

Chapter 188

The leader of quark county Party committee has come to the hospital. Before saying anything, old Zou fainted and lay upright in the office! The leader of the county Party committee was almost scared out of his body! This kind of thing happened at this moment. Others don't know the consequences. He knows very well! The hospital is a special professional unit, and laymen can't command it.

The leader with an iron blue face can't make a fire "What about the Secretary of the hospital?" A low and gloomy tone!

"It was his wife who answered the phone. She said she was drunk!"

"What about the vice president?"

"Report to the leader. I'm Shi Lei, vice president of the hospital." Although Shi Lei is nervous, why is he nervous? Because the information is not equal, others are good. At a glance, you know that Lao Zou is pretending. At this moment, the pros and cons are particularly huge. But he bet! Because he is no longer young, there are not many opportunities!

"Now you organize doctors and nurses to prepare all rescue matters. Several special wounded came to our county hospital. Be quick and ask questions as soon as possible. " The Secretary quickly gave the order. When Shi Lei didn't stand up, his heart was clenched together. Now he's a little relieved.

"Report to the leader. There is no requirement. All our medical staff must make all preparations according to your order. Please rest assured! " As soon as Shi Lei heard that he was rescuing the patient, he was worried about him. He didn't worry at all. Who is he! Human spirit! If he does other things, he is not sure. If he rescues the sick, he is not afraid at all. Today is the rescue of Tianwang Laozi, and he is not afraid. As a vice president, he has no main responsibility, so he doesn't worry at all. Anyway, the county hospital is at this technical level. He has a big life and no way to die! However, he asked nurses, doctors and logistics personnel to prepare all the medicinal materials and instruments that should be prepared. He checked them again and again for more than ten times. As long as he could not find any problems in the prepared instruments, and as long as God gave face and could rescue the wounded, he was waiting to take the lead!

"Old Zou! It's cold! " His heart leaped with joy! But he didn't even look at old Zou lying on the ground moaning.

The leader of the county Party committee sat in the car at the gate of the hospital. Looking at the busy doctors and nurses outside the window, "I don't know if it's useful!"

Because he received the order to personally lead the team and organize the county hospital to prepare for rescuing the patient. So when he saw old Zou faint, he wanted to step on his feet!

The doctors of the city hospital arrived in Quark county one step earlier than the wounded at the border. After all, the road from the city to the county is better. The driving level of the armed police is quite high. They stop at the edge of the hospital gate and leave the road to the injured comrades in arms.

However, a car stopped under the hospital building, and the doctors of the municipal hospital got off one after another. When they were still confused, they saw the car parked under the building with the searchlight on. Then Ouyang stood on the roof with the help of armed police soldiers, "please note that I'm ouyanghong, President of the municipal hospital. Now I'm taking over quark county hospital. Please listen to my order. I'll call the roll. Please come forward if you arrive. "

Ouyang is holding a car microphone. The cold wind at winter night makes her black and white hair dance disorderly“ Please stand on the left side of the operation personnel of the county hospital. Wang Qingqing of the city hospital takes your operation nurses and stands with them. " Several nurses and anesthesiologists came out of the crowd and stood together.

"Doctor of general surgery, second row. Orthopaedic third row. The second row outside the brain. The fifth row outside the chest. ICU Row 6. Seventh row, Department of cardiorespiratory medicine and Department of Gastroenterology. " Well organized, without a trace of chaos. Rows of doctors and nurses dressed in white coats stood in the cold wind, with a sense of awe~

"The head of quark county hospital." Ouyang said again.

"Here!" Shi Lei replied loudly.

"Now ensure that all relevant medical technology departments are on standby, turn on all inspection machines, and preheat those to be preheated in advance."

"Yes!"

"I'd like to inform you that six soldiers injured on duty are coming to the hospital. We must do our best, and now I'll determine the medical expert group. " Under normal circumstances, the leaders present, who are senior officials, who give orders and who command, can rescue this kind of professional nature. Today, the Secretary of tea vegetable city has to hand over the command to Ouyang!

"Members of the rescue expert group: team leader ouyanghong, deputy team leaders Wang Quanping, Gao Shijun, Zhao Jun, Ren Li, Yu Bin and Li Jianguo." Then he hesitated and continued, "and Zhang Fan,

director of Anesthesiology, nurtu." After that, he turned his head and looked at the vice mayor and the captain of the armed police standing under the car. The vice mayor said, "President Ouyang, we will cooperate fully. You can give orders directly." He's here to stand for Ouyang.

"Please give orders!" The armed police captain shouted.

Ouyang nodded and brushed away her disordered hair. Although her hands were numb with cold, she did not interfere with her thinking at all. "I now order, but I didn't point to the name of the personnel. Stand by according to the Department and ask the armed police comrades to control the elevator. Please the doctors of the county hospital to appease the patients in various departments, don't come out and walk, and don't occupy the life-saving elevator. " As soon as the voice fell, the armed police soldiers with guns divided several teams and went to the elevator entrance of each floor. The doctors in the county hospital knew they couldn't use themselves, so they went to the Department to appease the patient.

"For the last time! We must do our best. This is our duty and the natural responsibility of our medical staff. The soldiers have been bleeding and injured and their lives are at stake. Now it's up to us. Today, everyone here, please put down all your unnecessary ideas and save people first, otherwise the national law will be difficult to tolerate! God forbid! " Ouyang has great momentum and a sharp voice. She was also worried that the rescue would be delayed because of the dirty things of what level and who is a knife, so she specially emphasized it once.

"Operating room personnel enter the operation. The others are on standby in the hall. Members of the expert group come to me for a meeting. " With that, the old lady standing on the roof was helped down by the armed police soldiers, and her lips were purple with cold.

"Wait for the director of your surgery, select and transfer the surgical personnel, and you'll have an operation group one by one. Try to match it well. I don't need to say more about the rescue principles. They are all experts of old doctors." The sound of the siren was heard before the voice fell.

"Here we are! Ready. " Ouyang said, looking at the flashing lights in the distance outside the hall.

Stretchers, first-aid vehicles, first-aid drugs, etc. were all waiting at the door of the hospital hall, and all the armed police vehicles side by side turned on the searchlights! When the cold wind blew, Zhang Fan stood in the expert group and seemed to smell a bloody smell.

Three 120, and Iveco modified medical vehicles. The drivers are all armed police soldiers. The speed was very fast. After entering the hospital, the first 120. After the door was opened, the female doctor in Sumu County shouted, "come on! The wounded are cyanotic! "

As soon as he said this, the doctors of chest surgery and respiratory medicine rushed up. Then the doctor in the second car shouted, "come on, it's in shock. The blood pressure can't be measured. It's bleeding at the root of the right leg." Orthopedics is up.

"This way, the soldiers' intestines come out ~!" The general foreigner went up.

It's not over, and!
