

Chapter 1511

"Master, you call me?" Ma Yichen came to Zhang Fan after the operation.

"Well, do you want to follow me?"

"Haven't I been doing gallbladder all the time, but you..."

Zhang Fan's eyes stared, Ma Yichen couldn't say any more. Zhang Fan glanced at him. Can you comment on a master? Ma Yichen said in his heart, although you didn't work hard before, you can also be regarded as a surgical. Now you're directly infected. You're capable and don't let me say it!

"I mean, you'll choose gallbladder later. Specialize in gallbladder!"

As soon as Ma Yichen heard it, he said with a little reluctance: "I want to do the liver, the gallbladder is so little, and I can't show it."

"Hiss!" Ma Yichen smiled angrily at Zhang Fan, "level times, level times, but you can't show it. Do you want to dance in your stomach?"

Do you think you can remove the gallbladder under the rush lens now, but you can't do it? It's still early, master. I don't dare say anything else, but my master uncle has recognized my position in the gallbladder field. Am I proud? "

Then he looked at the wood and said, "I want to work hard on gallbladder cancer. It's eccentric to you. You're stupid and ungrateful. Why didn't you inherit your father's shrewdness!"

Ma Yichen's father, a liquor dealer, has been wandering the Jianghu for decades. He is a man who can talk with his eyelids. Ma Yichen studied since childhood and then went to the hospital. How can he his father's ability.

When Zhang Fan said gallbladder cancer, Ma Yichen was stunned. "Master, do you really want to get gallbladder cancer?"

"Nonsense! OK, no, I'll let..."

"Do it! I do it! How can I not listen to you."

"It's almost the new year. Now it's a high incidence period of gallbladder disease. There are snacks these days."

"OK!"

According to evidence-based statistics, in winter every year, the high incidence of diseases are lung diseases, heart diseases and bone diseases.

By the end of the year, near the Spring Festival, gallbladder and pancreatic diseases caught up, followed by various accidents, injuries and explosions. Even a foreign scholar specially wrote a paper to study this situation.

.....

To tell you the truth, choosing surgery is relatively easier than choosing internal medicine. In the past two years, the foundation of surgery has been much stronger than that of internal medicine.

In addition, we can also use this wave of surgical research to select several good seedlings. Li Cunhou, Zhao Jingjin and Zhao Yanfang on the tea side should accept students.

After thinking about it, Zhang Fan doesn't know how to think of leeks in the vegetable greenhouse!

Just when Zhang Fan had put down tuberculosis, countries outside China did not stop. The big humanitarian hats of the past were given to China one by one.

Early in the morning, Ouyang was gnashing his teeth when watching the news. Zhang Fan came into her office and was happy because he saw Ouyang's QQ name, snow white!

Zhang Fan didn't dare to laugh, "Ouyuan, who are you angry with in the morning?"

"Look, look, why are these guys so shameless? They have to let us publish data and give up patent rights."

"Oh." Zhang Fan didn't stretch his head. There are professional thugs in this matter. Anyway, now they don't dare to drive planes and artillery to quarrel? Can you lose just by Chinese culture?

Ouyang sat here gnashing his teeth and opening his mouth. It is estimated that he is not angry that others let him give up the patent. It is estimated that he didn't go up and say something in person.

"Well, my master is also in tea, and brother Lu is also in tea. I want to overcome the problems of liver and gallbladder recently. It will be the spring festival soon. I don't think it's a little fast. I don't have a bottom in my heart, so..."

Zhang Fanyi said that Ouyang took off his reading glasses and didn't look at the news on the computer. He directly said, "can old Wu's body eat?"

"Yes, the old man is red now, much better than when he first came."

"As long as Wu is healthy, nothing else is a problem. The Spring Festival lasts for three days every year, which is not a big problem. Whether we are sure or not, we should mobilize everyone first.

Don't make sure that the whole world knows what you want to do. First mobilize everyone's emotions, and then step by step. "

Zhang Fan smiles, but what he thinks is: all over the world? Is this my hobby?

"I can't help you in other aspects. I just want to hold on. Master Mao said that only if you grasp something very tightly and don't relax, can you grasp it. If you don't grasp it tightly, it's tantamount to not grasping!"

Zhang Fan reluctantly tilted his lips. In fact, the purpose of his coming is to breathe with Ouyang first. As a result, the old lady got him a set of art of war!

In the words of the leaders of the tea vegetable hospital, as long as Zhang Fan and Ouyang agree, it is equivalent to a team meeting.

Zhang Fan knew it well. As soon as he entered the operating room, he heard Xue Fei in the emergency center call the skin, brain and ophthalmologist through the pager.

Call doctors in so many departments at one time, and they are about to catch up with the big consultation in the hospital, "what's the situation?" Zhang Fangang just changed his number and brushed his hand clothes. He picked up the internal phone on the wall of the operating room and called.

When Xue Fei heard that it was Zhang Fan, he immediately said, "there was an explosion in a community, three members of the family were injured, and the 110 front desk just called for emergency."

"OK, I'll come right away."

After hanging up, Zhang Fan put on his white coat and ran towards the emergency center.

Zhang Fan panicked when he heard the explosion. People in other places may think of natural gas

explosion or chemical plant explosion. Zhang Fan thinks differently.

"What a big firecracker it has to be."

Entering the emergency center, Zhang Fan saw Xue Fei standing at the door with a group of nurses and doctors, pushing a stretcher and waiting.

"What's the situation?"

"It's not clear yet. It's said that there was an explosion and the injury is very serious. Let's get ready!"

"Hey!"

To tell the truth, waiting for this thing is really not a good thing. In the hospital, some people who wait in unknown situations often just wait and wait, and people don't come.

It turns out that there are a number of old-fashioned red brick buildings in Chasu, which are generally three or four stories high. Although these old buildings look like dangerous buildings, these buildings were specially built for Maozi experts in those years.

However, because the design of that year was still not very good, the area was not large, 30 or 40 square meters, and the washing machine could only be placed in the kitchen.

In the explosion family, the husband was making breakfast in the kitchen, and the daughter-in-law was washing clothes with the child in her arms.

In the narrow area, meat sticks to meat. Otherwise, one person enters the living room first, and then the other comes out. He is going in, because both of them have to go to work and can't care about meat sticking to meat.

The hostess of the family still put the down jacket she changed last week into the washing machine. While standing beside the washing machine, she brushed her teeth with her child and talked to her husband about trivial things.

As a result, just watching the fried meat with scallions coming out of the pot, I heard a bang. The child had a pacifier in his mouth and didn't have time to cry. I saw a bright sub plate flying over.

It turned out that the down jacket turned around and got angry. Then the gas filled its fabric, getting bigger and bigger. Then, because of the high-speed rotation, the blessing of various moments, bang.

The door of the washing machine flew out like a Frisbee.

If the place is bigger, the explosion force is nothing. After all, if the down jacket is angry again, can he go to heaven?

But the place is too small. The small meat sticks to the meat, which is directly equivalent to frying on the face.

Blowing a condom on your face can also make a red mark on your face, not to mention a Frisbee as big as a pot.

Old house, old washing machine, narrow space, this is the pressure.

The frisbee first hit the woman and child, and then flew towards the hot pot as if it were hungry.

Crackling, the child threw up a pacifier and cried, while the blood on the woman's face was like red paint splashing down from the head.

The woman held the child tightly and didn't have time to look at herself. A pot of hot meat fell from the sky, the blood was covered with meat butter, and one end of her long hair was mixed with green scallions.

Really, I thought it was a plate of pizza.

The man in the family couldn't care about the hot blisters. Looking at the blood on his wife and children's faces, his soul was scared away.

Wailing to call 110, said the feeling as if foreign enemies had come in.

When they were sent to the hospital, except for a cut in the back of the woman's head and gurgling blood, the child and the man were a little frightened. The child cried with a pacifier and the man held the wall.

The more to the end of the year, the more to this family reunion day, the more prone to accidents, like this family of three, is a blessing in misfortune.

Unfortunately, due to the heavy snow at the end of the year, the annual stock of this year is a few days earlier than in previous years. In particular, Jack and Lili who came home changed their clothes and began to help them work.

It is a Han village closest to the urban area of chasu. The people here have a different lifestyle than other people far away from the urban area.

People in other places either graze or grow wheat and corn. People here mainly grow vegetables in glass greenhouses. They grow vegetables in front of the greenhouses and raise pigs behind them. Their income is also good.

Because the children at home came back early, they chose a fat white pig to kill the sausages, sausages

and bacon.

The family is busy, and several children aged three or four seem to be participating in this activity.

Just as everyone shouted to catch the pig, the two children played and climbed into a big iron pot to shed their hair after killing the pig. The iron pot for killing pig leg hair is unknown to younger people, because you are not allowed to kill pigs by yourself now.

Most older people who have lived in rural areas know that this kind of iron pot is bigger than the marching pot. There is no problem for an adult to jump in and take a bath, because it scalds the surface of pig skin with boiling water and makes hair follicles fall off.

When a group of people just carried the pig to the yard, the two children climbed into the pot and babbled into the angry pot.

When the parents carrying the pig looked, their legs were scared and soft. They also grabbed the fart of the pig and shouted. They didn't dare to shout. They could only quietly fly under their feet and touch it.

The child's mother has collapsed on the ground.

He grabbed the two children with one hand. As a result, the child turned around and saw his father coming. He thought he was catching cats and cats. He hurried to avoid laughing, and then the smiling child fell into the pot.

The hot water for scalding pig hair was just boiled before it was removed from the stove. The cry of tearing heart and cracking lung rises in this originally festive yard.

Below the child's ass, the contracture is severe. The pink feet are like the Golden Lotus wrapped in the old society. The sausage with Monascus powder is directly stuffed into the boiling water pot, but it is not eye-catching. On the red and swollen legs, there are white blisters and gray and white necrotic skin.

Also Xinkui was in the tea element, and also Xinkui was with the child's father at that time, otherwise the consequences would be unimaginable.

Li Cunhou used the allogeneic skin directly. Zhang Fan and Li Cunhou led the doctors of the burn department of tea element hospital and the doctors of the digital institute into the operating room. The two children were divided into four waves.

Because this kind of operation is quite time-consuming, a wave of doctors can't do it at all. For more than 36 hours, four waves of doctors took over the operation in turn, really fighting with the virus.

The tea element emergency center, because of the upcoming Spring Festival, is also particularly lively and fights. Originally good friends can't be better friends, just because they compare with each other, and then drink some wine. The wine bottles explode on each other's heads like shooting.

Moreover, Xue Fei didn't dare to go home and ate and lived at home every day.

Some things sound wonderful. In fact, the more holidays the hospital meets, the more. Li Cunhou even wants to hold a science popularization lecture, so that an expert who doesn't even hold a government meeting can't help but take the initiative to hold a meeting.

It can be imagined that how many terrible things have to happen every year, so the more festive the day, the more we should pay attention to our own safety and the safety of our family.

Chapter 1512

The busy and orderly team slowly began to form. Zhao Yanfang certainly couldn't count on it. Although she is the head of surgical scientific research, she is still unfamiliar with the liver and gall. It's OK to pull it to build a framework, but it's not OK to be the top beam.

But fortunately, Lu Ning is here. This Zhang Fan doesn't have to worry. Although the hospital is busy, Zhang Fan has begun to prepare. How to say this, because the hospital has almost no free time.

In winter, there are lung diseases, influenza, heart diseases, fractures, all kinds of allergic asthma in spring, fractures and gastrointestinal diseases in summer, allergic asthma, gastrointestinal diseases in autumn, and big belly women all year round.

To tell you the truth, it seems that there are only these diseases.

But when patients in an area arrive at the hospital, what scene? Really, the doctor is late and can't even squeeze into the elevator. It's no exaggeration, especially when the seasons rotate.

Pancreatic cancer is known as the king of cancer, and its neighbor's gallbladder cancer can not be underestimated. One hobby of this disease is to like mature women, especially women after the age of 65. Like it, but the cure rate of this guy is quite low. There are no specific drugs, no target organ drugs, only surgical treatment.

The most important thing is that the effect and healing are also very unsatisfactory.

In particular, this operation is closely related to the level of surprise of doctors. Zhang Fan chose

gallbladder cancer, first of all, because there is an improved resection method in the system that can be achieved at the current level.

The old man said to a group of curious doctors and Zhang Fan, "you're busy. I'll just sit in."

Lu Ning shook his head reluctantly. He remembered that the old man was so regular when he graduated. As for Zhang Fan's master's graduation, in a spring and autumn saying, it's not worth mentioning.

In addition to the old man's happiest, Zhao Jingjin is even happier than Ouyang. Ouyang was born in internal medicine after all. How can he support Zhang Fan? After knowing that Zhang Fan has the ability of internal medicine scientific research, he can actually be biased towards internal medicine.

Unfortunately, Zhang Fan didn't listen. For Zhang Fan's behavior of not answering back but not obeying, the old lady could only pout to show that she was unhappy.

Zhao Jingjin gave up competing for the president of the central hospital from niaoshi, and then directly came to tea element to be Zhang Fan's deputy. It was not that the central hospital was much worse. On the basis of qualification wheel and hospital equipment, the tea element hospital just upgraded at that time was not much better than the central hospital.

The Central Hospital, with a name, can know how well this old hospital is located.

In the words of a businessman, location, location, location!

But Lao Zhao came to tea vegetable like a broken arm. Why, for tea vegetable smoked horse intestines?

He came for the future development of Zhang Fan's liver and gall.

After coming to the hospital, it has indeed developed well. The only thing that can develop rapidly is the hospital. But for Lao Zhao, in addition to getting a comment that is good at cooperating with his comrades, what else can he do? Dean of tea?

Lao Zhao didn't even think about it.

Zhang Fan doesn't do it on the left and Zhang Fan doesn't do it on the right. He has bathed countless times. Zhang Fan still doesn't do it. Lao Zhao is almost out of expectation. When he feels that he is widowed, suddenly Zhang Fan feels that clothes are not as good as new and people are not as good as old.

When Lao Zhao learned that Zhang Fan was going to have gallbladder cancer, the tip of his nose turned red. What he lost was like Yingshan red in spring!

This time there is not only surgery, but also laboratory.

There are few primary gallbladder cancer. What is primary is that there are no other main factors and no indirect reasons. It is a target to pierce. For example, breast cancer, thyroid cancer and other primary.

Most gallbladder cancers are cancerous after gallstones.

There is a medical saying that if inflammation is not controlled, the final outcome is cancer.

Gallstones are in the gallbladder. With the flow of bile, they rub and rub against the gallbladder wall, and inflammation will appear continuously. The symptom is nausea and abdominal pain. Many people eat some drugs and avoid eating for a few days, and the symptom disappears.

Then I feel at ease. If I don't feel pain, I won't be ill. In a few days, eat a pig's hoof, and then continue to start, cycle after cycle. There is no cure, either people hang first, or gallbladder cancer.

Therefore, especially for some female patients with gallstones, don't be careless. Don't think it's no problem to take some anti-inflammatory drugs and gallstone Litong tablets. This thing is not afraid of ten thousand, just in case. Now cholecystectomy is very simple. You can poke three holes. If the skin condition is good, you can't even see the holes.

This is a general process of cancer caused by uncontrolled inflammation.

There are many examples. Many people's oral gums are often infected, do not pay attention, and then suddenly one day tongue cancer appears.

For example, all kinds of hepatitis, without formal treatment, had a big stomach like giving birth in a few years. As a result, it was a man who turned hepatitis into liver cancer.

In Zhang Fan's office, a group of doctors from general surgery sat casually in Zhang Fan's office. When Ma Yichen watched Zhang Fan talk to academician Lu, he rummaged through the boxes looking for things.

"Director, I'll make you some tea. Director Wang Hong is absolutely reluctant to take the best tea." The bastard took Zhang Fan's tea as a favor. Really, some of his actions and looks are very similar to Zhang Fan in quark.

In terms of affinity, general surgery is slightly worse than orthopedics, because Zhang Fan appeared as a doctor in the undergraduate department when he was in orthopedics, and then finally went to the leading post and became the Dean despised and envied by everyone.

By the time he arrived in general surgery, Zhang Fan had a foothold. Therefore, although he was kind, he was not as close as orthopedics.

Sometimes, the theory of ancestry in medical treatment is really more true than some ancestral temples. What is registered for the first time and what is registered for a lifetime is the same as the ancestral home of the ID card.

Whether you are the capital or the magic capital, your ancestral home is majiatun. You will always be majiatun. Don't think that Lulu is a city man.

For example, now, when the outside world comments on the flying knife boss in the surgical industry, they often say, "it seems that Zhang of Frontier orthopedics has not come to the devil for some time recently. He has done appendix surgery."

They certainly won't say that Zhang Dana, Lu's disciple, is the blood lineage theory in the medical field.

"Our purpose this time is to find some special reasons through various gallstones. This workload is very heavy. Your laboratory department is not timid!"

Upon hearing this, Jiang Weige, director of the laboratory department, immediately said, "Dean, don't worry, we will complete the inspection task of the experimental group if we work overtime."

The director of the laboratory department, in the same age as Ouyang, sounds like a man, but actually she is a lesbian.

She answered quite simply. She was deeply afraid that Zhang Fan would introduce foreign aid. In fact, all departments of tea vegetable hospital now know that they want to make a fortune and go abroad with Zhang Fan. They want to mix their qualifications and do scientific research with Zhang Fan.

There are ready-made examples. The operation to make a fortune is Bayin, a little rich woman lying at home waiting to give birth. The doctor can't see it if he doesn't show off. Just look at Bayin, little Audi's husband, 160 river view room, which he brought with Zhang Fan.

As for the qualification of scientific research, it is even more obvious that in the past, the infection department, let alone selecting people, could supplement the positions of retirees on time. Director Huang was already happy as if she could raise it again. Where did she have the qualification to select people.

But now, you go and listen. Lao Huang has spoken. If you're not a doctor, don't submit your resume. It's said that medical university has sent Lao Huang an appointment letter, but Lao Huang doesn't seem to accept it.

In fact, Lao Huang wanted to accept it, but after asking Zhang Fan, Lao Huang immediately refused. You looked down on me in those years. Can you climb up now?

The laboratory department of the hospital, how to say, belongs to the medical technology department, and the clinical department is divided into two departments.

In terms of income, this department is a little worse. In the past, doctors in the Department quarreled because of the ownership of pharmaceutical packaging boxes.

If the hospital level of this department is low, the use of drugs is small, and there is almost no gray income, it will mix a big meal of a pharmaceutical dealer all year round, and the rest is to buy and sell paper shells containing drugs.

If the hospital has a high level and sound inspection items, the income of the Department will be on the reagents. Although all kinds of luminous reagents are not as high as doctors, they are also relatively good.

But in the tea element hospital, what we are pursuing now is not one or two drug rebates, let alone the ownership of paper shells.

Therefore, when Zhang Fan said that there were many tasks and heavy burdens, the director of the laboratory department had an eagerness.

.....

"Zhang Fan has gone to the liver and gall again?"

"I'll go. It's so capricious!"

"Gone with the wind, gone with the wind. If you have a little talent, you don't know the greatness of heaven and earth. Sit and wait for him to fall!"

"Throw your sister. The master of others is Lu Lao and the uncle of others is Wu Lao. Do you think you can fall down! If you squeeze, you can drown you."

"That TNN, how did he get infected with tuberculosis?"

"Maybe this is the willfulness of a good master!"

When Zhang Fan wanted to get gallbladder cancer, he didn't know who spread it. Anyway, there was a feeling that he didn't understand what he was familiar with and unfamiliar with.

They feel that Zhang fan can hold this tuberculosis in his hand, and then even if he lies flat, he can eat it all his life. Why do you have to get another one.

Most people think so.

Several academicians in the tea plant, with a beard blowing and staring posture: "nonsense, nonsense, obviously, they are so talented in tuberculosis. How can they think of beating up excrement and urine again? It's also an unclear goods!"

On the contrary, the teachers and brothers in the South half of China sent congratulatory messages.

"Younger martial brother, you can say what you want." Elder martial brother mordu called.

"Younger martial brother, I had some ideas about gallbladder cancer. Later, the state asked me to get the pancreas, so I got the pancreas. I'll pass some of my ideas to you. See if they are useful."

Brother Wu, the eldest disciple of Qiu sect and the oldest master of the third generation, called.

Even the elder martial brother of the West Lake sanatorium called, "I said, you can't do internal medicine for a few days. There are several old leaders here who have been conservative treatment. When necessary, I'll ask them to find you first.

It's cold. Why don't you let the younger martial sister and the two elders come here to recuperate for a while? "

Zhang Fan hasn't started yet. Support from all sides is ready. The difference between this and tuberculosis is underground.

"How's it going?" Old man Lu looked at Zhang Fan who hung up and asked Zhang Fan with a very meaningful smile.

Like again, baby, are you stupid? Stupid? You know my power!

Chapter 1513

The warm winter sun shines through the French window in the lounge of the operating room. A group of male doctors squeeze on the edge of the window, close their eyes and greedily enjoy the ultraviolet rays brought by the warm sun.

Of course, female doctors certainly won't do this. It's too late to cover. How can they irradiate. In hospitals, especially surgeons, the sun is often invisible. The sun rose early in the morning and they entered the operating room.

In the evening, the sun set and they didn't come out, so many surgeons gave people a kind of white distilled from the cage drawer.

In recent days, the liver and gallbladder group of general waiters in the tea element hospital is seriously busy, because all gallbladder patients in the tea element area are concentrated in the tea element hospital.

It's hard for Zhang Fan to say for places outside the tea vegetable area, but Zhang Fan's voice is quite authoritative for the medical treatment in the tea vegetable area.

Needless to say, to say hello to the presidents and surgical directors of county hospitals directly means to stop gallbladder surgery and send all patients to tea vegetable hospital.

This kind of scientific research first needs a large number of patient data.

This kind of thing is simple to say but not easy to do. First of all, this data is done by doctors one after another.

Because the hospital needs scientific research, there is a sudden difference in the ward of the hospital.

In a ward with liver and gall, a leader of the Bureau and another second leader of a unit are bed friends.

This bed friend is not the kind we understand, but a ward.

Both of them finished the operation. The leaders of the Planning Bureau were a little dissatisfied with not living in a single room, but the operation was done by Zhang Fan himself, which also made up for the disappointment of not having a single room.

"Hey, how's your reply? I don't feel at all now. Experts are experts. I didn't want to disturb Zhang Yuan and didn't say hello. As a result, who knows, people came in person during the operation.

Ah, this is a big favor! "

After hearing this, the bedmate also said, "Hey, yes, the tea vegetable hospital did a good job in this regard. I didn't say hello. Zhao Jingjin gave me the operation myself!"

They have a feeling of being human.

In the tea vegetable hospital, if you want to enjoy the treatment of a senior one, you can go to the international ward, let alone a single room. There are presidential suites. In the general ward, except ICU, all single rooms were cancelled by Zhang Fan.

However, human society is like this. There is no single room and don't want to spend more money. Double rooms are more popular. Although Zhang Fan stressed that head nurses can't go through the back door, this thing can't be stopped.

Zhao Jingjin is really fighting. I don't know how he fooled Luo Zhengguo. Anyway, his administrative business is almost entrusted to Luo Zhengguo. He stays in the operating room every day and doesn't even attend the hospital affairs meeting.

Zhang Fan's sad discovery seems that these leaders of his family are a little technical. Needless to say, after Zhang Fan came to power, the meeting was significantly reduced by more than half.

As for Ren Li, this is the mixed secretary's salary and treatment. Other leaders, Zhang Fan, looked at it, and they can count on Ouyang, Yan Xiaoyu and Lao Chen.

During the tuberculosis experiment, in a relatively high-end script, Zhang Fan was from a strategically advantageous position and let everyone do it. To put it mildly, Zhang Fan came up with an idea and left it alone.

But now the gallbladder is different. Zhang Fan personally ended up with six operations a day.

Zhang Fan and Zhao Jingjin worked so hard that other doctors worked even harder. For a time, the young doctors in the Department held their breath and compared with each other.

The promotion of the hospital is cruel to some ideal people. A group of doctors in a department are the objects of mutual competition and cooperation. This group is not one year, but five years.

That is to say, the doctors who entered the Department in 2001 and the doctors in 2004 are actually a group. The position of discipline leader and department director is only one.

.....

"Where's Zhang Yuan?"

Old man Xia came to the administration building to find Zhang Fan. These infectious academicians don't look like ordinary people and loyal elders, but their pride can force people to shiver.

For example, old Xia, who are not invited by Zhang Fan on weekdays, never take the initiative to come to the administrative building of tea vegetable.

This also shows that people don't recognize your leadership.

However, since the success of the experiment, it has improved a lot.

So this thing talks about thousands of things. You don't order your own goods. Even if your buildings are one by one, others will despise you.

"Zhang Yuan is in the operating room. Do you need me to contact you?" Wang Hong personally received academician Xia.

"Er, he doesn't care about later animal experiments. He's not the right director."

Old Xia forbore and forbore, but he still couldn't. Wang Hong calls Zhang Fan quickly. She can't afford to carry this pot. If Zhenqi leaves, Zhang fan can peel her alive.

"Why?" It is estimated that after watching the screen, the itinerant nurse in the operating room said Wang Hong to Zhang Fan, so Zhang Fan was a little impatient.

Zhang Fan is very impatient because Wang Hong's phone call usually requires him to go to a meeting or sign, or someone to come to the hospital.

"Academician Xia is looking for you." Wang Hong hurriedly said something. She was afraid to make Zhang Fan feel that she had angered old Xia.

Sometimes, the people around the leader really answered that sentence. If you want to wear a crown, you must bear its weight. Don't look at the scenery. It's easy to be promoted. To tell the truth, don't mention any big leaders. It's hard to be the office director of Zhang Fan. Let's talk about others.

"You..." old Xia answered the phone and asked for trouble.

Zhang Fan directly interrupted the old man, "I happen to have something to find you. Xia is always like this. Do you understand parasites?"

Zhang Fan didn't give old Xia a chance directly.

Because I'm in a hurry, I feel skeptical. Really, the old man pouted. "I don't understand. Infectious parasites are twins. Do you say I understand?"

The old man's tone is that you are ignorant!

In fact, the subject of medicine is very troublesome. For example, if you want to study the heart, you must first understand the lung, not to be more proficient in the lung. But if you want to become a first-class heart expert, at least you are a second-class expert in the lung, not even second-class ones.

"That's good, that's good. Come to the operating room quickly. I have a problem here. Come here quickly." Then he hung up the phone.

Old man Xia was so unhappy that he couldn't get angry and had to go.

Old Xia entered the operating room and was led by the director of the nursing department into Zhang Fan's operating room. The director of the nursing department was also the head nurse of the operating room.

This woman, really, if it comes to emotional intelligence. Ten bayins tied up are not her opponents. It's too thief. For example, in the recent gallbladder surgery, she won't follow Zhang Fan. They do it one by one day and night.

The most is to go in and ask Zhang Fan if he is tight, or deliberately wipe Zhang Fan's dry forehead. Then as soon as the fragrant wind floated, she left.

But for every key operation, she can step on it to be an instrument nurse for Zhang Fan, and then stand beside Zhang Fan and enjoy the honor. You can't say it yet!

She perfectly released the system. If she didn't play hard or lazy, she would play blind.

Old Xia entered the operating room. Zhang Fan didn't give the old man a chance to breathe. He directly said, "elder martial brother, let the academician see."

With that, Lu Ning handed the thick information to old Xia, who couldn't care to quarrel with Zhang Fan.

He took his reading glasses with him and sat in the corner of the operating room and looked at them quietly.

The more you look at the old man, the deeper his eyebrows are. "You're incomplete in data collection, but you're very typical."

"Yes, I told my master and my uncle that master meant to let us continue. Uncle meant that intestinal parasites were most likely to develop in the gallbladder."

Zhang Fan explained to the old man while undergoing the operation.

Old Xia hissed. He didn't know whether to laugh at Zhang Fan or old Lu and old Wu. Anyway, he looked like you know something.

"This requires qualitative experiments and protein analysis of parasites. Do you think gallbladder polyps and gallbladder cancer are associated with parasites?"

"It's hard to say at present, and the data doesn't support it, so I want you to see. If you don't know, I'll ask academician Yang of the golden mean."

"No, leave it to me. Dr. Li of our group is still OK in this regard. Wait for me."

Then the old man left, and he had no idea to quarrel with Zhang Fan.

When Zhang Fan decided to carry out gallbladder research, the hospital was really busy. Needless to say, the color ultrasound rooms of the imaging department of the laboratory department were all linked, and even the laboratory let Zhang Fan be mobilized.

Really, there was no mistake in Zhang Fan's choice of tea vegetable and Zhang Fan as Dean.

If you go to a big hospital, it may be easier to start, but it's a little difficult to mobilize the whole hospital.

For example, if you go to the golden mean, you can mobilize a large department. It's already a cow. You can't be a cow anymore.

If you want other departments to help, you can queue up if you have some strength. If you don't have some strength, people won't take care of you.

.....

In Bird City, the boss of the pharmaceutical factory held the filling production line that Zhang Fan forcibly sold to the government. He didn't know whether to cry or laugh.

Indeed, with this production line, they can enter the production of tuberculosis drugs. But the price is too expensive. Millions of people died in the market. But Zhang Fan was stunned to boast that he was a world-class one.

Let the leaders agree that half of the profits in the next three years should be distributed to Zhang Fan.

Really, the leaders of the pharmaceutical factory really wanted to say no, but

A week after TB drugs entered the enterprise's production, they were quietly listed. There was no big publicity, that is, all CDCs and pulmonary hospitals had new TB drugs.

Data from all over the country are gathered bit by bit in the tea element laboratory, which is brightly lit every day.

"You said, after the first phase of treatment, can we get a progress award or something?"

"It's hard to say. It depends on the effect of the first phase. The feedback data these days are pretty good. Zhang Yuan of this tea vegetable can really calm down."

To tell the truth, the highlight time of tuberculosis drugs has not arrived, but Zhang Fan has made a lot of money. As for the next reward, Zhang Fan doesn't have to worry about it. Can Lao Xia be commanded by Zhang Fan now.

Chapter 1514

Zhang Fan is really a little overwhelmed recently. Really, he didn't expect scientific research to be so troublesome.

After calling local county-level hospitals, there are not enough patients. Zhang Fan has sunk to township level hospitals, and the number of patients is still not enough.

When Zhang Fan was worried, Lao Chen gave Zhang Fan an idea, "Dean, do a physical examination. At the end of the year, a new round of physical examination will begin. We can spread the net!"

Zhang Fan is right when he thinks about it. Lao Chen is Lao Chen. The old mechanism's eyelids will pay attention in the blink of an eye.

"Each big unit you contact or I contact." Zhang Fan pondered a little. It's not impossible to give Lao Chen sect a task. The main reason is that he doesn't show some respect for you.

So Zhang Fan asked.

"Hey, hey, look at what you said. I can handle such a small matter. But Zhang Yuan, if you contact directly, the leaders of major enterprises and institutions will face up, but in this way, we owe a favor.

In the future, it's annoying to ask for a single room, which needs an expert. "

Lao Chen said to Zhang Fan with a smile.

"Well, what do you mean?"

Zhang Fan didn't quite understand.

"Zhang Yuan, in fact, is simple, that is, let the leaders do the physical examination, and then let the academicians at home hang a title. We don't need to call one by one. It's like begging them. As long as we finish the physical examination for the leaders, and then hang the Title of academicians, I dare say that private hospitals in tea vegetable area can't celebrate the new year this year."

Zhang Fan was stunned. "You're still tall! I don't think it's a good operation..."

"You see what you said. Say hello to the leader and leave the rest to me."

"Good!"

Then in the tea element area, everyone seems mysterious.

"You know what? The tea vegetable hospital gave the leaders a welfare, saying that the academician led the physical examination for the leaders! The couple in my family had a good relationship with the government boss, and they went in. They told me at home, and I got some light!"

"True or false?"

"The black Dean of tea vegetable is too shameless. I know to lick the leadership ditch. I'll have a physical examination tomorrow!"

First, from the leaders, the wind blows. Finally, even the children in the kindergarten know that the tea vegetable hospital has a special physical examination project led by academicians.

This is the way things are in the world. If the tea vegetable hospital appeals and asks everyone to have a physical examination, it is estimated that if you don't send someone a bag of milk and a piece of bread, he can stand at the door of the hospital and swear.

But this kind of operation like stealing touch feels like losing money if you can't get it. For a time, the masses of physical examination came to line up before dawn.

On the side of the tea vegetable hospital, Lao Chen issued a number to the people in line while bluffing that there are not many numbers. There are not many numbers. Leaders will come for a physical examination in the afternoon. Don't line up.

Shouting and cheering.

Zhang Fan outside the hospital has to worry, but Zhang fan inside the hospital doesn't worry. Really, sometimes Zhang Fan feels very happy just to be a doctor and do surgery, regardless of scientific research or not.

In the hospital, the directors of relevant departments are like a group of Jianghu heroes who have done evil. They become sick and kill you.

"Zhang Yuan, our equipment is qualitative and quantitative. The specific values vary greatly from top to bottom, so we can't use them as accurate data."

Director Jiang Weige called Zhang Fan in a strange voice. "OK, I see!"

Zhang Fan then motioned the itinerant nurse to hang up. Then I wondered where to get a set of quantitative inspection equipment.

Although this thing seems unknown, we all know that nuclear magnetic CT is expensive. In fact, the laboratory equipment that can perform quantitative analysis is not cheap at all.

For example, the nuclear magnetic resonance is more than 800, and everyone thinks it's expensive to die, while the big biochemical is only in its early 300. In fact, the nuclear magnetic resonance you enjoy is VIP treatment, one inspection warehouse per person, so that you can enjoy the launch of Kesai.

Biochemistry is different. Hundreds of them will be checked together. Whoever makes money will make more money in the laboratory department.

When it was possible, the hospital's scientific research was general. This kind of finalized equipment was only available in the laboratory, but not in the hospital.

You can't move the lab to the laboratory.

Zhang Fan thought in his mind to see who he could find to make a fortune.

I haven't figured it out yet. The director of the color Doppler ultrasound room called again. We can't blame these directors, because Zhang Fan generally doesn't like meetings. Anything can be solved directly point-to-point.

This method is good and efficient, but the bad thing is that the bus head is here. There is nothing here on weekdays. Once something happens, everyone pulls the thread head.

"Zhang Yuan..."

Zhang Fan said impatiently, "don't tell me that your color Doppler ultrasound is not clear. You got the most advanced 4D for you only half a year ago!"

"But just one. It starts up 24 hours a day. What should I do if this one breaks down? You have to be clear. You have to measure the data strictly. The old machine in the hospital has to check it. I'll let you call.

Now there are hundreds of people in line! "

The director is more angry than Zhang Fan. Zhang Fan is impatient and starts directly.

Zhang Fan is sad. The equipment of the laboratory department hasn't been found yet, and the color Doppler ultrasound room reaches out again.

Sometimes it's like this. If you want to do something, there are all kinds of things waiting for you.

.....

However, throughout the year, the strength of the tea vegetable hospital has also improved significantly. Although some departments do little scientific research, it is obviously different from before.

For example, due to the cooperation with the golden mean, the dermatology department, which used to be small and didn't even have a hospital bed, now has its own scientific research products.

"Plateau cold proof moisturizing anti ultraviolet wet cream?" Zhang Fan had an operation and finally had a rest in the office. The director of the dermatology department smiled and entered Zhang Fan's office with a dissecting bottle in his hand.

Gulina Zha was deeply afraid that Zhang Fan didn't understand. He directly opened Ansan and took it to Zhang Fan's nose. Thinking of gulina Zha's letting Zhang Fan touch Flammulina velutipes, Zhang Fan quickly stepped back.

"Director Gu, sit down and say something." Zhang Fan quickly smiled and asked gulina to sit down and say.

The fat director is too tiger.

"Don't underestimate this. This is jointly developed by us and the golden mean dermatology department." Gulina Zha looked at Zhang Fan's disdain and twisted her fat ass reluctantly, trying to stand up and theory.

"No, director gulee, you bring this thing. Do you want me to get you a company or something?"

Zhang Fan really doesn't pay attention to cosmetics. Even if this thing works very well, Zhang Fan is not going to do it. How to say, after all, the hospital is not a company. Making money depends on what money you make.

It's fast to rob the bank!

Gulina Zha rolled her eyelids. "This is for the plateau army!" Then look at Zhang Fan with an expression

that you don't know anything.

"Oh? Why didn't I know you studied this?" Zhang Fan paid attention to it. Curiously, he took a section and asked specially. There was no taste.

"You are a big courtyard. Your eyes are fixed on large departments and large projects. Our small departments and small projects dare to disturb you!"

"Look what you said, hehe, what do you need me to do?"

"Our laboratory has done a little and wants you to test the army."

"That's a good thing!" Zhang Fan then called Ouyang.

Old lady Ouyang is probably very interested in this kind of thing.

After listening to the bad news of the day, Zhang Fan is still very satisfied with the good news.

Chapter 1515

Gulina Zha's walking is trembling. Zhang Fan is not curious about the things in her anatomy, let alone pay attention to them. If Na Zha says she has rich and fierce research results, it is estimated that Zhang Fan will be a little interested. He directly called Ouyang for this oil thing that is anti ultraviolet and anti freezing.

To tell you a bad story, it is estimated that among the military representatives stationed outside the army in China, the tea vegetable hospital is the most sad. The military representatives of other enterprises have really good treatment and high status. But it's different at the tea vegetable hospital.

Even party a can't count. Sometimes when assessing or practicing any subjects at the end of the year, Ouyang is asked to let the rescue helicopter of tea vegetable hospital go out for a few days.

Therefore, although the troops stationed in the tea vegetable hospital are not under local management, Ouyang still has a great voice. Zhang Fan is not very involved. He thinks others are professional. He can't even count two knives, so there's no need to get involved.

But Ouyang, an old lady, likes to carry guns. I often supervise people's running exercises early in the morning. Really, when a group of young men run, they have to hide and wait for Ouyang, otherwise the old lady can't keep up.

"Zhang Yuan, won't our hospital hold a winter sports meeting? It's said that the garrison will carry out armed cross-country training in a few days." Gulina finished his business and chatted with Zhang Fan.

Among all the department directors, there are not many directors who can chat with Zhang Fan at will. The directors who used to joke with Zhang Fan now dare not. However, Gulina Zha has not changed much. Except for the change of name, there has been no change in others.

"Why, you also want to participate. Let the European Academy say that you will run with them at that time, not to mention taking a ranking. You can follow the whole process. I will decide this year's model worker for you." Zhang Fan turned over the latest data while talking nonsense with Gulina.

"Cut!" Guli rolled her eyes and made a disdainful voice. "I don't want to be an official. Just two bags of rice flour oil. What's the meaning? When has the tea vegetable government been generous? I want to lose weight!"

"All right, go and be busy if you have nothing to do! There are many patients in the Department. No, you can't go to the clinic!" Zhang Fan is impatient.

"Do you want to do long-distance running in winter? People have long-distance running marathons in big cities every year. At least we are provincial hospitals now. We should keep pace with the times!"

Gulee is not afraid of Zhang Fan. At the beginning, Zhang Fan was embarrassed. She took it out to people from time to time.

"Ha ha!" Zhang Fan looked up at Guli, then smiled and shook his head.

Gulina Zha was not happy, "why, look down on people?"

"Director Gu, you are not from orthopedics and may not be familiar with human muscles. I suggest you don't run any marathons. You're not fat and very rich."

"Why not? I'm a surgeon anyway. Don't look down on people."

"Then you are not familiar with marathon!" Zhang Fan said helplessly.

"Why not? Why not? When I was young, I won the long-distance running champion in school. It's just

that you don't have time to toss in recent years."

Zhang Fan is helpless. If you don't press her, she can go to your head.

"Well, I'll tell you a set of data. This is sent to me by Professor beiti kinematics. I'll read it for you."

Then Zhang Fan opened a paper from the computer and looked at Guli. Guli thought Zhang Fan looked at something, but she wasn't sure.

"One of the causes of adult women's disease after long-distance running. When adult women participate in the 50km marathon, the chest fluctuation distance of grade C women can reach 4km. For the suspensory ligament of the breast, it can cause irreparable damage. If it is light, it will cause sagging, and if it is heavy, it will cause aseptic inflammation in the fiber bundle between the fascia of pectoralis major!"

"What a broken Professor!" After saying that gulina Zha was unwilling to stand up and scolded, and then left. Zhang Fangang wanted to look down at the data. Gulina Zha came in again, "I don't believe it. Send me the paper!"

Then he slammed the door and left with a blush. As he walked, he held his chest with both hands, and then said to himself: no wonder it sagged. I thought it was

Gulina Zha left, and Zhang Fan continued to look at the recent gallbladder data. Sometimes, it's really unexpected to inadvertently insert Liu Chengyin.

With the development of winter training, the frontier military and police have all entered the deep mountains and forests for live ammunition drills. Zhang Fan once heard that there are death places for such drills.

Sometimes think about it, is your work tired? I'm tired, but compared with a group of young guys who protect our country, what's my point.

Ouyang didn't know how to be fooled by gulina. Several dermatologists and Ouyang directly followed the army into the mountain. They didn't say hello to Zhang Fan when they left. When they entered the mountain, they asked the tea officer to inform Zhang Fan.

They said they followed the team into the mountain to test the effect of frost resistance.

When Zhang Fan asked where he had gone, people didn't tell him it was a military secret.

What Zhang Fan sighs is not Ouyang's escape from work, but what to do once something happens at such an old age.

In a week's time, Ouyang came out of the mountain. Ouyang took gulina directly into Zhang Fan's

office. Zhang Fan looked and said, oh, what he knew was that you went to test. What he didn't know was that you were going to wear minks.

Ouyang is a little better. It's nothing to put on a coat, but gulina's fat body puts on a black and yellow fur coat. From the back, it really looks like a bear blind. Zhang Fan mutters in his heart that he is not afraid to be treated as a bear for you biubiu!

"This kind of thing, let us young people go. Why do you join in the fun?" Zhang Fan was not very happy and said a word to Ouyang.

Ouyang did not refute, but said to Zhang Fan with a smile: "the effect is very good. Every year, there are layoffs due to frostbite of hands and feet. There is none this year, especially the wrapping of oil, which is directly equivalent to the production of an effective isolation area."

"There is no such exaggeration. The temperature this year is not higher than that in previous years!" Zhang Fan didn't believe it and took the composition list in Guli's hand. Since Li Cunhou came to tea, Zhang Fan has not been very concerned about burns and skin.

I don't know that they even set up a scientific research team in their own department. While Zhang Fan watched, gulina chatted, "President Li inspired us. He said that it was too cold here in winter, which would damage the capillaries of the face. If there was a special antifreeze skin care product, it would be much better.

Later, we thought about it. We are no longer a small department. How can some departments even academicians not have their own scientific research projects? Therefore, we carried out our own research and development with the doctor in the golden mean dermatology department of tea element.

"What department's small Treasury, that is, the scientific research reserve reserved for each department!" Zhang Fan glanced at gulinaza. There are some things that can't be said, such as the coffers of tea and vegetable departments, and even the coffers of hospitals.

Everyone knows this, but Zhang Fan never admits it. When he asks, he is the reserve for scientific research. You have a name for this thing. You can, but if it's really a small Treasury, there must be superiors to urge reform.

"Yes, yes, yes, scientific research reserve. Zhang Yuan is smart!" Gulinaza is in a good mood. I thought I could have a scientific research project team. Don't let other departments look down on it. The result is really good.

"Li Yuan, if you are busy, come to my office." Zhang Fan asked Ouyang and gulinaza to have a rest, and then called Li Cunhou directly.

Before long, Li Cunhou came. Looking at the ingredients list of protective oil in Zhang Fan's hand, he was

surprised and asked gulina Zha, "did it come out so soon?"

"Not only did they do it, but they encouraged the European Academy to let the training team try it out!"

Old Li Leng, this is a little bold! If it doesn't work, the training will be reimbursed.

But now that it has been successful, needless to say. "Yes, yes, unexpectedly, unexpectedly!"

"What now?" Zhang Fan asked.

Ouyang, who was sitting on one side, was not happy. "What should I do? The logistics director of the Garrison has reported it to the police and said he wants to purchase."

Zhang Fan covered his forehead. "My European Academy depends on which crucible in the laboratory. How many kilograms can you supply!"

"If I had a way, I would have given birth long ago and come to you?"

Zhang Fan looked at Li Cunhou, and Li Cunhou left his hand: "it's supposed to be the golden mean for you, but the doctor of the golden mean has given advice on this ingredient list. You can give it to the golden mean for your production. I think we will suffer!"

Lao Li's family has always been a scholar's temperament. Since he came to tea, those affected began to calculate.

Zhang Fan thought about it. He originally wanted to give it to the doctrine of the mean, but Lao Li said, he immediately interrupted the idea, "yes, give it to the doctrine of the mean, and you will directly become a beggar and enter the main room. The owner can't help it. Wait for me to ask first. There's really no way to say it."

Then Zhang Fan called the boss of the bird market in front of Lao Li and them. At the time of disaster relief, Zhang Fan met many bosses. They gave the car to people without saying a word, and didn't ask for a little return. Zhang Fan felt very sorry.

"Mr. Mo, ha ha, why? It's like this. I've made a report on logistics and want to purchase, but we don't have production capacity. If you don't mind the small list, you can do it."

At the beginning, the other party heard Zhang Fan say that he had protective oil, but he didn't take it personally. He directly said that he helped Zhang Fan do it, and didn't want any processing fee. If there was no processing fee, Zhang Fan would just give them raw materials.

As a result, when Zhang Fan said that the Army wanted to purchase, he paid attention to it and directly told Zhang fan that he would buy air tickets to tea now.

Mr. Mo is also a strange man. It is said that his family's ancestors were religious. In his generation, the goods didn't believe in religion, and they almost broke off relations with his family. When he was young, this guy traveled everywhere. Later, he made fatty alcohol for some enterprises in the frontier.

.....

"Good stuff! This is good stuff. I'll give you the agent for our cooperation. But we need to add some high quality flavors."

In the evening, Mr. Mo killed the tea vegetable. With a beard on his face, he said he was Han and a strange man.

"This thing makes money?"

"My God, this can definitely make a lot of money. If it's done, it may make more money than your tea vegetable hospital! Now there are two ways, one is to hang the brand of moderation and follow the scientific and technological route, and the other is to find a foreign half dead enterprise and take a foreign brand. In the future..."

"Which makes more money?" Zhang Fan is not worried about the future. He is worried about making more money.

After struggling with gulina Zha for a long time, Zhang Fan wants to take half of the profits, and the rest is divided by President Mo, dermatology and Li Cunhou, who gave important opinions at that time. Anyway, Zhang Fan, no matter how they do it, takes shares in technical patents and pays dividends every year.

Guli looked as if she had suffered a big loss. She couldn't find her eyes on Zhang Fan's smiling face in the office. She didn't expect Zhang Fan to directly let the department participate in the dividend. She thought Zhang Fan would only give some bonuses, but she didn't expect to participate in the dividend directly!

Guri swayed up and down and trotted all the way to the Department.
