

Chapter 1516

People say that there is no secret below the county and regiment. Mr. Mo spent some effort. Anyway, the dog pulled the sheep's intestines. He found a lot of people. Finally, the report has been approved!

Hearing this news, Mr. Mo was reassured. The beginning of the festival called friends and began to raise funds.

Chinese people have a habit that they can't get in or out in the twelfth lunar month. Especially business people pay attention to this. Especially before the new year, they will settle all kinds of debts for a year as much as possible.

It was difficult to raise money at this time, but Mr. Mo took Zhang Fan's brand and the name of logistics. Within three days, he asked him to collect more than a billion, and then came to tea to buy a state-owned soap factory.

When Zhang Fan heard about it, he was amazed! I'm not happy about his acquisition. I'm happy to take over the state-owned soap factory.

Because the amount of soap used in the hospital is relatively large, the soap in the tea vegetable hospital has always been a long supply. In the past, I didn't know how, but Zhang Fan was quite dissatisfied with the soap factory after entering the tea vegetable hospital.

The soap transported here either can't be crushed into a row, but can only be turned into soapy water to give patients enema and gastric lavage, or it can't be split by a hard axe, and the little nurses deal with this thing with a file.

Zhang Fan wants to push the supply enterprise, but the leaders of the tea vegetable pipe industry are like toothless old women talking to Zhang Fan every day, which makes Zhang Fan very helpless.

Just like the projects in China, speed is not a problem. The biggest problem is the project payment. Because the money Mr. Mo got this time was quite abundant. In a week, the soap factory supported by Lao maozi became Ingrid Princess moisturizer.

Finally, President Mo decided to take the foreign route. Listening to the name, Zhang Fan had a feeling of tooth plugging, but there was no way. It was said that high-end cosmetics could not afford a foreign name and could only be sold as a treasure.

At the weekend, Zhang Fan didn't press Ma Yichen to work overtime. The experiment is not production. Now it's the data collection stage, so it's not in a hurry. So he went home early.

The atmosphere at home is obviously different these days. In the past, when Zhang Fan blew a cow at home, he could expose old man Lu every minute.

But now it's different. When Zhang Fan comes home, the old man doesn't say happily. He often comforts Zhang Fan. Take your time. Don't worry. What you have learned accumulated a little. This experiment is different from surgery.

Surgery is to have a clear goal and summon up the courage to fight to the end, while the experiment is to find the flickering inspiration from a myriad of things.

The most important thing is that the old man doesn't expose Zhang Fan's Cowhide now, but with this, Zhang Fan is embarrassed to boast.

Hey! It's not good for happiness to come too fast. The old man doesn't quarrel with himself. It seems that Zhang Fan is missing something.

"Where's the old man and the old lady?" When Zhang Fan came home, he found Shaohua alone.

"Let dad take him to the farm for the new year. The farm's income is OK this year. At the end of the year, the sheep raised at home are fat and the chicken can be eaten. In the afternoon, dad drove his car to pick up the teacher and his wife to the farm."

"Well, they left us?"

"Yes, what do you eat at night?"

As soon as Zhang Fan saw it, she knew that Shaohua had no mind to cook. There were few people, and she had no motivation.

Before he finished, Jia SuYue took Wang Ya's man Feng and killed him at home.

The walkie talkie at the door let Jia SuYue use it as a speaker.

"Yes!" Zhang Fan dodges into the comfort zone.

Jia SuYue has been to the villa on corruption road two or three times. She often comes home like shopping malls. I don't know if it's because of the distance. Princess Jia seldom comes. I don't know what happened today.

Although Zhang Fan and Jia SuYue are not very good now, Zhang Fan is not willing to chat with her. As for Wang Yanan, I am tired of seeing him in the operating room every day.

"Where's your Zhang Fan?"

As soon as he entered the door to find Zhang Fan, Shao hualeng said, "in the study, what's the matter?"

"What's the matter? You don't know if something big has happened?"

"What's the matter?"

Shao Hua was not surprised at all. She knew Jia SuYue's character too well. Sesame big things, she can give you boast into watermelon big.

"The tea vegetable hospital has developed a whitening lotion jointly with the golden mean. It is said that Europe and the United States are out of stock, and now you can't buy it. The vice president of our unit entrusted a lot of relationships today to get a box. I used it a little, just a little, but the effect is very good."

Jia SuYue gestures with his fingernails.

Shaohua knew there was no big deal, but he told Jia Su that it was very important.

Jia SuYue wanted Shaohua to ask Zhang Fan to get some boxes.

Anyway, the tea vegetable hospital is also one of the R & D enterprises. It should not be a big problem to be the president.

But Shaohua didn't understand it. He looked left and right and didn't want to shout Zhang Fan.

To tell the truth, if Jia SuYue's relatives want to see a doctor today, Shaohua will definitely help, but in her opinion, she doesn't want Zhang Fan to ask for help. Even if she doesn't ask anyone, she doesn't want Zhang Fan to break the rules.

How to say the rules? They are the same as the road. They are often broken. After a long time, they have no binding force.

Wang Yanan is not interested. What she cares about is what to eat today. After the operation, Jia SuYue was pulled here like a fire.

Just as the three were talking, the door of Zhang Fan's house rang again.

"Hey, what's a good day today? Many people come to the door." Shaohua thought to himself, and then

saw a man with a beard standing at the door with two men who looked like his men.

"Is Zhang Yuan there?"

"Who are you?" Shao Hua opened the door while asking, because people who can enter the community can be said to have passed a round of political trial.

As soon as they entered the door, the two men directly put a few boxes in the corner like beer boxes, and then left without saying a word.

Shao Hua was worried, "this can't be done, our family Zhang Fan..."

"Mo Zong!" Zhang Fan came out with his cell phone, and Mo beard hung up the phone in his hand.

"This is my sister-in-law. Ha ha. I saw you for the first time. No wonder we don't touch the leaves outside the Zhang yard. It turned out to be a golden house!"

As soon as Zhang Fan came out, Shaohua didn't say anything.

"Have guests? Is it convenient?" Although Mo beard asked whether it was convenient, it was obviously convenient to see the two girls' films. He sat on the sofa and motioned Jia SuYue and Wang Yanan away with a very firm look.

Wang Yanan was bored. Now she saw that someone had sent gifts to her home. She wanted to see if the black buy river would accept it, and Jia SuYue couldn't go away looking at the box in the corner.

As soon as Zhang Fan saw that neither side moved, he smiled. It's not a shady thing.

"Why don't you go to the military region and come to me for what?"

"When the product comes out, I won't try it for the big boss. What if the big boss is unhappy?"

"Hehe, look at what you said, drink tea!"

After Mo beard drank two cups of tea, Zhang Fan asked, "I'm a layman in business. Mr. Mo, you know better than me when you're drunk. I don't talk nonsense. Just one thing I want to say."

When Zhang Fan said this, President Mo put down the tea cup, and the man straightened his back. He immediately entered a very serious state, and his eyes were shining like a wolf on the grassland.

Although Zhang Fan said something quietly, the looming momentum just made Wang Yanan feel as if the black river was strange.

Shao Hua looked at his man and never had such a pressing breath. For a time, there was a feeling of

happiness that my stone was a tiger outside and a lamb at home.

Jia SuYue looked at her foolishly. She didn't have quite Zhang Fan's momentum. Where is this earth steamed stuffed bun!

"The antifreeze oil given to the troops must be 100% free from problems. We must not give the troops defective oil in order to control the cost."

"Zhang Yuan, don't worry. This will be the iron law of the enterprise and will be completed."

"Well, I'll rest assured if I do this." Then Zhang Fan smiled, and the atmosphere seemed to heat up again.

Friendship belongs to friendship. If you don't make it clear in advance, you can't even make friends when something goes wrong. It's like many friends or relatives who have a particularly good relationship do business. If you don't say well in advance, you can't even make friends or relatives when something goes wrong.

"This time, some samples have been sent out in the world, but not much. The feedback effect is good. I'll send you some. You can find some people to try this. If you can put forward effective opinions, there will be rewards."

To tell you the truth, it's not for nothing to be able to give gifts so fresh.

"Well, I won't work for you if I give you so many large boxes. Don't expect me to advertise for you for free." Zhang Fan said with a smile.

Jia SuYue shook Shaohua's arm like a little girl who wanted to eat ice sugar gourd. Shaohua gently held Jia SuYue's hand. The expression on his face didn't change. He still looked at it with a smile.

"Ha ha, Zhang Yuan is Zhang Yuan. It's too old." In fact, it's just a one sentence business. After that, I chatted a few words.

As soon as Zhang Fan saw it, he knew that this guy didn't want to go. "What would you like to eat in the evening? I didn't thank you for borrowing your car before. It's tea vegetable today. I must thank you very much."

"Look what you said. You always mention big things. Whatever you eat, I've come from a hard time."

"Ha ha, OK, Shaohua, you can book a better hotel, otherwise Mo always says I'm stingy." Then he said to Wang Yanan and Jia SuYue, "don't you work overtime today?"

Wang Yanan glanced. "I've been in the unit for three consecutive days. I'll let you check my post over the weekend!"

Zhang Fan looked at Jia SuYue again. Jia SuYue gave Zhang Fan a white look. I don't know why. When Zhang Fan looked over, she couldn't help turning her eyes: "weekend, who is the same as your hospital."

"Hehe, OK, we'll be together."

"Is this the doctor in the hospital?" Mo always asked.

"These are my good sisters. Asian men are in the orthopedic department of the hospital, and Su Yue is moving to work." Shao Hua introduced it with a smile.

"Ouch, isn't this my customer? Our products will face the elite women in this industry in the future."

Then he took two boxes of antifreeze oil and handed them to Wang Yanan and Jia SuYue respectively.

Wang Yanan looked at Zhang Fan who didn't want it very much, while Jia SuYue clearly wanted it and didn't know where to drum up his courage. What he refused was that he didn't answer.

To tell the truth, Zhang Fan nodded gently at Shaohua.

Shaohua said to President Mo, "well, I'll thank President Mo for them. If they don't put forward any opinions, don't blame us!"

Zhang Fan is very satisfied with their rejection, especially Wang Yanan. Orthopedics will have her days in the future. If she doesn't know the world, Zhang Fan will be disappointed.

Wang Yanan was carrying antifreeze oil as big as an instant noodle box. He looked worried. He seemed to say, "how many years will it take to run out?"

Jia SuYue was looking forward to it. As a result, he got such a large box. Suddenly, he felt that this thing didn't seem so fragrant.

What they don't know is that this antifreeze oil has set off a trend in the bird market.

Chapter 1517

Sometimes, things in this world are strange. At the end of November, there was a moisturizing tide in China. The skin care products produced by a century old foreign beauty enterprise tuochasu soap factory are popular.

Really, Zhang Fan doesn't know what to say when looking at the data in front of him. He doesn't know whether he has no concept of money or the world. In less than a month, tens of millions of profits have come out.

Zhang Fan thinks that even if his hair is dyed yellow, he can't rob the bank so fast.

This is not the total payment, but the profit, the naked profit. Moreover, the first batch of people who can use this thing seem to have a feeling of superiority, such as a circle of friends, sending a bad news, and then slightly revealing a bottle of moisturizer.

This kind of has a plan. Those who don't have a plan directly say that their Godfather got skin lotion from the leader.

Zhang Fan is really stupid. It's just a moisturizing, cold resistant and anti ultraviolet antifreeze oil. Is there such an exaggeration?

Then, the logistics orders were placed in the tea vegetable hospital. Most people don't know that the cold troops in China are really hard, especially in the troops in various mountain passes. They didn't know before. With the advent of the Internet age, a young face is like the skin of the same purple potato. People who see it have an inexplicable sadness.

Because of high cold and hypoxia, low temperature and strong wind, the facial skin is seriously dehydrated. Therefore, after this antifreeze oil was inspected, it immediately entered the purchase list.

Of course, it is not the kind of packaging boxes that can be used as heirlooms for the troops. Barrels the size of gasoline barrels are filled with antifreeze oil, and then transported to the northeast, northwest and southwest of China under the transportation of tea vegetable railway.

No matter how much money there is outside, Zhang Fan's order is to first meet the needs of the army. Now it is the coldest season. The soldiers can be coated with antifreeze oil early, and the railway and highway of tea vegetable make way for transport vehicles.

It was thought that after supplying troops, insufficient production would lead to lower income. But Mr. Mo didn't know how to form his brain circuit. He began to restrict the purchase. Not only did he restrict the purchase, but also increased the price. Not only did he increase the price, but also he had to give priority to members.

The already hot sales seem to have become an embodiment of identity.

In the early morning, Zhang Fan got up a little late today. He fought with Shaohua last night because the system told him to let go of the vitality of the tadpoles, which reassured Zhang Fan and prevented Shaohua from counting the days and doing various postures like a god woman.

Although I can't say it clearly, is home a reasonable place. As a result, he played for half a night. The next day, Zhang Fan was dizzy, with sour waist and numb legs, but it was strange that Shaohua got up early and hummed a tune.

Is the surprise of men and women so obvious?

"Do you think I have changed today?" While brushing his teeth, Zhang Fan saw Shaohua come together.

Zhang Fan looked carefully, "the oil didn't wipe off!"

Incorrect answer! "The effect of this oil in your hospital is very good. It feels moist when applied to your face. Moreover, when you go out, you don't feel much when the cold wind blows. But it's a little too greasy. Do you smell it well?"

"Well!" Zhang Fan sighed in his heart, hey, is it a antifreeze. "If it's so popular all year round, I can support a lot of laboratories!"

Zhang Fan looked at Shaohua with an oily face. He felt really strange. More exaggerated is still ahead.

Zhang Fan drove into the hospital. As soon as he got off the bus, he didn't think it was right. Nurses and female doctors wanted to chew pig hooves with their faces one by one. They were smooth. Even Wang Yanan, who rarely makes up, has an oily face.

After entering the office, Ouyang came to the office with a proud face and Zhang Fan on his heels, "I thought you also had an oily face today."

Ouyang glanced at Zhang Fan and didn't reply. After Wang Hong came in and made tea, Ouyang said, "how's it going?"

"Yes, can the things you are optimistic about be bad? I think this product still has shortcomings."

"What?" Ouyang asked.

"After the Spring Festival, it is estimated that it will be difficult to sell. Why not continue research and development? For a summer, I think we need diversified development, not simple and rough..."

Before Zhang Fan finished, Ouyang said, "you can reach out when you see the benefits! It's OK to continue research and development, but first ask Mr. mo. after all, we are also laymen. Moreover, you

can't be obsessed with such things that seem to make a lot of money overnight.

You can't forget your heart! " Ouyang was deeply afraid that Zhang Fan would be narrowed by yuan, so he had to remind Zhang Fan.

To tell the truth, this kind of old lady is really rich in experience, so rich that she can see through everything.

"You see, what kind of person am I?" Zhang Fan said unwillingly.

"Hehe, it's not good!"

President Mo is afraid to turn on the phone these days. It's all for goods. I had to get a trumpet again. When Zhang Fan finished, he hesitated, "Zhang Yuan, this time it's luck. It's luck that this thing can be sold at such a high price this year. R & D is OK, but I'm not optimistic. Don't you understand?"

"What?" Zhang Fan didn't understand. With such a good momentum, he should continue to work hard. Maybe he can say later that I'm not interested in money.

"Women are fickle!"

Because Ouyang was around, Zhang Fan didn't make a statement, but there was a feeling that he dreamed of millions of money and found nothing after waking up.

This cosmetic is not fickle. It is still too restrictive. It works really well when it is used at the coldest time. Do you think it can be used as military supplies in areas above 4000 above sea level.

But this thing won't work when the weather is hot. Therefore, this thing is a hammer deal in recent months.

But it was also an unexpected fortune. Zhang Fan didn't feel pity, but felt it was too untrue. He went abroad for surgery with a team. As a result, Leng didn't earn much by making some false advertisements.

No wonder Chinese advertisements have to say hello, I'm good, he's good! Is this specially for Lao Wang next door?

At the end of the year, there are many things this year.

When Zhang Fan was assistant dean, he only had tea vegetable hospital. Later, he had three branches, and now he has become a tea vegetable regional medical group.

The volume has become larger and there are more things.

Moreover, looking at the date, this year's Spring Festival in Gurbang and China is together, which is more troublesome.

There is no problem in our hospital. We will continue to be on duty according to the duty table, but the branch hospital and the Chinese medical ward are more troublesome and can't open the tie.

Especially this year, we will formulate the enrollment plan for the new year.

In the past, when undergraduates came here, they could still have some cards. Now undergraduates can hardly enter the hospital.

In addition to some auxiliary departments, such as ECG room, what should we say about this department? It's what we see in the hospital. Bring an ECG all over the corridor to do ECG for patients.

In the past, this department was done by doctors in the Department of Cardiology. Now the Department of Cardiology doesn't care. Zhang Fan wants to find two people to do ECG in advance.

Originally, I was thinking about whether no one would come to the Department to get an undergraduate. As a result, I just had this intention and made a lot of noise.

All the time in the morning is such trivial things. It is a broken thing for leaders, but it is a big event for ordinary employees. Therefore, although Zhang Fan doesn't need to make any specific comments.

But we must grasp the direction and give suggestions for other people's opinions. Really, Zhang Fan was dizzy all morning.

After lunch, I went to the surgery building and the operating room.

The results met the director of Obstetrics and Gynecology and LV Shuyan. Zhang Fan pretended not to see it. As a result, the director of Obstetrics and Gynecology grabbed Zhang Fan's arm like a thief.

"Torn, torn, just got the white coat!" Zhang Fan impatiently asked the middle-aged woman to give up.

There are more women in hospitals and many departments, especially obstetrics and gynecology. Moreover, relatively speaking, gynecologists and obstetricians are stronger than female doctors in internal medicine. In particular, the older generation of doctors have no strength. To tell the truth, they can't move the forceps.

"I heard that dermatology can pay dividends directly?"

The director of Obstetrics and Gynecology pulled Zhang Fan and whispered around Zhang Fan. Aunt level director, Zhang Fan has no scruples.

"Yes, this will form a rule, who will benefit from R & D!" Zhang Fan also deliberately whispered to her.

Zhang Fan finished, and the director of Obstetrics and Gynecology gave Zhang Fan an unhappy look!

Zhang Fan is very angry. If you can whisper, I can't?

"Nothing yet. I went to the operating room. Didn't you have a baby today?"

"Well, if you don't say it, I know you are a leader. I just want to ask, can we pay dividends if we use a small Treasury and don't need the scientific research reserve?"

"All right, you still have research reserves. There are many doctors and nurses in your obstetrics and gynecology department. When the boss of the KTV opposite sees your doctors and nurses in obstetrics and gynecology department, he smiles like a pug. Do you still have money?"

I can tell you, don't fool around! "

If obstetrics and Gynecology get extra money, it is also quite convenient. The simplest prenatal physical examination is directly placed in the Department. People have color Doppler ultrasound and doctors, so it is much more convenient to intercept it.

"Don't worry, I won't dismantle your platform. I'll borrow some reserves first. We have a small scientific research on postoperative fat liquefaction this year. If it succeeds, I'll double pay you back." The director of Obstetrics and Gynecology said, pulling LV Shuyan.

You are like a tiger at home. You don't speak for me when you come out.

Fat liquefaction is common in all surgery, especially in burn department and obstetrics and gynecology department, especially in obstetrics and gynecology department. Many pregnant women have to prepare for a second child after caesarean section, but the fat liquefaction in the abdomen is like drooling. Is it white grease.

Zhang Fan listened and thought, "I don't want you to double the repayment. As long as it is effective, I will support it."

"Ouch, I knew our dean was the best. Do you think so, Dr. Lu!"

LV Shuyan snorted. The director was very angry and bit his teeth. He clearly agreed in the Department. As a result, if he didn't help here, he would drag his legs. If Zhang Fan was unhappy and Zhang Fan said he didn't borrow money, what should he do.

Zhang Fan hurriedly asked, "how much do you borrow?"

"Seven or eight million, not much, mainly..."

Zhang Fan turned and left, "what can be discussed, what can be discussed, OK, I'll bid. Maybe you can make a counter-offer!"

The director of Obstetrics and gynecology is worried.

"Five hundred thousand, the most! Say one more word and I'll leave. Don't think I don't know your idea. I'll give you ten million. Don't study it."

"Five hundred thousand is five hundred thousand. Alas, such a big Dean, the largest medical officer in the tea vegetable area, is still so stingy! When will it be given?"

"I'll write you a note. After that, go to the finance office and get it by yourself."

Zhang Fan didn't expect her to work out anything, but this kind of director seems to talk nonsense. In fact, they have been doing medical treatment for half their life and attach great importance to their reputation.

"Hey, hey, you wanted 200000, but you're still a thief. Open your mouth and ask for a bigger one. Otherwise, you directly asked for 200000. It's estimated that you can only give 50000!" The director of Obstetrics and Gynecology praised LV Shuyan while looking at the note.

With the explosion of antifreeze oil these days, other departments of the hospital know that their dermatology department can participate in the dividend. Obediently, Zhang Fan and Ouyang used to push and scold for scientific research one by one.

I can quarrel with you when I'm in a hurry.

But now one after another to apply for scientific research, really, the power of example is still very powerful.

Chapter 1518

"Zhang Yuan, please fly a knife in the outer court!" Wang Hong seemed to be watching in the crack of the door. As soon as Zhang Fan came out of the elevator, she jumped out.

"What surgery?" Zhang Fan pinched his hand and had too many operations. The joints of his hands were a little sour. He asked while doing finger exercises.

Zhang Fan extracted this health exercise from the system and taught it to hospital surgeons. The elderly scoffed at it and felt that it was a fuss. Young doctors believed Zhang Fan.

Sometimes, many patients feel strange when they enter the surgical building of the tea vegetable

hospital, because the young doctors are dazzled with Dharma rings in their hands. The patients once again confirm that this is the tea vegetable hospital, not the tea vegetable Taoist temple.

To tell the truth, the effect of this finger health exercise was general at the beginning, but it was absolutely useful to persist for years, because Zhang Fan knew that if he did not take care of his health now, he would not be able to escape the hands like his master and martial uncle. His fingers were stretched out and twisted like a rake.

"Spine!" Wang Hong pursed her mouth and smiled. Zhang Fan was very strange. What happened to this woman today? It's strange! Then he suddenly found that the woman was like an oil dish hanging on her face. Zhang Fan understood that Wang Hong was showing off.

Before Zhang Fan spoke, she said, "your teacher contacted you!"

"No way, don't be fooled!"

Don't mention that old man Lu is at home. Even if he is not at home, the old man won't get a flying knife for Zhang Fan. It's just a phone call to help. As for orthopedic surgery, the old man will never contact Zhang Fan.

Zhang Fan is deeply afraid that this woman has been cheated.

"President of Su provincial clinical medical college, is it your teacher?" Wang Hong rolled her eyes at Zhang Fan's back.

"Er! He, yes, is a teacher. What's the matter?" Zhang Fan said in his heart that depression is not depression. Anyway, it seems to be a feeling of being pulled to touch his ass. he obviously doesn't want to, but he has to tilt up and put on a good posture.

"A hospital in Jiangsu province wants to be promoted to the top three. Their key discipline is spine orthopedics, but so far, there is no typical operation that can be taken out, so I want to ask doctor Feidao to do it."

Wang Hong took the notebook and explained the matter to Zhang Fan.

Most people don't know about the upgrading of this hospital. It seems that upgrading is useless. If the hospital changes its name, will the technology of doctors in the hospital be improved?

In fact, after this upgrade, the fees, income, number of beds and subsidies will be increased. Therefore, in the years after 2008, a wave of centralized and explosive hospitals have been upgraded, and then people feel that they are the top three hospitals.

Many key departments of hospitals fail to meet the standards, and then ask for foreign assistance. For example, this time. Zhang Fan thought, "what did you say?"

"The other party invited you or your team to have an operation without hanging the name of the main knife and hanging the operation consultant. There are three spines in total. As for the cost, they said to discuss it with you in person."

After listening, Zhang Fan looked at the time and just went to work opposite. Zhang Fan called. People are poor and busy. No one asks. Zhang fan understands this. For example, in the past, when we were quarks, who knew who Zhang Fan was.

Now, as long as they come from a school, they are old classmates when they call. Is it difficult for Zhang Fan? When you graduate, I was still in high school. What kind of students do we have? As for Zhang Fan as a teacher, there are more.

Just as Zhang Fan swaggered and cheated under the banner of old man Lu, many teachers now flaunt Zhang Fan's banner. For example, Zhang Fan, the director of the Department of infection of Suzhou Medical College, who came to the tuberculosis laboratory this time, has never seen him before.

But when they met, they said, what did I give you? Zhang Fan thought carefully at night. Whether I skipped class or he didn't take undergraduates, it has become a pending case.

"Ha, Zhang Fan, I know you're busy, so I left a message for your office director. I think our public management students are better than those of niaoshi Medical University. Look at you, it's unprofessional to get an office director. Why don't you pick some of your own schools when? People around you still need to rest assured."

The dean of the Clinical College started talking nonsense as soon as the phone was connected. Zhang Fan also laughed and talked nonsense with him, and then got to the point, "you are an expert in spine research. You know that this kind of operation still needs the cooperation of the whole team, otherwise the risk is very high."

"I know, I know, how can I not understand? You bring your team here. Originally, they wanted to invite the Military Medical University over roujiamo. I gave advice. Why do you have to use outsiders? We have people.

Let tea vegetable Zhang Fan come here! Originally, they were not very happy. I made a guarantee by patting my chest. If our own students don't protect it, who else do they protect? "

Zhang Fan smiled helplessly, "you're right!" Anyway, Zhang Fan doesn't have the energy to argue with him in language. It's boring.

In fact, people's hospital just wants Zhang Fan to come over. According to the current status of the spine in China, although Zhang Fan is not a master's or doctor's supervisor, where Zhang Fan's spinal decomposition map is placed is his status.

It can even be said that in terms of spine, the head of shuitanzi's spine can talk about Zhang Fan. Other spine doctors can't say Zhang Fan. If they want to say Zhang Fan, they should recite Zhang Fan's decomposition diagram first and then be familiar with it.

Moreover, it is said that this decomposition diagram of Zhang Fan will be introduced into the textbook for master of spine next year.

When the hospital in Jiangsu Province wanted to find an acquaintance Zhang Fan, the president of the clinical medical school jumped out. I know, Zhang Fan, I know, my student!

If it's an ordinary operation, people don't have to find acquaintances. They directly found the tea vegetable hospital, but this operation is different. To put it bluntly, please take a popular examination. It doesn't matter if you are rejected. If it is publicized, it will be embarrassing.

Although this kind of thing is true in many hospitals, the superiors also open their eyes and close their eyes, but it's really opened by someone and it's in trouble.

That's why the dean of the clinical college came to find Zhang Fan. Zhang Fan muttered in his heart, "Hey, the world is going down day by day. Has even the professor started to help people find a hot hand?"

As soon as the Dean heard that Zhang Fan seemed a little hesitant, he directly said, "you don't have to worry about the cost. You're 100000 alone, and the others are 30000 per head." The Dean didn't say I won it for you this time.

This thing is the market price. It's much more expensive than ordinary throwing knives.

"OK, how can I contact you? Will you contact me or will I contact the local hospital?"

"OK, don't contact yourself. I'll fix it all. How many people do you come here?"

Zhang Fan thought for a moment and said, "there are six doctors, including me and three nurses. Just one person!"

"Why don't you take your daughter-in-law to visit your hometown and gather ten people together. Don't save them money. They have a lot of money."

Zhang Fan certainly won't do such things. How do you say this? If you take your wife, people will certainly not say anything, but they are absolutely uncomfortable. It's not about money, but that you don't respect people.

This thing, if the local hospital director gets drunk one day, he will definitely say, ha, tea vegetable Zhang Fan, what thing, throwing knives come with his wife.

That's ugly.

It was because of a box of broken cigarettes that Ouyang scolded him. At that time, he had a shadow in his heart, but also let Zhang Fan get rid of the bad habit of small eyes. Or not. If you want, go down and eat.

This is Zhang Fan's experience after being scolded by Ouyang.

"OK, add one. Wang Hong, director of the hospital office, is one."

After hanging up, Zhang Fan called the doctor respectively. First, he called the director of the anesthesiology department, "Lao Li, I have a job abroad and need an anesthesiologist. You can send someone."

As soon as Lao Li heard it, he quickly said, "is it abroad? If you go abroad, the Department has to hold a meeting, and then have an internal competition."

"Why don't you have a big competition? You too, either go abroad or ordinary domestic surgery."

As soon as he heard that it was a domestic operation, director Li discharged his gas like a needle stuck in a balloon. "Oh, according to the schedule, Qian Weiwei will go."

Because Zhang Fan's flying knife brought people a high income, at the beginning, Zhang Fan ordered soldiers and generals. Later, Zhang Fan thought about it. In order to motivate everyone, he handed over the quota of flying knife to the Department.

This right, the director of the Department can't give an order to directly designate it. If it is directly designated, the doctor can make trouble in front of Zhang Fan. Some departments say drawing lots, while others say scheduling.

Drawing lots certainly won't work. Even if the department agrees, Zhang Fan won't agree. I want you to work hard. You give me a lie and win.

Drawing lots is not good, and scheduling is not good, so we get a performance point. Whoever has more

operations, fewer surgical accidents, more scientific research papers and better teaching directly form a coefficient table like bonus.

This is going abroad. As for domestic, the competition is not so fierce. Generally, the director calls the roll to see the doctor.

"OK, just Qian Weiwei. Let her come over."

Then call orthopedics. Orthopedics, "find four doctors, domestic flying knives. Four orthopedics, one in one department, preferably spine doctors."

After a while, Wang Yanan, Xu Xian, Zhou Guofu and the new master Yang Weidong came to Zhang Fan's office.

Anesthesiologists, surgeons, and nursing.

Zhang Fan called the director of the nursing department.

The director of the nursing department even wanted to go. Zhang Fan rejected it. It's not that Zhang Fan is unwilling to take her. She will take the administrative route in the future. It's no use training her. It's better to train a little nurse.

In the afternoon, the air ticket was booked. Zhang Fan went home and said something to Shaohua, and then set out for Su province the next day.

The throwing knives in Jiangsu Province are messy, just like the fighting methods of major powers here. The oncology is monopolized by the doctors in the capital, and the urology is monopolized by the Military Medical University of rougamo.

The mind is three rivers, and the battlefield is directly outside the brain. The doctors invited by major hospitals are different.

As for orthopedics, shuitanzi almost monopolized the Throwing Knife of China, but now because of Zhang Fan, orthopedics estimates that shuitanzi will not come to the northwest in the future.

The airports in China's major provincial capitals are estimated to be the farthest from Suzhou. At that time, the airport was military. Later, it was eliminated to the local government and continued to be used.

After getting off the plane, Zhang Fan smiled because he saw the slogan, "welcome the tea element medical expert group to our hospital for investigation and visit."

How can I say this? I feel like I want to be the number one in the flower building and hang a chastity archway.

Chapter 1519

"Zhang Yuan, ha ha! I've heard about you for a long time. It's a pity to meet you. I finally saw you today."

The dean of Sanyi promoted to the top three, affectionately took Zhang Fan's hands, shaking and shaking, soft and warm hands, which made Zhang Fan feel like holding the hand of a fat woman.

Moreover, as soon as Zhang Fan pinches the other party's hand, he knows that he is not from medical background, because the other party is almost 50 years old. If he is from medical background, his hand skin will not be so soft after decades of frequent hand washing with various disinfectants or alcohol.

After pinching for a long time, the finally gave up his hand. There were not many people to pick up the plane, just a few leaders and a few anti flag nurses. In the winter, Zhang Fan looked at the lost nurse after his frozen face, and felt a little sorry.

The winter in Lan City, how to say, is not very cold. Three snows a year, it is already a auspicious snow year. It's like a warm tempered person, but after standing outside for a long time, it can still be frozen through. If it's not cold, it's also northwest.

After getting on the bus, Iveco went straight to the city. In the other car, 120 miles away, several nurses chatted, "he is Zhang Fan, dark and young!"

"Of course he's young. He's with me. I'm from the nursing department and he's from the clinical department! He's an expert now, and I'll carry the flag to pick up people again. Hey!" Another nurse said with emotion.

There were many people in the car, and Dean Sany didn't say anything specific. He chatted with Zhang Fan. He was very talkative. From the experience of hospital construction, he talked about the training of doctors, and from the training of doctors to the upgrading of the hospital.

Zhang Fan felt that he was very professional, just like the tea vegetable hospital was wild raised by himself. Of course, Zhang Fan certainly won't say how many billion a year our hospital's revenue, let alone that our hospital's laboratory is still National.

People pay for this thing. It's not a customer. Fortunately, in the end, Dean Sany said, "we still have great shortcomings. Zhang Yuan must give good advice at that time."

After entering the urban area, they didn't go to the hospital first. They directly took Zhang Fan to eat first. Zhang Fan looked out the window at the familiar and strange city, and his heart was a little in a trance. The car stopped at a small building on Binhe Road along the Yellow River.

The diet in Northwest China is not very different, which is characterized by beef and mutton. This small building is located in a remote place. It is also beef and mutton with a special beef noodles. But there were four circles at the door. Zhang Fan understood that this place was mainly engaged in hospitality business.

The box has been reserved for a long time. It's antique. Zhang fanxin said, do you want such a grade for selling beef noodles now?

In fact, although Zhang Fan is from Lan City, he was an ordinary student in this place and didn't know much about the high-end catering industry. Like many cities, the remote location of some catering industries can be surprising, but the business is very good. The mystery in this is not understood by Zhang Fan who hesitated to add eggs to beef noodles.

"Zhang Yuan, rest in the afternoon and start the operation tomorrow?" Seeing that everyone was almost full, Dean Sany smiled and said to Zhang Fan.

Zhang Fan thought about it. There are three operations in total. If they start tomorrow, they will stay in Lanshi for one night. It's better to do it in the afternoon.

He looked at his colleagues who had put down their chopsticks and asked, "are everyone tired?"

"Not tired!"

Then, Zhang Fan smiled and said to Dean Sany, "we'll listen to the dean's arrangement, but if you can start the operation in the afternoon, you must be very busy at the end of the year."

Dean Sany hesitated, "is time a little urgent?"

Zhang Fan was stunned and then looked at Wang Hong.

Wang Hong doesn't know if she was opened today. She even has the feeling of knowing something. "Dean, in fact, this kind of operation is a routine operation in tea vegetable hospital."

Then he stopped saying anything, bowed his head and pretended to drink tea.

"Nonsense, she's not clinical, she doesn't understand. It's supposed to be cautious, but we made a lot of preparations in advance."

As soon as he said this, Dean Sany's face changed, but he still said with a smile: "I'm also grateful that hospital Zhang can have such support for our work. In that case, I'll inform the operating room and the Sixth Department of spine, and we'll start this afternoon?"

"OK, starting in the afternoon."

.....

"Have you heard? Zhang Fan came to the hospital to fly a knife!"

"Really, my God, after graduation, he just took off. Think about the eggs he sold in those years, Leng is one circle smaller than others."

"Why don't the students get together in the evening?"

This is a classmate in the internal medicine circle. The classmate relationship in the university is very strange. Most of them feel scattered when they walk.

For Zhang Fan, to tell the truth, most female students are not familiar. Now, they are in a trance.

Surgery is different.

"Zhang Fan came to your flying knife?"

"Yes. The Dean picked up the plane in person and went to Quanyang building. The leader just called to get ready for the operation in the afternoon."

"You said that in recent years, he has done both spinal column and tuberculosis, and he has become a disciple of an academician. Why didn't he see it before. Hey, don't say it. I'll change my dressing and make an appointment in the evening?"

"OK, you contact and call the students."

The general group of students is another scene, especially the students in Zhang fanlai's Throwing Knife hospital, "warmly welcome Zhang to Sany!"

In general, medical students joke that a dean and a director are actually ordinary doctors.

But now, Zhang Fan's family is really the president, but the president of a third class hospital, or a provincial hospital with a national laboratory.

The Dean shouted. To tell the truth, it's a little sad.

When Sany's classmates shouted out their arrival, other students in Lan City, especially male students, were very enthusiastic. Even good things have begun to organize. Fat students in Yunnan and Guizhou and those with private hospitals at home also shouted, "group up, group up, set a time and I'll fly over."

"Why doesn't Zhang Fan speak? It's a little cold!" A female classmate didn't know what to think, said a sentence in the group, and then circled Zhang Fan.

Suddenly no one spoke to the bustling crowd.

At this time, the students in Sany orthopedics spoke, "Zhang Yuan has entered the operating room."

Then followed by a sentence, "I, NIMA, our director personally started disinfection. I went. I haven't seen the director take the initiative to disinfect patients since I entered the hospital. I went. Today, I took the initiative to disinfect Zhang Fan."

In fact, the students don't feel deeply about Zhang Fan's current achievements. After all, they are still young and still have an upward momentum in their hearts.

It is these directors who really understand Zhang Fan's achievements. It is absolutely no exaggeration that the director of orthopedics in Sany hospital, a capital city, will have a place in any city.

"I'll go. Today's cosmetic surgery is a little powerful. The vice president also had surgery! God, the vice president put on the operating suit for Zhang Fan. You don't know that when Zhang Fan entered the operating room today, the spine surgery department of the hospital lined up in the operating room to welcome him."

For small doctors, not to mention the Dean, even the director is the position they can only dream of.

"What are you doing in the operating room?" It was the lesbian who had a sense of superiority.

"I was selected to observe. There were more than a dozen doctors in the Department, and the resident chose me. I think our director..."

"Does your director know that you are Zhang Fan's classmate?" When the female classmate's soul asked, there was no one to speak in the group.

After entering the hospital, Zhang Fan, accompanied by Dean Sany, went to see the patient first. Sany hospital in the provincial capital city also has their sadness.

Hospitals at this level can become local reputation hospitals in other areas that are not provincial capitals. But it's different in the provincial capital. There is no shortage of ordinary patients, and even

there are not enough beds.

But there are few patients with a little difficulty. As soon as people ask, they turn to the third class hospital.

Therefore, for the three surgical patients, the hospital not only invited surgeons, but even patients were paid for.

This is no exaggeration. For example, the hospital will subsidize certain nutrition expenses in addition to all the expenses of the patient's treatment.

This is a little bit, three students do evil, magistrate attached to Guo, full of evil attached to Guo's capital.

Zhang Fan didn't have time to chat with his classmates. When he arrived at the hospital, he first checked the room of the patient in the ward, accompanied by the dean of Sany.

Preoperative physical examination, many Throwing Knife doctors do not pay much attention, and then when something happens, they can't cry if they want to cry.

At that time, there was a joke that a general doctor from a third class hospital secretly touched the county for surgery. Because he was anxious to go home, he didn't make rounds, and then there was an accident after the operation. It's hard to say who was responsible.

But the hospital compensated 300000 to the patients, and the matter is not over. The dean is also a person with a strange brain circuit. He suspended all the surgical doctors, and then asked them to go to the third class hospital and the throwing knife doctor to pay compensation!

It became a joke.

Physical examination, Zhang Fan personally started, and the doctors in the spine Department of Sany hospital stood by and watched.

Some people are not convinced. They think that Zhang Fan is young. Maybe he is a good teacher, so he has today's name. But he doesn't think about it. Teacher Zhang Fan doesn't make bones. He plays with his intestines.

"He has a hand in this physical examination!" The vice president of business said in his heart gently. As for the younger doctors, they can't feel the depth of this skill. They only know that Zhang Fan seems to be very trivial.

After the physical examination, let Wang Yanan explain his condition to his family. Zhang Fan also needs to see the doctor's advice, then enter the operation, and then wait for anesthesia and disinfection. Zhang Fan also needs to seize the time to see the various examinations on the light switch.

Every operation, although not desperate, is absolutely all-out.

Chapter 1520

As soon as he entered the operating room, Zhang Fan was different. When he was outside the operating room, Zhang Fan was easy to talk, and even didn't express his opinions, let alone discuss the comparison with Dean Sany in their respective hospitals.

But when you enter the operating room, put on a green hand brush suit. After soaking your hands in iodophor, it's like a different person standing at the door of the operating room. Where Zhang Fan stands quietly and doesn't speak can make people have a kind of pressure.

The vice president of business was originally sitting in a high chair looking at various image examinations hanging on the film viewer, but after Zhang Fan stood at the door, he didn't know what was wrong. He subconsciously came forward and put on the surgical clothes for Zhang Fan himself.

This is a momentum.

"Disinfect it!" Zhang Fan was not polite. When the vice president dressed Zhang Fan behind him, Zhang Fan said to the assistants in the operating room.

The vice president dressed Zhang Fan. The spine director looked and quickly began disinfection.

"The spectrum is very big!" The doctor who didn't enter the observation room whispered outside.

Because the doctors in LAN city did not say that 100% of them graduated from Jiangsu Medical University, and 80% of them graduated from Jiangsu Medical University.

It's a bit like foreign monks like to chant scriptures. If you come to an expert in the Jishuitan in the capital, they won't say spectrum, but they will say: Wow, an expert is an expert.

It should be because there is always an unspeakable distrust in their hearts.

"President Wen, let's do this operation first. Please help me stand on the stage. For the operation tomorrow morning, please help me. For the operation in the afternoon, let director Zhuang help me.

Do you think so? "

Zhang Fan's words are polite, which means that you learn the first operation first. Tomorrow I will take the lead in your two disciplines to do it hand in hand.

The vice president nodded and said, "OK, just listen to Zhang Yuan."

"OK, prepare for the operation and follow the routine!" With that, the assistants on the operating table have been in place.

One is Zhou Guofu, the other is Xu Xian, the third is Wang Yanan, and Yang Weidong is on standby.

When Zhang Fan said he was ready for surgery, the catechin team immediately changed. Qian looked up slightly and said, "after anesthesia, the patient's vital signs are stable. You can operate!"

"Good!" Although Zhang Fan's eyes are now looking at Qian slightly, he still replied. This is not modesty, let alone politeness, but a professional norm.

It's like passing scissors. It's clearly in the other party's hand. You have to press down to let the other party feel your own strength and feel the other party's strength. Confirm that the handover is completed.

It's about the future income of the hospital and the promotion of his position. The dean of Sany is in the observation room. Although he can't understand it, looking at the preoperative preparation of the tea vegetable team makes people have a rigorous beauty.

"In fact, our operating room can do this in the future. It looks very standardized!" After that, the other doctors looked at each other. Their eyes were full of the feeling of lying to the dog. They thought it was Zhang Fan's performance again.

The deputy director of the spine Department said, "it's a little too formalistic."

The Dean secretly remembered the deputy director.

Under general anesthesia, the patient's back was all open and covered the corner of his head. At a fierce look, he was really like a lying white pig in a meat case.

When a group of people in the operating room saw the operating nurse open the instrument, they were more and more surprised, "what brand of instrument is this? Why haven't I seen it?"

Someone looked on his feet.

"This is customized. Do you see the unique logo of Johnson & Johnson orthopedics!"

"I'll go. It's a real customized model. This word is bigger than the logo of Johnson & Johnson orthopedics. It's estimated that it's very expensive. The customized model of Johnson & Johnson orthopedics is obedient. According to the temperament of Johnson & Johnson orthopedics, it's estimated that no one can't get it? Being the Dean really makes money!"

"If I become the dean in the future, I'll get two sets, one at home and the other in the operating room!"

A good tool is really a treasure for a surgeon. In the past, Zhang Fan had an operation and specifically explained it to the nurse. Don't let a bunch of bastards use my equipment to death.

With the establishment of the Institute of orthopedics, Zhang Fan doesn't worry. Although others don't have unique signs, they are all the same instruments. Zhang Fan won't hide them. If the orthopedic doctors of Sany hospital know, they probably don't want to go to work.

"Sharp knife!"

"Sharp knife!" The nurse repeated and slapped the assembled knife handle into Zhang Fan's hand.

After receiving the knife, Zhang Fan didn't have to think about it. He started directly, put the tip of the knife into the meat, and then cut the patient's back muscle without a sound from head to tail vertebrae.

"Doesn't he need to make a plan in advance? I'll go. Is this too big?"

In many operations, before the operation, the doctor will draw a curve of the operation in the future with gentian violet.

Zhang Fan doesn't need it. This kind of operation is engraved in his mind like a brand.

At the moment of opening the skin, all the assistants started directly without talking like the power switch was turned on.

Slowly open the muscles and fascia. The doctors on the operating table didn't communicate a word.

"My God, this operation is so weird. They don't even communicate."

"Don't you dare to go to Liangshan Mountain without some skills? Don't talk. Look carefully. Don't think what you think. If someone can fly a knife and can be specially invited by the hospital, he has the skills of others.

You don't have much skill and a lot of strange words. Can you do this kind of operation? If you can't do it, shut up and show me. "

The deputy director couldn't listen, so he turned around and cleaned up the young doctor behind him.

For a time, the observation room, which was a little noisy, was silent. Although everyone stopped talking, they scolded in their hearts, "you can, why don't you go? I've only graduated for a few years. Your TNN's are about to retire and can't do it. Have the face to say that I'll definitely do better than you in a few years."

The Dean looked at the unconvinced people below. He looked at the deputy director with an iron face. The idea that he had given up had been changed. "It's still good to let this be the director after the top three is upgraded. At least orthopedics won't last forever in the future."

Because they are skilled staff, although Wang Hong said that this kind of operation is a routine operation, which is a little exaggerated, there are still a lot of tea and vegetable operations, especially after the establishment of the Institute of osteology, there are so three or four operations every week.

Cut open the tendons and protect the blood vessels and nerves. When entering the bone part, the surgical field of vision is like a work of art without a little bleeding. The surgical field of vision is clean like a yogurt bottle licked by a girl with a long tongue.

When muscle fat is separated, the spine appears. Most people have no concept of this. People who don't have spinal surgery can't understand this situation. It's difficult to find a similar one.

For example, when killing pigs in rural areas, this thing is separated from the belly and then split in half from the inner layer. The spine is cut from the middle, so it can't be understood completely. More similar is the dinosaur fossil. When looking at the dinosaur skeleton from the back of the dinosaur, the white bone stubble stands on the back.

The human spine is about the same, but it has shrunk many times.

Separate the muscle tissue and vascular tissue, and the operation is the real beginning. The bone knife opened and closed in Zhang Fan's hand. In the observation room, Dean Sany looked pleasing to the eyes, "is this right? This is the operation. What's the thin in front? I don't have a look."

He doesn't understand. The human tenderloin is on pigs. Many people like to eat it. It's delicate!

But it's different in people. It's called erector spinalis. It sounds like a child after getting up in the morning. Once this muscle is damaged, the bone is repaired, but it's useless.

Many people have problems with their lumbar spine. Doctors will recommend strengthening the strength training of lumbar muscles. This is not to make you stand up in the morning.

This is to strengthen the muscles and replace part of the function of the lumbar spine.

Therefore, after many lumbar surgery, whether it's CT, MRI or X-ray, I feel that the patient's bone is OK, but the patient's waist is still sour and soft, like playing seven or eight times last night.

In fact, this is the doctor who injured the erector spinae muscle.

The layman's dean watched a lively, while in the operating room, the elites in one side of the Department watched the scalp numb.

Card, under a bone knife, the slightly beating spinal cord is about a centimeter or two. When card goes down with a bone knife, it seems to be cut on the spinal cord.

To tell you the truth, the sweat is down.

Every time the knife rises and falls, it's like a roller coaster, but other assistants in the operating room don't say a word. The doctors watching the operation can only hold it, endure it, and their scalp is numb.

The sound of click, click, click is like a midnight bell in this silent operating room.

The door of the operating room has been filled with doctors from other departments.

"I'm NIMA. A carpenter is a carpenter."

"This is my classmate. Alas, people are throwing knives. I also lift my legs and push my hips!"

Then, after shaping, the titanium plate is placed on the adjusted spine edge of Zhang Fan, which fits perfectly, and even doesn't need orthopedics.

"So it is, so it is!" The business Dean finally figured out that the fixation between the spine is the most important step.

And others, still like Zhang Fan, what did he do? Why did he suddenly become a perfect match?

When the titanium plate is put into the spine, both sides of the spine are like naturally formed metal bones, stably shining on the side of the spine.

The doctors in the observation room responded, "I'll go. The operation is finished!"

And Zhang Fan, their team, from the beginning of the operation, except that Zhang Fan would speak simply when handing over the instruments, the whole team didn't say a word.

"This is the operation!" Although I didn't understand it, at this time, most doctors understood why Zhang Fan was invited to fly a knife.

awesome.
