

Chapter 1601 - Lu Yang attacked Shrov

σ? „

Just as Mitomon fled back to his area, Alice called and said, “By borrowing the right way, we are going to Steig’s area.”

“Why?” Sanyouweimen asked.

“Merger.” Alice said helplessly: “No way, we can’t stay in that area anymore, we have to go.”

Sanyouweimen said in surprise: “Why not merge with me, I can also accept them.”

Alice smiled and refused, and said, “Who can do the math? Together, we are bound to become vassals. We might as well go to Steiger’s groceries and work together.”

“Sorry, we have signed an agreement with Steiger,” Alice said.

Sanyouemon was so depressed that he regretted that he had just patronized and ran away. He didn’t have time to understand the subsequent developments. If he thinks a little more, he can definitely get a profit from the G8. Unfortunately, it is gone now It became the stabbing cargo of Steiger, but it was also a good thing. At least it could curb the development of Liu Jie in the northern region and not make the central region more chaotic.

“Okay, I’ll let you go. I’ll send you some back to the city. We signed a cooperation agreement before. We can use our fortress’ reels, which can save two days.”

Originally, Alice was going to ask for this. She couldn't think of Sanyou Weimen's initiative to agree. She said excitedly, "Thank you."

"Give them only one minute. I don't want Galga to run away through me, otherwise, I will be targeted by Lu Yang. At that time, I will come to Lu Yang for protection. They're stupid. "

Alice breathed a long sigh of relief, and said gratefully, "Don't worry, this will never happen."

She quickly told Daniel about this, and Daniel and Kerim and others briefly discussed. The guild issued an order and the members gathered in their respective fortresses. After half an hour, nearly 2 million absolute masters simultaneously used the transmission scroll. He flew out of the G8 region and sold everything he could.

Gelgar was chatting with Daniel and others, and suddenly learned that Daniel and his men flew away from the fortresses. He looked at the allies sitting next to him in surprise and asked, "Where are our people? Anymore? "

Daniel glanced at Galga apologetically and said, "What a guarantee."

The light flashed, and Daniel and Kerim disappeared from his presence. Galga was stunned instantly. The next moment, Steiger and Daniel announced simultaneously that they would form a new guild congregation.

"Dirty, despicable, shameless, cowardly bastards, villains!" Galgar fell into rage and pointed at the north and cursed: "They abandoned me and left it to Claudio, these **** bastards, I want to kill them. "

As soon as the words fell, Claudio's hearty laughter came from outside the fortress: "Gelga, today is the end of the G8, let me Claudio go to the road."

Vice Chairman Anthony looked at Galga with a bleak expression, and said, "Boss, let's ... hide it first."

Gale grew angry and said, "Why retreat, I forged this fortress, and I will never let it go."

“But apart from our 500,000 elites, not many people are willing to fight with us.” Anthony said lonely.

“Then let these 500,000 people fight with me, I will never give in.” Gellgar roared and quickly came to the wall.

Outside the walls, Claudio was proud of the expression of 1 million people. When he saw Galga coming, he said loudly: “Today, the strongest guild in Mexico dissipates in the hands of Claudio, Galga, I Give it a chance, and give up resistance, and I can let everything go with me. “

Gelga looked at the countless enemies, and Yang Tianchangxiao said, “Someone will send someone to attack me. See if I’m afraid, Gelga will let me admit defeat. What a thing.”

“Be brave, this is what you ask for.” Claudio didn’t care, and shouted with a laugh: “The army attacked, laid the fortress, killed Gerga, and destroyed the Mexican Guild ~!”

One million people swarmed up from four directions, fighting with Gelgar’s men. During this melee, on the other side, Lu Yang’s three army arrived at the Frost Fortress, the Cold Wind Fortress, and the Thundering Fortress. below.

Frostwind fortress walls.

Shrov didn’t show up. At this time, he had hid in the earth fortress at the northeast corner of the map and enjoyed his feeling of being the president for a short time.

At this time, defending the Cold Wind Fortress was the second deputy chairman of one of Shrov’s many women, Rusata, and sixteen large guilds, with a total number of 2 million.

“The army is ready, here comes the Brotherhood of Iron Blood.” Rusatta yelled loudly with a three-pointer.

Two million people stubbornly guarded the fortress. Lu Yang watched the enemy not even out of the fortress, sighed, and said, “What age is this? Why is there such a way of playing?”

When the forbidden mage exists in a guild with thousands to tens of thousands, the defensive fortress cannot stay inside the fortress, otherwise it is a group of live targets for the forbidden mage to play.

Xia Yuwei said, "Don't underestimate this fortress. I don't know who Slovak listened to. The last four fortresses he has occupied have been modified above the city wall. There are special places to avoid magic, and there are shooting holes in the city wall, and the undercover channel allows their players to support from all parts of the city wall, which is very difficult to play."

Lu Yang looked at Tu Feng, and Tu Feng said, "That's right."

"It's a bit more interesting," Lu Yang said with a smile on his face. "If we won the battle so easily, I'm afraid we can't pretend not to attack the area of Gelga and be suspected by Claudio, Ayala, Attack."

"Okay." Hei Yan waved his arm, and 80,000 Spanish cursed mages began to release magic in batches according to the fortress.

The entire fortress instantly fell into the ocean of forbidden spells, and Wu Yun covered most of the fortress. Taking advantage of the release of the forbidden spell, Lu Yang said to Xia Yuwei, "The army attacked."

"Yes." Commander Xia Yuwei stormed four gates.

At the same time, the battle between Frost Fortress and Thunder Fortress began, and the three fortresses were simultaneously attacked by the Brotherhood of the Iron Blood.

For five consecutive days, Lu Yang did not fight seriously. Until the sixth morning, Lu Yang received the battle report, Claudio defeated Gherga completely, the Mexican Association was dissolved, and the Group of Eight had already been dissolved.

A new guild congregation of gods appeared in the northern region. Headed by Steiger and Daniel, a guild management committee was formed. The first president was Steiger, and the rest were Daniel and Renault. The position, including the position of a vice chairman, was not made public, but Lu Yang knew that it was for Alice.

All of Xue Yiming's suggestions were made by Lu Yang. Lu Yang's purpose was to let Steig restrict Liu Jie's development and allow the two of them to continue the melee in the vast northern region, so that he could free up his hands and improve his level.

Now, outside enemies and internal enemies are unable to attack him within a year or two, and he can finally settle accounts with Liu Jie.

Tu Feng said, "Heiye took her scattered army to occupy the area west of the Qingling Plain to the Lalbag Fortress, and all areas of Gelga were occupied by Claudio. Now Claudio On the guild of two men, Jerz and Tom. "

Lu Yang sneered and said, "Claudio is really rude. Even my entrance to the central area blocked me."

Tu Feng said: "I'm afraid he means that we want to go out, we must drive the black guild first. This will give him time to prepare."

Lu Yang said: "Yeah, we have a hatred with Black Yarn. No matter what, we can't ally with Black Yarn. Therefore, if we want to enter the central region, we must first kill Black Yarn, and Claudio If he doesn't want us to go out, he can secretly send equipment to the black yarn, so that the black yarn consumes our level and equipment first. "

"This kid is black enough," the White Lion and the bitter half-life said.

Lu Yang said, "Don't worry about him, sooner or later he will eat bad results."

Tu Feng grinned and said, "That's right, now that Galga has been destroyed and the Group of Eight has dissolved, but when the seven of them, Daniel and the Blood Butcher, left, they took away only the most elite people. No one else took it away, leaving tens of millions of G8 Guild players stranded in that area.

Originally they shouted that if the Jagged Brothers League entered, they would fight the Judge Brothers to the end. As a result, we did not go. Claudio went. There are almost hundreds of new organizations derived from the dead bodies of the G8 Threatening to take revenge for the G8 and Galga, they are looking for supporters. "

Xia Yuwei frowned and asked, "Where are their fighting spirits, Galga and Daniel, eight of them, do they have such a big favor below?"

Tu Feng said: "Of course there is no more, if any, they are taken away, they will not stay in the original area for Claudio to kill them wantonly."

"Then why?" Bitter love was puzzled for a long time.

Lu Yang said: "These people are just gathering power under the guise of revenge for the Group of Eight to build a new guild. When they really take Claudio away or develop to a certain extent, they will never What about the G8? "

"It's really a bunch of boring people," Jiang Ze said.

Lu Yang said: "There are rivers and lakes in people's places. They can be bosses and who are willing to be younger brothers. Even if they gather people and don't fight Claudio, and enter the replica to fight equipment, their leaders can get equipment first . "

"Fuck." Everyone shook their heads. Obviously, Lu Yang was right.

Chapter 1602 - City break

σ? ,,

Lu Yang said, "Let's attack, right, get our trebuchet and bomb me according to the fortress and let them hide, this time enough."

Those 20,000 catapults from the nine strongest guilds were brought back by Lu Yang. During these five days, he was transported all the way from Tiger Mouth to the gate of the Cold Wind Fortress.

“I’ll order it now.” Hei Yan ran away. At present, the Jagged Brothers Alliance has not formed a trebuchet army. The trebuchets seized this time were handed over to the mages’ management of the remote mage.

The first time he directed so many trebuchets, Heiyan was so excited that 20,000 trebuchets lined up 500 meters outside the city.

“Ready, let go!” Heiyan roared.

At the same time, 20,000 catapults threw a hot flame stone ball, crossed a beautiful arc in the air, and hit the wall above the wall. Ruisa tower defended the wall, and the player died instantly.

Taking this opportunity, Lu Yang ordered: “The army attacked and won the fort.”

Two million people swarmed up. From morning to night, Retha Tower made use of the secret passages in the city walls for a day.

late at night.

Lu Yang looked at the fortress and said to Tu Feng: “I have to admit that although Rui Shata is a girl, she is a defensive expert. We have met the opponent.”

Tu Feng said: “This is all the result of their pile of money, not really powerful, and she is already a loser, we can launch a sneak attack tonight.”

In these days of fighting, Lu Yang has been ordering Tu Feng to find a way to counter the high-level legionnaires and vice-chairmen of the anti-Russat. These legionnaires and vice-chairmen are all the young men who Shilof spent money to help Guild, when there was still a chance to win, they were willing to contribute, but now they are about to lose, and they have less respect for Slov.

Now these little guilds think more about how to keep their guilds, and Lu Yang saw their ideas and gave them a very favorable condition, that is, as long as they surrendered, they would not care.

These little guilds were afraid that Lu Yang would lie to them. Until they met last night, Lu Yang personally agreed to them and signed a letter of understanding with them before they agreed.

Not only is the Cold Wind Fortress one, including the three strongholds of Frost, Thunder, and Earth, all have surrendered the Jagged Brotherhood.

Three in the morning.

Resata is in a drowsy state, and the gate on the east side is suddenly opened. The president of the defender said to the players around him: "You can't win the brothers, for the future of our guild, we will surrender. We flew back to the Celestial City. "

Nearly 200,000 defenders, except for a few diehards, took out the teleportation scrolls and flew away. In a flash, Dongchengmen ran clean.

"Iron Brotherhood, kill ~!" Xia Yuwei sighed and rushed to the wall with no one in charge of defending the underpass in the city wall. No one can stop the Legion Brotherhood. The fortress was attacked.

The defensive facilities inside the fortress are very simple. There are not many buildings. There are only some Tibetan barracks, which were destroyed by Xia Yuwei in the first place.

Resata was awakened by the shouting and killing, and watched the men who rushed in in panic and asked, "Is the Brotherhood of Iron Brothers attacking again?"

The men said sadly: "Vice President, we lost. The group of Dongchengmen became traitors and opened the gates. Now the Brotherhood of Iron Blood has entered and the sleeping brothers have been killed."

"What?" Resata sat in a chair in shock.

At the same time, the same was true of the Frost Fortress and the Thunder Fortress. Both Brothers of the Iron Blood defeated. That night, Lu Yang commanded the Brothers of the Blood Brothers to soldier the last fort controlled by Slo, and there were also fortresses controlled by himself, Earth Fortress. .

Shi Luofu has not slept a good sleep for more than ten days, he has been waiting for the situation over Rui Shata, and now got the news of defeat. On the city wall, Shi Luofu said to Lu Yang: "I confessed, this The game won, and I hope to be kind to these players who follow me. "

Lu Yang smiled at Shi Luofu and said, "Of course, I have always been tolerant of Indian players and never accounted for these things. Dissolve the guild and appease them. I hope we can become friends in the future."

Shloof smiled even more ugly than crying, and said, "We're bye."

World Channel Shilov: Starting today, the Indian Legion is dissolved. Sorry, I disturbed everyone. I hope you can continue to play in the game. Goodbye, my friends!

At this point, Schloff failed to control the Indian region for the first time, and withdrew from the game with disgrace. However, Schloff's calm departure did not arouse the turmoil in the G8 region, and everything transitioned very easily.

...

Five days later.

Time has come to the day of New Year's Day. The Brotherhood of Iron and Blood once again held a grand party to celebrate this great victory. The cute queen was forced to dance a thigh dance because she failed in the bet. The angry little girl kept blowing her hair. Thinking of seeking revenge from the town **** king.

Xia Yuwei, Qing Qian Zimeng, and Lan Yu also performed on stage. Of course, the party was broadcast live on the Internet and was not performed live, but it still attracted countless players to watch.

Inside the live room.

Du Bin looked at Lu Yang around him. Today, Lu Yang is no longer the young boy who just went to college, but a formal university graduate who has established a huge world-wide three billion dollar guild. One of the presidents.

Dubin asked excitedly: "I have a lot of questions to answer here, can I?"

"Of course." Lu Yang had seen the problem ahead of time.

Dubin immediately said: "Great, first question, what happened to Zhou Tianming, everyone is curious."

Lu Yang said: "It's also simple. We foresee an unprecedented crisis in the Jagged Brotherhood. This is because we have occupied the entire northeast corner and included the eastern region. Players in other regions have decided to join forces. Get up and attack us, and inside our China region, many people are instigated by Alice, who want to take advantage of the fire to rob and replace me to establish a new China Association.

As for the South Korea region and the India region, because of other reasons, we found that someone was going to attack us. The number is still very large. It can be said that we are in a state of internal and external difficulties. If these enemies continue to develop like this Go on, when they develop, we will be fatally hit, so Zhou Tianming took the initiative to ask for help.

I did n't want to let him go. Cute Liz kept looking for him. Zhou Tianming promised to carry me down. The two of us quarreled about it. In the end, I did n't convince him. Later, they saw it. Zhou Tianming shouted on the battlefield. In that sentence, the Brotherhood of Iron and Blood also allowed the enemy to start the war without preparation, and we won. "

Dubin nodded clearly, his body up and down as if he had drank cold water in the summer, he then asked: "What about the Ningshen mixture in South Korea and the special medicine in India? How could they be fooled?"

Lu Yang said with a smile: "I have to apologize to President Kim Kwang-soo of South Korea and President Shrov of India. Both of these potions were used to cheat them by using camouflage coats."

"What?" Dubin asked with a surprised smile: "I lied to them to buy them."

Lu Yang said, "Yeah, by chance, I saw Kim Kwang-soo, and I sold it to him. As for Shi Luofu, he didn't understand the game, and thought it was a leak, they were both fooled by me."

Dubin laughed and said, "This trick is too clever."

Lu Yang shrugged his shoulders and said, "This is also the bonus brought by Zhou Tianming. If he didn't give up his life and start the war in advance, leaving more time for Jin Guangyu, he would surely find the defects of Ningshen Mixture, and Slovak would not So easy to be deceived, we won very lucky, if Korean players know the flaws of Ningshen Mixture, we can't beat them in two or three days. "

Dubin was more relaxed physically and mentally, and asked with a smile: "Yeah, South Korean players' equipment has been defeated for three consecutive battles because of Ningshen Mixture, so many equipments have been dropped, and they are not so strong again."

Lu Yang said, "That's right."

Dubin then asked: "What about the internal rebellion? How did Alice be fooled by her 10 little siblings?"

Lu Yang smiled at the corner of his mouth and said, "They are even simpler. Alice wanted to find a powerful guild and found them."

Alice, Kim Kwang-soo, Ma Canlie, Slov, and others who were watching the live broadcast, listened to Landing Yang telling the story of this war, and each smashed the helmet on his head.

"Lu Yang, Miss Ben is incompatible with each other," Alice growled.

"Lu Yang, I will come back."

"I'm not so easy to admit defeat at. Unfortunately, they can't hear a word of Lu Yang, and no one will listen to the barking of the defeated dog. After a live broadcast, Lu Yang passed the live broadcast room. Say loudly: "Brothers and sisters of the Jagged Brotherhood, within a year, no one can threaten us anymore. Everyone can upgrade and rest assured, and all players who have helped us in this war. With the guild, all new copies of the Iron Brotherhood alliance, the strategy is shared, I wish you all can rush to level 175 in the next year. "

The players are boiling, and other guilds and players from other countries are envious of envy and jealousy. As Lu Yang said, the Brotherhood of Iron Blood will not have a war in the next year.

In front of him is the Black Swarm Legion. Those casual soldiers are brave, as long as the Brotherhood of Iron Blood wants to fight, it is only a wave of offensive things.

Players of the Jagged Brothers League rested that night. In the early morning of the next day, White Lion, Xia Yuwei, Zhou Tianming and others led the team in person. Hundreds of thousands of players came out of the tiger's mouth and entered the area where they had reached the sky. Has been to the Qingling River fortress from the heavenly fortress to the cardinal fortress, looking at each other across the silent hill and the black army of scattered men.

Chapter 1603 - The miserable Claudio

♂? ,,

Alice and Heisha, who are studying what to do next, are scared when they hear the news. They thought that Lu Yang was going to attack, but Lu Yang stopped in front of the Qinglinghe Plain.

"It scared me." Alice stroked her chest and asked, "Why don't we go with Daniel?"

Xue Yiming said: "With the current strength of our guild, do you think we will be respected when we go to the northern region? Now Steige is joining Daniel and Liu Jie in a decisive battle. We go if Liu Jie chases our defensive What about regional onslaught? Steige is looking for helpers, not for burdensome things. After several defenses, he will have an opinion. "

Alice nodded consciously and said, "It's true."

Xue Yiming went on to say: "I am afraid that not only will Steige have their opinions, but Daniel and the Blood Butcher will also have their opinions. We might as well stay here, while both sides can't afford us, we will develop our strength quickly. When our strength is enough, and Steiger and Daniel have achieved some results, we will go again, that will be the most beneficial for us. "

The Jagged Brothers League is also tired. After so many battles, the player's level has been seriously damaged. Many people have fallen to level 160. If they want to fight another battle, they must rest for at least one or two months. The problem of richness. After this battle, Jagged Brothers has no money. More than 10 million players have been mobilized. Jagged Brothers 'warehouse has been emptied, and members' guild points have not been exchanged for half.

After listening to Xue Yiming's analysis, Alice kissed her and said, "I'm so happy to be around. What should I do now?"

Xue Yiming said: "Go to Claudio and believe that we can reach a cooperation with him. He is also willing to let us stand in front of Lu Yang for him, but whenever Lu Yang wants to hit us, we immediately retreat to the northern region. At that time, Steiger and Daniel were tired from playing with Liu Jie, and we went to be a fresh force. "

"Awesome." Alice was so excited and said happily, "I'll go to Claudio."

Seeing Alice gone, Heisha looked at Xue Yiming in surprise and asked, "How do you know so much?"

Xue Yiming said: "I'm a man, I'm a nobleman, and I have a lot of books in this family."

Hei Su felt the same, and said, "The poor are left with a pile of books, and they are still willing to read."

Xue Yiming shrugged his shoulders and saw that the black gauze had also left. He sent a message to Lu Yang and said, "Stabilize."

Lu Yang saw the news, closed the mailbox with a smile, and said to the white lions and others around him, "In the future, the Brotherhood of Iron Blood will officially expand the scope here, so that players can also upgrade here."

The original Huaxia area is too small. Counting this area has more than doubled, he said to Tu Feng: "From now on, construction of the 170-level fortress will be included, including South Korea, India, Nine Star Alliance and Spain. In total, 25 will be built. "

Including the 170-level fortress in the existing Spanish area, if the ministry is successfully constructed, Lu Yang will become the person with the largest number of 170-level fortresses in the New World, and also the most of the 170-level map.

Tu Feng frowned and asked, "Our funds are running out. It takes 250 million to build these 25 forts."

Lu Jian said: "Jian, this is good for us in the future."

"Okay." Tu Feng stepped back.

"Let's lead the team to upgrade each other. I should also upgrade the boss. This time wasted too much time." Lu Yang said with a smile.

White Lion and Xia Yuwei and others nodded, and they could have a safe and comfortable upgrade environment. Everyone was willing to dare to upgrade and upgrade equipment.

However, not everyone thinks this way. For example, the eight fierce soldiers who were previously subdued by Lu Yang, Zhang Yuan, the first master of the bloodline, the spirit of nature, Koreli, the little Phoenix, and other special blood masters.

This group of people were strictly prohibited from participating in the war by Lu Yang. For more than ten days, the eight fierce squats were upgraded in Lu Yang's secret place. Koster and the little Phoenix used the demon bottle to catch the blood ghost spider in the copy of the blood demon. .

Zhang Yuan ran to the big fissure, and controlled the wild ancient aliens that Lu Yang had given him to kill the fissure demon in exchange for the crystal exchange experience value.

Inside the chat group.

"Oh my god, the war is over, why did the boss let us nest here?" The beautiful face of Little Phoenix Kerui Li also showed a very depressed expression.

"I'm so handsome that I can't go out and enjoy a romantic life, it's really bad." The handsome guy Coster said.

"A life that can't stand up is not life," said Naif, the eight boss.

Lu Yang just took a break, watching a few people chatting, and said, "Very busy guys, I have been upgraded to level 175 within a month, and those who can't rise will not take them out for tourism."

"Guaranteed to complete the task."

"Observe the boss."

...

When I heard that I could go traveling, a bunch of people were crazy. This is Lu Yang's recent idea. I plan to organize another tour. This time, I do n't go too far. I'd like to play in Sanya in China in batches. .

As for why Lu Yang wanted to upgrade several of them to level 175, the reason is that the game has reached the next stage. The official limited the level to 175, and launched a lot of special copies of level 175.

These copies have a great chance to drop a piece of equipment called a ghost, which is more advanced than legendary weapons, second only to artifacts.

The next stage of the war is probably after Claudio has been completely destroyed, that is, a few months later, he said that one year, but to make players feel at ease.

Lu Yang speculated that now Claudio and Hariken had discovered their situation in Lu Yangkeng. The original plan was that Lu Yang was exhausting the army of Radvedev and Jerz for them, but Lu Yang and the two have discussed.

Now, Hariken is facing the absolute main force of Radvijev. Hareken, who was supposed to have the upper hand, was beaten up by Radvijef. If it wasn't for Radvijef that had no siege equipment, There are fewer forbidden mages than the other, and he already stepped in with Stephen to defeat Harriken.

Claudio's side is the same. Gertz and Lu Yang are playing fakes. As a result of Claudio's intention, only 2 million people were sent to attack Gerz. As a result, Claudio was defeated in that battle. Now Jell I'm united with Tom, and the two played against Claudio.

If there are no accidents, in the near future, the two sides will go on strike, and then in a few months, the remaining eight strongest guilds in the central part of the new continent will jointly encircle the two king-level guilds in the southwest and southeast regions.

By the time they are finished, the Brotherhood of the Iron Blood should develop to terrify the enemies in the central part of the New World. However, even if Harriken and Claudio knew that Lu Yang had pitted them, they could only shoot their teeth to the ground. Stomach swallowed, they can not have another enemy like Lu Yang.

"This bastard, I'm going to kill him sooner or later." Claudio shouted as he watched Jerz's long-lost area.

Alice looked at Claudio gently and relieved: "We were also deceived by him, so miserable. Trust me, as long as you support me, I can stop Lu Yang. After all, we have sand. Natural danger in areas such as Lulu Falls and Silent Hill. "

Claudio didn't use Alice even if he had another helper, but he didn't. Under the same circumstances, he could only say, "I will support the development of the people. I want to share copies of the strategy, lack of equipment and potions."

"Thank you very much." Alice looked at Claudio with a wink, and such injustices were rare.

Game Studio, 33rd floor.

Lu Yang withdrew from the game and said to the blue feathers around him: "Go arrange it, we can get things done within one and a half months."

"Okay." Lan Yu is busy with the basic documents, which are all administrative trivial matters. These things seem small, but they are indeed the most central thing to consolidate the strength of the guild.

It is so-called that there is no widowedness and unevenness. It is very difficult to distribute the existing things of the guild evenly to everyone.

How many big companies, because the rewards and penalties after success are not clear, or the successful people think that the hard work is high, but the rewards given are too small and create a gap for the company.

Lu Yang took care of him inside the battlefield, but he couldn't do so carefully outside. Most of the things were for Lan Yu to sew up for him.

"Also this time the meritorious people joined the company, I also arranged together, take a good rest." Lan Yu said playfully.

Lu Yang nodded with a smile, how many consecutive days and nights of anxiety finally solved all the problems, he slept for two days and one night, until the next night, he woke up come.

Lan Yu has arranged everything, and the travelling staff has gone to Sanya in batches. It is already years later, and the price of tourism has dropped. In addition, there are more people going to the Brotherhood of Iron and Blood, there are 30 Tens of thousands of people have gone, and almost all the

travel agencies and hotels in Sanya have dispatched, and they are entertaining such a big business that makes Sanya City move.

When the last group went on a tour, Lu Yang brought together Lan Yu, Xia Yuwei and Li Wenxing of South Korea, Darvi and Padu of India, and Ayala of Spain.

Originally scheduled to go to Spain, Ayala's hometown, but Luyang was worried about Galga's crazy revenge, and eventually settled on domestic tourism.

When Lan Yu and Ayala and other women walked together, they instantly became a beautiful scenery on the West Island. Among this group of people, there are also a very special group of people. They are Lu Yang's spy leader Tian Fenghe His spouse's wife and children.

Tian Feng's battle was far from over. Although the internal rebellion was beautifully resolved, in order to prevent similar things from happening, Lu Yang ordered Tian Feng to take this opportunity to train a group of spies in the guild to find the traitors. Come.

Chapter 1604 - Wanjie Consortium Mission

♂? ,,

There are a group of people who are not here to play, such as Qing Qian Zimeng. According to Lu Yang's order, he has started new work and continues to penetrate the South Korea, India, and Japan areas, and still uses Internet celebrities as the Lord.

As for Tu Feng, he also began his infiltration, and constantly attracted the men of Olma, Sanyoumen and Stephen.

Lu Yang seems to be the most leisurely. He took Ayala and other regional vice presidents to play for ten days before he ended the journey. In fact, it is tourism, which is also a few of their reporting work, tedious. Under the data report, there is one thing in common, that is, the enemies have been eliminated, and regional stability will no longer be disturbed.

Lu Yang wanted this sentence, and returned to the game city, because the expansion was too fast, the war studio was renamed the Tiexue Group, and the two subordinate buildings were renamed the first and the second, and the manager of the two was Zhou Tianming.

Inside the game.

Lu Yang once again called the eight fierce and the little Phoenix and asked, "How is the level?"

"It's all up to level 175." Little Phoenix said excitedly. Players in the entire game city almost went to travel, leaving a few of them missing.

Lu Yang looked at each other and nodded in satisfaction. He said, "Go and play. The tickets have been bought for us. There is a person in charge who will take you to experience the customs and customs of China. You can go wherever you want. Months. "

"Boss, I really love it." Little Phoenix was excited.

Eight fierce men, Zhang Yuan and others are also eager to try, this time led by Zhang Yuan, along with the scroll master Grant.

"Experience Dan gives me, I want to go straight up to 175." Lu Yang said.

Little Phoenix returned the refining demon bottle to Lu Yang, and had a storage bag experience Dan, and then a group of people went off-line to travel.

Lu Yang took the experience Dan and quickly ate it. After eating for 10 minutes, the light flashed. He rose to level 175, and then returned to the Chiyang Fortress, where he learned the four practice departments to level 20.

“Hei Yan, come to the Guild Hall of Chiyang Fortress.” Lu Yang said in a message.

“Here it is.” Hei Yan replied. In less than 3 minutes, the little boy ran in and said, “Boss, what is it.”

Lu Yang threw the gourd to him and said, “Go to the copy of the blood ghost spider, and use this to grab the spider, you can make experience Dan. This task will be handed over in the future, and you can get priority to level 175.”

“Thank you, Boss.” Hei Yan was so excited holding the gourd that he had long heard that his boss had a way to gain high-level experience, and he could not think of this good thing now on his head.

“I’m gone.” Lu Yang put on his camouflage coat and flew to the Flame Fortress in the Indian region using the teleporting scroll, and ran down the avenue towards the level 175 map.

The Indian rebellion was solved very beautifully. Since the disappearance of Shrov, there has been no rebellion of any kind in India, and no one has quarreled for revenge for Shrov. Players along the way are playing monsters, everything seems so natural and quiet.

When Lu Yang passed by the 170-level map, he saw that a fortress was being rapidly constructed. This was the 170-level fortress that Lu Yang requested to start construction, and it could be completed as soon as half a month later.

Continue to run along the avenue. A small village appeared not far from the front. In appearance, the village is full of technological sense, and various long glass tubes are filled with pink and blue. Liquid.

A group of humanoid creatures at the door, wearing special pink coats, and various pipes.

System prompt: Found the World Realm!

“The admirable Luyang warrior, hello.” The captain of the guard of the Wanjie Consortium at the village mouth said respectfully to Lu Yang.

“Hello.” Lu Yang also bowed his greetings and walked into the village. Prior to his mission, he had worshipped the reputation of the Wanjie Consortium.

There are not many trigger points for Level 175 ghost artifacts. There are only dozens of Manchuria. The Consortium is one of these dozens.

When the player reaches the worship of prestige, he can receive the task of exploding ghost map in the World Realm Consortium. As it happens, Lu Yang has reached the worship of World Realm Consortium.

He entered the village and found the Prince of All Realms in the middle of the village. He didn't wait for him to speak. The Prince walked excitedly to Lu Yang and gave Lu Yang a big hug, saying, “My dear friend, finally came, I met When it comes to the problem, hope to help me solve it. “

Lu Yang asked with a smile: “What's the problem.”

“Mechanical Fire Dragon King.” Prince Hu Lei said depressedly.

When the Dragons entered the New World in search of the ancestors, the Fire Dragon Army led by the Fire Dragon King fought against the Legion of the Flame Demon, one of the nine pillar gods of the New World, and failed in defeat.

Seeing the huge family of fire dragons, Prince Hull, who has power, can fly, and understand elemental magic, is just right to combine with a new type of mechanical magic they researched. Therefore, Hull sneaked on the fire dragon and turned the remaining fire dragons. The ministry captured them, and then they carried out mechanical magic transformation.

After hundreds of years of experimentation and transformation, the Wanjie Consortium was successfully transformed. Since then, the Fire Dragon King has become a mechanical fire dragon king, and the fire dragon family has also become a mechanical fire dragon. The power has been improved hundreds of times over the original, even if it is Facing the subordinates of the Jiuzhu God at level 170, it will not fall into the wind.

Prince Hule of Wanjie expressed his great joy at this, but what he didn't expect was that his transformation was successful physically, but failed mentally. The first tens of thousands of fire dragons were in a state of insanity. They couldn't understand Hull's orders, and they became completely unwise beasts.

Hu Le sighed and said, "This was done in private, and it took a lot of manpower and material resources of the Wanjie Consortium. Although this incident will not make me dissatisfied, but it is too shameful, I hope to help I will kill these fire dragons, and I will be very grateful if they succeed. "

The system prompts: Whether to accept the mechanical fire dragon king killing mission!

Of course, Lu Yang chose it. His favorite task is to kill the mechanical fire dragon king. Not only is the reward in the map rich, the reward of Prince of Worlds is also very rich.

"Of course, my friend's business is my business." Lu Yang said.

"That's great." Prince Wanjie smiled with excitement, but after thinking about it, he said to Lu Yang: "Forgot to tell one thing, they are controlled by me in the starry space of Wanjie Consortium. The demon heart there is invalid. "

Wanjie Starfield is a special emergency evacuation site developed by Wanjie Consortium. It is also a storage place for Wanjie Consortium. In order to prevent enemy invasion, a suppression property has been set up. For ordinary players, this setting has no effect. However, such artifacts as the Devil's Heart will render them ineffective.

To put it plainly, this is an official setting in order to prevent artifact players from brushing equipment. Lu Yang scolded the official for lack of morality and said, "Can I go in now?"

"Of course." Prince Wanjie pointed Lu Yang with his right hand and said, "I hope to achieve what I want."

Lu Yang's body glowed with a purple light. In the next second, Lu Yang appeared in a space full of mechanized civilization, surrounded by silver-white metal walls. There were various transparent glass tubes against the wall. Inside, There is liquid bubbling.

At the top of the silver-white metal wall, there are lighting settings such as electric lights. The entire space here is bright and the space is very large. The platform in the middle is about hundreds of thousands of square meters. Place, but where a group of players come.

100 meters away from the entrance, there is a 30-meter-long fire dragon. His head and most of his body can be seen as a fire dragon, but the neck is entirely made of silver metal, and two-thirds of the wings are silver metal. There is a silver mask on it, the eyes are wrapped in metal masks, and the mouth is metal teeth.

The legs are also made of metal. As a whole, it has nothing to do with the fire dragon. It is a metal monster, especially the two huge fire torches on the back of the monster, and the two laser shots on the front of the body mouth.

Mechanical Fire Dragon (Special Elite)

Level: 175

Qi and blood: 300000000/300000000

Lu Yang sighed, why the blood of this mechanical fire dragon is so high, it is still a fire department, I am afraid that the magic resistance should also be very high, trying to kill them is not an ordinary effort.

Normally, this is not a place that individual players can play. Even killing a mechanical fire dragon alone requires 5 people to cooperate, because the damage of the mechanical fire dragon is extremely high. Here is a special map, which is worn alone. 170 The set of dark gold anti-warfare can't carry the mechanical fire dragon, and Lu Yang can't carry it alone.

If there are 5 people to fight, it will be difficult to kill. The easiest way is to fight with 10 people. But this map is special. There are more than 3 monster killers, and the elite monsters will double their health and triple. The number of players is equal to three times the amount of health. Players would rather fight less than learn more.

I remember when I first came out of this map, I do n't know how many people have come here alone, or formed a team of 5 people to enter here. There are few people who have singled out a mechanical fire dragon, even 5 people. Coming also walked into too deep area.

Lu Yang dares to come here alone, relying on his special items, escape daggers, ejection staff, stealth potions, silver clocks and other life-saving items, as well as so many control skills.

Another thing, Lu Yang is also used to being alone, not a special case, he still likes to fight monsters alone.

“Lava Eruption”

He began to release magma on the ground, a distance of 100 meters from the mechanical fire dragon to him. After it was covered with magma, he pointed at the mechanical fire dragon and said a spell.

“Comet Impact”

Lu Yang did not dare to use mixed spell skills. Mixed spells are range attacks. There is another mechanical fire dragon not far behind this mechanical fire dragon. Once he provokes the next mechanical fire dragon, he will return without success this time. Already.

“-898978”

Lu Yang's damage is more than 2 million. The farther the distance is, the higher the damage of the comet impact, but the damage that can be done is only that. It can be seen how high the magical defense power of the 300 million blood mechanical fire dragon.

♂? „

“Hello ~!”

When the mechanical fire dragon was hurt, he roared and ran towards Landing Yang. Lu Yang didn't dare let him approach the spell in his mouth.

“Flame Shock”

A firelight lit up on the head of the mechanical fire dragon, and the mechanical fire dragon was stunned for two seconds.

“Fire Shadow-Activated”

Lu Yang jumped in front of the mechanical fire dragon instantly.

“Fire Snake Bondage”

A sturdy fire snake trapped the mechanical fire dragon in place. After 8 seconds, the spell in Lu Yang's mouth came out again.

“Flame Storm”

The mechanical fire dragon was trapped for another 2 seconds, and then he chanted again.

“Yan Yang Suo”

The mechanical fire dragon was trapped for another 8 seconds.

“Remnant Flame-Activated”

Lu Yang jumped to the entrance 100 meters away and pointed his right hand staff at the mechanical fire dragon.

“Destruction Cannon”

The mechanical fire dragon was stunned for 5 seconds, and then Lu Yang’s spell came out again.

“Meteorite Falls”

A huge meteorite hit the body of the mechanical fire dragon and stunned it for 6 seconds. This set of skills came down to stun the mechanical fire dragon continuously, waiting for the mechanical fire dragon to wake up from its place, nearly 50 million health. Gone.

“Hello ~!”

The mechanical fire dragon fell into rage and ran quickly towards the landing sun. The 30-meter-long body and 10-meter-high height. When he ran fast, the dual sense of oppression brought by the dragon and metal made people feel uncomfortable. .

“flicker”

Before the mechanical fire dragon rushed to his side, Lu Yang turned into a light and jumped to a distance of 100 meters. The mechanical fire dragon turned back and sprinted. Every time he ran, he was injured by magma, and when he came to Luyang again.

“Escape The Dagger”

Lu Yang jumped back again. When he came again, Lu Yang began to jump with the residual flames. There was no way. The monsters here could only fight like this. I don’t know how many laps this way, and the mechanical fire dragon finally wailed and fell to the ground.

Suddenly, a big 8X8 explosion appeared in front of Lu Yang, which surprised Lu Yang. It should be the first time someone came here to fight monsters, so this happened.

Lu Yang looked at the objects on the ground, and suddenly, a special object appeared in front of Lu Yang's eyes.

Ghost Tool · Ring of Dragon (Level 1)

Level: 175

Defense: 1000-1000

Magic resistance: 2000-2000

Intelligence: +600

Constitution: +850

Additional Fire Spell Damage: +1400

Additional Fire Spell Critical: +1400

Ignore Fire Resistance: + 1%

Lu Yang picked up this equipment, and his happy face had blossomed. What is missing? Who can think of it, the first needy equipment burst out like this.

In this map of the Mechanical Fire Dragon King, a complete set of flame-based ghost devices can be produced. This dragon ring is one of them. However, the explosion rate of this ghost device is extremely

low, let alone kill the boss. Killing the lord does not necessarily reveal a ghost weapon, it is possible to give legendary weapons, even a dark gold weapon.

When the first monster came up to kill the ghost, it exploded, which made Lu Yang not know how to describe his luck. It can only be said that it was too good, it was really good.

He carefully looked at the appearance of the ghost weapon, the amethyst dragon ring, like a narrow oriental golden dragon plated into a circle, the dragon head rushed up, lifelike, even the purple dragon whiskers.

This piece of equipment now looks very bad. That's because the ghosts all need to be upgraded. Every time a monster is killed, the dragon ring will increase 1 experience. For every 1 level, the attribute is about eight times the growth. A total of 5 levels can be improved.

Lu Yang took out the goblin robot and built a teleportation tower on the spot. Now he doesn't need to go to fight the dragon dragon immediately. Instead of playing it slowly, it is better to raise his experience value today.

It is very easy to kill monsters to increase the experience value of the Dragon Ring. In the Old World, the first fortress of the city of St. Gall under his control, the Red Fortress, always kept fleshy female worms to make small bugs to upgrade for novice players.

Lu Yang waited for the sentry tower to be completed. He used the scroll to teleport to the red fortress. At this time, there were not many novice players in the fortress, and the place was basically deserted.

At the crater behind the fortress, more than 60 flesh-and-blood mother worms continued to spit out worms, and the crater was almost out of capacity.

“Second Injunction-Meteor Fall”

Lu Yang threw a huge fire meteor according to the crater, with a loud noise, except for the mother worm, the small worm inside died.

System Prompt: Ghost Tool · Dragon Ring Experience +1

System Prompt: Ghost Tool · Dragon Ring Experience +1

...

The system prompts: The level of the ghost weapon dragon ring is increased to level 1!

System Prompt: Ghost Tool · Dragon Ring Experience +1

...

The system prompts: The level of the ghost weapon and dragon ring is increased to level 2!

...

Lu Yang's current chat box is swiped by the tan system prompt, and then look at the level of the dragon ring.

Ghost Tool · Ring of Dragon (Level 5)

Level: 175

Defense: 30,000-30,000

Magic resistance: 35000-35000

Intelligence: +186600

Constitution: +208850

Additional Spell Damage: +271400

Additional Spell Crit: +271400

Ignore Magic Resistance: + 5%

Special Skill: Hades

At this time, I do n't know how many times it is. This ring alone is better than two 170-level dark gold equipment attributes.

There is also the property of ignoring fire resistance of 5%, which is very important to fight ghost copies in the future, because each ghost copy is not allowed to use the spirit of the demon.

However, Lu Yang is most excited about the last attribute, the special skill Hellfire, which is a skill that is triggered by chance. In the case of only one, it is about 1%. If you can get together the weapons and if the suit is a ghost weapon, it has a 30% chance to trigger.

Hellfire Flame's damage is fixed at 20 million points, which is equal to the health of a 160-level dark gold sleeve non-defense player.

Why Lu Yangfei wanted to join the eight fierce and the little phoenix, because these top players holding ghosts can turn into harvesters on the battlefield. They alone top a thousand people and use them to attack the enemy's rear supply team or elite. Support troops are the best option.

"Boss, why are you here in person?" A shooter player quickly ran to Lu Yang, complimenting.

Lu Yang looked at the shooter player. He didn't know him, and asked with a smile: "Give a task and continue to let these 60 females make small bugs. The more, the better, it doesn't matter that the area is covered."

“Guaranteed to complete the mission!” The shooter player said excitedly, he was only level 50, and was responsible for managing this fortress. The New World was not qualified to go, and I did not expect to see the boss of his own guild here.

“There is another thing that I am not allowed to say. If it can be kept secret, I will give a good reward.” Lu Yang said.

“Thank you, boss.” The shooter player was even more excited.

Lu Yang took out the transmission scepter and flew back to the map of Wanjie Starfield, replaced a ring, and equipped the ring of dragons, Lu Yang’s magic damage increased by more than 300,000 points.

The flames on the ground had not yet disappeared. Lu Yang looked at the next mechanical fire dragon, and a comet hit him.

“boom”

With a loud noise, the mechanical fire dragon roared towards the landing sun, but this mechanical fire dragon made Lu Yang frown.

Mechanical Fire Dragon (Elite)

Qi and blood: 200000000/200000000

The mechanical fire dragon’s health is only one hundred million less than the previous one. At this time, Lu Yang noticed the name of the mechanical fire dragon. Although he is also an elite, there is no prefix in front of his two words, that is, Said that the elite Lu Yang killed just now is different from them.

Lu Yang remembered that he patted his head and scolded himself for not having a copy of the ghost weapon for too long, even forgetting the existence of special elites.

Special elites, they are a group of special creatures whose magic resistance and defense are close to boss monsters. They only have less blood, but the damage is not much different from that of the lord.

Lu Yang was lucky just now. He was habitually unwilling to let the stranger run into him. If he came in from another profession, he thought that playing this strange monster would be the same as the ordinary elite. Inadvertently, the two dragons would die back.

“Flame Shock”

Lu Yang touched the head of a mechanical fire dragon and stunned it in place. A purple flame burned with red-gold flames, causing 890,000 damage, while hitting 20 million fixed damage, regardless of magic resistance!

Lu Yang was eager to get together a set of ghost equipment, as before, after a set of stun skills, he began to walk back and forth through the magma with a mechanical fire dragon.

This ordinary elite was much slower than the special elite. It was not long before he was ground to death by Lu Yang. He continued to walk forward and found a mechanical fire dragon.

With the Dragon Ring, ignoring the 5% fire resistance of the mechanical fire dragon, and the occasional damage caused by the outbreak of the phantom flame, the speed is greatly improved.

When Lu Yang fought here, on the other side, there was new development in the central part of the New World. Lu Yang took his men out to play for a month. During this month, Gelga and his remnants were completely destroyed. Eliminated, but the two strongest guilds of Jerez's Freedom Corps and Tom's Book of Truth survived.

The only regret is that Tom was destroyed by a third of his territory. As for Jerz, he only lost an optional fortress. As a result, Claudio's battle was determined. Claudio's idea was over. He wanted to take advantage of the exhaustion of the battle between the nine strongest guilds and Lu Yang to kill Jerz, Tom, and Galga in World War I, so that he could control the New World. One-fifth of the area became a larger guild than the Brotherhood of Iron and Blood.

Then, taking advantage of the opportunity to get rich in the war, he continued to attack Sanyouweimen and Olma, complete the closing of the Jagged Brothers Alliance and beat the dogs, and completely lock the Jagged Brothers Alliance in the front-line area of Shalulu Falls, preventing Lu Yang from stepping into the central part of the New World region.

At this point, Lu Yang was exhausted and had no ability to attack again. He could only rest. When Lu Yang rested, Claudio also stood firm. He could use the hatred of Luyang and Sanyou to guard Sanyou. The guards merged into the guild, so Lu Yang could never go out to the tiger's mouth, and had to wait for Claudio to destroy him.

Unfortunately, in the battle between Claudio and Gerz, Gerz did not seem to have suffered much loss before, and the main force is still fierce. He battled with Claudio 13 times and half of Claudio lost strength.

As for Tom's side, Lu Yang was not the main target of attack at first. Under the circumstances of Tom's life, even if he lost a large area of territory, it also caused Claudio's other army to be badly hit.

Chapter 1606 - The battle subsides

At this point in the battle, both Jerez and Tom, who were already tired, did not want to fight, and Claudio had no stamina. The two sides temporarily stopped, but both Claudio and Tom and Jerez understood Since then, both of them have an endless end.

Claudio, standing under the Jerz Fortress, looked at the guarded Jerz army and thought blankly in his heart: Could it be that Lu Yang didn't hit them hard?

But that's not right. He saw Lu Yang's attack on Gertz's army with his own eyes. It was the so-called sigh. Claudio was sighing at Gerz's fortress and retreated with the main force.

This sigh was also the last time Claudio was standing under the Jerz Fortress. He will no longer be able to bring the team here.

Claudio's luck was pretty good. The really bad luck was Harriken. He took the main force against Radevjev and Stephen, and the main force brought back by them both stormed through.

Stephen was a bit miserable by Lu Yang's cursed mage before, but even so, Harriken only occupied one-third of Stephen's area, and one-fifth of Radevjev's area, Roland. He didn't have any chance to touch his finger in Germany's area.

At a time when Radevjev, Stephen and Harriken could not argue, and no one wanted to retreat, but had to retreat, the Three Friends Guards appeared, and as a peacemaker, he persuaded the two parties to strike and convened again. Jerz and Tom, as well as Olma and Anatoly, who were not affected by this incident, have eight strongest guilds in total and announced the formation of the strongest alliance.

Claudio and Harriken, who were still hot in the strike, didn't panic. The two realized the reason why Sanyoumonmon persuaded them to strike, originally to form an alliance to attack them.

The eight strongest guilds in the central region are definitely not alone in the ability of Harriken or Claudio to deal with it. Think of the Brotherhood of the Iron Blood. If it were not for Zhou Tianming's death, he would not be able to hold his mouth.

Claudio and Harriken's team does not yet have a special blood legion such as the Iron Blood Brotherhood and a warlike tauren. It is also not as brave as the Iron Brotherhood.

Even if the two men had a dangerous relationship, they did not have the confidence to block the joint attack of the eight strongest guilds by themselves.

"No, we have to find someone to make an alliance." Claudio couldn't sit still for the first time.

Natalia said with a smile: "Look at Harriken and Lu Yang, they will be very willing to formally ally with us."

Claudio nodded and said, "The three of us are all king-level guilds. The enemy must want to destroy us first. I'll go to them both."

Claudio immediately sent a message to Lu Yang and Harriken, just like Claudio, Harriken was in a state of restlessness, and now he can still remember the look that Radvijev had left when he left.

"The eight strongest guilds in the central region have already warned us. I suggest that I, Harriken and Lu Yang, our three guilds form an alliance. If the enemy attacks any of our guilds, we will unite and fight them. how about it?"

Harriken received the letter and immediately replied excitedly: "Agree, we must let the enemy know that no matter how they want to fight, we can destroy them, and let them wait to die."

Lu Yang looked at the news and grinned, saying righteously: "This alliance is necessary, and we must work together to kill the garbage in the central region."

Claudio released a long sigh of relief, and sent old tears to form a new group. There were only three of them. He said excitedly: "Two brothers, I heard that Sanyou Weimen is in the middle of the Celestial City. A grand alliance ceremony was held, and we held a ceremony just opposite them. How about that?"

"Now?" Harriken asked in surprise.

"Yes, it is now," Claudio said.

"Then let's talk to them, and we will do it, now." Harriken said angrily.

Lu Yang shook his head with a smile. The two were really scared, but now they know that they are too late. Both sides have offended the eighth strongest guild, occupying so many places, and spit it out. It's impossible. It's hard to swallow if you eat it.

It can be said that Claudio and Harriken have big ambitions in the chest but have no half strategy. They only want to take advantage, but they don't want to think about it. No matter whether he is Lu Yang or the eighth strongest guild, whose advantage is so easy to take. what.

"Yes, you can discuss specific methods, but my alliance with you cannot be made public for the time being." Lu Yang said.

"Why?" Claudio asked.

Lu Yang said, "I'm looking for Alice's troubles. If we expose our alliance now, it means that Alice's person is sandwiched between you and me. I worry that he will run away with someone, then I can't get revenge. . "

Claudio and Harriken both thought for a long time and each agreed to Lu Yang's request.

Hareken said: "Then I won't take you first, but let's say that once we start the war, or if you lay Alice, our covenant will be exposed immediately."

"Of course." Lu Yang naturally had no opinion.

"Then we will discuss the specific measures for alliance, and we will not disturb President Lu Yang." Claudio said, in fact, Claudio still has a deep hostility to Lu Yang, he did not want to alliance with Lu Yang at all, I just want to use Lu Yang. If he and Lu Yang don't have Alice as a buffer, he really worry about other problems.

Lu Yang watched the two no longer chatting. It is estimated that they were on the phone or meeting to communicate. He closed the chat box, picked up the phone and called Tu Feng, and asked, "How is the penetration of the black gauze?"

Tu Feng is infiltrating the area where the black yarn is located according to Lu Yang's order. True, Lu Yang has given this area to the black yarn, but he is cheap and not so easy to occupy.

The reason why Lu Yang ordered Xue Yiming to give Alice this idea, in fact, he is the group of players who pay attention to the black yarn, they not only have Chinese, but also Europeans.

After the integration of Alice, the total number of players under the black yarn is now close to 50 million. Continue to let Alice develop this way for several months. The population she can absorb is definitely more than 100 million.

By that time, Lu Yang directly killed Alice and took these people as her own. Even if there was a rebellion, it would be fine to rebel a few times. As for whether Claudio and Olma would agree, he did n't need to Think, at that time, Claudio and Olma and others were fighting.

Tu Feng said, "I have contacted several of the deputy regiment commanders of He Peng. At this speed, in less than a month, I can hollow out the black gauze."

The guild they created with Alice and Black Veil had a very, very huge loophole. This loophole should not have existed, but it happened in the guild of Alice.

This loophole is called uneven distribution. The two decisive battles caused by Alice were to have a good place to develop the guild, but he failed. Now that there is a gap, she feels sorry for her money and doesn't want to Spend so much money with his men.

In order to save costs, his accountant boyfriend gave an extremely gloomy idea, only paid the head of the legion, the deputy head of the legion had no money, and the ordinary head of the legion could only make a living by himself. There are some who are willing to apply for withdrawal.

With this move, Alice can save millions of credit points a month, which makes her feel relieved a lot, but there is an old saying in Huaxia that if you are rich and do n't spend money, you ca n't get together, Alice is relieved , The players under his hands are upset.

Not only the players below the deputy commander complained, but even the commander of the commander complained, on the one hand, the hatred from their subordinates, on the other hand, their wages were also reduced, and they did the most troublesome work, but gave the least money. With no money to take, Alice's area clearly seemed stable, but in fact cracks were gradually forming inside.

Lu Yang said: "Continue to recruit their deputy regiment commanders, first pick those who are outside and ask for money and money for things. This immediate benefit is nothing."

With 100 million more people, the monthly income is tens of millions. Tu Feng knows this and says, "OK."

Lu Yang closed the talker and continued to kill the mechanical fire dragon. After playing for a whole day, he encountered three or four special elites and killed several bosses, but none of them broke out, leaving Lu Yang to regret to quit. Up the game.

Wait until the next morning.

Lu Yang continued to kill mechanical fire dragons in Wanjie Starfield. The map of Wanjie Starfield was very large. Lu Yang ran straight, killing the portal of the star domain until the next night.

The second layer of the star field is different from the first layer. The first layer is a large space. Starting from the second layer, it is the laboratory of the star field.

From the second floor, you can see that there are countless vertical rows of small rooms from left to right, with an interval of 80 meters between each two rows.

Just like a prison The room is made of silver metal, and the gate at the entrance is a row of purple iron pillars made of special materials.

In each room, there is a mechanical fire dragon. The range of this second floor is not smaller than that of the first floor.

Lu Yang didn't know which of these mechanical fire dragons were special elites. It was too much work for him to find them one by one. He decided to use a simple method.

"Second Injunction-Meteor Fall"

At the center 200 meters away from Lu Yang's right hand, a huge fire meteor fell down, stunned all the mechanical fire dragons in the room within 200 diameters.

"Hello ~!"

"Neighing ~!"

...

All sorts of hissing came and went, Lu Yang took out a bottle of stealth potion and drank it. After 5 seconds, the mechanical fire dragons woke up, but could not find the object of hatred, and stopped the guild to rest.

Chapter 1607 - Ghosts · Mechanical Fire Dragon Armor

In the invisible state, Lu Yang looked to the right with his voice. He seemed to hear that there were special elites here. Their shouts were different from ordinary elites. This is what Lu Yang called yesterday. It was discovered one day that the special elite's voice was even higher.

Sure enough, after three laps in the right area, Lu Yang found a special elite mechanical fire dragon that was trapped in a prison cage.

"Lava Eruption"

...

Lu Yang is standing in the middle of the two rows of prisons. Only 5 meters from the left and right of this line will not cause strangeness, otherwise the mechanical fire dragons in the nearby prison will be drawn out.

He released 10 lava eruptions in succession, creating a 200-meter-long magma corridor, and then he returned to the door of the special elite's laboratory.

“Flame Shock”

Lu Yang raised his hand and hit a magical dragon on the head of the fire dragon, and stunned it in place.

“Lava Eruption”

Lu Yang put a magma at the foot of the mechanical fire dragon. As before, after a set of stun skills, he led him back and forth in the magma for more than ten laps.

“Woo ~!”

With a wailing sound, the mechanical fire dragon fell free on the ground, and a brand new Amethyst Warframe burst out.

Ghosts · Mechanical Fire Dragon Armor (Level 1)

Level: 175

Physical defense: 5000-5000

Magic defense: 5000-5000

Intelligence: +900

Constitution: +1050

Additional Fire Spell Damage: +2400

Additional Fire Spell Critical: +2400 points

Ignore Fire Resistance: + 1%

Lu Yang's eyes showed an excited look, and he had to say that the first person who came here to open up the wasteland was lucky. Even if the second person came over, killing the special elite did not necessarily reveal the weapon equipment, even the lord would not. He came out, but he was lucky, and even one of the most valuable ghost equipment, the mechanical fire dragon armor burst out.

Regarding the weapon level, whether it is defense or mage, the difference in defense value is not too much, that is, if a player equipped with a weapon set, even a mage, the defense and magic resistance are not inferior to the defense. too much.

The upgrade method of the clothes is the same as that of the ring. It requires experience points. After building a sentry tower in situ, he uses the scroll to fly to the red fortress.

After more than one day and one night of reserve in the crater in the central area of the fortress, the mother worms reproduced the worms in the middle of the night.

“Mixed Spells-Fire and Wine Storm”

Lu Yang summoned the avatar, a spit of fire wine sprayed out, and a worm in the crater ash annihilated, and his mechanical fire dragon armor rose to level 5 in an instant.

Ghosts · Mechanical Fire Dragon Armor (Level 1)

Level: 175

Physical defense: 300,000-300,000

Magic defense: 300,000-300,000

Intelligence: +258900

Constitution: +295050

Additional Fire Spell Damage: +444700

Additional Fire Spell Critical: +442400 points

Ignore Fire Resistance: + 5%

Special Skill: Hades

Lu Yang looked at the attributes of this armor, and his face was full of excitement. The attribute of this piece of equipment was equal to a complete set of Antola War Council, and the defense was even more amazing.

If you can really come up with a set and go out to fight with people, it is not a problem to fight against melee. Lu Yang can still remember how hard it was to collect a full set of ghost weapons from the last life. Every one can collect such equipment. The player is a godlike presence on the battlefield. I don't know how many people can work together to kill him. As long as he is given a chance, he can kill everyone who is not a ghost suit.

Almost four years after the service was started, a European studio was lucky enough to get a set of Level 175 ghost weapon suits for their old piano magician, and he could sweep a piece by himself if there was a war, uh, but There is also a disadvantage. The person holding the ghost equipment has become the target of all players in the New World server.

I remember the boss of that studio, that is, the piano magician. As long as he wore a ghost suit and went out, he must be followed by thousands of elite players who hunted him down. Anyone who could burst him with a ghost weapon died a hundred times. They all make money.

As a result, the piano magician never dare to wear a ghost suit out of the safe zone. Basically, as long as he stepped out of the safe zone, tens of thousands of skills will hit him at the same time, so that he begs those who chase him on the official forum. People, I will not wear a ghost suit in the future, do not kill him, the level is almost gone.

Every time I think of such fun things, Lu Yang couldn't help laughing, not only studio players like him, but even the chairman of the strongest guild, he didn't dare to wear ghosts when no one was with him To go out, just like Lu Yang, you must first use a camouflage coat to ensure your safety before you can go out. Once exposed, you must leave immediately. Otherwise, if you have an accident, you can cause people to collapse if you suspect it.

Lu Yang wore the fire dragon armor on his body, and the instant damage burst. The damage of the law changed from more than 2 million to more than 3 million. The chance of triggering the underworld is also greater. He looked around.

“Red Lotus Explosion”

Lu Yang launched the mixed spell, threw a skill according to the right, and quickly returned the two avatars to the special space. He drank the stealth potion.

“Hello ~!”

“Neighing ~!”

...

There were also special elite voices. Lu Yang ran to follow the voice. Unfortunately, this time a piece of dark gold equipment was exploded. Lu Yang shook his head. He felt that it was too slow to kill and needed to speed up.

In memory, the door of a room on the second floor of the Starfield was very small, as if it was the rest room of the test staff of the Wanjie Consortium. Lu Yang stopped the attack and searched curiously.

Unfortunately, the map was too big, and I found it for half a night, but I couldn't find it. In desperation, Lu Yang went off the line to rest, waited until the next morning, and at noon time, he was finally in Starfield. A room with clear glass windows was found in the upper left corner of the second floor.

The room is full of test benches and various red buttons. In the space of the bench, a black pyramid-like thing is placed.

Unknown item

Attributes:??

Lu Yang raised his eyebrows and put this unknown item in his backpack. He hadn't heard of this thing, but it must be a treasure. Anything unwilling to write in the Raiders must be a top secret item.

He walked to the doorway, released lava eruption to the corridors on both sides, and discharged five rows within 200 meters around the promenade on both sides before returning to the room.

“Summon the Wild Ancients”

A flash of light flashed, and a huge body of the ancient alien appeared beside Lu Yang. He pointed at the door, and the ancient heterogeneous stepped forward to block the door.

“Forbidden Curse-Demon Flame Burned Out”

Lu Yang said in his mouth that after 30 seconds, countless fireballs were dropped within a range of 1,000 meters in diameter.

“Hello ~!”

“Neighing ~!”

...

The sharp roar came and went, and thousands of mechanical fire dragons in the surrounding laboratory were hit by the flames, rushing out of the gate and running towards the landing sun.

I just entered the row of corridors where Lu Yang was located, and was instantly hit by lava on the ground. When I ran to the door of the room where Lu Yang was located and wanted to rush in to attack, I was blocked by the strange and strange species in front of the door .

“Hello ~!”

The three fire dragons aimed at the ancient ancient heterogeneous jet flame.

“8549403”

“8394839”

...

Every ordinary attack is more than 8 million damages, but the ancient blood of the ancient heterogeneous is 80 billion, so it is not afraid of this damage.

“Second Injunction-Meteor Fire Rain”

Lu Yang suspected that the killing of monsters was slow, and he threw out the secondary forbidden spell. Then, Lu Yang summoned a clone.

“Mixed Spells-Fire and Earth Storm”

“Mixed Spells-Fire and Wine Storm”

“Mixed Spells-Red Lotus Explosion”

“Hybrid Spell-Fire Cloud Storm”

...

Four super powerful mixed spells were played out in succession, and Lu Yang was like a mobile artillery, giving him a bracket, and he could output infinitely.

The mechanical fire dragon dropped blood very fast. In less than 10 minutes, most of them were burned to death by Lu Yang. Only a dozen mechanical fire dragons were walking around the door.

Lu Yang looked at the dozen fire dragons and smiled, because these dozens were all special elites, who had a chance to drop the best ghosts.

“Be sure to drop the ghost weapon, another ghost weapon.” Lu Yang said in prayer.

A few minutes later, more than a dozen mechanical fire dragon special elites successively fell to the ground, each of them bursting into the 8X8 superb explosion.

Lu Yang quickly jumped out of the door using flashes and looked at the items they dropped. Among the layers of items, the top one was their dozen of mechanical fires. Among them, the most dazzling equipment was two Pieces.

Ghost Tool-Mechanical Fire Dragon Leggings

Ghost Tool-Dragon Ring

Lu Yang felt that his luck was so high today that he actually exploded two ghosts, which was an unimaginable thing.

This is wasteland development. When you come in next time, it is absolutely impossible to have such an explosion rate. There are more than 60 new continents on this map. Remember that in the last life, players when they found that the ghost had dropped the map, these sixty maps became the main battlefield, because anyone can fly in as long as the reputation of the World Realm is worshipped.

At that time, in the star domain, whether it was ordinary players or the elites of major guilds, it was not clear what the camp was, and they were all fighting in PK, especially after the fire dragon king refreshed.

I remember at that time, everyone who could hit the ghost equipment and got outside started at 100,000, and the most expensive one sold for 1 million.

Lu Yang sighed and put the two ghosts in his backpack. He didn't fly back to the Red Fort immediately. Only a few hours have passed since he went last time. There are not too many small bugs, and it is inappropriate to go.

When Lu Yang went on to brush the Dragon King on the other side, on the other side, a total of 43 fortresses in the area occupied by the Group of Eight had spawned more than 200 forces, all claiming to regain territory for Galga and blood slaughterers. .

Claudio just signed an armistice agreement with the eight strongest guilds, and his occupied area started to swell again. He had to send players from affiliated guilds to participate in the battle. However, these players who were abandoned by the Group of Eight had a good combat effectiveness. Claudio's The affiliated guild, after playing with them for three days, did not win.

Of course, Claudio did not lose, but this gave these rebels great hope. From the ice mark fortress in the bottom right corner to the ruins fortress in the upper left corner, more and more rebels, As for Claudio, he had to give up the upgrade of the main force and sent millions of main forces to this area. Even so, it took three days to wipe out more than 200 shares of power.

During these three days, Lu Yang squatted on the second floor of the Starfield and brushed up his intelligence. All the information came from Tu Feng's summary. Tu Feng then said: "This morning, Claudio retreated with the main force. It is estimated that he is still late at night . "

Lu Yang laughed and said, "He thought this time was over. It was a delusion. Look at it. With more than 200 groups of strength, you will find that they are scattered and won't win at all. Slowly, they will merge. Together, they will become dozens of stronger shares. If they still cannot win, they will continue to merge until their confidence is smashed, and Claudio's men can't improve the level.

Tu Feng also laughed and said, "I have sent someone into their interior. I am a Chinese of British nationality. I have failed to do business at home, and I am looking for a high income to support my family."

"Identities must be verified. If we are raped internally, we will lose adults." Lu Yang said.

He has the largest spyware system in the game. If it is penetrated by enemy spies, his spyware system will become a joke.

Tu Feng said: "This person was collected by Qing Qian Zimeng through the British Internet platform. I hired a private detective to check the condition of his home and confirmed that he has no problems."

"That's good." Lu Yang was very relieved about Tu Feng's work. He hung up the intercom and looked out of the gate. In the past three days, he was killed by all the strange creatures in the second floor of the star domain. A ghost weapon.

Fortunately, no one else has entered here, and Lu Yang still has no need to rush to the trouble of the mechanical fire dragon king. In the past three days, he has upgraded the ghost weapon · dragon ring and ghost weapon · mechanical fire dragon leggings to level 5 Like the clothes, the leggings also added more than 900,000 spell damage and 200,000 intelligence.

Counting the Dragon Ring, Lu Yang's magical damage reached 4.5 million, and four pieces of ghosts also made the possibility of triggering the Underworld higher. He felt that he could enter the third level of the star domain.

Lu Yang put away the wild and ancient species, walked out of the laboratory door, ran along the current avenue, toward the middle of the map, and entered the entrance of the third floor of the star field, just on the square in the middle of the map.

At this time, the mechanical fire dragons in the map were all cleaned up by Lu Yang, and the range of the forbidden spell attack was wide. Even if Lu Yang was in the laboratory, he could draw the strange here.

Running all the way, he came to the square, and a purple transmission aperture was emitting a dazzling fuchsia light.

The aperture is about 3 meters high. Lu Yang walked into the aperture, a flash of light flashed, and he appeared in a larger square.

There is no wall at all on the left and right sides. The vastness is hard to imagine. In this huge square, there are mechanical fire dragons everywhere, and there is a huge high platform 100 meters away in front of Lu Yang. A giant mechanical fire dragon trapped in a chain, he has a loud name, called the mechanical fire dragon king.

In the entire star field, there are two mechanical fire dragon kings. One is the one in front of the eyes, and the other one is hidden in the fifth floor of the star field, which is the lowest one. The mechanical fire dragon in front is in the official official history. He is an early fire dragon family. King of that year, but in the battle with His Majesty the God of Nine Columns, the fire dragon in front of him was severely damaged, and during the transformation process, due to repeated failures, although this mechanical fire dragon king saved his life, but the strength is better than the bottom one Much worse.

As for the mechanical fire dragon king on the bottom floor, it is a new generation of fire dragon king transformed by the powerful realm to allow the fire dragon to reproduce freely.

Of course, even the old Fire Dragon King is not easily killed by Lu Yang, especially when there are so many mechanical fire dragons around.

“Ancient Heterogeneity”

With a left-handed move, Lu Yang summoned the wild ancients, fired a comet at a mechanical fire dragon, and hit him slowly, little by little.

For two full days, Lu Yang was cleaning up these mechanical fire dragons. It was only in the morning of the third day that the mechanical fire dragons were finally killed. Looking at the mechanical fire dragon king in the middle of the huge hexagonal prism platform, Lu Yang stepped forward. 30 meters away.

Mechanical Fire Dragon King (First Class Lord)

Level: 175

The blood and blood volume is 100 billion yuan. It is reasonable to say that killing him requires a team of 20 or even a team of 40, because the mechanical fire dragon king has too many skills, 8 long-range and 12 melee, but if there is a mistake, This is the end of the regiment, but Lu Yang is not afraid. He has wild ancients and healing rings. Therefore, he dares to challenge the mechanical fire dragon king.

“Ancient alien species, come on.” Lu Yang issued an order, pointing his staff with his right hand, and a magma erupted at the foot of the Fire Dragon King.

“Roar ~!” The mechanical fire dragon king was lying on the ground and fell asleep, the chain broke instantly, it stared at the landing sun, and said with a huge voice: “Humble human, you broke into the star field, this will be your life. The end point. “

“Heavenly beheaded!” Hegu Xuan didn’t wait for him to finish, hacking 8 times according to the mechanical fire dragon king.

“Roar ~!” The two mechanical forelimbs of the Fire Dragon King furiously launched an attack on Xuangu Heterogeneous.

“157193049”

“152394859”

Each attack is 150 million damage. Even if the ancient alien has 80 billion blood, it is still difficult to resist. This is the damage when the mechanical fire dragon king did not put special skills.

“Summoning the avatars” Lu Yang summoned all four avatars and said the spells in order.

“Mixed Spells-Red Lotus Explosion”

“Mixed Spells-Hundred Snakes Kill”

“Mixed Spells-Fire and Wine Storm”

“Hybrid Spell-Fire Cloud Storm”

...

A total of 8 mixed spells were released, but each spell killed the mechanical fire dragon king's health of 10 million to 30 million. When added together, it killed nearly 200 million health, which is five times the total health. One percent.

You know, Lu Yang's magic damage has more than 3 million, each skill is the damage result multiplied by 9 or even higher, before hitting this health, the mechanical fire dragon king has at least 2 million magic resistance.

100 billion health, 3 million magic resistance, and 150 million damage per attack, this is a lord who can only resist wearing a 170-level legendary shield or even a ghost shield. If Lu Yang has no wild ancient aliens, Can't beat him at all.

It's also Lu Yang's luck. He had dealt with the wild ancient aliens before. If not, he can only watch the mechanical fire dragon king go away.

“Roar ~!” The mechanical fire dragon king was hurt by Lu Yang, and on top of the silver-white mechanical armor on the back, two giant cannon barrels were suddenly pointed at him.

System prompt: laser is about to aim, please be careful!

“Fuck.” Lu Yang was silent. The thing he was most afraid of was laser attacks. The gadget was instantaneous. If he didn’t pay attention, he would be hit. The physical attack of the mechanical fire dragon king was 150 million. Now it is magic. Such a big attack will definitely not be less than 200 million.

Lu Yang quickly stared at the two huge gun tubes, and suddenly, Lu Yang saw purple lights appearing in the two gun tubes.

“flicker”

While a white light was on, two huge lasers hit white light. 30 meters away, Lu Yang looked at the laser for a while and was afraid. He smiled and continued to output to the lord.

“Mixed Spells-Fire and Wine Storm”

...

The hybrid spell has a fast cooling time, only ten seconds. This single attack, the one that Lu Yang likes most is the killing of hundreds of snakes. A hundred fire snakes hit the head of the mechanical fire dragon at the same time, and can hit more than 30 million. hurt.

1 minute later, the mechanical fire dragon king’s health dropped by 1%. He stared at the landing sun and roared: “No one can escape the fetters of fate, let me help you.”

The chest of the mechanical fire dragon king is made of silver metal. He suddenly stood upright. The original silver metal chest had two large holes, and the two shell-like things were exposed. The voice just fell, and the two shells were long. The long tail of fire shot towards the landing sun.

“Escape The Dagger”

Lu Yang threw a dagger and appeared 100 meters away on the other side. Just after landing, two huge fireballs with a diameter of 50 meters popped up in the position where he stood.

This skill is relatively easy to evade. What is really difficult to avoid is that the mechanical fire dragon king's blood volume drops below half. After 10 minutes, Lu Yang let the wild ancient aliens hide in the distance. While adding blood to the wild ancient aliens, he was pulling the mechanical fire dragon. Run over the map.

When the blood volume of the Aragua heterogeneity is full, let the Aragua heterogeneity fight again, and then go back and forth three times. After half an hour, the blood of the Aragua heterogeneity drops below 50%.

“No one can invade the star space of the World Realm Consortium The target danger level is increased, and higher-level strike skills are used.” The mechanical fire dragon king made a mechanical sound, and suddenly it lay on the ground with its back The metal holes were all open, and nearly a hundred small holes were exposed densely.

In a blink of an eye, these metal holes suddenly ejected countless small * s into the sky. There were hundreds of dense feet. When they flew to the sky, they burst open, and countless fireballs fired around the landing sun. Come on.

“Ice Guard”

Lu Yang instantly turned into an ice cube and froze himself inside. This trick is a mortal skill. You must freeze yourself with refrigerator-type skills, otherwise any small fireball will cause hundreds of millions of injuries and will die if you hit it.

“Lethal Strike-Laser Cannon” The mechanical fire dragon king made a mechanical sound again. After standing up, he opened his mouth to point at Lu Yang's ice.

This trick is invincible. Once hit, it will undoubtedly die. At this time, the small fireball outside is not finished yet, and the laser cannon is preparing quickly.

The only way to crack this trick is to use the flashing skill at the moment of laser emission, because the last one of the small fireball just happened to fall at that time, and the difference between the two is less than 0.5 seconds.

Chapter 1609 - Ghost Tool: Mechanical Fire Dragon King Staff

This depends on the player's reaction speed. Lu Yang's reaction speed is now about 0.2 seconds. It may seem difficult to avoid him, but it is actually very easy.

The laser cannon becomes more and more dense in the mouth of the mechanical fire dragon king. When the limit is reached, the mechanical fire dragon king shoots out to Luyang, which is not an instantaneous skill, but a continuous skill.

“flicker”

Lu Yang jumped to the side 100 meters away instantly. He just landed and could still feel the temperature of the small fireball bursting from the ground.

The body of the mechanical fire dragon king turned towards the landing sun, and a laser was still in his mouth. Unfortunately, when he moved to the position of 30 meters, he stopped and resumed the attack on the wild ancients.

Lu Yang breathed a sigh of relief, and continued to attack with mixed spells. After another 10 minutes, the blood of the mechanical fire dragon king dropped to 40%. His two giant wings suddenly opened. At this time, his wings were completely made of machinery. Mechanical surface injuries, exposing numerous small holes.

System prompt: * Coming soon!

Almost 100 small holes fired 100 at the same time, flying towards the landing sun, but Lu Yang stood still.

“Mixed Spells-Fire and Wine Storm”

Lu Yang blasted out a flame, 100 pieces on both sides * did not wait to hit Lu Yang, he was blasted by the fire and wine storm, this skill can be blasted, but most players do not know, the first encounter They are all evasive, but this skill can track the target, it can't escape at all, each * 's damage is 100 million, and it will die if it hits.

In fact, this trick is also a trick of the pit lord. His explosion bleeds blood on both the player and the lord. Therefore, Lu Yanggang ejected and 100 * exploded around the blame himself.

Nearly 10 billion of blood was instantly blown up, and the ancient and alien species were also affected. Lu Yang quickly asked him to withdraw and add blood to him, and at the same time he pulled the mechanical fire dragon king and ran around.

The Mechanical Fire Dragon King has no hatred. No matter who hits him, he will cut whoever. Therefore, Lu Yang pulls up very easily.

After 10 minutes, the ancient blood of Xuangu recovered to fullness, rushed to the front of the mechanical fire dragon king, continued to slash, and Lu Yang also continued to release the hybrid spell.

30%

20%

...

5%

The mechanical fire dragon king's blood volume is getting less and less. When the last 1%, the body of the mechanical fire dragon king emits a reddish light.

The system prompts: The mechanical fire dragon king will explode within 30 seconds!

"Fuck." This is the most potent skill. Once the mechanical fire dragon king explodes, nothing will explode, and the player will also be killed. Fortunately, Lu Yang knew his skills early, and deliberately changed the ancient and alien species in the output. Several big tricks have stayed.

"Sky Wrath"

"Curse"

"Sky Slay"

Lu Yang's banking industry released all his big skills, and under continuous attack, he finally hit the Lord's monster's health to 0 within 30 seconds.

"Finally ... liberated!" The mechanical fire dragon king finally let out a wailing, and the huge body of 50 meters long fell heavily to the ground, giving Lu Yang a superb explosion of 8X8.

Lu Yang saw that the Fire Dragon King was indeed dead. There was no follow-up task. He went to the Fire Dragon King and looked at the equipment on the ground.

Ghost Tool: Mechanical Fire Dragon King Staff

Ghosts · Mechanical Fire Dragon Helmet

Lu Yang saw the corners of these two items wide open, and said excitedly: "So lucky, burst the staff here?"

The mechanical fire dragon king staff is the most difficult one in the entire mechanical fire dragon system equipment. It is said that the chance is less than one ten thousandth, and it is all a real lucky person who can burst out. He did not expect his luck to be so good.

The helmet is also the same, the rareness is second only to the staff. The reason is that the shape of the helmet is very special. When worn, it looks like a storm helmet in Star Wars. In fact, this set of mechanical fire dragons is assembled and looks like Especially like a purple storm soldier, but with a helmet is more like, remember that in the last life, this helmet can sell 500,000 credits.

Lu Yang received the two equipments in his backpack, and continued to look at other items, but there was nothing better. He built a sentry tower in situ and quickly flew back to the red fortress, a fire and wine storm and a fire cloud In the storm, both items were upgraded to level 5.

Ghost Tool: Mechanical Fire Dragon King Staff

Level: 175

Physical attack: 1300000-1300000

Intelligence: +358900

Constitution: +395050

Additional Fire Spell Damage: +804470

Additional Fire Spell Critical: +804240

Ignore Fire Resistance: + 5%

Special Skill: Hades

This weapon alone is higher than the entire set of 170-level dark gold sets of magic damage, which shows how powerful this staff is.

Ghosts · Mechanical Fire Dragon Helmet (Level 5)

Level: 175

Physical defense: 200000-200000

Magic Defense: 200000-200000

Intelligence: +178900

Constitution: +19050050

Additional Fire Spell Damage: +244700

Additional Fire Spell Critical: +242400 points

Ignore Fire Resistance: + 5%

Special Skill: Hades

As for the second equipped mechanical fire dragon helmet, although the attributes are worse than the previous ones, they are still much stronger than the 170-level dark gold equipment.

Lu Yang replaced the mechanical fire dragon equipment, and his injuries exceeded 4 million points. At this time, his mechanical fire dragon suit also had necklaces, double wrists, double guards, and a shin guard ready. The total damage can reach more than 5 million or even 6 million, and the second person becomes extremely relaxed.

The only pity is that the mechanical fire dragon king that he just killed did not drop the fire dragon crystal. That thing is actually the most precious thing. The fire dragon king crystal can only change half of the ghost equipment. The owner may not be willing to change it. .

He shook his head, I'm afraid he wanted to explode the Fire Dragon King crystal, only to go to the 5th floor to find the real mechanical Fire Dragon King.

He flew back to the platform on the third floor of Starfield, stepped towards the platform stairs in front, but just after stepping off the platform, Lu Yang could not help frowning and glanced at a stone pillar next to the platform.

This is a hexagonal prism of black crystal stone. It is very beautiful. It is a cross section at the tip of the stone pillar. It looks as if the small section above has been cut off. How does this small section look like The mysterious item he got on the second floor can be connected.

Lu Yang curiously took out the mysterious item from the backpack, which is also a hexagonal prism, and also has a cross section at one end. He connected this side with the black crystal stone pillar.

Just at this moment, a light flashed on Lu Yang. The next second, he appeared in a fuchsia space.

System prompt: You accidentally entered the Treasure Vault, and Lu Yang was a little speechless when the countdown was teleported. This was too sudden. He didn't know that there was such a place. Who would have thought there was a trove? , The Raiders of the previous life were not mentioned at all.

He came in, but he didn't know what was going on with this map, and the map was so big that he couldn't see the panorama.

"Summon Flying Carpet"

Fortunately, Lu Yang had a flying carpet. He summoned it and flew into the air, but as soon as he reached the 10-meter position, he was restrained. Although there was no obstruction in the sky, the more he could not pass, it was estimated to be enchanted.

However, you can also see clearly here. This is a treasure map. There are 12 platforms in total. Each platform has a giant stone ape guardian on the back and a wing. It is estimated that it is the guardian of the platform enchantment. To kill the stone ape, you can enter the platform.

Stone Monkey Guardian (boss)

Level: 175

He was about to act, and stopped again. Only a total of 5 minutes, he killed a maximum of 5 bosses. This was still in the case of the help of the ancient and heterogeneous species. If there were no ancient and heterogeneous species, he would kill a maximum of 3.

But there are 12 of them. Theoretically, the more they are at the door, the worse the equipment is, the deeper they are. The better the equipment, he can't kill the outside first, but the murderous from the inside, especially the innermost. Several bosses are very close, he can kill together.

Having figured out the way, Lu Yang flew straight ahead, not looking at the stone guardians at the door.

The map here is rectangular. From the beginning, there are two platforms on each side, each platform is 50 meters wide, and the distance from the next platform is 100 meters.

“flicker”

“Escape The Dagger”

“Remnant Flame-Activated”

Lu Yang jumped to the deepest part of the Star Treasure Treasure instantly, just landed, 5 meters away in front of it is a platform guarded by a stone ape, and the platforms on the other sides are not far away, about 80 meters.

“Second Injunction-Meteor Fire Rain”

Lu Yang said in his mouth that all 6 stone apes within 200 meters of the surrounding area were hit by the secondary forbidden spell.

“Woo ~!” Six three-meter-high stone apes stood up at the same time and beat their chests hard, rushing towards the landing sun.

“Ancient Heterogeneity”

Lu Yang summoned the Xuangu aliens and blocked them in front of him. After swallowing a bottle of stealth potion in his mouth, he instantly gathered hatred to the Xuangu aliens. He jumped 30 meters away and watched 6 stone apes surrounding the Xuangu aliens. Everyone’s Each attack is about 80 million. One attack of 6 stone apes can destroy the 500 million HP of Xuangu Xuan.

“Second Injunction-Meteor Fall”

The huge fire meteor descended from the sky, stunned the six stone apes in place, and called for a clone after landing.

“Mixed Spells-Red Lotus Explosion”

“Mixed Spells-Fire and Earth Storm”

“Mixed Spells-Hundred Snakes Kill”

“Mixed Spells-Ah Bi Hell”

Lu Yang took this opportunity to read the forbidden spell again: “The magic flame burned out countless skills filled the entire map, and the range of the flame burned out was not in the condition of the demon heart bonus. It was 1,000 meters down, but it also hit the stone monkey in the doorway, which caused the stone monkey in the doorway to run over.

Lu Yang was also in a violent state at this time. Regardless of the others, the mantra continued to be spoken.

“Meteorite Falls”

“Destruction Cannon”

“Angry Skills-Fire Kill”

The flames of the flames and the meteor fire rain increased Lu Yang’s anger value, 12 monsters, increased by 24 points per second, Lu Yang came around the 12 stone apes around the wild ancient heterogeneous attack, and released infinite fire kills, only In 2 minutes, 12 stone apes died in sequence.

Chapter 1610 - Special Map · Starfield Warehouse

But just when these stone apes died, Lu Yang secretly said a fluke. Fortunately, he is a mage. If a soldier comes in, he must be mad by the official behavior.

The reason for this is that after the two stone apes at the door were killed, the two platform enchantments at the door did not disappear, but the two platform enchantments at the middle part disappeared.

The two stone apes in the middle platform were killed, one of the enchantments at the door opened, and one was the innermost enchantment in the upper left corner of the map, which was simply a disorderly combination.

If most people imagine the official design in accordance with the conventional understanding, they will surely be killed by this design pit. However, this time the designer is in trouble, and Lu Yang killed everything at once. He is still in the blood. Each avatar has an acceleration skill.

“Grab it.” Lu Yang issued an order, and four avatars rushed towards the four platforms in the middle. Lu Yang launched the Residual Flame skill and immediately jumped to the platform 10 meters away in front, opened the first treasure chest, took out The first item was a manufacturing instruction.

Plans: Hellfire Motorcycle

Level: 170

Description: This is a motorcycle that can only be used by level 170 players. After getting on the car, it will bring you a flying experience. The movement speed will increase by 450%. You can activate the fire-breathing device to increase the movement speed to 650%. Duration 5 minutes is a must-have item to enter and escape the battlefield.

Lu Yang was almost crazy when he saw this design. He never thought that this thing was obtained here. You must know that the flame chariot of the last generation has been sold crazy. Even if the player reaches the 200 level, there are With 200-level mounts, the flame motorcycle market is still hot, and any flame motorcycle can sell for more than 6000 credit points.

The point is that no one knows where this thing came from, nor does it know how much it costs to make it. It only knows that the output of this thing is extremely scarce. Nearly 5 billion players around the world sell motorcycles to less than 10 people. .

Lu Yang didn't expect that he was so lucky. He found a blueprint of a motorcycle here, and not to mention that he sold it for sale, even if he didn't sell it, it was a great reward to equip his elites.

He quickly received the drawings in his backpack. At this time, his water mage came to platform 8 and opened the treasure chest to take a look.

Engineering Drawing: Spider

Description: This is only used by the Fire Mage Master. The Fire Mage Master holds spiders and can be placed anywhere. Once a target is within 10 meters of the target, the spider will instantly shoot out of the soil and hit the target to explode. Inflicts 20 million damage to enemies within 30 meters in diameter.

Lu Yang was already happy to know what to say. This thing was more expensive than the Flame Motorcycle. When the battle was over in the central area of the last generation, it seemed that Tom's guild had got the spider, and it was around several important fortresses of Sanyoumen It's full.

As long as the people in Sanyoumen dare to come out, they will be killed in pieces. The key thing is that they are extremely beautiful in disguise, can be the same color as the desert, and can even be disguised as gravel. As long as they are not explored by exploration skills, It will not be broken by spells, even if it is explored, because it is not easy to find because it has a color like sand.

Lu Yang entered the central area to fight and needed this item. I did not expect to get it here. He controlled the water mage to collect the drawings into his backpack.

The system prompts Master Lei to enter his designated area. Lu Yang consciously switches into Master Lei's body and opens the treasure chest on platform 7.

Ghost Tool-Blood Slash

Lu Yang made a strong fist. This thing is a wide-bladed machete that can be used by the boss in the Eight Fiends. It is unexpected here, and this thing normally wants to be played. The patriarch of the clan, the 175 superior lord Gustomer on the map, kills him before he can burst out. The probability is not high.

Originally, Lu Yang was thinking of waiting for the eight fierce men to return, and took them to map each other to play equipment. I didn't expect to get them here first. The boss in the eight fierce men is invincible.

Hell Blood Slash This melee weapon knife is different from the mage case. The mage case needs to be output as a whole, but for melee systems, this one is enough, because the weapon knife can kill and extract damage. The upper limit is 3 million points. After receiving this knife, the real melee master will give up a lot of unnecessary equipment and only rely on the sword and a small amount of accessories to kill.

He shook his head in shock, put the sword in his backpack, and his consciousness entered the mage's body.

On the 6th platform, the mage opened the treasure chest and took a look.

Chaos Ball

Level: 175

Strength: +500000

Damage: Description: Kill 1 monster above the elite level, increase 1 damage value.

Lu Yang was surprised again that this thing should not appear here, this should be another group of the three major races of the **** of death under the nine pillars of the throne, killing the patriarch may only be dropped.

This thing can add 500,000 strength, plus 3 million damage. This item can add 3.5 million damage. If this thing is in the hands of a divine knight, turn on the divine skill, and increase the power by 2.5 times, which is equal to another increase. 2.5 million injuries.

Fortunately, one person can only take one thing. If he can take more than two, a divine knight can sweep over a thousand players of the same level, which is not a problem.

Lu Yang received the things in his backpack, and entered the Feng Fen's body consciously. At this moment, the Feng Fen stood on platform 5 and opened the box.

Ghosts · Mechanical Fire Dragon Greaves

This time he sent the necklace, the guards and the wristbands. He stowed his equipment and ordered the four avatars to run towards platform 4 to 1. He flew directly to platform 10 and opened the box to take a look.

Ghosts · Mechanical Fire Dragon Gauntlets

He flew to platform 11 and got the mechanical fire dragon wristband. When he flew to platform 12, he opened the box and took a look. A transparent crystal with a solution of fire dragon color in it appeared in front of him. Lu Yang Xinxi's face changed.

Fire Dragon Crystal

Level: 175

Description: The Fire Dragon King was originally the product of the evolution of the Spirit of the Elements. Their soul is the Fire Element. The Fire Dragon King Crystal is the source of the Fire Element. Players of Chiyou Fire Dragon Crystal can add 10 levels to the specified skills.

Lu Yang's face was full of irresistible smiles. He entered the Realm of Stars, on the one hand, for ghosts, and on the other hand, for the Fire Dragon Crystal, he could add 10 levels to a certain skill alone. It was prepared by Lu Yang for Little Phoenix Corelly.

Kerui Li's big flame burning skill is a fixed damage skill. The higher the level, the greater the damage. However, even if he wears the heart of Vulcan, his fire burning skill is only level 15. The damage is not too high, but with the Fire Dragon Crystal, it can be increased by 10 levels.

If you add the heart of the Phoenix, you can increase the level by 10, and take into account some other accessories and equipment. In the most extreme cases, you can increase the flame burning skill of the little phoenix to level 42. At this time, open the flame burning. Every second is more than 5 million damage, and also comes with magic forbidden effects.

System prompt: You have 30 seconds left!

Lu Yang put the heart of the Fire Dragon King in his backpack, and quickly looked at the other avatars. Moisture arrived at platform 4 and opened the treasure chest for a look. Inside was a cloak of nine fire-red feathers.

Fengyu Cloak (Legendary)

Level: 175

Defense: 30,000-30,000

Magic resistance: 50000-50000

Intelligence: +132806

Stamina: +152203

Additional Spell Damage: +150003 points

Additional Spell Critical: +162940 points

Added issue penetration: +194059 points

Special Effect: Flame Burning Skill +5

Lu Yang looked at the last attribute and smiled, just right for Little Phoenix.

He looked at the item picked up by the soil clone.

Cooking: Heavy Armor Thunder Rhino (Legendary)

Although this thing is not introduced, Lu Yang knows that he can add 100,000 points of strength, which is the best cooking with 175 levels.

Lu Yang looked at the items picked up by Feng Feng.

Formula: Nine-color mixture

Description: Can add 300,000 spell damage to the target.

Lu Yang secretly sighed that if he could get this mixture in the last war, he would be out of the city and destroy the nine strongest guilds. Unfortunately, he only got it.

His consciousness entered Thunder's body and looked at the item in his hand.

Enchanting: Divine Power

Description: Add 30,000 points of strength to the hand and wrist support.

System prompt: time is up

The light flashed, Lu Yang returned to the hexagonal prism under the three-layer platform of the star field, and the mysterious objects placed on the hexagonal prism had disappeared.

Lu Yang understood that this is another unique map. After someone enters, the map disappears completely, and no one will enter again. It is no wonder that the person who did not publish this map guide in the last generation, it is estimated that after entering, I got a maximum of two or three items.

Not to mention that his running speed is fast enough, even if he kills these stone apes, it is not something he can easily fight to. There is no strange and strange help, it can only be killed one by one, count When I went up and down to find the platform, I was lucky to get three.

In the face of such a treasure house, there are obviously 12 babies, but only 3 of them have been obtained, and the remaining 9 have not been obtained. It is strange that the state of mind does not collapse, and then it is embarrassing to write this thing, or he Still looking for ways to re-enter.

Lu Yang secretly fortunately built a sentry tower in situ, flew back to Tianyu Shencheng, found Mu Yi, and said, "Show you a few good things."

"What is it?" Mu Yi asked, he was in a state of rest. A while ago, he rushed to work with 160-level gold equipment and 160-level various enchanting products, which made him the boss and his subordinates miserable.

Lu Yang raised an eyebrow, handed him two drawings, and said, "Look."

Mu Yi looked down and was pleasantly surprised, saying: "Hell flame motorcycle, and this good thing, the movement speed can reach 650%, the same speed as the blood wolf."

"I like it," Lu Yang asked.

Mu Yi nodded again and again.

Chapter 1611 - Ghost Tool: Hellsword

σ? ,,

Lu Yang said, "Choose one from the first batch, and put the rest in the warehouse."

Mu Yi nodded and asked, "What about this spider? I looked at the material. If you count the labor cost, this mine will cost 1 yuan."

Lu Yang smiled and said, "Don't care about money. Give me 10 million spiders. This thing is very useful to me."

"No problem," Mu Yi said.

Lu Yang patted him on the shoulder and said, "I know I have always wanted to participate in the war. In this way, if my brother is lucky, I can come up with a set of special muskets for my men and I will take them to the war."

"Say, don't fool me anymore." Mu Yi said angrily.

Lu Yang was laughing, he had flickered this little brother several times, but it's okay, it was Mu Yi who could let him rest assured to manage the smithy. Han Zhong had been busy, and he couldn't leave the management at all. Can only make Mu Yiduo worry.

He also knows that he owes a lot to Mu Yi. There is a chance that the mechanical fire dragon king will drop a ghost-level mechanical fire dragon gun and the legendary mechanical fire dragon 8 sets of drawings. Whether it can burst out depends on his luck.

Leaving the smithy, Lu Yang came to Jinbuhuan's pharmacy, handed him the nine-color mixture, and said, "Make as soon as possible, the more the better."

Jin Buhuan has become a big fat man and said with a thick smile: "Boss rest assured, I will do my best."

Lu Yang laughed. The boy is very rich now. He has made money after doing business a few times. Now he has no shortage of food and clothing, no girl around him, but he ran to the game city and lived. His house made Lu Yang very speechless.

"Leave." Lu Yang said, meeting almost every day, people who are familiar with it can no longer be familiar with, and much lazy to talk nonsense, he turned and left.

Jin didn't change and didn't care. Le Bianer ran to make a potion. Generally, he made such potions himself, because his potion's ability to mutate was special, which was suitable for this. Can double to 600,000.

Lu Yang returned to the guild and handed the cooking to Mo Long. Among his classmates, Mo Long was the most credible. Huang Xiang repeatedly sought information from Mo Long. Mo Long ignored Huang Xiang and even made trouble with Huang Xiang. When the relationship is broken, it is not that Mo Long found that Lu Yang is not good for Huang Xiang, but that Mo Long clearly realized that his work is only responsible to Lu Yang. Although everything is not much more confidential, he should not tell any unrelated people. Even if the parents and girlfriend didn't tell, let alone Huang Xiang.

Because of this, Lu Yang trusted him more. The pharmacists and cooks of the guild gave him the management. He told Mo Long: "I have done a good job recently, and I will promote and prepare for it after a while."

"What a good thing." Mo Long asked in surprise.

Lu Yang said, "Tu Feng's logistics team will hand it over to the meeting and pick up things with me later."

"Xie Boss." Morong put his position right.

Lu Yang smiled and quit the game to rest. When he entered the game the next morning, he took out the telescopic scroll and went to the red fortress of the old continent. The bug in the backyard was not killed overnight. The shooter player who was in charge of the fortress was very recent. It is hard, constantly attacking the mother worm, and now it is covered with a crater.

"Boss, you are here." The shooter saw Lu Yang and hurried over.

Lu Yang smiled and nodded. "Good job, keep working hard."

"Yes," said the shooter happily.

Lu Yang wore the mechanical fire dragon's handguards and shin guards on his body, and then took the blood of the infernal blood and cut the sword. He placed a red lotus in front of the crater and blasted it. Three lights on his body continued. He opened the equipment to see At first glance, the properties of the shin guards and hand guards are the same as those of the helmet.

Ghost Tool · Hell Blood Slasher (Level 5)

Level: 175

Physical attack: 1577832—1670000

Strength: +387890

Stamina: +400000

Additional physical attack: +1200000 points

Additional physical crit: +1200000 points

Ignore target 5% physical defense

trick:

Hell Slash

Special effects:

Dominating Necropolis: 0/3000000

(Attack speed 3.5)

At this time, the special effects of this weapon were really revealed. Those who received this weapon could definitely run away. Not counting the 3 million damage that dominates the undead, the attack itself has more than 3 million points, plus domination. The undead is 6 million damage. This knife exceeds the total damage value of the 170-level dark gold sleeve, not to mention there is Hell Slash, which has the same effect as Hades, with 20 million fixed damage.

The key is that this weapon is huge enough to resemble the door panel, and it is just like the door. It matches the boss's rebound magic in the eight fiends. With such a wide blade, you can block your skills in front of you.

The only flaw is that it is difficult to control the special effects of the Necromancer. First, it is difficult to gather the souls of 3 million elite monsters. If you die, the soul will be halved, that is 1.5 million, enough for a player to cut elite monsters for half a month. Already.

Lu Yang looked at the time. It was three days before the eight fiends and the little phoenix came back. He was a little bit humorous and sent the picture of the knife to the boss of the eight fiends.

Sanya, Hualong Hotel is located in a prime area of Sanya Bay. The main building of the hotel is less than 100 meters from the sea. The hotel and the beach on the seaside also have an extremely beautiful swimming pool. Koster and Corelli and others are in the pool with Grant. Play around here.

Each of the Eight Slayers, like Naif, lay on the beach chair in front of the swimming pool. Even if the sky was sunny, but there were parasols and iced orange juice, they made eight people uncomfortable.

"This is life." The fourth old man comfortably stretched his waist and changed his position so that the sun could reach his back.

"It's so nice to follow the boss. We didn't work at all this time, so let's go out to play," said Paul the sixth.

The youngest David said: "I will kill Black Veil and Olma the next time there is a big war."

The old seven Benanis rolled his eyes and said, "Three brothers, you can't rest for a while, you just want to fight every day, so good, enjoy the sun, the beach and the handsome guy."

The boss Naif laughed and put on his sunglasses to get ready for a good night's sleep, but at this time, a message came from his cell phone and saw that it was from Lu Yang. Naif hurriedly opened it when he saw the content.

"What?" Neff sat up sharply and shouted, "Book a ticket now, and we'll go back."

Paul glanced at Neff, who had been beaten with chicken blood, and asked silently, "What's the matter, brother."

Neff quickly sent the attribute map he got to everyone, including Little Phoenix, and said, "How can there be such a powerful physics in this world."

"Who sent it?" David asked inexperiencedly.

Little Phoenix and Koster also swam to the shore in excitement and looked at Neff inquiries one after another. Little Phoenix said: "This equipment is too powerful. A three-stroke ordinary attack can hack a master of the same level."

Naif said excitedly: "The boss sent it to me. Just now, he must have hit this piece of equipment. No, I can't bear it."

"Boss is too bad, who can stand this." Little Phoenix looked at the beach in depression, and said, "But there are three days to travel."

"Ding Ding"

Little Phoenix's cell phone rang. She opened it and looked at it. It was from Lu Yang. She quickly received the message, but she could see the content of the message. Little Phoenix was not calm.

“Let’s go.” Little Phoenix said excitedly.

“What’s so good about that?” Coster asked.

Little Phoenix excitedly sent the Fire Dragon King crystal to the crowd and said, “My flame burnt is fixed damage. I am worried that I don’t know how to increase the skill level. This crystal can increase the level by 10 and does not occupy the equipment bar. Artifact. “

“Let’s go,” Naif said.

As soon as the voice fell, Lu Yang called Neff to a video projection phone. Neff pressed the connect button and cast a screen into the space through his mobile phone. Lu Yang appeared in front of them.

“Boss, have you got that weapon?” Neff asked impatiently.

“Yes.” Lu Yang looked at them and said with a smile.

“Oh my God, I’ll go back now,” said Neif.

“I’ll go back, too. I want the Crystal of the Dragon King.” Little Phoenix said.

Lu Yang laughed and looked at them and said, “The rest of the three days of holiday will be taken off with peace of mind, and then we will enter a very horrible working period. Don’t complain then that I didn’t give them a holiday. It’s the holiday of the month. “

Paul asked curiously: “Boss, is there going to be war again?”

Lu Yang smiled mysteriously and said, “Three days later, we will know when we come back. Enjoy the holidays.”

The voice has just fallen Lu Yang has ended the call, there is indeed a big war, but not now, but a month later, in order to get revenge, the eighth strongest guild decided to take advantage of everyone's not yet reaching level 170 At that time, the first integrated forces attacked Harriken and Claudio, and the first attack was Claudio.

Once the two sides go to war, it is time for Lu Yang to bring this group of special elites to trouble. This war, both sides want to end in a few days, but Lu Yang does not drag them to a month, it is absolutely not Let them make the difference.

Of course, Claudio and Harriken must lose in the end. The two are too far behind the eight strongest guilds in the central region.

Tu Feng called and said: "Boss, there is new news. A large number of elites suddenly appeared in the black yarn. According to our secret investigation, it was learned that this is the use of his beauty by dozens of Europeans who invited him to help him. A first-class studio, these people have now entered the management and accepted the post of head of the legion. "

Lu Yang sneered and said, "It's really a good abacus. I hope to use these first-class studios to improve the overall combat effectiveness. If you give black yarn for half a year, she can really develop well, but I won't give her that. For a long time, rest assured, let the brothers continue to upgrade, and make up the level first.

Chapter 1612 - Explosive spell damage

♂? ,,

In the next war, Lu Yang most hopes that his men will start fighting around level 175, and not to fight when they are still in level 160 or more. However, none of the current enemies are weak, even if Alice is

not good at it. He fought, but he could dance long sleeves and find more allies. Hei also gradually revealed her strength. Alice contacted the guild and she contacted the studio. The two cooperated well.

But Heisha forgot one thing. She could graduate from college, not by her own efforts, but by a man working hard to raise her.

This person is not someone else. It was Heisha's ex-boyfriend. He went to college at that time. The man worked in a restaurant near the school because he didn't have the money to hide in the corner of the hotel. The boy saw her as poor and gave her more. A few pieces of meat were added to the meal.

Heisa is grateful to this man. She often comes to this restaurant. This man always gives her delicious food. Gradually, the two become friends with each other.

According to the normal development, the two will be separated after entering the work unit after graduating from Heisa University. However, Heisa chose to study for a master's degree, and it took more than two years, and studying for a master's degree requires a lot of money. Not enough. In order to fulfill the master's dream of black gauze, this man worked four times a day and didn't sleep at night.

Here Heixian was offered a master's degree, but Heixian entered the game and became his status today. Then, Heixian dumped him, and the man had collapsed for six months.

Xue Yiming learned this from the mouths of other Thorn Bird Studios. To this end, he immediately reported to Lu Yang. Lu Yang sent Qing Qian Zimeng to find the man, and then Qing Qian Zimeng found a very beautiful girl, using the gentlest sweet words to cheer up the man again, and set up a goal for him to seek revenge on the black gauze.

Now, this man is working under the black yarn. He is the commander of the large army and manages 12 legions for the black yarn. It can be said that whenever there is anything in the guild, this man knows the first time.

The purpose of this man now is very simple, he is to make the black gauze have nothing again, let her feel the feeling of despair.

This person is called Cumberbatch. Among the newly recruited people, he likes black gauze, and black gauze has an ambiguous relationship with them. Cumberbatch is already furious. He immediately turned the list of these people to Lu Yang, but Lu Yang didn't care too much about it.

He turned off the communicator and returned to the third floor of the Starfield with a teleportation scepter. The square area on this floor had been cleared by him. He ran forward from the square, there was a T-junction, and the left and right sides were like a second floor laboratory. State, both rows are small houses, each house has a 30-meter-long mechanical fire dragon.

Lu Yang was not anxious to kill these fire dragons. There is also a laboratory on this floor. He searched along the map on the left. After running for about half an hour, Lu Yang found a laboratory and a laboratory on the second floor. Same, unfortunately, there are no mysterious objects on the test bench.

“Lava Eruption”

Lu Yang put a 200-meter-long magma outside the laboratory, and then returned to the laboratory to summon the ancient and strange species to block the door.

“Forbidden Curse-Demon Flame Burned Out”

The large-scale curse of 1,000 meters in diameter led out the mechanical fire dragons in the surrounding laboratory.

“Second Injunction-Meteor Fire Rain”

“Mixed Spells-Red Lotus Explosion”

...

After finishing several mixed spells in succession, the first batch of mechanical fire dragons within 100 meters of the door was left with blood. Today, Lu Yang is no longer Lu Yang who just came to this place a week ago, but wears more than half of a mechanical fire dragon suit, and a mechanical fire dragon. Lu Yang of the King Staff.

He was injured by more than 4 million lawsuits, and occasionally triggered by Pyramid Flames. Even after being recruited, the mechanical fire dragon dropped blood very fast.

After 3 minutes, the first batch of mechanical fire dragons were killed, followed by the second and third batches, until all the mechanical fire dragons that were burned by the magic flame were killed.

“Unfortunately, none of the mechanical fire dragon equipment was lost.” Lu Yang shook his head sadly, looking for the next laboratory to continue brushing up.

The area of the third floor is very large. Lu Yang brushed it for two days before finishing it. Fortunately during this period, Lu Yang hit a hand protector and a wrist protector, which is equivalent to collecting more than half of a set of equipment, leaving only Necklace and the last wristband.

In the morning of the third day, Lu Yang went to the Red Fortress first, and raised his handguards and wristbands to level 5.

Ghosts · Mechanical Fire Bracers

Level: 175

Physical defense: 200000-200000

Magic Defense: 200000-200000

Intelligence: +178900

Constitution: +19050050

Additional Fire Spell Damage: +204700

Additional Fire Spell Critical: +202400 points

Ignore Fire Resistance: + 5%

Special Skill: Hades

Attributes are the same as hand guards and helmets. After Lu Yang wore them, the two pieces added more than 400,000 points of damage to Lu Yang. At this time, Lu Yang's damage exceeded 5 million.

Then Lu Yang returned to the guild materials warehouse of Tianyu Shencheng, supplemented the materials, and just right, Jin Buhuan sent the first batch of nine-color mixture, all of which were mutated, which could increase 600,000 spell damage.

It is a pity that there is no enchantment of level 170, and the gems are still gems up to 17th level, and the added spell damage is not high.

Lu Yang first added 17 pieces of intelligence gems to his body. After entering the copy, even if he does not have the heart of the demon, he can use the flames to hurt the lord.

Today, he is going to kill the last lord. He has to prepare carefully. The strongest mechanical fire dragon king is on the fifth floor of the star field, and the fourth floor of the star field is not large. It is just a maze. Lu Yang knows how to walk the maze. It is easy Can reach five floors.

When he had done enchantment, cooking, gems, and the mixture, his magic damage reached 6 million points, which was enough to make him beat the mechanical fire dragon king.

Lu Yang took out his teleportation scepter and flew into the third floor of the star field. At this time, all the monsters on this floor were burned out. To refresh, he would need to wait for Lu Yang to kill the mechanical fire dragon king. At that time, The monsters that are brushed out are no longer wasteland strangers, and the damage is not so high. Of course, the explosion rate is poor.

The entrance from the third floor of the star field to the fourth floor of the star field. At the bottom of the map, you need to walk through the three-level T-junction and then run to the right to the bottom.

For two days, Lu Yang hit monsters on both sides of the T-junction. Now on the right, he ran to the room at the bottom of the map and saw a 3-meter-high teleportation array.

He made a move with his right hand, and Xuangu Xuan appeared beside him. According to Lu Yang's instructions, Xuangu Xuan entered the teleportation array first.

The system prompts: The ancient and alien species have been attacked, taking 80 million damage.

...

More than 20 consecutive prompts, the ancient blood of the ancient and alien species lost a small amount of time, Lu Yang sneered, this is the lack of official setting, if there is no defense, the four layers of the star field can not go down, just entered He was attacked by a mechanical fire dragon.

Lu Yang felt that the strange and strange species had caught the monster. He drank the stealth potion and walked down. The light flashed. He could see the surrounding situation clearly. He could see less than 200 square meters of the room and dozens of mechanical fire dragons. He was spitting flames in front of him.

“Meteorite Falls”

Lu Yang quickly released magic. If he did not release the control skills, he would be dead when these mechanical fire dragons used the range skills.

A huge fire meteorite fell into the fire dragon group and stunned more than 10 fire dragons around it. Taking this opportunity, Lu Yang uttered a spell.

“Mixed Spells-Red Lotus Explosion”

...

Eight consecutive mixed spells plus the anger skill flame super kill, dozens of mechanical fire dragons around were beaten into residual blood, then landed the sun and then released a round of mixed spells, Lu Yang up to 6 million spell injuries, easily these mechanical fire dragons Elite kill.

Unfortunately, there are no special elites, and nothing good is on the ground. Lu Yang is too lazy to pick up trash. He looks at the map around him.

There are four portals in the room. They are divided into southeast, northwest, and northeast in four directions. Remember to go in the order of North-North-South-East-West-East-South.

Lu Yang filled the blood of the ancient wasteland and went into the room on the north side. As before, he killed the mechanical fire dragon in the room, then entered the room on the north side, followed by the south side, and went to the last south side room. At that time, three special elites of mechanical fire dragons appeared.

After some killing, a mechanical fire dragon necklace was dropped, and only the last wrist was left. It is estimated that it is on the mechanical fire dragon king.

He put the necklace in his backpack and walked into the last portal on the south side. A flash of light flashed and Lu Yang appeared in a huge laboratory.

This laboratory is circular and has a diameter of about 500 meters, which is enough to accommodate a hundred people group. In the center of the experimental bench, there is a mechanical fire dragon king 50 meters long and 20 meters high.

Mechanical Fire Dragon King (First Class Lord)

Level: 175

Qi and blood: 100000000000/100000000000

This mechanical fire dragon king has been transformed more thoroughly The entire head is metal, and two eyes are two infrared rays, which can emit laser light.

The neck of the mechanical fire dragon king is made up of a series of high-precision metal connections. Each time it shakes, it is filled with the texture of precision metal. Looking at the abdominal and lower limbs of the mechanical fire dragon king, the entire abdomen is mechanically wrapped. It's all metal, and the tail is also made of an alloy metal, exactly like the material of the neck.

"Hou ~!" The mechanical fire dragon king found Lu Yang, but he did not take the initiative to attack, but yelled out.

Looking into his mouth, the teeth of the Mechanical Fire Dragon King were extremely sharp, and his tongue was gone. The substitute was a rotary machine gun.

On the two wings of the Mechanical Fire Dragon King, there are a lot of them, as if they can be thrown out at any time, and the two wings also have a machine gun to scan the mouth.

I remember the guild that played the Mechanical Fire Dragon King in the last life. At that time, it took a hundred people group, and would rather increase the health of the Mechanical Fire Dragon by 2 times, but also let the hundred people fight. The output of this Mechanical Fire Dragon King was too high. There are more skills, less treatment is not enough, and the output is fast. The output is lacking.

Chapter 1613 - Heads-up Mechanical Fire Dragon King

♂? ,,

For this mechanical fire dragon king, the guild was fully stuck for a month and a half. If it was not found that other guilds came in, the elite players of this guild fought hard for a day and night before killing it.

Normally, an ordinary player comes here, just like sending death, but he is Lu Yang. He has the top response speed of 0.2 seconds, the only summoned beast with 80 billion health in kimono, and a top ghost equipment. This is his reliance on the mechanical fire dragon king.

Most of the equipment in the body is a mechanical fire dragon suit, the probability of the blaze is more than 20%, and his output is enough, and he speaks a spell at the mechanical fire dragon king.

“Blazing Heart”

A heart attack hit the mechanical fire dragon king, causing more than 80 million injuries.

“Hello ~!”

The mechanical fire dragon king roared. There was no time for Lu Yang to prepare. While opening his mouth, the tongue made by the revolving machine gun was directed at Lu Yang and fired fiercely.

“Da da da”

Lu Yang knew what the Fire Dragon King was going to do when he saw the fire light. His body turned into a white light and appeared at the eternal position 100 meters on the left side.

“Danger Prediction: A stronger dangerous breath was detected, Target: Lu Yang, * launch!” The two eyes of the Mechanical Fire Dragon King continued to flash red light, and numerous holes were opened on his back, and more than 100 rounds * were launched into the air. , Then, the blasting towards the landing sun.

The damage of the pseudo-mechanical fire dragon king is about 100 million, not to mention this real mechanical fire dragon king, Lu Yang is afraid to resist his injury, aiming at the * in front of him, and spelling out in his mouth.

“Fire and Wine Storm”

A flame spit out, and the first number rushing in front of him was detonated, and then the landing sun spoke a spell in the mouth of the mechanical fire dragon king.

“Mixed Spells-Hundred Snakes Kill”

A hundred fire snakes suddenly shot out from the front end of Lu Yang’s staff, and the part hit the mechanical fire dragon king.

“Danger Prediction: Stronger dangerous breath detected, Target: Lu Yang ,, launch!” The Fire Dragon King still has no control over the wild ancient aliens that are constantly attacking in front of him. You must know that the ancient ancient aliens have more than 8 million injuries. The damage caused by the Fire Dragon King is extremely high.

Lu Yang felt that maybe the attack method of this mechanical fire dragon king was to hit anyone who saw high damage to him. Therefore, this is a battle that does not require defense, but requires a blood bull warlock with high defense value. .

If he fights like this, it will be simple for Lu Yang. His strength is to evade the lord’s skills and watch four blast towards him.

“Escape The Dagger”

At the moment of the explosion, Lu Yang jumped to a position 100 meters away and returned to the front of the mechanical fire dragon king.

“Mixed Spells-Hundred Snakes Kill”

Lu Yang released another hundred fire snakes, and the mechanical fire dragon king followed Lu Yang again. This time, he opened his huge mouth and aimed at Lu Yang with a machine gun.

“Remnant Flame-Activated”

Lu Yang quickly ran to a position of 100 meters on the right with a red-gold light, and let the machine fire dragon's machine gun fire only 30 meters before stopping.

"Roar ~!" The mechanical fire dragon king lost 1% of his blood. He roared and opened two huge wings to point at Lu Yang.

System prompt: Warning, danger is approaching! Be prepared to withstand the anger of the Mechanical Fire Dragon King!

"Hello ~!" The mechanical fire dragon king Qingxiao uttered, and two wings opened hundreds of shooting ports at the same time, aiming at the position where Lu Yang was standing, and started shooting wildly.

"Who can resist this." Lu Yang with a residual image quickly ran towards the right side, he did not dare to go back to the front of the Xuangu alien, he was worried that the Xuangu alien would be shot and killed by this wave .

It is estimated that the damage done in each shooting hole is about 100 million. The rate of fire of several rounds and hundreds of shooting holes in one second is not at all ridiculous. It is estimated that it must be hung in 3 seconds. Already.

The mechanical fire dragon king opened his wings and glanced at Landing Yang for half a minute. He did not hit Lu Yang. His hatred was attracted by the ancient ancient aliens, and he bit his head with a bite.

"-583049403"

Instantly 580 million HP was gone. This attack frightened Lu Yang. He didn't dare to let the mechanical fire dragon king output like this again, and quickly released his skills.

"Blazing Heart"

A heart attack hit the mechanical fire dragon king, causing more than 80 million injuries, the mechanical fire dragon turned his head and stared at Lu Yang instantly.

“Warning: Laser overload!”

The laser of the fire dragon king’s eyes fired instantly, even that instant attack speed, Lu Yang could not escape. Fortunately, Lu Yang saw in advance that the red light in the eyes of the robot fire dragon king would soon turn into water. Already.

“flicker”

Lu Yang jumped back to a position 100 meters to the left, so that the abdomen of the mechanical fire dragon king was facing the ancient alien, so that he would not be shot by his wings.

What Lu Yang didn’t expect was that the body of the wild ancient beast suddenly exploded, and then the blood volume fell by 1 billion points. At the same time, the other side of the ribs on the other side of the body of the mechanical fire dragon king shot at him. .

“Halo ~!” Lu Yang found that the mechanical fire dragon king was transformed by the Prince of the Realms Hull with weapons, and he hurried to the front. Now it seems that the frontal attack can be less, at least the mechanical fire dragon king attacks He can see it.

“Blazing Heart”

After playing for several minutes in a row, the attack methods of the mechanical fire dragon king are still the same, which makes Lu Yang feel a little relieved, but when the blood of the mechanical fire dragon king dropped 10%, the mechanical fire dragon king fiercely lay on the ground. His mouth was huge, his eyes were blazing red. At the same time, his wings were exposed with numerous shooting holes on the metal bones, and his north was exposed with four huge muzzles with a diameter of 2 meters, and a large number of The energy began to gather.

“You must not let him release it.” This is Lu Yang’s first thought, and not to mention whether Lu Yang can resist it. Just saying that this ancient and strange beast is easy to be hit by skills in this first wave of attack and give it instantly Drops two-thirds of your health in seconds.

“Remnant Flame-Activated”

Lu Yang jumped in front of the Mechanical Fire Dragon King with a flaming light, and when the Mechanical Fire Dragon King was about to play his skills, he spelled it out in his mouth.

“Angry Skills-Fire Kill”

His body burst into fierce flames, stunned for 8 seconds with the mechanical fire dragon king, his body became stiff, and even the skills he wanted to release stopped.

“Rage Skills-Red Lotus”

Just after the skills stopped, Lu Yang was worried that the mechanical fire dragon king would continue to put his skills on. Then he took the red lotus for 4 seconds and continued to stun the mechanical fire dragon king.

After the two skills, the mechanical fire dragon king automatically stood up and stowed the skills just to be released. The two claws suddenly ejected and flew towards the position where the landing sun was.

“flicker”

Lu Yang jumped back to a position 100 meters behind him and read the spell in his mouth.

“Lava Eruption”

He found that the wrath skills were also good for this lord, and quickly put a skill to accelerate the wrath, and then he read the spell.

“Destroy Heavy Artillery”

A fierce flame ball hit the Fire Dragon King’s body and tilted it back, then he was spelling.

“Meteorite Impact”

A small fireball in the sky hit the body of the Fire Dragon King, and quickly rolled along his body, Lu Yang's anger value was instantly full.

“Roar ~!” The mechanical fire dragon king roared, the strength of his body left, and numerous muzzles appeared in front of the wings. This time it was not a machine gun muzzle. Unlike the previous appearance, the machine gun muzzle was black, this time it was fuchsia. of.

“Not good, it's a laser.” Lu Yang only reacted, but it was too late. Immediately, countless lasers flew out.

“Ice Guard”

Lu Yang traps himself in the refrigerator, and the laser hits Lu Yang and disappears automatically. The ones that do not hit are ejected to the surrounding wall and continue to bounce until they hit Lu Yang's ice cube or the ancient alien species. The damage of each laser is 100 million.

The mechanical fire dragon king saw that Lu Yang was no longer exporting, the hatred was transferred to the wild ancient alien, the mouth of the fortress wild ancient alien, two claws attacked wildly, and in a flash, 5 billion blood was gone.

“Blazing Heart”

Lu Yang ended the freezing and fired a heart attack according to the mechanical fire dragon king, which caused 80 million injuries. The mechanical fire dragon king opened his eyes and stared at the landing sun to emit a laser.

“Remnant Flame-Activated”

Lu Yang ordered the Xuangu alien to run away. He avoided the attack and added blood to the Xuangu alien. At this time, the Xuangu alien only had one third of his health. It took 3 minutes for him to fill up. Order the ancient ancients to attack again.

At this time, the mechanical fire dragon king's health dropped by 10% again, he lay on the ground again, and Lu Yang quickly jumped in front of him.

“Angry Skills-Fire Kill”

The Mechanical Fire Dragon King was stunned again. At the same time, Lu Yang discovered one thing, as if jumping on the back of the Mechanical Fire Dragon King, the attack was also possible. This Mechanical Fire Dragon King did not have the ability to attack the back. He jumped up on the back of the fire dragon king still lying on the ground, and hung it on his neck. Suddenly, he saw the mechanical iron plate on the neck, and there was a red light spot. He smiled for a moment, this is obviously the weakness of the mechanical fire dragon king.

“Meteor Fire Rain”

Lu Yangning could let the mechanical fire dragon king attack the wild ancient alien for 5 seconds, and read the secondary forbidden spell. Then he added a sun mask to his body. He aimed at the red dot area of the mechanical fire dragon king, with a stick in his right hand. Smashed down.

“Angry Skills-Devil Slash”

A red-gold flame was sharp as a knife struck the metal piece across the neck and hit the red dot. The mechanical fire dragon king was still biting the big mouth of the ancient species and instantly released, and at the same time was killed more than 2 million blood.

The damage of the Wrath ability is intellectual damage, so the damage is not high. He chants a spell while the mechanical fire dragon king is rigid.

“Pyroblast”

A big fireball hit the red dot area, and the mechanical fire dragon king roared again, losing 12 million health.

Chapter 1614 - Lu Yang's breakthrough

Lu Yang made a strong fist, and sure enough, this is the weakness of the mechanical fire dragon king. As long as he continues to attack here, he can accelerate the death of the fire dragon king.

“Yanyang Mask”

Lu Yang's body radiated a light, he stepped on the red dot, just when the fire dragon was crying, preparing to hold his head up and close the red dot area with a metal sheet, Lu Yang said a spell again.

“Red Lotus”

A grid of anger skills, controlling the fire dragon king for 4 seconds, the fire dragon king was stiff in place, and his sun hood caused 12 million damage to the red dot area every second. After 4 seconds, Lu Yang's mouth The spell came out again.

“Red Lotus”

The second Red Lotus was played, and the Fire Dragon King was controlled again for 4 seconds. In this continuous control, the Fire Dragon King had no resistance at all. After the skill was released, he kept releasing the third Red Lotus. .

And every time he releases Red Lotus, because the three skills of Meteor Fire Rain, Lava Eruption, and Sun Mask are returning his rage value, Lu Yang's rage value is always full. He just needs to keep on The release is fine.

In this way, there is no longer an attack on the wild ancient xenogeneous species, and he attacks the mechanical fire dragon king with all his strength. In this way, the blood of the mechanical fire dragon king has been hit below 30%.

“嗷~!” Suddenly, the mechanical fire dragon king uttered a clear howling, which was still roaring when it was within the range of anger control.

Lu Yang suddenly felt wrong, at this time it was too late, the wings of the mechanical fire dragon king suddenly spun up, Lu Yang was too late to escape, and was strangled straight, and instantly, Lu Yang died.

“Resurrection Stone”

Lu Luyang was scared out of cold sweat. If he died, the control of the fantasies would fail. Fortunately, he also had the resurrection stone, and he would live in an instant.

“Blink”

Lu Yang did not wait for the next rotation of the mechanical fire dragon, and quickly jumped down, hiding 100 meters away from the left side, and he ordered the wild ancient aliens to retreat 100 meters away from the right side. At this time, the mechanical fire dragon king’s body was completely deformed. Like a Transformer, it turned into a humanoid figure walking upright.

System prompt: Mechanical Fire Dragon King enters the second form (ignoring control skills)

Lu Yang scolded the system for lack of morality. Since the immune control is ineffective, the wrath skill is meaningless, and the upright walking state of the mechanical fire dragon king, he does not know what skills he has. In the strategy I saw before, there is no such thing. In the state of walking upright, it is estimated that the person who posted this strategy did not write it intentionally.

“Hoo~!” The distorted mechanical fire dragon king roared again and aimed his target at Lu Yang. Lu Yang fiercely opened his eyes. Where did he dare to test the damage of the mechanical fire dragon king, he immediately ordered the wild ancients to rush up.

“Tian Xuan” Xuangu Xun hit the mechanical fire dragon king, killing the opponent’s 20 million health, and suddenly hatred attracted him.

“嗷~!” The mechanical fire dragon king Qingxiao whispered, the two mechanical forelimbs aimed at the ancient ancient xenograft, and suddenly, the two claws shot out and hit the ancient ancient xenomorphic body instantly, causing 500 million damage. After piercing the body, pulling the ancient ancient xenogeneic In front of the mechanical fire dragon king.

System prompt: Dragon’s Wrath skill is about to be released

The mechanical fire dragon king roared again, biting the upper half of the wild ancient alien, and two claw thorns were pulled out of the body of the wild ancient alien, and suddenly it was slashed wildly.

500000000

500000000

Uh ...

Attacking 5 times in one second, the amount of blood in the ancient and alien species dropped by 5 billion in a blink of an eye, and the mechanical fire dragon king also caused 1 billion damage every 1 second, 5 seconds is 5 billion, and the total health is 10 billion. It’s gone.

Where did Lu Yang dare to let the ancient aliens continue to resist blame, the left hand pointed at the head of the mechanical fire dragon king, and said a spell.

“Blazing Heart Flame”

A flame hit his head, knocking out 80 million HP of Fanggu Xuan. Suddenly, Fanggu Xuan stared at Lu Yang, and ran towards him while opening his mouth, exposing the runner machine gun inside. The two wings also spread out, revealing hundreds of shooting holes.

“Roar~!” The mechanical fire dragon king roared and fired at Landing Yang while chasing.

“Too much.” A white light from Lu Yang’s body jumped instantly to the room at 11 o’clock, 100 meters away.

“Blazing Fast”

A flame came from Lu Yang’s feet, and he hurried forward. The mechanical fire dragon king no longer stopped and fired this time, but kept chasing the attack. The machine gun hole emitted a fierce fire. Lu Yang only felt Behind him were all the sound of bullets sweeping, as long as he stopped for 0.1 seconds, he would die.

Fortunately, Lu Yang had a Fengyu cloak with fire skill +5 before, so that his blazing speed was fast enough. Otherwise, his current running speed is not as fast as a sweeping speed, and he was killed early.

After running continuously for 1 minute, the mechanical fire dragon king stopped firing and switched to using two robotic arms to launch the attack. This attack took only 0.3 seconds to reach the position where Lu Yang stood, even if it was 30 meters away.

Fortunately, Lu Yang’s reaction speed was 0.2 seconds, otherwise he didn’t know how to hide from this trick. While he could avoid the attack of claws, Lu Yang quickly released a lava eruption on the ground, and the mechanical fire dragon king attacked with claws. During these 30 seconds, Lu Yang placed a magma belt 60 meters wide and 200 meters long on the ground.

At this time, there is no more magma at the feet of the Mechanical Fire Dragon King. Lu Yang pointed his staff in his right hand, and the gas-red red magma was at the feet of the Mechanical Fire Dragon King.

“Hello ~!”

The mechanical Fire Dragon King was enraged and chased him towards the landing sun. At the same time, there was a close attack, and two claws continued to fly out to attack.

☐ 30 meters away from Lu Yang will be dodging his claws, how dare to let the mechanical fire dragon king enter within 30 meters, he quickly launched the residual flame skills and ran towards the distance.

“Hello ~!” The mechanical dragon’s health dropped to 29%. He opened the mechanical hole again, and his wings also exposed hundreds of mechanical holes.

“Oh my god.” Lu Yang sighed, at this time he had no evasion skills, and could only fight to avoid the flames.

“Remnant Flame-Activated”

Lu Yang aimed at the 50-meter position of the Mechanical Fire Dragon King and instantly launched his skills. A red-gold Naruto belt landed at a rapid speed. Chen Haozhe crossed the foot of the Mechanical Fire Dragon King, and the Mechanical Fire Dragon King just fired his skills and fired a fire attack along Naruto, and this attack it was constantly chasing down Naruto, so that when Lu Yang flew to the foot of the mechanical fire dragon king, the mechanical hole of the whole body of the mechanical fire dragon king even shot at his feet, and a fierce fire light hit his feet, every bullet was Has 100 million damage, instantly taking away 3 billion health of the mechanical fire dragon king.

Lu Yang stopped 50 meters behind the mechanical fire dragon king, looking at the instant blood loss of the mechanical fire dragon king, his eyes showed an excited look.

“Hello ~!”

The mechanical Fire Dragon King’s blood dropped by more than 1%, and was instantly enraged. The eight under the wings quickly flew out and blasted towards the landing sun.

“Remnant Flame-Activated”

Lu Yang flew to the foot of the mechanical fire dragon king in an instant, and was able to track. Seeing Lu Yang ran away and quickly flew back.

Lu Luyang watched hitting his body, he instantly activated the flashing skill, jumped behind the left leg of the mechanical fire dragon king, followed him, and hit the foot of the mechanical fire dragon king.

“Boom”

The mechanical fire dragon king lost 8 billion health, and only 20% of the blood was instantaneous. Suddenly, the mechanical fire dragon king became red and fell into a state of rage.

“Step on you **** human.” The mechanical dragon king lifted his left foot and stepped down on the head of Lu Yang.

“Remnant Flame-Activated”

Lu Yang flew to the outside of the right foot of the Mechanical Fire Dragon King instantly. Even if the Mechanical Fire Dragon King wanted to attack again, he could not violate the body manufacturing settings. The left foot he had fallen could not stop suddenly. Go step on.

“Blazing Heart Flame”

Lu Yang stood at the feet of the Mechanical Fire Dragon King, violently launched a fire attack on his body, and his reaction speed was very fast. Because of his large body, the Mechanical Fire Dragon King was very fast. Slow, because every time the Fire Dragon King wants to kick, he has to move the knee joint and sacroiliac joint first.

As soon as Lu Yang saw the knee joint and sacroiliac joint of the Fire Dragon King move, he quickly jumped to the outside of the other foot and jumped while attacking. He then jumped for 10 minutes in a row. Lu Yang felt I felt dizzy in my head Only the mechanical fire dragon king's health was reduced by 10%. At this time, the mechanical fire dragon king had only the last 10% left.

“You **** ant, I'm going to kill you.” The mechanical fire dragon king fell into extreme fury, his body violently emitted numerous laser rays, and shot back on the silver-white wall, quickly scattered and rebounded.

At the same time, the holes of the whole body of the Fire Dragon King popped up, and aimed at Lu Yang under his feet, he roared: “Rage of the Dragon!”

Hundreds of machine gun holes, eye lasers, and full-body wing machine guns fired continuously from the back.

Lu Yang is already crazy, he does n't know what he 's like at this time, and his body is sweating wildly to avoid it. If you hit him with any skill, it will be the end of the death. When he came, it was absolutely impossible for Lu Yang to single out the mechanical fire dragon king.

If he is not singled out, he will need to find a lot of teammates to help him, but this boss can not hide his skills, how can he ask his teammates to hide away, the final result can only be those who follow him, including him All of them were killed by the last move, but they returned without success.

With this conviction, Lu Yang tried his best to maximize the potential of the body. At this time, if there is a test of physical equipment, Lu Yang's adrenal hormones are in a state of soaring.

A foreign zoologist did a test. Normally, a wild deer on the African savannah jumped only 0.4 meters in height. When the cheetah attacked him, he could jump to a height of 1.2 meters because of the adrenal hormone. , So that the instant muscle strength of the wild deer tripled.

Chapter 1615 - Need for a Big Bang

Lu Yang is now in this state. Adrenaline hormones have soared, allowing Lu Yang to unknowingly break through the 0.2 second response speed and become 0.18 seconds. This is 0.02 seconds faster, allowing Lu Yang to avoid overexcitation again and again The laser and, even bullets, that came from him, and Lu Yang knew that he couldn't leave the legs of the Fire Dragon King because he had two places to block the damage and left here. It really hurts in all directions.

If you look at the distant ancient alien species, you can see that 80 billion blood has been punctured by laser at this time, and there is only 40 billion left. Lu Yang's total blood is not even 100 million, which means that if he is outside, They were pierced by the laser 400 times.

System Tip: Your connection to the helmet has been reduced to 94%

System Tip: Your connection to the helmet has been reduced to 93%

In this case of telling to avoid, Lu Yang's brain is finally unable to bear it. His brain and helmet connection has been declining. As long as it is reduced by 3%, he will be forced to go offline. However, Lu Yang is anxious. When I didn't know what to do, suddenly, there was a wailing over his head.

"Woohoo ~!" The huge body of the Mechanical Fire Dragon King suddenly stopped releasing skills, and fierce fire smoke erupted from the whole body.

"No, this grandson is about to explode." Lu Yang instantly launched the flashing ability to jump beyond 100 meters, and outside, the laser has not completely ejected, and at least 30 lasers are ejecting.

"Frozen Body"

Lu Yang froze himself in the ice cube. Fortunately, this skill has cooled down, otherwise he will die.

"Boom"

The body of the Fire Dragon King exploded violently, forming a huge fireball with a diameter of 50 meters. Although the damage did not reach Lu Yang, the shock wave rushed back the Lu Yang ice block by more than 10 meters.

"Ding"

"when"

Uh ...

More than 30 lasers successively hit the shell of the ice cube, all of which became MISS state. Lu Yang saw that the laser was gone, he ended the frozen state with excitement, and quickly ran to the front of the mechanical fire dragon king.

This is the big explosion caused by the mechanical fire dragon king in the state of anger, or the first big death in the story mode, it must be the best thing.

Lu Yang looked to the ground carefully. At this time, the body of the mechanical fire dragon king had been blown up, only the limbs and wings were still there, and the rest were gone. An 8X8 area was generated in the empty body of the mechanical fire dragon king. Need for Big Bang.

前 The first two of them are the mechanical fire dragon king wristband and belt. Now, Lu Yang's mechanical fire dragon king suit is complete, including weapons and equipment, a total of 13 items, all hit.

He put a piece of equipment on his body and looked at other items. A fiery red liquid crystal appeared in front of him.

“Second Fire Dragon King Crystal.” Lu Yang made a strong fist, which could add 10 more flame burning skills to Little Phoenix.

Ghost Gear · Dragon Gun

Lu Yang laughed. He was thinking of exploding this weapon. It really exploded when he didn't think about it. This is a shooter's musket, which has a very technological sense. The silver fluid barrel is inlaid with the dragon color. Crystal sight.

Seeing that the dragon gun received the inside of the backpack, and then looked at the items on the ground, a strange wooden comb glowed golden light on the ground.

God's Wooden Comb

Description: It is said that this is a wooden comb used by a goddess of Jiuzhu God to comb her love cats!

When Lu Lu saw this wooden comb, his excited eyes were all bright, and his body was shaking. Others did not know, he knew the purpose of this wooden comb very well.

Lu Yuan originally thought that after finishing the mechanical fire dragon king, he went to the next secret place he knew, but he did not expect that this thing broke out, what secret place did he go to, just look for the cat directly.

After the Spring Festival, a **** cat appeared outside the Celestial God City. According to official explanations, he was a pet of the goddess of light among the nine pillar gods and fled to the heaven. Players can attack this **** cat wantonly, and once the **** cat Being attacked will attack the player.

So far, it is not the player that kills the most people in the entire server, but this **** cat. According to official statistics, this **** cat has killed more than 300,000 people, which shows how crazy this **** cat is.

You just can't beat him. If you are not angry, if you do n't attack the **** cat, the **** cat won't take care of you. That's why you wander around the various areas around the Celestial God City, and sometimes enter the Celestial God City, no one at all. Leave him alone.

I remember that in the last life, in order to kill this **** cat, the players had reached level 200. Several guilds combined with elite players did not kill him, causing the **** cat to go crazy and killed hundreds of thousands of players.

Actually, this cat is not used to kill at all. The only one who has been able to hit the cat is the wooden comb. As for how to fight it, people who do n't own cats do n't know. Cat owners know what cats are most afraid of.

What is tortoiseshell cat afraid of? He is not afraid of humans hitting him, anxious cats can scratch you, bite you, and regenerate **** kittens to hide and ignore you. It doesn't matter how you poke the cats. What really can subdue cats is the use of wooden combs.

Once you flip the wooden comb teeth and make that crisp sound, the cat collapses, with one click, he will stare at the wooden comb teeth, two times, he will be confused, three times, his back will start to tremble, to the fourth When it sounded, the cat basically spit it out.

This is the best way to deal with cats. Of course, you can't deal with kittens this way as a last resort, because it will hurt the cat's body too much.

However, the game is not the same. Remember that after some players figured out this secret, they flipped the wooden comb teeth against the **** cat. Each time they swipe 4 times, the **** cat will spit out a baby thing, which is fun. .

Lu Luyang had the trouble to find the God Cat immediately, but a sense of dizziness came. He resisted the discomfort, and flew back to the village of Prince Wanjie, found Huller, and said, "The mission is complete."

"It's hard for you, my friend." Hu Lei excitedly handed a skill book to Lu Yang, saying: "This is what you deserve. If you want to enter the star domain later, you can come to me at any time."

"Starfield Prison Cage"

Type: Mixed Spell

Distance: 10 yards

Consumption: 100,000 magic

Description: The five-line elemental mage can be learned in any profession. It requires five bodies to cast at the same time. The target is controlled for 20 seconds and the skill cooldown is 24 hours.

Lu Yang had a headache at this time, no other, and quickly took out the teleportation scroll and flew back to the hotel in Tianyu Shencheng, then quit the game, took off his helmet and rested.

The moment of taking off the helmet, the intense dizziness made Lu Yang almost vomit. He resisted the urge to vomit and walked to the reclining chair to lie down.

Baihei was watching Lu Yang's safety and found that Lu Yang's body wasn't right. He quickly came up and asked, "What's wrong?"

Lu Yang waved his hand and said, "I encountered a strong lord in the game and forcibly killed him. The brain was bitten back. I do n't care. I just rest for a while."

He nodded in black and white, walked aside and poured a glass of water for Lu Yang. Now he no longer underestimates the game, especially after Zhou Tianming fought for a year of peace for the game city, he can feel that including Lu Yang Everyone in the family, the dedication to the game city, and the true love.

After a full night's relief, at 10 am the next day, Lu Yang calmed down from a state of apathy and severe headache. Lan Yu stayed with him for a whole night, watching Lan Yu worry about her appearance, Lu Yang said: "Don't worry about me, I'm fine."

Wu Lanyu said, "Why so desperate, I don't care for my body at all."

Lu Yang changed a comfortable posture, sat up and leaned on the sofa, put her two legs on the coffee table, sighed comfortably, and said, "Zhou Tianming can work hard. What am I missing? Rest assured, this is a pain It's nothing, right, when will Zhou Tianming be back? "

Lan Yu gave a strange look at Lu Yang and said, "He has been in the hospital for half a month, and you won't go to see him when you are busy."

Lu Yang laughed and said, "How can I have time. I saw him in the game the other day. This kid is very active. I have already told him about the new appointment. He knows my trust in him."

Black and White smiled and said, "Of course All the buildings belong to him. This trust is the highest in the Brotherhood of Iron and Blood. However, you are a bit uninteresting in muddy wine and his loyalty is not bad Yu Zhou Tianming, but he has been silently guarding the Tianjian Fortress for you. "

Tong Lanyu smiled and said, "Look, black and white people who don't play games know that you are not fair to muddy wine."

Lu Yang grinned and said, "I bet, this is definitely not a complaint of muddy wine to you, it must be some of his people."

“How do you know?” Black and White asked.

Lu Luyang said, “This is the secret between me and Zhuojiu, and I will tell you later.”

知道 He knows that there is a muddy wine in his most sorry person. He used to be one. Now he has one more Zhou Tianming. He can give Zhou Tianming a building because Zhou Tianming is dying for the game city, but the same is true of muddy wine.

White Lion and Tian Yao, they can also charge into battle to gain fame and money, but what can Zhuojiu get? He stayed at the fortress of Tianjian, not only did it have no advantage, but also had various complaints from his men.

Lu Yang knew this, so he privately gave a 5% stake in Game City to Zhuojiu. Game City is independent of War Studios and is a private company of Lu Yang. All stores in all the properties developed by this company The house, as well as the large shopping malls, movie theaters, and large catering companies developed around the war studio, are Lu Yang’s private property.

Even if it only has a 5% share, this is a large amount of income. He told Zhuzhuo that he could n’t keep the sword fortress all the time, and they would be replaced with white lions in the future. By then, there would be white lions in this share. They got a share, but he got it first and made money first.

Chapter 1616 - Black yarn handle

Lu Yang knew that Zhuojiu didn’t care about money. He gave Zhuojiu the money, which was also used to place his players. Once anyone had any urgent matters, when Luyang could not be found, Zhuojiu could use the money to help.

I heard that it was for this reason that Zhuo Jiu took the 5 shares, otherwise Zhuo Jiu would not want it, and it was considered Lu Yang lucky. In this life, he can meet loyal brothers like Zhuo Jiu. He can only give limited things. , Can only continue to be ashamed of muddy wine.

He sighed and said: “Lan Yu go back and get busy. There are a lot of things about you. You stayed with me for one night and I think I have left a lot of work.”

Lan Yu nodded, she now manages the entire game city operation, and also takes care of Lu Yang's parents and her parents and elders.

Nah, when you are old, you are not healthy. Even if you exercise regularly, you will have all kinds of problems. Not to mention people in their 40s and 50s, after 35 years of age, their body's mental metabolism slows down. Various diseases were found.

Some time ago, Lu Yang's father and Lan Yu's mother were both ill. Lu Yang's front line was fighting tightly. There was no time management. All of them were taking care of the elderly on both sides while managing logistics.

"Well, I'll see you when I'm busy." Lan Yu sighed and left.

Lu Yang returned to the game again. Just after launching, eight fierce and little phoenixes and others sent news.

"Boss, we are back."

"Weapon, my weapon, God, pray to my boss to go online soon."

Lu Yang shook his head with a smile and watched the news from them. He said in the group: "All come to the Dongcheng District of Tianyu Shencheng. Remember to use a camouflage coat. I will take you to fight the baby in a while."

"Yes." A group of people were excited.

He closed the call box, flew to the Red Fort, and first raised all his ghosts to level 5.

Mechanical Fire Dragon Necklace Level 5

Level: 175

Defense: 3000030000

Magic Resistance: 3500035000

Intelligence: 186600

Constitution: 208850

Additional Spell Damage: 271400

Additional Spell Critical: 271400

Ignore Magic Resistance: 5

Special Skill: Hades

The attributes of the necklace and the ring are the same. Lu Yang wore the last wristband, necklace and belt on the body. Suddenly, the damage of the magic increased to more than 5 million under the state. With the addition of gems and mixture, the total damage it has risen to more than 6 million, including the demon heart worn, and the magic damage has reached 7 million.

At present, the magic resistance of the 170-level dark gold set is less than 1 million points. Lu Yang can deal 6 million damage with any ordinary magic. If it is replaced by 9 times the magic damage of the mixed spell, it can hit tens of millions. The damage, the 170-second dark gold player is no longer a luxury.

Now, he can do all he can to bring his elite group of elite players from the fourth contest to fight equipment. When they are also equipped with Lu Yang, it is estimated that the eight strongest guilds Claudio and Kazakhstan Ruiken's war should also begin. At that time, it was time for Lu Yang to take this elite to sweep the logistics of both sides and weaken the strength of both sides.

He used a camouflage coat to transform himself into an ordinary person. After leaving the hotel, he put on an elite mount and ran towards the east city.

But he didn't run for a long time on the mount, and suddenly he was tracked, and it was a group of European players who followed him.

Lu Yang showed a sneer look. For many years, no one dared to follow him like this. He was curious as to who these people were and who was instructed by them.

He ran to the door and saw the eight fierce men and little phoenixes in camouflage coats. Near to him, he whispered to the excited crowd: "Someone followed me, mounted, we killed them before we left the city."

"Good grin." Eight fierce and little phoenix did not look back, they are more familiar than Lu Yang to deal with such things, are tracked to grab equipment for many years to get used to it.

Lu Yang ran out of Dongchengmen with a group of people. When he was on the road, he threw a bottle of stealth potion for each person. There was a dense forest outside Dongchengmen. After the pedestrian ran in, he quickly hid with the stealth potion.

The tracked person ran to the position where Lu Yang and others stopped, and the headed player frowned and said to the left and right, "Strange, how did it disappear?"

The deputy next to him said, "Boss, let's go. They are not alone. They are a group of people. We may not be able to take advantage."

"What are you afraid of?" The boss frowned at him and said, "If you want to make the black guild grow fast, killing and grabbing things is the fastest shortcut. You are all my brothers. You can chase the black veil Help me. "

"It's natural," the deputy said.

The boss continued: "We are all from the elite studios. It is not a problem to kill five. I think they are ordinary rich people. It is not a day or two that we squatted at this door, which is not easy. "

Lu Yang was able to understand. It turned out that these people were all under the control of Heisha. Heisha was now in a state of lack of money, but she was not ordinary in virtue by using this method to make money.

It is true that the location they chose is right. Anyone who comes out of the hotel is not a bad player. As long as they kill them, they will definitely explode 10 dollars. There may also be demigod-level equipment and special items.

But this is fine for small and small studios, but a grand guild does so, it is too tasteless.

He just turned on the recording equipment and recorded the conversations of these people in front of him. The light flashed. He pulled away to hide in front of more than 20 studio players and frowned. "You're too shameless, to help Black gauze actually robbed rich players. "

This group of European players was startled by the sudden appearance of Lu Yang. The boss Ruiz quickly said: "Don't talk nonsense, we don't admit it."

Lu Yang sneered, took the recording equipment out, put it back again, and said, "How about, what else needs to be justified?"

"You, you have to delete it quickly." Reese was anxious, he was not stupid, knowing that if this thing spread, it would surely cause uproar.

"Why can I delete it? This is the evidence of your group. Under the banner of the group, you specifically kill the group. I see how you explain it." Lu Yang pretended to be a cymbal and intentionally stimulated Reese.

Reston was embarrassed, thinking for a long time, finally, his eyes showed a trace of Le Mans, and instantly turned into a flattering expression, said to Lu Yang: "Brother, this matter is we are confused, we are not right, you see this is OK , We compensate you for 50 gold coins, you deleted this recording. "

“Really?” Lu Yang looked greedy.

“Of course it is true.” Reese watched Lu Yang hook up, took out the gold coins quickly, and said, “Look, as long as you delete the video, this money will be given to you immediately.”

“Which video to delete.” Lu Yang asked.

“That’s just the video you just recorded killing me. We promise not to do it in the future, after all, we’re also scattered groups,” Reese asked.

“Then you swear to me,” Lu Yang said, “you promise not to rob and kill casual players in the future, I will delete the video after taking the money.”

“Swear yes, I swear.” Reese gritted his teeth and repeated what Lu Yang said just now, saying, “Can you delete the video first, and then I will give you money, I’m afraid you will run away.” . “

“Of course not.” Lu Yang smiled at Reese, beckoned and said, “Come out and kill them all.”

Eight fierce, little phoenix, Koster, and Mike flew from both sides of the forest instantly, and Riss was killed by Koster without saying a word of why.

“It’s rubbish, so dare to call it the studio.” Neff said disgustingly.

Coster smiled melancholy and said, “Perhaps their understanding of the studio and ordinary players is different from us.”

“Just your kid can talk,” Mike said scornfully.

Coster was so handsome that they made Mike and the eight murderers jealous.

Lu Yang smiled and threw the blood slashing knife and chaos ball to the eight murderers, and said, "Some of you have to live in harmony. I also expect you to fight for the world. The internal quarrel is not for me style of."

"I see." Mike and Coster said together.

"My God, this weapon is too powerful." Neff jumped up in excitement when he got the blood infighting knife of Hell, holding the sword in his hands as close as holding his wife.

Weapons are two different feelings when looking at pictures and getting them by hand. The former just feels too cool, and the latter feels that I finally got it. The excitement that the former can never provide.

"This blade has caught up with the door panel," said Xiao Fenghuang.

"It suits me. I am a rebounder. This board is in front of me. I do n't need to waste energy on aiming to bounce back the skills. I can use this time to do more things." Neff said excitedly. .

"That's true," Mike said.

"Boss mine, mine." Little Phoenix's eyes brightly looked at Lu Yang.

"I can still forget you, take it." Lu Yang gave the cloak and two Fire Dragon King crystals to the little phoenix, and said, "All are used to learn the flame burning skills."

"Observe." Little Phoenix salutes, looking adorable.

"Improved several levels in an instant," Mike said enviously.

Lu Yang leaned on Mike's shoulder and said, "Follow me and see how lucky we are today. If you are lucky, you may have all your weapons."

“Where?” Coster asked.

Lu Yang said, “You’ll know where you are.”

He changed into a mount and ran towards the East first. Koster and others followed closely and ran with Lu Yang.

Passing the forest outside the East Gate is the endless Great Plain. When running to his destination, Lu Yang sent the video and voice just recorded to Tu Feng.

Chapter 1617 - God cat vomit

As soon as Tu Feng heard his voice, he opened his eyes with excitement and said, “Boss, you are so god, you can get all this stuff. This is deadly to Alice.”

Lu Yang sneered and said, “It’s not fatal enough. Starting today, you sent people to squat outside the gates of the hotels in Tianyu Shencheng and Tianyuan Shencheng. When you saw someone, you sent someone to kill. How many kills, anyway. Rich players don’t care about these three melons. “

Tu Feng understood it instantly and said excitedly, “You are trying to get a paycheck on the black yarn.”

The black yarn guild was established by what they said. To put it bluntly, they are the second brotherhood of iron and blood. They started as a Sanctuary, and how the Sanctuary appeared to fight against large guilds that were unfair to ordinary players.

These scattered groups are united together to help each other, but suddenly, among these scattered groups, there are a group of people who are specialized in killing robbers. The nature is different.

Sanshou will definitely not bully ordinary players, nor will they do such things as looting homes. Anyone who has done such things is the grand guild act that Sanshou players despise. However, this video from Lu Yang’s hand and Audio, once the players are let out of the shame and anger of the house, release the video and audio, then the foundation of the black veil to establish this guild is removed, which is equivalent to the rootless duckweed and water rotten wood, Death is sooner or later.

Lu Yang originally thought it would take a lot of effort to get rid of the black yarn, but he did not expect that the black yarn was so stupid that he brought such a big handle to him. In that case, Lu Yang would never be polite.

“One more thing, let the spies inside the Black Gauze Society also collect the materials in this area. We must make a one-shot kill and not give Black Gauze any chance to justify and escape.” Lu Yang said.

“Rest assured, I must let them dig this out.” Tu Feng said.

Lu Yang nodded, hung up the phone and continued to take people forward, running for two hours in a row, when Little Phoenix and Koster were almost impatient, finally, in a valley, Lu Yang found the **** cat.

“Meow!” A traditional Chinese black and white cow cat, Meng Meng Meng Meng lay under a big tree, staring at two curious big eyes, looking at the player’s body and falling around him. Equipment.

The kitten is very beautiful, the back is black, the abdomen is white, and there are a few white hairs on the lower jaw, which look like the mane of a lion. The little guy’s eyes are particularly large, but don’t look at his beautiful, harmless expression , Can kill people, not relentless.

There were hundreds of level 160 players around, and kittens were around. Naif frowned when he saw the situation, and said, “Isn’t this trying to kill? Cow cats can’t beat them.”

“It’s so cute.” Little Phoenix overflowed with love.

Coster said helplessly: “These people are dead.”

“Of course.” Lu Yang shouted suddenly, “Go up, kill him together, he has a 200-level semi-artifact.”

“What? Demigod, kill him.”

“Kill!”

Hundreds of impetuous players rushed up, and the kitten was just attacked once by the shooter, and instantly became furious.

“Meow!” The kitten yelled, rushed into the crowd instantly, opened the kill ring, and in a blink of an eye, hundreds of people were killed and scattered.

Little Phoenix looked over at Lu Yang and said, “Boss, I find you really lack moral character.”

Lu Yang gave a slight greeting and said, “Thank you for the compliment.”

“They’re dying, shouldn’t we go?” Neff asked.

Lu Yang shook his head and said, “No, I brought you here to find him.”

“What?” Neff, Mike and others were stunned. Little Phoenix asked dumbfoundedly, “Boss, aren’t you taking us to kill it, we can’t fight it.”

Lu Yang pulled the reins, and the warhorse ran toward the cat and said, “If others can’t fight, it doesn’t mean that I can’t, but come on, I have special weapons.”

Koster, Little Phoenix, and others were curious, and they ran to Godcat together. At this time, players around Godcat were dead and hundreds of people were killed by him. It was only a matter of ten seconds, and the kitten recovered. With the original cute appearance, he lay under the big tree and looked around with two big eyes.

Lu Yang murmured to himself: “I really don’t want to treat you this way, but spit out some good things for me.”

God Cat turned his head to one side, and a side light glanced at Lu Yang, and the little black tail patted the grass, signalling that he was uncomfortable when he heard this sentence, and was too lazy to deal with it.

“Boss, what do you have to deal with the **** cat.” Neiff asked in a daunt.

Everyone looked at Lu Yang. In the eyes of everyone, Lu Yang took out a wooden comb from his backpack and said with a smile, “That’s it.”

Little Phoenix: “”

Coster: “”

Mike: “”

Eight Fiends: “”

Little Phoenix rolled his eyes and said, “Boss, don’t tease us, okay, what good is this wooden comb?”

Lu Yang said with a smile: “If you have a **** cat in a circle, if he wants to run, immediately stop him with control skills. Remember, he will not actively attack the player during my attack with a wooden comb. Every 4 A baby will be spit out in a few seconds. Little Phoenix is responsible for picking things up fast, and the rest must stop him. “

“How do you fight with a wooden comb?” Mike asked distrustfully.

“I’m going to be surrounded first,” Lu Yang said.

“Oh.” Mike and Coster and others responded. A total of 11 people formed a circle of 10 meters in diameter and surrounded the cat.

The cow cat classmate looked around and found that he was surrounded. Some dissatisfied looked at Lu Yang and others with their heads down, as if to say: You are looking for death.

Lu Yang looked at the kitten provocatively, pointed the wooden comb at him, and then started to gently pick up his teeth.

“噔”

With a crisp sound, the kitten stood upright, staring at the wooden comb in Luyang’s hand incredibly.

“God, it really works.” Little Phoenix said excitedly.

Mike and Coster and others also looked dumbfounded. Lu Yang gave them a prepared look and continued to move the wooden comb teeth.

“噔”

The kitten was anxious, staring at Landing Yang violently, and then turned to jump and run away. Neff was just on the way in that direction, quickly picked up the **** slashing knife, and patted the kitten against the door of the kitten.

With a “dang” sound, the kitten was photographed back to its original location. If it was the case, the God cat was not afraid of the blow at all and would not even be hit back. Instead, it rushed out directly. Most of the attributes of Divine Cat are weakened.

“Oh!”

Lu Yang flipped the wooden comb for the third time, and the kitten’s back jittered sharply at a visible speed, as if something had come out of his stomach.

“He’s going to spit something,” Little Phoenix shouted excitedly.

Coster, Mike and others were also excited, Lu Yang could not wait to flip the wooden comb teeth immediately, but this thing has a cooling time, every time you flick, it must be cooled for two seconds.

“Oh!”

Finally, after cooling down, Lu Yang flipped the wooden comb for the fourth time. God Cat couldn't help it anymore, and he vomited a long knife.

Reggae knife

Little Phoenix quickly ran over and shared the materials with everyone. Lu Yang saw a reggae sword and couldn't help but make a fist and said, “David, your thunder knife is out.”

David is also full of excitement. Obviously, the attributes of this knife will not be weaker than that of Naif's Hellblood Sword, saying, “Thank you.”

“You're welcome.” Lu Yang flipped the wooden comb again and said, “Everyone has control. Don't let him run away. If you run away, it will be difficult to catch up.”

“Boss rest assured, absolutely let him run away.” Mike and eight fierce and others are excited, obviously, the top equipment really came out, let them realize that this **** cat is really a good thing.

“Oh!”

Lu Yang moved the wooden comb again, and the God Cat couldn't hold it this time, rushing towards Mike, and a space control magic hit him back to his place.

Of the four wooden comb teeth sounds of the **** cat, only the second time would escape. When the second time, he was charged back to the place, and he could only bear the third and fourth sounds.

“Spit!” The kitten opened his mouth and spit out a transparent, black crystal.

Time and Space Dragon King Crystal

Level: 175

Description: You can specify an increase of 10 levels for any skill.

Lu Yang saw the attribute map sent by Little Phoenix, and made a strong fist, saying, “Mike, it’s yours this time.”

“Thank you, boss,” Mike said excitedly.

Lu Yang went on to say: “Everyone continues to work hard, stop it, his speed will accelerate.”

God cat spit something twice, and the moving speed increased by one grade. When Lu Yang flipped the wood comb teeth twice, God cat escaped nearly one-fifth faster than the original, but this increase is still difficult for Mike and Little Phoenix, they tried to stop the **** cat.

“vomit!”

“vomit!”

Two successful interceptions God cat spewed out two shield-shaped strange weapons with serrated blades.

Ghost Water Soul Shield Knife

Lu Yang said with a smile: “Karim, your life is so good. You have brushed out two shield knives at one time. In the future, you can use this shield knives to fight. It is just right for you to play together.”

“Thank you, Boss.” Karim loved these two shield knives. He is a water melee, and what he lacks is defense. With this shield knives, he can launch an attack while defending, and no longer afraid of siege by multiple people. Close combat.

“Continue to fight, and his speed has accelerated again. Stop it.” Lu Yang said.

The speed of the **** cat is increased by one-fifth, at this time his speed has been 027 seconds, which is already Naif’s limit reaction speed.

“Meow!” The kitten rushed towards Koster, but he launched a disguise halfway, avoiding Koster’s attack.

“No, he ran away,” Coster said in a panic.

Chapter 1618 - Hidden map on gold coins

“Little Phoenix combs his teeth with wood.” Lu Yang threw the wood comb out, and his body instantly emitted a white light, then four avatars appeared behind him at the same time, and his position was in front of the **** cat.

“Meow!” The kitten saw Lu Yang standing in front of him, and was furious, and the two claws caught him in the depths. If he was caught, he would die.

“Five-line mixed spell starfield prison cage”

Before Lu kitten hit him with his paw, he launched the super control skills at the kitten, and directly controlled the kitten in a huge purple prison cage. He controlled the kitten for 5 seconds, because the kitten was The superior lord, according to the official setting of the control effect on the special monsters in a decreasing order, the original 20 seconds of control, only 5 seconds to the kitten here.

“Come over and surround him,” Lu Yang said.

“Come here.” Koster and others quickly surrounded the kitten. Little Phoenix turned the wooden comb at this time. Because the escape was successful just now, he needs to start again, but this time the kitten was trapped in the prison of Starfield. After the second beep, he couldn’t jump out. After four beeps, he spit out another item.

Destiny Day

This was a shaman’s special one-handed long grappling hook, and Coster suddenly opened his eyes and said, “Great, it’s my turn.”

Lu Yang said, “Be careful, otherwise you will be gone.”

“I’m sorry.” Coster showed an embarrassed smile, and instantly lost his handsome look, causing Mike and the eight fierce men to laugh.

“Meow!” The kitten was about to run.

“Wood comb teeth.” Lu Yang shouted.

The little Phoenix quickly moved, and the kitten jumped in the direction of the old eight Gibri in the eight fierce. Gibri quickly used the control skills to control the kitten back to the original place. The crowd breathed a sigh of relief, and then continued to stir. Wooden comb teeth twice.

“Spit!” The kitten spat out something again.

Plans: Legendary Infantry Gun

Lu Yang's eyes were all bright, and he couldn't help laughing, and said, "This good thing has burst out. It's rare."

Legendary drawings, the hardest part in this game is to mass produce a certain superb equipment, not to mention the legendary ones, even the dark gold ones are not easy to get.

From level 0 to level 175, Lu Yang only got the legendary two-handed sword drawing once, and it was still at level 60, and he never exploded again. Not only did he never explode, the 5 billion players in the New World It didn't explode again, I didn't expect God Cat to spit out a drawing.

"Good luck, our musketeers are invincible." Lu Yang said.

"Is this legendary musket strong?" David asked.

Lu Yang said with a smile: "Of course you do n't feel the legendary weapon is strong when holding a ghost weapon, but what is the hardest thing about a musket is that there are many people. Once the number advantage is formed, no player can beat them. Including me. "

Everyone nodded in agreement with Lu Yang's statement that once the Musketeer team is formed, it is the most difficult target to attack and the most powerful single-professional combination.

"Meow!" The cat suddenly yelled, his body speed increased by one-fifth, and his body was shaking in place, as if the shadows of several cats were added, Naif said, "It's over, you can't see it now. Cleared. "

"I can't hold it," Coster said.

"I try." Mike wasn't convinced.

"Woohoo!" God cat rushed towards Mike, and his eyes widened sharply, punching him in the direction of God cat's body.

“噫”

With a loud noise, the **** cat was beaten back to the place, and the little Phoenix quickly turned the wooden comb teeth once, twice, three times, and four times.

“Spit!” God Cat spit again, and a Japanese-shaped sword spit out.

Ghost weapon

Lu Yang said, “Eric, your weapon is here.”

“Thank you, boss.” The fifth of the eight murderers took the long knife excitedly.

Little Phoenix continued to move the wooden comb teeth, this time the cat rushed in the direction of the landing sun and was beaten by Lu Yang’s Lie Yang punch.

After three more strokes, the kitten took a spit and spit out a piece of 170 dark gold equipment, and everyone looked disappointed.

“Continue,” Lu Yang said.

At this point, the speed of the **** cat was already very fast. This time he ran in the direction of Mike. This time, Mike failed, and shouted in panic: “It’s over. Run away.”

“I’m here.” Lu Yang suddenly appeared behind Mike, his body burst into light, and he launched a polynuclear explosion to fly God Cat back.

“Oh!” Little Phoenix continued to comb his teeth.

Mike looked at Lu Yang in shock, and said, "Boss, what is your reaction speed now."

Lu Yang smiled and said, "What's wrong?"

"You are definitely faster than before. I was about the same speed as you before, but now you are much faster than me." Mike said in surprise, but before he was not convinced by Lu Yang, but this time, he was a little hesitant.

The speed of the two before was between 022 and 027 seconds, but this time Lu Yang entered within 02 seconds and became 018 seconds. Don't look at the difference of less than 01 seconds, but in front of the master, this is the nature.

Lu Yang said, "I don't want to learn."

"Think." Mike nodded quickly.

Lu Yang said, "Teach you slowly in the future."

"Thank you, boss." Mike said excitedly, the space mage's most important reaction speed, if you can reach the world's first reaction speed, almost no one can beat him.

Lu Yang looked at Mike's expression. Originally, he still felt that it was difficult to tame this group of masters. However, he did not expect this time to tame all of them.

Naif, they are grateful for their equipment, Mike admires his reaction speed, Little Phoenix and Cost are for money, and they agree with Lu Yang.

“噫”

“噫”

Little Phoenix flipped the wooden comb again, and the kitten spit out a piece of space-time Dragon King crystal, and Lu Yang motioned for Mike to hold it.

At this time, Mike and Little Phoenix are fully equipped, and their skills are fixed damage skills, which can be combined into a dual control combination.

After rising to level 40, the flames of the Phoenix can not only cause 5 million damage per second, but also ban physical attacks. Mike's space magic can cause players within 500 meters in diameter to move and prohibit use. magic.

Their skills are instantaneous, which is equivalent to putting them together, that is, there is a combination of absolute seconds, the opponent can not escape, can not fight, can only wait to die.

As for how to upgrade the skills of the two to level 40, Lu Yang is preparing to match them with the heart of God. From then on, Lu Yang will officially bring the Artifact Army into the battle. This is a very exciting sport. Kill Enemies do not necessarily make much money. If they die and fail, they will definitely lose hundreds of millions.

The money earned is disproportionate to the money lost, but who can kill them? As long as the information is in place, Lu Yang can take them freely to shuttle between the central plains and the mountainous areas in the southeast, and no one can catch him.

“Meow!” The kitten's anxious voice pulled Lu Yang back from his thoughts. Looking at the kitten who wanted to run away again, Lu Yang stopped trying to block the kitten for three more times, hitting them 2 Chaos Balls and a stab knife blood sacrifice for the sixth child.

“Meow!” The kitten couldn't hold it anymore this time. The speed was as fast as 0.1 seconds, and Lu Yang couldn't stop it either. He could only watch the kitten run away.

“It's a pity,” Benanis said, his weapon had not been hit yet.

Lu Yang said with a smile: “Don't worry, I also know where to get this special weapon.”

This is the place he was going to go, and everyone in this place actually knows it, but no one has ever watched it carefully.

“Where is it,” Benanis asked, kicking the stone under his feet.

Lu Yang smiled and said, “You give me a gold coin, and I’ll tell you.”

“Well!” Benanis reluctantly gave Lu Yang a gold coin and said, “Say it.”

Lu Yang pretended to put the gold coins in his hand and mumbled, “Gold coins, gold coins, tell me where can I get Benanis’s weapon?”

Everyone looked at Lu Yang, and they all felt very boring. At this time, they talked about Benanis, and Naif said, “I’m going to upgrade the weapons.”

“Don’t worry.” Lu Yang opened his palms and said, “The gold coins told me, there is a way, you can go straight to a hidden map, as long as you clear the customs there, you can get what you want, but customs Chances are very, very low. “

“Really fake?” Coster looked at Lu Yang curiously and said, “Boss, this is usually what I like to do. You do n’t learn from me, do you not deceive a little girl? I despise you. “

Lu Yang was speechless and looked at Coster and said, “I still despise you. Every day, my little girl in the game city, how many people come to me to complain.”

“Eh!” Coster pretended not to hear.

Lu Yang didn’t bother to talk to him and said, “Look closely at your gold coins, is there a weird figure on it?”

“Is there a graphic on the gold coin Isn’t it the Celestial City?” Mike said curiously holding the gold coin.

Lu Yang said, “Yes, it’s the Celestial City, but you find that there isn’t. There is a road on top of it, it seems to lead to somewhere.”

“Really?” Mike and Neff looked at the gold coins with curiosity, but found nothing on them.

“No,” Mike said.

Lu Yang said: “You buy a 200x magnifying glass in the system, and then you look at it.”

Officially sold things are strange, but each is not useless, such as this 200 times magnifying glass, no one knows what it is from out, but this thing is to find the map on gold coins.

On the back of the gold coin, there is a pattern of the Celestial City, and then there is a boulevard extending out. It looks nothing special. Under a magnification of 200 times, you can actually see that there is a cave in the middle of the boulevard The map, exactly where it is, is the road they are now walking for another three hours.

Chapter 1619 - Extremely hard to copy

“My God.” Coster looked at Lu Yang in surprise and said, “Boss, how did you know this?”

Lu Yang said with a smile: “This is the strength of the strongest guild. He has not only the number of players on the Ming Dynasty and the hard power on equipment, but also the soft power. This gold coin map is soft power.”

Lu Yang knew the map on the gold coins long ago, but after the group of people he studied in the old continent specialized in books entered the new continent, Lu Yang let them continue their research without assigning a job.

This gold coin is one of the successes of their research. Lu Yang only knew the approximate location before, and he has not been there, but this group of researchers not only found the location, but also found the approximate way of the map inside.

Unfortunately, their strength is very low. Everyone has developed a certain routine, but they just can't fight it. Even if they go all out, the reaction speed can't catch up with those of Lu Yang and their elites. If they use it too much, it will lead to They were forced to interrupt the game.

Lu Yang explained all the way, and Koster and Naif went all the way to listen in detail. Until this time, they really recognized the strength of the Iron Brotherhood. A guild can always find other people's hidden places they can't find. , And they are the beneficiaries of this first hidden place, no one would be reluctant to join.

Three hours later, Lu Yang took them to a cave. At the entrance of the cave, there was a pale white enchantment layer.

"Here it is." Lu Yang pointed at Jiejie.

"Can I go in this way?" Mike went to the enchantment, but didn't respond at all.

Lu Yang smiled and scolded: "Stupid, so you can go in, what do you need a gold map?"

"So how to get in." Mike looked puzzled.

Lu Yang said with a smile: "Look at your gold coins, there are detailed ways to enter the map. There are six types, and you can clearly see which one you are. After completing the above requirements, put the gold coins into the one next to the enchantment. Inside the coin slot. "

On the rock wall next to the cave boundary layer, there is a coin slot with a diameter of gold coins, just like the coin slot of a large game machine used as a child.

As for the entry method written on the gold coins, Lu Yang's one is to turn left three times and then right three times, and then put the gold coins in.

"It's expensive, one coin at a time," Benanis said.

Lu Yang said with a smile: "The guild will reimburse you, come in."

"Thank you, boss." Benanis happily threw gold coins, and as Lu Yang entered the copy, Mike followed the action on the gold coins, and then poured gold coins into the copy.

The light shone, and everyone appeared in a dark underground cave. The ground of the cave was marble, very smooth. Looking forward, it was a ground with purple flames. Lu Yang said: "As long as you step on the ground, Die, no matter how much blood you have. "

"Well, then," Mike asked.

Lu Yang pointed at the oblate flying saucer flying in space in front of him and said, "Step on that and jump over, you all have ejection staff."

The ejection staff is the standard configuration of the Iron Brothers League for the elite players. Each elite has it. Mike and Coster got it from Mu Yi on the first day they entered the guild.

"Yes," said Coster and others.

"It's good to have it. I'll go over it myself in a while. You guys watched my video. Remember, everyone only had one chance. They fell below and died. They need to re-enter the gold coins. Don't waste guild gold coins, be careful that others don't look good to you." Lu Yang said.

Everyone pouted.

“Come on, I can do it if you can get over,” Mike groaned.

Lu Yang rubbed his little head and said, “I’m your brother. You’re not as strong as me. I’m going.”

“It’s not as strong as you are now,” Mike mumbled. He was a smart boy who knew the gap between himself and Lu Yang.

Lu Yang looked at the oblong flying saucer flying from a distance. The diameter of the flying saucer was only 03 meters. It just happened to be able to stand a person. But around the oblate shape of the flying saucer, there were 8 sharp short knives rotating at high speed. If the jump failed, the The rotating short knife hits, just like the purple inflammation that fell into the bottom, instantly die!

Even in the last life, Lu Yang couldn’t guarantee that he would pass the level 100%, but this life is different. He has exceeded the limit of the previous life and the reaction speed has increased by 002 seconds. It is this improvement that allows Lu Yang is more confident than before.

“catapult”

Lu Yang grasped the distance, watched the flying saucer coming, and quickly launched the ejection staff. He flew over a beautiful parabola in the air and landed precisely on the flying saucer.

The flying saucer took Lu Yang to the front of the map and flew forward for a distance of 50 meters. There were six flying saucers staggered up and down, and there was a treasure chest on each flying saucer.

In fact, it’s not a treasure chest, but a small flying saucer. Once you jump on it, you must step on the medium treasure chest, and the small flying saucer will break out of the box.

The small flying saucer has a switch. Stepping on it will accelerate him to fly upward. Each of the six staggered flying saucers is 200 meters away. Lu Yang wants to fly up and must use the small flying saucer. It can’t be hit by a small flying saucer, this is the hardest.

“Ejection Staff”

Lu Yang aimed at the distance. When the flying saucer flying horizontally reached a sufficient ejection distance, he launched his ejection skills and ejected himself to the bottom fixed flying saucer staggered up and down, namely the No. 1 flying saucer.

As soon as it landed on it, a small flying saucer flying in the treasure chest with a diameter of only 01 meters was enough for Lu Yang to step on one foot.

He quickly jumped and stepped on the small flying saucer. Suddenly, the small flying saucer flew up at a high speed, an average of 15 meters per second. At this speed, Lu Yang was slightly slower and would hit the fixed flying saucer No. 3 above. He must be hitting Before flying saucer No. 3, jump to the fixed flying saucer No. 2. This jump has only one chance, and the flying saucer No. 2 only has a landing distance of 03 meters. In the case of high-speed rise, even if the timing is less than 01 seconds, it will be skipped. fall down.

The advantage of the mage is that he has the ability to escape daggers and flashes, and can have two more chances than others, but this copy of continuous and rapid response, that is, two more chances, now used, there are two flying saucers to jump, still You can't make mistakes, so if you can jump by in the early stage, you must jump by.

During the high-speed ascent, Lu Yang suddenly jumped forward hard, landing on a flying saucer No. 2 with a parabola.

“噫”

The treasure chest opened, and the flying saucer No. 2 flew up. Lu Yang seemed to have formed a conditioned reflex. He just jumped quickly after landing. When he fell, he stepped on the flying saucer and the flying saucer quickly flew up. He has two choices for flying saucer No. 4, one is to jump to flying saucer No. 3 regularly, and the other is to start the flashing skill to jump to No. 4 flying saucer. After thinking about it, he still gambles.

“flicker”

Lu Yang landed on the No. 4 fixed flying saucer, and then he jumped up and down on the No. 4 small flying saucer. The small flying saucer did not take him up, but quickly moved forward, still moving at a speed of 15 meters per second. From Lu Yang's point of view, if there are trees on both sides, you can only see the ghost.

Fortunately, this is an underground cave. There are no counts on both sides. At this time, you can see a piece of marble land in front. If you are a novice on the land, you will be stunned by the horrible sight in front of you.

What a terrible place it is. Whether it is in the sky or underground, there are rotating cutting knives. If it is a long knife with a fixed pulley, there is a long knife with a 5 meter long moving pulley.

The so-called moving pulley long knife is that the handle position of the long knife can be moved up and down or left and right, and the map itself is very small. There is also a fixed pulley long knife that swings left and right. Opportunity, and this moment of opportunity is less than 03 seconds.

No matter it is fast or slow, it will be hit by a long knife. If it is hit, it will be a spike. The main thing is that it can't be avoided from side to side. The marble floor is only 20 cm wide and can only be run forward and backward.

Lu Yang carefully looked at the long knife in the sky, the ground, and the middle. After looking at it for 2 minutes, he finally found the opportunity and ran quickly forward, but he just ran 7 meters, 5 meters in the sky. The knife came, and he ran back 6 meters quickly to avoid the long knife. He ran forward quickly, because at the position he had just ran over, there was a 5 meter long knife behind him and smashed at him.

Just ran forward 6 meters to avoid the 5 meter long knife at the back and the long knife in front fell down, he must run another 6 meters back to avoid the long knife in front.

There is a small gap between the long knife and the ground, just to allow the long knife to pass through the gap. Lu Yang skipped the rotating long knife. In the sky, a long knife with a moving pulley suddenly descended, and he split it vertically according to him. At this time, Lu Yang was no longer afraid.

With his eyes closed, he sprinted forward 7 meters, turned back 6 meters, then ran forward 8 meters, and ran back 5 meters.

In the previous life, someone had already cracked all the areas on this straight line since then. As long as these numbers are memorized, and there is a response speed of about 0.27 seconds, they can successfully pass the barrier.

For a while, Lu Yang backed this number because, after entering the map, facing the pulley long knife with only 0.27 reaction opportunities, it was too late to take a few steps, only to memorize it in advance, and in the process of running No fear.

Later, Lu Yang dreamed of being able to memorize this string of numbers, so he is now very easy to run, as if the number has been printed in his consciousness, he does not need to think at all, his legs automatically ran so much Step, even when he needed to duck his head to avoid, he didn't need to think about it. When he reached that step, he bowed his head and passed.

Chapter 1620 - Legendary Realm Consortium Infantry Gun Drawing

After 5 minutes, Lu Yang ran the whole journey and jumped to the last platform smoothly. A flash of light flashed. Lu Yang was teleported to a special space. An old man looked at Lu Yang and said, "Child, you are very good. , I have something good here, which one do you want? "

The old man is the reward initiator. The old man started to give everything very well, but in the later period, the thing he gave was bad. After one year, I ran across this map and gave no dark gold, so I gave gold. of.

Lu Yang estimates that the official has not thought that this carefully designed map will be so easy to be cracked by top players like him. He looked at the given items and chose the ghost blade.

This knife is like a sewing needle with a small arc, but it is indeed a knife. It is intended for girls like Benanis. It happens that Benanis is also a female warrior in the space department and likes to use this bayonet.

“Boss, I love you to death.” Benanis saw Lu Yang choose the Instant Kill Blade, and happily sent three kisses to Landing Yang.

Lu Yang laughed. He just got the item, and his body turned into a ray of light. He left the copy. When he came in, he handed the blade of Instant Kill to be unable to wait for Benanis, and said to everyone, “Do you all understand how you passed? ? “

Everyone nodded.

Mike said, “Is there a number you can remember in the short distance you ran on the platform?”

Lu Yang said: “My digital memory is not the same as yours, because our steps are different. Let’s try it out first and see how many steps you can run, or if you choose the same steps as me”

He took Koster, Mike and others to start the experiment. For a whole day, Lu Yang was studying how to make this copy. Mike learned the fastest. He tried it three times in the afternoon and succeeded the fourth time. After that, he brushed it 12 times in a row, and got the ghost weapon Hellfire Sword used by the fourth child and the ghost town soul sword used by the old eight. All the remaining 10 were converted into chaos balls. Several of them output occupations, one for each person. .

The second one was Zhang Yuan. After success, he even brushed it more than 30 times. He brushed out a set of Level 175 ghost and demon soul dragon suit and 10 sets of mixed spells that he could use.

The demon soul thunder dragon suit is the same level of equipment as the mechanical fire dragon suit. In the official history, the thunder dragon went to the southwest area, and as a result was controlled by the devil soul family under the local nine-pillar throne, and the devil soul family Turn the Thunder Dragon into a half dragon and half demon creature.

Normal playing is not easier than Wanjie Starfield, but it can be brushed out here, but Lu Yang is quite surprised. Of course, more surprisingly, he feels that Zhang Yuan has formed, a Zhang Yuan who hurt about 6 million, just using If he was single-headed, Lu Yang would tell him more than 60 in his combat win rate. This is still his reaction speed bonus.

The third person to go in is Cost, don't look at him as usual, but he really started to learn, faster than Naif and Little Phoenix. They went down more than ten times in a row, and gave Lu Yang 3 mixed spell skills. The book, Impatiens Dance, Skyfire Meteor and Thunder Fire Dragon cut three books, both range and heads-up.

The last one to go in was Little Phoenix and Naif, who successively brushed out more than 20 chaotic balls, which were all taken away by Lu Yang. The rest of the ghost equipment was not hit, but they got a lot of skill books. And drawings of the Infantry Gun of the World Realm and two drawings of the Hellfire motorcycle.

"It seems that the weapon equipment of the melee system is not an ordinary rarity." Naive frowned.

"There are places for special brushes, but it is more difficult than this. For the time being, I have no confidence to take you over. I need to wait for two people to help." Lu Yang said.

"Who, who is stronger than us?" Mike asked unconvinced.

Lu Yang said, "You are masters, but there is a kind of talented person in the world who is very special in ears or eyes. Maybe they don't respond as fast as you. They can hear the special sounds around them and see us. Can't understand something. "

Some people's eyes know even 500 glasses of water, which glasses are still passive?

Some people can hear sounds that we humans can't even hear. Even two water polo **** 80 meters away can be heard on many floors.

When you meet such a person, you can say nothing but speechless. You can only say that this person is a reward from God, that is, to make him stronger than ordinary people. If they use it reasonably, they are the geniuses of this world, the geniuses of nature!

These two people have a talented eye next to Lu Yang. Lu Yang is conducting special training for him. The ear is only recruited. The child is very young and does not like to get along with them. Take him to train with them, they are the same as father and son.

Little Phoenix asked: "Boss, I've always been curious to ask you something. Someone in the black gauze said that she was talented, and could hear sounds we couldn't hear in the distance, is it true?"

When mentioning this, Neff and Zhang Yuan were curious, and Coster even showed melancholic eyes. Lu Yang smiled and said, "Yes, the ears of black yarn are different from ordinary people. He can hear many people listen. What you can't, even if you whispered 80 meters away, she can still hear what you are saying. This is not lip reading, but talent. "

"There are really such people." Little Phoenix said in surprise.

Lu Yang said: "The global population is over 10 billion, and it is normal for some special talents to appear. For example, you are not ordinary people. At least this level, even if I tell you a shortcut, can reflect people whose speed is higher than 0.27 seconds. They can't get through, they know it's useless. "

Neff and others nodded.

"What shall we do next?" Neve asked.

Lu Yang said: "The next thing you guys do with the Chaos Ball is to brush the elite monsters. I have prepared a copy for you, which will allow you to get 3 million points of damage within a month."

"Our weapons haven't been upgraded yet." Pang raised his hand and asked.

Lu Yang said: "The Brotherhood of Iron and Blood is in the red fortress on the old continent in Huaxia District. There are mobs in the area that have special experience in brushing. I will take you there for a while. I will not be in the future. You can go by yourself."

"It is indeed the Grand Guild, everything." Little Phoenix said excitedly.

Lu Yang laughed and said, "In the future, you will more and more feel that our guild is different, let's go."

He flew to the Red Fortress with a little phoenix and others, and the shooter administrator ran over, Lu Yang said to him: "In the future, these people come here to brush up, so you can let them come without notice."

"Yes, boss," said the shooter administrator.

"Let's go." Lu Yang took them to the crater in Houshan, watching the mobs full of craters and the more than one hundred flesh female worms. He said to the archer administrator: "Good job."

"Thank you for your praise." The shooter administrator is very proud.

"This time things are over, Tu Feng will personally give you an order, don't worry, there are still about half a month, enjoy the last leisure time, and then you will become very busy." Lu Yang patted shooter management Shoulders.

"Thank you, boss." The shooter administrator was so excited that he knew that there would be no more problems with his subsequent upgrades and the equipment was not a problem.

"Go get busy." Lu Yang motioned him away.

Naif looked at the excited shooter administrator and asked, "Boss, you're good to him."

Lu Yang said: "I have tried this boy a few times, and each time I came alone. If he leaks my information, someone will come to trouble me, but he did not leak it once, which proves that he Be a loyal person. "

"Killing you broke the heart of the devil, that is two hundred million US dollars, this is not tempting." Little Phoenix sighed.

Lu Yang sneered and said, "How easy is it to kill me? Boss, I have been playing games for four years. Have I died once?"

“Uh” Little Phoenix and others thought for a long time and found out that they hadn’t heard of anyone who had killed Lu Yang.

“Boss, how did you do that,” Coster asked.

Lu Yang said, “Strength, let’s go, kill the bugs.”

This is his secret, he will not tell others that he will always be surrounded by the most elite space-time thieves to protect him at all times.

At the entrance of the volcanic cave, Zhang Yuan was the first to use mixed spells to upgrade his equipment to level 5. He suddenly injured more than 5 million. He said to Zhang Yuan, “Go to the guild headquarters of the Brotherhood of Iron Blood and tell Mo Long that it is In my opinion, I will give you a full set of 17th-level magic gems and 160th-level best enchants, mixtures, and various scrolls. You can look at your backpack and pick whatever you want. “

“A happy life, here I am.” Zhang Yuanle flew away.

“It’s really a happy life.” Pang said to Lu Yang, “Boss, I want it, too.”

Lu Yang laughed said: “You all have this treatment. If you like it, the legendary musket has been made, and you will take the musket one by one.”

Neff and other melees nodded quickly. They can use the musket to blame. Although they have no skills, they can use 170-level legendary weapons for flat shots, which is also quite cool.

“Okay, you go to the chop first, roll the dice to see the size, and start to upgrade the equipment one by one tomorrow. Little Phoenix and Mike, you two don’t need to upgrade the equipment. Take a break today and leave with me tomorrow.” Lu Yang said .

“Where?” Little Phoenix asked.

Lu Yang said, "Secretly, go to Morong and pick your favorite scrolls and special potions first. You must get a set for the elite package, and choose the rest."

"Observe." Little Phoenix and Mike ran away happily. The two little guys were very harmonious and there was a tendency to become good friends.

Neve and Coste's nine people roll the dice to determine the order. The next one is Coste, who is sitting next to the caldera, watching the flesh-worm female in a daze, and whispering to himself, "When can I save enough?"
