

Chapter 235

The sound of locking the needle holder came out, and Zhang Fan finally released his sore fingers“ Almost went in again! " Zhang Fan said to LV Shuyan with palpitation.

After taking out the foreign body, Zhang Fan looked. There was blood on it, and because of the retractor, the girl's anus had been a little torn“ You have to be hospitalized. Improve the examination to see if there are any residual foreign bodies. Moreover, because your organs are edema, your anus has a slight tear. If the foreign bodies adhere to the intestinal wall, it will stimulate the inflammation of the intestinal wall. "

"Doctor, is it OK not to be hospitalized?" The girl lying on the side weakly pulled the girl in the black leather coat. Her expression was pitiful. First, it was really uncomfortable because of this operation. Second, Zhang Fan was very strict because she was loud and didn't say it. She was a little afraid of Zhang Fan. She didn't dare to say it, so she shook her friend's arm and asked her friend to say it for her.

"This is not mandatory. I have said everything I should say. You decide for yourself. Dr. Lu, I'll go first. You can collect the expenses. " Then Zhang Fan left. The hospital is not a prison. People don't want to live in it. He can't help it. Just do his duty.

Zhang Fan took gloves with a retractor and went back to the Department with Zhao Zipeng. This instrument needs to be disinfected after use. The hospital has a special person to disinfect these used medical instruments, so Zhang Fan doesn't have to worry about it. Just give it to the nurse.

Winter has reached the tail stage. Although it is not as dry and cold as in the previous weeks, it is not hot. Moreover, because it is the end of the old year and the beginning of the new year, all units hold special meetings. The leaders of the surrounding counties are concentrated in tea vegetable city.

Because Shao Hua and Jing Shu went to Thailand, Zhang Fan looked at Shao Hua's QQ space. The two girls were very beautiful in cool summer clothes and straw hats with big brims.

Jing Shu ate big mangoes, crabs and lobsters. She couldn't see her smiling eyes. They were happy and Zhang Fan was happy. Don't people live like this? Let the people around you who care about themselves and care about themselves be happy.

If you have a strong ability, you care more about a few people. If you don't have enough ability, you can only care less. Society is so cruel that you have to do a cruel multiple-choice question.

There are more and more patients in the anorectal department. Zhang Fan, the acting director, has done well, and Ouyang is very satisfied. Shaohua left and took her sister to travel. Shaohua's parents wholeheartedly cooked for Zhang Fan and took care of Zhang Fan's life.

Zhang Fan likes to eat the noodles made in his hometown. For this reason, the old lady specially went to learn from sister-in-law Shaohua several times. Although her cooking is not very authentic, Zhang Fan was moved by this intention. A family's eating habits have been formed over the years, but they don't complain at all about eating unfamiliar pasta for Zhang Fan. The two old people are really very thoughtful!

Once the work of the Department is on track, it will be difficult to return to the previous state. First, several highly qualified inpatients cooperate with Zhang Fan's work. Moreover, because Zhang Fan has liberalized all kinds of income and paid more for more work, the Department's two-week time has changed the previous decadence and become prosperous. This is the power of money.

When the Department works normally, Zhang Fan becomes idle. This is the difference between people. Some people are busy as directors. When I first entered the Department, several young doctors greeted Zhang Fan, just one: Doctor Zhang.

But now it's different. The young and thin skinned man called Zhang Fan teacher Zhang, and the doctor who has worked for several years directly called Zhang Fan director Zhang. Zhang Fan has no choice but not to call him. He is indeed the acting director. Let him call him. Zhang Fan doesn't feel so comfortable.

The black-and-white double evil girl was finally hospitalized. When they learned that Zhang Fan was the director of anorectal department, their mouths opened in surprise.

"I'm lucky to meet the director, or I'll be in trouble. I'll see if you'll fool around in the future." In the ward, the charming girl in white lay in the arms of the girl in black and said coquettishly. That is, there are only two patients in the ward, otherwise the elderly who have never seen anything in the world in this small city may be able to hold the meatballs in.

Winter is the peak period of medical treatment in frontier cities. First, this is the most time of the year. Second, the income of the year is safe. The doctor who should see the doctor and the blind date who should be blind date.

Because of the medical insurance reimbursement, there are more patients in the county. After work, Zhang Fan goes to the surrounding counties.

The county is different from the county, and hospitals are different, not to mention doctors. At present,

only the general foreign affairs director of one county hospital can make an appendix laparoscopy alone, but other hospitals can't, mainly because he doesn't want to learn.

Zhang Fan's income is good because of his acupoint walking, so he doesn't care about the things in the Department and is very open. Moreover, the business of Ma Wentao hospital is getting better and better, and everything is developing in a good direction.

Because it's the new year, in previous years, Shaohua's parents went to the market to buy less food and prepare some cooked food to entertain relatives and friends, but not this year. Because of Zhang Fan, the old lady and the old man went to the farm by line car and bought a lot of new year goods. I'm afraid Zhang Fan and Jing Shu have a bad year.

"Aunt, tell me what you want to buy in the future. This fall in the cold winter is not worth the loss." After work, Zhang Fan looked at his home like a warehouse and said to Shaohua's mother.

"It's all right. We'll take exercise. You're busy all day. Take a break. I'll pour you water. You see, your lips are dry again. Shaohua told me when he left. He wanted to stare at you and drink water. I'll put some honey for you and drink more water. When I was young, I could drink several glasses of water a day. " The old lady talked endlessly.

She really treats Zhang Fan as her son now. Zhang Fan is happy, she is happy. Zhang Fan's tired appearance after work hurts in her heart, so she never lets Zhang Fan do any work. Even Zhang Fan's shoes shine.

Because it has been a year since the transfer, several doctors who have passed the practice examination in the same batch as Zhang Fan have begun to apply for a fixed course. These doctors have been contacted by the Department Director on their own initiative, while doctors who have not been tested and contacted by the director on their own initiative can only continue to transfer.

Zhang Fan is not in a hurry. Now he just wants to turn the Department like this, and then do more general surgery, because the general surgery is not upgraded, and other subjects cannot be opened, and the general surgery is a big pit. Zhang Fan's scalp is numb looking at this huge pit.

The department director takes the lead in robbing the patient, and the following doctors will certainly follow the director. Because Zhang Fan's operation needs to be upgraded, as long as he encounters anorectal diseases, those who need surgery go to the anorectal department.

After spending several months in the emergency department, it was not for nothing. The doctors and directors of the emergency department had a good impression of Zhang Fan, and Zhang Fan went to the emergency department from time to time. Moreover, at the end of the last anniversary, Zhang Fan entertained his colleagues in the emergency department in the name of anorectal department and anorectal doctors.

Although this meal is not worth a few money, it is an attitude and respect for each other. Zhang Fan's

requirements are not high. As long as it is an operation related to the intestine, it can be sent to the anorectal department. The emergency department didn't give it to anyone, and because of Zhang Fan, many intestinal related operations were sent to the anorectal department.

There are many patients and many operations. Moreover, according to the system of more work and more pay, Zhang Fan is very active from top to bottom. Appendix, intestinal obstruction and intestinal polyps are patients related to the intestine. Zhang Fan doesn't want to rob shamelessly.

In the past, it was robbed alone, and the impact was not very obvious, so the doctor directors of other departments laughed off, but now it is different. Small rifles have become big guns.

All departments follow to rob patients. The general foreign affairs director's nose is crooked. He doesn't dare to say that he has the ability to rob gastric patients. Because these operations are difficult to defeat Zhang Fan, he can't take Zhang Fan.

Seeing that the number of operations is less and less day by day. For half a month, there is no operation for appendix and intestinal obstruction. The director of general surgery can't sit still. He doesn't go to find Zhang Fan because Zhang Fan is too young. If Zhang Fan's level is the same as him, the cliff can let him come to the door. But Zhang Fan is a resident doctor. He doesn't sound good. A chief doctor and a resident consult about the problems of the inpatient. He can't afford to lose that person.

It's no use going to the emergency department. The two departments are not affiliated. They can only go to the dean.

"Dean, Zhang Fan doesn't know much about the medical practice system of the hospital. I suggest that a special study class be opened for him to learn. This is his protection. It is also the responsibility of the hospital. " The director of general foreign studies really has nothing to do with Zhang Fan.

"What's the matter?" Ouyang looked at the director of general foreign studies. This department is the super Department of the hospital. Generally, the third and fourth vice presidents are not nourished by him.

"He has gone too far. Now more than 30 doctors in our department are idle and dazed every day, while several people in their anus and intestines are busy. It's easy to have medical accidents. "

"Huh? He robbed the patient? "

"Yes!" The director of general surgery was embarrassed. A chief doctor told the dean of a resident doctor that his face was really hot.

"That's strange. Did he go to the emergency department again? " Ouyang said stiffly.

"No, but when he went to the clinic, he specially took two nurses to stay at the guidance desk. Once it was intestinal disease, they all let the nurses pull down their departments. And the emergency

department also cooperated with them. As long as it was intestinal diseases, they were sent to their department. In fact, it doesn't matter. They grab it, but their department doesn't even have a chief treatment. If there is an accident, the patient will sue one by one, so ~ ~ "

"Well! That's true, but as his superior doctor, we can't too discourage the work enthusiasm of young doctors, or you can send a deputy high school to their department to be a second-line doctor, and then I'll talk about him. " Ouyang Cai doesn't care about Zhang Fan's robbing the patient. The general surgery department is too big, and the anorectal department is too weak. Now it's too late to bring up the anorectal department.

"That's not good. What shall we do?"

"The golden cup and silver cup are not as good as word-of-mouth. The general surgery department of the hospital has been comfortable for too long, so it should have a sense of crisis. I don't care about this matter. You send a Deputy High Commissioner to register. " After saying that, Ouyang lowered her head and pretended to read the documents. She was very happy in her heart!

This is why Zhang Fan is obedient and sensible. No matter how angry Ouyang is, he quietly pretends to be a good teacher. If other doctors try, it can be regarded as disturbing the normal order of the hospital, but not here. Zhang Fan's level is high. In fact, the most important thing is obedience. This is the hidden rule of the workplace.

What is the hidden rule? This is the hidden rule. People in the Jianghu should abide by the rules of the Jianghu. What are the rules? Think for yourself!
