

Chapter 165

Leon didn't care about that. But watching Alyssa cry, he was heartbroken.

Thinking about what happened yesterday, he couldn't bring it up.

"From now on, you are not even allowed to leave. You have to stay with me. If I don't feel well, you have to accompany me." Alyssa hugged Leon and wouldn't let Leon leave.

"Okay." Leon hugged Alyssa, "Do you feel sick elsewhere?"

"My stomach hurts." Alyssa rubbed her stomach.

"Let's go to the hospital now."

"I'm so hungry, and that's why my stomach hurts. Oooh, I'm so hungry." Alyssa felt her stomach was empty. She just wanted to eat meat.

Leon nodded. Looking at Alyssa's aggravated look, he said, "I'll go rush Wendy."

He carried Alyssa to the bed and then turned to the kitchen. Worried that she didn't get enough nutrition, Leon asked Wendy to make more of her usual favorite dishes and meat. Then he heated a glass of milk.

The milk warmed up faster.

Leon was worried that Alyssa was too hungry.

He gave the milk to Alyssa first.

Alyssa drank the milk and felt her body warmed up. She looked at Leon and smiled, "The milk smells good."

Leon looked at Alyssa's contented look and was finally relieved.

When she cried, he felt that his heart was going to jump to his throat.

Fortunately, she was fine now.

Soon breakfast was ready.

Alyssa sat down at the table.

Looking at the table full of her favorite foods, Alyssa happily ate her breakfast.

Seeing that Alyssa was happy to eat, Leon also ate one more bowl of rice than usual.

After breakfast, Alyssa drove Leon to work.

"Are you okay with that? Do you want me to drive?" She had morning sickness. He was worried that she wouldn't be able to handle it.

"No problem." She felt better after she had eaten breakfast. She must be too hungry just now to throw up.

She wanted to drive Leon to work because it would make her feel stable.

Leon didn't refuse.

Alyssa was always a steady driver. She quickly drove him to Hunter Group, and then she went to Citic with all the green lights.

Hassan's office.

Alyssa shared her findings from the past two days with Hassan.

Hassan never said a word. He occasionally looked up at Alyssa and then continued to sort through the materials in his hands.

When she finished, Hassan understood.

"That's all you've found out in the last two days?"

Hassan lifted his head. His expression showed his dissatisfaction with Alyssa.

Alyssa froze for a moment. She could see Hassan's displeasure with her and said softly, "Yes."

Indeed, she seemed to have found out a lot of information, but in reality, it was all useless information.

Sky's case had little to do with what she found out.

The most she had found out was that Nash might have brought the result of their research to Venture Corporation because his name was not on the patent three years ago.

However, that was just her guess. She had no evidence to support it.

She was also a little frustrated, "I'm sorry."

"What's the point of being sorry? You continue with this case."

"But if I continue to investigate further, I might reach something that should not be in our hands."

"I thought you were smart enough." Hassan did get a little disappointed in Alyssa at this point. After taking over such a simple case, she could only find out useless information.

And she even wanted to mess with people who were in the dark?

Did she not want to live anymore?

She was probably too comfortable as the president's wife.

Hassan was worried that Alyssa was really on the wrong track. He gave Alyssa a meaningful look and said softly, "The case you're taking on is about Sky. You have to look for clues around Sky. What's the truth of the situation now?"

Alyssa thought about Hassan's words for a moment and finally realized that she was on the wrong track.

"By the end of the day this afternoon, you should be able to give me a plan to deal with this matter!"

"Okay."

Alyssa nodded.

After talking with Hassan, Alyssa didn't leave Citic but thought carefully about what she should do next.

After all the research she had done, she could only confirm that the original "Hydrodynamic" was done by Professor Riley and his team. Before that, Riley was a professor at A University, and Jamie pursued Riley. After that, Riley was transferred. Nash became Riley's student ...

Alyssa suddenly felt that human nature was really complicated.

Whether it was Jamie's unrequited love, Nash's deliberate revenge, or their long-standing interest in Professor King's water research.

She could be sure that Professor King did nothing wrong.

Although it had been three years since the incident, Professor King must still have the original design of "Hydrodynamic". Or that could be the core of the design that Nash did not know. As long as Professor King could show the core design and prove that it was the part that Nash did not know, this case would be much easier to handle.

But this was about personal reputation, so why didn't Professor King reveal Nash?

Alyssa felt that she needed to meet with Professor King once again. This time, she had to get Professor King to tell the truth.

She brought all the materials she had prepared and prepared to meet with Riley.

An hour later.

Alyssa arrived at Sky.

There were still many reporters standing outside.

Alyssa left Kelly's contact information last time. Today, she could just contact her.

When she saw Alyssa, Kelly greeted Alyssa warmly and invited her in.

Alyssa saw Riley again and said directly, "Professor King, I came to see you this time because I hope you can provide evidence that Nash took the 'Hydrodynamic' technology from you. Once I find the evidence, I can help you overturn the case."

"How could I have evidence?"

"Of course, you have it. Professor King, we don't have much time. Today, we must solve this matter."

"But ..."

Alyssa glanced at Professor King and took out the materials she had found out in the past few days.

"Professor King, I'm not interested in your personal affairs, and I don't have time to investigate Jamie's relationship with you. But if the court really decides that you have infringed 'Hydrodynamic', the final result is not only that Venture Corporation can get your research achievements, but all your earnings will have to be given to Venture Corporation. Professor King, at that time, even if you give them Sky, it may not be enough for your compensation. You have to think it over."

Riley, of course, knew this.

But hearing Alyssa's words, he was still in a cold sweat. No one would want something like this to happen.

Alyssa saw a little hesitation in Riley's eyes after she said those words. She took out a bill and threw it directly to Riley, "Professor King, take a look at these bills. These are the bills that you will have to pay to others next. I advise you to consider it clearly. Do you have that much money or not?"

Riley looked at Alyssa, and he picked up the bill that Alyssa had put down and looked at it carefully. Then, he looked up at Alyssa, "I can't believe that it's that much!"

"It might be more than that!"

Alyssa looked at Riley and said, "Professor King, please read the bill I gave you carefully. I'm going outside to get some air. If you still won't tell me the truth, then Citic may not be able to help you."

Alyssa finished, feeling a little tired. She turned around and walked out.

Walking outside, Alyssa began to pace around.

She was a little nervous, not knowing if Riley would tell the truth.

If Riley didn't want to work with her, then there was nothing she could do.

Citic really wasn't short on business. But for her, this case was important.

It was the first case she had ever worked on as an intern. No one had assisted her from the beginning until now.

Alyssa turned her head to look at Riley's office. She could see him walking back and forth in the office.

He was smoking and looked very upset.

What could she do at this time?

How could she convince Riley to listen to her?

If the bill didn't work, what about credibility? What about his reputation?

Alyssa turned around and took out her phone to call Leon. She talked to him as she walked.

She wanted to get some information from talking to Leon.

About ten minutes later, Alyssa drove to Hunter Group and hurriedly met with Leon.

Leon handed Alyssa a copy of the contract for the project Hunter Group had done with Sky earlier.

Alyssa smiled and said, "Thanks, honey."

"What else can I do for you?"

"I can handle the rest myself. I'll go first."

Alyssa turned to look at Leon and smiled before reluctantly leaving.

Although she wanted to spend more time with Leon, she didn't have much time right now.

She had to go to at least five companies. Alyssa chose some of the companies she had worked with before. She was able to get five contracts in an hour. Then, she rushed back to Sky.

Seeing Alyssa back, Riley saw Alyssa put down the contracts she was holding before he could say anything.

"Professor King, none of these contracts should be new to you. They were all signed by you. What I brought over is only part of the contracts. Of course, there are many more contracts. This must be clearer to you than to me."

"I ..."

"If you really don't care about being in debt, what about your reputation? Do you not care if your reputation is ruined? So here's the question again, Professor King, who's going to fund your Sky after your reputation is ruined? It must be difficult for you to create this company!"

Riley suddenly didn't know what to say for a moment.

"Professor King, six o'clock is time to leave work. You must make a decision before six o'clock. Otherwise, even if I want to help you, I can't do so!"

Alyssa said, turned around, and left.

Riley immediately chased after her, "Miss Graham, I promise you! Some of the core technology was not taken away by Nash. Now Venture Corporation sues me for copyright infringement, but in reality, our two companies use different nuclear energy. My nuclear energy is still a bit higher-end than theirs. Over the years, I've been trying to find a way to create a resource that not only saves energy but is also more convenient for people to use. I have also learned about the resources used by Venture Corporation. Their core design is not the same as our company's."

"Do you have evidence?"

To be continued
