

Chapter 1381

Is there anyone who plays 120? Really, NIMA reported to the fake police. There are a lot of people harassing 110 girls, not to mention 120 without a gun. Especially when the tea high school dormitories were equipped with landlines.

At that time, I didn't know whether the leaders of the school had just eaten, or whether the students really needed a landline. Anyway, each high school dormitory installed a card. You need to buy a card, and then enter the number of the card before you can make a phone call.

It is estimated that young people don't know this card. It seems that it was called IP or IC card at that time. Anyway, master Fan said this card when he robbed.

But at that time, the operator of the emergency center of tea vegetable hospital gnashed his teeth at the high school principal. Because at that time, high school students made a lot of boring phone calls, especially after the evening self-study, it began around 11 o'clock.

Obscene mouth called sister, said his ass hurt!

Head Leng's mouth said he was swollen how to do!

A group of little male dogs who were too young to vent and dared not actually chase girls. At that time, the young lady and sister of tea vegetable hospital almost went to the police.

So when the first car driver out of the valley called the tea vegetable hospital, at first, the sister in the emergency center of the tea vegetable hospital thought this person was making a harassing call.

But when I heard it again, what they said was methodical, and the most important thing was that more than a dozen of your doctors and an old lady with gray hair and two triangular eyes were rescuing the wounded on the highway.

The old lady told me to send an operation vehicle, an emergency vehicle, doctors and nurses!

On hearing this, the operator knew that the other party was not making a harassing call.

Then for the first time, the operator reported the matter to Lao Chen.

Lao Chen listened and then contacted the tea vegetable traffic police team. The car driver of others called 120 from the tea vegetable hospital, but he could call the traffic police team. Others called the bird market. However, Lao Chen still implemented this matter.

This implementation, Lao Chen's heart clicked. In a car accident, an Iveco, it is estimated that at least six or seven people are injured. Moreover, the wounded in a car accident are often bleeding, so the surgery must be done at the first time.

Lao Chen stopped tangled and reported to Ren Li that Ren Li wanted to take the team, but Lao Chen stopped it "The family leaders have gone out. You'd better sit in the hospital. I'll do this. "

Then Lao Chen took half of the operating vehicles of the tea vegetable hospital, twelve! To tell the truth, it is estimated that other hospitals in the whole frontier do not have as many operating vehicles as tea vegetable hospitals. Of course, there are donations here, most of which are robbed by Ouyang.

Look at the Huahua hospital next door. There is only one operating car, but it's still too noisy. Ouyang eliminated the old operating car from his hospital to them. That's why Ouyang asked people to pay 200000 yuan from Jiahua hospital!

What is it? The equipment on the operating car was installed after the tea vegetable hospital. Either pay or all the equipment on the car will be dismantled.

Really, it was Zhang Fangang who took over the hospital. When Ouyang just got up, the president of the bullied Hua Hospital cried.

Twelve operating vehicles, as well as ambulances and inspection platform vehicles. It is almost a class II class a hospital.

"Hey, our plane is too big, otherwise we should let the plane out first. You should tell Zhang Yuan that it's time to get a small one! " Lao Chen got into the car, tied his seat belt and said to the people around him.

The hospital is a big waste. There are many materials. One is used in Kaifeng, and the others must be scrapped. Some use half of them. As a result, they must be scrapped after the expiration date.

Therefore, this kind of waste is necessary. Lao Chen took half of the surgical vehicle in line with the idea that he would rather have more cars than less.

I thought someone would agree.

However, there were front-line doctors on the bus, and everyone laughed. No one or everyone was not very good at cheering, so Lao Chen also said that he was lonely.

There are many people without EQ in the technical unit of hospital. There was a joke back then, from the old Huang era.

He said that Lao Huang had a ward round in the morning and took a group of leaders to the internal medicine ward round. As a result, he met a late surgeon on the way. Lao Huang was good. He wanted to mention something, but he didn't say he was late. That is, "good morning, Dr. Chen!"

This means that if your baby is late, quickly pose, or trot, or quickly say a reason.

As a result, the other party just nodded, and then, as if he was Lao Huang's leader, um, he almost didn't let Lao Huang out of heart failure at that time!

Therefore, sometimes people in technical units are stunned and lovely!

The motorcade set off in a mighty manner.

Just out of the hospital, the tea vegetable traffic police also came.

To tell you the truth, it's hard to tell how the tea vegetable hospital has a relationship with other units, but it has a good relationship with the traffic police and the fire squadron, because there are too many contacts.

Therefore, although people didn't call the police in tea, the traffic police brigade sent police cars and mounted police to open the way.

Then the motorcade was mighty, and the police car in front shouted: make way, make way. There was a flashing light in the back 120, and the people of tea vegetable city looked at the team curiously.

"This NIMA is too fierce. The team of tea vegetable hospital is more fierce than the general manager. Look at how many cars."

"I don't know where the accident happened again, alas! I hope it's safe! "

"Why didn't the flower hens in the tea vegetable hospital come out? Isn't it the flower hens that fly in the sky every time they go out?"

Ouyang's strange aesthetics dressed the helicopters of the tea vegetable hospital in a fancy way. The doctors of the tea vegetable hospital called our flowers intimately, but the tea vegetable people are not so intimate. They are generally called flower hens.

Of course, it's my time to say flower hen. If you're an outsider, people can definitely blow it for you.

Who in Asia's largest Manchukuo hospital can afford such a large plane, tea vegetable hospital? You know, our tea vegetable hospital's plane.

"It's estimated that it's not a big deal. Maybe it's the hospital president's birthday. Let's go there and be lively!"

There are people who don't have moral integrity. Of course, no one cares about that.

.....

The team got on the highway and went straight to 160.

At the scene of the accident, emergency treatment has begun.

A group of men driving big trucks really helped.

Because there are tools and strength. Although the blood was stained, no one cared at this time. Some even knelt on the ground and climbed on the ground to slowly pull out the people inside.

You have to say that doctors understand the structure of the human body and know where it is weak, but given a car, they don't know where to get in, which is the most labor-saving and shortest time. And other truck drivers understand.

Click, click, the door frame was stretched. A man with a head full of blood, just like a big cock with a head full of blood, was pulled out, and he was unconscious.

"Xue Xiaoqiao! Come on! Unconscious. " Xue Xiaoqiao came up with a stretcher team.

There was only one nurse in the audience. Bayin didn't know how he survived. He asked for bandage and infusion when the patient was in shock.

Really, under such extreme circumstances, Bayin's technology has been brought into full play, and the feeling of adrenaline Biao really makes her feel like a superman, so she is still young. If she is five or six years older, it is estimated that she will not be able.

When others say a word, she remembers it in her mind. While doing the infusion of the previous one, she has thought out all the drug excipients to be prepared for the next one in her mind. Even if there is a person who cuts in the queue, she can adjust very well.

And the one in cardiology, because there is no physician, she is now the whole rescue center.

"Dobutamine 250mg 5% glucose solution 250ml, intravenous drip immediately, norepinephrine..."

For each one rescued, the flower should be checked first and the vital signs of the patient should be

determined at the first time. Then, the doctor's order shall be given to deal with the most urgent vital signs of the patient at the first time.

To tell the truth, this is the talent trained by tea vegetable in recent years. After not knowing how many rounds of training, after not knowing how many times of rescue, this is today. Although there are few people, it is only fast and steady without panic.

Medication, bandage, bandage. The scene seems tense, but in fact, it has been slowly controlled by the doctors and nurses of the tea vegetable hospital.

To tell you the truth, today's car accident patients, unfortunately, also have a trace of luck, that is, they met the doctors and nurses who went to the tea vegetable hospital for a big competition.

Almost all of them are young and capable doctors. Almost these are the most powerful doctors among the youngest generation in the frontier.

"Wow, wow!" The child rescued first cried loudly after the scare period. Ma Yichen, who is still a single dog, doesn't know what to do. The child thrust his head into Ma Yichen's chest.

Ma Yichen thought that the child was cold. He took off his white coat and wrapped it up. It was still not cold. He took off his T-shirt and wrapped it up. It was not enough. There were only pants left for NIMA. Ma Yichen was about to cry like the child.

"You fool, how did Pediatrics transfer to another department? Other people's children are hungry!" After Ouyang finished the meeting, he began to make a full tour to see where he needed help.

Seeing Ma Yichen holding the child sweating, the old lady scolded and brought the child over. Although Ouyang had never had a child, it was still very possible for a physician to take care of the child.

Puff, poke open a bottle of 5% sugar and gently drip it on the child's mouth. The child licked his mouth, his small mouth and tongue kept licking outward, and his eyes were still full of tears, but he didn't cry anymore.

"Eat, eat, your mother will not have an accident. Eat, eat!" Ouyang looked at the child quietly.

"No, the blood type ratio is coming out. This woman is dying." Zhang Fan pressed the bleeding point with one hand, stopped bleeding with his bare hands, and touched the carotid artery with the other hand.

When the car accident came, the woman bent down, wrapped the child up for the first time, and then used her own human flesh as a buffer.

The child had no injury at all, while the woman, her legs and hands were directly hit by strong impact, resulting in fracture. The most serious thing was that the iron frame under the front seat was directly

inserted into the lower abdomen.

A group of big men driving trucks were covered with blood, sweat and oil, just as they had been sprayed with red paint. Four or five big men, beside Zhang Fan, shouted directly, opened the window and the seat in the front seat with a jack and crowbar.

"1, 2, 3, up!"

"1, 2, 3, up!"

Ferocious faces, teeth biting together, and blue veins popping up, a group of nameless men tried their best to save people they didn't know who they were. This is the hero, this is the people of China!

Finally, with a click, the woman's was entrusted out.

"Come on, gauze, Bayin, come on, gauze!" When a woman is carried out, she is like a three section stick.

The twist of arms and thighs is like a wooden stick that has been broken several times, only a trace of flesh skin is connected!

Chapter 1382

Iveco has become like a big eyed fish. One by one, all the windows have been enlarged.

Although all the people were rescued, the scene was just like the Shura field, and the sheep and cattle were broken and crushed like revenge by the wolves.

This kind of scene is not a slaughterhouse. At least the excrement of the slaughterhouse will be cleaned up. This kind of blood, meat paste, and all kinds of excrement sandwiched between meat and blood will gather in the low river valley and cannot dissipate.

Moreover, there is water vapor evaporated from the river valley, and the smelly gas is mixed with water vapor, which is like entering a sauna with defecation.

Even wearing a mask, the hot and humid air is tightly applied to the skin, which is really uncomfortable. To tell you the truth, this feeling is estimated to be deeper in the southern human body.

"Come on, let's come. You have a rest. You have to rescue the patient later." Several truck drivers could not help but replace the stretcher bearer.

A total of eight wounded, including the driver, five big and three small. They were all placed on the roadside. If it were not for the presence of rescue workers, it would be like a great disaster in the end of the world.

At this time, a truck driver shouted from a distance, "there is another wounded under the subgrade!"

As soon as Zhang Fan listened to them, they didn't have to give orders. Xue Fei ran with the stretcher group towards the truck driver in the distance.

Ran to the front and saw a middle-aged man obviously like a herdsman lying under the subgrade. On the side lay a lame big red horse! If it hadn't been for the painful pattering of hooves, the driver might not have found this one.

"It is estimated that the car accident frightened the mount and fell off the subgrade." Xue Fei explained as he looked, and then walked down with a safety rope.

The height is more than two meters, which can be counted as the height of Malaysia. There are rivers under the subgrade and stones in the rivers. If you land your head on the ground, it will be dangerous.

After three or four people lifted the patient from under the subgrade on a stretcher, the patient was unconscious. "Life is fairly stable. I hope there is no cerebral hemorrhage."

Surgery, there's no way to operate now.

"What should I do? Forward or back!" Ouyang asked Zhang Fan.

The current situation is that although the life state of these patients has been controlled, this thing is that the levee has to burst and sprinkle some dry loess. It looks like the levee has been blocked, but if you are not careful, it is a big collapse.

Therefore, the problem now is to get into the hospital and operate quickly.

"The nearest hospital is the port hospital. Go forward!" Zhang Fan thought for a moment and decided to move forward.

To tell the truth, for the surrounding hospitals, tea vegetable hospital is estimated that no one knows

better than Zhang Fan. Although it is not as frequent as before to fly knives in various counties and townships, there are still some occasionally, mainly because in the past, Zhang Fan almost ran countless times to hospitals in tea vegetable area for systematic tasks.

So he is clear about the distance from the hospital.

Just as Zhang Fan and his colleagues were trying to carry the patient into Koster, they vaguely heard the siren.

"Police car?" Ouyang is old and can't hear clearly.

"120 more! And it's 120 from our own hospital!" Zhang Fan pricked his ears, listened carefully and said.

To tell the truth, this person's hearing is really different sometimes. Zhang fan can really hear it. When I first told Xue Fei, Xue Fei also said that Zhang Fan was a dog's ear.

At that time, Zhang Fan had a classmate whose home was on the side of the railway track. At that time, there was no fence on the side of the railway track, so the train was similar to the current car, often honking and honking.

Zhang Fan's classmates slept from nap to high school on the side of the railway track. Whenever the train passed, he didn't have to look. Listen to the sound of the tracks and the whistle of the train. He could tell whether it was a truck or a bus.

I don't brag at all.

As soon as Zhang Fan finished, the sound of the siren became louder and louder.

This time, everyone put some snacks in their hearts.

"I don't know how many cars my family sent. I don't know if it's enough. If it's not enough, we have to find a way."

"Yes!" Zhang Fan nodded. Ouyang's words were also under consideration in his heart.

Rescue is a comprehensive event. It doesn't mean that you have arrived. All aspects must be considered clearly. After all, this is saving people. Once you don't think carefully, you will regret it.

When Zhang Fan, Ouyang and Li Cunhou came together to consider, when the police car crossed the slope and rushed down the river valley, an operating car appeared.

Zhang Fan looked and said nothing.

Here comes the second one

The third one is coming

Zhang Fan, Ouyang and Li Cunhou looked at each other, "it should be enough!"

A total of twelve came!

If at ordinary times, Ouyang will definitely jump and scold the loser!

But now, when Ouyang saw twelve surgical vehicles and three or four ambulances, the old lady breathed a sigh of relief, "when you have money, you will have courage!"

Zhang Fan has neglected to speak.

They hurriedly carried the wounded in groups and arranged for the wounded to get on the handcart.

In the motorcade coming from behind, many doctors came.

To tell the truth, Lao Chen didn't use so much at that time. As a result, so many people came.

Not that it's okay to be idle. Originally, there were provisions for hospital rescue. Everyone knows who will go and who will not.

But this time is different. All those who are not on duty after work today came. Why, just because the candidate for the skill contest was chosen by Zhang Fan.

This thing is not a model worker selection. We have to choose.

This was decided by Zhang Fan alone, but the person who didn't choose was holding a breath in his heart.

What's wrong with me?

So, this time, a group of black people came.

Really, sometimes people's fate is hard to say.

Doctors from various departments came in one breath. As a result, they all used it! Where is NIMA going to reason.

Is there a person who put down the butcher's knife and became a Buddha in his previous life?

Chinese people have many children, many blessings, many people and great power. Sometimes it is really useful.

One by one, the wounded were put into the operating room car.

"The surplus operating vehicles shall return immediately. The operating vehicles that have entered the operating room shall slow down and set out towards the port hospital. Please guide the traffic police. The vehicle must be stable. "

For example, fracture patients can actually do it on the spot, but some patients can't, such as intracranial hemorrhage, thoracic hemorrhage and shock.

The operating car can do surgery, but the blood bank in the operating car may not be able to support it. In the past, China lacked everything.

Now take the tea element hospital as a comparison. Conventional drugs are not a problem at all. So let's head for the hospital first.

In the operating car, the operation has begun.

The vehicle drives very steadily and fast. I can hardly feel the vehicle moving.

Fracture, thoracotomy, rescue.

The operation vehicles were carried out in an orderly manner.

The woman standing in the way knows what to say at this time.

Sad, there was a car accident, followed by a group of doctors.

Happy, there was a car accident today!

Really, I want to cry without tears.

"Car 1 operation is over, and the patient's life state is stable!" In the surgical car of the fracture, I reported it.

After a while, another surgical vehicle reported.

All the wounded, only the driver, the child's mother and the shepherd are still outside the dangerous period, and all the other patients' operations have been successfully completed!

"European hospital, there is no big hospital along the way. Now it's no fun to go to the port hospital. It's better to go directly to the bird market. Moreover, most of the operations have been completed now. According to the current situation, the blood preparation we brought can definitely support the bird market.

It's better to go directly to the bird market if you expect to waste time in a small hospital! "

Lao Chen suggested to Ouyang. Ouyang looked at Lao Li. Lao Li nodded. Ouyang thought a little, "OK, set off for the bird market!"

"It's troublesome for the traffic police to continue to guide!" Li Cunhou said with a little worry.

"Li Yuan, don't worry, this matter has been arranged!" Lao Chen said definitely.

When Lao Chen came in a motorcade, Ouyang praised Lao Chen very much. To tell the truth, Lao Chen is good at personnel and communication, but he can take responsibility at the critical moment, which also makes Zhang Fan very happy.

Hospitals are not afraid that you have small problems. They are afraid that at the critical moment, you can't stand it, you can't stand it, and you're afraid of taking responsibility!

At this time, Zhang Fan was already on the operating table, and the situation of women was very serious. He can't separate his mind from other things.

The convoy continued.

Under the guidance of a team of police vehicles and mounted police, they directly entered the bird market.

Then he went straight to the central hospital.

The central hospital is close to the highway exit.

The location of the preliminary contest is in the central hospital.

Everyone had arrived, but the tea vegetable hospital didn't arrive.

Someone said sarcastically that the shelf of tea vegetable hospital is big.

Others say that we can't blame the tea vegetable hospital. After all, the tea vegetable hospital is relatively remote!

Anyway, it feels like a big brother from the countryside comes to visit his relatives in the city.

"Wait, wait, wait another half an hour. If you don't come, let's start directly!"

The health system is very familiar with the major hospitals in niaoshi. After all, it is not like the migrant of tea vegetable hospital.

Flags fluttered and banners danced in the wind. In the hospital compound, people from various hospitals in bird city came, as did the leaders in charge of health.

When we were discussing whether the tea vegetable hospital was afraid to come.

Here comes the siren.

"Why, is there an emergency?" The head of the health system asked dissatisfied.

"No, I've said hello to the bird city emergency platform. The central hospital doesn't accept emergency patients today." The leaders of the central hospital also wondered.

But before he finished, he saw the mighty convoy coming.

Four mounted policemen, clear the way!

Two off-road police vehicles!

Ten large surgical platform vehicles followed.

There are several large 120 rescue vehicles. As for Koster, it is no longer remarkable at this time.

"Is NIMA here to participate in the activity or to demonstrate. Nima police car opened the road, followed by so many surgical platform vehicles. Are they here to show off their wealth? "

In the meeting hall, the doctors in various hospitals were silly.

With so many surgical vehicles gathered together and police cars, zhenima is a little aggressive. It's like the section where transformers go to the reservoir. It's really a little powerful.

"Leader, leader, look, look, they are too domineering!" Speaking, the president of the central hospital and the president of the Second Affiliated Hospital looked up at the sky.

"What?" The leader of the health system asked in wonder.

"For this virtue, the operating vehicles are coming. Will their planes come? Let me see where they are hiding. It is estimated that Zhang Fan may get off the plane later. Leader, your management ~! What is it called? "

Chapter 1383

A mighty convoy and escorted by traffic police! Nima flashed the police light and drove to the gate of the hospital.

The most important thing is that today, almost all the leaders and doctors of the third class hospitals in niaoshi are in the central hospital.

This posture makes the doctors and leaders of bird market feel that tea is a little bullying.

Yes, there are not as many surgical vehicles in major hospitals as you. Although this car is not expensive, it is only one million.

But it's too much for you to drive to someone else's hospital.

Leaders, leaders in charge of health did not participate in the selection of big competition. In previous years, I went every year, became an atmosphere group every year, and participated in the NIMA award every year. Did the leaders have no cards!

But this year, the major hospitals in niaoshi will block the tea vegetable hospital. If there is no leader, it will be bad if there is a problem at that time, so the leaders come this year.

As a result, when I saw this scene, I felt a little indebted to the tea vegetable hospital. They were not in the capital, and they were upgraded late. Moreover, all the participants in the bird market were at the vice high level, thinking about how to give tea vegetable a place at that time.

Don't make it too ugly! As a result, looking at the huge team and the team with flashing alarm lights, the leaders were angry. NIMA Lao Tzu didn't travel like this!

"A little too much!" The leader said a little too much, but he shouted in his heart. NIMA is too unruly!

"Too much!" The leaders of Annex II and the leaders of the central hospital can't stand it anymore. They are waiting for Zhang Fan to come out. They must say well that NIMA is so large that it scares the patients in the hospital. Who is it.

As a result, we looked up and waited for a long time, but we didn't see the flowers of tea coming out. At

this time, Xu Guangwei, President of the first affiliated university, said, "it's estimated that something has happened!"

Xu Guangwei was a general foreign student. When he was a director, he had dealt with Zhang Fan. Although his relationship was not as good as Zhao Jingjin, he also said it was in the past. After all, attachment 1 often invited Zhang Fan to fly a knife.

"He is showing off! Too superficial! " The president of the Central Hospital glanced at the president of Annex I discontentedly and shouted in his heart, you traitor, are you in the bird market circle!

Originally, the president of the central hospital and Zhang Fan could say two words even if they were fake, but since they heard that a big leader of the bird market went to the tea vegetable hospital for convalescence, the president of NIMA central hospital was very angry.

You Zhang Fan's operation flew up. Even if your tea vegetable hospital was so powerful, I applauded with both hands, but NIMA dug my corner. That's not enough.

It's mainly the Central Hospital, which can be taken by the cadre ward. Therefore, in previous years, people were designated cadre convalescent centers in the frontier. Now they can't do it. Tea vegetarians are watching the convalescence of the international department.

He began to be afraid, because the central hospital can't do anything except recuperation!

It's going to kill you!

At this time, the motorcade entered the hospital. Rows of operation stations formed a row. The doctors all over the hall looked angrily at the team of tea vegetable hospital. The whole hospital square was surprisingly quiet.

This has aroused everyone's common hatred! To tell you the truth, the equipment of tea vegetable hospital is very good!

There are two or three inspection vehicles, surgical vehicles, 120, magnificent in Ukraine and other hospitals in bird City, which are already very powerful, but they are directly ten!

The radiation examination vehicle of tea element is even more powerful, because it can do emergency X-rays and CT. Because it is a radiation examination, the requirements for vehicles are too high. At present, only tea element is available in the frontier.

As for this car, in fact, Ouyang came from the special hospital at the beginning. Not to mention anything else, it's a large carriage and the sign of Mercedes Benz in the front, which already reflects the high cost of the car.

This kind of car can be regarded as a special engineering car. The more special it is, the more expensive it is. Sometimes you can't buy it with money.

It seems that the doctors who want to kill tea vegetarians with their eyes glare one by one.

At this time, the door opened, the automatic door opened, and Zhang Fan appeared!

Wearing disposable blue surgical clothes, hands with gloves, hands full of blood! I didn't wear a mask because I wanted to talk.

The doctors who were supposed to kill Zhang Fan with their eyes were surprised!

I'm really surprised.

I thought that the doctor of tea vegetable might walk down proudly in a line in a uniform suit or something.

Unexpectedly, it turned out to be like this!

Zhang Fan doesn't care about a group of stunned doctors.

He shouted directly, "are there any foreigners! Come and help, there's a car accident! "

If Zhang Fan and his team came in today with a pair of money built up for no reason, the full field will definitely give Zhang Fan a silent resistance.

But now you see, you understand. There must have been an accident on the way.

When Zhang Fan shouted, someone answered directly, "Zhang Yuan, I'm the director of general foreign studies!"

"Zhang Yuan, I'm the director of the second affiliated general foreign school!"

If Zhang Fan doesn't shout at this time, someone else will shout. It is estimated that the director level will come forward, but will not sign up.

How do you want others to recognize it, and then said in surprise: Director Li, ouch, director Li, it's you. Come on, come on, come on, great. Director Li came to help, director Li came! This is the card face, this is strength!

There is a feeling of big guys coming out.

But Zhang fan can't. in general, let alone the bird market, there are people in China who dare to compete with Zhang Fan and Zhang Fan's school! The current carrying disciple of the ancestral family, he

calls people. To tell the truth, people who don't have any strength dare not respond!

Even the competent and confident director experts dare not play cards in front of Zhang Fan, so they can only sign up and let others nod!

Moreover, although Zhang Fan is far away from tea vegetarians, he hasn't seen NIMA. He is not only the general foreigners in the capital or the magic capital. Now one is counted as one, and he doesn't come to the bird market to fly knives.

The two big men don't pay much attention to what their Dean thinks. This technical unit is like this. People will stand up. There's no good way for the dean to wear small shoes in the future.

The two directors, while reporting their names, trotted towards the operating car, took off their suits and ties.

Zhang Fan nodded when he heard the two directors. Others will be surprised and shocked when they see the general foreign affairs director of the bird market, and he will nod, not to mention the general foreign affairs director of the bird market. Even if the moderate general foreign affairs director sees Zhang Fan, he will laugh and shout: Zhang Yuan!

Because this thing can only be called like this. Although Zhang Fan is the smallest in the third generation of his own school, he can take it out and put it outside China. If Zhang fan can't do it well, others have to call him shiye.

So, it's impossible!

Without waiting for the two directors to get on the operating car, Zhang Fan shouted directly: "those outside the brain are good at brain trauma and intracranial hemorrhage."

"Zhang Yuan, I'm the extrabrain director of Annex 3!"

"Zhang Yuan, I'm the extrabrain director of Annex 2!"

"Good!" Zhang Fan said with approval.

However, I simply said a good word, that is, there are too many patients today. They can't tell their origin. Otherwise, it's their turn. Zhang Fan did it himself.

Moreover, the doctors brought today are still too young. Although no one is afraid in the clinical competition, they are a little weak when it comes to difficult surgery.

This medical treatment is not about face. If it works, it works. If it doesn't work, it doesn't work. Zhang Fan won't feel ashamed to invite someone, because it's human life.

"Gynecological! The female wounded is bleeding! " Zhang Fan continued to shout!

"Zhang Yuan, I'm the dean of women and children!" This time, the mother and child's dean came directly.

"Zhang Yuan, I'm the chief gynecologist of the First Affiliated Hospital!"

Then, a group of people got on the operating car, and the electric door of the operating car closed gently!

On the small square, the doctors anxiously looked at the operating car and whispered: what's the matter, what's the matter, how many patients are there, and what can we help. After all, this is a hospital, and at the beginning, everyone misunderstood others' tea vegetable hospital.

Therefore, now everyone has a compensation mentality.

Then, after kostrel, Ouyang came down!

When Zhang Fan shouted, Ouyang quickly took his hands and dipped some water to tidy up his hairstyle. Although his hair was gray, he was in a hurry to save people in the river valley, which was a little messy.

This doesn't work. Ouyang is really particular about appearance. For example, when rescuing, others are as disheartened as marmots. But although Ouyang is also covered with mud, she always keeps as neat as possible. This is not only her appearance, but also her calmness!

We used to pay attention to it, but now we pay more attention to it. Now I am the leader of the provincial hospital. I have a brand, and I should pay more attention to the appearance!

Can't compete with a bunch of bald boys!

When Ouyang got off the bus, Lao Chen slowed down Ouyang a step or two. He didn't seem to steal the limelight of Ouyang, let alone let Ouyang's shape and shadow only leave. This is the level.

As soon as Ouyang got off the bus, he was covered with blood. Although it looked dazzling, he was in the hospital. It was nothing.

Hula, a group of doctors gathered around“ Ouyuan, what's the matter? What's the matter? "

"European Academy, what can we do!"

Ouyang town waved steadily, "there was an accident on the road! There are many wounded, but most of the wounded have been out of danger, and the operation has been successfully completed on the way here.

There are still three patients who are seriously injured. Dean Zhang Fan is still rescuing them with people. Take it easy. If you need manpower, you will be notified at the first time. I'll thank you here first!
"

The blood and mud all over the body make people feel that the more they look, the more they look, the more they feel the spirit of the old lady!

At this time, the crowd gathered around Ouyang.

It's like pointing your ass towards the conference podium. The leader in charge of health and several deans have been forgotten.

The leader in charge of health had an iron green face and said to the president of the central hospital and the president of Annex II: you are so good that you mean to say that you are an expert!

Then he hurried to Ouyang.

The leader in charge of health is not a health professional, so on weekdays, he pays great attention to it. For example, when talking at a meeting, he will ask the Secretary to pick some new medical professional words to show that he is also concerned about the medical frontier.

Because I am not a health professional, I am deeply afraid that others will say that laymen lead experts. So this time, he was very angry with the presidents of these affiliated hospitals and central hospitals.

I'm a layman. I can't see that something has happened, but NIMA, can't you see that a group of presidents of the top three provinces can't see it? It's a shame to sit on the podium like a goose with a dull head. If the TV station puts this paragraph on it.

Hospital ambulances and operating vehicles came in, and she was still sitting on the podium in a daze. This is how NIMA will lead the system in the future.

So he was quite angry. If this group of people hadn't misled me, I would at least stand up and ask. But now

As he walked, he adjusted his face and thought, "no one in these bastards likes my position and wants to dig a hole for me?"

The more you think about it, the more likely it is, "who is it? Who wants to go up? "

This is the difference between doctors and non doctors!

As for the president of the central hospital and the president of the Second Affiliated Hospital, when you heard the leader scold, what kind of expert are you.

They were so embarrassed that they bowed their heads and wanted to get under the table and come out with their feet.

Tanima was embarrassed.

Chapter 1384

In the operating car, three patients have begun the key steps of the operation.

In Zhang Fan's operating car, two directors of general surgery have taken over the doctors of tea vegetable hospital. Ma Yichen changed from one assistant to three.

The director of Annex I and the director of Annex II have become one assistant and two assistants.

"Let's do it at the same time. I'll take care of the chest and you'll take care of the rest." Zhang Fan entered the operating car and had no time to greet.

Start issuing commands directly.

"OK!" The two directors nodded gently. In the general foreign system in the frontier, only tea vegetable Zhang could give them orders without politeness. If others spoke in this commanding tone, it is estimated that they all left NIMA.

Medical treatment, this thing, to be honest, is very bullying. A doctor should not only have high education, but also have done many operations.

Without education, there are many operations, and you can never get down the difficult operations, that is, cutting the appendix, circumcision and gallbladder in the past.

She has a degree, less surgery, knows everything and knows everything. She doesn't know what to do. This is a typical example of being able to do nothing at a glance.

It's indispensable. A leader said that medical treatment is elite training. In fact, this is bullshit. Elite NIMA has participated in the national examination. Who wants to learn this when she has nothing to do. That is, there is no way. Only those who can bear hardships and suffer can do this.

To learn medicine, we must first endure loneliness. We have been unknown for the first 20 years and keep trying. Maybe we are still unknown for the next 20 years. Even there is no cigarette lighter in the Department, because there are too many risks.

For example, the tutor was not selected well, the Department was not selected well, the director did not meet the right eye, the wife and husband did not combine well, and there were too many pits that destroyed the doctors in the past 20 years. These are all factors that may lead to the mediocrity of a doctor forever.

And endure poverty. Some people say that the doctor kicks back red envelopes every day, and NIMA says she should stand poverty?

In fact, that's right and wrong. Like every industry, those who can get to the front row are no worse.

But medical treatment is too tangled in the early stage. Five years before graduation, whether you are a doctor, a master or an undergraduate, you are an intern in the hospital, with a salary of two or three thousand.

Kickbacks? You can. The doctor can give you 500 a month, and you can smile happily.

After ten years of graduation, everything went well and worked hard. Everything was taken down, and then I was qualified to take kickbacks. As a result, the director changed his wife. The director said: brothers, brother, I'm really short of money recently. Your little sister-in-law is bleeding again. We should work together to tide over the difficulties, and then the kickbacks are gone!

Therefore, those who are capable of reaching the top of the industry, or the top of medical care in a province, are almost more tenacious than those with high Eq. However, there are exceptions, such as those with people behind, but there are few such people after all.

Moreover, before getting on the bus, the two directors of general surgery thought it was too difficult for Zhang Fan to take down the operating table alone. As a result, now they know that they don't intend to be general surgery at all. They are directly doing chest surgery!

The two directors looked at each other and could see a sense of NIMA not too scary from each other's eyes.

In the past, they only knew that Zhang Fan was born in orthopedics, studied under Lu Lao and was a disciple of the ancestral generation. Because the operation is accurate, it is said that the green is better than the blue, and he has mastered the knife technique of Qiu sect. I seem to have vaguely heard of Zhang Fan, who seems to have made some achievements outside his brain.

However, these are all hearsay. They feel that Zhang Fan is already very good at general surgery and orthopedics.

As a result, when NIMA went to the operating table today, she would still be out of her chest!

That's scary. However, it's just a surprise. It's like a man shivering. It can't last too long. It can't stand it for too long.

The general surgery on their side is also relatively difficult, and the irregular abdominal injury is a little tricky.

They came up and faced the opened abdominal cavity. To tell the truth, they were a little stunned.

How can you say this thing? It's like a beautiful woman. You know it, then you think about ways, and finally you change clothes one by one. In the later procedure, if you are a man, you don't need to teach. You can naturally find the way, but there is a difference between fast and slow.

But as soon as you enter the door and open the door, you suddenly see a naked opposite sex standing in the room. At this time, don't mention the novice. Even the veteran won't think about the road, but how NIMA became like this. It won't be a psychosis!

Therefore, when they were about to look at one side again, Zhang Fan said: "there are about three to four injuries in the terminal of the ascending colon. The breach is plum blossom, and two arteries are ligated. Both are smiling arteries.

However, the patient had too much bleeding during the car accident, resulting in shock and unclosed blood vessels! "

Zhang Fan, while performing extrathoracic surgery, explained the situation of general surgery.

As soon as the two directors heard it, they understood and knew the context of the disease at once!

The operation began.

The two directors also played their tricks.

In the other operating vehicles, the scene was similar. But it's not as serious as Zhang Fan, nor as surprised as Zhang Fan.

Especially outside the brain.

Outside the brain in the northwest, not to mention the brain in the northwest, that is, outside the brain in China, in addition to large hospitals, once the level of hospitals drops a little, the level of doctors

outside the brain will drop step by step.

To the county-level hospital, to tell the truth, there is little difference between extrabrain and non brain. People's emergency department can do things outside the brain. What the emergency department can't do, they can't do it outside their head.

Therefore, the two directors who entered the operation vehicle operated with Xue Xiaoqiao and Dai Yuhang. Even discuss with each other. Because the difficulty outside the brain is unknown, not known. Without the support of a strong medical laboratory, the most outside the brain is a head smashed by a beer bottle!

In the operating room, everyone has started the operation in a nervous and orderly manner.

Very harmonious, just like a family, men earn a lot of money and take care of their family, while women are warm and considerate, and harmonious.

Outside the surgical vehicle, it's different. Whether men or women, up or down, there is a sharp edge in their words. Looking at everyone laughing more politely, it is estimated that the other party wants the other party to hang!

This is probably the difference between natural science and social science!

"Dean ou, hard work, hard work!" The leader in charge of health trotted to Ouyang's side, just as subordinates greet their superiors.

Because of this attitude, sometimes it is very important. It was several steps late at the beginning. Now we must catch up with the change. Otherwise, when we get on TV and let our superiors see it, we will not mix up in the future.

"No hard work, no hard work, this is what we should do." Ouyang said very low-key, but he held the leader's hand and kept looking at the camera, which was a little too much.

The leader in charge of health thought that the people on the side of tea vegetable owed a lot. Now, looking at Ouyang, he couldn't wait to put his face into the camera. He kept feeling that the president of NIMA's hospital was too bullshit.

"The president of the European Academy is really hard, and he doesn't call in advance so that we can make preparations. That is, today everyone is here to prepare for the big competition, and all the personnel are there. Moreover, I called in advance to stop all the operations in the operating room.

Otherwise, you're here. The directors are in the operating room. How dangerous you say! " The president of the Central Hospital said from the back.

"Originally, we wanted to inform, but there were too many patients, otherwise we would have notified

in advance. As for the danger you said, you really worried about it wrong.

From dozens of kilometers, people are fine. When they arrive at such a frontier capital, will there be problems? You underestimate our Frontier Medical System! " Ouyang has sharp teeth and a sharp mouth. He likes to quarrel with others.

When no one quarrels with her, she grinds with herself. In this case, can she spare others?

That's bullshit!

If Zhang Fan were here, it would not be like this. This is the difference between people. If you don't hate him, he still thinks that tea vegetable is easy to bully.

But it hurts too much. It also makes others feel that tea is not easy to deal with. This is the same as people. You can't be too soft. If you're soft, you can't be ridden. But you can't be too hard. Others don't want to play with you!

Several deans looked at it and couldn't provoke it! Everyone stopped talking.

On the scene, one by one smiled at each other, but NIMA could make people feel cold when she walked in.

"Wait a minute. After all, we are a medical unit. Saving people is our bounden duty. For other things, wait a minute!" The leader in charge of health spoke.

.....

On Zhang Fan's operating car, Zhang Fan has finished the operation outside the chest. Chest trauma is difficult to deal with, but it is not as big as outside the brain.

But one thing they have in common is that they recover very slowly.

For example, in the early years, someone fell from a height, such as an electrician from a wire pole, or a bricklayer from a house.

Then fall straight on your back. At that time, there was no trauma. The bones were good, and even the skin was not broken.

But people have difficulty breathing, and their choked faces have become eggplant color. Sent to the hospital for treatment. After a period of time, the patient has been coughing.

But the video data and experimental data show that there is nothing wrong with this man. Everyone thought the man was pretending to be ill.

In fact, it's not. It's a lung injury. The lung tissue can be understood as small bubbles like small pearls gathered together and put into plastic bags.

After the fall, the liquid between these small bubbles fell out. It seeped out of the plastic bag.

The amount is not large, but it's like a car without oil. If you can run, you can run, but the friction becomes larger.

This kind of damage doesn't last for several years. It doesn't work at all. So for this kind of trauma, Zhang Fan handled it very carefully.

Chapter 1385

In the meeting hall, the leaders were also very tangled. Let's dissolve. It was not easy to gather doctors from various hospitals and say that doctors in provincial capital hospitals are idle. This is simply looking down on frontier provinces. It can be said that doctors in the mainstream departments of the provincial capital third-class hospitals have almost no leisure.

Don't break up. It's really hard to stand here and listen to Ouyang grinding his teeth with a group of people. It's a shame for a group of people to say openly and secretly that they can't be a woman. Obviously, this woman is a dozen n players. A bunch of goods have to come forward and find it uncomfortable. She really likes to eat and play.

Looking at the rhythm and state of this group of people, the leaders in charge of health are relieved. At this level, it is impossible to dig a hole for themselves! The leader in charge of health glanced at the president of the central hospital.

Listen to each other's words: President Ouyang, why are there so many surgical vehicles in your hospital, and it seems that they are not uniformly distributed by the state. Is this illegal.

The leaders in charge of health despise this one. Even if you give each other eye medicine, NIMA, don't ask about it. The operating car is not Ouyang's own. As long as the hospital has money, the state doesn't care what people like to buy.

You are so pure that you can pass the steps to others and let them stand high to show off!

Sure enough, Ouyang smiled and said, "ouch, although our tea vegetable hospital is located in a remote

area, our doctors are skilled. Therefore, these surgical vehicles are not only distributed by the state, but also donated by foreign patients, but also supported by cooperative hospitals!

Although we are not in the provincial capital, we have not forgotten self-reliance, striving for strength, let alone... "

Looking at the green expression on the face of the president of the Central Hospital, the president in charge of health secretly shook his head.

How did NIMA get promoted to the position of dean. Whose brother-in-law is it?

In fact, it's not that people's level is low. It's mainly because they just feel that they have the opportunity to lose an adult in the tea vegetable hospital.

As a result, he was taken by surprise, and then he was suppressed by Ouyang from beginning to end. For a moment, he was confused. As soon as he was worried, he felt more and more out of standard.

I can't help it. When I meet Ouyang, who is either quarreling or on the way to quarrel, it's bad luck for them.

The leader in charge of health couldn't help but interrupt and said, "Dean, since the tea vegetable hospital is still undergoing surgery, we can't wait like this. Why don't we settle down the doctors in the venue first."

He didn't say the dissolution was over. Because he said to dissolve and settle down, there will be a second gathering at that time, which is very troublesome.

He doesn't want to be called a swollen leader, so he wants others to say.

As a result, the goods who had a quarrel with Ouyang and whose IQ was all below the level returned to the normal level one by one after hearing this.

"Leadership, what do you mean?"

"You decide!"

"Yes, it's up to you to decide. We came from tea vegetable. Although there is a distance, we listen to the command and the team of leaders!"

This NIMA, "or wait! You talk first. I'll go and make it convenient! " The leader in charge of health was so angry that the pot in his stomach opened.

The operation went on very quickly. In a third class hospital, this kind of traffic accident trauma can not be regarded as a difficult operation.

As long as the patient does not reach the point of organ failure, there is a great chance of being cured.

More than half an hour later, all three patients completed the operation. After the operation, if it is impossible for the patient to continue to be hospitalized with tea, the principle of proximity must be followed, and other patients entered the relevant departments early.

The last three wounded became the focus of attention. When the surgery door was opened, all the cameras gathered near the three surgery vehicles.

The first one out of the operating car was the uncle of sheep. The operation was very successful. After the horse was frightened, he fell from a high place and landed on his head. The patient was unconscious at that time.

And now, although his head is wrapped like a San, he is sober.

"Can we interview him?" The female reporter asked Xue Xiaoqiao with admiration.

Xue Xiaoqiao said in an outsider's proud tone: "yes, but only three words at most!"

In fact, this makes sense. Patients with other operations do not hurry to wake up after the operation. They often wait for the natural decline of anesthetics, but craniocerebral surgery can not. They must wake up after the operation. Because you have to see how the operation works.

Some craniocerebral operations, especially in important parts of the brain, often wake patients up. For example, to use a knife in the language center, the patient is forced by the doctor to sing and frighten the doctor to cut in his brain with a knife on the operating table.

Therefore, the grazing uncle was awakened early, but he was still very weak.

"Hello, I'm a reporter from bird city TV station. How do you feel now?"

"Cows and sheep were all touched by the white car. The sheep is still in the stomach! "

The uncle was almost crying.

The driver came down for the second operation. The situation of the driver was serious at that time, and his left body was stuck in the deformed carriage, which directly became iron meat.

The speed was too high. It was estimated that it was definitely over 140 at that time. It was a great loss, otherwise it would really fall into a box.

When the camera was aimed at the driver, the driver was not awake.

The reporter can only take a shot, and then the doctor and nurse quickly took him into the inpatient department of the hospital.

Although the Central Hospital, in several large hospitals in niaoshi, has taken the official road, generally speaking, it is still the top three in provincial management, and its professional quality is still very good.

When Zhang Fan's surgical vehicle opened the door, the last and most serious wounded lying on the flat car finally came out.

"Dear viewers, dear viewers, the last casualty of a major traffic accident on niaocha finally got off the operating vehicle. Although a large number of people were injured, they were rescued by our front-line doctors.

Fortunately, all the wounded successfully completed the operation. Now the last wounded has got off the operating vehicle. After the accident, the situation was very urgent. The convoy of our tea vegetable hospital just passed by.

With the full rescue of doctors and nurses, we got the best results we all expected. Now please take a look with me at the last and most serious wounded.

Here, I would like to remind you that the autumn transition season is coming. All drivers driving on the expressway must pay attention to the road conditions and avoid such accidents again. "

When the patient pushed out of the operating vehicle, we also understood that the wounded was really serious. After the other wounded got out of the operation, they just hung drops, and this one still hung a breathing mask.

The reporter didn't come forward this time, because he felt very serious when he looked at this posture.

Just as the wounded was about to pass through the crowd and enter the inpatient department, the female patient gently raised her hand and kept waving. Her weakness was like a dog tail grass in the wind.

"What's the matter? Are you holding your breath? Where is it? " The man who was pushing the flat car was very fast, but he stopped at this time.

Zhang Fan also followed, looking at the patient and the patient's life monitor.

"The heart rate is a little fast, but nothing else is abnormal!" The director of the first affiliated general foreign school whispered to Zhang Fan.

The reporter quickly aimed the lens at Zhang Fan at this time, because she also saw it. Although the doctor was young, all the other doctors and nurses looked at him. It was estimated that the doctor was the chief surgeon.

Zhang Fan looked. Although the heart rate is high, it is not a pathological condition, and the blood oxygen saturation is also good.

Then look at the patient's expression and look anxious.

Suddenly, Zhang Fan understood!

"Child? It's a child, isn't it?" Zhang Fan asked.

The patient couldn't speak with his mask on. When he heard Zhang Fan talking about his child, the patient was even more worried.

Struggling to get off.

Nima frightened a group of doctors and nurses around. Just after the operation, she struggled again and broke the suture in her body, but she was dying.

To tell the truth, the patients themselves are like this, half their lives are dying, and they are still thinking about their children. Really, that is, the mother can do it.

This is the so-called mother is strong, mother is just!

"Don't worry, don't worry, the child is good, the child is good, don't struggle!" After Zhang Fan finished, he turned back to Ma Yichen.

"Ma Yichen, where's the child? Where's the child for you!" Zhang Fan shouted loudly.

"Come, come, the child is coming!"

When Zhang Fan got out of the operating car, Ouyang let a group of presidents go. She didn't grind her teeth. I heard Zhang Fan shouting for children.

The old lady took the sleeping child down from Koster. The child began to be frightened, hungry, and then left her mother.

The child is exhausted. Although there is no milk powder in the car, can it be difficult to live in a medical team?

The motorcade driven by Lao Chen can become a second-class first-class hospital. If you are hungry, you will be ashamed of a child.

What is the concept of a class II class a hospital?

In this way, when the state promoted the major upgrading of county and township hospitals in the past 15 years, this grade II grade A did not have this scale in many counties in the northwest region.

Therefore, the children on Koster, in the proportion of a group of professional laboratory technicians in the laboratory department, mixed a portion of protein powder with various water-soluble vitamins, and then added a little glucose and normal saline.

A nutritious meal is out. What the child eats is strange. It's not delicious. It's slightly sweet. It can be said that it's delicious. How do you eat it? It feels like there's something missing.

But fortunately, the child hasn't eaten any supplementary food and is very hungry. He still eats a round belly.

Then in the hands of a group of female doctors, he washed the child's face with cotton dipped in normal saline.

Let the child with blood on his face become a white and tender baby again.

When the patient saw the sleeping baby, his face was finally not anxious, and his heart rate finally came down. The slightly raised corners of his mouth and the grateful eyes of the doctors made a group of stone hearted doctors feel a kind of moisture.

.....

"Do you need a rest? If I need a break, I'll suggest to the organizing committee to postpone the competition!" Ouyang whispered to Zhang Fan.

Zhang Fan took off his mask and hat, then turned and looked at his medical team.

One by one, although covered with blood, the spirit is excited, "are you tired?" Zhang Fan asked loudly.

A group of young doctors answered loudly: "not tired!"

"Can you still participate in the competition now?"

"Yes!"

Really, Ouyang didn't expect that the momentum of the team was like a rainbow!

In fact, this is the performance that adrenaline has not been consumed!

When the leaders of the Central Hospital looked around, the deputy chief physician looked around. NIMA, a group of little tigers!

"OK, let's start!"

Chapter 1386

The doctors of the tea vegetable hospital had just had an operation, and then hurriedly took a bath, and then changed into the clothes that Lao Chen bought to replace. Lao Chen went in a hurry, regardless of whether it looked good or not. Anyway, it was a big bag.

Because everyone was ready to go back that day, they didn't bring their clothes. As a result, they were in a car accident and had no way.

Xue Fei was unlucky. He looked at a few crooked characters on his clothes: if you don't accept it, hit me! Xue Fei has to chase Ma Yichen to change. Of course Ma Yichen doesn't want to.

Anyway, everyone looked at the words on Xue Fei's chest and couldn't breathe with laughter“ Chen Yuan is the same. Public money can't be so wasted! ”

"Oh, I'm sorry. It's my fault. The time is too urgent. Just make do with it. No one can really hit you!"

Lao Chen said with a smile. The main reason is that the time is too tight to jump. As a result, the non mainstream has got one!

Ouyang is busy going to the organizing committee to see the rules of the martial arts competition. She likes to do such things. Originally, Ouyang wanted Zhang Fan to go, but Zhang Fan was not very happy. Ouyang scolded and took Yang Hong to the organizing committee.

To tell the truth, Zhang Fan is a little embarrassed if he enters the organizing committee, because everyone is the boss in terms of official identity in the organizing committee. Don't look down on the second child.

Zhang Fan is not only the Dean, but also an expert in the frontier expert library, but also a nominated outstanding youth.

But if you talk about internal identity, Zhang Fan will be a little embarrassed. Others are at least Zhenggao, that is, the so-called chief doctor, the chief doctor of the provincial third-class hospital, if it is classified into the school, that is, the professor level.

But Zhang Fan is hospitalized. If it weren't for old man Lu, who made Zhang Fan a graduate hat, Zhang Fansheng would still be in charge for some time.

But after having a graduate student, he put on the hat last year. Now, as long as he waits another two years, Zhang fan can take the test.

Originally, Zhang Fan also wanted the teacher to get himself a doctor's hat, but the old man didn't know what to think, so he just didn't get it for Zhang Fan.

Zhang Fan said that he didn't work hard all day, either to get orthopedics or skin. In fact, the old man means that if you get some results in general education, the doctor will come, but Zhang Fan is now in the system. After the primary pit of general education climbs out, he has to climb other pits.

He can't help it, but he can't explain it to the old man. So the old man thought Zhang Fan was uncertain and too young.

Therefore, Zhang Fan didn't go to the organizing committee, but changed clothes in the hotel with a group of colleagues and prepared to have a casual meal.

Originally, the competition was held in the afternoon. As a result, because the tea vegetable hospital came late, it could only be held in the evening.

But Zhang Fan, they haven't eaten for almost a day. Ouyang is the kind of person who is not hungry if she doesn't eat as long as there is a struggle. Looking at Chen Hong who follows Ouyang, she is also a menacing posture. Zhang Fan thinks that this little young woman is still young. It is estimated that it will be another Ouyang after decades!

"Let's have something to eat in Zhang Yuan. It's a little early for lunch now. It's too late for lunch." Lao Chen asked.

If you meet other leaders at this moment, it is estimated that you will say to eat casually, review well, train well and prepare for the martial arts competition in the evening.

Even if the subordinates curse their mother in their heart, they have to choose among instant noodles such as braised pork, seafood, big bone, pickled cabbage and so on.

But not when we get to Zhang Fan. As a last resort, he doesn't eat instant noodles now. He probably hurt himself in those years.

Moreover, the tea vegetable hospital has spent so much to let doctors study. Of course, this is the unified caliber of Zhang Fan and Ouyang. In Ouyang's words, doctors should have a sense of guilt, otherwise they don't study well.

Zhang Fan thinks, yes!

So, it's been a day now. How can I eat some casually.

"Let director Xue treat you." Wang Yanan jumped up and shouted.

Then a group of young doctors began to coax. Xue Fei, a bastard, had no money in the past. Because he was paid every month, he gave it to three young women in the mahjong room.

Later, mahjong was not played, but NIMA became more and more angry. Zhang Fan took the stethoscope equipped by Siemens. He thought of a way to get one with someone else's pharmaceutical enterprise. Although it was not specially made, it was also relatively rare.

Zhang Fan drove a cool Luze, so he got a hanlanda. Anyway, everything is better than Zhang Fan, but it's a little lower.

Once someone asked why he didn't get the same version. Xue Fei twisted his nose and crooked his eyes and said: Dalang's experience tells us that the conditions are not enough, don't match it!

Besides, not counting Zhang Fan, he is the youngest deputy director of the tea vegetable hospital, but this guy's deputy director, people outside the hospital don't understand, but people inside the hospital know how he came and how he slept.

So especially for young people like Wang Yanan, who are arrogant and can't catch up with Xue Fei, they are jealous and jealous of Xue Fei!

"Don't quarrel, don't quarrel. The boss hasn't spoken. You're chattering. Is there any organization and discipline?" Xue Fei looks like a leader. Wang Yanan is angry. They are grinding their teeth.

"Oh, come on, everyone is really hard today. I invite everyone to have a big meal, eat and drink enough, have a good game in the evening and earn us a face. Even if we come from a small city, our technology is no worse than that of the capital!

Do you have confidence? "

"Yes!"

A group of people, laughing.

"Just have confidence. I'll go out today and have a good meal!"

I don't know whether Zhang Fan is greedy or really wants to give everyone a strong walk. Anyway, Zhang Fan picked up the phone and began to dial the number.

"Mr. Zhao, are you busy. I came to the bird market. "

"Ouch, Zhang Yuan has come to the bird market. Where are you now? I'm free. If you're not busy, I'll pick you up. I haven't seen you for a long time. I miss you!"

The boss of blue and white got through the phone. In fact, he was in a meeting. When the secretary brought the phone, Lao Zhao also looked at the long legged secretary.

But as soon as it was Zhang Fan's, the meeting didn't open. He directly stood up and went out of the conference room, making a group of people think Lao Zhao answered the phone of the big leader.

Zhang Fan seldom contacts these bosses at ordinary times, that is, during the Spring Festival, people take the initiative to send a message or something. Zhang Fan returns when he is free and when he is busy, the festival is often over.

If there is no accident today, Zhang Fan will treat, but he won't make such a big fuss. At most, he can find a better buffet or rinse hot pot.

But today, if you say shameless words, everyone is a hero. Although this is a natural responsibility, leaders must be considerate of their subordinates.

That's why I asked for someone.

And as soon as I looked, I found a very powerful person in the frontier. An enterprise that can engage in energy in the frontier is not powerful!

"Well, my colleagues and I came to the bird market to participate in the competition. It's not something. It's the wrong hotel. I want my colleagues to eat something good. I think of you!" Zhang Fan said with a smile.

"Hey, what a big thing, it should be, it should be. If you don't call, I'll be angry. Where are you? I'll send a car to pick you up now. How many people. Are there any taboos? "

A big boss has to worry about whether Zhang Fan's colleagues have any taboos. Really, some people can succeed, not necessarily luck.

Although Zhang Fan is the president of a hospital in a frontier area, this is a serious resource. People see it clearly and think clearly.

Before long, a Mercedes Benz business drove into the hotel next to the hospital.

Boss Zhao personally picked up Zhang Fan in the co pilot. He attached great importance to it. If Zhang Fan was alone, it was estimated that he would send his own car. People may not come back, but today Zhang Fan took his subordinates. He directly suspended the meeting and then picked up the people in person.

"Come to the meeting?" After seeing Zhang Fan, Lao Zhao was very friendly. There is no strange feeling that I haven't seen for a long time.

"Not to participate in the big competition of the medical system." Zhang Fan holds Lao Zhao's hand.

At the beginning, Lao Zhao found a liver tumor, the sky fell down, and NIMA made money into figures, but she couldn't enjoy it.

At that time, the capital of Lao Zhao was magic capital, and golden hairs ran everywhere. At the beginning, Lao Zhao thought he would have a master.

As a result, it can be done, but most of them are not guaranteed to get off the operating table.

Some people recommended the ancestral disciple. Old man Lu sealed the knife. At that time, old Wu didn't do this difficult operation because he was too old.

Then recommended Zhang Fan!

As a result, when he saw Zhang Fan in the frontier, his heart was cold.

Because he is too young, the young man is not as old as his own son.

Results of the three liver tumor operations, Zhang Fan did them all safely.

Lao Zhao just got on the operating table. Then the postoperative review, tumor cell resection!

At that time, after the operation, Lao Zhao felt that NIMA days were blue.

For him, Zhang Fan is equivalent to giving him a second life.

Therefore, even if he has recovered, he still attaches great importance to Zhang Fan.

"You all led a team to compete in martial arts. Isn't this bullying?" Lao Zhao said with a smile while greeting other doctors.

"I'll go. Is this the richest man in the frontier? Our boss is so awesome. We all know the richest man, and we have such a good relationship! "

"Yes, the boss is usually silent. I didn't expect to have so many contacts!"

"What is this? You haven't seen the boss go to the magic card. The big guys from all over the devil and ordinary foreigners lined up to invite the boss to dinner. It's not cow force. It's nothing! "

Xue Fei is like a senior student popularizing science to a junior student.

At that time, he was studying in Mordor. When Zhang Fan went, his martial brothers invited Zhang Fan to dinner. At that time, he took Xue Fei with him. Xue Fei's eyes were straight. NIMA almost hung her name on the textbook.

The one who is not in the teaching book is also the general foreigner boss of a large hospital. It seems that those who are not the general foreigner boss are embarrassed to come out and greet Zhang Fan!

The young doctor who usually comes out less with Zhang Fan feels like NIMA bragging again.

But think again, it seems to be the same thing.

Otherwise, in any hospital in the capital of magic capital, if you want to study, you can study. Without this ability, can tea vegetable hospital be so awesome!

Chapter 1387

"What about the doctor team of tea vegetable? I can't see them anyway. It can't be that our dean has made a hard stool in the hall! "

"I didn't see it. I guess I was taken out to sit on the hard bench. Hei hei, our dean is still very careful. He was humiliated and asked people not to enter the conference room. It is estimated that instant noodles will not be sent! "

"What do you know? Although it's a packet of instant noodles for three yuan, it also represents a qualification. A kind of recognition. Do you understand? Look here. Look, which one is attached to one, the one who eats ham in the distance is attached to two, and there are attached to three. Have you seen the tea vegetable? Have you seen doctors in other areas?"

If it's not the third class hospital in bird City, our president won't entertain it! "

Several young doctors gathered together to eat instant noodles. Unexpectedly, someone ate class and pride!

Normally, how can we be proud of a rotten instant noodles? It's good not to complain, but after comparison, sometimes it's true.

For example, when the state invited young volunteers, then a classmate sent a picture in the circle of friends, carrying instant noodles and feeling that he was too busy. He could only make do with some instant noodles, but his busy life will not live up to time after all.

Then the background wall behind you is the picture of the great hall!

It's OK to be so proud. But NIMA is a rotten venue in a rotten hospital, which is a little too much.

"Come on, add an egg. The dean said that he paid out of his own pocket to add nutrition to everyone. When you are full, you will have to refuel later!"

Doctors in the bird market sweat a little on their brows when they eat instant noodles. It's too hot. There's no air conditioning in the venue and there are many people. However, compared with the hard benches outside, the benches inside are still padded, and there are no incoming and outgoing patients.

Um! The treatment is still good.

People are like this. Once they have a comparison, no matter whether they are in the fire or in the oil pot, they will be comforted as long as they are worse than themselves.

It is estimated that Lao Zhou's complex of writing jokes about ah q had a lot to do with his medical study and being ridiculed by his classmates.

Eating at the meeting, I suddenly found that the atmosphere was wrong.

Originally, such a large number of dinner, no matter what you eat, will eat in full swing, talk, laugh and

fight. Originally, this atmosphere suddenly became silent. Even some people have thrown their eggs on the table.

In particular, the round egg yolk was bitten, and the gap was like a big mouth laughing at others.

"What's the matter?" A doctor in Annex I felt something was wrong with his colleagues.

"See for yourself!" As he spoke, the man handed his cell phone to the colleague who asked. The man ate carefully, didn't look at his cell phone, and then took a look at his cell phone.

Nimatton thought instant noodles were awful.

A video is being sent in a QQ group.

The characters in the video are not stars. Mr. Chen takes photos, let alone doors. It's the tea element medical team they just laughed at.

In the video, there is a hall. Although it is a video, you can also see the vastness of the hall from the video.

"Isn't this NIMA Sheraton! Isn't this NIMA's medical team? When was it taken? " He also had an expectation in his heart. He hoped that this was the previous video and that this was the past video sent out because the tea vegetable team members who could not enter the conference room were angry.

"Just shot! Look, look, the man in the video hit me! He wore this dress for a few days. A female doctor in our department said it was wonderful! "

"Well!" The braised instant noodles are really a little sour.

In the video, everyone was laughing and laughing, especially the one who didn't accept the beating. She smiled angrily. Next to her stood a tall beauty with a good temperament like a star. She even stood aside to clean the plate for this guy.

This NIMA is too angry and arrogant.

Look at the dishes on the big and surprising table. It makes people angry.

In the middle is a roast whole sheep, and then all around NIMA are hard dishes, big crabs, big shrimps with thick arms, cold water fish and small suckling pigs. Only you can't think of them, and no one can't eat them.

"Before August 15, the crabs should not be yellow. Zhennima has a bunch of buns!" The blabbering guy commented.

"Who sent this video?" He asked curiously.

"The people in the group said they forwarded it from the circle of friends!"

Originally, it's Lao Li FA's circle of friends. After Li Cunhou won the title of academician, he came to chasu. His former colleagues and classmates made all kinds of mockery of Lao Li, which means that Lao Li had no vision when he ran to SHANGUAN overseas.

Therefore, this time Lao Li thought that he should send a circle of friends to let everyone see. The frontier is not bad.

His former classmates and colleagues didn't know what to think, but after all, he was the only academician in the frontier medical circle, so many burn doctors in niaoshi took the initiative to add his friends, and then the video was forwarded.

For a time, there was a lot of acid gas in the venue of the central hospital.

"Why do they eat a big meal? Let's eat instant noodles!"

"Why are we sitting on the broken bench in this? They go to the luxury hotel!"

"Yes!"

"What does it mean that the NIMA organizing committee favors one over the other?"

A group of people pointed the finger at the organizing committee. Yes, we usually save people. Why do people eat a big meal to save people? Although we didn't save people today, NIMA can't fool people with instant noodles.

Not even with eggs!

"No, it's not fair." I don't know who shouted in the crowd.

Then, like a fuse, "just, no, let's find leaders to comment."

This is a female doctor.

Then it was lit. Everyone put down instant noodles and plastic forks to find leaders.

This thing, one or two, no one will go. Once there are more people, NIMA will become a climate.

At this time, someone shouted, "it's probably not arranged by the organizing committee. Don't you think this is the richest man in the frontier? You see, the young Dean of tea vegetable makes a toast. You see,

NIMA's brand is big enough to serve tea!"

Then the second video came again! Lao Li usually likes photography and even has a hobby with Mr. Chen. Of course, Lao Li takes pictures of mountains and rivers, which are different from Mr. Chen's mountains and rivers.

"Red Star Maotai, red star Maotai doesn't drink. It's a pity!" People with good wine. Looking at the wine bottle in the video, the saliva came down.

"Hey, the richest man entertained me. That's not what the organizing committee can arrange. You say how can this one eat so deeply? He has only been in the frontier for a few years. How can he even have such a good relationship with the richest man. "

Someone asked curiously.

"You're an orthopaedic, of course you don't know. At the beginning, the richest man had a bad liver. He found many doctors and hospitals. Finally, Zhang Fan opened a knife in our hospital! " A general practitioner in Annex 1 said with a little pride.

Although the chief surgeon is Dr. catechin, we still have to do it in our hospital. Our hospital is well equipped! Maybe that's what it means.

.....

Zhang Fan of the hotel smiled and chatted casually with Lao Zhao.

To tell you the truth, Zhang Fan doesn't particularly like this kind of hotel food. This thing is just for watching. It's really not for eating.

For example, this roast sheep is estimated to have been roasted long ago, and then go back to the oven and brush some oil. It looks smooth. It's actually the same thing to eat in your mouth. There is absolutely no delicious food baked and eaten in the bag pit.

Moreover, this environment also makes doctors who rarely attend this level feel a little constrained.

There are beautiful women in cheongsam standing around. They are ready to clean up everything for you at any time. When you say wipe your mouth, people will smile and gently brush your mouth without a trace of surprise.

But this treatment may not be enjoyed.

Xue Fei, for example, put his chest against the table and was deeply afraid that the beautiful woman would see a few big words on his chest.

There is also Wang Yanan. From time to time, he looks at the big white legs of people's cheongsam.

Zhang Fan is not used to it, but the food is too general, and all the good things are wasted. Zhang Fan turned over the cold water fish unfortunately.

She muttered in her heart, "NIMA is so wasted! Steamed for a few minutes. The meat is a little old. "

"Mr. Zhao, you should drink less wine at ordinary times." Zhang Fan took a sip of tea and didn't let Lao Zhao dry the wine in the cup.

"I'm sorry that you're here and you can't have a banquet without wine. Usually I hardly drink. Now, health is serious wealth, and everything else is floating clouds! "

"Your realm is still high!" Lao Chen held it. Otherwise, it would be a little unreasonable for Zhang Fanpeng.

"Hey, it was Zhang Yuan last time..."

"Oh, why does president Zhao always mention that? All right, let's hurry up and have a few bites to live up to president Zhao's heart."

"The time is too short to prepare. Everyone will make do with eating. When your martial arts competition is over, I'll treat you well. I don't want to invite you on weekdays. I can give you face this time!"

Lao Zhao smiled and said to everyone that he chatted with Zhang Fan and didn't leave others behind. The level of Flowing Clouds and water is sufficient.

.....

Ouyang also saw this video in the central hospital. The old lady smiled bitterly, shook her head and explained to the leader in charge of health, "the dean is a eater. She took a group of eaters to find delicious food.

If everyone wasn't too tired today, it's estimated that Zhang Fan wouldn't be like this. "

In fact, there is no need to explain. The leaders in charge of health have raised Zhang Fan to another level of concern.

"Is the legend true? Lao Zhao has a lot of eyes! "

In fact, as the old saying goes, people look at people, look at clothes, and look at your appearance.

What connotation, inner, these are things after communication.

.....

After eating and drinking well, president Zhao sent Zhang Fan and them to the central hospital. As soon as they entered the venue, Zhang Fan felt that NIMA's atmosphere was particularly wrong.

The hall is full of sour smell, which is really sour“ Instant noodles, some people eat pickled cabbage instant noodles! ”

Xue Fei twisted his nose and explained to Zhang Fan.

Can't Zhang Fan smell instant noodles. It was mainly the president of the central hospital who looked at himself with a pair of bitter eyes, while the doctors in the meeting place looked at themselves with envy mixed with strange expectations.

Is it swollen? Zhang Fan wondered.

Chapter 1388

As for the eyes of the broad masses of the people, in fact, there is a kind of envy in their anger. Looking at Xue Fei with oily lips.

For a moment, the doctors in the meeting, especially the young doctors, suddenly had an impulse to make Zhang Fan the president of their own hospital.

Of course, as for the dean of the central hospital or annex II, it is a kind of murderous look at this time, that is, it can't kill people. Otherwise, it is estimated that Zhang Fan will have become dumpling filling.

"Zhang Yuan, no, you have to play!" The president of the Central Hospital looked at Zhang Fan with a smile and said hello.

In fact, there is a taste of ridicule in the words, which means that all you come are inpatients. You are also a inpatient. You can go too!

Ouyang didn't like it. The old lady stared at her and wanted to talk. The leader in charge of health was haggard.

His eyes at the director of the center were: NIMA is both delicious and in love. Aren't you tired!

Zhang Fan smiled and stopped Ouyang with his eyes, because there was no need to argue, "ha ha!" Then he simply smiled at the president of the central hospital. He didn't speak. It's unnecessary.

"Laugh, NIMA will laugh. Why don't you hate him!" Ouyang was so angry that he had white bubbles. But Zhang Fan won't let her quarrel again.

"Laugh, let you laugh, you won't laugh later!" The president of the central hospital made Zhang Fan smile as if he were despised.

"OK, now that all the teams are here, let's start now. It's been delayed for a day, and everyone is tired."

The leader in charge of health was pressed alive in the hospital today. He was really haggard when he watched several people quarrel.

"OK, let's start." Zhang Fan nodded. He also wants to end this competition early. When watching the publicity, it seems that everyone actively participates in the skill training. In fact, conversation is of little use to serious clinical practice.

That is, doctors show off their skills and leaders show up.

The contest begins.

First, cardiopulmonary resuscitation.

Cardiopulmonary resuscitation is a skill that not only doctors but also ordinary adults should master. With the advent of an aging society, cardiac arrest will occur more and more.

Of course, the training in this area is better, except for the hospital and the power department. The hospital's cardiopulmonary resuscitation index is to give up continuing resuscitation if there is no effect within half an hour, while the index of China's power department is 40 minutes.

Especially the employees in the front-line power sector, sometimes their recovery technology is really better than some idle doctors.

The core of cardiopulmonary resuscitation is artificial respiration, chest compression and early electric shock defibrillation.

In the past, the assessment standard of this kind of competition was actually very unreasonable. It was scored by the reviewers of the organizing committee. People thought that if you were treated successfully, you would be treated successfully. People thought that if you failed, you would fail.

Because everyone plays on rubber dolls, it's impossible to start with real patients.

The previous rubber dolls were really rough. Really, it's like directly from the mall, wearing beautiful fake models, taking off their clothes and sending them to the hospital. They can distinguish men and women, and have no other functions.

But now it's different, because dahui'an has a place and a county. The most powerful place for China to engage in pharmaceutical companies is not a magic capital or a fishing village in Jiangsu and Zhejiang.

But in a county of Da Hui'an, every family exaggerates that every house with a real estate certificate is registered with a company. Walking on the streets of this county, almost all over the world are medical representatives.

At the beginning, the county was engaged in medical representatives. Later, with funds, it was involved in the manufacturing of medical equipment. People's swords go sideways, and large instruments and equipment can't afford it.

Just take the path, what medical model, what bone shelf, what mannequin, what others do well, it really took a lot of effort.

For example, all the mannequins used in today's meeting hall were made by Da Hui'an County. The contact points were well done. The standardized action would trigger the green light, indicating that the rescue was effective. The non-standard action would trigger the red light, indicating that the rescue was ineffective.

This also makes many medical students, especially those who have just graduated and need to take the practice certificate, gnash their teeth at the county.

"Big competition, the first item is cardiopulmonary resuscitation. Now please put all groups in place!" In the Central Hospital, the head nurse presided over the contest.

In terms of appearance, to tell the truth, the head nurse is no less than a star. She has big eyes and a tall figure, that is, she doesn't wear a dress and no silk stockings on her long legs! Even under the white coat, it can't cover up the smell of an old woman.

I don't know why. One of the nurses attached to one, two, three and four is not as beautiful as the nurses in the central hospital. Is the appearance of nurses in health-care hospitals also conducive to the rehabilitation of patients?

Of course, it's hard to say what's going on here. I haven't seen some little nurses who graduated from technical secondary school. Suddenly, ten years later, they became something long.

Cardiopulmonary resuscitation, although the relationship between Xu Guangwei and Zhang Fan in Annex I is OK, it does not mean that they will release water on this competition. Annex II is even more unlikely. The rise of tea has affected the income of major hospitals.

If you can strangle early now, you will never let go.

Attached is the team led by the deputy director of the emergency center. All the five doctors are the teaching doctors on the emergency platform.

Attachment 2 is not bad. He is also led by the deputy director of the emergency department.

As for the Central Hospital, it is directly led by the director of ICU.

In the meeting room, the young doctor looked and his mouth opened.

"This NIMA is too exaggerated. Is this the first round for teachers to demonstrate?" The medical industry often breeds itself.

For example, in frontier hospitals, most medical students graduated from local medical universities. These doctors who had just graduated looked at the people on the martial arts competition field and were not surprised, because these were their teachers in class or teachers in clinical practice.

Today, I want to compete with the teacher. If I don't talk about technology first, it's difficult to pass the psychological level.

However, the tea vegetable hospital was not surprised. Even many doctors didn't know these people on stage.

Because the tea vegetable hospital does not mention China, even in the border areas, it is remote.

Although the natural environment is beautiful like a fairyland, the economy is not good. Where the industry makes Nang and the business depends on the hospital, how can it deceive the students in the province? Therefore, before Zhang Fan entered the hospital, almost all of the tea vegetable hospital were students graduated from provincial medical schools in other places, or students with poor family conditions in NIMA.

If the family conditions can be said in the past, who will come to the border.

For example, Xue Fei, from the north of Sanchuan, brought tea vegetarians with his wife on his back. He can go to work and get paid just for graduation.

For example, Wang Zipeng and Dai Yuhang are from other places.

Of course, there are also local ones, but after all, they are still a few.

"Who is the man of tea vegetable?" After seeing the people in the first scene of the tea vegetable hospital, everyone talked about it one after another.

"I don't know. It looks like a bad call! But I know Wang Yanan. When he could have stayed in the bird market, he had to engage in surgery or orthopedics in surgery. Several hospitals were unwilling, so he returned to tea. It is said that he is really an orthopedic doctor now!

I don't know the level of female orthopedic doctors. "

There are familiar and unfamiliar.

Xue Fei led the team. Although Xue Fei didn't have any classmates here in the bird market, it was impressive to wear the T-shirt that he refused to fight me. Although he was wearing a white coat and clothes, everyone still remembered what was on his chest!

"It is said that he is the deputy director of the emergency center of tea vegetable hospital!"

"Hiss!"

A group of air-conditioned people came, because many young doctors were going to graduate to apply for tea vegetable jobs. At this time, they said Xue Fei owed and was reported by others, but it was difficult!

From the 1st to the 6th, the martial arts teams in several hospitals were all in place.

On the rostrum of the venue, no one spoke. They didn't speak up if they had spoken up.

"What's the use of your hard mouth? You'll be soft later!" The president of the Central Hospital muttered in his heart and secretly glanced at Ouyang with his eyes.

Ouyang was also nervous at this time.

Because of the competition team in the venue, the doctors in their own hospital are young. Medical stuff, really eat experience.

However, Zhang Fan is not nervous. He drinks tea with the tea separation cup specially made by Lao Chen. He is very hungry during the day and eats a little more and oily at night. He will drink some tea and make it greasy.

As for the contest, he really hasn't paid attention to it.

When there was a beep in the venue, the game began.

In a group of five, they ran to the model for the first time. All female rubber models were plump.

"Start!" Xue Fei started with a sound from the tea vegetable side, and everyone performed their respective duties.

On weekdays, people talk and laugh, fight and even quarrel constantly, but when they start to work, especially when there must be leaders, whoever has a high professional title is the leader.

This is what old man Mao said in those days: tension, seriousness, liveliness and unity.

Wang Yanan touched the pulse and prepared to replace the external chest compression, the flower prepared the defibrillator, Xue Fei prepared the external chest compression, and Xue Xiaoqiao prepared artificial respiration.

"The pulse cannot be touched, rescue immediately!"

Almost at the same time, the six teams began to sound at the same time. Six groups of green lights are on at almost the same time.

This represents the first item of the team, and the pulse check is effective.

Then the chest compression starts at the same time.

High quality cardiopulmonary resuscitation focuses on external chest compression. Press hard and quickly to avoid interruption as much as possible. The interruption time should not exceed 10 seconds!

How to say, it is the same as the waist of a male dog. At this time, you can't stop. Once you stop, it will lead to brain hypoxia and brain tissue damage.

At the beginning, the six teams were almost the same. Each time they pressed the green light, it was no less than a second away.

But after 100 presses, each team is obviously different.

"I'll trade you?" Wang Yanan looked at Xue Fei who was sweating on his forehead and asked.

"No! Just finished warming up! "

Xue Fei, who was talking, started seriously at this time. His speed remained unchanged from beginning to end, his strength remained unchanged from beginning to end, and even his expression remained unchanged from beginning to end.

But up and down 100 times, only 30 times reached the G-point of the heart, which made the heart contract. This is equivalent to that the doctor pressed it slowly for 30 times in a minute, but it sent out the strength of eating milk.

It's like looking at the door and spitting. It's like trying to pull your clothes and break your thighs. In fact, there's no ending, just like sitting motionless.

The green flashing light lights up the most times behind the tea vegetable team, especially in the later stage. After the comparison with other teams, Xue Fei's rhythm and speed are obviously very good. The light can make people feel a comfortable rhythm.

"Xue Fei seems to have worked hard these two years." Ouyang whispered to Zhang Fan with satisfaction.

"Ha ha!" Zhang Fan didn't say anything, but there was a sentence in his heart, which was set off by his peers.

Ouyang said, turned his head, stared at the president of the Central Hospital, didn't speak, and just looked at it quietly.

This nimabi talks and makes the other party uncomfortable. Your vice high school, I took charge, but you couldn't beat me. Now I won't argue with you. I'll see what you can say now.

Ding Dong! An end bell, the rescue is over.

At the end of the three minute competition, the rescue team of tea vegetable hospital was the most efficient, followed by the comments of the expert group.

To tell the truth, in the past, the frontier organized big martial arts competitions, which were attended by inpatients, and the experts commented very easily. It's okay to say wrong. It's no problem to say mean, because the level gap between inpatients and chief doctors seems to be only three levels.

But if calculated by year, it will be almost fifteen or six years. So everyone is relaxed.

But this time it won't work. First of all, the major hospitals in niaoshi are deputy high schools. If these people don't do well, they will be the successors of the director in the future.

The experts of the organizing committee looked at each other. Everyone saw the trouble of this comment from their eyes.

Not only the following contestants are vice high, the most important thing is that they lost the competition! It's hard for NIMA to say.

There was a bit of embarrassment at the meeting. The leader in charge of health quickly asked the host to take the stage. The head nurse who presided over the meeting looked, "next, let's invite Wu Tianhao, chairman of the first aid association of Frontier Province, chief physician, to comment on each group."

Dr. Wu smiled awkwardly. It sounds very famous. He is the chairman of the first aid association of Frontier Province. In fact, just like the status of the emergency department in the hospital, the emergency association is also an embarrassing existence in various medical associations.

Other associations, pharmaceutical enterprise sponsorship and company support, often get as high a level as the opening meeting can be. The doctor speaks on the stage. According to the level, the most common is 2000. Just say a word and say something about the recent research.

If you don't have the face to talk about the weather, people also give money.

For high-level doctors, money is given to middle-level doctors. For example, gifts are given to doctors from the main doctor to the deputy high school. If you have a doctor friend, you can go to their house and see what USB flash disk and tableware can't be used up.

For doctors under the main treatment, such as residents, they sell credits cheaply and manage good meals for a few days.

The more popular the Department, the higher the level of this association. For example, the first was orthopedics, followed by intervention, and then tumors have risen in recent years.

Of course, the emergency association is bleak.

The director looked awkwardly at the team of his own hospital and several hospitals in other bird markets, and then said: "this CPR group competition is more elegant, professional and the quality of our emergency doctors.

Not actual combat, but better than actual combat.

All teams have come up with better skills than actual combat. There are experienced teams and young and energetic teams. They represent the highest level of first aid in our frontier.

Although there are many shackles and difficulties in the development of emergency medicine in all

aspects, talent training is more difficult than other departments. And no one wants to come to the emergency department.

Many young graduates went to the hospital and resigned when they heard that they were going to work in the emergency department. Comrades, our emergency department... "

Director Wu Tianhao can also fool. He also knows that it's not good to comment today. He simply opens his mouth and praises. After praising, he begins to pour bitter water. The doctors below are laughing and laughing. The leaders in charge of health are toothache.

Moreover, people were also awesome. They spoke directly for more than five minutes. Finally, Ouyang couldn't listen. It was too much nonsense. Under the sign of the leader, the host interrupted director Tianhao.

"OK, let's invite the leader in charge of health to comment."

The host wanted to laugh, but he couldn't laugh. His face was red, like listening to a driving joke and pretending not to understand it.

Originally, according to the normal meeting process, the competition lasted for three minutes, comments for three minutes, and then the leaders summarized for five minutes.

As a result, there was a dark horse in the competition today, and Xue Fei has turned his head to the sky. Then the director of the review unexpectedly poured bitter water. The leader in charge of health stood up and felt that NIMA had nothing to say.

He didn't want to read the speech prepared by the secretary. He hastily praised each team, comforted director Tianhao and announced the next game.

"You've got the advantage of being young. It's hard to say next time." The president of the central hospital didn't look at Ouyang, facing the northwest, as if talking to himself.

"Ha ha!" Ouyang smiled like Zhang Fan, and then felt a little strange. He turned his head and glanced at Zhang Fan.

Zhang Fan looked at the old lady, a little inexplicable, what do you mean!

The second scene, five wear and one insert.

Five puncture, more common thoracic puncture, lumbar puncture and abdominal puncture. Relatively rare spinal cord puncture and pericardiocentesis.

Especially pericardiocentesis, which must be mastered by residents according to routine. But in reality, some doctors have not done this puncture until they retire.

Because it's too dangerous. Once there is a mistake in this operation, people have a little pericardial effusion. They can live seven or eight years after treatment, but you can go down with a puncture and a needle and directly send people to the crematorium.

Therefore, slowly, many hospitals do not advocate doing this examination, and then slowly, fewer and fewer doctors master this technology.

One insertion is endotracheal intubation. As for this, anesthesiologists almost do it in the hospital. Usually in the hospital, 99% of the doctors who carry a full moon machete are anesthesiologists.

These operations are invasive operations. In general hospitals, sometimes notices signed by family members and patients are almost the same as surgery.

Five punctures and one insertion, start.

The first puncture is abdominal puncture. In fact, several punctures have one thing in common, that is, to find an empty place to pierce, so as to avoid damaging organs.

For example, thoracentesis, between seven or eight ribs, along the upper edge of the ribs. This is because there are intercostal nerves along the lower edge of the ribs. The same is true for abdominal puncture. Be careful to puncture the bladder and intestines.

At the tea vegetable hospital, Ma Yichen and Bayin were the first to play. Bayin prepares equipment to assist Ma Yichen, who is the main operator.

"Nervous?" Before Ma Yichen came on, Wang Yanan asked quietly.

Because Ma Yichen's tutor, who was a graduate student, also played in the meeting. They really worked hard to block the tea vegetable hospital this time.

Ma Yichen crooked his mouth and didn't speak. Ma Yichen was unlucky to be a graduate student, because he was a graduate student for the first time, and his mentor was also a mentor for the first time.

The two Mengxin get together, so there are few resources and experimental projects in the Department.

As a result, Ma Yichen didn't go to study for a doctor later, because he had surgery during his master's period. Although he was a postgraduate, he actually did professional and master's work. This also led to Ma Yichen's graduation, can only tea in the regional top three hospitals.

But the world is so wonderful. Ma Yichen went to tea, but he had research work.

Last time, when Zhang Fan brought old man Lu and old man Wu, Ma Yichen's mentor asked, but he thought Ma Yichen was a newly graduated child. He was not familiar with it, so he didn't ask deeply.

This time, Ma Yichen's teacher was slightly embarrassed when he saw his students in the tea vegetable team.

He nodded to Ma Yichen from afar and didn't mean to come and say hello. Ma Yichen knows that he has talent and savvy. Unfortunately, he didn't have any good opportunities when he met him. He owes a little to ma.

But today's competition will not be humble.

Attachment 1 is the teacher of pony, and attachment 2 is the deputy director of general foreign language teaching. The central hospital directly went to the deputy director of the Department.

For the temporary replacement, the first time has been very embarrassing, and the second time is to return the chain. NIMA is losing face.

At the beginning of the competition, Ouyang quietly introduced the team members of the following hospitals to Zhang Fan on the podium.

"The of the central hospital is so shameless that the deputy directors of the departments have been sent out. This time we are all young. " Ouyang looked at Zhang Fan's face and asked angrily.

"Ouyuan, take it easy!" Zhang Fan smiled.

Chapter 1390

"In fact, we can't blame us. In recent years, other hospitals have bought instruments like cabbage. Look, look at some hospitals. There are more emergency surgical vehicles than the whole body.

Leader, you stand high and look far. Can you go on like this? No, is there only one hospital in the province treating patients and saving people?

Our convalescent Department hasn't changed equipment in three or four years. It's not easy for us, leader! "

The president of the central hospital was sad and complained to the leaders in charge of health.

Seeing that this year's own hospital is really expected to be a tail, the president of the central hospital

first began to find reasons. Anyway, it's subjective and objective. Now one is one. Otherwise, the doctor doesn't care. It's obvious that the president is a little too incompetent.

After listening to this, the leader in charge of health pretended to be an expression of approval. In fact, it's not clear what's going on.

But Ouyang didn't like it. NIMA said everything, and NIMA wanted to drag the tea into the water. Since you wanted to drag it into the water, I'm not dumb.

"The country is like our mother. Although the palms and backs of our hands are full of meat, the eldest sons are in the capital and the youngest sons are in the center. We can only have illegitimate children.

Equipment. Although we have so many surgical vehicles now, you can see how many are subsidized by the state.

Most of them are bought by ourselves or donated by others. We are not a waiting and relying hospital and will not complain to the leaders.

Buy what you need and earn what you want. I wonder if there is no capitalist to donate some equipment to a famous hospital like yours? Or you don't like it?

In fact, there is no shortage of leaders! I really need to work hard by myself. Look at our hospital. You know as a leader that if we don't lack it, we will work so hard? "

The president of the central hospital turned green. But he couldn't get angry, because he first related to the tea vegetable hospital, but unexpectedly, Ouyang directly tore open the broken paper, gun to gun, stick to stick. This broke his half life experience.

Don't you all come with Yin Fire? How can you lift the table without paying attention to ways and methods!

"What everyone said is reasonable, but now is not the time to talk about it. Let's watch the game. President Ouyang, the doctors in your hospital are very young!"

Leaders have big heads and want to put a few raisins in their ears.

"Ha ha!" Ouyang looked at it. He smiled and muttered, "if you want to play double bidding with my mother, there is no door. Unfortunately, the government leaders of tea vegetable are good to talk!"

The meeting is ready to begin.

Moreover, several other hospitals, not only doctors, but also nurses rarely exclude nurses at the level of Mammy. Such nurses are rare in provincial capital hospitals. Many people seem to have a feeling that the nurses in the hospital are little girls.

In fact, hospitals do not rush people easily. But the industry will force doctors and nurses to leave.

For example, if an elderly nurse can't change to a slightly relaxed department and is over 35, she is often unable to walk. It's really not easy for a nurse to change to a relaxed department in the third class hospital in the provincial capital.

Doctors, in fact, are the same. Don't think you can stand in the hospital after graduating from medical school. School is easy to mix, really easy to mix, no matter how difficult the school is, it is better to mix than the workplace.

When I get to the hospital, once I can't get a job, NIMA is gray in the world and the sky is dark. Rescue the patient, you can't take it down, do surgery, do one, infect one, write a prescription, write one, and a patient will chase after the doctor.

If doctors can't work hard in private, this profession will soon be eliminated. It's no exaggeration that some people will be eliminated without even starting this profession.

Of course, this refers to large hospitals. Small hospitals are easy to mix. If surgery can't do it, go to internal medicine, if internal medicine can't do it, go to pediatrics, and if Pediatrics can't do it, go to ophthalmology. Anyway, if Adu is replaced by agon, he's not afraid if he can't stand it. Anyway, small hospitals always lack turnips and have many pits. They will always encounter a larger pit.

If you go into the pit, you can spend your life at ease.

How about selling emergency patients to private hospitals, usually writing small prescriptions with kickbacks, secretly writing sick leave notes for people, and then if you have experience, secretly writing some abortion drugs for people. To tell the truth, it's OK to moisten your small days.

However, this is different in the tea vegetable hospital. In the past, it was not easy to study. There were limited places to study in the bird city hospital. To hold a three-day meeting, we had to sign an eight-year contract. But with the arrival of Zhang Fan, it's different.

Study, choose the good to study. They even went to the best hospitals in China. Therefore, doctors' own efforts are the premise, followed by a lot of training. The training seems to cost nothing.

In fact, money can't buy this thing.

So, don't look at a group of young people, but now they are experienced in ordinary medical operations.

Let's say nurse Bayin. According to Bayin's level of study, I really can't find a second one in the frontier.

Want to go to shuitanzi, to shuitanzi, to the golden mean, to the golden mean, to the East, to the East, a nurse, don't be too cow. Even in the tea vegetable hospital, it was said that Bayin was the worst scolded by Zhang Fan.

But Bayin is also stained with shit. At present, in terms of development potential, there is no nurse full of tea element who is more powerful than Bayin. Of course, if someone has a distant relative, it doesn't count.

Zhang Fan is about to fall asleep. To tell the truth, he keeps humming at the rubber doll. Even if it's practicing skills, it's really boring. He regretted coming to the rostrum.

Moreover, listening to a group of people grinding their teeth with Ouyang, he was really helpless. He is not curious about other people, that is, Ouyang. He thinks the old lady is too energetic. It's been a long time, and he doesn't feel dry mouth.

At the beginning of the competition, puncture and intubation, the common foreign horse Yichen was the first to cross the river. The pony didn't come to cross the river.

"Isn't this Ma Yichen! Didn't the boy call you at the bird market? Hey, it's interesting today. Don't you think the player in Annex I is Lao Jiang, Ma Yichen's mentor! Hi, the master and apprentice will play together today! "

"What's funny? People are already top soldiers in the hospital. You and I can only stretch out our hands and applaud under the stage!"

A female doctor said angrily to another male doctor. Both of them were college classmates. Later, they went to graduate school and chose different subjects. Ma Yichen had no one at home and finally returned to tea.

The pediatrics selected by the female doctor can't be said to be popular, while the other male classmate's family is outside the brain, and some contacts in the family stay in Annex I.

At that time, both boys were interested in the girl, but no one broke it. Later, Ma Yichen went away to tea vegetable. Originally, he thought that the pony would be like this in his life.

Unexpectedly, I saw him at the whole body medical competition today, and he also participated in the general surgery project in the competition on behalf of tea vegetable hospital.

That's great. Many people didn't understand when they were young. For example, I went to medical school and applied to the clinical department. The clinical department is quite powerful. As a result, when they graduated, their eyes were green. Tens of thousands of graduates. As a result, about 100 people were anesthetized next door. Before the end of their internship, they had signed a work contract.

When I got into the hospital, I fell into a large department again. I thought there were many opportunities in the large department. As a result, I saw a large group of people waiting for the general post of hospitalization, while people in other small departments, such as facial features department, came to the main treatment easily.

Therefore, the female student understands that the competition in large departments is more intense, but if Xiao Ma can come, it means that Xiao Ma has stood up! However, she was a little angry that Xiao Ma didn't call her when she came to the bird market.

Staring at the pony, as if to see clearly what color the pony is today, which makes the male doctors around feel very delicious.

People are like this. If their three outlooks are different and their world outlook is different, either their facial features are different or their career is not enough.

This is a double standard world!

At the beginning of puncture, there will be a contactor waiting for the operation of doctors and nurses, from the local anesthesia of rubber dolls, to the disinfection of sheets, to the penetration depth.

It's not standard. The green light doesn't light up.

Ma Yichen started very fast. Compared with others, he started really fast. He has talent, he also has understanding, and even he has efforts. He didn't have a guiding light until he met Zhang Fan.

This is no exaggeration. There are many geniuses, but in the end, most geniuses became ordinary people because they didn't have luck and didn't meet famous teachers when they were young. Finally, there was a waste.

Zhang Fan worked hard in the system and finally became his own technical system under the guidance of old man Lu and old man Wu.

Ma Yichen, in fact, is now forming his own system under the guidance of Zhang Fan.

However, the shadow of Qiu pie can't be separated from it.

It's not by his early years of life that old Qiu became a pioneer.

At the beginning, Zhang Fan asked Ma Yichen to eat with copper chopsticks first. Ma Yichen used two copper chopsticks ground by copper welding for more than half a year. Everything is good. It's heavy, that is, eating hot pot and scalding his mouth.

Half a year later, Ma Yichen was asked to use a toothpick as chopsticks. It seemed very funny, but the muscles of his hands not only had strength, but also sensitivity.

"I'll go. What has this boy experienced in the past two years? He's steady and fast!" The male doctor next to the female doctor is also a sincere person. Tell the truth.

He also knows that if he tells lies, the sister around him is estimated to be farther and farther away in the future!

In the meeting hall, from the First Affiliated Hospital to the tea vegetable hospital, the backbone of general surgery came on stage. It can almost be said that the speed and accuracy are extremely high. It is not said who left too much behind.

But when entering the cooperation stage, the team ladder finally began to appear. First of all, the green light of tea is on first.

Bayin cooperates with the pony. The pony is no inferior to any doctor on the stage in puncture, but Bayin is the best nurse on the stage.

Who's a little nurse in an operating room? Before she was twenty-eight or seventy-eight, she had been studying in huaguoda hospital for several rounds.

Although this study sounds like nothing, China's medical system stands up from point to area.

Why did old man Lu and old man Wu come to the frontier, and the general foreign doctors in the whole frontier have to stand and welcome, because really speaking, the general foreign doctors in the frontier don't learn other people's technology!

Chapter 1391

"This NIMA is too fierce! Down the mountain tiger. " In the meeting hall, the young doctors were more and more surprised at the team of tea vegetarians. Because it's terrible, the doctor cow has been very confusing, and now the nurse is also cow.

That's great.

"It's said that their Dean especially likes to use young people. He not only likes to use them, but also

reuse them. As long as you like, there is no one who doesn't rise with wind and water.

Do you know why people are so good? The dean of tea vegetable family has sent out words. As long as you work hard and want to go to any hospital for further study, as long as you can go with questions and come back with answers, any hospital can! "

"Really? Don't lie to me. I have little social experience. " Several young men who looked mature and bald, but looked very young, gathered together to talk about tea.

These are graduate students who will graduate next year. Originally, on this occasion, they should compete in the middle of the venue, and then get a good score. In the future, they can choose hospitals or let hospitals choose them.

But this year is not the same. The third class hospital in niaoshi sends all Deputy high-level doctors, and most of them are attending doctors. At the beginning, they wondered. Now even if they are really pure, they understand.

This was to block the tea vegetable hospital, but it didn't succeed.

"Unfortunately, if only the tea vegetable hospital were in the capital, it would be too far away!" A female master said a little tangled.

"Ha ha!" The others smiled and said nothing. In fact, everyone has a choice.

The four key nodes of life are reincarnation, college entrance examination, choosing units and finding objects.

Among them, the technology of reincarnation is too difficult for ordinary people to get. College entrance examination, when the college entrance examination, many people follow their parents and teachers in a muddle headed way. In fact, he doesn't know what he wants.

Only when you choose a unit and find an object can you count yourself as having some ideas and control them.

Of course, people who have been talking about objects since primary school are not included in the scope of calculation.

In fact, the only thing I can consider is choosing a unit.

Perfect, not to mention the unit, not even people. Therefore, when choosing a unit, most people want to figure out two things.

Or you have to learn technology and live with less money. You have to endure it, because after a few years, you will one day be able to harden and pound the sky and pestle the ground.

Otherwise, if you want money and work hard for ten years, you can make the girl sit on her donkey cart and cry willingly.

For units such as tea element, Manchuria can't find more technology for money. In terms of frontier, people are still in the forefront of high-end technology and basic training.

The only bad thing is that the location is a little remote and a little poor. There are three national poor counties. Step by step, hold a small mouth with a little strength to urinate, which can urinate to Stan, resulting in health disputes between countries.

But is there anything perfect in the world? No, most of the people who want to go to tea vegetable are young men and a few are girls. The girls who live in the bird market hardly think about it.

In the competition field in the middle of the venue, the puncture has been completed. Although it was not said that the teams were very different this time, tea vegetable still took the lead with a very weak.

Ouyang was even happier this time. Not only lost two games in a row, but also won the first. Originally, Ouyang thought that he would be very satisfied to be in the top three.

But I didn't expect to be so smooth today. I took the leopard out, "ha ha!" The music of the European hospital made Zhang Fan want to cover her mouth and laugh too recklessly. He almost put his mouth on the ear of the president of the Central Hospital of others and smiled.

"The old lady has a grudge!" Zhang Fan looked at the president of the Central Hospital, who was blue and biting his teeth. His muscles were bulging. He had no choice but to have a look.

"Please comment on Dr. Li Cunhou of our Frontier Medical System! Please give a warm welcome! "

The host in the venue warmly welcomed Lao Li with the best smiling face. Originally, according to the routine, Lao Li had the highest status in the frontier medical field, but the first scene was first aid and ICU. He went up to comment on it.

This time, it was barely surgical, so Lao Li was invited.

"Well, Lao Li is very energetic today!" Ouyang looked at Lao Li and pulled his little suit. Zhang Fan smiled and looked at Ouyang pulling her own clothes. Zhang Fan knew that the old lady also wanted to comment.

But the comments here don't look at the position, but only the professional title and academic, so it's a little difficult for Ouyang to go up.

"Why don't you go up and comment? You are at least the executive director of the frontier Breathing Association. Why? Didn't the organizing committee consider you? Originally, the Organizing Committee asked Cha Su to send a few people. We didn't want to do much.

But people are enthusiastic. Academician Li can't do without going up. When we think about it, we can't let all our people comment. We can also let the experts of brother units say it. How come the doctors in your central hospital have the right to participate, and the experts are not qualified to comment? "

Ouyang's heart is not satisfied, so he has to vent. Anyway, my mother is not satisfied, and she can't let her enemies be satisfied.

The dean of the central hospital is crying. This woman can't afford it!

"I'll go. This is the academician of tea vegetable! This is Professor Li. I saw a living one today! "

"It's so young. It's estimated that it's young among academicians. It's gentle and elegant. It really has the posture of a scholar."

"Tea vegetable is awesome. Academicians have it!"

This is the first time Lao Li has appeared in the Frontier Medical Field on a formal occasion.

Lao Li in a suit stood on the podium, smiling at the crowd below“ The development of medical treatment is inseparable from doctors and nurses, and the improvement of doctors is inseparable from basic skills. In the past, I was also confused.

I think with the development of science and technology and the emergence of various examination equipment, do we doctors and nurses still need to work hard to improve our basic skills?

I've been thinking for a long time and I don't have a very positive answer. Finally, when I came to the frontier and came to tea, I really found that basic skills are always indispensable for doctors and nurses.

I don't sing high-profile. As everyone knows, I'm engaged in skin allogeneic transplantation. My material, okay? It must be good. If not, I can't be an academician! "

All the people below laughed. Although Lao Li is boasting, he is approachable. This is also his ability.

"But when materials were first invented, no one in the world could successfully use materials on experimental animals, let alone patients.

At that time, I firmly believed that there was no problem with my materials. The problem was the clinical surgeon!

Sure enough, when I came to tea plant, I finally met a doctor. Everyone knows him. Comrade Zhang Fan, President of our tea plant hospital!

At that time, I really understood one thing. If a tall building rises from the ground, it should also have a deep foundation.

President Zhang Fan, with his most basic surgical suture and improved Qiu Pai surgical suture, let me see what is technology.

Comrades and colleagues, this competition is quite good... "

After Lao Li blew a wave, he didn't know whether it was the academician's bonus or the fact. Anyway, it was reverse and warm.

Warmly, the presidents of other hospitals couldn't sit still, because in Lao Li's words, surgery and tea are the most powerful, and the others are brothers!

The leader in charge of health affectionately held Lao Li's hand and kept praising. After praising, the third and last game was over.

First aid bandage, fracture fixation and casualty transfer.

In fact, these three technologies can't be seen at ordinary times. Pull out a doctor and let him think for half an hour. He must be able to do it steadily without any mistakes.

But if this thing is in a special environment, it takes into account the professional quality of a doctor.

In the simplest case, when the fire collapses, the wounded are injured in the waist, and the house is about to collapse. No one can guarantee whether the house will fall down in the next second. Therefore, when the doctor transfers the patient at this time, there is almost no time to think.

At first glance, the patient should come out lying down, carrying on his back, or pulling out. At first glance, it should be determined, and then he can't think and directly start the treatment.

If you think for half an hour, the patient will become a mutton kebab.

This is a kind of, and in the battlefield, medical treatment is to save people, and the battlefield is to kill people. But it's nothing to protect our country.

For example, battlefield treatment, although many doctors have never seen a thief in their life, this battlefield treatment also needs to be learned. Although there is no doctor major in digital hospital, we must understand what we must do when we need to do something.

When the personnel in the third game came on, not only the audience were surprised, but also the doctors and nurses who participated in the game looked at it.

Because this time, the tea vegetable comes directly to the women's team. Of course, if there is no snake boy, it is directly to the women's team.

Wang Yanan took the flower, Bayin and Xu Xian into the meeting.

There are fewer female surgeons and fewer female orthopedics doctors. In particular, female doctors in trauma orthopedics are more rare. Often female doctors engage in orthopedics, either tumor or pediatric orthopedics. This kind of trauma female orthopedic doctors leading the team are too rare.

Originally, this game should be led by Xu Xian, who is a master. When Xu Xian was in graduate school, he took the joint, but Wang Yanan hasn't decided the direction yet.

Especially after two trips to the pool, Wang Yanan's small chest has stood up because the road is wide.

Shuitanzi's old Zhao meant to let Wang Yanan do minimally invasive surgery outside his hands and feet, but Wang Yanan couldn't stand that temperament. She also asked Zhang Fan. Zhang Fan was actually more optimistic about Wang Yanan's spine.

Although Wang Yanan is a girl, without this layer of women's skin, there is an old man in his body.

Therefore, the spine is actually more in line with Wang Yanan's character.

At this time, Zhang Fan also paid attention.

After all, orthopedics is now a serious department.

"I'll go, the women's corps of tea vegetable hospital. What's the lewd man behind?"

"Is it a little big for the female doctor to come here?"

"What do you know? He is Zhang Fan's eldest disciple!"

Wang Yanan looked proudly at the other teams in the meeting. To tell the truth, in terms of his pride, Wang Yanan really doesn't agree with anyone. Don't look at the almost identical vice High School of

other teams.

But in Wang Yanan's heart, it has no influence at all.

At the beginning of the competition, rubber dolls of various postures climbed in the venue. If it's not day and night, it's really frightening to look at the patients all over the venue.

Tanima looks like a real person.

Drop! Drop! Drop! After three sirens, the rescue teams of each team entered. Xu Xianbayin carried a stretcher, Wang Yanan carried a first-aid kit, and Naduo entered the site quickly with all kinds of auxiliary equipment.

The competition stipulates that within 15 minutes, the effective and large number of rescue patients and wounded are the victory group.

This is a competition between intelligence and physical strength.

First of all, you have to judge the survival of a wounded person and the injury of the wounded. For a patient with lumbar spine injury, you carry three or four people away from the accident point. Originally, people could save it. As a result, you were asked to carry it out and shake away the last breath.

Chapter 1392

"Roll away!" Wang Yanan first identified the injured person's spinal injury, and then quickly issued a transfer order.

I don't know what kind of disaster scene the organizing committee has created. Anyway, there are all kinds of diseases and casualties. Diarrhea and dehydration, burns and fractures, and smashing and falling. Anyway, there are almost no same diseases among the rubber people lying all over the venue.

After six teams entered the venue, they began rescue and transportation. In any case, whoever successfully transports and handles more emergencies wins.

This kind of consideration, from testing the level of a doctor to testing the level of a team, but also testing the level of team cooperation of doctors on weekdays.

When Zhang Fan saw the third game, he nodded to the organizing committee. This is a serious and effective competition. For the other two, go to the hospital. Who NIMA dared to get a puncture.

Not to mention the doctor's own courage, if this speed, the doctor's face is red and white, and the speed is like his ass on fire. It is estimated that the patients will be scared to jump up and run from the hospital bed. NIMA, this is boiling water. Are you anxious to kill the pig to molt!

So, sometimes, skill competition is a group of professionals playing games with stupid leaders. You said you could improve your serious level, yes, but not much.

But this third game is really good. For doctors, rapid judgment, rapid treatment and rapid transfer are really greatly improved.

Of course, this kind of training is only organized by large hospitals, and it is difficult to organize small hospitals. For example, in some township hospitals, there are three people in a surgical department, one for rest, one for work and one for work.

The health bureau organizes training. Whoever you let go will never go to rest. Even if you go, it's a little monk who rings the bell. If you don't go for a while, you can deal with the job.

In this team competition, it is obvious that the hospital usually has more emergency tasks.

First of all, look at the team of tea vegetable hospital. It is very fast and the cooperation is in good order. In particular, several girls take a young man. Although they are young and do not have an advantage in physical strength, there is almost no language communication in the whole process.

It's all based on the tacit understanding of eyes and cooperation. In fact, they don't want to talk. But since Zhang Fan took the lead in tea, he talked less and less when he worked as a surgeon. After all, with an example, the following people follow suit.

For several other hospitals, Annex I and Annex III are also good, and the team cooperation of others is quite tacit. When you go to the provincial hospital and the Central Hospital, there are some problems with Annex II and annex IV.

The doctor's cooperation is stumbling. If there is no comparison, you may not see who is powerful, but once there is a comparison, you can clearly see the problem.

In that year, China Medical carried out a platform combination for emergency. If the patient calls 120,

they will drive directly on the nearest medical platform.

This method is resource integration. Unlike in the past, sometimes a patient comes with four or five 120's, sometimes, he makes countless calls and doesn't come with one 120.

When the platform was established, many hospitals did not understand it, especially when the president did not understand it and felt that the platform was useless, so they rejected the good intention of the health system to set up a center.

For example, in Annex II, the president of such a large hospital felt that there were enough patients in his family and there was no need to rob others, so he gave the emergency platform to Annex IV hospital in the later stage.

As a result, within a few years, the surgery of the Fourth Affiliated Hospital was significantly improved. From the last Affiliated Hospital, it has become the second best in the surgery of bird city.

Because the hospital is done by doctors and nurses, this emergency operation is tired. Doctors and nurses are tired and can urinate blood in the middle of the night.

But it also exercises the level of doctors and nurses.

Later, the new dean of Annex II felt that this was not a matter. He begged grandpa and grandma to find the leaders of various systems, and finally set up an emergency platform in Annex II.

Sometimes, it seems that leaders are useless for an enterprise or a unit. However, at key nodes, the development of the unit can be delayed for many years when a leader who only knows that pig tail is eating soft and rotten.

With the help of Xu Xian, the flower is used for medicine, Bayin is executed, and Wang Yanan is in charge of it. The four young people come and go, come and go, one after another, and the green signal light is on and on.

"Wang Yanan is really good. When she was going to surgery, her uncle came to Lao Huang. I objected at that time. I said that it was bad for a girl to go endocrine and breathe. Finally, the old yellow face is soft, just like you, agreed!

Unexpectedly, this is against the emergence of a female director of surgery! "

Ouyang said to Zhang Fan with a smile. A department, especially a well-developed department, must have a good director.

For example, in the old Huang era, you can see that the original department director was still very powerful.

For example, Lao Ju in the Department of respiratory medicine, Lao Huang vigorously developed the surgery of tea vegetable hospital, but Lao Ju failed to develop the Department of respiratory medicine by virtue of his meritorious qualifications.

Now look at the respiratory medicine department of others. NIMA has its own ICU. Even ECMO, there is only tea in the frontier, only in the old residence of others, and only the doctors in the Department of love for the old residence of the world can use it!

Take another look at Ouyang's cardiology department. Although Ouyang's technology has fallen behind, Ren Li, the successor director selected by others, you see, now the cardiology department of tea element is almost the only department for many tea element leaders to recuperate.

Look at Lao Gao's orthopedics, needless to say. And don't look at the old Chen who picked up flowers for Ouyang and made tea for Zhang Fan. NIMA forced the hospital office and the party office to dry up.

The director can't. He still can't. For example, in the digestion of tea, there have been chicken feathers in NIMA since ancient times.

Besides Urology, besides listening to Ouyang's words, Lao Li's work remains unchanged. Many new technologies have been developed in other surgeries. Lao Li will never be impatient.

Now even the anorectal department, which was about to close down, is more powerful than the extraordinary department. Wang Zipeng, selected by Zhang Fan, is very happy to cut chrysanthemums now. The tea vegetable chrysanthemum protection brigade is not white. Previously, private anorectal hospitals with good business were crowded by the chrysanthemum protection team.

Zhang Fan glanced at Ouyang and said in his heart, if you praise others, how can you scold me.

"It's mainly you, but the rotation order is good. Look at our doctors. Pull it out. Surgical can be used as internal medicine. The three important concepts of internal medicine. Lifting a knife can also stop bleeding and amputation. These are your policies that were effective in those years!"

Zhang Fan praised the old lady and expected her to work. If you don't praise her, you can't help it at all.

As soon as Ouyang heard this, he turned a pretty charming look at Zhang Fan. Zhang Fan couldn't help shaking his eyes. It's like Zhang Fei, who has no beard in the old three kingdoms, staring at the triangular eyes and giving you the flattering eyes of your understanding.

This is a compliment to the old lady. She cares about only a few aspects.

The third game was a little slower. When all the rubber people in the venue were transferred, the game ended. The team led by tea vegetable Wang Yanan won the first in rolling, and successfully transferred three patients more than the team attached to the second one.

In fact, it seems that there are not many of them, which can not be called rolling. In fact, in this kind of emergency treatment, a doctor or a team can save one more, which is already quite powerful.

This is the vast border region that created such a special hospital. If you put it in the south, such as Jiangsu, Zhejiang and Shanghai, your county hospitals will not develop at all, unless you come to an extremely powerful doctor.

Otherwise, once someone else feels that the situation is more serious, they go directly across the provinces and go to the West Lake. Where will they stay on the ground for treatment.

The frontier is different. Not to mention praising the province, sometimes praising a county is hundreds of kilometers, such as tea vegetable. You have to travel 600 kilometers from tea vegetable to the bird market. This is still something after the expressway.

Not to mention the provincial highway, you have to walk for several hours on the highway. You often encounter critical patients. It's cold before people arrive at the bird market.

Moreover, although the urban area of catechin is not large, the whole catechin is very large. As a sub provincial unit, doctors encounter too many rescue and disaster relief things.

In recent years, he followed Zhang Fan out and in. If he didn't get good results this time, Zhang Fan felt that his idea of building a team was wrong!

Looking at a group of young doctors standing on the podium, Zhang Fan slightly tilted the corners of his mouth. Although he said he didn't care, he still cared when he really came. When he looked at a group of doctors standing on the podium, zhennima incense.

Ouyang had already stood on the podium and was with a group of hospital leaders. She was the presenter.

At this time, Ouyang's proud eyelids are facing the sky.

The president of the Central Hospital left as soon as the third scene was over. Ouyang was really ashamed and couldn't stay. This is the first time that NIMA, a dean from another hospital, took the Dean away angrily, which is estimated to be the first time in the Frontier Medical competition.

Mainly after three games, none of their teams could enter the top three, which made Ouyang ridicule and couldn't wipe off the spitting stars.

Also, before the game, he and Ouyang molar. They think that their hospital is also the capital of the province. It must be better than the tea vegetable hospital. As a result, NIMA is too angry. When he left, Ouyang kept trying to stay. Don't go, don't go. Maybe there will be a miracle later. Come on, continue!

Watching a group of people holding trophies and certificates, especially Wang Yanan and Xue Fei, is like

holding a golden doll. That's solemn!

Also, a director is not favored by everyone. He always talks about his black history and how he was cheated by three women.

One is a female orthopedic doctor. If it were not for Zhang Fan's protection, even if his uncle was the leader of the Health Bureau, it would be difficult to mix in the Department.

Now, this is the affirmation of the system to them. Affirmation of their efforts and efforts.

People still need to pursue something.

"Zhang Yuan, can you say something?" The leader in charge of health smiled and invited Zhang Fan to say something.

Zhang Fan waved his hand. He would not respect the leaders in charge of health like the presidents of other hospitals. He just treats it with an ordinary mind. Anyway, he doesn't expect to be a leader in the health system in the future.

Just be in the hospital.

Just when everyone in the tea vegetable hospital, especially Bayin and Ma Yichen, took the trophy and claimed credit in front of Zhang Fan.

The dean of Annex I came over.

"Zhang Yuan, there is a special patient in the hospital. You are here. Why don't you show me?"

Chapter 1393

"Is it convenient?" Zhang Fan is happy to be invited for consultation. But this kind of thing, how to say, just want the big girl to enter the bridal chamber. Even if she wants to die, she should be reserved and hesitate a little.

At least this will not make others feel that Zhang Fan is impatient for money. Because expert consultation, provincial expert consultation, as long as the consultation is once, no matter what others say, the money must be given in advance.

Of course, the market threshold is relatively high, and ordinary people can't get the money. Even if there is labor to pay, after all, it is the patient's extra money, so even if what happens, it is still necessary to look like it.

After all, people pay attention to one face when they come out to mix in the Jianghu. Moreover, there are leaders in charge of health standing around.

Generally speaking, the health system can be divided into several teams, from hospital to prevention, from prevention to public health, and from public health to supervision. It looks very complex.

In fact, there are two teams, one working and the other supervising and guiding.

For example, according to the current saying, doctors must first issue a certificate to the health bureau where they are, then go to the Health Bureau of the destination for the record, and then practice medicine at the destination with the consent of the responsible department of the Health Bureau of the destination.

Otherwise, it is illegal.

But in reality, there are several doctors who really come according to this. Flying knife doctors often go out on weekends, just like special workers at night. Normal units have been off work for a long time. How big is your face when you let others work overtime.

But some things can't be said. Although Zhang Fan said it was inconvenient, he actually looked at the leader in charge of health from the corner of his eye.

"President Zhang is still very popular. I hope there are more young and capable hospital leaders like Zhang hospital in our frontier."

They didn't say anything. It's estimated that the business is not good!

"Yes, it's all here. Let's have a look!" The dean of Annex I didn't seem to see Zhang Fan's reserve. He still warmly invited Zhang Fan.

What industry, when it comes to the top, is actually a resource, such as what in the sky and on earth. Although others break the law, it is said that the people inside will use 18 kinds of weapons, so the people who go in and put money in line.

"What about the European Academy? Why don't you go and have a look?"

When the game was over, we couldn't leave the old lady, so Zhang Fan asked.

"I'm not going. I'm still busy. You should treat us well today. Such a good ranking, you can't justify it without a little blood. "

The rare Ouyang wants to give benefits to doctors and nurses. It's really the moon rising in the daytime.

"OK, I didn't intend to reward. I had a reception before the game, but the European Academy said it. This must be arranged. When I come back, let's have a good meal today."

Zhang fan set off Ouyang with a smile in front of the crowd, and then he would follow the president of the First Affiliated Hospital.

As a result, Wang Yanan wanted to go. Zhang Fan didn't hesitate to go!

Then Ma Yichen will go, too.

Then Xue Xiaoqiao came from the capital. He hasn't been to the largest hospital in the frontier. He wants to go too. Let's go.

As a result, many people wanted to go.

Then Xiao Chen accompanied Ouyang to the hotel to have a rest. He can't go back today. Lao Chen and a group of young people followed Zhang Fan to Fu Yi.

Originally, Zhang Fan meant to let Lao Chen rest. He's been tired all day. But Lao Chen was not at ease. He was deeply afraid that Zhang Fan would be bullied. Ouyang also meant that. Zhang Fan didn't object.

In fact, in the past, Ouyang old Chen flattered some big hospitals such as the first and second affiliated hospitals of the bird market. Now, however, there is a faint sense of hostility.

There's no way. Whoever makes the position of tea element bad, and who makes the tea element hospital want to be superior, we must step on these hospitals.

Of course, Zhang Fan is not so hostile because he doesn't have the historical elements of Ouyang and Lao Chen. He has only been in the frontier for a few years!

Zhang Fan took a group of people to the first affiliated school, and Ouyang took several others to the hotel.

When the old lady played, she was as excited as if her hair had been charged by high-voltage electricity. When she returned to the hotel, she wilted.

"Ouyuan, when Zhang Yuan leaves, let you choose a place for dinner in the evening." Xiao Chen poured Ouyang a cup of tea and asked Ouyang happily.

Xiao Chen is not a clinical major. To tell you the truth, watching martial arts competitions is suffering for them. A group of adults had fun playing with several rubber dolls. She wanted to say, it's fun. Buy one and go home to play every day!

Of course, the young woman is still happy to have dinner. She doesn't know whether she has recently or whether she is greedy. Anyway, when she hears that the dean is going to bleed, the corners of her mouth are turned up.

"Or just eat at the hotel. I think the hotel is very good. The room price is five or six hundred a day. Hey, I'm really willing!"

Ouyang slightly didn't want to move.

"European hospital, you can't be casual today, otherwise it's hard to mobilize doctors and nurses to participate in the competition in the future."

Before this sentence was finished, Xiao Chen looked at Ouyang's calm appearance and added: "how powerful our team is. Today, when I saw the president of the Central Hospital leave, his mouth was crooked!"

As soon as he said this, he really talked about Ouyang's heart.

"Yes, you should be rewarded. You are young and familiar with the catering industry in the bird market. Where do you think it is more delicious and affordable?"

"I decided? You let me decide? " Xiao Chen's eyes are blooming.

"Well, be more affordable!" Ouyang closed his eyes and wanted to squint for a while.

Xiao Chen didn't even hear Ouyang's word "benefits".

Out of Ouyang's room, Xiao Chen began to call " I'm in the bird market! No, I'm going to organize everyone to dinner today. What kind of stalls? In a five-star hotel, our dean specially entertains us! "

"Well, was Victoria delicious last time? I heard it was the most expensive self-service in the bird market, wasn't it? Do you have crabs? No, it's so expensive. I don't want to eat at ordinary times. This time, our leaders want to invite us to dinner. If there are too many people to order, find a self-help. "

For more than half an hour, the waveguide known as the standby king was hot, but the effect was also quite powerful. Xiao Chen's relatives, friends, classmates and friends knew that Xiao Chen had come to

the bird market. And a big meal!

Xiao Chen thinks well. It's hard for everyone to order. It's easy to complain at that time. Eating self-help is the most convenient. Moreover, she knew too much about Zhang Fan's daily income. She followed Zhang Fan to the South several times. She knew that she was sorry for Zhang Fan's income if she didn't eat better today.

Why are you looking for expensive ones? Because she knows that Zhang Fan likes seafood, so he has to eat it fresh, and it doesn't include mail from the seaside to the frontier. Of course, Xiao Chen thinks she is considering for Zhang Yuan. She eats everything herself!

.....

In the First Affiliated Hospital, with the end of the competition, the visiting and participating doctors have arrived at the hospital.

"How's it going? This year, our hospital is the first, but the first is useless. Going to the capital is an enthusiastic participant! "

Those who didn't go on duty or were not selected asked colleagues who went to visit or attend.

"Well! No! "

"What is not, go every year, every year is a Participation Award..."

"This year, we are not the first in the frontier!"

"No, it's a shame. Let Wannian's second son catch up with him? What did I say? The Dean has no eyes. Why don't you let me go? If I go... "

"All right, you can go there. This year, the first place in the Frontier Medical competition is the tea vegetable of others. After three competitions, it is the first!"

"Well! Tea element? "

"Yes, tea vegetable!"

During the discussion, I don't know who shouted, "look, the president came to our hospital with tea."

"This NIMA, too much, even chased her home." Participants thought that the tea vegetable hospital came to show off, and their faces were blue.

As a result, after everyone understood, they suddenly felt that they were too amorous. They were invited by the dean for consultation.

Of course, for Zhang Fan, although not familiar, but we all know. The only disciple of the Qiu sect in the frontier, and NIMA is not engaged in general surgery, but in orthopedics. NIMA's wayward can make people envy her toothache.

As for others, I don't really understand them. I know that this general surgery, orthopedic surgery is also done well, and it is even said that he can engage in gynecology. It sounds very fierce.

In fact, it is the corresponding department that really knows how fierce Zhang Fan is. For example, those who engage in general foreign studies know that Zhang Fan already has the posture of carrying the flag in terms of liver and gall.

Orthopedics practitioners know that Zhang Fan has now combined with Jinmao's special to do spinal orthopedics. It is said that he started according to the Chinese template.

At present, the frontier says that the real development outside the brain, and there is still a future, that is, Zhang Fan's tea vegetable hospital.

Everyone has a one-sided understanding of Zhang Fan. It is estimated that only a few serious children are familiar with Zhang Fan.

Of course, in other people's eyes, this is comprehensive. In old man Lu's eyes, NIMA just doesn't do his job. Zhang Fan has told the old man several times. He wants to be a doctor. As a result, the old man is stunned and ears.

Of course, Zhang fan can get it himself, but there is always a saying that there are old people in the world. You can get someone else's doctoral student. You can't kill old Lu.

Although Zhang Fan didn't know why the old man didn't get it for himself, he didn't want to go to find someone else. If he really wanted to find someone else, Lao Zhao of shuitanzi could welcome him with both hands.

Why don't you get it for yourself? Zhang Fan doesn't know. Graduate students have graduated and it's time for a doctor, but the old man is, hey, Zhang Fan has a headache when he thinks about it.

The dean of attached No. 1 took Zhang Fan directly to the general hospital, and the doctors in the surgical building pointed out all the way.

"I'll go. This is the tea doctor participating in the competition today. NIMA is all a resident!"

"It's not. There are a few who are in charge!"

"Ah. The vice high school let others stay in hospital and lay down. Our dean also means to let others come for consultation. "

I mean, laughter is laughter, but medical treatment is not. Even if you are reluctant, you have to invite others to see it.

In particular, it is impossible to say to patients: you can transfer to another hospital.

Because in principle, the top three hospitals in various places are the end of medical treatment in the province, such as the First Affiliated Hospital of Bird Market and the Golden Mean of the Capital. Of course, this thing is in principle.

Into the Department of General Surgery.

The director of general foreign affairs waited early at the elevator door and saw his own Dean and tea vegetable Zhang Fan.

Came up quite enthusiastically.

Chapter 1394

"Zhang Yuan, here you are! Last time I went to Mordor for a meeting, Mr. Li, the dean of foreign affairs, asked me to greet you for him! "

The senior director of attached No. 1 General Foreign School was quite polite. When he saw Zhang Fan, he bent slightly and put on a clear posture of treating Zhang Fan as an elder.

The director of a department, especially the chief director. If you are in the capital city of magic, at least you have the experience of studying abroad. Many doctors broke their heads for this quota when they were in the vice senior high school. Because if you don't go out once, you will never be considered as a director.

When you go to other provinces, especially relatively poor provinces, such as frontier, the chief director of the Department of the Third Class Hospital, the minimum requirement is to study in the capital or magic capital for more than one year, which will be considered.

At the beginning, Xu Guangwei, who was attached to the first general foreign school, went up a step and became the dean. The director of general foreign studies fell on Yang Hao. When Yang Hao studied ten years ago, he first went to the East and followed Master Wu's students.

After coming back, his level improved significantly. The organization decided to let him go out again. The

second time was when he went to study five years ago, he went to foreign affairs and followed Master Zhang Fan.

Of course, they are different from Zhang Fan's. They are like an assembly line, going wave by wave, and then the doctors of magic capital carry on the operation wave by wave, and arrange different difficult work according to their respective abilities to open their eyes.

However, teachers are nominally teachers, but teachers are different from teachers. Especially among surgeons, many are actually called masters instead of teachers.

Wang Hao is a disciple outside the wall of Qiu sect. Although this is the case, we still know in our hearts who our level improvement comes from. Moreover, Zhang Fan hasn't come to the frontier yet.

They are relatively young leaders in frontier ordinary foreigners.

So when he saw Zhang Fan, Yang Hao's attitude was very low, and he took the initiative to explain his origin. The meaning depends on Zhang Fan. If Zhang Fan doesn't say anything, there will be no communication in the future.

"Oh? Director Wang was the master brother with? Hey, what does that say? We're a family. I haven't contacted you for a long time. How is he? "

Zhang Fan smiled and held Yang Hao's hand. People handed the note to speak. Zhang Fan certainly wouldn't refuse. Moreover, it seemed that elder martial brother said it at the beginning, but what elder martial brother said at that time was unclear, and Zhang Fan also remembered it.

I know today. This is the elder martial brother.

"Count up, you are my little martial uncle!" If Zhang Fan doesn't talk about his family, he doesn't think Zhang can open his mouth. Doesn't he have a card? At least he is also the director of the top three in the frontier.

"Hey, everyone talks about it. I made a late debut and got the light of my master!" Zhang Fanzhen didn't want to refuse.

Zhang Fan came to the bird market for the first time to give a speech. Several leaders of the frontier digital hospital almost hung Zhang Fan in the air like dried meat. They came to the bird market for

surgery for the second time. Many people in the Second Affiliated Hospital questioned him. This time I came to the bird market to compete, my team seemed to have become a public enemy and let everyone block it.

Can NIMA do this?

Although Zhang Fan has many times of throwing knives, almost all the throwing knives in the bird market are Zhang Fan's private plots, these guys should not only use Zhang Fan, but also guard against Zhang Fan like a thief at all times.

Therefore, I met a director who is my own person today. Zhang Fan must accept it. As for elder martial brother, is this my own thing?

In fact, in the medical profession, birth is very important. The simplest, such as Shuimu and the golden mean in the financial circle, are said to be monopolized.

The medical treatment is the same. For example, the two deputy directors have the same professional ability and life. Finally, when competing for the director, don't say you don't look at your origin. It was brought out by an ordinary teacher. No one knows it.

The other one opened his mouth and said that I was a student of old man Zhong and a student of old man Hu. My master was an apprentice of old man Qiu. NIMA was different immediately.

This is the so-called invisible benefits brought by contacts.

The more such places outside the border mountains pay more attention, just like the dim sum pea yellow in the capital in those days. What is different from those in other places? I can't eat it, but NIMA eats it differently.

"No, no, I still understand the truth of standing at attention and taking a moment. I didn't mean to come to the door before. I didn't know how to behave. If I don't talk about some rules today, how can I see my master in the future! "

This guy is also on the road, from a teacher to a master. Zhang Fan swaggered and cheated under the banner of old man Lu.

"Hehe, OK, OK, your martial uncle and nephew won't discuss it first. Director Yang's nine bed patient is not there. Let the doctor bring the medical record. I finally invited Zhang hospital today. I must let Zhang hospital give you a good class."

Xu Guangwei, the dean of Annex I, looked at it and interrupted the two people's implicit question. They were all Millennium foxes on the mountain. He couldn't understand what Zhang Fan thought and Yang Hao thought, so don't give it to anyone.

When he met Zhang Fan last year with Zhao Jingjin and Luo Zhengguo, the former brain surgery director of the first affiliated university and now the vice president of tea, he still felt that Zhang Fan was a technology maniac. As for social science, um, a layman.

This NIMA, look again this year. This guy has made such rapid progress. What medicine did he take? The effect is so good!

Xu Guangwei didn't say it. In fact, he is still envious. He has good technology. He also knows the system and people's hearts. He is so old. How can he get mixed up!

"Please, Dean, little martial uncle!" Yang Hao has become a disciple of Qiu sect. After entering the Department, other doctors have stood at the door of the office.

"Zhang Yuan, come!"

"Zhang Yuanhao!"

After all, Zhang Fan is confident "Little martial uncle, let me introduce you. This is the new doctoral student in our department this year, and this is the new master student in our department."

Director Yang introduced the newcomers this year, and Zhang Fan met them with a smile.

Other doctors, especially those with similar qualifications as Yang Hao, are stupid. There are question marks on their heads. "Didn't NIMA say that you were just going to study? NIMA, aren't you a disciple outside the Great Wall? Why did you have a relationship with Zhang Fan today?"

In the past, everyone's boss didn't joke about the second child. Everyone came out of the Frontier Medical University. When they went to school, they chased the girl and what happened to the girl. Everyone knew that there were holes under their pants, which were clear to each other.

But now, this guy became the director, and suddenly became a disciple of Qiu sect. Did NIMA pay for it? How much is it? Can you count me in!

Looking at some doctors with high professional titles who were not peaceful around, Yang Hao was more pleased than when he announced the director. He is even more down-to-earth. He must follow little martial uncle well.

For a time, the middle-aged bald man looked at Zhang Fan differently.

"Other people, little martial uncle, you are familiar with it, so I won't introduce it. This is the patient's case. You should have a look. It was planned to have an operation the day after tomorrow, but after several rounds of discussion in the Department, there is no definite operation plan. Take your pulse."

As a saying goes, San Sheng is unfortunate, and the county magistrate is attached to Guo; Three lives do

evil, attached to the provincial capital. It's good that Yang Hao became the director of general foreign studies, but President NIMA was born in general foreign studies.

This is good. The funds are sufficient first. Can the Dean not support his backyard! Moreover, doctors are also delicate. For example, orthopedics use more antibiotics. The prescription clinical pharmacist directly stops the antibiotics for orthopedics.

No one said how to use it, because the boss is his own.

For ordinary doctors, it's very happy. It's convenient to ask for leave for further study, but for the new director Yang Hao, this NIMA is a disaster.

Each mountain in the Department rebelled with his younger brothers. If there was a little problem, they talked to the Dean directly.

The Dean intervened again, which made NIMA, director of general foreign affairs, haggard and want to resign.

Today's patient is an example.

Yang Hao advocated asking for throwing knives, and another director advocated doing it by his own department. Finally, the lawsuit came to Xu Guangwei.

Lao Xu hesitated. There were different opinions in the Department. After an operation, NIMA became the rhythm of the sub team. Just in time, I met Zhang Fan today. When Lao Xu thought about it, he simply invited one of the most authoritative people in the frontier to have a look.

Although Lao Xu was also worried about Zhang Fan coming to the bird market, Zhang fan used to be a director of the Department.

Now it's different. In terms of level, if Zhang Fan wants to really come to the bird market, which of the presidents of these top three hospitals in the provincial capital is not worried that his seat will collapse.

Zhang Fan took the medical record and frowned.

Esophageal anastomotic fistula!

No wonder the opinions in the Department are not unified. Lao Xu has to pull Zhang Fan for consultation.

Esophageal anastomotic fistula is one of the most creepy surgical complications.

At that time, a world-class big man said that the esophagus is woven by loose muscle tissue, and esophageal anastomosis is tantamount to forcibly pulling together those that cannot be sutured at all.

Moreover, this anastomotic fistula is a common disease, almost 25% of esophageal surgery. And the mortality rate is as high as 30%.

Zhang Fan took the medical record and began to read it. The patient was 48 years old. According to the patient's oral statement, he accidentally swallowed fish bones when eating fish a year ago, resulting in swallowing pain. After self-treatment (swallowing dough and steamed bread), it did not work. At that time, the patient did not pay attention to it.

Half a month later, the patient developed fever, chills and obvious difficulty in swallowing. After seeing a doctor in the local hospital, he was treated with esophagoscopy. The specific treatment process is unknown. After operation, the patient felt better and discharged from the hospital.

Three days ago, the patient suddenly had a high fever and severe cough, rushed to the local hospital for treatment, and then transferred to our hospital.

This is probably a main complaint and current medical history of the patient.

Ten years ago, this case was unqualified, because this case did not mention the previous treatment and effect of the patient, but at present, this case can be used as a template. Without a trace of cause and effect.

After Zhang Fan read it, "is there a leak in the chest?"

"Yes, the patient had a problem with endoscopic suture, resulting in wound suppuration, and then fistula. When he arrived at the hospital, the patient had septic shock." Yang Hao explained.

"OK, look at the patient first." Zhang Fan closed the medical record and said. The medical record is also checked. Nothing else can be seen. The writing is perfect. In this case, you a layman to file a lawsuit?

Don't talk about laymen. Even experts in the medical field can't do anything. Therefore, sometimes good things are not all good things!

Chapter 1395

Under the leadership of Yang Hao, Zhang Fan walked with the dean of the First Affiliated Hospital, followed by a group of general foreign doctors.

In particular, a group of inpatients who were about the same age as Zhang Fan secretly looked at Zhang Fan and whispered: "the three generations of Qiu school, this NIMA is much better than the four generations of our director, the diamond. Have you heard that academician Lu is now giving lectures to the major county hospitals of tea vegetable. "

"Why not come to the bird market? After all, the bird market is still the capital of the province! An academician went to the county hospital and wasted it! "

"NIMA, isn't the bluebird bigger than the bird market? Is the capital not bigger than the bird market? It's all about looking at the face of Zhang Yuan. I don't understand. How did you graduate from the master's degree? Didn't you wash socks for your Shiniang! "

The wronged man blushed and didn't know what to say.

Of course, these words are said privately by the hospitalized dogs. They dare not speak louder. The unit is not a school, and the director is not the former head teacher.

After entering the ward, Zhang Fan saw the patient, a middle-aged man who was thin and haggard.

And the body is full of all kinds of plastic channels, like white thin candles for birthday, which is almost lit.

The channel of the chest is a drainage tube. Because of the fistula, what leek leaves, spinach leaves and pig hooves are more or less leaked into the chest. It's okay to keep this thing for a day or two.

But once 48 hours passed, it began to ferment, and then pus formed. The local hospital did not open the chest horizontally, so it had to insert a tube for drainage.

Sometimes it's helpless. For example, in many county hospitals, various interventions have taken off, such as heart intervention bridging, which seems to improve the medical level of the hospital. In fact, NIMA is purely moving forward.

A county hospital, even without cardiac surgery, dares to intervene in the heart. If NIMA's heart is punctured, are you going to let the patient die on the spot, or open the chest to block the hole.

For example, the closed drainage of pneumothorax in a hospital can't be done. As a result, people even have bronchoscopy! It's still flying.

This kind of thing can't be said. There's no accident. It's really convenient. Patients in the county don't have to go to the city or superior hospital. Once something happens, NIMA is still unlucky for the patient.

For example, this patient is, what can Zhang Fan say, stand in front of the patient and accuse his initial hospital? It's useless, so Zhang fan can only see a doctor.

Patients have tubes in the upper body and many abdominal tubes, including urinary catheters, drainage tubes and nutrition tubes.

The small intestine is the big food of the human body. For example, if you don't eat for 48 hours, you will feel uncomfortable at most, but the intestine can't. once you don't eat on time, the villi on the intestinal mucosa will be necrotic and degenerated.

What is fluff? This thing is the mouth of the intestine, which is used to absorb nutrients.

For example, many people pay attention to a diet without eating. Their perseverance is amazing. They say they don't eat. They insist on eating breakfast every day for ten days and a half months.

Indeed, NIMA lost weight, her big face became an owl face, and her little belly disappeared, but suddenly she seemed to be a sick beauty.

From time to time, I have stomachache and abdominal discomfort. I go to the hospital for examination. There is no problem at all. I used to eat hot pot and dare to eat abnormal spicy food. Now if I eat a little spicy, I can loose and pull straight like a whip rod.

This is the intestinal mucosal damage caused by diet, which is irreparable.

So in the hospital, if a patient can't eat for a long time, he will never simply give you some fat emulsion, glucose and vitamins. First, he should give you an eye in the stomach, and then punch the chyle food directly into the intestine.

This is not only to maintain life, but also to avoid intestinal necrosis.

After seeing the patient, Yang Hao quickly introduced Zhang Fan to the patient and his family, which is the rule of the medical industry. This is also the so-called patient's right to know.

"This is the dean of Zhang Yuan, an expert in general foreign studies. We specially invited you for consultation." Yang Hao didn't mention tea. Sometimes it's true that the less doctors talk, the more problems they have. When the disease is mild, some doctors will teach patients with a tiger face.

Because he knows that as long as he is ill, he can say anything, you can, and everything you say is right.

But if you can't see well, the doctor will definitely cherish words like gold.

And tea is not as good as bird market. Ordinary people don't know much about this.

Zhang Fan nodded with a smile, then realized that the temperature of his hand was ok, and began to check his body.

To tell you the truth, it's the first time he's seen such a leak. Nima is suffering from pyemia after eating a fish, which is also going to kill her.

The shriveled abdomen and bowel sound are extremely weak, but the body is hot like an electric treasure in the body. Really suffer, there is a trachea near the neck, which leads to a urinary catheter. Weak hands are extravagant hopes.

People, once they can't eat, rely on people to feed, and rely on urinary catheters, life is really worse than death.

With both hands on the chest, the breathing range is obviously limited“ This is obviously caused by an internal infection in the chest. ”

The bowel sound is like nothing. After the stethoscope is placed on it for five minutes, I can slightly hear the bowel sound like a groan. It makes a slight sound. It's like a little milk cat without its mother.

The structure of the human body is very wonderful. Many places are similar or even homologous, such as kidneys and eggs. When they were young, the two guys even lived together, but when they grew up, they divided their homes and did different jobs.

For example, lips and anus, if you look at the structure carefully, you will find that NIMA is clearly a thing.

Although they are similar, they are still slightly different. At this point, slightly different structures lead to great differences in functions.

The egg can secrete the mask. Your kidney is dead. It's just a bloody urine.

The anus and lips are even different. If you put a banana in the anus, you can easily clip it without effort, but you can try with your lips. If it gets swollen, you can't clip it. Of course, biting is cheating.

Therefore, people are innate advantages, not always advantages. The day after tomorrow's efforts are the most important. If you don't work hard, you may not be able to cut the banana. Of course, the idea of reincarnation against the sky is not discussed with us.

The gut and esophagus are the same.

But the anatomical description of the two things is different. The esophagus is a muscular tubular organ with flat front and back, while the intestine is a tubular organ. But their structure is as like as two peas.

The intestines, like soft insects with many feet, push food through the anus wave by wave. The esophagus, too, pushes food toward the stomach in waves.

If you don't believe it, take a big tripod upside down and eat an egg, the egg can still go into your stomach.

As like as two peas, they have four layers, including intima, muscle, outer membrane and mucosa. But in the muscle layer, it's a little different.

The muscles of the small intestine are hard, but not tough. It's round, like a girl pursing her lips. It feels a little shaped. The muscles of the large intestine are like a greasy middle-aged man. Without hardness, NIMA has toughness.

The muscles of the esophagus are like a layer of cotton wool, which can't even support a little weight.

In this reality, you can find out. For example, if you eat stewed large intestine and the heat is not enough, you can eat a feeling of braised rubber. You can pull it constantly and waste your teeth. The small intestine, on the other hand, is different. It tastes just like it.

The esophagus is like eating steamed buns with some meat. It doesn't have any chewing power.

"The operation is difficult, but now the liver and kidney function can barely support. If the operation is not carried out as soon as possible, the physical condition will not support the operation in the future."

After Zhang Fan finished the physical examination, he not only told the attached doctor, but also told his family members and patients.

"Yes, because this kind of operation is very difficult! At present, the internal opinions of our department are not unified. "

"OK, let's go to the office and say that the family members have strengthened nutrition for the patients these days. There can be no shortage of protein and fat."

As soon as the Dean saw it, he quickly closed the topic and didn't say his own junk things in front of the patients.

Into the office. Zhang Fan is also welcome. He sits directly at the top. This makes sense. If you hold an administrative business meeting, even if Zhang Fan performs the operation well, he is not the president of the other people's hospital.

But when it comes to surgery today, Zhang Fan must have the same posture. After all, he has been

throwing knives so many times and has long trained a skill of control.

"First of all, I would like to commend the tube bed doctor of the first affiliated general surgery department. After the patient's fistula is formed, he enters the hospital and gives various drainage at the first time. It seems that the damage is great. In fact, you create hope for the patient.

Although we can't make a thorough diagnosis and treatment, this step is the basis of all future treatment. Yes, the doctors in Annex I can still pull it out. "

Zhang Fanyi said, a tube bed chief stood up and bowed slightly excited. Then he said it was the oral medical advice given by the superior teacher.

Zhang Fan nodded to a deputy director, "an old doctor is an old doctor. What you've seen is more. Director Li, have you seen this kind of injury?"

The superior deputy director of the bed doctor, when Zhang Fan called the roll, he had a conflict in his heart at the beginning. Although his level was not as good as Zhang Fan, he still had an identity after all. This is that it seems that foreign monks can recite scriptures. If you come to the capital as an expert. People don't have this resistance. It's strange.

However, Zhang Fan's first few words have satisfied the director. He can no longer be satisfied. This meeting has entered the working state" Zhang Yuan, to tell you the truth, I haven't seen it. I also gave oral medical orders by instinct, and the comrades below have strong executive power. "

"Yes!" Zhang Fan smiled and nodded, then turned his head and asked Lao Xu, "Dean Xu, you are an elder. Have you seen this kind of injury?"

After thinking a little, Lao Xu said, "I saw such a case when I was a resident in the major surgery department for 30 years. However, after the patient entered the hospital for examination, he didn't have an operation. After hearing the operation fee and nutrition fee, he directly pulled it home."

"Yes, esophageal cancer is common in the northwest, but esophageal fistula is rare, and it is more common in the south. Director Yang, have you seen it when you were studying? "

"Yes, I saw it when I was abroad. The operation is very difficult, mainly because the probability of secondary fistula formation after suture is particularly high, and the patient in our department has formed sepsis.

His fistula is more difficult to repair! So I advocate throwing a knife. "

"Yes!" Zhang Fan nodded, "director Yang said well. This cautious attitude is a qualified director of general foreign studies. This operation is difficult, especially in the case of rare fistula in Northwest China. Therefore, for this operation, I need the full cooperation of the directors and experts in Annex I!

About six assistants! "

The directors of Annex I heard that NIMA needed six people to repair a hole. You didn't mean to say that to support your nephew.

However, we just think about it a little. The operating table, especially this flying knife operating table, NIMA is similar to the battlefield. Zhang Fan should not be trifling.

In fact, when Zhang Fan asked, he took a look into the system. This fistula repair operation after infection and suppuration.

To tell you the truth, there are thousands of operations. There are really those kinds of operations that can make you ignorant.

Chapter 1396

"Director Yang, you will gather the key forces in the Department later. This operation must be done well, not only well, but also beautifully. The subordinate units have made mistakes. When we come here, people have no way to go. We can't take it lightly. This is your first assessment since you took office! "

When Zhang Fan finished, Xu Guangwei immediately followed Zhang Fan's words and began to give Yang Hao orders.

He also saw that Zhang Fan wanted to hold this. OK, it's OK for you to hold it up, but if it's useless, don't say that I don't give face to Lao Xu. Today I'll delegate administrative power to him to see whether he is a mule or a horse.

Some departments choose directors, but they really choose elites, such as obstetrics and gynecology. Even if this department has a way, if it is unable, it dare not find someone to reconcile it, because in this department, the state draws a red line.

It's an iron rule to die a few times a year if you give orders. The lightest step is accountability. Therefore, although the status of Obstetrics and gynecology is not high in the third class hospitals, you can see that the director of Obstetrics and gynecology is sometimes better than the vice president.

But some departments are the product of balance. Moreover, the larger the Department, the easier it is to cause this product to come out.

For example, Lao Huang, the director of tea element in those years, chose a soft faced and unskilled Lao Chen. Why? Because he cares about you, you are not obedient, and the following people will replace you every minute. There are only a few big departments in the hospital!

As long as he holds the tail roots of several directors of major departments in his hand, it's no big deal for the dean to divorce and change his wife every day.

The hospital is similar to any company, not just the one on TV. The mainstream is to treat patients and save people. The rest also have intrigues and workplace means. Can this kind of thing be stopped? It is estimated that we can only look at the future. Anyway, according to the life span of normal people, Zhang fan can't see it.

Therefore, when he was in his own hospital, Zhang Fan neither objected nor supported. For example, earlier, Ouyang suppressed Lao Gao. Zhang Fan just didn't understand. He thought Lao Gao had failed Ouyang in his early years. But look at Lao Gao's face, like a donkey, which accounted for a loyalty. If he could fail Ouyang in this way, the world would be unreasonable.

Later, Zhang Fan slowly understood that people still need to grow.

"OK, Dean, I understand. I will be responsible for the patient and for this position. Please rest assured that the president and Zhang Yuan. "

"OK. All right, pick someone yourself first. It's not easy for Zhang Yuan to come to the bird market. I have to treat Zhang Yuan well tonight. "

"All right, president Xu, we're not polite to each other. Today's martial arts competition is a little late. President Ouyang is estimated to be tired. Next time, I'll invite you next time!"

Zhang Fan refused Lao Xu's hospitality. Today is a happy day. There is no shortage of food. Let Lao Xu entertain. People in his own hospital are not happy. It's unnecessary.

When Zhang Fan left the meeting room, others asked Zhang Fan to persuade him not to send him off, but Yang Hao still followed Zhang Fan, pressing the elevator for Zhang Fan and leading the way for Zhang Fan.

"Others, why a consultation? All the people who followed me are gone." Zhang Fan asked Yang Hao.

"Well, the director of the hospital office took others to other departments. This is what the president meant."

"Hey, this old Xu wants to dig people!" However, Zhang Fan didn't take it to heart. These people brought out this time are seriously cultivated by himself in tea. If they are poached by Lao Xu.

This one has nothing to count.

In the Department of spine orthopedics, the deputy director of the hospital office introduced Wang Yanan and the snake playing fairy to the director of orthopedics.

In fact, there is no need to introduce them. Both Wang Yanan and Xu Xian graduated from Frontier Medical University. When they went to school, bone science was taught by the director of the first affiliated school.

"Hello, director!" Wang Yanan and Xu Xian said hello first.

"Ha ha, good, good. Wang Yanan, I remember you. When you were in my department, you removed the parts of my orthopedic teaching aids, and then you couldn't install them! Is it you? "

Wang Yanan was finally shy for once. But it was just a moment. In that year's big class, the orthopaedic director ostentatiously took a real bone model he collected to class. Other directors only have plastic or plaster in their hands, and only others have a real one.

As a result, when he peed after class, Wang Yanan felt free to take this thing apart and put it together like a building block.

Then he fell to the ground. After going to the bathroom, the director was not in the mood to punish. He even yelled and asked people to put all the parts away. He ran to the human solution room without going to class, because the glue of this thing is a special glue.

It's not a good friend in the market, such as May 20. The glue of this thing is said to be biological glue boiled from bones. Zhang Fan doesn't know whether it's true or false, because there are great differences in clinic and foundation.

"Director, you have a good memory!" Wang Yanan has grown up and doesn't hate people.

"Hey, you're old. Now you've changed from a tomboy to an expert Wang. Last time in the Chinese Journal of orthopedics, I saw the spine paper jointly published by you and the golden mean orthopedics. It's really good.

Good, good, contact more in the future, don't forget the teacher after graduation! "

Having said that, Wang Yanan looked at Xu Xian again.

"Xiao Xu, I regret seeing you. In the year when you graduated, the hospital didn't prepare it for us. At that time, you were asked to go to tea. If there were any possibility at that time, I would have left you with me.

The golden mean half year's study is over? Your paper level is getting better and better. The sum of all your senior brothers and junior brothers in our department is not as good as your paper published on SCI.

Now our department is just short of you two. As long as you like, I can get you the staffing even if I sleep in the dean's office. "

"Hehe, our study is not over yet. Zhang Yuan, that is, my master, contacted us for a year. Now I just came out of the joint and haven't gone to the spine. He has been staying in the bone Institute of others."

Wang Yanan didn't take over, so he said the current situation.

The orthopaedic director didn't care, and personally took two people around the Department. Briefly introduce the current situation and the occupancy rate of beds.

The director of orthopedics also knows that the hospitals in niaoshi are no longer attractive to tea doctors. Especially for one income, he thought it would be good for his doctor not to be pried away by others.

Those who still want to dig others, the president of his own family also wants to be blind.

Listening to the director's kind words and looking at the director's slightly ostentatious talk about the occupancy rate of his own hospital bed, Xu Xian really wanted to talk about the situation of his own department in his hospital, but he endured it again and again. He wanted to show off.

Really, he wanted to show off. He thought about the bitter master's graduation in those years. He originally wanted to stay in the first affiliated university. As a result, all the pits needed bidding. Finally, with the expectation of all his relatives and friends, he returned to the tea vegetable disheartened.

The director said that he didn't have a system in those years, but several of NIMA's classmates were, and Xu Xian didn't think much, because on the contrary, isn't it good now? The income they get in a year can't be earned by students in the bird market even if they prescribe big prescriptions every day.

And I don't have to lose my conscience. I also have learning, more freedom and convenience, and technology. Who can stand up for the war among the students who graduated in the same year.

Thinking about it, Xu Xian didn't hate it, but listened to the director's introduction quietly and

peacefully.

As for Wang Yanan, she didn't have any ideas at all. When she graduated from college, other students looked for ways, and they directly compiled tea vegetables. Therefore, listening to the director's words, in fact, she thought that attachment 1 was just like this!

"Director Xu, leave a wechat. When you graduate, everyone was noisy and didn't even have a contact information."

"Director Xu, do you have time to have dinner together in the evening? Although we were not in the same class, we were also in the same class."

Out of the orthopedic department, several orthopedic doctors in different classes of the same year came to Xu Xian and left contact information.

Wang Yanan looked at Xu Xian and politely added others' wechat. She was a little jealous because she felt that it would be nice to stand in front of them if there were students in attachment 1 and orthopedics.

Unfortunately, undergraduate students can't stay here.

Xue Xiaoqiao outside the brain is a wolf with a big tail, "well, you can't get your high-grade astrocytoma surgery? We have done a lot of tea vegetarians. They are mature operations.

However, it is estimated that our hospital can do it.

Have you carried out stereotactic pineal apical approach? We have just carried out cooperation with my alma mater. The source of disease is few and the development is slow. Dean Luo is your former director Luo.

I also went to the golden mean to borrow a patient. If people don't borrow it, it's not moral. Director Wang, there will be suitable patients here in the future. Please contact us. After all, we are brothers. "

All the way, all the way. The director outside the brain was annoyed. NIMA jumped up and hit someone.

But you said he pretended to brag, and what others said was real, but NIMA listened to this little young man with a capital accent, mouthing our tea vegetarians, mouthing our tea vegetarians, and the face of the director outside her brain turned green.

Other doctors, listening to Xue Xiaoqiao's words, showed envy in their eyes!

Old Xu thought that it would be good to bring one of the hospitals in the capital. He liked these boys and girls so much this game.

At first glance, he knew that he had worked hard. He pulled one. Even if he had a face-to-face quarrel with Zhang Fan, he thought it was worth it.

As a result

After leaving the hospital and waiting for a while, a group of people came chirping. The disdain faction led by Xue Fei and Xue Xiaoqiao didn't study and practice here, so after reading it today, I think that the first attachment is just like this.

"NIMA, stop talking about planes. There are only three operating vehicles. What's the use of this. Now I have a slightly more serious accident. I went out after a phone call and seven or eight surgeries. The helicopter opened up in front and the motorcade was moving behind. Is this the emergency center!

They say they are the general platform of Frontier emergency center? I think we should give this general platform to our hospital and our department. "

The white foam came out at the corners of Xue Fei's mouth.

There is also a row of happiness after psychological loss, such as Xu Xian and Ma Yichen. How can we say this? In addition to tea, people attach one or another, and the existence of the frontier boss.

But after the comparison, the goods have to be thrown away!

Chapter 1397

Before they got to the hotel, Zhang Fan and Xu Xian were contacted on Xu Xian's wechat, which meant whether they could go to tea vegetable or arrange to go to shuitanzi for further study. This makes Xu Xian very helpless. Originally, he thought that he attracted others by his own technology and appearance. As a result, NIMA's family originally robbed him of his places for further study.

This made Wang Yanan laugh at Xu Xian for a long time.

In fact, there is a difference between the medical industry and other industries. For example, the bottom of other industries is difficult to mix, and we should always guard against being laid off. The medical industry is different. As long as your money and material desire is not particularly high, how can you get retired after graduation and enter a small public hospital.

Then after retirement, go to a private hospital or a casual private clinic to pretend to be an old expert. The days are still moist. Especially in some small hospitals, there are more doctors and nurses than patients in the afternoon.

But even so, the state has to keep these hospitals and doctors. In hospitals of this level, if you let doctors go to study, others don't go. They don't give travel subsidies. There's no way to let them go to study.

Therefore, in China's medical industry, what is really difficult to mix is not high or low. For example, some top-level doctors who are not top-level hospitals are difficult to mix. Their majors should be compared with the top-level top-level top-level doctors, and their professional ability should be assessed frequently.

In case of an accident, this kind of hospital can not be compared with the top hospitals, and the struggle of colleagues makes everyone vigilant to each other.

There are only a few seats in a department. If you don't grab them, others will grab them. Therefore, doctors and nurses in this kind of hospital are extremely busy and tired. Of course, it seems a little unfair to doctors and nurses.

In fact, they are the backbone of the country's medical industry. There are no such famous medical experts. They are the main force. Therefore, Zhang Fan thinks that this sense of competition is also created by the country.

Of course, you lie flat. If the director loves anyone, don't talk about the country. I have nothing to do with you.

After entering the hotel, Zhang Fan sees old Chen Hu training Xiao Chen with a face. Xiao Chen is about to cry. Wang Hong, director of the hospital office on one side, wants to persuade again, but she can't hide her smile from the corner of her eyes. It's estimated that the persuasion and the ignition fan will stand half by half.

"Zhang Yuan!" Zhang Fan wanted to hide and go to the hotel, but Lao Chen still saw Zhang Fan.

People criticize their subordinates. As the Dean, Zhang Fan rarely intervenes. Unless the people below are unconvinced and come to complain, otherwise, Zhang Fan usually doesn't see it when he sees it.

"Oh, didn't you rest? You're all waiting for dinner!" Zhang Fan smiled and didn't ask anything. Xiao Chen's resentment was like an angry bag.

"Hey, you have to criticize me!" Old Chen approached Zhang Fan and whispered.

Although Xiao Chen did something wrong, he is still the soldier of Lao Chen. Lao Chen is very good and protects his calf.

"What's the matter? It's so serious. Go, go up and say. " Zhang Fan looked at Wang Yanan who leaned over to eat melons.

"Isn't this a dinner party? It's my fault. After squinting for a while, Ouyang was a little tired and asked Xiao Chen to book a restaurant!"

"What a big thing, not just a meal!" Zhang Fan said disapprovingly.

"It's mainly expensive. You see, it's more than 300 yuan per person." Lao Chen said with chagrin.

"Three hundred! It's a little expensive! " Although Zhang Fan doesn't have meat pain, it's a little more expensive for more than 20 people.

"I'll go back now."

"Wait, let me see the restaurant." Zhang Fan didn't let Lao Chen go.

Zhang Fan took a look at the seafood buffet. No wonder it's so expensive, but to tell the truth, you can't eat anything if you eat three hundred seafood buffet in the frontier.

However, all the orders were ordered, and everyone performed very well this time. Zhang Fan thought, "OK, just this one. It's not easy to come out once. OK, I'll wash my face, you'll clean up, and let's go to dinner.

It's estimated that Wang Yanan and Xue Fei are waiting to kill me. "

As soon as Lao Chen listened, he nodded and said yes“ Don't criticize Xiao Chen, take your time! "

"Good!"

This is Lao Chen. I think Xiao Chen is OK. If ordinary leaders don't say you, they will change your post when they go back. Then those who are changed feel inexplicable and think they don't wear black silk stockings!

.....

Zhang Fan washed his face and went out to see the tea doctor chirping in the hall. Led by Wang Yanan, with Bayin and Xu xianma Yichen, their young are crusading against Xue Fei.

Of course, this is the happiness of clinicians, not with the hospital office and the medical office.

"What about the European Academy?" Zhang Fan asked Wang Hong. Wang Hong looked at the elite doctors with envy, but she also knew that she had no talent and ruthlessness to join the team, so she could only stand and watch with a smile.

"I'll be down soon. The European hospital slept for a while. It's cleaning up."

When Ouyang came down, although her face was haggard, her hair was combed meticulously, and her clothes were ordinary, she looked like she was going to attend the China Sea Conference.

The buffet is very large. After entering the restaurant, Ouyang looked left and right curiously. It turned out that the old lady had never eaten a buffet.

"It's no different from the government meeting. There are a lot of fish and shrimp." Ouyang said to Zhang Fan.

"Well, it's actually a hot pot shop." Zhang Fan explained with a smile.

The old lady's life is actually very simple. Especially when she gets old, she goes home from work to watch Bangzi TV dramas and rarely goes out. If she had a biological child, it's estimated that Ouyang wouldn't be so homesick.

People, there are always disappointments.

.....

The most noisy people actually eat like that. Wang Yanan and the flower clamored to kill Zhang Fan, but they went into the restaurant, ate some yellow crabs, rinsed some mutton and ate a few mouthfuls of fish, so they lost their combat effectiveness.

Of course, there are exceptions. For example, Xue Fei and NIMA eat abalone, saying it supplements trace elements.

"The food is very rich, but it's all cooked in a pot. It doesn't taste very delicious."

The old lady can't eat pepper. She wants a three fresh pot. This frozen seafood doesn't suppress the peculiar smell of pepper. Anyway, the more she eats, the more she feels fishy.

Yes, of course. Zhang Fan did not let go of the restaurant owner. Although it is frozen, it is really not easy to eat seafood in the frontier. Crabs, prawns and all kinds of shells are welcome.

For a time, the food eaten by Zhang Fan, Xue Fei, Xue Xiaoqiao and Ma Yichen was called fierce, which made Li Cunhou forget to eat.

"This is the surgeon. He can eat and do well!"

Ouyang smiled and covered up for Zhang Fan. NIMA, the president of a third class hospital, seemed to have never eaten seafood. Ouyang felt a little ashamed.

The next day, I went home. Ouyang also went to the health bureau to get the first prize of the competition. Moreover, the number of places for the competition in the capital was also determined. This time, other hospitals in the frontier were completely destroyed, and all the places were occupied by the tea vegetable hospital.

The leaders of other hospitals are unwilling, but they have no face to say. I can only watch Ouyang go arrogantly with the certificate and list.

Just out of the bird market, Zhao Yanfang called Zhang Fan.

"How many in Marubeni are going to withdraw their capital? Do you want to take the extension medicine alone? Why? " In the fog of Zhang Fan's head, NIMA had cooperated well. Seeing that the drugs were going to enter the clinic, NIMA played a moth at this time.

"I don't know. Their pharmacology director asked me to talk today. As soon as they met, they said they were going to withdraw their capital. Only a few university affiliated hospitals have not moved, several pharmaceutical enterprises have to withdraw their capital, and they have to discuss the buyout of pharmaceutical achievements with us. "

"Is this NIMA crazy? OK, I see. I'm out of the bird market. I'll be home in the afternoon. "

After hanging up, Zhang Fan thought a little and told Ouyang, Li Cunhou and Lao Chen about the matter.

To tell you the truth, Kost jenima is good at meeting on this vehicle.

"Do they want to eat it alone?" Ouyang asked.

"No, many hospitals and pharmaceutical companies in the two countries participated in this drug. It is impossible for them to swallow it alone.

Did they find new derivative drugs? It's impossible. All the data are in tea. Even if derivatives are not necessarily less than the current R & D expenses, why should they? " Li Cunhou doesn't understand.

"It is estimated that the starting price is sitting on the ground. I want more shares." Lao Chen said it without much thought.

"No, they never said it. I haven't seen them dissatisfied! " Zhang Fan was also confused.

In fact, Marubeni didn't come for delay medicine this time. To be honest, although it's a golden hen, it hasn't risen to the point where it has to be won.

Moreover, compared with not getting up, more people will pay attention to not getting up, because it is a hard injury, and many people don't pay much attention to looking at the door.

The real intention of others is the new skin transplantation material jointly studied by the tea element hospital and the Digital Research Institute.

That's what people really think.

This technology seems to be worthless at ordinary times, but once it reaches a critical moment, it is a very important technology.

For example, in the event of war, especially the shock wave of modern war, all kinds of burn weapons can be found everywhere. Once this technology is available, it is definitely one of the technologies to relieve the army's worries.

The pharmaceutical enterprises in Marubeni originally wanted to join, but they wanted tea and even golden hair. Therefore, they thought about it and felt that they should use delayed drugs as an introduction to finally achieve the technology of skin transplantation.

In the originally happy car, the rest of Quan NIMA thought. Why?

Zhang Fan really didn't think of it, little pill. What's wrong with this.

In the other car, Xue Fei can sing the Sichuan music version of thank you for your love, which makes a lot of people in the car laugh. In addition, Xue Fei's funny expression. Don't listen. It's a pity to see this boy as a doctor.

As soon as the car came in, the phone came again, but this time it wasn't Zhao Yanfang's, but Ren Li's.

Chapter 1398

Ren Li called, which made everyone nervous. In the configuration of tea vegetable hospital, Ren Li is the second leader, not Ouyang, not Lao Zhao, not Lao Chen. Lao Ren is the second leader of the hospital.

Usually, Ren Li doesn't see much. Although this woman looks soft and weak, she has a tenacity in her bones and a posture of rather bending than bending. Give her a job. Generally, she doesn't do it. When she does it, she will never ask for help.

When Zhang Fan said he would be the Secretary, the leaders in the car straightened their necks and sat

up straight one by one. Those who want me to be a secretary don't compete for power and profit. Is it kind of you to reach out?

Luo Zhengguo is in charge of extracerebral and cardiothoracic surgery plus one neurology. These three departments are also one of the weakest departments in the tea element hospital. It is not that doctors don't work hard, but that they start late and are difficult.

It can be said that the tea vegetable hospital now seems to have done a lot of mature operations. In fact, in these departments, it is done. People's big cities and big hospitals have already completed operations for many years.

In this way, catechin's extracerebral cardiothoracic surgery can still be powerful in the frontier. It is conceivable that the development and difficulty of these disciplines in general provinces. Therefore, many patients outside the brain, far from big cities, either hang up or have extremely troublesome surgical sequelae.

Yan Xiaoyu is responsible for endocrine digestion. There are also women's federations. Now digestion is different for Zhang Fan. The enterprising spirit and effort of doctors are different, but endocrine, Zhang Fan is still a little helpless.

The so-called environment is so. Although the income of the tea vegetable hospital is already very high, it is an allowance for most endocrine doctors. As long as Zhang Fan doesn't fire them, I still make up all day, wear silk stockings and high heels, and be my rich wife.

Moreover, the women's Federation does not say that it is not important, nor can it say that it is important. The family is short, March 8th and nurse's day should be presided over and participated in by the women's Federation. For example, the little nurse let her husband call. In ordinary units or enterprises, few unit leaders participate.

But it's different in the frontier. As long as you report to the unit, the leaders of the hospital first talk to men. If they can't talk, they can directly find the leaders of the other enterprise or unit. If they can't, they can intervene directly.

Therefore, small places also have the advantages of small places.

Anyway, this department must have, and it must also be the responsibility of a major leader. To Ren Li, to Ren Li, to Ouyang, is to humiliate the old lady. It is estimated that she will be spitting on her Tui face.

Lao Chen is responsible for the medical department, logistics, general affairs, pharmacy and equipment department. Anyway, all the trivial things in the hospital will never be wrong to find Lao Chen. In the past, these departments were not robbed except the medical department. The equipment department of the logistics pharmacy was almost the Department that laid golden eggs.

It has been said that the leaders of these departments can be directly sent to prison without trial. Although exaggerated, we can also see the importance of these departments.

Lao Chen did this very well. He ate and drank small favors. He didn't refuse to come. He crossed the line a little. He began to pretend to be confused. He didn't talk about important bidding. He gave all bidding more than 100000 to Zhang Fan for signature.

He's just a suggestion. He's not in charge. Because he knows that Zhang Fan is young and too young. This kind of leadership has a long way to go. If you follow him, you may be able to honor your ancestors, so there is no need to overturn on the way.

It's like a rising enterprise, everything is good, and when it comes to a closing enterprise, NIMA's demons and ghosts appear. It's not how high people's quality is, but everyone's running.

As for Ouyang, he is also responsible for the work of the hospital's Discipline Inspection Commission and the task of Party Construction in the hospital. In other aspects, the old lady gave it all to Zhang Fan long ago. A pair of old women now give you their belongings. You love ho ho ho, and I'm ready to complete my task.

This is the responsibility of the team members, and the vice president did not enter the executive level. Lao Gao is now responsible for outreach and training, especially training, which is the most important work of tea element hospital in addition to clinical work.

Although this job seems not light or heavy, this thing here is a hospital, and the training of doctors is extremely important. The country has been shouting for decades about the pre job training and post continuing education of doctors. Whether there is any effect or not, but it also floats on the surface.

The team cooperation of doctors in the tea vegetable hospital is so awesome. In the big competition of medical technology, several top three deputy high heads in the bird market can't lift up. On the one hand, they go abroad for study, on the other hand, they are unknown in-hospital training.

Without in-hospital training, all overseas study is a flash in the pan. Therefore, Zhang Fan is not at ease when handing over this extremely important work to others, so he can only go to Laogao.

Jumabek, Lao Ju is responsible for breathing and the trade union. Although he didn't join the team, he is

now the chairman of the trade union and the senior leader of the hospital. This is a consolation award. If you don't give him face, the old guy is expected to annoy Lao Chen to death.

The rest, such as the nursing department and various departments, are small comprehensive units. The hospital is like an onion layer by layer.

Therefore, when Ren Li called, we had to be nervous. "What?" when Zhang Fan heard this, a very strange expression appeared on his face.

"Zhang Yuan, what should we do now? People have driven sheep and cattle into the backyard of the hospital. All the children in the kindergarten think that the backyard of our hospital will be transformed into a zoo! Not only the children, but also the adults have come to join the fun and said that the backyard of the tea vegetable hospital will be turned into a bazaar."

Ren Li was on the phone and didn't know what to say.

People still have to do good. The trouble in the meatball country made Zhang Fan feel indistinctly uncomfortable. But today, the first time they came home, they heard a good news, although it was a little funny.

It turned out that the shepherd they rescued on the road had an operation and informed his family. Then Zhang Fan and they should have completed the task.

But when the people of this family heard that they were saved by the doctor of their own tea vegetable hospital and didn't ask for medical expenses (the insurance company came out! The herdsman didn't understand). They looked after NIMA, a good man. Then when they returned to tea vegetable, they went straight up the mountain to drive cattle and sheep.

In pastoral areas, a herdsman with grassland, to be honest, if his assets are viewed from the perspective of urban people, there is no problem with millions. Moreover, NIMA is a renewable resource. As long as the grassland is, there will always be capital to start.

But what can people say about this? It is regarded as a life, not a career. That is to say, herding sheep is life, not to make a fortune. A family, hundreds of sheep, thousands of cattle and dozens of horses, will sell them and enjoy them in the city.

But they often don't. anyway, according to the city people or non herdsmen, they can't understand.

This time, people think that the doctors in the tea vegetable hospital saved people. They want to repay them. What should we do? Directly drove hundreds of sheep into the city.

The traffic police wouldn't let them. They said they were sent to the tea vegetable hospital. They wanted to thank them for the operation. The traffic police thought that these people came to pay the medical expenses, so they reluctantly escorted them into the tea vegetable hospital.

After entering the tea vegetable hospital, Ouyang not only planted cactus in his office, but also planted all kinds of flowers and plants in the garden in the yard. After the NIMA sheep entered, the car horn and the crowd were already very flustered.

But as soon as I saw the flowers and plants all over the yard, I directly spread flowers and broke in.

Ren Li was in the clinic, but the guard said a large group of sheep had been killed in the hospital. She thought the chief of the security department was drunk again today.

But looking out from the window, she felt a little faint. It was white. She estimated that this was the most sheep she had seen in the city in her life. The sheep bleated in the tea vegetable hospital. The children in the kindergarten gathered around and looked at the flowers planted by Ouyang in their hands.

There are also hospitalized patients with mild illness. Groups of people look at sheep, as if they had never seen sheep in their life.

The officers of the security section stopped people, one for three, and the kenima sheep could not be commanded by their laymen.

"Hurry up, my God, the peonies of the European Academy. Come and see them every day. The flowers grow only when they are cooing. As a result, they are Huohuo today!" the chief of the security section looked at the sheep who didn't know where to come from.

Ren Li has no way upstairs. What should I do! She really didn't think that one day she had to face the problem of sheep in the hospital. Nima won't be the sheep made by the Hua hospital next door to destroy the good situation of our hospital!

Chapter 1399

"You say, at this juncture, it's really uncomfortable for the meatball country to give us such a visit."

In the conference room, Zhao Jingjin said with a sad face. Although he is not responsible for scientific research, the intestinal department belongs to his management. As long as the drugs are delayed in the future, how can the gastrointestinal department be divided.

As long as there is this little bit, compared with sildenafil, even if there is only half of sildenafil's income, his gastroenterology department can eat well. He doesn't want to buy anything in the future, but NIMA's future dreams are well done. As a result, he woke up and lost hundreds of millions of money!

Therefore, the folds on his face are more like a dishcloth that has been used in the kitchen for many years.

Team members and leaders at the vice president level all attended the meeting, and Zhao Yanfang also attended the meeting as a nonvoting delegate. However, Lao Chen is not here. Lao Chen will be busy dealing with the sheep incident. Originally, Ouyang wanted to go there in person. It was so beautiful.

In order to thank the doctors of the tea vegetable hospital for sending a group of sheep, not to mention eating the broken peonies in the flower bed, even if they chew all the trees in the hospital, Ouyang will grin, not only smile, but also invite TV stations and newspaper reporters to publicize it.

But I'm not in the mood today. Xiaowanzi has made trouble. Of course, the purpose of the hospital is to persuade herdsmen to drive the sheep back. If they really don't agree, they will spend money to buy them.

It doesn't matter if you take this thing as a gift. If you really take a group of sheep, it's estimated that the tea vegetable government will have trouble with the tea vegetable hospital.

Lao Chen looked at a group of sheep and estimated that the doctors and nurses in the tea vegetable hospital had mutton pasted with autumn fat.

When autumn comes, the grassland like tea is fat and strong, but the price of sheep is also the lowest at this time. Lao Chen looked at the herdsman's posture and just said to buy, but they didn't hesitate to agree.

This NIMA Lao Chen thinks that the current herdsmen are also bad at learning. Is this guy here to sell sheep or to thank?

However, now a big tea vegetable hospital doesn't care about this money. It's enough to have a reputation. It's not easy for people to drive a group of sheep. Lao Chen collects them according to the price in winter. The sheep house in winter is the most expensive.

In the conference room, everyone was no longer in the mood for baa downstairs.

In particular, Lao Zhao and Zhao Jingjin, who studied in Marubeni in those years, have complex feelings for Marubeni and know Marubeni very well, so Lao Zhao feels sad and dying.

"The current situation is that the researchers in our laboratory and the researchers in Marubeni are mixed together and cooperate together. It doesn't matter if they withdraw their funds. They are afraid that once they withdraw their researchers and miss the golden period of new drug research and development and are derived from similar drugs by others, even if our drugs are successfully listed in the end..."

Zhao Yanfang introduced the specific situation.

"They didn't show any signs before?" Yan Xiaoyu asked.

"No, just yesterday, everything was fine!"

Zhang Fan took a sip of tea and felt a little upset. He felt too chicken nonsense.

Because the cooperation of tea vegetable hospital is often smooth sailing. So in this situation, he felt troublesome in his heart, and felt that NIMA was like playing at home. If she said she didn't play, she wouldn't play.

Zhang Fan didn't speak. Several other leaders said their opinions one by one. Most of them first found out what the goods in Marubeni wanted, whether they started from the ground, or what they wanted.

Zhang Fan didn't speak, neither did Ouyang. When everyone was about to discuss, Ouyang looked at Zhang Fan. Zhang Fan understood that this was to ask him not to speak first. Zhang Fan nodded imperceptibly.

Ouyang saw that Zhang Fan understood his meaning and spoke.

He patted the microphone in front of him. Although there were only a few people, there were still some microphones. Xiao Chen of the medical department was very careful and disciplined in his work.

"I listened to everyone's views. Everyone has an idea of worrying about the withdrawal of capital or scientific researchers from marukuo. In fact, it's not necessary. In those days, we were too poor to eat. We still played with TV and refrigerator in marukuo.

Are we still worse off than when we were poor? Comrades, we have what we want and what we are afraid of them doing. Don't they know how to play tricks? We feel like we are poor and can't open the pot.

Trying to threaten us!

Damn it, they're looking up at the sky. No matter what they want, we can't let him succeed.

Master Mao said that we despise the enemy strategically and attach importance to the enemy tactically. Our focus now is not on what they want to do, but on what we should do.

My opinion is that in terms of funds, we should first find ways to fill the hole in their withdrawal, and then find partners.

China is so big that I don't believe it. Do all pharmaceutical factories sell health products? They don't understand the importance of the original medicine?

As for researchers, there's no need to worry. Didn't Shuimu drool after seeing the golden mean cooperate with us?

As long as they dare to withdraw their researchers, we will make do with it and let Shuimu send someone over. Of course, after all, we are all a family. Can we let them bring funds into the group? The state gives them so much money a year, and they can't spend it!

This is my opinion. Please consider it by the president and leaders.

Moreover, this time, we should have a vigilant heart and a vigilant heart of cooperation with Marubeni countries. Comrades, capitalism will never die. We can't take it lightly! "

"Cough, cough, cough!" Zhang Fan was drinking tea. He listened to what the old lady said. He had an idea in his heart and didn't get upset. When he heard the old lady's last sentence, he was choked directly.

That's right, right! But it sounds like it's too big, and it's a little far away. If you don't interrupt, it's estimated that Ouyang will first analyze the current situation. Of course, Zhang Fanyi coughed and the old lady stopped talking, but she glanced at Zhang Fan with great dissatisfaction.

It seems that I haven't said I'm happy yet! I haven't finished talking about the key points. You are so interested in me!

As soon as the old lady said a few words, the original gloomy conference room was like the light of NIMA's sun, and the color of the office lit up.

Yes, what are we afraid of? We're not Xiaomi and rifles now. If we want anti-aircraft guns and have anti-aircraft guns, are we afraid of a meatball country that has been beaten to play with TV and refrigerator?

Sometimes, this person is like this. First of all, you should be hard. You can't complain that the holes given to you by others are too small. If you are hard first, you are not afraid of any size holes, but if you can't be hard, even if you give you a big door, you will vomit at the door.

"Yes, what the European Court said is right. We can prepare with both hands. It's best to cooperate with meatball countries. It's ok if we don't cooperate. We can negotiate with them in a responsible attitude, but we can't pinch us around like mud dolls.

We can contact Shuimu first, which not only puts pressure on pill state pharmaceutical enterprises, but also we have a second choice. "

When Ren Li saw that Ouyang had spoken, she immediately agreed with the old lady with both hands and feet, and also picked up loopholes and made up for them.

As soon as Ren Li finished, everyone nodded.

Then everyone looked at Zhang Fan. Although the collective responsibility system, the opinions of the chief officer were the most important.

"The opinions of comrades fully reflect the combat effectiveness of the leading group of our hospital. They have the idea of being mature and prudent in the European Academy, and several academicians and doctors have forward-looking views. They are all right.

Well, we can contact Shuimu first according to the method of the European Academy. Here, please president Li and Dr. Zhao Yanfang. You are more familiar than us. We can establish contact first.

We should not only talk with Shuimu, but also know about MARUKI. This is up to president Zhao Jingjin. We should let them know that we still have a choice, and we should establish a guarantee system.

This time they said they would quit if they quit, which clearly reflects their unprofessional and arbitrary cooperation.

Therefore, we need to set up a security system. For example, when they turn back this time, we welcome them. We welcome them with both hands. However, when they turn back this time, someone has to pay the bill. We can't just turn back. Our tea vegetable hospital is not a place to come in and go out casually.

We can discuss how to set up this security system. We can set up an account like a fuse in the economy. If they go back on their word, can we take out the money.

As the old saying goes, since you've done 15, don't blame me for being the first day of junior high school. If you can come, don't allow me to go? So we must discuss this system later.

The hospital needs equipment for internal medicine this year... "

It's Ren Li's turn to cough this time. Ren Li, who covered her forehead, lowered her head. She didn't know whether she was laughing or laughing. Anyway, the small hair on her temples was shaking like a small leaf.

Ouyang also glanced at Zhang Fan angrily, because some things can be done but can't be said. Nima, where is the fuse? You're obviously going to pit others, but why did you say it!

I don't know whether Zhang Fan influenced Ouyang or Ouyang lit a lamp for Zhang Fan. On the contrary, Zhang Fan is becoming more and more sophisticated in his working methods and methods.

Zhao Yanfang looked silly and listened silly. She shouted loudly in her heart: This NIMA is the leader! Nima is a bureaucrat. No wonder I used to be bullied. I can still do this.

"Well, I agree with the president that there must be an insurance system or risk protection, but we can also move forward slowly and can't scare people away. After all, our original intention is to engage in R & D!"

Lao Li said with a smile. In fact, he didn't finish.

In the backyard of the hospital, old Chen shouted that a group of young boys would catch sheep. A professional butcher was invited and dealt with it on the spot.

"Chen Yuan, what are we doing today? Are so many sheep going to be welfare for us?"

Xue Fei looked at the fat sheep's tail and his saliva came down.

Now it's the best time to eat mutton. Sheep who have eaten grass all summer do not eat fattening feed at all. Even the fat of sheep is hard fat rather than soft fat.

A handful of green salt can make people want to swallow their tongue.

"What do you think? Stop talking nonsense and help quickly. I'll inform the directors of various departments later and send mutton in the evening!"

Chapter 1400

"Tea vegetable hospital, NIMA has welfare again! One person and one sheep. Look, the fat nurse carries the sheep. NIMA is like a pig walking with a sheep!"

In Huahua hospital, everyone looked at the tea vegetable hospital with envy in the high-rise office.

In the early years, the tea plant was in a big place. There was a busy street around the front and back. Almost all government units were in the same street. So was the hospital. The distance between China Hospital and tea plant hospital was at the tip of the nose.

In the past, the two hospitals were well. After Ouyang came to power, the two hospitals were full of hostility from top to bottom. When Zhang Fan came to power, the leaders of Huahua hospital wanted to move out of this place early.

Because the benefits of the tea vegetable hospital are too good. As long as the tea vegetable hospital gives benefits during the Spring Festival, the employees of its own hospital can be impotent for several months.

"NIMA, what day is it today? It's not a legal holiday. What are they doing in the tea vegetable hospital? Don't deceive people too much!"

The leaders of China Hospital also saw the mutton in the tea vegetable hospital. In the tea vegetable hospital, the processed mutton was smooth, like a naked beauty, holding one head.

Zhennima looks angry. China hospital can't afford mutton, but NIMA can't afford to send welfare so often.

"Dean, don't be angry. The autumn tiger hasn't left yet. They will have nosebleed after eating mutton. They don't know how to maintain at all. They are also known as doctors, just a group of mallets!"

"Hey, today's Hospital mobilization meeting will not be held first, let's talk about it in a few days!" the sad Dean wanted to have a meeting to cheer everyone up and work well, but how can NIMA hold it!

No comparison, no harm!

When Zhang Fan and Ouyang got home, the meeting was over. I don't know what others think. Anyway, Ren Li was relieved. No matter whether it was sheep baaing outside or the meatball country was making a fuss to go, anyway, president Ren has entered a state of self admiration again and didn't worry about anything.

When others say something, she will open her mouth in surprise and say, "don't the Dean know? Then tell him!" or, "Oh, this matter, this matter needs to be decided by the European Academy."

Really, in any case, she would hardly take the initiative to express her opinions on anything other than internal medicine, but the more so, Zhang Fan paid more attention to president Ren's opinions. This

directly made latecomers, especially vice president Yan Xiaoyu, who was also a female, jealous and almost imploded.

Individuals have their own fate. You really can't learn this stuff.

.....

"How can I be two sheep?" Zhang Fan opened the door after work and asked Lao Chen behind him.

"Several more sheep came out. I gave each of the doctors and nurses involved in the rescue one more. Your second is the smallest, and others are bigger than yours!"

Lao Chen said with a smile.

But Zhang Fan looked at the two sheep in the car and couldn't say. Lao Chen said the smallest, but the sheep tail felt bigger than Zhang Fan's own head. Can this be the smallest!

"I can't finish eating, there are few people in my family..." Zhang Fan whispered against Lao Chen.

"Isn't old Lu there? He doesn't want to send others. This will be our local specialty. Don't care!"

Zhang Fan only nodded and said with emotion: "did they drive the sheep of their whole tribe!"

"Hehe, there are about 2000. In the morning, the traffic police department and the environmental sanitation department also called. The traffic police said that it could not be like this next time. The traffic in the urban area was almost paralyzed. If it weren't for your face, they would all rush back.

The environmental sanitation said it was hard for us to pay 20000 yuan for overtime cleaning sheep dung. It was not a fine, but it was equivalent to giving some labor fees. It was estimated that we were very angry. "

Zhang Fan's head was big. "Let the financial staff send the money to others quickly. It's done!"

In the past, when the traffic was inconvenient, let alone the grassland where people could not be seen for dozens of kilometers, even the people in border cities were quite hospitable and simple. How to say these years? It has changed slightly anyway.

Zhang Fan has heard a joke that is not a joke. It was said that southerners fooled people in border cities with paper leather shoes, and people in border cities went to the grassland to buy sheep with the simulated money of bank practice counting.

Then, the environment became as smart as everyone. A car passed and killed three sheep with big horns. Then the herdsman asked you to accompany six. You were angry and said, "you have dolls in your

stomach!"

Lao Chen watched Zhang fan drive away. When the car got out of the hospital, he couldn't see it. Then he turned back and went to the office.

Zhang Fan certainly didn't look at it in the rearview mirror, but Lao Chen is used to it. Although it is a small detail, it can definitely make others feel his respect.

When Lao Chen returned to the office, he still had work. The mutton hasn't been delivered yet. People who rest today have to call to get the mutton. They have to send some to the traffic police team and the sanitation team. It's not much. It's also a thought.

Anyway, the work is so trivial that most people can't stand it for a few days, but Lao Chen can do it for several years.

.....

"Why did you buy two sheep today?" Shaohua asked in surprise when he came home and saw Zhang Fan in the yard open the door.

Zhang Fan seldom buys mutton at home unless he wants to entertain guests or something, but he usually greets her in advance.

"Welfare of the unit!" Zhang Fan said to Shaohua with a smile. It's autumn. Shaohua has been busy going to the farm recently.

Last year, two old men wanted to play with lavender on the farm, but they were almost bullied. This year, let alone the two old men, the two old ladies won't let them interfere, so Shaohua has to support them all.

Although the autumn sunshine makes Shaohua not as white as before, his face is slightly wheat colored, which is more healthy than before.

He helped Zhang Fan carry the mutton into the kitchen. Although Zhang Fan didn't let Shaohua do it, Shaohua helped Zhang Fan carry a leg of mutton. He was afraid that the slaughtered fat sheep would crush his husband.

"The mutton is very fresh. I'll call Shifu and Shiniang to have some mutton soup later. I'll take this one back to the farm tomorrow and the day after tomorrow for my parents to eat." Shaohua arranged the next thing.

As soon as he entered the house, Zhang Fan followed the style of focusing on big things and ignoring small things. He rarely made up his mind at home. Even if Shaohua asked, he would pretend to be stupid and can't say one, two or three unless Shaohua asked again.

Although this small means can make couples have a sense of harmony. Unlike some people, I don't know how much leadership I have become outside. Anyway, I go home as if I were in a meeting. I treat my wife as if I were my deputy.

I don't know how they live a husband and wife life, but it's better when they are in office. It's estimated that they've been on top all the time. Once they retire, life will be difficult.

The tea vegetable government also arranged a small villa for academician Lu in Zhang Fan's community, but the old man was in the county most of the time and in Zhang Fan's house when he came to the city.

"Is Shifu Shiniang back?" Zhang Fan asked Shaohua.

"I'm back. I'll come back in the afternoon. Go and see if the old couple have a good rest."

"OK!" Zhang Fan nodded and went out to call the old man and the old lady.

After entering the door, Zhang Fan saw an old man he hadn't seen for many days. The old man looked at the computer with a book and recorded it. Although he looked thinner, people changed from the morbid white of the office to a little black.

But the spirit is good. Seeing Zhang Fan coming in, the old man looked at it and didn't speak. "Master, what are you doing?"

"Well, look at some information!" he hurriedly closed the notebook in his hand, as if he was afraid of Zhang Fan seeing it.

The old lady came out of the bedroom with a smile, "little stone, you're off work. Your master is looking for teaching materials!"

"Why, you still need to find teaching materials? You have to review your lessons when you meet a Qianlima."

Zhang Fan sat beside the old man with a smile.

"Hey!" the old man saw that the old lady had broken it and didn't hide it.

He sighed and said, "in the past, teaching your martial brothers can't be said to kill three with one stroke, but it's almost transparent. Especially you young people don't need my teaching in surgery.

But when I arrived at the county and township, I felt powerless. You can't teach him many surgical methods, but he is only a surgeon in Manxiang township. I'm not looking at the early teaching materials on the Internet to see if there are some simpler and simpler methods. "

After listening, Zhang Fan doesn't think so. The old man is a member of the Bureau. Since the siphon phenomenon was formed in the medical industry, almost all those who have a little Kung Fu have gone from the lower level to the higher level.

The rest of what has become, do not need Zhang Fan to say, you look at the number of patients to understand, the patient is not a fool.

Zhang Fan has to use the old man recently, so he can't point it out. If the old man gets angry and the old man doesn't give you help, Zhang Fan has no way at all.

"Well, Shifu's idea is right. I'll ask the organization of the medical education department of the hospital to help you sort it out later, just like the barefoot doctor's manual in those years, and get an upgraded version!"

"Go! You know how to make me happy. Don't underestimate the barefoot doctor's manual. It was compiled by top doctors in the country in those years. Although it looks simple now, it is no less than the classic works of the medical industry in those years."

"Well, that's right! It's said that you and my master also participated in that year. The one you were responsible for!"

What the old man liked to hear and what Zhang Fan asked, the old man was happy and foamed at the corners of his mouth.

The old lady saw the two men chatting. She didn't get involved, so she went out to help Shaohua cook.

The old man said and said that since he was a student, he has always talked about how to be the dean of Qingniao and how to make efforts in scientific research.

Although he was curious about how this son of a bitch was so patient today, he was able to listen to his own experience in scientific research and his history as president. It was a missionary to dispel doubts and teach.

So the old man was happy.

After chatting for more than two hours, the old man concluded. Zhang Fan seems to have gained a great harvest. Anyway, I don't know whether it's true or not, but it's no problem to fool the old man.

"Master, don't go to prefectures and counties these days. You have to go to the tea vegetable hospital to help me."

"What?" the old man raised his vigilance.

Just as Lao Tzu doesn't like his son's career, the old man thinks it's an evil way for Zhang Fan to make a

big deal, but Zhang Fan's family is doing well now, so the old man is out of sight and out of mind, and rarely goes to the tea vegetable hospital directly.

"I also have a group of people who want you to train! No one else here, including me!"

"What are you going to do?" the old man thought for a long time and didn't understand.

Zhang Fan smiled. "Didn't the leaders say that we are training talents in the wrong way? In this medical contest, we have all the places in the frontier occupied by the tea vegetable hospital. In the frontier competition, you don't have to go, I'll go.

But if I go to the capital to compete, I'll be a little out of my pocket, so you have to help me! "

"You haven't given up yet!" the old man thought that the big leaders were talking. Zhang Fan should give up. Unexpectedly, this rabbit is like brown sugar. He just doesn't give up.
