

Chapter 187

The young women in the Department don't flirt with Zhang Fan. When a person's technology suddenly improves a lot and others have to look up, although colleagues can't talk about respect, they will give at least a little respect. At present, Zhang Fan is in this state.

When several young women flirt with other transferred subjects, they won't laugh at Zhang Fan. Now Ren Lina is also very polite to Zhang Fan. When Zhang Fan first entered the Department, she took it for granted. Now she's a little embarrassed. She won't let Zhang Fan do some small things. She found that Zhang Fan likes to ponder over medical records, paste test sheets, write various checklists She did these little things by herself, such as talking to the patient's family members, and didn't bother Zhang Fan.

Dignity comes from strength. They may not ask for Zhang Fan, but now they will respect Zhang Fan. This is the characteristic of a technical unit. As long as you pass the test and become a top technical person, you are really comfortable in the unit. In this environment, if others want to dig you, they can't dig you without spending about ten times their salary.

Director Di's medicine is a little partial to Soviet medicine. It's hard to say who is good and who is bad. China also studied Soviet medicine earlier. It separated the medical department from major colleges and universities and established it independently. After decades of development, the shortcomings have been infinitely magnified.

Graduates only know their major. After a few years of work, they will only see the diseases in the undergraduate room. There is a joke in the medical community that a class III hospital organizes doctors to go to the community free clinic. They are all experts from various departments. As a result, what diseases are the most common in the community? cold. Then, in addition to the respiratory department, experts in other departments can't even diagnose and treat colds! Although a little exaggerated, it's not far away.

Now the state has begun to merge the separated medical schools of various colleges and universities. In any case, the systems of medical schools that have been separated for decades are incompatible with the headquarters. Moreover, personnel and politics have changed from the top leader of a school to the lower ranking vice president. The leadership of the medical school has great resistance. Although it is the general trend, the merger of schools is not comprehensive, and the final consequences are borne by only students.

The work of the Department continues, and there is no peak or trough for endocrine patients.

The director of general surgery of niaoshi city called the hospital of chasu city to inform that two typical

patients with giant central liver cancer came for surgery at the weekend. Please make relevant preparations.

Now the hospital is exposed. This is the gap. What should I do? That's liver. Wang Xiaoyan can ask for medical knowledge, and Zhang fan can certainly ask for English problems.

After work, Wang Xiaoyan returned the periodical to Zhang Fan on time. "Doctor Zhang, I can borrow the periodical tomorrow. Today's time is too short to finish reading it."

"OK, no problem." People saw less than half in an afternoon. Zhang Fan, who was loveless, said, and then asked, "Dr. Wang, how can this medical English be improved quickly?"

"Well! There seems to be no way to improve quickly. First, you should reserve special medical vocabulary and improve your vocabulary. It should be better. "

"But some words can't be found directly. Even Du Niang can't find them." Zhang Fan asked reluctantly.

"Many medical terms in English are abbreviated in Latin, so I can't find them!" Zhang Fan didn't hear the words behind. His eyes blackened! It's really hard!

Zhang Fan bowed down and left work. When he saw a way to improve his technology and was about to prepare for the charge, he found that there was a very high mountain in front of the gate. Its name was Ingrid. It was a mountain! It's no use worrying. Take your time!

The weather is getting colder and colder. When she was single, Zhang Fan never wore any bibs, gloves or hats. Shrink your head and plug your pocket.

After falling in love, Shaohua prepared these things properly for Zhang Fan. Zhang Fan, who used to dress casually, is now cleaned up by Shaohua.

One of his clothes can be changed into several clothes for Shaohua. Shaohua is reluctant to give up on himself, but not generous to Zhang Fan. For food and clothing, Zhang Fan doesn't want to be serious. Eat more when you're delicious and your clothes are clean. People rely on clothes and horses rely on saddles. Now Zhang Fan finally has a bit of elegant temperament!

Although the frontier weather is not the coldest place in China, the snow is not small in winter. Zhang Fan has encountered the kind of blizzard with heavy snow closed doors twice. Therefore, in winter, all the cars here are snow tires. Although they are special anti-skid, there are many accidents.

Zhang Fan is busy asking for liver English, and there are more orthopedic operations in the county.

Zhang Fan is busy.

The winter solstice is the time when Han people burn paper and offer winter sacrifices to their dead relatives. At Shaohua's home, Shaohua's mother is making dumplings. Eating dumplings at the winter solstice does not freeze her ears. This is a kind of inheritance from word of mouth.

At more than seven o'clock in the evening, when the family was happily preparing to eat dumplings, Zhang Fan's phone rang. It looked like it was from the medical department. Zhang Fan quickly connected. When he called at this time, something must have happened“ Dr. Zhang, come to the hospital as soon as possible. ”

"Yes, right away." As soon as Shaohua listened to Zhang Fan's phone, her heart became tense and worried involuntarily! This is the special industry.

"I have to go. Something must have happened!" Zhang Fan picked up his gloves and went out.

"Be careful and drive slowly on the road! ~" Shaohua hurried after Zhang Fan.

"I see."

"Why don't you bring some dumplings? You haven't eaten a mouthful!" Shaohua's mother chased out with a plate of steaming dumplings in her hand.

"Forget it!" Zhang Fan has gone far!

Zhang Fan hurried away. The original lively atmosphere suddenly cooled down. Shaohua was worried about Zhang Fan and had no appetite“ Hey! What's this called! An Sheng can't even eat. " Shaohua's mother said to herself.

"What, it's a job, it's a duty! Since you are a family member of someone else, you should have this psychological preparation. " Although Shaohua's father is talking about his wife, he is actually persuading Shaohua.

In winter, when the snow line extends from the hillside to the foot of the mountain, some industries walking in the dark also begin to become active. China's border areas are not rich countries, and now these countries are still a tripartite arena. Russia and the United States are constantly looking for trouble here. Originally, the systems of these countries are very fragile, but now they are completely disturbed by the two big guys.

Then came crime! Neighboring countries are in a mess, arms and drugs can be easily obtained, and a small tribe has many weapons. When the world was not peaceful and human life was worthless, people in these countries began to take risks.

The goal of these chaotic countries is to enrich the surrounding areas, China! The name of the public

security in border provinces near these countries is different from that in other cities. They are called border public security! I've been a policeman in the mainland all my life. Many people haven't fired a few shots. But here, once something happens, pistols don't work.

When the country was poor, others didn't look up to it. Now it is a little richer. Spies and transnational selling (ah) pornographic and toxic (a) products are like flies, trying to drill towards China. Someone once said that in China, the three cities with the most foreign spies are the capital, Lianda and the bird market.

People in these neighboring countries are group crimes. When they encounter martial law in China, they hibernate, and they rarely make any big moves in summer.

It is in winter that they enter China with guns and goods from some very hidden routes. Once successful, a tribe can eat and drink for three years. If we fail several times in a row, the tribe will not exist. The men will die, the women will be divided up, and the children won't say any more.

This time, when the border police patrol in Sumu County, they met a tribe with few men. More than a dozen people, including grenades and submachine guns, have broken the boat. If they fail this time, there will be no future. As a result, it was discovered by the border police.

Just fire! The sword and gun are ruthless. After the battle. The casualties are unknown. There are six seriously injured. Modern firearms have great power. The county hospital can't deal with this kind of firearm injury directly.

The border public security is under the jurisdiction of the military region. The military region directly contacts the province. The province directly gives orders to the city of chasu, and the leaders of the city of chasu give orders to Ouyang.

"Now there are a group of special wounded who are rushing to quark county hospital. The mayor in charge of medical treatment and you take the team, take the strongest medical personnel of the hospital and the necessary equipment for rescue, and set out towards quark county hospital as soon as possible. Keep communication unblocked, and the armed police of chasu city will cooperate with you. " The Secretary's voice is hoarse!

Quark county is just in the middle of the city of tea and Sumu county. In order to get the fastest treatment for these injured people, accompanied by the medical staff of Sumu County, these wounded people rushed to quark county.

Old Zou of quark county also received orders from his superiors. After answering the phone, he softened in his chair. This year is his last year. He is about to retire, but this thing happened at this moment, which really caught him off guard.

According to his usual little moves, as long as his superiors don't investigate, he can go on happily, but now all the doctors with some surgical skills have run away, and the rest are young doctors. Lilly soso

can't even do an appendix. If there is an accident in Quark county hospital, it would be a mistake that no one would investigate, maybe it's a fatal mistake!

When Zhang Fan arrived at the hospital, the entrance of the hospital was full of armed police vehicles, flashing lights. Armed police with guns stood on both sides of the car, with serious expressions. Some armed police were carrying things to the car.

As soon as Zhang Fan entered the hospital, he was sent to the car by the vice president of surgery. All cheetahs are off-road. Other vehicles are not useful in frontier winter. They must be 4WD off-road.

There are already four people in the car. Except that the driver is the armed police, the others are colleagues from the hospital. Chen Yun, the best skilled nurse in the operating room, the deputy director of general surgery and the director of ICU.

The driver looked serious and looked straight ahead without turning his head. Zhang Fan just got on the bus. He didn't know what had happened and didn't dare to speak rashly. He looked at the three colleagues in the hospital with his eyes. "Don't think about it, squint for a while, keep your spirit and go to rescue the wounded." The deputy director of General Foreign Affairs said to Zhang Fan with a grim face. In fact, he didn't know much.

"Oh!" Zhang fan can't sleep. He hasn't eaten yet. His stomach is growling! Just when Zhang Fan was thinking about how to forget his hunger, the driver's walkie talkie sounded, "ready to go, target area 323, turn on the police light! Full speed! "

The car started. Early on, the traffic police had cordoned off the roads in the city. The speed is very fast. This is the fastest car Zhang Fan has ever made at night. It's dark outside the city. You can't see anything from the side window. Zhang Fan looked with his probe. The speed is 110!

"It seems to be a big deal!" The front and rear alarm lights flickered and sirens rose everywhere. The team was driving on the wilderness at high speed. At this moment, Ouyang's voice came from the walkie talkie.

"Comrades, I'm ouyanghong. Not long ago, there was a vicious incident in which hostile forces violently attacked our border public security at the border. At present, six public security comrades were seriously injured and used their troops for a thousand days. Now please keep your spirit. The border comrades are good. Let's see what we do next! "

Several colleagues in the hospital made eye contact and then closed their eyes for a rest. When they closed their eyes, they didn't find tears in the driver's eyes!
