

Chapter 1536

On the plane flying to tea vegetable, Zhang Fan sits in the middle. Wang Yanan is near the window. On the other side is a West Asian man with a stomach like a pregnant woman. Sitting next to him, Zhang fan can be proud. He is whiter than him!

The round-trip air tickets were booked by SANY hospital. Although the time was changed several times when I went back, the dean of Sany didn't say a word of impatience. Moreover, when I left, although I knew it late, people still tried to buy two first-class tickets for Zhang Fan.

Just then, I was embarrassed to say that I knew it was late. If I could get a little earlier, I could get more first-class tickets! Very polite.

When Zhang Fan flies a knife, he never takes first class. This is not only Zhang Fan's habit, but also an unwritten regulation within the industry.

However, there are many cases of non-compliance. For example, some doctors don't know how to travel technically, but the travel license is really large. They don't take non first class seats, and they can't pick up planes without luxury cars.

Really, although he is going to operate on people, this kind of problem is indirectly making the patient worse.

A doctor with real character is just like ordinary people. He doesn't even take care of it. Just take the ordinary cabin of the plane. You can have a guide when you pick up the plane. You can't see the clothes. He is the top doctor in China.

Some people can't. They think what they should do when their level is so high. In fact, looking at the old man Zhong sleeping in the dining car, they understand that sometimes when some things reach a certain level, they will really be indifferent to things outside their body.

That is, the hospital pays, otherwise Zhang Fan will push it off. This thing is the same as a broken condom. No matter how big the hole is, as long as there is one, it will lose its bottom line.

First class Zhang Fan gave up to Wang Hong and the older nurse. The nurse had nothing to say. Although she was not an instrument nurse this time, Zhang Fan went on the operating table. Zhang Fan was responsible when he was on the stage and someone else was responsible when he was off the stage.

I'm really going all out. I'm afraid of making some mistakes. Every week, the old nurse looks older than before.

As for Wang Hong, it's mainly because this guy, in order to save face for Zhang Fan, cleaned up the same as the chairman of the listed company and asked her to sit next to him. Zhang Fan felt a little too eye-catching.

After the plane was a little stable, several doctors were like winding up at the same time. They all lay down in their seats and fell asleep. They didn't even need a little brewing. They just lay down.

Wang Yanan, in particular, not only drools, but also snores. Although Zhang Fan sitting on one side doesn't drool, there are still some snoring, mainly because the airline tinima can do business. The chair is narrow and bent when lying down, but that doesn't affect Zhang Fan's sleep.

The plane flying directly to chasu in LAN city is a passing plane, which comes from magic capital. There are many southern accents on the plane.

To be honest, the volume of local businessmen in front of businessmen in Jiangsu and Zhejiang, the magic capital, is the same as playing at home.

For example, a Stan country in the southwest of tea is rich in tin decorations, such as flower bottles and plates, and then inlaid with all kinds of cheap gemstones. It looks more expensive than tota old linata.

As a result, a village head who made tinned leather in Jiangsu and Zhejiang came to see that this NIMA was so easy to make, and then it was terrible. He directly hanged this traditional craftsman of Stan country.

This thing from Jiangsu and Zhejiang is cheaper than theirs. It's of good quality and more gorgeous. It's colorful in the sun. It's directly the baby born.

There is a woman boss sitting in the first class of the plane. Needless to say what she was wearing. When she stretched out her hand, her watch was full of diamonds. Wang Hong kept pulling her sleeves.

As soon as I raised my head, the Pearl Necklace in my neck was bright, just like Sha Wujing's necklace. But you can't see it with your hand. Although all kinds of jewelry are rough, it's like a man's hand.

Although all kinds of maintenance, it can still be seen that a lot of heavy work was done in the early years.

After comparison for a long time, it is estimated that the watch in others' hand will make Wang Hong bankrupt, but Wang Hong just shrunk a little, and then suddenly felt that she was a cadre or a deputy

department level! This time, I'll make up for it.

I don't know why. It's strange that two people compete with each other secretly when they get on the plane.

The female boss brought two children, the older about three or four years old and the younger about one or two years old. Small head with cooling paste. It is estimated that she has caught a cold. The female boss seems to have caught a cold, too. She mumbled and asked the stewardess for a thermometer.

Sometimes I have to admire the businessmen in Jiangsu and Zhejiang. They can really bear hardships.

If Zhang Fan, it is estimated that at least he will not start until he is in good health or his children are in good health. He can't make enough money.

The older children seem to be all right and naughty. They run around and make Wang Hong frown very unhappy.

The stewardess also persuaded the children to sit down and let the parents watch. The female boss promised, but she didn't take much action.

Just then, the plane bumped, the child plopped and fell.

The stewardess was worried, but the female boss didn't take it seriously.

As a result, the child cried, and then when everyone looked over, they found a small white metal ball left on the corner of the child's mouth. And there's a broken thermometer on your lips.

The female boss was frightened when she saw it.

When Wang Hong saw it, she was also frightened. The thermometer broke.

Just as the female boss was about to hold the child, Wang Hong immediately got up and shouted, "bow your head, don't move!"

Then he hurried to the child and pinched the child's mouth. The blood was mixed with glass. The female boss saw Wang Hong pinching her child's mouth. When she was about to tear it, Wang Hong shouted.

"Zhang Yuan, Zhang Yuan, the child has mercury in his mouth, and there are wounds in his mouth. Zhang Yuan, Zhang Yuan, don't sleep!"

Zhang Fan was awakened by Wang Hong's loud cry, and several other doctors were also awakened.

"Hijack o machine?" The West Asian men who couldn't understand the words immediately sucked their

belly and huddled together to show that they had no money and were honest.

Zhang Fan got up and jumped out across the West Asian man, and then ran to the child in two or three steps.

"I'm a doctor! Come on, eggs, vacuum cleaner, Xu Xian, equipment!"

The curious passengers looked around, and some people said, "this is also a food product. The child's mouth is rotten, and he still wants to eat eggs!"

The person next to him gave him a white look, as if to say, "don't understand, don't beep!"

"There are no eggs in our cabin!" The young long legged stewardess is almost crying. What's this called!

The female boss reacted. When Zhang Fan shouted for eggs, she became angry. NIMA, what doctor, a charlatan, asked for a sister's eggs now.

When she was about to grasp Zhang Fan, Xu Xian opened the instrument box like a suitcase. With a slap, the box opened and closed again, and a simple small operation platform appeared.

When she saw all kinds of long and short matte instruments in the box, the female boss knew that this was really a doctor.

"What's the matter, what's the matter with the child? Is it badly pierced?"

"It's not strong, but there's Mercury in the thermometer!"

A middle-aged stewardess, presumably the leader of the shift, came with a simple vacuum cleaner.

"Suck around quickly. Who has eggs? Raw eggs!" Zhang Fan said as he began to wear rubber gloves.

Xu Xian also cooperated quickly. While taking Zhang Fan's hand, he continued to hold the child's mouth, let the child lower his head, and took out the cotton ball. Wang Hong also quickly entered the position of the nurse, and the blue hole towel was quickly spread on the child's face.

The little boy was crying, but he could see all kinds of bright pliers, and then his mouth was pinched by Xu Xian. Looking again, Zhang Fan took out the pliers and tweezers, and didn't even dare to make a sound.

The huge eyes are a kind of panic. He knows that these are doctors who dare not make trouble and will be injected again. Therefore, in addition to the eyes trying to see their mother, they are super cooperative.

Every household has a thermometer, an old-fashioned glass thermometer. Be careful not to play with

children. Mercury is not afraid to swallow a small amount. Go to the hospital and the doctor can find a way to get it out for you. It's terrible because it's afraid of breathing into the lungs or blood.

Zhang Fan, why are they so nervous? Because the child's mouth is scratched. Once Mercury enters the blood vessel, it's a big trouble.

People who have taken drops know that the air needs to be discharged. In fact, a small amount of air into the blood vessels is not a problem, but a slight excess can form air thrombosis. If this thing goes there, it will be blocked.

For example, into the brain, cerebral infarction! Into the heart, myocardial infarction, into the lungs, pulmonary embolism, these are fatal things.

And mercury, it's better than air. Not much, just a little, give you a block on the key node, and it will kill you directly. Moreover, it can also cause heavy metal poisoning.

If the quantity is large, this thing will definitely make your life worse than death.

Therefore, if the mercury thermometer is broken at home, first open the window and ventilate, and then don't pinch it with your hands. After ventilation, gently take it away with objects such as hard paper. If there is sulfur powder, you can sprinkle it on the ground to make it react. Remember, the most important thing is ventilation.

"I have, I have raw eggs. I caught a cold and wanted to make egg water..."

"Thank you!" Wang Yanan took all the eggs and ran away. Like the relay race, the other party didn't speak.

It's not that Wang Yanan is impolite, but that she can't be polite at this time!

One by one, the broken glass was cleaned out by Zhang Fan. "Shut up and try. Does it hurt? Does it hurt like a needle?"

Zhang Fan looked at the naughty child and asked. The child shut up, turned his tongue, shook his head, and then turned his head to see his mother.

As a result, Xu Xian opened his mouth again. The head didn't turn around. The child's eyes were full of tears, but he didn't dare to cry. Yes, I can't cry.

The two male doctors are as ferocious as hell, especially the positive doctor, who is black ball, feels that he will be injected soon.

Pinch open the child's mouth, and then the egg white is stuffed into the child's mouth, "swallow!" The egg white of four or five eggs is fishy. I don't know whether it's fishy or not. Anyway, the child who never

eats eggs quickly swallowed it with a clever face.

Even a little clear liquid flowing out of the corner of his mouth quickly sucked it into his mouth like snot.

According to the normal situation, the best way now is to induce vomiting, but there is no way here, and the child's mouth is broken.

This is very difficult. Vomiting can make mercury flow out, but mercury can also enter the blood. Therefore, we can only use high protein food to enter the abdominal cavity and combine it with mercury.

"After the plane lands, go to the hospital with us! It's best to have a recheck!" Zhang Fan said.

"What's the matter with the child? There won't be any danger?"

"It's estimated that there was no blood. The child jumped on it. I looked at the bottom of the thermometer. It's outside! But I still have to go to the hospital for safety."

Zhang Fan said to the child's mother as he took off his gloves.

Xu Xian also let go of the child. The child slipped into his mother's arms, then stuffed his head into his mother's arms, peeped at Zhang Fan and burst into tears. His little finger secretly pointed at Zhang Fan and cried.

At this moment, there was applause in the cabin!

Chapter 1537

After treating the wound, Zhang Fan and them couldn't sleep at all.

"Young man, are you married? Which hospital does Nu work in?"

"Big girl, what kind of doctor are you? Look at the medicine I take. I don't have a manual!" A rich old lady lay on the seat and handed Wang Yanan a box of medicine.

Wang Hong and the rich woman used to get on the plane. They were like cockfighting, but now they are different. The child is lying in Wang honghuai. The rich woman even gave Wang Hong a fist sized pearl necklace.

Wang Hong really wants it, but she doesn't dare

Although Wang Yanan wanted to continue to sleep, he still took it and took a look at aomao's cod liver

oil!

The medical industry is very similar to other special industries. Once there is any achievement, it will be held in the hands of the people. However, how to say this thing? Just like living, in most cases, there are few special cases.

The rest of the day is a trifle.

The plane landed on the tea plant smoothly. Lao Chen had already waited at the airport with the government's Koster.

To tell the truth, the tea government is now using a flattering attitude towards tea hospitals, which is not exaggerated at all.

For example, in this pharmaceutical factory, Zhang Fan said to take the tea vegetable government to play, and the tea vegetable government was happy. Some people shouted out: does Zhang Yuan need us to move? The government building will be given to you if necessary.

Now, let alone borrow Koster, Lao Chen can drive out even car No. 1. However, Lao Chen is more stable. If Wang Hong goes, he may really get car No. 1 for others.

Old Chen used to have a smiling face, but when he saw Xu Xian and Wang Yanan Qian Weiwei carrying a child, old Chen cluttered and looked again. Zhang Fan's face was calm and his heart was a little better.

"Go back to the hospital first!" Zhang Fan didn't say much. Koster's driver flew into the hospital.

As soon as the X-ray is taken, a metal dot in the child's stomach, "eat it!" The director of the radiology department glanced and said to the rich woman.

The child got off the plane for inspection, and then lived in the children's Institute. "Mom, my ass hurts!"

After the child gave the medicine, he went to the bathroom six or seven times an hour. The rich woman's mother took a small stick and dialed it over and over

Every time I dial, I have to ask the doctor to come and see me! After tossing for a whole day, I saw a

crystal clear metal ball glittering in the child's feces.

.....

After Zhang Fan explained, he went home first.

Old man Lu and the old lady were at home early. The old lady helped Shaohua cook. "It's still popular. Professor Li in LAN city called."

"Of course." Zhang Fan said with a smile.

"I didn't expect that Su Da wanted to award you an honorary doctor. It's still poor!" Old man Lu had some feelings.

Zhang Fan said reluctantly, "the experiment has yielded results!"

Old man Lu glanced at Zhang Fan without refuting. As long as Zhang Fan is willing to engage in scientific research and make him proud, be proud.

"The data of gallbladder cancer is still not enough. I called your martial uncle. I can't go to the capital after the new year." Old Lu said a word to Zhang Fan.

The remote area is good for Zhang Fan. Not to mention the others, as for the attitude of the tea vegetable government towards the tea vegetable hospital, you should try to put magic on it and don't beat your shit out. What a big card of your hospital.

But there are also disadvantages, that is, the lack of population base.

"The affiliated general hospital of Lanzhou wants me to release the research direction of gallbladder cancer in their hospital!"

"They? The level is not enough." Lu Lao thought.

"They promised me that as long as I was willing to release directions in the affiliated general hospital, they would apply for government subsidies to let hospitals above grade 3B help us collect data."

"Oh, you're cheap! I said how to come back with a smile on my face. So it's the same thing."

"You have to help me to the platform. If you have time, you should also come."

"OK, I can still be worth so much money. The platform is the platform."

After dinner, the old man and the old lady went for a walk. Although tea is cold in winter, it is not dry.

It's good to eat and walk.

After Zhang Fan helps Shaohua clean up, Zhang Fan and Shaohua are tired of being together. "Didn't you go to see your old lover?"

"See what you say, you can see me!"

"Nonsense, there are many people who like you, but you can't see it!"

"Come on, let's not be intoxicated with ourselves. I didn't buy anything for you this time. There are no specialties in Lan City, but someone gave me a picture. Have a look."

In recent years, there are still many good things given to Zhang Fan by others.

For example, in the earliest days, when going to the grassland, the Lama gave Zhang Fan honey wax. Zhang Fan felt gloomy, but Shaohua said it seemed very valuable.

But Zhang Fan didn't really ask anyone how much it was worth. This thing is a memorial to commemorate the difficult days of those years.

As for the rest, in fact, it is purely a nature of adult collection.

Zhang Fan smiled and took out the painting sent by Dean Sany. Shaohua opened it and had a look.

"Hey, hey, black donkey!"

"Let you laugh at me!"

After a while, Shao Hua checked that it was painted by a painter from Jiangsu Province, but now it is in the capital Academy of fine arts.

Zhang Fan and Shao Hua can't tell whether the painting is good or not. Anyway, the black donkey grinned as if he was very happy.

The next day, because it was a weekend, Zhang Fan didn't go to the hospital and drove to the farm with Shaohua.

To celebrate the new year, we have to pick up the four old people. Although they don't live together when they return to the city, they are closer after all.

Moreover, some ingredients should be prepared for the Spring Festival. In previous years, Zhang Fan and his family just got some food for themselves. Now major supermarkets are also open all the time. They can buy what they want when they go out.

But this year, we have to prepare a little. Many departments are ready to come to Zhang Fan's house to pay a group visit. Because Zhang Fan doesn't receive him alone, it's very embarrassing, so I don't know what Ouyang said, so I'll pay a group visit directly.

There is more atmosphere in the farm than in the city.

In particular, this year's Lavender has been collected at a high price. The farmers do not know that it is easier to count farmers as workers.

Because of Zhang Fan's relationship, the price of lavender was not cut by two dealers.

When Zhang Fan came to the farm, the political commissar and head of the farm came to visit with some of their own chickens and fish.

It's actually to thank Zhang Fan for visiting.

Shaohua's father looks proud and resolutely refuses to accept things. With the days getting better and better, Shaohua's father can no longer be satisfied with Zhang Fan, especially his nephew sells steamed stuffed buns in the tea vegetable hospital. Other relatives in the family respect Shaohua's mother and father more and more, which makes the old man defend Zhang Fan.

Their own pigs and chickens cleaned up all day. Corn fed pigs have compact meat.

In particular, the sausage made by Zhang Fan's mother-in-law is cut into a piece, which is slightly oily. Light oil flows out of the fat and thin meat, which can make people drool.

In particular, I don't know when to start. Chinese people have been brainwashed and don't eat this. They think they are people with poor living standards.

In fact, this is what people who have been paid IQ tax think.

Pig blood is really a good thing. Especially after enema, it is nutritious and delicious.

Cut into blood intestines the size of a chess flag, fry with a little lard in an iron pot, mixed with the smell of scallion flavored protein. Really, it's a kind of enjoyment.

This stuff is rich in iron, a lot of protein and trace elements. Especially for some adolescent women, it is a good food for beauty and iron.

When he came back, Zhang Fan drove Shaohua's pickup truck and Shaohua drove kuluze. It was strange. When Zhang Fan was away, Shao Hua drove a pickup truck carrying tons of goods, and nothing happened.

When Zhang Fan came back and pulled something in the car, Shaohua's technology was out of order!

On Monday, just after Zhang Fan entered the hospital, President Mo waited for Zhang Fan at the gate like a hound. Steamed stuffed bun and milk tea.

"You said you were such a big boss that I was embarrassed." Zhang Fan got out of the car and said with a smile when he saw president mo.

"Lose someone. My biggest business now is in the tea vegetable hospital. I come to work by day."

"How about sales?" Zhang Fan is busy with surgery these days and doesn't worry about the business of antifreeze oil.

To tell the truth, Zhang Fan always thinks this thing is not worth a lot of money.

"It's back!" After taking a sip of milk tea, President Mo began to report to Zhang Fan.

"The anti freezing oil task of the army has been completed. Now the goods in the first tier cities have been rolled out. It is estimated that there will be another wave of sales climax before the Spring Festival, and it is expected to slowly enter the trough after the festival. I think the hospital should develop what to use for another summer, such as..."

"OK, you talk to the dermatologist about this. I don't support or oppose it. If you want to continue the research, you can, but you can't get cheap from the hospital. You have to pay for the use of the laboratory and consumables. You can do it yourself."

Zhang Fan interrupted the other party and drew a line directly.

"Zhang Yuan, as long as you don't object, we have contracted for experiments."

"Hey, it seems to have made a lot of money?"

"Hey, hey, it's average. It's more than 30 million excluding the cost!"

"Oh. Yes, I'll divide half and the rest according to the original agreement!"

"OK, I'll wait for you."

Mr. Mo left in a hurry.

Zhang Fan didn't take it seriously. How to say, this kind of money is really easy to earn. Otherwise, meatballs are beautiful and all kinds of Lai emerge in endlessly.

However, Zhang fan understands that the hospital is not simply a profitable enterprise. Therefore, he will not strongly support such things.

Zhang Fan didn't take it seriously, but the hospital almost rioted.

Because the salary at the end of the year came out.

The highest is Li Cunhou, whose annual income is more than 3 million before tax!

Ouyang was shocked and came to find Zhang Fan.

"Is it a little too much?"

"My European Academy, this value is really not much!"

Zhang Fan said to Ouyang with a smile and showed her Li Cunhou's income statement.

Salary, bonus and welfare, 500000 before tax, Li Cunhou's throwing knife is less, 100000, mainly because Li got allogeneic transplantation in his old age. As for lecture fees and conference fees, they are not much, more than 500000.

According to the routine, Lao Li is only over a million a year. As a doctor at the academician level, his income is really not much. But this year is different. The share of antifreeze oil is less than 2 million.

Not only has Li Cunhou doubled his income this year, but also the doctors involved in R & D in dermatology are not good this year.

If the contribution is small, according to the coefficient, there can also be 200000 or 300000. Many, such as Guli, have directly distributed more than 1.2 million.

Gulina Zha, who is full of meat, laughs like no one in the morning. With the dividend at the end of the year, plus bonuses, wages and various benefits, Guli is almost two million less this year.

Originally, the bonus of tea vegetable hospital was high.

When you look at the tea vegetable area, oh, there is no enterprise with better income than them.

As a result, as soon as the antifreeze oil was sold, the previously small and transparent dermatology department shook up. Looking at the doctors and nurses of other departments in the dermatology department, who were almost laughing at the pig's cry, they immediately felt that they didn't smell good when they looked at their salary slip.

All departments start meeting!

Chapter 1538

All departments, on top.

It's really on top. When the flood is flooding, we have no pressure. We feel that the hospital is better and we are happy with more money. As for development and improvement, I have this idea, but it is not strong.

It's like swearing to do something tomorrow morning at night. As a result, the next day, it's time to eat and drink.

It's different now. The gap will come out at once.

For example, the director of orthopedics, who comes down to 500000 a year, feels that he has reached the peak of his life. Not only don't you have to share the equipment, you don't have to take risks.

As a result, it's not working now. The dermatology department that used to look down on and dare not speak loudly in the operating room trembled at once.

"Comrades, do you feel a sense of crisis now?" At the morning meeting of Orthopaedics, the orthopaedic director asked with a serious face.

The doctors nodded and looked embarrassed. And the real pressure is on the nurses.

The annual salary is 160000 or 70000, which seems not much, but the tea element directly makes many people jealous. Now the nurses in the dermatology department of others can get almost 300000 this time.

What is this concept? This does not mean that other people can get so much, but that more and more people will compete for this position in the future.

It is estimated that a large number of master level nurses will come to the tea vegetable hospital next year. This is a matter of certainty.

So the question is, can you still get a high salary so safely in the future?

Even some nurses and doctors want the hospital to go back to the past. Although the money is not a lot,

they are at ease. There is no crisis. Now, with more money, NIMA can't sleep.

.....

Early in the morning, when Zhang Fangang went to the administration building, he saw Wang Hong staying in the duty room of the administration building. At the sight of Zhang Fan, Wang Hong came out quickly.

"Zhang Yuan, I don't know what's wrong today. The chairman of the tea vegetable credit union came early and took someone to guard in front of your office. I didn't open the door of your office and invited them to my office."

"This TN has a traitor!" Zhang Fan became angry as soon as he heard it. He just raised the money from the firm yesterday, and someone was guarding the door in the afternoon. Can you not be angry.

Many functional departments in China are very interesting, such as police, industry and commerce, local taxes, banks and hospitals. These departments are not only managed by local governments, but also subject to direct superior management.

For example, the credit union of chasu has long paid attention to the chasu hospital. Recently, some leaders even went to Zhang Fan's house to do Shaohua's ideological work, and they also want to hire Shaohua to be a director of the credit union.

Shao Hua said to Zhang Fan, "my mother was so excellent that I was a teller. Now I let my mother be the director. I won't go!"

Although what he said seems very funny, in fact, Shaohua also clearly told Zhang fan that I won't hold you back.

I didn't work at home. Now I come directly to the unit.

The chairman of the credit union never dreamed that the tea vegetable hospital had become the enterprise with the largest working capital in the tea vegetable area.

Banks in the tea vegetable region also have characteristics, because there is no industry, and the business is also around the season.

For example, in spring, there are many borrowers, most of whom are spring seedlings. They buy all kinds of animal husbandry cubs. In autumn, they sell grain, cattle and sheep, and then deposit.

To tell the truth, the banks in this place depend not on whose volume is large, but on whose business

point is remote.

Therefore, when the tea vegetable hospital emerged, the bank found a big piece of meat. For example, the 12-year goal of the tea vegetable credit union is to store 300 million. If it's not nice to say, as long as you take the tea vegetable hospital and lie down, you can get a bonus at the end of the year.

But NIMA, who can know that a hospital that used to eat subsistence allowances is so powerful now.

Zhang Fan swears and gets on the elevator. He really doesn't want to deal with these leaders of the bank because they are too sticky.

Like an old cat catching thieves, Wang Hong quietly said to Zhang Fan, "did Guli run to the bank to show off and be known by others?"

"It must be!"

When he got out of the elevator, the little officer from others looked at him and ran towards Zhang Fan while shouting to the chairman.

"Ouch, Zhang Yuan, I haven't seen you for a long time. Last time the community organized a physical examination, the doctors in our hospital told me about fatty liver and told me some precautions. Hey, I went back to implement it seriously. Unexpectedly, now you see, my stomach is down!"

The president is a middle-aged man. He is not fat, but he is a little fat and has a smile on his face.

People's words are pleasant to hear. Zhang Fan's impatience is also much less because people are customers!

"Ouch, are you here for reexamination today? Yes, yes, you are busy and need reexamination. You can't ignore it after a physical examination! Physical examination is not everything, especially you leaders. You must take care of your body."

"Er! Yes, yes, yes, it's for reexamination. Not only me, but also those who were abnormal in the last physical examination in the unit. This time, they also want to reexamine. They just want to go through the back door of Zhang hospital and tell the doctors in the hospital, let's join a team or something."

"Ha ha, little things, little things!" Zhang Fan smiled and shook hands with each other, and then invited him into the office.

The chairman of the credit union muttered in his heart: "Hey, the legendary mosquito flies to Zhang Yuan, which has to pull out its legs. It really deserves its reputation."

In fact, for others, the physical examination is only a few money, but there is a feeling of being kidnapped.

However, for Zhang Fan, even the legs of flies are meat. If you don't catch this rich unit, you will be caught. Who let him deliver it to the door today.

In earlier years, private medical enterprises could not set up medical examination alone. Later, the state liberalized, and many enterprises with separate medical examination appeared at once.

The investment in this industry looks large, but in fact the investment is small. For example, CT and MRI, buying several instruments eliminated by the hospital is really not a big deal for the bosses.

Make tens of millions, make the decoration more luxurious, and who knows whether this MRI is the mainstream for those who come for physical examination.

This enterprise with separate physical examination saves much more money than opening a private hospital, employs fewer people and has few disputes.

In fact, the most expensive is not equipment, but helping boxing. You don't have local boxing assistants. How can you get a physical examination? This is no exaggeration. Sixty or seventy percent of the annual income is spent on helping boxing.

The physical examination center of tea vegetable hospital is the easiest one with the name of the center. Zhang Fan thought at that time that the hospital was strong and the physical examination was still used for advertising?

As a result, there are many individuals who come for physical examination. The tea vegetable government for collective physical examination is fixed. Other units come this year and may go to a private physical examination center next year.

Don't enterprise leaders know that tea vegetable hospital has good equipment and high technology? There are a lot of things in here.

In the simplest way, one year, the transportation management office didn't know whether it was too much money or what. It gave free physical examination to local drivers using vehicles.

This is a good thing!

Taxi drivers, big car drivers, some people sometimes really don't want to go for a physical examination.

But after a physical examination, something went wrong.

For example, do a color Doppler ultrasound and tell others that something serious has happened. You have gastric cancer. You'd better go to XX Hospital to find xx director to operate on you.

Nima is a real liar. She's not professional. You should say gastric cancer under the gastroscope. The

driver's scared legs are soft. The family lives on their own. If something goes wrong, the family can't starve to death?

Then the driver came to the physical examination center of tea vegetable hospital with the physical examination report. Once checked, nothing happened.

At that time, the driver patted his thigh and scolded, crying and scolding. Really, ordinary people can't stand such a scare.

As for the false signature, I will give you a report without pathology. Really, only you can't think of it, and no one else can't do it.

In public hospitals, his face is ugly and his words are ugly, but he dare not cheat. Once he is found, he can't hold his job. The cost of fraud is too high. If an inspection report is double signed, both people will be on guard.

In the workplace, what I fear most is that I have something in the hands of my colleagues.

This is also why the public hospital must issue a report for medical treatment on bail, because the report of the public hospital can be fraudulent, yes! But there are great risks. For example, if the participants quarrel or feel uncomfortable one day, they will report the matter to the police.

In those years, there was such a director of some bureau who was taken care of food and wanted to be released on bail for medical treatment. Found the vice president of the hospital. The vice president was so brave that he took it.

Then all the processes were successful. Finally, the inspector of the laboratory department issued a report. When the inspector saw that the urine sample had been changed, he did not sign directly. He asked the director to sign, neither did the director, and asked the vice president to sign by himself.

The vice president had no choice. The goods were also a brain cripple. He even put on small shoes for the inspector afterwards. The inspector made a big deal. He even cried and scolded and ran to several complaints of the government. The vice president was scared and peed his pants at that time.

Many people will tell their children that they are not afraid of things if they don't get into trouble, but the essence is that they are not afraid of things. Parents don't make it clear to their children that they are not afraid of things.

After entering the office, Wang Hong poured water and made tea, and then said, "Zhang Yuan, there are two gallbladder cancer operations that need you to do later. They are not sure."

Zhang Fan nodded and thought that this product has finally enlightened. Some people have something like this. Not giving pressure seems to be good to him. In fact, pressure is the only condition for growth and progress.

This is not an exaggeration at all. For example, the child of a big man is a hundred Li Hou, and the child's resume is also dazzling. The best golden hair graduated from a University Master's degree, and then worked for a few days, but he couldn't go on.

For such a person, his superiors will not wear small shoes and his colleagues will curry favor with him, but he just can't do it. Because of a little pressure, he has collapsed.

The chairman of the credit union was not unnatural at all.

Chapter 1539

After talking for a long time, Zhang Fan asked the financial director of the hospital again. Only then did he deposit the money in the credit union, and the door didn't come out. The chairman smiled and asked Zhang Fan: "in the future, I promise to give the lowest interest for the hospital loan, and the payment speed is definitely the fastest for tea!"

Zhang Fan smiled unnaturally. As soon as he finished saving, he thought about asking me to borrow money. It's too

The tea vegetable government, the leader in charge of health, is in the office of the tea vegetable boss. "I heard that the tea vegetable hospital has paid dividends to doctors?" Chasu boss asked the leader in charge of health sadly.

"It's their antifreeze oil that pays dividends, but others don't. however, this antifreeze oil feels that the profit is still good. I specifically asked that the production technology is not difficult. If there is a formula, we can also let the municipal chemical plant produce antifreeze oil. Isn't the output of tea vegetable hospital insufficient?"

"We can help! "

Boss Cha Su shook his head. "The idea is good, but do you think you can get the formula from Zhang Fan and Ouyang? Even if you want the formula, the price of tofu turns into the price of meat, which is not worth it.

Their hospital has the highest income of Academician Li this year. How much is Zhang Fan? Do you know Ouyang's income? "

"I asked, Zhang Fan is not much lower than Academician Li. Zhang Fan's main income is flying knife. The cost of flying knife has exceeded one million a year, and some lecture costs have been more than 2.3 million a year. However, he did not participate in the dividend of antifreeze oil.

Ouyang is in his early one million, mainly in terms of bonus and salary. Other leaders are similar to Ouyang. Those who can fly knives, such as Zhao Jingjin and Luo Zhengguo, have a slightly higher income. Their secretary is similar to Ouyang. "

The salary of the tea vegetable hospital is not back-to-back in private enterprises. It is publicized. If there is any doubt, it can be questioned. The tea vegetable non-medical department takes the average award. Even the ordinary encirclement personnel of the security department earn almost 150000 a year.

As for other hospitals that joined later, such as China Hospital and digital hospital, the salary is still in accordance with the original regulations because of the new entry this year, and there is a big gap between them.

However, no one makes trouble. As we all know, there is no reward without dedication. Now many doctors in China Hospital and digital hospital have been mixed into the hospital of tea vegetable hospital.

However, the assessment of tea vegetable hospital really gives them a headache. There is a small examination every three months and a big examination every six months. In case of disqualification, the first disqualification will lead to post transfer, the second disqualification will lead to off-duty study, and the third disqualification will lead to dismissal.

"This income, ah, makes us hate passivity now! Do you think we can also learn from tea vegetable hospital?"

"Raise wages? Well, this is good, but I don't think the bank will agree!" The leader in charge of Health said with embarrassment.

"What and what ah, people pay money, people have confidence, we tear down east walls to make up west walls, what do you think. I mean to send someone to go there without making noise or noise, that is to cry for poverty, and then urge Zhang Fan to give us the enterprise dividend as soon as possible."

"It's hard to say. Zhang Fan is no softer than Ouyang when he should start."

"Hey!"

.....

Zhang Fan certainly won't pay dividends. This year's income looks a lot, but next year's expenditure will be very large. First, with the establishment of the Medical Union, there will be a lot more employees, which is a large expenditure.

In addition, the national experiment has been established, so there must be new projects. Tuberculosis will be on the market soon. After tuberculosis is on the market, most researchers must change direction and study towards other scientific research projects.

This is also a large expenditure, and it may not be able to see the expenditure of back money. The general timeline for drug research and development is ten years. In other words, the average time for a drug to be released from the laboratory is ten years.

In addition, it is not time to spend money on the research of gallbladder cancer. When it enters the stage of clinical review, the money will flow out like a flood.

The largest part of the current income of tea vegetable hospital is the international hospital, followed by the dividends of various enterprises, the dividends of two barrels of oil, and the dividends of antifreeze oil.

As for Li Cunhou's allogeneic transplantation, if it enters the ranks of national protection at present, it is estimated that it will be several years later to make money. When foreign research is almost successful, it will be released directly.

The income of tuberculosis drugs and state subsidies have just wiped out the early R & D expenses. If you want to make money, you can only wait for the clinical experiment to be completed and earn money from foreigners.

Another big head is the male antiemetic drug organized by Zhao Yanfang. Now it is to hope for plum and quench thirst. Originally, I wanted to be listed in the early years, so I can be more affluent. But this antiemetic drug has directly become a closed drug, which makes people unable to spit out at once, so it is estimated that it will take some time to do it.

Zhang Fan, Li Cunhou, Ouyang, Ren Li, Zhao Jingjin, Lao Chen and Luo Zhengguo, plus Lao Ju, Lao Gao gathered in Zhang Fan's office to discuss some major events next year.

"The bigger the stall, the more nervous it is. Next year, the national experiment will start new projects and the gallbladder will enter the formal stage. It is estimated that we will not have enough funds on hand." Zhang Fan also said sadly.

"The antifreeze oil of dermatology department and all consumables experimental sites are used by the hospital. Finally, why can't the hospital participate in the dividend?" Ouyang said reluctantly. She always felt that Zhang Fan was too big on the salary issue.

According to the old lady's idea, it's good to have more than 300000 a year. Now there are millions of income. She thinks it's too wasteful.

Zhang Fan smiled. "Haven't you got 15 million? You can't divide the money into two crops. As for these consumables in the laboratory, you're not afraid of him using them, just afraid of him not using them." After that, Zhang Fan said, "the Department of Cardiology has also applied for scientific research this year?"

On the issue of salary, Zhang Fan and Ouyang have different ideas. The old lady's life is simple. She lives in the family hospital of the hospital. She doesn't socialize and has no big expenses. In addition to eating and drinking, it is estimated that the biggest expense of her family is the electricity bill of TV.

So she thinks there's too much money.

But other people are different. Tea element is not in a good position. Taking one step to pee can cause diplomatic problems between countries. Can you keep people if you don't give more money?

For example, the dividend of dermatology department went down with one hammer, and the two doctors of the golden mean entered the post directly.

To be honest, it's not easy to find one of these serious doctors with scientific research ability and clinical ability. Now there are two directly. Zhang fan can't sleep happily if he thinks about it.

"Well, the Department of Cardiology is preparing to do the subject of intravascular embolization. It has had preliminary discussions with Shuimu Medical College, mordu Jiaotong University and double egg University. At that time, the four low joint research will take the form of scholar exchange."

Ren Li said to Zhang Fan very seriously.

In internal medicine, Zhang Fan has less management, mainly Ren Li and Ouyang. Now there is one more Yan Xiaoyu, so Zhang Fan is very relieved.

But when Ren Li said this, Zhang Fan didn't show much on his face, but he still tilted his mouth in his heart.

Academic communication, to put it bluntly, is that borrowed cats don't catch mice, because there is no rigid standard for communication. When people come, they can work or don't work.

However, it's OK for the internal medicine department of tea vegetable to communicate with the head medical school now. You can't let others get you a platform. It's unrealistic. The internal medicine department of tea vegetable mainly has no leader.

Ouyang, three or four years ago, she could boast about tea vegetarians, but now no one has asked her

for consultation for a long time.

Ren Li, at present, is also a name that can be counted in the frontier. As for the whole country, it is not qualified enough. Yan Xiaoyu is the same, that is, frontier experts. National experts are not enough.

This time, I can communicate with the head medical school. It is estimated that the name of the national experiment has helped.

"Well, it doesn't matter if we can't make achievements. The most important thing is to seize the opportunity to train more troops, find our shortcomings and learn from others' strengths."

Zhang Fan said a word to Ren Li.

Ren Li nodded.

After Ren Li finished, each Dean then reported the bigger things of the year to Zhang Fan.

Zhang Fan doesn't like meetings, so the meeting lasted almost another day. Hospitals are getting bigger and bigger, and there are more and more things.

Lao Gao finally has a second spring. Now Ouyang doesn't suppress Lao Gao very much. If it was released before, Ouyang's triangular eyes would stare at Lao Gao.

Lao Gao is now in charge of science and education. The affiliated kindergartens and primary schools of the hospital are all in the charge of Lao Gao. The most important thing is that Lao Gao is also in charge of the clinical department of tea element of Frontier Medical University.

"Zhang Yuan, this year we still need to make some efforts in the teaching staff. The Medical University urges the teachers to go back every day. They seem to understand a little bit." Lao Gao said with a smile.

The benefits of tea vegetable are so good that when the teachers of Medical University rotate, they don't want to go back. At the beginning, the school pretended not to know. They like to stay in remote areas.

But slowly, I found that something was wrong. Several teachers not only didn't come, but also left. After leaving, he went directly to the establishment of tea vegetable hospital. Then, it was time for rotation, and the doctor in tea vegetable applied to stay in office.

That's a problem. After the final prize was given to the teacher, he should come and rotate, but the teacher who had no position quit.

Nima is a direct express. Why don't you let me go.

The teachers made so much noise that the school finally came back. NIMA sent more than a dozen

teachers. When she came back, there were only two or three left.

If there are several rounds of rotation, there will be no teachers in the clinical department of the school. So the leaders of Medical University are also afraid.

In the words of the headmaster: "I never thought that the tea vegetable hospital hid and swallowed our hearts!"

But now the clinical department has been set in the tea vegetable hospital. If you go back, let alone the students, the frontier government will not do it.

The school leaders regret that the students can't be tough, but the teachers can, so the rotation quota for the new year has not come out so far.

"Hehe, it's all right. Don't be afraid. In ten thousand years, it's estimated that we will have more teachers."

Ouyang looked at Zhang Fan curiously. Seeing that Zhang Fan kept secret, he looked at Lao Chen. Lao Chen looked innocent and blinked as if to say, "Zhang Yuan didn't tell me!"

This time, Zhang Fan decided not to let others intervene and deal with it himself, otherwise it would make a 985 school principal angry. It's really scary.

The tuberculosis drugs of tea element hospital were finally on the market, and five hospitals in the East, West, North and South launched new anti TB drugs at the same time.

For a time, I don't know how many countries stared at China.

Chapter 1540

Frontier Medical University is very cautious about the whimsical idea of tea vegetable hospital. Although domestic hospitals do not have subordinate medical universities, the president of Medical University thinks it is safer to stay away from the current income of tea vegetable hospital and the status of frontier.

But the clinical department has passed, and it's hard to get it back.

"I said that at the beginning, he didn't want anything and had to bear the teacher's bonus. I thought I met a good man and a good dean who was willing to support our medical university. Unexpectedly, I didn't expect that he was thinking about my school!"

The president of Medical University didn't dare to tell anyone. He told his wife at home.

His wife glanced. "What's wrong with being merged? Don't give you three million a year, it's good to give you one million. Listen, it's the headmaster. It's today, and it may not be tomorrow."

The headmaster glanced at his wife and wanted to say what you know, but he didn't dare to say that when a man goes bald and doesn't urinate smoothly, he usually feels guilty about his wife, so he doesn't look like a university president outside. In fact, he has no position at home.

In fact, he can't keep it. Without the National Laboratory, Zhang Fan may not be able to do anything. Now relying on the National Laboratory, he is a frontier provincial university. It sounds like a Medical University, but it sounds like a medical school.

As long as the conditions are ripe, the Ministry of health needless to say, as long as he persuades the Ministry of education, he can only lie down by himself and close his eyes and wait for Zhang Fan to do it hard. There is nothing he can do. The most important thing is that the clinical department also asked him to personally deliver it with both hands.

The more the headmaster thought about it, the more he couldn't sleep, and the more he thought about it, the more he felt a loss. If he had understood this thing at the beginning, even if he couldn't stop it, he might as well talk with them about the treatment in the future. Now, I'm passive.

The headmaster didn't sleep all night. The next day, as soon as he entered the office, his deputy came to him in a hurry.

The headmaster looked at the joy on his deputy's face, and his heart was secure. "What's the matter?"

"Headmaster, let's not worry. Look, look." As he spoke, he handed the headmaster a tablet.

The tablet is all in English, not a journal, but English news.

"Hey, I'm worried, I'm worried. Normally, this kind of scientific research should first issue papers, then do clinical trials, then invite scientists from various countries, and finally go on the market. It's good. It's safe and famous. But you say, he, how can he think of taking the wrong side of the sword!"

The headmaster was unhappy when he saw it, because the news in Europe and America all scolded Chinese tuberculosis drugs. Although he would be as defensive as a thief when facing Zhang Fan, in the headmaster's opinion, it was his own business.

Just as his wife snores at night, he won't tell others. It's his own business, it's his own contradiction.

In the past, the newspapers did not mention the tea vegetable hospital in China, because the hospital was too small and felt that it was a little cheap to scold.

But this time, I didn't let go of the tea vegetable hospital. I didn't even know the leading Party. Even Zhang Fan's old background was confessed.

"An orthopedic doctor who developed tuberculosis drugs has not yet undergone phase III clinical trials, and then China began to inject them into its citizens. This is a naked tyranny. It is a blasphemy of medicine and a trample on human rights."

This is the news of the golden wool Wall Street Journal. Although this broken newspaper is mainly financial, many medical professionals in Europe and the United States are also their customers.

"The poor Chinese are impatient to use a so-called tuberculosis drug developed by an orthopedic doctor with non immunology background to give it to the people of their country. This is the executioner!"

The newspaper of Deng Da Xiong's husband in Mishima also looks high above the world, talking about China and tea vegetable hospital.

Although Mishima is no longer good now, just like Jinmao's little attendant, people still think they are the first in the world and still look down on countries such as China.

In China, many epidemic prevention stations have opened the injection of tuberculosis drugs, "Mom, don't give an injection. You don't know in China. Now Jinmao almost says that this tuberculosis drug in China is very dangerous."

"Why is it dangerous? If it's dangerous, the country will let people inject it? I think you've been brainwashed after only a few days out." At this end of the phone, a woman with a little status regretted sending her daughter out to study abroad.

She has been sent out since junior high school. Now she has graduated from college, but the lady seems to have something wrong.

In fact, can these sent out from junior high school become useful? Not with high probability. Zhang Fan knows several bosses, not very big ones. It's worth 10 or 20 million.

Send the children out early. A boss's boy didn't learn anything. He was an expert in smoking cigars and drinking foreign wine. Finally, he had no way to learn luxury management and couldn't get along abroad.

After returning home, he opened a shop selling foreign wine.

His father told Zhang fan that ten foreign wine shops in NIMA have come out after spending more than ten years.

The other one is a girl. After going out, she is honest. She doesn't know whether she is looking for a boyfriend or not. She can get her graduation and hold the master's Diploma of Cambridge. She is stunned that she can't stay in Sandao. It is said that people don't recognize this diploma.

I don't recognize the country when I return home! This thing is genuine. I have money to burn it.

On this day, epidemic prevention stations in the East, West, North and south of China have begun to accept susceptible people and people who have been infected with tuberculosis.

"Free?"

"Free!"

"Oh, it's free. Why don't you worry? I'll come back in two days! These people are so anxious and busy. They're so mean. Will you die later?" An old man walked away singing a song.

A prevention center in the capital. A lady patted her thigh and scolded, "why don't you give my children free? They're all free. Why don't you give my children free? Do you know what I do and ask you to lead."

The little nurse said wrongfully, "Chinese people are free, foreigners are not free, I can't help it!"

"What? My Chinese has no way to be a child. Ah, why not? Do you has the final say?"

"The card has the final say!"

"You wait, you wait, I'll ruin your job. Grandma!" Women's morale is foaming. Tanima bullies people. Now, put it over. I'm coming. You all have to kneel down for me.

Watching the aunt leave, the interests and hobbies of the people in the capital showed up. "Hey, I said, little comrade, how much will it cost if foreigners inject this?"

The little nurse blinked wrongfully. "One shot for prevention is 32000, and the injection fee and registration fee are 10 yuan. If it is a patient who has contracted tuberculosis, there are six shots in total, almost 200000 less."

"My God, it's so expensive! Darling, I have to call my family and ask them to come too. It's the first time I use such expensive medicine!" A middle-aged man who speaks authentic capital words is like crosstalk.

But there was a kind of pride in the tone.

Zhang Fan sat in the network center early in the morning. Of course, other big guys didn't come and were busy in the laboratory.

Because the drug is developed by tea element, the director of the national laboratory must be on duty today. Zhang Fan doesn't want to go, but he can't call several old men. There's no way. He can only come to the network center on duty by himself.

Prevention centers everywhere have been connected to the Internet.

Rows of avatars appeared on the screen. At the top was Zhang Fan's head, and his face was serious. The directors of the prevention center didn't dare to say hello. They thought Zhang Fan was too professional.

In fact, this drug has been used by severe patients for a long time. If there is a problem, he dare not go on the market. He is serious today because he wants to wait here for a day.

So unhappy.

Waiting is mainly for fear of some special circumstances.

Zhang Fan, they don't worry, but the leaders worry.

Therefore, the general manager personally called Zhang Fan and asked Zhang Fan to take it seriously.

The general manager has called. Zhang Fan has to come if he doesn't come.

"30000 injections!"

"100000 injections!"

"500000 injections!"

All over the country have been summarized. Zhang Fan didn't move his eyelids. The population of China is huge. Just wait.

"Director Zhang, all infectious hospitals and troops have begun to inject."

Those who have been ill will be given priority injection, and all troops will be given priority injection!

The injection in China is carried out in an orderly manner, and there is no centralized publicity, that is, there are more injection points in vulnerable groups and vulnerable areas.

Ordinary people really don't understand this disease. The final death of many diseases is not the primary disease, but tuberculosis.

"Zhang Yuan, Zhang Yuan!" Wang Hong came in angrily, gnashing her teeth, like a Tibetan mastiff protecting food.

"What's the matter? Who annoyed you?" Although Zhang Fan will clean up Wang Hong at ordinary times, Zhang Fan will care about it at this time. If his subordinates don't maintain it, your leader is almost over.

"Look!" With that, Wang Hong handed the documents sent by the tea vegetable Network Supervision Bureau to Zhang Fan.

Zhang Fan looked at it and said, "Oh, there are a lot of people who scold themselves, as well as some foreign news intercepted." Zhang Fan opened it and looked at it. Although his English is almost the same as that of Lao Ju's Kazakh English, it's not a big problem.

Looked at two eyes, "Why are you angry? If someone opens his mouth, can you still block it?"

"But..."

"Are you from digestive origin? Your mother said that gastroscopy can break people. Will you explain to your mother?"

"If I'm chatting normally, I'll pretend I didn't hear it."

"Isn't it over? All right, go and help you. Someone will bring you a cup of tea later."

Zhang Fan ignored these intentional or unintentional clamors. He is not a glass heart. If he had a glass heart, he would not be able to graduate from college.

"Is there any allergy? Pay attention to those who are allergic and report them!" Zhang Fan shouted in a weak few minutes while turning over the periodical in his hand.

The capital, Zhonghai.

"Arrange it in the evening. We should praise our doctors, especially the tea vegetable hospital. We should focus on it."

"Where's dean Zhang Fan?"

"He? Forget it, it's better to go too far. He will win the grand prize this year. Now it's time to highlight the collective contribution."

"Good leader, I see."
