old man's life is like a flag.

Shuitanzi hospital, Wang Yanan, Xu Xian and Zhou Guofu are studying.

In the past, I only studied clinic.

It's different now. In the operating room in the morning and in the laboratory in the afternoon.

And they still have to assign tasks. Unlike before, they learn by themselves without being urged.

Now it's different. First of all, the task of the laboratory is on them. They not only have to experiment, but also do papers.

As a result, the pressure is great, especially Wang Yanan and Zhou Guofu. They are even more difficult and have to cry. After all, they graduated from college and have little scientific research contact. Now they plunge into the laboratory. To tell the truth, it's really difficult.

Xu Xian is a little better, but not much. After all, this is the highest palace of orthopedics in China. There are too many big takers in it.

Chapter 1319

With the upgrading of the tea vegetable hospital and the improvement of the hospital's reputation, the number of times Zhang Fan was invited to fly a knife also increased with the naked eye.

In the past, Zhao Jingjin, the director of the bird market, and several directors of hepatobiliary surgery would invite Zhang Fan to fly a knife, and the hospital would only invite Zhang Fan if he was called by patients who were really helpless or energetic.

It's different now. First of all, the major hospitals in niaoshi can't invite other Chinese general foreign experts and orthopedic experts.

As soon as they heard that it was the frontier, they directly said that it was too far away and the time was inconvenient. At the beginning, the doctors of several affiliated hospitals in niaoshi thought, is the flight slowing down now? Why didn't you say too much in the past.

Later, a mediocre general foreigner got angry: "do you have Zhang Fan in the border area? You contacted me again and again. Do you think I'm easy to bully?"

This makes everyone understand that when did Zhang Fan put the bird market into his sphere of influence!

People are like this. If people who are familiar with or around them suddenly become rich and rich one day, their hearts are sour, which can't be expressed in words. But distant strangers are young models of luxury cars every day, and their mentality seems to be just envy.

But now there's no way. Sometimes the operation is too difficult, and you have to ask Zhang Fan.

In the past, the tea vegetable hospital was a subordinate Hospital of several top three hospitals in niaoshi. For the president of the subordinate hospital, he was happy and called a president. If he was unhappy, he didn't have to pay any attention.

However, when you see Zhang Fan, you should first bow your head and shout a word of leadership, because others' tea vegetable hospital is now also a provincial third-class hospital.

"The patient with congenital spinal curvature is only ten years old. What do you think of this patient, director?" In the spine surgery of the Third Affiliated Hospital of Niaooshi, an attending doctor found his department director with the patient's examination.

The director frowned before he took the examination. If the spine is the king of orthopedics, the correction of congenital spinal curvature is the crown in spinal surgery.

There are too many technologies in it.

First of all, you should consider the patient's future development. For example, what you are correcting now is straight, but because there is no predictability, three years later, the original left deviation has become right deviation.

But also consider the body's own self correction.

It was three degrees off, and you corrected it by 2.5 degrees. As a result, your orthopedic department was abnormal after someone else's body corrected itself.

We should also consider the organs in the body that have been deformed due to spinal bending, so this kind of operation is too difficult for orthopedics doctors.

It can be said that double height surgery is high-risk and difficult.

As soon as the director of the Third Affiliated Hospital listened, he didn't have to look at the examination. He was upset.

Because his Jianghu status has declined now.

It still fell inexplicably.

Orthopedics is the least needed hospital in each province. Because orthopedics is easy to start with, the orthopedic leaders in many provinces have equal honor one by one when they stand up. But throwing knives is not without them.

For example, in terms of spine, the third class hospitals in some developed provinces in the south, not to mention the northwest, may not do well.

It's like spine surgery in the golden Maoist country is controlled by doctors of stick and pill. Orthopedics is a simple thing to start with. It's difficult to be skilled.

It's like a man fooling a little girl with sweet words. It's easy. But it's hard to fool a young woman just by mouth.

It's like your liquid. Don't say you vomit. You don't bleed much. You can't do it.

"Didn't they say anything?" The director of the spine Department of the Third Affiliated Hospital looked at the results of the examination and asked, then felt that his doctors might not understand their meaning, and asked, "didn't you say something like transfer?"

In the past, patients didn't have any energy and didn't find a person with a head to talk about love. You turned the sky when you wanted to transfer to another hospital! Even if you can't do it yourself, you should invite throwing knives. One is to show your energy, and the other is to show your contacts in the capital's top hospitals in mordu. Third, make more top doctors.

This kind of top doctor is familiar to ordinary doctors, but it is very useful for the Department Director of a provincial third-class hospital, such as being a director of a spinal surgery association.

For example, if you are familiar with others, you may be able to work as two or three in other people's scientific research in the future.

Now, orthopedic experts, especially shuitanzi experts, can't be invited. But he couldn't do the operation again, so he wanted to let the patient transfer himself, so he could go down the slope and let the patient go to other places.

As for letting Zhang Fan fly the knife, he really felt oppressed.

A former subordinate hospital, a little doctor with uneven hair, has become his superior now. He refuses to accept it.

But even if he is really dissatisfied, as long as patients do not mention transfer, their level of hospital, according to China's health regulations, is the end.

The golden mean is the same level as the Third Affiliated Hospital. Therefore, he has the cheek to transfer the patient. If he knows what to do, he will directly report to the president of the hospital. He has to shake three times.

The attending doctor looked at his director in surprise. Although he was very surprised, when did his own director say such words? If any brother in the Department said a transfer, he could spray the other person's spitting stars on his face.

Now he has taken the initiative to transfer to another hospital.

Needless to say, the director of a small hospital does not have a high binding force on lower level doctors, especially for young doctors. Maybe one day the doctor will take the postgraduate entrance examination and go to the doctor's college. If he doesn't do well, he will be the higher-level doctor of his higher-level hospital.

The big departments of the hospital are different. No matter how high you fly, where can you fly. Therefore, the throwing knife right of large departments is in the hands of the director.

For example, there are two ways for a patient to ask foreign experts to come to the throwing knife. One is that you are very familiar with the Throwing Knife experts, and the Throwing Knife experts are very awesome. They are parachuted directly to the hospital, and the directors and deputy directors have to queue up to meet them. The second way is to get in touch with the director and let him contact doctor Throwing Knife.

In general, the flying knife doctor contacted by the director will never be too often, because he doesn't need to maintain too many doctors.

"Didn't the patient say? Director, shall I give you a hint? " Then he quickly added, "I said it was what I meant."

The director took a look and shook his head. "Forget it, I'd better contact an expert. Go and ask them if they are willing to pay the expert fee."

A department director of someone else will not let lower level doctors have his handle on small things. If people don't have a few holes in their heart in the workplace, they don't know how they will be buried in the end.

.....

On weekends, Zhang Fan is at home.

There are two women in the family, Shao Hua and Jia SuYue.

Jia SuYue was going to leave. Shaohua softened his heart and asked Jia SuYue to leave on Monday. Jia SuYue was very happy to stay. Shaohua looked at Jia SuYue smiling and regretted that he was soft hearted.

If there were no outsiders, Zhang Fan would come out to talk with Shaohua after reading the meeting, or help do something within his power, such as praising Shaohua's craft.

With outsiders, Zhang Fan easily doesn't leave the door of the book room.

"Hua Zi, you are so powerful now. You can pull a noodle!" Jia SuYue was surprised to see Shao Huaxian skillfully making noodles. His small mouth was open enough to swallow an egg.

"Miss, is this potato silk you cut? Is there such a thick one! " Shaohua glanced at Princess Jia, who claimed to help.

"All right, just be polite. I won't do it yet. You say your family is so big, why don't you hire a nanny? "

Jia SuYue looked at the old mahogany furniture, the old leather sofa, and even the old solid wood floor, and asked.

"Zhang Fan and I are the only two people at home. My parents don't come. Occasionally, the master and mother come to stay for a few days and invite a nanny to chat. It's not easy to make money. It's a little easier to save money. "

"Just be careful to be a yellow faced woman! Women should be more delicate. " As she said this, Princess Jia put down her kitchen knife. It was quite natural that she didn't start to work without any contradiction.

Some people are born with this talent. They can do it without working. It seems they should.

Shao Huabai glanced at Jia SuYue and didn't speak.

She has experience in how to run a family. As for Jia SuYue's delicacy, it is estimated that she has too many dreams.

"Well, if you're not busy recently, I can't go to the farm with me on the weekend. There's too much passenger flow recently, and you know more people. If you stay at home all day, you'll think nonsense."

"OK, my boss Shao. Is the meal ready? I'm hungry. "

In the past, Zhang Fan loved his mother's cooking.

But soon after getting married, Zhang Fan thought Shaohua's meal was really delicious. This is a woman's transformation of a man.

Pull a strip, West spicy red and a plate of fish. Because there was one more person today, Shaohua got another braised spare ribs.

At dinner, looking at Zhang Fan's snoring of noodles, Jia SuYue couldn't see that the black boy was the president of the third class hospital and a very good doctor.

In her mind, the doctor has hair gel on his head, a suit and tie on his body, and shoes on his feet should be bright. When eating, he should chew and swallow like a lady. When looking at people, he has a trace

of amorous feelings in his eyes.

But look at Zhang Fan. He looks at people like a wolf and eats like a pig. She had looked at the villa and felt much better after a meal with Zhang Fan.

When Shaohua and Jia SuYue were chatting and Zhang Fan was having dinner, Zhang Fan's phone came.

Zhang Fan opened the hands-free because he was eating noodles, because it was a strange number!

"Zhang Yuan, ouch, I'm eating. I'm really sorry. Excuse me, I'm Gao Liqun from the Third Affiliated Hospital."

"Oh, director Gao! Hello, no bother, no bother, it's finished. " Zhang Fan puts down his chopsticks.

"Well, there is a patient with spinal curvature. He is ten years old and it is difficult. We would like to invite you to give him guidance. I wonder if you have time tomorrow. "

When director Gao spoke, his heart was sour.

"OK, tomorrow, Saturday, I have time."

"Well, I'll ask my family to book your ticket."

"Yes, please, director Gao."

Zhang Fan's politeness made director Gao feel much better.

After hanging up, director Gao Xin said that President Zhang was very nice and polite.

On this side, Jia SuYue looked at Zhang Fan strangely: "all the birds in the bird market asked you to have an operation? Isn't he the capital? "

Chapter 1320

Capital, frontier bird market. In terms of climate, the city is not very friendly to people anyway. In winter, it directly enters the persuasion mode. It is normal to go to minus 20 degrees. Especially when the street lights are just on in the early morning, and then looking all the way, the low hanging wickers on both sides of the street are covered with frost, just like popsicles hanging all over the street.

It's very hot in summer. Under the direct sun, it's like stripping people. Wearing dark clothes can take off your color at the end of the day. Not to mention the grape ditch not far from the bird market, even the canal is built underground. This thing is on the ground, and the water in the canal is not enough for the

sun.

Zhang Fan was supposed to take a plane, but when the director of the Second Affiliated Hospital sent the patient data, Zhang Fan saw that the operation had to take his own team. Otherwise, this operation is a little difficult.

It can be said that this kind of operation can defeat the operation of the director of a large department of a provincial third-class hospital. Even Zhang Fan should go all out.

Therefore, when Zhang Fan saw that there was only one plane ticket, Zhang Fan was embarrassed to say that I brought several people and you bought me some more plane tickets. To tell the truth, Zhang Fan was still young and his face was not thick. He thought there were many people. After flying over, the plane tickets were more expensive than the operation fees.

"Director Gao, I'll drive over by myself, take some people, and refund the plane ticket for me!" After seeing the patient's qualifications, Zhang Fan immediately called the director of the spine Department of the Third Affiliated Hospital.

"Oh, I'm so sorry. I'm really sorry. Zhang Yuan is really sorry!" Hung up.

Director Gao sat in the office and said to the doctor in charge of the bed, "you said whether you got economy class, which makes Zhang Yuan unhappy. But this is the rule. No matter how big the wrist is, the doctor of flying knife corresponds to economy class! "

The doctor in charge of the bed also said in wonder: "yes, last time the director of shuitanzi hospital came, people also came in economy class!"

"Ah, young, too young! If he does, ah... "Director Gao is like a toothache.

.....

"Bayin, what class are you on tomorrow?" Zhang Fan hung up director Gao and called Bayin.

Bayin is now called deputy head nurse by the little nurses in the Department. After the disaster relief came back, the little girl won the prize, and everyone also saw that Zhang Fan looked at the little Meng girl differently.

However, Bayin also worked hard, and everyone saw this.

At the beginning, Zhang Fan wanted to go abroad to operate on the chief's son. At that time, there were not many nurses who took the initiative to sign up. Because everyone is afraid. If the operation fails, it's good to be made into a village lady by others, but what if you don't become a village lady?

Bayin followed Zhang Fan. When I came back, I got a suite and a big red Audi, which made many people jealous.

In addition, Bayin followed Zhang Fan into the fire area when the fire was in relief, and almost couldn't get out. But after coming out, not only did he find a good husband, but when he got married, Zhang Fan personally asked Lao Chen to arrange it for him.

There are so many little nurses in the hospital, who has this treatment.

It's all spelled out with life.

Therefore, although the head nurse in the operating room has not yet gone to the nursing department, we all know that it is only a matter of time. As long as the director of the nursing department retires, the head nurse in the operating room will go to the nursing department as the director.

The head nurse in the operating room will be Bayin.

The Bayin who received the call was still confused.

Because she had a rest today, she tossed her husband Xuefeng for a long time last night.

"Zhang Yuan, I'll rest tomorrow." Zhang Fan heard a cat like sound and heard a slap. Although he didn't know where it was taken, he still had to say something, so he hurriedly said, "tomorrow you tell the head nurse, and you adjust your class. Tomorrow I, you and Dr. David of director Yang's special orthopedics department of shuitanzi will go to the bird market and have an operation!"

Then he hung up.

Shao Hua and Jia SuYue heard the sound because they were hands-free.

Jia SuYue had been drinking milk with a white layer of milk (a) skin on his lips. As soon as he was about to speak, Shaohua stuffed a duck egg yolk into his mouth, "try it, Zhang Fan said it's too salty."

Zhang Fan glanced at them and didn't say much. After a few bites, he said to Shaohua, "I'm going to the bird market tomorrow. It's estimated to take two days."

"Drive? I happen to go too. I want to buy some biological fertilizer on the farm, but I can't buy tea here. "

"I'll go too, I'll go too. I'm going shopping in the bird market!"

Zhang Fan turned his mouth and went into the study.

"Why don't you let me talk!" When Jia SuYue saw that Zhang Fan had left, he was unwilling to complain to Shaohua.

"There's nothing to say about the quarrel between husband and wife." Shao Huabai glanced at Jia SuYue.

"Where is a quarrel? Where is a quarrel? A slap will cry when you are young, but a slap will be wet when you grow up!"

"Oh, my God! Get married quickly. I'm afraid of you. You're going to the bird market, too? "

"Take me. I haven't been to a big city for a long time. It's always in tea. I haven't changed my bag for a long time! "

"Hey!" Shaohua had to nod helplessly.

Some people like to be prosperous, like to embrace each other, and like to pursue fashion. Some people, such as Shao Hua, like to live in peace and simply live a prosperous life. Zhang Fan and Shao Hua are particularly interested in this aspect.

They all like quiet. Zhang Fan was willing to move into the villa on the corrupt Road, not seeing that it can improve his social status here. In fact, I came to this environment.

Especially in the late night, when I am tired of reading and studying, open the window, the breeze blows, don't mention the sound of cars around, not even a dog barking. The rustling leaves especially show a sense of tranquility and serenity.

.....

On Sunday morning, Zhang Fan drove kuluze, took Bayin, director Yang of shuitanzi, John of Jinmao, Shaohua and Jia SuYue.

Director Yang of shuitanzi has a scientific research cooperation with Jinmao, so he can't go back to shuitanzi in the short term.

And not only he can't go back, but also some of his doctoral students are here. Although it seems that several doctors have come to SHANGUAN overseas from the capital, in fact, they are happy and their

mouths are crooked.

In the capital, the conditions are very good, and the scientific research atmosphere is stronger than that of tea. I don't know how many times. But they are caterpillars. There is only one laboratory. They have to wait in line to be turned over. If they meet a big man for a long time and the beads are yellow, they may not be able to do anything in the laboratory.

And there's the boss of Gaza. In a word, I'm sorry. My experiment is at a critical juncture. I'm really sorry. I'll plug in the team first.

These doctors not only have to smile and say it's okay, but also politely pat the soil on their hips.

But when we get to tea, we look at the equipment of the bone Institute in front of us. We don't cry with joy, but we can definitely wake up with laughter when we fall asleep. Moreover, we don't have to turn over the sign. We can go to the laboratory whenever we want to go to the laboratory.

Moreover, it cooperated with Jinmao's special orthopedics department. What is special orthopedics? This is just like the existence of Microsoft in the orthopedic industry. As long as this experiment is done well, those who were worried before can't graduate. Is this still a thing?

As long as you get a good project, is it still a problem to find a big hospital after graduation?

So, the research dogs have been sleeping in the laboratory recently.

Zhang Fan and Ouyang can't let you use the laboratory for nothing.

Come on, students do experiments. After the tutor's guidance, you don't want to give me leisure. Come to the clinic.

If you want to do the experiment at ease, the boss is directly listed in the sequence of expert outpatient service of tea vegetable hospital. Not to mention the patient, we have to take our doctor for surgery.

For such top doctors in the industry, it seems that you can't learn the level of others for a while, but if you give advice on surgery, you may be able to break the bottleneck of a stage. This is no exaggeration.

Chinese old people have said that knowledge is not worth a point, but it is so difficult before it is broken.

"Director Yang, are you used to eating in the frontier?" After introducing his wife and his followers, Zhang Fan drove off and chatted with Director Yang while walking.

Director Yang, a southerner, works in the capital. In his words, he is not used to eating noodles. He can eat two mouthfuls of fried sauce noodles for three days.

When he came to the northwest, Lao Yang complained at the reception dinner once, "can I have a

mouthful of porridge?"

Sometimes it's funny to think about it. An orthopedic magnate, pitifully facing the meat, asked for porridge.

"Ouch, the people here are so enthusiastic. The barbecue is as big as my fist. How can I eat it? It's full in a string. Also, Zhang Yuan, can you arrange less outpatient service for me? When I was in the capital, I only went to the outpatient service one day a week.

Come here, three days a week. Ouch, there's no time to go to the laboratory. "

Lao Yang kept complaining.

Zhang fancai ignored him. "Who makes you have a big card? Don't dislike it. Do you know that your outpatient volume is three times that of shuitanzi orthopedic director. When he came, everyone didn't recognize him, but I didn't expect you to come. Once the photo was hung up, you couldn't stop it. People came to you in a flood.

My brother, you should understand our frontier people's love for experts! "

Although it's a little exaggerated, sometimes speaking is a little skillful. It sounds pleasant.

Lao Yang's mouth was crooked and he forced himself to smile, "ouch, Zhang Yuan, you can't talk nonsense. I have a good temper. I have a temper. Unlike our director, I have a big temper!"

Hey, it's done in a word, otherwise people really play a temper, and Zhang Fan is not easy to operate.

As for John, he has just come to tea from golden hair. His Chinese level is limited to words such as eaten and hello.

He came here mainly to wait for the special orthopaedics department to provide scientific research projects to the tea element bone Institute, and to monitor other scientific research projects of the bone Institute.

When the contract was signed, people were on guard. They had the right to participate in any experiment studied at the Institute of orthopedics.
