

Chapter 210

There are many right and wrong people. In the past, Zhang Fan's excellence was only spread in a small range in the surgical system. Now, with Zhang Fan's excellent performance, more and more people in the hospital know Zhang Fan's excellence.

The older doctors give Zhang Fan some respect. The younger generation of doctors feel a little special about Zhang Fan. They envy and envy all kinds of mentality, but you can't help it in this medical industry. The strength really comes first. Zhang Fan is very low-key, but technology can't deceive people.

As students, men and women attract each other. Relatively simple, beautiful and handsome account for a lot of factors, but they are different after work. Although the proportion of appearance is not small, other factors are gradually increasing. With the increase of age, other factors are becoming more and more important, such as work, such as ability, such as future.

Zhang Fan is already ahead of the younger generation, and more and more eyes are staring at him. Especially doctors in the medical industry, with the increase of technology and fame, more and more people will contact.

Shao Hua was a little stressed. Several female doctors came. Although they spoke politely, she understood the meaning of what was inside and outside. What might we do? Tie Zhang Fan around? Or let Zhang Fan no longer be excellent?

Marriage is not maintained by feelings alone. It's too childish to always think that feelings are better than everything. Feelings will be slowly consumed by daily trifles. Only by making efforts to forge ahead and keeping up with each other's footsteps, the common management of both sides is the king. It is pitiful and sad to rely on one side or one side's compassion alone!

Shaohua was a little drunk. On the way home, she leaned against Zhang Fan. This was the first time she was so close to Zhang Fan in public.

"You said, if one day a woman more beautiful and excellent than me came to pursue you, would you leave me?" Shaohua, who was drunk and hazy, looked at Zhang Fan and asked.

"Nonsense. You are the most beautiful and excellent. " Zhang Fan fondly touched Shaohua's face and said, "don't drink in the future. Today is also my mistake. I should stop you from toasting."

"I'm fine. I'll listen to you and stop drinking, but what if a woman appears who can help you in your career? For example, the other party is the daughter of a big leader. She is not only beautiful, but also can help you? " Shao Hua is cute after drinking!

"Ha ha, it's impossible and unnecessary. I could have walked standing. Why should I go kneeling?" Zhang Fan's momentum soared. Zhang Fan didn't dare to ensure other things, but for his career, as long as he practiced his technology before the system disappeared, he was not afraid of anything! So it's very powerful!

Zhang Fan's confidence also gave Shaohua a lot of motivation, "hum! I will try my best! Maybe you'll have to rely on me to support you in the future! " Shao Hua said coquettishly.

"Well, I like you like that." Zhang Fan took the opportunity to kiss Shaohua's ruddy lips.

"Annoying! ~"

"Ah! If it weren't for Li Hui's phone, I would be a man now! "

"Ha ha! Does this mean that only love can be regarded as a man? "

"Well! That's what I think! " Zhang Fan said solemnly.

"Nonsense!" Shao Huabai glanced at Zhang Fan and remembered what day it was. She couldn't help being shy!

"Girl! When will you make me a man! I've been looking forward to it for a long time! " Zhang Fan's saliva is coming out!

"Think of the beauty, you have missed the opportunity, and you are so ugly! Ha ha! " Shaohua suddenly let go of Zhang Fan and ran to the front with a smile.

"How dare you laugh at me!" Zhang Fan chased up with a smile.

Zhang Fan's guarantee gave Shaohua a little peace of mind, but only a little peace of mind. Let it go, she felt the pressure, the real pressure.

The competition of resources in modern society is everywhere. If you don't work hard or struggle, you can only wait for others to give alms. No matter how, although a hard-working life has countless shortcomings, it can always stand!

The old couple cleaned up at home without touching the ground, "yo! You're drinking! They're all drunk cats. Go and lie down for a while. " Shaohua's mother looked at Shaohua a little confused and said.

"Ah! It's all my fault. I didn't pay attention to one. As a result, my colleagues in our hospital gave me too much." Zhang Fan said embarrassed.

"It's all right. I'll just sleep."

Shao Hua was lying in his bedroom, dizzy, but he couldn't sleep. He kept eating in his mind. Worrying about gain and loss is a common problem of young people. There is no drill in life, it's the first time.

Wang Yongyong's advertising effect was good. After the operation, waiting for his recovery, he went to the largest and most professional gym in the bird market and became a professional fitness coach. Because he was a professional athlete, he became a coach easily, and his former teammates were also moved.

One weekend, three athletes were confirmed to have surgery in Ma Wentao hospital. Two knees and one ankle were old injuries. After Lao Chen and Zhang fan set the time, they began the preparation before the operation.

Ma Wentao saw Lao Chen's performance. Now Lao Chen is the head of surgery. Ma Wentao has let go of some things to Lao Chen.

The smaller the parts of the body organs, the fewer people study. First, it is not good to make achievements. Second, it is lack of interests. Endoscopic technology has developed rapidly in the abdominal cavity and uterine cavity. Many and many operations. Endoscopic treatment has replaced the old open surgery. However, the development of endoscopic technology for small joints such as foot and ankle is very slow.

It's not impossible, but few people study and ponder. Especially in the West with weak medical foundation, it's difficult to find a doctor of this specialty.

The introduction of ankle arthroscopy is simple, but it is too difficult to be proficient. The ankle bears the weight of the body and ensures the flexibility of movement. Therefore, this joint needs to be stable and flexible. This joint is small and complex.

Wang Yongyong's former teammate is younger than Wang Yongyong. He was also the guard of the basketball team in those years. After leaving the basketball team, his body became fat like a balloon, which overwhelmed the ankle with an old injury.

I saw a lot of hospitals in bird market and found a lot of experts. They all have the same caliber. Lose weight first, and maybe the symptoms will be reduced after losing weight. It's all uncertain.

Wang Yongyong's advertisement gave him an idea. It happened to be the winter vacation. He also came to the tea vegetable market. After careful examination, Zhang Fan also felt very difficult. This symptom has affected his normal life. The operation can recover, but his weight is too heavy. If he can't lose weight as soon as possible after the operation, he will still cause pain.

"Surgery can be done, and the symptoms will obviously reduce or even disappear, but if you still can't lose weight, it is estimated that the symptoms will continue to appear and worsen in half a year."

"What if you don't?"

"If the operation is not done and the weight is not reduced, it will only become heavier and heavier, because this joint is already overburdened."

"Should I lose weight first or have an operation first?"

"First do surgery, you can go to the ground, you must lose weight." Zhang Fan looked at the MRI in his hand and said.
