

Chapter 1361

"Leader, what does Zhang Fan want to do? What does he want to do? This is nonsense. Now the administrative units not only don't allow business, but even the three industry departments have been separated. He is going back. This is..."

"You know shit! It's on the line!" Boss Cha Su scolded the leader in charge of health.

The leader in charge of health has no face in front of the tea vegetable boss now, because it is clear that a huge tea vegetable hospital with golden eggs is not well maintained, and it is always raised with others. As a result, the hen turns into an eagle and flies!

This makes the leader lose his heart. It's like clearly dreaming of hundreds of millions of lottery numbers and asking his people to buy lottery tickets with money. As a result, his people didn't buy lottery tickets because the waiter at the lottery station had a bad attitude!

This NIMA, really, people with a bad attitude can die suddenly.

"Hey!" The leader covered his forehead painfully, but on another thought, such subordinates are better than those with horns on their heads. On this thought, the leader's mentality is good.

With a long sigh, boss Cha Su said, "this is Zhang Fan. He has a thief's heart. He needs to practice his skills. Do you know, the prime minister called in person and said that the establishment of a basic medical school in chasu hospital was nonsense and the way of talent training was wrong.

At that time, I thought Ouyang and Zhang Fan had listened to it, but now it seems that Zhang Fan is a thief with an indomitable heart. If he doesn't succeed, who can succeed. Ah!" The leader said with emotion.

The leader in charge of health doesn't know whether to pretend to be stupid or really stupid. Leng is a look of incomprehension.

In the system, sometimes the system is very complicated, just like some people drink. When they don't drink, they seem to be drunk, but when they drink, they seem not to drink! When you tell the truth, you seem to be joking and boasting.

But when bragging and telling jokes, I really want to tell the truth.

Really, sometimes, don't think that a person who can climb above the department level is a hem, that's a real hem.

"Don't understand?" Boss Cha Su looked at the leader in charge of health in doubt.

"I don't understand. The leader should enlighten me! He Zhang fan can't wait for these kindergarten pupils to graduate, and then get a junior high school, a senior high school, and then a university step by step? It's hard to understand that medical undertakings should start with dolls? "

"Once he has some experience, you see, he will definitely get a high school quickly. When high school gets a little better, he will get a basic medical school. The young man really could bear it. There was no noise at that time. I thought he gave up.

As a result, unexpectedly, he came again in circles. At that time, even if the leader disagreed, he couldn't say it! This is a talent. It falls three times and is tenacious! "

"The leaders saw it thoroughly. I thought Zhang Fan cheated the government to ask for land and then sold the land to make money! It seems that I'm worried for nothing! "

.....

"NIMA, I can't afford a university or a kindergarten?" If Zhang Fan knew what boss Cha Su said, he would definitely take boss Cha Su as his confidant.

When the personnel department said that a doctor recruited by the tea vegetable hospital was a Mr. Nanguo, Zhang fantou was big, thousands of choices, thousands of choices, and went into the pit.

As a result, when he saw other people's lectures, Zhang Fan always felt that the goods were useful in his mind, but he couldn't think of how to use them. Then, after the basic college he was thinking about was smashed into pieces, Zhang Fan finally had a clear idea.

Before the age of 25, a person has many ideas. Today he wants to be a hero and tomorrow he wants to be the richest man in the world. Sometimes, the event of an egg seems to be more complex and solemn than making a box of eggs. But sometimes, it's very easy to do business when it's public to public. Of course, this kind of ease is affirmed by a pen. Otherwise, public to public, just wait.

The kindergarten of tea vegetable hospital passed very quickly. The government also gave a quota of government-run kindergarten, but Zhang Fan refused.

In a week, Ouyang took people to get the kindergarten out. To tell the truth, it was a pity that Ouyuan didn't be a foreman.

"The physical examination and the education department are not shouting day by day. Don't we pay attention to them? Now let's spread out all the people in the education and protection department. Whether they have the ability or not depends on them. Children admitted to hospital must make a formal set of files from preventive injection to growth and development.

The diet of the kindergarten is run by the nutrition department. In terms of childcare, we should not only have experts in education, but also give full play to the characteristics of our hospital. Isn't there a group of old nurses in pediatrics who want to apply for the second line? Now they are all in the kindergarten.

Shift it, a lifetime of day and night weeks upside down, now the morning and afternoon shift it, it should also enjoy happiness!

We must have characteristics. Our goal is... "

"No cavities!" Xiao Chen, director of the medical office, suddenly said something. After that, he felt wrong. His face turned white. Lao Chen looked at her and wanted to get angry.

"That's right. Children should not only have no cavities, but also have balanced nutrition and good development!"

When Zhang Fan held a meeting in the dean's office, the director of the hospital office glanced at Xiao Chen jealously.

In the past, he was jealous of Lao Chen. Now he is no longer jealous of Lao Chen and begins to envy Xiao Chen.

"What about Zhang Yuan's charge?" Old Chen hurriedly asked after hearing Zhang Fan finish.

"In this way, the children of the hospital not only don't have to charge, but also give a subsidy of one yuan a day, just as they come to work.

As for the children outside the hospital, they are not accepted in principle. Understand, they are not accepted in principle. "

When Zhang Fan finished, Lao Chen nodded and said he understood.

Light hospital children, a class is not satisfied.

However, Lao Chen also understood Zhang Fan's intention. How to say this, it's not business that catches up.

Your advertising may not be effective, but it's different if you create an atmosphere that you can't come without energy.

Sure enough, the kindergarten was open for a week. First, the evaluation of doctors and nurses in the hospital was particularly high.

"Ouch, Zhang Yuan is really a young man. I used to work at night. The child had no way to beg his grandfather to tell his grandmother. Now it's OK. I'll work at night. The kindergarten has a teacher to sleep with. It's really, great."

"What is this? My sister-in-law's father-in-law has some money. Last year, her children were pirated Cambridge children, more than 10000 yuan a year. You don't know. My sister-in-law is arrogant. If you don't know, you think it's the golden mean.

Now, it is said that there is no bird market in our kindergarten. Even children's strabismus was found early. Moreover, it was treated directly. Really, it's too good to say. My sister-in-law envies it. "

This is the young people inside the hospital, while the outside of the hospital is even more lively. Various immortals, in various ways, want to send their children to the kindergarten of tea vegetable hospital.

Because the rumors in the Jianghu are too powerful. Some people check their children carefully. All the doctors at the director level come to do the physical examination in person. The tea vegetable boss doesn't have this treatment.

Moreover, people's diet menus are not called menus, but diet recipes. They are prepared by professional nutritionists and specially for children's development. They say that short people can grow tall after eating, and those who don't like eating don't eat snacks.

Especially in the offices of various units, old women and young women come together to pass on the tea vegetable kindergarten.

"It's said that they also equipped their children with a doctor as a teacher. Darling, you don't know. There are only a few doctors in our tea vegetable college. People give their children directly to accompany the doctor as a teacher. Darling, it's so awesome."

"The president of this hospital is really powerful. Sister Li, your grandson has entered the kindergarten of tea vegetable hospital?"

The younger asks the older.

"Hey, it's hard for me to go in. People only accept children, not people outside. They say they can't bring them. You don't know. It's too hard. "

"Sister Li, take a step!" Sister Li proudly followed the young woman.

"There are two places for the staff of each tea vegetable hospital. The recommended places! Children are eligible for automatic enrollment, but the recommended children are not subsidized. They must pay for food. This is to subsidize doctors and nurses. We don't rely on children to make money! "

Lao Chen spoke to a group of people at the parents' meeting.

For a time, the kindergarten of the tea vegetable hospital became the talk of the tea vegetable people.

"Did your child go to the tea vegetable kindergarten?" Don't ask if you have eaten.

Zhang Fan did not expect that a kindergarten had become a hot spot. Sitting in the office, Zhang Fan looks at Ouyang.

Ouyang didn't expect to be so popular.

At Zhang Fan's home, Zhang Fan's mother-in-law explained to Shaohua, "this watermelon is not seedless. It's very sweet. You must pay attention when you eat in the future. Don't eat seedless ones!"

Shao huatou is big! Gnashing his teeth, he thought: why doesn't Zhang Fan get off work!

Chapter 1362

Zhang Fan, who came home, looked at the fruits on a table, which were still peeled, even ripped and placed neatly on the table.

Zhang Fan felt a little sigh in his heart. Alas, his wife still loves him. The fruit even peeled in advance.

But eating Zhang Fan felt wrong and peeling was all right. Why did the grapefruit cut in the middle and then be like the smiling Maitreya Buddha. Moreover, each is a knife to see the core, the same as apple and watermelon.

Zhang Fan wondered, "who is practicing knife technique at home?"

After a while, Shaohua came out of the kitchen and looked at Zhang Fan in a daze at the fruit. He couldn't help laughing, "your mother-in-law said that we can't eat childless fruit in the future!"

"Well!" Zhang fanhan came down. When did the civil science department have such a statement.

However, home is not a reasonable place. Zhang Fan is now in the tea vegetable area. Although he can't dominate the city, he also has a weight of thousands of kilograms. But when he comes home, his mother-in-law says that he can't eat seedless fruit, so he can't eat seedless fruit.

I don't even have a chance to refute the appeal.

"What's the matter with the old lady? She suddenly came home and told these little things." Lying in bed, Zhang Fan hugged Shaohua and asked.

"What else can I do? I heard that there are kindergartens in the tea vegetable hospital. Many people went to beg her. It's estimated that they were unbalanced when they thought about it. There's no way to say. It's going to kill them at home!

Stone, do you think I have a problem? "

Shaohua asked a little melancholy.

"Pull, believe in science, physical examination, we are all healthy."

"Then why hasn't there been any movement?"

"Not enough frequency!"

Zhang Fan doesn't have a little pressure in his heart. To tell the truth, he has seen people who have been married for five or six years and have no children. He doesn't deliberately use contraception, but he can't conceive. Everything is good in the physical examination.

It's just a bit of a waste bed.

In the morning, Zhang Fan rubbed his waist, got up and ran. To tell the truth, when women have a strong desire to have children, it's really terrible. At the end of each battle, Shaohua, who had been lying like a rabbit riding an eagle for half an hour, began to toss Zhang Fan again. Really, Zhang Fan was afraid.

When he peed the next morning, he felt that he couldn't pee clean when he stood. "Prostate edema!" Under normal circumstances, this kind of thing will not happen.

Many young people just roll and roll when they're free, and then they have trouble urinating the next day. That's why sex won't happen when they win the catheter, because no matter whether you push the car or lotus drop, the physical consumption of sex can never reach the point of prostate edema.

But the hand water pipe is different. You can get it when you lie down. The more you get, the happier you get. In the end, when you were 20 years old, you were still a virgin. As a result, the prostate was swollen!

This shows that Zhang Fan's physical strength is so good that he can reach the frequency of hand rolling in one night, which is very powerful.

Fortunately, he ate the double yellow eggs made by Shaohua's mother. Under the supervision of the old lady, he drank almost a kilogram of milk, ate two walnuts, a handful of peanuts, and a plate of pig kidney fried like chicken rice. Really, the old lady used the extreme.

But Zhang Fan actually wants to say that donkeys can't feed like this!

In those years, Chinese people didn't eat water. After Uncle Zhang Zhongjing said to make up for the shape, it was like an academician bringing goods. In particular, Chinese male animals were attacked by seedlings. Northeast tigers didn't dare to come to Daxinganling because they came to catch the one who wanted to cut haw.

Animal kidneys, let's make a rational analysis. Tigers, lions and sika deer are not considered. Because it's illegal to eat, let's talk about pigs entering the water.

The calcium content in all groundwater is not high, about 6 to 9mg per 100g, or even no more than 10. However, the pig hoof is 33mg, which is not only the highest calcium content in groundwater, but also the highest calcium content in the whole pig.

The highest iron content is pig liver, the highest magnesium content is pig skin, and the highest potassium content is pig hind legs. In fact, these are of no reference significance, because these trace elements are easy to obtain in other foods.

What is really difficult to obtain is some trace elements, such as selenium. Some businessmen sell rice under the signboard of selenium rich rice, which makes people reluctant to eat'

But what is selenium rich food? It's pig kidney, 157mg. Other tissues include lean meat. The highest pig liver is only 3.68mg, and zinc is also the highest in pig kidney. The trace elements in human * * are these two things.

Especially for children, after June, don't listen to others about the trace elements of Jinmao country and Australian fish oil.

Get some pig liver for the child, cook it thoroughly, grind it into minced meat, sprinkle a little in each supplementary food, the child will not be short of iron, and his eyes are bright!

Many people roll too much, and then their hands and feet fall off layer by layer like a snake molting, and there will be bubbles on their tongue and mouth if they have nothing, which is actually a lack of trace elements. Really, sometimes it's shocking to think about it.

How did Lao Zhang find that these things could really supplement the human body when he hadn't even found bacteria in those years? Was Zhang Zhongjing a foodie, or did Lao Zhang have too many heads and peeling hands?

This is a trace element. Really, it can be as high as more than 150. Of course, you can't eat too much because the cholesterol is too high. Pig brain is the first and pig kidney is the second.

But even if it's rich in selenium and zinc, it's oily to dry a plate early in the morning. Anyway, it's not very beautiful.

Dangling a belly of milk, with a pig smell in his mouth, really, it's no exaggeration at all.

Zhang fan runs towards the hospital. He can't run without running. Zhang Fan thinks the energy is too high. At ordinary times, when there is an operation, Zhang Fan really doesn't dare to drink milk.

Tea is a pastoral area. The milk is too pure. Pure Zhang Fan drinks it again and again, and finally has to drink it in bags. However, the old people object that this thing has no nutrition. Drink it. Zhang Fan doesn't intend to enter the operating room today.

It's just that I'm too busy to attend to the internal medicine recently. Although I've been notified to make a large ward round, there are too many things. Zhang fanshuang made an appointment. Today, I'm full of milk and pig kidney. I have to go to the internal medicine for digestion!

The man who ate pig kidney early in the morning is different. He walks aggressively!

"Zhang Yuan even used lip gel. I don't know what brand it is. It's shining!" Xiao Chen looked at Zhang Fan and muttered in his heart.

Lao Chen has been busy recently. Originally, Lao Chen wanted to accompany Zhang Fan to the ward round, but Zhang Fan refused. Lao Chen is not easy. He has a lot of things to do. He still has time to accompany Zhang Fan to the ward round. One day's time is almost scrapped.

Lao Chen followed the ward rounds. He was suffering. He was not particularly proficient in clinical matters of internal medicine. Every time he went, he kept silent from beginning to end and had to listen carefully to the dialogue between Zhang Fan and the doctors. It was really difficult for Lao Chen.

Therefore, when Lao Chen didn't go, Xiao Chen took the director and the dean of internal medicine

business to participate in the ward round.

Today, when I grew up in the hospital, I didn't know if Ouyang killed the cactus again. The old lady even wanted to participate.

Then Ren Li and Yan Xiaoyu came too.

The director of the digestive department finally waited until the second boot landed. Anyway, the immortal finally came.

After the last notice, as a result, Zhang Fan went to the bird market. The director of Gastroenterology waited and waited. He really couldn't describe his inner suffering.

It's like being told to behead, but the executioner doesn't fall with a big knife. It's too hard for NIMA. If you don't come again, the director of Gastroenterology thinks she's almost depressed.

Ren Li and Yan Xiaoyu are escorts, because the internal medicine belongs to their responsibility field, and Ouyang just comes to see why Zhang Fan bites the internal medicine of digestion and doesn't let go. She is also a little puzzled. The old lady thinks Zhang Fan has long passed the time period of Liwei.

It's not Liwei, but it's not right to grab a hard roll. If you roll again, it's estimated that the director of Gastroenterology will collapse.

Unexpectedly, Ouyang, Ren Li and Yan Xiaoyu came together. For the director of Gastroenterology, the sky fell down. This NIMA will not be a pre-mortem condolences!

Surgical ward rounds, especially those in the Department of trauma and orthopedics, are just like walking around after breakfast. The director takes the doctor around for more than ten minutes. Because there is really nothing to say.

The most is to look at the postoperative recovery, preoperative examination and postoperative antibiotic use. The rest is to ask the patient to get out of bed and brake. There is nothing more.

Internal ward rounds, in the words of inpatients, are smelly and long.

"European Academy, let's start?" At the end of the shift, all the people in the Department looked at Zhang Fan. Zhang Fan smiled and said to Ouyang.

It means, old lady, you go ahead and we'll follow.

Ouyang glanced at Zhang Fan and ignored Zhang Fan.

Zhang Fan is not embarrassed. Anyway, the old lady has such a temper. She doesn't know what's wrong today. Maybe another Bonzi opera died, or the cactus died again. Zhang Fan is used to it.

The old lady ignored, and Zhang Fan smiled, "rounds!" The old lady can proudly ignore Zhang Fan.

But others can't and dare not.

The inpatient holds more than a dozen medical records and medical records made of lead plate. Really, the little girl holds it in her arms for more than ten minutes. It doesn't matter. It's too tiring to hold it for a few hours, but if you can't hold it today, you have to hold it, because it's a big ward round.

Check one by one and ask one by one.

"Diagnosis? It's been three days. The diagnosis is not clear yet? Even if it is not clear, there is not even a suspected diagnosis in the medical record? "

Zhang Fan asked unhappily with a medical record.

The medical records of the hospital must give the results within 12 hours of the preliminary diagnosis, and the definite diagnosis must be made within 24 hours.

Even if there is no definite diagnosis, there should be a diagnosis with a question mark.

But this medical record, the preliminary diagnosis says appendicitis. After the doctors of general surgery consulted and gave a diagnosis of appendicitis exclusion, the doctors of gastroenterology department have been vacant.

The doctor in charge of the bed blushed.

Because, this patient, she wants to go to surgery. So I didn't care. As a result, Zhang Fan found out.

Chapter 1363

"Come on, do a physical examination!" Zhang Fan has not been obsessed with this problem. He is very clear. When he finds this problem, when the ward round is over, the Department will not go through the medical records of the past five years, but at least the medical records of the past two years.

In the early days, medical records were records of the occurrence, development, prognosis, examination, diagnosis, treatment and other medical activities of patients. When it was simple, the medical records were wonderful.

Doctors will write their own conjectures or their own views on the future development of the disease. A medical record is a doctor's depth of understanding of the disease. Later, medical records played a new role and became the legal basis for disputes.

Then the medical records are not much to read. They are all the same. They are full of possibilities, maybe and No. let alone write their own opinions. Even the treatment can be signed by the superior doctors and their families.

Therefore, the current medical record is to look at the examination pasted on it. As for others, they fit perfectly, you can't see anything useful.

The patient is a young man, thin and fit for ordinary people. He is like a broad monk's robe, but the color of blue and white makes him feel like a T-Bag in prison break.

Cheekbones are raised, eye sockets are deep, eyes are open, and white eyes are more benevolent than black eyes. Obvious malnutrition.

"Why are you not feeling well?" Zhang Fan started physical examination while asking.

"It's just a stomachache! I don't want to eat. " Zhang Fan nodded his head, matched his hands, turned the knife with four fingers, and began to touch his finger belly counterclockwise.

"Does it hurt?"

"No pain!"

One lap down, from left to right, I didn't find any pain points.

Zhang Fan looked up at the patient's expression, no pain, and then looked at the tube bed doctor.

It means that there is no pain in the whole abdomen. What you wrote is suspected appendicitis. You invited a general practitioner to come for consultation. You want a general practitioner to operate. How did you learn this diagnosis? Did the biochemistry teacher give you a diagnosis class?

"He has paroxysmal pain. There is no abnormality when he is not in pain, but his position is passive when he is in pain. When the general foreign doctor came, he was well. When the general foreign doctor left, he began to hurt. Now he is well again! "

The doctor in charge of the bed pursed his lips and looked like he was dying of injustice. To tell the truth,

the department director is afraid of Zhang Fan, but the little doctor is not afraid of Zhang Fan. Not only are you not afraid of Zhang Fan, but also you have the ability not to ask me.

The profession of doctor is very wonderful. If a person who wants to be a part-time official in the hospital is very easy to manage and doesn't need your management, he will work hard to get close to the organization. He is afraid of this kind of person who doesn't ask for merit but no fault.

Anyway, I'm just a little doctor. If I don't get close to you, don't worry about me. Just give me the salary and bonus on time. I don't want your front guard or your guard with a knife.

Moreover, Zhang Fan is a surgeon and young. He is a young internal medicine doctor. In fact, he is quite unconvinced. No matter how awesome your operation is, it's also surgical and doesn't understand anything.

Really, it's no exaggeration. It's obvious that doctors have this experience when doing medical treatment. Surgeons suppress physicians in income, and physicians always surpass surgeons in spirit.

But to be honest, the digestive department of internal medicine is a little similar to the general surgery of surgery. The disease is complex and difficult to diagnose. This department is difficult to do.

In detail, this thing is too difficult. First of all, the feedback of abdominal pain is not accurate. For example, a comatose patient was sent to the outside of God first. The doctor said that there was no organic change in the brain and respiratory failure. This is a matter of the respiratory department.

Then the patient came to the respiratory department. The doctor in the respiratory department looked, "quickly transfer to the digestive department. This is a willingly encephalopathy."

After being sent to the gastroenterology department, the doctor said, "come on, check it first." The family members were unhappy and scolded the digestive doctor. If you don't do anything, you have to have an examination. How do you become a doctor.

Digestion is also very wronged.

Gastroenterology is very similar to general surgery. General surgery can also have an exploratory laparotomy, while gastroenterology can only see the doctor's technology.

It's hard to guess the heart, and so is the disease. Moreover, when you think about it carefully, the tissues and organs in the abdomen are a little like Yan Laoxi in those days. They are self-contained. They usually seem very honest and listen to the orders of their superiors, but when this thing comes to a critical moment, it doesn't listen to the orders of the brain.

Not only don't you listen to the command of the brain, you may have to send troops to turn over the brain first. For example, in patients with liver coma, this is the ammonia from the liver into the brain and

turn over the brain. This is not what sending troops is.

Zhang Fan looked at the grievance of the bed doctor with a complaining face, looked at the slightly embarrassed director of the digestive department, and smiled gently.

It's not much to say. Technical units often have wishful thinking if they want to convince each other verbally, unless they lie down with their identity, but Zhang Fan won't. It's too technical.

Those who engage in technology are those who don't see the coffin and don't shed tears. You can't convince her technically. You can't press her out of breath with technology. She will always raise her mouth and say: that's it? I've seen bigger!

Therefore, Zhang Fan smiled gently and seemed to say: it's time to show real technology.

"Fold your legs, bend your knees, take a deep breath, breathe out, and spit out clean air. That's it. Do it again."

The young and thin patient was squeezed by Zhang Fan's hands like a doll.

"What are you doing? Increase the amount of exercise and cause symptoms?" The bed doctor looked at his director slightly incomprehensibly.

The director glanced at her as if to say, "no learning, no skill!"

Of course, Ren Li, Yan Xiaoyu and Ouyang all understand.

Zhang Fan wants to do a deep abdominal physical examination.

When CT, MRI and Dr dominate the medical field, not to mention the deep physical examination method, even the ordinary physical examination is almost lonely.

Few people can see the deep physical examination now, because it is not only difficult to operate, but also prone to accidents.

With advanced instruments, who needs NIMA to take risks.

So, let alone patients, some young doctors have heard of it and haven't seen it.

Ordinary examination is quite exquisite. Four fingers and finger abdomen scratch the skin, rising and falling, like a couple. The girl first says to take a bath, then seduces the boy, pouts her mouth, and four fingers gently scratch the boy's eight abdominal muscles.

Well, how amorous it is.

The in-depth examination is more rude. In a vulgar way, a man with big cheeks hasn't seen the opposite sex for more than ten years, and then suddenly gave him a opposite sex.

Hands together!

The hands are folded together, just like artificial respiration, and then in the patient's abdominal cavity, the depth fluctuates. For patients who don't have much muscle fat, the abdomen is like a flattened and bulging watermelon.

It's frightening to look at it. I'm afraid that the patient's stomach will be crushed by carelessness.

"Breathe, breathe! Hoo, come on, spit, spit desperately, come on! " I don't know. I thought NIMA was doing something.

Thin patients, the eyes pressed by Zhang fan are almost protruding. It's really no exaggeration. Not only the eyes were coming out, but also the tongue was being pressed out, and the patient was a little frightened. If so many doctors were not around, he would definitely think Zhang Fan was going to murder him.

It's really difficult to press your hands across your belly to a depth of about 10 cm and touch your organs. You can't feel like you can read a novel, and then you can experiment with your girlfriend in bed at night.

Don't let your girlfriend pull a bed instead of doing a physical examination. Making a pool of stool is the lightest. If it is not done well, it is a matter of human life. When it comes to substantive organs, it is massive bleeding, and when it comes to hollow organs, it is rupture and infection.

Zhang Fan's in-depth physical examination shows that in the early stage of exertion, he should sink quickly and vigorously with the moment the patient exhales, and when he comes near the organs, he should recover his strength quickly.

How to say, it's like a bull galloping at high speed. I thought it would destroy the woman in front of the bull. As a result, in front of the bull, the bull brake quickly and kissed the woman's lips gently. The light woman can't even feel kissing!

This is the requirement, and Zhang Fan should not only touch the organs, but also feel the abnormalities of the organs. Therefore, this kind of physical examination is too difficult.

Up and down,

Up and down,

The patient's frightened expression showed his eyes open.

Then, under Zhang Fan's deep pressure for more than a dozen times, the patient finally shouted: "it's here, it's here, it's here!"

The sweat of Zhang Fan's head. This thing is individual work.

When the patient shouted, Zhang Fan stopped the action for the first time, determined the position, and then made a nail mark on the skin.

The female doctors in charge of the bed are stupid. Not only the female doctors in charge of the bed, but also Yan Xiaoyu.

Really, for many years, few people have used this way of physical examination, but today I finally see it, and it's still so popular.

Yan Xiaoyu looks at technology, and the female doctor in charge of bed is like watching a small film for the first time. It's not why the female number one is not dressed, but whether the male number one is full of gas.

Tanima is amazing.

Up and down, she even worried that the patient's liver would be crushed by Zhang Fan.

"CT and MRI couldn't find the lesion, but the body was found!" Yan Xiaoyu muttered to herself.

"Can it be diagnosed now?" Zhang Fan asked the bed doctor. The bed doctor was not convinced and changed.

Like a little white rabbit seeing a big tiger, he began to politely say, "Dean, Dean seems to be colonic diverticulitis!"

Um! Zhang fan can't say.

"After three days in hospital, there is no way to diagnose. Not only do I not think of a way, but also prevaricate the patient. Director Li, is this OK? Today, I checked out this disease. If another one can't be diagnosed tomorrow, do you want me to have a physical examination?"

Am I going to be the director? "

Zhang Fan doesn't talk about the bed doctor, but he can't let go of the director.

The director's sweat is flowing down, as if he did the operation just up and down!

Chapter 1364

Zhang Fan questioned the director of the Department of Gastroenterology. The director of the Department of Gastroenterology was sweating with white hair.

If Zhang fan can't find out today, he's not afraid. But Zhang Fan found out today.

The director of the digestive department has a sharp heart, like willow leaves in the wind, "I didn't come so badly last time. How long has it been? How can I come so badly this time!"

He opened his mouth and didn't know what to say. It's useless to explain now. An orthopedic doctor can find out your internal diseases. What else can a physician say?

You have to bow your head and listen to what people scold you. Who makes you incompetent.

"Look, look, your department, a gastroesophageal shunt disease, is the first time to see a doctor. It is imported omeprazole directly. Is it cool to get a commission? Why not use octreotide?"

You see, a patient with hepatic encephalopathy, you give people home calf blood! "

Zhang Fan took the medical record and patted it. The director's face was pale. I can't say a word.

If Zhang Fan doesn't succeed in the examination today, it's estimated that some doctors will come forward and give Zhang Fan a sophistry on pharmacology from the medical records, physiology and biochemistry internal medicine.

However, now we dare not, because they found that Zhang Fan's level of internal medicine seems to have suddenly increased.

They can't stand the change. They can't deceive the change.

It is also right to say that they are wrong, because the drugs are symptomatic, but they are also wrong, because there are cheap alternative drugs.

In the past, Zhang Fan was not easy to manage. Although he is the Dean, it's really hard to manage. As

people say, there are wronged people who are shot in line. If they fight one after another, they will definitely miss the net.

Moreover, the doctor's salary was not high before, and the hospital was located in the frontier. You were strict. People left the job and went to the south. You really have no choice.

This is an example. It is said that in a frontier County, a new president confiscated all the drug rebates under the guise of not allowing physicians to use drugs indiscriminately. Of course, after the confiscation, it is said that he bought a mini for his mistress.

As a result, several internal medicine departments of the county hospital, under the leadership of the department directors, directly contacted a private medical group, changed jobs as a whole, and it was too late for the president to cry.

In the frontier, really, sometimes talents are really talents. Even Mr. Nanguo, if people can block one of your pits, the leaders will say that Mr. Guo is a great talent.

But now it's different. The salary of tea vegetable hospitals is almost no higher than that of Manchurian public hospitals.

At present, even if the harbor Fishing Village United Hospital in the fishing village, this special hospital, the salary is barely in line with that of tea.

Therefore, Zhang Fan has been very tough now. Moreover, Zhang Fan's level of internal medicine has been able to convince them. Technical units, technical curse, this is a foundation, but not enough, rich and technical curse, is thick and big.

"Come on, now tell me about this treatment. Now tell me how to treat it." After cleaning up the director, Zhang Fan began to ask the bed doctor to give the doctor's orders on the spot.

Ouyang looked at Zhang Fan and said, "when did this boy have such a high level of internal medicine? He was not as good as me in the past. Now he is even higher than me." Thinking, she looked at Ren Li.

Ren Li smiled, "I'm not as good as him!" Whisper to Ouyang.

Ouyang looked at Ren Li with a pair of eyes that wanted you to use.

Then I can only watch Zhang Fan install 13 quietly.

"Ampicillin, sulbactam, 3.0g a day..." the doctor in charge of the bed didn't think for a minute and began to say the treatment plan.

After hearing this, Zhang Fan said: "ciprofloxacin, methylNitrate file 500mg, liquid diet, change the diet

doctor's advice corresponding to the change of symptoms. After three days, it is recommended to take a high fiber diet and check the blood routine regularly. If the leukocyte increases, it is recommended to recheck CT~

You think, my and your doctor's advice, whose is good! "

After finishing the doctor's advice, Zhang Fan immediately put forward his plan, and asked the doctor without asking anyone else.

The bed doctor didn't dare to roll his eyes when he wanted to roll them, because his is really not as good as Zhang Fan's. She wanted to say that Zhang Fan bullied people, but on second thought, she was an orthopedic doctor. She had to say, "the dean's good!"

"Don't be unconvinced. I haven't read much about internal medicine. Comrades should pay attention!"

The doctor in charge of the bed is dying of anger, but there's no way. People can blow it now!

A dean of surgery came to the internal medicine department to check the doctor's orders. Really, what a cow!

Erosion, ulcer, sinus, fistula, cavity, diverticulum. When explaining the terms in the pathology examination, Zhang Fan was particularly impressed with this diverticulum.

The term explanation of medical school is all in English.

First translate it into Chinese, and then explain the meaning of the word.

These are all words related to caves. Of course, there are deep caves and shallow caves. At the beginning of the exam, Zhang Fan knew the English of a diverticulum and wanted to show his skills. As a result, he suddenly found that he couldn't write Chinese characters.

Really, at that time, Zhang Fan was as uncomfortable as a dog. It was like looking for a favor to thank you for your patronage. As a result, he became another bottle. Who knew the mood at that time.

At that time, Zhang Fan almost used Pinyin! Really, a college student uses Pinyin in the exam. NIMA is a joke.

Diverticulum, what the hell is this. Many textbooks explain that there is a hernia in the intestine.

This thing is bullying. If you explain it to a student who has no contact with clinical practice, it's the same as not explaining it. It's very persuasive. Because a noun doesn't understand, it forms a new noun.

Therefore, self-study of medicine is more difficult. Sometimes it's difficult to learn, and if it's wrong, it's troublesome.

When Zhang Fan had just finished learning pathophysiology, he gave himself a diagnosis as soon as he coughed. He clattered in his heart. Cancer! Just like everyone's Du Niang disease now, he can scare himself to death.

In fact, it would be much easier for Zhang Fan to explain this diverticulum now. In fact, the underwear of the intestines is concave. It's like a toothpick boy who put up a tent on his underwear after chenbo.

If there is no top break, the nest formed by underwear is a diverticulum. If there is a top break, it is a sinus. Of course, this thing should be thin. If it's thick, it's not a diverticulum, but a hernia.

What is a hernia? It means that your own organs push your own tissue out of an abnormal depression. It doesn't count if you break it. It doesn't count whether you break your own or someone else's.

Breaking one's own organs is a hernia. For example, the spermatic cord breaks the muscle layer of the inguinal thigh with the intestine, which is a hernia.

The top is unbreakable. A hole is a diverticulum.

If you don't understand, there is a more classic explanation. A beautiful woman wore two layers of socks, white silk stockings next to her toes, and black silk stockings outside.

Of course, the beautiful woman's thumb is longer. When the white silk stockings are not broken but the black silk stockings are broken, this is a hernia. When the top is broken, the white silk stockings and the black silk stockings are not broken, it is an ulcer. When the white silk stockings and black silk stockings are all broken, the thumb leaks out, which is called Dou Dao.

The diverticulum is that the little thumb breaks the white silk stockings and black silk stockings, but it forms a nest.

This kind of diverticulum that goes outward to the muscular layer of the intestinal tract is called a diverticulum. What protrudes toward the inside of the lumen is a polyp.

If you remember this thing literally, it seems very simple to separate it one by one, but similar nouns can often confuse students.

There should be their own ways and means. For example, Zhang fan understands that polyps are standing urination in the intestines. The diverticulum is squatting and peeing, with seams.

Really, it's not driving. It's medical textbooks that drive medical students to death.

Many people say that surgeons drive fiercely. In fact, this has its roots. You go to medical school to listen to the lectures of old professors, especially the closer to clinical disciplines, the more serious driving is.

The more female teachers, the older female teachers, the more fierce they drive.

It's strange that male teachers in medical school were coquettish when they were young, but when they were old, they looked like moral gentlemen one by one. Female teachers, when they were young, were as cold as ice one by one. They opened their mouth and shut up. They even had to avoid farting. But when they were old, they released themselves after they could make soy sauce.

After checking the room, Zhang Fan dissolved the doctor team and said to Ouyang, "Ouyuan, let's organize a meeting between the director and the president."

"OK!"

Then, the director of Gastroenterology and several vice presidents in charge of internal medicine were gathered in the director's office of Gastroenterology for a meeting.

Zhang Fan sits in the director's chair.

Lao Ju also came because he was in respiratory medicine.

Of course, when he came, he looked like we had no problem breathing. What did you want me to do.

"In the future, the Department of Gastroenterology can't unify prescriptions. Now the income has been raised. I didn't say anything before. From now on, a prescription can't be unified."

After Zhang Fan and others had finished, he began to speak.

The director of Gastroenterology turned green, but Zhang Fan pierced his pants today, and he had no face to speak.

What is Tong Fang?

In fact, after the doctor prescribes, the patient takes the prescription to the pharmacy to get the medicine.

Then, at the end of the month, drug dealers go to the pharmacy to start counting prescriptions one by one.

Who prescribed a few bottles of medicine, who prescribed a few bottles of medicine, let the director of pharmacy count it out, and then pay the doctor accordingly.

Of course, the director of the pharmacy department can't run away. The price of a prescription is clearly marked.

"Why, don't you like it?" Zhang Fan looked at the director of Gastroenterology.

"No, I'm not happy. It's just our gastroenterology department. I can't tell the following doctors."

"I have a face. A digestive doctor in a full department is not as good as an orthopedic doctor. It's interesting to mention. I'm here to give you a breath. Today is the digestive department, but today is not the end, but the beginning. You should clean up the ending early. Let bygones be bygones and never be merciful in the future.

In addition, the gastroenterology department carries out a month's skill training. If it fails to pass the level II or even level III clinic, the laboratory wage subsidy will be cancelled! "

That's going to kill you.

"Do other internal medicine also start?" Ouyang asked.

"First internal medicine, then surgery. From one department to another, until all hospitals stop unified prescription. Ouyuan, this is to save them again, not harm them! "

"Well, I support Zhang Yuan!"

"I also support it!" Ouyang said, Ren Li was the first to support.

Other presidents also supported, especially Lao Ju, as he should have done for a long time.

Yan Xiaoyu looked at the team and turned the pot in her heart.

If this unification party is not a country, which President dares to break it?

But today, Zhang Fan broke it.

This NIMA is awesome.

Chapter 1365

"I don't know, NIMA. Hospital Zhang followed the ward rounds in the Department of Gastroenterology for two or three days, and then directly killed the digestive tract. It's terrible. Paroxysmal diverticulitis has no signs and laboratory evidence. I checked my body on the spot and found it!

You don't know. The director of internal medicine had a purple face. "

At the end of Zhang Fan's ward round that day, the internal medicine building directly seemed to have entered the weasel's chicken house in the middle of the night.

"The director of the digestive department is a hair salon director. Let Zhang Fan take away the right to unify the prescription. Now it's good. It's said that next, the cleaning of the internal medicine is in line, waiting for Zhang Fan to take turns one by one!"

The older doctors talked about Zhang Fan's taking away the right of unified prescription. The younger doctors talked about Zhang Fan's simply making rounds with him for a few days and penetrating a department's pants. How terrible this talent is.

"Who said no, you know, Zhang Yuan didn't read much about internal medicine. He just checked the room for a few days, and then learned everything directly. Is this still human? "

To tell you the truth, I followed the ward rounds for a few days, and then a department became well versed. It's so enviable. Really, envious physicians are now taking longer and longer rounds.

Of course, digestion is like a child who has caused trouble. As a result, he failed in the exam. At present, the Department has begun to train troops. Zhang Fan scolded the director of digestion on the spot, but he didn't give punishment.

This is the grace of not killing. The director of the Department of Gastroenterology now incarnates himself as the general manager of the hospital. He trains troops every day, from diagnosis to medical record writing, from treatment to return visit, anyway.

That's what Zhang Fan wants to see.

Since ancient times, the digestive system has not been very powerful in the tea vegetable hospital. When Zhang Fan transferred to another department, the development of digestive system stagnated due to the inaction of the old director.

Now, although the director is not the most suitable director in Zhang Fan's heart, the opportunity will still be given once. If the opportunity is given, Zhang Fan will not be soft hearted.

Sometimes, people still have a sense of crisis. For example, the director of digestion is really afraid now.

A person can become the director of a class III hospital, and he is still under provincial management.

Even if the hospital makes efforts in the second half, the position of the director is so fragrant and rare that insiders know it very well.

Other internal medicine directors discussed: which department will Zhang Fan go to next?

Anyway, the director of endocrinology is not in the mood to make up recently. Lao Ju is proud to say that both the respiratory ICU and the respiratory ICU are the best internal medicine and the benchmark of the internal medicine of the tea element hospital!

Of course, he sealed it himself.

But to tell the truth, the internal medicine, cardiology and Respiratory Department of tea vegetable are really the leaders. As for pediatrics, they have developed into the Institute of Pediatrics, obstetrics and Gynecology, and they have made great efforts to become the first brother of tea vegetable. Think about it carefully. After Zhang Fan took over Ouyang at that time.

To tell the truth, the internal medicine foundation left by Ouyang to Zhang Fan is really good.

.....

Dry turned inside the digestive tract, Zhang Fan's system and other internal medicine disciplines brightened again.

Of course, only one discipline can be selected.

Zhang Fan thought for a while. To tell the truth, he didn't want to choose endocrinology. This discipline is too troublesome and is known as the inner grave.

Digestion, good entry, difficult to master, and endocrine, directly is difficult to entry, difficult to master, it is no exaggeration.

Zhang Fan, who is in the office, hesitates. Now he knows that he can pass the internal digestion because he can barely pass the internal digestion by relying on his own anatomy and the skills of general foreigners.

If you choose endocrine, God knows when he can pass. Zhang Fan looks at the discipline lit up by the system again, "it's not party members who are afraid of death!"

Really, I have to cheer myself up when I choose a subject. It can be imagined how frightened Zhang Fan is by this internal medicine.

Finally, Zhang Fan chose endocrine.

They are all ready to fight a protracted war. They enter the system and choose. Zhang Fan takes a look and then exits directly. There is no more look. Because in the genetic structure of protein, amino acid polymorphism and polymorphism lead to multiple forms of splicing factors of RNA splicing factor itself, post-translational modification leads to diversity and genomic sequence prediction, mutation leads to physiological defects and drug sensitivity!

This NIMA, Zhang Fan, who quit the system, touched his face. He felt that he was sweating. He thinks that in the future, he should have a better attitude towards physicians. After all, it is not easy for people to deal with such a mouthful every day.

Zhang Fangang was about to have a cup of tea. Ouyang took Lao Chen into the office again.

Ouyang couldn't see anything on his face, but Lao Chen's happy face was about to deform.

"What a good thing. Has the tea vegetable government called over the subsidies owed to us for more than five years?"

"Beautiful you! It's not dark yet. The sun is so big. Why do you think of good things?" As Ouyang said, he couldn't help but turn up the corners of his mouth.

"What's the good thing? You look happy." Zhang Fan took a sip of tea. He pretended to be very curious and asked. In fact, he was not curious at all. He had just been hit by the system. Now the income of three melons and two dates really can't arouse Zhang Fan's curiosity.

"Professor Li Cunhou's establishment has been approved to be transferred to tea vegetable hospital. Bird market informed us to sort out Professor Li's scientific research achievements and your scientific research achievements of Zhang Yuan. Bird market is going to apply for titles for Zhang Yuan and Professor Li!" Lao Chen explained to Zhang Fan with a smile.

"Hey, what a good thing!" Zhang fanpi smiled twice without laughing.

Ouyang saw that Zhang Fan was in a wrong state, so he secretly signaled Lao Chen to go out.

When Lao Chen left, Ouyang began to say painstakingly: "you don't have too much pressure. The growth of a department can't be achieved overnight. If all the departments are particularly excellent, what's the meaning of being a dean.

Just like teachers, isn't it a sense of achievement to bring poor students to top students?"

Ouyang thought Zhang Fan was too angry today, so he enlightened Zhang Fan on one side "You can rest assured that it will be all right. Today, your unified power is better.

It's an excuse to directly accept the right of unification of one department. When you accept the right of unification of other departments in the future, everyone complains that the digestive department is not

good, and they won't think you are overbearing. That's better. And... "

Zhang Fan is stupid. Is this what I want? Am I such a small bellied man?

"When Li Cunhou comes, you are going to give him those departments." Ouyang advised for a while, and she was impatient. To tell the truth, that is, Zhang Fan, she had the patience to persuade others. She had already turned her face.

And Zhang Fan, because Ouyang was the one who was advised. Even if she was already well, she had to pretend that she felt bad and let Ouyang give play to her love.

Therefore, when Ouyang talked about work, the two people surprisingly got out of the role of being persuaded and persuaded.

It's like they were practicing lip synching just now.

"Dermatology, burns, cardiothoracic surgery, and Neurosurgery, I want to give it to him. How do you like it? "

After listening, Ouyang didn't object or support. The old lady thought for a moment.

"I have some ideas."

"Ouyuan, you say!" Zhang Fan sat up straight, got up from the boss's chair, sat on the reception sofa, and sat side by side with the old lady.

"I think so. You see, dermatology and burn department should be given to him, but the executive deputy is a little less responsible. You give him outside the heart and nerves. For him, it is not only a responsibility or a burden.

Unlike you, I ordered you to transfer all departments. You have experience in all departments. If it weren't for me, you would know how to do orthopedic surgery now... "

"European Academy, who are you? Not to mention tea, there are several leaders like you in the country. In terms of vision, your vision is not good even if you are an academician. Let's talk about Professor Li Cunhou's work first!"

Zhang Fan blew a few words and quickly pulled the old lady back. Otherwise, let Ouyang blow. It's estimated that it won't be finished in a moment and a half.

Ouyang's leadership is both capable and boastful. Anyway, some achievements must be put on her mouth. You want her to hide in her heart and contribute silently. It's estimated that she can suffocate her.

Sometimes Zhang Fan also wondered if half of the power of the old lady's contribution came from bragging about having capital in the future!

"Oh!" Ouyang glanced at Zhang Fan with dissatisfaction. He was not comfortable and was interrupted "You don't know what to think all day. Giving people three or four broken departments will not only delay their research, but also fail to make achievements. Is it for these broken departments that people come to you? "

Because Zhang Fan didn't make the old lady comfortable, the old lady's tone was obviously impatient.

"Let Professor Li take charge of the laboratory?" Zhang Fan asked suspiciously.

"Oh, I'm so worried!" After glancing at Zhang Fan, Ouyang said, "it's silly of you to give the international department to others. I've asked a lot of people, even your master. Lao Li has a great chance of being elected this time.

Think about it, an academician, although he is a research talent, his research path is too narrow, just a skin. If you give other laboratories to others, it's not as good as Zhao Yanfang. Besides, isn't Dr. Zhao doing well?

Now give him the international department. When you get the title of academician, think about it. Think about it carefully.

I won't believe it if I directly put out the banner of academician. Will several local tyrants in Stan around be unhappy? Also, after the mass production of allografts, I thought you should always sell this thing, and you won't keep it at home.

At that time, relying on our international department, we don't even have to go out of the house. Take down a few stans and we'll have a comfortable new year. " The old man and Zhang Fan whispered head to head.

"We can win the ball country and the stick country!" Zhang Fan felt that Stan had only a few money and suffered a little.

"You think it's beautiful. If you can take Stan, you'll steal music and take balls and sticks. Is the state-owned asset of your fishing village free? If Lao Li hadn't been in our hands, you would have been of great use in allogeneic transplantation. People would have dumped you.

How white do you think you are! "

Zhang Fan has no choice. I just didn't let you boast. You can't attack yourself.

However, after listening to the old lady, Zhang Fan also felt that others were right.

With high technology, Ouyang can't keep up with the pace of the tea vegetable hospital now, but these can be done. Zhang Fan, Ren Li, Yan Xiaoyu and Zhao Jingjin of the tea vegetable hospital are not opponents of the old lady.

In other people's old lady's words, I know better when I'm asleep than when you're awake!

Chapter 1366

In fact, Ouyang thinks more comprehensively.

To the International Department, we have a first face. Although several leaders who join the team have a little background, they are not as big as Lao Li.

Externally, he is a doctor with golden hair. At present, he is also the first person in the world for skin allogeneic transplantation. He is a professor of the golden mean. Just take one of these names. In ordinary second and third tier cities, he is already a brother of cattle among cattle.

Internally, people agreed to the request of the state, suspended patent application and stopped cooperation with foreign countries. If money is used to calculate this, Lao Li's estimated personal loss is not small. Even if people stay in the golden mean, the state has to give people an explanation.

Therefore, according to Zhang Fan's idea, Li Cunhou is estimated to be too tired to make achievements. According to Ouyang's method, fame has prestige, and there is no need to do too much work. The international department is equivalent to a branch of tea.

Lao Li just hang up his name. As for other things, it's too simple.

Zhang Fan thought carefully, and then looked at Ouyang with surprise, envy and even worship.

Of course, it's unknown whether Zhang Fan brought private goods to flatter Ouyang. Ouyang is very useful anyway.

An old woman's skill. You haven't learned the posture of home.

"I want to lose my hair. I still didn't think of a good way. You can do it as soon as you do it. Hey, the leader is the leader!"

Zhang Fan is also shameless. He wants to lose his hair before he knows the news for three minutes!

"Of course!" Anyway, there's no one. My mother boasts!

"Ouyuan, there's another thing. No one else can do what you do." Zhang Fan looked at Ouyang's happy appearance and took the opportunity to say a word.

"OK, I'll go. What's up?"

"The Medical Technology Department of the hospital reported to me that because the patients of the International Department occupy the resources of the hospital and the laboratories scramble for the equipment of the hospital, the patients who do the examination sometimes have to queue up for a day. I want to get a medical technology department for the international department.

Some instruments and equipment here still need to hold a bidding meeting. I think you have to preside over this bidding meeting. I don't trust the others! "

Ouyang wanted to refuse, but she agreed and couldn't refuse. The old lady stood up and left without saying a word.

Out of the door, I saw Lao Chen. Lao Chen took two steps forward and greeted him with a smile, "wilting! It's not fun! "

Lao Chen can't laugh!

"Scold me, the European Court scolds me!" Zhang Fan ran out of the office with a smile. Seeing that Lao Chen's face was purple, he quickly explained.

"What's the matter?" Lao Chen still doesn't look very well.

Zhang Fan told the story again. Of course, he didn't say anything specific, so he said Ouyang promised him first and then said something.

"Er!" Lao Chen is finally connected.

"Why, why don't I tell the European Academy that you go?" Zhang Fan said reluctantly.

"Er, the leader's art of speaking is getting higher and higher. Now I haven't even done a good job in settling down the doctors. Zhang Yuan, if it's all right, I'll go first!"

As soon as Lao Chen listens, he will slip away.

Bidding, if put off before, this is a good job, and the head will be broken. Just like building a hospital, this thing can squeeze out gold and silver.

But now, everyone doesn't want to go. The salary of tea vegetable hospital is so high and the development is so rapid. Who knows what the climate will be in a few years. Now go to get some small money and get kicked out later. It's not worth it.

Moreover, the bidding of the hospital is sometimes not a good job. Today he came with a call from so and so, and the day after tomorrow she came with a note from so and so, and even someone's wife ended up fighting with you in person.

Therefore, people without a little political skill and art can't get down at all.

Ouyang originally pushed this kind of thing to Zhang Fan. She felt that she would never do it without exercise, so Zhang Fan couldn't invite others at all.

But Zhang Fan is most impatient with this kind of thing, so today he took this opportunity to let the old lady go on. In addition to Zhang Fan, Ouyang can do this job in the tea vegetable hospital.

The others really can't stand it. Zhang Fan is not an ordinary Dean now. Even when there is disaster relief, the big leaders call Zhang Fan up. Everyone knows what this means.

And Ouyang, although he feels a little hidden behind the scenes now, he has no children at this age, and his achievements over the past few decades, even if the tea vegetable boss meets Ouyang, he is not polite to say that the European Academy still has a brand!

.....

Lao Li is coming. He can also be the executive vice president. The news is like a long leg. Not long ago, not only the people in the hospital but also the major pharmaceutical companies that opened the branch of tea vegetable.

Because of Lao Li's material, the major pharmaceutical enterprises are a little dissatisfied with the tea vegetable hospital on the surface. Of course, Zhang Fan should be appeased on the surface.

Businessmen? The business is not about affection. The key is to give people a step.

Before Lao Li's news came, everyone pretended not to wake up and didn't mention it. Now Lao Li is coming. If Zhang Fan doesn't act a little, he won't treat others as a dish.

Because there are too many places to use in the future, we can't go too far.

"Ouch, Zeng Dong, I heard you went abroad recently. When did you come back? I didn't say hello. I'll pick you up."

What Zhang Fan said is the same as true.

The other party listened seriously, "ouch, now tea vegetable is half of my hometown. Don't be so polite. Also, Zhang Yuan, you will call me Zeng Dong later. I dare not answer the phone... "

It sounds very intimate. In fact, everyone is playing abacus in their stomach.

"Well, I'll invite Ms. Zeng to dinner tomorrow. I've been drinking tea for so long, and I also..."

"If I don't go to any big hotel, I like a big stall. I don't know if Zhang Yuan is willing to eat a big stall!"

It's nice of Zhang Fan to listen and save money" OK, tea vegetable Nang pit meat is the most famous. "

Zhang Fan scattered several team members. He should bow his head and win over. We eat, drink and drink tea. This crop is over.

Really, this is the advantage of a strong country and its own strength.

If the country can't do this project, people say you squat down and you don't dare to sit down. If you are not strong, people will turn around and leave, not to mention the big stalls. Even if Zhang Fan takes off and becomes a human feast, people will not come back.

Now, a big meal, that's it.

Zhang Fan took Yang Hong, director of the hospital office, and Xiao Chen of the medical office to treat him.

Hospital office, there was no such department at the beginning. Later, the hospital was upgraded. According to the regulations, there must be this department.

What should this Department say? According to the routine, it should perform the tasks assigned by the upper leadership, draft documents, issue notices, announcements, organize and arrange meetings and records, plan and organize activities, approve some administrative processes (such as business trip application), allocate resources (such as vehicle arrangement), external exchanges, reception and contact of foreign visitors, etc.

The scope of work is very wide, the threshold of skills is not high, but it is a test of communication skills. It is not easy to weigh the pros and cons of all parties and serve everyone well.

But Zhang Fan was not a leader who claimed power. First of all, Zhang Fan handed over the resource

allocation to Lao Chen, and the administrative process to Ouyang. Ouyang quit and handed it to Ren Li. Ren Li pretended to be dead and handed it to Lao Chen, but Lao Chen avoided suspicion.

So, this piece, Zhang Fan caught who let who do. Later, it really didn't work. Lao Chen proposed to get a public management department to be the office director of the hospital, otherwise it wouldn't be a thing to go on like this.

As a result, Zhang Fan thought about it and said no. he picked it from the doctor.

Li Hui wanted to come. Zhang Fan said yes. You write a speech first. Li Hui's writing is like asking the patient's medical record.

As a result, Yang Hong, who was digested, came to the fore in the selection.

When Yang Hong and Zhang Fan and Li Hui went to the hospital together, Li Hui pursued others for a while, but Yang Hong finally married a small leader of the government.

Although Zhang Fan and Yang Hong are not very familiar, to be honest, this woman is born to do this.

I took the lead in the selection. I did a really good job when I waited for the agent trial.

From Zhang Fan's travel and the coordination of various departments, he has done a model and a kind of work. Although he is not as old as Chen, he is already valuable. And for professional, people will not be cheated by clinical doctors.

So Zhang Fan asked her to act as her agent first. In fact, Zhang Fan wanted to appoint him. As a result, Ouyang said that he had to investigate for half a year. Anyway, it was a position in the hospital, and that was the case if he didn't investigate.

Yang Hong is very good at coming and has a wink. Anyway, Xiao Chen doesn't feel like someone else's opponent.

"Zhang Yuan, is it appropriate to go to the stall? It's mainly your identity..." Yang Hong's serious nonsense.

In the past, she thought Zhang Fan was very good, but she didn't expect that this level was too high. Her husband is now a minor, and Zhang Fan has become the dean of the top three in provincial management. Really, sometimes she thinks Zhang Fan is the child of a big leader.

But when they went to the hospital together, she still knew whether Zhang Fan was the second generation.

However, although it was the same year, when Zhang Fan became the acting director, Yang Hong was particularly polite to Zhang Fan.

When Zhang Fan became Vice President, Yang Hong respected Zhang Fan very much.

She won't joke like Li Hui before or now. Anyway, no matter who or not, she is a subordinate's state of respect.

Really, sometimes you have to sigh that some people are naturally engaged in administration. Really, they are naturally open-minded.

"What are you talking about? If you want to say that it's inappropriate to invite a big boss to a big stall, just say it. People took the initiative to talk about my identity. You are the director of the hospital office. You can put forward your opinions directly in the future. Don't beat around the bush. "

"OK, leader, I see."

Zhang Fan shook his head helplessly. Xiao Chen stared at Zhang Fan and Yang Hong. She felt that she needed to go to Lao Chen to study again.

Chapter 1367

Zhang Fan Drives kuluze, and Ms. Zeng sits in a Bentley longer than a truck. When Bentley stopped at the barbecue stand, the boss glowed as if the car was his. The voice of greeting guests could go three blocks.

Especially when several barbecue bosses next door look over, people's voice becomes louder! Tea vegetarian barbecue is not very famous.

Because mutton is not very good. When it comes to mutton in the Manchu frontier, the southern border will be hanged and the northern border will be hanged and the tea element will be hanged in other places in the northern border.

Because the water and plants of tea are too abundant, the rivers in the river valley and the rainy climate from time to time make the lamb eat the tail meat, but the mutton is not particularly fragrant.

Mutton still needs to eat hay and lick minerals in what kind of semi Gobi desert in order to grow good meat.

However, even if the mutton of tea vegetable is not good in the frontier, it is much better than that in the mainland and the south.

Special Nang pit meat. Zhang Fan, who doesn't particularly like tea vegetable mutton, sometimes comes out to eat a little.

After entering the barbecue shop, Ms. Zeng, dressed in casual clothes, pretended to be a civilian.

But some things really can't be installed. She thought that populism might bring her closer to Zhang Fan.

But when she entered the barbecue shop, she was like a cat with her feet padded. Seeing the oily table, I wanted to frown, but I didn't want to be too particular, so I sat on the oily table and bench with my teeth clenched.

"Darcy, hurry up. The table is so dirty. Don't you clean it up after eating? Do you want to wipe the stool? Hey, why don't you just make money? "

Although Zhang fan can't speak authentic frontier words, she can still count. Looking at Zhang Fan directing his boss to clean the table and bench, Ms. Zeng's face turned green.

Especially in summer, the men who come back from the grasslands and the unique perfume that the fair girls wear are mixed with the peculiar smell of mutton, beef and water. Anyway, to tell the truth, the local people have to slow down a little before they get into the meat shop.

This is why Zhang Fan seldom comes.

This kind of barbecue spot in the frontier can't look at the door curtain. What kind of high door and large window machine is bright, that is, it is dedicated to entertaining tourists.

And the local barbecue, if you want to eat delicious, you have to accept people's different.

For example, in this family, the tea element can be said to be the ceiling of the barbecue industry. Even within three meters of the gate, there are oily marks. Because there were so many people in and out, oil and water invaded the bricks in front of the door.

Moreover, the waiter's attitude was quite poor. Zhang Fan came for the first time and ordered several dishes. When the third dish came up, Zhang Fan didn't know much, so he asked the little girl waiter, "what kind of dish is this?"

The little girl was stunned for more than ten seconds as if she had been humiliated. Then she stared and loudly told Zhang Fan, "you ordered it yourself. Don't you know?"

Zhang Fan was asked a lonely question.

But to be honest, it tastes really good.

"Boss, what to eat?" Although the owner of the shop didn't know Zhang Fan, he knew the sign of the car, so he received him in person today.

"Nang pit meat, shelf meat, Western spicy red, piyazi cold bitter gourd, and some kavas." Zhang Fan didn't see the menu either.

Although it is said that Zhang Fan is a gourmet with a slightly flattering taste, it is absolutely not wronged to say that he is a foodie. Although he doesn't like mutton very much, he can usually remember a delicious one.

When Zhang Fan finished ordering, the boss said slightly embarrassed, "Nang pit meat has no boss!"

"Well, before the meal arrives, there's no meat in your Nang pit?" Zhang Fan felt that the boss was joking. He bragged to Ms. Zeng that there was a unique Nang pit meat here, but they didn't have it.

"Alas, the government said it wanted to create a clean city. It despised the smoke of our Nang pits and confiscated them!"

As soon as Zhang Fan heard it, it was an embarrassment. The embarrassed Zhang Fan looked at Ms. Zeng. Ms. Zeng was happy at this time.

In fact, even if there is Nang pit meat, people don't eat much, but it's just a step name.

Tea vegetable hospital, except Ouyang, everyone else came out to find steps for others.

.....

The new year's summer recruitment of the hospital is finally over.

The tea vegetable hospital has a brand for this recruitment. In the past, Zhang Fan and Ouyang carried brochures and billboards and ran to schools thousands of miles away for recruitment. Sometimes they were shaved.

Now, people don't go to school for general recruitment except for those at the doctoral level. Niaoshi Medical University sends a letter invitation, and the tea vegetable hospital doesn't take care of it.

Although no one went to the tea vegetable hospital, the graduates came by themselves.

It has become a rule for clinical departments and graduate students to start, but not for other departments, such as medical technology departments.

New doctors and nurses do not enter the post directly for the first time this year, but come to pre job training first.

Lao Chen is busy these days. He can't wipe it clean.

Just settled the doctor, the master came, settled the master, and a large number of undergraduates came.

Really busy enough.

After half a month, the hospital finally entered a normal working environment.

The new doctors and nurses looked at the hospital and felt that they had not come in vain.

"Hey, our hospital is not very good, not a few kilometers from the border. Although there are the best rescue helicopters in Asia, the troops are directly responsible.

And it's inconvenient to get in and out, because there are troops on duty at the gate of the hospital! I have to see my certificate to get in and out, and I don't know why a hospital gets the duty of the army.

The salary is not too high. It's just that the inpatients spend a little more than 100000 a year! "

For a time, the QQ space of newly admitted doctors and nurses was full of such words. It seems a little too high-profile.

"Dean, is this a little too high-profile? Do you want to talk to Zhang Yuan?"

"It's all earned by skill, not issued by the state. Why should we keep a low profile? These new arrivals are very good."

I don't know who called the European Academy. Ouyang was very happy after listening to it.

With the arrival of the newcomers, the first executive vice president of the hospital also came to the hospital. It was the leader of the Ministry of health who sent Lao Li to the hospital.

To tell the truth, even if the mediocre vice president is in place, the general third class hospitals will not be accompanied by the leaders of the Ministry of health.

But this time, the executive vice president of the tea vegetable hospital sent someone from the Ministry of health.

This time, the leaders of the bird market were nervous. Now that the Ministry of health has sent someone, our Frontier Province can't fall behind. Sure enough, an intestines and stomach followed.

Really, Lao Li is embarrassed.

Although Lao Li is a newcomer, he has been here for a long time. His head is familiar. After welcoming Lao Li, it is the internal working meeting of the hospital.

Chapter 1368

Although not everyone is happy about Professor Li Cunhou's admission, relatively speaking, several leaders of the hospital are very satisfied.

For example, Lao Gao and Lao Ju admire Li Cunhou's joining the class. Everyone can see their achievements there.

Zhao Jingjin and Luo Zhengguo are also happy, because they are all technical dogs, which will not be too troublesome, and there will be no strife on other issues. For example, a few technical dogs specialized in politics are not enough for others to play.

Ouyang is also happy to have a prospective academician. It's a cow. Calculate the full frontier. Whose hospital has an academician. Really, if it weren't for Zhang Fan, she could run to the door of other hospitals and shout: who else! It doesn't matter if it's not embarrassing.

I'm afraid it's bad for an old dean or two!

As for Ren Li, she felt that the internal medicine atmosphere was not very good recently. She didn't even think about Professor Li. It's so capricious.

Yan Xiaoyu was a little lost. Because the members of the team seem to have a sharp tail. Originally, she wanted to be a new one, so she didn't have to wear a sharp tail, but now it seems that she thinks a little more.

According to the level of tea element hospital, one more member of the team is needed at present. According to the current development of tea vegetable hospital, according to the hospital that can affect the house price of a city and the high-tech zone, there will definitely be a deputy secretary, rather than continue to be generated within the hospital.

Therefore, Yan Xiaoyu estimates that the tip of her tail will continue to hang.

There is a big difference between the president who has joined the team and the president who has not joined the team. In a simple and popular way, the president who has joined the team is appointed by the government.

The directors who have not joined the team are recruited in the hospital, which is similar to the directors of hospital departments.

The first reason for the unity of the team members of the tea vegetable hospital is that the tea vegetable hospital has developed really well in recent years. The second reason is that the president Zhang Fan is young and capable. Although he does not claim power, he can convince all members except Ouyang.

Of course, in the words of the former Secretary, Ouyang and Zhang fan are just a pair of pants, colluding!

"Lao Li has finally become his own family. You're welcome in the future. In the past, the superiors did not pay attention to our hospital, resulting in the imperfect construction of our team, and all leaders were busy and thin. Now that Lao Li is here, we can all relax. " Zhang Fan smiled and spoke at the internal meeting of the hospital.

Director Yang Hong of the hospital office and director Chen of the medical department are responsible for the meeting minutes.

Yang Hong looked at Zhang Fan sitting on the throne, talking and laughing. She was really envious.

Lao Li smiled and said nothing. Other leaders also smiled.

"Now, let's allocate the business of all leaders. Secretary Ren and I are responsible for the overall work. Of course, Secretary Ren should worry more about human resources. Last time, when the doctor joined the editorial, I signed. People were not satisfied with the bird market stalls. They said I was domineering. In the future, I won't sign for personnel matters that need to be signed. I'll find a secretary. "

Ren Li glanced dissatisfied. To tell the truth, if she were a secretary like Ren Li in other hospitals, she

would have been sent to the countryside and stationed in the village early, but in the tea vegetable hospital, although Zhang Fan said at the meeting, people would do whatever they should do.

"The basic safety and operation guarantee of the hospital should be checked by the European hospital. The rest of us are lack of this..."

The broad responsibilities of hospitals can be divided into ten categories. The more important ones are personnel, finance and most units. The difference is equipment implementation management and drug consumables management, which are the largest in ordinary hospitals.

For example, in a general hospital, if the vice president can manage these two, Jiannanchun will become Maotai and furongwang will become China immediately.

However, in the tea vegetable hospital, everyone is unwilling to take care of these two aspects. The hospital has been upgraded too quickly. At present, almost all the medical industries in the frontier, whether hospitals, drug dealers or leaders, are staring at this one, and the pressure can be imagined.

In the International Department, Zhang Fan listened to Ouyang's suggestions and handed them to Lao Li. As for the Department, if Zhang wants to give someone cardiothoracic surgery, they don't want it. Like a rattle, "Zhang Yuan, don't laugh at me. I came from a small department. If you let me take charge of a large department, others will think I'm a mallet."

Not sold, Zhang Fan has no choice.

The distribution of departments is much simpler. Zhao Jingjin, who comes from general foreign studies, is responsible for general foreign studies, Luo Zhengguo is responsible for God outside God inside God, and Lao Chen is not responsible for any department among the team members.

Although Lao Chen came from Ophthalmology, he has not been in contact with clinical practice for many years and can't keep up. Let him be in charge of Ophthalmology. It is estimated that the ophthalmology director is also uncomfortable, and he is also uncomfortable.

The team meeting is over.

Zhang Fan's footsteps kept going.

Although Yan Xiaoyu is in charge of Endocrinology, after all, she is new here and is also responsible for teaching and other tasks in the hospital. Sometimes she is busy, and the endocrinology department is too special.

Yan Xiaoyu has too many concerns and can't carry out the work well.

"I'll go. It's coming! Heima Jiang has come to the internal medicine building!" Zhang Fan hasn't entered the internal medicine building yet. The female doctors in the internal medicine department have

gnashed their teeth and began to pass the news, as if the groundhog on the grassland saw the big gray wolf in the distance.

The little nurse called black buy buy River, but the tone was full of ridicule and intimacy. There was a slight meaning that Shaohua called Zhang Fan Stone.

The female physician of internal medicine called black buy buy River, just like NIMA to the black man who forced them to pout: I'll call the police. There is a smell of dare to anger but dare not speak.

For the gastroenterology department is an example. Now, not only does the digestive department have no right to unify the prescription, but it is also engaged in technical training. After training, it has to be assessed. If it fails to pass the assessment, it will be directly delegated. In the past, people might say that delegation will be delegated. Lao Tzu is still a hero, or Lao Tzu will come back.

But now it's different. The loss of decentralization is too great, and it may not come back, because too many people have submitted their resumes to the tea vegetable hospital. They accidentally lost their pit and want to come back in the future.

In the morning, when Zhang Fan just left the office, Yang Hongli came out of the hospital office with a notebook in his hand.

Zhang Fan greeted with a smile, "go to the government meeting!"

"Well, no, you're going to the Department! I have to follow, or I'll be incompetent. It's stipulated in the scope of work. "

Yang Hong smiled, half a step behind, followed Zhang Fan and said.

"Oh!" People say the scope of work, and Zhang Fan is embarrassed to say anything else.

"Zhang Yuan, which department shall we go to today? Do you need to say hello to the director of the Department in advance? Is it a ward round or a major ward round? "

"No, it's business learning. Don't say hello in advance!"

Zhang Fan replied without saying which department to go to.

But when Yang Hong heard this, she was full of admiration. "Zhang Yuan is really working hard. His level is so high. He modestly said that he is going to study. It is really that he is not the leader. Who should be the leader?"

Yang Hong thinks Zhang Fan is modest. In fact, Zhang Fan really studies.

After going home last night, he was chased by Shaohua and almost peed. After Shaohua fell asleep with

satisfaction, Zhang Fan ran to the study to read the book.

Zhang Fan's head is dizzy. NIMA hasn't gained a little. As she knew before, after reading the book and learning in the system for the second time, Zhang Fan began to doubt her previous knowledge again.

Endocrine, he knows. NIMA is so hateful.

Now he is worried not only about himself, but also about the endocrine department.

Let a group of wives and grandmothers go to this department and make achievements. Zhang Fan doesn't pee standing.

Zhang Fan took Yang Hong into the internal medicine building. Before walking a few steps, Xiao Chen of the medical office came panting after him.

"What are you doing here?" Zhang Fan asked.

"Dean, medical business teaching belongs to our medical department." Director Chen was quite dissatisfied with his less spectacular chest.

This is to Yang Hong.

When Yang Hong was not married, she was plump. How to say, she was as mellow as a young woman, but as light as a young girl.

Now married, much less light, but plump to a higher level.

Wearing a white coat on her, it's like she went to the canteen and packed two big steamed buns in pairs. I don't know if it's white powder.

But the weight is enough.

Zhang Fan didn't say anything. He looked at them and continued to walk towards the elevator.

Yang Hong waited for Zhang Fan to turn around and slightly opened her mouth, but she didn't make a sound. It seemed to say: little girl film!

"Shh! Zhang Yuan didn't get off the elevator!" The head nurse in God sent a little nurse to monitor the elevator door. Seeing that Zhang Fan's elevator didn't stop in God, not only the head nurse, but also the department director was relieved.

Zhang Fan, this is too scary.

"No digestion!" The director of the digestive department was sweating early in the morning.

"No, no, the elevator stopped on the 11th floor!" The head nurse patted himself on the chest as if for the rest of his life.

"Go endocrine?"

"It's hard to say. The nephrology department is also on the 11th floor."

"Forget it, rounds, as long as we don't come to digest it. Hurry up. Who's the turn for the physical examination this morning? Come on, do it one by one. "

.....

On the 11th floor, Zhang Fan got off the elevator and walked towards endocrine.

"Those who should come always come. Why is my life so hard? Why don't you go to the nephrology department! " The director of Endocrinology heard that Zhang Fan entered the internal medicine building, she had a bad feeling, and the result came true!

His wives were also taken by surprise by Zhang Fan.

Because they didn't say hello in advance, when they found Zhang Fan, Zhang Fan had entered the internal medicine building.

Therefore, it's too late to prepare. Now it's time to hand over the shift.

Zhang Fan felt wrong as soon as he entered the Department. What's wrong? Zhang Fan bowed his head and found something wrong.

Because March 8th Festival and nurse's day are legal festivals. When these two festivals come, the hospital will give female doctors and nurses some small benefits, such as small white shoes.

Therefore, in the hospital, female doctors often wear hospital welfare shoes when they go to work. Although it's not explicitly stipulated, everyone wears it like this.

But when you enter the endocrine system, it's different. Riotous with colour, white coat, all kinds of fashionable shoes, pink, purple, toes, and even some toe painted black nail polish, how black?

It can be said to be black and shiny. I don't know. I thought my toes were smashed by a hammer. They were shiny.

Zhang Fan frowned slightly and said nothing, but he had an idea in his heart.

Chapter 1369

"The dean is here today! It is said that they are still making rounds! "

It's more than three o'clock in the afternoon. The ward round is not over yet.

People are like this. If things don't fall on their own, we can always get together and gossip.

For a time, everyone wanted to see endocrine jokes.

As for Endocrinology, this department has attracted people's dislike. When others ride bicycles to work, the little daughter-in-law and big girl of the Department have already driven a car.

When cars became popular, people began to run with a rope around their head at work.

When everyone can wear leather clothes and pick up leather bags, people begin to carry gunny bags for natural beauty again.

Therefore, although this department leads the fashion style of tea element hospital, it is the Department that other departments, especially female doctors, dislike most.

To tell you the truth, the conditions of doctors in this department are really good.

The lowest level is tea element, the wife of a County Tobacco Bureau. When people are reluctant to eat NIMA's meat when it's 25 kg, their welfare is directly the unit that sends half a pig, which is not a number in this department.

Really, think about it, but also very helpless. I don't know how I got a department.

Director, daughter-in-law of the tea vegetable people's Congress, deputy director, daughter-in-law of the boss of the tea vegetable distillery, other doctors, taxation, public security and law.

That is, the tea vegetable hospital has been upgraded, and Zhang Fan doesn't want it now. Otherwise, I can't help it.

This is not a joke. For example, Dr. Li's husband, the boss of the tea element environmental sanitation bureau, had to treat Ouyang's medical waste through Dr. Li to invite his husband to dinner to solve the problem that the medical waste truck came late every day.

The director of Endocrinology, who wanted Zhang Fan to go ahead, was rejected by Zhang Fan. "You're busy, just think I'm not here. I'm here for business study, not for ward rounds."

As soon as the director of Endocrinology heard this, his wronged eyes turned red. It seemed that it was too sour in his digestion. What's more hateful is that Zhang Fan stood at the door of the ward and went out to see a doctor. He raised his wrist to look at his watch. At the same time, he had to look at his watch. When the doctor came in, he had to raise his wrist to look at his watch.

Nima can't be lazy if she wants to steal more in the office. Zhang Fan is like a timing master with a red sleeve. I'll write it down in a small notebook every second you have.

A large ward round. At the end of the last ward round, Zhang Fan felt that the toes of these ladies in high heels had thickened a little.

Especially those who wear crystal stockings have crisp white toes, which are clearly granular on beautiful shoes.

Now, standing for a long time leads to edema. For example, the white toes of Cuizhu have now become fat milk candy. They lean closely together one by one. It is estimated that the shoes originally worn by 38 can't be worn by 40.

That's what Zhang Fan wants. I make you stink. I won't tell you. I'll let you stand. Anyway, I'm wearing flat sneakers. Although it's uncomfortable, it's definitely better than you.

Although the hospital has no written requirements, doctors and nurses are not allowed to wear high-heeled shoes. But this really can't be worn. For example, the patient needs to be rescued in a short time in case of an accident.

You wear high heels and run from one end to the other. It's about ten meters. You run for two minutes. When NIMA runs to the ward, the patients are cold.

After checking the room, the director meant to let Zhang Fan say two words. Zhang Fan shook his hand and turned his head and left.

Today, in addition to letting these people stop, Zhang Fan didn't get anything. Because it was too basic, Zhang Fan left reluctantly.

When Zhang Fan left, the doctors really grabbed the nearest stool one by one, like children playing the

game of grabbing the stool. They took off their shoes and wanted to put their toes in their mouth.

The director of Endocrinology sat in the middle, rubbing his toes and thinking, "what are you going to do today? I don't say a word. I heard it from the beginning to the end. I have no opinion at all. I'm more serious than the students who come here for further study.

But when I left, why did I look unhappy? Was the ward round too short? "

If someone takes a camera and takes a picture of these endocrine wives at this time, you will find that it is extremely strange.

Obviously, they are all star faces, but each one is more rude than the other.

One hand rubbed his feet, two rubbed his feet, and looked carefully with his arms“ Today, I was really crippled by Zhang Fankeng. I think he did it on purpose! "

"Why don't you hit him!"

"If you don't fight, why should I fight!" The two titles are the main treatment, and the husband at home is the deputy. The women quarrel.

"Your husband's Discipline Inspection..."

The director of Endocrinology listened in her ears and felt a lot of sadness in her heart, although she came over like this.

To tell you the truth, the situation in this department is really complicated.

Back to his office, Zhang Fan sent two tails. He changed his slippers and relaxed a little.

Kill an enemy for a thousand and lose eight hundred. Although he hasn't reached the point of covering his feet and crying, his toes are already sore and swollen.

Today's harvest is not big, but after listening to the ward round of the director level doctor, it's like reviewing the endocrine course. With a little breath, Zhang Fan sat on his desk, opened his internal medicine book and turned to endocrinology.

People's success is really not blown out. Zhang Fan's learning spirit is really admirable.

Yang Hong returned to the office. Although her feet hurt as if she had just opened the foot binding, she looked at her watch for ten minutes. Zhang Fan hasn't gone out yet.

She got up with her teeth clenched. When she walked, she seemed to have been hurt between her legs. But she still twisted her face and gently knocked open Zhang Fan's office.

"Dean, you haven't eaten yet. I'll go to the canteen and order for you?" As he spoke, he poured water for Zhang Fan to make tea.

Zhang Fan was a little embarrassed and wanted to stop it, but Yang Hong quickly soaked Zhang Fan, and unexpectedly knew that Zhang Fan was trained by Lao Chen to like drinking Dahongpao.

"It's all right. Don't worry about me. I'll eat by myself later. Go to dinner. You'll have a rest this morning."

"Leaders work so hard, where can I rest? As long as the leaders are in the hospital, I will be responsible for the leadership's food, drink and Lhasa. This is my job." Yang Hong said, glancing at the books on Zhang Fan's desk.

I secretly admire that NIMA has worked so hard as the dean.

Although Zhang Fan said no, his body honestly accepted Yang Hong's arrangement. To tell the truth, this is subtle. If a subordinate, especially the staff attached to the Department, can do this step, it means that your position is firm.

Zhang Fan is drinking tea and nibbling on his endocrine bit by bit. To tell you the truth, the more he reads, the more uncomfortable he is. He wants to tear up the book.

I don't know how many people have this feeling when learning endocrine.

Anyway, Zhang Fan has this feeling.

Really, the more you look, the more angry you look. The angry Zhang Fan ate five or six more thin skinned steamed stuffed buns than usual.

Yang Hong looked at Zhang Fan's eating appearance and admired her.

I'm so hungry that I have to read and study. Hey! He deserves it.

That's how people are. If you succeed, NIMA farts are lavender. For example, if Zhang Fan doesn't succeed now, she will definitely say that NIMA is stupid. She has to read books at dinner time, and that's how she is in her life!

Chapter 1370

"Ferocious! Do you know, in a ward round, the whole female endocrinologist in Zhang hospital walked out of the Department with her legs tilted. Especially the youngest one, who is still young, has never suffered so much toss.

Come out of the office, curling your legs and crying. "

"Do male doctors cheat?"

"NIMA, is there a male endocrinologist? The old party didn't go to endocrinology at the beginning. It took three months to apply to the infection department. I can't stop it. "

"Well, I heard. It seems that the next goal of Zhang Yuan is endocrinology. But it's good, as long as you don't come to our section. "

On the same day in the hospital, many little doctors and nurses gathered together to gossip and chat.

Of course, most of them are joking. Especially the hospital QQ group. In this group, it was initiated by several small nurses, and then pulled. Almost all the younger generation of the hospital joined this group.

Of course, Zhang Fan didn't enter, because when they knew Zhang Fan, Zhang Fan was already the acting director of anorectal department, so they didn't pull Zhang Fan into the group.

Although this group are all doctors and nurses in the hospital, they just have no leadership. Usually everyone is very happy in the group.

For example, today, many people are @ the Party Central Committee students who ran out of Endocrinology! The young man's surname is Dang and his name is Yang. Originally, there was a Chinese character. He spent primary and junior high school safely. In senior high school, the head teacher said, he'd better go with the Chinese character. His name is too big and bad for children.

His parents also think the teacher is right.

Later, he graduated from medical school and entered the tea element hospital. He was assigned to endocrinology. After staying for three months, he raised his hand and surrendered.

"The government, you still have foresight. You ran away from the endocrine early, otherwise you came out with your eggs covered yesterday."

"Party Central Committee: the water is too deep, the wind is too strong, there is no strength to talk less,

and there is a boss and trumpet in the group!"

Then, no one spoke! The Party Central Committee smiled with a mobile phone. He bluffed people, mainly because he was hurt in the endocrine in those years. He was particularly reluctant to be mentioned by others about what he had come out of the endocrine before.

It can be imagined how much damage these wives caused to the newly graduated doll! At least they have endured such a big name for several years, but when they met a group of silk stockings party, they surrendered!

.....

"You say, is Zhang Yuan dissatisfied with me?" Yan Xiaoyu said sadly in Ren Li's office.

Several leaders of tea vegetable hospital, although the office is uniformly decorated by a builder, the style is still different.

Ouyang's office is simple. In addition to a few half dead cactus, there are only the party flag on the desk and the inscription hanging on the wall behind the chair. Originally, it was not big. As a result, when Ouyang asked someone to mount it, the frame was particularly huge.

She wanted to be half the size of a wall. Her office can make people vaguely feel like a war room.

Zhang Fan's office is more complicated. There are many books, and each one is more expensive. There are also tea cabinets, tea sets, bone models, human body atlas, and a small bed in the suite.

A massage lounge chair. Others advised Zhang fan that you don't make it very high-grade. Look at the office in Central South China.

Zhang Fan didn't answer.

Ren Li's office is more warm.

There are not only books, but also all kinds of gadgets on the table.

There are even dolls like cherry balls. The pink doll is very childish in such a large office. It seems that this woman, no matter how old, always has a girl's heart.

"No, you don't have that idea. He's a man who says one thing." Ren Li said seriously.

"Ah! He has something to say to you, but to others? You think it's a kind man who jumped to the top

three Dean in a few years? " Yan Xiaoyu sighed in her heart.

Really, she envies Ren Li too much. Ouyang protected it, Zhang Fan held it, and other leaders respected it, while Ren Li was still the same as when she just graduated 20 years ago.

If NIMA's marriage was not perfect, she would be the happiest woman in the world.

Unfortunately, some people's life, others can only envy but can't imitate.

"I've been in the hospital for so long and haven't done a good job. Hospital Zhang attacked endocrine this morning and didn't say hello to me. You said..."

"He's usually like this. He doesn't say hello when he comes to the cardiology department and doesn't say hello when he goes to the respiratory department. Don't think too much. If you think too much, you'll get old. In this way, I'll tell him to go to endocrinology and ask him to say hello to you in the future."

Ren Li opened her mouth to live without even thinking about it.

"OK, is that good? Will Zhang Yuan be angry?"

"It's okay!" Ren Li said indifferently.

Zhang Fan is still gnawing at endocrine in the office. The more he read, the more he would secretly rejoice. Fortunately, his family was poor. He wanted to get rich early and chose orthopedics in the system first.

At first, if he wanted to become a God and Buddha and save the world, he chose internal medicine. It is estimated that Zhang Fan is still practicing internal medicine in quark.

This thing is not human work. The system requirements are too high. Zhang Fan swears while reading a book.

"Is this NIMA a book made up?" The Dahongpao prepared by Lao Chen is not good to drink.

"Who!" Zhang Fan was very upset when he read. The door of the office rang again. He didn't take it out on his donkey and sent his fire to the people outside the door.

Then the door opened and Ouyang stood at the door.

Zhang Fan looked up and swallowed his anger.

"Why, early in the morning, so angry." After Ouyang came in, he glanced at Zhang Fan, then slightly padded his feet and looked at the book on Zhang Fan's desk. The old lady smiled, as if to say again, I know I know you.

"Work and leisure should be combined. If you really can't see it, go to surgery and have a rest. It's easy to lose your confidence by reading with your head down."

Is NIMA here to persuade people!

Zhang Fan was too angry and cried.

"Are you free today? I heard yesterday that the general nurse retired and gave you all the flowers?"

"Er!" Ouyang looks bad.

The chief nurse retired and the hospital was upgraded. She was originally an associate department. Because of the upgrading of the hospital, she became a positive department before retirement. I can earn six or seven hundred more a month. I'm happy when I leave.

As soon as he said this, Ouyang didn't like it, because he didn't know why. Ouyang didn't have a week to send the flowers to others, and they were all ruined.

Even the previously fresh cactus can't be raised now. Ouyang is angry. It is said that he even fell off the watering pot.

Zhang Fan felt that it was estimated that he spent too much. The general affairs office couldn't get it. He was killed in the collective battle.

"Well, you know you're angry with me! When you ask for help, you smile like a sunflower. When you don't ask for help, you look like a dog in law. " Ouyang is not a loser.

"Oh, I care about you." Zhang Fan was scolded and couldn't answer back. He thinks he's cheap too. Why bother the old lady!

"The bidding has been completed. Look for yourself. Also, there are too many people greeting in the kindergarten recently. You say you are a bastard. Throw this to me. My head is big."

As soon as Zhang Fan heard this, he smiled and took the document handed over by Ouyang. He looked at it carefully. Ouyang didn't stay much. After giving the document to Zhang Fan, he turned and left. He was in a hurry. He was afraid that Zhang Fan would arrange another job.

After reading Ouyang's documents, Zhang Fan still had to admire the old lady's old ways.

All the instruments and equipment that should be bought were bought, and none of the businessmen who looked ugly were on the list.

For this kind of thing, Zhang Fan has no pressure at all. He doesn't expect his father to ensure his

position as president, nor does he expect his father-in-law to make him sit more firmly in the tea vegetable hospital.

So, don't mention these businessmen. Even if the people behind the businessman invited him to dinner, he didn't take care of it.

Although the work is left to the European Academy to finish it, as president, Zhang Fan still has to watch it again. Really, this is responsibility. Whoever sits in this position for a long time will have naturally generated responsibility.

After reading it, Zhang Fan thought and called Lao Chen.

"Put the equipment in place as soon as possible and let president Li worry more. After all, it's all for his international hospital."

"OK, I'll implement it later. Dean Li, let's call you. I heard that digital research and the golden mean have been holding Professor Li in the laboratory for two days. No one is allowed to enter or give up."

"OK, I see. It's estimated that it will be mass produced soon. In this way, I'll call him, but you still have to worry more about his business.

Also, what's the matter with the flowers in the office of the European Academy? When the old lady came to the office today, I saw bubbles on my mouth. "

Zhang Fan asked.

"I see. I've been busy lately. I can't take care of it!" Lao Chen doesn't put the blame on others. For example, for such things, Lao Chen said: I told Xiao Chen that it has nothing to do with him.

But Lao Chen knows that this small responsibility must be borne when it should be borne. Not only the people below will be grateful, but the leaders will feel that Lao Chen is more responsible.

After all, old Chen is also a member of the team. Zhang Fanzhen will think that old Chen is all right all day and stares at several pots of broken flowers in Ouyang?

After explaining things, Zhang Fan continued to read.

I went to endocrinology yesterday. After reading a book all day today, Zhang Fan feels that he has made some progress now. He plans to go to endocrinology tomorrow.

This kind of thing, like chasing a girlfriend, has to be particularly fierce and active a few days ago. If you can't win it, you should first put out the flag and raise the flag first. How can you have the moral initiative? No!

After the first day, the director of Endocrinology held his breath the next day. As a result, Zhang Fan didn't come. She was a little relieved. She felt that Zhang Fan might not come these two days. If you can't die, wait two days.

And endocrine doctors have collectively stopped wearing high heels!

It's too bullying. After everyone rubbed their feet for three days, they realized that Zhang Fan is wilting!

Chapter 1371

Tea element hospital is different from other large hospitals. Because it takes a short time to become a large hospital, it has not got the common problems of large hospitals.

This is as like as two peas.

The larger the hospital, the larger the enterprise, the more rules and regulations, and the less humane. Even after working in a unit for seven or eight years, it may not be able to know most people.

The tea element hospital is different. It was upgraded late, and it is still in small cities. Therefore, the competition between doctors and nurses is relatively smaller, and the relationship is more harmonious.

A little like a super family.

Lao Li, Li Cunhou appreciated this when he chose the tea vegetable hospital.

He is not a combative man. In addition to being tough enough, he is not the kind of person who looks down on wolves. In his early years, he came back from the golden Mao country. In fact, he came back only because he couldn't fight others.

After he came back, the golden mean didn't make him feel particularly comfortable, so he had been wandering outside the whole hospital.

When it comes to tea, it's different. When people reach a certain level, they still have a strong sense of being needed.

Early in the morning, Lao Li came out of the expert building. Because his wife hasn't come yet, he is now a bachelor. Although the food cooked by doctors and nurses in the canteen is delicious, it's boring to eat

too much.

Standing at the gate, he hesitated whether to eat out or in the hospital canteen.

"Lao Li!" When he hesitated, Zhao Jingjin called him at the gate of the hospital.

"Come, come, come, I'll treat you to breakfast." Zhao Jingjin enthusiastically shouted Lao Li.

In fact, whether the food is good or not, Li Cunhou is not like Zhang Fan, mainly because of loneliness!

Hearing Lao Zhao's cry, Lao Li was as happy as a newly weaned Lamb on the grassland. He felt that his limbs were collectively off the ground.

"Zhao Yuan, didn't you say that the steamed stuffed buns in this family are not clean!" Although Lao Li was confused, he was already sitting on the small bench waiting for the boss to get steamed stuffed bun.

"The unclean one doesn't set up a stall here anymore and has no business. This family is a relative of Zhang Yuan! " While eating steamed stuffed buns, Lao Zhao popularized the gossip of the hospital to Lao Li. At the same time, he also asked the boss to serve steamed stuffed buns and bean curd.

"Well! No wonder there are so many people! Zhang Yuan doesn't worry about others gossiping? " Lao Li looked at the small stall for steamed stuffed buns in the tabloid kiosk. People came and went in an endless stream. He was a little surprised and asked.

"When people buy steamed stuffed buns, Zhang Yuan is still a small doctor. They have good workmanship, clean work, and the most important thing is to keep a low profile. Not many people know this."

"Oh! The newspaper stall sells steamed stuffed buns, and Zhang Yuan has a unique vision! " Lao Li nodded " It tastes good! " After eating steamed stuffed bun, Lao Li's eyes brightened.

Zhang Fan drove into the hospital and looked at them. Hey, these two guys eat steamed stuffed buns. He parked his car and came over.

Shaohua's cousin and sister-in-law didn't say hello as if they didn't know Zhang Fan. Just nodded slightly.

"Who's on?" Zhang Fan smiled and patted Lao Zhao and Lao Li on the shoulder.

"You!" Lao Zhao looked back and saw that it was Zhang Fan. He was happy!

"Hehe, OK, I'll just ask!" Zhang Fan also sat down with a smile.

"Lao Zhao, you've been making more snacks recently. Let the clinical pharmacist in the pharmacy enter the Department and stop all the antibiotics and traditional Chinese patent medicines that use the most." Zhang Fan said while eating.

"OK!" Lao Zhao nodded without asking why. In fact, there's no need to ask now. It doesn't make sense if the hospital gives such a high salary or takes kickbacks from the pharmacy.

"Lao Li, what's the matter? The international department is the Treasury of the hospital. You can't go into the laboratory and ignore the international department."

"Zhang Yuan, I haven't had time to say it yet. Just as you said it, I'll say it too. I only care about the medical business, but I really can't care about the rest. The International Department of our hospital, say a bad word, let it out is a hospital.

I haven't even managed the Department Director. Now you let me manage such a large department and such an important department. I really have more heart than strength.

Just yesterday, two chiefs came, mighty. If President Chen hadn't helped me, I wouldn't know how to receive.

Really, I'm not modest. I really can't do this. "

Lao Li was sincere. Zhang Fan was right when he thought about it.

"OK, I see. I'm not considerate! How is the mass production of allogeneic transplantation? "

As soon as he said this, Lao Li's eyes brightened. "You don't come to the laboratory. What can you compete with the internal medicine? Now mass production is almost finalized. Go again and see if you can reduce the cost again. It is estimated that mass production will be possible in the second half of the year. "

Zhang Fan nodded and had a concept in his heart.

Ouyang said to take Stan. It seems that they have to make plans. Lao Li and they move very fast.

But for these things, others seem to be the most important thing. When Zhang Fan comes here, it's a small thing. Because many people help him with these things.

Before entering the office, Zhang Fan informed the hospital office and the medical department to make

a plan for the project, and Zhang Fan didn't consider these things when he entered the office.

Now he has to think about big things, how to pass the endocrine thing. If popular and simple, what is endocrine research.

To put it simply, endocrine studies are hormones, and there are about three kinds of diseases. There are fewer hormones, more hormones, and another is hereditary hormone diseases.

It seems too simple, but once you want to go deep, you'll be a dog. First of all, what are hormones, the types of hormones, the organs that produce hormones, the organs that receive hormones, and whether hormones guide messengers or receptors.

To tell you the truth, Zhang fantou is big.

However, since you have chosen, you should complete it even if you are kneeling, otherwise the system can't open the next options.

Endocrine diseases, the most famous is diabetes, the most famous hormone is insulin. In fact, endocrine diseases are also learned according to organs.

The first is the pituitary gland, which is divided into anterior and posterior lobes. This thing secretes different things from front to back.

Next is the thyroid gland, then the adrenal gland and * *.

Just a pituitary gland. Zhang Fan, who is dying, can't get in. When he digests, Zhang Fan feels that he doesn't read books and may be a general doctor in the Department of digestion. After all, I'm good at general surgery.

When it comes to endocrinology, if you don't read, it's definitely bullshit.

After reading endocrinology all morning, Zhang Fan thinks Ouyang's words are right. He should combine work and rest. It's time to go to the operating room and read the book of internal medicine. He's almost out of confidence.

Out of the administrative building, into the operating room, put on the surgical wash clothes, Zhang Fan felt refreshed in an instant!

Especially the greeting of the little nurse in the operating room, Zhang Yuan, Zhang Yuan, Zhang Fan, listening, his heart is sweet. Really, it's no exaggeration.

After entering the operating room, Zhang Fan saw the head nurse patrolling between the operating rooms with Bayin.

"Why haven't you gone to the nursing department and can't bear the operating room?" Zhang Fan asked the head nurse.

"I'm really reluctant, but today is my last visit to the operating room. I'll report tomorrow. I'm gone. Don't be too tired yourself. Look at the collar of your hand clothes! It's all the Dean, and I have to worry about it! "

The head nurse is like Zhang Fan's mother and Zhang Fan's wife. She personally gets the collar for Zhang Fan's clothes. Zhang Fan smell the perfume on the other side, quickly stepped back a few steps, "you made the separation of life and death, less to this set."

"Sample! All right, after the inspection, I'm at the station! " Although it seems very proud, in fact, the head nurse's slightly red eyes still make people feel a little sad.

That is, the promotion, this kind of sadness is a little weak.

"I'm gone!" The head nurse gently turned her head and looked at the operating room, the place where the lights are always bright no matter day or night, the place that is always ringing and ticking, and the place where her best years are left.

"Head nurse!" Bayin shouted softly. Behind Bayin, a group of nurses followed.

Although the head nurse is sharp, she can scold the illegal nurses with tears, and scold the new doctor out of the operating room because of the unqualified aseptic operation. However, whenever the little nurses come during their physiological period, she will always replace them like her mother, but no one knows. She also cries secretly at home in pain.

But in the operating room, she is the backbone of all the little girls here. The director vented his anger on the little nurse because of the equipment. When the little nurse cried wrongly and dared not cry, the head nurse quarreled like an old hen for the sake of the little nurse and a surgical director.

You can also fight with a group of anesthesiologists because of the bonus. Really, justice is at ease. Now the head nurse has become the head nurse, but this is not her battlefield.

Nurses, the most vulnerable group in the hospital, have a head nurse who can carry in front. To be honest, it can really make everyone sincerely support it.

"All right, go back. Go to the surgery, go to the surgery, pack the equipment. Zhang Yuan, I'm leaving! "

"Oh, OK, hurry. You can use more snacks for the distribution of new nurses this year." Zhang Fan smiled and waved.

Looking at the figure of the young woman leaving, there will be a peculiar smell of perfume in the operation room, and a voice like Wang Xifeng.

"Bayin, nurse Ba! How many thyroid surgeries are there today?" Sadness is short-lived. After all, this place has no time to make you sad. Patients in the operating room can't wait.

Ba Yin wiped a handful of tears and hurried back. He was still sad. Now let Zhang Fan call nurse ba. Ba Yin was a little embarrassed. Of course, she doesn't have the arrogance and strength of Lao Ju. Lao Ju hates others calling him Dean ~!

"Zhang Yuan, there are three thyroid in the operating room of the double gland Department today. Two have started. The third has an operating room without a surgeon."

"Oh. Come in and arrange an assistant for me. The third thyroid surgery, I'll do it. "

"OK! Zhang Yuan. "

Zhang Fan then went into the operating room of the double gland department. As he walked, he muttered, "NIMA, I don't understand your mechanism. Can't I cut your body?"

Zhang Fan entered the operating room with a menacing posture of revenge.

Chapter 1372

Double gland department, a favorite Department of female doctors, especially young female doctors. Clean, no emergency, but also surgery. Female surgeons, tut Tut, have face when they say it.

Like the police and special police, they like long ones and long names when they are young.

Zhang Fan entered the operating room of the double gland department. The director of the double gland department is a woman and the only female director in the surgical system of tea vegetable hospital. Some people say that the director of dermatology is fat Naza.

In fact, dermatology department is very embarrassed when standing in line in the hospital. Oral cavity, maternity and facial features are often classified as small departments, and human surgery does not want it.

Therefore, female directors, especially those in surgery, not only have face, but also have special status.

When selecting excellent surgical directors at the end of the year, especially when several directors are

top leaders, women directors are often elected. In previous years, women directors have been excellent directors for six or seven consecutive years.

Later, the director of the double gland department was embarrassed to participate.

Moreover, the director of the double gland department is also good-looking. Although he is in his early 40s, he is not thin or fat. There is no macula left over from pregnancy on his face. He speaks and works in an atmosphere on weekdays. In the words of the people of the capital, the director of the double gland department is da SA MI.

From this point of view, man, man, man is a very strange creature. It has been said that once people's curiosity is lost, it represents weakness.

For example, an old man and an old lady, an old man watched the live broadcast, stole cool clothes, called him to reward his brother's sister, and even slipped away than the young people. The old lady is a little resistant to new things.

Although the old man is not serious, in fact, the old man's aging speed is definitely slower than the old lady's aging speed.

This thing is actually the same in technology. For example, Zhang Fan is particularly curious about surgical technology.

Sometimes, I also try to get a new technology. In fact, this is men. Men are teenagers until they die. It doesn't mean that men are innocent until they are teenagers, but that men like to play until they die.

Even in the ward, especially in the geriatric ward, you can find that in the female geriatric ward, two old ladies chat quietly or close their eyes.

The male geriatric ward is much happier, even wearing a breathing mask and playing with the old man in the next bed with a crutch.

The director of the double gland Department saw Zhang Fan enter the operating room.

"Ouch, my boss, help me quickly. Today, there are several breast surgeries. Xiao Li and her family went to the countryside for women's census. There are not enough hands. You can add hands and do all the breast surgeries today."

The director of the breast Department glanced at Zhang Fan and said, but he didn't stop under his hand.

Compared with the director of internal medicine, the contempt for Zhang Fan at the beginning is a common problem in the hospital. Physicians think surgeons are vulgar. Don't mention Zhang Fan, even if his master is in the hospital.

Other physicians don't recognize the academician status of surgeons.

Recently, after Zhang Fan overwhelmed an internal medicine, now the internal medicine directors see that Zhang Fan is not admiration, but fear.

Nima, a dean of surgery, actually overwhelmed the director of surgery alive. Is this still a person!

In the Department of surgery, except for several senior directors, such as Lao Gao and Lao Li of Urology, although they admire Zhang Fan from the heart, they still don't admit it.

In addition to a few old qualifications, other directors are particularly kind to Zhang Fan. I don't care about what I say or do.

Even Zhao Zipeng of the anorectal Department secretly asked Zhang Fan how to use more kickback drugs!

This is tantamount to treating Zhang Fan as a kind parent. We are comrades on the same front, not enemies with class levels.

"I won't be a strong man for you today. I don't think Corey has a few thyroid glands. I just told the head nurse, "I'll do thyroid, not breast!"

"That's better. I'm afraid you say I'm picky. I'd rather have your thyroid. Who will you take to do it? "

The director of the double gland Department said with a smile.

"You have few people today. Just send an intern." After Zhang Fan said hello to the director, he went to the operation and waited for the nurse to send the patient to the operating room.

Zhang Fangang went out and several young female doctors were young women. After peeking at Zhang Fan's departure, he whispered: "it's estimated that he seldom comes to our department. It's estimated that he thinks of some new ideas these days, and then go to the internal medicine department after the test is successful."

"What pretend to force, talk well!" The director of the double gland Department said discontentedly that maintaining the superior leaders is a quality that the subordinate leaders must have, whether you are pretending or sincere.

But I didn't say anything. Just do it! And I didn't participate in the chat with several other young doctors.

Zhang Fan really doesn't have this idea. He just wants to have an operation and evacuate the depressed mood of reading recently. It's too oppressive.

.....

"Top three Doctor Skills Competition? Why didn't we go to the tea vegetable hospital? " In the administration building, Ouyang quarreled with each other on the phone.

Sometimes, Zhang Fan is also very strange. The old lady Ouyang, with such a small body, where she got such powerful energy, is either quarreling or on the way to quarrel, and the object of quarrel is often the superior.

Opposite is a deputy in charge of medical teaching and re education in niaoshi health department. At this time, I received a call from Ouyang, and the two monks who were wronged were confused.

When Ouyang said seven or eight sentences like a machine gun, the other party said, "this thing is arranged according to previous years, and it doesn't belong to me! Did you scold the wrong person? "

The other party was also a gentleman. He thought he was a man and a leader. As a result, Ouyang said, "it's not your business. You didn't say it earlier!"

Then he hung up the phone directly, and the deputy leader was angry.

Really, I was wronged for no reason early in the morning, "tea vegetable hospital, let me see, tea vegetable hospital, don't think about going to study this year. If you don't say it earlier, you can!"

As a result, I looked through the list of advanced studies. Darling, no one from the tea vegetable hospital applied!

The deputy leader stood up and went to complain.

"Ouyuan, my fault, my fault, I must criticize the people below. How can I forget the rising stars of the frontier in recent years, but you should also understand that it is not a very important thing after all."

The boss of the health department smiled and explained to Ouyang.

The competition of young doctors' clinical skills was more concerned with attention as early as 10 or 20 years ago.

But later, just like the Chinese national ping pong team, except that doctors in the capital and magic capital were more active, doctors and hospitals in other areas didn't catch a cold.

Nima, run every year, run every year. After running, she will be laughed at. Who loves who goes.

In the past, tea vegetable hospital was not qualified, because it was not even provincial management. Now qualified, Zhang Fan doesn't worry at all. In his opinion, it's all shit.

Being able to apply clinical skills honestly to patients is already an excellent doctor. I have to organize what to do with these flowers, and several of these skills will be used on patients.

It can't be used on patients. Even if you are the first in the universe, you have a gross use in medical treatment.

But Ouyang is different. People like her attach great importance to competitions, competitions and big competitions.

Zhang Fan as like as two peas in the primary school, the government sent the gold medal.

But Ouyang didn't think so. She said it was an honor and recognized by the country.

Therefore, even if this kind of competition, competition and other activities are not arranged, Ouyang will take the initiative to pick them up.

"Our tea vegetable hospital will also participate this year. It was not qualified before, but now it is qualified. Why don't you let us go? "

"OK, OK, go, go. I'll give you 20 places this year. I think the tea vegetable hospital will bring back a grand prize to the Frontier Province."

The boss of the health department, although it sounds like praise, is actually inflating Ouyang. Let alone the frontier, even if the whole northwest has not won a weighty award in the past ten years, it is just the consolation of the participation award every year.

Ouyang won't let the other party have the upper hand in words. Whether you get it or not, I'll talk about it first.

You're welcome. Get angry directly in words:

"One? Who do you despise. Our tea vegetable hospital is not the doctors in your bird city hospital. They go every year and are shaved every year! "

With that, he hung up without waiting for the other party to say anything.

Anyway, I don't care if you're happy or not. I don't rely on you to give me funds, I don't rely on you to give me places for further study, and I don't want to be your deputy in your unit. Why should I get used

to you!

Two health leaders in the office foaming at the mouth of the West complained: this woman is not a good person!

Ouyang was cool. When he was finished, he asked Zhang Fan to arrange for someone.

In terms of technology, she still knows very well that Zhang Fan has to arrange this thing, otherwise it will be really embarrassing.

Zhang Fan is actually cool this time.

"Thyroid, how simple. In all operations, the operation of thyroid is pure resection. You don't need to consider what to rebuild and leave a position. Just cut it! You see, here, just pay attention to this nerve and cut it down.

You see, you see how simple it is. Look, how easy it is! "

It is rare for Zhang Fan to say so much on the operating table. Two interns, stunned.

Because everyone knows that Zhang Fan hardly speaks on the operating table. He is known as Zhang's dumb art. What's the matter today? Do you find me accomplished in surgery and want to give me some advice?

In fact, Zhang Fan was suppressed in internal medicine, and then bullied by internal medicine books. This is to vent!

After a good day, I'm finally tired.

After entering the operating room in the morning, Zhang Fan had a whole day of thyroid surgery. Just like hanging up and cutting monsters, they all know it's boring, but it's so cool!

Chapter 1373

Early in the morning, on the streets of tea in late summer, there are only mottled shadows of trees and no human shadow. In addition to a few morning exercise lovers, the rest are pushing flat cars to set up stalls in the street to sell breakfast.

Tea vegetarians are particularly comfortable in the early morning of summer. Especially at 5:00 or 6:00 in the morning, the sun has not yet risen, but the sky has brightened. Especially in the early morning after the rain, the light blue sky breeze blows, and the nose can definitely feel the moisture blowing down from the snow mountain.

Before the sanitation workers on the street worked, Zhang Fan had gone out for a run. Sometimes Zhang Fan also wants to sleep in, but to be honest, the biological clock will make him open his eyes on time.

It's not that Zhang Fanduo is self disciplined, but this thing has become a habit. Especially recently, he not only has a habit, but also has a feeling that he is unable to do what he wants.

In the past, Zhang Fan ran after Shaohua like a big wolf dog who saw meat and bones and stretched out his tongue. When he first got married, Zhang Fan understood why the king didn't go to the early Dynasty.

But now, in turn, Shaohua ran after Zhang Fan. Men, especially in this regard, will not easily admit defeat even if they are tired of vomiting blood. What is depicted in their bones is pounding the sky and pestle the ground.

But when a woman starts this thing as a job or a goal, it's boring, and it can't be only once. It's said that once is not safe.

Then, for the insurance period, as much as possible.

Many Zhang Fan have changed from wearing triangular underpants to plain pants recently. It can be imagined that friction hurts more.

In this way, Zhang Fanxue peed down whenever he met Shaohua's sad eyes. Really, women who want children are crazy.

Therefore, in order to have physical strength, Zhang Fan pays more attention to early morning exercise. I can't do without exercise. He didn't drink milk before. Shaohua thought it might have something to do with it. He specially asked his parents to get a milk sheep on the farm.

Zhang Fan is crazy. Really, if you drink this thing, you won't have diarrhea. But goat's milk tastes too strong. The taste of pure milk is barely acceptable to Zhang Fan, but this goat's milk can't fall.

This thing is like stinky tofu. Those who like it love it, while those who don't like it say it's made of shit.

Goat's milk can compete with stinky tofu. Watching Shao Hua enjoy the version of drinking goat's milk, Zhang Fan needs to pinch his nose to drink.

Therefore, Shao Hua and Zhang Fan's goat milk are different versions. Shao Hua is pure goat's milk, while Zhang Fan directly puts some pepper, pepper and salt, huh! This is finally drinking.

Zhang fan can't do without drinking. The old people at home don't know from which immortal they heard that drinking dairy products helps to get pregnant. Watching Zhang Fan drink milk to have diarrhea and sheep's milk, they are ready to raise a camel.

In order not to let others laugh, Zhang Fan's version of goat's milk came out. It's nothing after drinking it. It's just like eating a bowl of spices in his mouth. When he opens his mouth, he has the taste of seasoning.

Really, it's a sin not to drink milk in the frontier.

When I ran from home to the hospital, I was sweating all over and my body woke up. I flushed under the shower in the lounge and put on my shirt and white coat, and the day's work began.

Because Zhang Fan is now the top leader, many things need Zhang Fan to agree and sign in advance, and then the people below can carry out them. So I went to the administration building half an hour in advance every morning to deal with the day's administrative business.

Then start the medical business.

"Why should the respiratory department add equipment? This fan likes to do this. Does he want to rebel and work alone?" After Zhang Fan saw the application of the respiratory department, although he scolded, he approved it.

To tell the truth, if the directors of all departments of the tea vegetable hospital are as proud and charming as Lao Ju, and stick to it for decades like Lao Ju, Zhang fan can wake up with a smile in his dream.

"The nursing department needs a training base? Hey, the head nurse, when he came on stage, he did such a big thing. In the past, he could quarrel with the doctor with more gauze. Now he is extravagant. This thing is not included in the department budget! "

Zhang Fan also agreed. He was naturally stingy. He couldn't help it. Although he agreed, he always had to scold him. Otherwise, I feel grateful.

With the voices and footsteps in the corridor, Zhang Fan knew that the working time was coming.

Yang Hong opened Zhang Fan's office with the key and came in to see that Zhang Fan had already worked. After scolding herself a little, she said hello and was busy boiling water and making tea for Zhang Fan.

"Zhang Yuan, the European hospital came to you yesterday and said that the hospital was going to participate in the doctor's clinical competition. Let you check. "

Make tea and bring it to Zhang Fan. She began to arrange the day's work for Zhang Fan.

Zhang Fan sometimes feels that he is the dean. He is busier than a thin dog. For a while, the department wants the dean to do this and the office wants the dean to do that!

"Let the European Academy see for itself. I can't care about it recently. "

"OK! There is a joint teleconference between the health system and the medical insurance office today. Are you present? Leaders of local medical insurance offices and leaders of the health system will participate! "

"Let director Gao go. This one is familiar to him. " Really, when Ouyang suppressed Lao Gao, Zhang Fan was unfair for Lao Gao.

But now, Zhang Fan thinks that director Gao has gone. Don't cheer. It's really delicious.

If you let Zhao Jingjin and Luo Zhengguo go, you can be cheated by the oil of the health system. You let Lao Chen go. Lao Chen is too soft and hard. Sometimes he will suffer.

If you let Lao Ju go, Lao Ju can fight with the leaders of the health system. As for Ren Li, Zhang Fan never thought about it.

In fact, Ouyang is the best one to attend this kind of meeting. You have old qualifications and credit, but please don't move! Therefore, director Gao is still very fragrant.

Yang Hong looked at Zhang Fan, but she didn't say anything. She knows that although she smiles at everyone and is kind like a good man, she knows the strength in her bones.

Therefore, even if she had something to say in her heart, she didn't dare to say more. In particular, Zhang Fan has shown impatience.

"And..."

"Well, I don't do anything until I have to. I still have something to do. Please inform the director of Endocrinology about the business ward round tomorrow. There is no need for other leaders to participate. Just send a record from your hospital office and medical office. When you are a leader, you don't have to go with me.

They are all very busy. All right, go ahead! "

Because Zhang Fan has signed the last document, and now the administrative affairs are over. Zhang fan can see this clearly. If you don't interrupt her, she can stand here and tell you all morning.

With that, before Yang Hong turned, Zhang Fan opened the endocrine book and began to take notes seriously.

Yang Hong doesn't know how to evaluate Zhang Fan. If he doesn't grasp the rights of the hospital and don't look at the financial affairs of the hospital, isn't he worried about the loss of power at all?

Zhang Fan should seize the time now, because after returning home, his reading time is greatly reduced. Unlike before, as long as he doesn't stick out his tongue, Shaohua won't disturb Zhang Fan's reading.

But it's different now. It's after ten. You want to read? Come and have a baby with my mother.

So now we can only squeeze after work. Read for two hours in the morning, and then go to surgery for several operations.

This day is gone. Although Zhang Fan is busy with internal medicine now, his surgical skills have not fallen.

Technology must be practiced every day. After all, if a craftsman doesn't practice for a day, his hands will be trendy.

There are about ten people, nine doctors and one nurse in a province.

Provinces choose their own.

Yang Hong feeds back to Ouyang. Zhang Fan doesn't want to do it later. Ouyang didn't find Zhang Fan either " I can't pick anyone without you, butcher Zhang? "

Ouyang selects people from various departments.

The big contest is actually a little similar to the Mathematical Olympiad in high school.

The Mathematical Olympiad in high school is really useful. It's still useless at all.

It's hard to say.

But Zhang Fan knows that there is no gross use in the medical contest.

For example, deep knotting is abdominal knotting. This kind of knotting is a knotting technique used

when ligating the artery in the abdominal cavity.

It's the hardest knotting technique.

The big competition is to see who plays fast and well in one minute. It hasn't slipped yet.

But does it really take dozens of this thing a minute?

Abdominal bleeding, the opportunity to tie a knot is only once. If you can't fight well for the first time, people will die. Where will you get a second chance.

So this kind of competition, for some serious bosses, NIMA came up with a plan by sitting in the office and patting her ass.

But Ouyang and his generation like to do this. They try to peel off the skin for a certificate made of red silk.

Of course, if the Ministry of Health says which hospital will win the first place, it will give 1.8 million, not much, or even 500000. Zhang Fan is expected to drool. Anyway, it's easy to hug the grass and beat the rabbit.

As for now, he is lack of interest in giving a project with a broken flag and a broken certificate of merit that does not even reimburse the return fee! It's better to listen to the frightened lecture of the director of Endocrinology.

In the afternoon, Zhang Fan had several thyroid operations.

To tell you the truth, there were a lot of big neck diseases in the past. Older people have seen this kind of meat hanging from a lump under their neck. The small ones are big fists, and the big ones are even bigger than basketball.

Now, the disease has almost disappeared in China. But there are many thyroid nodules, thyroid cancer and other diseases.

Especially female thyroid nodules and hyperthyroidism. In recent years, there has been an explosive growth.

Some lords feel that their wives are particularly prone to lose their temper in the past two years. For example, when they steal a look, their wives are furious when they have a long legged sister.

Also, when I got up early in the morning, my wife began to lose her temper before she opened her eyes.

At this time, we should consider whether you are too lazy to hide too much private room money. 2、 Consider taking your wife to the double gland department to see if there is a thyroid problem.

Really, this is not nonsense.

Chapter 1374

Sometimes, Zhang Fan feels that medicine, like the previous branches of Arts and Sciences, is related to each other, but the more in-depth study, the more he feels that surgery and internal medicine, NIMA is like two ambiguous men and women.

No one knows whether they have slept or not, but you say they are a family. They play each other every day. You say they are not a family. One can't lack the other.

For example, the thyroid gland, you suddenly ask a surgeon to tell you about the thyroid gland, and then he is serious and calm. At most, he tells you about the function of the thyroid gland. Looking at his calm face, he was as flustered as an old dog.

If you ask how the thyroid comes from, how it works, and what you eat for three meals a day, the surgeon is expected to turn his face. He thinks you're here to make a stand.

Physicians can clearly explain the principle of the thyroid gland. For example, thyroid hormone is coupled to form thyroxine (T4) by iodide and iodine catalyzed by oxidase.

What's the use of this thing after you know it? For patients, there is no gross use. For doctors in general hospitals, it's OK to know about it. Because of the treatment plan, you can't break the treatment guidelines sent by the Ministry of health.

But the more we reach the level of top doctors, this thing is quite clear, just like one plus one is two. We can't hesitate. Only those who are proficient can't be proficient.

Just like the right hand spiral, holding the cylinder, you can dish it up, so that you can make new discoveries and research.

Of course, 90% of doctors don't have to and can't be so skilled. After all, the pleasure brought by the right-hand spiral is similar to that brought by research. People can be happy when they lie down with

their own equipment. Why do they have to play this research.

Therefore, there are still a few who can be called National hands in the world.

Of course, when it comes to thyroid, let's briefly talk about what this thing does.

The expression of thyroid gland is mainly completed by thyroid hormone. Thyroxine can increase oxygen consumption, heat production and low density lipoprotein expression.

In fact, to be more transparent, thyroid hormone affects the heart, but it's not as strong as adrenaline, but after a long-term problem, it's like you're wearing inappropriate shoes.

Can you go? I can walk, but if I walk too much, I still let you cover your feet and cry.

Therefore, this thing is a necessary fine-tuning function. It is similar to the salt in food.

Thyroxine plays a key role in brain development and bone maturation. Therefore, don't forget the pre pregnancy examination.

Various indicators of thyroid gland, such as T3 and T4, to tell you the truth, they are not engaged in medical treatment. It's useless to know this thing. Today, I'll invite you an academician of Endocrinology, who will speak thoroughly. In three days, you still don't know anything.

However, it is necessary to know about thyroid diseases. After all, in modern society, all kinds of pressure and depression, early detection and early treatment are always the best way to treat diseases, which is more effective than knowing the president of a class III hospital.

Thyroid diseases can be divided into, more and less, as well as nodules and lesions.

Hypothyroidism, or hypothyroidism, is a disease that is more common in older women. There are more whites and Latinos, and I don't know why. The symptoms of hypothyroidism are obvious.

For example, excessive menstruation, amenorrhea, no child, the result is milk overflow! And chills and dry skin.

Some female friends feel that their skin is rough. They want to make thousands of cosmetics shiny. At this time, they should pay attention to hypothyroidism. Go to the hospital.

There is also hyperthyroidism. It is not called hyperthyroidism in Jinmao country. It is called thyrotoxicosis. It means that there are too many thyroid hormones and they are toxic.

The symptoms of hyperthyroidism are also particularly obvious. They are afraid of heat and eat more. As a result, they lose weight and have more stool times.

Pay attention here. It's not that you are greedy and eat too much hot pot. You feel hyperthyroidism after diarrhea. The stool of hyperthyroidism is formed, which is definitely not your greedy soup.

There is also fatigue, which is difficult for ordinary people to understand, because everyone is weak, but anxiety and irritability are particularly obvious. Also, if one day, you suddenly feel that your eyes are getting bigger. Be careful at this time.

This is not secondary development. What makes your eyes bigger may be hyperthyroidism.

Early detection and early treatment are not good in case of thyroid crisis. This thing will kill people.

In particular, women with hyperthyroidism must not get pregnant easily, because pregnancy complicated with hyperthyroidism is really troublesome.

For people in the non-medical industry, the focus is on how to prevent. As for treatment, to tell you the truth, you may not be able to explain the examination results clearly to undergraduates who have graduated from medical school for three or four years.

Women are three to five times more likely to suffer from thyroid diseases than men, especially women who are addicted to tobacco and alcohol.

Also, we must try our best to control our mentality and avoid frequent excitement and anger.

Gland diseases, including mammary gland, thyroid gland and even pituitary gland, are very mysterious. Some people have a firefist temper all their life, but others have no gland diseases all their life.

And some people, because of a period of bad mood, not only the thyroid, but also the breast are all kinds of nodules.

Therefore, to avoid emotional excitement, in fact, the most important thing is that there are some mysterious factors, such as heredity and environment, which ordinary people can't choose, so they can only listen to fate.

There is also pressure, which is impossible to choose.

Therefore, we, especially female friends, can only work hard on emotion. If we divide half of the energy of beauty and whitening to take care of the glands, it should be very effective.

The morning operation lasted until noon. Zhang Fan had a working meal with the doctors of the double gland department. Speaking of this working meal, everyone in the tea vegetable hospital laughed at Zhang Fan, which made Zhang Fan very angry.

Because many leaders, whether big or small, often start with health at the beginning of taking office, and then observe their subordinates through this action that is easy to achieve, to see who is obedient, who is not obedient, and who is a thorn in the head.

Zhang Fan is different. At the beginning, the first thing people did on stage was to kick out the boss who contracted the tea vegetable canteen. He doesn't care if there's a man or a woman behind this guy.

Because he doesn't cook well.

Now, the canteen of tea vegetable hospital can be a food attraction of tea vegetable.

Especially for the working meal, Zhang Fan felt that it should be better for these doctors and nurses who can't go home to eat and drink better.

Therefore, the working meal of tea vegetable hospital is very rich. A meal costs three yuan, but there are many dishes, including fish, all kinds of meat and vegetables.

And it's not limited. It's three yuan for a self-help meal, but you can't waste it. Whoever wastes it will be fined 100.

At the beginning, Ouyang was sad looking at the consumption of the hospital canteen. She told people at that time that the Dean was a food, and the doctors and nurses in the whole children's hospital were food. Why didn't I find it before!

At that time, Zhang Fan didn't explain or refute after listening, but there was something in his stomach "You have come through hard work and plain living. You can get rid of it with a meal of white rice, but we can't! "

But a week later, the hospital canteen was on track, and the consumption was about the same as before. But people from top to bottom exaggerate that anyone who can eat and find a high level of chef.

The working meal in the operating room and the extra meal in the middle of the night cost Zhang Fan even more.

From cakes to snacks, Zhang Fan made all the delicious food in the hospital canteen. Many bachelors began to get fat before they got married.

In particular, some lesbians claim not to eat meat on weekdays, but since the reform of the canteen, women's meat consumption is almost the same as that of men.

"Zhang Yuan, my uncle's children want to come to our affiliated kindergarten. Please give me a note."

During dinner, the director of the double gland Department ate braised meat and chatted with Zhang

Fan. Other doctors and nurses are not interested in coming.

Zhang Fan doesn't like this kind of big fat red meat very much unless he is hungry. He usually gets a fish and sucks it slowly, especially the small white strips of tea vegetable Sailimu Lake.

The fish is not long, because the snow melts in plateau lakes. In summer, the lake water is biting, so the fish in them are not long.

But the fish is beautiful, full of silver. In the blue lake, it looks like a piece of white spray.

It looks good, but it's more troublesome to eat, because it has many thorns, and it seems that the thorns are not long in order. There are all thorns under the fish skin.

However, after the fish is slightly braised and then boiled with a little red pepper, although the fish can't give a sense of satisfaction, it sucks up and brings the unique taste of protein.

Really, there is no way to describe it. The more you suck, the more fragrant it is. It's the same as sucking the bone marrow pasted with meat. It doesn't taste.

However, few people like to eat this fish in the hospital because they are afraid of trouble. Only a few people like to eat. For example, Zhang Fan is even one, and he is still the favorite.

"OK, let his children enter the hospital tomorrow. Check them in advance. All kinds of preventive shots should be given. After all, they are their own children. Don't be careless. "

In fact, the director of breast department can let his uncle's children enter the kindergarten, but isn't the dean in front of him now. It's better to ask for leadership than to do it yourself.

After dinner, Zhang Fan had no time to rest. Although there is a small lounge of Zhang Fan in the operating room.

But at noon, Zhang Fan usually has time to rest.

Because most of the operations are in the daytime, once the operation is arranged, the patients often can't eat.

Although the nutritional agents are injected intravenously, so that the patients will not have hypoglycemia, they can not eat, light infusion, and the discomfort in the stomach is still very strong.

Therefore, the operating room will not rest at noon. After dinner, drink water and continue the operation.

Chapter 1375

The operating room has now entered the Bayin era. Bayin, who is in his early twenties, has become the head nurse of the operating room of the provincial third-class hospital. At the beginning, Bayin was excited and nervous. However, a week later, Bayin was on the right track. It is worthy of following Zhang Fan.

"How to brush your hands? Brush again. If you can't brush, go back to your department and let your director teach you to come back to the operating room."

Tongyan breast said a severe warning. In addition to the parties, other men definitely had a strange feeling in their hearts, and they were still wearing uniforms, really! It's no exaggeration.

The concept of sterility is the bottom line and the final defense line of the operating room, which is the most important work of the head nurse in the operating room every day.

Zhang Fan listens to Ba Yin's charming sound in the double gland department. Although there is no expression on his face, he is still very happy in his heart.

Because after the former head nurse was promoted to chief nurse, many people are working hard for the position of head nurse in the hospital operating room.

Because the nurse's road is very narrow, even if Zhang Fan speaks loudly in the hospital, he should be responsible for this joint node.

If Bayin can't do it, not only she will suffer, but even Zhang Fan will be criticized. Fortunately, Bayin's instrument technology is top-notch in the operating room.

Moreover, the girl also worked hard. She could do all the surgical instruments, from general surgery to ophthalmology. Of course, it's not without short board. Bayin, who graduated from technical secondary school, is her biggest short board.

But it's said that she's an adult undergraduate.

Now listening to Ba Yin, Zhang Fan is relieved to arrange various matters in the operating room. Of course, the head nurse who molested him no longer exists in the operating room.

When Zhang Fangang was going to have an operation and continued to have a thyroid, Lao Chen came.

Zhang Fan, a thyroid doctor in the Department of internal medicine, couldn't help it. Zhang Fan thought that maybe the old man said it was true to supplement the shape with shape, so he wanted to make more thyroid in the operating room. Maybe he could suddenly open his mind!

I really want to be blind. I have the posture of going to the exam soon and not studying hard.

"Zhang Yuan's wedding!" Lao Chen, wearing a mask and hat, wore a smile between his eyebrows.

Zhang Fan was stunned. What's the happy event? Is the tea government paying the bill? Or does the bird city government feel that it owes a lot to the tea vegetable hospital and want to make compensation?

"There will be academicians in our hospital. The quota of President Li has passed! The municipal government informed the hospital at the first time, and I came directly to you. "

"Well! Well, that's good, that's good! " With a mask, Zhang Fan doesn't have to smile.

If an academician comes from another hospital or other regional third class hospital, the president is estimated to be happy to lie down and spit white foam, and then he has to find the butcher's father-in-law to slap him.

But for Zhang Fan, academician, this thing is not uncommon. Others think academicians are precious. Others rely on such achievements for promotion.

But Zhang Fan doesn't need it, and he hasn't dealt with academicians since he went to sea.

Right now, there is still an academician at home. He has trouble with Zhang Fan every day.

Therefore, Zhang Fan is really not excited.

"Come on, let's inform president Li first!" After Zhang Fan said a word, he thought for a moment, "OK, you double glandular surgery do it yourself. I need my help for such a simple operation. I don't hesitate to say you."

Although Zhang Fan doesn't feel valuable, he still wants to congratulate Lao Li on behalf of the hospital.

Zhang Fan, they haven't finished yet. Ouyang called directly: "where have you been? Come on, President Li Cunhou has now successfully passed the selection of academicians, and the leaders of the

government have come. " Ouyang's tone could not hide his unhappiness. Zhang Fan didn't have to ask. As soon as he heard it, Ouyang was estimated to have finished showing off at this time.

Sure enough, when Ouyang heard the news, he didn't tell Zhang Fan the first time, but picked up the phone and called " Dean Wang? I'm Ouyang from the tea vegetable hospital. Do you have any academicians in your hospital? "

"Oh, no, our hospital has!"

The president of the Hua hospital next door to the tea vegetable hospital has a crooked nose. NIMA is really bullying.

After the government learned the news, the eldest and second brother of tea vegetable came to tea vegetable hospital together. Under normal circumstances, this kind of thing often comes either to the boss or to the second. Very few two bosses come together.

But this is so exciting.

How to say, it's like a poor county in a country that suddenly one day came out with the richest enterprise in the country. Really, for the frontier, especially if you go out for two steps, you may leave the country.

There is an academician in the local hospital. Darling, NIMA has a great sense of achievement.

When Zhang Fan arrived at the office from the operating room, Lao Li had a bewildered smile on his face. There were too many leaders, and Lao Li was not particularly good at dealing with leaders. In particular, a leader wanted Lao Li to be a deputy to the government.

Lao Li doesn't know what to say.

When he saw Zhang Fan, Lao Li was like a child seeing his mother. His eyes were full of expectation.

"Congratulations, congratulations to hospital Zhang, President Li and tea vegetable hospital!" The tea vegetable eldest brother also greeted with a smile, holding Zhang Fan's hand in both hands.

The smile was so brilliant that Zhang Fan didn't feel a trace of shame about his debt.

Of course, today is not the day to charge.

"Tongxi, Tongxi, without the care and care of the leaders, and without the strong support of the leaders in policy and funds, the tea vegetable hospital can not go today, nor can it produce an excellent doctor like Academician Li."

Zhang Fan said with a smile.

"Don't say, don't say, even if we have a little achievement, we should do it. Here comes the TV station. Today we have to go on the news. Today we must go on the news. This is a good thing, this is a good thing. "

After listening to the money, boss Cha Su was deeply afraid that Zhang Fan would ask for an account. He quickly interrupted and asked the TV station to throw a flash.

Zhang Fan scolded a little in his heart, "too much oil, don't eat at all."

In the leader's speech, the boss finished, the second finished, the second finished, and the third finished. Anyway, it means that the health cause of tea vegetable city has made great progress, and the people's health has been improved by leaps and bounds.

Then, in front of the camera of the TV station, he rewarded 500000 for the tea vegetable hospital, one million for Academician Li Cunhou, and a villa for Lao Li on the road of tea vegetable corruption.

Of course, this villa is, as long as you Lao Li people are in tea, this villa will always be used by you Lao Li. The premise is that you can't leave. Once you leave, I'm sorry, this thing is the property of the government.

.....

"There are academicians in the tea vegetable hospital!"

"Yes, unexpectedly, the first hospital with academicians in our frontier turned out to be a tea vegetable hospital!"

"Academician Li was not trained by the tea vegetable hospital. He is the golden mean. What can I envy. Have you received Ouyang's call? Tanima is so angry.

He said he invited us to the ceremony. This is NIMA! "

Those who say this are all from major hospitals in bird city. They don't envy each other. In fact, they envy each other more and more.

Maybe developed cities don't pay much attention to this, but in small cities and small places, especially border cities, there is really a feeling that the country has not forgotten us.

.....

"What about the European Academy?" Zhang Fan sat in the conference room, listening to the passionate and emotional speeches of the leaders.

"I don't know. The European Academy has just been there. What about the people?" Lao Chen also wondered, this kind of thing, this kind of situation, no one can lack the European Academy.

Ouyang will be really busy. She has a big chess game in her mind.

Ouyang summoned the hospital, the medical department, the party, the trade union and the women's Federation.

"What's the weekly price of the advertisement on the top of the taxi in tea vegetable city. Who knows the leaders of transportation management and let them give us a cheaper price? I want to advertise. "

"How much does the big screen outside the Vientiane exchange building cost a week? Who knows the boss of Vientiane exchange? I want to advertise."

Where there are many people and where they can attract attention, Ouyang decided to advertise.

"About three or four million a week!" The chief of the finance section sweated and reported to Ouyang with the budget.

There was even a frightened look in his eyes. Was the old lady crazy?

"Well, so many? Can I have a discount? " As soon as Ouyang said this, the section chief was reassured. It seems that he is not crazy to bargain.

"European Academy, what kind of advertisement are you going to advertise?"

"When there are academicians in our hospital, we must let the tea vegetable people know. By the way, TV stations in various counties should also advertise. This has to be done by Zhang Fan. He used to be like a street runner. He is most familiar with counties and townships.

You go and contact first! "

Sent away the leaders.

Zhang Fan heard that Ouyang was going to advertise. When he thought about it, he understood that Ouyang was going to swallow tea in several other hospitals, even bone and skin.

To tell the truth, sometimes Zhang fan can't understand Ouyang's abnormal mentality of seeking big, high and famous.

However, this time, Zhang Fan felt that he should do the same.

Now the size of the hospital can't go up. Even making a medical school is ridiculed by the big manager. So, this money, he is ready to pay.

Ouyang wants to be famous, wants to swallow tea and other hospitals, and then be her queen.

Zhang Fan wants to increase the volume of tea vegetable hospital after annexation, and then he must do the things of medical school.

Otherwise, everything is a castle in the air, which may collapse one day.

Therefore, the leaders of the hospital show their magic powers.

Zhang Fan knows the leader of transportation management. The surgeon and the traffic police are mainly familiar with each other. Because of the connection between the car accident, the hospital has to deal with the traffic police.

And the traffic police and transportation management are familiar with it. Zhang Fan directly invited the boss of tea vegetable traffic police to contact the boss of transportation management.

Vientiane exchange, Lao Chen knows. In recent years, many of the benefits issued by the tea vegetable hospital have been remitted to the operator by Vientiane.

For a while, almost everything Ouyang could think of could be contacted by the hospital. There is really a feeling that we are not afraid of others.

Chapter 1376

In the week at the end of the summer, people still remember a grand occasion many years later, that is, wherever they go, they can see a line of words, "warmly celebrate that Professor Li Cunhou was awarded the title of Chinese academician at the bracketed mean Affiliated Hospital of the tea city hospital, the cooperative hospital of the Digital Research Institute and the naval cooperative hospital!"

There are in taxis, on TV, on the radio, on the electronic screens of major shopping malls, and even the telephone RBT has become such a passage!

After work, Zhang Fan looked at the overwhelming advertisements. He bowed his head and was deeply afraid of meeting acquaintances. It was a bit exaggerated.

Ouyang wanted his plane to spread leaflets, but it seemed a little unreliable. Then he wanted to rent a hot-air balloon to spread leaflets. Zhang Fan stopped him.

For a time, the old men and women in the streets were chatting at the tea vegetable hospital“ It's so powerful. Now the tea vegetable hospital has cooperated with so many hospitals, but what do you say the Navy does? "

"Cow force, do you know that there are no academicians in all the hospitals in the frontier. This is the first meeting of the tea vegetable hospital."

"I hope academicians will continue to stay in the tea vegetable hospital and don't go to big cities in a few days."

Ouyang also put up huge banners at the ports of the tea vegetable border in various countries, and they are still bilingual. One is the old maozi language, and the other is the corresponding language of various countries.

What NIMA clearly puts forward is to lure the local tyrants of other countries to see a doctor. Where is celebration, naked temptation.

To tell the truth, for Stan countries, Zhang Fan's idea of the whole team is the same, that is, to take the high-end line.

Treatment is high-end, private and individualized.

It sounds like a bit mercenary. Someone once said why not give people treatment according to the Chinese people's treatment fee. Isn't learning medicine just to see a doctor and save people!

Those who say this have good feelings. But it costs money to see a doctor and save people. China's medical subsidies are now huge.

If there is no state subsidy, according to non-profit medical institutions, one public hospital in Manchuria will have to close down.

If there is no state subsidy, to tell the truth, the vast majority of Chinese people can't afford to see a disease or have an operation.

The medical treatment of Jinmao country is so powerful. Why does it look like it is so bad in emergencies? It feels like Jinmao's medical treatment is not good.

In fact, people's medical level is still the top in the world. But other people's medical system is different. In a vulgar word, it is who has money and who enjoys it.

If the tea vegetable hospital treats people from all over the world according to Chinese standards, Zhang Fan will lose all his underwear.

Therefore, for sta countries, the strategy of tea vegetable hospital is who has the money and who enjoys it.

They didn't want to make a personal naval battle to win by quantity. To put it bluntly, the International Department obviously made money to subsidize the tea vegetable hospital.

In the past, the tea vegetable hospital was very powerful, and few people from all over the world knew it. For example, at the beginning, the famous tea vegetable hospital still relied on manager Wang, who was two barrels of oil.

Later, I slowly let Stan know some of the upper class.

Moreover, in general, the attraction of tea is not as attractive as that of laomaози and Europe and America. After all, it wasn't famous before.

It's different now. Even the scalpers in the international department have it.

"We have academicians, academicians, do you understand? It's for state leaders. Most people can't see it. There is only one academician in the northwest, and we still have tea. "

This is what the scalpers at the port say.

For high-end patients, people can directly contact relevant units or tea element hospital.

Middle class patients don't have this ability. The scalpers feel business opportunities and don't earn you much. After receiving you from the port, they queue up for you from beginning to end, 1000 at a time. Of course, it's RMB, but don't you rubles.

It's really the prophet of warm duck in Sichuan river!

At the beginning, Zhang Fan didn't like Stan's countries. Zhang Fan thought that the poor countries had no money to see a doctor.

As a result, the cruelty of society taught Zhang Fan a lesson.

Indeed, the poor in these countries have gone to the mountains as kings, but the rich are also extremely rich.

This kind of money has become a symbol. It is the pursuit of medical treatment. People don't want the best, just better.

I heard that there were academicians in the tea vegetable hospital. Or academicians who claim to see national leaders, obediently, waves of local tyrant Jin came to tea vegetable hospital.

Zhang Fan thinks that the propaganda of the scalper party may have come from Ouyang. Ordinary people who understand this ah!

For a moment, the hospital was full of Tu Haojin in the yard.

Tu Haojin is really Tu Haojin. People's country absolutely loves Tu Haojin more than China.

see,

The International Department of the tea vegetable hospital did a good job in this wave of advertising. A group of people came to the tea vegetable hospital for treatment.

Lao Li wore a mask. Both men and women of the other party were wearing robes, especially some men. They were young. As soon as their mouths opened, they were full of golden teeth.

Before Lao Li entered the tea vegetable hospital, he went to the clinic very casually. Now he can't. Ouyang arranged the outpatient director to arrange his shift.

Originally, the burn department was a small department in surgery, with few patients.

But what Ouyang said is good. You are now the card of the international department. You must stay in the outpatient department of the international department in the morning of workdays. You are not allowed to go to the laboratory.

Lao Li sat helplessly in the clinic to see the local tyrants in Kinmen.

See all diseases, that is, see all other diseases except those not familiar with gynecology and pediatrics.

Lao Li doesn't want to see it. It's mainly the willfulness of local tyrants.

Some middle-aged local tyrants even threw 10000 outpatient fees with a veil of pride to see what academicians look like. Lao Li was originally elegant. Now, with his achievements, he is more open-minded.

Darling, NIMA's language is not smooth, otherwise the local tyrants may have to talk about mental diseases.

In one week, the number of visits by the International Department has doubled significantly.

Ouyang even considered whether to get a long-term membership system such as VIP card and VIP. Moreover, the income of the international department this week is almost the overall income of tea Su general surgery for half a year.

It's a little scary. Tea vegetarians can earn almost tens of millions of dollars a year, but all the income should be handed over, and then the government will allocate funds.

The income of the international department is the income of others' tea vegetable hospital. That's great.

The tea vegetable hospital ate a round belly.

This makes several hospitals in bird City jealous.

In the past, they also had Stan's patients, but they were ordinary Stan people.

These people are special.

In those days, when China was poor, uncle Mao was very satisfied after eating braised meat. After being fooled by interested people, some people around tea vegetable went directly to several Stan countries.

It's going to rain. My mother wants to get married. Let him go! When the official left, uncle Mao said this.

The common people don't know how to follow. Uncle Mao said you will suffer. Don't go. The Golden Nest and silver nest are not as good as your own broken nest. Don't go. Organize grass-roots cadres to persuade you.

As a result, tens of thousands of people went.

Later, it became clear to everyone. Now they want to come back. Really, in this case, this feeling will not be seen by the human body in the mainland.

Really, now they regret smashing their chests, third-class citizens!

Looking at China in recent years, two brothers, one Stan and one China. Just look at the difference.

So these people actually come to China to see doctors.

As a result, there is no such patient in niaoshi hospital now.

"What's the great thing about tea vegetable hospital? There is an academician, or an outsider. Isn't this a clinical contest!"

Ten places, one place will be rewarded with 10000. Whoever wins will be given cash immediately, and priority will be given to the evaluation at the end of the year. "

The leaders of the Central Hospital spoke at a meeting. NIMA is so bullying! Because he heard that a leader of bird city went to the tea vegetable hospital by car. Can NIMA bear it?

The Third Affiliated Hospital also said, "there is a quota of 10000 for clinical martial arts competition, and the evaluation of excellence at the end of the year is preferred."

Several hospitals in bird city are all red.

This is to teach a lesson to the tea vegetable hospital, which jumped a little fierce recently.

.....

Ouyang is very proud recently.

Really, very proud. Ask whether the government holds meetings every day. Once the meeting is held, she will attend.

Once she speaks, she will boast. You can't listen or applaud warmly. You can't even make a speech. At present, tea element is the largest medical body. If you don't let others speak, who can speak? Let the Chinese hospital speak. It's estimated that Ouyang can fall out at the venue.

Therefore, the tea vegetarian government has not even held medical related meetings in NIMA recently.

.....

"The European Academy, the bird market has changed a little recently!" Lao Chen was well informed. He got the news as soon as several hospitals in niaoshi finished their meetings.

Then he quickly told Ouyang.

"Are you sure? We? " Ouyang asked Lao Chen.

"There should be!" In fact, both of them were a little nervous.

Because one has not been in contact with the clinic for a long time, and the other has hardly been in contact since he graduated from the Department that year. It is considered that the two people who have separated from the medical clinic have no confidence to speak.

"No! No shame. Hurry, hurry to find Zhang Fan. "

Ouyang thought, it's not good. He's just been happy for a few days. It'll be a shame if people step under

their feet in a big competition.

"That's too much!" Zhang Fan was not particularly comfortable. Nima went away year after year and was shaved every year. The fierce people in her family were like tigers. When she went out, NIMA was like erha.

"Yes! Too much! " Ouyang likes Zhang Fan so much. She hates the way Zhang Fan smiles at people. She doesn't have a little leadership temperament! Not serious!

"Let me see who you choose!"

Zhang Fan took over Lao Chen's list and looked at it again, "no, you can't pick the person."

Ouyang rolled his eyes and didn't say anything, but he muttered, "if it's OK, I'll come to you!"

Chapter 1377

Ten years ago, it was far away. That is to say, when Zhang Fan's memory is still fresh, he wanted to build a diversion canal in his hometown, which is said to be the largest diversion canal in Asia, because he borrowed money from an international bank or an Asian bank. Anyway, the bidding is all international.

So for a time, a group of foreign contractors came to the northwest.

At that time, Zhang Fan, who lived in a small county, saw a tall foreigner with a high nose, blue eyes, yellow hair for the first time.

There are many kinds of foreigners. At that time, they were wearing white tourist shoes, jeans that highlight women's buttocks, and carrying an extremely beautiful backpack. At that time, Zhang Fan's schoolbag was sewn by his mother on one shoulder and made up of leftover cloth heads of seven or eight colors, which carried Zhang fan's childhood.

If anyone has a military schoolbag, he can become the most beautiful cub in the school.

At that time, I remember the teacher said in the classroom, "don't run after the foreign guests, let alone ask for sugar with the foreign guests! When you see foreign guests, be polite and salute the Young Pioneers! "

Of course, Zhang Fan didn't have a red scarf at that time. He didn't belong to the organization. Because he was too naughty, Zhang Fan barely entered the team in the third grade. It was also a great humiliation for him!

The teacher doesn't say it's OK. The children know that these boys have yellow hair and big nose and sugar.

Really, when Zhang Fan ate chocolate for the first time, he could never forget the sweet taste in his life.

Later, when Zhang Fan grew up, many students went abroad. Maybe it's because the first bite of chocolate in childhood made these students want to go abroad all their life.

But Zhang Fan didn't want to go abroad. Although he has been Amoy since childhood, home is home, and others always belong to others.

At that time, in addition to being sweet, what you can't forget is your respect for foreigners. Foreign guests, county and city cleaning, going to the streets and wearing clean and tidy clothes, you can't be surprised and laugh at foreign guests!

At that time, the Asian Games had not been held in the capital. People in a small county had never seen so many foreigners on TV.

In fact, after growing up, Zhang Fan recalled that he was a little uncomfortable. But now, a group of local tyrants in the tea vegetable hospital have a child who will go up to eat and say a bad word.

If you give it to others, they still think you are a bad person and want to steal other people's children.

Moreover, there is no inferiority complex like before. Especially the younger generation, who is five or six years younger than Zhang Fan, has no inferiority complex for foreigners as they did in previous generations.

For example, the younger generation of nurses in the tea vegetable hospital are full of collagen. When facing the eyes of foreigners, you can obviously feel their resistance.

Even some more exquisite little nurses will dislike their taste. It will never taste like mutton if some people claim that people eat and drink well before!

Local tyrants lined up to see a doctor in the International Department of tea vegetable hospital. Group

by group, group by group, the golden teeth glittered and clattered like walking gold coins into the deposit jar of the tea vegetable hospital.

Really, Zhang Fan didn't expect that NIMA, an academician, had such a great appeal. See if you are sick and maintain if you are not.

"The hospital is dry, not advertised. Recently, some doctors and nurses are not very responsible!"

Ouyang held a meeting for the chief nurses in the international department.

The people below looked surprised. Really, I've seen shameless leaders. I've never seen such shameless leaders.

Who let you advertise? Now I despise it as if you didn't do such a thing.

There are no such leaders. They can only set fire to the state officials.

"The inspection should be careful. An expert's number is more than 1000 yuan. Even if they are not ill, you should also check more carefully, otherwise what if they don't come next time. We can't do one hammer business.

Also, we must adjust our thinking, correct our mental state, check, and improve the equipment of tens of millions of people. You have to tell people about the advanced nature of our equipment. Will they know if you don't tell them how advanced your equipment is?

You have to be able to work and speak. Why did I transfer you out of our hospital and let you be the director of the international department and the head nurse?

Show your strengths, comrades, time waits for no man. This wave of opportunities can't be grasped. It's impossible to let people come in groups in the future. Therefore, now we must play the characteristics of our tea vegetable hospital and make the signboard of our tea vegetable hospital. "

Lao Chen doesn't even go to the administrative building. He soaks in the international department every day, and Ouyang runs three times a day. Not only did Li Cunhou go to the clinic on time every morning, but even the doctors in the tea element laboratory were pulled out by Ouyang.

A research doctor, to tell you the truth, if you talk about clinical experience, you may not be better than the experts in our hospital, but others have a doctor's hat.

With a hat, Ouyang has confidence to blow. And for laymen, you say experts, people may not understand. But you say this is a doctor of the golden mean. There are no more than three doctors from the most powerful schools in China. Tea leaders have to make an appointment if they want to find these doctors.

As soon as this was said, a group of gold teeth local tyrants were particularly proud of their gold teeth. Ouyang has never been a local tyrant in his life, but the old lady knows the hearts of these local tyrants. She doesn't want the most suitable, but the most expensive.

The more you catch up, the more people don't accept it. You set the threshold, obediently, and all at once.

Everyone likes money, but the stall of tea vegetable hospital is too big now. If we rely on the subsidy of the bird city government, the hospital can only stand still.

The hospital is a big waste. Zhang Fan is going faster and faster in the units with high consumables and high consumption. The income of the hospital does not increase. It is estimated that it will be shut down in the future.

Sometimes, Ouyang thinks again whether he and the tea vegetable government continue to ask for subsidies. After all, the tea vegetable hospital has not moved away, has it!

"Establish a membership system!" Ouyang doesn't know who paid her attention. She knows the membership system.

"No, will Stan's patients feel that we deliberately embarrass them?"

Zhang Fan thinks it's too much for the hospital to establish a membership system.

Ouyang glanced at Zhang Fan, a look you know.

"Although many high-level hospitals in Europe and America do not have a membership system, they must have limited donations."

Lao Li explained that he had lived in the United States for many years and was familiar with Europe and America.

"Why is this a bit like protection money?" Zhang Fan shook his head.

"What do you think? If you don't have money, what will you do with these institutes and laboratories. This year, a lot of money has been allocated for the placement of doctors and masters, as well as the experimental projects applied by various laboratories. With a stroke of a pen, you have passed them all.

This is another sum of money. Then there is the salary. In Manchuria, the salary of our tea vegetable hospital is the highest. You are generous. If you don't open source, we estimate that it will be the only bankrupt class III hospital in the tea vegetable area. "

Ouyang said unhappily. In fact, the old lady is extremely in favor of the investment in laboratories and research institutes, especially the construction and establishment of bone Institute, hepatobiliary

Institute and children's Institute. She can wake up with a smile when she goes to bed at night.

She was a little reluctant to give up her salary. She thought it would be good to give more than 5000 a year. She was one of the best in the tea vegetable area and could catch up with the ordinary treatment of the tobacco company.

But Zhang Fan is good. The income of ordinary doctors and nurses can reach more than 100000 a year, which is a little extravagant, but she can't persuade Zhang Fan.

Now Ouyang has a feeling about Zhang fan that he can't help his mother. Although he is angry, Zhang Fan has to do so. Although Ouyang is unwilling, he still has to find a way to solve the problem for Zhang Fan and help Zhang Fan make money.

Really, Zhang Fan was so lucky that he met a group of good colleagues and good bole.

"In this way, membership is OK, but you can't name it like a club. Just donate to charity and set up a group to take charge of this piece. Since you want to figure it out, figure it out and form several gears.

We must find out what treatment is in the first level, how many times we have not lined up to make an appointment for academicians, and what treatment is in the second level. If we do not publicize or take the initiative, we are willing to take the bait. "

After thinking about it, Zhang Fan took a version.

"I want both money and face. This black Buy River is becoming more and more thieves!" Ouyang despised Zhang Fan in his heart.

.....

After arranging the International Department, Zhang Fan thinks he has some time to do endocrinology. As a result, the spies in Laochen bird market sent a message to Laochen again.

Several hospitals in niaoshi are even said to have excluded vice-high-level doctors from participating in the preliminary selection of clinical martial arts. For no reason, they just don't let the tea vegetable hospital take the lead.

Nima is shameless. Although it is not explicitly forbidden for doctors above the attending level to participate in the clinical competition in previous years.

But generally, the deputy senior doctor won't go. There's no benefit in winning. It's just a card. It's humiliating to lose.

So, it's all the doctors in charge who go to the game.

It's NIMA. They sent the deputy high school to be pre elected. This is clearly that there are no places in the tea vegetable hospital.

"NIMA, I'm not angry. I really think I'm made of mud!" Zhang Fan was not happy to hear what Lao Chen said, but even more so now.

"Inform me and let the doctors who study outside come back!" Zhang Fan thought.

"OK, are you all back?"

"All!"

"Good!"

For a time, tea doctors studying in the country received a collection of information from the hospital.

Shuitanzi's Wang Yanan had an operation. She has been in the operating room for three months and hasn't left the operating room at all. This study is more experience than the last time, because my hospital is strong.

The hospitals here have also given face up and down.

Xu Xian in shuitanzi orthopedic laboratory also received the information back to the hospital.

In the emergency center of digital hospital, Xue Fei received the return message, "what's the matter? Isn't it half a year? " Although there were doubts, after confirming the news from the medical department, Xue Fei asked for leave with the vice president of the digital hospital.

The flower in the Department of Cardiology of Shuimu medical department also received a message, "please report to the medical department of tea vegetable hospital three days later!"

"Copy that!"

Xue Xiaoqiao, who studies outside the brain in Temple of Heaven hospital, also received the call information every day.

For a time, a group of doctors who had almost entered the hospital with Zhang Fan and a group of current pillars of the tea vegetable hospital received the information.

They are different from the former directors. They are younger and study more frequently. Although the technology is not perfect yet.

But they are already rising stars. It is the future star of tea element medicine.

Chapter 1378

After the phone call from the medical office of the tea vegetable hospital was sent out, the doctors reported in succession within three days.

The medical doctor industry is the same as many industries. You can leave without asking for leave, so you still have to have a margin of three days.

The orthopaedic doctor led by Wang Yanan came back first. Although the director of Shuitanzi's orthopaedic university had a grievance against Zhang Fan, it was because Zhang Fan didn't vote under his door, but the tea vegetable hospital was very good for Zhang Fan himself.

The old man is a kind-hearted person without a good face. He will give you kindness, but he will not give you a good face. Therefore, it is very convenient for the orthopedics department of tea vegetable hospital to study in Shuitanzi. Tea vegetable hospital has other operations that have no chance.

There are no places in other hospitals, but there are tea vegetable hospitals.

For example, in the whole frontier, there are no more than five places to study in Shuitanzi in a year. After these five places were divided up by several large hospitals in the bird market, there was no more than one place out of the bird market.

For this quota, hospitals in various regions are struggling. What's more, the most irritating thing is that these doctors with places often transfer to the big hospital in Bird City after their study, or become the leader of the local hospital after they come back, and then they almost don't have surgery.

And these places go to the hospital for further study, often about half a year. In the first two months, the head was unfamiliar, the other party was not familiar with the study, and the doctor was not familiar with the other party. Both sides were very cautious.

Then when I got started, I almost didn't have a month to study. Therefore, a doctor's study, like students, is once every three years, once every three years. In this way, there will be some harvest after more than ten years.

But the tea vegetable hospital is different. Wang Yanan and his wife went to Shuitanzi, which is no

different from that in the tea vegetable hospital. The only difference is that their income is estimated to be a little low.

The convenience here is not only the face of Zhang Fan and the care of the director of orthopedics of Shuitanzi University, but also the Bone Research Institute of tea element.

The tea vegetable Bone Institute and the special orthopedic hospital jointly run the hospital. Now many Shuitanzi doctors go to the tea vegetable scientific research institute with their own projects.

Therefore, if Shuitanzi's orthopedic doctors want to go further in the future, they have to go to the Bone Institute of tea element to set up a research team by themselves.

Because there is an unwritten rule in large hospitals in China, if you want to be the director of a department, you must have the experience of studying abroad.

The reason is the same. It is difficult for doctors in small cities to study in the capital, and it is also difficult for doctors in the capital to study in the world's top hospitals. The state not only has to pay for each other's hospitals, but the quota of others is also limited.

But now, although the tea vegetable hospital can't be ranked, others' Bone Research Institute is powerful. Not to mention hardware. Hardware has been the first existence by default by people in the Chinese industry.

As for the technology, the basic is not enough. Few theophylline orthopedic doctors can enter the Institute of osteology, but the top research of others is powerful. Now several Shuitanzi doctors and Jinmao special orthopedic doctors have jointly developed a new hip prosthesis replacement.

It is said that this method of operation, the patient surgery the same day, the next day. This is very powerful. It is said that the gold Lord is Johnson & Johnson.

Therefore, now if you want to rush to the top in orthopedics, it's too expensive to go abroad. There are constraints and fierce competition, but you can go to tea vegetarians, and you don't have to ask your superiors. As long as the other party invites you, it's easy to go to tea vegetarians if you have time.

No matter how far the tea is, can it be far beyond the golden Mao country?

Therefore, Shuitanzi's orthopedic doctors, especially the sub top directors, are very friendly to the doctors of tea.

The same is true of the digital general hospital. In terms of burns, Zhang Fan not only cheated the digital general hospital of a large sum of money, but also fooled the vice president and the director of the

General Foreign Affairs Department of the digital general hospital to set up a scientific research station in chasu.

During this period, almost three-quarters of the time the director of the General Foreign Affairs University of the digital general hospital spent in tea. The vice president even brought some funds allocated by the General Logistics Department to the general hospital.

The doctor of NIMA tea goes to the general hospital for further study. Can't he be kind? In particular, we all know that Zhang Yuan and Ouyuan tanima, the tea vegetable, protect the calf. They all say that the northwest people are generous. This NIMA can't be seen in these two people.

Therefore, the doctors of tea vegetable hospital go to the top hospitals in China for further study. It is really a further study, and the effect is extremely obvious.

In the tea vegetable medical office, all the training troops are in place.

"Ouch, it's still the water and soil nourishing people in the capital. Look, our Asian men's skin feels much whiter!" Yang Hong also came to join the fun. She and Wang Yanan were also a group of people who entered the hospital.

In the past, the relationship was average. Vaguely there is a kind of you beautiful, I am also beautiful. Your family is an official, and my family is also a civil servant. Anyway, there is a comparison. Coupled with the private comments of young people in the hospital, the relationship between the two female doctors is general.

However, Yang Hong has been different since she entered the hospital office. She put down her airs and can give each other a feeling of spring breeze when she sees anyone.

"Yes, it's a lot whiter!" Lao Chen agreed without raising his head.

"I haven't been out of the operating room. I haven't seen the sun. The water in the capital is white. It's not as good as our tea. Chen Yuan, what did you ask us to do? Didn't you say half a year? After only a few months, you can't open the bolt and want to go back! "

Wang Yanan spoke carelessly to Lao Chen. Lao Chen is really helpless for Zhang Fan and his group.

At first, he was the director of the medical department and dealt with doctors day by day. This group of doctors have a lot to do. Today, he feels that this department is not good. He wants to change the Department. Tomorrow, he won't work in pediatrics and wants to go to orthopedics.

But this group also produces talents, so they still have feelings for the last batch of doctors they took in the medical office, so they are not big or small on weekdays.

Although the later doctors were also very excellent, they always felt less taste in it.

"Repentance? We are such a big hospital that we can't give you a little doctor to go back on his word. There are ten places in one province in the national clinical competition. All of them are provincial level hospitals. The hospital in bird city has sent a message that they will take all the places to participate.

No, Zhang Yuan is a little unhappy! Let me tell you all to go home. What do you think? "

Lao Chen said half dead. The more this tone, the more it can make people feel angry.

Really, if Lao Chen said enthusiastically, everyone would feel that they are not so angry!

Therefore, the working methods of leaders and leaders are different. Ouyang's words are definitely talking about history with chicken blood.

As for Zhang Fan, he is usually steady and clear about things. It depends on everyone if he can't go up. Anyway, I want to go up, and then follow the people. Bayin is an example!

As for Lao Chen, he is pretending to be a grandson, which makes everyone have a desire to protect!

"It's so bullying that they still want to give no quota. Do they have the ability?" Before Wang Yanan did not study, whether he had strength or not, he still had sufficient confidence. Now he has studied twice, and others have strength.

"Who did you choose?" Xu Xian, who played with snakes, asked. Xu Xian went to shuitanzi to study mainly in scientific research. Originally, Xu Xian was a graduate student. After a trip, his career outlook was even different.

It is not only ascension, but also sublimation.

"We have prepared ten places, including Wang Yanan from orthopedics department, Xu Xian, the flower in the heart, Xue Xiaoqiao from outside the brain, Dai Yuhang, Ma Yichen from general education, LV Shuyan from gynecology department, he Xinyi from urology department and Xue Fei from emergency department.

Nine doctors and nurses are Bayin, the head nurse of the operating room!

Any of you who don't want to go, said earlier. It's still time to submit the list. "

Lao Chen's half dead voice said the list of doctors one by one.

"Hey, Xue Fei is in charge. What did he do? It raised our average age for nothing!"

As soon as Wang Yanan heard it, he shouted out in his voice.

Xue Fei is worried. NIMA, I'm three years older than you. Why are I old.

Because Xue Fei went to the emergency center from the Department of orthopedics in order to be an official, he was a deserter in the Department of orthopedics. In the past, Wang Yanan and Xue Fei were a little dirty in order to rob the operation.

Now we must take the opportunity to take eye medicine.

In fact, this is the daily work of a unit. Where is a unit where you are good to me and everyone. The unit is not a kindergarten. There is always the rhythm that I can't beat you, or you overwhelm me.

It's just that the leadership level of tea vegetable hospital is special. Zhang Fan is too young, and Ouyang is Zhang Fan's Guide. Ren Li is the lucky baby selected by Zhang Fan and Ouyang. As for the other presidents, they can't obey.

Because the three leaders are in the same team, can the people below you form a faction by themselves?

"How am I old? How am I old? Don't talk nonsense!" Xue Fei's face turned white with anger.

"OK, OK, they are all experts. They are still like children." Lao Chen stopped a group of people from laughing.

"If no one goes back, I'll submit the list! The boss is in the office. I'll take you there! "

Lao Chen took a group of people into Zhang Fan's office.

"Oh! They're all back. They look good in spirit. Aren't they frightened by the big hospital in bird city? "

"Look what you said, don't look whose soldiers we are!" At this time, Lao Chen changed his voice again. He lifted heavy as light, and looked like a million soldiers in his heart!

"Ha ha. All right, sit down! " Zhang Fan smiled. Xiao Chen and Yang Hong came into the office and quickly brought tea and water for everyone.

"Ya Nan, how do you feel about this study?" Zhang Fan asked. To tell the truth, Zhang Fan is very pleased with Wang Yanan's growth.

The little girl who wiped tears in the operating room and brazenly attended the meeting in the orthopedic office now really has the momentum of a female surgeon.

"It's OK. I can't compare with you, but it's much better than some people who change jobs halfway!"

"Ha ha, OK, that's good." Zhang Fan doesn't seem to understand.

Zhang Fan greeted and cared one by one.

"Well, you're a physician this time. You're in charge of internal medicine."

"OK, Zhang Yuan!" The flower smiled.

In terms of relationship, the relationship between that flower and Zhang Fan is special. It can be said that they are martial brothers and sisters, but their majors are different, one is internal medicine and the other is surgery.

Moreover, old man Lu complained many times that Zhang Fan turned the flower from the bird market to the frontier, making him look like a human trafficker in front of his old friends.

But Zhang Fan doesn't pay much attention to the old man's statement. In the past, Zhang Fan, known as an academician disciple, pulled the old man's flag and made throwing knives in various counties and townships around tea vegetable.

Now the old man, holding the banner of his disciples, called on all the surgical directors of the county and township to run training courses, and the tea vegetable government paid for them.

Zhang Fan sometimes wants the old man to come to the hospital for help. The old man pouts and blows Zhang Fan, "don't bother me with your shit. I'm busy!"

After the staff is complete, Zhang Fan asks the European hospital to lead the team. The European hospital doesn't do it. He says that his old lady has gone. Let others say that there is no one in our tea vegetable hospital. You go!

Zhang Fan is helpless and wants Ren Li to go, but Ren Li can't find her.

He had to go by himself. As a result, he was about to start. Ouyang came again with the tea government Koster.

The old lady said she would go too, but if she didn't lead the team, she would go to see the excitement!

Chapter 1379

"You too! This gives the hospital in bird city too much face!" Zhang Fan looked at the frightened driver of Koster and said to Ouyang with a smile.

Without Zhang Fan's role model as a dedicated driver, the drivers of the government car class, especially those driving this kind of bus, actually like to come to the tea vegetable hospital with high salary and not

so big rules.

But now with an example, everyone dare not come. Because of the special driver, other leaders don't use it very much, and they will arrange for a 120 team. When they are busy, they have to drive 120. There is no night or day.

It is also an iron rice bowl in the government and in hospitals. It costs thousands of dollars a year to drive an ambulance in the middle of the night. People's government drivers must not be happy.

As for Ouyang, Zhang Fan is helpless. You can take advantage of a big bargain. What's the meaning of this small bargain! Koster's tank is absolutely full!

To tell the truth, Ouyang's advantage, especially that of the government, is really not enough. It is said that now the tea vegetable hospital is not under the control of the tea vegetable government, and people have no obligation to help you out.

But Ouyang doesn't. some pharmaceutical companies merged by our laboratory still pay you taxes a year. Why don't you take advantage of it.

Ouyang was happy when he heard this“ Well, we should go to the meeting and cheer you on by the way. Not only I go, but also president Li. I don't say how long people have been in the hospital since you became president.

You haven't taken people around the bird market yet. The hospitals say you are a gourmet and don't take people to taste the delicious food of the frontier capital. How to say, the bird market is also the capital of the frontier! "

Zhang Fan has nothing to say. It's just a skill qualifier. You not only go by yourself, but also take the academician, and you don't admit it. The excuses are found on others. Alas! It's obviously to show off. It's urgent for me to drool, but I just don't admit it!

Lao Li came from afar with a wry smile and a file bag in his hand. "Hey, the European Academy is still considerate. Just in time, I went to medical university by the way. I'll see some students who want to take my PhD."

Lao Li also has nothing to talk about. To tell the truth, in his current position, does he have to see it himself to recruit a doctor? Or go to the bird market? In fact, he doesn't want to go to a broken bird market. There's nothing to turn. He eats and eats, either roast mutton or pocket meat. It's not attractive to him.

But now Ouyang has spoken, and he is embarrassed to refuse. The tea vegetable hospital, especially Ouyang, was very kind to him.

Entering the hospital, not only the government arranged a villa, which is a reward from the government, but also the tea vegetable hospital arranged a villa, just beside the virgin forest. Knowing that he was a bachelor, Ouyang also specially invited the housekeeping company of the government logistics to clean up.

Moreover, a chef was specially invited to cook for him. He wants to eat in the canteen, eat in the canteen, want to go home, and someone at home cooks for him.

Really, this treatment, Manchu tea vegetable hospital, only he has. These were all proposed by Ouyang.

He has a wife. Otherwise, it is estimated that Ouyang can organize personnel to give him a blind date.

As for whether Ma Gu didn't say it first, this care moved Lao Li, who hadn't felt much organizational care in his life.

Two koests, specially decorated koests, were pulled by Ouyang. Sitting in kostery, Ouyang looked contentedly at the young doctors behind him.

"If there were these people in 1998, I would have swallowed up other hospitals!" Ouyang said with regret.

1998 is an important year for Chinese medical treatment. This year is also the beginning of medical siphon effect and the beginning of medical practitioner qualification examination.

Before 1998, undergraduate graduation certificates were issued directly, and junior college students were issued after a year's work.

Therefore, before 1998, the qualification certificate of medical practitioners was worthless. Many old military doctors on electric poles and skin flower willow doctors at the door of toilets are almost certified.

This is because all the students who graduated before 1998, as long as they worked in medical related units at that time, were issued with qualification certificates. This has led to the birth of many leaflet doctors.

In particular, many old experts of a certain field Department cut out Quan NIMA in a one size fits all manner. This has also led to the courage of old experts in many Prefecture, county, township and private hospitals before 1998.

Ten minutes of appendicitis, half an hour of gallbladder, and even all kinds of strange treatments that were passed down as myths in those days.

Anyway, the medical reform in those years was very strange. In the end, it made the third class hospitals bigger and bigger, and all the previous small hospitals became half dead.

In particular, a group of doctors who were selected to go to university in that year were also in their prime of life, so the medical industry was very wonderful in that year.

Therefore, Ouyang's generation who really learned to enter the University despised the generation selected to go to the University. In those years, the hospital struggle was very fierce, which can be said to be the struggle between social medicine and natural medicine.

However, sometimes you have to convince these old guys who have been delayed for a long time. In a few years, the leaders of doctors who went to university were selected. Slowly, they either went to the health bureau or became ordinary doctors.

I can't do it!

Almost all the experts, directors and hospital directors were taken down by Ouyang. This also led to the spectacle that in that year, the director and Dean Du NIMA was about to retire, and the following doctors were not 30 years old.

The middle layer, which should have supported the girder, broke the line!

Of course, the three-level diagnosis and treatment system can be strictly implemented. They are all good hospitals!

Zhang Fan doesn't feel much about Ouyang's words, but he is also greedy for the tea vegetable Huahua hospital.

In the past, Zhang Fan didn't pay attention to the tea vegetable China Hospital, so he knocked Ouyang when he was all right.

In recent years, because of the development of tea element hospital, Huahua hospital has also received a lot of subsidies. The Chinese people's idea of balance is weird anyway. At the beginning, in order not to let the tea vegetable hospital be dominated by one person.

The government secretly and openly funded China Hospital, and then China hospital met the national policy of vigorously developing China Hospital.

Therefore, in recent years, buildings have sprung up one by one, which makes Zhang Fan a little greedy.

Because the International Department of the hospital is too small now, if it is built now, it is not too late, mainly because it costs too much money.

Hearing Ouyang say this, Zhang Fan has an idea in his heart. Really, what kind of people bring what kind of apprentices are right.

"European Academy, can our international department let the tea vegetable government buy some shares!"

"No!" Ouyang subconsciously objected, and then said, his eyes turned and thought.

"What do you mean?"

"Yes, several buildings of Hua hospital have been built. Their new hospital area is so big that there are few patients. Isn't it a waste? "

"Hiss!" Ouyang took a breath of cold air. Then he took a look at Zhang Fan and said in his heart, "this black river is really black! At ordinary times, I don't hum or ha. It's really a start. I'll go straight to the pot!"

"This is a national policy. Every region must have a sanjiahua hospital!" Ouyang thought about the possibility in his heart and said the biggest obstacle!

Zhang Fan smiled.

In fact, there is a joke in tea.

In Huahua hospital, a patient went to see Chinese medicine, then registered, hung up an expert number, and went into the clinic. The patient wanted to return this number, because the doctor couldn't speak Chinese well, and he was still a Chinese medicine expert. Isn't this bullshit!

Therefore, there is a slight patient number in the orthopedic rehabilitation department of the tea vegetable China Hospital. Other departments, that is, those who sell drugs, do not have the emergency department, the obstetrics and gynecology department, and the general surgery department. Anyway, surgery is an orthopedic department, which can also be the top three.

"Double name, the name of Hua hospital will not be changed, the old hospital will continue, and the new hospital will be directly changed into our international department. In this way, state subsidies can also be obtained, and there are ready-made new hospitals! "

Zhang Fan smiled and said something to Ouyang.

"I've never done this before. Is the tea vegetable government happy?" Ouyang's eyes are round. Although she asked whether she was willing or not, in fact, she had figured out that as long as the bird market did not care, the tea government would be very happy.

A government that even needs loans for civil servants' salaries. You said that it would give you twice the income of Huahua hospital a year. Can he not hand over the hospital to Zhang Fan. And this is not the loss of state-owned assets. Zhang Fan, they are the state.

This is called strong alliance!

Zhang Fan smiled, and then Ouyang looked remorseful!

"What's the matter?"

"Why didn't we do it earlier? Several years of state subsidies have been issued. It is estimated that these goods will be finished early!"

Ouyang said sadly.

"Ha ha!" Zhang Fan is happy.

At present, the first thing that restricts the tea vegetable hospital is talents, sustainable talents. Although the tea vegetable hospital is full of talents, the hens that do not lay eggs will lose sooner or later.

At present, Zhang fan can't help it. He has peed clean, and then pee is blood.

The second is the volume and income of the hospital. When the volume and income are large, the things you want to do will come naturally. Maybe one day the government will have to say it in person. Zhang Fan, medical school is not very good now, or you will merge!

Although Zhang Fan wants to be beautiful, you have a small body and low income, and you dare not think about it.

The third is the regional issue, but Zhang Fan doesn't care much about it. This thing is not a club. As long as you do something famous, someone will come even from the horizon.

For example, Mayo is also on the border of Jinmao. One more step, NIMA has gone to Canada.

Zhang Fan's words seemed to open Ouyang's new world. The old lady half narrowed her eyes, grinned and smiled secretly. It is estimated that the scheme has almost taken shape.

Zhang Fan also had an idea. If he was allowed to get it, it would be troublesome. It doesn't look like

giving the government three money, and the government will drool to eat meat. In fact, there are too many things to compete.

This requires resilience and courage. Of course, Ouyang is not lacking. You think, when the tea vegetable government wanted to give more state subsidized operating vehicles to China Hospital, Ouyang could quarrel with the tea vegetable boss every day for a month.

This toughness is more than enough!

Two Kesters entered the expressway. Ouyang was very satisfied because they didn't even have to pay the expressway fee because of the government's special pass.

She didn't want to pay the money. A line of vehicles sped along the expressway from tea vegetable to bird market.

When I was about to cross Tianshan Mountain, "Zhang Yuan, there was a car accident in front!"

The driver told Zhang Fan.

Zhang Fan quickly stood up and looked at the past.

Chapter 1380

Chasu is estimated to be a city with a relatively late huaguotong train. Zhang Fan remembers that when he came to chasu after graduation, the railway had not been opened until the end of the Olympic Games. At that time, many parents took their children to take the train.

I didn't do anything. I slept on the train for one night. The next day I strolled on the bird market bus. After drinking yogurt, I slept for another night to return to tea. Before taking the train, the children chattered excitedly.

Keep asking how the train purrs.

The distance between tea and bird market is not long, only 600 kilometers. But the train will run all night.

Hundreds of kilometers of trains here not only run fast, but also made great efforts when they were built. It is said that when it was built, several stans around protested several times.

Ah San, in particular, clamored that trains could pull anti-aircraft guns and that railway construction carried anti-aircraft guns. Zhang Fan didn't pay much attention to what Huaguo said at that time, but there was no news later. Anyway, the train was through.

Don't look at the train running slowly, but the living habits of tea vegetable people have changed greatly. First of all, the long-distance bus is the kind of fully closed sleeper car that Zhang Fan made when he came to tea.

It's better in winter. In summer, the bus with rhinitis can smoke you out. First of all, there's no business. Who still takes your bus all night? It's smelly and expensive.

So all the buses, 30 or 40 people, have become Iveco.

Iveco has less than seven seats, the speed is unlimited, and the driver doesn't have to take a photo anymore, as long as he is an old driver who can drive.

Therefore, on the highway, sometimes Iveco, a tea vegetable running in the bird market, is like a small plane one by one, not running too fast, but flying too low.

In addition, during the peak tourism season, these small planes have changed into a tourism through train. Often at this time, old drivers are not enough. At this time, anyone with a driver's license will be pulled by the tourism company to rob money.

However, tea is a pastoral area. In those years, a cadre from a coastal province had a car accident. Later, the government issued a painful order directly. At a certain level or at a certain level, driving is not allowed and can only be driven by local drivers.

Because the pastoral area is very special, even the train to Tibet has to make way for the Tibetan antelope. The expressway on the side of tea vegetable should leave a transition channel after entering Tianshan Mountain.

In fact, it is to leave an access channel for sheep, cattle and horses in the mountains at the intersection of the expressway, so that people can go from east to west.

This kind of channel, whenever it is a pastoral area, will have, which is also a regional feature.

But foreign drivers don't know. Seeing the signs of cattle, horses and sheep on the roadside of the expressway, I thought the traffic control reminded passengers to watch the grassland herds!

No, Zhang Fan, when they entered the hinterland of Tianshan Mountain, they saw a car accident in the distance.

"Slow down! Stop at the back of the vehicle in front, play double flashing and put on the warning sign! Yang Hong, call the nearby hospital and the nearby traffic police. Xiao Chen, call the vehicles behind and ask them to pull over. Get ready to save people!" Zhang Fan stood up and saw a car accident in the distance.

"Good!" The driver didn't speak, but the car had flashed.

Ouyang looked at the car accident ahead and regretted that he didn't drive an ambulance in order to force and take advantage of it. To tell the truth, the collective travel of hospitals is generally ambulances. After all, they are their own vehicles.

It's the level of tea vegetable hospital that dominates others' Koster.

"Dean, no signal!" Yang Hong is almost crying.

However, fortunately, the drivers driving for the government were all retired auto soldiers. When they saw the head car double flashing to the side, they didn't need to inform them and directly followed double flashing to the side.

Zhang Fan's head hummed as soon as he heard that there was no signal. He was not afraid of the wounded, but how long the accident had happened.

In the valley, there is a ditch between the two mountains. Looking at the mountains on both sides narrowly, only a few eagles fly overhead. There are also patches of virgin forests, where there are small waterfalls impacted by snow mountains.

Therefore, there is a drinking point for animal husbandry transfer, but the terrain of this place is too tangled. There is no telephone signal. You have to choose this place if you can't tell where the car accident is.

"Hurry up!" Zhang Fan urged. Koster's horsepower is OK. With a moo, he can push his back.

The closer he got, the deeper Zhang Fan's heart sank. He saw a woman, with one shoe on and the other barefoot, standing in the middle of the road, jumping like crazy to stop the car.

Far away, on the highway, you can obviously see a large piece of red meat, as well as a large piece of blood, black and red, reflecting a strange color light in the sun.

The people in the car are all ready in the car. They are going to participate in the martial arts competition. They have everything with them.

"I'm carrying an electrocardiogram. Who can help me carry a defibrillator!" The flower shouted anxiously, because she can't get the equipment in the heart of a cardiologist alone. Other departments are one department and one department has become a group.

Just the flower, a person with a stethoscope, an ECG and a defibrillator under his feet.

"Yang Hong, now you belong to the Department of Cardiology. I hope you haven't forgotten your internal medicine skills!" Zhang Fan shouted loudly.

"Yes! Not forgotten!" With that, Yang Hong put down her mobile phone and took off her shoes while walking. She took off her dress that was supposed to appear in front of her peers in the bird market. Directly put on the small white shoes with flat bottom and put on the white coat.

The action is so quick. The agility of taking off shoes, skirts and coats shows that she is still a doctor and a physician who has participated in rescue for many times.

"Small white shoes are still comfortable!" I don't know why, Yang Hong, who changed her shoes, suddenly had this feeling in her heart!

"Xue Fei took the orthopedic group and moved away from the patient near the center of the road for the first time."

"Copy that!"

"Xue Xiaoqiao, take the outside of your brain and deal with the comatose patients at the first time."

"Copy that!"

"That flower, take it with you. Do a good job in medical rescue. Have you brought enough cardiogenic and anesthetic?"

"Report, there are 50 cardiogenics and diuretics in the rescue bag!"

"Bayin, have you brought the anesthetic?"

"It is reported that only lidocaine and other drugs are narcotic drugs..."

Zhang Fan's heart is slightly lowered, and lidocaine is lidocaine. At this time, lidocaine is already very powerful, and he can't expect it any more.

The car quickly stopped behind the car in the accident.

As soon as the door opened, a doctor in a white coat jumped out of the car.

Moreover, it was just the early morning sun, slanting through the gap in the forest, and the light hit the white coat. The white coat was so white and flawless, so quiet and stable.

The crazy women standing in the middle of the road really think they have lost their eyes. What kind of life is this? There was an accident. As a result, the first car was stopped and more than a dozen doctors came down.

Really, the woman didn't believe it and rubbed her eyes. The woman with a bloody face looked again. It was really a doctor.

"Wow!" With a cry, I burst into tears " Help! Help! The car overturned. "

Ouyang took Xiao Chen. One was old and frail. Zhang Fan didn't arrange work. The other was not clinical.

But who is Ouyang? He has presided over more rescue and disaster relief than Zhang Fan has seen. Take Xiao Chen directly and pull the crying woman in the middle of the road to the roadside.

Zhang Fan and them set out directly. The driver of Koster followed behind with a stretcher. At this time, there was no complaint.

Really, Chinese people are particularly good at this. When they encounter bad things, they tend to unite more people and are often willing to reach out more.

Perhaps this is the unique nature of a nation.

"Come on!"

When they ran to the car, Zhang Fan directly smoked on Iveco's wheels. From the rollover trace to the parking position, a large area of sheep and cattle were crushed under the car, and the blood flow was like a river.

Broken limbs and rotten meat are not human!

In the sun, mutton was roasted on the road. The smell of hair, blood, fat and leaked gasoline trapped in the river valley was extremely bad. It's like a naughty boy who uses a lighter to ignite foam.

"There's someone at the head of the express, Jack!"

"There are people in the car. No, the window is deformed and stuck in it!"

The non-stop accident report was passed to Zhang Fan's ear. Zhang Fan was busy rescuing while trying to find a way.

At this moment, Ouyang asked Xiao Chen to comfort the woman. She took the red flag, the red flag on

the window of Koster's car, and pulled it off when she asked the old lady to get off.

At this time, the old lady holding a red flag stopped the car on the road!

Here comes a car.

"What's the matter? Can I help you?" The car stopped and the people inside wanted to get off.

"Don't get out of the car. Now drive out of the valley. When there is a signal, call the local hospital and traffic police. Say that there is a major accident here. You'd better call the tea vegetable hospital. I'm Ouyang Hong from the tea plant hospital. Let them shoot the operating car. Hurry! "

"OK, you pay attention to safety!" The driver looked at the gray haired old lady with admiration, and then ran quickly out of the river valley.

The old lady continued to stop the car.

Four big cars carrying heavy cars slowly stopped.

"Come on, Jack, iron bar and other tools. The wounded in front are stuck in the car. I need help now. "

"Right away, there are tools in the car. We'll come now. Don't worry, old lady."

Then the driver or co driver in the truck, carrying a jack and a crowbar, ran towards the scene of the accident one by one, like a charging warrior, carrying tools.

"Child, child, get the child out first and save my child!" On the side of a side window, a young woman, bleeding and dying, sent her two-year-old child out of the window with both hands!

"Hold on, you must hold on. We are the doctors of tea vegetarians and the best doctors. You must hold on. Open your eyes and don't sleep quickly. Your child needs a mother. You must hold on!"

While Zhang Fan took the child, he asked Ma Yichen to stick to the child, while Zhang Fan put his hand into the child's mother's lower abdomen, pressed the bleeding point, and shouted to the child's mother.
