

Chapter 1441

To be honest, once energy is involved, it is really easy to make rich. For example, a piece of cloth on top of my head is my richest oil country in the world. In the early years, NIMA didn't have enough water to drink. When there were camels and multiparous sheep, who would have thought they could be today.

It's the same everywhere. For example, in the residential areas of China's major oil bases, ordinary people outside feel that the quality of people here is really high and the welfare here is good. Has it reached a certain doctrine.

There are coal bosses in the west of the mountain and roujiamo. For ordinary people, the one in the west of the mountain is more famous, because big fat bear married a beauty who only wanted to marry once a year.

Of course, there are also negative examples, such as the fishing gate in Jiangsu Province, and barren ghosts are afraid. But the oil workers in Jiangsu Province are still good. Many later oil fields are fishermen who go out.

When he learned about the two options of the capital and tea, the family of the coal boss immediately began to contact the doctors he knew, as well as the partners in the capital and bird market to inquire about the orthopedic doctors.

Contacts started at this time. Many people think it's good for NIMA to have money. They can inquire everywhere. In fact, if the boss of this size is placed in Jinmao, there is no need to inquire. Many top hospitals in Jinmao are membership.

Is to pay sponsorship fees to the hospital every year. Many people think that golden hair medical treatment is good and the level is high. To tell the truth, it is true that the level is high, but ordinary people may not be able to enjoy it. The simplest, Mayo, no, No.

The leaders who attend the charity party at the end of each year can enjoy priority treatment, even pay a little more, and enjoy the scientific research team specially established for you. In China, these local tyrants have to ask who did the operation.

This is the difference. This is the difference between service objects. Many local tyrants get their hukou

to a street city, in fact, in order to enjoy preferential treatment and many-to-one medical security provided by the expert group.

Try it in other cities in China. NIMA will check whether you have evaded taxes first. This is really a good policy for ordinary people. Of course, money is better than no money, which is also a fact.

"Mr. Zhao, I'm Wang Qian of Muxian county. My husband had a car accident. The injury was very serious. The experts here suggested transferring to another hospital and gave two choices, one is the capital and the other is tea. I want to ask, do you know the experts of tea, especially in orthopedics."

President Zhao, the boss of blue and white, this enterprise is just like the primary school students required by the state in the past, with all-round development. From energy to real estate, from real estate to culture and sports, it is really all-round development.

As soon as Mr. Zhao heard it, he thought it was the same value. What Lao Zhao thought was not that the other party was dead or alive. What came out of his subconscious mind for the first time was: "this NIMA can't be a conspiracy!"

"I know the Zhang Hospital of tea vegetable. I can contact Mr. Gan if necessary." Lao Zhao didn't tell the truth. Zhang Fan is too familiar with him. His father's liver cancer operation was done by Zhang Fan.

Why didn't Lao Zhao tell the truth, because the water in it is too deep. Who can know what's going on with Lao Gan? Moreover, the streets are full of white when his wife is dead and no one buries his master when he is dead, which has been the case since ancient times.

This is also the reason why Zhang Fan has a closer relationship with the winery boss, but has a general relationship with Lao Zhao, who has a larger body. The winery boss is relatively more like an individual and an ordinary person.

When Lao Zhao said this, the other party didn't tangle. After two polite sentences, he hung up the phone. Then continue to ask others, other reliable people.

"Zhang Fan, President of tea vegetable hospital, orthopedic doctor, studied under academician Lu of puwai..."

Looking at Zhang Fan's resume, the families of boss Gan in Mumu county were stunned. This is not the younger generation of academicians. Let's go through the back door and be the Dean!

It seems that it's not reliable to ask outsiders. Finally, I don't know how to contact an insider in the capital.

"Let me put it this way. The Xue family's children had an accident in tea vegetable the year before last. At that time, president Zhang was in charge of the operation. Shuitanzi and the moderate orthopedic boss went to work as assistants for others. As for the level of operation, I can only say that they are very strong."

You say there are coal mines everywhere. Why can people finally become black * *? "Go to tea! Let's go now!"

"Go to the capital! Tea is not as good as our Wood County!" boss Gan's brother thought his sister-in-law had an idea.

Money is the cause of trouble. Sometimes more money may not be a good thing. Looking at her little brother-in-law, Wang Qian felt cold.

But the housewife at the top of the door was not for nothing. "Lao Gan is not dead yet. Even if Lao Gan is dead, he also has a son!" with sharp teeth and sharp lips, without saying a word, he directly chartered a plane to go to tea.

Because she knows very well that she may not be able to find the corresponding experts in the capital at the first time, but when tea goes, she can directly find Zhang Fan. More importantly, the only son of the Xue family is Zhang Fan, not to mention her husband.

As for the brother-in-law whose eyes twinkle in front of him, to tell the truth, although he can't be said to be a rich second generation, the children who grow up by their husband always have less responsibility, but more ambition.

Although boss Gan was a local tyrant and informed the tea vegetable hospital in advance, the tea vegetable hospital did not take this matter seriously. Let alone the dean's pick-up, even 120 are booked through the emergency platform.

However, the rich are rich after all. Many frontier bosses who are still cooperating have come to tea.

Zhang Fan had to give a unified reception. It's not that Zhang Fan dislikes poverty and loves wealth, but because Zhang Fan owes others. At the beginning of the disaster relief, the medical team could not enter the disaster area. The local tyrants in the frontier sent the off-road vehicles they could borrow to the tea vegetable hospital one by one.

At the beginning, several cars were damaged, and Zhang Fan was not allowed to compensate. He left without saying a word. This is human kindness. Although it is for the country and the disaster area, it is their own initiative to borrow from each other.

After a meal with these local tyrants, it didn't take Zhang Fan to arrange. Then the frontier health department sent a letter directly. Old man Zhong asked for tea!

According to the conventional saying, the former doctors in China were not well-known. For example, is Zhang Fan's master famous? To tell you the truth, I'm not usually engaged in this business. Who wants to know what the old man is doing.

The doctor who really let everyone know is estimated to be old man Zhong. In 2003, the old man was desperate. Sometimes, especially at certain moments, dare to tell the truth and have the ability to solve problems.

It's really a hero.

The reason why the old man came to the frontier this time is that the catechin flu is special, and the most important thing is that the treatment methods of the catechin hospital are very timely and the response measures are particularly appropriate. A city of hundreds of thousands of people can not only deal with the flu but also deal with the mumps carried with the flu in a week without asking for help.

This ability, not to mention general hospitals, several hospitals directly under the site can reach this level.

When they learned that the old man was coming, the doctors in the tea vegetable department, especially the respiratory and infectious diseases department, walked three points higher than before.

And Lao Ju, NIMA wears a suit every day. I don't know. I thought this guy was going to get married again.

"Don't take the estimated data, I need basic data!" Zhang Fan stood at the door of the respiratory department and didn't understand Lao Ju's Kazakh English for a long time. When I entered the Department, darling, all the people in the Department kept looking at and copying the cases.

"What is this?" Zhang Fan asked. People who don't know think their superiors are going to check the cases. They concentrate their time on Revising the cases.

This is definitely not a joke. For example, if a hospital wants to attack the signboard of grade three, it must first deal with the inspection expert group at the level of case. The case is not based on your past one or two years, but directly in recent ten years.

Therefore, when reporting, many hospitals first organize a large number of doctors to modify cases.

"Academician Zhong's coming must depend on our data. Alas, the hospital had no habit of summarizing before, and there was no corresponding data in the computer network center, so I mobilized the doctors in the Department to summarize the epidemic clinical data in recent 30 years.

Many cases are incomplete. The more distant the data is, the more unclear it is. Hey! "

As soon as Zhang Fan heard this, he felt a sense of admiration for the old house. According to Zhang Fan's idea, shouldn't Lao Ju be busy with his own things or achievements these two days? His head is

smooth.

As a result, people reorganized the epidemiological clinical data in the tea element area. This is the doctor in China, and this is the old residence of the tea element hospital.

Face, this guy wants to wear a suit that he probably doesn't want to wear at ordinary times, but the rest is all for work!

"Hard work!" Zhang Fan sighed softly.

"What's the matter? This is our original work. We didn't do well in the past and didn't have that condition. However, Dean, I think you still need to snack on this data center. Otherwise, if you look at these cases, the data is incomplete."

"Don't we have a network center?" Zhang Fan was nervous.

"Which is a brand? We can't repair the computer ourselves. The Dean can't bear to let the children get the wolf. When it's time to spend money, we still have to spend it!"

Zhang Fan was originally very moved. At this time, NIMA was only vigilant. "There are always crafty people thinking of Lao Tzu's small Treasury!"

Lao Zhong and his party are very low-key. Except for the accompanying personnel sent by the frontier health department, there are no other irrelevant personnel. In fact, when the old man's golden body is brushed, he knows how powerful the old man is.

First, when they entered the ward, the families did not know the specific situation, so they watched the president of a hospital accompany a doctor who was not an old man to make a ward round.

"The resident director's respiratory department is powerful! When the capital was separated, it was not quite. Now the resident director's respiratory development is more powerful than many capital hospitals."

The old man looked at the bed ventilator without money, and looked at the code of artificial lung in the respiratory ICU. He said that it was false if he was not shocked.

This NIMA is too rich!

He is rich and wants to borrow some.

The old resident in the capital was also a front-line staff, especially in the intensive care unit. However, he was a little transparent at that time, because he was in charge of the intensive care, and discussed the patient's situation with old man Zhong.

Unexpectedly, the old man remembered him and called out his name at once.

Lao Ju's meticulous hair is trembling, and his lips are trembling. His already fluent Mandarin is even scarred.

Zhang Fan glanced at the old house. "NIMA, this guy is still very modest. Why is NIMA proud like a rooster in a hen flock in the hospital?"

Chapter 1442

"Miss Zhong, you remember me!" old junima was almost crying.

"Sometimes in those years, just one breath might cause a huge crisis, and NIMA was a biochemical crisis!

Therefore, the research on symptomatic drugs in the tea element hospital can be isolated and cultured, which is a little driving the big cock to soar in the blue sky.

The old man came and left again. It's not that Zhang fan can't dig at the foot of the wall. He really can't dig. "Are you going to develop, produce and sell your own antiemetic?"

When seeing the old man off, Zhang Fan drove by himself. Lao Ju, the co pilot, took Ouyang's back seat and accompanied the old man to the airport.

"Yes! I want to make more money!"

"Ha ha!" the old man smiled again.

Smiling Zhang Fan is creepy!

Chapter 1443

"Medical treatment can't be piled up by money alone. This thing has no hematopoietic function. It's always a castle in the air!"

Looking at the flying old man Zhong, the old man's words kept wandering in his mind. In fact, Zhang Fan wanted to say to the old man: are all the equipment in your laboratory made by fate? If the frontier province is as rich and developed as Yangcheng, I can stand without waist pain.

What a pity! But the old man also told Zhang fan that first of all, pharmacy and selling medicine are not

so simple.

Not to mention others, first, laboratory preparation and industrial mass production are two different things. From production experience to raw material preparation, and finally to sales channels, it is a more troublesome thing.

Let's talk about production experience. It looks like an assembly line. You can do whatever you're skilled at.

In fact, it's not. For example, many health care products, simple vitamin health care products, you go to see the drug dose. If the vitamin dose of OTC is 100mg, it must be 100mg, and you look at the health care products that sell thousands of dollars.

Someone has done experiments. Whether it is thousands of golden hair or Austrian hair vitamin health products, the dose of vitamin content is inaccurate.

Therefore, the old man also advised Zhang Fan to have a patent right and eat some dividends. Don't think about eating Bayi in one bite. Maybe Bayi didn't eat it. Finally, he had to fill the hole if he smashed the pot and iron.

In fact, Zhang Fan has agreed with the old man, but he is still very depressed.

Of course, Zhang Fan certainly won't tell the old man face to face, because the respiratory department of tea vegetable still hopes to cooperate with the old man.

Zhang fan can also see that the internal medicine develops by itself and improves by himself. It is estimated that these goods are not convinced.

I always feel that I am a layman. Zhang Fan sometimes thinks that NIMA despises Lao Tzu now. When Lao Tzu system reaches the second level, you will cry and haw if I don't beat you. But then again, it's the current state.

Zhang Fan doesn't expect much, because it takes at least three months for a subject to be proficient

from point to point. For example, in gastroenterology, Zhang Fan is proficient from point to point. As for Endocrinology, it's a point to point state at present.

It's too hard for me. At present, it's not a big problem to look at ordinary diseases, but it's not useful if it's a little more complex. This thing takes too much time. Recently, Zhang Fan feels that the haircut interval has been extended for a long time than before.

Moreover, even if you graduate from internal medicine in the system, you can't quickly lead the growth of doctors in the Department. This thing is not surgery. Appendicitis is done well. Take young doctors to practice in death. Even if you hang a bear and get too many whips, it can get you a tripod.

But internal medicine is not good. If you want to comprehensively improve technology, you must establish a knowledge system from bottom to top. Therefore, if you want to really improve this thing, you can only rely on back-to-back with advanced hospitals and let the corresponding departments of others learn.

Zhang Fan thought about it in his mind. Now he has found a home in the respiratory department. Lao Zhong's breathing is OK. He barely makes do. He mainly wants to find someone more powerful than his respiratory Institute. It's really not easy.

The respiratory department of the capital hospital in the capital is awesome, but the hospital is like a group of people. When I'm free, I can't carry out any business, but when I live in the serious illness, experts from all over the country come.

Very powerful, but we can't let the experts in this hospital every day!

As soon as a group of people left the airport, they saw 120 people in their own hospital shouting slogans and driving into the airport.

Zhang Fan: "

Ouyang: "

Lao Ju originally wanted to have a questioning expression, but he didn't think it was good. He quickly took out the phone to ask.

"A patient called 120 of the first aid platform and said that the plane was about to land." after understanding the situation, Lao Ju reported to Zhang Fan and Ouyang. To tell you the truth, it's Zhang Fan and Ouyang.

Others, Lao Ju is definitely a leader. Call you and wait!

After entering the hospital, Zhang Fan estimated that the coal boss was coming, but without detailed inquiry, the corresponding department took over, because there are too many 120 in the hospital, he

can't take care of it. Just opened a paper, I have to look at it with a sad face.

Wang Hong came to rescue Zhang Fan.

I don't know how others learn English. Anyway, Zhang Fan's current level is to translate English in his mind, no matter what word it is, even if it is the simplest 123. Moreover, looking at the split, the efficiency is really low.

Old man Lu has lost confidence in Zhang Fan's scientific research ability. To tell the truth, now the old man doesn't urge Zhang Fan to improve his scientific research ability. For example, Zhang Fan's master's degree. It's hard. A group of senior brothers who can go to the doctor's office have got him a lot of data for a master's degree.

Moreover, give him an operation without asking. Zhang fan can do it with an intern, but give him a scientific research topic. Old man Lu feels that the first reaction in Zhang Fan's mind is blank.

Now the old man doesn't expect to train Zhang Fan into a scientist. He now expects Zhang Fan to make some efforts in this subject. But this bastard has too many interests.

Today I do orthopedics, tomorrow I do skin, and recently I also learn endocrinology, but I don't work hard at general surgery. The old man is really helpless.

I want to say, but I can't say, because this bastard has done quite well in other disciplines, which makes the old man feel uncomfortable. Originally, I wanted to show off with my little disciple all over the world, but the old man was embarrassed. I can't say that this is the spine decomposition map made by my little disciple. I can enter the master's textbook next year.

He really can't say it!

"Dean, there is a serious patient who came by plane from other places. Xue Fei, deputy director of the emergency center, has applied for a large consultation of experts in the whole hospital."

Zhang Fan quickly closed the paper, didn't say a word, got up and left.

The patient was seriously injured. Although preliminary treatment had been done in the local hospital, it was still not possible.

The first is the head. It's like a cock fighting to step on an egg. It's wiped with blood hula, like a blood gourd hanging on its neck.

This is not the most serious, the most serious is the patient's neck.

At that time, the car rolled like an egg from the road to the gully. Sitting in the back row, he was like an egg yolk in an egg shell. Because he didn't wear a seat belt, he came up and went down, and his neck

cracked.

Many people have never been to Mumu county. Those who have been to Mumu county will have a feeling that they will go downhill all the way from the entrance to the county.

It feels like running from the top of the mountain to the foot of the mountain, and there are mountains on one side and steep deep ditches on the other. Moreover, because heavy trains and large coal trains run on the highway for many years, it is estimated that there are not 50 tons, but also 30 or 40 tons.

The road is uneven. Walking on the road here, I don't know. I think the car can bump and free its kidney when it comes down the stairs.

"How's it going?"

"Intracranial hemorrhage, three or four fractures of cervical spine, dislocation and dislocation obviously oppress the spinal cord. Hemothorax is obvious, burst out and vital signs appear crisis. It is uncertain whether it is hemorrhagic shock caused by internal hemorrhage or cervical compression."

"Arrange the operation! Explain the condition to your family! Now get ready for the operation and tell Bayin that two groups of nurses are on standby for the operation, and take out my special orthopedic instruments!"

The first two sentences are for Xue Fei, and the last one is for Wang Hong.

Many people have a strange understanding of this massage, especially some men, who are addicted to massage.

Normal and regular massage can indeed relieve some pain, such as lumbar muscle strain, such as some specific migraines.

Can you massage a prostate to give you health care? Don't let you get swollen. Your prostate is of good quality.

Others like to listen to some Jianghu rumors, and then go to find some massage masters who don't even have a business license to massage. They also extend their necks long for others to massage.

To tell the truth, the person being massaged is stupid and bold, and the person massaging NIMA doesn't know anything.

In orthopaedic rehabilitation physiotherapy, there are many, usually massage rehabilitation, but for the neck, to tell the truth, the more senior doctors are, the more easily they dare not touch the neck.

Say a bad word. Sometimes you stick a stick on an adult's forehead. Maybe someone else can fight you for three or five rounds. Maybe they can beat you down.

But a back of the head and a neck are extremely fragile places for the human body.

The strength of the hand of some masseuses was accidentally jammed. What if it was broken and dislocated.

If you're lucky, you'll be paralyzed and rely on people for food and drink. If you're unlucky, you'll be killed on the spot. It's no exaggeration at all. So, really want to massage, can, let someone relax your waist muscles.

You can push the skin. Even if you massage your gluteus maximus, you can't show off your long neck and let others clean up your neck. This thing is not massage. It's suicide.

After Zhang Fan explained, he didn't talk nonsense. While walking towards the operating room with the flat car, he also had to arrange the operation personnel.

"Hand over all the people above the first Department of orthopedics to the spine operating room, let the doctors above the second Department of orthopedics also go to the spine operating room, and let Wang Yanan, Xu Xian and Zhou Chengfu from the third Department of orthopedics also go to the operating room. After Xue Fei explained his condition and signed the operation consent, he also hurried to the operating room."

Spinal trauma surgery is like fishing. You often get what you want, but one or two small fish will never surprise you.

Moreover, the spinal trauma medical treatment started at the scene, and the pre hospital medical treatment is an integral part of the trauma medical treatment. The developed European countries close to the Arctic circle are called the trauma life chain.

To tell the truth, there are not many hospitals that can do a good job in this matter, especially the treatment at the scene of the pre hospital accident. In particular, many county-level hospitals really just flash the alarm to pull people. Because the profession of emergency is not easy to become a talent, and in the current environment, Quan NIMA, who can become a talent, went to other departments.

In trauma medicine, we pay attention to a prime time, so when some people have an accident, they should not deal with it blindly, because it is the most likely time to do bad things with good intentions.

It must be sent to the hospital as soon as possible for the treatment of specific trauma system.

Chapter 1444

Many operations are like shaking dice. Even if your ears are as sharp as looking for the black back of a female dog, just listen. Inspection, especially for this organ with complex structure, is a suggestion.

Many people have seen it. There is often such a sentence on the checklist. Considering the patient's XX lesions, please combine the clinic. There is an extremely small sentence at the bottom. This diagnosis is only responsible for the submitted samples.

This is not because the technicians who do the inspection are afraid to bear legal responsibility, but because many times, the inspection really can't see clearly.

For example, the current equipment of tea element, especially the convenient inspection equipment in orthopedics, is placed all over the world. Zhang fan can stand up and play a dozen, but he can't completely rely on inspection.

In the operating room, Bayin has rarely been on the operating table in person. She is responsible for the overall arrangement in the Department. From the arrangement of patients' operating tables, to the scheduling of nurses, and the supervision of aseptic operation in the operating room, it is often not easy to be the head nurse at the end of the day.

In particular, the number of operations in the tea vegetable hospital has directly increased compared with that in the past. In the past, when he could do 50000 operations a year, he could make Ouyang laugh and give everyone a bonus.

But since Zhang Fan came to power, the number of operations has soared, from less than 50000 operations a year to 110000 operations a year.

Perhaps this concept cannot be understood by ordinary people. For example, the largest hospital in China is the super first hospital in the universe, with an annual operation volume of 350000! 100000 more operations than the second hospital.

If we try harder, the number of operations is almost more than that in the urban area of tea vegetable. It's so terrible!

Last year, the number of operations in the tea vegetable hospital was 100000, which could not enter the top 20 in China, just a little more than the border affiliated hospitals.

Therefore, Bayin's current working state is almost half separated from the operating table. Originally, after Bayin entered the operation, he wanted to go to the operating table in person, because the operation of cervical spine is the most difficult level in orthopedics.

But looking at the patient as if she fell into tomato sauce, she had a hiccup. This is terrible. The head nurse of an operating room even saw that the patient had a hiccup after being injured. Bayin endured and endured.

After washing his hands, Zhang Fan looked at Bayin's pale face and his throat trembled slightly! "Are you pregnant?"

BA yinleng said, "no, I don't know! But I feel a little fat recently!"

Zhang Fan glanced, and the wash clothes obviously didn't fit. "All right, let others come, you go and have a rest!"

I can't say more. Disinfection has begun.

Bayin went out of the operating room. Zhang Fan trembled slightly in his heart. This NIMA, she is pregnant!

Xu Xian and Wang Yanan are responsible for disinfection, because their qualifications are the shallowest in the operating room. This kind of operation, which is shallower than them, can't get in.

For example, the directors of the first and second departments of orthopedics have finished washing their hands and are waiting for Zhang Fan to arrange work.

Let who go first, just like a washed concubine, stripped naked waiting for the emperor to turn the sign.

The orthopedics department of tea vegetable hospital is originally a strong department, but this is also nonsense. As long as a slightly standard general hospital, almost all orthopedics departments are strong departments.

It's like that in large departments, orthopedic postgraduates are the worst to get employed, but once they get employed, they start to get rich immediately.

This department is simple, rough and direct, and its income is relatively rich. With the progress of society, the aging society is becoming more and more serious.

In the past, orthopaedic surgery was the only major trauma. Now the trauma caused by traffic accidents and the degeneration of joints in the elderly.

The trauma is flush with the joints and spine.

Although orthopedic surgery has fallen into the second tier from silver orthopedics, it has a lot less income than intervention and reproduction, but even if it enters the second tier, it is also difficult for others, such as ordinary and heart.

Zhang Fan walked to the side of the film placer while holding his hands. This kind of operation is most concerned with the level of a doctor.

Because there is no time for you to have a morning meeting to discuss, even the simplest discussion is too late. Take it to the operating table, give you a knife, and then wait for the doctor's advice.

Therefore, now is the last time for Zhang Fan to consider. When he waits for the operating table, he has little time to consider. Now he not only has to arrange the work of other doctors, but also has to achieve the ultimate goal of surgery in his mind.

The goal is not to let the patient die. Because this is too general, Zhang Fan now considers where to enter, what to do, what to deal with at the first time, and then how to achieve the best diagnosis and treatment effect.

Outside the operating room, Wang Qian was not only anxious, but also happy, because her husband got off the plane and entered the hospital, so she was directly handled by the doctor and arranged into the operating room.

There is almost no time delay. To be honest, the larger the hospital, the harder it is to do.

Because the larger the hospital, the more patients, even if your condition is the most serious and you have to go to surgery, but the operating room is not enough or the doctors are not enough, you can't let the operating room make way for you.

Therefore, this non queuing really makes Wang Qian feel a little relaxed. She also knows that if the operation fails, her child is still young. Now she can be tough because there are men lying in the operating room who don't know whether they are dead or alive.

Once the man dies, she and her children, the best outcome is to take some living expenses and leave.

"Mr. Wang, are you familiar with the leaders of the tea vegetable hospital?" wine dealer Lao Wang also came to tea vegetable.

"In addition to president Zhang, I am familiar with Vice President Chen. I can talk to him about what I need to do. Old Chen has been following Zhang Yuan and understands Zhang Yuan's character and temper!"

Lao Wang, to tell the truth, it makes sense to be rich.

Wang Qian wants to be clear. Now the only thing that can help her is Zhang Yuan. "Thank you. I want to donate \$5 million to the tea vegetable hospital!"

"Oh, good!"

It wasn't long before Lao Chen came and his hair was cocked up. I didn't know that Lao Chen had gone racing.

Lao Chen listened to Ouyang in his office to discuss things, because after the recent flu, the hospital not only had to arrange the rest in rotation, but also recommended the doctors and nurses who contributed the most to the flu to the government.

Lao Chen and Ouyang were embarrassed. Lao Ju was originally recommended. As a result, the goods said that the state had rewarded them in those years. I went to study in Jinmao country for a year and spent an unknown amount of foreign exchange. This time, it's OK.

As proud as he is, he is the first in the world.

But when he didn't want to, Lao Chen and Ouyang had a headache.

Zhang Fan ignored the matter, waved his hand and said it was the Secretary's business. Ren Li was stunned and said, "I'm also a participant. It's inconvenient to recommend!"

You can't have a vote on such a thing. And internal medicine is not like surgery. It has a chief knife assistant.

Often, a serious patient is a team. For a team with so many patients, it's hard to recommend anyone.

Especially in internal medicine, it's troublesome.

For example, surgery does not need to be said at the hospital leadership level. The director of the direct Department says who is who. Unless the director of the Department has no control, who dares to have an opinion.

But internal medicine can't. Even if the flu is over and the government doesn't reward, it doesn't matter. But once something happens, if one doesn't clean up well, there will be a big fight in the Department.

Ouyang also had a headache, so he discussed it with Lao Chen. As a result, when Lao Wang called, Lao Chen thought about not wanting to go.

As soon as I heard that someone wanted to donate money, Ouyang meeting would not be held. I quickly asked Lao Chen to take the from the finance department to have a look!

"It's all right. A car isn't expensive yet. It's just a little thought. Lao Gan of our family went to the hospital without a little delay from beginning to end. I'm really sorry to see you work overtime."

Although I'm sorry, not a car is expensive, that's a little heart, but Ms. Wang just doesn't give up with a check.

Lao Chen smiled and dragged for a long time, but he didn't pull it out. If someone else, he must ask, "give it or not!"

But Lao Chen felt the power of the other party's hand. He didn't have to turn his eyes to know what he wanted.

To tell the truth, the hospital can't find a more detailed one than Xue Fei when talking about his condition with his family.

It is estimated that he has also trained in the emergency department in the past two years.

Two book thick patient condition notification and patient operation love letter, Ms. Wang had no bottom in her heart. This time, she got more tangled.

In fact, there was no such thing in the early years. Later, this notice became thicker and thicker, some thicker than the case.

"It's estimated that the operation hasn't started yet. I'll go in and have a look. By the way, tell Zhang Yuan what you think!"

To tell you the truth, the current tea vegetable hospital really doesn't take five million seriously. Can't stop the leaders of these hospitals are all from a small family, and none of them is rich.

Lao Chen entered the operating room and saw Zhang Fangang on the operating table. He looked inside at the door of the operating room. He didn't even trigger the electric door. He estimated that the time was about the same, and then he left the operating room.

"Zhang Yuan said that no matter what the situation, the orthopedics department of our tea vegetable hospital will go all out!"

Then he took the check and asked the financial to report it quickly.

I don't know whether it's the peace of mind after spending the money or the steadiness after seeing the hospital collect the money. Originally, I was worried like Ms. Wang with urine retention. I'm relieved this time.

In fact, it's the same whether you give money or not. Without money, doctors dare not kill patients. This

is not a hospital where anesthetics are used to talk about expenses on a field operating table.

Moreover, if the patient really can't be rescued, it's useless for you to give money. The most important thing is that Zhang Fan has no time to think about this at this time.

That is, Lao Chen, who has rolled three times in the oil pot. Ordinary people, if Wang Hong, might really want to take the money to ask Zhang Fan.

Chapter 1445

Zhang Fan is still in the operating room, the observation room of the orthopaedic operating room, and almost all the orthopaedic elites of the tea vegetable hospital are here.

The construction of orthopedic operating room is different from that of other departments, which is more expensive. For example, the observation room and operating room in the orthopedic department have thick walls, and the glass contains lead.

Because the orthopaedic operating room often needs to do various radiation examinations, such as C-arm, which is X-ray. Generally, this kind of examination is either in the basement or in another building and placed in the operating room, which has higher requirements for the operating room.

Because the operating room here is an old-fashioned operating room, unlike that of the Institute of orthopedics, it is dome shaped. If you observe the operation or standby operation, you can stand on the roof of the operating room and see the operation process from a God's perspective.

The old operating room has only one observation window, which is still occupied by Wang Yanan. There are three orthopaedics departments and nine wards. Although there are several other female doctors, which may be called elite female orthopaedics doctors, Wang Yanan is the only one. The rest only came this year and haven't sprouted yet. I don't know if they will go to other departments in the future.

After all, orthopedic girls are really tired.

Because there is only one woman in the family. She is not only beautiful, but also Zhang Fan's eldest disciple. So everyone was more modest. Others looked at the monitor and left the observation window to Wang Yanan.

There are good people in the hospital who also gossip. Some say that Ma Yichen is Zhang Fan's eldest disciple, and some say that Wang Yanan is his eldest disciple. However, when the pony sees Wang Yanan, he usually gives up because he can't afford it.

Wang Yanan was angry and could scream: Zhang Fan!

No matter how angry he is, he won't dare!

I feel bored when I look at it alone. Watching surgery is actually the same as watching TV dramas. I still need someone to talk with me.

"Xu Xian, don't you think this man is a tyrant? Why are there all kinds of scars on his face? Is this man a tyrant or a bandit?"

In the operating room, the disinfection has been completed. Zhang Fan is the main knife. Spinal surgery, that is, the first assistant of the director of the second Department of orthopedics, the second assistant of the golden hair director of the Institute of orthopedics, the third assistant of the director of the first Department of orthopedics, and the fourth assistant of Wang Guofu, make soy sauce.

The patient's face was washed out at this time. Because of neck surgery, the patient is lying on his side. The bed in the operating room, like the bed in some bath centers, has a hole.

What's different is that many holes in the bed of the bath center can not only put the company but also put the ass! And the hospital bed can only put the face.

Because there is no hole, the operation takes a long time and general anesthesia will cause oppression and suffocation. After the operation is completed, people are suffocated, and NIMA will be shot.

Therefore, the side of the face is downward, just facing the direction of Wang Yanan's observation window. Wang Yanan looked at the patient's face clearly.

Xu Xian is Wang Yanan's Doudou. He has a good character and has the style of an old-fashioned cultural man. He speaks and works very tactfully. Being pulled over by Wang Yanan, Xu Xian looked at this ferocious face. Said softly:

"This kind of person's wealth accumulation is no less than robbery. Therefore, it is estimated that when he is of average value, there are still some bloody storms."

Wang Yanan rolled his eyes. "It seems that you know very well. How do you know about such local tyrants?"

Xu Xian looked at Wang Yanan, sighed in her heart, and said, "I'm talking nonsense!"

But he said in his heart: "you are a city man and don't know the price of coal. Even if there are rich coal mines in tea, in recent years, from 300 yuan per ton to more than 1900 per ton, what else can NIMA have if there is no bloody rain."

The operation has begun. To tell the truth, if the orthopaedic surgery technology is put in the world, the orthopaedics of the tea vegetable hospital can also be squeezed into the first-class. The establishment of the Institute of Orthopaedics and the cooperation of Jinmao special orthopaedic hospital.

Up to now, it can almost be said that the surgery that tea can't be done may not be done in other hospitals. This is the difference. If the research results are placed in internal medicine, even if old man Hu and old man Zhong are brought here, they may not reach the world-class level.

This is the difference between internal surgery and surgery. Surgery can definitely hit a dazzling star across the sky with money. If the money has no follow-up, it is a meteor. If the money can continue, it is a star.

But internal medicine is different. This thing needs to be accumulated for generations.

"Input hypertonic salt solution and control systolic blood pressure at 60mmhg." Zhang Fan gave oral medical advice to the anesthesiologist while slowly drawing with a knife.

The incision of the neck, even the incision of the spine, is different from other places. This place can really be said to be drawn. For example, the abdomen is crossed by a scalpel. The handsome is like a knight in ancient times. The light of the knife flashes and the intestines come out.

And neck surgery, NIMA is like a eater holding a toothpick and pounding shell meat. People who have eaten sheep's neck know that it's delicious, but it's hard, because it's all flesh and blood.

For the operation for which the examination cannot be clear, once the surgical band is included, the doctor always has only two choices.

1、 The patient is strong enough to continue the operation. 2、 Leave this land of right and wrong and fight again in the future!

Zhang Fan cut the skin of his neck. It was like cutting an autumn persimmon or a ripe persimmon.

The red and black soup, mixed with white mucous membrane and broken bones, gushed out at the moment when the scalpel was cut, just as the hu la soup without coriander was overturned in winter.

Because the surgeons were all experts and didn't need Zhang Fan to shout. When the black and red blood like a volcano came out, it was only one second, or even one second. The four hands of Zhang Fan

and Yizhu covered the wound for the first time.

Moreover, the five fingers are separated, and the two hands, like computer instruments, are inserted into each other's fingers at the first time to form a human meat umbrella.

To be honest, Zhang Fan and Shao Hua may not have this tacit understanding.

Then the maximum power of the attractor, puff, puff, puff, like a cup of chocolate milk tea cooled in winter. The black, red and black soup passed through the straw, and occasionally massive objects bumped through.

"Gauze! Small square towel!" Zhang Fan and Yizhu crossed their fingers, and Erzhu sucked quickly with an attractor. Like a tool man, Wang Guofu pulled the hook motionless.

Gauze. The gauze in the hospital is folded. It has about four layers. It is the same as the special paper towel used by girls in their physiological period. It is almost the same size and shape, but there is an additional layer of blue perspective lines.

In this kind of operation, the big gauze can't be put in, so the nurse should fold the small gauze on the spot.

After the first wave of accumulated blood gushed out, the rest was trickling, and intermittent, just like male compatriots holding guns against the wall. The first wave felt that they could reach the roof, and the last wave could only be left in their underwear intermittently.

At this time, we can't be careless. Although this intermittent outflow is not too large, if we don't deal with it in time, it will be stronger than that of male compatriots, and it will only get bigger and bigger. In the end, it will lose blood and die.

And the bleeding in the neck is different from visceral bleeding. There are too many capillaries here. It is difficult for doctors to determine the bleeding point at the first time. Maybe this thing is exudation rather than outflow, so it must be pressed around.

A piece of gauze stuffed into the patient's neck, directly like a greedy child, stuffed with a lot of blocky white sugar, grinning.

After the compression treatment, the operation continues, and the neck operation is very difficult.

First of all, because the nerves are complex, to put it simply, some people have numbness and pain in the back of the head. This may be because the nerves of the second neck are compressed, because this sensory nerve root extends from the second neck.

For example, some people have numbness in their forearms and hands. At this time, we should not consider whether they are too much, but whether the nerve roots of neck VI and neck VII are

compressed.

How to describe the cervical spine? This thing is like a cuff, and then the cuff has seven pairs of openings from top to bottom. The nerves that control the corresponding organs are derived from the holes.

This is the periphery, that is, in the periphery, if it is not done well, it will damage the patient's nerves, which will lead to the patient's inability to move his upper limb muscles, or the loss of feeling on one side of his face.

When entering the cuff, one accidentally injured the spinal cord, which directly led to the loss of contact between the brain and the body. The patient had incontinence in an instant, and the body had meaning!

Therefore, this operation is particularly troublesome from the periphery to the interior.

Several doctors are already sweating just by circling around the periphery. Especially Zhang Fan, every time he cuts, he has to clearly construct in his mind whether there is anything else in this place.

This makes laymen feel like hypocrisy. Where is NIMA's knife standing, motionless, and her hands move slowly like snails? How can she sweat profusely?

To tell you the truth, even if you lie on your daughter-in-law, you can't reach this kind of sports. Because of the high concentration of the brain, my hands can almost say where I mean and where I hit. I'm too tired.

The director of nursing, the former head nurse of the operating room, also came. When Bayin left the operating room, he didn't go to gynecological examination for the first time, but called the director of nursing department.

Not only doctors but also nurses need to be top-notch in this difficult operation.

The director of the nursing department took off his hat with three bars, put on his hand washing clothes, and entered the operating room with his operating cap.

Bursts of fragrance fluttered over, as if there was no one in the elevator, but the fragrance remained. Male compatriots will definitely conceive a forward convex and backward warping mode in their minds.

But Zhang Fan couldn't care about it now. His head tilted. The director of the nursing department quickly wiped Zhang Fan's forehead with the gauze soaked in xinjieermie.

The cold gauze made Zhang Fan slightly drop the temperature of his brain.

Not only nerves but also white broken bones run through the torn muscles. Outside the operating room, the bird market is also holding a meeting on the tea vegetable hospital.

Chapter 1446

"After the resolution of the stomach and intestines, the gifts given by the boss of the desert country to Dr. Zhang Fan, President of the tea vegetable hospital, can all be regarded as souvenirs. The souvenir of Dr. Zhang Fan, President of the expensive tea vegetable hospital. Because there are no martyrs, this is special column, but this is the only time!"

Originally, Zhang Fan didn't want to give up this pile of stones. In fact, Zhang Fan doesn't love money. Zhang Fan just likes this shiny thing. The leader of this tea vegetable has no right to deal with it. The leader of the bird market thinks it should be turned over.

Then, as a witness of the friendship between the two countries, it's unreasonable that NIMA and China didn't establish diplomatic relations. Take it for auction. Do you have that face? When opinions could not be unified, the general manager asked the Chinese Minister of health to come directly to the bird market.

The minister came with a mission this time. First, let the medical treatment in the tea element area become a medical group, mainly tea element hospitals, and integrate them into a medical group.

Listen, it's a group. It's not for listing. Because after I went back for an hour, I wrote a special letter. First, I made some suggestions according to the scale and degree of the flu and the treatment methods of the tea element hospital.

It is suggested that the Ministry of health should form a systematic study on the treatment of the influenza with tea, so as to form a template for the corresponding defense in the future.

That's a great suggestion. Many epidemics, the terrible thing is not its infectivity, but the unknown of this thing.

The correspondence of tea element this time is very rapid and effective. The government and experts made the right treatment for the first time, so that the first wave of outbreak just reached the peak and was directly put out in the hospital.

This is great. Leaders also attach great importance to it. And I don't know whether the development of tea vegetable hospital has reached the bottleneck or has cooperated with tea vegetable hospital. The

old man's suggestion is to integrate the hospitals in tea vegetable area.

Therefore, the bird market also responded quickly, just this one example.

Zhang Fan didn't know that he was reluctant to give up the pile of shiny stones and came back.

The opinion on the integration of hospitals in tea vegetable areas was quickly adopted in bird city. Then the expert group and the research group went to tea element in pairs.

"What are we doing when an expert group wants to enter the hospital? Is it necessary to upgrade the hospital? Ouch, ouch, the leaders still pay attention to the development of our efforts in recent years. Hurry, hurry, we must do a good job in reception. I don't need to say anything about hygiene.

Come on, come on, get ready to welcome all kinds of banners, and be sure to satisfy the expert group. "

In chasuhua hospital, the Dean never dreamed that the expert group coming this time included not only the bird market but also the capital.

The most important thing is that the superior only said that the experts came to evaluate this time. He didn't say why or what to evaluate.

The president of China Hospital thought that the same was true of the tea vegetable hospital at the beginning. Is the tea vegetable hospital dissatisfied with the leaders now?

"Ha ha, ha ha, I see how arrogant you will be in Ouyang's future, ha ha!" to tell the truth, the Dean can wake up laughing when he falls asleep.

Tea element digital hospital is also occupied by military medical experts. And not only the evaluation, but also the evaluation of doctors.

Doctors in digital hospitals are not only responsible for routine diagnosis and treatment activities, but also responsible for defense work. Therefore, after the experts check in, they first conduct the five kilometer evaluation, and then the ten meter target evaluation.

"What is this?"

"I don't know. The year-end assessment hasn't arrived yet, but even if it does, our level hasn't arrived. Let a leader of Venus lead the team to assess!"

Doctors in digital hospitals are not as optimistic as the president of Huahua hospital.

"Qualified ones are incorporated into the emergency center of the tea element hospital, unqualified ones are discharged from the army, and the specialty of the specialty has had accidents several times. We have not seen the corresponding contribution of the tea element digital hospital. It is all the tea element hospital!

Shame, shame, we have to cancel the hospital system and cancel it ourselves. Today, it happened that local hospitals merged our digital hospital. Shame, shame! "

In the president's office, the president of the digital hospital was red faced by the superior leaders. Nima, the president of the digital hospital, is going to cry.

It was originally a second-class hospital, which was smaller than other tea vegetable hospitals. As a result, no one expected that the tea vegetable hospital suddenly broke out, which made them unable to develop.

Moreover, the dean of the tea vegetable hospital not only has a good relationship with the surrounding Brother units, not only the numbers but also the armed police. NIMA also has a good relationship with the digital general research institute directly.

People from the General Research Institute did not come to the local digital hospital, but went directly to the tea hospital.

You said that, isn't it bullying. In the past, Ouyang clamored that he should merge the digital hospital, which made him worried. Later, it seemed that his superior didn't agree, so he was relieved.

But I haven't been at ease for long. Why did the leader change his mind again. Didn't you agree not to merge? Don't bully people like that!

Nima, the president of the digital hospital, is going to cry.

In fact, the superior hospital has also considered that if we vigorously develop the digital hospital in the tea element area, it will be a little more than worth the loss. For example, we will equip the tea element digital hospital with rescue helicopters without mentioning the money.

Several neighboring countries couldn't sleep first. If the tea vegetable hospital gives up the rescue plane to the digital hospital, don't even think about it!

Moreover, at present, the tea vegetable hospital and the digital general research institute cooperate together, and the depth of cooperation is getting deeper and deeper, which is a bit embarrassing.

Finally, the general manager decided to let the tea vegetable hospital merge with the local digital hospital and retain some qualified digital doctors to deal with emergencies.

Before Ouyang knew it, he heard that some experts from the ministry came to China tea element

hospital for evaluation.

Ouyang smashed all the watering pots angrily. She thought that Hua hospital might be upgraded. The old lady was too angry and trembled.

Lao Chen also looked at a loss. It shouldn't be. In order to balance the population size of the tea vegetable area, it's necessary to get two provincial hospitals?

"European hospital, the superior asked the main leaders of the hospital to have a meeting. You see, hospital Zhang is in the operating room, and Secretary Ren is still in the ICU of the respiratory department."

Lao Chen means that you are the one who has nothing to do at home.

"I won't go. I won't hold that smelly foot. Whoever loves to go will say I'm sick!"

"Er!" old Chen's sweat came down. The old lady was really angry.

"Where can I go to Li Yuan?"

"Don't ask me, I don't know anything, I don't care!" then the old lady picked up her small bag and went home.

As a result, Lao Chen went to Lao Li's office. After hearing this, Li Cunhou shook his head like a rattle. He knew that his talent was not in this regard. There was no way. Lao Chen went to find Yan Xiaoyu again.

Yan Xiaoyu is a thief. It's estimated that he has to listen to the opinions of the tea vegetable hospital. Agree. He will be white eyed by Ouyang when he comes back. If he doesn't agree, he doesn't respect the opinions of the leaders. That's why she's not going.

Lao Chen thought about it. He couldn't let Lao Gao go. Lao Gao didn't join the team. The difficult old Chen had no way. Finally, the old man was also a thief. He didn't know what he said to Lao Ju. They went to the meeting together.

.....

In the operating room, Zhang Fan's operation was the most critical place. The muscle layer has separated.

The muscles of the neck have their own characteristics. They are all rope strips. Speaking of people, they are strips of tenderloin starting and extending here.

Therefore, to do this kind of operation and open the skin, it is necessary to separate the muscle layer.

Zhang Fan's fingers swam between the muscles, pulling around. The muscles that were originally closely arranged together finally let Zhang Fan free a meat hole.

Then, small retractors, seven or eight small retractors, jammed, open the muscles and expose the cervical spine.

The cervical spine is covered with blood, like a fresh sheep scorpion brought up like instant boiled mutton.

"C3, C5 compression fracture, C6, C7 comminution..."

Compression fractures are common in the spine. For example, some people joke that they pull the bench away when others want to sit down.

Then the man who fell to the ground, touch his ass! Younger ones don't matter. They have high bone density.

The elderly, especially women, are extremely prone to compression fractures. At the beginning, her buttocks and tail bones hurt. After a few days, she didn't feel right. NIMA had a sour back and thought she had been tossed by the old man.

Rest, the result is still not good, and then slowly appear waist and leg numbness.

The bone of the spine is a little special. This thing has a large number of hematopoietic loose bones. A layer of hard bone is wrapped with tissues like a wasp's nest. If the upper and lower bones are connected, it will cause a large area of collapse.

Moreover, this kind of collapse is particularly troublesome. Unlike ordinary bones, the steel plate becomes fast, and this collapse cannot be recovered. We can only use steel nails to make a steel frame, and then support the spine like a steel hand and foot frame.

So, sometimes, a little joke can cause a big accident.

Zhang Fan slowly entered and told several of his assistants what he saw about the patient.

The more said, the more frowned.

Now this situation is very troublesome. The human spine is like the beam of a car. Once the beam of a car goes wrong, hundreds of thousands of large trucks may only sell scrap iron.

The human body is almost the same, especially the neck, which is the most flexible place in the spine.

Many people can lower their waist, but her waist can't swing left and right like her neck.

Moreover, when she gets down to a certain age, she can't get it, but her neck is different. Even in her seventies and eighties, some professionals can still make her neck flexible like a turtle's head.

The only way to fix this collapsed bone shell is to put on a steel coat for this guy. If you make him turn his neck, he can only turn his body and neck together.

You can't even lower your head. It's estimated that it's troublesome to stretch out your tongue and lick ice cream. You can nod up and down before. You have to squat down and stand up in the future!

Chapter 1447

The loss reporting rate of doctors' surgical instruments, especially those used in public hospitals, is particularly high.

A needle holding device, which is used to hold metal suture needles or some hard and subtle things, such as Kirschner wire.

Originally, they could only serve things that were not much thicker than toothpicks. As a result, orthopedic doctors had to hold a needle holder to clamp large steel plates and nails. They still used them violently. If they couldn't hold them, they used brute force. They had to insert them anyway.

This thing, how to say, even steel, also has a tolerance. When several orthopedic operations are completed, the director of general surgery holds the needle with the needle holder. He is stunned that he can't insert it into the skin. The director of general surgery throws the needle holder away.

Although each department now has its own operating room, the equipment is uniformly taken to the supply room for disinfection. After disinfection, I don't know which operating room I will be assigned to.

Therefore, orthopedics is not popular with other departments in surgery. Zhang Fan also understands that sometimes the critical moment of surgery is often neglected, so Zhang Fan has a set of special surgical instruments for orthopedic surgery.

After Zhang Fan became the Dean, the only gift he was willing to accept from drug dealers was surgical instruments. Therefore, he has several sets of high-quality surgical instruments in his hand.

Earlier, Zhang Fan's instruments were stared at by several directors like wolves. Zhang Fan also explained them carefully. Don't let them take them.

Zhang Fan is not stingy. Everyone has the habit of using, especially surgical instruments. In some difficult operations, using their own special instruments is really twice the result with half the effort.

For example, when you drive a car that others have driven for a long time, you will feel as if the car is wrong. You kiss your wife who has been married for 30 years. You can know without turning on the light. She opens her mouth at that position.

So are the instruments.

Now the directors of various departments and even some top surgeons don't envy Zhang Fan's special instruments. Because of the improvement of tea element hospital, other equipment companies have sent equipment to the attending class.

"Lao Wang, are you ok?" six hours have passed since the operation. Zhang Fan feels that one of his assistants has stumbled under him.

"My eyes are a little dazzled!" Lao Wang said shyly, because it's neck surgery, with one eye surgery glasses, and because it's orthopedic eyes with double lenses, it's very comfortable to do nerves, and it's more troublesome to do orthopedics.

So those with one eye became bigger and smaller, which made more than 50 Lao Wang a little dizzy. Whether it costs 48 or not, Lao Wang is in his fifties. He can stick to it now thanks to the lack of mobile phones before.

"OK, let's take turns!" Zhang Fan gently covered the surgical incision with a wet gauze cloth and suspended the operation.

He also took the time to stretch his waist and change his feet.

As soon as the director of the nursing department saw that the operation was suspended, he immediately said to a nurse who opened the cover: "come on, 100ml, 5% glucose, open a bottle, don't open 10%, give Zhang Yuanrun mouth!"

The director of the nursing department goes to the operating table in person, which is very rare in general hospitals, because after the director of the nursing department of many hospitals is transferred to administration, he will hardly go to the operating table in person or work in the corresponding department.

Because of Zhang Fan, the doctors and nurses of tea vegetable are younger at present. On how to serve Zhang Fan, to be honest, Bayin is not good.

Bayin has good skills, and she has good skills on the stage. Moreover, she has a high protein diet since childhood, and her health is better than other nurses. This is really not nonsense. Although Bayin is a lesbian, once the doctor didn't work on steel plate orthopedics, and the strength of eating milk was used. As a result, the steel plate didn't move.

Bayin couldn't see it and said: I'll do it if you say how to correct it! Then Kaka three times, it's done!

Some nurses have a slightly larger blood volume in the physiological period. If they stand on the operating table for a longer time, they will feel dizzy. For example, a nurse with excellent surgical skills meets a particularly difficult operation.

As a result, her physiological period came. She was uncomfortable and fainted on the stage. This was an accident. But Bayin can't. a strong calf can give people a sense of security. I don't know how her husband subdued Bayin.

This is one of the reasons why Bayin can become head nurse.

But when it comes to serving Zhang Fan, Bayin is almost a Taoist. She wipes Zhang Fan's sweat with gauze and can wipe Zhang Fan's pain. Sometimes Bayin doesn't work as a itinerant nurse. Zhang Fan wants to tell Bayin himself that I'm a little thirsty.

Bayin will take the initiative to open a bottle of sugar. When it's time to feed, Zhang fan can put the mouth of the bottle in a hurry.

The director of the nursing department is different. Gently pull down Zhang Fan's mask a little. First take gauze to Zhang Fan to wipe his mouth, wipe the sweat near the nasolabial groove, and then slightly raise the sugar liquid and gently send it into Zhang Fan's mouth.

Even every mouthful can make Zhang Fan feel comfortable and sufficient in his mouth, but it won't make Zhang Fan have time to swallow it. This is all Kung Fu. It is said that Bayin is a young woman and should improve a little. It's useless. When in a hurry, he can still put Zhang Fan in his mouth like a donkey.

"Fuck naturally or half unconsciously," Zhang Fan dared not look directly at the eyes of the head of nursing department. He was obviously the director and he had deliberately and unintentionally made a look at him.

Zhang Fan did not dare to look down, because Zhang Fan was tall, and the director of the nursing department was wearing a hand brush suit. The hand brush suit with a peach heart collar could not cover up the figure of the director of the nursing department. Pink, white and black lace.

Really, this woman is too demon.

"I'll use what you like next time?" the rotating doctor went down. The second wave hasn't come up yet. The director of the nursing department whispered.

Zhang Fan couldn't answer back. He glanced, "hurry to hurry! Why don't you come!"

"OK!" the director of the nursing department made a loud voice this time, as sweet as the mother of Xiuchun building called uncle.

The doctors on standby, Wang Yanan, Xu Xian and Xue Fei, took turns to perform the operation. Xue Fei was originally the one who helped. Xu Xian and Wang Yanan thought Xue Fei was in an emergency and it was good to be on the operating table. How could he be the one who helped.

Then Xu Xian and Wang Yanan looked at each other for ten seconds. Xu Xian had to give up his position. Xu Xian could play with snakes, but Wang Yanan's eyes narrowed like a big civet cat, and the cold light came out.

This makes Xu Xian feel guilty. When he gets on the stage, he will inevitably. Why am I guilty? Why don't I be tough!

The doctors who underwent the operation can't leave now, because the probability of accidents in this operation is very high, so after the operation, they hurried to the bathroom and ate something.

Lying in the corner of the operating room, and then lying on the ground, seize the time, can sleep for a while, can not sleep for a while, especially when Yizhu Lao Wang, when eating, he felt that half of the rice in his hand was small beans and half sesame.

They can rest, Zhang fan can't.

The operation continued for an hour, two hours.

The operation lasted eight hours.

Zhang Fan, they finally cleared away the fragments around the fracture. In the surgical tray, the bone fragments are like a tray of pearls in the tray according to their size. The surgical nurse is not only responsible for transmitting the instruments, but also responsible for wiping off the blood on the bone fragments, and cleaning the free muscle tissue with dry gauze like sandpaper.

We also need to protect the tissue debris connected with the bone. Really, it's hard to do. It's like shredded meat embedded between teeth. If you don't look carefully, who wants to know whether it's native or embedded.

Smaller fragments don't matter, but larger fragments will have to be put in, otherwise a large number of fragments will be abandoned, which may cause bone nonunion after operation.

Bone recovery is different from muscle recovery.

The recovery of muscle and skin is very simple. Platelets fill the broken gap as the first adhesive, and various collagen as the second adhesive. It will probably form a connection in three days.

However, this bonding is not elastic.

Just like girls wearing silk stockings, they broke a hole and sewed it together with thread. This place is not only inelastic, but also has insufficient tension. It is easy to break in the old place when pulled by others.

The skeleton is as like as two peas. The first thing is to melt the broken bone fragments, and then the osteoblasts are using these raw materials to produce the same bone as the original bone.

This is why the saying of breaking muscles and bones for a hundred days is a long time, and the products made are also firm, which is not like fooling people like muscle and skin.

"See, the spinal cord is compressed and the bone fragments are inserted!" Zhang Fan is also a little dazed, but he can still hold on.

The legs are a little sour, and the diaper in the crotch is a little poor in quality and insufficient in water absorption. The eggs are soaked on it and stung a little. After the operation, Zhang Fan must find the director of the instrument department.

I didn't want to have children, but now I've been soaking for so long!

Slow, the original fast operation becomes slow at this time. The doctors on several operating tables are the same as thieves, and they dare not give out the atmosphere.

Even when you breathe, you lean your head. The spine is set up ring by ring, and inside this ring is the spinal cord.

The spinal cord is the telephone line that the brain uses to manage the channels of the body. Once broken, it's paralyzed. Moreover, the most troublesome recovery, previously said, is that spinal cord cells cannot recover. In recent years, some scientists think it can recover.

But the recovery time is extremely slow, less than a millimeter a year. When the spinal cord recovers, the patients are 200 years old.

So this speed is equal to no recovery.

"Ophthalmic forceps!" Zhang Fan shook his body slightly, and he was a little tired.

To tell the truth, although the operation time is not the longest, it is broken too badly, bit by bit, just like picking sesame seeds on sesame cake with tweezers.

The director of the nursing department sees the difference. Really, sometimes I have to say that a familiar woman is a man.

Seeing Zhang Fan move slightly, she knew that she was not quite right. Then gently hold the lifting chair, gently put it on Zhang Fan's legs, put both legs against the chair, and hold Zhang Fan's ass with both hands.

"Zhang Yuan, there's a stool! I'll adjust the height for you, and you can sit for a while!" it's useless for you, but when you talk, you seem to hold your breath, and your words are incoherent.

She is a little distressed, a little distressed about the doctor on the operating table. Look at the doctor who is slightly snoring in the corner, and look at the dean who has been standing for nearly ten hours. She puts her head against Zhang Fan's back.

The gentle hands are not big, but can guide the strength, so that Zhang Fan gently, slowly and steadily sits on the chair.

"OK!" today's operation is too eye-catching. Once your eyes are tired, your brain will think you're going to sleep.

Then it will give orders to the organs and get ready to sleep.

Once the organs accept the command, the human body becomes more and more tired. For example, you suddenly have insomnia one day. If you lie in bed and blink quickly, you may fall asleep.

When Zhang Fan sat down, the director of the nursing department didn't go away, but approached Zhang Fan and used his body as a back chair to make Zhang Fan relaxed.

Zhang Fan nodded and didn't speak, but the director of the nursing department understood that this was Zhang Fan's silent thanks.

Wang Yanan holds forceps in one hand and forceps in the other. The forceps help Zhang Fan peel off the tissue. The forceps cooperate with Zhang Fan.

Cross interaction, especially in surgery.

For example, when making an incision in the abdomen, the main knife and assistant will hold tweezers. Like dancing, one of my legs will be inserted between your legs, and then you step back. When I'm safe, you can insert tweezers between my legs.

Then slowly separate the organization from the organization.

"Slow, slow, don't worry, glue head dropper and normal saline drip in to make the structure of fragments and spinal cord clearer."

Xu Xian, holding a rubber tipped dropper in both hands, can almost ignore the weight of things. In Xu Xian's hand, it's like holding a kilogram weight.

Tick!

Tick!

Salivary saline drips between the fragments and the spinal cord, and the outer membrane of the spinal cord is gently wetted by the liquid.

"Boost!"

Zhang Fan didn't dare speak a little louder.

Because now as long as one is careless and lets the fragments insert, all efforts are in vain.

.....

In the conference room of the tea government, the leaders of the bird market also came. When I saw that Lao Chen, Zhang Fan, Ren Li and Ouyang were coming from the tea vegetable hospital, the leader in charge of health in niaoshi was slightly ugly.

However, it doesn't matter. The problem of the tea vegetable hospital is not for a day or two. He is helpless, but today the leaders of the Ministry are also there, which shows that the health leaders of bird city can't have jurisdiction.

"Where's Zhang Yuan?"

"A serious patient came from mumuxian county. Zhang hospital was on the operating table. He really couldn't smoke." Lao Chen said uneasily.

When the leader in charge of health was about to ask others, the leader of the Ministry smiled: "from Mumu county? You can. You have played an influence in Mumu county. Ha ha, it is estimated that you will go to Beijing sooner or later!"

Lao Chen didn't know whether the leader's words were praise or criticism, and he didn't dare to answer. He also sighed in his heart. Alas, Zhang Yuan and European yuan didn't come. I'm under too much pressure. Lao Ju was about to speak when he was dragged by Lao Chen.

Lao Ju didn't say anything, and then glanced at Lao Chen, saying, if you don't let me talk, what meeting do you let me have!

At the beginning of the meeting, Lao Chen, who had been nervous since he entered the door, slowly felt that something was wrong. Does the assessment require the participation of the leadership of the tea plant hospital?

For personnel with staffing, one size fits all in age? Early retirement over the age of 50?

What's this for?

"For this merger, we should do a good job in the ideological work of the hospital staff. I would like to emphasize again that we must raise our spirits in order to improve the medical level in the tea vegetable area. I don't want rough work."

"?" Lao Chen has a star on his head. What are you doing.

Finally, the leaders of the Ministry finally summarized, "comrades, the rapid development of medical level in Northwest China is not only the strong support of the state, but also the efforts of doctors, nurses and logistics personnel in various hospitals.

However, the times have changed. At present, the tea vegetable area continues to be a hospital with international influence. It not only has influence, but also needs to pull out and fight. If it can fight, it can win. The leaders attach great importance to this work. I would like to ask you here. When making evaluation, we must strictly abide by discipline.

If anyone wins, he will not be tolerated! "

Lao Chen was silly and looked at Lao Ju in disbelief. Does tea vegetable hospital want to merge with other hospitals?

Lao Ju was also stupid and looked at Lao Chen. Tea element hospital should be built into a hospital with international influence?

Two people slowly, face from white, slowly red, slowly began to shine. There is really an old lover.

The president of Hua hospital was also stupid. His face turned red and gray when he entered the conference room. Tears were coming out.

"Why? Why? Our hospital is going to move and go to the high tech Zone. Can't we afford to hide? Leaders, can't! I can't figure it out!"

"If you can't figure it out, take your time! But I emphasize here again that we must do a good job in the

early retirement of doctors and nurses and do a good job in the ideological work of doctors and nurses!"

"Well, well, well! I will, please, please, please rest assured!"

There will be an end. The president of Huahua hospital goes fast. For example, he always feels that Ouyang will emerge from that place at this time, and then patted him on the shoulder and said: where are you going, brother?

"One family is the only one!" watching the leaders of the bird market talk to Lao Chen and Lao Ju. The leader in charge of health also attended the meeting. At this time, he talked to himself with a complex tone.

It may be a blessing or a pity. Anyway, the tea vegetable hospital has been paid attention by the superior or higher leaders.

As for the young Dean, he can't imagine!

Zhang Fan in the operating room can finally take a breath. The fragments are not inserted into the spinal cord, but the compression time is also relatively long. The patient must have limb dysfunction for a period of time after operation.

However, this is not a problem. He lifted his neck slightly, and suddenly felt that the back of his head was wrapped by something, soft.

Zhang Fan couldn't look back. He felt it again. Suddenly Zhang Fan understood. The body leaning on the meat chair is hard.

"Head nurse, thank you. Now I'm going to stand up. I can't do the sitting operation!" I don't know that Zhang Fan, who is going to stand up and has soft legs and stomach, stood up close to the operating table.

Moreover, as if there were something like a hook on his leg, he picked up all the auxiliary towels on the operating table.

The director of the nursing department was still in a poor mood. At this time, when she heard Zhang Fan's words, she stood up proudly.

He said in his heart, "I can't do without me in the operating room. Otherwise, if young nurses come to this operation today, they probably can't think of this way!"

Chapter 1448

Lao Chen and Lao Ju were on their way back to the hospital. They slowly slowed down from the surprise. Neither of them spoke.

In his mind, Lao Chen immediately conceived that the leading group should be expanded. After such a large area forms a medical group, the executive president will certainly increase. Do you have a chance? But when I think about it, I think it's unlikely.

The most important thing is that the requirements for the entry conditions of doctors and nurses have become higher in recent years. The requirements for leaders are also higher. He has been out of clinic for too long, and even if he is not out of clinic, he seems to have no chance.

Now the executive is Li Cunhou, a new academician from NIMA! This instantly raised the industry threshold. Lao Chen sighed slightly and looked at the pedestrians outside the window!

And Lao Ju, the excited red tide hasn't gone down yet, his face is greasy, and he doesn't know that he thought he had chewed a sheep's tail. The old house thought simple, and he showed that in the mind, the future of tea breathing, he has the final say.

Thinking of a group of tea vegetarian respiratory doctors, he stood under the podium. On the podium, he talked about the cutting-edge knowledge of respiratory department in standard golden Mao language, while the dark doctors below looked at themselves with a longing for worship.

The more you think about Laoju, the more excited you are. The more you think about Laoju, you should tell the dean that the respiratory department now needs a conference room as a department classroom, otherwise the office in the department doesn't even have a microphone!

This is the choice, different choices, different happiness!

Lao Chen also slightly meditated for a while and then separated from his state of mind. Holding the phone, I called Secretary Ren first. As a result, Secretary Ren hung up! "I guess I'm rescuing the patient!"

Then Lao Chen dialed Ouyang again. As a result, Ouyang shut down!

Call Ren Lixian because the leaders called the roll and said that at least one of the two squad leaders of the tea vegetable hospital should come at the next meeting, and none of them will come. Does this not

pay attention to the leadership or do not understand the organization and discipline!

The leader said this casually to Lao Chen. When he met Zhang Fan, he probably couldn't say it. Because the tea vegetable hospital is so special, the superior leaders call the names to make the tea vegetable hospital become a hospital with international influence.

What does that mean?

In the hospital, Lao Chen stood at the door of the operating room, waiting for the end of the operation. He will report to Zhang Fan as soon as possible.

As for Lao Ju, he didn't have this idea. He went back to his office quickly and searched through the boxes and cabinets to find some large books he bought when he went to study in Jinmao. He had to take them out. Otherwise, how could he reflect the identity of the first person to breathe tea!

He didn't even think about why Lao Chen asked him to attend the meeting. Of course, he probably wanted to. Maybe his academic achievements are relatively high, otherwise, why do he call himself?

In the operating room, Zhang Fan said to Wang Yanan with tweezers: "can you change people? What are you shaking?"

The tone is very bad.

In many TV dramas, this happens. The assistant will question the main knife, then say his own thoughts, and then the main knife from anger to meditation, and then startle people.

In fact, this kind of thing rarely happens. First of all, this thing is not a family affair, it is a matter of human life. If the chief surgeon does not have an overall idea before the operation, he will never go to the operation.

Of course, criticizing people is also watching people. Society is not a TV play. For example, even if Zhang Fan is angry again, if Yizhu is Wang Guofu, Zhang Fan will not swear. It's not that Zhang Fan doesn't dare, but it's unnecessary.

There was a joke that I criticized you for loving you! This is particularly obvious on the operating table.

The assistant didn't do well. The chief knife was silent or tried to solve it by himself, but he didn't say a word. Maybe the assistant won't know he made a mistake for decades.

And Zhang Fan cleaned up Wang Yanan, forcing her to improve. Wang Yanan opened his mouth and didn't say a word. Instead, he took a deep breath with his tweezers and tried to control his hands not to tremble.

"Don't take a deep breath, breathe in calmly." Zhang Fan's voice became a little relaxed.

Wang Yanan nodded. At this point, Zhang Fan still appreciates Wang Yanan. If he is wrong, he is wrong. If he is willing to change, he will not cry and howl. Maybe this is thick face?

"Ready!"

After Zhang Fan cleaned up, Wang Yanan shouted. All the people in the operating room were refreshed, and even the sleeping people were called up.

Now the most important step is to remove the fragments. More than ten fragments are gambling more than ten times. There can be no negligence at this moment.

One, Wang Yanan and Zhang Fan, holding sharp ophthalmic forceps, gently clamped the bone pieces.

"One, two, three, up!" Zhang Fan gently counted the numbers, and then a broken bone the size of a nail was clamped and connected from the lower side of the spinal cord.

Zhang Fan and Wang Yanan's two pliers cooperate, just like a crane lifting a kilo weight.

Xu Xian swallowed nervously.

a block!

Two!

.....

Zhang Fan's slippers are full of sweat, which requires a high degree of concentrated surgery, which consumes people's spirit and physical strength.

When the last piece of bone was not taken away, Zhang Fan felt that his legs could hardly stand.

"All right, all right!" Xue Fei said, sweat from his neck.

"Wake up!" Zhang Fan said to the anesthesiologist after checking again.

Lao Huang, director of the anesthesiology department, also accompanied Zhang Fan from the beginning to the end of the operation, but he was a little easier than Zhang Fan. He could simply move and sit. But even if you don't do anything, you can sit and split for more than ten hours.

"OK, wake up! Wake up!" Lao Huang repeated Zhang Fan's words for fear that he had heard wrong.

Wake up with boiling water, boss Gan with a scar on his face was awakened.

Confused looking at the surrounding scenery, there was no time to explain to him.

"You are on the operating table now. You can do whatever I ask you to do. Do you hear me? Blink when you hear me!"

Because of endotracheal intubation, he couldn't speak. Lao Gan blinked.

"Move your right leg!"

Everyone's eyes were all focused on Lao Gan's right leg, and the whole leg was exposed, from tinking and clanging to feet.

I saw a slight twitch of the right leg muscle on the operating table and a slow translation of one leg!

"OK, move your left leg!"

"Good!"

There was only Zhang Fan's voice in the operating room, but the surprise in the eyes of others could not be concealed.

After the inspection, "Ma fan!"

Needless to say, a needle was injected into the oxygen channel. Lao Gan just woke up from his confusion, turned his eyes and fell asleep.

"Fixed!"

The atmosphere in the operating room is alive. In this line of work, it is not said that they hope their patients can't do it. Especially on the operating table, doctors and nurses really hope that patients' surgery can succeed.

"This man will be an iron neck!" Wang Yanan finally couldn't help talking.

"It's better than paralysis!" Xue Fei said.

Wang Yanan glared and turned his eyes.

"Cough!" Zhang Fan coughed. He hates talking on the operating table.

Wang Yanan looked at Zhang Fan reluctantly, and his teeth were broken. If it were anywhere else, could Xue Fei be her opponent?

"C3, C4 fusion! Sharp point, pay attention to the vertebral artery! Stripper, Xue Fei pull it! Pay attention!"

When Zhang Fan said something about Xue Fei, Wang Yanan's eyes smiled.

The steel plate is applied between the third and fourth cervical vertebrae, and then the screws enter one by one.

The deformable steel plate is applied to the cervical spine. This kind of deformable steel plate is not that it can deform, nor is it a transformer.

This thing is that the direction of the screw is different. For example, the screws of ordinary steel plate are straight in and straight out. The direction of the first screw and the subsequent screws are parallel.

This variability is different. The first screw is inserted on the left and the second screw is facing the right.

To put it simply, the first is a traditional position, and the second is lying behind your ass.

In such a row, the directions are different, and the benefits are obvious. The steel plate has stronger adhesion and stronger fixation.

But the disadvantage is that there is no trace of activity at the broken end of the fracture.

In general fracture surgery, there is 1-2mm activity space for the broken end of the fracture, which will make the broken end of the fracture recover faster.

This is not good. It's dead. Don't move! Boss Gan estimates that it will be troublesome to eat in the future.

There's no way to bow your head.

After more than twenty hours, the operation was finally over.

"Yes, it's less than 24 hours. You can make progress!" after praising everyone, Zhang Fan quickly got off the operating table and went to the bathroom. He felt that the egg skin below was about to be stung.

The patient was moved to the surgical flat car. Zhang Fan doesn't worry about the rest.

After taking a rest for a while and drinking a mouthful of warm water, Zhang Fan took a bath, and then slowly went out of the operating room. He was tired enough to say that he stood motionless for 20 hours. Zhang Fan felt that his joints all over his body lacked lubricating oil, and he seemed to have a sense of squeaking and twisting when walking.

As soon as he got out of the operating room, Zhang Fan found Lao Chen sitting on the bench at the door

of the operating room, drooping his head and dozing off.

The one without hair on the top of the head is particularly obvious.

"Lao Chen! What's the matter?" Zhang Fan scolded his mother in his heart.

Something must have happened. It's still a big deal. Otherwise, Lao Chen won't stay up late and doze off here. He won't call the operating room.

I'm afraid I'll be affected by the operation.

Zhang Fan shouted, Lao Chen immediately looked up, and then suddenly turned from a daze into a grin.

"Did you drink?" Zhang Fan's heart was half relaxed. Really, he would rather Lao Chen drink too much here!

"No, Zhang Yuan's wedding!"

"OK, the happy event is good. I scared you to death. OK, I won't say the happy event first. I'm too tired now. Don't let me have any more burden. I'll go to have a rest and wake up."

Really, Zhang Fan is not curious at all. As long as there is no death and no major medical accident, Zhang Fan doesn't want to take care of anything now.

Just want to sleep.

Chapter 1449

"Why didn't you tell me earlier?" Ouyang's face was jubilant. He walked around the office as if it had been the second spring. He didn't know what to do now.

"Your phone is off!" Lao Chen explained with a smile.

"You don't know my family. Hey, if you told me yesterday, I would go to China hospital to have a look. When the goods left, they told me how he operated China Hospital.

Hum, I should go and see how he runs Huahua hospital! "Ouyang is not a person who has to forgive people. She doesn't believe in Uncle Mao for the rest of her life. Moreover, she can't learn from overlord. The old lady is the standard.

Lao Chen smiled, "I haven't even notified Zhang Yuan!"

It's not dawn and he hasn't been to work yet. Ouyang is old and can't sleep at home, so he came to the hospital. Lao Chen didn't go back last night. This meeting is good here!

"Hey, how can I criticize you? You're also a member of the team now. You shouldn't be like this. I'm not the master now!" Ouyang looked at it as criticism, but what's inside and outside is maintenance.

"You will always be my leader!"

Dunima was moved by Ouyang's words, that is, the old lady is extremely happy and believes in today. If it were put aside at ordinary times, Lao Chen would not be able to fool the old lady.

The old lady has experienced too many things. When she was young, she was the one who came from intrigue.

Today's 20-year-old Lang Dang is still a child in the eyes of adults, but when Ouyang was in their teens, they carried guns, knives and people who didn't deal with them. If they had a bad mind, could they survive!

"I'll report to Zhang Yuan now?" Lao Chen asked with a smile.

"Go, go!"

Old Chen smiled and turned away, leaving the excited old lady in the office like a grinding donkey.

Zhang Fan went home last night and was sent by a full-time driver. For Zhang Fanai's habit of driving, the full-time driver is almost crying.

When Zhang Fan came home, he ate a little and went to bed. Shaohua took off his clothes. Lying in bed, Zhang Fan, who never snores, snored all night. Shao hualeng didn't sleep.

I'm too tired. My muscles are too relaxed to lift my spirit.

Early in the morning, Zhang Fan woke up at his usual time and looked at Shaohua with a tired face. "Why didn't you sleep? Insomnia? Something happened?"

"You snored all night. I guess our next door neighbor's cat didn't rest well all night, not to mention me."

Shaohua jokingly said that he wanted to get up and make breakfast for Zhang Fan. Zhang Fan didn't let Shaohua get up.

The two held each other and said the conversation. Because Shaohua was too tired, he didn't bother Zhang Fan, which made Zhang Fan feel that he had just got married. It was very warm and sweet!

Where, like this period of time, has become a task, making Zhang Fan afraid.

When I got up and went out, I found old Zou, the full-time driver, cleaning the car again. "Master Zou, what are you?"

"I saw you too tired yesterday. I'm afraid you can't slow down today. I came early. The car is a little dirty. I'll wipe it when I'm idle."

"Hey, look at you. Did you eat? I didn't eat either. Let's go out and have some food." Zhang Fan greeted old Zou to get on the bus. He didn't take the initiative to drive, otherwise Lao Zou would be embarrassed.

In fact, old Zou ate two eggs and three steamed stuffed buns in the morning.

Because it's winter, I don't eat more. It's a little cold.

But the Dean offered to invite him to dinner, and he had to accompany him.

Tea vegetarian diet, if it comes to breakfast, is actually richer in winter than in summer. Because of beef and mutton, breakfast in summer is a little dry.

Winter is just right. Where I don't want to leave the hospital, rows of breakfast cars have opened, and the white steam has covered a street. Looking from a distance, I don't know that this place is the place where Taoist friends want to become immortals.

After entering, it was also lively and noisy. Almost all the young people came to have breakfast, and the old people couldn't see it.

Rice sausage noodles and lungs, beef powder soup, oil tower, butter milk tea, fried dough sticks, steamed stuffed buns, all kinds of.

I was too tired last night. I ate a little at home. I was a little hungry in the morning, which made Zhang Fan want to eat some meat.

After ordering 20000 powder soup, Zhang Fan and old Zou sat down at the stall and ate.

To tell the truth, this kind of powder soup tastes really good. Zhang Fan has also made it at home. One pot of meat and one pot of noodles can't make the taste of others.

The clear soup of a large sea bowl is as cool as boiling water. At the bottom of the bowl is a white and tender jelly ball. The jelly is covered with a little vermicelli, which is covered with several pieces of beef brisket.

First drink a mouthful of soup, darling. The soup with a little pepper will wake you up in an instant. It's spicy but not choking. Take a mouthful of powdered soup. The caramel non paste oil tower baked with the skin, the sweet maltose decomposed in the mouth of starch and the fragrance of fat are mixed together.

Really, the more you eat, the better.

After dinner, Zhang Fan entered the hospital. Lao Chen seemed to have arranged a spy for him. As soon as Zhang Fan entered the door, Lao Chen came in and was busy boiling water and making tea for Zhang Fan. Zhang Fan didn't let Lao Chen do it, but Lao Chen wasn't happy.

After a while, Wang Hong also came in, but when Lao Chen was making tea, Wang Hong was even red, and she was late again.

"Zhang Yuan, there were several things I didn't report to you yesterday. Why don't you listen to me while drinking tea?"

"OK, you say I listen!" although he promised Lao Chen, Zhang Fan still asked Wang Hong to have a look at the operation schedule in the operating room first.

Because yesterday, doctors, nurses and anesthesiologists in the operating room worked for several rounds almost day and night. Today, he cares about it. Don't send people to work again, and he also has to see if there is any major operation today.

Zhang Fan looked at Lao Chen and said, "you say you, I see me! Don't wait for me to go, you have to follow, which will delay your time!"

In fact, Zhang Fan is not interested in Lao Chen's administrative report.

Lao Chen smiled helplessly, "the superior held a meeting yesterday, mainly about the rectification of medical treatment in tea vegetable area. The leaders of the ministry came..."

Lao Chen paused, thinking that Zhang Fan would give some reaction, but Zhang Fan didn't hear it.

"The leaders of the Ministry should integrate tea element medicine!"

As soon as Zhang Fan listened, he responded. He raised his head and looked at Lao Chen. There was no

joy on his face! Instead, he was stunned.

Lao Chen's heart clicked, and Zhang Yuan was unhappy.

"If so many doctors are integrated, the expenditure will be too large. It may not be a good thing!" Zhang Fan seemed to himself and to Lao Chen.

When they reported, the Chinese hospital next to the tea vegetable hospital opened the pot and filled the yard with people watching.

Chapter 1451

Zhang Fan began to analyze the leaders, which made the leaders fidgety. In the early years, the state suffered a lot from state-owned assets. In the business of turning left hand to right hand, some people have a fat head and big ears.

"But this is also the property of the country!" the leader's tone was obviously three points weaker.

Many doctors have a discount on equipment on their payslips. Although there are not many, it seems that there is a feeling that labor tools are rented. Someone once asked, this machine was bought by his own hospital, and the hospital staff have to pay the depreciation fee?

Can we dismantle the machine and take it home when the machine is scrapped or eliminated? Of course not!

Therefore, the later state-owned assets were strictly controlled. For example, the hospital bought a refrigerator for 10000 yuan. From the day it entered the hospital, the refrigerator had a discount fee, which was finally included in the operating cost of the hospital.

When the refrigerator has been used for five years, someone wants to buy it. After discussion, if it can be sold, the price will be sold at the price deducting depreciation expenses. Then there are many statements in it.

Many medical examination units in a field in the city claim that their equipment has CT and MRI. In fact, most of these are taken out by walkers from public hospitals.

As for the equipment of Hua Hospital, it was out of date when it was bought, and the quality was inferior and the price was high, so it was not worth removing the depreciation fee. Zhang Fan definitely doesn't want these rags.

Although these equipment reports are worth tens of millions, in fact, when they were bought in that year, they were not dehydrated.

As for doctors, there are good doctors, but Zhang Fan will not take over without taking off three layers of skin. Doctors in the tea vegetable hospital have been studying continuously since the age of Lao Huang. At that time, they went to the bird market for further study. Later, they studied in almost all the top hospitals all over the country.

"Otherwise, the state will buy back!" Zhang Fan saw that the tone of the leaders in the Ministry was obviously discouraged, so he smiled and communicated with the leaders.

And during the communication, Zhang Fan took a look at the leader of the bird market who pays attention to health. They had a pair of eyes. The leader of the bird market looked at other places. Although it was only one eye, Zhang Fan also understood the meaning of the leader, that is, don't look at me. I won't help you or him. The rest depends on your ability.

Because the tea vegetable hospital has been upgraded, he is credited for its success. The superior took care of these equipment, and he also contributed to it.

Anyway, he takes credit for going in and out, so they don't help each other.

Zhang Fan looked at the leaders of the Department and felt hesitant, so he put out the decision to let Ouyang out. It was not Ouyang that was difficult to use, but too strong and too large killing area.

"What do you say? You don't want the equipment. You don't accept the personnel. You just want the chassis?"

Zhang Fan smiled implicitly and nodded.

"Where is such a good thing!" the leaders of the Ministry made Zhang Fan laugh angrily. He also finally understood that the superior of the Ministry had specially explained before coming to tea vegetable, and was ready to work patiently after going to tea vegetable.

At that time, he didn't understand. Generally, when the superior went to the subordinate hospital, he didn't say what is what! Now he knows what it means to work patiently.

Although the dean is young, he is well-known, and the most important thing is that this guy's lack of oil and salt is a thorn. If Zhang Fan really doesn't take over, he really can't help it.

"I don't know who brought this guy out. His teacher, academician Lu, is gentle and always looks like an old man. Although his grandfather has a bad temper, he is also reasonable. Why is this guy unreasonable!"

At the gate of the conference room, Zhang Fan and the leaders from the Ministry, you come and I go. They are fierce.

Zhang Fan knows very well that this kind of hole can't be opened. Once it is opened, there will be a flood in the future. He managed to build a small pile of sand. As soon as the hole opened, it was washed down by a bubble of urine. He had no place to cry.

"You can see the age of the doctor across the board. We have made great efforts. We can't let people in their thirties retreat! These equipment can still be used for physical examination, brother comrade, we understand you.

You have to understand us, too. "

In this kind of thing, whoever is anxious will lose.

"What about subsidies, financial subsidies? What about millions of financial subsidies and special funds for national medical subsidies of China hospital every year?"

"This can be, I promise it must be!" the leader of the Ministry pushed his little hair with his hand and said firmly, because this money was not issued by the Ministry, but the bird market's own business. He made decisions for others. Of course, he was happy.

After a long week of negotiation and evaluation, Zhang Fan felt that this week was longer and more tired than a year.

But the result is satisfactory.

A medical group was established in the tea element region, and a medical group was established in the tea element region's top three hospitals led by the tea element hospital.

The original meaning of the tea vegetable government was that the president of China Hospital also joined the team. As a result, a group of women comrades in China hospital got down, and the government was embarrassed to open its mouth.

Digital hospitals cut some doctors, but the previous functions of digital hospitals still have to be undertaken.

Some young digital doctors continue to hold the title, but they are managed by the tea element hospital.

.....

The rectification of the hospital, just when everyone felt that the overall level of the hospital would decline, Zhang Fan's corresponding system also came down.

Examination, people willing to enter relevant departments can enter the general hospital from the branch hospital or go to the branch hospital from the general hospital. Those with unsatisfactory results enter the community and do not enjoy the salary treatment of tea vegetable hospital.

Anyway, several families are happy and several families are sad.

At the weekend, Zhang Fan didn't go to the hospital. Today, his family will entertain guests.

He was a colleague of the elder martial uncle in his early years. One went to the Navy and the other to the General Logistics Department. The old man was responsible for the withdrawal and merger of the tea element digital hospital.

After tea, uncle Lu called old man specially, so Zhang Fan's master answered the old man.

As soon as Zhang Fan heard this, he wanted to entertain, but he couldn't entertain outside. He wanted to entertain at home.

Therefore, early in the morning, Zhang Fan drove with Shaohua and Shiniang to the vegetable market to buy some vegetables.

On the way, Shaohua looked worried, "Shiniang, what do you say to do today?"

Shaohua and Shiniang are chatting behind. Shaohua is worried about his cooking.

Zhang Fan thought about it. It's really a problem. It doesn't matter if his family eats. Shaohua makes the treat. It tastes a little ugly.

Potatoes roast beef, stewed potatoes can not be found, a bowl of paste wrapped meat, what I know is potatoes roast beef, what I don't know is sesame paste soaked meat pimples.

After thinking about it, Zhang Fan called the director of the government reception office to ask for a cook.

Unexpectedly, they sent a chef class directly. "As far as your family has not used our chef, you can rest assured that our level will definitely satisfy your guests."

Zhang Fan's house is on the capital Road, which is the most essential part of the city of tea. A hundred

years ago, this was the residence of Guixun. On one street, there were the consulate of Lao Maozi, the consulate of Sandao and the general's house of tea.

We should have history and environment. Towering trees are scattered on the roadside. The villas in the community are like hiding in the forest.

The country is stable. The location here is limited. If you can live here, you can't get in with money. Unless the car overturns or dies, the replacement will fill in immediately.

A star old man accompanied by Lu came to Zhang Fan's villa. "This is your little disciple. Elder brother Wu is full of praise. I finally saw him today."

In his early years, the old man was engaged in digestion. Later, experts turned to leaders and began to work in the field of military medical management.

The digital hospital is more agile. At the command, those who should be dissolved should be dissolved and those who should be moved away. It's not like that China Hospital has been tangled with Zhang Fan for a week.

Professional is professional. When the guests arrive, the people in the cook class also start cooking.

Zhang Fan doesn't drink, but there is a lot of good wine in his family. This is also good wine. People who don't drink keep it.

The old man has been boasting since he entered the door. Although Master Lu said it, the eyebrows on his face trembled.

Zhang Fan felt something was wrong. As a result, something was wrong after dinner. "The salary of tea vegetable hospital is too high. If it is not paid according to the hospital, the comrades who are merged into your hospital will have ideas.

But according to your hospital, the whole army doesn't have this special case. Today, I want to talk to Zhang Yuan about this. Of course, this is a business. Don't mix other things, especially don't look at the face of your martial uncle and your master.

Do whatever you want! "

This NIMA, Zhang Fan thinks that the old man's door is bad. Zhang Fan really guessed it. Too NIMA is crafty!

.....

The merger of hospitals has been a little chaotic in management for a few days, but it is only a few days. Zhang Fan originally thought that digital hospital and China hospital would be treated equally.

As a result, Ouyang gave no at the three person meeting. When Lao Chen saw that Zhang Fan and Ouyang disagreed, he immediately stood up and began to make tea and pour water, so he had to mop the floor with a mop.

"We still have to bear the responsibilities that should be borne. The hospital is on the border and has no ability. Since we have the ability, we must bear the responsibilities that should be borne."

As soon as he said this, Zhang Fan thought about it and agreed. Yes, if you can, you have to bear it.

But we can't let them go. The training list of the digital General Institute was directly asked by Zhang Fan for an unlimited one.

The security of the hospital has completely changed from the original security department to one with guns.

.....

"Is this true?" in the evening, in order to slow down, Zhang Fan showed Shaohua the precious stones sent by his superiors to Zhang Fan.

Huge rubies and Sapphires filled a suitcase. Spread on the bed, bright like a glass ball of the bed.

Shaohua felt this and that for a while. They all felt that Zhang Fan bought it from the stall to fool her.

Shao Hua fiddled with it for a while. "Are these all ours? Make a necklace for Jingshu and a necklace for Shiniang and two moms. Do you say red or blue?"

"Adjust three, no more. Although the leaders of the desert country gave me gifts, others in the hospital also made great efforts. I'll take them to the hospital to discuss how to divide them."

Zhang Fan was lying in bed and was relieved to see that Shaohua didn't bother himself.

In the past, people often boasted that they could create a nation by giving him a girl. Zhang fan used to think he could, but now he finally found that he is still too young.

Now he can be sure that the person who said this was definitely a single dog boasting.

Chapter 1452

Merger and integration of hospitals. At the beginning, everyone loved it, and as a party, they all felt that they had made money.

For example, the government, especially the tea vegetable government, even smiled secretly. "Finally NIMA got rid of the big burden." boss tea vegetable felt that he slept much better than before and didn't get up at night!

Because there is only one hospital that makes money from tea.

Zhang Fan and Ouyang also think they have made money. Because, not to mention others, first of all, China Hospital and the newly built standardized ward of digital hospital can't talk about what tea vegetable hospital likes.

Although it is impossible for these buildings to make tea research institutes, these buildings are too easy to use for shunting patients and departments.

But who lost? Zhang Fan finally found that he was young! After all the financial information is cleared up, Huahua hospital is almost insolvent. In recent years, in order to catch up with the pace of tea vegetable hospital.

Vigorously purchase equipment and build buildings. At the beginning, the leaders of the tea vegetable government felt that this was a good way to get rich and go far away, so they strongly supported it.

As a result, it was later found that NIMA was lying. Wages, performance, social security, daily maintenance, loss reporting, and 7788 expenditures resulted in the failure of the medical insurance fund to cover expenses, and then embarked on the old road of the tea vegetable government to borrow money.

Just a few million at the beginning, and then slowly tens of millions, one billion, five billion! Therefore, when the superior ordered the integration, the tea vegetable government packaged it for the first time and didn't even say anything about bargaining.

The leaders of bird market think that the tea vegetable leadership is still OK this time, and Zhang Fan also thinks that the tea vegetable leadership is still bold.

Now, Zhang Fan finally knows that NIMA has been fooled. "Is this integration, or are you afraid that the hospital will bring down the government?"

Hospital loans can't be stopped. As long as they are opened, they can't be stopped easily.

Ouyang frowns at the financial report. Zhang Fan and Ouyang are both experts in looking at the medical records. NIMA is a layman in looking at the financial report.

But after accounting experts from the finance department gave accounting, Zhang Fan and Ouyang also understood.

"Unexpectedly, look at the dean's entertainment expenses, which are reimbursed more than 100 times a year. Where do so many people need to be entertained come from?"

"Abolish! Those who fail in the exam and fail to pass the exam will be abolished! We are not civil servants and have no iron rice bowl!" Zhang Fan's face was black. At this time, NIMA was angry. It turned out that NIMA sold defective products by the government.

When the hospital was busy integrating the examination, a vicious fight occurred in the tea vegetable City, which directly suppressed the limelight of the integration of the tea vegetable hospital.

Venus community, a slightly more high-end community in Teasu city. This community is a small, multi-storey, garden like community with four floors. When other communities are still more than 2000 square meters, this community is almost more than 4000.

So the people who bought in this community are not rich, but they always have a good life. In the garden of the community, there are many people walking dogs at night.

As a result, a small thing happened while walking the dog. A male owner with a little male dog and a female owner with a little female dog are respectively active in the community. Although it's from a community, I've never dealt with it.

I don't even have a friendship to meet and nod.

As a result, while walking, the little male dog of the male owner gave the little female dog of the female owner to Huo. The female owner is worried, but the two puppies can't be separated for a while and a half.

She felt that she had been greatly humiliated. Her speech may not be good, and the male owner is unreasonable. It is estimated that she also said something ugly. The woman slapped her in the face. As a result, the man didn't save fuel. He immediately waved and knocked the woman over.

After the woman owner's husband came, he also joined the battle. As a result, he didn't fight twice. He turned around and ran away. Originally, he thought he was going to call the police or security guard. Unexpectedly, he was going to get weapons.

The wife of the male owner also came down. When she saw her husband whose face was dug, she tore up with the female owner.

In winter, there are few people walking. The open community has become a battlefield for two families. Two teams of men fight together. The two women also tear each other's hair and bend their heads.

Not only did he not persuade others to fight, but he also joined in. This is also a talent. The male owner kept scolding while standing on one side. When he saw that his daughter-in-law was a little inferior, he was a kick.

It was a small matter, but I got angry. The man with a small knife came down like a balloon. He stabbed the male owner walking the dog on the spot. Then the man with red eyes turned his head and stabbed the female owner who was playing with his woman twice, and immediately fell to the ground.

That was the end of the matter. As a result, several other families came down for a stroll with their children. They not only didn't stop them, but also cheered. A woman even shouted: come on, call me to death.

Those who watch the excitement are not afraid of big things.

When I saw the blood coming out, someone was nervous and called the police. As a result, the man with the knife didn't know what he thought. When he picked it up, he began to chase the murderous people around.

Suddenly it was like a wolf like a sheep, screaming and shouting. Those who can't run fast, fall down and run away with their shoes.

The man, who has lost his rationality, stabbed everyone, no matter big or small, men or women.

When the police came, there were seven or eight people lying in the garden of the community, most of them old people and children. The lost shoes everywhere were like the blood splashing from killing chickens. Where it was still the community, it was directly the Shura field.

The police fired and 120 came.

In the cold wind, the female owner of the dog walking sitting on the ground looked at the blood and lost shoes. She didn't expect to live a comfortable and rich life in a few minutes. It's gone!

I couldn't cry. I looked at it foolishly, and my mind was blank. Only the separated dogs wagged their tails around the female owner, looking satisfied.

Because it was Saturday, Zhang Fan had just had dinner and walked with Shaohua in the evening. "Is the heating hot in the house over there, master? It's estimated that the old man didn't adapt to the first

winter when he came to tea. It's time for his parents to come back. The farm doesn't have heating and wants to burn their own boiler. You should also persuade them to come back.

Even if they don't want to live with us, they don't have a house. "

Zhang Fan told Shaohua that to tell the truth, Zhang Fan doesn't care about these things at home at ordinary times. The conditions at home seem to have changed dramatically since his marriage. It's not rich, but there is no lack of money.

However, without Shao Hua and others, just a few old people. First of all, Zhang Fan has no time to worry.

"I've already arranged. I'm worried that the heating on Shifu's side is too hot for the two old people. As for their parents, I've asked the farm workers to help clean up. It's estimated that they will come back next week."

They talked and walked slowly. They could walk for a few days. After a while, they couldn't walk after the heavy snow began. Zhang Fannan took the time to tell the truth. There are gains and losses.

Outstanding at work, there is a debt at home. Therefore, although Zhang Fan has a black face and black hands in his unit, he has abolished the establishment of almost 600 people. It is estimated that the abolished doctors have greeted the ancestors of Zhang Fan's family from top to bottom for more than a dozen generations many times.

Zhang Fan who comes home is just like the Persian cat. Shaohua can hold Lu and drag his tail to see his ass. Zhang Fan always has a smiling expression.

"Why don't we go to a movie?" Shaohua suddenly said to Zhang Fan.

"Good idea, my daughter-in-law's idea is good! I'll drive." Zhang Fan now imitates Lao Chen.

As soon as the car was started, before Shaohua got on the bus, Zhang Fan's confidential phone rang.

Zhang Fan doesn't usually take his private phone. Because the family has something to do, they usually don't find him. They call Shaohua. As for the unit, now each department has a backbone. Zhang Fan participates in the emergency much less than before.

But this big brick's confidential phone, where Zhang Fan goes, he takes it with him. It is no exaggeration to hear that Zhang Fan's scalp tightens naturally when he is in the field of hope.

Pick up the phone, "Zhang Yuan, get to the hospital..."

Shao Hua just opened the door and saw Zhang Fan with a changed face holding the phone. She knew it was over!

"I have to go to the hospital. Hurry home!"

"Don't worry about me. Be careful yourself. Drive slowly on the road. Don't..."

Before he finished, cooluze sped away. Zhang Fan went out of the community door and drove towards the hospital.

Shao Hua didn't want to see a movie. His man was in such a hurry to go out. Although he wasn't worried, he was also uneasy. Walking on the road, Shaohua thought about what disasters there were in this season.

"Flood disaster is impossible. The chasu river is frozen. Earthquake? Fire? She didn't expect that someone died for the copulation of dogs!"

Back home, Shaohua deliberately found something to keep himself busy. Not long after he was busy, Jia SuYue's phone came, "Shaohua, Shaohua, you know, Venus community killed people!"

Princess Jia's exaggerated tone made Shaohua really nervous. "What's the matter? What's the matter?"

Hospital, when Zhang Fan arrived at the hospital, the police car with flashing lights had stopped in a yard. Wang Hong is waiting for Zhang Fan at the gate. Without Zhang Fan, she is an officer, and in Zhang Fan, she is a leader.

Zhang Fan, stop and open the door. Without waiting for Zhang Fan to ask, Wang Hong began to report: "two people died on the spot, two men and one woman, six seriously injured and one child!"

The male owner of walking the dog was killed on the spot, the husband of the female owner was killed on the spot, and the woman who lost her life was a melon eater standing outside watching the fight and refueling!

Chapter 1453

Under the blue courtyard wall of the lake, the warm sun in early winter shines on the courtyard wall. The creeper with yellow green, like a bald man who has lost most of his hair, hangs on the wall and swings gently with the breeze.

The apple trees climbing out of the wall inside the courtyard wall are almost out of leaves, but there are some small fruits. However, Zou Baba thinks it's like a wrinkled egg, hanging there alone.

The children's frozen faces were red and dressed like meat balls. They also jumped with a bamboo pole to beat down the apples on the apple tree. Suddenly, they said, "the sentry is coming. Run!"

Hula, a group of little children chirped and scattered, and there were younger children. They didn't know what the sentry was, and they were scared to cry. The sentry of the tea vegetable hospital smiled, gave the child a piece of sugar and walked away.

When the sentry went away, a group of children came and jumped and beat apples. These are some old apple trees outside the old obstetrics and Gynecology Department of tea vegetable hospital. The children feel that their joy has been much less since they were uncle of the people's Liberation Army at the door.

In the past, I could sneak into the hospital to pick fruit. Now I can only hit the roadside. In those years, because there was no cremation furnace, there were some stillbirths and some cut organs, such as placenta.

Because the young people don't pay attention to the Purple River cart, they often hand it over to the doctor. Therefore, this apple tree has not withered for decades. It is estimated that it also had something to do with eating and drinking well.

The children outside the courtyard wall laughed innocently, accompanied by the smell of bread just baked in Eric bakery in the distance. Really, the country is so peaceful, and people are so peaceful under the blue sky.

In the emergency center inside the hospital wall, there were bursts of hissing and lung cracking cries, and several white haired old people fainted with tears.

Especially in the seriously injured children's home, grandparents and grandparents fainted for several times, and the child's mother knelt at the door of the operating room, and no one could pull it up.

"I'll never watch the excitement again. I'll never watch the excitement again. God, please don't take my children away. I'll never watch the excitement again."

Mother's tears, saliva and snot are like streams, and she slaps herself from time to time.

There are also the children of male owners who hide in the corner and look at the people around them in horror. Innocent eyes, tears are contained in the eyes, but they dare not cry. She hopes her father can hug herself again and her mother can build herself.

I don't know when people's temper has become more and more irritable, especially when driving, and when taking children or pets. It seems that a person with reasonable knowledge and quality has suddenly become an underwear.

Temper is getting bigger and hotter. All feel that others should be humble to themselves, and fearless courage fills the sky.

In fact, this is caused by the so-called face or official standard thought of the Chinese people. For example, in the early years, everyone called cars cars, because this thing represents the continuation of sedans.

Therefore, those who can drive feel superior to those who walk, and those who keep pets feel that others can't afford them. Then he deceived himself into believing that I was superior. The consequences are the same as the words of the head teacher in Charlotte: do you think you are the headmaster and sleep wherever you want?

With the takeover of the digital hospital of the hospital, the army also gave Zhang Fan a certain treatment. Although the deputy director of the tea vegetable area of the joint logistics department is a part-time job, it is really difficult to manage the digital team merged by the hospital without this name.

Zhang Fan also secretly rejoiced. To tell the truth, as a Chinese man, who has no dream of becoming an officer, but this is just a part-time job.

The patient in the hospital has arrived in the emergency room. Why are the knives controlled, not more ferocious iron bars and hammers?

Zhang Fan doesn't know. From the medical point of view, Zhang Fan's view is that a certain length of knife is really too dangerous. The hammer and stick can't hit the key parts. At most, it's painful jumping and swearing.

And a tool that reaches the length is too terrible. So, although it was a random stab or two, it really didn't have to be much worse than the gun.

"Zhang Yuan, the child directly stabbed into the liver from the posterior rib space. The liver was stabbed with a big hole. The No. 1 adult female patient was stabbed into the right chest. If the rib hadn't stuck the knife handle..."

Xue Fei arrived at the hospital earlier than Zhang Fan because he lived in the family building next to the hospital. He could go to the Department when he took a pee.

While introducing the patient's condition to Zhang Fan, he quickly accompanied Zhang Fan into the rescue room.

"Surgery is needed, which is difficult..."

Entering the emergency room, almost half of the doctors were playing with various pipes, and Zhang Fan's heart sank slightly.

In medical treatment, especially in emergency medical treatment, there is a saying that if you are not sure to deal with patients and patients with trauma, please don't do it blindly, but don't stand aside in a daze. Please do a good job in various channels for patients, such as oxygen tubes!

Almost all the doctors who can do this kind of operation are doctors who can be department directors, which is no exaggeration at all. For example, simple surgery, appendicitis, a resident can go up and cut it off for you in minutes.

Not even a dish.

But what about appendicitis perforation? What about gangrenous appendicitis? These difficult operations require a leading team, not a doctor.

For a team, from the main knife to the assistant, from the assistant to the anesthesiologist, from the anesthesiologist to the instrument nurse, and the itinerant nurse, any chain must be skillfully run in without problems.

"Send it to the operating room and let all departments prepare for the operation immediately." Zhang Fan knows at a glance that these operations can't be taken down only by the emergency center.

One patient after another was running towards the operating room. When the patient flat car appeared in the hall, there was a lot of crying and shouting.

Just when Zhang Fan entered the operating room, a phone call from the government came, "Zhang hospital, hard work, we must pull the innocent people back from the death line, otherwise the social impact..."

Zhang Fan hung up without saying two words. To tell the truth, in real society, most people are warm-hearted, but once hot and hot meet, this regrettable thing will often happen.

People in other industries may not know that a policeman and a doctor encounter a lot of such things. For example, why do criminal police always have an adjutant's face? In fact, this is caused by occupation.

Sometimes, good things don't necessarily come in pairs, but bad things often come one after another.

Every winter, when the snow line on Tianshan Mountain has reached the foot of the mountain, the

prime time for the surrounding criminals is also up.

Their activity window is a period of early winter. Because they enter the deep winter, they are not sure they can bypass Tianshan Mountain, because it is too cold and will freeze into ice sculpture.

China's National Defense Center has once done a map of AIDS. After two thousand years, the fastest growing area of AIDS in China is that several border city is a developed city.

These frontier cities are almost either in the northwest or in the southwest. For example, tea vegetarians are on the list, and the romance capital is also on the list, and the developed city is Yangcheng.

Well, it is said that the origin of this thing is the tea vegetable valley. In the early years, there were a lot of people smoking this thing. When herding sheep, they lay on the grassland, bask in the sun and take a sip.

Immediately the shepherd became a prince!

Later, the state of China made great efforts to crack down, but several neighboring tribes relied on this to support their families.

At the foot of the snow mountain, a group of soldiers and a group of police hid in the depression, waiting for the sack passengers to sneak into the country.

Really, sometimes think about it. For example, drug addicts feel wronged. In fact, they are the soldiers and police who take care of the country in the mountains.

For example, you can't do anything for the Dragon Prince. He has to do this thing. Every time he takes a sip, maybe a policeman or soldier will die.

.....

"Director Zhang, there are wounded people in the border police. Please use a helicopter to equip medical personnel and quickly meet them at the anlashan whistle!"

Before Zhang Fan went to the operating room, the confidential phone rang again. Some people don't ring once a year, and Zhang Fan's phone has become a hotline.

As soon as Zhang Fan listened, he directly asked, "what kind of wounded and how many people?"

"Gunshot wound, fall injury, frostbite, six people, gunshot wound three people..."

Zhang Fan hung up the phone and stood at the door of the operating room with bursts of contracture in his stomach. Let who go. In this case, we must send someone who can make decisions in the past.

When Lao Chen went, he didn't have enough professional knowledge. Let Li Cunhou forget it. It's estimated that he won't be able to go first. Let Zhao Jingjin go. Although Zhao Jingjin is in the frontier all year round, he has been in the bird market and has never participated in such a thing at all.

Only the old lady can go.

"Ouyuan! There is an accident at Anla pass. There are wounded people who want us to go. I can't care about it here..."

"I see. You don't have to worry now. It's time for surgery. I'll take care of everything here. You don't have to worry about it. Let's go to surgery."

After hanging up the phone, the old lady quickly cleaned her hair with her hands!

Then he went out and said directly to the medical department, "Xiao Chen, inform the emergency center and take the rescue medicine. Inform the plane shift and take off in five minutes!"

"Yes!"

Then Ouyang took the military coat stored in the office and walked towards the roof. The only thing the old lady wondered was, "why didn't the superior call me?"

Sister Hua of chasu took off abruptly and quickly flew towards the border. It's too close. Chasu is too close to the border.

Zhang Fan has entered the operating room. He is not too worried about other operations. He is not at ease about the child's operation and wants to go on it in person.

Catechin pediatrics is the shallowest and the latest of all surgeries. So Zhang Fan is not at ease!

Chapter 1454

After Ouyang got on sister Hua, he went directly to the post. In fact, there are also considerations when handing over the digital hospital to the tea vegetable hospital. First of all, the first-aid ability of the tea vegetable hospital is estimated to be one of the best in the whole northwest, not to mention tea vegetable.

Moreover, not only does it cooperate with digital, but also has a particularly good relationship with armed police and fire control. Even people have designated the treatment hospital to the tea vegetable hospital, when all over the country are crusading against all kinds of official cars to pull the junior to pick up the children.

Zhang Fan's red card cooluze was directly ignored. Even the traffic police department said that once the

cooluze starts to retrograde and get on the road, we must pay attention to keeping the traffic smooth and let it pass quickly.

A city, a region, such preferential treatment, because they all know that this person is not to spend too much, but to save people.

When Zhang Fan enters the operating room, Ouyang takes over the overall command of the hospital. As for secretary Ren, Secretary Ren is a mascot to fool the superiors. You see, we really have a dual chief officer responsibility system.

Stretchers, a group of soldiers like marmots, run desperately on the plateau with stretchers, just in order to reach the flat place as soon as possible and get their comrades in arms treated as soon as possible. The young body blooms the flowers of loyalty on the border of the country.

.....

Zhang Fan has started the operating room. This kind of operation is actually a race to see whether the action under the doctor can exceed the call of Lord Yan and the patient's desire for survival.

Because the various hormone reactions of the human body are more powerful than any drug at the critical moment. "Come on! Plasma, dexamethasone, cardiogenic!"

The medication at this time can be said to be the medicine of the tiger and the wolf. It can almost be said to be used according to the limit of the drug safety window.

Many people take medicine, especially the elderly, always add a little to the measurement of drugs, because he thinks the doctor is too timid, gives less medicine, and the effect is not good. In fact, the drug has a safety window.

Once beyond this window, the medicine originally used to treat diseases becomes a deadly poison.

Along the puncture incision, the scalpel extends and cuts. The child who should have been pink and tender becomes like a frozen meat taken out of the refrigerator for a long time because of blood loss.

"Come on, the child is dead. Zhang Yuan, the blood pressure can't be maintained. Come on!" the

anesthesiologist watched the blood pressure drop little by little. Now he has no way. He has given all the drugs that should be given, and the measurement has come to an end.

Now there is almost no way. He can only urge the surgeon on the operating table.

"Know, know, if you try again, it's enough for you to try again. Mention your blood pressure, hurry up and find a way. What did you learn in Mordor, just keep it for five minutes, just five minutes!"

Zhang fan can't help it. The position of the incision is too poor. On the left is the abdominal aorta, on the right is the spine, and then on the front is the intestinal tube. Above is the child's kidney, and below is the child's pancreas and spleen.

He can't think fast. He's done his best. This kind of thing is like an emergency. You never know whether your girlfriend is angry because you smoke secretly or because you are ambiguous with her best friend.

This kind of surgery is not like routine surgery. For routine surgery, you can call the personnel of the Department to plan where to start. You can also lie in bed and rub your partner to find the safest and most suitable incision, but you can't even make the surgical incision in such emergencies.

Come on, come on, come on.

When the child's heart rate was about to have heart failure, with a click, Zhang Fan finally stopped a puffing bleeding artery.

Just like the sound of nature, the sound of vascular clamp is so clear and pleasant, just like the cry of birth!

The doctors on the operating table had no time to get excited, because now they just saved their heart and brain.

When the human body is ischemic, the first thing the body protects is the brain, followed by the heart. As for other organs, they will be directly abandoned.

Therefore, at this time, it is just that the brain and heart have passed the barrier of failure, but the kidneys, liver and intestines are in crisis.

Of course, these organs are more resistant to exercise than the brain and heart. The anesthesiologist secretly touched the sweat on his forehead, and his heart was about to jump out of his throat.

Tanima is scary. Life and death is only a few seconds. Really, he has finished the outcome of the child's death on the operating table.

Ligation, repair, pale children's lips slowly begin to ruddy, just like the newborn sun. Although it is a little

white, this is hope.

Medical, hospital. To tell the truth, this industry is very troublesome. It is estimated that there are few countries in the world that are not troublesome.

We should not only be cheap but also effective, but also take into account the needs of some special groups. To tell the truth, it's hard to do.

At present, countries with good medical care are several particularly small and rich countries, such as those island countries that are about to dance with polar bears, and Li Jiapo, who hates China, are all quite good.

To tell you the truth, a place with a big palm is actually the same as Mu County in China. As long as the coal is still valuable and has not been dug up, the medical treatment in Mu county can be said to be better than these small countries.

But this thing doesn't work!

As long as the country is a little bigger, it has all kinds of problems. As for Jinmao, to be honest, the medical treatment in this country is quite extreme.

Rich people and local tyrants can get the best treatment on blue water polo. It can even develop all kinds of special drugs for one person, but for ordinary people, this thing is too expensive. In the early years, some people came to China from Jinmao to see their teeth and have surgery.

Zhang Fan thinks tainima is exaggerated! In fact, this is a routine operation for Chinese Americans!

As for China, there are many medical problems, but at least ordinary people have access to academician level doctors, which can be envied by ordinary people in most countries.

Especially in extreme cases, it can be said that China's medical care can be envied by many countries. When sister Hua came out of the sky, the signal light on the shutdown platform of tea vegetable hospital flickered like a fairy jumping on a rope.

Elder sister Hua is just like a hero coming from stepping on auspicious clouds and driving through clouds and fog. If she wears more plain clothes, she will be more dignified and solemn! Now it's like a naked Nezha in a belly pocket.

When sister Hua of tea vegetable hospital appeared in the sky of the city, everyone began to talk.

"It looks like it's from the northwest, probably from hall port!" a middle-aged man who looks like a civil servant said to the people around him.

Another obvious person outside the system, the big gold chain and small tattoo, looked at the middle-

aged man around him. I don't know whether it's to raise the bar or really know. He opened his mouth and came: "don't talk nonsense. It's clearly from the north. It must have come from the red flag port."

"Zhang Yuan, the wounded have been transferred to the hospital." Zhang Fan immediately came down from the operating table, because he was not the main knife for this operation, and Zhao Jingjin was the main knife. He just went up to make soy sauce.

"I'll go and have a look. Ma Yichen will go and go out with me!" he said and took Ma Yichen out.

Zhang Fan, a master knife and an assistant, has been standing on the operating table for more than three hours.

If this meaningless struggle in the community leaves people with the feeling of helplessness, the wounded carried out from sister Hua's stomach is distressing and regrettable.

A young age, the fluff on his lips has not turned into stubble. He should have been able to act as a spoiled child at home, but now he still shoulders a heavy responsibility.

Although the wounded in the community were also injured, except for some blood stains, it can almost be said that they were dressed decently.

Looking at the wounded coming out of sister Hua's stomach makes people blind. The camouflage clothes can't see the color. The blood is mixed with soil, which has turned yellow green into gray black. Under the smoky and burning faces, the shriveled lips are like metaplastic skin.

"Turn up the air-conditioning temperature, come on! Don't you see that the patient is still shaking?" Bayin has a big stomach, but she can't care at this time. She should be fully responsible for the work arrangement of nurses in the operating room.

When Zhang Fan entered the operating room, the first thing he saw was not the wound, but the yellow feet, frostbite! Frostbite causes the fingers of both feet to drool like a child, and the yellow skin mucus trickles down.

An operation!

Two surgeries!

Three operations!

The main knives qualified for surgery in the hospital do not need to be urged by their superiors. They all go all out to rescue the patient.

Especially Zhang Fan, if one operation is over and other operations are in critical condition, Zhang Fan will also help to see and get through the most difficult stage.

In the operating room of the hospital, there can be no more chaos.

In the blood center of the hospital, generations of bright red plasma are constantly sent to the hospital operating room. At ordinary times, the director of the blood center who picks up search directly opens the door, opens the anti-theft iron door, and keeps shouting at his throat, "hurry, be careful!"

In all departments of the hospital, there are only two places with anti-theft doors, one is the finance department, and the other is the blood center.

Ouyang stood at the door of the operating room and arranged the diversion of other operations. "Lao Chen, you go to the second branch hospital and take the past of the first Department of general surgery, the second Department of orthopedics and the second Department of urology. Don't stop all the routine operations in the hospital. We can stand it and go to the second branch hospital!"

"Good!"

Lao Chen immediately led the team.

"Lao Gao, Lao Ju, the emergency platform of the hospital has been closed, but there can't be no emergency in the city. You take the third Department of orthopedics, the second Department of general surgery and the Fourth Department of urology to the third branch immediately to support the emergency platform."

"Yes!"

Lao Gao and Lao Ju set out.

Don't look flustered. In fact, Ouyang assigned him with confidence. Lao Chen went for routine surgery. Routine surgery was discussed within the hospital. The problem is not big, and the probability of accidents is the smallest.

Let Lao Chen pass, just take a head.

Let Lao Gao and Lao Ju, the prick in Ouyang's eyes, support the emergency platform. This is Ouyang's vision of employment. The old lady knows that it is difficult for Lao Chen to support the emergency platform, but Lao Gao and Lao Ju can go without any problem.

One operation and two operations are all extremely difficult operations. To tell the truth, since Zhang Fan became a doctor, he did not say that he encountered all fatal operations in one day, not only the patient's life, but also the doctor's life.

He felt that his eyes could not be opened. When his brain fainted a little, the system made a rare sound.

Chapter 1455

It's estimated that everything can become a feature when it's combined. For example, Baijiu, a big foreign nose, thinks that this drink is just a foot wash for the fuck, or a beriberi.

The winter in the South can freeze the people in the northeast. It's not a matter of heating, but wet and cold, which makes you like soaking in ice water.

If you are tired, sometimes simple physical fatigue can also give people a pleasant feeling. For example, it seems that it is still very cool to spend money to move iron bars in the gym and the swelling of muscles.

But the fatigue on the operating table is not this sour feeling, but really tired. Simply, you can do 200 push ups, but flat support may not last for two hours. Zhang Fan is not only physically tired, but also mentally tired.

So, doctor, it's really not a TV play. He wears a snow-white coat, carries coffee and talks with patients. Occasionally, he can pat the big ass nurse, and then he can count money. In particular, a doctor who is a little famous does not boast that he has about 200 outpatient numbers a day.

Don't do anything. A patient can't last more than three minutes. Really, just moving your mouth can grind blood bubbles for you. So Zhang fanlei, really tired, had surgery for a longer time than today.

But today is different. It's like fighting with your wife. I feel I can't beat it. You can change tactics, such as hugging and chatting, but not today. It's like a dozen n's, one down and one up. You say you're a little slow, and people can tear your pants apart.

One crisis followed another. Zhang Fan now feels that he can sleep in the dark when he lies down.

"Break through, break through, break through secondary assistance, whether to enter tertiary assistance?" Zhang fanleng, this NIMA is hallucinating!

The operation has come to an end. Zhang Fan is not hypocritical and quickly gives up the position of the main knife, "Ma Yichen, you come, I'm a little uncomfortable!"

"Or..." Ma Yichen wanted to say, or you go down and have a rest. Zhang Fan said directly, "you do your operation. I'll stand on one side!"

As they spoke, they changed their positions back to back.

There are two ways to upgrade the system. One is to study layer by layer in a formal way in the future, and the other is that among women and children inside and outside, as long as one is perfect, although the others are still ordinary, after the system test, they will still give breakthroughs and upgrades.

Of course, Zhang Fan doesn't know about this. Seeing where a discipline of internal medicine hangs, Zhang Fan is like peeling a layer of skin every time he passes. It's not only painful, but mainly because it's too difficult to upgrade. Really, Zhang Fan feels that he can't upgrade this broken system in his lifetime.

When Zhang Fan said that he was uncomfortable, almost all the people in the operating room looked over. Some are concerned, some are worried, and some are surprised. Yes, Zhang Fan in the wind and rain has hardly asked for leave. He is uncomfortable today.

The older itinerant nurse quietly called a young nurse to replace her, and then she quietly went out of the operating room. Zhang Yuan is not feeling well. This is no small matter. If you don't tell the head nurse early.

After the operation, it is estimated that the head nurse with big chest can eat himself. Although Bayin is young, he still has some prestige in the operating room.

"Zhang Yuan is not feeling well?"

"Yes, I took the initiative from the position of the main knife and let Dr. pony go to the position of the main knife."

"OK, I see. You go in quickly and pay more attention to Zhang hospital." Bayin asked the itinerant nurse to enter the operating room. With a big stomach, she climbed at the door of the operating room and looked inside.

Seeing Zhang Fan standing on the edge of the operating table, his face seemed a little paler than usual, and the sweat exuded slightly from his forehead, as if Zhang Yuan endured something. "It's all like this. There's no operation yet. What are you doing?"

Bayin's eyes turned red. If she is the most grateful person in the hospital, Zhang Fan is definitely a platoon, but NIMA has to have time and money. In reality, the poorest, bitterest and most tired of the top three hospitals are hospitalized dogs. Even if a girl follows you, you dare not want it. Two thousand yuan a month, not only to live, but also to buy all kinds of books, really, it's tears.

This situation will not improve in the future. In order to make doctors feel at ease, we have directly given you a reproductive isolation. NIMA is better than levonorgestrel tablets!

"Upgrade, upgrade, upgrade!" Zhang Fan is anxious. Really, Zhang Fan is not to inherit the family line, nor is he afraid of Shaohua fiddling with himself. He is really for the all-round development of medical undertakings!

"Please make sure the surrounding environment is safe, please make sure..."

What does NIMA want to do? Zhang Fan has no patience and comes directly to confirm! Then he felt as if he had drunk too much in an instant.

The most important thing is that there are all kinds of data and knowledge in the brain, from surgery to internal medicine, from internal medicine to pediatrics, from pediatrics to obstetrics and gynecology.

Zhang Fan suddenly felt that NIMA's own efforts still didn't work. He didn't know so much knowledge. Then Zhang Fan fell into the operating room of the hospital.

Originally, the system asked him to accept the upgrade one by one. Zhang Fan was anxious when he saw the opening of reproduction. Is it a human life for NIMA these days!

Therefore, I chose to upgrade all without looking at it directly. As a result, the crazy knowledge irrigation made the brain shut down and fainted directly.

He blew the pot in the operating room.

"Ah!" the itinerant nurse who had been watching Zhang Fan screamed like a mouse getting into his trouser legs.

To tell you the truth, the young women working in the operating room haven't seen anything. As a result, they were shocked.

Ma Yichen sewed. When he was about to insert the needle, he tightened his heart. Then he saw his master walking straight in the corner of his eyes. His tears burst out directly. I don't know why, his tears flowed down.

He wanted to see his master immediately. Although his master was two years older than him, he really took him as an elder, but the operation had not been completed. He endured and blinked hard, afraid that tears would blur his eyes and make him unable to complete the operation.

"Zhang Yuan!" the anesthesiologist's operation notebooks fell to the ground and ran straight over.

Ouyang had not yet entered the operating room. When she was in the operating corridor, she heard

screams and the call of Zhang Yuan. Her heart clicked.

I walked very fast, but now I'm running.

She desperately pushed some ideas out of her mind. She really didn't dare to think. One thought was sudden death and the other thought was myocardial infarction.

The doctor's sudden death is not news, so Ouyang didn't dare to think. He hurried into the operating room and couldn't wait for the automatic door to open.

The moment she opened the door, she saw the young man who had placed all her hopes on the ground of the operating room.

"Come on, let the people from all departments come, come on!" the old lady's voice was crying.

Then he grabbed the anesthesiologist's stethoscope, tore off Zhang Fan's mask, and then began to tear Zhang Fan's surgical suit. The surgical suit is all inclusive. She can't plug it in, tear it, and then tear it, "what's the matter, what's the matter, Zhang Fan? Don't scare me!"

Chapter 1456

"Secretary Ren is coming to the operating room. Zhang Yuan fainted!"

"Yan Yuan, come on, Zhang Yuan fainted during the operation."

The dean of surgery didn't have to shout. By this time, he had arrived in the operating room. Medical experts, by this time, had all started running towards the operating room.

"Zhang Yuan fainted on the operating table!"

Like a whirlwind, the whole hospital knows. Many people think this is a joke. Usually, when they are free, they will gossip and secretly scold black to buy Jiangxin black. After all, there are people around.

In fact, the changes in life in the past two years, we don't say it, we all know it very well in our hearts, it's all because of Zhang Fan. The income alone has tripled. We don't say it at ordinary times, but now Zhang Fan has fallen on the operating table.

Not only the director, but also some attending doctors. They ran directly to the operating room. The hospital was in chaos. There was a feeling of chaos.

In the medical profession, to tell the truth, it's better to muddle along. Go to a small hospital, prescribe cold medicine, fool people with cold diarrhea, take small kickbacks from drug dealers, and flirt with young nurses from time to time. In case of a difficult disease, transfer to another hospital in a word, and then you can't live with this patient in your mind. In fact, it's very moist.

But if you want to do something, it's hard to tell the truth. First of all, you have to have talent. If you don't have talent, you can only kick at the door and never open it. There should also be emotional intelligence. Although this thing is very mysterious, it is actually particularly important.

Many people say genius, genius. In fact, if you can't survive EQ, you can be crushed by huge industry pressure when you are hospitalized. Especially in the medical industry, although it is not as restrictive as the army.

But the superiors and subordinates are almost a lifetime thing. Before your teacher retires, it is estimated that you will never surpass him. Before your leader retires, you will always live worse than death. Civil servants can change their posts, but changing their posts is as difficult as changing their lives.

It's too difficult for physicians to change jobs to surgery and surgeons to become physicians. It's impossible not to take off a few layers of skin. Therefore, after doctors enter a hospital, they deal with these people almost all their life.

With these, not enough, but also have a good body. The duty of the hospital is never day and night shift. It is 24 hours directly. Although you can sleep, the patient has a stomachache and can't urinate. To tell the truth, being able to sleep is just squinting like a cat.

If it's a surgery with more emergency departments, it's almost impossible to sleep at night, so that's why there are sparks in hand and foot surgery, gynecology and obstetrics private hospitals, because it's too tired.

Look at old man Zhong. He's full of tendons and muscles. He walks like a tiger. Without this good body, it's estimated that he can't reach the current level.

Ouyang felt that his strength was exhausted, and his soft hands began to shake. The hurried expert took Ouyang's position. Ouyang sat on the ground of the operating room. Her mind was blank. She didn't know what to do now.

After countless storms, she really didn't know what to do now. Looking at the young man lying in front of her, she felt hurt, distressed, dry mouth and wanted to say something, but she couldn't get out of her voice when she opened her mouth.

Scissors, Zhao Jingjin took the scissors, quickly started from the neck, directly cut one of the surgical clothes, and then Ren Li quickly put the stethoscope on Zhang Fan's heart. At the same time, Yan Xiaoyu lisuo installed a monitor on Zhang Fan.

"The heart rate is 100, although it's fast, but the rhythm is neat!" Ren Li reported what she heard the first time.

"ECG waveform is normal, no myocardial infarction!" Yan Xiaoyu shouted directly when the waveform of electrical monitoring came out.

"The temperature is a little high, it's 40 degrees!" shouted the director of the nursing department.

All the life data are normal, only the body temperature is abnormal. "Come on, ice cap!" Ren Li's doctor in charge of rescue now, although the nervous expression on her face is particularly serious, the oral doctor's orders are not delayed for a minute.

When he heard that there was no myocardial infarction or cerebral infarction, Ouyang calmed down.

The soft Ouyang was helped up by the nurse. Everyone asked her to have a rest, but Ouyang waved his hand and sat watching. He was deeply afraid that others would not do their best.

"Draw blood!" the needle goes straight into the blood vessel. Arterial blood and venous blood were drawn out at the same time, "let the laboratory hurry up."

Ren Li said, looked at the people around her, looked at Yan Xiaoyu, Yan Xiaoyu shook her head slightly, looked at Lao Ju, Lao Ju also shook her head slightly.

It's not that Zhang Fan is going to hang up, but that he can't find the cause of coma. All the other data are normal except that his temperature shows a high fever.

Physical examination showed almost no abnormality ~!

Ren Li turned and looked at Ouyang. "Ouyuan, let academician Jiang come and have a look. Zhang Yuan's vital signs are stable, but she can't find the cause of coma!"

"Are you too tired!"

"It's hard to say. Under mild stimulation, various trunk reactions are normal. Pain and touch are normal, but they still can't wake up."

Ouyang nodded.

When Lao Chen came from the second branch hospital, he almost turned his car into a plane. When he entered the hospital, his shoes ran away.

"How, how, what happened to Zhang Yuan?" holding Ba Yin's hand, Lao Chen was crazy.

"Lao Chen, Zhang Yuan's vital signs are stable, but you can't find the cause of coma. Now go and contact the academician at home." after Zhao Jingjin went out, he saw Lao Chen.

"OK, I'll have a look first. Hi, I'll go now!" Lao Chen turned and left.

Academician Jiang, academician Liao, even the golden hair expert of the Institute of orthopedics and the pill expert of the Department of Gastroenterology were invited.

Lao Chen bit his teeth. At this time, he knew that no one could discuss whether to invite academician Lu or inform Shaohua. He thought about it. Finally, Lao Chen drove to Zhang Fan's house in person.

As soon as Lao Chen entered Zhang Fan's house, Shaohua saw something wrong from Lao Chen's face. Although Lao Chen has a smile on his face, his stiff face is more ugly than crying!

Academician Lu also came, "what's the matter?"

"Zhang Yuan, fainted during the operation, but rest assured that the vital signs are stable!"

Shaohua looked at Lao Chen's face. She didn't believe it, but

"Don't worry, don't worry, huazi, it's okay, it must be okay!" old lady Lu comforted Shaohua.

When he got on the bus, Shaohua's tears had already flowed on his face. "Everything was fine yesterday, and we had dinner and a walk together yesterday!" Shaohua kept telling old lady Lu, as if to prove that Zhang Fan would be fine.

The old lady looked at Shaohua with pity. She was also a doctor and a doctor's family. She knew the bitterness very well.

The bus soon arrived at the hospital, and Zhang Fan had been transferred from the operating room to the special needs ward. The special needs ward of the hospital was full of doctors and nurses. Ren Li talked the crowd back.

As a result, Shaohua came and the people who left came back!

.....

"Let's inform the leaders. The leaders must be informed about the affairs of Zhang hospital." old Chen said to Ren Li. Ouyang accompanied Shaohua. The old lady is no longer in charge. Now everything in the hospital depends on Ren Li.

People are really strange. Usually, Ren Li really doesn't care about things, and when things happen, she is always in a panic and asks people to find Zhang Fan to find Ouyang, but when Zhang Fan lies down and Ouyang is not in charge, Ren Li actually stands up.

"Lao Chen, inform the leader and report the situation of Zhang hospital to the leader, and I'll leave it to you." then he told Li Cunhou, "you are familiar with the situation in the capital. Now, whether it's human invitation or money, the top internal and external doctors must be invited.

I have contacted the tea vegetable garrison. In the afternoon, there will be a direct flight to the capital. You go to the capital now and contact the experts as soon as possible. "

"Dean Zhao, the master brother of Zhang Yuan over the magic capital has taken off with people. He can arrive in the afternoon. You can make contact and arrangement!"

"Dean Yan, we must do a good job in the treatment evaluation of experts and summarize all the diagnosis and treatment opinions. We must not be careless!"

"Head nurse, now the nursing of Zhang hospital depends on you. The best skilled nurses in the hospital have been transferred out from various departments, and the rest will be handed over to you."

The director of the nursing department nodded his head with red eyes.

.....

"What's the matter, Zhang Yuan fainted in the operating room?" the boss of bird market hung up the phone, first reported to the superior, and then directly asked the Secretary to prepare tea.

Zhang Fan is not only a simple hospital president, but also a node radiating the surrounding medical treatment. For some things, medical treatment is often easier to obtain each other's friendship than commodities.

"Take my old ginseng and go to tea now!" the winery owner also knows Zhang Fan's situation. He doesn't know how to treat him, but he knows that he must do something for Zhang Fan now.

Two days, Zhang Fan slept for two whole days. In the past two days, the tea vegetable hospital has almost been in disorder. In these two days, almost the top doctors in China have been invited.

The diagnosis was not clear, no bacteria were found in blood culture, and no obvious abnormalities were found in nerve and brain waves.

In the conference room, top Chinese physicians and surgeons gathered together, and old man Wu organized a consultation and summary meeting.

"Manager Shao, I'm going to catheterize Zhang Yuan!"

"Yes!"

Lying in bed, Zhang Fan, dreaming, confused dreams, and AIDS will become a beautiful woman out of order to get rid of his pants. He will be scared to cry. For a while, diabetes has to make him taste sweet.

Zhang Fan, who had to sleep for a few days, dreamed that syphilis had become a beautiful woman. Pressing him, he had taken off his pants. When he saw the fortress, Zhang Fan shouted: no! Don't take off my pants!

Suddenly, Zhang Fan woke up and saw the director of the nursing department carrying his brother!

.....

Just when everyone was at a loss, Zhang Fan woke up!

"He's awake!" the general manager couldn't get away these days, otherwise he was ready to come to tea, and the good news came.

"Zhang Yuan woke up!" in the conference room, when all the experts were about to lose their hair, Zhang Fan's sober news came.

Old man Wu took a deep breath, as if he owed his breath these days. "This boy is really scared to death!"

Chapter 1457

Male and female catheterization, many people have not felt, to tell the truth, don't feel, it's really uncomfortable. Female catheterization is a little better. That's why Zhang Fan caused trouble during his internship. When he first entered obstetrics and Gynecology, the teacher asked Zhang Fan and his three young men to catheterize an old lady.

Three people pushed me to give the old lady a catheterization, and then came back after lunch. The paralyzed old lady lying in bed was suffocated and could walk down. Zhang Fan's catheter was inserted incorrectly.

As for male catheterization, it is more difficult. Generally, novices can't plug in without experiencing

several old men with enlarged prostate. First of all, this thing should be lifted and stretched close to the belly to straighten the physiological curvature of the urethra. Then pinch open the urethral orifice, just like pinching open someone else's mouth.

Then insert the hard plastic pipe. The action is a little softer, which can make you feel that the urethra seems to be scratched by a steel wire ball. It hurts. And those with poor skills poke around in the curve.

Really, it feels like someone is stirring around in your stomach with a blunt knife. Zhang Fan saw a young man who had a broken leg and didn't cry. He asked the catheterization to cry for his father and mother.

After the director of the nursing department quickly released Zhang Fan, he was surprised and didn't know what to say.

At this time, Zhang Fan saw Shaohua with swollen eyes and peaches. The girl's tears flowed down with a smile on her face, but the tears just couldn't stop, and the corners of her mouth slowly changed from surprise to grievance.

"What's the matter with you? I'm scared to death. You've been sleeping for two days, sobbing!" suddenly, Shaohua gently grabbed Zhang Fan's arm, wanted to jump into Zhang Fan's arms, and was afraid to sleep Zhang Fan again.

Careful is like a little dog who sees a birthday cake and doesn't dare to eat it.

In the two days when Zhang Fan fell, Shaohua was the most stressed and guilty, because she felt sorry for Zhang Fan and didn't leave a man and a woman for Zhang Fan. Moreover, she is also responsible for signing various treatment consents.

If Zhang Fan doesn't wake up today, it is estimated that Shaohua will inform his father-in-law. The heartbreak and pressure these two days made Shaohua's little baby fat disappear.

"I've been sleeping for two days!" Zhang Fan felt that he was constantly dreaming. Unexpectedly, he had been doing it for two days.

"How do you feel now? What's wrong?" Shaohua looked at Zhang Fan slowly, and his tears finally stopped flowing.

Gently stroking Shaohua's face, Zhang Fan smiled, "we'll have children!"

Shaohua snuggled up to Zhang Fan's arm and dared not really press on Zhang Fan. Really, when Zhang Fan opened his eyes, Shaohua suddenly felt that he had to rely on. His heart hanging in mid air seemed to have a landing ground.

With the sober news of Zhang Fan, Ouyang and Lu, who were almost several years old, entered the ward for the first time.

Looking at the spirit of the black guy, looking at the simple and honest Zhang Fan who smiled first without words, Ouyang's eyes were red.

"How's it going?" although old man Lu looked tired, he pondered and pondered over the treatment opinions of the expert consultation these days. He was too tired to describe it. If he hadn't been holding on to it, he would have fallen down.

"Master, Ouyuan, I'm fine. I'm just a little tired. This sleep can be regarded as a complete compensation for my fatigue in the past two years."

"Well, that's good, that's good!" the old man looked at Zhang Fan's face carefully. The old man, who had been a doctor for most of his life, didn't see any other discomfort except that Zhang Fan's face was a little white.

Ouyang stared at Zhang Fan, "you can't do this again!" this time, the old lady was really frightened. Hearing the news that Zhang Fan woke up, the old lady felt that her hands could not stop shaking.

.....

Wave after wave of visits, the leaders of bird market brought the general manager's care, and told Shaohua in front of Zhang fan that Shaohua must take good care of Zhang Fan and must cherish his body.

The leader in charge of health, tea element, has been waiting in the hospital almost every day these two days. For a moment, I thought whether I could be the president of the hospital, and whether there was no tea vegetable hospital or tea vegetable hospital without Zhang Fan.

Tangled, he has been haggard these two days. After seeing Zhang Fan awake, he inexplicably has a sense of relief.

There were too many visits. Ouyang let people decline some people's visits at the door, but he couldn't stop the medical care of the tea vegetable hospital. Bayin came with the girls in the operating room. The

head of the security department at the door looked at Ouyang's absence and said, "come in and out, don't let the leaders criticize."

Into the ward, a group of gorgeous girls chirped. Then Zhao Jingjin, a general foreigner, took a group of men from general foreigners. Soon Li Cunhou came with a group of doctors and nurses from small departments.

Yan Xiaoyu from the internal medicine department came with his endocrine wives and specially brought some supplements to Zhang Fan. Zhang fan can't help it. He's just in a coma. You don't have to bring a deer whip to visit!

After a thorough inspection and evaluation by the expert group, Shao Hua and the section chief of Lao Chen's security department took Zhang Fan home and couldn't live in the hospital.

Back home, Shaohua let the parents of the farm come to tea. After hearing that his son was unconscious, Zhang Fan's mother cried. The father-in-law and mother-in-law get Zhang Fan all kinds of fish every day. They have to make up for it.

Shaohua is tired these two days. Zhang Fan lies in bed with Shaohua and waits for Shaohua to fall asleep like a cat.

Zhang Fan finally has time to enter the system to have a look.

First, all secondary systems of the system have changed from gray to optional. The internal medicine that gives Zhang Fan a headache is all passed.

In the third level of the system, first of all, the changes of internal and external women and children are the largest, and some special diseases have been added from the original conventional diseases.

Moreover, in addition to the original subjects, there is an additional scientific research option.

The scientific research options are still the same as before, but also step by step, and the requirements for real scientific research results are different from surgery. It does not need many real cases, but needs to be completed in reality.

The only bad thing is that Zhang Fan has never heard of a lot of equipment and reagents here. Therefore, it seems that he can work out something at once, but there are some in the system, which may not be in reality, so there is a long way to go!

However, I finally overcame the common diseases in internal and external medicine, and the most important thing is that I don't have to worry about what's wrong with my tadpoles in the future. Looking at the scientific research options of the system, Zhang Fan finally breathed a long sigh of relief, "no white coma!"

Zhang Fan had a rare rest for a week. Since he went to work, Zhang Fan hasn't had such a long rest except that he was sent to the grassland free clinic and asked for a week off when he got married.

And Ouyang didn't want Zhang Fan to come to work immediately. He was in a coma for two days and frightened the old lady.

However, with the establishment of the Medical Association, many things cannot be controlled by Zhang Fan and Ouyang. On Monday, Zhang Fan came to work with the symbol of more children and less disasters, which I don't know from which immortal my mother asked.

Zhang fan can't take it without her. She can't say it with her mother. You tell her science, she tells you what she heard, you tell her the facts, and she tells you just in case.

After dealing with some accumulated work, Zhang Fan had to take the phone to thank his friends who came to visit the doctor. These days, even Jia SuYue came to see him several times. Zhang Fan was really a little embarrassed.

Zhang Fan's coma has also put a lot of pressure on the leaders of niaoshi. In the past, they always felt that the tea vegetable hospital was an illegitimate child. Although everyone said that they were treated equally, they still paid more attention to several top three hospitals in niaoshi.

But this time, after Zhang Fan lay down, they found that the development of tea vegetable hospital was too powerful. Not to mention others, the light and tea vegetable hospital and several pharmaceutical equipment enterprises have put great pressure on the leaders of bird city.

When they learned that Zhang Fan was in a coma for no reason, they directly began to wait and see. Fortunately, it was only two days. If they were in a coma for more than a few days, it is estimated that these large international enterprises will withdraw their capital.

Moreover, the general manager will be ready to visit in person. This makes the original trail legend more detailed.

While being familiar with the upgraded system, Zhang Fan organized meetings of relevant departments. In the past, tea vegetable hospital was known as a class III class a hospital integrating medical treatment, scientific research and teaching.

In fact, medical treatment has reached the standard of class III class a hospital. Scientific research is purely sufficient. It can be said that it is almost all scriptures read by foreign monks. As for teaching, more generally, interns come every year with the idea that they can work in the tea vegetable hospital after graduation.

"President Li, I have to add some burden to you." in the conference room, Zhang Fan said to Li Cunhou with a smile.

Lao Li smiled foolishly. He felt that he was going to give administrative tasks. Although he didn't want to do it, Zhang Fan was tired and had no excuse.

"Niaoshi Medical University has 16 clinical classes for junior internship this year. I plan to come to six classes, about 200 students. I want Li hospital to take charge of teaching and jump out some top students."

"OK, no problem!" Lao Li looked at Zhang Fan in surprise. He didn't have such a big hand as Zhang Fan. Now he finally began to work towards teaching. After a little meditation, Lao Li said, "you have to give me an assistant, Dr. Zhao."

Lao Li said Zhao Yanfang, and Zhang Fan shook his head. "Dr. Zhao has other jobs, so I'll give you an assistant. It's absolutely appropriate."

After that, let Lao Chen inform he chuanlai, the part-time Dean of tea vegetable kindergarten and primary school.

He Chuan was Zhang Fan's doctor in those years. He was excellent in learning and examination, but his scientific research ability was average.

Chapter 1458

For He Chuan, Zhang Fan's recruitment into the hospital is really like eating a mouthful of chicken feathers. He doesn't know what to do to alleviate the bitterness. Such a famous doctor can't recognize all the surgical instruments when he goes to the hospital. All the knots are slip knots.

When you go to the laboratory, you can write papers on any subject, but the papers written by NIMA are really useless. Later, after slowly understanding, Zhang Fan found that this thing is also a wonderful person.

Take this year's licensed doctors for example. He Chuan was the person in charge of the training course in the hospital. At that time, Zhang Fan thought that we should not let the goods get paid for nothing. As a result, after the examination results came out, the average of tea was higher than that of several other top three hospitals in niaoshi for the first time.

Ouyang is happy to call several hospitals in bird city every day to ask about their achievements. Each other wants to black Ouyang.

The primary school attached to the tea plant and the tea plant kindergarten are now sought after by tea

plant parents. People without social energy can't get in. Later, after slowly understanding, Zhang Fan found that this product was really a genius for the exam.

He Chuan has an awesome legend. It is said that when he met his ex girlfriend's parents, his ex girlfriend's father didn't look up to him. At dinner, he kept saying how difficult it was for his girl to be admitted to the CPA and how excellent her girl was.

Then he said he Chuan didn't deserve his own girl. He Chuan said it wasn't too difficult at that time! His ex girlfriend's father was not happy and said you would give him a test. As a result, this product was taken seriously and passed the examination the next year.

Then it's gone. After Dr. He Chuan graduated, he didn't want to go to a big hospital in a big city. He knew his own things clearly, so he came to tea vegetable pit Zhang Fan.

However, there are still some advantages for those who can graduate from both doctorates. This guy is really excellent in vocational training. Looking at the examination outline, NIMA can delimit the scope of the examination, and she doesn't know how long his head is.

For old man Zhong's suggestion, Zhang Fan is at ease. He has no time for some time. Now he has time. Zhang Fan must find a way to practice it. Now the system has been upgraded. Zhang Fan is harder than before.

If Zhang Fan hesitated a little before, he was deeply afraid that he could not do it well. Now he is not worried at all, so he immediately began to dig the foot of the wall.

While drinking Tieguanyin, Zhang Fan thought proudly, doesn't it mean that I can't train talents with tea? I'll get one for you to see.

Lao Chen looked at Zhang Fan's face, and it seemed that there was a happy event. Lao Chen said interestingly, "leader, how can we get from the Hua hospital next door, whether to set up another branch or get through in front of the hospital."

"Get through, but the name of the branch should be hung up. The state's support for China Hospital is still great, and this kind of cheap can't be let go. Isn't China Hospital newly built an administrative building? Look at the decoration and turn it into our science and education center."

"OK, but the leaders of the tea vegetable government seemed to say that the land was rich last time.

They..."

"Just pretend you don't know. This site was for China Hospital at that time. China Hospital is now bankrupt. This is a historical problem that our generation can't solve. Let later people worry about it."

Zhang Fan didn't plan to give money. Especially after the accident of the president of Huahua hospital, even if the tea vegetable hospital doesn't accept it, it's not business. Zhang Fan certainly won't pay. According to Zhang Fan's idea, it's good that you and I don't ask for money. How white your face is if you still want to ask me for money.

As for the development of China Hospital, Zhang Fan knows his weight. If the state did not vigorously subsidize China Hospital, Zhang Fan would tear down the brand of China Hospital. Anyway, now it's buying mutton with a dog's head.

The science and education group was established. Li Cunhou is the director and He Chuan is the deputy director. He Chuan is in charge of daily affairs. Lao Li is the sign. Academicians personally train undergraduates. Even if niaoshi medical university can't figure it out, there's no place to reason.

Students in the clinical department of Medical University began to contact internal and external women and children in their junior year, which all need to enter the clinical internship. Zhang Fan saw this opportunity and directly came to six classes.

At the University Party committee meeting, the leaders of Medical University were tangled. As a rule, interns go to the hospital on the same day and then go back to school. Therefore, there were no interns in the tea vegetable hospital before, only the fifth year interns.

I want the students to go. There are still some subjects that haven't been completed. I don't want you to go. Academicians started. This configuration is not in the northwest. Students in other provinces will break their heads, not to mention tea, even in the South Pole.

At the meeting, the leaders were tangled. One of them is counted as one. In their hands, they are holding big lobbyists invited by many students. Zhang Fan wants six classes, not one more. The quota is still very popular.

Zhang Fan left a heart and didn't say that even the teacher would invite him, because it was too explicit. Everyone knew that Zhang Fan didn't want to give students an internship. He ran to his own school.

After struggling for a long time, the leaders finally decided to give face to the tea vegetable hospital and, frankly, to Zhang Fan and Li Cunhou. Therefore, the school leaders decided to divide six classes to tea.

Tea vegetable hospital should be responsible for a series of things such as students' accommodation and food safety. To tell the truth, students are really eager to sign up. Everyone knows that in the bird market, they will be at most an ordinary doctor in the future.

Even the bird market can't stay after graduation. But if so many academicians go to tea vegetable, if one can see himself, NIMA will go to Qingjie in the future. So 200 places are almost breaking the head.

Finally, the school decided to sign up according to the results, from top to bottom. Anyway, they are their own graduates, and the leaders of the school don't care.

The students were enthusiastic, but there was a problem when they came to the teacher. No one was willing to go. I don't say no one wants to go, but those who do better don't want to go. Finally, the headmaster can only order. Everyone changes. A teacher will come back after three months.

This made a group of professors, associate professors and lecturers reluctant to go to tea. They all have families, not like the students.

Lao Chen is responsible for the decoration of the teaching building. Ouyang volunteered to be responsible for the accommodation arrangement of students and teachers. The logistics director scolded his mother in his heart, but he followed Ouyang attentively and laid a hand on Ouyang.

After arranging these things, the annual summary will come again. Zhang Fan looked at the document and muttered, "no wonder the old lady ran away early. It turned out that she was running away!"

After Zhang Fan went to work, Ren Li entered the state of Pikachu again. The Secretary's office didn't even open the door all day. If you want to find Ren Li, you must go to the Department of Cardiology.

Zhang Fan has no choice but to catch strong men. "The leader at home is in the administration building." Zhang Fan called Wang Hong to ask about the situation.

"President Yan Xiaoyu and president Zhao Jingjin are here. President Luo Zhengguo went to the operating room. The residential hospital and the High Court went to the clinic today, and Chen Hospital..."

"OK, come with me to Yan Yuan's office and bring these materials."

If you let people work, you must have the consciousness of being polite and virtuous.

Yan Xiaoyu's office, Zhang Fan almost never came, first of all, is a female leader, and Yan Xiaoyu felt that she had not been integrated into the tea hospital before, so Zhang Fan also let it go. Later, slowly, after Yan Xiaoyu took the initiative, Zhang Fan accepted her.

After Ouyang's office went in, it gave the impression that it was not the office of a female leader. Except that the huge inscription on the wall was more conspicuous, there were only a pair of half dead cactus left.

Ren Li's office is simpler. There is nothing else except unified decoration. Yan Xiaoyu's office obviously has its own characteristics.

Some professional books, some family photos, and all kinds of small ornaments. After Zhang Fan and Wang Hong knocked on the door and went in, Yan Xiaoyu looked surprised and quickly got up to greet Zhang Fan to take a seat.

She didn't expect Zhang Fan to come to her office today. "Zhang Yuan, just call me if you have something. How..."

"Hey, it's just a two-step road. It's not so exaggerated." Zhang Fan smiled and waved his hand. Yan Xiaoyu wanted to pour water. Wang Hong immediately took over the kettle in Yan Yuan. Wang Hong dared to show her teeth with old Chen, but she dared not show her teeth with Yan Xiaoyu.

After all, Lao Chen is a good man.

"Yan Yuan, endocrinology is much better than before in terms of technology and atmosphere, but for Yan Yuan, it's overqualified. I think it's still a burden for you."

Yan Xiaoyu sat straight. Although it was not a formal meeting, it also represented the leader's conversation. Listening to Zhang Fan's words, although I was very happy, I was finally accepted by Zhang Fan, but my face was serious.

"You should be responsible for the hospital finance and discipline..."

They talked for half an hour and Wang Hong recorded it. After leaving the office, Zhang Fan looked relaxed, and Yan Xiaoyu looked excited.

"Zhang Yuan, the government has a teleconference today!"

"Let president Zhao Jingjin go. Let's go to the infectious diseases department now!"

Zhang Fan chose and chose in the system last night, and finally chose a scientific research project that can be won in reality.

Although it is the simplest one in the system, it is still difficult for reality, especially for tea, so pull up the team first.

"Oh, rare guests, please, please, the dean is coming, we have to fire guns and line up!" director Huang of the infection department listened to welcome, but in fact it was all naughty words.

If the director of the tea vegetable hospital doesn't care about the position of the director, it is probably the infection department.

Even the director of the emergency center, who used to be disgusted by people and run by dogs, is now in hot demand with the addition of aircraft and equipment.

Without seeing Xue Fei, he said he was fine, so he took a plane for a ride.

In the past, director Huang of the infection department was even more powerful. The most powerful one was to knit a sweater at the hospital affairs meeting. Ouyang was angry and scolded his mother.

But in this way, we should coax Lao Huang to do well.

Chapter 1459

After three doors and changing the clothes specified by the infectious diseases department, Zhang fanci entered the Department. If paediatric gynecology is not in the central position of the hospital, it is arrogant. Big surgery and big internal medicine don't play with them. They don't play with people inside and outside.

As for the infectious diseases department, no one will play with them. The imaging department is in the basement. Because this thing has radiation, the infection department is directly next to the morgue. It can't be in the remote.

It's better in winter. The leaves are bald. You can see the small building of the infectious diseases department at a glance. In summer, the Department is like hiding. People who are not familiar with the hospital environment can't find the location of the Department.

In the past, the salary of this department was not only low, but also dangerous. Because many countries that treat infectious diseases are free, many drugs are extremely cheap. This also leads to people who don't have much energy acting for these drugs.

These drugs are directly distributed by the government on a monthly basis, so doctors' wages are very low, and sometimes they can only get the average salary of the hospital.

There is a saying in the medical industry, either learn technology or make money. Many large hospitals, especially the more famous hospitals, the lower the salary of resident doctors. People are not afraid that no one will come.

To put it simply, for example, the golden mean hospital charges internship fees without salary. It is estimated that 90% of young doctors in the country are willing to go. And some small hospitals, if you don't give money, no one will come.

As for the infection department of tea element, the previous state was that there was no money and no technology. Therefore, the behavior of doctors and leaders also opened their eyes and closed their eyes. If they can pass, they can pass. It's really not good, and they have to give people some comfort.

After Zhang Fan took the post, his salary increased significantly, but his other status has not changed. These infectious diseases doctors are good doctors in the respiratory department.

But even if this department has no future, it should be raised. Because once something happens, these people are the first to enter the isolation zone. It was like later that a doctoral director of the infectious diseases department mocked himself and said that he had been in the hospital before, and the president ignored himself.

This is true. No one in the infectious diseases department cares when things are all right. But in case of an accident, this department is the most dangerous department. Whether the condition is clear or not, they should be isolated first, and these doctors should go in for treatment first.

The doctors in the Department have just finished their shift. When they see the Dean coming to the Department, they are more and more surprised, but most of them are shy. Their habits over the years have made them the edge of the hospital. Even some doctors, Zhang Fan, can't name them.

And they are not used to the dean's attention. If it is a general foreigner, Zhang Fan enters the Department, a group of young doctors should be able to eat Zhang Fan enthusiastically. Some ask questions, some secretly tell Zhang fan that they want to study, and some even let Zhang Fan have his latest prescription.

As for going to orthopedics, we can't see it anymore. At the beginning, Zhang Fan gave Wang Guofu a set of special equipment, which is also a reward to compensate Wang Guofu for supporting the mess left by Chen Qi after he entered the third orthopedics department.

But Wang Yanan and Xu Xian quit. Xu Xian is better. At most, it's the metaphor of dark poke. He actually works very hard and wants a set of equipment. As for Wang Yanan directly holding Zhang Fan's white coat sleeve, NIMA would have been torn apart if the white coat in the hospital was not of good quality.

Although other departments are not as enthusiastic as these two departments, they will also show their faces around Zhang fanduo. For example, when I went to pediatrics, the little nurses seemed to say it secretly, but Zhang Fan heard it clearly. They whispered behind that they were black buying river.

But when they arrived at the infectious diseases department, the doctors seemed shy one by one. They

either went to the ward round or went out of the office and stayed in the nursing station. Before long, there were only director Lao Huang and deputy director Lao Zheng left in the Department.

"Dean, I won't pour you water!" Lao Zheng looked at Zhang Fan awkwardly. This department is more particular than any department, because if you don't pay attention, one will be infected accidentally.

Lao Zheng graduated from traditional Chinese and Western medicine. After being admitted as a licensed doctor, he was appointed to the infectious diseases department and worked for most of his life. The low-key guard didn't know that the doctor was a deputy director of the Department. Riding on the twenty-eight bars is like a cleaning uncle in logistics.

However, after working hard for half a life in infection, Zhang Fan was quite respectful. "Don't be busy, director Zheng, sit down and let's talk. Are there many patients in the Department now?" Zhang Fan smiled innocently, sat in the chair of the doctor in the Department, asked questions and looked at the case casually.

"Ordinary beds are full, and three special wards are reserved to prevent accidents." Lao Huang is very serious about his work. After a report, another sentence came: "how did the Dean think of our corner? There won't be another epidemic!"

The thin old yellow is thin and dry. His hands are just like chicken feet. He has no meat at all. But in terms of contribution, people are the first line of medical treatment in tea vegetable areas.

Zhang Fan smiled, turned to Wang Hong and said, "see, this is director Huang's criticism that we don't pay attention to the infectious diseases department. I have a grievance in my heart. I apologize to Director Huang, director Zheng and the comrades of the Department. It's our work that hasn't been done in place, which makes you cold!"

This is the difference in working methods. At ordinary times, Ouyang doesn't come to the infectious diseases department because he quarrels when he comes. Ouyang and director Huang of the infectious diseases department are of the same age. They both eat soft rather than hard. Zhang Fan's remark embarrassed director Huang.

"If you have any work, please arrange it. I can't speak. I really believe that Zhang Yuan is approachable. Is there an epidemic? Don't worry, I'm here to make a statement. As long as you give an order, our infectious diseases department will not frown even if it is isolated."

"With your words, I can not lose sleep at night!" Zhang Fan looked at director Huang and said definitely. Really, although director Huang is a thorn in the head, Zhang Fan is not worried at the critical moment. These are cadres who have been tested by the epidemic many times. If they say a bad word, all they need is a little attention and attention.

If Zhang Fan has a better attitude and asks them to work hard, they are willing. Because some things always need someone to do.

"I'll check the room with the two directors. Although I haven't notified in advance, the dean of the infectious diseases department has never made an administrative ward round. Today I want to check the room."

Some people bully you to death when you are soft, but some people are more humble when you are soft.

"Hey, look what you said..." director Zheng didn't know what Zhang Fan was going to do, and he didn't know where to put his cramped hand.

"This group of goods can't be on the table. I'll let them come in quickly now!" when I heard that Zhang Fan asked the president to make an administrative ward round, director Huang could see his excitement even though he didn't show much on his face.

Who wants to be a soy sauce maker! They are also medical students, and they are also painstaking efforts. Who doesn't want leaders to pay attention to them in the medical industry.

"The Dean wants to make rounds?"

"What's the matter?" the doctors hiding in the nurse station looked at Mrs. Huang in surprise. Some even whispered, "the old lady is drunk?"

Due to the particularity of the infectious diseases department, it is not suitable for a large number of doctors to conduct collective ward rounds. As a result, more and more leaders are willing to take the initiative to come here for ward rounds. Usually, when the administrative leaders are on duty, they always know the situation by telephone.

Now, the boss of the hospital comes to the administrative ward round in person, and everyone doesn't believe it.

"Don't ink. I usually look forward to the leaders. When the leaders come, they are like unmarried girls. If you are shy, please bring all the medical records." director Huang hurried his doctors and nurses like a duck.

The old lady was not polite to the leaders, but the doctors and nurses under her opponent were quite good. Even some young female doctors liked to call her grandma Huang.

The infectious diseases department is divided into six wards, and the respiratory ward has the most patients. Zhang Fan's purpose this time is tuberculosis.

The most widespread infectious disease in the world is not AIDS or Ebola, but tuberculosis. This virus has been fighting with humans for thousands of years.

In the past, Lin Huiyin and Lin Meimei hung on this disease, and master golu also hung on this disease.

The disease was also known as infectious cancer in the early years. Even now, it is still a killer. About 1.7 million people die from the disease every year and more than 10 million people are newly infected.

Among infectious diseases, the second leading cause of death is AIDS. In the early years, tuberculosis was actually controlled. As a result, the old man had beaten him and did not fight.

This is terrible, and then with the withdrawal of Lao maozi's army, a large area of drug-resistant tuberculosis was spread. For this disease, many countries have spent a lot of energy and money, such as BCG after a child is born.

This thing is used to prevent tuberculosis. Many people think that the national free vaccine is bad and try to prevent children from injecting. To be honest, this kind of brain circuit is strange and doesn't know how to form.

Director Huang urged all the doctors to concentrate in the office. When other departments of the hospital were wearing thin disposable blue medical masks, the infection department was also wearing old-fashioned 16 layer cotton masks.

This mask is specially for the infection department, "Zhang Yuan!" Wang Hong handed Zhang Fan a cotton mask at the first time.

Zhang Fan turned his head and saw that Wang Hong was ready. While wearing a mask, Zhang Fan said to Wang Hong, "otherwise, don't go. You stay here and I'll come out later."

"No, I'm the director of your office. How can you have no accompanying recorder during your ward round? Besides, I'm also a doctor. Let Xiao Li of the medical office stay here. After all, they are not professional doctors."

Zhang Fan glanced at Wang Hong and nodded without saying anything. In fact, he wanted to replace Wang Hong. Because he thought Wang Hong was a little too official, but today, her careless words made Zhang Fan cancel the idea of replacing her.

People have all kinds of shortcomings, but as the director of the hospital office, she is qualified today. If she hesitates and prevaricates today, Zhang Fan will definitely replace her.

As the director of the hospital office, Zhang fan can tolerate her false tiger power and her vanity, but Zhang Fan must not tolerate her retreat in the face of disease, because this is a hospital. Her identity is not only the director of the hospital office, but also a doctor. She needs to enter the ward at the critical moment.

Chapter 1460

Snowflakes fell silently outside the window, and flakes of flying catkins accumulated in the corner of the tea vegetable hospital. In half an hour, the quiet small yard of the infectious diseases department was like a big white cashmere carpet.

Large snowflakes fluttered in the air, as if they were bustling, but in the small yard where people disappeared, it was so idle and quiet. A group of sparrows with white hats on the tree branches occasionally flew up and down, which made the quiet yard more angry.

The hospital boiler is heated by the hospital heating. In the slightly beautiful departments, the clothes of doctors and nurses are relatively thin, especially in the endocrine. The nurses are better. The female doctors wear very thin, and all kinds of lace bloom rarely in winter.

The infectious diseases department is different. The thick cotton mask is covered on the face like cotton trousers. It's very difficult to breathe. Zhang Fan looks at the department doctors behind him and sighs in his heart, "no wonder the doctors in the infectious diseases department are so thin and can't stop eating three eggs in the morning."

Coupled with the power of logistics heating, sweat mixed with breath and the August 4th disinfectant, people with masks immediately felt that their faces were covered with a piece of wet and warm urine mustard just pulled out from under the child's buttocks.

When entering the ward, the ward of the infectious diseases department is different from other departments. The ward area of this department is relatively small, and the patients are almost one room per person. In this era when the tea element hospital has been the leader in the tea element area, if other departments can have the treatment of a single room, it is definitely energy.

"Pulmonary tuberculosis, recurrent pulmonary tuberculosis, the hospitalized patient is admitted with painless hematuria!"

The doctor in charge of the bed began to report the patient's condition to Zhang Fan before entering the ward. The ward round of the infectious diseases department is different from that of other departments. The ward round of other departments is to report the patient's condition to the superior doctor in front of the patient.

The infectious disease department reports the condition at the door, which can reduce the contact time between doctors and patients. Zhang Fan nods after listening. As a result, after the case, he asks, "what does the pulmonary hospital say?"

Chasu hospital has merged all the top three general hospitals in chasu area, but two hospitals have not been merged. It is not that the strength of chasu hospital is not enough, but that the national policy does not allow it.

One is the women's and children's hospital. In terms of the inclination of medical policies in recent ten years, all hospitals are not as strong as the policies and funds obtained by women's and children's hospitals. Everyone may have such a feeling that the small transparent maternity and children's Hospital, which was not very famous in the past, suddenly seemed to be developed and famous overnight. This is not only the efforts of doctors and nurses, but also by the state's vigorous use of money.

The second is the Pulmonary Hospital, the so-called infectious diseases hospital. The income of this hospital is wholly subsidized by the state. Even if there is no patient a year, the state still fully subsidizes. The salary and bonus that should be given will not be less.

The name of this hospital is also strange. In the early years, it was called the infectious diseases hospital. Later, I don't know whether the surrounding people were unhappy or the staff in the hospital were dissatisfied, so it was renamed the lung hospital.

In 2003, the whole country was shaking. The hospital was renamed infectious diseases hospital. Later, I don't know what happened. It became a lung hospital. Anyway, the past and these two names kept changing.

In general, the initial treatment of tuberculosis patients is in the pulmonary hospital. Moreover, the state has free distribution of drugs for tuberculosis treatment.

"The Pulmonary Hospital suggests transferring to another hospital!" the bed doctor said helplessly. It can be said that the treatment plan has hardly changed since the 1950s. The drugs used are isoniazid and rifampicin.

If there is no drug resistance, it is good to say that once there is drug resistance, it will be quite troublesome.

Zhang Fan opened the case while listening to the report of the tube bed doctor. When he saw the profession, Zhang Fan was a little dizzy. "Drug resistant tuberculosis patients, how or the catering industry?"

"Er!" heard the dean's voice is not big, but very strict inquiry, the bed doctor has no voice. To tell the truth, Zhang Fan's cross examination of others about this matter is purely unreasonable.

Zhang Fan paused slightly and realized that his inquiry was wrong. He shook his head and said helplessly, "go in and make rounds."

When I entered the ward, I was a woman with a headscarf. Maybe it was because of hematuria. The woman's skin color was very white, and she looked like a pretty young woman.

The woman walked in the street. To tell the truth, who knows she is a patient with tuberculosis drug resistance. Before Zhang Fan opened his mouth, the woman began to cough. The woman stood up with her mouth covered while coughing. She was thin and had no strength after getting sick. It was really hard to cough in bed.

Wang Hong gently pulled Zhang Fan, and then she took two steps ahead and stood in front of Zhang Fan. Zhang Fan gently shook his head. In this cough state, not to mention one Wang Hong standing in front of him, even ten Wang Hong standing in front of him can't.

useless!

A woman's cough is very far away. Her thin body trembles in the cough. It gives people the feeling that she wants to cough out a cavity of lung leaves. On her white face, blood vessels and green tendons are exposed in the cough.

It's like a woman wearing a mesh like Turquoise mask. White and sick skin has also become a kind of sick scarlet.

The cough finally subsided. After the cough, the female patient breathed in and snored, just like an old cat getting angry and threatening other creatures nearby. The others who listened had an impulse to cough for him and cough out the things in his throat.

It's too depressing. It's like being infected.

Zhang Fan and others waited for the patient's cough to subside before they said, "how do you feel now?"

"It takes a lot of trouble to breathe in, but nothing else. When can I go home, doctor? The child is young!" the woman took a sip of tea and the local dialect.

"Treat first. When you are cured, you can see the child at any time. What can you do to see the child when you are sick? And you must not touch other people until you are cured. Can you lie down now?"

Even the introduction of relief was cancelled, because no one knows when a woman will cough again.

The woman sat by the bed sadly, "can't lie down, lie down and hold your breath."

"OK, you can sit. I'll check it for you and untie your coat."

Zhang Fan said as he daubed the disinfectant in the corner on his hand. The woman silently turned her back to the crowd and slowly untied her clothes.

When you take off your clothes, you feel extremely uncoordinated. Originally, a thin woman should be as thin as firewood, but the whole chest is like an aerated bucket, and there are no ribs at all.

According to normal people, according to a woman's height of about 165, no 80kg to 90kg can't even see the ribs. But the woman in front of her, Zhang Fan, looked at it with his naked eyes and knew that she didn't even have 50kg.

When the patient turned around, his chest was thin and almost no excess fat could be seen. Only two brown flesh pimples like grapes hung alone in front of his chest.

"I've pumped chest water twice, but I still can't control it. I was going to pump it once today."

The bedside doctor whispered. Zhang Fan nodded and began to check his body.

When she clasped her hands on the woman's back, it was like hitting a leather drum. In the fluffy sound, the woman began to cough again. Covering the palm of her mouth, Zhang Fan saw the bright red blood.

The breathless woman stood up again, regardless of the exposure of her upper body, holding Zhang Fan's white coat with both hands, like a drowning man holding a life-saving rope, dragging it desperately. This is breathless.

The sense of suffocation makes women's eyes stare as if they are about to pop out.

"Pump!"

Tuberculosis is a consumptive disease. In short, it is a disease that bullies people. Pumping puncture, lidocaine local anesthesia, neutral refill, thick needle sniffing into the patient's cleft space.

The green yellow liquid starts to expend in large quantities. With the liquid flowing out, the liquid white foam begins to roll with the liquid flowing out, just like the liquid that is washed out of washing machine is washed out of the clothes.

"That won't work. The protein has been pumped out. This is to raise the soup and stop the boiling." Zhang Fan frowned and said to Director Huang and director Zheng.

"There's no way. The effusion in the chest seeps out again in three days. The more patients smoke, the weaker they become. If they don't smoke, they will suffocate. The state of patients will only get worse and worse."

"Strengthen nutrition, have you lost albumin?"

"Lost, the effect is not good, can not control Mycobacterium tuberculosis, everything is in vain." director Huang frowned together.

After six or seven hundred milliliters of liquid was pumped out, the woman was like smoking a big white face and becoming addicted. She lay in bed with her eyes closed. If it wasn't for the ups and downs of her chest, she thought she was dead.

With so many people at the window, women soon fell asleep. These days, she can only sleep within one or two days after pumping water. On the third day, she can't. when she lies down, she chokes and coughs.

Most of the tuberculosis patients in the Department are in general, and the mild ones are often in the Pulmonary Hospital, while almost all the patients in the tea plant hospital are severe patients.

After a ward round, Zhang Fan said to a group of doctors and nurses with sweat beads on their eyelashes in the Department: "you've worked hard. You must protect yourself."

Sometimes, in fact, what people need is attention. Zhang Fan's hard work made many grateful lesbians red eyed.

"Director Huang, I think so. I have some ideas about this tuberculosis recently. I want to take some doctors to do some research!"

After everyone's absorption and disinfection, Zhang Fan said to Director Huang with a smile.

Director Huang's face was dull when she heard this. She felt that it was more shocking than the shock brought to her by Zhang Fan's ward round in the infectious diseases department.

Looking at director Huang's disbelief, Zhang Fan smiled awkwardly. Wang Hong was unhappy and said to Director Huang, "director Huang, director Huang, the leader asked you!"

Director Huang glanced at Wang Hong, who ignored director Huang directly. Zhang Fan is helpless, this Wang Hong!

"You say you have an idea? Hehe!" director Huang not only hehe to Zhang Fan, but also to Wang Hong.

She said in her heart, "don't pull the calf for me!"
