

Chapter 195

On the ambulance, Zhang Fan said to the nurse, "rehydration, input 1000ml crystal and 400ml hydroxyethyl starch." Zhang Fan has set up a banner in the hospital. If the department director is not present, especially in the field of surgery, ordinary doctors automatically become Zhang Fan's subordinate doctors. In particular, this first aid almost follows the battlefield principle. A first aid is actually an alternative battlefield!

After explaining to the nurse, Zhang Fan directly called the medical department, "director, I'm Zhang Fan. Now a patient outside the chest must be operated on immediately. He has entered a state of shock. We are already on the road. It is estimated that we will be in the hospital in about five minutes! "

"OK, I'll inform the operating room now. What else do you need?"

"No more."

The director of the medical office hung up and was about to report to Ouyang. As a result, Ouyang had come to the medical office. When Zhu Bing was 120 on the stage, Lu Renjia cried and called her father. Although she was out of breath, the main point was that Zhu Bing was stabbed with a knife for him!

Although Lao Lu was depressed to death, he still had to comfort his daughter, "don't worry, don't cry. I'll call the hospital. There's absolutely nothing wrong. You go home first. Look what you're crying like. Be obedient! "

"I don't! I'm going to the hospital now. Dad, I beg you, come to the hospital, too! I'm afraid! " Lu Renjia was really afraid. A daughter, the suitor, was stabbed to the ground for her. Now she doesn't dare to look back at the pool of blood on the ground!

"You call Xiao Zhang." Old Lu said to his daughter as soon as he pondered.

"Brother Zhang, my father wants to talk to you." Lu Renjia's eyes are swollen. Zhang Weijun has been the old Lu's Secretary for several years. I really haven't seen Lu Renjia cry like this.

"Leadership!" Zhang Weijun said with the phone.

"Jiajia, are you sure you're not hurt?"

"OK!"

"You stay at the scene now and try your best to help the police catch these outlaws in the fastest time.

These people pose a great threat to the masses. You must not take it lightly. You can shoot them when necessary. This is also my opinion."

"OK, I see! We must not let them slip through the net. "

"OK, you send two more people to follow Jijia to the hospital. I'll go to the hospital right away!" After Lao Lu explained, he hung up and was ready to go to the hospital. His daughter was his heart. Although he had a bad relationship with his wife, his daughter was his only daughter.

While preparing to start, he called Ouyang, "President Ouyang, just now, a vicious attack on the police occurred in our city. The patient is estimated to be sent to the hospital immediately. I hope the hospital will give full treatment. Now I have gone out to the hospital."

"Yes, leader, I'm going to prepare now. The medical staff in our hospital will give full treatment." Ouyang put down the phone and went out to the medical office. She didn't even have time to think. The Standing Committee of the city not only called, but also came in person. She couldn't help paying no attention.

"Come on, a wounded man will arrive soon. Open the first aid channel immediately. Inform the experts for consultation. They must arrive within two minutes, and the experts who cannot arrive must also send the deputy senior doctor of the Department to participate! " Ouyang quickly said to the director of the medical office.

"Yes!" At this time, the director of the medical department didn't have time to talk about Zhang Fan. The number of hospital wide linkage in the hospital is not much, but as long as the president ordered the hospital to linkage, it's not a small matter. Everything must make way.

The most important thing he needs to do now is to ask the staff to inform each department first, and then notify the 120 call center. If there are any emergency patients, they will be transferred to other hospitals. The municipal hospitals are linked!

Many ordinary people are already unfamiliar with the term emergency collection. I always feel that this word is a word of the last century. In fact, this word is still used very much in special industries. Take the hospital as an example, it will not appear at ordinary times, but once the superior orders, the called personnel must end everything as soon as possible and gather. If you can't get away, you should have a reasonable explanation afterwards. If you don't, it's troublesome. If you give a warning and cause heavy losses, it's troublesome. Those who are light will be expelled from the hospital, and those who are heavy will have their practice certificates revoked and even go to jail. Your superiors will directly wear out your

qualifications for survival! Because you don't deserve it!

The special elevator in the operating room has been watched by special personnel, the door has been opened, and the personnel of the security office maintain order in the hall to ensure the smooth passage. The patients in the hospital wondered what happened today, because they saw many doctors who were not young running towards a place! Emergency room!

Most people can drive cars in modern society, but most people with 120 drivers can't do it. This is the case now. The doctor in the emergency department shouted loudly with an external horn on the co pilot: "get out of the way! move out of my way! Step aside! Step aside! " The driver focused on both hands and feet, quickly shifted gears, refuelled, changed lanes, made a sharp turn, and then began to retrograde. The flashing first aid lights made all the vehicles get out of the way.

"Hurry up!" Zhang Fan looked at Zhu Bing's state and involuntarily urged him. 120 has been racing. You can run more than 100 times on the road after work. It's really racing.

The municipal hospital, the largest hospital in the urban area, has traffic police commanding at the door during almost peak hours. Today, there are at least five to six traffic police. The road is smooth, and 120 drove directly into the door of the emergency room. As soon as the door opened, a group of young doctors and nurses started.

"Zhang Fan, is it this patient! ~" The director of the emergency department is confused!

"Yes!" Zhang Fan doesn't know what other patients are, but now this patient is also the most urgent patient!

There is no chance to do any examination, there is no time for consultation, and there is no need to do any physical examination, because Zhang Fan is in the car. Zhang Fan, covered with blood, jumped down 120 and began to say: "go directly into the operating room, trauma, knife in the left chest, blood loss is estimated to be over 800. The great arteries are still beating. "

"Come on, come on! Get into the elevator. " As soon as Zhang Fan said the situation, other experts in the Department made way. The director in the heart, the director outside the chest, Zhang Fan, and several senior nurses in the emergency department entered the special elevator for surgery with a bottle.

"What's going on!" Zhu Bing was tightly wrapped by Zhang Fan with a towel strip. From the outside, he could only see a knife. Director Liu outside his chest asked Zhang Fan.

"This man is a policeman. He was stabbed in his left chest by several hooligans. I was there." Zhang Fan said.

"In this position, isn't the depth of the injury deep?" From the outside, the dagger is estimated to be in the third and fourth ribs, which is at the apex of the heart of ordinary people, so Ren Li, director of

Cardiology, said with a little doubt.

In this position, if you plunge into it, generally there is no chance of rescue, because this is the position of the heart. If the sharp tool is damaged, the direct ventricle will be broken. Not to mention the heart, if the main artery breaks, there are few opportunities for rescue, let alone the heart.

Suddenly, the director in his heart and the director outside his chest brightened their eyes at the same time, looked at Zhang Fan and said, "is it?"

"Yes! His life is great! " Zhang Fan said with a trace of happiness.

Lu Renjia, accompanied by Shao Hua and two policemen, also came to the hospital. Zhang Fan and Zhu Bing had gone to the operating room. The poor girl, with blood in her hands and tears flowing, asked the emergency doctor, "where's Zhu Bing! Where is Zhu Bing? " She's running away!

"It's a chest injury, a male patient just sent by emergency 120." Looking at the confused appearance of the emergency doctor, the policeman accompanying Lu Renjia hurriedly said.

"Oh! I've gone to the operating room. "

Lu Renjia turned and ran to the direction of the operating room. Shaohua and two policemen hurried to follow. Lu Renjia just ran into the elevator. Her father also came. There were many people around her. The director and Secretary of the health bureau and even the director of the police station are there. Ouyang greeted him at the gate. "How's the injured policeman?" The old road asked with a frown.

"The wound is very serious. A knife in the left chest is more dangerous than good!" Ouyang didn't know much about the situation, but she was an expert in her heart. She could still judge what happened with the knife in her left chest, so she told the leaders according to her usual experience.

The old road didn't worry about going to the operating room. He turned directly to the comrades of the police station and said, "we must take down this group of criminals. This is not only an explanation to the people, but also to the front-line police. It's too arrogant. It's not enough to calm the people's anger without severe punishment."

"Yes! Now the whole city has pulled the net and can't run away. There is another situation to report to the leaders. "

"What's the matter?" Asked the old road.

"From the monitoring of KTV, one of these people is a wanted member of the smuggling gang. This time, our police officer Zhu Bing and the road section chief fought with these criminals, which reflects the excellent quality of our civil service. Does this need to be vigorously promoted? "

"Don't worry about this first. Has officer Zhu's family notified you?"

"He was an orphan. His father was on the front line of anti drug. His mother couldn't stand the blow and died the next year. Under the care of the government and the leadership, officer Zhu entered the police academy with outstanding achievements. After graduation, he entered the Criminal Police Brigade. He also received awards for meritorious service for many times and was rated as an outstanding young man not long ago. " The police chief introduced Zhu Bing's life experience to the leaders.

"What!" The old road was shocked! In a daze, he said to Ouyang, "contact the superior hospital as soon as possible. I will report to the secretary now. We must rescue them. When necessary, we can invite experts through military aircraft. This is the offspring of the hero. We can't let the hero hate! Otherwise, it will be our dereliction of duty. "

"Yes!" Ouyang immediately began to contact the external chest director of Dida. Doctors at this level have a special phone that can be turned on at any time. Moreover, the doctor's family members will not easily call this phone.

"Secretary! ~ ~" Lao Lu reported the situation to the Secretary, who directly contacted the Military Commission of the military region. Even if there was only a front-line opportunity, he had to fight for it.

When Lao Lu came to the door of the operation room, tears came out. His Jijia squatted at the door of the operation room like a lamb, holding his legs and covered with blood.

"Jijia!" The old road cried softly.

"Dad!" Lu Renjia looked at his father and cried.
