

Chapter 1321

"Here comes Zhang Fan!" When he was about to arrive at the Third Affiliated Hospital, Zhang Fan called director Gao. Director Gao hung up and hurriedly took several doctors in his department to the door to meet him.

The medical circle is a practical circle. Although the directors of the Third Affiliated Hospital were unconvinced in their hearts and mouths. But when they really face Zhang Fan, they still have to bow their heads.

This thing is not a matter of politeness. If it is a matter of politeness, you can come to a small doctor in a prefecture or county. Don't say welcome. It's estimated that you can't even find director Gao's office.

Moreover, this indifference in the medical circle is not the kind that can be perfunctory and disguised in the system or business circle. This kind of people who engage in technology and often see life and death have no disguise for indifference.

However, for Zhang Fan, the orthopedics department of the Third Affiliated Hospital dare not be so indifferent. Earlier, the directors of the orthopaedic department of the third class hospital could not think of the observation operation in Lianda University and the current bone research institute.

In addition, it can upgrade the top three in a region to provincial management, which is especially achievement and ability. If we can't bend down the directors.

Then it is Zhang Fan's technique that overwhelms the directors and makes them lie down with their eyes closed and their legs crossed. Others, you can say that Zhang Fan has a backstage, Zhang Fan is the son of someone, or even Zhang Fan is the illegitimate son of someone.

However, where Zhang Fan's technology is placed and engaged in technology, it ultimately depends on technology.

In the administrative building of the hospital, the president of the Third Affiliated Hospital was standing right beside the window. Because it is in the capital, and the hospitals here are said to be ancient buildings with a little history, among all the high-rise buildings, the side of the hospital gate is the administrative building.

Perhaps it's because officials don't repair yamen, or in order to show people's historical heritage, in the

administrative building like an official hat, the president will stand by the window every day.

With your hands on your waist, if you stand next to a sister, it will be too imposing. It's like: come and see, this is the world I laid for you!

Of course, if you put on a white coat instead of a yellow mandarin jacket, this momentum will disappear, and it will become a day to see who is late and who leaves early.

"Why is Lao Gao of the spine standing at the gate with a group of doctors?" The dean asked curiously.

The officer of the medical department immediately opened the various documents reported. It was useless even for three seconds. He directly and accurately opened the column of the spine department.

"Oh. Today, they invited flying knife experts to perform surgery. " The little officer probably came in through the back door and couldn't return to the dean's mind when answering questions. If Lao Chen doesn't have to turn over the record book and opens his mouth, and the dean will report in detail what he wants to know.

"Oh!" The Dean glanced at the little officer and saw an acquaintance on the little officer's face. He wanted to scold, but he thought about it and didn't scold, "spine? Who did you invite? "

A few years ago, the top three hospitals in major capitals were physicians. Even if it is not absolute, it accounts for 70% or 80%. Because of the inconvenient transportation at that time, some people had to see a doctor here, and mental workers often had chronic diseases.

Therefore, the early Presidents were internal medicine. Later, with convenient transportation, surgery was more urgently needed by the people, and then the presidents of the hospital gradually changed from a physician to a surgeon.

The president of the Third Affiliated Hospital was born of bone and joint. Very sensitive to orthopedic throwing knives.

"Oh!" The little officer woke up and hurriedly said, "Zhang Fan, President of the tea vegetable hospital, doesn't know why the spine Department invited doctors from prefectures and counties!"

The little officer is from a non-medical background. His eyes are still looking up. He will never look at the prefectures and counties.

"All right! Today I'm going to a government meeting! " The Dean waved his hand impatiently. Then he hurriedly packed up his file bag, like hiding from someone.

The little officer wanted to ask, but the Dean was really unhappy. He wondered if there was no meeting today? I didn't say it in advance! Didn't the Dean say he was going to the orthopedic department for a sneak attack and ward round today?

Not only the Dean, but also the directors of several other orthopedics departments all seemed to ask for leave collectively. None of them came to the hospital, like avoiding catching strong men.

Zhang fanru was like the same stone falling into the dead pool, and the fish in the pool gave way one after another.

In fact, the most embarrassing thing about Zhang Fan's rise is several top three hospitals in bird market.

Every year, at the end of the year, the government will count out a data from the hospitals under its jurisdiction. This data is particularly official, that is, the number doesn't say anything, but everyone knows it.

This data is first the number of patients treated in this year, then the overall income of the hospital, and the number of papers published in core journals of the hospital every year,

As a result, last year, the tea vegetable hospital reached the top three. The tea vegetable hospital is not only not in the city center, but also in the capital, but it has reached the top three.

This is just like the crackling King's eight fists. A group of presidents of class III hospitals have lost face in front of the government.

Then they couldn't even shout out their grievances. If you want a position, people's tea vegetarians are special. If you take another step, you will come to stan. In terms of policy preference, any other third-class hospital will get more than tea vegetarians.

Can see the results

Even within the system, there is a saying that the president of the third class hospital in bird city should wash his ass and prepare for his position.

Give who the position, of course, is for Zhang Fan of tea vegetable.

Therefore, now the medical group in bird city has a little collective default to interview tea element hospital!

Although everyone knows that Zhang Fan will not come to the bird market. But I can't guarantee it. What day did Zhang Fan lose his head?

Zhang fan drives a car. Men of all sizes actually like to drive it. Little men like to drive a balanced car, drive when they grow up, and drive others when they get old. So, don't look at the usual men looking at

the long legged sister drooling.

But if this girl is not easy to control, if you let him get married, his head will shake like a rattle.

Zhang Fan is no exception. He likes driving.

Because Shaohua didn't drive, he had to follow Zhang Fan to the hospital and then drive to work. So we can only follow Zhang Fan to the Third Affiliated Hospital first.

Zhang Fan's kuluze and kuluze with red lettered license plates have no restrictions at all in the limited bird market, especially the security guard of the Third Affiliated Hospital. When he saw the car, he didn't even stop it.

"Ouch, Zhang Yuan, I'm sorry to let you drive here in person. It's really hard for you to travel hundreds of kilometers."

After seeing Zhang fan drive off in person, director Gao rushed over in two steps and three steps. Followed by the deputy director of the Department and seven or eight attending doctors, the hospitalized dog is not even qualified to welcome.

"Director Gao invited me to face. Even if I run, I will come. This time, there were a lot of people. They all took the plane. Director Gao was also embarrassed, so I drove over! "

Zhang Fan smiled and held director Gao's hand to speak. As soon as Zhang Fan said this, director Gao's heart was comfortable.

"This is director Yang in the Department. The earliest spinal arthroscopy in frontier was the first one made by director Yang." Director Gao introduced in turn.

"Good morning, director Yang. I've been making friends for a long time. I finally see my master!" Zhang Fan is very polite. After all, each other can be their own father at any age.

"This is director Li. The Department is mainly responsible for business learning. The basic skills are solid. The Department can't do without me, but it can't do without director Li." Director Gao also learned that Zhang Fan gave face to his people.

"The director is polite, the director is polite, Zhang Yuan, last time I didn't talk in detail in Lianda, this time I finally invited you!"

A row of people stood upright with a smile on their faces. They had seen experts and had never seen such a young expert.

I've seen experts. I've never seen such a polite expert.

This makes a group of people more comfortable.

Zhang Fan is not just a few doctors. He is also the president of a third-class hospital, and Ouyang has worked hard for several years. If you don't have some Kung Fu, you can kill Ouyang.

Shao Hua didn't get off. Jia SuYue looked at Bayin with a big chest standing next to Zhang Fan. She was proud like a little hen. She also wanted to go on.

"What are you doing down there? Are you a doctor or a nurse! How would you like Zhang Fan to introduce you? "

Shaohua took Jia SuYue and didn't let him down.

Jia SuYue opened his mouth and didn't know what to think, but he said, "why don't you go down? Look, this is the bird market. These people are the leaders of the bird city hospital. Maybe..."

Then think again, suddenly Jia SuYue felt dull.

After introducing the doctors of the Third Affiliated Hospital, Zhang Fan began to introduce his own people.

"This is the director of shuitanzi hospital, this is the director of special orthopedics, and this is the head nurse Bayin of our hospital!"

The director of shuitanzi, everyone's eyes lit up. This is what orthopedic doctors in other provinces can think about in their dreams except the capital of magic capital.

I haven't woke up from my dream, and then I look again, the director of Jinmao's special orthopedics department. Special orthopedic hospital, say a bad word, this is the existence of ordinary orthopedic doctors who dare not dream.

But now, shuitanzi or special orthopedics, standing quietly behind Zhang Fan, they can see that they try to support Zhang Fan and make everyone look at Zhang Fan.

At this time, everyone really understood the content and weight of Zhang Fan.

And Bayin, when Zhang Fan introduced him as the head nurse, which one was excited, which one was depressed, and his eyes were full of water. He was proud and proud.

Zhang Fan is upgrading her. She's a nurse for fear that others don't pay attention to Bayin.

Zhang Fan learned from Lao Chen that he can give his subordinates such a comprehensive thought.

If you want people to sit on it and work hard, you can either give money or make people happy.

If you don't give money and don't make people happy, why should they move by themselves?

Zhang Fan and his party entered the surgical building. Audi A6, President of the Third Affiliated Hospital, secretly left the hospital.

Shao Hua also drove out of the hospital.

Chapter 1322

Zhang Fan really didn't expect that he could let a provincial top three Dean flee and let the top three presidents of the bird market avoid talking about himself. When a person, Zhang Fan doesn't know, but if Zhang Fan knows, it's estimated that he will have a good time in his heart.

To tell you the truth, people are really all kinds of people. For example, some people always want to be more comfortable when they are comfortable, and they never seem to remember the suffering.

While some people seem to be indifferent to enjoyment and comfort, but they definitely have a deep memory of suffering.

Zhang Fan is the second kind of person, so he has a subconscious discomfort with all hospitals in the provincial capital. Although he is the president now, he will never forget that he went to the city to find a job in the wind and rain.

But the great sense of loss and helplessness of being rejected.

In addition, when there was an accident at home, his father was injured and his mother wanted surgery, he felt that he couldn't pay a penny. Apart from others, he often dreamed, as if he had gone back to the past. When he woke up, he touched the pillow and soaked in tears. Those who hadn't experienced the bitterness in this can't experience it at all.

As a saying goes, you think it's a small thing. You think it's a matter of thousands of dollars, but it falls on my head, that's a big thing, something that can kill people.

Really, like many people, Zhang Fan is a pessimist.

His efforts, every time he tries to seize the opportunity, in fact, it is not only the relationship between the system and his own personality.

Just like a man who almost drowned, he always tries to have a little more sense of security, which is the feeling Shaohua can give him, not the more beautiful Jia SuYue.

Shaohua took Jia SuYue to buy biological fertilizer. Sometimes Zhang Fan doesn't understand. Isn't this biological fertilizer farm fertilizer? Do you have to buy it at the bird market? However, this thing is like crossing a mountain. Zhang Fan generally can't speak easily about things he doesn't understand. It's always more reliable to hide clumsy and cautious words than to talk casually.

Shaohua drives Zhang Fan's car, chatting with Jia SuYue and watching the road. Jia SuYue was greedy for the tall buildings outside. She didn't hear what Shaohua said.

"Huazi, look, look, backless clothes, wow, suspenders, that woman's skin is so white!" Jia SuYue looked like an LSG just released from the high wall courtyard, and his saliva came down.

Although Shao Hua seldom comes to the bird market, he doesn't feel much about High-rise Building fashion sachets. How to say, she is like an orchid in the valley, blooming quietly.

Jia SuYue is more like a rose, delicate and beautiful, and needs precious metals or other high value-added objects to set off.

Along the way, Shaohua was almost disturbed by Jia SuYue's frightened cry and almost scratched. However, the good thing is that the car is cool Luze, and the red letter sign is still hung. Taxis running around like fish in the city generally don't leave the car.

.....

In the Third Affiliated Hospital, when Zhang Fan entered the Department, although the directors of other orthopaedics departments took collective refuge, the orthopaedic doctors, even the orthopaedic doctors who took a rest after work, heard that Zhang Fan came and took the director of the special orthopaedic hospital and shuitanzi to fly a knife.

One by one, he arrived at the spine department again and again, as if he would suffer a loss if he didn't come today.

In fact, doctors are like this, especially those in class III hospitals. If they don't advance, they will retreat, which is particularly obvious. At ordinary times, everyone seems to be in the Department, smoking and flirting with the little nurse. In fact, it's the same as junior high school students.

Go home and study hard. Usually you don't show up. Suddenly one day, you will find that a doctor who wants to pat the head nurse's ass from time to time can recite all the diseases in the orthopedic guide.

Moreover, endoscopic surgery is easier than holding chopsticks. Don't be surprised. Everyone is the same. They all work secretly at home.

Of course, those who have lost the position of director don't count. Such doctors are old-fashioned.

After Zhang Fan entered the Department, he was not polite and became a speaker directly.

Director Gao also cooperated. After the introduction, he directly handed over the right to speak to Zhang Fan.

I can't help it if I don't hand it in. He can't do the operation.

The tube bed doctor politely took out all the examinations of the patient from the examination in history.

Turn on the viewing machine and put them on the viewing machine one by one. Like the boss who used to play videos in the small black room, they have to play back at the critical moment.

"Zhang Yuan, this is the X-ray taken at the local hospital when the patient was admitted for the first examination last year."

"Why is there no CT?" Zhang Fan looked carefully and asked again.

"At that time, the doctors of the county hospital asked them to go home for observation."

Zhang Fan nodded and said nothing.

Many times, some patients will feel that the doctor opens a lot of tests, especially when they see a doctor, they can't see a doctor for three seconds.

In fact, if you're not a particularly powerful expert, you'd rather have more tests than talk more.

If you have doubts, you can directly take the examination to other hospitals or find other doctors. This is your body file. You can't go to other hospitals or other doctors. You said that the last doctor said I was too short!

How short is it? One meter? Or an hour? Moreover, the professional language of some doctors is actually no more elusive than diplomatic language.

Therefore, the most reliable and most able to let your body have evidence and become a file is the

examination, not the case and the doctor's words.

"This is the examination that the patient did after coming to our hospital this year. At that time, the patient was corrected with brace, but the effect was not good. Therefore, after the patient was hospitalized again, he had a strong desire for surgery. "

The doctor in charge of the bed introduced the patient and observed Zhang Fan's face.

Because he also wants to wait for Zhang Fan's approval without disgusting his director.

After two comparative examinations, Zhang Fan nodded: "there are no weak soldiers under the strong generals. Your conservative orthopedics give patients the opportunity to have surgery. If there is no orthopedics, you see, the lamina here has become abnormal.

What would happen if there were no conservative orthopedic intervention? "

Zhang Fan looked at the bed doctor and asked directly.

Director Gao finally had a smile on his face. He was worried that Zhang Fan was young. He not only couldn't see his own good, but also had to be picky.

I've never met such a.

The tube bed doctor was directly excited and directly said: "there will be spina bifida and scoliosis, and there will be longitudinal spina bifida with a high probability, resulting in paralysis of the corresponding section of the patient."

"Well, that's right. The capital is the capital, which makes me very relaxed. OK, young man, I was surprised. I didn't expect to do so solid treatment and homework. OK, I'm relieved. Take me to the doctor's number. "

Speaking, Zhang Fan turned to director Gao and said, "director Gao bothered. I've gone through many top three hospitals. If you want to talk about the mental outlook and basic skills of doctors in the spine department, your department can be ranked in the top three."

"Ouch, you haven't done enough. You have done enough. Zhang Yuan, you are the leader of a large hospital. Your vision is accurate. This young man is the most practical one in our department. Hey, I didn't know before. I didn't contact Zhang Yuan earlier.

I'll understand later. If you want to find throwing dagger, you can find Zhang Yuan. You don't have to go out of Xinjiang. After this operation is finished today, there is another one. Will you show me? "

"OK, no problem." Director Gao is affectionate at this time, without the reserve at the beginning.

People are like this. Face is given to each other.

Director Gao deliberately let Zhang Fan in front. Zhang Fan should be modest, but director Gao won't let him.

In this way, the party, led by the bed doctor, directly came to the patient's ward.

In the ward, the worry on the adult's face is estimated to be the patient's parents. They came from the countryside. When they saw a group of doctors coming in, there was a faint panic in their eyes.

I didn't even know how to say hello. I stood rigidly aside, especially the child's mother. I didn't know where to put my hands. I grabbed my clothes and rubbed them around. Let the original uneven clothes become more wrinkled.

And the wrinkled clothes are like her mood now.

Chinese, some special groups do not count, such as local tyrants. The expenses of ordinary people are often concentrated in the last two years of life, especially those who never have a physical examination and endure minor diseases.

It can be said that almost 80 or 90% of the savings are empty of personal wealth in the last two years of life.

Therefore, physical examination is actually very important at ordinary times. It is once a year when you are younger and once a year when you are over 40. Sometimes it feels like money is wasted,

But once you find something bad, treat it early. It's definitely better than a one-time expenditure in the last two years.

"Hello, don't be nervous. I'm Zhang Fan. Dr. Zhang Fan from tea vegetable hospital is the doctor who operates on your children. This is director Yang of shuitanzi hospital and director John of jinmaoguo. They are all very powerful doctors."

When talking about tea, the parents of the patients were at a loss. When talking about shuitanzi, the parents were still at a loss. When talking about golden hair, a morbid ruddy rose on the faces of the two parents.

But in an instant, their face changed from ruddy to waxy yellow. What they thought, Zhang Fan understood, but now is not the time to say this thing.

Little girl, a little girl in her early ten years old already knows that she is shy. She knows that her body is different from others. She ducked her head and trembled slightly like a little sika deer caught by a hunter.

While looking at his mother with tears in his eyes, he secretly looked at Zhang Fan timidly.

Really, no money is better than illness!

The little girl is dressed like some special hobby equipment, with a leather collar around her neck. A support on her body extends from her throat to the perineum (a), and then a metal support is directly between her crotch and her lower body.

Like dead chaste iron underpants.

Even if the metal brace has a leather pad on the body, it still rubs and rubs the place where the child's crotch meat is less red and swollen.

Moreover, in the weather of more than 30 degrees, it is very hot. If you put on such a set of equipment, you can't take it off for 24 hours. Really, the sweat flowing in the swollen and red place is like sprinkling salt on the wound.

Really, often this torture, if it is an adult, is estimated to have collapsed. This kind of suffering, this kind of disaster, only a child with a pure and clean heart can afford it.

Life is so terrible. The brilliant age that should have laughed freely makes children understand that things are difficult. No matter how painful they are, they won't shout. When they see other people's children eating ice cream, she will secretly swallow saliva. But I will never pray to my parents.

Innocent big eyes look at Zhang Fan, crying big eyes secretly look at Zhang Fan, Zhang Fan's heart is like a cat scratching, really, he is an old doctor, but he can't see children, sick and sensible poor children!

Chapter 1323

Remove the brace from the little girl. The petite body bound by steel, after removing the brace, the people present felt as uncomfortable as scraping the tongue coating with a scraping film.

The soft body becomes particularly twisted under the steel support. The swelling and ulceration of the skin on the body are particularly obvious.

To tell the truth, in orthopedic treatment, many diseases do not need surgery.

For example, clavicle fracture, what is clavicle?

Many people call this bone a beauty bone, especially in the frontier. The actresses put their hands under their necks, flush with the clavicle, and then turn their heads. They look particularly beautiful. Of course, a fat old man did the same.

This is not good-looking. This thing looks like a hot eye. It looks like a turtle (a) head stretching. This old man seems to be a curved old turtle in Bao Qingtian. Zhan Zhao was Zhang Fan's idol in those years!

The clavicle evolved to be used for fracture, such as strong impact. In order to prevent heart and lung injury and head injury, the clavicle will absorb energy and then fracture.

The treatment of clavicle fracture in China was formed hundreds of years ago, and even in modern times, the first treatment was summarized by our ancestors hundreds of years ago, the eight character bandage. Just tie it up and make a figure eight in your chest.

Then bind it for about a month. Not to mention the others, just one itch makes the patient laugh and cry, especially in summer, sweat mixed with the exfoliated skin on the body, which is extremely itchy.

There are pelvic fractures. The ancestors can't operate, but they can treat them.

Put the person on the bed, then hang his feet, hang his hips in the air and land on his back. As like as two peas in a special hotel, the women are hung up and separated from their legs. They are the same color, which is the color of the characteristic hotel is a little bit more colorful.

Hang in the hotel for another half an hour. If the technician is not satisfied with the money, it is estimated that she can work hard with you.

The patient had to hang for three months and the pelvic fracture healed itself.

Even in ancient times, this kind of treatment was not available to ordinary people.

In modern times, few people try.

The recovery of this treatment is definitely better than surgery. However, this treatment is too painful. Often after a few days of treatment, the patient clamors for surgery.

And spinal deformity, orthopedic is inevitable. Like Forrest Gump in the movie, the iron frame is hung on him.

After removing the braces on the children, the children feel much more relaxed. When they go to the operating room, they feel a floating look under their feet.

In the operating room, John, director of shuitanzi and director of Jinmao special orthopedics department, gathered around Zhang Fan to discuss imaging examination.

"Dean Zhang! I think the compensation angle is too large. The child is only ten years old now. In the future, even if she stops growing at the age of 21, there will be more than ten years. The compensation angle you give is so small. Will there be secondary deformities in the future? "

Director Yang of shuitanzi has some significance for Zhang Fan's compensation angle.

Spinal orthopedics, to put it simply, is to find a way to straighten a bent bamboo. This kind of thing can't be done by an old farmer who has served the land for 30 years.

Just like a joke in those years, a car repairer talked to a cardiologist and said that when I repair the engine, you also repair the human engine. Why do you earn more than me.

The doctor is also a talker. He said softly: when I repair the engine, the engine works!

Zhang Fan turned to look at John. "What do you think?"

John felt his fluffy chin. It was strange. This guy didn't know whether it was ethnic or natural. His hair was too thick. Especially when wearing surgical clothes, the heart protecting hair in front of the chest can be connected with the beard. Reach out and directly feel wearing a pair of wool gloves.

And it's yellow. Sometimes in the dressing room and bath room of the operating room, Zhang Fan feels that if he lies on the ground, he really looks like a golden mastiff.

Although this hairy child has not evolved very well, in terms of technology, especially in the spine, he is really better than most doctors in China.

It is said that he studied astrophysics at the undergraduate level. After graduating, he couldn't find a job. He went to study medicine again. He is also a figure of Xueba level.

" δ and β If it is infinite, then the compensation angle is too large, but now these two angles are limited, then I think the excessive angle is too small. Later, it will lead to insufficient correction of children! "

Zhang Fan nodded and had to admire it in his heart.

Even if they despise Jinmao, their doctors are too powerful in physics and chemistry. He can get an answer from mechanics, chemistry and biology.

Chinese doctors, on the other hand, often do not have as much physical and chemical knowledge as high school students two years after graduation.

The reason for this is that Chinese doctors are not solid in these knowledge and have not even entered the door.

"Let's talk about the problem of too large angle. Director Yang, you're right about development, but have you noticed that neither of her parents is more than 1.7 meters tall, and her height now lags behind that of normal children.

In the future, even if she catches up, she will not exceed her father's height. Moreover, she is a woman. In the future, her muscle development will never pull the spine and offset the spine. Therefore, this angle is not big. "

Then he said to John, "when you go back, take out your template and teach everyone!"

"Boss, this is my personal general feeling. You are violating my rights and interests. You don't....." the hairy boy shrugged his shoulders to refuse.

"When I invited you to dinner, why didn't you have the AA system? I heard that you all ate together with AA. Now tell me about your rights and interests. The moment you picked up my chopsticks, you had no rights and interests. And don't be a baby.

Believe it or not, I won't give you advice on surgery in the future. Your knowledge is special, isn't mine?

Also, don't lick your face one day and make a double policy if you can't take advantage of it. Your template is still wrong here. "

John looked unconvinced.

"What is the average width of the spine and the thickness of the vertebral body of European and American female stars? How many are ten year old girls? I knew your template for a long time. If it weren't for Chinese forensic medicine, I would have worked out a template myself.

Come on, look, look, what's the width. If you follow your template, do you think this is appropriate? My comrade, really open your eyes and have a look! "

John reluctantly took a ruler to measure on the film, and then calculated with his mobile phone in proportion. His face was full of surprise.

To tell the truth, when he took out his mobile phone to find a calculator, Zhang Fan lost his contempt. He just added, subtracted, multiplied and divided more than a dozen people. This thing also had to take out a calculator.

But looking at this guy's convinced face and pretended worship, Zhang Fan doesn't admire this guy's cheekiness.

To tell you the truth, China is a country of etiquette.

This is true, for example, chasing girls. If other girls say no, Chinese boys often retreat. Even if they have ideas in mind, they just look at each other from a distance. Of course, veteran doesn't count.

Foreign, especially those from the golden hair country, don't care about you. That's one of the reasons why many blacks can soak up Chinese girls. People don't want face. For example, they miss your liquid. In fact, although they have a mouthful of northeast silver, their thoughts are also golden hair.

Can any Chinese who wants a face do this?

Zhang Fan said, director Yang thought thoughtfully, and then had to nod. This thing is worthless to pierce a penny. If it can't pierce the Dean, it will always be the Dean!

Bayinliso's is preparing surgical instruments. There are too many spinal instruments. There are 100 conventional instruments. She puts them neatly, just like a disassembled machine gun. She can pick them up and hand them to the doctor at the first time.

Disinfection, general towel, the tube bed doctor of the Third Affiliated Hospital of bird market had to give Zhang Fan a hand. Zhang Fan smiled and said it was hard.

The senior director of the spine department, who doesn't know what to think, directly wants to be an assistant on the stage.

All the young doctors of the Third Affiliated Hospital gathered in front of the monitor in the observation room next door.

"Zhang Yuan, I went to the bone research institute last time. Hey, the leader is the leader. The operating table of the bone research institute is advanced. At that time, they said it was your additional funds. Look at our operating room. We don't even have an observation seat. "

Zhang Fan's face was red. When he was decorating the house, he almost didn't agree. Now he is feel shy about being praised so much.

The operation began.

Among the four adult men, Zhang Fan is not fat, but he is not thin. It can be said that he is strong. John is tall and big. For his big head, he feels that he occupies more space than others. Director Gao is the representative of Frontier men, and director Yang is a little thin like Gong Hanlin.

So in front of the four strong men, the little girl was like a pigeon on a dinner plate. Not even much meat on the spine.

Boom! The shadowless light is turned on and aimed at the surgical site!

Knife, Zhang fan starts the operation with a sharp knife.

John helped, with gauze in one hand to help pull the muscles, and an attractor in the other hand. The second assistant of director Yang carries the retractor and the gauze used to dip and suck blood. Director Gao of the Third Affiliated Hospital holds the retractor.

When the blade passes gently, children, especially these thin children, pass through the blade, just like cutting off the outer skin of walnuts. The inner fat layer will not overflow at all, as if there was No.

Open the skin, separate the fascia, free the muscles, layer by layer, and the operation proceeds quickly.

"There is no empty man under the fame! The operation field of view of Zhang hospital is too beautiful. Just like works of art, there is no excess obvious bleeding! This is the Kung Fu at hand! "

The doctors outside the observation room whispered. When Zhang Fan's operation began, everyone looked quietly. The more they looked, the more they felt as if they had found a direction.

"This is the operation, this is the expert level operation!"

Someone even shouted it out in his heart!

Chapter 1324

Among all operations, orthopedic surgery is cruel, but if you meet a master, orthopedic surgery is also the most art surgery.

For example, when the head is opened for extracerebral surgery, it seems to be the king. As a result, it is especially bronze after entering the skull. This place dare not move, and that place dare not touch. Often, when you go in, you suck two mouthfuls of blood, and then how to get in and how to get out.

When retreating, they all come out with their heads down and backward. Many intracranial operations, such as tumors, do not say that the tumors are not cut clean. After the operation, patients who did not have epilepsy will lie on the ground and spit white foam from time to time.

Also, for example, the surgery for general surgery has not been done yet. First take a stainless steel iron basin that is not much bigger than the bowl for dinner and take out the feces first. Sometimes it's

wonderful to think about it. For example, a strong man usually eats with a sea bowl. If he has intestinal obstruction and wants to take out feces, he has to take an iron basin of the sea bowl level.

A thin beauty with chopsticks legs has intestinal obstruction. Just take a small bowl and take it out. The big bowl can't get into your stomach. It's right to eat as much as you can.

There are operations in other departments, either embroidery on peanuts or boxing in cages. For example, in Ophthalmology, there are so many places, such as extracardiac surgery. If the action is a little bigger, the heart dares to stop you.

Only orthopedics. Although the tools are rough, the operation is done. It's really beautiful. White bones and bright red muscles will not make people excited because of shit.

After Zhang Fan passed the first level of surgery, although it was not clearly stated in the system, Zhang Fan felt that the operation seemed to be better than before. Many times, he could predict in advance without any omen.

It's like something will go wrong in a certain place, such as bleeding in a certain place. It's like you need to know in advance.

Because of this, Zhang Fan's operation directly feels that it is a non-invasive operation. It is too clean. There is no trace of blood in the surgical field of vision.

Whether the operation can be done or not depends on the skill of a doctor, but more people judge whether the operation is good or not.

For example, playing basketball and how NBA players play, it is estimated that there are hundreds of thousands of coaches in front of the TV. To be honest, some people really know how to play well.

This is the same as surgery. There is nothing the bird market can do for spinal orthopedic surgery, especially for this seriously deformed spine. But there are more coaches on the spot.

Anyone who engages in spine in the third class hospital can tell you the truth by pulling out one.

"As like as two peas, I think, the treatment of the lamina in the hospital is very good. It is very good to

avoid the artery in advance, and to abandon the small capillary net and enter it from the side. This is exactly the same as I think."

Bosom friend, at present, there is no such operation in magazines and periodicals. I thought of publishing it, but there are no operation cases. Now there are. "

"You can do it. An expert is just like you. You have so many ideas. Does the director know?" Some people can't see others pretending to force.

"Director, director, director, I haven't reported to the director yet!"

The difficult operation is the same as the Mathematical Olympiad. It's very simple to say with the answer, but there's no answer. They all stop cooking.

Golden haired John, Mao Duoduo doesn't say, but his hands are still big. Zhang Fan wears gloves of size seven and a half. In the Chinese operating room, this kind of gloves is a routine. Few doctors use size eight, and almost all nurses are size six.

Mao Wazi had to use No. 9 gloves. The Third Affiliated Hospital of niaoshi almost turned over the warehouse and found No. 9 gloves.

Although this guy is big, but smart, really, he feels like a young Hong Jinbao. Fat or fat, but there's no problem picking a disco.

"Zhang Yuan has to have a blood transfusion. It's going into the spine soon!" The director of shuitanzi gently reminded me.

He also knew that Zhang Fan was too overbearing during the operation and hated driving and chatting on the operating table, so Zhang Fan's operation was like a mime.

"Prepare 300ml first!"

Zhang Fan nodded gently. In fact, the real bleeding place hasn't arrived yet.

In orthopedic surgery, there are three kinds of surgery with the largest bleeding, one is the pelvis, one is the femur, and the largest is the spine.

Moreover, this kind of orthopedic surgery, because almost all vertebrae must be opened from top to bottom, the operation is large and the amount of bleeding is particularly large. Even if Zhang Fan predicts again, he can only avoid places where bleeding should not be, but some bleeding can't be avoided.

For example, this orthopedic operation, what should be done.

In fact, to put it bluntly, it is an iron bar with more than ten iron hooks.

The iron bar is inserted next to the spine according to the preset angle. If you want to restore the spine to that position, insert it to that place, and then insert the hook into each single vertebral body. Then, relying on the metal memory and the rising force of children's growth and development, the vertebral body is restored to normal at three points and one line (This is not easy to describe. There are pictures to see.)

To put it bluntly, the little tree is crooked, and then tie a wood to make it straight.

"Zhang Yuan, the situation of this family is not very good, so we also tried to save money for them and prepared 300ml of autologous blood."

Director Gao quickly reports to Zhang Fan.

Modern blood products, this is really hard to say, because there are many blood diseases that you can't completely determine. Therefore, the doctor will inform the risk during blood transfusion, which is inevitable.

Therefore, many people will agree to bring their own blood before operation. For example, taking blood once three weeks before operation, 300 to 400 ml, and taking blood again three days before operation, 300 to 400 ml, 600 to 800 ml, can often cope with most operations.

Many people are for their own safety. And this family is really out of money.

But the little girl's physical quality is not good. After pumping once three weeks before the operation, the hemoglobin can't come up. There is no way to draw blood three days before the operation, so director Gao means that the blood transfusion is only 300 ml!

Zhang Fan was stunned.

"Treat my labor expenses as medical expenses! It's not easy for hospitals to prepare more blood. After all, I'm not attached to the Third Hospital, and my labor expenses don't have to be paid in, so it's easy to deal with. " Zhang Fan said softly, not only to say, but also to explain.

Because they are all doctors and understand each other's difficulties. If Zhang Fan doesn't explain today, how do you make director Gao behave?

"This, this, this is how good, Zhang Yuan, let's go out of the Department!" Director Gao of the Third Affiliated Hospital blushed.

"There's nothing to be ashamed of. Call me more for surgery in the future. We have everything. We're all our own people, so don't say anything! All right, let's have an operation! "

Zhang fan fixed the tone with a hammer.

Outside the operating room and in the observation room, the originally chirping crowd heard Zhang Fan's words and fell silent in an instant.

When many doctors took the oath with their fists raised, they really wanted to be a good doctor, a good doctor who didn't take kickbacks and a benevolent doctor.

But the real mortgage, the pressure at home and all kinds of internal problems in life. Really, the Dragon butcher finally became a dragon. There's no way to say this.

However, today, Zhang Fan's understatement has set off a ripple in everyone's heart. Anyway, it makes everyone feel a little uncomfortable.

Of course, some disdained and muttered in their hearts: "you are so generous when you are the dean and eat in a building for decades. Let me be the dean. I'm generous when I'm full! "

.....

Shaohua's bio fertilizer sounds tall. In fact, the Biotechnology Institute in bird market is closing down so soon. So you can buy it when you go in, and then they go shopping.

Twitter, twitter, Jia SuYue seems to be able to create the feeling of a group of people alone.

"Try, try, this dress is beautiful, I want to try!"

Zhang fan can slip his legs when he goes shopping with Shaohua, and Shaohua has finally seen what terrible shopping is today.

Shaohua also likes shopping, but she doesn't go in at the store or try her clothes.

After wandering for several hours, Jia SuYue finally had a good time.

Men usually think of good things when they are full.

And women think about eating only after they are happy!

"Call your Zhang Fan and invite us to a big meal!" Jia SuYue said to Shaohua as he rubbed his chopsticks legs in the car.

"I thought your leg didn't hurt. It hurt too! I'll treat you. It's estimated that his operation is not over yet. " Shao Hua also rubbed his legs.

Pain and happiness, this is the state of two women now.

"No, it's been a day. I've finished shopping in the street and haven't finished the operation yet? It can't be a date with that breast size nurse! "

Jia SuYue doesn't believe it. She thinks what surgery can take longer than they go shopping?

"Don't wrong my family Zhang Fan. Hurry to eat what you want." Shao Huabai glanced at Jia SuYue.

"Go, go, go and find him. After that, we eat self-help. We're a little at a loss. The one in your family will never go!"

Shaohua thought about it and agreed. She thought that Zhang Fan had had an operation all day and could not eat well in the hospital, so she agreed.

After entering the Third Affiliated Hospital, Shaohua didn't call Zhang Fan because she knew that it was not very necessary and that calling would interfere with Zhang Fan's.

Although the Third Affiliated Hospital has not been here several times, after all, the president's wife is not. She took Jia SuYue directly to the surgery building, then got on the elevator and directly pressed the operation floor.

"Don't you call? If you want to make a sneak attack, forget it, you'd better call, don't..... "

"Ouch, my ancestors, what do you really think? Why do you think so strange!"

"Hey, you still haven't grown up! Haven't you seen a TV play? If you don't call in advance, you'll find out in the past... "

"Keep your voice down, I'm afraid of you!"

"Are there any outsiders!" Jia SuYue is a little dissatisfied with Shaohua's careless and laissez faire state.

Out of the elevator room, Shaohua asked a nurse and learned that Zhang Fan and they were still in surgery.

Jia SuYue looked surprised, "it's almost a day. Does an operation have to stand for so long? Can he make it? "

"Yes, when there was a major operation, he didn't want to talk when he came home. He was tired and lay on the sofa like his whole body was stiff!"

Shao Hua sighed leisurely!

Chapter 1325

Hospital, this place is more uncomfortable to tell the truth than the Yamen. Sometimes the Yamen can make some sense. For example, you have money and you have reason. But the hospital is really unreasonable. Sometimes real gold and silver may not be useful.

But not without real gold and silver.

Therefore, especially in the waiting channel of the operating room, this place is like a lottery point. It's definitely a roller coaster ride.

Shaohua and Jia SuYue had just arrived at the door of the operating room. They took a nurse and asked Zhang Fan if their operation had been completed. The little nurse looked at Shaohua and Jia SuYue contemptuously from top to bottom. I think they're drug dealers or something.

And said impatiently, "no!" Then he left. Jia Su was more and more unhappy. "What attitude!" To follow the nurse's theory, Shaohua quickly pulled Jia SuYue.

There is a joke in the medical circle that a surgeon's healthy marriage has four stages.

The first wife is her college classmate, the second is a beautiful little nurse, the third is a flirtatious and rich female drug dealer, and the fourth is a female graduate student brought by herself.

So according to the joke of the medical circle, female nurses are very hostile to female medical representatives. In fact, in real life, nurses are also very hostile to medical representatives. This is not because female medical representatives can seduce male doctors.

The reason for this is that drug dealers will only curry favor with doctors and ask doctors to prescribe, rather than pay much attention to female nurses. Even if they send things, they will only send them to the head nurse. Therefore, the little nurses are very hostile.

Shaohua was deeply afraid that Jia SuYue would quarrel with the little nurse, because she knew that the nurses in the operating room had a bad temper.

When Zhang Fan was a little doctor, he flattered the nurses in the operating room.

Pull Jia SuYue to sit on the plastic bench outside the operating room, "this bag is expensive today!" Shaohua pulls Jia SuYue, who is still staring.

"No, it's not discounted. I'll tell you, what's sold in the tea Vientiane exchange may not be true. Look at the workmanship, look at the brand... "

Shao Hua breathed a sigh of relief.

At this time, I heard a middle-aged woman around me. Looking at her appearance, she felt older than Shaohua's mother, but her voice was very young.

The woman cried while making a phone call. "Her uncle, once the child's operation expenses are paid, there is no money at home. Just now the nurse came out and said he wanted blood transfusion. Let's hurry to pay the money. The child is lying on the operating table now. Can you lend me some? We will return it. "

It is estimated that the man has gone to donate blood, and on the phone, he heard something like a girl film or a disabled girl film. You have to hire experts to cook, and I don't have much money.

Then hung up.

The woman holds the phone, her lips tremble, and she can't even say a word of defense. Even if the child's spine is twisted, it's also the meat falling from her body.

She really didn't expect her eldest brother-in-law to say such words that broke her heart.

Tears are like water beads pulled from the line, and women are deeply afraid of affecting the doctors who operate on their children in the operating room. They curl up in the corner and sob.

Really, I'm disappointed. Tell the heaven that there is no way, and ask the earth that there is no way. If the child hadn't been lying in the operating room, she really wanted to jump out of the window.

The more I think about it, the more I feel sad, the more I think about it, the more I can't help it. It's like the child's deformity is the evil she created and the disaster she did in her previous life.

Curled up in the corner, tightly against the cold concrete wall, as if the wall could give her a trace of strength.

When a woman called, Shaohua turned her attention to the woman because she didn't want to listen to Jia SuYue. Although it was impolite to eavesdrop on other people's calls, her eldest brother-in-law's

voice was too loud.

And the phone said, please experts, her heart jumped.

To tell the truth, although she married Zhang Fan, Zhang Fan rocketed to the position of president, in fact, her times to the hospital are limited.

Especially after President Zhang Fancheng, their family and their parents-in-law had a physical examination, and Shaohua took them to the former tea vegetable Affiliated Hospital for physical examination. Shaohua and his family are deeply afraid of bringing bad influence to Zhang Fan.

Therefore, she does not understand the sadness of the hospital, and she does not understand the sadness of the family members of the patients in the hospital.

Looking at the woman's tears and repressed cries, her heart suddenly became uncomfortable.

Because every time Zhang Fan went to other hospitals for surgery, she could bring tens of thousands back every time she came home. At that time, she was proud that her men were skilled.

But now, she seems to feel very uncomfortable. It's like Zhang Fan and himself caused the tragedy of the woman in front of him.

Shao Hua's eyes are red!

Think about the house of mordu, think about the villa of chasu, and think that chasu is just a big golden pickup truck. She seems a little flustered.

For the first time, she seemed to see clearly that the doctor's money was made in this way.

Zhang Fan never discusses his work at home. Happy or sad, he felt that the emergency room was constantly in the middle of the night on weekdays, which had interfered with his family. It would be unfair to his family if he brought home the affairs of his unit.

So, Shao Hua doesn't understand!

"What happened to her?" Jia SuYue seemed to be hiding behind Shaohua, revealing a small face and secretly looking at the woman in the corner.

"Her family has no money for surgery."

Shao Hua suppressed the agitation in his heart.

"Why don't we help her? It looks so pathetic!"

Jia SuYue looked at the woman in the corner with red eyes.

"You wait here. I'll have a look."

With that, Shaohua got up. Jia SuYue wanted to hold Shaohua, but he took back his hand.

Shao Hua walked gently to the woman and handed her a piece of paper. The woman suddenly saw a piece of paper and trembled with fear.

She's too nervous.

"What's the matter? Can you tell me?"

"Wow!" With a cry, the woman looked at the young woman with tears in her eyes. "The child had surgery. There was not enough blood and there was no money. Just the nurse came to urge, the child went to draw blood, and the child was in poor health. He coughed all night!"

Shaohua couldn't ask anything at first. She stood up and wanted to do something for the woman.

Just then, the door of the operating room opened. A nurse put her head out: "howl, what howl, don't you know what's going on inside?"

Jia SuYue was angry again, and his red eyes stood up to fight!

At this time, the nurse shouted: "is the patient's family in bed 9 of the spine department, and is Feng Tiantian's parents there?"

"Yes, yes, yes." The woman struggled and almost fell down. Shaohua quickly grabbed the woman.

"Your child is in operation, and you are still howling at the door of the operation. Is it appropriate?" Looking at the tears on the woman's face, the nurse's tone became much better, but she still had to give advice. After that, the nurse added: "hospital Zhang exempted the cost of your throwing knife, and director Gao exempted the cost of your treatment.

The operation is almost over! Everything is going well. "

Then the nurse left.

The woman grabbed Shao Hua's hand and knelt softly at the door of the operating room with her head on the ground. "Good man, benefactor, I kowtow to you!"

There is no way to survive, and there is no way to die. The sky is clear and the moon is bright. Really, this kind of great sorrow and joy turns in an instant. It's too troublesome.

The woman cried so loudly that she couldn't even say a word.

Shao Hua wanted to pull up the woman while crying, but he couldn't.

Jia SuYue also joined the woman, pulling and pulling. She also cried. She didn't know why she cried so hard. She didn't even know what happened to each other.

There are three tragedies in life: the loss of a mother in childhood, the loss of a spouse in middle age, and the loss of a son in old age. In fact, there is another tragedy. There is no money for medical treatment.

It's hard to watch yourself wait to die or give up treatment. I really hope no one will encounter it.

.....

From the early morning when the sun had not risen, Zhang Fan and his family had already started the operation, and now the sun has set.

The operation has just come to an end.

"Zhang Yuan is fast!"

"Yes, last year or the year before last, I invited Jin He to fly a knife. From the morning to the middle of the night, director Gao stood and peed."

"Did you find that Zhang Yuan's technique seems different from that in the textbook!"

In the observation room, the doctors were chatting. As soon as they said this, it was cold. The young graduate students still didn't understand it. They were thinking, "why do I see it alone? My level is growing! "

In fact, everyone can see it.

Zhang Fan's technique is faster, less damage, but more difficult, so we actually know that this operation should go back and think about it secretly.

In the operating room, John took the measuring instrument for the last time, measured the data and reported the data to Zhang Fan.

"The angle is the same as that discussed before the operation. There is no deviation." John reports.

"Well, John, what does your wife do?"

"Oh! oh oh oh This is my private... "

"You don't even pray for dinner. Why are there so many things!"

John's level of measurement is particularly high. The measurement of spine and joints. To tell the truth, many orthopedic doctors may not be clear after working all their lives.

As for Lao Yang, Zhang Fan has no idea. It's like someone has passed a Tsinghua University examination. Even if you give someone a suite, they won't come to the upper University, no matter how beautiful the girls are.

But John is different. He may not be able to stand in special orthopedics, but the tea vegetable bone Institute and special orthopedics are cooperative units. Here is his position!

However, Zhang Fan sometimes hates the double label of golden hair. When he asks others, he takes it for granted. When others ask him, he even infringes his privacy.

Sometimes I hate to give him the fur of this hairy child!

Suture, close.

Then he pushed the child out of the operating room gently. The ICU of the Third Affiliated Hospital was not connected with the operation. After all, it was the old building.

Waiting for the patient to wake up and push the child out of the door, Zhang Fan also came out.

As soon as the child's parents look at the child, they run over, want to touch, don't dare to touch, want to ask, don't dare to ask, their hands tremble, and don't know where to put them. I dare not even speak out loud.

Once again, the director of the Department came out and stood beside several doctors. This must be the benefactor of her child. The woman cried to kneel down and thank the doctors.

Director Gao and the bed doctor hurriedly stopped the woman, "Zhang Yuan, please say a few words, or she will be upset!"

"Good!" Zhang Fan nodded.

Then he gently stretched out his hand and smoothed the child's hair. "Today, you have gone through all the detours in life. From then on, life is full of smooth roads. In the future, you will grow up and be filial to your parents!"

The little girl nodded slightly.

Chapter 1326

Orthopedic surgery is different from surgery in other departments. For example, in the breast mass surgery of general surgery, you can't see whether you have cleared the mucous membrane and damaged the breast duct after you finish it, except that the mountain is a little collapsed.

Of course, except for fengxiang surgery, this thing doesn't look at surgical technology. It looks at the size of frosted silica gel material. As long as the material is large, there are no mountains that can't stand up.

In orthopedics, the effect can be seen when the operation is completed. Whether the steel plate is fit or not, and whether the fracture is jointed or not, the X-ray can let you see clearly.

When the patient was sent out of the operating room, the doctor in the radiology department pushed the C-arm and began to take pictures.

"Well, why are you here?" Zhang Fan saw Shao Hua and Jia SuYue.

"It's too late. We'll come here until your operation is over." Shao Hua explained.

Director Gao looked at Zhang Fan with a smile and said nothing. In fact, I murmured in my heart, who are these two.

"This is my lover Shaohua! She came to the bird market for something, so she came with me." Zhang Fan smiled and said a word to Lao Gao, not to mention the introduction. In fact, director Gao's heart was not so stupid. Director Gao pretended to be indifferent with a fake smile. No matter how stupid Zhang Fan was, he was not a good guy!

"Oh, you didn't say earlier. The hospital has a special lounge. Look, it's made. Xiao Wang hurried to take Zhang's lover to have a rest."

Director Gao began to laugh solemnly.

"OK, you follow them to have a rest first. I'm not finished here. I'll call you when I'm finished."

Then he turned around and took director Gao and them to the observation room of the operating room.

When Jia SuYue saw that Zhang Fan didn't introduce himself, he was quite dissatisfied. But there was no way. He was fully armed and even wore goggles. At a glance, he knew he was very busy, and director Gao didn't be polite to Shaohua, so he nodded.

In the observation room, Zhang Fan, director Yang of shuitanzi, Mao John and director Gao entered the observation room. The doctors in the observation room stood up and began to applaud.

"Today, the Third Affiliated Hospital first broke the zero record of no highly difficult spinal orthopedic surgery in bird market. Here, on behalf of all orthopedic doctors of the Third Affiliated Hospital, I would like to thank director Zhang of tea element hospital, director Yang of shuitanzi hospital and director John. "

Director Gao slightly bent over Zhang Fan, and then continued: "the age of children with spinal deformity in the frontier is often too old because of various reasons. There are reasons why our doctors' technology is not comprehensive, and there is a long way to go..."

Settle a matter by leaving it unsettled. The Minnesota of early Jin Mao, which is a census conducted by the University of Su Su, has surveyed 2000000 children, the incidence rate is 1.40%, and China has made a census of more than eight thousand children in the early years of the golden mean. A report has been consistent with the data of Minnesota, and then it has gone to the end.

When Zhang Fan was reading this paper, he thought it was another census to cheat funds.

Director Gao barabara said a lot of difficulties, and then the last sentence concluded that our conditions are very difficult, but our department is the first zero breakthrough in the third class a hospital in niaoshi. After a few words, he gave the podium to Zhang Fan.

Because he also knows that this thing is actually a little weak.

After the routine flying knife doctors are finished, they often look at the patient's soberness and stable life state, and then they will turn around and leave, so that they will not participate in the political state of the local hospital.

Zhang Fan is different. First of all, Zhang Fan has some experience in this operation. He wants to share it with you. Second, it was also the gracious invitation of director Gao.

He wants Zhang Fan to tell him about it. It was not that he wanted Zhang Fan to give lectures to the doctors of the Third Affiliated Hospital, but because he didn't understand it, he also wanted to listen to his confusion under the excuse of letting Zhang Fan give lectures.

Of course, you can also ask directly, but director Gao is a little embarrassed.

Not everyone is a good teacher, and not everyone is ashamed to ask questions.

.....

"Thank you. Thank director Gao for your invitation. Thank you for waiting outside the operating room. Although some of you here are meeting for the first time, we have known each other for a long time. "

Zhang Fanyi opened his mouth. He didn't have any official words. He didn't have anything tall, but thanked him. That's comfortable.

People are like this. Everyone likes to listen to good words.

"The development of spinal orthopedic surgery is slow not only in the border areas, but also in our country.

First of all, this kind of operation is double height operation, which is difficult and high-risk. In addition, the threshold for hospitals is not low.

This time, with the assistance of director Shuitanzi, director John and director Gao, I have improved the spinal orthopedic surgery. Next, I will report to you the difficulties encountered in the operation and my own caution.

I hope you will criticize and correct me. "

Zhang Fan has a smile on his face.

Although the mask and surgical cap have drawn traces like a hoop curse on the face, the smile is sincere!

This aspect of temperament, especially the smiling temperament, Zhang Fan is a graduate and is very good at handling it.

Don't think about the past. When I went out to lecture for the first time, I looked angry and arrogant. I was deeply afraid that others would look down on me.

Now, to tell the truth, Zhang Fan doesn't care what others think of him. What he cares more is that he wants other doctors to listen to him and listen to him carefully.

This is also a change of mentality. At the beginning, there was a system. Zhang Fan was deeply afraid that the system would run the next day and that the system would be found and robbed the next day.

Now, Zhang Fan wants to spread what he has learned.

After all, this thing is the medical system, not the Royal female art in the room.

During the lecture, Zhang Fan drew the picture first. Really, the doctor's drawing is not good. To tell the truth, it's sometimes troublesome.

For example, when you talk about surgery to patients or their families, the state requires to clearly inform patients and their families what doctors should do next.

For example, in a circumcision operation, the doctor said that there was a lot of hype, what ring was cut and what was minimally invasive. The family members didn't understand. The little doll kept crying with the chicken and said that the bad uncle wanted to cut the chicken.

Although people are small, they also know that this thing is very important.

If the doctor can't draw, he can only take the eggplant and tell others. I'll take off the black skin on the eggplant head and let your white meat show.

But eggplant is sometimes hard to find in the hospital, because it can't be put.

If you can draw a picture, it's great. Brush it, draw it, and then say it, everyone knows. In fact, Lao Zhou was used to using a brush, and then suddenly went to learn hard strokes. He couldn't play.

Zhang Fan drew a good picture and began to say, "everyone's confusion now is the grasp of the compensation angle. Let's learn the principle of the compensation angle together today."

Zhang Fan explained it in simple terms, pinched and crumpled it. First of all, from a geometric point of view, I really don't know that the make-up teacher has now opened the make-up class to the hospital.

Doctors listen very carefully and take notes when they don't understand. They can't buy this knowledge with money.

If you understand, you will constantly combine Zhang Fan's knowledge points in your mind to improve your knowledge structure.

With Zhang Fan's explanation, suddenly all around the operating room was quiet, and only Zhang Fan's voice echoed.

Surgery is sometimes very similar to weapons. The more sophisticated it is, the less it will be popularized soon.

For example, the most powerful hospital in Jinmao, if you are not from Jinmao, you are not allowed to participate in many operations. For example, Mayo, known as the world's strongest private hospital, is the big holder of spinal orthopedics, either stick or ball.

But they never speak stick language and ball language in the operating room, all in English. And one count. Although these people are Asian faces, they are all from the golden Maoist country.

Therefore, when Zhang Fan started speaking, many doctors became more and more excited.

"The compensation angle was calculated like this!"

"Why don't Campbell's orthopaedic surgery be explained like this?"

"Zhang Yuan is so awesome."

It's also an ability to understand and explain what you understand thoroughly.

Zhang Fan had a deep understanding of this skill. When he was in school, he wanted to open a biochemistry class. At that time, their grades were a sensation.

Because the two children of the old man's family in class were academicians, and he was too old to be employed as an academician, the old man was angry and went to take undergraduates instead of doctors and postgraduates.

The students of Zhang Fan's generation felt that they had won the first prize at that time. Darling, excited, I entered the classroom and cried as soon as I had class.

It's too painful. It's already quite difficult to be biochemical. It's called myth. When I met a Hupu dialect with the chairman's accent and his old man's English, my God, after a class, the Chinese people who are full of brains stood up!

And that year, the old man wrote his own paper. Zhang Fan failed more than 80% of their biochemical courses. Finally, the headmaster bent over and smiled and invited the old man away.

I can't afford it!

So Zhang Fan gave a lecture and tried to make everyone understand. When you say this thing, others don't understand it. What's the meaning of this? It's not making an atomic bomb. I'm afraid everyone has learned the same. It's originally a surgical technique that benefits the public.

"Your family Zhang Fan will give lectures!"

Jia SuYue and Shaohua peeped at the door.

Shao Hua really hasn't seen Zhang Fan standing on the podium waving Fang Qiu. Looking at the underground doctors listening carefully, her heart is really sweet.

"Isn't he afraid to teach students to starve to death? You see, his potato accent and English from time to time are terrible. "

Shao Hua seems to have heard nothing. Looking at his stone and standing on the podium, Shao Hua is really proud.

"Zhang Yuan, can I apply for your doctoral student?" The harmonious scene is an illusion. Zhang Fan looks at the people off the court and listens carefully, and he speaks cheerfully.

But in the last question session, a young man stood at the end and shouted excitedly.

He thinks Zhang Fan should be a doctoral tutor at this level.

"Director Yang is quite experienced in taking students. You can talk to Director Yang in private."

Zhang Fan was embarrassed and didn't know how to get down.

Chapter 1327

"Pooh! Pooh! "

In the car, the two women are like farting, pursing their lips and laughing, as if they are embarrassed. They even want to steal their laughter, but this clearly knows that the other party is laughing at you, but it is the one who makes the laughing angry most.

Zhang Fan tilted his mouth and continued to run west.

After checking Zhang Fan's information, the girl at the front desk directly said, "Hello, chief, please follow me!"

Jia SuYue is stupid. How did he change his head. If she didn't know the stingy stone too well, she thought she met a liar today.

People after 80 probably don't hear much about the word leader, that is, in TV dramas or during military parades. In fact, although they don't hang their titles on the farm, they still manage in the way of the army.

Even the platoon and regiment system existed, and at the division level, people began to hold titles.

Pay for accommodation.

"What place is this? How do you feel that your family Zhang Fan took us into the great hall!"

"I haven't been here!" Shaohua also followed Zhang Fan to such a place for the first time.

It's not that Zhang Fan shows off, nor that Zhang Fan dislikes the expensive local hotels, but that Zhang Fan thinks it's still a safe place for the army when he comes to a strange city.

I guess this idea is the same as many people.

Because Zhang Fan has a level, the room is a suite, and Jia SuYue is treated according to the entourage, standard room! More money won't arrange a suite for you.

President Jia was not very satisfied, but he didn't dare to show it, because the atmosphere of this place had suppressed her.

Look at the wall. They are all photos of leaders who have been here, from old men who love drinking to old men who love smoking, and old men who preside over two bombs. One by one, you can look at it in awe and dare not make a noise.

Senior officials have no cards. Hang photos here!

As far as the natural environment is concerned, Shizi city is worse than the bird market. This city is a modern city established by the predecessors of Nanniwan in those days.

It's freezing in winter. It's so hot in summer that there's no place for mosquitoes and flies. Imagine how dry this place is.

Zhang Fan had an operation for a day, while Shao Hua, Jia SuYue and Shao Hua had slipped their legs for a day. They were tired, but the food in shizicheng was not special. Breakfast is Nanhe hu la soup and Dongshan pancakes, ruling the city.

Lunch and dinner are fried restaurants and hot pot shops in xiaosanchuan. So after three people ate a little casually, they were ready to rest.

In the evening, Shaohua leaned against Zhang Fan, "are you tired today?"

"It's OK. It's a little easier than going to work." Zhang Fan said indifferently.

Others seem to think that the doctor will peel off the skin after one day's operation. In fact, they are used to it. The younger the doctor, the more tired he is, because he is not used to it.

"How much do you charge for surgery in other places?" Shaohua never asked Zhang Fan about his specific income.

Zhang Fan didn't say how much he earned anyway.

But this time Shaohua took the initiative to ask. Zhang Fan was quite puzzled, but he still said: "thirty thousand throwing knives at a time!"

This price sounds super much. 30000 a day. I'll go in a month. It's amazing. Moreover, it seems that this price is particularly expensive, and the academician level is 60000. Even if Zhang fan does better than his master's operation, the price is this price. Doctor Feidao will not bargain with local doctors, and local doctors will not take the initiative to lower and raise the price for doctor Feidao. There is a price in the country.

Of course, if you go to ask for a Throwing Knife by yourself, the price is hard to say.

In fact, the price of flying knife doctor is 30000. It is also 30000 to do ten operations and 30000 to do one operation.

Therefore, many remote hospitals often accumulate several operations at one time, and then ask doctor Feidao to come. Generally, they can do four to six operations in two days.

The most important thing is that many experts, often two days a week, can't be invited in many places.

The state neither supports nor opposes this Throwing Knife. Anyway, there are no standardized regulations and rules. I have been practicing in different places for decades. I don't know why. I've been shouting all the time.

"Today, I saw the patient's family. I was very sad because of the money. I was also a little uncomfortable!"

"Oh. It's this! " Zhang Fan understood.

"Hey, there's really no good way to do this for the time being. Special diseases require special doctors. Not all special diseases can meet special doctors. Today, although I told director Gao not to pay for the operation.

In fact, this matter can only be said in private, not to other Throwing Knife doctors. "

"Why? Doctors who can fly knives should not be short of money. Everyone is dedicated... "Shaohua couldn't say any more, and she knew she took it for granted.

"Yes, just like what old man Kong said to his disciples in those years, his superficial style will be noble and his willingness to be kind will be blocked."

Although Zhang Fan said so, an idea suddenly came out of his heart.

My teacher can give lectures on a tour. Now my bone institute can also do regular training?

The scope is not large. It is in the frontier. As long as a system is formed, the frontier orthopedics will definitely be improved in the shortest time.

.....

After a sleep, Zhang Fan is lively. He doesn't recognize the bed, which is almost the same. Of course, you can't recognize a bed, but you must recognize a person.

Shao Hua and Jia SuYue can't. Both of them had dark circles under their eyes. When they got on the car, they were very angry, as if they had an addiction.

"Zhang Yuan, Zhang Yuan, where are you? Come to the lab! " On the phone, Zhao Yanfang was so excited that she was about to call out.

Hearing Zhao Yanfang's tone, Zhang Fan knew it was a good thing, so he didn't worry.

To tell the truth, when he was at school, Zhang Fan envied others for having mobile phones. As soon as the bell rang, he reached out and took out one, and then connected it. It was so natural and unrestrained.

But after work, as long as the phone rings, there is nothing good, especially after becoming the Dean, as long as the phone rings, he has a feeling of panic. Really, it's no exaggeration at all.

"I went to the bird market. Now I'm going back. What's the matter? "

"Why did you go to the bird market? Why don't I know? You said what did you do in the bird market at this time!"

"You are my leader. I have to report to you where I go. Tell me quickly!"

Since Zhao Yanfang ripped off Zhang Fan, Zhang Fan was not polite to her and didn't worry that she ran away.

"The experimental report of animal experiment has come out, and the toxicity test has passed!" Zhao Yanfang said excitedly on the phone.

Zhang Fan was also very happy, but his mouth was not like this: "that's it? Give me the phone back? With hundreds of millions of investment, you can't hold your breath with this small achievement?"

My comrade brother, now is not a time to be excited, proud or lying on the credit book. We should continue to work hard. We must not be proud. Let alone the others, if we fail this time, I think the tea vegetable government can be bankrupt by both of us.

All right, I won't say more. Besides, I don't know the confidentiality discipline. In the future, I'll make a confidential call for this kind of thing. I don't know to ask President Chen! "

After hanging up the phone, Zhang Fan had a smile on his face.

Chapter 1328

A drug, here specifically refers to a compound drug. If you want to enter the clinic, you can learn from the Scriptures like Lao Tang. Anyway, you can't escape through mountains and rivers.

The simplest, AIDS clinical trials have failed more than 200 times, and the money in it can almost be counted as if the water in the Yellow River has been pouring out. Others, such as herpes, also failed.

Before the third phase, many drugs felt like seed players. As a result, they entered the third phase. The whole thing was a silver like Pewter gun head.

Generally speaking, the trials before the third phase were all literary dramas, but after entering the third phase of clinical practice, this is the work of real knives and guns. Whether it is OK or not, this thing will be shown at this time.

Around the world, more than 10000 medicinal compounds will be developed a year, and then about 200 to 300 can enter animal experiments, and no more than 10 can really enter phase III clinical trials.

It can be said that one out of ten thousand.

The tests before the third phase are often qualitative. For example, if you eat this thing, it will lead to other diseases. For example, the drug tea element has found a pair that can make mice stay overnight. This is one of them.

Seriously, the research is to treat intestinal tumor suppressor drugs. As a result, the skin of mice has been stripped off, which is a failed chemical synthesis.

What is the third phase test? The third phase test is simple. The first phase toxicology and pharmacokinetics depends on the drug toxicity and metabolic mechanism; In phase II, select the dose, determine the dose of the drug through the window between the maximum acceptable dose and the minimum effective dose, and preliminarily measure the effectiveness and safety of the drug; Phase III, large-scale effectiveness and safety test to verify that the drug can treat diseases and be used safely.

After passing these three trials, we can apply to the regulatory authorities for NDA. In fact, there are still four phases. However, the fourth phase is fooled by everyone. The fourth phase is the market response and some individual requirements of the regulatory authorities. It's OK to have money.

Therefore, if the general drug instructions tell you to take it according to the measurement, you can take it according to the measurement. Others don't say that there is gold in it, but you have to take one when you take the medicine. Do you think he can't do the test, or do you think you are lucky.

Drugs are toxic. Especially for some drugs, the window of safety measurement is very narrow. If there is more, it will change from treating diseases to killing poisons.

Moreover, before the clinical experiment, once the drug characterization is passed in the laboratory, it is necessary to conduct two appropriate animal experiments in order to give the data for human experiment.

This thing is more popular. It is to find human cousins who don't have five clothes to experiment. Although the regulatory authorities of various countries do not specify an animal, they have a requirement: animal experimental data related to pharmacology.

That's why I said plainly, cut the monkey!

Small molecule drugs generally require the test data of rodent species, and strictly use slightly larger mammals, such as mini pigs and dogs.

And Zhao Yanfang and their cousins who don't have five clothes, primates!

Therefore, although I am happy now, the pressure is not small.

In fact, the current situation is that just after the Long March, you have to die in the Jinsha River. The pressure is really not small, but there is hope now!

Therefore, Zhang Fan now tells himself that he must hold fast, hold fast, and never swing. If he really swings down, the boss of the tea vegetable government may really cry.

All the way west, on the highway, kuluze galloped steadily. Both women were making up for sleep. I didn't know that they stole some rice from someone's house last night.

Zhang Fan listened to the Xihai love song of the Phoenix Group and ran all the way towards tea.

After Tianshan, the scenery is different immediately.

If the scenery of the bird market is similar to that of Jiangsu Province, in addition to the flat land, it is also mainly earthy yellow. On the bare mountains, like children without hair, they tie up a chicken and sing an elephant.

But once you cross the Tianshan Mountain and enter the tea boundary, the scenery is different. The expressway shuttles through the Tianshan Mountain. Looking at the snow mountain in the distance, you can feel a little cooler in summer. On both sides of the road are all kinds of fir trees, which are lush and straight into the sky.

Really, extremely beautiful.

After entering the tea vegetable land, he obviously didn't get home, but Zhang fan can obviously feel that he seems to be home.

Zhang Fan drove into the hospital.

.....

The hospital's laboratory was overcrowded. Lao Chen looked out while wiping the sweat on his forehead. When he saw Zhang Fan's car, he quickly said, "Zhang Yuan is coming, Zhang Yuan is coming."

In addition to Ouyang, others are ready to welcome Zhang Fan.

Zhang Fan entered the laboratory and looked, Ho! The leaders in charge of health came and rubbed their hands. It is estimated that sweat beads have been rubbed into medicine pills.

"If you don't come today, I think the doors here will burst." Ouyang looked at a group of people around him reluctantly.

"What about the report? I'll look at the report first."

Zhang Fan hurriedly asked.

"I'm in charge. Before you come, the report is sealed. No one can read it first." Ouyang said.

"Take it out quickly, Zhang Yuan is coming!" The leader in charge of health is like a junior high school student and the owner of the video hall to play a midnight film. He is quite dissatisfied with Ouyang.

After a while, the report came over. Zhang Fan found an office and opened it to have a look.

Ouyang whispered to Zhang Fan, "the security of the laboratory is estimated to be out of order."

"It's not necessary. It hasn't reached phase III yet." Zhang Fan didn't understand.

"What do you know? Something's really going to happen. You have no place to cry. Look how complicated this place is.

Marubeni, golden Mao, golden mean, digital, and doctors from various places. Some don't. do you know what people think? "

When Ouyang said this, Zhang Fan thought the old lady was right. There's going to be a problem. Who is he looking for to cry.

"OK, you're right. Let the tea vegetable government come forward?"

"No, we don't have a good relationship with road airlines. They borrowed our plane last time. I mean, let road Airlines send a company!"

"Well!" Zhang fanhan came down. Ouyang's tone is too big. A company, a hundred people, you haven't done anything yet. You just want a company. If you want to be able to do something, do the border military region have to move to the tea vegetable hospital!

"OK, OK, OK, I'll ask Lao Chen to contact me later. If you can save your face, you can use it less and save it for the critical moment. "

Zhang Fan comforted the old lady. The old lady was very useful!

Open the report, Zhang Fan has a little egg pain. He read the report too hard, almost all in English, and there are a large number of chemical molecular formulas.

Big head!

Chapter 1329

On Monday, when the doctors and nurses of tea vegetable arrived at the hospital ahead of time, they seemed to find something different. First of all, there are many military vehicles in the hospital, but not PLA, but the internal defense armed police force.

Ouyang came to the hospital early, stood in Zhang Fan's office and looked down, "how can old Chen contact the internal guard? Didn't he say good road navigation!"

"Well, the old lady is picky!" Zhang Fan doesn't know when to start. He can eat in the morning and drink tea.

"I have also learned about road airlines. They all fly planes. Getting off the plane is not as good as our security section." Zhang Fan said without conscience. He wants the old lady to water the flowers early. Zhang Fan doesn't want to make trouble for others early in the morning like Ouyang.

Ouyang crooked his mouth and knew that Zhang Fan was fooling her, but she had no choice. Now she has a feeling that her son is old and I am finished. She is more and more afraid to command the direction of the hospital now, so she holds on to the small place and hardly speaks in the general direction, unless Zhang Fan really has no way.

Last night, Lao Chen and the leader in charge of Health reported to boss chasu all night. After the report, boss chasu attached great importance to it. It's no good not to pay attention to it, because the government has paid great attention to the tea vegetable hospital. It can be said that this is the largest government investment in recent years.

In case of any accident, all of them are expected to be consultants this term. Therefore, boss chasu contacted the local armed police overnight, and then the most professional defense forces drove into the chasu hospital the next morning.

The news of the success of the drug animal experiment, like his long legs, boasted that the wall of the tea vegetable hospital flew out.

Early in the morning, Zhang Fangang was about to go to the internal medicine department. His digestive medicine department was about to be upgraded. This thing should not be the same as sister Pao. It

should be tactical detour. This thing must strike while the iron is hot, or it will be cold if a detour is not done well.

As a result, before going out, Mishima Zeng came to the door with the president of GlaxoSmithKline Europe. One is the president in China and the other is the president of the European region. This row is quite large. Zhang Fan doesn't give face either.

"Zhang Yuan, I know the rules of your government, so I brought some tea this time. There is nothing else. After all, our friendship is between gentlemen. We are all gentlemen."

The big nose of temoshima can speak Chinese and drop his schoolbag. However, listening to this guy's nondescript remarks, Zhang Fan always thinks of the morning reading led by the old residence of respiratory department every morning.

"Thank you! Please sit down! " Zhang Fan politely asked them to sit down. Originally, people at this level wanted to come, at least they would make an appointment in advance. Unexpectedly, they killed them directly without saying hello. They also wanted to make friends with Zhang Fan.

When I went to Sandao, but to tell the truth, Sandao Glaxo really had a fireworks relationship with Zhang Fan. If it hadn't been for the charter flight made by Ms. Zeng, Zhang Fan couldn't have come back as soon as possible. Therefore, even if people don't make an appointment, Zhang Fan has to give Ms. Zeng face.

"Zhang Yuan, the pharmaceutical factory we invested in tea is built on the most advanced scale in the world, and the government supports it very much. I just feel that Zhang Fan doesn't care about us, maybe we don't do well. Therefore, this time, I invite the president of Europe to come and express our urgent wish to you, and hope you can give us fair and just treatment."

Ms. Zeng watched Zhang Fan take the tea and began to talk.

"Oh!" Although Zhang Fan has a smile on his face, he knows in his heart that what people say is that we are now the government financiers. Some people support it, and they also want to play a role in new drugs!

Original medicine, what do you say about this thing. It's a bit like a mouse pulling a wooden lift. As long as it can be pulled into the third stage of clinical practice, it often won't lose money in general. Otherwise, they are the first in the world to sell the Army (a). How can they finally transform to medicine?

"I see. Don't worry. I will pay more attention to your enterprise. I also guarantee that once the new drugs in our hospital need to be introduced into partners, I will choose you under the same conditions."

Zhang Fan has no mind to guess riddles and play Tai Chi with them.

"I like dealing with leaders like you!" Ms. Zeng praised Zhang Fan, but in fact she secretly blamed herself. She used to think that Zhang Fan was just a doctor. He was amazing. Could he be better than an academician?

If this is at the national level of China, Zhang Fanzhen can't. Fame, appeal and scientific research ability are still young.

But it would be very different if it were placed in the city of tea. It's not that she hasn't put pressure on the government, but the government also said that we can't be the home and master of the tea vegetable hospital.

At first, Ms. Zeng thought that the tea government was fooling her, but after she seriously entered the high-tech zone, she understood.

There are not many high-tech zones in a city, not in developed cities, especially in the northwest.

The high-tech zone of tea has really developed.

Most importantly, the high-tech zone is almost full of enterprises in the pharmaceutical industry.

The endoscope manufacturing plant established by Olympus in Marubeni and the pharmaceutical plant established by Anstelai, a pharmaceutical enterprise in Marubeni. There are also equipment assembly plants set up by Siemens, GE and Philips in Chasu High Tech Zone.

With these leading enterprises, there are more enterprises extending from the downstream. It can be said that the high-tech zone is almost developed by relying on tea vegetable hospital or Zhang Fan.

Sometimes, Ms. Zeng is a little in a trance. One person, one city. How powerful it must be.

However, she admires the enterprises of Marubeni more. Sometimes she also kept thinking that people in the meatball country had a better nose than the dog Turin.

Look at the partners of tea vegetable hospital.

In China, the golden mean, digital hospital and magic capital are foreign-related. In addition to the early cooperation with foreign countries, which of the golden mean and digital hospital is not smashed in by real gold and silver.

Let's look at the foreign partners, special orthopedics, many cattle, but let's look at the bone Institute of tea vegetable. This is what Zhang Fan and his white headed wolf got.

But look at the people's meatball country. What they invested in at the beginning is some broken instruments. It is estimated that they don't even have one tenth of Jinmao's investment, but how close they cooperate with tea now.

Now, not only pharmaceutical companies smell profits, but also some people in the government feel the overflow of red blood cells.

"They are so shameless. You say how difficult it was for us at the beginning. When you and Zhang Yuan went to meatball country and Sandao, their legs were thin. But now with a little success, many people want to pick peaches.

What do you think director Li of the food and drug bureau is? He said that he had worked hard for our research and development and wanted to be named. Why doesn't he blush! "

Lao Chen, who came out of the government, and Xiao Chen, acting director of the medical department, met director Li of the food and drug Bureau. Lao Li politely exchanged greetings with Chen Sheng, but what he meant was that it was best to put him on the list of leaders in new drug R & D, otherwise it would be self-evident.

Looking at Xiao Chen's angry face, Lao Chen said to Xiao Chen: "I don't want to hear you comment on superior leaders in this tone in the future. Many times, this is also a part of our work.

Your starting point is higher than me and your education is higher than me. I want you to go further. I hope you don't stop early because of your complaints.

You can complain and have opinions, but you can't complain! "

With that, Lao Chen narrowed his eyes and pretended to sleep. Life is so cruel. At the beginning, Xiao Chen and Xiao Wang went into the medical office together and ran forward and backward with Lao Chen. As a result, after Lao Chen ascended, Xiao Chen ascended.

Xiao Wang can only be a director of the branch. Although they are all directors, everyone knows that the gold content is different.

"Oh, I see!"

.....

Internal medicine building, Zhang Fan walked into the internal medicine building. Because old Chen Xiaochen is busy running to the government these days, and other people in the medical office also have something to do, Zhang Fan didn't inform the medical office and ran to internal medicine himself. According to the formal system, he interferes with the work of others' internal medicine.

Therefore, when Zhang Fan just entered the internal medicine building, the little nurses and female

doctors in the internal medicine building jumped like frightened.

"Yes, which floor, which floor. Call, call! "

Zhang Fan cleaned up the gastroenterology department last time, and all departments of the Department were worried.

The digestive department is on the 16th floor. Zhang Fan has just arrived on the 10th floor. As soon as the elevator door opened, he saw that the director of Endocrinology, like an angry child's daughter-in-law, stood at the elevator door without talking, but did not give up according to the elevator.

"Why?" Without saying hello or talking, he stared at Zhang Fan. Zhang Fan was a little impatient.

For endocrine, he was really a little angry. Originally, he was a department with a particularly good beginning. Now, like the Department of Gastroenterology, he is the xuanming second old man of tea element hospital. One day, he made trouble about right and wrong and didn't do business.

"I want to report to you!" The director of Endocrinology bowed his head.

Zhang Fan thought, "let's go to your office!"

.....

"Zhang Yuan went to endocrinology."

The internal medicine building is like a bird in a tree, chirping and instantly exchanging the behavior of the big gray wolf.

After entering the endocrine director's office, Zhang Fan sat down and felt that each director's style was different.

In the office of Endocrinology director, you can smell or smell perfume, and clothes hanging on clothes rack are exceptionally many, skirts, black, white, tops and red powder. And shoes, pointed ones, high heels.

"Speak, what are you doing with this attitude? As if I were your subordinate, I still have to figure out your intentions? "

Zhang Fan is crazy. A 40 year old woman who looks like a little girl has been stealing peaches directly makes Zhang Fan angry.

Chapter 1330

"Zhang Yuan, if you are not satisfied with my work, you can transfer me to the community clinic or the branch hospital. I'm under too much pressure for you to hold the knife like this. The director of Gastroenterology has cried several times. "

If the director of endocrinology is ten years younger, she is definitely a little enchanting young woman.

It's not her face, but her expression that can't be ignored. It can't be described, but it can inadvertently reveal a feeling that makes men jingle. Really, it's no exaggeration at all.

This kind of women, if they read more books and have a little bookish spirit, really, what Dongzi's milk tea sister and all kinds of stars are absolutely no less than them. Moreover, the endocrine director feels like a child's wife in a big house.

Because he has a child, he is tough, but because he has a father-in-law and a little weak, he wants to play a little temper.

Zhang Fan looked at her and didn't speak. His face hasn't changed much. It's good to have pressure, and it's even better to have shame. The dead pig is not afraid of boiling water. I'm like this. What can you do to me? Come on, I'll fork my legs and don't move. What can you do to me!

"Now there are 16 doctors in endocrinology. Five of them run companies at home. They drive either Audi or Mercedes Benz at work. There is also the daughter-in-law of the boss of a winery. She says her blood sugar is low after a little extra shift.

The others are either the director's wife or the director's daughter-in-law. What do you want me to do! The last time I did a sugar tolerance test, one was more tired than the other, so I didn't pay overtime. It's hard for me. Don't I want to be a good director.

It's hard for me! "

These objective factors she said do exist.

The smaller the city is, sometimes the more concentrated some characters are, and the pressure is relatively small. These people, you give less money, they really don't move. They just press the button and wait for retirement. You need this job to save face when you ask her to resign. After all, an energetic daughter-in-law is a housewife, which seems too shameless.

Zhang Fan must not be happy to give more money.

"Tell me about yourself. You have published several papers in core journals in recent years. You are the director of Endocrinology, not a retired doctor such as opening a long-term clinic. Look at you, the director of Endocrinology who was the first batch of students sent to the capital to study.

I went with you in the same batch. If it's far away, was dean Yan Xiaoyu a classmate with you at that time? Not to mention the position, look at the achievements of others in recent years, and look at yourself. I think you spend more time turning fashion magazines than you do turning periodicals.

Look at your office. Can you turn up the latest endocrine journal? Think for yourself! "

After that, Zhang Fan got up and left. The director of endocrinology was about to be trained to cry. Watching Zhang Fan go up the 16th floor according to the elevator, the director of Endocrinology said with a cry: "who said Zhang Yuan was coming to endocrinology? I'm going to tear her mouth today!"

When I heard that Zhang Fan had entered the endocrinology department, the directors of various internal medicine were relieved. Men and women all know that. Just a few times, when he gets tired, the back will be relatively relaxed. The most afraid thing is the first three times.

In particular, the director of the Department of Gastroenterology felt that she had passed the test. When she heard that Zhang Fan entered the internal medicine building in the morning, her heart almost jumped out of her mouth. As a result, Zhang Fan went to endocrinology.

"You say that Zhang Yuan is not as fierce as president ou. Why do I always feel frightened when I face Zhang Yuan."

"It's probably because Zhang Yuan is young!"

After the director and head nurse of gastroenterology department learned that Zhang Fan had entered the endocrine system, they stood at the door of the elevator and said a few words casually.

Then the director of the digestive department took the doctors to the ward round.

As a result, we haven't checked a few patients yet. The head nurse came, "here comes the hospital Zhang, here comes the hospital Zhang, and he has arrived at the nursing station!"

The director of Gastroenterology didn't feel like peeing.

We all think that the system is cruel. In fact, the medical industry is more cruel.

For example, if you fail to compete in the system, you can transfer a department or even a unit, but the medical treatment is different.

Especially in the tea vegetable hospital, now the tea vegetable hospital is the only one. Your department director is really going to be exempted. You have no place to go.

When you are in the Department, the new director and colleagues can't carry out their work. The new director will definitely propose to the leader to let you leave.

But where can you go? Go to China hospital? To the branch? Or go to the community clinic and be an outpatient director?

Therefore, the current situation of tea vegetarians is that they can only go up and down. Once they come down, they will be really ashamed unless they change places.

Zhang Fan clearly expressed his dissatisfaction with internal medicine at the doctor's meeting. It didn't give Ouyang Ren Li face at all, let alone Yan Xiaoyu later.

In particular, those who named names said Gastroenterology and endocrinology. In Zhang Fan's words, they are capable of doing things and can't leave.

"Zhang Yuan..." the director of the Department of Gastroenterology looked at Zhang Fan nervously and said hello.

"Continue the rounds!" Zhang Fan didn't talk much.

Just behind the doctor group, followed the ward round, while the head nurse followed around Zhang Fan, secretly looked at Zhang Fan's face and guessed Zhang Fan's mood.

The doctors in the Department of Gastroenterology are active at this time. The director is afraid of Zhang Fan, so they are not afraid. Some even have to show up in front of the leaders.

Therefore, when the director asks questions, one answer is better than another. Especially after Zhang Fan said that he was dissatisfied with the gastroenterology department, the doctors made some efforts privately.

"Abdominal pain, the tube bed doctor said, how does this abdominal pain form?" No. 9 hospital bed, the patient has perennial chronic abdominal pain and idiopathic abdominal pain.

Idiopathic, in fact, to put it bluntly, you just don't know the reason. Anyway, people are here. You don't know where they come from or go.

Dr. Wu, a senior vice senior in the Department of Gastroenterology, has been suppressed in the vice senior position because the number of places in the hospital is limited.

In the past, I didn't participate in the struggle in the Department. Especially in the competition for drug dealers, he never cares.

Since the hospital became better and better, he also had ideas in his mind.

When the director of Gastroenterology asked a question, the resident was just about to speak. He spoke directly because he was the superior doctor of the bed doctor.

"For abdominal pain, we should first clarify the mechanism of abdominal pain. The total area of gastrointestinal epithelial cells is larger than that of tennis courts. In such a large area, there are complex neurons and ganglia. It has between 10 million and 100 million neurons, which is equivalent to the total number of neurons in the spinal cord.

Moreover, this is an independent nervous system, which has complex and systematic interaction with the central nervous system.

According to the current research, the development of symptoms of irritable bowel syndrome has a clear relationship with intestinal nerve, autonomic nerve and central nerve, especially in... "

Old Wu Yue said that the more he felt, the more he said, the more profound. The director of Gastroenterology turned green, but he had to pretend to listen very carefully.

Other doctors didn't know what to think, but Zhang Fan listened very carefully.

In a word, everyone has everyone's understanding, not to mention this kind of internal medicine disease, one person has one person's view, and the senior doctor who has studied this kind of medicine has absolutely great experience through a lot of clinical experience.

This is what Zhang Fan needs most now. The treatment of medical diseases is diversified, which is different from surgery.

Although surgery is also said to be diversified, it is still relatively single compared with internal medicine.

Always think of ways to cut around the lesion. Even if the current minimally invasive intervention, in fact, the ultimate goal is the focus.

Internal medicine is different.

So Zhang Fan listened carefully at the end.

Irritable bowel syndrome. Many people have heard of this disease. It is actually similar to cardiac functional syndrome. Clinically, most abdominal discomfort diseases are classified as irritable bowel syndrome.

Therefore, some patients feel comfortable after taking a certain kind of medicine, and their intestines are comfortable. Then they recommend their medicine to another patient. As a result, the other patient can't discharge his stool for a week after eating it, and even wants to put an eel into it to dredge it.

In fact, this is a disease. Although it is a name, it is not a disease.

The disease kills you, but it also makes you uncomfortable. According to evidence based medicine in Jin Mao Kingdom, 16 of IBS in the Jin Mao kingdom were women with irritable bowel syndrome, and the incidence rate of women was higher than that of men. People over 60 years old have a lower incidence, and 30% of patients have spontaneous symptoms that disappear over time.

Moreover, the trouble is that many patients with irritable bowel syndrome rarely seek medical treatment. Once they enter the tertiary hospital, 40% to 60% of the patients often have mental symptoms, especially those who have received physical abuse or sexual (a) abuse, are more likely to develop severe irritable bowel syndrome.

Another special point is that those who have experienced psychological trauma in childhood are prone to this symptom.

For example, constipation and abdominal distention, sometimes you are not greedy and eat too much. Maybe you are a patient with irritable bowel syndrome. But you don't know.

"What about treatment? According to the routine treatment, does this disease need the intervention of psychotropic drugs? "

Zhang Fan asked questions. When Lao Wu finished, Zhang Fan asked questions at the first time. At this moment, all the people stood at attention and turned to Zhang Fan.

Is this going to be mad again? What ordinary doctors think.

Is this the right eye? This is the director's idea.

"No, the golden Maoist countries prefer to give psychotropic drug intervention. Although my data is relatively small and has no reference value, I found that there is no difference between the life of patients and that of normal people after I took over the first IBS patient that year.

And the doctor's comfort and explanation seem to be more effective than drugs in the treatment of this disease. Our current treatment tends to favor symptom treatment. Constipation treatment constipation, diarrhea diarrhea, pain, give antispasmodic drugs.

But I did a single blind trial. After I treated the patient with placebo, I gave a lot of explanation and comfort. The patient said that the drug effect was good! "

Doctor Wu looked at Zhang Fan and said.

"Nonsense!" Zhang Fan whispered.

When Dr. Wu heard this, his face darkened. Zhang Fan turned and left, but when he left, he added: "this experiment is to apply for the experiment fund of the hospital. Don't do it next time!"

"Good!" Only Lao Wu himself knows the taste in his heart. But there is hope.

Zhang Fan left in a hurry because the gastroenterology department in the system had to start testing again.

Chapter 1331

When you hear the word "rough waves", you don't think of the sea at the first time, so it means that you have grown up and are especially successful!

Zhang Fan got it this time. The system of Gastroenterology passed the test.

Life is as like as two peas, and it is always daze before the exam. After a few days, it seems that it has been thoroughly permeated. For example, before becoming a man, a little boy was hungry day by day. Even if he saw a round electric pole, he had to rub it with the pole.

But once you become a man, you won't do such a thing as rubbing a telegraph pole, except when you look at your thigh with murderous spirit.

Zhang Fan is in this state now. Before he passed, he had all kinds of troubles in digestive medicine. This month, Shaohua had an opinion on him, "are you too tired recently!"

In fact, Zhang Fan's mind is always the same as the students before the college entrance examination. His mind is full of various topics. Really, lying with Shao Hua at night, Zhang Fan didn't think of soft and soft for the first time.

Zhang Fan thought of how many times the normal bowel sounds are!

During the doctor's practice, he took the hospital examination every month and the national

examination every year. In fact, the most important thing is not that doctors don't work hard, but that doctors cause trouble.

In the office, Zhang Fan lies sweating on the boss's chair. Suddenly, he feels that there is love in this world.

To tell the truth, internal medicine pays too much attention to foundation and experience. Zhang Fan has tested it three times. The first two tests almost destroyed his own medical world outlook. At that time, after the test, Zhang Fan felt that he didn't work hard in recent years.

Now, he finally understood why doctors should perform internal surgery. Zhang Fan, who passed the exam, looked at the sky outside and listened to the voice of old Chen and old men in the corridor.

When Zhang Fan opened the system, he saw that the gastroenterology department passed the first level, while other internal medicine departments lit up at this time. You don't have to think about it. Just click endocrine.

Surgery, although Zhang Fan is tired like a dog, in fact, Zhang Fan still has talent, and he doesn't think it's annoying and difficult. When he enters the operating room of the system, Zhang fan can play until dark. But the internal medicine was different. As soon as he entered the system, he was sweating all over.

The purpose of internal medicine is to open more advanced surgery in the future, and to frighten the disobedient director of internal medicine.

They always think Zhang Fan is a surgeon. There is no way to take them. Now Zhang Fan has a way!

The biggest feature of the surgical system is that it allows you to have countless surgical templates for you to practice, and it can also correct your various manipulation and technical problems, such as too fast rotation and pain, because the treatment is for others, not yourself.

Under anesthesia, the doctor really doesn't know that the rotating rubs the patient's skin, and the system can tell. Therefore, since Zhang Fan's debut, whether he is convinced of Zhang Fan's technology or not, it should be said that Zhang Fan's accuracy can rank among the top three in the world.

No talent, no system, that is, it can stand in the third class hospital. For example, in internal medicine, Zhang Fan doesn't have much talent. A small test makes Zhang Fan's endocrine disorder.

So, there are really, really talented people in this world. For example, the gap between your master and

your uncle is obvious.

Old man Lu's specialty is research, partial internal medicine. And old man Wu is in the hands of Kung Fu, and Zhang Fan feels that old man Wu works harder than his master old man Lu.

Just look at your hands. Old man Lu's fingers are still straight and can compare y. old man Wu stretched out his fingers, which is OK. His fingers are crooked. How many times and how much time do you have to take to crook your fingers.

Really, if this thing has talent and works so hard, it's impossible for others to succeed.

In my mind, the knowledge of Gastroenterology suddenly feels organized and has a skeleton, just like a beauty looking at bones but not skin. As long as there is a skeleton, the things behind it are just to take time to fill it. It's not a big problem.

Click to open the endocrine. Zhang Fan thinks he has passed one door. The second door should be easy. How did he get in and how did Zhang Fan get out.

Digestive department if Zhang Fan is OK, endocrine is the book of heaven. The straightforward system gives a study of congenital metabolic defects, and then the first thing is to draw the biological map of plasma membrane transporter protein mutation, glucose transporter defect, transmembrane tuberculosis and signal transduction defect.

Zhang Fan quit the group chat again.

"Too special, bullying people." Zhang Fan finally found out why he couldn't handle internal medicine. It's all the research of doctor of internal medicine.

Zhang Fan plans to go to the gastroenterology department tomorrow. He is serious enough to teach them. He has been bullied by the system for so long. Now he is out of the mountain and doesn't bully the gastroenterology department. Zhang Fan feels bad.

As a result, Ouyang, Zhao Jingjin, Ren Li, Lao Chen, Luo Zhengguo and Yan Xiaoyu pushed the door in when he just called out the cases in the Department of gastroenterology from the computer and wanted to find a case to teach the students in the Department of Gastroenterology.

If this is another unit, it is estimated that the first thought is that the palace has changed!

What Zhang Fan thinks is that something big has happened, medical accident?

This is the difference between hospitals and other units.

However, after a closer look, everyone's face was stable, and Zhang Fan's heart was stable.

"European Academy, leaders, sit down!"

Ouyang sat down without expression, and the others greeted Zhang Fan with a smile " Hey, you'll call us leaders later. We're embarrassed to enter your office. You can't be too polite when you're the monitor! "

Zhao Jingjin smiled and said to Zhang Fan.

"Ha ha, OK, I'll make tea for you."

No one else, or when there are few people, Lao Chen makes tea or something. Zhang Fan doesn't care. He's used to it anyway.

But now everyone is a member of the team. Let Lao Chen make tea alone. Zhang fan can't bear it.

"I'll come, I'll come!" Sure enough, Lao Chen wants to make tea.

"OK, OK, I'll serve you once. I've been too busy recently, and everyone is tired. When I'm not at home, thanks to everyone, I should pour a cup of tea. "

Lao Chen knew in his heart that this was Zhang Fan's promotion to him. Lao Chen was grateful and could hardly speak.

"Well, don't be busy. Let's talk first. Everyone has something else to do. "

Ouyang said impatiently.

In fact, the old lady is now tossing a few pots of cactus in the office, mainly because others are busy.

"What's the matter, is this?" Zhang Fan asked.

"This is the plan for the job fair. Why don't you go?" Ouyang handed the plan to Zhang Fan.

Zhang Fan stretched out his hand, turned it over and said, "just go to Chenyuan. This time, he won't go to other cities."

"I think you still want to go. When you go to the ward round in the morning, we discussed it. This year is the year when our tea vegetable hospital is upgraded. It should start well, so you go, otherwise it won't reflect the style of our tea vegetable hospital."

"Hehe, look at what you said, which reflects the style of tea vegetable hospital. Go there!"

Zhang Fan said with a smile.

"Of course I'm going!" Ouyang was like a little girl in love, "but you have to go, and all the leaders at home have to go."

"I won't go!" Ren Li doesn't want to go to the bird market. The bird market is always a pain for her.

"Go, why not? This time we have to go with gongs and drums."

"This is to make trouble!" After Zhang Fan and several others had a look, everyone's thoughts were instantly connected.

.....

The job fair every year will start again. In the past, Ouyang seldom went to job fairs in the bird market.

Not to mention that niaoshi discriminates against tea vegetable hospital, it can't recruit suitable people.

At the doctor level, people either went to other places or signed a contract with the third class hospital in bird city. At the master's level, either continue to study for a doctor or stay in the top three of the bird market. As for tea, I don't look at it at all.

At the undergraduate level, Ouyang doesn't want it. The profession of medicine has paid special attention to education from an early age.

This is not the case after the founding of the people's Republic of China.

From a distance, for example, master Qiu, doctor, or doctor of de Mao, de Mao was the leader in the field of medicine, just like gold Mao now. Lin Qiaozhi, doctor, and the medical rules in those years were much more stringent than now. At that time, the golden mean stipulated that if a woman wanted to be a doctor in the golden mean, she could not get married!

Huang Jiasi, doctor, doctor of 33 years. Especially when China was illiterate all over the world, they were already doctors.

Therefore, the mainstream of medical treatment in China is still started by doctors.

In those ten years, many people who were ignorant and incompetent became big men, and then slowed down.

After catching up in recent years, almost all doctors in hospitals with a little brand are doctors.

Now the tea vegetable hospital, Ouyang thinks it has a card in the frontier, isn't it. Considering the previous recruitment, Ouyang is really angry.

Zhang Fan looked at Ouyang and everyone, then sat down and looked carefully at the recruitment plan

in his hand.

Originally, Zhang Fan didn't pay attention to this matter, but now everyone thinks we should pay attention to it.

"The master's degree in internal medicine is crossed out, and all doctors are recruited. The age line card is under the age of 32. There are several graduate students in nursing. In terms of pharmacy, doctors are also recruited. Their age is the same as that of internal medicine. As for surgery, you can find several professional masters. It's better to have a doctor. But you must be young. "

Zhang Fan looked at the plan and said as he read it.

Not only Lao Chen, but also several presidents in charge of internal surgery began to record.

This thing usually laughs, but once you work seriously, the superiors and subordinates must be clear.

"That's it. Let's gather the directors of each department to discuss it. Since the European Academy has spoken, we'll go together and make a good start."

In fact, Zhang Fanyi is right. Now that he has a position, he should strive for some interests and position. Otherwise, the third class hospital in niaoshi thought that the tea vegetable hospital was a dough.

Chapter 1332

In the past, the hospital had just improved a little. Ouyang led the tea vegetable hospital to press on the Chinese hospital and asked the Chinese hospital to call dad. After all kinds of trust relationships, undergraduates who took the road wanted to enter the tea vegetable hospital. And before calling dad.

In fact, the recruitment of the two hospitals is similar. China Hospital is more relaxed, but the income is similar.

Because there is no emergency, no maternity, no facial features, almost no medical trouble, and the income is not low. For a small example, when Chinese medicine entered the hospital, it was imported by ton, and when it came out, it was exported by gram or money. Therefore, in the past, the income of Chinese hospital was not much different from that of tea element hospital.

After the upgrading of the tea vegetable hospital, there will be a lot fewer people who trust the relationship. Because the threshold is high, you enter the hospital through the back door, which is the lice on the bald head. No one will be responsible for you.

It's like a girl. She's so good that she can't even think of a single dog, and she doesn't even dare to flirt. She even feels boring when she goes to bed at night.

On Friday, Zhang Fan and others will go one day in advance to decorate the venue or something. Since you want to do it, do it quickly.

Zhang Fan was going to drive, but Ouyang went to the government and hid him in the garage. Koster asked him to come out.

Now, although the tea vegetable hospital is no longer under the jurisdiction of the tea vegetable government, just like relatives and relatives, it has a good relationship when they live far away.

Now the relationship between the tea vegetable hospital and the tea vegetable government is much better than before. In the past, especially after Zhang Fan took the lead, Ouyang entered the government. Like the appearance of clean street tigers, the financial management leaders directly hid from the cat.

Now it's different. When Ouyang went to the government, all leaders received Ouyang with a smile. Even want to curry favor with the European court.

Because after the rise of tea vegetable hospital, the city used to be half dead, and the grass covered high-tech zone has hope. Once a well-developed high-tech zone is erected in such a poor and old city, it is directly like the purple bamboo erected by an 80 year old man. It is directly auspicious!

So, the old lady, don't mention borrowing a Koster now. Even if she wants to drive away the tea element 001, the tea element boss has no problem at all. This is the card face.

A car of people, Lao Chen sat in the co pilot position next to the driver in the front row, turned his head, talked and watched the driver.

Zhang Fan sits alone. Director Chen pours water for all leaders while chirping to find the topic.

"Zhang Yuan, does the hotel book the inside of the university or others?"

"Director Chen, I don't have a reservation. I go home to live. It's not easy to go back to the bird market. I

go home." Lao Zhao, Zhao Jingjin said with a smile.

"Director Chen, me too!"

"Me too, director Chen."

The homes of the three vice presidents, Zhao Jingjin, Luo Zhengguo and Yan Xiaoyu, are all in the bird market. And they are all near the University.

"It's hard for the three presidents. They should go back this time. Without the support of your families, the tea vegetable hospital doesn't have a good leader like you."

Zhang Fan said with a smile.

"Ha ha, it's all brought by the monitor." Yan Xiaoyu smiled and flattered.

When Yan Xiaoyu first transferred from the bird market to the tea vegetable hospital, he actually took a circuitous route. He wanted to go to the tea vegetable first to raise his level, and then find a chance to kill him back to the bird market.

Therefore, when she first came, Yan Xiaoyu always treated herself as an outsider and calmly faced everything in the tea vegetable hospital.

Neither integrated nor participated, but with more and more understanding of the tea element hospital, especially when Zhao Yanfang got male antiemetic drugs, Yan Xiaoyu was warmed up.

Now Yan Xiaoyu has changed from the previous high cold and started to follow the model of mature women. She is very friendly to everyone and takes the initiative to participate in the work of the hospital.

For the change of Yan Xiaoyu, Zhang Fan is still happy to see it. He is not afraid that you have ideas. He is afraid that you will sit up and don't move. The tea vegetable hospital is big enough to stand up.

Luo Zhengguo, the outside of the brain is much better than before. First of all, there is no need to go to Zhang Fan for many operations.

Lao Luo and Xue Xiaoqiao cooperated well. They have been independent outside the brain and are no longer the vassal of thoracic and cardiac surgery.

As for Zhao Jingjin, people have known Zhang Fan for a long time, so now their attitude is very low. Everything is dominated by Zhang Fan, which makes the leaders of the bird market unsuccessful.

Originally, I wanted to send three experts, which could last at least half a day. As a result, Yan Xiaoyu, who is now smiling, is dead.

"European Academy, I think we should thank the families of the three presidents. Without their support, our presidents can't do a good job."

Zhang Fan smiled and turned to Ouyang.

"Yes, I should. If you don't say it, I'll say it. We must thank their families."

"Well, don't ask university leaders this evening. First arrange a reception to thank our family members and comrades. Chen Yuan, we should be responsible for car pick-up and delivery, so that our families can deeply feel the enthusiasm of our tea vegetable comrades. "

"OK, Zhang Yuan, I'll call the car rental company now." Lao Chen smiled. In fact, car rental companies are excuses. They call the pharmaceutical companies in bird city directly. There is no problem with a few cars.

Of course, there are some things you can do, but you can't say.

"Forget it, I'll contact you. Don't book Xiaochen hotel first."

Zhang Fan thought and said. Then pick up the phone and call the winery owner.

The winery owner has been in contact with Zhang Fan since Zhang Fan threw his knife, and the most important thing is that people never ask Zhang Fan to do anything. Such as bidding, such as filling people, never.

And as long as people come to tea, they will definitely find Zhang Fan. Regardless of the length of time, it's OK to have a glass of water. It's OK to meet and say a word. Anyway, they are very careful to maintain this relationship.

Therefore, Zhang Fan thought about the departure of the large army. Instead of living in other places, he might as well find the winery owner.

"Ha ha, Mr. Wang, what are you busy with?"

"Hey, brother, what else can I do, either fishing or playing mahjong. I said why there were magpies barking in the yard today. It turned out that it was on my brother. How do you get to the bird market? "

He knows that Zhang Fan is usually very busy. Sometimes no one answers the phone. He must have come to the bird market to take the initiative to call.

In the past, maybe Zhang Fan would ask him to do things, but now he knows that Zhang Fan has taken off and is no longer the little doctor who couldn't find a wedding car when he got married.

However, it is gratifying that Zhang Fan, a young doctor, and Zhang Yuan, have never changed their attitude towards him, which makes him very comfortable.

"Yes, now it's the way to the bird market. I'm not alone, but also leaders and colleagues. I want to live in your luxury winery!"

"OK, no problem. This is my honor. I can't invite anyone. I'll give it to me in the evening. I must arrange for all leaders!"

"No, don't bother you. Just get me some houses and have dinner at our unit in the evening."

"OK, what's the trouble? Don't worry. I'll let the driver wait for you on the highway. You're still driving a red card, cooluze?"

"No, I'm here to recruit students this time. It's Koster, No. o of the tea vegetable government."

"OK, they are special vehicles, easy to recognize!"

.....

"Winery owner?" After Zhang Fan called, Ouyang asked. Others want to know, but they can't ask because of their identity.

It's just that Ouyang can ask openly.

"Yes, Mr. Wang. He's a nice man. You've seen it, too. " Zhang Fan still respects Ouyang.

"Well, I've seen it several times. It's very good. Rich but not upstart. I'm also friendly to people." Ouyang nodded.

"Today, you will bring your families out!" Zhang Fan told Lao Zhao and them again.

Ren Li hid in the corner, slightly unable to lift her spirit.

Ren Li lost tea from the bird market. To tell the truth, Ren Li has hardly been to the bird market since then.

She declined both the meeting and the invitation.

If Ouyang and Zhang Fanfei hadn't asked her to go this time, she really didn't want to come to this place.

When she was in Annex II, she was excluded and was very depressed. If the unreasonable old lady hadn't protected her, she would have left the business.

And her husband is also a classmate. She still didn't prevent the little nurse Heisi. Finally, she was hooked away by the little nurse Heisi.

There's no way to say this.

In fact, doctors were very depressed in the early days of the hospital. After a little achievement, many people with bad temper doubled their depression in that year.

Especially in special units such as hospitals, for example, after a first aid, adrenaline burst and a sense of achievement burst.

Then, if someone wants to tease me, there are many derailments, so the divorce rate is very high not only in China, but also in the medical industry all over the world.

When Koster entered the bird market basin along Tianshan Mountain, he saw a Mercedes Benz waiting at the intersection of the expressway. After seeing Koster's double flashing a few times, Lao Wang called, "brother, do you see? A Mercedes Benz, the car number is XXXX! You follow him. I've prepared some strange fun for you now. "

Without words, he entered Lao Wang's winery.

Lao Wang, how to say, said he had no ambition. He was financially free. He said he had a good business. When his business was the most brilliant, he sold his property to Zhang Yu, and then he left a winery now.

Lao Wang's winery, if bigger, is the same as the Taj Mahal.

Before entering the door, there is a long blue pool, with various European sculptures on the edge of the pool, women who lack arms, and small curly dolls with chickens peeing.

Once Zhang Fan was very curious and asked him why they were all European and American sculptures.

Lao Wang's original answer was also wonderful, "in fact, brother, I want to make two big lions, more dignified, one male and one female, to ward off evil spirits and attract wealth, but what we do is wine. How can you fool others if you don't make some foreign goods!"

As soon as Zhang Fan listens, NIMA makes sense.

Chapter 1333

"NIMA, Zhang Wuji is here! ~"

In the largest auditorium of Niaooshi Medical University, two medical department officers from different third class hospitals chat with each other.

"What?"

"What else can we do? The Medical University in the bird market can't do it. Look at the extent of licking the hook. It's so annoying to give the podium of the auditorium to tea as the recruitment desk."

"Well, it's good not to clear the floor for you. Move the table quickly! But where did Zhang Wuji come from? "

"Look, who's the master, the founder of surgery, who's the uncle, who's the father of courage, who's the master, and who's the leader of ordinary foreigners in the north. Even if our dean sees others, he will call a little martial uncle. Don't you see? Our dean didn't come this year. Otherwise, it's necessary to pretend to be forced every year! "

If there is an industry that depends on self reproduction locally, medical treatment can't escape.

In fact, there are very few foreign students in the third class hospitals in Niaooshi. Because almost every provincial capital city has a medical school.

Xueba and Xueshen all want to go to the capital, magic capital and Yangcheng. The slightly better ones stay directly in the local area. Therefore, when the job fair is held, the hospital staff in the auditorium of bird market are either senior brothers or junior sisters.

Even if you don't know, you look familiar.

For many years, the positions of recruitment fairs of Medical University have become commonly known as the agreement. Which position is attachment 1, which position is attachment 2, which position is attachment 3, which position is the central hospital and which position is the provincial hospital.

Several provincial top three have divided the best position in the auditorium. In the past, the tea vegetable hospital was sometimes arranged in the aisle outside the auditorium! I can't recruit a few people anyway. So last year, Ouyang didn't come to the job fair in the bird market and couldn't afford to lose that man!

But now I can't. I'll arrange the tea vegetable hospital under the eaves of the corridor, and the school principal will wait for a lawsuit.

Therefore, there is no way, and we can't let the veteran hospitals give way. We can only arrange the tea vegetable hospital on the podium, which means that the latecomers live in it.

Zhang Fan entertained the families of several deputy directors. The winery owner told the truth. Others don't know what to think. Anyway, the families of several deputy directors have been muttering for a long time.

In the past, my family went to tea vegetable. Although I went to be vice president, everyone was not satisfied. It's like a district chief of the magic capital to be a deputy in other provinces. Although he feels that he has been promoted by half, his family is not happy.

I feel like I've been distributed.

But when they saw Zhang Fan, the reception of the winery and the hospitality of the boss, they were shocked.

As like as two peas, the boss of the sitting area, the owner of the resource, is not a species of grape. In fact, if the land is large, it is exactly the same as the mine.

Therefore, this kind of boss is not interested in the local hospital leaders. People are rich, and the hospital doctors flatter people very much. Moreover, there is something wrong. People fly to the capital to go to magic. Not even the gate of bird city hospital.

But today, it really opened their eyes. The winery owner personally helped Zhang Fan drink a cup to his family with a glass of wine. There was a kindness in his words. And during the reception, familiar bird market bosses called one by one to offer Zhang Fan.

This special courtyard is not the brother-in-law of the bird market boss!

Although Zhang Fan didn't mean it, he also wanted to tell the families of several people to support their work. The tea vegetable hospital is still good.

After all, Zhang Fan is still satisfied with these deputies. Zhao Jingjin won't say it. Outside Luo Zhengguo's brain, there are few levels of bird market and Lao Luo. Yan Xiaoyu was the first batch of directors who went to the capital to study endocrinology. Although people have many minds, the level can rank the top three in the frontier.

A lot of things in China are like the yellow flower girl in the sedan chair. The first one is always the best. This kind of large-scale organization is always the best of the first batch, and the latter will be the best.

.....

Early in the morning, Zhang Fan and Ouyang came to the meeting. They live in the winery. Although it's not too late to start, they also underestimate the traffic jam in the bird market.

What about the temperament of northwest people? Sometimes they are generous like fools. In order to rush to pay the bill, two men beat their heads and blood.

Sometimes he is stubborn like a psychopath, such as the car jam. This thing is stuffed and added, which means that my technology is better than yours. If I can't add it, it means that you don't look down on me.

Many ordinary happy men, once they get on the bus, NIMA is not good. They will become the generals waiting for battle. Who adds me, who is anxious, who doesn't let me add, and who is anxious.

Zhang Fan didn't open the red card, cool Luze, so it's a little late. In the frontier, you may not be allowed to drive a luxury car. Anyway, it's a little silly and bold, but when you drive a military car, no one will leave your car. Like a city in the south, a female man driving a car dares to touch a tank.

So when they arrived, the president of the University waited at the door. The recruitment fair of Medical University is simple. Unlike a comprehensive university, there are all kinds of enterprises. The recruitment fair of Medical University is like a large collection of hospitals in the whole province.

How to say this kind of recruitment? Schools and local hospitals attach importance to it. Because if the job fair is not held well, the employment rate of school students will drop seriously. If the hospital does not pay attention to it, good seedlings will be robbed. It is difficult to cultivate medical students, especially those at the doctoral level. There is no place to make up for one less.

The school wants to push out undergraduates, and the hospital wants to focus on doctors. Ideas are never on the same line.

"Sorry, I'm late!" Zhang Fan smiled and shook hands with the headmaster.

"No, no, it hasn't started yet. It hasn't started yet."

Zhang Fan, who didn't have ink, hurried into the meeting. As soon as he entered the door and took two steps, he saw the president of the central hospital.

"Ha ha, Dean Zhang!"

"President Li!"

The other party directly greeted him with a smile. He also said hello to Lao Zhao and Zhao Jingjin. It's

strange that Lao Zhao has left. Now the hospital feels nobody. Anyway, it's just talking. The people who say don't believe it, and the people who listen don't believe it, but the president is really enthusiastic about Zhang Fan and Lao Zhao.

Because Lao Zhao didn't go, he always had to be on guard against his position as president being pushed down by Lao Zhao.

What about the central hospital? Among several provincial hospitals, it is the worst and the most unlicensed. It used to be like this. Now, after the tea element hospital joined, it is still like this.

Earlier, the president of the central hospital didn't know whether he was kicked in the head by a donkey or something. A huge hospital even wanted to take the road of health care.

Then all kinds of cadre wards and all kinds of cadres recuperated. As a result, all of them were changed to special needs departments. Some cadres who did not want to recuperate did not dare to go.

This is it. If the people don't go and the cadres don't dare to go, the central hospital is slowly getting worse and worse.

Then, more and more people were transferred from the hospital, but strangely enough, more and more people were transferred in. As a result, these people who came in were either so and so's wife or so and so's dry daughter. Anyway, they ran to the establishment and didn't work.

It is estimated that there is no such situation in developed cities in the south. In the north, especially the poorer places, pay more attention to some things, such as driving a Mercedes Benz and BMW and honking the horn at the aunt and uncle who dances square dance in the street.

They can tear you alive, but if you open four circles, turn a special pass on the windshield, and don't press the horn, people will come out automatically to maintain traffic safety for you.

Therefore, the president of the central hospital is still very envious of the latecomer of tea. Because he has no special pass under his hands, he can't roar!

After leaving the front door and taking a few more steps, it will be the site of Annex I. This position is the last except the podium.

"Ha ha, Zhang Yuan, when did you come? I don't say hello in advance." Xu Guangwei, the dean of Annex I, walked over with a smile when he saw Zhang Fan. Attached to the first Dean, born as a general foreigner. Although the volume of the hospital is larger than that of tea.

However, he had no face in front of Zhang Fan. When he went to study, old man Wu's students took him. In terms of seniority, he was really Zhang Fan's nephew. But his relationship with Zhang Fan is not as bad as the little officials say.

There is only one general practitioner in the world. Compared with other departments, the doctors of general practitioners are more united, because general practitioners are too big, too difficult and too difficult to achieve results. Unlike orthopedics, a hip joint can make doctors fight Zhang San and Li Si all their life.

"Where are we?" Zhang Fan asked Lao Xu in a low voice.

"Hey, you're on the podium."

As soon as Zhang Fan listens, he steals a look. He is really on the podium, a meter high platform, and the recruitment advertisement of tea vegetable hospital is really hung on it.

Zhang Fan smiled and said to the dean of the First Affiliated Hospital.

Before three steps, the dean of Annex II and Annex III is not far away.

The president of the Second Affiliated Hospital was born in orthopedics. In the past, there were several hospitals where my father didn't hurt and my mother didn't love.

There is the eldest son above, attached to one, and there are younger brothers and sisters below, attached to the Central Hospital of three provincial hospitals.

Therefore, the hospital's equipment, funds, and even the number of places for further education are relatively small.

But this thing, God is hungry and blind, really. Unexpectedly, the old Dean of the family gave an orthopedic winner.

When squatting in a cow pen, others almost starved to death. As a result, he drank milk every day and ate a round belly of air dried beef, because someone let the daughter of a frontier landlord sleep. You say this world. Really, sometimes it's too special and unreasonable.

When others suffer, he has children and takes care of them. When everyone's suffering is over, their children will play soy sauce. So I have feelings for the frontier. Of course, I didn't become Chen Shimei and settled directly in the frontier.

Then he went to the second hospital, which was awesome. For more than ten years, the surgeons of the second hospital despised all provincial hospitals in niaoshi.

But now surgery is no longer the second world, because the tea element hospital is coming.

Chapter 1334

"Is this tea vegetarian?"

"Nonsense, it's not tea. Can the presidents of major hospitals wait in line for an interview?"

"They are so awesome."

"What do you say? Wait and see. It is estimated that this year's medical science and technology progress award is someone else's tea vegetable. That's not enough. Have you heard that tea vegetarians have light hair welfare this year, and there are one rotten fruit in the hospital. "

"What's this? It's a family settlement fee, 100000 graduate students, doctors directly give the house, and arrange work for lovers who don't have a job."

"Hey, the year before last, the dean asked me to go to the job fair. I felt remote and didn't go. Now I regret it."

"Who said no."

This is a group of party affairs in the logistics and personnel section of the medical department. With the increasing degree of hospital recruitment, for example, these people are also graduate students. For example, a master's student in the Department of archives is required for the work of medical record management.

After the master of special archives department came to the hospital, he lived easily. One day, he sat in the office and placed the files. He usually looked at the cases sent to the patients for copying, and then there was no more. This is special. Anyone who graduated from literacy class can do well. Why do you have to come here? Did you sweep the floor clean?

Moreover, this group of people have the lowest hospital income. The hospital income does not depend on wages, but on bonuses, and they get the average award.

So they pay more attention to income.

"Isn't that Ren Li?"

"Yes, it's Ren Li. I heard that she went to tea vegetable."

"Why is she here?"

"Hey, did you find that she is in front of Yan Xiaoyu, and director Yan is lower than her in the position of tea element?"

"You don't know. He is the Secretary of tea vegetable. He is the second in command. See, the young Dean is followed by Ren Li."

When the tea vegetable hospital passed Annex II, some people in Annex II saw Ren Li. In those days, Ren Li entered the hospital with their front and rear feet. Now most of them are middle-level in the hospital. Either the Department Director or the senior doctor.

The hospital recruitment will bring these experts because they have to be interviewed on the spot.

When this was said, many people began to mutter, "there was no contradiction between Ren Li and me. At that time, I didn't exclude her. Can I contact her?"

Before long, when Zhang Fan was chatting with the Dean, a former colleague of Ren Li, a director of Annex II, came over.

"Secretary Ren, long time no see!" The other party came over with a smile.

Originally, Ren Li stood behind Zhang Fan and didn't greet other presidents. She ignored the front with a cold face.

Moreover, Zhang Fan and Ouyang seemed to protect Ren Li.

As a result, Zhang Fan's head turned when he was secretary, and Ouyang looked carefully from head to toe like the female director of the street office staring at the garbage collector.

The director who wanted to join the fun was a little overwhelmed. I'm just here to get a familiar face. What are you doing!

However, this kind of person's heart is very open, "ha ha, Zhang Yuan is good, European yuan is good, I am the director of the second chamber mirror center, Guang Hongda!"

"Oh! Good morning, director Guang. Ouyang said hello first. "

Ren Li doesn't look at the frost shell on her face. In fact, this is a mask to protect herself. In fact, she is nervous like a rabbit.

A hospital, especially the top hospitals in non capital and magic capital, because the top hospitals of the first devil are not bad, and the projects are not bad, let alone the money. In such a big country, all the funds of these two hospitals and research institutes can scare the smaller country to death.

But once this thing left these two places, especially after coming to several provinces in the old poor border, the situation was different.

For example, in the border areas, the people's government wants you to give people some money and want more money. To tell the truth, you might as well dye your hair yellow and rob.

This is why later, in addition to the capital city of magic, a fishing village suddenly appeared one day, and everyone didn't understand it. Because medical treatment also talks about inheritance. If you don't have a inheritance, how can you suddenly emerge one day?

The fishing village said with a little shame: I have copper and diamonds!

Therefore, the tea vegetable hospital now has both money and projects, and most importantly, it has many vacant positions. This is the rhythm of NIMA's rich woman's daughter seeking children!

We can't help but be indifferent.

.....

After they got on the podium, Zhang Fan suddenly felt that they could still cooperate with Medical University in the future. They were also very kind.

On the podium, I felt that the people below were all here to raise their hands to vote " Secretary of the meeting will talk about the development of the hospital and the core idea of the hospital. "

"You're the dean. Go up and say." Ren Li is a little embarrassed and doesn't want to appear in public.

"In this place, others are told by the secretary. We can't say there is no Secretary! Besides, your image is better than mine. " Zhang Fan said politely.

Everyone cares about his appearance. After all, Zhang Fan is still young.

"Yes, yes, you have a better image than him. The light in this place is not good, and there is no special light. When he speaks, people who don't know think he is doing background dubbing!"

Ouyang also said!

Zhang Fan feels uncomfortable. Others don't dare to laugh. It makes Ren Li's nervous spirit a lot easier.

This is a job fair held before undergraduates. When doctors and masters enter, hospitals begin to spread

their wings like peacocks.

The Secretary of the central hospital first began to speak. What's good in our hospital, you can enter the hospital, you can enter the house, and you can have the registered permanent residence of the bird market. Zhang Fan listened to the speech of the central hospital and said to Ouyang, "the central hospital is lonely now."

"Well, it's just that the location is not good and medical treatment is not good. Now it's like a sanatorium."

If the central hospital is in the capital, releasing this condition is expected to attract many doctors, but how attractive can NIMA's registered permanent residence in a bird market be. When the president of the Central Hospital finished, the applause was sparse.

Zhao Jingjin didn't look very good on his face, but he didn't show it. "Zhang Yuan, several directors of the rehabilitation department of the Central Hospital, I made an appointment. In the evening, I want you to invite them to dinner."

This NIMA is cruel.

"OK, OK, OK, you have to squeeze out time when you don't have time. Where are you arranged? The place is better. You can't neglect others."

Zhang Fan said happily. The rehabilitation department of the central hospital is very powerful, otherwise it will not develop towards nursing homes.

"The place hasn't been booked yet. Isn't it waiting for your news!"

"OK, I'll contact you later. Zhao Yuan, you're great!" Zhang Fan praised Lao Zhao.

After the Central Hospital finished, the Secretary of Annex I began to speak or show off. Annex 1 is relatively both internal and external, but it is neither prominent nor backward. After all, it is the eldest son, not the eldest son.

After the lecture of Annex I, Ouyang whispered, "they are still very powerful relying on Medical University."

At the beginning of Annex II, annex II is actually a competitor with tea vegetable hospital. Because both hospitals are famous for surgery.

For example, some of Ouyang's favorite bronze plaques are fooling people, but you can't hang them casually. In the frontier endoscopic surgery center, there can only be one hospital in the frontier. Therefore, Ouyang spoke most seriously to the Secretary of Annex II.

"Our hospital already has a general surgery center. Since its establishment, the center has been highly praised by people from all walks of life, and the operation volume has made a qualitative breakthrough. We will establish a series of surgery centers such as orthopedic surgery center, cardiac surgery center, extrathoracic Surgery Center... In almost five years.

Therefore, students and comrades, attachment 2 will be the most potential hospital for frontier surgery. We are located in the center of the city and can bring together the advantages of all directions. With the attention of leaders, I believe that it is definitely a good choice for you to come to our hospital. "

The applause was very warm. Ouyang leaned his mouth and said, "it's so boastful. If our tea vegetarians were in this position in their hospital, they would have been established long ago."

Zhang Fan smiled innocently. He didn't care too much, because what he said was better than what he did. He was afraid of him bragging when he was on the podium?

Followed by the lecture of the Third Affiliated Hospital, and then the lecture of the provincial hospital.

The provincial hospital was upgraded from the first municipal hospital in the past. At that time, the hospitals were all affiliated to the University of Medical Sciences. Other provinces had their own provincial hospitals, so we can't lack them.

Then the Municipal First Hospital was upgraded. It was originally pulled out of the Shorty, and then pulled into a group of giants. The hospital became naturally malnourished. It had to live on government milk (a) or starve to death.

In fact, there are only two top three hospitals in the Manchurian frontier. The others are the top three in face.

Ouyang listened to the speech of the provincial people's court. The Secretary of the provincial people's court said that he was weak. Even if he bragged, he didn't dare to blow too much. He had no confidence.

"What do you think of the location of their hospital?"

"Very good." Zhang Fan said indifferently.

"What's good? The location of this hospital can't be better." Ouyang is not satisfied with Zhang Fan's perfunctory. But what Zhang Fan thinks in his heart is that even if the position of others is better, can it be replaced for you?

Seeing Zhang Fan's indifference, Ouyang's brain banged and banged, "why don't you make a detour at all."

"Well! You say, you say. "

"We can merge with them to run the hospital!"

"Borrow a chicken to lay eggs?" Zhang Fan said directly.

"Look what you said, we are cooperative. What do we lack most now? There is no basic college. You say the golden mean. That is fooling people. There are not many students in a year. What they want in the hospital is nothing. Now you look at their speeches as if they are inferior. I think we can merge them. "

"Isn't it cooperation?"

"Take your time, don't worry! Don't be too dark. " Ouyang glanced at Zhang Fan.

"I'm anxious!" Zhang Fan is helpless.

"I'll talk to their Dean in the evening." Ouyang smiled proudly and felt that he had a chance.

After the speech of the provincial hospital, the speech of the tea vegetable hospital began.

Chapter 1335

The tea vegetable hospital began to speak.

Ren Li gently stood up and looked at the people under the stand. There were many people she knew, and even some people she remembered deeply.

To tell the truth, when she left the bird market, she never thought that one day she would appear in the bird market again in this form.

She was a little nervous. Looking at the envious eyes from the audience, especially from Annex 2, she suddenly felt that this feeling was very good.

"I'm not the little doctor who fled!"

For more than ten years, hiding in the tea plant licking her wound for more than ten years, she suddenly felt how wise it was to run away from tea plant that year.

"Last year, the number of patients treated by tea vegetable hospital at home and abroad reached 3 million!" Ren Li opened her mouth and reported the data without talking big or boasting.

She is not good at bragging. If she really bragged, Ouyang would stand up and give a speech. In terms of boasting, all of you here are brothers in front of Ouyang.

"At the beginning of last year, our tea element hospital and Zhongyong University made a great breakthrough in the research of allogeneic skin transplantation. Now the skin transplantation studied by tea element and Zhongyong university has entered the phase III clinical trial, and the data of the phase I trial are very different. Limited to the confidentiality regulations of the trial, I won't give examples one by one here."

Speaking of this, the burn doctors under the stage suddenly felt a little disappointed. No data, say an egg.

As a result, Ren Li continued, "if you want to know the specific data, please join the tea element hospital and let's study the rest of the experiments together.

If the burn department is an appetizer, then our tea vegetable hospital is more prominent in general surgery and orthopedics. Great breakthroughs have been made in the research of anorectal tumors established by Marubeni and the Institute of osteology established by Jinmao special orthopedics.

Now the tea vegetable hospital is rising. Now the tea vegetable hospital is the time for all students to show their skills. "

Ren Li said a lot, but she didn't mention male antiemetics.

It's like touching through jeans. Although it seems to stop itching, it's always better to take it off and scratch through silk stockings.

Many doctors in the audience began to be eager to ask questions. Originally, there was no such link, but the people below were very positive, and Medical University agreed. After all, this is their own student, not their own.

This is not the case with several other hospitals, especially the female directors of Annex II who previously excluded Ren Li " You see, she's cooked, and there's an appetizer! "

Having said that, Ren Li, who looked at a high-ranking official's hat, was jealous, and their hearts were boiling.

When they were young, they might have ideas in scientific research. Now at this age, they have no ideas

if they haven't made achievements. What they think now is either money or how to rise.

In the last row of the venue, Ren Li's ex husband also came. He was also standing on the site of Annex II today to question the graduates. But I don't know why. When he heard that the tea vegetable hospital was coming, he hid.

In fact, he has had a bad time in recent years.

After all, the old husband and young wife were very sweet at the beginning, one darling at a time, one darling at a time. But slowly, the little girl changed from worshipping him to disdaining him.

"You dare not go bungee jumping with me. You can't drink with me. Now my mother should be happy. You can't do it yet. You'd better drink more medlar tea tomorrow."

Although it is exaggerated, in fact, his living state is also similar. At the beginning, the little girl had tender skin and soft meat. But slowly, the little girl's sharp teeth, sharp mouth and willfulness came out.

Sometimes, neither of them has anything in common.

Regret it? He didn't know, but looking at the confident Ren Li and the beautiful Ren Li on the podium, he seemed to regret it.

After thirty-seven, people's appearance often depends not on natural beauty, but on comprehensive factors.

For example, although Ren Li is not as young and beautiful as she was in those years, she has been a director for more than ten years, a leadership career at the hospital dean level in the past two years, and a cautious style in medical treatment.

This makes the girls in those years become like an elite in the workplace. Their temperament is from the inside out, plus an originally exquisite face.

Really, sitting in the last row and looking at Ren Li's ex husband, I felt uncomfortable.

What made him most uncomfortable was that there were many colleagues looking at him. There seemed to be banter and ridicule, and more was pity! It's like looking at a fool's pity.

It's too hard for NIMA.

"Any Secretary!"

"Hehe, I also graduated from Medical University. I'm going back to my mother's house today. You should call me senior sister."

It's a familiar woman's taste. With such a smile and a gentle say, darling, no matter the boys or girls off the court, they don't think Ren Li is amiable and lovely.

In addition, Ren Li's black framed glasses and neutral short hair style are not tall, but her white skin and water chestnut shaped lips are definitely like the female teaching director in the harbor film. Although she is not young, she has a different taste in her heart!

This kind of woman is a man and woman for students.

"Elder martial sister, elder martial sister, I want to ask whether the drugs studied by Dr. Zhao Yanfang of tea vegetable hospital are included in antipsychotics or hypnotic antihypertensive drugs."

The doctor directly asked about the most promising scientific research of tea.

Ouyang and Zhang Fan looked at each other and smiled.

"It seems that this student studies very hard. You've read Dr. Zhao's paper just after it was published. Although it's a pity today, Dr. Zhao can't spare time because he has to demonstrate with experts in Marubeni.

But I can reveal a little secret. Dr. Zhao's drugs do not belong to psychotropic drugs, nor do they belong to hypnosis and hypotension. You can ask Dr. Zhao in person. "

As soon as this was said, the students below were even more excited.

"Can we get involved?"

"Why not? Our tea vegetable hospital is looking forward to your arrival. Now let me talk about the treatment of our tea vegetarians. Maybe we are not as good as other hospitals, but we are sincere in treating our colleagues and our own comrades in arms!

For graduate students, the resettlement fee is 100000, plus three years of rent. The doctor directly sends a 140 square meter residence. If there is a special contribution, a villa in the tea element primitive forest park. In addition, if family members need work requirements and children have difficulty in going to school, our tea vegetable hospital is fully responsible, and is responsible to the end. "

As soon as I said this, the applause was like pouring rain. Even if you don't go to the tea vegetable hospital, you have to help the market for the attitude of others.

The Secretary of Annex 2 has a green face. In previous years, people were the protagonists in this kind of job fair, but this year, Temo tea vegetable hospital was too unreasonable and directly raised the market price.

"Can our hospital raise the treatment a little?" The Secretary asked his deputy.

"No, if we raise it, what can we do to advance the hospital? Moreover, we really have no advantage over others' tea vegetable hospital in terms of capital, which can't be compared. A national medical department can almost compete with half of our surgical system. "

"This world, this world, this group of upstarts!" The Secretary of Annex II's lips trembled.

I don't know whether she opened her heart knot or ended her long cherished wish. After Ren Li finished her speech, she leaned against the old lady's shoulder and quietly wiped her tears.

After the mood stabilized, he said thank you to Zhang Fan. Zhang Fan babbled and wanted to say, but he didn't say anything.

When the speech is over, double selection will begin.

Sure enough, the people surrounded by the tea vegetable hospital were three times inside and three times outside.

In China's education system, both undergraduate and graduate students should come in and go out. As long as the graduate student doesn't rob his girlfriend with his mentor, he can graduate easily. It's like the first time a single dog and girlfriend.

But the doctor is different. He goes in and out tightly.

Doctors under the age of 30 are definitely Xueba.

"Oh, you are a master of general education. Do you have any idea to continue to study for a doctor? At present, we have strict requirements for a master of general education. What general education and what surgery can you win?"

Zhang Fan stood aside and sighed in his heart. Finally, there was one thing Lao Tzu could not say to the master.

Zhang Fan stands aside and Lao Chen holds a teacup for Zhang Fan. Zhang Fan said no, no, but Lao Chen never stopped. Whenever Zhang Yuan was fine, he didn't show up in front of people, so he followed Zhang Fan. If Zhang Fan wanted to chat, he was cheering. If Zhang Fan wanted to know, he was asking.

Some young students don't know. Looking at Zhang Fan's good clothes, there are others to serve, "what's that black boy doing? Do you want to go through the back door!" A female graduate student asked her male classmate.

"He probably wants to enter the tea vegetable hospital through the back door. He knows the medical treatment of an egg!" The male classmate said jealously, and then crowded into the crowd.

Ren Li and Yan Xiaoyu are in charge of internal medicine recruitment, while Zhao Jingjin and Luo Zhengguo are in charge of surgery recruitment. All the recruits are doctors and masters. Ordinary experts can't do it at all. Moreover, the hospital makes great efforts to provide welfare. If several people come in, it's too late to cry.

Therefore, recruitment is very slow and a person has a lot of problems.

"Zhang Yuan, where to go in the evening, the director of the reception center hospital." Lao Chen saw that Zhang Fan was a little bored, so he opened a topic.

"Oh, I forgot if you didn't say it. I won't go to the winery today. It's far away. It's inconvenient. In this way, I'll call the boss of Qinghua and go to their Qinghua Hotel today. The grade is a little higher. Don't let these directors feel unimportant. "

"Well, OK, can Laojiao?"

"Forget it. Today, when you go to Maotai, these experts get one back. They all make money." Zhang Fan thought for a moment and felt that this was an opportunity. He must be cruel with a hoe.

Chapter 1336

How difficult is it to train a director.

It's hard to say that the training of chief doctors such as Lao Zhong, Lao Hu, old Lu and old Wu is not reproducible. According to the general director of county-level hospitals, it will be more than ten years.

But the directors of the third class hospitals, especially the provincial directors of the third class hospitals, seem to have been around for more than ten years, but there are a lot of things here, just like the elite (a) war. At the beginning, when these directors were young men.

It is estimated that hundreds of people went to the hospital together, and then more than a decade later, these people walked and abandoned, and a dozen or so directors were elected. Not to mention one in a million, at least one in a hundred.

If they choose according to the number of undergraduate students in those years, they may really be one in a million.

"Zhang Yuan is mixed now!"

"Who said no!"

The invited directors chatted quietly on their way here.

The blue and white Kunlun snow lotus box doesn't mean you can book it with money. Although these directors have No. 1 figures in the bird market, they have never heard of this box.

"Those who can book this box here don't have any weight. Don't even think about it. It is said that the dean of Annex II wanted to invite Xiangya experts to come here at that time. As a result, he called, and Qinghua directly declined to ask the agent.

I can't say anything! "

"Really? Not even the boss of Annex II? "

"Why are you lying? Isn't Lao Yang in the second affiliated medical office? He did it himself. He said it when he drank too much last time."

"What do you say Zhang Yuan wants to do this time?"

"What do you say?"

People have no words. When they are middle-aged, they have less choices. Family elders, children and daughter-in-law are all things. You can't just think about yourself. Don't look at the lively talk of these directors. In fact, you are still tangled in your heart.

Some people want to go, some people don't want to go, but whether they want to go or not, Zhang Fan invited today. Although they didn't invite each other three days ago, everyone came.

All the fortresses collapsed from the inside, and the road leading Party is the most hateful. This sentence is right.

While several directors were chatting, Zhao Jingjin also introduced Zhang Fan in the car“ He is the director of the first rehabilitation department and the director of the frontier Rehabilitation Association. He also participated in the review and compilation of the teaching materials of the Chinese Rehabilitation Association. Unfortunately, he became a health doctor for so and so in the early years, and then after so and so had an accident, he was also involved. "

"It seems that there are still some goods in hand. Well, does he have any other doubts? "

"He's a director who doesn't hurt or itch. Anyway, after the accident, he doesn't even take graduate students anymore. The doctors below don't respect him very much. "

"Well, you can use it." Zhang Fan nodded after listening.

"This..." Lao Zhao hesitated. "It's all right. Let's put the international department. A good director of the International Department will have it."

Zhang Fan waved casually.

Some things are like this. There is a saying that businessmen are close to the government and away from politics. In fact, this sentence does not mean doctors.

Many doctors feel that their skills are almost the same. They want to take a shortcut. Then their efforts all their life have come to naught, and even their chance to get on the operating table has disappeared. In fact, most of them don't have much brain to consider more complex politics when they choose this industry.

Ouyang is an example. A few years ago, Ouyang, a tea vegetable, didn't say that he was an expert, but now people just say that Ouyang is an European hospital. After all, there are gains and losses. Originally, medical treatment is a very useless business. How can you think of doing anything else.

"What about the director of the second section..."

"The director of the six departments has a bad reputation and average technology."

Lao Yang introduced all the directors to Zhang Fan on the way.

In the early years, no one paid attention to the rehabilitation department, let alone the frontier. Even the capital magic capital, this department is the vassal of many departments.

Some are in orthopedics, some are outside the brain, and even some are in eugenics and health care.

However, with the slow development of medical treatment, we have found that if there is no rehabilitation department for some diseases, the treatment is often halved.

For example, patients with cerebral hemorrhage or cerebral infarction go home after treatment, and then skew their mouth and neck for the rest of their life, just like Nicholas Zhao Si.

In addition, a patient with hip arthroplasty accidentally dislocated his hip after sitting on the toilet. Then pull it to the hospital, and the doctor pulls the leg to reset. This thing is simple to reset. The joint is like doing something. If you go in and come out many times, this thing will be sent. Once it is sent, you can

come out by lifting your leg.

Therefore, rehabilitation guidance doctors are needed at this time.

Now the tea vegetable hospital lacks such a director. For example, many patients with special needs in the international department are not short of money, and Zhang Fan even sent an old doctor outside his brain to pretend to be a rehabilitation doctor for some time. After all, he is not professional. Now he has the opportunity, how can Zhang Fan let go.

It was agreed to arrive at the hotel at 7:30 p.m. yes, that is, in the afternoon, not in the evening. But everyone arrived half an hour early.

After entering the box, although Zhang Fan didn't arrive, everyone stopped talking about work. This is the rule. Don't talk about work. Talk about women frankly. It seems that I'm sorry for such a luxurious box.

Then tell a joke.

If you say a bad word, people in the workplace, especially in the system, sometimes can't integrate into other people's topics if you don't save one or two jokes.

This is not. The director of the sixth rehabilitation department began to tell jokes.

"In other words, there is a Congliang brothel woman who wants to get married. She is deeply afraid that her husband knows that she used to work in a happy place. Just ask the doctor if you can make it up.

The doctor said yes, but the eardrum needs to be removed and mended. The woman agreed. As a result, a few months after marriage, the husband came to the doctor.

The doctor was surprised. I shouldn't be. I'm very skilled. I shouldn't be found.

The man said to the doctor in shame that his wife had a disease that was difficult to open her mouth. The doctor was surprised and asked, what's the matter.

The man said, "whenever I whisper to her, she will fork her legs!"

A female director smiled and scolded. In fact, she thought: cut, what is it? It's not as good as my girlfriend!

In the laughter, Zhang Fan and the leaders of tea vegetable entered the box. In the box, on the wall facing the door, I don't know who invited to draw the picture of national unity, and the red carpet of red peony on the ground.

"Sorry, sorry, experts, we're late." It was a little early when I entered the door, but Zhang Fan was very

polite.

People are good when they are young. When they are young, their skin can be thicker and their waist can be bent down, but they can't do it when they are old. Therefore, they should do shameless things as soon as possible, otherwise they will feel bad when they are old and others feel bad.

"We're early, Zhang Yuan. You're welcome."

You're welcome. After some humility, Ouyang sat in the main seat. Just sat down, the waiter came in, "Hello, Zhang Yuan. Do you start now?"

"Up, everyone is here."

Originally, Zhang Fan wanted to order. The boss of blue and white people laughed at Zhang Fan and said that Zhang Fan would have a good reputation. He would arrange the order.

Zhang Fan is not polite. Sometimes it's a kind of accomplishment to let others show off.

There are many things to pay attention to in a unit. For example, when the director of the Bureau of health draws Zhonghua in his own unit and goes to the superior unit, he may be replaced by Lotus king. Who stipulated it? And when in the Health Bureau, other section chiefs are the same. In the unit, they never show the China in their bag.

In fact, this is also a so-called accomplishment!

The Chinese meal is broad and profound. Zhang Fan still doesn't understand it. When we talk about business, when we joke, or when we joke, we can talk about business.

Anyway, Zhang Fan thinks this thing is more difficult than endocrine.

Of course, the boss of blue and white is really better than Zhang Fan.

Meat and vegetable collocation is quite good. Ouyang looks at Zhang Fan's chopsticks and doesn't put them down. His eyebrows are almost wrinkled with an egg.

"What a shame!" Ouyang muttered.

Ren Li covered her mouth and smiled. Yan Xiaoyu wanted to laugh and didn't dare to laugh. Lao Zhao reluctantly glanced and sighed in her heart: "Jianghu legends don't seem to come from nowhere!"

Of course, Lao Chen also eats goods, but others have a shield, because Zhang Fan always holds chopsticks, which is not good-looking, isn't it.

But to be honest, the big dish ordered by boss Qinghua is really delicious.

Rich goose, Zhang Fan's tongue is almost swallowed.

However, Zhang Fan's simple style let the director of the first rehabilitation department put down his guard, which Zhang Fan didn't expect. Zhennima hit his heart by mistake.

"Zhang Yuan, has the rehabilitation department of tea vegetable hospital been established?" They asked on their own initiative.

"No, I have an idea at present, but there is no leader. Director Yang gave me advice. " Zhang Fan smiled and finally put down his chopsticks.

On the way here, Lao Yang told the past about the character and temper of the directors, and Zhang Fan had a goal.

And it's not one. I don't start now. After a while, I'll be poached. It's too late to regret. It's like a saying. Today, I took my classmates' hand and regretted that I didn't start at that time.

"It depends on the determination of the hospital leaders. If the leaders have the determination, in fact, the rehabilitation department is still developing rapidly. This department is not like other disciplines."

After a banquet, Zhang Fan didn't pay in vain. The three directors have an intention. Now they have to go one by one. They can't go all together. Otherwise, the central hospital will definitely go to the government to complain.

I don't need a doctor of this level. It's my business. If you start, I'll definitely complain. Often, once this kind of thing is complained, the government will be reconciled, freeze the doctor's files, and then take it off one word

Leaving the hotel, Zhang Fan's mouth seemed a little sorry.

"What's the matter, Zhang Yuan? You can't worry about it." Zhao Jingjin thought Zhang Fan was worried. He muttered, "you're still young!"

Ouyang glanced at Zhang Fan and said to Ren Li and Yan Xiaoyu, "you Zhang Yuan probably still want to eat that goose!"

Lao Chen came out of the hotel at this time, walked to Zhang Fan and said quietly, "I asked about the practice!"

Zhang Fan's eyes lit up!

Chapter 1337

It's very idealistic that blessed people don't have to be busy. But sometimes for Zhang Fan's luck, Zhang Fan feels too good without talking about others. For example, now, through the introduction of Lao Zhao, I know that I have met three directors.

Originally, I wanted to go down and slowly blend with the president of the Central Hospital, and then touch it like a cat. First feel it comfortable, and then let it fork its legs, so that the three directors can run to tea. As a result, Zhang Fan hasn't stroked the dean's hair yet. The central hospital doesn't know what stimulation he has received.

Hospitals should be reformed and reformed greatly. It is said that too many rehabilitation departments should be cut down and general surgery should be developed. Nima sleeps and meets the pillow. Hurry up, Zhang Fan let Lao Chen go to activities. As for the development of general surgery in the Central Hospital, Zhang Fan thought that the president was kicked and swollen by a donkey.

As early as twenty years ago, you could still do this. Now you cut off rehabilitation and engage in general foreigners. You despise your long life. Even if you go to internal medicine, it's better than surgery. What's the current environment? If you say something bad, there are many surgical mountains. You, a layman Dean, want to kill in this sea of blood?

He really despises the subject of surgery.

Therefore, what about this? The layman leads the expert. If there is no accident, it will be doomed.

Zhang Fan is very proud, really proud. He didn't dare to think of such a good thing, but he met it. Therefore, Zhang Fan felt that he should talk to the provincial people's court.

He thinks so. The central hospitals are stimulated and need to be reformed. Don't you think of a way for the provincial hospital to be the end of the ten thousand year crane forever.

"Zhang Yuan, today we are in contact with the leaders of the provincial people's hospital. Where shall we arrange?"

"Let me call the boss of Qinghua. I think the box of Qinghua is our blessed place. The menu is still according to the menu for the three directors yesterday. We can't favor one over the other."

Lao Chen asks Zhang Fan for instructions. Zhang Fan doesn't even think about it. He opens his mouth and comes.

"Is everything the same for drinks?"

"Just go to the old cellar. After all, we frontier people still want to support frontier wine."

Lao Chen curled his mouth in his heart. He felt that Zhang Fan's flesh hurt. It is estimated that if Zhang Yuan hadn't thought about the goose, he would be able to change to the Government Guest House today.

To tell you the truth, Zhang Fan really hurts. Dinner, banquet, if Zhang Fan's personal business, the blue and white boss doesn't need Zhang Fan to say. He directly meets the list, and even meets to support Zhang Fan. But for official banquets, people won't help Zhang Fan.

But this money is actually earned by Zhang Fan. The dishes are really inexpensive. They last for twenty or thirty thousand. But after a banquet, Zhang Fan, who is expensive in wine, trembles. Looking at several directors he doesn't like, one cup after another, he wants to end the banquet early.

Sometimes, there are some habits. No matter who you are, five people and six. The living habits brought by your native family are almost difficult for anyone or anything except your wife to change you.

For example, Zhang Fan hasn't seen any big money since he was a child, and he is stumbling at school. Even if his life improves, his idea will always be money. Saving, what to buy a house and what to buy gold bars are not as reliable as putting them in the bank.

For the money of the unit, he would rather spend one million today to pay benefits to doctors and nurses than watch others drink their own Maotai. How to say, anyway, I don't want to get cheap from you. Don't look at the big boys in my pants pocket.

Therefore, after the three directors in his mind fell into his pocket, he was not as enthusiastic as Ouyang about what provincial hospital.

This is his character. Ouyang likes to be vigorous and everything is big. Just like men are always obsessed with big steamed bread, he has a strong ideological atmosphere of that era. He wants to rush into mass action and think of the biggest when doing anything.

Zhang Fan is different. The big ones also like it, but relatively speaking, they prefer exquisite and exquisite, less vigorous and more flat and light. It's like Ouyang they like chorus and collective dance, while Zhang Fan's generation prefers karaoke and face to face dance.

Just like Zhang Fan's grandfather loves Lao Mao and Zhang Fan's Lao Tzu loves Lao Deng, Zhang Fan's

generation especially likes Kesai to fight dinosaurs. The brand of the times on them is very clear.

However, if we can have a base in Bird City, and then rely on Medical University and a basic medical school, this thing is still possible.

Otherwise, Zhang Fan is stingy and sucks his fingers. He wants to let the provincial hospital invite him to dinner.

Therefore, Zhang Fan did not invite many people, so he invited the president and Secretary of the family.

They came to the banquet awkwardly and wanted to show off that they were thin and dead camels, but now the volume of tea in others was not as big as others when the provincial hospital was the most brilliant. They wanted to show off their high level. Now Zhang Fan is less than 30 and has been rated with them in more than 50.

This NIMA was bullied by her country relatives. But I can't come. I feel like I'm timid.

.....

"Mr. Huo, Zhang Yuan called again to ask for a box of Kunlun."

"OK, finish it for Zhang Yuan. Be polite to Zhang Yuan." Lao Huo touched his forehead. He was going to hang up the phone. After thinking about it, he said, "tell the front desk these days that Kunlun will be renovated and will not be open for business."

"Good boss, Mr. Huo, the subordinates of Zhang Yuan asked about the practice of rich ducks yesterday." The lobby manager took the opportunity to report everything to the boss.

His level is out of reach with the boss at ordinary times, so he is stained with Zhang Fan's light.

"Hey, this Zhang Yuan is really delicious. In this way, let the chef be more careful in the evening. You can copy the recipe and give it to Zhang Yuan."

"OK, Mr. Huo, I know." The lobby manager went along well, and then paid more and more attention to Zhang Fan.

Kunlun box, in fact, is similar to the box of roast duck in the capital in the early years. Serious capital bosses don't go. They often go to other places and feel that they have a level. This box is a little similar.

On weekdays, the most used people are all kinds of people who come to the bird market for meetings in the state and county. The lobby manager has worked here for several years. He has never met someone who made the box closed.

So he trotted to receive Zhang Fan himself.

The leaders of the provincial people's Hospital and Zhang Fan arrived almost front and rear. It is estimated that they waited for a long time in the car outside the hotel and stepped in.

The reception director and the reception Dean have different atmosphere.

The reception director, the directors are still a little reserved, just like unmarried girls and young men. They are still a little shy.

The reception of the president and secretary is as enthusiastic as the half old Xu Niang who specializes in wedding gifts. She wants to hold her arms together and touch her mouth. In fact, what she cares about is the other party's three gold and wedding gifts.

"For the female boss of our hospital in Yangcheng last time, we still need to develop it and build a large high-end community relying on our hospital..."

The president of the provincial hospital can't show off his technology and comprehensive strength of the hospital. He can only show off his presence in the provincial capital. In this way, sometimes the more he shows off, the more he has no bottom in his heart.

Zhang Fan was stunned. This thing is really shameless, just like a businessman.

Secretary Ren sat on one side as if she was afraid to stand on such a greasy middle-aged man. She was a little extroverted. She could still talk with the directors, and there was no topic directly with the president and secretary.

After waiting for the rich goose to come up, she ate a few more chopsticks and wondered: "it's not just goose. How can Zhang Fan eat so fragrant?"

That's what's on her mind.

If only Zhang Fan and Ren Li come today, they probably can't talk about anything. But today the protagonist is Ouyang.

Ouyang took chopsticks and listened to the leaders of the provincial hospital boasting. With a slight smile on his face, he actually laughed at the female boss of Yangcheng. It's good to say that if I mix up like this, I'll have to jump out of the building

Nod your head and wait for the other party to finish blowing.

Ouyang picked up his glass and said, "the leaders of the provincial capital still have a way, but the building community is a little tossed. In fact, I think there is another way to improve the income of the provincial hospital. Not to mention, it can also improve the status of the provincial hospital in the

medical circle. "

"Oh? The European Academy will solve the puzzle! " Everyone was confused with understanding.

Zhang Fan was not interested either. He kept eating rich geese with chopsticks.

Lao Huo, a blue and white, is a good businessman. He has a set of energy vendors and a set of hotels.

Other people's hotels do not seek to integrate with internationalization. They do not pursue any star suites or tire restaurants.

For example, in this menu, people do things according to the Royal recipe of the year.

The so-called rich goose has a tacky name, but most people can't eat it without booking in advance.

First of all, when cooking this dish, it's really delicious. It's really troublesome and luxurious when cooking.

First, a local chicken and ribs, and then some pig feet and chicken feet, boiled and fried in water, and then add dried cuttlefish, scallops and Jinhua ham to stew for more than ten hours.

This is the first step. Filter the ingredients that have become slag and leave only the broth. Then add the soaked abalone, flower glue, scallop and mushroom in the soup, and simmer over low heat for more than four hours.

Really, at this step, you can jump over the wall in front of the Buddha, but it's not enough.

There is also a procedure, that is, the goose. Empty the abdominal cavity of the cleaned goose and stuff all the stewed ingredients into the goose's stomach. Then use an iron pliers. Zhang Fan looks like a Kirschner needle. In fact, he is an iron pliers for roasting mutton.

Just like in the God of gamblers, the meatball lady who makes it difficult for men to forget pricks the goose's stomach with chopsticks. This technique is very exquisite. We must not let the soup flow out.

Then use an air pump to layer the skin and meat of the goose. Then, the boiled water is like rain, spoon by spoon to shape the goose. Then, hang the shaped goose in a ventilated and dark drying room for air drying, and wait until the goose skin is dry.

Also brush the goose with honey, brush one layer, and then air dry for six hours, a total of three layers.

When this is done, the last thing is to take the duck to the oven for roasting.

This oven must be roasted with fruit trees. It can't use any other liquefied gas or coal. It must be roasted with apple tree wood.

When Lao Chen told Zhang Fan about this practice yesterday, Zhang Fan decided to have another meal, and then forgot the practice of this dish. It's too troublesome.

However, this rich goose is really delicious. The baked goose is golden and yellow, just like the golden armor on his back. When he just baked the goose, not to mention the taste, he cut it and sniffed it. For a delicious person like Zhang Fan, his saliva can drown him.

The crisp but not greasy goose is mixed with the seafood of abalone and scallops. When the goose stained with high soup is sent into the mouth, the unique aroma protrudes between the lips and teeth. When the teeth touched lightly, the crisp goose oil just burst out and met the soup mixed with soft scallops and abalone.

Darling, really, the more you eat, the more you eat, the more reluctant you are to put chopsticks.

Even if he ate it for the second time, Zhang Fan still thought it was delicious.

Chapter 1338

Good things come in pairs!

It is estimated that this is a word invented by the old ancestors to fool the younger generation. Zhang Fan and Ouyang are thinking about finding a foothold in the bird market. People want to find a foolish son of the landlord to occupy his property.

Anyway, neither side has the purpose of friendly development and harmonious coexistence. They are all thinking about how to be the active party and the leader in the relationship between the two sides, with the idea of pressing the other party under themselves and letting the other party call dad.

This thing is the same as the situation in China. Never think that the two units at the same level can be well combined. At the dinner table, without talking a few words, Zhang Fan understood in his heart. He'd better eat well. Today is a bullshit.

Tea vegetable hospital seems to be the health leader sent by the central government. The provincial hospital feels that it is the general director of the northwest ministry of health.

Not to mention the others, the tea vegetable hospital and the provincial hospital just started talking, not even the negotiation, they encountered irreconcilable contradictions. If cooperation, what about the

name of the hospital? The provincial hospital means that its own name is atmospheric, and its name should be used.

Ouyang means that you can't do it. Your name has no glorious history. It's better to call it tea vegetable hospital. After all, tea vegetable hospital has worked since childhood and is now in the limelight. Both sides are not satisfied. Finally, I don't know who mentioned it. Why don't you call northwest general hospital?

Is NIMA talking about cooperation? It's just a compliment!

Ouyang would like to, but it's estimated that the Ministry of health can't pass this first. Why don't you call China general hospital if you can.

On the way back, Ouyang sighed slightly with wine. The European Academy reached out to the bird market for the first time and was ruthlessly cut off.

It doesn't matter whether Zhang Fan or Ren Li. How can we say this? There are no free meat buns in the world.

One door doesn't open, but the other door works well.

In previous years, the tea plant hospital had never thought of infecting the doctoral graduates of Niaooshi Medical University. Even a master's degree is a collection of one or two that others don't want.

Now the situation is different. The burn department receives doctors. A group of Hula came. A research site of allogeneic transplantation attracted many doctors.

Dr. Pu Wai received, obediently, but also in groups. Let's not talk about the cooperation project between Pu Wai and Marubeni. One Pu Wai of tea is another branch of the ancestral family. Don't you see that old man Lu is in tea now.

This appeal, really, is that Xu Jinjiang lifted the weight and danced like a wind and fire wheel.

There is also the recruitment of orthopedics. Orthopedics, to tell the truth, whenever Manchuria is a hospital, it has its own experience, and everyone is not stupid. Everyone knows that orthopedics makes money, so this thing is popular, but it is not very good for employment.

For frontier recruitment, not only those from niaoshi Medical University, but also frontier people studying for doctors in other provinces have come here.

Special orthopedics is a partner outside the golden wool country. This name is too fierce. Directly gave the tea vegetable hospital the right to pick and choose.

In the three-day job fair, tea vegetable hospital is the hospital with the best income in this job fair.

Six doctors came at one time, and there were a little fewer in the burn department, two. Because someone else Li Cunhou said, don't be too much, you must leave several positions for his doctoral students.

Although the doctrine of the mean is well-known, Lao Li's feeling of the doctrine of the mean is not as good as tea vegetarians under Ouyang's deliberate flattery.

In the tea plant, it feels like Lao Li is the general director of the burn department. What he says is what he says. From top to bottom, not only did no one object, but also went all out.

This is cool, which makes Li Cunhou, who has been listening to and executing orders for half his life, extremely cool. If tea vegetable funds were not too strong, he really wanted to settle in tea vegetable.

Anyway, although Li Cunhou has the name of Professor of the golden mean, he spends most of his time in the laboratory of tea.

As for the Institute of Orthopaedics, it seems that there are not many doctors. In fact, the frontier can only graduate several orthopaedic doctors a year, and they are still doctors of bone tumors.

Thirteen of these things directly cover today's bone tumor doctors, and there are bone tumor doctors from other foreign schools.

The tea vegetable hospital is so domineering. Anyway, the leaders of several hospitals in niaoshi have brought a lawsuit to the government.

The government wants to teach, but Ouyang is unreasonable.

I'm kidding. Ouyang is waiting for a lawsuit.

"Independent two-way choice, our tea vegetable hospital chose others, and others chose our tea vegetable hospital. What are you dissatisfied with? "

The leader said painstakingly that we should take the overall situation into account. You can't let other hospitals not develop.

Ouyang stared, "is this what I'm thinking about? According to what you say, where should we give funds

to the policy? What does our tea vegetable hospital have? Why don't you say to take care of us? If you want us to release a few doctors, you can give us a ten-year fund first.

We should support the development of tea vegetable hospital. "

The leader in charge of health in bird city was angry.

"This NIMA is so unreasonable. Did they do this before?" The leader in charge of health in niaoshi called the leader in charge of health in chasu to ask about several presidents and secretaries of chasu hospital.

The leader of tea in charge of health, really, really is a complaint of snot and tears, "leader, I'm bitter, my heart is bitter!"

There is no way to reconcile this matter.

Three days later, the tea vegetable hospital left the bird market. The leaders of the major hospitals in niaoshi took a sigh of relief.

Tanima is bullying.

If you accept the doctor, you can accept it. NIMA has been pulling experts from the tea vegetable hospital on TV these days. These days, experts from the bird market station and the tea element hospital talk about all kinds of health care and popularize knowledge every day. There is a comparison between doutmo and those who treat infertility and don't give up early vomiting in the evening radio.

Ren Li said that in her heart, Yan Xiaoyu talked about endocrinology, Zhao Jingjin talked about general foreign studies, Luo Zhengguo talked about outside the brain, and even Chen Sheng talked about ophthalmology.

In particular, Ouyang, who applauded and belittled other hospitals in niaoshi, was almost naked to say that the frontier tea vegetable hospital was the boss.

The leader in charge of health in niaoshi wanted to stop, but the boss of niaoshi acquiesced in this behavior of tea vegetable hospital.

This makes him very confused.

In fact, the second brother of the bird market and Zhang fan are still a little fireworks. Moreover, people are willing to develop the tea vegetable hospital into a big Mac.

The mighty team left the bird market.

"There's still a lot of work to go back to." Zhang Fan leaned back comfortably in the car.

"Well, the resettlement work must not be taken lightly. I'll take charge of this piece. " Ouyang answered.

"OK, you go to the European Academy. I'll ask Chen Yuan to help you. "

Zhang Fan was very happy to see Ouyang go out to work.

"No, I'll just take Xiao Chen with me. Chen Yuan would better help you."

Ouyang gave Zhang Fan a white look.

In the tea vegetable hospital, good news came again.

Chapter 1339

Zhang Fan's motorcade returned to tea vegetable. Looking at the hospital near the sunset, Ouyang sighed a long sigh.

"You say, how do you feel about this Koster?" Ouyang asked Zhang Fan. She seldom calls Zhang Fan's name now.

"It's OK. What's the matter? The European hospital buys one if it likes the hospital, otherwise we often borrow a car from the government, which makes us seem to always get cheap from others. Easy to annoy others. Moreover, your A4 should be changed. "

"Yes, it's not a thing to borrow. No! Forget my car! " Ouyang didn't reach an agreement with the provincial hospital. Then she looked at the streets around the hospital. She was a little distressed. She didn't get cheap. She was very upset. As soon as she was upset, she wanted to lose her temper. It was bad for her health to lose her temper. She simply didn't return this Koster!

In fact, this car is really inexpensive, mainly decoration.

When the price of the official car was limited, it was said that the decoration cost of an imperial car less than 70000 yuan was 200000! And this Koster is even more exaggerated. Apart from others, Zhang Fan feels that the car seat is more comfortable than the boss's chair in his office.

"Well!" Zhang Fan doesn't know how to answer.

"Hey, at that time, there were several neighborhoods in the distance. I told the government that the hospital offered some money to sell me all these places. As a result, the government was afraid of my

default and didn't give it to me. Now look, can you afford it?

This car won't be returned! " The more the old lady said, the more angry she became.

The driver kept looking at Ouyang from the rearview mirror. His face muscles were hard. He didn't expect that he was fine when he came, but he couldn't go back. How can he explain when he went back!

When a hospital becomes a landmark of a city, you can't imagine the pride of the people in the nearby streets.

For example, the tea vegetable hospital is now like this. In the past, this area was an old community. Many of the buildings of the first family building were expert buildings built for old maozi experts in those years, with maozi wind rising from the eaves. This kind of broken house is older than Zhang Fan. The air leaked. The man in room 1 farted because of indigestion. The woman in room 2 had to open the window for ventilation, otherwise the undigested smell of leek wouldn't go out.

This kind of house can really be said to be the former Wang Xietang Qianyan. The first group of residents are experts, and the second group of residents are senior cadres of tea vegetables in those years. But later, it gradually became lonely.

Then the surrounding environment is not good. The 120 whimpers in the hospital for 24 hours will never be a holiday. Even some people can tell whether the car is an ambulance in the tea vegetable hospital. Because there are many patients sent to tea vegetable hospital in prefectures and counties.

In the past, anyone with a little family background tried to stay away from this place. People who can't move out can only stand on the street and yell when they have nothing to do.

But now it's different. The five-star hotel opposite the broken community is said to have joined some international hotel alliance, as well as the improvement of the level of tea vegetable hospital.

This place has become an inch of land and an inch of gold.

People with houses around now boast without saying anything else. It's all right. Today, I pay the bill. I have a suite next to the tea vegetable hospital. There are also boosters who say that there are suites in the tea vegetable hospital, and the chance of survival is greater than that in other places.

Although the posture of a bed for Toni maning to grass is a little exaggerated, it also shows the growth

of tea vegetable hospital. Although it is bragging, it also makes people who have little assets have the potential of demolition households.

Especially after the improvement of the medical level of tea vegetable hospital, there are also many patients from other places. Many patients who need long-term treatment live in hotels. After all, it is still expensive to live in hotels, so these broken buildings have become rental houses for gunmen.

Moreover, the east-west street at the gate of the tea vegetable hospital is becoming more and more lively. Tea vegetable people spontaneously organized into a snack street. Especially in the morning, it's really lively. People who sell steamed buns, steamed buns, flower rolls, bean curd, milk tea and pancakes have a lot of breakfast anyway.

Besides, there are people who sell flowers. Originally, the government wanted to renovate this place, but there were contradictions. Finally, the government simply set up stalls and began to charge fees.

This will make the already busy place more lively, because it is legal.

But the road is not enough.

Ouyang was originally disgusted with this form, but he put up with it when he saw that the common people had more business to support their families.

In fact, the old lady is sometimes unreasonable and suffocating, but when her heart is soft, she is like a Guanyin. It's really contradictory.

Zhang Fan looked at this is not a thing. Finally, he thought of a way to get a gate directly in all four directions of the hospital. Anyway, Ouyang likes to hang a sign. One gate is not enough for Ouyang to hang a sign. Three more doors are also good for the old lady to show off.

No one expected that the gate of hospital development has become just needed!

As a result, the three doors opened for less than a month, and even began to be lively.

Moreover, with the rise of house prices, high Zhang Fan wants to sell his old house.

The house price of tea vegetable in other places is only in the early 3000's, while the hospital has 20000 here. And often have money and no house. Many people hold it in their hands and don't sell it!

The house price has risen, but Zhang Fan and Ouyang also regret it, especially Ouyang. At the beginning, the tea vegetable government said to let the hospital give 10 million, demolish the old building and give the land to the tea vegetable hospital. At that time, Ouyang felt a little at a loss. She said five million.

Ouyang always dealt with it by bargaining for clothes. As a result, the government quit.

Now I feel like I can't afford to buy it. When Ouyang talks about this, it becomes that the government does not act and does not sell land to itself.

But the government is happy now, because this place can sell at least tens of millions. Tea vegetable hospital has become the center of the city through its own efforts. The former commercial center and administrative center were all empty, and the tea vegetable hospital was very popular.

When the car entered the hospital, Koster's driver didn't even put out the fire. Everyone got off the car. They ran away in the car. Lao Chen shouted for dinner. The drivers were as if they hadn't heard him. They were deeply afraid that Ouyang would detain the car.

He knew that the government had no way to deal with Ouyang, but the monitor of the car class was sure to deal with him. Zhang Fan and they had just entered the hospital. Li Cunhou was greeting Zhang Fan from a distance with a group of people, mostly golden people.

Zhang Fan looked at a group of people and clattered in his heart.

Then take a closer look. Lao Li's face is peach blossom. His unshaven beard is particularly conspicuous on his ruddy lips. His eyes are bright. Zhang Fan is at peace.

Now he felt that he was not old and that he was about to have occupational diseases. He just couldn't see or hear. Someone came to him in a hurry.

"Phase III test passed! FDA approved! " Li Cunhou walked quickly to Zhang Fan, bent slightly, then grabbed Zhang Fan's drooping hands, squeezed them tightly together, and then looked at Zhang Fan with eager eyes.

"Passed? Great. Lao Li has worked hard. " Zhang Fan seems to be very happy on his face. In fact, he can't afford the waves in his heart.

Because how do you say this? It's like looking at your newborn son after being a father. You can only force a smile rather than really smile. Lao Li's skin allogeneic transplantation was also desperate at that time, so he found Zhang Fan.

At that time, several of Lao Li's brothers in Jinmao were developing the same products.

The medical industry is very exclusive. Once a new product is backward in research and development and originally landed with a gold key, it can only become a copper key or be induced into labor in advance.

For example, insulin and metformin. One after another, metformin is also a magic medicine. It is really great in sugar control. Unfortunately, its eldest brother insulin was born early, so metformin can only help its eldest brother after landing.

Shi's valuable gehuazhi made some money, but it's hard to say whether the R & D expenses have been earned back.

Therefore, when Lao Li was desperate, he met Zhang Fan, and then brought the team to tea vegetable.

But this thing has basically taken shape by the time of tea element. Zhang Fan gave some opinions on its application, and then made it more in line with clinical use. Therefore, although it has passed the FDA, Zhang Fan is not very excited.

"Aren't you excited?" After all, Lao Li is also an expert doctor, and he still deals with skin. When he looks at Zhang Fan's face, he knows that Zhang Fan is not excited at all.

"Well, excited. I'm a little confused. I haven't slowed down yet. Your news is too hot. I have to slow down! "

"You have 15% of the shares. Are you excited?" Lao Li is looking forward to seeing Zhang Fan excited.

Zhang Fan still couldn't feel the excitement. "It was the contract you asked me to sign at that time. Oh, look at you, Lao Li. Don't we talk about it? I just filled the number at that time. You took the tea vegetable hospital..."

"Acelity has the intention to cooperate with us to mass produce products."

"Oh!" Zhang Fan nodded.

Lao Li thinks Zhang Fan should pay attention. In fact, he thinks too much, and Zhang Fan doesn't have the mind to pay attention.

Acelity, a golden hair enterprise, is the most professional skin wound technical care enterprise in the world. This company is also wonderful. It doesn't do anything. It worries about how to deal with the broken skin in one day.

Although the company is small, it is very professional. Many scald products all over the world are developed by others.

"Do you know that our patent family estimates that the annual net profit can reach US \$3 to US \$6 million, 15% of you. Calculate how much you can share a year."

This time, Zhang Fan finally moved " So many, when will it be divided? "

In fact, Lao Li's research and development is a material rather than a drug. If it is a drug, if everything goes well, a new drug will take at least more than ten years to be approved by the FDA.

"Well! You are too realistic. " Lao Li can't laugh. It's only his intention. As for the serious promotion and listing, there is still some time to go.

Chapter 1340

Lao Lixing rushed to find Zhang Fan. In fact, the main purpose is not to tell Zhang fan that you are financially free.

But let Zhang Fan do an observation operation. To put it mildly, materials and medicaments are actually commodities with commodity attributes. Therefore, in order to make doctors know more about commodities, we need to use some means.

For example, the Commission, which means that all kinds of blood match the same, and all kinds of Salvia miltiorrhiza are used very frequently, because there is no specific clinical data, the column of the manual is often brief, which is like fooling people, and especially in terms of drug taboos, people also write one directly, unknown!

Therefore, half of the Chinese people are allergic.

There is also a means, such as major insulin. These guys don't give you money, but give you academic status. For example, call on underground doctors to attend meetings, take care of food and drink, give small gifts, and have more credits.

Doctors, like college students, need credits to graduate every year. Many credits need to spend money, and some insulin manufacturers spend money for doctors, and then call on doctors to attend classes.

The lecturer is the top three doctors in an area. It is the spokesman of their local products.

Now that the skin transplant developed by Li Cunhou has been completed, he also wants to quickly complete Europe and make the product quickly accepted by doctors.

Therefore, his idea is to let Zhang Fan sit on a machine to observe the operation.

First of all, the difficulty of this operation should not be low, and the effect should not be poor. There

should also be gimmicks to attract doctors.

This is like the scream of night shift women in remote mountainous areas. Is it the loss of human nature or

Let the doctors pay attention first.

Therefore, Lao Li worked hard for a long time to find a patient he found very attractive.

"You have to watch the operation on the platform. I've got all the patients from the mainland."

Lao Li looked at Zhang Fan and was a little excited before he said his purpose.

"OK, no problem." Zhang Fan said, and then asked, "what operation?"

"Breast repair!" When Lao Li said this, his eyes flashed away from Zhang Fan's face, and then it was like a dog who did something wrong hiding from his master's eyes.

Zhang Fan was excited by Lao Li's news and didn't pay attention.

"OK, I'll see the patient first!"

This is Zhang Fan's habit. He looks at patients before operation and after operation. Unlike some doctors, they are not very skilled and play big cards. They don't look at patients before operation and even after operation. It's like he's running water.

It was only halfway through the operation that he found that someone else's right leg was broken. As a result, he cut open the patient's left leg to find a fracture!

This kind of thing is not fictional at all.

.....

Mammary (a) glandular family, a small branch of general surgery. This discipline is the most competitive department in major hospitals. The competition is not academic status, but how to enter this department.

Many doctors have just graduated. They are eager to enter general surgery. They want to save the earth. He is the king of general surgery in the future. Then five years later, my head was bald and I was numb. I cried for my father and mother to get breast cancer, and I didn't want to do general surgery anymore.

The double gland department, thyroid and breast, is the most relaxed discipline in general surgery. First of all, there is almost no emergency in this department. It is a department in the hospital that can go to and from work normally, and the work of this department is clean.

What doctors fear most is not how difficult the operation is, but the emergency.

It's like a woman, especially an ugly woman, who meets every day. In fact, she slowly feels acceptable. I'm afraid that netizens will rush to show up, and then women are big and thick. They pull your arm and say, today you don't want to sleep with me. I'm not finished with you.

It's scary.

If the endocrine of tea is the gathering place of Guanfu's wife, the mammary gland is especially the gathering place of high wealth and beauty.

Like most hospitals, doctors who can enter this department, don't say you are lucky, don't say you have strong ability. If your father is a farmer, you are a great skill, and you can't enter this department to play your golden cudgel!

Zhang Fan and Ouyang said hello and asked Lao Chen to start preparing for the placement of the doctor, so they excitedly followed Lao Li to the breast department.

Double glandular department, one floor in the surgical building. After entering the Department, you can feel the cleanliness of the Department, which is not mixed with the special smell left by rotten wounds and excrement and urine.

Moreover, there are many female patients in this department, so not only there is no unpleasant smell, but also there is a faint smell of fat powder in the Department.

"Zhang Yuan!" When the nurse saw Zhang Fan, she hurried to call the head nurse. The head nurse also came quickly.

"Hello, head nurse!" Zhang Fan greeted with a smile.

After Zhang Fan became the Dean, most of the nurses in the double gland Department arranged to provide for the elderly either openly or secretly. It's also difficult for many nurses. They are in their 40s and have not been promoted to head nurses. It's a little unreasonable to let them run to the front-line department to change and boil medicine.

General hospitals, nurses of this age, will try to let you go by yourself. Zhang Fan thinks that nurses at this age are valuable empirical talents like doctors.

Therefore, the average age of breast nurses is relatively old.

"How's it going? How's the Department?" After greeting with a smile, Zhang Fan asked the head nurse.

The head nurse is no longer young. Her face is painted with a layer of white skin care products. I don't know whether it's poor quality or something. I feel that this white skin care product is a little uneven. It's like putting a layer of white vest on her face.

"The hospital beds are full, most of them are for postoperative radiotherapy and chemotherapy, and some are for preoperative examination."

"Well, nothing's wrong." Zhang Fan asked softly.

"No!" Although the head nurse is old, her professional ethics has not been ignored.

In particular, a group of old nurses stood in front of Zhang Fan. Zhang Fan's heart was stable. Therefore, in front of these old nurses, Zhang Fan had no leadership airs.

"With you, I can have a good sleep. If you have difficulties, you can go to the hospital office or come to me directly. You are all my teachers. For example, Li Hu, when I was in vascular surgery, venipuncture was not very good. Li Hu directly taught me a little trick.

Then, I don't brag about venipuncture now. Few in the world are better than me. Therefore, you should teach young people a lot of your experience now. "

After a few words, the old nurses' eyes turned red.

Breast nurses are more at ease. Zhang Fan doesn't think much of doctors.

For example, Jiang Qinqin and Wang Yanan, who had been in the orthopaedics department one after another, entered the breast department after a short time.

"Zhang Yuan!" Jiang Qinqin looked at Zhang Fan as if his daughter-in-law had met a stranger, shy.

Zhang Fan promised and didn't talk to her much. The girl can't afford it. Earlier, Ouyang had to rely on his father's relationship for things that the government couldn't decide.

Although it is no longer used now, Jiang Qinqin stuck to Zhang Fan at the beginning. Later, Zhang Fan got married. Although he didn't stick to others again, Zhang Fan still didn't want to deal with her. Because the girl's hands are so stupid that she can't even do a better suture. She has to cry and shout for surgery.

You don't have such a good father. It's not good to go to the health bureau to have tea and read the newspaper. It's not good to find a strong guy for fitness after work. You have to suffer here.

"What bed is the patient in?" Zhang Fan asked, and then took a look at Lao Li.

"In nine beds, Zhang Yuan, I'll take you!" Jiang Qinqin said quickly.

"All right, let's go."

.....

After entering the ward, Zhang Fan looked at the patient and looked at Lao Li with a murderous look.

Lao Li smiled.

Because the patient is too special, first of all, he is not young and has wrinkles on his face. After watching Zhang Fan and them enter the ward, he smiled at Zhang Fan and exposed the only few teeth in his mouth.

And the chest is even more invisible, as if there are two Taupe face bags hanging on the chest.

The old lady's mammary gland (a) is directly dragged around her navel. This thing can really be thrown behind her like some guys' separate hairstyles.

"Old lady, what's the matter with you!"

After stabilizing his mood, Zhang Fan asked the patient with a smile.

"Young life!" The old lady who had laughed stopped laughing, then patted her thigh and began to complain.

"Yao'er's baby, wooden man belt..."

With a three Sichuan accent, Chuan (a) Pu, for example, the young sister of the accompanying capital of Chengdu, said that Chuan (a) Pu, the northwest people had no obstacles in communication, and thought that the people in this big city spoke well.

But if you let the old lady in her seventies speak authentic Sanchuan dialect, Zhang fan can't understand it. Really, it's no exaggeration.

Things are also simple. The little grandson of the old lady's son was left alone, so the old lady volunteered to take care of the children.

As a result, at noon, the old lady happened to have no one at home. She had to cook while taking care of her children. Really, it's not easy for such an old man to take his children to cook.

As a result, the child may be hungry and crying badly. People in Sanchuan usually look at dolls as a basket on the back or wrapped on the chest.

The old lady was cooking with the baby on her back. As a result, the baby cried badly. She threw the milk (a) gland behind her, and then the baby sucked the shriveled peas without crying or making any noise.

As a result, the baby was sucking and fell asleep.

Then the tragedy happened. The old lady was ready to fry a pepper in hot oil. As a result, the pepper had not been put in the pot. After the breast came out of the baby's mouth, she fell into the oil pot at the moment when the old lady bent down!

The old lady's physical quality is really good. If she is an ordinary old man, it is estimated that heart failure can be caused under such great pain.

The old man took out his mammary gland (a) from the oil pan, gently put down the sleeping child, then bandaged it, and stood on the hillside scolding his little son.

The family was also filial. Although they had no money, they were sent to the big hospital in the provincial capital. This is not true. Li Cunhou, who is looking for special patients all over the world, found it, and then directly told people that free treatment and world-class doctors had surgery.

In this way, patients in their 70s and 80s were brought from Sanchuan to frontier tea.
