

Chapter 1341

Life is full of surprises. Sometimes you think it will never be possible. Maybe the next day you open your eyes, yo, it will be.

For example, the old lady Sanchuan invited by Li Cunhou never thought that she was old. She was even watched by more than a dozen men, and there were foreign men with blue eyes and high nose.

The old lady really didn't expect to be shown by foreign men in her life. Although she was old enough to be a grandmother of these people, the old lady was shy.

"I'm ashamed of your mother. If you go underground, you old man can't kill me!"

Without talking about outsiders, the old lady scolded Yao'er and tried to reach out to hit him. If it weren't for the chest pain, the old lady in her nineties would really be able to jump down and hit him.

Her youngest son has white hair. She still has to bend down and stretch out her hands to let my mother beat her. She also has to prevent my mother from falling out of bed.

The grandchildren, on the other hand, were provoked by the old lady. A roomful of grandchildren, a roomful of children, the old lady sat on the bed like an old birthday, wrapped in bandages.

Zhang Fan looks at telling the truth and is quite envious. This is a charity home. Otherwise, can the old man live so old? Not only is she old, but also she has clear ears and eyes and a clear mind. The old lady kept scolding her son, but she didn't say a word to the doctor.

This is really the mother's kindness and filial piety. If nutrition can't keep up, even if the old lady has a long life, she may not be in such a good state.

"You still laugh and don't help you with your baby. Is there such a thing?" The old lady's youngest son patted her next to her mother and scolded her son.

Then he turned his face, smiled and said to Zhang Fan, "you're laughing. My mother doesn't look like a little foot, but she gets out of bed before dawn every day, and then walks until night. She is not allowed

to work at home, but she has to do it. There will be an accident. At such an old age, suffer. Professor Li said, "you are the most powerful doctor in China. You must operate on the old lady."

"Hehe, don't worry, don't worry, it's too late to envy. There is such an old fairy at home. My family is absolutely prosperous. OK, I will go all out to have a good operation."

"I won't do it. Let me die. I'm going to find you, old man. I don't get hurt by the knife. It's going to release Yang. You're going to let me die." The old lady grinned to cry.

"No, no, you don't need an operation here, and it's not on your stomach. It won't put your Yang!" Zhang Fan walked into two steps with a smile. Although the old lady was wrapped like a white zongzi, she had no peculiar smell.

This shows that people's family cleaned the old lady, which is great.

"My mother, do you know that people are big doctors? You see, people with golden hair come to see people."

The old lady's son worked harder.

"Oh, it's as old as my youngest grandson. Wang Mazi of Hujibaba is not a big doctor with a beard!"

Zhang Fan couldn't help laughing. The old lady is not easy to fool. Compare him with the village doctor in their village.

"Ouch, how many years have pockmarked Wang died. The doctor is a college student. He went to college. Pockmarked wang hasn't been out of the village all his life. What does he know. The big doctor knows a lot. He knows that my old man is not angry. "

"Don't coax me!" The old lady took a look at Yao'er and Zhang Fan.

Obviously, Zhang Fan is too young and the old lady doesn't believe it.

"Really, really, let me take your pulse, and I'll know what's wrong with you." For this kind of old people, you can't help but keep young people away, be old but not cruel, and be old and reasonable, which makes people like it.

Although the old lady doubted, she still put out her hand. For this kind of old man, you say biochemical examination, blood routine and CT, she may not believe it. Maybe she is afraid of spending money or cognition, but if you give her a pulse, she is absolutely willing.

In fact, Zhang Fan will call a fart pulse. When I was in college, I studied Chinese medicine. I not only took elective courses, but also learned a Sijunzi soup. But what is this thing? Zhang Fan doesn't know. At the

beginning, the teacher fooled things, and the students fooled things.

Zhang Fan pressed on the old lady's pulse. In fact, he just estimated the pulse. When he said the number, he was a little boastful.

But as a doctor, I still have some skills in seeing people.

Under the old lady's bed, there are urine cans all the time, and there are sons and daughters all over the floor. This kind of old man with many sons and many women, let alone others, can't control his urine holding muscles when he gets old. In addition, the decline of intestinal function in the elderly leads to constipation.

"Old lady, your disease is not serious, but it will become a serious disease without treatment."

Zhang Fanyi said that the old lady's eyes were round, but she didn't speak. The old lady was also a schemer when she was young.

"You see, you usually get up at night, and when you say pee, you have to pee immediately, which can't be delayed at all. Also, sometimes you can't take a shit once a week, right? "

"Yes, yes, you are better than pockmarked Wang!"

"Do you listen to me?"

"Listen, how can you not listen. You are a great doctor! "

Hi, I'm a big doctor at this time, and I don't dislike Zhang Fan's youth.

"OK, that's good. Shall we look at your wound first?"

Zhang Fan said with a smile.

"You see, they can't. You're not as big as me. Just look at it. They can't. " The old lady put her mouth to the foreigner and shook her head. Anyway, she just wouldn't let the foreigner see it.

"OK! It's my honor for the old lady to trust me. " Zhang Fan smiled and stopped the old lady's anxious little son.

Zhang Fan wants foreigners to go out. Foreigners are not willing to protest, "privacy, understand?
PersonalPrivacy

"Zhang fancai won't get used to them. You're here to learn, not invited by Lao Tzu.

Zhang Fan wanted to untie the bandage. Jiang Qinqin hurried forward, "Zhang Yuan, I'll come."

"OK, you come!" Zhang Fan didn't say much. Circle by circle, the white bandage slowly began to untie. Then slowly, the gauze finally saw the yellow exudate and brown blood on the gauze. Then I saw the true face of Lushan Mountain. The huge breast, even though it has been slightly shriveled, is still hanging on my chest like a big pocket.

Jiang Qinqin, who was unprepared, could not close her mouth when she saw such a large breast suspended under her navel. Even she used a feeling of looking back and taking out her chest. Because of surprise, the hand trembled a little, and the gauze stuck to the wound was pulled.

The old lady took a breath of air-conditioning in pain. The soft meat in front of the chest had thin skin, and then it was fried again. It broke, and the softer meat was exposed.

This pull really hurts. Men may not imagine, but those who have undergone foreskin surgery can realize it.

This pain, how to say, is like licking your tongue on a steel pipe at minus 20 degrees, then shaking your head and pulling a layer of skin.

"Be careful, you can't do this at this time." Zhang Fan is a little angry and his tone is not good. Jiang Qinqin's face turned red and his eyes were watery.

When the girl entered the hospital, there were people at home. The Department generally accommodated her. I wanted to show my face, but

Moreover, it was said by Zhang Fan, which made the girl a little sad. She was a little like Wang Yanan who had just entered the hospital. She had not been beaten. It would be better to beat her several times.

"Don't frighten the girl, don't frighten the girl."

To tell the truth, people are getting older and more confused, and some are becoming more and more smart. The old lady is the second kind. Although she has never seen the world, she is sophisticated and clear in her mind.

Zhang Fan didn't say much. He took the gauze in Jiang Qinqin's hand, and then took a needle and sprayed it on the place where the gauze touched the wound.

Half an hour later, the connection between the gauze and the wound finally softened. Gently untie it. At this time, Zhang fancai seriously saw the wound.

"How long has this been?"

"Three days?"

The place of breast scald is blackened, and there is pus.

Because the breast is rich in fat, and fat is particularly prone to liquefaction and infection. Because it has high energy, not only adults like it, but also bacteria.

A piece of fat, a piece of muscle, the fastest infection and corruption is fat.

The old people's waxy yellow and shriveled mammary glands, like those blasted by artillery, are grotesque, showing flowering cracking.

Although the skin is waxy yellow, the fat without infection is still milk (a) white (a) milk (a) white, and the front end of the wound is different.

Red and black blood clots mixed with infection, like yellow cheese half melting and half not melting, hang on the breast, really like a thick liquid secreted, hanging on the breast. It's really a feeling that people can't help sticking out their tongue and licking it.

In particular, the red and black blood clots are mixed above the white fat, and then the top is decorated with a half melted and crumbling cheese, which is then placed on the breast larger than the Pu fan.

Darling, it's so weird.

Moreover, what makes Zhang Fan frown most is the old lady's milk (a) glandular peas, which directly went into the oil pan. Originally, there was chapped skin on the peas, fried, and then mixed with exuded oil. It's really like a fried chicken rice flower with too much oil.

The old lady was a little unnatural at the beginning. When she looked at Zhang Fan really like a doctor, she was calm. Lying in bed, one hand is holding Yao'er's hand and the other is holding his eldest grandson's hand.

Then a posture that life is enough!

"Disinfect first and get the dressing change plate!" Zhang Fan said to Jiang Qinqin.

Then he said to the old lady, "old lady, I'll wash my hands."

"The operation is difficult!" Out of the door, Zhang Fan said to Lao Li and Li Cunhou.

"Yes, it's not difficult. How can it be an observation operation!" Lao Li said, but what he thought was, "do you think it's easy for me to find such a patient!"

Chapter 1342

Debridement and dressing change are very important in surgery. Many hospitals, especially doctors, are lazy. They will let their interns do debridement before operation, and then infect after operation. They can't find the reason for his head breaking. They also say that they are angry about taineng!

It's not too much to pull out and shoot such a doctor. Zhang Fan took the dressing change plate brought by Jiang Qinqin and began debridement.

A lot of people estimate that they haven't seen the dressing change. The three major dressing changes will be life. One is diabetic foot. Every morning at half past eight, the doctor takes the scissors knife, the coarse gauze, the iodophor hydrogen peroxide, the new bromine, and the salted oil gauze.

There is gangrene, and the last one is fat liquefaction. These three major wounds are not only headache for doctors, but also quite uncomfortable for patients.

For example, the debridement of fat liquefaction is like wiping the nose of a snot king. Take gauze, wipe it bit by bit, wipe yellow pus bit by bit, and then pick up scissors to find new granulation tissue.

To tell you the truth, the wound of this fat liquefaction infection is not easy to clean up, but the old lady's is too surging. It falls down to the belly button, which can directly say forever!

Moreover, the old lady is too old to move too much, otherwise the old lady will be in pain, excited and have heart failure, which will be nonsense.

Zhang Fan took the gauze and gently, really, he didn't do it so gently when he rolled Shaohua. Once he enters the working state, Zhang Fan is obviously different. When Jiang Qinqin was still immersed in how big it was, Zhang Fan had been absorbed in changing the dressing.

People are like this. People are easy to gossip and idle people. After debridement, Zhang Fan said to Li Cunhou with sweat on his forehead, "prepare for surgery."

"Good!"

The old man was unlucky. He squeezed the cheese when he was old, but when his bad luck reached the extreme, it changed again. He was invited by Lao Li to tea, but he also used the latest technology for treatment, and it was free.

This new technology is unknown in other fields, but in medical treatment, to be honest, sometimes it may not be safer than the old technology.

Many people pursue a new drug in treatment. In fact, many new drugs, especially those that have been on the market for five years, should not be pursued as a last resort.

This thing is the same as you go to the bathroom to find a sister. People tell you it's a new sister, but you don't know if there's any disease. It's better to find an old sister and rest assured. The same is true for new drugs. Many new drugs have major problems almost five years later.

Although the operating room of the surgery department of the tea vegetable hospital is relatively advanced, it is several generations worse than that of the bone Institute.

Sometimes you have to admit that the effect is really different when the money is spent.

For example, in the current operation observation of the Institute of orthopedics, the doctors stand directly above the dome like operating room. They can not only see the actions of the surgeon, but also see clearly the assistant, anesthesia and the monitoring of various instruments.

On the micro level, the transparent dome can be enlarged to make the doctors see more clearly. On the macro level, the overall situation of the operating room can be observed, which is much more intuitive for the cultivation of doctors.

The operating room of the surgery department of the tea vegetable hospital is a high-definition camera facing the hand of the chief surgeon, which can only see a part.

In the surgery observation room outside the surgery building, not only many foreign doctors came, but also many female nurses in our hospital came. They are not obsessed with foreigners to see the bridge of their nose. In the frontier, to tell the truth, the market for foreigners is not very large.

Unlike some places, female college students are asked to accompany sunspots. Especially the nurses in the tea vegetable hospital, with the higher and higher status of the hospital, now people don't speak the local dialect of tea vegetable when they go out. Opening their mouth is Mandarin.

"We are a provincial hospital!"

"My God, it's really so big."

"Big is big, but it sags badly."

"God, I'll never eat papaya again."

It is said that there is a breast as big as a cattail fan. Many female nurses came to see it. The head nurse in the operating room rushed away with a fake vacation, and then she also participated in the discussion.

Moreover, whether women engaged in medical treatment or not, they turn a blind eye to the legendary rich and fierce food of papaya, even if doctors and various nutrition books say it is useless. This thing is the same as fortune tellers. People have their own answers in their hearts.

The answer is right. It's divine calculation. The answer is wrong. Bah! swindler.

In fact, there are five kinds of women's mammary glands, which are particularly prone to accidents. Obese people, especially those with two volleyball on their chest, also like to eat high-fat and high protein food. This kind of women have high estrogen, and fat will secrete estrogen. If estrogen is higher than a certain level, it will continue to stimulate the mammary gland, and the risk of cancer is quite high.

In addition, those with this disease in family history must be checked regularly. There are those who marry late, have children late, and are not breastfeeding. Many female celebrities, especially unmarried and unborn female stars, often suffer from breast cancer. Because of pregnancy, fertility and lactation, they produce progesterone, which inhibits estrogen.

There are women who have had multiple abortions. Don't think it's okay.

A group of women looked at Zhang Fan. After starting the operation, they had gossip and were still holding hands. If they didn't look good, they walked away. The head nurse couldn't stay if she wanted to stay.

There is still a difference between nurses in the operating room and nurses in the non operating room, because after the operation, it is different. The display is full of yellow fat and red blood. And the black burnt chicken rice flower protected by Zhang Fan.

Ordinary women's breast surgery is generally great, that is, embroidery on Dongshan steamed bread, and the steamed bread is still fixed, the position is unchanged, and the disinfection area is so large.

The old lady's is different. It's just like opening a door. It's not only opened up and down, but also turned left and right. Therefore, the disinfection range is large. It's still a sports war during the operation.

Zhang Fan is the main knife, Li Cunhou is the first help, and Jiang Qinqin is the second help. Breast surgery generally has two doctors, because no matter how big, there is no operation space. The steamed bread is already crowded when the two heads are facing each other.

The old lady's doesn't matter. Another one. The four doctors are all right.

"Pick it up!" Zhang Fan said to Jiang Qinqin.

Jiang Qinqin immediately stepped on the small bench. Originally, the girl was 1.7 meters tall. After standing on the bench, he lifted the old lady's breast with both hands, and then let the breast hang in the air.

This operation looks simple. If the breast is heavy, can it have a pig's head? Certainly not, but this operation, suspended in the air, may be nothing for more than ten minutes.

But if you carry it for half an hour, and you can't shake yet, you must keep a steady trace of it, which will kill NIMA.

Who is Jiang Qinqin? He is beautiful. There are many people chasing him. He has good conditions at home. When he goes out, he is just a small Kun bag. It is estimated that there are licking dogs chasing him to give him advice.

But now, standing on the small wooden bench, Jiang Qinqin holds his breast in both hands.

At first, she didn't care.

Ten minutes later, he began to bite his teeth, as if he were suffering from some pain.

Fifteen minutes later, the girl's teeth bit her lips, and her hands began to shake a little.

Twenty minutes later, the girl's tears ran down her eyes.

Not to mention tears, the itinerant nurse stood behind her with gauze stained with jieermin, shed a drop and wiped it immediately. For fear of dripping on the operating table and polluting the operating area.

"Brother Li, you replace it."

Zhang Fan didn't lift his head. He knew that Jiang Qinqin was dead, because his breast began to tremble.

Lao Li wanted to replace it early, but he knew Zhang Fan's problem. There could be no objection on the operating table, not even suggestions.

Although very overbearing, but with so much cooperation, he knew that Zhang Fan had this strength.

Therefore, over time, the doctors who have surgery with Zhang Fan now know that if you can't talk, don't talk.

Jiang Qinqin, who has been replaced, doesn't own NIMA anymore. It's like a Zombie dance. It's similar to the girl who helped her boyfriend roll all night in the Bangzi country movie.

"You are still young and can still do this job. If you don't work hard and improve your level, can you still do this job in ten years? Can you still do this job in twenty years?"

If you don't want to work hard, change your unit early. Go to the health bureau and the government. I can help you. "

Zhang Fan glanced at Jiang Qinqin and whispered.

On the operating table, she just endured her anger and said, "don't look down on people, I don't believe I can't do it."

"Ha ha!" Zhang Fan smiled gently and said nothing more.

Jiang Qinqin looked at Zhang Fan and scolded himself: "you are a promising man. How did you think he was handsome before? People are more black hearted!"

In fact, Zhang Fan is ready in his heart. He waits for an opportunity to give a blow to the doctors who don't want to make progress and fish.

It's wrong to kill without teaching. Anyway, it's up to them.

Zhang Fanshun has cleaned up all the necrotic skin and skin in a circle with muscle disorder.

At this time, the breast looks like a flower watermelon, "transplant material!"

Because this material is like black fungus, it needs to soak hair before surgery, and it needs to be leveled in advance during surgery and before doctors use it. It's difficult not to train professionally every day.

Lao Li said hello to the nursing department and wanted three full-time nurses for skin transplantation.

At the beginning, there were not many nurses who signed up. Everyone thought Lao Li was a migratory bird and might fly away one day.

Moreover, this operation is very difficult. It looks like a mask, and it doesn't have the toughness of mask. For example, after the operation, the doctor said to have a triangle, a few centimeters, a few centimeters triangle. The nurse needs to get ready.

If you don't pay attention to it a little, it will be broken, just like a strong man with ultra-thin. So there's too much pressure. I want to go, but not many people have confidence.

As a result, now the nurses who hesitated to sign up and didn't sign up regretted it.

These three full-time surgical nurses have high income, and Lao Li often flies around the world with three people. Most importantly, they now publish nursing papers on skin allogeneic transplantation with

Lao Li, and the core journals are soft.

So, sometimes life is too bullshit. Choose the right, hard work is refueling, choose the wrong, hard work directly is to show your good health.

Zhang Fan took over the transplant material as thin as a cicada's wing. This is the time to prepare to show the technology.

When you have an operation, think about it carefully. It's really the same as making an appointment with a sister. You meet first, then invite a guest to dinner. If it's eye to eye, then get some wine, and then spend the money you usually hate to open a good room. Finally, it's actually three times.

And surgery, often the same, has been prepared for three or four hours. In fact, there are only a few serious joint moments.

In the observation room outside the operating room, the doctors watching the operation opened their eyes wider and wider.

Chapter 1343

What is the difficulty of the operation?

Different people have different opinions about this thing. Three surgeons come together to discuss this matter and can fight.

In fact, according to Zhang Fan, this thing is like doing technical work, such as making a wooden bench. The material of a simple four piece bench is the same, and the difference made by the three carpenters is not big.

However, if you want to make a shelf bed, such as an antique, with a servant girl standing next to push her ass, different carpenters will definitely make different things.

Some of them are useless. They are as long as the oars and rudders on the old ship are short of oil. The servant girl hasn't pushed yet, and the bed has sounded. According to people's opinion, this thing is a defective product with poor alignment.

If anyone really wants to buy this bed, it is estimated that the aunts and uncles upstairs and downstairs can stick it on the wall to listen to your fight.

The shelf bed made by some carpenters will not make a sound even if it is pushed by three big men, let alone a little servant girl.

This is the technology, this is the difficulty.

In fact, the difficulty of surgery can be compared in such a simple way. Although it is not comprehensive, the artistic conception is right.

After Zhang Fan's operation completed the peripheral tasks, he began to prepare for the final sprint.

Is peripheral task important or sprint important?

It's important. If this thing has to say that it's important, it's a raise.

It's like seeing someone else's black lace without kissing and touching. This is a truth. You have to say compulsion. NIMA is non-human. Even if dogs don't do this, dogs will smell each other and see if they lick their ass after they shit.

"He did quite well in the periphery of the operation, and the reserved space is also good. Why do you think he is so powerful as an orthopedic doctor?"

The two doctors in Jinmao were chatting with each other. These two people are very special. Although he is a doctor, he seldom sees a doctor, but he specializes in beauty needs. To put it bluntly, he is engaged in beauty. He became Pfizer's industry consultant.

This is unreasonable. Although their treatment can not be compared with that of regional managers, it is much worse than being a cosmetic doctor.

Their job is to evaluate the new technologies and drugs related to beauty all over the world, as well as the clinicians who need to be blended.

Those who know doctors must be people of the same profession. Many people criticize the drug rebate in China. In fact, it is the same all over the world, because drugs, a special commodity, rely too much on channel sales. For example, a doctor's word is definitely better than advertising.

That's why when selling health medicine films to deceive the elderly, they all put on white coats and compassionate faces, and claim to be an old military doctor, specializing in the treatment of incurable diseases!

Pfizer had a coquettish operation that year. People wantonly distributed clinical test fees in the richest state of Jinmao. This is not a clinical trial, it is a clinical test. What is a clinical test.

For example, when the new rotten fruit mobile phone was launched, people's drug consultant took it to the doctor and said that our company recently put a new drug app on this mobile phone. Please input the patient's situation after taking medicine on this mobile phone!

Pfizer spent more than \$10 million on such a clinical test and made a profit? Profit of 300 million!

After the melon broke out at that time, it was said that the shares of some companies that said that luxury goods were not luxury goods, such as rotten fruit, fell a lot. Old Joe almost died of anger. Zhennima people sat at home and the pot fell from the sky. It is estimated that old Joe didn't trust the hospital and pharmaceutical enterprises, which has something to do with this matter.

If Lao Li wanted to enter the market of Jinmao country, he had to find a big man to cooperate, so Pfizer found the door.

The treatment cost of skin all over the world, in fact, scald is my brother in front of beauty.

Let's talk about the simplest thing, such as Feng fierce surgery. This thing is very simple when Feng is abundant. Cut a small hole under the armpit, insert silica gel into the breast along the pectoralis major muscle, and then it's over. How much does the operation cost?

This thing is hard to say. It depends on the IQ and the thickness of the wallet. For example, if the star does this operation and doesn't cut you hundreds of thousands, I'm sorry for the enlarged cup.

But this thing has side effects. Many people have done it. After standing up for a long time, they regretted it. Because they discovered the omen of breast cancer, they came to do the operation.

It's hard to get it. The operation is not very difficult, but it costs a lot of doctors. One operation should be done for at least three hours.

But what about the cost? The third class hospital can't exceed 2000!

If you dare to ask for more, people will dare to report you to the Health Bureau.

"Well, the level is very high, and the difficulty is not very great. If this kind of peripheral surgery is popular, it is relatively simple. Moreover, the patient Professor Li is looking for today is still a special patient. Look at the skin and adipose tissue. The damage is very serious. "

The two people chatted in a low voice. They still had a unique vision.

"Well, now it depends on the operation of the material. It is said that the material of allogeneic transplantation was almost abandoned at the beginning. It was the young doctor who improved the operation that succeeded."

"It's said that's it. It's beginning!"

Not only Pfizer's consultants, but also the beauty doctors of the four-star hospital in Bangzi country.

Sometimes, you have to sigh that the attitude of the four-star company to serve the people of Bangzi is really good.

There is no one in his big company who doesn't even give up serving the public.

The two doctors in Bangzi country discussed different things again.

"Smecta, do you think this material is suitable for neck skin?" The young doctor asked the old doctor.

"Well, look at the fit!" The old doctor is very serious. His eyes have been staring at Zhang Fan's hands.

"Smecta, it seems that the doctor's technique is different from that of our ordinary doctors. It's a little similar to your operation. "

The young doctor said again.

"The company may have committed adultery. I invented this technique first!" That's what I said. In fact, I shouted loudly in my heart: "Omo, Omo (MOM), I should have done this, I should have done this!"

.....

"Material, round, two pieces with a diameter of 3mm, tiled, with a pedicle, with a pedicle length of 1mm!" When Zhang Fan was about to finish the peripheral surgery, he began to give medical orders to the instrument nurse.

On the operating table, the doctor gives instructions to the nurse or anesthesiologist. These words are all doctor's orders and must be recorded. In particular, for some double height operations, high-risk and difficult operations, there is often a nearby itinerant nurse who specially records doctor's orders, not only doctor's orders, but also time.

What time did the doctor tell you to do? What time did the doctor tell you to use? This record is not a double signature, but a three signature. Even doctors, nurses and anesthesiologists should sign.

The instrument nurse quickly and carefully began to prepare materials. This material has molds and adjustable molds. Even so, it is troublesome to operate, because this thing, how to say, is like the layer of milk (a) skin when people drink milk.

If you don't pay attention, this thing will become a lump in milk (a). The nurse is careful. She is definitely more careful than when she puts a condom on her boyfriend. There is a problem with the condom. It's amazing that a 15 yuan Yunting can solve it.

But if this goes wrong, a material with an area of about 5x5cm will cost tens of thousands. Although you won't let the nurse compensate, you make more mistakes, and Lao Li won't let you do more in this position.

He took it and put it in the bend with a tail. If the material is the same as a big tadpole, Zhang Fan said to Li Cunhou, "Lao Li, don't shake when you lift it. After the operation, you should consider an instrument to fix the breast. It can't rely on people's hands alone."

"Yes!" Li Cunhou didn't say much. He's sweating in his tense ass.

Jiang Qinqin listened to Zhang Fan's words, rubbed his sour hands and turned his eyes at Zhang Fan.

Picking up the material, Zhang Fan's eyes changed.

Sharp, can be described as sharp. The left hand holds ophthalmic forceps, and the right hand still holds ophthalmic forceps. Two small forceps gently clamp the material as thin as cicada wings and cicada milk (a) skin, and gently open it.

Zhang Fan held his breath. If this thing shakes a little, it will tear. Therefore, the stability requirements for doctors' hands are still relatively high.

This kind of surgery, smoking and drinking, elderly doctors were directly discouraged at this step.

Then gently face the blood vessel on the repaired damaged skin, "release the vascular clamp!" Zhang Fan's speech is a voice that can no longer be pressed, just like talking in his stomach.

Jiang Qinqin quickly released the vascular forceps. When the vascular forceps were released, the vascular mouth was like a patient with enlarged prostate, puffing and puffing blood.

Because it was a small blood vessel and had been clamped again, the mouth of the blood vessel trembled and began to spray blood. Zhang Fan looked at the blood vessel and waited for the blood vessel to stop shaking and the bleeding had been stable. At the moment when the previous blood began to solidify slowly, he immediately spread the material on the wound.

Moreover, the moment Zhang Fan put down the material, he immediately clamped the pedicle of the allogeneic transplantation material with a vascular clamp and stuffed it into the blood vessel.

This action must be done at one go, otherwise the material will not survive.

You can think about the blood vessels on the breast. This kind of transplanted blood vessels can't be too large. If the blood vessels are too large, there are more factors in it, especially more combat factors. If there are many things, we can take the materials of allogeneic transplantation as the enemy.

The blood vessels can't be too small, too small. After the blood vessels are frightened, they may close themselves. Therefore, it's not big or small, that is, in a quarter of the blood vessels of the earphone cable, they are inserted into a pedicle after spitting blood smoothly.

This insertion is very particular. It can't make blood vessels swell and shut them up. This is the technology.

Chapter 1344

"Awesome!" The two advisers of the golden Mao Kingdom saw Zhang Fan put a pair of pliers into the blood vessel, and their eyes were round.

In general, this treatment is an assistant holding pliers to open the blood vessel mouth. Then let the main knife aim at the blood vessel and insert it. This kind of insertion should be slow, and always be ready to have a very good patience.

Many times, you may not be able to plug in once, but many times.

Because of this thing, the blood vessels at this time keep bleeding. This kind of thick and thin capillaries bleed, which is even much smaller than the mouth water for an adult. For the pedicle of allogeneic transplantation, it is like retrograde in a flood.

If the position is a little bad, the already weak hoof will be tilted by this torrent.

This is like a new couple. Even if the bride can stand upside down and split, the groom is born with noodles and can't harden.

So it's amazing that the bride doesn't need to stand upside down and split, and the servant girl doesn't need to move her legs.

"Is your technology accidental?" The golden hair consultant whispered to his colleagues.

"What do you say? You don't see that the main assistants have gone to lift the breast. The female doctor around him even looks unfamiliar with the way of grasping pliers. Do you think it's an accident? Doctors who can improve surgery are not understandable to ordinary doctors.

I think the technology has matured and the material has matured. Even if other doctors do it slowly, the doctors who invented the operation have begun to show the operation, and other doctors will not be too bad. "

"Well, the technology is mature. Take a look, take a look, and don't rush to a conclusion."

.....

Chatter without stop, the young doctor as like as two peas, "teacher, look, you see, is this slant cutting method exactly the same as yours? Though he is inclined!"

Bevel cutting, in a simple and popular way, is like a table tennis ball, which is smeared with ink. After you wipe the front, you don't have to turn the table tennis ball over. You just wipe it with a rag from the front.

The side can still be seen, while the inclined cutting can't be seen directly.

For doctors, the requirements for this technology are quite high. Many people can do side cutting, but too few can do inclined plane cutting, especially blind area cutting.

When Zhang Fan hasn't inserted it yet, the older doctors in Bangzi country can accept the praise of young doctors. Although they know what's going on, who doesn't like being licked on their hips.

But after Zhang Fan's precise insertion without assistance, the older doctor Bangzi, the world collapsed.

In the past, when Dr. Bangzi inserted, his assistant did not do it well. He could get angry on the operating table and even scold his assistant on his knees. Really, it's no exaggeration at all. Sometimes, if he could insert it within three times, he could hold his head up proudly, like the first in the universe.

But today, at the beginning, he was still slowly comparing with Zhang Fan in his heart. Although it seemed that he was a little comprehensively suppressed, these can catch up.

When he saw Zhang Fan plug in today, he peed. He knew very well that even if he peed, he couldn't do Zhang Fan's level.

How powerful this is. This insertion requires too much from timing, personal talent, personal conditions,

understanding of surgery and perception of surgery.

"Look at him, ha ha, he doesn't need an assistant to open his blood vessels. How can he..." the young doctor couldn't go on, because he saw it, because he also knew it. NIMA Zhang Fan broke the pot and couldn't blow it.

If you blow again, NIMA will be shameless.

"Well, master smecta, I think his operation is illegal. This operation does not comply with the surgical manual. The surgical manual says that he needs an assistant..."

"Shut up, 78%..." the older doctor turned his evil fire on the licking doctor.

Anyway, it means you silly fork. Don't be like a crow.

Doctors in other hospitals in China looked at Zhang Fan's technique and said, "this NIMA is too unreasonable. Why is this thing softer than noodles pounding the sky and pestle the ground like a golden cudgel in Zhang Fan's hand! It's unreasonable. "

Finally, someone put Zhang Fan in an unreasonable position.

Li Cunhou looked at Zhang Fan's operation and carried the breast in his hand, but the corners of his eyes were very proud and wrinkled.

Although the area of this skin transplantation operation is small, because of the elderly, the thin breast skin and the large amount of fat, the difficulty of the operation is rated as class A. Pfizer's evaluation consultants and team need the operation to be class A.

Originally, this operation should be carried out in the capital. After all, it is the capital of China and has great influence. At present, there are many people who can do it, but only Zhang fan can do it beautifully and amazingly.

So Lao Li had to bring the golden hair team and the doctors of Bangzi country to tea.

Now, others don't know what to think, but Lao Li is cool.

Especially when Zhang Fan inserted it, he was really happy, and the pores of his whole body were enlarged. When he was in the United States, he was bullied by golden hair and refused to let him enter some operations. Now, he can finally shout with his head held high: look, let's see whether Lao Tzu is hard or not. At the beginning, you didn't see Lao Tzu. Now, can you climb up to Lao Tzu?

Of course, this is his own idea.

Just as Zhang Fan was undergoing surgery, a male star leader of the China Institute of digital biology also

set off for tea.

This unit, like the unit that buys ice cream in 504, is not exposed at ordinary times. Jumping out at a critical moment can frighten people.

"The allogeneic transplantation technology has matured, and the FDA has passed the preliminary review. Now it is waiting for big enterprises to lobby."

"How about this technology? Compared with the materials we have developed ourselves, will it work?"

"The idea of this material is simulation, while we are substitution. If we say its disadvantage, it is estimated that the later use cost is about six to seven times that of our materials, and the operation is relatively difficult, which requires more doctors.

Even in the short term, a group of doctors must be out of work for professional training! The price is huge, leader! "

The one star leader of the Institute of biology didn't know which leader to report to on the phone.

"Let's talk about the advantages. Since you say this material is so unbearable, but you are in a hurry and even go to tea vegetable before you can apply for the report, it seems that its advantages are also obvious."

"Indeed, the disadvantage is that it is expensive and difficult to operate. But its advantages are also quite huge. Firstly, after using this material, there will be no rejection, and there is no obvious scar after operation. It is not surprising even if you don't look carefully.

For soldiers who are burned or injured by explosion, this material is better than our own developed material. I don't know how many grades. An immune rejection can make our soldiers suffer.

Leader, we can't let Jinmao or Bangzi country take this project away. "

"Oh? Tea vegetable, is the surgeon Zhang Fan? "

"Yes, this material was almost stillborn at that time. Because the operation was too difficult, no one could use it at that time. Later, it was improved by Zhang Fan. Now almost all the follow-up operations of allogeneic transplantation are carried out in tea. "

"OK, I see. You contact first."

.....

The transplanted material was successfully applied to the breast. The fried and blackened breast now looks so big, but it is no longer chicken rice flower, and even a little cherry powder.

Really, if it's news, it can be written like this. What material can turn Grape Black into cherry powder, and what doctor can make 90 old women scream!

But to be honest, because after a large area of allogeneic transplantation material is applied, the fried breast on this side can definitely laugh at the other side: look at your dark.

"Dilate blood vessels!" After applying the material, Zhang Fan gently crossed his hands in front of his chest and said a word to the anesthesiologist.

"Good!" The director of Anesthesiology immediately began to use vasodilators.

When the vasodilator drops into the body, walk with time, five minutes later.

Not only Zhang Fan, but also the doctors in the observation room stared round at the breast raised by Lao Li.

As time goes by, the mammary gland changes from gray to pink slowly. From the beginning of the faint powder, slowly and directly, all the transplanted skin began to pink.

This shows that the blood flows freely and happily in the transplanted material.

"BIU special service!" The two consultants of Jinmao shouted directly with red necks. What they saw was not pink, but green paper money.

The young doctor in Bangzi country whispered, "why don't you change all the transplant materials? It's like patching the breast!"

The old doctor's face was normal. He stood at attention with both hands and looked at the breast in the display. What he didn't know was that he thought the old guy was watching their country's ethics film.

.....

"Talk to Professor Li quickly and win the patent as soon as possible!" The consultant has begun to call the regional manager.

"Dean smecta, I apply to study in tea vegetarians!" The old doctor called his hospital despite the stunned look of the young doctor around him.

The boss of the tea vegetable government also received a call from his superiors and accompanied the leaders of the digital biology institute to tea vegetable.

Ouyang also got a call.

Ouyang answered the phone at attention, "please rest assured, even if all the family assets of the tea vegetable hospital are emptied, I will leave this patent in the tea vegetable hospital. Please feel at ease and ensure the completion of the task. "

"Well, what a legendary European Academy. I'm so angry. How can Zhang Fan's phone get through?"

"Today he was in surgery, because he was watching the operation, the phone was turned off!"

"He won't have a problem!"

"Chief, don't worry, there will never be!"

Ouyang almost patted her chest and hung up the phone. Ouyang turned to look at the inscription on the office wall. She sorted out her clothes, and then went to the operating room with her phone as seriously as going to the battlefield.

"What happened to the European Academy? I haven't seen the European Academy so serious for a long time. " When the medical officer saw Ouyang, he said hello. Ouyang didn't even move his eyes as if he hadn't heard.

"I guess I went to the government to quarrel. Every time I went to the government to quarrel, the European Court was like this!"

Chapter 1345

Zhang Fan in the operating room doesn't know yet. Because of this patent, Jinmao, European and American enterprises and even Jinmao's military burn research center have been moved.

The hospitals in China and the hospitals in the capital city of magic are very powerful, but in early years, several major digital hospitals did not boo them.

Although in recent years, it seems that the reputation of digital hospital is not so big, and even some charlatans don't pretend to be old military doctors, in fact, digital hospital is still awesome. Usually they play soy sauce. They are usually sleepy, like staying up late playing mahjong every day. Only at the critical moment, they find that Oh, this guy is still sober.

And the Military Research Institute of Jinmao military hospital is also awesome. If some research institutes of others are open to accepting patients, it is estimated that they will have to belong to others because many disciplines are the first in the world.

Many burn standards in the world, and even in the burn department of modern medicine, are formulated by the golden hair Burn Research Institute of others. You can think about how awesome it is to be able to formulate a discipline standard.

Others aside, if you can set the standard of tofu size and others have to comply with it, you can't run away as an academician, and you will never be criticized like an academician of tobacco and wine.

And Jinmao's Burn Research Institute is so awesome, does it share technology? No, many other people's data are confidential. It is said that the public time is not calibrated, which is even better.

The most disgusting thing about NIMA is that, for example, huaguoshanhua succeeded in the improvement technology of pig skin, and it was necessary to prepare to cooperate with Baiyun Mountain to produce this material. At that time, almost the capital location was determined, and even many countries wanted to join in.

The Army Burn Research Institute of Jinmao, poof, released the transplantation paper of Tilapia Skin! Even the surgical data were released.

Then other countries that wanted to join China went to Jinmao for various reasons. What can you say? If China does not improve and move forward, it is estimated that Jinmao will never release the mature tilapia transplantation technology in this allogeneic skin transplantation.

It's so annoying, especially in recent decades, Jinmao has fought everywhere, and their data are confidential. Do you want to know? no way. For example, in Mayo's key operating room for spine and joints, doctors of non golden hair descent cannot enter, while people's Burn Research Institute, as if it were not from Anglo or Saxon descent, cannot directly participate.

Listening to Jin Mao's incessant clamor, medical care should be shared globally. Medicine cannot be monopolized. Monopoly is a crime. If you really believe them, you will be deaf for three years.

In fact, Li Cunhou came to China because he was discriminated against and was excluded by his brothers.

However, the old boy still has two brushes. He didn't think that the allogeneic transplantation material he finally got is the best at present. Although there are many disadvantages, the operation is difficult

and the material cost is expensive, this thing is the best allogeneic skin transplantation material under the current conditions.

Pfizer has the highest income among pharmaceutical companies in the world. Why is this guy so awesome? Look at other people's drugs. Early antibiotics, such as oxytetracycline, which we heard and saw in those days and now fed to pigs, made a lot of money.

Then when sildenafil was listed, Pfizer became the world's leader and merged several pharmaceutical companies that were no worse than it. What the Chinese pharmaceutical companies were doing at that time was a joke.

When sildenafil was listed, the world was suddenly full of love between old men and girls, or true love. A survey company conducted a survey and found that after sildenafil was listed, the marriage age between men and women suddenly opened about five years old.

At that time, the Chinese pharmaceutical enterprises did not mention their names. When they saw that Pfizer made a lot of money, they wanted to intervene and couldn't get in. This thing doesn't say whether people rely on the lower three ways to make a fortune. Even if they rely on the lower three ways, it's also their ability.

There was a change of thinking in Chinese pharmaceutical enterprises. Maybe the chairman hugged a sister at night. The sister thought it ugly. He was unhappy. Then he suddenly jingled like brother Yixiu. He had an idea, and then directly came up with a female sister!

The medical world all over the world was in an uproar.

Apart from others, women and men are very different. Men wear tight underwear. Sometimes they will hold the sky high. Male (a) organs are directly related to male (a) sexual star peaks. It can be said that if you let a man stare at a sow and stimulate him, he will also respond.

Women are different. First, women's excitement is not necessarily related to their organs. You are just taking drugs to dilate blood vessels, which makes people swollen like a trumpet flower. People don't feel it just don't feel it.

Therefore, sometimes, you have to admire the brain circuit of the boss of Chinese pharmaceutical enterprises. It's too strange.

Pfizer then got another antibiotic Shupu deep, actually cefoperazone sodium and sulbactam sodium, which can be said to be the antibiotic with the highest market share. There are many, many, but generally speaking, these drugs are the drugs that people can eat with a knife from the sky.

However, in recent years, their situation has become more and more bad. At present, the patent period of a kezotinib drug for the treatment of small molecule lung cancer is still relatively long and can not be replaced by other drugs. Almost all the patent periods of their leading products have expired.

Why does GlaxoSmithKline of Mishima attach so much importance to Zhang Fan? Even Ms. Zeng, President of China, is as quiet and resentful as a child's daughter-in-law in front of Zhang Fan, because they don't have leading drugs now.

Without the protection of the patent period, GlaxoSmithKline of Mishima has slipped out of the top ten in the world from the top three in the world at that time, and is still falling.

Once the drug patent expires, we have to mention Chinese pharmaceutical enterprises here. The third brother's drug imitation is that children play with mud to paste their little birds. Others smile and don't care.

Chinese pharmaceutical companies are different.

Once involved, the price of drugs is falling everywhere. As soon as the non patent period of blue pill sildenafil arrives, Jinmao Pfizer is scared to death, because Baiyun Mountain is involved and Baiyun Mountain has done enough.

Not only did you buy brother Wei's name in China, but even invited the Nobel Prize winners who studied the drug to their own enterprises as the director of the R & D center, which means that our great brother is real and can make people pestle the sky and the earth.

Pfizer has been in a lawsuit with Baiyun Mountain for nearly ten years in order to prevent big brother Wei from listing. In this way, from the price that only the rich and leaders could afford in those years, brother Wei can be used by any uncle who likes to visit beauty shops.

Even some big men ate and ate a handful. They wanted to revenge. As a result, Quan NIMA turned into a Smurf.

Therefore, the profits of pharmaceutical enterprises are amazing.

That's what Lao Li developed in China this time. Otherwise, it's not certain that Lao Li will have a car accident one day.

Ouyang took people into the operating room. Originally, the old lady heard that foreign doctors and experts came to visit. She was very proud. Hum, my mother is now developed.

But after answering the chief's phone, she saw that everyone thought it was a thief who came to steal her patent.

For example, Ms. Zeng, at ordinary times, Ouyang sometimes talks about beauty with others. Although Ouyang sometimes doesn't even wipe Yu Meijing, she still talks about lipstick brands with Ms. Zeng for money. She knows an egg!

Now, Ouyang's black face, like a dog's face, turned over.

As soon as she entered the observation room of the operating room, she took out her mobile phone and began to swear, "the state pays you a salary. Is that how you protect the hospital? I'll get a wolf dog. It's more responsible than you! "

The director of the security office didn't know what he was doing " Have you been reported about the falsely high price of your shop in the hospital? No! Did someone find out about me and my logistics daughter-in-law? It shouldn't be! "

"Ouyuan, I'm wrong. Please criticize me! I'll pay attention. I'll never do it again. " Anyway, it's wrong. Admit it first. You have to have an attitude. This thing, especially within the established system, is sometimes not reasonable.

"Now, take your men and run to the operating room!" Ouyang looked at the people in the observation room with a black face. Sometimes there is a big difference between having a staffing and not having a staffing. If the security office has no staffing, Ouyang will never say so.

Because I take you thousands of yuan a month, you scold me like this, I quit. But the establishment is different. For example, why do some dare to slap their subordinates? Let them slap the aunt of the neighborhood committee. It's your life not to lie at the door of the government.

The people in the observation room and those who understand Chinese know Ouyang's and look at the little old lady in surprise. I don't know Ouyang. I thought the patients in the psychiatric department of the hospital ran out to make trouble.

Although Ms. Zeng didn't know what was going on, she still clanked in her heart. She felt that something was going to be bad.

She was suspicious and wanted to say hello to Ouyang with a smile. As a result, Ouyang ignored the plastic friendship and blocked the door of the operating observation room.

Before long, the director of the security office came with the people from the security office.

In the summer, the guards were armed, and they did not fire. Otherwise, even guns were brought. Although no guns were available, shovel handles, helmets, shields, and even summer police boots were put on.

"Clear the site. Irrelevant personnel are not allowed in the surgical building. No one outside the hospital can enter the operating room unless I sign and agree. No one is allowed to enter the current operating room of Zhang hospital without my consent. Inform all departments. Now the hospital is under control. "

You should make it clear who controls NIMA, but Ouyang won't care about this problem. In a word, no

one is allowed to contact anyone in Zhang Fan's operating room without my mother's order.

Ouyang is not worried about Zhang Fan. She is worried about Li Cunhou and his doctoral students.

Anyway, now they are all in the operating room. This trick is cooked in one pot. There is no way to go out.

And they are in the lead plate operating room. Except for the landline, the mobile phone has no signal directly.

Chapter 1346

"Zhang Yuan, slow down your operation. All the doctors in the observation room outside are watching your operation now. You do it too fast, people can't see clearly, and they think you can't do it!"

After the most difficult part of the operation passed, Lao Li Cunhou smiled and talked to Zhang Fan.

Zhang Fan tilted his lips and said in his heart, "you have a lot of shit."

Jiang Qinqin said in his heart "It's just you!" She wants to finish the operation quickly and get off the operating table. This operation is too painful. Every step from beginning to end was in her eyes, but she couldn't understand every step.

This is the charm of surgery. People who understand it naturally understand it. For example, like young women and girls, only hairy boys will call young women aunts and girls dear, while people who understand it will only look at each other and smile.

Jiang Qinqin was suffering like a pug, licking the soles of her feet across silk stockings, with gnashing teeth in itching.

While Li Cunhou was carrying the hanging breast, he longed again, "dig, Professor Li, your material is really good. We Pfizer's 10 billion will buy it!"

"Li sang, please accept my heartfelt kneeling. You must become a professor of our marukuo Northeast University."

"Professor Li, please accept my respect. Please be my teacher!"

Lao Li carried his breast. Although his two arms were sour like a young man who had been married for three days, he was happy in his heart. He imagined that a group of people would come up after the operation. How should he face it with an attitude and attitude?

Be reserved? But I've been reserved all my life. Do you want to be reserved?

Be proud? I wonder if Zhang Fan will laugh at himself.

Hey! A successful life is really difficult!

Just wear a surgical mask, otherwise Zhang Fan will see the glittering saliva around Lao Li's mouth.

Life is like this. You can see a person's true face most clearly during the ups and downs, but the question is, who has such a chance of ups and downs?

After reading for half a lifetime, he finally has today. Really, Lao Li can endure the pain and carry a half meter long breast. He is also a man with a city government.

Zhang Fan also found the abnormalities of Jiang Qinqin and Lao Li, but the operation was almost over, and he didn't say much. Jiang Qinqin's teeth are creaking, and Lao Li's eyes are full of fascinating gossip. He doesn't know how he chose such two assistants today.

"Oil gauze! Oil gauze!" Zhang Fan looked at Jiang Qinqin with oil gauze and said two words. Jiang Qinqin still stared at his breast in a daze.

Oil gauze is actually made after Vaseline infiltrates the gauze. The advantage of this gauze is that the adhesion is relatively small and the liquid secreted by the tissue can be absorbed.

Many young doctors often don't use oil gauze when changing dressing. They don't want to save money for the hospital, but to save themselves trouble, or they have a poor surgical foundation and don't understand the role of oil gauze.

As a result, when the patient came to change the dressing on the third day and removed the gauze, he cried in pain.

And the wound was stained and broken by carelessness.

In particular, if this kind of transplant wound is directly dried with gauze, it will kill itself. The original successful operation can not be done well, and finally it is destroyed because of a piece of gauze.

What Zhang Fan doesn't know is that Jiang Qinqin thinks of Zhang Fan as licking her feet and chasing him with a whip!

After sticking the oil gauze, start dressing.

In medical treatment, the simplest dressing is finger toe dressing, while long bone dressing is relatively difficult, because the dressing is too loose and ineffective. If the dressing is too tight, it will lead to poor circulation and osteofascial compartment syndrome.

The most difficult is the oval organ bandage.

Such as the head, such as crayon Xiaoxin elephant. These organs are the worst to wrap.

Some experts bandaged their heads, just like the ancient Thai pagodas layer by layer, not only beautiful but also reliable. The head wrapped by the novice can move a little. It is the Tema honeycomb directly, or the honey honeycomb dug by brother Xiong.

The crayon is a new elephant. This thing doesn't look big, but this thing can get bigger and smaller. So in order to save trouble, many doctors directly buttoned disposable paper cups and went to special bandages. In fact, this is also a technical improvement.

Zhang Fan's breast, like a milky white bamboo shoot, is not only beautiful, but also upright. Just like Wei Chunhua's purple bamboo climbing with a slave, the old lady's injured breast stood up directly, and the huge breast stood up.

Really, the fullest models in golden hair probably don't have this scale.

The operation is over.

Zhang Fan breathed a sigh of relief. Today's two assistants are really amazing.

After the operation, Zhang Fan was a little scared. It was terrible. One God and two pits didn't overturn. It's really lucky. Zhang Fan felt that he had never met such an assistant since he became the dean. In those days, old Nur was better than these two goods.

Jiang Qinqin also breathed a sigh of relief. The operation was finally finished. She dug the ground with her five toes on the operating table. It is estimated that the silk stockings will be changed again after going down.

And Li Cunhou was relieved because he could go out and show off. His highlight time has come!

"How does my brother treat you?" Lao Li came up to Zhang Fan and grabbed Zhang Fan's arm.

"That's it!" Zhang Fan was angry.

"What? You asked for materials. Without saying a word, I pushed off the invitation of dean mordu Wang and sent you materials thousands of miles by plane like a postman. Now you say that! " Lao Li is about to jump up and swear.

"Well, it can't be better. All right? You won't be looking at my share? " Zhang Fan glanced at Lao Li.

"Brother, pattern, pattern, do you think I'm that kind of person?" Lao Li was helpless.

"If you don't give me more shares, I don't think you are like that." Zhang Fan smiled.

"You are so beautiful. All right, I'll go out later. Take me as your leader and I am the mentor of the experiment. "

"Yes, carry the sedan chair. I understand this very well. OK, there's no problem at all. "

.....

Lao Li and Zhang Fan went out of the operating room at the same time. Lao Li was in front, Zhang Fan was a little behind, and then three doctors followed Lao Li. Jiang Qinqin was kicked out of the team by Lao Li because she was too beautiful and obviously had eyebrows and eyelashes.

Then, Lao Li put on airs and said to Zhang Fan, "well, today is to fully meet my expectations. But one thing, we should pay attention to the next operation. We must reduce the vascular damage as much as I do, and... "

A group of people pretend to be studying how to improve or improve surgery. Lao Li was talking. Several others saw Zhang Fan nodding, and several others nodded.

Lao Li made such a successful speech that he had never made in his life. As he spoke, he waited, waiting for everyone's impatient and orderly steps. A crowd gathered around him waiting for him to stop his speech.

Melodious and frustrated, he saw Zhang Fan staring at his back. He was a little unhappy. He clearly agreed to carry the sedan chair. NIMA's performance is almost over. What are you doing with your mouth wide open? Eat turnips?

He looked at Zhang Fan discontentedly, but finally he understood that something was wrong.

Then turn your head.

He cried.

What about this NIMA?

The people who originally arranged an observation room, a small 100 people.

Where's the golden man?

Where's the stick man?

Where's the meatball man?

What about Pfizer?

What about the people in Baiyun Mountain?

What about Janssen's people?

What is an old lady standing here for? Scare ghosts?

Lao Li asked Ouyang with a cry: "Ouyuan, what are you doing here? What about the others! "

Really, if Lao Li were a little younger, it would have been crying in the corner.

"You, how old are you? You are so careless. How did you come back from the golden Mao country. Why did you make it like a lost dog.

What do you think they're chasing you and holding you up for? "

Ouyang changed his tone and took a step like a bosom sister. Began to care about Lao Li.

As soon as Zhang Fan heard it, he knew that something must have happened. Suddenly, his heart clanged, "is this old lady going to black Lao Li's technology? No, the tea plant wants to cut the beard? It doesn't have such good teeth! "

Zhang Fan glanced at Ouyang suspiciously.

Ouyang glanced at Zhang Fan, meaning to help quickly.

Zhang Fansi understands. Although he doesn't know what the situation is, he must stand with Ouyang now.

"Yes, I think this kind of observation operation should be studied more in the future."

Zhang Fan doesn't know what happened, but this kind of wheel, and then Ouyang's words, at least it won't be cold.

When talking and communicating, I'm afraid of being cold and the other party's calm thinking.

Ouyang's communication is always three board axe. When you open the door, you first think hard, then give examples to prove it, and finally show your edge.

The effect is hard to say. If you are willing to listen, you can say whatever you want. If you don't want to listen, he won't change his mind.

After listening for a long time, Zhang Fan finally understood. Materials are not internationalized, only produced in China, and do not even apply for patents.

Zhang Fan thinks this is really a little difficult. Seeing that he is going to be successful, he hammers it down. It's hard for anyone to accept.

Li Cunhou opened his mouth and didn't say a word.

Ouyang also said that Zhang Fan shook his head and let Ouyang and several doctors out of the operating room.

In the observation room, there are only Zhang Fan and Lao Li.

Lao Li bowed his head and didn't know what to think.

"Are you worried that the country has hacked your patent?" Zhang Fan whispered, like a thief.

"It's not dark enough. I just think that I can finally cheer up and press my elder martial brother." In fact, I haven't said a word. Maybe I have a chance to win the Nobel Prize, because Pfizer has promised him and operated it for him.

He just didn't mean to say it.

"Oh!" Zhang Fan thought, "you've been a learning bully all your life. It's estimated that you haven't experienced the mentality of learning slag. When I applied for a job in Lanshi, I couldn't forget the pain in my life. Later, my technology was slightly small. I thought that one day, I would stand at the gate of Lanshi hospital and shout to them, "you are so blind. I'm the best."

Lao Li looked at Zhang Fan like a fool.

Zhang Fan said seriously, "don't think I'm talking nonsense. I really had this idea before. Later, I met an old professor who taught me biochemistry in the capital.

The two sons of their family are academicians. He has been nominated countless times, and each time he was rejected because of his age.

The old man shouted that he had no eyes, but he still went back to Lan City to take undergraduates. Just to let the younger generation mature earlier.

When the old man saw me shining in the field without mentioning his alma mater, the old man looked gloomy. Really, I felt bad at that time. People, especially knowledgeable people like you, still have to have roots. "

"Root? Where is my root? "

Chapter 1347

"Look at me. To tell you the truth, in recent years, many large hospitals, even hospitals in the capital, have contacted me privately. The conditions given by everyone are good. Some hospitals directly let me be the president of surgery.

To tell you the truth, I've never been touched. Do you know why? "

Zhang Fan seemed a little stunned when he saw Li Cunhou, so he asked.

"Why? Isn't it better for your future to go to big hospitals and big cities? " Li Cunhou doesn't quite understand.

"Hehe, it's very simple, a sense of belonging. This hospital, this city, for me, has a great sense of belonging. For example, when I drive on the road, even if everyone knows that Kuluze is not the car of the armed police, it is driven by Zhang Fan of Tea Vegetable Hospital.

However, when the traffic police salute, they always smile. Have you ever seen a traffic policeman salute a passing car and smile? Because they know that there is Zhang Fan and a doctor in the car!

When I go to any unit in this city, everyone will kindly call me Zhang Yuan, and the people will enthusiastically call me Zhang Dao.

It is not my vanity, but that I have paid and contributed to this city. This city affirms me and this city accepts me. This city needs me, and I need this city!

Don't people just pursue this thing? People leave their names and wild geese leave their voices behind.

Let's talk about the tea vegetable hospital. I said to the west, everyone worked together and walked West in unison. Even when we were shameful, the government was like a doormat. Wasn't it the power organ? Why?

This is because of our contribution! Our dedication, our pride!

Now you go abroad with a patent. Indeed, you have money and fame, but after a few years, you are a charterer. When you go to the street, your big nose stands up for you and your middle finger. You can't help it.

Why do you have no sense of belonging in the golden mean, why do you have no sense of belonging abroad, and do you feel comfortable doing anything in tea? "

Zhang Fan looked at Li Cunhou and asked.

"Yes, in the golden mean, everyone in the department seems to be very friendly. In fact, they all take precautions, especially the director of the Department, who is always afraid that I will rob him of his throne. In foreign countries, for the quota of one or two professors, to tell the truth, it is illegal to poison and kill people. Otherwise, I think I can shoot all my classmates and colleagues with a gun."

Lao Li loosened his tie and looked decadent.

Zhang Fan didn't expect that this guy still has the tendency of anarchism!

But I guess I was bullied at that time.

"After tea, to tell the truth, it's comfortable." Lao Li took a breath.

"Do you know why? Because the burn department of tea element is your own child. You hatch it from scratch like an old hen. This is your foundation, this is your root.

You're in the golden mean. People say you won't do it. You can't even find a helper, because what have you contributed to others? But you are different in tea. You are the king of burns here. You are the future and hope of this department. "

"But I also want to contribute in the golden mean. They don't give me a chance!"

Lao Li is unwilling to look at Zhang Fan.

"You're stupid. People have been flying for nine days. You make the most contribution, which is just icing on the cake. They can't fly higher without you. They won't fall immediately without you. But tea is different. With you, this is a world-class department. Without you, you may not be able to reach the top three level. Do you understand? I won't give you any national righteousness or national honor or disgrace. You are more knowledgeable than me and know more than me.

Let me ask you, do you have the heart to look at the burn department of the tea vegetable hospital and return to the original level? "

Zhang Fan asked directly.

"Well?" Lao Li's eyes are wide. Is this the matter of the tea element burn department? But to tell the truth, Zhang Fan's statement is like that of the tea element burn department, which is really like his own child.

In the past, I didn't feel it. Now when I say it, it seems that there is a blood relationship. Li Cunhou swallowed a mouthful of saliva.

"Well, don't think you will become a billionaire. Let's talk about your material market first. The price is dozens of times that of other materials. This one has blocked the way of most ordinary beauty salons.

You're right.

Then there is the difficulty of operation. Can the beauty salon afford this level of surgeon?

Don't listen to what they tell you about the benefits. When the goods arrive on the ground and die, they are really sold to Jinmao. If they break the contract, what can you do? Is it difficult for the body to destroy you? Don't say it's impossible. You always wanted to be a hot man!

Therefore, the biggest advantage of this thing is medical treatment, even basic medical materials, such as the army! This thing needs the backing of a strong country. "

"Don't talk nonsense. When will I be a hot man. No wonder you can be the dean at a young age. It's not a technical problem. You think better than me. "

Zhang Fan looked, hey, this guy figured it out and just put it in place in one step!

"In fact, you are now in the tea plant, and don't go to break the golden mean. I don't like that place either. Let's work together to build a burn platform, a world-class platform, and let them beg us later. Think about it. Why do you have to be a little wife for others? Are you sadistic?"

Come and have a look. You can walk sideways. How comfortable it is. People will shout to you when they see you. Yo, isn't this president Li walking sideways? Everyone has to make way for you! "

"Go and talk, and you'll make fun of me!" Lao Li seems to have figured out something, and people are relaxed a lot.

"One more thing, I have to say more. Will your martial brothers in those years and those martial brothers in Jinmao make more advanced things than you?"

Zhang Fan asked.

Lao Li looked contemptuously at Zhang Fan, "you don't understand! Come on, let me tell you... "

Physiological and biochemical, there must be a hang!

Medical students are not afraid of systematic anatomy, which is as thick as a city wall. Because this thing, how to say, even if women and children inside and outside are thick and dissected carefully, they will always be rewarded as long as they learn to work hard. Rote learning can work wonders.

I won't say whether I will see a doctor first, but there's no problem breaking the paper and getting a high score.

But physiology and biochemistry, this thing is different. If popular, this thing is a little similar to Mathematical Olympiad. When you practice every day and wait for the exam, the results are similar to those who skip classes every day and never read books. If you don't understand, you still don't understand.

At most, I was a little familiar with the topic. In those years, the Nobel Prize was born in biochemistry for several consecutive years, and then dolly sheep and a series of achievements appeared. It seems that biochemistry has become the most popular discipline in the world.

Then a large group of young and tender students were admitted to this discipline, and the four-year purgatory like life would not be mentioned. After graduation, let alone undergraduates, even doctoral students went to high school as teachers.

This profession, how to say, is really not capable of ordinary people. The first sentence of the general theory of biochemistry is to explain and reveal the essence of life phenomena with the principles and methods of chemistry, physics and biology, along with the disciplines of heritage, cytology and bioinformation.

Listen, NIMA is tall, interdisciplinary and easy to get results. In fact, this is Tiankeng. Many things need to be explained by many other disciplines. Many things need researchers to develop a system to explain a phenomenon or essence. Biochemistry looks partial to application. In fact, this thing is the foundation, or a basic discipline without its own ways and methods.

In other words, biochemistry requires skilled application of various tools, and then try them again. In other words, I can use the tools of other disciplines. Why did I come to play with you! Are you inlaid with Phnom Penh?

To tell you the truth, sometimes two people can fight when they communicate. How difficult is it for another person to understand this system created by individuals.

The simplest, the basic structure of protein, amino acid, is the simplest thing in biochemistry, but this thing can block 90% of medical students in front of Biochemistry and make them difficult to move.

At the height of Lao Li, there is not only effort and talent, but also luck.

If time goes back and Lao Li studies it from the beginning, maybe because he and his wife are too happy and excited the next day, the thing he makes is another thing.

Therefore, in medical treatment, many things are confidential. Really, this discipline is very similar to the military in some places.

For example, how many important papers have been published in Jinmao P4 level laboratory? In this field, a bad word often gives you finished products. Without detailed data and experimental principles, you may not be able to copy them.

This field is really an extremely opaque business in the scientific community.

Zhang Fan was relieved to hear Lao Li's explanation. Then he asked, "scholars are scholars. How about tea vegetarians? Don't worry about going to the golden Mao country. To be honest, you don't feel comfortable quarreling with them. Do you say a common saying? Do they understand? Do they say a slang? Do you understand?"

Don't stay in the golden mean. Come and have a tea vegetable. Don't you have a few words to say? It's better to be a chicken head than a phoenix tail. "

Lao Li smiled and said, "how can I listen to people saying that I'd rather be a phoenix tail than a chicken head?"

"That's what incompetent people say. Those who can do it will be chicken heads! Come on, brother, let's have tea. I'll give you the position of Dean! "

"Ha ha, you, you, you think the hospital is your home? If I come to tea vegetable, have you ever thought that you and I will be under great pressure! "

Lao Li sighed deeply.

"Ha ha, brother, you just don't treat me as your own. All right, you wait!" With that, Zhang Fan picked up the phone and called Ouyang "Ouyuan, come here. "

Then, he said to Lao Li, "it's good that we don't bully people. Look, you don't need others for your affairs. This old lady can pierce the sky for you!"

"Professor Li said that if he came to tea, we would be under a lot of pressure. Let's talk about it..." Zhang Fan told Ouyang about the matter, and then repeated Lao Li's concerns.

Ouyang just started to pretend to be a scholar and listened quietly.

After hearing that Zhang Fan almost persuaded Lao Li to stay in the tea vegetable hospital, Lao Li was worried that the pressure he brought would affect the tea vegetable hospital.

Listen to this. Ouyang's triangular eyes stared, "who dares! Does it have this ability? "

"What if it's the golden mean?"

"He can. I'll contact the leader now. Professor Li, you know me and tea vegetable hospital. Now I'll go to the bird market and implement your position and salary first. I don't believe it. A province larger than one sixth of China can't do a school!

You work at ease. This is your home and this is your chassis. On our own chassis, the dragon has to be coiled for me, and the tiger has to be turned into a pug for me. " With that, Ouyang left.

Tea vegetable leaders also received a call from their superiors and said nothing more that they would improve the security level of tea vegetable hospital.

Chapter 1348

Ouyang cleaned up his hair twice. Although it was gray, he applied it to his scalp meticulously. To tell the truth, even if she is covered in patched clothes, her energy can obviously make people feel her strength.

Clattered downstairs, went to Zhang Fan's red card kuluze, and then got ready to go to the bird market. Because it was a quarrel, other cars had no license plate, and Zhang Fan's car not only didn't register when it went in and out of the government gate, but also led people to find a parking space.

Not only because the brand is red, but also because the green pass on the windshield is hung with double rows of red long-term effective seals. To tell the truth, there are no more than 100 cars in the bird market. The leaders in charge of health of tea are all hung temporarily.

Don't underestimate this seemingly nothing strange. The more in the system, the big welfare is almost no different from top to bottom. It is this kind of small node that can reflect the difference.

So, quarrel, of course, use the most powerful.

Master Tian is Zhang Fan's full-time driver, but Zhang Fan rarely bothers others. However, as long as Ouyang uses Zhang Fan's car, Lao Tian is a full-time driver. Others don't want to drive this car.

Master Tian also gave power to the car, like a tank, when the hospital slowed down its pile, the car almost flew out of the hospital awesome as a small plane.

Just went out, as a result, the A6 of the government was killed at the gate of the hospital, and the two cars met at the gate of the hospital.

Boss Cha Su looked at the aggressive appearance of the car and clicked in his heart. Isn't Zhang Fan happy? It's not easy for boss tea vegetable to say it clearly, because behind him sits the leader of the bird market, and there is also the leader of a research institute.

"Look, the leaders of our hospital have gone out to meet us. It looks like a hospital car!" Anyway, the hospital is not under their own control, and embarrassment is not their own embarrassment, but we can't let Zhang Fan run away. Simply, he pointed to Zhang Fan's car and said to the leaders behind him.

"Oh!" The leader didn't say anything. The driver got off the bus and greeted him with a smile.

Ouyang heard it. It's just right. I don't need to go to the bird market. I brought it to the door. The old lady got out of the car and asked Lao Tian to go to the hospital to inform others. She walked in four circles.

'Although her own special car also has four laps, it is an A4 eliminated by the government. At present, only the eldest and second children are using this A6.

"Leadership!" Ouyang looked, eh, the leader is sitting in the position of secretary today. It seems that today is a big fish!

"It's too bullying. Leader, you said that the tea vegetable hospital is not a hospital within the Chinese system. Are we the unit in the preparation plan?"

The boss of the tea vegetable government is big. You're too fake. You've seen the bird market leader behind me. You're still pretending to attack me here.

However, the face should be given.

"Comrade ouyanghong, pay attention to your attitude. You are still not a cadre of the government and a member of the party. You have difficulties in your work, which can be rightly raised. You have been educated for so many years, and now you are the main leader of the unit directly under the bird market. How can you change such childishness.

Come on, there's a leader in the back! "

Hi! Connecting the preceding and the following, I have not embarrassed the leaders since I have spoken out.

Really, sometimes you don't admit that the smartest people in China are all in their physique.

"Well, don't let the leaders of the research institute laugh. Where's your Zhang Institute?" Bird City No. 2 leader got out of the car with a bitter smile.

To tell the truth, he had heard that the leading cadres of tea vegetable hospital were wonderful.

At that time, he felt that these were deliberately arranged by the people in the bird market. Now, he finally understood why the leader in charge of health in the bird market patted the table and scolded his mother.

This is not a welcome, this is a direct threat!

"Tell me, what's the situation?" As he walked, he asked.

Zhang Fan and they also got the news.

Lao Chen means to line up quickly to meet him. It's too sudden now. Otherwise, the nurse should at least wear silk stockings, draw lips and offer flowers.

Zhang Fan crooked his mouth. "In the future, no matter which level comes to inspect, the people in the administrative building or office will greet him. Who should be in charge will greet him. Don't take the nurse to stand guard if there's nothing wrong. He's here to save the lives and heal the wounded, not to be a welcoming lady!"

Zhang Fan not only said Lao Chen, but also the head nurse of the nursing department.

"Hard work!" Just out of the office, the leader has gone upstairs. Before Zhang Fan spoke, the second son of the bird market had grabbed Zhang Fan's hands and said something emotionally.

"What we should do! Leaders, please! " Although Zhang Fan is not as rigid as Ouyang, he is not as flattering as Lao Chen.

Is to greet and shake hands often. Although young, there is a vague style of everyone.

be neither humble nor pushy!

"This is director Chen of the Digital Research Institute. Director Chen, this is the president of our tea vegetable, Zhang Yidao and Zhang Fan in the mouth of the tea vegetable people!"

"Chen suhao!"

"Zhang Yuanhao!" The middle-aged star held Zhang Fan's hand, looked at Zhang Fan carefully, and then whispered, "it's not easy!"

This sentence is not clear, but Zhang fan understands and Li Cunhou knows what he is talking about.

Zhang Fan took them directly into his office and didn't go to any conference room.

The armed police who had just entered the conference room were standing at the door.

"I won't talk nonsense. China needs your scientific research achievements and China needs this blank. You have come to the forefront of the world in the simulation and replication of human tissues. We have been working hard in this regard, but the foreign blockade is too severe.

According to our current level, we estimate that it is two to three generations worse than Jinmao. Now your skill is our chance to overtake in the corner. If necessary, we can take out all the funds we have in this regard as compensation. "

As soon as Zhang Fan heard it, it became clear that the one who came was in charge of technology.

However, he likes such people.

As soon as he finished, the people in the office, including the leaders of bird market, tea vegetable, Ouyang and Professor Li, all looked at Zhang Fan.

"In those years, there were a group of people who had been anonymous in the lotus base not far away for decades. In those years, there were a group of people who were buried on the snow mountain not far away for a national defense highway. Now, not to mention a patent, we have no problem with the whole tea vegetable hospital.

What compensation and funds do you say? You look down on us. According to our level, we really want money. Can you afford it? We have contacted golden Pfizer and GlaxoSmithKline of Mishima.

Give subsidies. Our comrades have dedicated their youth to their children and grandchildren in the frontier of the motherland. I think you have a little less money! "

Zhang Fanyi said that the bird market leaders nodded slightly and thought, "although they are young, they still have some consciousness."

The leader of the Institute bowed his head embarrassed. He felt that he despised the frontier people and the frontier scientific research workers.

Boss Cha Su wants to find an excuse and slip away. This is what NIMA Tuo's Ouyang said when he was shameless!

Ouyang proudly tilted his chin slightly.

Finally, finally, the boy finally has his own success.

Dedication, yes, you can, contribution, but you still have to. Say smaller, the country is rich, and you are not short of three melons and two dates.

As frontier doctors, we should also be responsible for the health of millions of people in the frontier!

Zhang Fan thinks very clearly.

"Here is the patent information from beginning to end. What do you think of transportation, air transportation or special train?"

"Air, air! Go now. "

The director of the scientific research institute is holding a Book of information in Zhang Fan's hand. He is still a little strange. Why is there so little information? There are no trucks and cars for the experiments, materials and data of such macromolecules. Why is there only one?

This is the directory Zhang Fan looked at each other and the leader with a smile.

The director still doesn't understand. Really, this kind of scientific research workers with numbers, to tell the truth, have been spoiled by the state and divorced from society.

There is a joke about a military sister-in-law of a border defense regiment who went to the army after graduating from university and has been in the army for decades.

When her husband was about to recover, she first returned to the place and then cried for three

consecutive days.

Why?

She thinks she's useless. In the army, the army even bought vegetables from local places first, and then sold them at a reduced price.

When something happens, there are organizations and troops to deal with it. Even if the husband beat his wife, the superior leaders came out to clean up.

But when she got to the place, she drank mineral water for three months. Because the water supply was cut off at home, she thought everyone was the same. In this way, she saved three months. When she learned that she needed to go to the property, she burst into tears.

She once said that she really wanted to stay in the army all her life.

Therefore, the director didn't understand, but the second son of the bird market understood at once. Zhang Fan wanted to ask questions. He didn't speak. It's hard to get out of the door today.

"We should strongly support and reward the tea vegetable hospital for its dedication to the country. You must put forward your difficulties today, Zhang hospital, or the monitor will complain about me when I go back. You can say it. As long as I can do what I can, I will do it for the hospital!"

Strong support, but if you are also careful about the key points, you can do what I can.

Zhang Fan, Ouyang and Li Cunhou looked at each other. Ouyang nodded slightly. Lao Li looked at Zhang Fan with a little excitement and sincerity.

"We need a basic medical school! Built in three years! You don't need 985211! "

Zhang Fan spoke. The dick of the bird market and the director of the scientific research institute are stupid.

And the boss of the bird market almost covered his face with both hands! What a shame. But he was stunned and didn't say a word. What if he let the black boy become!

Is this called dedication? This NIMA is a naked black hand!

The second son of the bird market was surprised and took a breath.

Really, he didn't expect that the young leader opposite had a blacker face and a darker heart. Really, he felt that he had wronged the leader in charge of health.

Chapter 1349

There are only two 211 level schools in the Manchu frontier, but not 985. At that time, it was said that the schools in the bird market swallowed many schools before they were qualified. So, when Zhang Fan's face is not red and his heart is not jumping, he opens his mouth and says that he wants a 211 level school, or a medical school!

The second son of niaoshi choked and was dissatisfied with China. How many independent 211 medical schools are there? Moreover, Zhang Fan seems to have taken advantage of the government, as if the government has been exposed to much light and how wronged they are.

Really, you really can't say when you meet such a subordinate.

They say that they don't have a view of the overall situation. They have shouted the slogan of the year and offered their youth to their children and grandchildren. You say people are selfish, but they don't make money for themselves. The boss who didn't see tea vegetable was like the back of his ear. He was stunned and didn't take over.

"This, this has to be discussed in the long run. The land transfer, the approval of the Ministry of education and the review of the State Council do not mean that we can do it as we say." The second son of bird market thought in his heart for a long time before he opened his mouth and said.

"In fact, the land of tea is not expensive!" Boss Cha Su seems to be talking to himself. Anyway, he doesn't dare to look at the killing eyes of the second son of the bird market.

"I can call the general manager!" Ouyang raised his chin proudly.

"Well!" The second son of the bird market was almost crying, "all right, let me tell you the truth, no money, no important people. This year, our medical college took two young heroes and lost several rivers. At present, there is not even an academician.

No college has developed well. Now where can we find the energy to develop the second one.

Comrades, I know your eagerness, but the food is eaten one mouthful at a time, and the road is taken step by step. "

Bird market Dick is not only telling the truth, but also acting like a liar. Anyway, it's such a situation at present. It's no use forcing me.

"Leaders, I don't know if rice noodles are expensive. I didn't know what you said before. After being the president of this small hospital... "

"Zhang Yuan is polite. Zhang Yuan is polite. Tea vegetable hospital is still a small hospital. There are no large hospitals in the border!" The second son of bird market is really afraid. If Zhang Fan wants to be polite, others won't let Zhang Fan finish.

"Hey, hey, I think there is one in our frontier this year!" Zhang Fan smiled and went directly to the softest place in the leader's heart, regardless of the other party's current defensive posture.

In fact, this is the level of communication, such as communication between men and women. To be honest, sometimes men and women really talk about boxing and may not have hit each other, but if you use hard things she doesn't have to deal with her, even if you can't fight, you can lose both.

There is no frontier in medicine. It's really a little embarrassing to say it.

For example, old man Lu, although he is having a good time in the frontier, the bluebird government sends big money greetings on time every month. Over time, people's Bluebird leaders will send someone to have a look.

Academicians are not very rare in the capital, and they may be attacked. If you say something bad in other places, the government boss must make an appointment in advance when he sees academicians.

As soon as he said this, the second son of the bird market looked at Zhang Fan and thought carefully. He felt that there should be no pit in it. He said cautiously: "it's good to have academicians. It also represents the rapid development of our frontier medicine. It's my honor, but it's also the honor of your medical workers!"

The meaning of the second is also very clear. Without academicians, it also means that you have no ability to be a doctor and a hospital leader. Don't go to the pit for me. I don't drink well.

Really, I'm really scared by Zhang Fan. NIMA's mouth is about 211. Why don't you make a comprehensive 985 in one step!

The dick didn't dare to answer easily.

In ancient times, the emperor Jinkou said that in fact, the higher the level of modern leaders, they dare

not easily promise. This thing also has the meaning of Jinkou.

"Leader, look..."

The second one really wants to say, I don't look, don't come here. Unfortunately, he can't. He came today with a superior task, otherwise he would have left early. NIMA is too bullying.

"The current volume of our hospital is short of a basic medical school. We have land, right?" Zhang Fan finished and turned to ask boss Cha su.

With an empty cup, the boss of tea has been pretending to drink tea. As soon as he heard this, he immediately nodded: "after all, our tea is known as a small plain. Thousands of mu can't be given, and hundreds of Mu is still no problem!"

Not even money.

Really, otherwise, at present, the profit income of tea vegetable hospital is no worse than that of Frontier tobacco. Sell land to tea vegetable without money? I'm kidding. Even if Ouyang demolishes the government gate, he won't sell it to tea vegetable hospital cheaply.

Unfortunately, although money is good, it's better to get a university.

Although culture, education and health do not seem to be paid much attention in the context of the economic center. In fact, a city's requirements for government leaders are quite strict in culture, education and health.

"As for funds..."

"We really don't have a budget for the past five years. You can't get such a large amount of money if you sell me!"

Bird market Dick is really telling the truth.

"We can raise some by ourselves, the higher-level leaders will care about some, and the social sages will donate a little more, so that we can go to central and South China to make a point. In fact, it's not much worse. After all, this investment is not a one-time investment. In fact, it's not much after three years."

"Well!" The second son of the bird market looked at Zhang Fan as if he were a fool. He said, "blow, you continue to blow. There is not much NIMA. In many provinces, an ordinary university can't afford it. You have to get one in a hospital. What NIMA said is like keeping a pet rabbit. Pull some grass and feed it."

"Even if we care about some, you raise some by yourself, and the great good people donate some to you, but what about the teacher? Do you think the tea vegetable area can attract teachers? Now go to the bird market and see how many tea vegetarians the teachers of other people's medical school can

have. Even if you give a high salary, do you think it's ok? "

The second son of the bird market finally persuaded Zhang Fan in the tone of a person who came over, as if to say, you little comrade, you are still too impatient, but we can understand your mood.

"Teacher? Hehe, this is simple, this is the simplest. Chen Suo, we exchange what we need in terms of allogeneic materials. Can you help us in terms of teachers? "

One star leader was already in the mist at this time. At the beginning, when he saw Zhang Fan and them, director Chen also felt that these doctors had developed such high-end materials in such a difficult place in the frontier. He really felt that Zhang Fan and them had worked hard.

But I didn't expect that now, he finally understood. This is not only a doctor, but also a killer!

"In fact, our institute is not big. We usually bring not only doctors from major schools, but also our own scientific research figures to teach tea vegetarians. Hey!" Chen Suo lowered his head. He was really embarrassed to do something like Zhang Fan.

"It's all right. At the beginning, we can have a small class system with 15 people in one class. We can even go to the golden mean or other schools for training. In the last year, we can go to tea element internship, and graduate students can return to major research institutes."

The second son of bird market looked at Zhang Fan. He didn't expect that the young man had really thought about it.

"Are they willing to train you. Why don't people train more students themselves if they have the Kung Fu of agent training ~! "

"Hehe, they will!" Zhang Fan smiled.

"This has to be studied at a meeting. I don't count alone. You'd better form a report." Bird market Dick is helpless.

"What's more, academician, Professor Li has decided to join our tea vegetable hospital. The leader applied to the superior this year. We have a heavyweight player. "

When Zhang Fan finished, Li Cunhou opened his mouth and wanted to talk. As a result, Ouyang dragged his clothes.

Lao Li's eyes were red. He didn't expect Zhang Fan to apply for academician.

To be honest, recommendation is very important. Just like asking for someone, it's easier to succeed the first time. If you split the first time and want to recover later, you'll have a higher chance of failing to pass the test.

Academician, for a scientific research worker, especially in China, this is a lifelong goal.

"Welcome, welcome, heartfelt warm welcome!"

The second son of bird market finally laughed sincerely. To tell the truth, he began to be frightened from entering the tea vegetable hospital. Unexpectedly, there was such a good thing.

"Leadership, but there are still some problems." Ouyang spoke.

The smiling face of the second son of the bird market was frozen on his face and said in his heart, "I knew, I knew, there is absolutely no such good thing."

"What's the matter? Tell me! " Leaders dare not promise.

"Professor Li's research was a golden mean scientific research project, and in order to get scientific research funds, he signed a series of unequal treaties, but later, Professor Li's research encountered difficulties and the golden mean ignored it.

Our hospital thinks this project is promising and has a high probability of success. Therefore, we do not hesitate to give our full support at the cost of money. We want people to give people and money to give money.

Professor Li believes that his future career should be tea vegetable, but the golden mean does not let people go. Leaders, this is bullying. They think our Frontier Province can't do it. If the magic capital is the golden mean, it dares to do so. If the bulk Province, it dares to do so?

This is the naked horse legged, looking down on our border province. Tomorrow we'll go to Zhongnan and file a lawsuit with them! "

This NIMA, this NIMA, the hands of the second son of the bird market began to shake.

Three minutes, embarrassing three minutes.

Boss Cha Su thinks the pit dug by the cha Su hospital is too big.

I don't know what the second son of bird market thinks, but the back alveolar on the side of his face can obviously see biting and biting!

Leadership estimates are also difficult.

To tell you the truth, it's really hard. Not to mention anything else, where is the headmaster's level? The sophomore of the bird market has gone. We can't say inspection, but research or investigation!

The leader bit his teeth. Finally, he stared at Zhang Fan and Ouyang, "OK, I'm responsible for this matter to the end!"

Chapter 1350

"Lao Chen, quickly arrange a better and higher-grade hotel that can reflect the energy of our tea vegetable hospital. We should entertain the leaders today."

Zhang Fan began to call in front of the leader.

"I see!" Lao Chen didn't talk nonsense. He replied directly. When Zhang Fan hung up, Lao Chen went to arrange it.

"Zhang Yuan, it's inappropriate. There's a meeting tonight. I have to go back to the bird market. " The second bird market smiled and said to Zhang Fan.

After talking about the work, the leaders were kind and the subordinates were obedient. It seemed that there was an atmosphere of unity, harmony, tension and liveliness.

Often in the system, the first leader is always relatively serious, while the second leader is usually relatively easy to say.

However, in the frontier, Zhang Fan has a special status.

Needless to say, the school's cattle force, and after several rescue and disaster relief, it is said that Zhang Fan has registered in Zhongnan.

Also, Zhang Fan's surgical level, at present, will hardly make friends with Zhang Fan because of business.

Moreover, Zhang Fan is still young.

Therefore, this kind of phone call, Zhang Fan dares to call in front of the leader. If Ouyang, it is estimated that the leader will say a euphemism.

"We are very grateful for how much help the leaders have given to chasu, but on weekdays, you and boss chasu manage everything every day, and we don't have a chance. It's not easy to get together today. We still understand the rules of standing at attention and taking a break when we are

subordinates.

Just a specialty! "

"Leaders, I also touched your light, so I let Zhang hospital and European hospital entertain them. You don't know. Tea vegetable hospital usually doesn't say anything else. They even want to go to our government to manage food for them."

Boss Cha Su, this will live, talk funny, and don't recite your ears! Ouyang glanced and Zhang Fan hurriedly said, "the leaders are right. In terms of our subjective initiative, we are still unqualified. In the future, we will report more and ask for instructions, as long as the leaders don't dislike our work!"

The second bird waved helplessly, looked at the boss's face and said, "if all States, counties and regions are the same as you, how can we work. Not again! "

This set the tone and criticized the leadership of tea vegetable from the side.

Really, don't look at the ordinary people's constant scolding, wine bags, rice bags and General belly. In fact, which of these people killed from thousands of troops is simple.

.....

Lao Chen arranged quite well. Under the guise of letting the leaders inspect the tea vegetable logistics, saying the slogan that the leaders care about the living standards of employees, he made six dishes and one soup in the box of the tea vegetable canteen.

The environment is not elegant. The box in the canteen has one more coat than the chairs outside the lobby, and one more layer of plastic on the table, which is especially disposable.

There are not many dishes, just six and one soup.

It looks very simple. Even the wine didn't go to the old cellar, let alone Mao Wujian. It was all contained in mineral water bottles.

"The leaders should not have been so simple when they came to inspect the work at the grass-roots level, but I was deeply educated by the leaders' recent conversation in the training course for middle-level cadres. I think the leaders are right and I have no level. Zhang Yuan asked us to reflect the fighting spirit of our tea vegetable hospital. I thought about the simplicity of the leaders in ordinary days, So we ventured to set up a working meal in our own canteen.

If you can't reach it, please criticize and correct it. "

At the door of the box, Lao Chen stood at the door to introduce the leaders.

After a few words, the leader's eyes lit up, "who is this?"

"Our president in charge of logistics and office, President Chen Sheng." Zhang Fan introduced with a smile.

"Good cadres!"

The leader nodded and said.

Then he entered the box.

After Zhang Fan saw the leader go in, he took a look at Lao Chen, which means, how can we arrange it here? Why don't we go to the five-star hotel opposite the hospital!

Now the leader wants to work for us. You can't even give up delicious food. How can you do it.

Zhang Fan feels a little inappropriate. He was afraid that the leader would say he was satisfied, and then he went back to work. The leader really doesn't work. Zhang Fan has no way at all.

But Lao Chen squeezed his eyes at Zhang Fan, which means that you can rest assured, no problem!

Zhang Fan enters the box suspiciously.

On the dinner table, the atmosphere of chat and conversation is obviously much better.

Zhang Fan poured water with Lao Chen, and Ouyang spoke with the leaders.

Then start the dishes

Zhang Fan doesn't think it's right. When did NIMA make Russian cold water fish head in the hospital canteen? It's still so big.

To tell the truth, Zhang Fan feels guilty when he eats this kind of fish once in a while.

After boss Cha Su was drunk by Ouyang, boss Cha Su looked at the mineral water bottle and sighed, "this NIMA, the winery hoards a little in the old cellar a year. Last time, the factory director complained to me that there was not much, not much. It turned out that dunima was brought to the mineral water bottle by the tea vegetable hospital. This reception is organized. Zhennima is a talent. "

During the dinner, the second child of bird market said with emotion: "in the past, I heard that tea vegetable hospital developed well. I don't think so. How far can a small hospital on the border of the country develop!

As a result, there were planes flying in the sky. It was estimated that there were few planes in Asia, and the research institutes were one after another.

Today, after close contact with the staff of Zhang hospital, European hospital and tea vegetable hospital, it's really not easy for this unit to be full of fighting spirit, strong leadership and excellent combination of middle-aged, young and old people.

Today, I am here to assure you that I will do my best! "

The leader said it was emotional. Really, such a high-level leader would do so. Really, Ouyang, who didn't drink much, kept toasting with a wine glass.

When the leader left, Ouyang was rarely drunk.

Holding a wine cup and singing a section of * * * in Weihu mountain, really, Zhang Fan thinks it's a pity for the old lady to be a doctor. The old lady who drinks a little wine looks like Third Master Ou!

Just take a gun and dig a hole at the intersection to collect the toll.

Of course, the tea vegetable hospital is not plain sailing. There are finally problems with the doctors who check together Zhang Fan, Ouyang, Ren Li, Zhao Jingjin and Yan Xiaoyu.

"The main responsibility lies with me. I patronize quantity and don't pay attention to quality. I review it." At the team meeting, Zhang Fan directly blocked the review of others and took the responsibility directly.

Zhang Fan knows that if these deputies really put the responsibility on them, they will definitely affect their rising career in the future. As a legal person, I don't take responsibility at this time. What are you waiting for.

When a doctor enters the post, the first thing is not to study on the job, but to implement other people's welfare, a villa, resettlement expenses and the work of the other person's lover, which should be implemented before others enter the post.

As a result, thousands of choices were finally mixed with a master, an exam master.

If we say that in terms of examinations, it is estimated that not many countries have been able to pass the Chinese people. Really, the Chinese people's examinations have reached an immortal level. How do others discuss and do the right topics, while the Chinese people study how to do the wrong topics!

That's great.

The doctor of rheumatism and immunity, who was under the age of 30, was still a male doctor. At that time, both Zhang Fan and Yan Xiaoyu were excited during the interview. Then, during the interview, they looked at other people's qualifications and participated in national level projects. Although it was a nominal name, such a person was already very awesome in frontier.

Ask someone else's resume. The first degree is nanxiangya. Be good. When they answered the question, Zhang Fan felt that they had found the baby.

As a result, when he came back, he found that he was an exam master. In terms of the breadth of knowledge, he was estimated to reach a double doctoral degree, but in terms of depth, he was just a graduate student who barely passed his studies.

Especially in the pill country intestinal group of tea element, one week after receiving the doctor, they directly shook their head and returned it.

You know everything, you can't do anything. Really, Zhang fandunima was stupid when he learned the news.

"Report it. We are responsible to the end. In the future, we should learn from the experience of this failure. We can't go in at one end. It's an individual who pulls it back. We also have a brand now!"

.....

A week later, the second son of niaoshi called in person and the state established the allogeneic skin transplantation project. Moreover, the factory was built on tea, with an investment of 30 billion yuan. The fishing village SASAC invested a wholly-owned share, and the tea hospital had some shares, Li Cunhou had some shares, and Zhang fan had some shares.

It can be said that this is the country to play with Lao Li and Zhang Fan.

In addition, the frontier gastrointestinal Association unanimously recommended Lao Li as the only academician in the backyard this year, and Zhang Fan as the outstanding youth this year.

Zhang Fan doesn't feel anything. It's not that Zhang Fan doesn't like it, but that he contacted many big men as soon as he looked up.

Old man Lu, one of the most powerful foreigners in the north, old Wu, the most courageous in China, and all elder martial brothers, who still takes outstanding youth seriously.

As for shares, Zhang Fan thinks that a few tenths of shares can do nothing.

As a result, Lao Li stayed in his office, his nose running down his eyes.

Think about the sins you suffered in Jinmao when you were young and the depression after returning home. Now, really, it's like orphans for many years have parents. This feeling is that more than 40 men hide in the office and twitch like plague chickens.

You don't have to do anything. As long as you sign, everything is organized and arranged for you. Everything is supported by the tea vegetable hospital in front.

This feeling of being spoiled makes old men feel that their second spring is coming.

Moreover, not only the recommendation, but also the addition of a vice president, but also the executive vice president. In the past, the tea hospital was upgraded.

There are many people staring at the position, but Zhang Fan and the European Academy are firmly in control of the executive position. Now finally, the first executive appears.

Moreover, what is more unexpected is that people want to form a pharmaceutical enterprise integrating R & D and manufacturing directly with the Digital Research Institute and tea element hospital, and the factory is located in the tea element high tech Zone.

Of course, the school that Zhang Fan and Ouyang were thinking about was said to have been photographed by the general manager because of immature conditions.

This also makes Zhang Fan and them a little regret. At that time, the general manager said: the road of tea vegetable hospital is still long. We can't go on the project in a hurry, especially in talent training. Although the idea is good, it's not practical. I hope comrades will be patient!

Chapter 1351

The hottest season in the frontier has come.

The weather in the frontier is the same as that in the frontier. It's clear and straightforward. It's hot. You're half dead. It's cold. You don't dare to pee standing.

Zhang Fan is hot in the office, especially from more than 1:00 p.m. to more than 7:00 p.m. during this period, sitting in the office is like sitting in a pot for frying melon seeds, his ass is hot next to everywhere.

"Have all the cooling items in the hospital in summer been done yet?" Zhang Fan asked Lao Chen.

"The money has been paid, and it has been paid in spring!" Lao Chen looked through his notebook and found the record.

"There are more than 3000 summer subsidies for a person, but it's a little early. When the Spring Festival is over, we give summer subsidies to others. Are we a little anxious?" Zhang Fan wonders and asks Lao Chen.

"Well! At that time, there were a lot of small Treasuries in the hospital. Everyone was worried about problems and wanted to pay money clearly. Even the allowance for next year's nurse's day had been paid! "

Zhang Fan had long forgotten this. At that time, there was so much money in the hospital coffers that there was no place to go. Zhang Fan was deeply afraid that the government would come to borrow it one day, so he paid all the subsidies for the past three years early.

To tell the truth, the doctors in the hospital were stupid. Really, there was no such leader. Other leaders hated having to give you subsidies and wanted you to donate your salary. But Zhang Yuan is good. He directly subsidized and distributed all the festival expenses in the next three years, those recognized by the state and those not recognized by the state.

At that time, the hospital was like celebrating the Spring Festival.

However, although this matter was decided by Zhang Fan alone at that time, and even angry Ouyang went home to watch the series, now, in Lao Chen's mouth, it is everyone's collective resolution.

Because this operation is illegal.

"Money is money. Everyone is not rich. It's estimated that they are reluctant to spend some money. In this way, they won't pay money this year, but it's still necessary to cool food and drinks. You see, I'm hot and sweating sitting here."

Zhang Fan is not a generous person to tell the truth. Even a little stingy, because in his childhood life, his parents gave him the idea not to go out and win the grand prize, but to store it diligently.

Therefore, he knows more about ordinary people and ordinary doctors and nurses. He knows very well that they probably put all their money in the bank.

"What shall we send?" Lao Chen also knows that his little leader pays close attention to food and drink. In other aspects, he may not ask, but if you don't do well in food and drink, he will really be angry.

Therefore, Lao Chen won't take out the things that other units fool people.

"Mung bean soup every year is not good. This year, contact the frontier Red Star farm. Don't they have a cold drink factory? Ice cream, soda and all kinds of snacks, such as cold skin and jelly, and get a buffet in the hospital canteen. "

"Is there a charge?" Lao Chen asked again.

"Well, take it. If a symbolic person eats a dollar and doesn't take it, these goods will be ruined. If he collects more and is afraid that they will have diarrhea, he will take a dollar, but he can't take it out. If he takes care of the children, he will turn a blind eye. He won't encourage or oppose it, otherwise it will be unfair to the bachelors."

Zhang Fan thought about it and explained it to Lao Chen.

"Yes, there are too many doctors and nurses bringing children to work recently. You said that there are many viruses in the hospital. Adults have antibodies, but children can't. yesterday, Dr. Yang's children in the Department of Anesthesiology came to the hospital and got fever when they came home.

Dr. Yang quarreled with her husband. Today, our trade union found her husband's unit. "

Lao Chen said intentionally or unintentionally.

"Why, did you do it?"

"I didn't do it. I just swollen Yang's angry eyes. I can't do lumbar anesthesia today."

"What holiday do you say the school has?" Zhang Fan is also depressed. Private hospitals can not worry about this, but public hospitals are different. Zhang Fan has the right to ask questions. Even if his doctor is bullied by his family, he has the right to cross examine the leaders of the other unit.

It's like going back to the 1980s. Everything is organized. In fact, there are still such institutional units in the frontier, but they don't pay so much attention than before.

"Do you have any way?" Zhang Fan thought about it. There was really no good way. He didn't even have children himself. He had to worry about others. He also pulled an egg.

"Well!" Old Chen looked down at Zhang Fan and said nothing.

"Yes, there is no one else. You don't want to pull the children to be child labor!" Zhang Fan asked Lao

Chen with a smile, because Lao Chen looked like he was paying attention, but he didn't dare to say it. He was afraid to be known.

"Now the children of doctors and nurses are on holiday, causing trouble, getting sick at home, and doctors and nurses are worried about going to work. We might as well manage them in a centralized way. The old nurses in the education and health department are more than two years old and more than six years old. Now they are idle and can give it to them.

If you are over six years old, give it directly to the examination genius in the hospital! "

The women and children of tea vegetable are very powerful now, which makes the maternal and child health hospital unable to carry out surgery. Fortunately, tea vegetable hospital is not very concerned about education and protection. The Department is full of old nurses. Where gossip every day is equivalent to a nursing center.

So, let these old nurses show the children. There's no problem at all. Who's the bully on weekdays? He's naughty and powerful at home like a Jianghu bully. In fact, when he comes to the hospital, he's good enough to see someone in a white coat. He doesn't dare to eat, sleep or cry.

As for older children, doctors and nurses also go to make up lessons, but if you ask a doctor to make up lessons for these guys, it seems that you are overqualified, and you have to consider whether the doctor is happy or not.

A company with a staffing establishment is not like a private enterprise. If you step left and right, you will be criticized and fired by the boss.

The establishment unit, once you have the establishment, you come to work on time every day, and the unit leader wants to dismiss you, there is no door.

He can arrange you to see the door of the unit, but he can't fire you. He doesn't even arrange work for you, but he can't revoke your benefits.

If he goes too far, you pack up and go to the superior Commission for Discipline Inspection to make a floor, and he will persuade you to come back.

Really, why do Zhang Fan and his wife want to make a self-examination? It's just that they don't strictly control it. In a more popular word, it's their aunt who wants to make others happy when kneeling.

Zhang Fan also wanted many positions for the exam genius to go to surgery. The genius was so stupid that he could annoy his superior doctor.

When he goes to the internal medicine department, he can ask the internal medicine director to overturn, but you let him say that he doesn't know.

It's like how many ways to write the word "Hui". You say he doesn't understand it. The clinician who knows it may not know it.

You say he understands. You let him take care of the patient. For a patient with hypertension, he can list more than a dozen treatment schemes, but he doesn't know which is suitable.

It's such a wonderful flower.

Really, Ouyang has no choice.

But you can't really let a doctor go to see the gate. Even if you go to see the gate, Zhang Fan is not at ease. A thief scared the doctor to death. Who's NIMA.

When Lao Chen said this, Zhang Fan thought about it and nodded in agreement.

Then, the children of doctors and nurses, crying every day with their parents, came to work before dawn.

The school also pays attention to nine to five. It's not here. I come to work before dawn. I'm not obedient. The needles and pipes with thick arms are in the car. Scared to death.

The magic beasts who don't eat tofu or vegetables at home and lie on the ground when they disagree with each other have arrived at the hospital and are as good as cats.

Eat without washing your hands? On the contrary, come to aunt to teach you the seven steps of washing hands.

Really, this holiday, the children of tea vegetable hospital know that the leaders of the hospital are not good people.

And for the children at school, the hard times have come.

In class, this exam genius is really awesome.

From Chinese to English, from English can give you two sentences of maozi.

He is proficient in everything, mathematics and chemistry, and can do anything.

Three days, a small test, five days a big test, but also specially find the key to test and teach. Really, NIMA's group of children from the tea vegetable hospital think that the college entrance examination will be the day after tomorrow.

Zhang Fan looked at the doctor in the classroom changed from the conference room and nodded thoughtfully.

Really, an English grammar is as simple as one plus one. Zhang Fan vaguely seems to know the usage of this man.

In summer, there are many surgical patients.

Especially trauma.

Because the construction site started, smashed and bumped, and all kinds of accidents continued.

Moreover, gastrointestinal diseases have also increased explosively. Barbecue stalls, night markets, a meal of Hu eat and drink, and my anus has been taken off.

When the doctors in the Department of surgery and gastroenterology were busy and the doctors in the Department of respiration were watching jokes, a medical patient was sent to the Trent county hospital.

It was sent directly to the ICU for severe respiratory diseases, and then Li Hui, who was on duty that night, applied for a general consultation of the whole hospital.

After Zhang Fan took office, he made a reform. In the past, hospital consultation could only be held once a week at most. No matter what department, it could only be held once a week.

Then every Monday, the hospital was like a village where devils had entered, and everyone took care of their heads.

Later, Zhang Fan felt that this would not work. He directly changed once a week to a doctor. He had the opportunity to apply for a major consultation once a month.

Although everyone is more busy, it is not explosive busyness, but linear busyness, especially because every doctor has a chance.

Doctors have worked harder and won't apply easily because they are afraid of losing face. They often find ways in their own department first, and then find a superior doctor, a director and check the data. They often apply cautiously after several rounds of research.

So in this way, everyone was secretly promoted to work harder.

Li Hui's application directly passed the medical department, and then after the medical department reviewed it, it directly opened the full staff consultation.

The general consultation is during the day, and there is almost no night.

However, this time, for the first time in the whole hospital, a large night consultation was urgently sent out.

The directors' calls are centralized and unified, and the hospital information management department has been upgraded.

It is no longer a call one by one, just a button, and the computer sends out signals.

Lying in bed, Zhang Fan listened to Shaohua's Micro snoring and afterthought his majestic taste. The phone rang.

Press the open call button, "Dean, there is a critically ill patient in the Department of internal medicine. Now the bed doctor has initiated the whole hospital consultation, and the medical department has passed the audit." Of course, Zhang Fan's call was made by Lao Chen alone.

"OK, I see. I'll come now."

Zhang Fan jumped out of bed gently, just like a cat. Really, he went out many times in the middle of the night. Now Zhang Fan feels that he is about to practice his lightness skills!

Chapter 1352

In China, especially in Chinese families, what professionals say may not be accepted by their families. For example, an expert, there are thousands of people gathered outside to beg, but when he comes home, no one may listen to him.

For example, Zhang Fan never makes comments on the so-called health care awareness of his parents, father-in-law and mother-in-law. It's not that he doesn't care, nor that he has no filial piety, because he doesn't count, and no one listens.

"Hua Zi, I bought you royal jelly from the grassland. People say it's very good and nutritious!" Zhang Fan's mother, like the underground joint, said to Shaohua mysteriously.

The money was really spent. It is said that I got one month's retirement salary from Lao Tzu Zhang Fan. In fact, people said that eating beauty care and improving immunity, the most important thing is to help pregnancy! In the bee nest, only the queen bee can eat.

They also said that there was a female leader in the city who had been married for 30 years and had no children. He ate his royal jelly and gave birth to two fat boys.

As soon as I said this, the leader didn't have children for 30 years after marriage. Finally, twins. All the

factors of NIMA's online novel are complete. Then the old lady bought it at a high price. Moreover, the most important thing is to help pregnancy. It's still twins.

Zhang Fan said it was useless. The old lady lit Zhang Fan's forehead and said about women. What do you know!

Zhang Fan opened his mouth, picked up milk tea and drank two bowls! I couldn't say a word, but I could only say in my heart: how many people begged me to have a caesarean section!

Really, sometimes more than ten years or even decades of professional knowledge learning, at home, is really not as good as someone else's story.

This is relatively harmless.

The patient Li Hui applied for is quite special to tell the truth.

A three-year-old child had a high fever of 41 ° when he was admitted to the hospital. The child in his arms twitched like a fast breathing anesthesia.

The children's parents are cadres assisting Xinjiang. One is a water conservancy expert and the other is an exploration expert. They are both professionals who drill big valleys as soon as they go out.

The child is taken care of by grandma and grandpa. The old man is the old watch of Xijiang film and has never been far away in his life.

I don't know whether the children are spoiled or the environment is polluted. Anyway, the child had a fever during the day.

High fever, 39 °.

The child's grandmother took out the dog skin mattress, and then pressed it on the child, saying that she should cover her sweat, cover her sweat, and the child will be fine. Then he made some garlic scorched and mixed brown sugar water for the child to drink.

Then, the child seems to sleep more stably, except for occasional twitch.

When the child's parents came home, they found that their child was hot like a fireball and twitched a

plague chicken.

One, take your temperature, 41 degrees. The child's mother was stunned.

Thanks to the child's father's attention, he called 120 at the first time and the leader of tea vegetable organization at the second time. Crying!

Really, I'm out looking for minerals for the country, and my child is like this. I'm a man and have a strong sense of guilt.

Frontier people, especially frontier leaders, don't pay much attention to the education industry or medical industry, because you can't improve people's performance in the short term. No, even if you're strong, it's useless to produce 70 or 80 Qingbei in 20 years. People don't know where to go next.

However, experts in this field of energy attach great importance to it.

Then the leaders personally arranged for the children to come to the tea vegetable hospital, but they didn't go to the maternal and child hospital.

When the doctor in the emergency center saw it, he quickly contacted the doctor in the respiratory department for consultation. Li Hui's face turned green.

Heat stroke!

This thing, deadly. The rescue window is between 40 minutes and an hour.

More than an hour, you will die. You don't have to think about it.

While organizing the rescue, Li Hui opened the big consultation in his hand. A doctor's big consultation only once a year is very precious.

It will not start easily unless it is absolutely necessary.

In the middle of the night in the urban area, doctors are like young people in the Jianghu. The cars drive fast and become small planes.

If the mounted police had not sent out to control the intersection, it would have aroused the dissatisfaction of the motorcycle party.

Fever must be emphasized here. When you have a fever, don't press the sweat of quilt and coat. If something happens to NIMA, it will be fatal.

Once the temperature of the human body rises, we should find a way to cool it. Do you think the temperature is not high enough?

When the child has a fever, be sure to reduce clothing, ventilation and ventilation to reduce the body surface temperature. Don't feel like hatching a chicken and want to press all the quilts in the house.

Really, heat stroke in summer is often irreparable. When the patient arrives at the hospital, the doctor has no chance. The death rate is almost 100%!

Especially under the big sun, playing basketball and football, brother, if there is heat shooting disease, the first thing is rhabdomyolysis, and then followed by kidney failure, liver failure and MODS. Let alone all these come together, even if there is one, it will make the doctor's egg tremble.

And this heat radiation disease has a special name, called labor heat radiation disease. Once it is complicated, the death rate is extremely high!

When Zhang Fan came back, the rescue of the hospital had begun.

"What happened?"

"The child of the cadre who helped Xinjiang has a high fever of 41 °, and has been rescued now."

"Is it confirmed?" Zhang Fan asked again. Old Chen sighed, "heat stroke!"

Zhang Fan was stunned.

There are three kinds of heatstroke, which is the precursor of heatstroke. Drink sugar and salt water, ventilate and blow the fan.

There is also mild heatstroke. The body temperature has risen by 38 ° at this time. It should be treated in time.

The last is severe heatstroke, which is divided into three types: first, heat spasm, second, heat spasm and third, heat stroke.

Heat spasm refers to strong physical labor under high temperature and drinking a lot of water, resulting in insufficient salt supplement, resulting in paroxysmal spasm of limbs, abdominal pain and hiccup.

Heat failure is directly similar to shock, especially the elderly and young children.

The last is heat stroke. When explaining this disease in textbooks, the first sentence is that it is a fatal emergency.

To tell the truth, this disease is often difficult to cure.

"How long has it been rescued?" Zhang Fan asked as he walked.

"Twenty minutes." Lao Chen followed Zhang Fan's footsteps and reported quickly.

Just entering the door of the emergency center, the leader of the tea element organization came with two panicked young couples with glasses.

"Zhang Yuan, two experts have visited all natural villages for half a year for tea. Their children must go all out. They must use the best drugs. The treatment cost does not need to be considered. All the costs are supported by the government.

This is the president of the tea vegetable hospital. He is one of the best doctors in China. You can rest assured that he will be fine. "

The organization leader finished talking to Zhang Fan and introduced Zhang Fan to the young couple.

Zhang Fan didn't care whether the introduction was appropriate or not. He said directly, "no matter who, we will do our best. Don't worry. Now I'm going into the emergency room."

"Dean Zhang, you must save the child!" The child's father is a little better. The child's mother is soft and opens her mouth, just like eating and washing clothes. When she opens her mouth and cries, her mouth is full of bubbles.

Zhang Fan gently nodded and entered the rescue room.

Really, no matter how numb doctors are, they often resonate in front of the feelings of mothers and children. This is the reason why human beings can reproduce.

After entering the emergency room, Zhang Fan was very satisfied.

First of all, Xue Fei of the emergency center has participated in the rescue. The old residence of breathing has taken over Li Hui's rescue position. All the four King Kong of the respiratory department have participated in the rescue.

Ren Li in her heart and the doctors in her heart don't quite summarize all kinds of data.

The director of nephrology department also takes the pillars of the Department to protect the patient's kidney.

The head of the children's Institute, with a group of pediatricians, also began to calculate the amount of fluid in and out of children.

Within ten minutes, each department pulled up a team and began to work.

This speed, this speed in the middle of the night, really satisfied Zhang Fan.

The combat effectiveness of a hospital is not the number of published papers, but the spirit of response.

In the emergency center, Lao Ju's melodious and frustrating Chinese floated in the rescue room.

It's not his intention. This guy usually pays special attention to his accent when talking, so he speaks slowly and can't hear his accent. But once he speaks quickly, he can hear the smell of grassland.

"Chlorpromazine and promethazine are 25mg each, diluted with 100ml 5% sugar water, ready for dialysis. In the kidney, director Li, get numb, get ready for dialysis."

For heat radiation disease, the first thing is to reduce the temperature. The rectal temperature must be reduced to within 38.5 ° within one hour, and the failure of various organs should be done well during the cooling period.

To tell the truth, once the human body's temperature system collapses, the first disorder is the various organs. Because of the temperature, the first thing to dry up is the brain. Patients have high-temperature convulsions, which are manifested in muscles. In fact, the brain is stupid.

For the rescue of internal medicine, Zhang Fan easily won't give instructions or suggestions.

He knew that even if his opinions were unreasonable, they would be considered by the doctor in charge of the rescue,

Five nurses surrounded the child. One was to ensure the child's venous channel. Venous needles were all hung on the baby's lower limbs and head.

The three nurses bent down and moved neatly. Like the three women kneading dough, they grabbed the child's limbs and massaged his chest with oil. This is to stimulate blood vessels, expand blood vessels, accelerate blood circulation and promote heat dissipation.

In the child's footsteps, there was a huge desktop fan. The last nurse, with gauze in her hand and cold water, wiped the child's body surface, armpit, head and groin. While wiping, she let the fan blow and accelerate evaporation.

Doctors in various departments have gathered the drugs of relevant departments around Laoju. Now Laoju should not only consider cooling down, but also consider how to protect the patients' organs,

"We must protect the organs. This high temperature has damaged the organs. Now we can't damage the organs again." The director of the children's Institute, suggested to jujube.

Zhang Fan stood looking at the doctor's advice, looking at the children and taking time to look at Lao Ju.

The old residence has long lost its former pretentious elegance. It has no shirt, tie and hair gel. It is a

middle-aged bald uncle with a slightly fat belly trembling on his loose pajamas and trousers.

The sweat beads on the forehead suggest that Lao Ju is highly nervous.

This kind of rescue is not linear. Sometimes it is obvious that children don't twitch. As a result, as soon as they turn around, they have respiratory failure, heart rate burst, and tsunami like roaring failure of various organs. Therefore, every medical order is the door to life and death!

"High dose hormone shock!" Lao Ju bit his teeth and shouted out.

The child is so small, a large dose of hormone shock, really, too dangerous. The problem now is that children may die of organ damage and failure. If they don't rush, brain edema and infection will follow!

Chapter 1353

Few people have seen the rescue of heat stroke. Even doctors and nurses have not seen much, because patients are often cold when they are sent.

Many people don't understand. For example, a person has a fever and his skin is too hot to touch, but the patient says it's cold, or even says it's too cold.

In fact, it is the temperature center that increases the temperature. The brain is a bully. Unlike other organs, it will fight bacteria and viruses. This thing is especially easy to surrender.

With bacterial and viral infections, the brain feels dangerous, and then says to the temperature center to raise the temperature, and then the center will raise the standard body temperature to 40 degrees. Then, the muscles begin to tremble and produce heat.

Shaking is not a joke. When the human body raises its temperature, it actually depends on shaking. Wearing clothes is just to keep warm.

At this time, it does not mean that if you cover him with a thick quilt, he will be safe. At this time, the temperature rise is dangerous. At this time, instead of covering him with a thick quilt, he will cool down. Even if he is uncomfortable, he will have ice in his armpit and lower groin.

Because high temperature is like a beauty to the brain. Since then, the king will not be early. Sometimes he will be stupid when he burns. In fact, the brain, like the eyes, likes cold and doesn't like heat.

At this time, the most important thing is drug intervention cooling! Don't think about the heat and sweat covered by the quilt. It is estimated that when I was a little old, I had Chai Juan Tongding on my ass. this is the previous antipyretic medicine. It's not very useful now. Because cooling is effective, but it also has great side effects.

Many old people, especially those who have brought many children, can tell at a glance whether their children have a fever or are comfortable. For example, a boy's egg is like a walnut when it is normal. It is full of egg wrinkles. Where it is hung seems to be hidden.

Once the child has a fever, the walnut becomes an egg cake and spread on his thigh.

This is a common cold with a fever. If the weather is hot and the child has a fever, although he is shaking, you can cover him with a big quilt and cure it. It means that your child is dying. If he can't get it right, it's too late to cry.

Generally, the child's high temperature exceeds 38.5 °, and parents without medical background should not listen to all kinds of Jianghu tips at this time. They should hurry to the hospital. Really, the child is yours, not someone else's.

When the temperature is higher than 40 °, a professional doctor must do it in the hospital. It's enough for a surgeon to do it.

Once it reaches 41 °, it can only be handed over to famous doctors in the hospital.

The heat radiation disease can only be carried out by experts from all departments of the hospital, and it has been done, but it is still unknown. Generally, it is impossible to do it with a high probability.

Juma Buick, Lao Ju, although he doesn't have a team in the hospital, he is arrogant even Ouyang. At ordinary times, the respiratory department eats more and occupies more, protects the calf, and the pace of the Department. I don't know if it is an independent specialty, but Lao Ju everyone knows that this guy has a big temper and great ability. He is the second eldest brother. He is full of tea. He doesn't bird except Zhang Fan.

Now, under the disorderly hair, there are layers of cold sweat, but Lao Ju steadily stands in front of the children. Although the time for each doctor's order to speak is getting slower and slower, he didn't let go and didn't retreat. Really, this guy rushed in when he faced SARS. Later, everyone said that he was proud of his achievements, but the doctors who had personally experienced life and death are different.

A stable doctor is not comparable to other doctors.

Really, in the hospital, serious experts and non serious experts can really be distinguished when you look at them with a steady eye.

Zhang Fan stood quietly and waited. In the emergency room, all the other doctors were mobilized.

After a while, old Chen came in again, "Zhang Yuan, the leader of tea vegetable organization wants to express the instructions of his superiors."

If at ordinary times, Zhang Fan will go out with great cooperation. Even if he is impatient, he will listen with a smile. Although there are only a few cliches, the superior pays attention to our relationship. I hope you will work hard. But every time Zhang Fan was very serious.

Old man Lu told Zhang fan that it doesn't matter whether you have a city government or not, but you should have self-restraint. Like me, when others talk about me, they should also say that the old man is gentle. You have a black face, so you'd better pay more attention.

Although he said it with a smile, Zhang Fan thought the old man was right.

But now, Zhang fan can't hold the fire. When was the most proud person in the old house so flustered? Even when he was a meatball expert, Lao Ju wasn't so flustered, but now where was Lao Ju like a proud rooster in the past.

Now it's like a chicken that failed to step on an egg. To tell the truth, it's desperate. This kind of rescue is very hurtful.

That's why when doctors write their resumes, the focus is not on their professional titles, but on having presided over the treatment of that disease.

Do you think it's easy to write something into your resume?

Don't take the government too seriously!

Therefore, Zhang Fan loves his doctor and his nurse. Look at the little nurses. They run one by one without stopping.

But now, NIMA asked my doctor to go out and listen to your instructions. Come if you have the ability!

Zhang Fan is angry. Really, he wants to go out. Lao Chen sees that something bad has happened. The little Lord is angry. Ouyang often gets angry, but Zhang Fan rarely gets angry, so Lao Chen won't let Zhang Fan go out against Zhang Fan, and then hurriedly called Xiao Chen, director of the medical office: "hold the dean. If the Dean goes out today, wash up and wait for your resignation!"

"Let them go!" Zhang Fan was pulled to no avail, but he shouted at the gate. People outside the door listen really.

To tell the truth, the organization leader didn't deal with the tea vegetable hospital much. He didn't like it in the past. When he liked it, he couldn't rise up again.

Therefore, when the bird market also sent a call of concern, he felt that he should show himself in front of his family. Whether he was successful or not, he should show his enthusiasm and concern.

As a result, NIMA was scolded and rolled away through the door. His face is purple.

After Chen Sheng went out, looking at the leader, he didn't know what to say. "The dean is a little worried. This, this, he's scolding me!"

The organization leader's teeth were broken. NIMA was on the tea vegetable chassis. Unexpectedly, she was scolded today. She was still naked.

He thought for a long time, but he didn't say a word and shook his sleeve and left.

It was not that he endured, but that he found that he couldn't take tea to the hospital.

Really, here he found that his NIMA seemed to be on the same level as others. "The leadership is also stupid. A broken hospital is even under the provincial management. Why not hand it over to the central government! It's really nonsense!" The leader of the organization left the hospital swearing.

Here, the family members watched the leader go, and they were even more frightened. Their frightened eyes were like a helpless child.

Lao Chen looked at the leader and left. In fact, he didn't rest assured. Really, if in the past, he did not care about the president's ideas, he had to curry favor with the organization and leadership first. There is a good saying. Why should he work hard in life is not because he has the ability to refuse others.

Now I didn't expect that the tea vegetable hospital has gone too far. It not only has the ability to refuse leadership, but also dares to speak unkindly. However, Lao Chen looked at the tail lamp of the car and was still secretly happy. "Zhang Yuan doesn't get angry easily. If he gets angry, it's an atomic bomb!"

Lao Chen didn't linger either. He quickly said to the child's parents, "don't worry, the hospital will go all out. You should have confidence and confidence in the doctor."

This NIMA, now she has no confidence and no way. Tea is so far from the bird market

Hormones, large doses of hormones enter the child's body.

Hemodialysis has also begun.

Hemodialysis was started with sterile saline at 9 °C.

Once the human system breaks down, there are three levels to break, one is to break through, two is to infect, and three is to recover.

At present, the child is facing shock. His left hand is death and his right hand is survival. In the middle is an egg position for Lao Ju to dance. Once he can't dance well, any drug is uncomfortable, or the drug has organ failure, the egg will be broken.

When you skip the shock level, you are faced with the infection level. You can't avoid it. The human body's function is greatly collapsed. After you save it, the body's immunity directly seems to change from 1W to 0, especially for young children. At that time, they are clearly awake with big eyes.

They would raise their little hands to ask for their mother. As a result, the infection appeared the next day and the third day, and the child was directly in a coma with high fever again.

When these two levels all rushed over, it was found that liver failure and necrosis, or kidney failure and necrosis.

Really, a covering sweat can have a chain reaction to this extent, not frightening people.

"Old house, use what you should use. As long as you choose well, I will fully support you!" Zhang Fan is irritable. He can behave in the face of leaders, but he can't be irritable in the face of clinicians.

He was agitated, and the clinicians involved in the rescue were even more flustered.

"Good!" Lao Ju subconsciously said, and even Zhang Fan didn't look back.

He's too nervous, really.

.....

"Black buy river finally rose up to curse!"

"Don't gloat. When Zhang Yuan shows his teeth to everyone like Ouyang, you should cry!"

"Hey, it's not easy for Zhang Yuan to be the president at such a young age. I want to help him share the pressure!"

The little nurses from other departments gathered together to gossip about Zhang Fan.

When doctors face Zhang Fan, they respect him more. Even if doctors in internal medicine are great, they think Zhang Fan is eccentric.

But the little nurses are different, because Zhang Fan seems to be like them. He was a little doctor yesterday and suddenly became the Dean today.

Therefore, there is a trace of regret in kindness.

In the hospital, if a nurse captures a doctor, to tell the truth, other nurses will definitely envy it.

Don't think that the little nurses in the hospital are Bai Fumei. In fact, they are all children of ordinary people. It's good to have a stable husband.

Zhang Fan was an opportunity at the beginning. As a result, this opportunity ran out to look for food. Therefore, especially the young nurses of school-age marriage and childbirth, they often black Zhang Fan in words.

For example, Zhang Fan's nickname in the mouth of nurses: Black buy buy river is estimated to be a secret that everyone else in the hospital knows except a few leaders.

Of course, doctors won't say it easily. If Zhang Fan knows it, he won't mix it up in the future.

However, the little nurses are not afraid. Anyway, they have no staffing. In the end, they are just nurses. And even if Zhang Fan knows, he won't quarrel with the little nurses!

Chapter 1354

Rescuing, rescuing, rescuing, in fact, the most complicated work of the intensive Department of the hospital is rescuing. If a patient who does not need rescue and a doctor with a mortgage can manage 50, this is definitely not an exaggeration. For example, Li Hui is in the respiratory department. If there are no critical patients, he even wants other doctors to go to the clinic. He receives patients in the Department alone.

However, if there is rescue, a doctor can manage all of them. Amitabha! If there are critically ill patients in a critical department, it is relatively easier than that in an ordinary department.

Because the mode of severe department is different from that of ordinary department.

The tube bed mode of the intensive care department is no bed separation, everyone goes together, and the group fight mode. Moreover, the Department has complete tools and instruments, throat cutting and intubation, and there is no need to call the anesthesiology department. The intensive care department has done it by itself, including ventilator, extracorporeal circulation, electric shock pacemaker, and everything. It is almost a pocket version of a small hospital.

The general departments are different. Doctors fight alone, especially in internal medicine, the main treatment and the auxiliary high, which may not affect the main treatment.

But once rescued, almost all doctors in a department have to go up to help. Then, the result is that the Department can't do anything that day, so it is rescued.

"Blood pressure up, blood pressure up!" Ren Li said softly and briskly, and even the joy in her tone could be clearly heard.

"Come on, look at the liver and kidney function." Lao Ju was also excited. Sweat beads flowed down the bridge of his nose, like tears.

If the liver and kidney function is healthy, the rescue is effective, and there is no organ failure or drug failure.

The difficulty in rescuing children is here.

When you need a large dose of drugs, you're afraid that your body organs can't accept it.

Really, this kind of thing is too difficult to weigh.

Fortunately, the child carried it.

The child came with the doctor.

This is the doctor's greatest expectation.

Doctors, especially doctors involved in rescue, whether they usually receive red envelopes or not, the atmosphere of the Department will let everyone participate from the heart during rescue.

This moment, in fact, is very similar to the retrograde of firefighters and the charge of soldiers.

Adrenal hormones soar. It's lucky and unfortunate to have this opportunity in life.

"Renal function is normal!" The nephrologist's report.

"Liver function is normal!" Report from the gastroenterologist.

"The child's temperature drops, heart rate, pulse and breathing tend to be stable!" The director of UNICEF also began to report.

"Continue, massage continues, we must promote the child's circulation, antibiotics, improve the level of antibiotics and prevent the tide of infection! Is this kind of medical record difficult? I think it's not difficult at all. I often tell doctors and nurses in the Department that we should have confidence and not be blindly timid.

For example, let's see, I didn't pay attention today. The patient passed the dangerous period. Give me a drink! "

After this hurdle, Lao Ju was full of energy, and NIMA's proud expression came out again.

Ouyang Aojiao looked at everything with white eyes.

Lao Gao feels more modest when he is proud and charming.

Old Chen Aojiao's time is to make you feel that he speaks better.

When Lao Ju was proud and charming, he raised his chin directly, as if the headlights of the car were raised. NIMA looked at people with her chin.

Really, it gives people a feeling that they want to kill this big tongue with a fist.

But now, Zhang Fan thinks Lao Ju is very cute.

Yeah, can't you be cute. Heat stroke, the first case of successful treatment since the establishment of the tea element hospital, can be said to be the first case of carrying forward the past and opening up the future. Can he not be proud and charming!

Of course, no one said at this time that his eggs were shaking and his face was white as if he had been dead for a long time. No one said the same hairstyle as the chicken nest, and no one disliked his boasting force.

Because now, this NIMA can blow anything, and people believe everything, because he succeeded!

Nonsense house, after drinking a mouthful of glucose, he began to blow his thoughts at that time, what drug order, which he had budgeted in his heart, and there would never be anything.

In fact, this is the sequelae of extreme tension after the decline of adrenaline, just like looking for someone to boast.

Doctors are human!

Heatstroke, no matter severe or mild, recovers very quickly once it is corrected. For example, if a mild heatstroke is carried to the ground of the shadow of a tree, you don't need to take a pee. People will be fine.

Once the heat radiation disease is corrected, the patient's body temperature decreases with the naked eye.

The little doll lying on the rescue bed also began to have spirit. The infusion needle on the head, hands and feet were like an antenna baby.

When they were brought in, the child twitched like a barbecue on the fire, all twitching and shrinking into a flesh pimple.

Now, the child stretches out, fat little hands, fat little feet, pedaling with refueling. Looking at a group of adults in white clothes around him, he doesn't dare to cry, but wants his parents.

"Milk powder!" The director of the children's Institute gave direct instructions.

Lao Ju glanced at the director of the Institute reluctantly, which meant that NIMA Lao Tzu was the commander in chief.

And the director of the children's Institute doesn't care about him.

Zhang Fan looked and felt that it was time to end the time for the great gods to get together. These experts, in fact, look down on who. When rescuing, who comes first will be the general responsibility. Once it is over, once it is successfully over, it will generally be dissolved early.

But Lao Ju boasted too much, and others were not convinced. Now there were sparks everywhere, and Zhang Fan hurried to take action: "well, well, let's have a rest. President Ju stayed here to continue hosting, and other experts hurried to find a place to rest.

If you want to go home, the hospital will send a car home. If you don't want to go home, go to the office to have a rest. If you have to go to the outpatient clinic tomorrow, go to the outpatient clinic and go to the ward round. Have a rest quickly. Young doctors from various departments are left to exercise here.

Experts hurry to rest. "

Zhang Fan accompanied the directors out of the rescue room.

Lao Chen has explained his condition to the family members of the child.

The directors of internal medicine are all about 40, especially the director of the children's Institute, who

is almost 50.

In front of these people, Zhang Fan is always polite.

The hospital is actually playing with these people.

Without these people today, it would be useless to get the most advanced equipment in the world.

These people can't practice to such a level without killing 70 or 80 people.

In particular, the application of internal medicine and medicine is really learned. The experience in this thing can only be understood by yourself. Even if I teach my son without a lot of experience, it is useless. The doctor's wife thinks that the old guy is cheating and wants to give it to Xiao San's son. She scratches the old expert's face every day.

This is as like as two peas in war, thousands of thousands of books, and thousands of thousands of people. Those who engage in technology are not leaders. Those who engage in leadership can rely on imitation the day after tomorrow, while those who engage in high technology can't do without a solid foundation.

Out of the emergency room, Zhang Fan didn't want to talk to his family to comfort him. It's no use. The child has been saved. You don't say that people have been very comforted. You just wanted to enjoy people's gratitude in the past. It can't be saved. You used to exaggerate. People's children are dead.

Originally, Zhang Fan wanted to go to the administrative building to make do with the night, but seeing Ren Li and Yan Xiaoyu go to the administrative building, Zhang Fan thought about it and didn't go again.

There are great differences between female leaders and male leaders. Male leaders seem to pay more attention to the chassis. For example, Zhang Fan, there are rest places in the operating room, orthopedics and general surgery. Just like Xiong Teddy, they want to pee out of their legs wherever they go.

The female leaders are different. Although Ren Li is mainly in her heart every day, in fact, her office in the Department of Cardiology has long been withdrawn. There is only one office in the administrative building. The newly appointed director of the department doesn't listen to any advice.

Maybe that's the difference between men and women.

Of course, watching the two female leaders go to the administration building, Zhang Fan subconsciously changed places. Zhang Fan went to the general surgery department.

Because the general surgery floor is a little lower than the orthopedic department. Without saying hello to anyone, he quietly got out of the elevator and quietly wanted to enter the office.

As a result, the corridors of ordinary foreigners are full of patients. There are too many people. The air conditioner can't be used. There are huge fans at both ends to blow.

Because of the promotion of general foreigners in the tea vegetable hospital, especially the intestinal group in marukuni, the signboard of the golden mean University, and the addition of Zhao Jingjin, the general foreigners group seems to have become the boss of the frontier. The most important thing is that there are no general foreigners in the frontier.

The people in northern and southern Xinjiang have regarded the general surgery of tea vegetable hospital as the final treatment node. So it's overcrowded.

Those waiting for surgery, those who had surgery, those who were hospitalized for re examination, those who moaned, snored and smelly feet in summer. The smell of disinfectant in the corridor has been overwhelmed.

Moreover, one will call a nurse, one will call a nurse, one will need to pull out the needle, one will have a fever, and one will have pain.

In the middle of the night, the little nurse ran under her feet like an aunt who went to the market in the morning.

"Black buy, er, Zhang Yuan!" The little nurse said hello to Zhang Fan with her tongue out.

"Is a nurse on duty now?" Looking at the little nurse's red eyes, the tired wrinkles on her young forehead are as serious as a 40 year old aunt. Zhang Fan specifically asked.

"There are too few nurses in Corey, so we can only do so reluctantly. Yesterday, the head nurse quarreled with the Department Director, saying that the bonus for nurses was too little. You have to keep it a secret!" The little nurse looked around and found no one, mainly no other people in the hospital, and quietly told Zhang Fan.

"Hehe, if you don't invite a big meal, you'll be sold tomorrow morning. All right, hurry and get busy. After you're busy, have a rest early. Look at the wrinkles around your eyes and get old! That day, we called on those who went to the hospital together to have a meal. "

Zhang Fan didn't say anything to the little nurse. He entered the lounge and Zhang Fan couldn't sleep.

The eyes and brain are tired and want to sleep, but they can't sleep. With their eyes closed, the little nurse looks like a race. It hurts. Really, especially after one night, the little nurse is as old as an aunt.

Zhang Fan really loves it.

"Did you sleep?"

"No, what's the matter with Zhang Yuan, you said." Listen, Lao Chen seems to be installing 13 in the emergency center. Zhang Fan didn't say much. This thing can't be installed in the hospital without 13. It's like people in the hospital are unreasonable.

"Go to bed early. Call our financial department to my office tomorrow and invite all the leaders at home. The salary of ordinary doctors and nurses is too low. We have to find a way, or there will be a brain drain. "

"OK, Dean, if you don't say it, I'll find time to tell you. You're so busy all day and can notice such a small place. Really..."

"All right, Lao Chen, save it. I'm tired and go to bed quickly!"

Although Zhang Fan interrupted Lao Chen's words, he was still happy. Really, sometimes this kind of naked flattery, you know he was intentional, but you can't help being unhappy.

No wonder everyone likes talking.

Chapter 1355

In the morning, Zhang Fan slept all night in the general foreign affairs office. Although he slept alone, there were always sleepless people walking around in the corridor, wearing slippers and kicking. In the corridor in the middle of the night, the sound was not loud, but it was really scary.

Get up and wash. Although this office has not been here for several weeks, the head nurse has the key. People will change the sheets, quilt covers and even toiletries regularly. Just after washing, open the door of the office.

The head nurse of the general foreign school smiled and walked towards Zhang Fan with milk, steamed stuffed buns, fried dough sticks and side dishes.

"Zhang Yuan hasn't been here for a long time. Today he bribed the president and took the back door. I hope the president will care about us more in the future."

"You want to go through the back door with two meat buns. You don't take me as a leader." Zhang Fan smiled to open the way and let the head nurse into the office.

The head nurse looked at Zhang Fan's face and didn't get up angry, so she answered, "then add two more meat buns!"

Zhang Fan skimmed his mouth and ignored her. "Have you eaten?"

"No!" The head nurse glanced at Zhang Fan.

"Then eat together."

Although nurses and head nurses have one more word, their status is obviously different. For example, the nurse is a soldier, the head nurse is an officer, and the height of the ceiling is different. The head nurse has more ways.

For example, in the future, you can go to the hospital feeling office, or to the nursing department, or even go to the party office and logistics. In general, the head nurse has a staffing. Of course, it is not necessary for super large hospitals. At present, all the head nurses of tea vegetable hospital have a system.

The head nurse took the initiative to clean up when she entered the door, wiped the table, set chopsticks and had a breakfast. It was like having a big meal. There was momentum anyway.

"Are you busy in the Department recently?" Zhang Fan took a bite of steamed stuffed bun, picked up the milk and asked.

As soon as the head nurse listened, she put down her chopsticks, wiped her mouth and immediately entered the working state. Such people joke and work. To tell the truth, the Department Directors in the hospital may have bad Eq. But the head nurse's EQ of each department is absolutely explosive.

"Doctor group, although I don't know much about it, I probably know a little. Ma Yichen, doctor Ma caught a cold a few days ago and went on the night shift with drops. Dr. Wang Xiaoming's wife had a big stomach, but the marriage leave was not approved. She held a wedding on the weekend and then came to work. A radish a pit, the doctor looked at a lot, when now can carry the girder or just those doctors.

Our nurse team is even more serious. There are four pregnant women. They can't let others go to treatment. They can only go to the administrative class, but two more children have been born at home. Now there are more and more new technologies in the Department, and the new nurses can't work at all.

When I'm busy, I can't wait to grow four hands. "

While eating, Zhang Fan listened and said nothing. The head nurse said, looking at Zhang Fan's face.

But she was disappointed. There was no trace of expression on Zhang Fan's face, as if she hadn't heard it. The head nurse sighed in her heart: "this guy is becoming more and more sophisticated. It's a pity to have my meat bun!"

After eating, Zhang Fan attended the shift handover of the Department. The doctors and nurses of ordinary foreigners were not surprised at the appearance of the dean. Even Lao Li of ordinary foreigners was going to arrange two operations for Zhang Fan.

"Not in the morning. I have a meeting in the morning. Please arrange two afternoon surgeries for me. You're too busy!" Zhang Fan said a word to the director of general foreign studies. After attending the shift handover, he returned to the administration building.

"How's it going? Did you find out anything?" Lao Li, a general foreigner, and the head nurse got together and whispered.

"No, he's getting more and more sophisticated now. Not only his words fit perfectly, but also his face hasn't changed at all. It's just that his appetite hasn't changed. It's still so good!"

"All right, go to work!"

.....

In the administration building, all the section chiefs of the finance department have arrived.

The section chief of the tea vegetable hospital and the section chief of the branch are all sitting in Zhang Fan's office in the face of danger. Generally speaking, in ordinary units or enterprises, the section chief of the finance section is definitely the core figure in the leadership pocket.

But the tea vegetable hospital is different. Since Zhang Yuan was in charge, he did not care much about finance. At the beginning, Ouyang supervised it. Later, Ouyang was angry and threw it to Lao Chen.

For the finance department, Lao Chen, that is, the Tibetan mastiff guards the door and only gets in but doesn't give up. Now when the president summoned them on such a large scale, he summoned the finance personnel for the first time. Several section chiefs, especially the section chiefs of our hospital, all looked white.

Isn't the Dean changing?

"Here we are! I've just finished my shift in general foreign studies, and I haven't delayed your work. " Zhang Fan enters the door with a smile.

Everyone hurried to say no. Lao Chen immediately began to make tea. How many times has Zhang Fan said it. As a member of your team, you look like a secretary, but Lao Chen turns his mouth and laughs that he will go his own way.

His attitude made several financial offices fidgety. "The power of Zhang Yuan is really big. Even the team members can only pour water and serve tea!"

"All the gods of wealth, talk about how much money everyone has now." After receiving Lao Chen's tea, Zhang Fan asked with a smile.

After looking at the section chief of the hospital, the section chief of the hospital immediately took out his notebook and put on reading glasses: "at present, there are 635.89 million in cash. The payment for the second phase of the decoration project of the Institute of orthopedics has not been paid, and the bonus next month has not been paid. In addition, whether our hospital has a reserve for the current allogeneic transplantation project or not, The leader has no instructions yet.

If we don't need the reserve fund, then we will have 600 million left after all settlement... "

Zhang Fan didn't expect to have so much money.

When Zhang Fan was meditating, the chief of the Finance Department added: "the health special fund subsidy of the tea vegetable government in recent five years has not arrived at 80%, and the financial subsidy of the bird market this year has not arrived at the account."

"President Chen, after the meeting, organize the clearing personnel. Those in arrears must arrive as soon as possible. The government owes money, and we are also his creditors!" After hearing this, Zhang Fan joked that money belongs to money. The national law clearly stipulates that why don't you give it to me!

I didn't get my money.

In fact, the hospital's accounting system is different from the enterprise's accounting system. The hospital's is the receiving and sending accounting system, not the right and responsibility realization system.

To put it bluntly, for example, the tea vegetable hospital built a building and spent 300 million. As long as the building is not put into use, the cost will not be included in the cost of the hospital. Of course, the government will not give you subsidies.

The hospital can only pay in advance. Therefore, the accounting of the hospital can not reflect the profitability.

However, if the tea vegetable hospital has no international medical department and no special ward, the majority of its income still depends on government subsidies. In the past, most of the income of

hospitals came from selling drugs and examination.

Now there is no difference in the price of drugs and the inspection cost is greatly reduced. In addition to the slight surplus of large hospitals in big cities, in fact, most hospitals are at a loss and can survive by relying on the government's milk every day.

But the tea vegetable hospital is different. In the past, Ouyang ate more and accounted for more. In fact, it was just a little subsidy. There were no less than three melons and two dates left throughout the year.

Later, after the international department and the special needs department got up, the hospitals didn't see the subsidy of tea element.

Hospitals, how to say, are enterprises and administrative units.

For example, the doctor's treatment in the hospital, in addition to the settlement fee, the hospital pays for the rest of the villa and the work of the doctor's lover, which are purchased by the government and handed over to the hospital, and then the hospital arranges for the doctor.

For example, although hospitals have the right to recruit independently, the number of available personnel is controlled by the government.

Now the treatment of doctors and masters has gone up, but the treatment of ordinary doctors and nurses has not gone up.

Now Zhang Fan also noticed this piece.

"Zhang Yuan, President Gao is in charge of this piece." Lao Chen reported to Zhang Fan.

"Let director Gao come back and go to orthopedics. Now the Institute of orthopedics has transferred most orthopedic doctors, and there is no one in orthopedics. If you arrange powerful people to fight with the government, director Gao will be bullied. "

Zhang Fan gave orders directly.

"OK, I see." Lao Chen nodded.

Asking for money, no matter who you ask for it, is not a good job.

Especially now that the tea vegetable hospital is decoupled from the tea vegetable government, what people think now is that they can rely on it. If they can't, they will push you to the superior government. They have a bit of a bachelor's posture. They don't want money or life.

After the section chiefs of several branches summarized the cash, Zhang Fan pondered.

Everyone is quietly waiting for Zhang Fan.

"I have an idea!" After pondering for a while, Zhang Fan spoke.

Then several section chiefs immediately sat up straight and began to record,

"Let's not put it on paper first. It's just a simple idea for me, which needs to be discussed by professionals.

The grass-roots doctors and nurses in our hospital should increase their income. Now how can they reasonably and legally increase their income? "

As soon as this was said, everyone looked relaxed at last. As long as it wasn't a personnel change, everything would be fine. It was a simple thing to send money.

For Zhang Fan, this thing is very difficult. When we give some bonuses, the superior leaders call and tell Zhang Fan openly and secretly, brother, it's illegal for you to do this. You make it difficult for us to do it.

This is also the reason why the superior has made great efforts to crack down on small Treasuries, because work is to serve the people. Why do you take more than others?

Even the bonus has a limit.

So the tea vegetable hospital has so much cash that it can't spend it.

"For this tripartite investment by the fishing village SASAC, we can attach the identity of some grass-roots medical staff here, such as technical consultants, so it is more convenient to pay the bill. But taxes are a bit of a headache.

Also, don't many tea vegetable pharmaceutical enterprises need us to take shares in tea vegetable hospital? Although it is not allowed by policy, we can divest assets, focus on laboratories, take shares in pharmaceutical enterprises, and then let doctors and nurses take temporary posts in laboratories, which can also form labor income. "

Several section chiefs found a way to spend money in minutes. Zhang Fan listened very carefully, but NIMA didn't understand from beginning to end.

"Left hand down right hand, but also pay tax? Is there any royal law? " Zhang Fan understood this sentence!

"Well!" The sweat of several section chiefs came down.

I'm sorry to say, otherwise, you know the king's law?

After waiting for the meeting, Zhang Fan called all the leaders at home for a meeting.

In a word, we should improve the treatment.

Ouyang didn't understand, "the income of our hospital has been good!" The old lady is really stingy.

However, she didn't understand it at all. Although she was reluctant, she didn't object, because Zhang Fan is in charge of the family now.

Ouyang looked at Zhang Fan and the way his son sold yetian. He was distressed, but he didn't object.

Because she knows that now is the era of Zhang Fan, and can no longer interfere with Zhang Fan's ideas. After all, the future still depends on Zhang Fan.

It's better to suffer a small loss now than to suffer a big loss in the future.

According to Ouyang's idea, it's a pity that so much money and wages are paid. Isn't it good to build a building? How good and magnificent it is to build several inpatient departments!

Several other leaders will not object even if they disagree.

For example, Lao Gao's ideas are very similar to Ouyang's.

Chapter 1356

"Head nurse, is Zhang Yuan going to fire me?" Bayin cried to the head nurse in the operating room.

"Nonsense, I'm going to be the head nurse. I'm still like a child. How can you convince the people below you?" The head nurse in the operating room scolded Bayin dissatisfied.

"If I'm not the head nurse, I want to be a soldier for you. I'm not afraid of anything when you're here! " Bayin put her arms around the head nurse.

The head nurse looked at her and sighed, but her heart was still sweet, "OK, did you hang up in the intestinal laboratory?"

"Well! I'm not going to the lab, I just want to be in the operating room. " Bayin pursed her lips. If she only looked at her face, she was really a Lori with white skin and charming facial features. But when she looked below her neck, she was obviously a nutritious young woman.

"Silly, this is the way Zhang Yuan gives you money. Look at this time, almost all medical staff below the middle level have additional temporary posts."

"Where did you hang up, head nurse?" Bayin asked curiously.

"Zhang Yuan asked me to choose, either hang up or prepare to take over the nursing department." The head nurse looked around and whispered to Bayin.

She knew that Bayin followed Zhang Fan in her life and death. When she went abroad, Bayin almost died in the fire when fighting the fire. Although Zhang Fan scolded Bayin like a wolf driving out a rabbit in surgery.

In fact, she knows that this is to cultivate Bayin. Otherwise, Zhang Fan's current position will specifically target a little nurse? make fun of!

For Zhang Fan's nostalgia, the head nurse was also particularly grateful. This time, Zhang Fan specially asked her. Don't look at a simple question. This is care. This is that the leaders have you in their hearts. This shows that you are my person!

"I've been a nurse for so many years. I chose to take over the nursing department. I also want to have an office, sit in the office and feel the taste of being a leader."

The head nurse said with a little emotion.

"Head nurse..." Bayin leaned against the head nurse like a child. She didn't know what to say.

Because she also knew that this was the nurse's final outcome.

"It is estimated that hospital Zhang will solve your staffing next quarter, and the general nurse will return. You should be careful this time. Don't be ignorant all day! "

"Well, I see, head nurse. Why don't I send you a cow's head and others to Zhang Yuan? I'm afraid he'll scold me and let my family learn from Feng."

"All right, don't pretend to be stupid in front of me. You, go and hurry to the operating room. Recently,

the new young nurses must check it. The concept of sterility in the operating room must be emphasized repeatedly. Whoever makes mistakes must not be humane. Go! "

.....

It is said that it is not allowed to be implemented on paper, but this kind of thing can not be kept secret. There is a joke in the Jianghu that there is nothing to keep secret below the county and regimental level.

Zhang Fan, they had just discussed a way, the doctors and nurses in the hospital yelled.

"The salary has been raised, the salary has been raised. Zhang Yuan is going to raise the salary of our nurses. I will never call black buy Jiang again! Zhang Yuan is the most handsome! "

"Where did you hang up? How much money can Zhang Yuan send us? " Two graduate students who transferred to another department chatted together.

Although they have settled down, their wages are not high, more than 70 yuan a month than undergraduates.

"We are professional masters. It would be nice to enter the laboratory. Alas, I regretted reading professional masters at the beginning. I don't know how much Zhang Yuan can pay this time. At least two more months' salary!"

Most people think that Zhang Fan is expected to pay an extra two months' salary. Any more estimation is a dream.

While everyone whispered privately, the new salary method of tea vegetable hospital came out.

Transferred inpatients and fixed nurses can apply for part-time academic secretary in the laboratory, with an annual salary of 100000 before tax.

Regular inpatients and intermediate nurses can apply for part-time academic director of the laboratory, with an annual salary of 150000 before tax.

The chief nurse can apply for an academic consultant in the laboratory with an annual salary of 200000 before tax.

Doctors at or above the level of deputy chief physician may apply for scientific research subsidy, with an annual limit of more than 300000. The specific amount shall be allocated according to the actual amount of the experimental project.

Head nurses and nurses above can apply for scientific research subsidy, with an annual limit of 250000. The specific amount shall be allocated according to the actual experimental project.

Logistics, party office and office personnel can apply for laboratory agency with an annual salary of 70000 before tax.

The last sentence of the notice is: the salary and bonus of the hospital shall remain unchanged according to the government regulations.

The notice was sent directly by the dean's office. This time, everyone was crazy.

The income of hospital doctors is quite wonderful. In fact, the income of inpatients, attending doctors and even some deputy high school students depends on dead wages, equipment rebates and drug rebates. This is not a fixed number, but depends on the director of the Department.

For example, Lao Ju, their respiratory department, why are they so united and United? Because Lao Ju doesn't want a penny's rebate. So the doctors in their department don't say that they speak Kazakh English every morning. Even if they call Lao Ju Long live, they will shout.

In some departments, doctors don't have any money. For example, in the previous anorectal department, the director stepped on his 20-year-old daughter-in-law and gave money to his subordinates? I'm kidding. My body is not hard, but my wallet is always hard.

Therefore, for a resident doctor, the post salary is 380 yuan, the grade salary is 446 yuan, the late meal allowance is 300 yuan, the national hardship area allowance is 1345 yuan, the retention allowance is 56 yuan, the housing allowance is 8 yuan, the housing provident fund allowance is 159 yuan, the official car allowance is 18 yuan, the telephone allowance is 100 yuan, the sole premium is 10 yuan, the monthly salary from 13 to 15 is 3000 yuan, the year-end overtime allowance is 2000 yuan, and the medical allowance is 1000 yuan, And holiday subsidy of RMB 5000.

Some are issued and some are deducted, such as old-age insurance, labor union fees, individual income tax, etc. the total is about 50000 yuan a year.

If the industry were not stable and extremely stable, people would not be able to stay, especially in the border areas. In recent years, the tea vegetable hospital has risen, as if it looked prosperous.

In fact, another five years of prosperity will be a wave of large-scale resignation in hospitals. Especially doctors, after attending, many people went to the south.

Now Zhang Fan sends money directly to improve his treatment. Although hospitals rely on a small group to improve the medical technology of all mankind, in fact, most people need ordinary doctors.

For example, do you need top doctors to see a doctor for colds and diarrhea? No, and all these top doctors come from ordinary doctors.

"A newly enrolled doctor can get 150000 a year?" Ouyang looked at the notice and was surprised that his mouth couldn't close.

Lao Gao, Ouyang, the chairman of the trade union and the retiring director of the nursing department gathered together.

"Zhang Yuan can't do that. You have to talk about it, Dean." Lao Gao thinks it's nonsense to send money like this.

"Why don't you say it? He's also your apprentice." Ouyang rolled his eyes, then waved his hand, "what should I do? People earn the money. People burn it as paper. It's up to them. Don't come here to fan the flames for me."

Ouyang began to rush people.

This is the difference of ideas.

But Zhang Fan knows very clearly that now is not the past, the times are different. And now the tea vegetable hospital is developing too fast. It can't make people sweat and don't eat.

The hospital is like the new year, up and down, large and small, and even the service attitude has changed for several levels.

"Is there another leader coming down to inspect? Look, the little nurses are laughing sweeter than before!"

"Well, yes, my brother-in-law's second uncle's child is in the government. He said that the bird market would come to the big leader for inspection."

Two men with enlarged prostate sat in the garden boasting with urine bags.

Notice down, three days later reached a climax.

July graduates, undergraduate graduates, Zhang Fan, Ouyang, they don't have to recruit, just pick and choose at home. After graduating this year, their resumes are filled with the personnel department of tea vegetable hospital.

"The pharmacy department must be a graduate student or above, and the technicians in the radiology department must also be a bachelor. Is there a shortage of people in our pathology department now? All nurses need high care!" Zhang Fan finally proudly can really experience the taste of the president of the third class hospital.

Finally, I can let myself look at the roster and turn over the signs like choosing a concubine. Really, NIMA is much more comfortable than going to cheat.

"Money, what a good thing!" Lao Chen said with emotion.

"Yes, it's a thing!" The chief of the finance section was not happy.

Some people from the tea Vegetable Health Bureau even reported that they wanted to come to the tea vegetable hospital, but it's too late now.

Money is really a good thing. In the tea element high tech Zone, the investment in the fishing village has been in place, the engineering vehicle has entered, and the most cutting-edge medical equipment manufacturing enterprise in the Northwest has been built.

Unconsciously, the tea vegetable hospital and the tea vegetable government are getting closer and closer.

"Zhang Yuan's foundation laying ceremony is yours to attend." The leader in charge of Health called Zhang Fan in person.

Now I am very kind to Zhang Yuan, the leader in charge of health.

"Ouch, leader, I can't leave, or let the European Academy go. Do you think so?" Zhang Fan declined.

"The European Academy is OK, but the superior wants you to come. Hehe, even if you are busy. I'll invite the European Academy. "

Zhang Fan doesn't like this kind of thing very much. He doesn't think it's interesting.

Ouyang, who was angry at home, received a phone call and immediately agreed. Not only did she promise, she thought she should have a perm or something.

A hospital began to slowly affect a city.

Pfizer and GlaxoSmithKline have accelerated the construction speed.

When everyone was still immersed in the happy time of getting rich, Zhang Fan began to enter the internal medicine, and his gastroenterology passed.

Now we have to go to the internal medicine to make a big move, otherwise the physicians feel that the surgeons don't understand anything and don't let go of the drug rebate every day.

Now that the salary has been raised, Zhang Fan will take this operation.

On Friday afternoon, the Department of Gastroenterology was informed by the hospital office that the president would come to the Department of Gastroenterology for ward round on Monday. All personnel must be in place half an hour in advance and make preparations.

The director of the Department of Gastroenterology hung up and almost cried: why is it our department again? Zhang Yuan, Mao is almost gone. Can't you change the Department? Isn't it good to go to endocrinology? Their doctors wear silk stockings!

Chapter 1357

After Zhang Fan ascended to the top, the internal medicine department thought Zhang Fan was eccentric to surgery, the nurses thought Zhang Fan was eccentric to doctors, the logistics department thought Zhang Fan was eccentric to clinic, the party office felt that they were not valued by the hospital office, and the hospital office felt that the medical department was Zhang Fan's lineage. Anyway, there were children like competing for favor in front of their parents.

In the past, although the party office was very transparent, people still had a place in the general assembly and small meeting. Moreover, people can manage the hospital newspaper, the thoughts of young people, and even marriage.

But as the hospital entered the era of Zhang Fan, the party office was already relatively weak in technical units. Several secretaries, front and back, either rubber stamps or bullied, couldn't stretch out their hands in the unit. It was not easy to come up with a secretary accepted by everyone.

As a result, Secretary Ren went too far and didn't care about anything. The superior asked the party office of the hospital to do a three lecture and five lecture report meeting. It was stunned that no one presided over it. The sad tea vegetable people's Congress criticized the ideological construction of the tea vegetable hospital at the small meeting of the general assembly.

Zhang Fan was really embarrassed. He sent several carts of fruit and watermelon to the tea vegetable people's Congress. People won't criticize him. In the words of veteran cadres, criticizing you means loving you. If you don't love you, you won't criticize you. Zhang Fan thought, aren't you allergic to mango? Or give me back the Mango!

Ren Li didn't worry, even her personnel rights. She handed it directly to Zhang Fan. People who don't know think the tea vegetable garden is a mom and pop shop, because it's too harmonious. There's only one sound in harmony.

This time, the hospital raised the salary in a large area, sent a notice in the same month, and sent cash in the same month. Then, when you put the ticket in your hand, it's different.

Xue Fei in the emergency center called his wife early. Xue Fei wanted to take his wife to Vientiane exchange for consumption, as if he didn't pay money at work on weekdays.

The most exciting thing is that some doctors who do not have a fixed department. If they do not have a fixed department, it means that they have no bonus and no other income. Doctors who do not have a fixed department, regardless of large and small hospitals, are very direct, like slaves without human rights.

This thing is really inhuman, so many doctors have a passion for serving the people. As a result, they have been transferred to another department for three years, and there is no trace of it. You can say that his faith is not firm, but in the medical system, the system of transferred doctors is too bullying. What this thing does most is not simply physical torture, but ideological and physical torture.

Over the past three years, how do you make people laugh at patients and how do you give sincerity to patients? This pot definitely needs to be carried by the government.

Now, with an income of more than 100000 a year, you can first feed yourself. You don't have to eat old boys in their twenties. You don't have to cut off food before the end of the month. You can even feed some poor boys at home!

Really, this is no exaggeration.

Of course, it is also good. Because you are poor, doctors can study wholeheartedly, regardless of whether the beauties on the street are beautiful or not, because you are so poor that you can't eat enough, and do you have money to open a house?

"Mom, I bought you a dress!" A graduate student just graduated from internal medicine called his mother with a salary card in his hand.

His mother was scared to death. "Son, don't think about anything. Really, there's no barrier in the world."

"Mom, we've got a raise. Now we have an income of more than 100000 a year. Mom, I'm making money!"

This statement frightened the old lady, "I'm afraid it won't be crazy!"

"Child, stay where you are. Don't move. Mother will come to you by train now!"

The nurses exaggerate, "ha ha, Zhang Yuan is a cow!"

"I'm going to buy a dress!"

"You look like you're worthless. I'll buy a QQ now. The four small circles of Bayin are greedy for me. I want to buy a red one, too."

For a time, the girls who went out from the tea vegetable hospital looked up very much. If it's a high beam, it's definitely facing the sky.

When the money was not handed out, other hospitals and other units felt too jealous.

When the money arrived, people in other hospitals and other units went crazy.

This NIMA, 100000 in 10 years.

In China Hospital, a group of inpatients cried, "I want to resign. I want to go to the tea vegetable hospital. The tea vegetable hospital came to dig me. I think China Hospital is a little easier, so I didn't go. Sobbing!"

"Woo woo, I'm going too."

Health Bureau, the director almost removed the door angrily.

Because people are scattered, the team is not easy to take.

"What big tailed wolf do you pretend to be? If you give it to me like Zhang Fan of the tea vegetable hospital, don't say more than 100000. Even if you give it 100000, don't scold me. Even if you sleep with me, I will. But NIMA spends more than 2000 yuan a month. You're like Zhou peipi. I tell you that the archives of the tea vegetable hospital is short of people now. NIMA, bully me again, and I'll go to the tea vegetable hospital to recruit. "

The job hopping of public officials is mostly lip service, scaring themselves and leaders.

However, around the tea plant, including the bird market, there was a wave of nurses leaving.

Special, high protection.

Senior nursing is a nurse at the undergraduate level. This kind of nurse has only one class a year in a medical school. They dare not recruit more. If they recruit more, they are afraid to smash the brand of senior nursing.

In the early years, after graduating from high nursing, they all went to foreign-related hospitals in major cities. Then, with the increase of the number in recent years, there began to be high nursing in the intensive care unit and operating room of major hospitals.

At present, there is no high care in tea element hospital.

This time, unexpectedly, several big hospitals in niaoshi did not have a senior nurse, so they resigned directly and came with tea.

In addition, in the past, the orthopedics department of China hospital went hand in hand with the tea element hospital.

After decades, the training of nurses has its own set.

As a result, after the salary reform of tea vegetable hospital, several head nurse assistants in orthopedics resigned directly.

Because the nurses have no staffing, they give some hats recognized by the Department, such as head nurse assistant, nurse group secretary, and so on. Don't mention the hospital. Even if they leave the Department, no one will recognize them.

For a time, almost the most beautiful nurses in the personnel department of the tea vegetable hospital came.

This startled Ouyang.

Ouyang opened his mouth and looked at so many girls. He didn't know what to say.

"I've been fighting with my opponent for half my life. I've only pressed the other side when I'm old. Now let this boy lift the table, ha ha!"

Ouyang was happy because she knew that the operating room and orthopedic department of Huahua hospital could not open the bolt.

"Dean, what should I do?" The of the personnel department called Lao Chen. Lao Chen didn't dare to call Zhang Fan.

"We can do what we should do. As long as it is what we need, we will sign it all. If we don't sign it, it will be cheaper for private hospitals in the future."

"OK, I see."

Lao Chen hung up the phone and directly let go of the entry channel of hospital nurses.

assessment!

The nurse who dares to come to the door will not come without some Kung Fu.

Intravenous injection, cardiopulmonary resuscitation, drug ratio, heart rate and blood pressure measurement, and then issue the examination paper for examination. After the basic examination, there is also the examination of transfer.

At the end of the day, the tea vegetable hospital signed more than 50 nurses, and there were 10 senior nurses.

In a hospital, there are more than 50 nurses. If they are thrown into the hospital department, they can't even afford water flowers.

But the next day, the president of Hua Hospital cried.

Temotanima bullied people, because the next day, the director of the nursing department came into the dean's office with a letter of resignation.

It's no use disagreeing. People won't come. This kind of resignation letter is to tell you that if I quit, my salary can't be less.

"The nurses of the orthopaedic department in the operating room and those who can go to the stage have left. Those who haven't left can't go to the stage.

All the nurses above the intermediate level in orthopedics have gone! Only the head nurse and those who have just graduated this year without a nurse certificate! "

Looking at the resignation letter in his hand, the president of Huahua hospital gave Ouyang and Zhang Fan's mother to the sun, "I'm also a top three hospital. Tainima bullied people. I'll sue the old woman. Tainima bullied people!"

However, the Dean hates Ouyang most. Because of the old sorrow and the new hatred, the dean of Hua hospital is crazy.

Digital hospital, the digital hospital of catechin has been able to go as far as possible. It never provokes the catechin hospital, because it can't provoke them. If it's not good, it will eat them.

But this time, the president of the hospital also had no choice. So did they. ICU, operating room, orthopedics, and mature nurses without military rank all ran away.

But they dare not complain. If they don't, the military leaders have thought of sending them to the tea vegetable hospital. Now they are going to make trouble. Isn't NIMA beating black back with meat buns.

Ouyang didn't expect that he was so relaxed that he beat up the remaining hospitals in the tea vegetable area and cried for his father and mother.

The leaders of the tea government in charge of health have become big.

"It makes sense for you to make trouble with me. You can't keep talents. I'm still wrong?" The leader in charge of health is not a leader in front of Ouyang, but he is a real leader in front of the presidents of other hospitals.

After patting the table and making a fire, he asked, "didn't any mature nurses stay?"

"Except for the head nurse with staffing, none of the remaining mature ones stayed. Leaders and bullies. Now we can't have surgery."

"Is there no solution?"

"Yes, there are two plans. One is to make more plans for hospital nurses in the future." As soon as the Dean saw the leader's face, he knew it was unlikely.

Then he said, "the second way is to raise wages!"

"Well!"

When money stood up, everything squatted down and leaned against the wall and puckered up. Although it seemed a little upstart and bullied people, in the office under the sunset at night, the Ouyang light did not turn on and the home did not return.

Just a person in the office secretly humming the red light record!

Chapter 1358

In three days, Zhang Fan not only sent money, but also gave the hospital three days off in rotation, and three days off every year.

This surprised the doctors and nurses more than sending money. "I can't buy the river. I've released myself!"

This is an elderly doctor, said dissatisfied.

Now the little nurses don't call Zhang Fan to buy the river, but the old doctors, such as Chen Qi, are marginalized and can only be in the community clinic, and the doctors who open the long-term chronic disease clinic at the night clinic are particularly dissatisfied with Zhang Fan.

However, it's no use being dissatisfied.

"It's just money. Why do you have a holiday?" Ouyang couldn't sit still. If something happened in the hospital, he didn't know. The doctors and nurses probably played wild.

"The professional title will be determined soon this year. We have to go to the bird market to focus on the establishment of professional titles, especially the establishment of intermediate and deputy high schools. We must focus on more points. I can't go alone. You must take the initiative in this matter. " Zhang Fan drank old Chen Pao's red robe and slowly worded.

He didn't expect that the consumption of tea was also upgraded. At the beginning, he drank Tieguanyin. He was good and the tea smell aftertaste. Zhang Fan thought this was the best tea.

As a result, it didn't seem so amazing to drink. Then Lao Chen didn't know where to get the Dahongpao these days. Zhang Fan just started drinking and didn't feel anything. But a few days later, he felt that the Dahongpao had a aftertaste better than Tie Guanyin.

"Well, there are more doctors this year. We should take action early, but what does it have to do with the number of professional titles and holidays?" Ouyang doesn't quite understand.

"I mean, let them spend money on the three-day holiday, look at the colorful world outside, and then concentrate on making up..." as he said, Zhang Fan's voice became smaller, and even Lao Chen couldn't hear it.

Ouyang listened as like as two peas. He finally nodded, and finally felt a sense of crying. He really put a black plaster on his old lip. Now the old lady is absolutely proud of it and is exactly the same as the one who had seen her.

"To the bird market, shall we go to the health department to prepare, or..."

"Go to what and why hall, go directly to the second son of the government!" Ouyang said dissatisfied.

"The old troublesome leader is not very good!" Zhang Fan feels a little sorry that he always grabs a person to collect.

Ouyang looked at Zhang Fan's sweet drink, and unconsciously talked a little. After pouring a little from Zhang Fan's tea cup with his own cup, he said, "you don't understand. Being close to leaders is what being close to leaders is. We ask people more because business is more troublesome. This is being close to leaders.

We have a long distance and seldom deal with each other. When we get in touch these times, we should seize the opportunity to let the leaders know us.

How to understand, isn't that more applications and more reports! OK, I really don't trust you to go alone. What kind of tea is this? It's so bitter. It's not as bitter as jasmine! "

Ouyang glanced at old Chen, who was playing with the teapot as if he hadn't seen it.

Ouyang drinks tea like an ordinary elderly aunt. You can't find a few tea leaves in a cup of tea, but things are not old or young. They overflow at the sight of water, such as Huangming chrysanthemums, medlar, raisins, longan and litchi. Ouyang puts dried roses and honey when he gets up early.

Really, when I opened Ouyang's water cup, I didn't know that there was a gouache made by Ouyang and smeared on his face.

"Chen Yuan, recently, some doctors and nurses want to buy a car, so they help to say hello to them. It's cheaper if they can get a license plate or something. They'd better get a fast track for our doctors and nurses. After all, their time is very precious. They can't play for a few days when buying a car!"

"OK, leader, I don't have to arrange this. Xiao Chen of the medical department is very familiar with the leaders of the vehicle management office. Last time, Xiao Chen did the physical examination for them, and every policeman can bring a family member to have a free physical examination. They have a good relationship. "

Lao Chen nodded and reported to Zhang fanhui.

"OK, just have a way!" Zhang Fan never worries about such things, as long as you do it for me.

Ouyang smiled and said, "Lao Chen is OK now. Small soldiers have energy."

"Hey, isn't it your face? Otherwise, who are Xiao Chen and I known by the vehicle administration?"

"Well, you have many people, and most of them are in contact with the outside world. You can give them the power and convenience, but you should stick the red line on their forehead, otherwise, I'm not polite."

Old Chen Han is down.

.....

"Leader, president Zhang Fan of tea vegetable hospital wants to report to you. Do you see the

arrangement?"

If you really talk about reporting qualification, Zhang Fan actually has the qualification to report to the boss and the second child. But hospitals are a little special. Generally, the health bureau reports to the government, while hospitals report to the Health Bureau.

But the Health Bureau has no direct command power, only the power of suggestion.

For example, the simplest thing is that the tea vegetable hospital needs to buy underwear. Generally, the president does not report directly to the government, but decides to buy it by himself, and then calls the report to the Health Bureau, which then reports to the superior leader in charge of health.

After the leaders make a decision, they will tell the Health Bureau, and then the Health Bureau will inform the hospital whether to buy or not to sell.

Therefore, few hospital presidents directly apply to report their work directly to the eldest son of the government. Firstly, this thing is a little out of line with the procedure, and secondly, it is easy to be dissatisfied with the leaders of the Health Bureau.

But Ouyang and Zhang Fan don't care much about this. After all, even if the tea vegetable hospital rushed to lick the back door of the bird City Health Department, the effect was useless. Although the hospital and the Health Bureau in niaoshi don't seem to have any contact at ordinary times.

In fact, these two units are directly like peacemaking.

Today, you went to the Health Bureau in the hospital, and then a few days later he jumped from the health bureau to the hospital as the president. Anyway, he jumped around like jumping sugar.

Therefore, tea vegetarians, as outsiders, can not give them leadership posts, but also are not obedient. How many good conditions can they give you? If you don't get stuck, you'll already see the face you've been cheated.

"Did you say anything?" As soon as the second son heard what the Secretary said, he began to calculate.

"They came for money? No, I didn't investigate their small Treasury. They should be sensible and won't come to ask for subsidies. To complain? It shouldn't be. There are almost no tea vegetable hospitals in the bird market. "

"I asked. They said they had work to report." The Secretary also wondered. When did the president of a hospital make the leaders so tangled.

Leaders always nod their heads. What's the matter today.

"Is the legendary dry son true?" The Secretary felt that he had guessed the answer, and then thought

that he would be polite when he called back.

It is said in the Jianghu that this thing is sometimes mysterious. It can influence from top to bottom and from bottom to top.

For example, Lao Li and later Lei Zhenzi explained desperately that his father was not the son of someone.

"OK, just Friday night. It's just right to invite them to dinner. Comrades on the border are not easy, and they are new. We should do a good job in contact and service. "

"Good leaders, which leaders do participants need to inform?" The Secretary picked up his notebook and began to record.

"Zhao hall in health, finance and finance are all right. Let's inform the prevention side, and..."

After the Secretary finished recording, he simply didn't understand the leader's intention. In fact, the contacts and introductions are true, but the leaders don't want them to contact the financial leaders early. Although he hasn't been familiar with Ouyang and Zhang Fan for a long time, he knows Ouyang's character. It's ok if he doesn't know it. If he really wants to know it, he'll definitely squeeze pomegranates under the banner. Even the skin can be used as a beverage squeeze for you.

On Thursday, Zhang Fan and Ouyang set out. Although the leaders said it was the afternoon, at least you should go in advance. No, you can't let the leaders wait.

Zhang Fan drove. The driver assigned by the government to Zhang Fan was wronged like a child without a mother. He stood at the gate of the hospital and waved for half an hour.

"Zhang Yuan, where shall we eat tonight?" Lao Chen sat on the co pilot, and Ouyang, like the empress dowager, sat in the middle of the back, half squinting, and did not participate in these little things.

"We can go into the city at night. The Nang pit meat you took me to eat last time is really good. The vegetarian tea doesn't taste as good as others. Let's go to relieve our greed tonight."

"OK, let's have some Nang pit meat and mutton noodles in the evening. We sweat. It's very comfortable in summer."

Ouyang half opened and half closed his eyes, glanced at the two people in front of him, disdained his lips, and seemed to say: two buckets, just think about eating.

Zhang Fan and Ouyang went to the bird market.

Tea vegetable hospital is really a sea of joy.

The consumption concept of Frontier people is influenced by foreigners. They don't like saving like their insiders.

Unlike some cities, when you get a salary, you have to think about how to invest, buy funds and stocks.

Because of the low house price in the frontier, although the house price of tea vegetable has increased a lot in the past two years because of the tea vegetable hospital, the staff of the hospital actually have no pressure, because the hospital will build its own buildings in three or four years. No matter how much it is sold outside, the internal price of the hospital is still very sweet.

Therefore, few people want to invest after they have money.

For example, Xue Fei, he wants to change the car. Although his wife is not very satisfied, she thinks that changing the car is better than playing mahjong and being cheated by the old women. Xue Fei was selling his old car while looking at the new car in the tea vegetable dead son's shop.

"Hannanda, that's what we want. We can't surpass Zhang Yuan, but we must keep up with Zhang Yuan."

Xue Fei's income is better now because he is the director and everyone knows it.

The little nurses, especially the little girls born in the urban area and without housing pressure, also ran to buy cars.

"Just QQ, just red QQ, how cute!"

"You're stupid. How nice to buy a second-hand Mini."

"Know an egg, which is a mistress car, I don't want it. I want a new, red QQ!"

Lao Chen's phone rang for a while. Doctors and nurses bought a car and asked Lao Chen to say hello.

People are like this. If there is a convenient shortcut, who will take the avenue.

After all, the path is tighter.

Ouyang looked at Lao Chen's busy appearance and muttered: jump, jump, there's time for you to pull your pants! One by one, they also regard the black Buy River as a good person and me as a bad person. In fact, this guy is wilting.

The meeting with the leader is very simple. In the leader's office, before entering the door, the Secretary specially explained that it would take 15 minutes. You can't delay it. The tea didn't cool down, and the matter was over. Zhang Fan felt that it was a pity to soak the tea.

Of course, you can't say this, otherwise Ouyang will be black and unhappy again. Sometimes Zhang Fan

feels that Ouyang is more difficult to figure out than Shaohua. Is this old lady a repetition in menopause? Zhang Fan didn't ask, and he didn't intend to ask.

The leaders were very happy that Zhang Fan and Ouyang came to the bird market to report their work. Although they came to reach out, Ouyang and Zhang Fan reported their work first because of their script.

What building presses several switches, and the elevator can install several big men. It sounds very detailed. In fact, dogs pull sheep's intestines as long as they want.

But such a solemn and detailed report is the first time that the tea vegetable hospital reported to the second child.

The second son also gave face. He listened carefully to the report of the leaders of the tea vegetable hospital. He not only made his own records, but also prepared to publish it in the newspaper, because the data of the tea vegetable hospital is too good-looking and beautiful, which is much better than other hospitals in bird market.

Of course, in 13 minutes, Zhang Fan began to stretch out his hand to compile.

In general, there is a definite number of senior titles in each province. This thing is not for chickens to eat millet. You can eat it with your head down.

But if you give one more home, his home will be one less, so Zhang Fan killed him halfway out. The major hospitals in bird city don't know yet. If you know, you'll have to cry.

Chapter 1359

Ouyang and Zhang Fan's trip to the bird market was very successful. Directly let the leaders approve almost twice as many staffing and quota as before.

Of course, people's leaders also asked health experts before giving them. Because the development of tea vegetable hospital is too fast, if it doesn't do special things, it will drag back the achievements that have not been easy to develop.

After eating and drinking, on Sunday morning, Zhang Fan got up early and ran towards tea. In the border areas in summer, you should drive early, especially those who drive long distances. You must start early, or the car will be the Nang pit for baking steamed buns in the sun at noon.

Running around Tianshan Mountain, when Tianshan Mountain is in the tea element, it is a personal font. It lies there like a man who drinks high, his head facing the bird market, his legs split, and tea element is the point between his legs.

In tea, Tianshan is divided into North and South Tianshan.

The conventional route to tea vegetable is to enter the North Tianshan Mountain, which is to start from the bird market and take the stone city into Santai Haizi to tea vegetable. Along the way, the scenery is general, that is, Santai Haizi, and Sailimu is relatively good.

In the past, you could see the scenery inside Tianshan Mountain, the forest and snow mountain. Now the expressway is like a bar. It is inserted and pulled out. The road is dozens of times more convenient, but the scenery is also dozens of times worse.

The other line, the south line, enters from Shanxian County where Hami melon and grapes come out, goes south Xinjiang, goes around the South Tianshan Mountain, and takes the national defense highway into the Tianshan Mountain.

This route is extremely beautiful in summer. Winter is a white north-south polar posture.

Of course, because of the expressway, Zhang Fan and others took the north line, that is, the route most people took.

"What do you have for lunch?" Zhang Fan asked Lao Chen.

Ouyang is crazy. Just after breakfast, the taste of milk tea hasn't dissipated, so he has begun to discuss what to eat at noon.

Sometimes, Ouyang feels tired. He just won the establishment. Shouldn't he discuss the future development of the hospital, who the quota is to and how to allocate it? Why do we have to discuss lunch?

But if Zhang Fan doesn't talk, Ouyang won't take the initiative to ask. It's like if you don't report to me, I won't take the initiative to ask. I'll wait and see when you say it.

"Have a big cake with vegetables at noon!" Lao Chen thought and gave a suggestion.

In fact, there are many delicious things along the way from bird market to tea vegetable.

Big dishes of chicken, meatball soup, hand grabbed mutton and roasted steamed stuffed buns are all very good, but Lao Chen also knows that Zhang Fan is difficult to serve.

Over the past few years, he felt that he had collected delicious food for half his life and was almost out of touch.

"Sibo pancake?" Zhang Fan asked.

"Yes. It tastes good, especially when people dip leek and pepper in sauce. " Old Chen chuckled.

Some people are born to eat goods, such as Lao Chen. When describing eating, a few words accompanied by Baji's mouth can make people pregnant.

"OK! Let's get off the highway and try it later. "

"How about hygiene? I don't eat if hygiene is not good!" Ouyang said unwillingly.

Others start from the bird market and arrive from morning to afternoon. Zhang fan can walk for a day.

It's not that the road is rough and the car is bad, but that there is food on the car.

Among the frontier steamed buns, the roasted steamed buns full of meat and the thin skinned steamed buns with oil are used as red sticks. Xibo big cake is an insignificant existence among all living beings.

It has been said that it is not good to have meat and oil. It is good to have this kind of soup without water. Xibo pancake is not easy to make. The one Lao Chen is looking for is a good one.

The door curtain is not big. The boss with dark eyes and black hair warmly greets the guests. To tell the truth, the female boss is estimated to be no less than the beauty Tong on TV.

Xibo people's eye sockets are relatively deep. Of course, girls are more beautiful, while boys are not good, just like they didn't wake up. It's OK to have bigger eyes and smaller eyes. Ouch, there's little difference between opening and closing eyes.

The curtain of the door is not big, but the environment is clean. Ouyang is quite satisfied and sits at the table. The old lady wants to be realistic about the taste. Don't be too salty. She can deal with what is delicious or not, but she has high requirements for hygiene.

Zhang Fan and Lao Chen pursue the same taste.

People of two worlds!

On the cake, the big cake doesn't look strange. This cake is placed in large pasta provinces, such as Liangxi, such as Su province. It's really hard to take it according to its appearance.

One finger refers to the thick dough pancake, and the surface of the pancake is slightly yellow and scorched. If the daughter-in-law of the three provinces baked such a cake when the living conditions were bad in the past, she would probably be beaten.

I don't know whether it's the wheat problem or whether someone's iron pot is unique. The slightly yellow and slightly burnt pancakes not only can't taste scorched, but also have a trace of wheat flavor when chewed in the mouth, which is not easy. Now in this age, who has ever eaten wheat flavored bread?

Moreover, the focus is on other people's leek chili sauce. The dark green leek is cut into sections. The length is the length that physicians can't clip. The red pepper is ground into a mi shape. There is also the most soul sauce. I don't know what it is made of.

When these three things fit together, the taste is different. It is mixed with the thick smell of spicy, fresh and leek, accompanied by the sweet smell after wheat fermentation. Darling, the more you chew, the more powerful it is. The more you chew, the more you can make you feel that you can't stop.

Ouyang ate three pieces and didn't eat any more. She felt that it took too much time. Looking at the sweat of Zhang Fan and Lao Chen, she deeply felt that it wasn't Lao Chen's talent that attracted Zhang Fan.

But the two guys have a common hobby.

When it came to tea, Ouyang went home, Zhang Fan also went home, and Lao Chen was still busy with the materials for the meeting on Monday.

There are three large-scale technical units like the hospital. In the name of the party office, the middle-level department must first talk about doctors, transferred doctors and surgery. In terms of surgery, we must take down the appendix, gallbladder and limbs fixation in the three-year career of transfer...

"Zhang Fan said, talking about almost dozens of conventional operations.

Everyone listened quietly and said internal medicine after surgery.

"If you can't get these operations and treatments within three years, the hospital will give you another chance and give you another year, but you still can't get them. Sorry, please choose another height.

In order to be promoted to the chief physician, a resident must have held the post of chief inpatient. In the past, the chief inpatient was paid 500 yuan more. Now it is different. The chief inpatient, the chief inpatient for a year, has no necessary things and is on standby in the hospital 24 hours.

What is necessary, I think we should also know. You should understand! "

There was no laughter. They all looked at Zhang Fan foolishly.

"This strength is very high!" Even some young people, especially those who have just bought a car, are crying. According to this rhythm, driving an egg car can't get out of the hospital. Why do you want a car.

The rules and regulations of the hospital are the same as those of sending money. They are implemented when they are said to be implemented.

The general application for hospitalization can't be accepted. You can only take the post after queuing up for application and passing the medical department.

More than 300 days a year, 24 hours a day, you must eat and drink. Lazar is all in the hospital. There is no ambiguity.

Now, darling, the doctors in the hospital are crying.

"This must be the idea of the European Academy! Zhang Yuan is not so dark. "

"Hey, I said, I said, Zhang Yuan is so generous that our wages exceed the capital magic capital. Ah, it's really delicious and difficult to digest! "

Chapter 1360

Dare to be the first in the world. This sentence sounds easy, but it's actually very difficult.

In the tea vegetable hospital, many people are dissatisfied. When they take the money, they will never dislike too much, but when they work, they will always be tired. This is human nature.

Just like the animals on the grassland, no one likes to work. Eat and drink enough to bask in the sun. After basking in the sun, it's more free.

Unfortunately, No. Since the birth of modern medicine, there has been a pattern of dry people walking away from their bones.

For example, why did the mother of ten thousand babies not get married in that year? The golden mean stipulated that if a female doctor wanted to be a doctor in the golden mean, she must first swear not to get married. The number of female doctors who entered the golden mean in that year was unclear, but only three insisted in the end.

Medicine, the first discipline, is accumulation. It is the same as jingman self overflow. There is no self-discipline like an ascetic monk. If you have nothing to do, just roll it. Even if you have self overflow, it will be good if you don't lose your kidney. And it's hard to get ahead. Not to mention Zhang Fan's age, even in the next few decades, the internship and training intensity of many hospitals and medical schools can't meet the abnormal requirements of the golden mean.

Therefore, at the beginning, we didn't understand, because other hospitals were not so harsh. Why should tea vegetarians be so harsh?

We don't understand. If Zhang Fan wants to explain, he wants to see who jumps badly. Really, sometimes, the boss of an industry and a unit is the observer. Don't complain without opening your mouth.

If you don't want to do it, leave quickly. If you don't want to leave, don't complain. Nothing can be solved. Maybe it will be regarded as a model. Of course, if your father is the boss, you can say it at will.

Zhang Fan didn't say, Ouyang couldn't sit still, and then began to summon individually“ Don't think I don't know. You think you are already the director. You Zhang Yuan can't help you.

I tell you, now a large number of doctors at the director level have contacted your Zhang hospital. Your Zhang hospital is a good man with a soft heart. I think you have no credit and hard work.

If you don't act and take the lead in responding to you, Zhang Yuan, I tell you, wash up and get ready to go.

Don't think you are a person one by one. Without tea vegetable hospital, you are not fart. I tell you, in three days, I still hear that everyone doesn't understand. No one has stood up to support Zhang hospital. I will clean up the director of which department in case of an accident.

Community clinics and branch hospitals need a large number of prescription doctors. "

Ouyang angrily drove away some directors of marginal departments and sat in the office sadly. She is a typical hard spoken and soft hearted person. Today she scolds Zhang and tomorrow she scolds Li, but there are not many serious people to clean up.

Zhang Fan is different. She knows Zhang Fan too well. Don't look at it. She is generous to doctors and nurses. When the little nurses see Zhang Fan laughing and joking to take advantage, Zhang Fan won't be angry.

However, Zhang Fan is a stingy man in his heart, and his face is not only black, but also his heart is darker. He is the one who started. He has no Ouyang's feelings for these old directors. Ouyang is afraid that these directors will not end well.

Looking at the current department, a large number of attending doctors were sent by Zhang Fan for further study. Look at Wang Yanan. They are sent directly to shuitanzi. Why? For fame? Say a bad word. When these people come back after three years of study, it will be the day when these old directors step down and finish class.

Ouyang didn't want to take care of the cactus. Before long, the office knocked three times. It was very special. It didn't look like Chen Sheng's rhythm or Zhang Fan's rhythm, but Ouyang quickly cleaned up his state, stood up and opened the door himself.

Then outside the door stood the director of Urology!

The director of urology department talked with Ouyang for a while. Later, I didn't know what was going on. They disappeared and then. However, since Ouyang came to power, Zhang Fan is not the one who most supports Ouyang in the surgical system. Zhang Fan sometimes casts his tail and kicks his son.

The most supportive of Ouyang is Lao Li of urology department, director Li!

"Come in, hot day, still wearing leather shoes and sandals!" I don't know whether it's criticism or concern. Anyway, Lao Li bowed slightly and respectfully, just as Lao had met the Empress Dowager.

"The following doctors can apply for the salary this time. They can get the money by reaching out. On the contrary, they need serious scientific research projects at the director level. It is difficult for the old directors of the hospital to see a doctor and do scientific research. Therefore, this time we are not satisfied. In fact, the directors are rhythmic."

Ouyang was as like as two peas, who listened to Lao Li's words, and felt worried. Indeed, she was exactly the same as she thought.

"Ah, unexpectedly, this black boy really has a black face and a black heart. He dares to start." Lao Li sighed again.

"Why, do you directors want to rebel?" Ouyang asked.

"Rebellion! Ah, now we are not thinking about rebellion, but actually not money. Now we are thinking about not ending well! "

As soon as he said this, Ouyang's face darkened, and she also understood that some people could not keep up with Zhang Fan's footsteps.

In the past, she always felt that Zhang Fan grew up too slowly and didn't understand anything. In the area of administration, she was ignorant and ignorant. Sometimes, she even worried that Zhang Fan would be cheated if her heart was too soft.

Now, instead, she wants Zhang Fan to walk slower, slower, and so on. But now, she finally understood that some people are young animals. After weaning, they want to eat meat!

"What do you do? Have you ever thought about engaging in scientific research? We college students who went to the mountains and the countryside in those years still have a weak foundation after all. Others have studied for five or eight years. When we were young

If you feel uncomfortable here, why don't you go to the health bureau. I'll arrange it for you!" Ouyang stared at the teacup in his hand.

"Hey, that black boy looks down on me. He respects you in his eyes. I've understood it in the past 20 years.

What's wrong with the director? I can still be a doctor and see people. I can still be a doctor. His black boy can't help but let me be a doctor.

To tell you the truth, I don't admire anyone in my life. I admire you. When you are young, you should be strong. Finally, Dean Ouyang, a tea vegetable, is famous all over the world!

The trained successors made a group of heroes tremble! All right, don't worry. I'll help him. Don't be too soft hearted. Now in the hospital, everyone says that the black boy is good and you are bad.

The world is blind. We can't tell who is good from who is bad. I wonder how he grew up so fast.

Those who don't hum and don't have firmly grasped most people in the hospital. Although the directors are making trouble now, it seems that the doctors in the Department are also making trouble.

It's all false. If I go back and tell the doctors in the Department that I'm not convinced by Zhang Fan, I also go to the superior to suggest changing the dean. If you look at it for minutes, I'll be elevated. Now everyone is making trouble. What's great is that they want to get more money and do less work.

But once Zhang Fan really wants to get angry, no one dares to speak! Look at your sorrows, they all have wrinkles!"

"Hurry up and do what you should do. I had wrinkles thirty years ago!" After listening to the words, Ouyang felt relaxed, as if he remembered something in those years. Then he stared with a triangular eye and drove Lao li away like a dog.

Men are like this. Ouyang is like this. Lao Li is obedient. Hey!

Really, lick the dog, lick the dog, lick to the last nothing, there will be no outsiders. If Zhang Fan sees it, it is estimated that Zhang fan can laugh all his life.

Of course, Zhang Fan is worried at all. If you have enough money, what do you want? Even if you resign and go to other places, you don't have this treatment. It's not easy to live!

After the new hospital system came out, the health system in the Manchu frontier was silent.

While admiring the high salary of tea vegetable, the doctor looked at the doctors in tea vegetable hospital with egg trembling.

"Really, I will have 100 kinds of routine operations in three years. This NIMA is really difficult. Tea is a frontier, not the capital, nor the magic capital. I think Zhang Yuan is floating!"

"I still have one year of hospitalization. I can't go home for one year. Darling, I'm really mediocre! You have the ability to make all the doctors of tea vegetable single! "

"But people's wages are really higher than the golden mean!" Then everyone couldn't talk.

Colleagues in the health system are very contradictory. Who NIMA doesn't want money and who NIMA doesn't want to become stronger. Although they say sour words, they still yearn for it.

The officers of the health department of the health bureau were also silent.

Because, anyway, people's salaries are there. Really, everyone has no desire to evaluate.

One month, the new system will be implemented for one month.

There are many problems. First of all, there are the most general problems in hospitalization. Some families are deeply afraid that their relatives locked up in the hospital can't eat well. They deliver meals every day, and no one brings the children of double employees at home. These are all problems.

Zhang Fan is not the one who cares about killing and burying.

In fact, at this age, the old man is not old enough to walk. The most important thing is the children.

"Lao Wang, how are you? How are you?" After a month's summary, Zhang Fan collected the problems together. When everyone was worried, Zhang Fan picked up the phone and began to call.

"Ah, Zhang Yuan, ha ha, it's fine now. Why did you think of calling me? " The other party is very excited.

"I heard that you lost the election as the principal of the affiliated primary school? As like as two peas in the leadership of the Bureau of health, the education bureau is not the same. In the full meeting room, everyone seemed not to hear, especially Lao Chen stood up to see if Xiao Chen recorded anything that should not be recorded in the meeting minutes.

"Cough, cough! Zhang Yuan is still brave. " The other party replied awkwardly.

"All right, don't tangle, tangle what, we're going to set up a private kindergarten and a primary school. You'll be the president. The salary is at the same level as the director of our hospital. There's also a free physical examination every year. Such a good thing, whether you come or not, in a word, I still have something to do!"

"Well!" The other party was stunned for about ten seconds. "I'll come, Zhang Yuan. I'll call my resignation report now!"

Tea element is the only national special grade teacher. When lung cancer was detected, Zhang Fan personally performed the operation and completely removed it. The people who were going to hang up in those years are still alive and kicking.

"Old man Wang, how about playing chess? Don't go down, go down again, and your head comes out of your ass! "

"Please, you are still the dean. You always talk about other people's defects!"

"Ha ha, when you say that, I know your old man is in good health and confident! OK, I'm not talking nonsense. Come and do me a favor. Our hospital will set up a primary school. No one will be a teacher. You're a big crocodile in the education sector in the tea vegetable area. Come and help me! "

The old man has rectal prolapse. Zhang Fan made it for him. He also made friends with Zhang Fan. As soon as Zhang Fan said he would help, the old man agreed.

"Xue Xiaoqiao, has your fiancée returned to the capital? No, tell your daughter-in-law that the cultivation of doctors for the people in the frontier depends on her. The tea vegetable hospital needs to set up a kindergarten and primary school. Isn't she a doctor of education? Come to the school of the tea vegetable hospital and be a vice president! "

"Good!" Xue Xiaoqiao is also the chief inpatient in the hospital, but the group who rises with Zhang Fan is the most supportive group of Zhang Fan, and it is also the backbone in the next ten or even twenty years.

After a while, Zhang Fan, from the principal to the teacher, had put it together.

"Dean, we don't have a place yet? No approval! " Lao Chen's eyes pop out. It's too sudden.

"The kindergarten should be started first, and the primary school summer vacation should be almost over. Ouyuan, you have to run this thing. You are familiar with the tea government. "

Ouyang is stupid!

"We have money. We don't lack teachers. Let me say here that we can get the best, just like our hospital. Now that the whistle is blowing. Now that the flag has been erected, we should let everyone understand that what we do is the best.

Do you have confidence? "

"Yes!"

A group of doctors are blind to Zhang Fannong's education!
