

## Chapter 205

Is life cruel? It's cruel. In fact, everyone born in this world is extremely lucky. Because you seize the most important opportunity, and then go through all kinds of hardships, conceive in October and grow up~ The dangers and difficulties here are one after another, more and more difficult, but you have bravely overcome these difficulties! So in the face of other difficulties, it is not difficult! Because you are the only king in billions!

In the fetal period, the principle pursued is natural selection. With the development of science today, there are many external forces to intervene in this process, good and bad! I don't know.

If an embryo has a problem, the husband and wife are still young, have the opportunity to get pregnant, and are particularly familiar with the doctor, the doctor will generally advise not to protect the fetus and comply with God's will. Although the words are ugly, it is also difficult to accept. In fact, this is not the best choice.

Li Hui is three years older than Zhang Fan. When he was young, he was naughty and didn't study well. After the failure of the college entrance examination, he caught up in stages, and his wife is three years older than him. This time there was no reason to see the red, and the family was particularly nervous, because the woman was old and had few opportunities. As the old saying goes, get married as soon as possible and have children as soon as possible. Think about it, it really makes sense!

When Zhang Fan arrived at the hospital, a group of people stood outside the gynecological obstetrics examination room. Li Hui's eldest brother-in-law and brother-in-law were many. It was too cold in winter in the tea market. Almost all of them wore leather clothes one by one. They were bloated and crowded, directly occupying the corridor. Although they didn't talk much, the atmosphere was not very good at a glance.

Li Hui squatted in the corner with his head down. This kind of thing is most worried about the couple, which is nature!

"What's the matter?" Zhang Fan approached and patted Li Hui on the shoulder.

"Lao Wang told me that the fetus is not developing well. Now the director has come and just entered." Li Hui's depressed expression, and the youth jump in the past, is two people directly. Lao Wang is the attending doctor of Gynecology, because Li Hui is a doctor in our hospital. After reading it, he felt that he should pay attention to it and give Li Hui face. He told the director that the director came from home to have a detailed examination.

"Oh, then wait for the news. There should be no problem." Zhang fan can't ask the specific reasons, and this kind of thing can only give Li Hui a little comfort in his heart. He can't help anything.

"I'm such an asshole. I'm popular this time. It may have something to do with my smoking and drinking. Otherwise, why would such a problem occur?" Li Hui is blaming himself. Something has happened. If he wants to regret it, it depends on whether God gives him a chance.

"What's the use of saying something? Cheer up. Your wife is more uncomfortable when you feel bad. What will people think when you wait like this? A man wants to cry and wants to shed tears into his stomach. At this time, it's actually your wife who needs comfort most!" Zhang Fan is a little angry at Li Hui. Although he sympathizes with him, he is still chattering about finding the reason. Even if he finds the reason, what can he do!

Chen Hong, director of Gynecology, is the first in the field of gynecology in tea vegetable city. After a while, Chen Hong, director, came out of the examination room. Li Hui's eldest brothers rushed up, but they felt inappropriate and gave Li Hui the opportunity to speak. After all, Li Hui is also a doctor in the municipal hospital.

"Director!" Li Hui is pitifully waiting for Chen Hong's sentence, and Zhang Fan is also standing beside Li Hui. Director Chen first nodded with Zhang Fan, and then said to Li Hui, "the cervix is not open, the fetal membrane is not broken, and there is little difference between the size of the uterus and the month of menopause." These are good news.

They are all doctors. Hearing this, Li Hui relaxed a little, and his tight shoulders began to come down slowly.

"However, the development of the placenta is indeed a little slow. This threatened abortion can continue pregnancy after rest. But there are certain risks, and it is hard to say whether the later fetal development can catch up with the normal value. You can think about it and discuss it with your family to see what to do. "

Chen Hong went to the office to wash her hands. Several of Li Hui's brothers-in-law also looked at Li Hui and said whether to or not. At this moment, Li Hui is the master.

Li Hui looked blankly at several brothers in law, then turned his head to look at Zhang Fan, and then squatted in the corner with his hair. Embarrassed! Really embarrassed.

Fetal protection, according to the current medical level, should be able to continue pregnancy, but the director's last sentence is the focus, fetal growth retardation! It's lucky to catch up. What if you can't

catch up?

The development of the fetus really needs to grow step by step. Once a certain period of time is missed, the child is either congenital deficiency, or the development of an organ is insufficient, or in the later stage, the time period of hormone secretion has been missed, and the possibility of deformity is relatively high.

It's also very simple not to protect the fetus. Use some medicine, clean up the uterus, and then observe. You can go home. It's very simple, but this choice and decision makes Li Hui unable to make a decision with heartache. And his wife is not young! If there is any accident in the future, I really can't imagine!

"How about a guarantee?" After a few minutes of distress, Li Hui looked up at everyone. This kind of thing is not the party who dares to make a decision. Although it is the eldest brother-in-law, according to the Chinese language, it is just relatives.

Everyone sighed, but no one took over. Li Hui turned to look at Zhang Fan again. Zhang Fan's technology is high. He really wants to listen to Zhang Fan's suggestions. Zhang fanlue said after thinking: "in this way, director Chen has made it very clear, and you should hear her meaning. You should comfort your wife first, and then wait until your mood is stable. You two should discuss it carefully, and you don't rush to this time."

"Yes! namely! take it easy! Don't worry! " The crowd echoed.

There were many people and great strength. Li Hui's wife asked several brothers to carry her to the ward. Li Hui also followed her and said to Zhang Fan: Thank you. Tears in his eyes, Zhang Fan is helpless. He just can't help if he wants to help.

The next day, Zhang Fan reported to ICU. Lin long and Zhang Fan have a lot of contacts, and they are very familiar. You're welcome to talk. Say what you have.

"Dr. Zhang, you don't have to take anyone. After you get familiar with the Department for a few days, go on duty alone."

"You'd better find someone to take me!" Zhang Fan said politely.

"All right! Don't be polite to me. You look familiar. Bring a transferred doctor when you're on duty, or you'll have to pull someone to help you when you go to surgery one day. "

"Ah! That really bothers the director! ~ " Zhang Fan feels his head embarrassed.

"It's all right. What's the trouble? Just an expert like you doesn't want to come to ICU. Ordinary undergraduates are trying to stay here now!" Lin long said proudly.

In fact, ICU is not very popular, mainly due to the impact of the expansion of university enrollment.

There are more and more graduate students, and the major departments are now beginning to pick and choose. Although these undergraduates enter the hospital through various channels, if there is no department director after transferring to the Department, it will be troublesome.

Undergraduate students are not like graduate students. Once graduate students graduate and sign a contract with the third class hospital in the region, the Department has been determined. After the undergraduate transfer, no department is willing to, so they can only wait for the hospital to assign.

It's too obvious. Someone, then you can wander around and spend something to enter the Department you want to enter. If no one works hard and performs poorly, then after the transfer, the hospital leaders will either assign you to the medical technology department or some clinical departments that no one does.

The same hospital, two hospital doctors who entered in the same year, one entered the infection department and the other entered the mainstream department. It doesn't take a few years, just five years, and the gap appears! Whether it's money, contacts or achievements, they are all very different.

Compared with other mainstream departments, ICU is not a key department in the hospital, because this department is too young and scientific. It is very difficult to come up with some achievements. All kinds of instruments, all kinds of equipment, do not start from a doctor. If you want to get ahead in ICU, there is almost no chance!

Although the ICU is tired and difficult, it is better than the emergency department and infection department. Therefore, some transferred doctors who can't stay in the mainstream departments are also desperate. If they don't have the liver, they can't think of it in the future once they enter the infection and emergency department, unless they change the hospital! Or the body really has big problems, or wait for retirement!

Zhang Fan was familiar with this department. After greeting several doctors, he went to see Bayin. Bayin's current state is good, but we can't be careless. This kind of electrical injury is very prone to cardiac electrical disorder, so it can't be regarded as out of danger now.

Moreover, the ring finger and index finger of his right hand have been carbonized. After his condition is stable, he has to have an operation to cut off the necrotic part as soon as possible. Bayin is lucky. Although he lost two fingers, his life was finally saved.

ICU patients can be said to be very serious patients. Comatose patients, patients with various organ failure and patients who need intubation are sent here. We can imagine how dangerous the situation here is.

And almost all of them don't want to give up treatment when they can be sent to ICU. In general departments, if the patient's condition is serious, conservative treatment is ineffective and surgical treatment is impossible, it is generally recommended that the patient's family members transfer to ICU or give up!

In this case, either give up treatment directly, sign a non rescue agreement, wait for death in the ordinary ward, or directly pull home, or send to the ICU.

The most terrible thing about ICU is rescue and communication with family members. It is said that when the Department was just established, there were six patients at the same time, almost one before and one after, who needed rescue! It's scary to think about it.

It is difficult to communicate with family members because the visiting time of this department is only half an hour in the morning, and family members are generally not allowed to enter at other times. Therefore, once the patient dies, although the patient's condition has been explained in advance, many people still can't accept it, so the doctor-patient communication in this department is also very difficult.

In three days, Zhang Fan became familiar with the work of the Department. Ordinary wards have single rooms, and ICU is no exception. There is also a single room, which is a separate ward separated by glass. Ordinary people can't afford to live in this ward, and the cost is super expensive. And living in this ward, there is a nurse to monitor alone 24 hours a day.

Li Hui communicated with his wife for a long time. They gritted their teeth and decided to have a baby. This process seems to be very happy, but it is actually very difficult, especially for pregnant women. Eating, drinking and Lasa are carried out in bed. It seems to be very happy. In fact, this process is really difficult. Normal people are uncomfortable to die in bed for two days, not to mention lying until the fetus is normal, which is not easy for women!

In less than a week, Zhang Fan sent several people away. Money is not everything, but you can't finish without money here. ICU has a special nurse to urge the fee every day. Every morning, you can hear similar words: "nine beds, the fee is not much, hurry to pay it, otherwise you can't do treatment!"

The atmosphere in the Department is tense, and doctors and nurses can only adjust themselves. When you are free, tell a joke, talk about gossip, and seize the time to have a rest. The eight hours in this department are too solid. Sometimes it is impossible to rescue patients and get off work on time.

The bonus for nurses in this department is also the highest in the whole hospital. It can be said that they are exchanging their youth for money. The head nurse of ICU is a young woman and has no scruples when joking. And she also loves to joke with Zhang Fan, because Zhang fan can see that he is a doctor with broad prospects in the future.

"Doctor Zhang, come and beat my legs for my sister. I heard that your orthopedic doctors are very strong. I want to try." Charming eyes, although wearing a mask, Zhang fan can also think of her fiery lips.

"Head nurse, those who beat their legs on TV are usually small Anzi and small plums!" Another older nurse said stubbornly.

"Ha ha! How do you know Dr. Zhang is not a little? Have you tried? "

"Well! Two elder sisters, can we have a good talk! They all study medicine. This joke is boring! " Zhang Fan said helplessly. No way, the doctors' desks were robbed by the transferred doctors, and they all had to work to write medical records. Zhang Fan was embarrassed to rob them, so he sat on the computer of the nurse station to read the medical records.

"Ha ha! Shy. Dr. Zhang, I heard you have a date? "

"Yes!"

"Is it beautiful? Is our Xiaocheng beautiful? " Xiao Cheng in ICU is a little nurse. She is a very beautiful girl. She has a good figure and looks better. She seems to be related to the head nurse. In fact, the frontier star on TV is a little more beautiful in the frontier, not a special top-notch figure.

Zhang Fan is not easy to answer. Xiao Cheng draws a thermometer at the same time! Although she was painting, in fact, her ears stood up before listening. She was embarrassed to make such a joke, but it didn't prevent her from caring!

"Each has its own merits! Each has its own merits! " Zhang Fan hesitated. Young women's flirtation is really reckless, and the head nurse is not a doctor. For this kind of young doctor, there is a natural occupational oppression.

"I haven't seen the world before. Why don't you break up with your girlfriend and chase us Xiaocheng!"

"Head nurse, I'll be busy first!" Zhang Fan fled. In fact, this kind of joke is only played by people like Zhang Fan. Other transferred students can make nurses talk harmoniously before they have a practice certificate.

After work, we can only joke to adjust the atmosphere, otherwise the tense work and depressed atmosphere can make the medical staff run away.

In Zhang Fan's second week in the Department, a special patient came!
