

Chapter 1506

Zhang Fan has been very moist these days. Although he didn't achieve the goal of a school in one bite, he has taken a solid step now. Except for freshmen in the clinical department of Niaooshi Medical University, all the students in the clinical department of other grades got tea.

In the past, he wanted to set up a basic medical school, but unfortunately his strength was not allowed. The main reason was that his teammates were too pit, so they worried about the government of dividends and bank loans. If you said to set up a primary school, he might not care. If you said to set up a university, he could die and show you.

There's no way. Who let the heavy industry of tea vegetable be barbecue and the light industry be Nang.

Some people say how about the golden mean Shuimu. In fact, if the state allocates their funds to other 211, to be honest, it won't take a few years, and the level will not be inferior to the golden mean and Shuimu. The university is the highest palace of knowledge, in fact, it is the existence of disrespect for the poor and love the rich.

As for the tea vegetable government, Zhang Fan has no expectations. His idea now is that I don't want the previous arrears, and you don't want to pay dividends with me. However, this idea seems not very good. Just as the tea vegetable government thought before, don't ask me for arrears, and I won't ask you for land sales.

With the entry of students, the happiest person in the hospital is not only Zhang Fan, but also the doctor who plays soy sauce. When he first came, Zhang Fan got him to kindergarten and primary school.

To tell the truth, the doctor was also uncomfortable at that time. He even said, how can he be in primary school? At least he has to be in high school.

Later, after discovering the talent of this product, Zhang Fan finally believed that some people in China are really full of exam talent.

Zhang Fan sometimes thinks curiously that if he and he go to the medical practitioner examination now, it is estimated that he can't get a good score, because this product comes with its own test plug-in.

Provincial Hospital. In the past, when others asked Zhang Fan, Zhang Fan was still a little guilty, especially when he was despised by several hospitals affiliated to bird city. Zhang Fan generally pretended that he couldn't hear.

Because hospitals at this level should at least integrate medical treatment, scientific research and teaching.

However, in the tea vegetable hospital, medical treatment was barely mentioned in the past, and scientific research was barely able to get one or two hands. Only teaching, we can't talk about things with the primary schools and kindergartens affiliated to the tea vegetable hospital.

Now, who wants to despise the tea vegetable hospital now? Zhang Fan has something to say. And now these are seeds. The circle of friends in medicine is very small. After graduation, these students will not leave the frontier with a high probability.

For example, if you are a medical student graduated from the capital, you generally don't go to the magic to find a hospital. The students here are the existence of Zhang Fan's selection of seeds in the future. As long as you cultivate them carefully now, it can be said that this is the core driving force of tea vegetable hospital in the future.

The talent construction of other people's families is generally the introduction of outstanding young scholars or thousands of young scholars. Zhang Fan directly went through the back door for his own sake, although there is only Li Cunhou, an academician currently compiling.

But there are many people who can be affiliated with it. Without talking about their master, the current scale of the infectious diseases department. To tell the truth, it is estimated that there are not so many academicians in the tea vegetable hospital in China. Even if there is no preparation, as long as the National Laboratory exists.

Zhang Fan knows that these people are cooked ducks.

Now we are waiting for the R & D of tuberculosis drugs. Once they are on the market and the laboratory team runs in almost, the status of infection experiment here will not be replaced easily in the future. After these seeds germinate and expose the tip of the lotus, this cycle is established.

.....

It is said in the Jianghu that horses have no night grass and are not fat. What you say is right. If we only rely on the personnel of the tea plant hospital, it is estimated that the various processes will become extremely slow.

When it snowed heavily, the drug test in the National Laboratory ended and the drug fully met the expectations.

Zhang Fan has just completed an extrathoracic operation in the operating room. These days, he has become the non editorial director of thoracic surgery. Just out of the operating room, he hasn't changed his clothes yet. Lu Ning hurried to the operating room.

"Ouch, I'm really beginning to admire you. The laboratory has reached the most critical moment, and you can calm down for surgery."

"Oh, I'm a doctor!" Zhang Fan said to Lu Ning with a smile.

Lu Ning's joining in and talking about his conscience made Zhang Fan really tie up the stall of the experiment. Otherwise, Zhao Yanfang made five or six calls a day, which made Zhang Fan almost depressed.

"The drug test is over and the data is out. Everything has met expectations. You're lucky."

"This is strength!" Zhang Fan added unwillingly.

"OK, OK, OK, everything you say is right now. Let's go. A group of people in the laboratory are waiting for you, the director who doesn't work." Lu Ning's face was full of coquettish spirit.

The more regular the person is at ordinary times, the more different he is at the exciting moment. There are several youth pimples around his mouth. With the vibration of facial muscles, one by one, it really makes people feel crushed.

Before Zhang Fan's clothes were put on, he was pulled out by Lu Ning, who couldn't wait. A group of little nurses in the operating room came out of the dressing room. When they saw Zhang Yuan walking and wearing a coat, one by one seemed to be stained with Zhang Fan's light. Laugh and steal a smile, but the appearance of stealing a smile didn't need to be seen by others.

After being dragged and trotted for a while, Lu Ning died. He gasped like an old dog and entered the laboratory. After seeing Zhang Fan, a group of scientific researchers gathered in front of the computer with data, collectively put down the experimental data and began to applaud.

"Succeeded!"

At the beginning, some old men who were not noses or eyes to Zhang Fan also looked at Zhang Fan excitedly at this time.

Zhang Fan was excited when he heard that the younger martial brother said it was done, but he could still suppress it. But when he came here, he watched a group of people work hard day and night according to their own ideas. Finally, he was excited and wanted to explode.

There are all kinds of scenes in my mind. I want to say some unique words, but I can't remember. Finally, I want to drag a poem, but what pops out in my mind is: the day is close to the mountain!

Hey, you can't open your mouth and shout. Shit.

After working hard for a long time, others looked forward for a long time. Zhang Fan took three steps ahead, grabbed the old men's hands and began to shake hands one by one, "it's hard!"

"Hard work!"

When it was Zhao Yanfang's turn, Zhao Yanfang said, "don't work hard. Call the leader. The leader may have been thinking about it for a long time."

"OK, OK, OK, I'll call now."

In the past, Zhang Fan could directly contact the general manager, but he had to go through the general office. After having the National Laboratory, he crossed the general office and directly went through the Secretariat. Zhang Fan felt that there was no change, but if he told the news to boss chasu, boss chasu could drool enviously.

The big man's confidential phone was directly connected. He didn't even make an appointment. He asked Zhang Fan to wait. He waited for about a few minutes. At the end of the phone, the gentle male director said, "will connect with the general manager, please pay attention to the time."

Didi three times, telephone Unicom, "chief, the drug test is successful and meets the listing standard."

"Good, good, great. In the future, every winter, our country will lose millions of coughs. You are heroes..."

.....

"The drug experiment of tea element was successful!" The doctor in the tea plant of Marubeni immediately sent a message to Marubeni.

Sometimes, you really have to admire the shrewdness of Marubeni. Although people can't enter the National Laboratory, they are all in the same building. People can directly judge from their facial expressions that tuberculosis drugs have succeeded, and they are extremely sure.

This is probably the self-contained ability to often fight with earthquakes. For example, the doctor sent by the Jinmao special orthopedic hospital next door thought that tea vegetarians were new year's goods again.

However, Marubeni knows, and Jinmao knows.

The next day, before the team sent by the general manager arrived at tea, the news media in Jinmao and many European countries began to wantonly ask China to hand over tuberculosis drugs for free around the world under the guise of humanitarianism and great power responsibility.

Originally, Zhang Fan would not know about it. He rarely read domestic newspapers. How can he read foreign newspapers? Is it comfortable to suffer from sheep.

Results the doctor sent by the special orthopedic hospital to the tea vegetable bone institute took his mobile phone and said to Zhang Fan: Zhang, you're in trouble. If you can't handle it well, maybe we can't cooperate in the future.

Zhang Fan glanced at it and was shocked. He seemed to be afraid of peeing his pants. In his heart, he said: if you don't cooperate, you won't cooperate. Anyway, the instrument has settled down. You scare me with this. Do you think I'm afraid?

The dog who doesn't bite and shit must have premeditated something. The special orthopaedics department is estimated to want to put pressure on Zhang Fan. Unfortunately, Zhang Fan was not Zhang Fan two years ago. Now frightening Zhang Fan really feels like he has a big face.

The more this high-end cooperation, Zhang Fan dislikes foreigners more and more.

It's true that after the experience of tea vegetable, at the beginning, the ball country was clamoring to withdraw, and now it's Jinmao's turn to withdraw.

Let's look at the Chinese side. Zhang Fan was really commander Biao. When he shot two or three guns, the digital hospital didn't say a word. The people brought by the deputy director of the people's Hospital entered the tea plant, and didn't even ask about the patent right.

With the idea of tuberculosis drugs, one of China's top infectious scholars gathered in tea, and Zhang Fan was appointed director directly.

This is the gap between family and outsiders.

Of course, it's not Zhang Fan's turn to worry about quarreling with foreign countries. In recent years, China has had enough confidence to quarrel with foreign countries, and its technology has also improved. It's getting more and more level.

Zhang Fan just sent Jinmao's spies. The phone was like frying a pot. All the princes came to Zhang Fan at once.

First of all, the leader of bird city said, "Zhang Yuan, what do I think of tea vegetable hospital?"

Zhang Fan has a heart to say, that's it!

"No leadership, no tea vegetable hospital!" With that, he said to Lu Ning: "don't talk to me. I'll call the leaders. Didn't you tell you about your scientific research funds? I'll go to the bird market in the spring of next year. Now it's the Spring Festival. How can I ask for money at this time."

Lu Ning was stunned and suddenly understood, "Zhang hospital, the affiliated hospital has hundreds of millions a year, and we don't have 10 million. It's unfair, it's unfair!"

In particular, the three words "unfair" were shouted at his throat. Zhang Fan's face was black. It was too much. As a role requiring experimental funds, how can you directly shout that the government is unfair? Hey, junior brother, you can only do experiments in the future.

If Lao Chen were here, he would not let the other party hear that Zhang Fan was acting.

The leader at the other end of the phone was smoking meat on his face. "Next year, next year, I will give you an explanation. Zhang Yuan, you also understand me."

"Look at what the leader said, we will stick to it!" Zhang Fan just doesn't follow.

If you don't cut him at this time, Zhang fan can't sleep at night.

Bird market leaders really have an idea to let Zhang Fan go back to the furnace and rebuild again. It's shameless. Stones can squeeze oil!

Chapter 1507

For example, the boss of the bird market knows very well about the tuberculosis experiment of the tea vegetable hospital. Although he doesn't quite understand how difficult this thing is, he knows that Zhang Fan told the general manager at the beginning that the tea vegetable hospital gave up all the patents for tuberculosis drugs, didn't touch a little, and turned them over to the state.

When he first reported the news, the boss of the bird market still had hope for Zhang Fan. He felt that although this comrade was young, he was still good. Moreover, he also knew that Zhang Fan had given up his patent, and the state would certainly give Zhang Fan a huge voice in drug production.

There was even other policy support in the follow-up. After hearing the success, the leaders of bird city called Zhang Fan at the first time, thinking that Zhang Fan would also give a snack to the pharmaceutical factory of bird city at that time.

Northwest pharmaceutical, how to say, started late, with old equipment and outdated ideas, and the

development of enterprises is not worthy of being described as difficult. That is, Wang Xiaoer spent the new year, smashing pots and selling iron every year, and the banks blackened them.

In 2008, niaoshi pharmaceutical factory moved away from the city center to the Development Zone, bought land to build commercial housing and made a fortune. In the words of niaoshi pharmaceutical factory employees, it hasn't made such a fortune in several lives.

The only goal for college students to enter the pharmaceutical factory is to get a welfare house in the bird market. As for others, if the salary of 3000 yuan a month can be paid on time, it is already the ability of leaders to ask for money.

Moreover, the main fist product of the pharmaceutical factory is snow lotus injection with unclear taboos. As long as it is used to treat joint diseases, it can be used from rheumatism to degenerative diseases. The treatment range looks very similar to some divine drugs.

Therefore, this thing doesn't sell very well, and the Commission for the hospital is also very high. Doctors don't dare to use it, mainly because they are afraid of allergies.

After 2008, all kinds of transformation ended in failure, and finally became a large enterprise manufacturing glucose and normal saline for export and earning foreign exchange.

After Zhang Fan's paper was published in the c-prefix journal, the boss of niaoshi pharmaceutical factory came to the government every day to report, for one purpose, let Zhang Fan hand over the production of tuberculosis drugs in the whole northwest to them.

He also wants to contact Zhang Fan himself, but Zhang Fan doesn't enter the oil and salt, or even the door, or the threshold is too high. If he sells the factory, he may not be able to open his eyes.

For example, in order to get Stan's equipment production right, several enterprises in the tea element high tech Zone directly cooperated with Zhang Fan to get a top-level P3 laboratory, and even the later maintenance costs were contracted.

At this threshold, the leaders of niaoshi pharmaceutical factory were afraid to see if they could get some benefits for Zhang Fan. As a result

Therefore, there is a place where the leaders of the bird market call Zhang Fan personally. Listening to Zhang Fan's exaggerated performance and aimless nonsense, the leaders of the bird market think how NIMA behaves so selflessly in front of the general manager. When you come to Laozi, you will become this virtue.

But I can't help it. How can I say this? The bird market has long regarded tea as a dry son. The funds given in a year are hungry but can't eat enough. Now it's Zhang Fan's turn. How can Zhang Fan catch up and listen to him? Zhang Fan doesn't want to be the director of the health department.

"Zhang Yuan still has a view of the overall situation. In this way, as long as you win the northwest production right for the pharmaceutical factory in niaoshi, you will be given preference in scientific research next year."

Zhang Fan tilted his lips and said in his heart that this is what I should take.

"Ouch, the signal is not good, leader. There has been a lot of deficit in recent years. It is estimated that we can't do any scientific research next year."

The leader's teeth are broken and can't talk together!

However, the leader in charge of health in the bird market has flown towards tea vegetable by plane. He doesn't meet in person or block Zhang Fan in person. He is on the phone. Unless he is dismissed, Zhang Fan will bite the chicken by the Li family's dog and steal the fish by the Wang family's cat. Anyway, he won't tell you the business.

The tea vegetable leader also rushed to the tea vegetable hospital for the first time. Since the upgrading of the tea vegetable hospital, the leader has rarely come here. Although he is also an intestines and stomach, the tea vegetable hospital is no longer in his charge, and he has no time to hide because he owes money to the tea vegetable hospital. How can he deliver it to the door.

But this time, this one had to come. "Why don't you have a pharmaceutical factory? It's not easy for you to eat grass and swallow bran in the tea vegetable area, which makes you competitive. Why don't you even have a pharmaceutical factory."

As soon as he entered the door, the tea vegetable leader took the lead. He knows that he can't give Zhang Fan a circuitous gap, or this guy will die.

Zhang Fangang sat down to have a sip of tea and had an operation all morning. At noon, he went into the laboratory and talked nonsense for a long time. Now his tongue was tied. He just hung up the phone of the leader of the bird market. The leader of tea came in as if he were eavesdropping outside the door.

Not even an advance notice.

Zhang fanleng for a moment, then smiled and sat on the reception sofa with the leader.

When Zhang Fangang was about to speak, the leader pushed his hand, stared round and said, "don't tell me anything else today. Just talk about the pharmaceutical factory. Tea vegetable is so poor. Why didn't you think of getting a pharmaceutical factory for tea vegetable."

Now the tuberculosis drug can no longer rely on the bank to issue tea by relying on the national finance... "The leader stopped and stared at Zhang Fan angrily.

Zhang Fan is like a sinner who hinders tea vegetable civil servants from going to a well-off society.

Zhang Fan waited for the tea vegetable leader to say almost, sat closer to the leader, and then said to the leader, "how can we say that we are all tea vegetable people? Do you think I have no selfishness?"

As soon as he said this, the leader immediately lowered his voice, slightly bent down and said to Zhang Fan, "drugs are going to be on the market, but we don't even have a pharmaceutical factory. We can't get a OEM company."

Zhang fanhan has come out, and the leaders know this?

"What's your hurry? The current drugs and double taboo experiments have not been completed. There is not even an animal experiment model. It's just for emergency. After listing, we have to push back to do various follow-up experiments.

After all the experiments are completed, we can seriously enter the market. Now it is a drug for our own use in China. Even if it is exported, it can only be given to other countries, and it should be labeled as an experiment, which can not be used for trade. "

"But the domestic market is not small. The national financial subsidy for one year is enough for tea..."

"You don't even have a medicine pot. You just want to eat this subsidy. How is it possible that the state will use the fastest speed to let drugs enter the ranks of free prevention. This time, almost all national pharmaceutical enterprises can enter, so we should think about the market after drugs go abroad."

"Hey! How many years will it take? Can foreign countries guarantee to win it?"

"For at least five years, as long as Europe and the United States still recognize their drug patent laws, we can eat for at least ten years."

"Hey!" The tea vegetable leader sighed. Although he said so, although the future can be expected, his salary still depends on the bank. After five years, he doesn't know where he is.

"Therefore, we should seize the time to set up a pharmaceutical enterprise in the tea vegetable hospital. We don't want to be big, we want to be refined!"

Zhang Fan mysteriously told the leaders that although the results may not fall on him, the leaders think about it and trace back to the source in the future, which is also led by themselves.

"OK, you do it! I support you!"

As soon as Zhang Fan heard it, he knew that the goods wanted to deceive himself, and then stood aside and applauded warmly. It was so beautiful.

"Hey, hey, I know the leaders are far sighted. In this way, I won't give the dividends to the government for the equipment enterprises in the high tech Zone in the next five years. I'll use these dividends to build a pharmaceutical factory and count them as a share of the government in the future."

This NIMA, this NIMA, the leaders jumped up. After a long time, the goods always think about my dividend.

Tea vegetable leaders resolutely disagreed, and Zhang Fan began to turn over the old accounts. Anyway, he got chicken feathers all over the place, and no one persuaded anyone.

"Pharmaceutical factory, construction or not?"

"Construction, but don't touch our dividends. I'll give you the land. I can even exempt you from all expenses in the next five years, and I'll give you free three links."

"I'll get a name for science and technology. The state can give me a discount to get a fracture!"

Tea vegetable leaders now regret running here.

To tell the truth, leadership is the most difficult to get rid of. Zhang Fan's brain cells are dead. I don't know how many, so he can barely support it. If he is a little weak, he will definitely press you down. People will make you keep calling dad.

As for the of enterprises, even if the largest pharmaceutical enterprise in China came over, Zhang Fan didn't pay much attention to it and didn't even see it.

Medicine is not divided. In fact, medicine is divided very badly. Zhang fan can draw talents from major research institutes and hospitals in China. Try to get a boss in a pharmaceutical enterprise. People's worth can't scare you to death.

San Jin's came. It was announced that the vice president would come. On the tea vegetable side, Ouyang met with Sanjin's leaders with the posture of enjoying positive treatment at the Deputy level of the Department and bureau. Anyway, he should show a posture one level higher than you.

The dark clouds in the South also came. Sometimes you have to say that people just know the rules. Before they came, they informed them that they came to visit tea vegetable and asked the leaders of

tea vegetable hospital to take the time to meet them.

His attitude is very low, but he let Zhang Fan meet him personally. Who hasn't the problem of loving the poor and the rich.

Dark clouds have brought a whole set of the most advanced drug filling production line of their enterprise to catechin, and it is called for better experiments by the National Laboratory of catechin hospital. That sounds good. Zhang Fan likes to listen like that. Although he doesn't even have a plastic shed, he also likes to be given this by others.

Is this a bribe? If you give it to Zhang Fan personally and properly pull out the rhythm of shooting, but the enterprise donates it to the hospital, it will be a good thing.

The major pharmaceutical enterprises in the High-tech Zone on the side of tea vegetable are crazy and want to participate, but their own government does not recognize it, because their own government wants to oppress China to bow down, but this is not the era when NIMA let Lao Lin herd cattle in the frontier a hundred years ago.

"Zhang Yuan, do you have time? Our enterprises in the high tech Zone want to invite you to try the cold water fish head of Russia."

"I'm allergic recently. I can't eat fish protein." Zhang Fan said while swearing. Who publicized Lao Tzu's hobbies.

"Well, have a cup of tea!"

"Then come to my office and I'll invite you to tea." After weighing for a while, Zhang Fan asked the regional managers of the tea element high tech Zone to come to his office collectively.

Sometimes, Zhang Fan hates the tea vegetable government. If it is the same as the bulk Province, let alone the bulk Province, even if several of the leading cities are OK. Now I don't have to struggle with these capitalists.

In fact, after the leaders of the tea vegetable government returned, they listened to the boss of dark cloud coming to tea vegetable with a big gift. They also heard that the capitalists of the high tech Zone collectively went to the tea vegetable hospital. The tea vegetable boss was distressed.

Standing by the window, looking at the landmark building of tea vegetable and the surgical building of tea vegetable hospital, he gently said, "Zhang Yuan, we must be poor and strong and not fall into the ambition of green clouds!"

It's so strange that the two units count on each other to strive for self-improvement.

But he made his own calculations. Anyway, don't get cheap with each other. There's no one to match.

Chapter 1508

Tea is usually prepared in Party A's office, and drinks are often prepared in Party B's office. It's hard to say what to pay attention to.

Zhang Fan called Lao Chen, "do you have any good tea? Bring me some."

Lao Chen tossed about in his office for a long time. In the tea vegetable hospital, only Ouyang and Zhang Fan's office were made by the decoration company designated by the boss. After Zhang Fan sat down steadily, the designated decoration company never came again.

Therefore, Lao Chen's office is relatively formal and doesn't look like a foreign trade company.

"Why don't you like Tie Guanyin? Something happened that I don't know? What did Wang Hong do? It won't be her..." Lao Chen thought of Wang Hong's red lips, and then drove the figure away. She is not qualified to be an opponent.

After tossing for a long time, Lao Chen has green tea, black tea, Pu'er and some famous tea here. This must not be bought by Lao Chen himself. If Lao Chen dares to buy it, it is estimated that his wife can beat him hemiplegia.

These are the stepping stones that some larger companies come to Zhang Fan. When Zhang Fan is not in, they wait in the office of the medical office, that is, the so-called door bag.

Many people say that we are all our own people. Why are we so polite and take gifts? To be honest, the effect of this thing is really different from that of empty hands.

After entering Zhang Fan's office, Lao Chen saw Zhang Fan and said, "Zhang Yuan, the tea set is not ready. These tea pots don't work well. They should..."

"There's not so much attention. Which tea is more durable and expensive? The regional managers of the high tech Zone will come later. We can't be too stingy if we want people to pay."

"Oh, I see. I'll help you make tea later?"

"It's not appropriate for you, a dean, to make tea for others!"

"Look at what you said. Aren't we nervous? I can do something if I can. I don't have any other ability."

Lao Chen smiled and began to wash the cups, waiting for the guests to come.

Zhang Fan smiled helplessly.

He likes Lao Chen's low-key. He doesn't look like Wang Hong. How can he feel that he is the second king of heaven.

After a while, the managers of the high tech Zone all entered the door.

Wang Hong took a group of managers into the inner door with a cadre's expression, which made the managers behind him a little serious.

Zhang Fan stood up with a smile. "I'm sorry to let you get away from your busy schedule today. If the National Laboratory hadn't been in a critical period recently, I'd like to visit you."

After politely asking everyone to sit down, Wang Hong saw that Zhang Fan didn't let her stay. She looked at Lao Chen and went out of the door. Although black buy buy Jiang easily don't pick up people, she doesn't give a chance when she wants to clean up, so don't look at Ouyang's curse. In fact, she is most afraid of Zhang Fan.

"Chen Yuan has some good tea here. You can taste it and warm up. I can't drink it or make a good drink. Please taste it."

After chatting, praising good tea and thanking Lao Chen, Ms. Zeng directly asked, "does Zhang Yuan have any ideas that we need to implement recently?"

To tell you the truth, it's hard to say how high the position of the general manager of a pharmaceutical enterprise in a large region is, but the value is really meat not on the pleats. The words in the Jianghu are not groundless at all. The first wife is a classmate, the second wife is a nurse of the unit, the third is a female medicine agent, and the fourth is her own graduate student.

The prime time of the medicine generation was not until an uncle came up, but he was really rich. A department director took tens of millions of bribes.

The medicine generation has a tradition similar to the flower world. When you make enough money, you quit immediately, and then find an honest man to hide his name and go away from home.

Only stupid people marry local doctors. There are too many things in it.

When Ms. Zeng arrived at the tea plant, she now understood that she should bow her head in the face of the young Dean. This guy doesn't like hard food, but likes soft food. There's no way. She can only talk with a short body.

Who makes people wave is the upgrading of a country's equipment. Let alone the short body, you can lie flat.

"Hehe, you're welcome. I have an idea. It's estimated that everyone knows that the tuberculosis drug of tea has been successful."

After that, Zhang Fan smiled and tasted Lao Chen's Pu'er. Well, it's said to be very expensive, but how can it taste like rat shit.

Although we already know that the drug has been successful, we are still surprised to say it from Zhang Fan's mouth, because the Chinese government is very similar to the Chinese people, and the money is not revealed.

Even in the most difficult years, when the big eggs of China came out, they didn't publicize all over the world like Lao maozi. It was like sending them to your door immediately. They were very low-key, especially low-key. Uncle Mao just asked someone to whisper to the country that we had big eggs.

Therefore, when Zhang Fan said it himself, everyone still sighed deeply.

I don't know whether to be happy or lose.

The tea vegetable hospital is getting better and better. They must be getting better and better. But the tea vegetable hospital is getting better too fast. Although they will get better and faster, the problem is that they can't control Zhang Fan more and more. If this goes on, it will become a pendant on Zhang Fan's thigh sooner or later.

For example, for the transformation and upgrading of desert country, Zhang Fan has a big mouth and a P3. Now call them. Are they really tea drinkers?

This tea is really expensive.

Even Ms. Zeng, who only drank beauty tea, couldn't help taking several drinks from her tea cup. Anyway, she was dead. Don't let Zhang Fan underestimate her before she died.

Zhang Fan didn't let them say anything flattering. If you want to hear this, you might as well let Lao Chen come.

"However, there is no model for animal experiments. My idea is to build a standardized biopharmaceutical enterprise based on the existing strength of tea, and when there is no conflict with national interests,

The tea element hospital is responsible for the R & D of various drugs, the tea element government is out of the territory, and it is the investor of some operating funds.

Originally, I wanted to introduce Chinese pharmaceutical enterprises. You must know that Wuyun pharmaceutical enterprises also came to visit yesterday.

However, we cooperate well and have a tacit understanding. Therefore, I want to ask you if you have any ideas. Don't have psychological burden. This is not compulsion.

Even if you don't want to, how can we cooperate or how can we cooperate in the future? In fact, Chinese pharmaceutical enterprises annoy me very much and have to invest money, but I'm a nostalgic person. My friends are still friendly, aren't they? "

a bit of!

Business as usual.

This is to comfort everyone, but in the ears of several managers, this is no comfort. This is clearly the bandit with a gun, and then said to the girl, bring the money, take off your pants and lie down.

Several people looked at each other, and their eyes were full of helplessness. If there was a voice over, it must be: look, look, there's no way to take him now.

If you can choose not to cooperate, OK.

However, no one is stupid. Although tuberculosis is not as famous as treating frostbite, in fact, tuberculosis treatment can be said to be cross era, and frostbite is an orphan disease compared with tuberculosis.

The production of this kind of drug is the same as that of tuyere. There are too many derived things. The simplest thing is to get rid of the flora of tuberculosis. Can we develop drugs against other flora from this grass-roots level.

The simplest thing is that the tuberculosis drugs in the world are used to kill other bacteria, such as Escherichia coli and Staphylococcus. Why don't doctors use these drugs to kill non tuberculosis bacteria under normal circumstances?

I'm afraid of producing drug-resistant bacteria, and these drugs have no substitutes.

"I wonder if Zhang Yuan has any specific ideas about the scale of this biopharmaceutical factory." Ms.

Zeng took the lead in asking everyone's wishes.

"High precision, do not produce ordinary drugs, just some cutting-edge drugs, the scale is not too large, covering an area of hundreds of mu."

"Er!"

In the cold, the floor area doesn't matter, but it's a little scary just to produce high-end products. For example, niaoshi pharmaceutical factory covers a large area, but one year is to get some glucose injection and sodium chloride injection. Is it useful?

"Zhang Yuan, we need to discuss with the headquarters, and we will reply to you as soon as possible."

"It's okay, it's okay. Today is actually chatting. I'm not in a hurry. In three days, my expert group will enter tea vegetarians. It's estimated that I don't have time to drink tea and chat with you. Ha ha, I won't send you away."

Three days, no reply is tantamount to giving up.

Although he said it with a smile, Zhang Fan's posture has been put forward. Three days, just three days. It's overdue.

When facing the general manager, Zhang Fan is a responsible young expert. When facing the leaders of bird market and its tea, Zhang Fan is a thorn, or they can't help it.

In the face of these capitalists, Zhang Fan is a ruthless hospital leader.

After a group of people left, old Chen cleaned up and said to Zhang Fan, "Zhang Yuan, why do you have to bring tea vegetable government? They don't want money. They can buy shares in that broken land. It's a little cheaper for them."

Zhang Fan looked at Lao Chen. He didn't know whether the old goods really didn't understand or pretended to be confused. However, Zhang Fan still smiled and said to Lao Chen, "what should be given or what should be given. We can be so strong.

It's not that we are on other people's territory, but that we can take other people to have a big meal together. As long as we take it with us, our position will be higher in the future. When you go to the government for a meeting, you have to shake hands with you. Isn't that good? "

Zhang Fan joked.

"Hey, you're still looking far away. I didn't think about it. I always feel that I've suffered a loss. In fact, I've got shit. No wonder now when I go to the government Koster, I don't need anyone to go. A phone call and the driver comes with full oil."

Of course, you can't take the banquet with you easily, otherwise people will be dissatisfied. I always think this is what the tea vegetable hospital should do.

Although Zhang Fan is young, he knows that this habit can't be used to tea policy, otherwise even friends can't do it in the future. There is a saying that it's good to hesitate to promise and be happy to refuse. Sometimes when you think carefully, it's really such a truth. Just like when a girl refuses, she hesitates a little and the other party thinks it's a promise.

Before it was implemented, Zhang Fan didn't let go. The answer to the tea government was not to pay dividends.

The tea government is also holding a meeting. The meeting rooms of the intestines and stomachs are noisy these days. The smoke from smoking is swirling. Open the window of the meeting room, and the smoke can overflow all over the window. I don't know. I thought the intestines and stomachs were burning a fire to keep warm in the meeting room.

"No, dividends can't stop!"

"Pharmaceutical factories can't be built! ~"

"You have to be reasonable. Neither of them wants to give up. What can we give to the tea vegetable hospital? Hurry up and find a way. Do you know that the leader in charge of health in bird city is coming soon.

What are you doing here? Everyone should know that if people give good conditions, the tea vegetable hospital... Tea vegetable hospital will definitely cooperate with bird market. "

It's almost time to say black buy buy River, but after all, it's a leader, not a little nurse.

Chapter 1509

"Zhang Yuan is still a good cadre of tea vegetable after all. This year, we will give more excellent places to tea vegetable hospital. Such an excellent unit must let the people know that we can see it."

The boss of the tea vegetable government, Ouyang and Lao Gao talked happily in the government office.

The enterprises in the high tech Zone act very quickly. They invite everyone to have tea in the morning. They give feedback before they get off work at noon. The head office agrees in principle. As for the specific details, Zhang Fan doesn't have to worry about it. Isn't it a matter of wrangling? There are not many academicians of tea vegetable hospital, but there are many experts to wrangle.

Therefore, after receiving the feedback, Zhang Fan asked the old lady to take Lao Gao to the government. At the beginning, the boss of the government thought it was asking for debt and didn't show up.

As a result, the second son and Ouyang were halfway through the negotiation. After the secretary informed them of the specific contents, the tea vegetable boss came with a tea cup.

"Land, you can choose wherever you want. Even if you want the government, we can move." Boss chasu is so happy.

In fact, Zhang Fan knows that he can top the bird market, but the tea vegetable side still needs to be maintained. After all, in this site, if you don't maintain it, you can make your head big with sanitation and environmental protection.

To be honest, the Chinese people, especially grass-roots leaders, really don't lack the courage to lift the table.

The leader in charge of health in niaoshi didn't even go to the tea vegetable government in the afternoon. After the leader in charge of tea vegetable picked up the plane, he directly came to the tea vegetable hospital.

Sometimes, to tell the truth, it's quite simple when it's simple. For example, Zhang Fan took a group of leaders at home and asked the leaders to put on protective clothing before entering the National Laboratory.

"At present, the equipment of the laboratory mainly depends on the equipment of our previous P3 laboratory. Thanks to the attention and attention of the leaders of the bird market, the equipment can be quickly entered and put into use."

Then he took off his protective clothing, put on the secondary isolation clothing, and went to the skin burn department with his leader. "At present, Academician Li's skin transplantation has entered the stage of clinical experiment. Here are mainly the experts of digital graduate students and our tea doctors for treatment research on patients."

Then, he took off his isolation suit, put on the protective suit with oxygen tube, and entered the severe isolation ICU of the respiratory department. In the house like crystal palace, Lao Ju personally introduced it to the leaders.

Lao Ju's introduction is no different from showing off. I don't know when this product can speak simple meatball language. Of course, it's not yamidi or the like.

There are really language geniuses in frontier provinces. For example, some Mongolian people who do fur business can speak seven or eight minority languages, and they speak them directly without any stumbling. And Lao Ju, although not so exaggerated.

But I didn't introduce an instrument, so I read the instrument in meatball language. When I was happy, the golden Mao language of the second leader also came out.

When leaders inspect other places, they will also ask some questions and put forward some suggestions. After all, even if they are not experts, they are also leaders in charge of the whole health of the frontier. They still know a little.

But after entering the breathing ICU, the leader didn't say a word, not only didn't say it, but also had to nod from time to time to deal with the pause of the old residence.

Don't talk about meatball. Zhang fan can't even understand the golden Mao language of Lao Ju. It is estimated that his spoken language can only be used in their respiratory medicine.

As for meatball language, Zhang Fan doesn't believe that Lao Ju is a language genius. He prefers this guy to be nonsense.

Out of the breath, the leader took off his isolation suit and sweat. Zhang Fan didn't seem to see it. "We are looking forward to the stars and the moon. We are looking forward to important leaders. Our mood is excited and the mood of comrades is enthusiastic.

They are eager to take out the best and most advanced equipment and let the leaders have a look. The director of general surgery is going to write a blood book. They must let the leaders go to see the surgical department of tea vegetable hospital to inspect. "

The leader in charge of health opened his mouth. As a result, he sighed and nodded. "The comrades' mood is understandable, and the blood book is not comparable. Please take me to hospital Zhang."

He now knows that it is true that Zhang Fan told the boss of the bird market all day. Today, he changed seven or eight kinds of clothes. To tell the truth, he hasn't changed clothes so often in his life.

Out of general education, when Zhang Fan was ready to say something, the leader said, "Zhang hospital,

I have a spectrum in my heart about the hospital now. In the past, we didn't pay attention to it. It was our negligence in our work. Now let's sit down and talk."

There's a saying that the leader doesn't mean to say that NIMA is peeling when she changes clothes.

Zhang Fan smiled awkwardly. In this way, it's soft for the leaders. It's a little too much to pull it hard.

"It is mainly the tea vegetable hospital, which has always appeared in front of the leaders in the image of poor households in the medical industry of the whole province. Although there are a little achievements now, we still want the leaders to know that we are working hard and have not..."

"I understand, I understand, I understand the mood of comrades." I can't do without understanding. The stupidity in winter is the hot sweat of the leader.

Originally, Zhang Fan wanted the leaders to wear radiation proof lead clothes like armor. As a result

After entering the reception hall, the leader sat on the sofa. Zhang Fan felt that he was about to collapse. Li Cunhou hid aside and was about to laugh. He didn't expect that Zhang Fan was really wilting.

"Zhang Yuan knows the purpose of my coming this time. To tell the truth, I came with the hope of millions of Frontier people. Even if Zhang Yuan has opinions on the leadership of bird market, it will certainly not disappoint the frontier people."

The leader will probably think, shit, you sneak with me and I'll bring you a hat.

Zhang Fangang is still proud. This time, he can't swallow his saliva. Who says that leaders will only talk empty words with a shy stomach!

Zhang Fan straightened his face and sat next to the leader. After the leader drank a sip of tea, Zhang Fan said, "I know that the only leader of the bird market cares about us is you."

"Hey, no, no, no, it's not just me, it's not just me!" The leader's face is a little better.

"Therefore, I will not fool you with nothingness. I know that I can certainly have the right to suggest the production of tuberculosis drugs.

However, the current situation is that this drug must be available as soon as possible. Otherwise, how can the leaders specially approve us to test the drug when we don't even have an animal model.

Therefore, the first batch of manufacturing enterprises must be old and powerful pharmaceutical enterprises. You said that in our frontier pharmaceutical factory, lilisoso's can't even produce albumin. Even if it is handed over to the frontier pharmaceutical factory, do you say you can complete the task of the superior? "

Zhang Fan began to get down to business, and the leader listened very seriously. After listening to Zhang Fan's speech, the leader meditated.

Yes, the medicine must be in a hurry, but such a large market is really unwilling to give up and be forcibly taken away at the mouth.

"Can you think of a way."

The leadership attitude is obviously much better.

Zhang Fan smiled. That's right. Can you just bring me a hat?

"In fact, there are ways to speed up the upgrading of equipment. As for talents, consultants can be hired at a short and high salary. Now the most important thing is to have corresponding equipment."

Zhang Fan smiled very affectionately.

The leader didn't feel it at all. After thinking about it, he estimated that there was no problem in terms of talents, and then asked, "where to get the equipment, commissioning and installation, when everything is ready, the production list has been determined."

"Hey!" Zhang Fan pinched and stopped talking.

"Don't worry, just say what you think."

"Wuyun pharmaceutical company donated US the most advanced canned equipment in the world. Originally, I wanted to dress up for the laboratory, but seeing that the leader was so worried, I wanted to give it to the leader if I couldn't.

But this equipment is donated by others, and it's not convenient for me to give it directly, so... "

Originally, it is the most advanced of Wuyun pharmaceutical company, not even the most advanced of the country. Here, it is directly the most advanced in the world.

Anyway, you're in a hurry. I've wasted so much time if I don't sell tofu into meat.

The leader looked at Zhang Fan, then looked at Ouyang with a serious face on one side, and sighed in his heart, "so you're waiting for me here!"

After seeing off the leader, Ouyang asked curiously, "aren't you going to use it yourself?"

"My European Academy, that thing may be eliminated in a few years. What do I want it to do? I just don't know the cruel leader of the bird market. No, anyway, we have it in the frontier. We're unique!"

.....

The expert group in the capital came to tea.

If you follow Ouyang's previous temperament, you must make colorful flags flutter, but this time it won't work. I don't know whether Ouyang's hobby is widely known or something.

Before the arrival of the expert group, it informed the dean's office of tea vegetable that everything should be simplified. It didn't even need to inform the tea vegetable government. It just gave a simple communication at the bird market.

Ouyang was quite disappointed, but this time the expert group and even the health boss came. It's a pity for Ouyang not to celebrate.

The meeting was held in the tea vegetable hospital, mainly to determine the drug production date and the manufacturer.

In principle, one in the East, one in the west, one in the north and one in the south.

What about the pharmaceutical enterprises in China? In fact, if you are interested, you will find that almost every province has a pharmaceutical factory.

This configuration has both advantages and disadvantages. As for pharmaceutical factories, some can eat and support, and some are starving to death. For example, in the bird market, it is estimated that they would be bankrupt if they were not supported by foreign trade.

Generally, there are four pharmaceutical enterprises in the East, West, North and south. Those in the South can't escape the dark clouds, those in the north can't escape the Sanjing, and those in the Northwest can't escape the Sanchuan.

Originally, this job could be done by Sanchuan, but the superior gave two places to the northwest this time.

This makes the boss of Sanchuan very dissatisfied, but there is no way.

Zhang Fan is very grateful. Really, if it weren't for this extra quota, his tofu would have to be made into stinky tofu.

The boss still knows me!

Chapter 1510

These days, Zhang Fan has had enough meetings. Sometimes he really can't imagine how those people who hold meetings every day survive.

He felt that the skin color on his ass was a little dark because of the meeting these days. It was really too difficult.

On weekdays, he would have entered the operating room earlier, but not these days. The boss of the Ministry of health personally sat in the conference room to maintain discipline. Even if he didn't care, he would be an honorary boss at least.

Zhang Fan really felt that it was not a good job. If it hadn't been for a quota specially approved by the general manager, he really wanted this group of people to go to other places for meetings.

There are too many details to specify. Now Zhang Fan finally understands the difficulty of OTC drug production.

What do you say about China's pharmaceutical industry? Compared with medical treatment, it is not very competitive, but horizontal comparison can also be regarded as passing.

To make a simple comparison, in the early years, the so-called golden wool country produced a lot of profits, selling all kinds of protein powder and vitamins. A box of soy protein powder can sell hundreds of dollars.

Later, I don't know what happened. The market didn't recognize it. It's definitely not that it's too expensive, but that everyone thinks aomao's things are good, and then all kinds of vitamins came in. There are even thousands of yuan a bottle of vitamins.

It is known that it is in line with vitamins and has comprehensive nutrition.

In fact, this is bullshit. At that time, a doctor wrote a paper that the doses of these so-called advanced vitamin protein powders were chaotic. There are 0.1mg and 0.5mg in a bottle.

Different sizes. This is not rabbit shit. You can pull as you want.

The OTC multivitamin of a whale in China costs 5 yuan a bottle, and the measurement error will never exceed 0.1.

In fact, if you really need to supplement vitamins, you can buy OTC signs. Once you hang health products, it's not Zhang Fan's nonsense. First of all, its production process is not as strict as OTC.

Because of the differences in product technology and manufacturing machines, there were constant disputes at the meeting on the dosage of drugs, the convenience of patients, and even what kind of packaging to use.

Each has its own reason. If you think about it carefully, it seems that you are talking about a few cents or even a few cents, but if this thing is enlarged, hundreds or even billions, the number you are talking about is not a small number.

Of course, for Zhang Fan, he didn't go into his mind at all. At present, this thing has nothing to do with his dime. He waited to get another quota in the northwest quickly after it was implemented.

Then go to the bird market to threaten the leaders.

The leader asked for expert opinions. Zhang Fan obviously played soy sauce. It was windy there. He stood there. Leaders are also helpless. Let's Take Zhang Fan's ticket as the lowest score.

The first batch of drug manufacturing enterprises have been determined, with a total of five enterprises, covering the East, West, North and south of China.

There are more issues to discuss than the dosage of drugs. After a few days of meeting, Zhang Fan felt that he was thin.

Back home, Zhang Fan found that old man Lu and old lady didn't come today, so he asked curiously, "where's the old man?"

"I went to the younger martial brother's house. The younger martial brother is alone. Today is the festival again. The old lady was afraid of the younger martial brother's loneliness, so she went with the master and asked me to go. I didn't go until you had dinner. How do you feel so busy these days? Your lips are dry and cracked!"

"Hey, I'm just fooling around these days. I'm just listening to people arguing." Zhang Fan said something uninteresting, mainly because a group of fat sheep shook their huge buttocks in front of them. Zhang Fan wanted to bite, but there was no place to bite. It's a pity of life.

As soon as Shaohua heard this, although she didn't know the specific thing, she looked at Zhang Fan's complaint. She probably knew in her heart that either the tea vegetable hospital was pulled into a strong man, or it was apportioned by her superiors.

However, she won't worry about it. As long as Zhang Fanping is safe and healthy, she hopes that there will be more wrangling and less surgery.

"Today's festival, I'll give you a present!" Then Shaohua sent Zhang Fan a small glass awl, which looked like an apple and wanted a pear.

Shaohua likes this gadget. Zhang Fan has no love. Seeing that Zhang Fan obviously likes it, Shaohua stared at Zhang Fan and said, "see, here, here, there is skin. This is the authentic Hetian seed jade!"

"Well, where did you buy it?" Zhang Fan looked at it. It looked artificial.

"I went to bazaar with my mother at the weekend. An old man with a long beard looked at my mother and said that this jade was destined for my mother, but this one was Ping'an jade. I didn't want it, but several people around wanted it.

I decided to buy it for my mother. I couldn't bear to take it. Let me take it. I think it's too transparent. It's more suitable for you to take it. "

Zhang Fan knew that his mother and Shaohua were definitely fooled.

"How much is it?"

"More than 900 people don't bargain." Shao Hua felt a little uncomfortable without bargaining while giving Zhang Fan a tape. "Today is Christmas Eve. The next apple can make you safe and healthy. Don't scare me. I'm afraid!" Shao Hua said.

Zhang Fan's heart is warm. It doesn't matter whether he is jade or not.

"Today is Christmas Eve!" Zhang Fan touched the cold glass pimple on his chest and asked a little embarrassed.

To tell the truth, Zhang fan used to attach great importance to this festival, because on this day, wholesale roses can earn living expenses for several weeks without going out of school.

After work, there is no life pressure. Zhang Fan generally doesn't worry about holidays.

"I didn't prepare anything for you, ouch!"

"I have everything I want. Just be healthy and safe. You're so embarrassed. You can say something nice to me. After all, it's a festival."

Zhang Fan knows that you can't think about it. If you think about it for a long time, even if you say the flowers, the effect will be greatly reduced.

"Since it is a foreigner's festival, I will follow the ocean current!" With that, Zhang Fan said solemnly to Shaohua, "Sir, I'm yours!"

"What, don't count!" Shaohua rarely has such a little daughter's appearance. Zhang Fan smiled. It is said that Shakespeare said it. I don't know whether it was true or not. It is estimated that Jinmao and they don't know the words of their ancestors. There was a problem in translation, so there was no mood at all.

"You have been 1cm in the focus of the midline of my left clavicle and the fifth rib."

"? ? ?" Shao Hua was confused for a moment, then pinched Zhang Fan's face, "I like you to say something I don't understand!"

It hurts. It's estimated that Shaohua really doesn't understand.

"We're going to celebrate the festival. Are you going?" After a while, Shaohua asked Zhang Fan.

"No!" Zhang Fan replied, and then said in his heart, what festival is this!

"Then stay at home and put the rice in the refrigerator. Heat it up. We'll go to the festival with King Ya Nan of Jia Su Yue."

"All right, go."

Shaohua wanted to take Zhang Fan with him, but Zhang Fan was a little tired today and gave up. If he hadn't agreed with them, Shaohua didn't want to go. Tea is not a big city.

To tell the truth, there was no festive atmosphere even at the door of the cake seller. In fact, Jia SuYue shouted the two out to accompany her under the guise of the festival.

"Hey, the salary is the same as that of my aunt. It comes once a month and disappears in a few days. Today I want to eat a big family. I have no money!" Jia SuYue sighed.

To tell the truth, she is also a small middle-level in mobile. In fact, her salary is high in small cities. She eats and drinks at home. It can be said that there is almost no big consumption, but she doesn't spend the money in her hands.

Snowflakes are falling out of the window. Flashing neon lights can be seen in the distance. After eating, Zhang Fan returns to his study. He doesn't have to worry about the rest of tuberculosis drugs.

At present, although their scientific research ability is still average, it is quite good compared with the past. First, they can enter the laboratory as the main force. Unlike before, they are just tool people.

Out of the office, Zhang Fan made a cup of tea and slowly immersed himself in his own world. There is a saying in the Jianghu that when coke turns into coffee, it represents maturity, but to tell the truth, Zhang Fan doesn't have many hobbies.

After entering the system, Zhang fanan chose quietly and slowly. Scientific research, to tell the truth, before Zhang Fan entered, he always felt that this thing was as versatile as surgery.

After the system upgrade, Zhang Fan found out why scientific researchers are so precious. This thing, let alone boast about discipline, even if an organ has different research directions, it may not be able to understand what the other party studies.

Although Zhang Fan practiced on tuberculosis drugs, this thing is different from surgery. He can't even use a foundation. Therefore, after Zhang Fan enters the system, he is not in a hurry.

To find the next direction, we must first ensure that it can be copied under the existing conditions, and can drive the vigorous development of relevant departments of the hospital as far as possible.

Not to mention the others, the research and development of tuberculosis drugs, after the infection of tea element hospital digests this wave of scientific research, although it can not squeeze into the top three departments in the country, it can definitely enter the top ten. This is the biggest benefit.

And, after all, although Zhang Fan has a system, this thing is the same as men entering barber shops with iron fences. Some like fat, some like thin, and there will always be a preference.

Zhang Fan's focus will still be surgery in the future, but he can't patronize surgery. To achieve his dream, surgery can't lift a leg

Looking at the most basic scientific research of the system, leaving aside some scientific research that cannot be done at the current level, there is only a corner of scientific research.

Zhang Fan thought for a while. Originally, he wanted to continue to do internal medicine, but then he thought that he held the old man's flag for a long time. The old man was not only not angry, but also accepted himself as a disciple.

Now that you have the ability, it's time to make the old man happy. So Zhang Fan focused on the liver of general foreigners.
