

Chapter 197

Ouyang knew the reason as soon as he heard it, and then said, "good! You worked hard. " Then she hurried out of the operating room. The old lady was a little embarrassed and had a misunderstanding of thinking!

The hunted people are almost ferocious. They grew up together and are the children of the mining area. Compared with ordinary people, they have a good life since childhood. When they grow up a little, they understand the importance of money. The management of old-fashioned state-owned enterprises is loose. When they have no money, they go to steal some minerals, steal some metals and buy them, eat and drink, and enter a well-off life early.

In the border areas, there are many people. They hang around in the acquisition station all year round. They have met many customers specialized in smuggling. Although the acquisition station is dirty and smelly, this industry is a humble industry that can make a lot of money. There will be no less bullying and dominating the market, and they are more crazy with human life in their hands ~!

If the country is not aimed at you, you can be carefree. Once you get serious, it's not a joke. resist arrest! The border police are not ordinary police. They shoot directly and use semi-automatic weapons to screen the three people directly.

Almost many industries have this kind of interest, organizing idle people to monopolize the market by force, especially in industries that can't see the sun. Far from it, ticket dealers in a hospital are not capable of ordinary people.

A number of hundreds of yuan can make them fry thousands or even tens of thousands. The national law is really easy for them. They come out and work in a few days. They are a group of blood sucking leeches lying on patients!

The operation was finally completed. Years of intensive training also increased Zhu Bing's chances of survival. If a person with poor physical quality or old age might die today. Anesthesiologists and nurses pushed patients to ICU. Such serious patients still have to live in ICU for a few days. After all, the operation is very big and there is a lot of blood loss.

Zhang Fan went out of the operating room and saw Shao Hua and Lu Renjia " It's all right. I'll see Zhu Bing in a few days! " Lu Renjia, who was already in a stable mood, saw Zhang Fan and began to cry again, "he is for me! I really feel bad! " It's really right to say that women are made of water. Please cherish the women who shed tears for you. When the women who shed tears can't shed tears one day, it's too late for you to regret.

"It's all right. It's all right. Don't worry. It's no use for you to stay here now. ICU won't let your families in. Shaohua and I will take you home. "

"Yes!"

In modern society, science and technology are more and more developed. Most people feel that they were born in an era of smooth information. Sitting at home, they can know what just happened on the other side of the earth. In fact, this is just an information black curtain. It seems that you know everything. In fact, there is no useful information. Unless genius can smell something from it, this information can only be used to pass the time. Most people still don't know the really useful or hidden information.

A truly well-informed person may not know what Putin did and what Ma Yun said today, but he knows what changes have taken place in policies and what has happened around him recently. Ma Wentao is such a well-informed person.

With the great development of China, the coast has risen. Not to mention others, the construction of supertankers one by one, like dumplings, is an embodiment. Military fans should be clear about the truth. When the south develops, the rest is the west, or to be exact, the frontier. Because this is the passage and the gate. To develop, first build roads. This slogan has been popular for half a century.

"The frontier is going to have a train!" This is Ma Wentao's first sentence after finding Zhang Fan.

"Good thing, it's convenient to go home in the future!" Zhang Fan was also happy. This is the thinking of mortals. Don't despise, you and I are the same. Ordinary people can't catch up with the trend of the times.

"Unpromising appearance!" Ma Wentao rolled his eyes and despised Zhang Fan.

"Nothing, nothing. I have to go back and read." Zhang Fan has no patience with Ma Wentao. This thing likes to pretend to be profound.

"Ah! The naive fairness gave you a pair of dexterous hands, but it didn't enlighten you. "

"I'm really gone!" Zhang Fan wants to go.

"I'm going to open a hospital." Ma Wentao said after holding Zhang Fan.

"Haven't you opened a hospital!"

"Is this called a hospital? It's just a bigger clinic." Ma Wentao has tasted the sweetness of medical treatment in recent months. Although it can not be called a career, his ambition has been ignited.

"Then drive."

"Let's cooperate! I'll be the major shareholder and you'll be the second leader!" Ma Wentao said to Zhang Fan. After a few months, he saw clearly that Zhang Fan was a talent and a senior talent. He must not let go. Moreover, he and the big girl of the Qin family have entered the level of engagement.

"I don't have money to open a big hospital. Even if I have money, I won't invest it in you. You don't know anything. If I lose money, I'm hard-earned money." Zhang Fan is not interested at all. Although Ma Wentao's power looks good, Zhang Fan really thinks he is unreliable. He opens a hospital when he says he opens a hospital and does whatever he says. He is unreliable than Li Hui. What a hospital is, it will die. One can't handle it well. If he has a medical accident, he will work for nothing for three years!

This is the gap in vision. Zhang Fan is just an ordinary person. Ordinary people do a small business and don't think about it or investigate it for half a year. They absolutely don't dare to do it rashly because they are afraid of losing money. Ma Wentao's image of Zhang Fan is recklessness! Zhang Fan is still young and can't understand money and power in economic society.

"Don't worry, I don't care about your little money. I mean, I give money and you give technology. We set up a medium-sized general hospital."

"I'll forget it. If you continue to open your hospital, I'll just work for you. If there is an operation that can't be done, ask me to do it, and you can give me the labor fee. I don't have any ability to be in charge or not." Zhang Fan's biggest advantage is that he knows his own family affairs, how big the pot is, how big the meal is, and it's too much to manage the hospital.

If you are an ordinary businessman, Zhang Fan's proposal is the best, and the labor fee is not expensive, but Ma Wentao doesn't want to be an ordinary businessman. He has great ambition.

"Listen to me, I'll teach you this elm pimple." After Ma Wentao poured old Pu'er for Zhang Fan, he continued: "the frontier is going to be developed. The train from the mainland to the frontier is set in tea vegetable city. Now the land here is the same as free. When the railway station is developed, it will be surrounded by prime locations. As long as you are willing to help me, this hospital will definitely stand in the border province in the future. This is our starting point!"

"I won't leave the public hospital. I would have gone to the south for money. You'd better save it!" Zhang Fan remained motionless.

"Have you ever thought that you can ensure that you will stay here forever?" Ma Wentao was unwilling and continued to seduce.

"And then?"

"If you walk around like this, you may not be able to guarantee your financial freedom for ten years. If you are not free, you can control everything. But if you are free, you can do what you want to do first. Moreover, this hospital is just a starting point. When you are all over the country, what you want to do and what you want to study, this hospital will become your greatest guarantee. Think about it!" The last sentence hit Zhang Fan's heart.

Zhang Fan, who is financially free, really doesn't have any ideas. He has three meals a day, eat and drink, and live in a house. He is free, but what Ma Wentao wants to study suddenly stunned Zhang Fan.

"Yes! No matter how it develops in the future, hospitals or hospitals, systems or systems will not change anything because of one person. Even if there is a system, it will still be bound in the system. How to change it? Ma Wentao's statement is a good way." Zhang Fan didn't speak for a long time. Ma Wentao was not in a hurry. He felt that he had persuaded Zhang Fan to drink tea at leisure.

"You are for money, but I am for interest or ideal. I don't think we will come together in the future." Zhang Fan thought and said.

"Nonsense, what's for money? Am I short of money? If I really want money, will I do this? I'm worried all day. I don't feel at ease as long as you have surgery. This is a career. Do you understand! Cause!" Ma Wentao was excited because he was despised. The world of the second generation will never be understood by people like Zhang Fan.

"Well, career. Who does the hospital listen to! If I listen to you, I will never agree. It's good to continue like this. I'll do the surgery I'm willing to do, and I won't do the surgery I'm unwilling to do. It's quite free."

"Your face is really big. Of course the hospital listens to me, but in terms of medical treatment, it listens to you!" Ma Wentao's eyes are turning out.

"When I insist on doing something that can't see the huge cost of profits, will you agree?"

"Are you stupid?"

"What do you say!"

"The cost is huge, the result must be huge. Even if it fails, it can only be said that the technology is not perfect or the idea is wrong. As long as it is business, I will definitely listen to you. And I repeat, this is not for money, this is a career!" Ma Wentao put down his posture for the first time and said solemnly.

"I have the right to withdraw at any time. You can't coerce me with any provisions!"

"Don't think too highly of you. I'm worried that I won't be able to drive you out when I want to drive you

out!" Ma Wentao laughed wildly again! Zhang Fan doesn't understand. He knows. What is medical treatment? Medical treatment is a science and technology integrating research and practical transportation, and technology is the king of the industry. Everything in medical treatment is false, and only talents are the first.

"What are you going to do? I really have no money! "

"Stop talking nonsense and look at the plan."

"What plan is this?"

"The planning map of high-speed railway station of chasu railway station."

"Oh!" Zhang Fan is not surprised because he doesn't understand! If this plan is seen by a real estate developer, it will make the developer faint happily. The early profit is not doubled, but dozens of times!

"I'm going to buy more than 100 mu of land here, build a hospital that radiates all countries and the surrounding urban areas of teasu City, and build it into another medical center in the frontier. After all, the frontier is too big."

"Well! How much does it cost? Do you know how much an MRI costs. Our hospital now has a pediatric and emergency center. Do you know how much the state has allocated? I think I'd better quit. " Ma Wentao's ambition directly frightened Zhang Fan.

"Get it! I really want to open your head and see if it's loaded with paste! These are not things you worry about. Your task is to train and contact some medical talents now. Let me explain one thing is talents. Leave the rest to me. I have to finish the early land acquisition before I settle the items. Moreover, I have to go to the capital recently. I can't eat alone. I have to contact my partners. You've been in the hospital more recently. Lao Chen and Li Liang can't stop it. "

"Oh! All right. " Zhang Fan hesitated a little. The plan is unreliable.

"Don't worry, my partner is also out of my shares and won't let you suffer. That's true! " Ma Wentao thought that Zhang Fan was entangled in equity. In fact, he thought highly of Zhang Fan. Zhang Fan really didn't understand these things and wasn't enthusiastic. What really moved Zhang Fan was that he was free to do what he wanted to do.

Some people, with inherent advantages, are brokers of various projects and cops. There are many such people, and there are many people who really want to do a career. Everyone has his own way of life!

Ma Wentao left and went to the capital. This is one of his favorite things in recent years. For this matter, he has compromised with his father. Whether he marries the Qin family or the Wang family, he can do whatever he wants as long as he is not prevented from doing what he wants.

After leaving the hospital to Zhang Fan, he went to the capital with great ambition, and Zhang Fan forced him. He was really in a mess when he came into contact with the hospital management for the first time. Although Ma Wentao has a deep relationship in the frontier, the general operation procedures of the hospital still have to be observed.

Go to the Health Bureau for a meeting today and talk to the medical insurance bureau tomorrow. He has to deal with some factory and mine bosses the day after tomorrow. Moreover, he has to go to the municipal hospital every day. For a week, Zhang Fan misses Ma Wentao incomparably. But I promised to do it. There are a lot of job escapes these days, and the director of endocrinology is a little reluctant.

Fortunately, Zhang Fan gave a lecture during the ward round, which stunned everyone. Otherwise, the old lady would have kicked Zhang Fan out of the endocrine system.

Looking at Zhang Fan one day, she either went to the surgical doctor's number or fled to the outside. The old lady was a little angry. If other transferred doctors do this, she doesn't care. As long as she doesn't come to endocrinology, but for Zhang Fan, she has a kind of mentality of hating iron but not steel. The old lady came from the era of national efforts and has a high birth background, so she consciously has the obligation to whip Zhang Fan and let Zhang Fan go on the right road.

"Doctor Zhang, I've been a little busy lately!" In the director's office, the old lady grabbed Zhang Fan to talk. Now Zhang Fan's teacher is embarrassed to say Zhang Fan. Zhang Fan knows more than she does, and now the hospital knows that Zhang Fan is very good in surgery, and the cow has robbed the chief of surgery's acupoints. It's really difficult for her to transfer to a doctor.

"I'm really sorry. I'm really busy recently." Zhang Fan tells the truth.

"I understand! I have also come from my youth, but sometimes a little money in front of you may become a stumbling block to slow down your progress. Now everyone knows that you have great skills, but this is a place, the most marginal city in China. Your technology is nothing when you go to a big city. You're still young. Don't be obsessed with money. You still have a long way to go. "

Zhang Fan was helpless. He was kind and could only promise with his head down: "I know, director, I will pay attention."

"Well, it's not that you're not allowed to go to acupoints. I mean, don't take it as your main business. Laying a good foundation is what you finally want now. Don't think my old lady has too many things. In this way, it's not a thing for you to run around day by day. Your teaching doesn't have the ability to manage you. I take you and you directly manage the patients."

"No, it's my fault. No matter what I teach, I'll review it." Zhang Fan said quickly.

"That's the truth. You can't teach you. There's a special patient tomorrow. I'll ask her to come to you. I think if you can manage her well, you can graduate from endocrinology. If you can't manage her well,

you can stay in this department and want to go to surgery! No way! " The old lady said happily, but Zhang Fan felt a cold air around him.
