

Chapter 236

The hospital leaders pulled off the shelf and asked the Deputy High School of general foreign affairs to fund the enemy. The director of general foreign affairs was very angry. What can we do? No, general surgery is not difficult for Zhang Fan. Although Zhang Fan has no card in general surgery, a huge liver tumor is expected to be studied by experts in the bird market. What the dean said, when the director of general surgery came to his office, he thought again and felt it was reasonable. General surgery was too comfortable. It was time for these boys to feel lost.

Anorectal department is in full swing. Doctors and nurses are happy. Only patients in medical departments have bonuses. Who doesn't want to get more bonuses. As soon as the head nurse went to work, "whose bed is seventeen, smoking? Go and talk to the doctor. Thirty three beds are leaving the hospital. Hurry to pack up. There are patients to go to the department behind. " This is the essence, Qi and spirit. The head nurse's spirit represents the nurses' spirit. If this kind of development goes on, you can earn a lot more a month.

At the end of the day, although the tired legs are soft and the feet numb, everyone is happy. No one wants to work in a department that the whole hospital despises. People want face.

Zhang Fan's status is also gradually improving. In the past, doctors in many departments saw Zhang Fan, called Dr. Zhang younger and nodded older. Not many medical technology departments knew Zhang Fan.

And now walking on the road, there is director Zhang's voice. Dignity comes from strength, that's right! In the past, Zhang Fan was embarrassed when others praised him. He wanted to explain to others. In fact, the other party just said it orally. It was a little too much to explain deliberately. With the growth of age and the improvement of knowledge, now Zhang Fan also began to learn how to deal with these things.

You need to nod, you need to open your mouth, you need to stand and greet, sophisticated? Maybe! Because you are not sophisticated, you will only walk harder and more uncomfortable. Because we all have accidents in this environment. And sophistication can save time from time to time!

Su Province, the old man and the old lady finally came back. As soon as they got home, they began to make a meal of braised meat. The brown rice these days exhausted the oil and water in their stomachs. An old lady who can only eat a small bowl of beef noodles for a meal can eat three bowls of rice for a meal in the last few days!

"Almost starved to death!" Zhang Fan's father said to his brother-in-law. Because Uncle Zhang Fan is also

going to apply for this group to travel, the smog in the capital and the exclusion of local aborigines, but every Chinese has a little special feelings for the capital, especially Zhang Fan's parents and their generation.

You can scold Shanghai and Hong Kong, but you can't say the capital. It's uncertain that these old men and women will quarrel with you. Although they all came from such an era, the brand of youth is the capital.

"It's not so serious. Can't you even eat?" Uncle Zhang Fan asked in surprise.

"Three meals a day are eaten by order. In the morning, porridge is eaten with pickles and steamed bread. At noon, when the table of ten people is full, there are only four dishes. How many vegetable leaves can there be on a fist sized plate? Stone can eat three bowls of rice or brown rice in the next few days. You say you're starving. So, don't report this regiment." Zhang Fan's father said after eating a few mouthfuls of fat.

"Look, this is the belt bought by more than 3000. It has been used for three days. You see, it's about to break now. It's really a liar gang. I took the belt to find the travel company yesterday. Guess what people said? They said that the belt sellers were not with them. If they want to return the belt, they must go to the capital by themselves! Ah, I was really deceived and suffered a loss!"

People are like this. There are so many old men and women in the community, but why are there still people cheated? One is todo of the company, and the other is people's jealousy. I have suffered a loss. Why didn't you suffer a loss. I won't tell you! When looking at the major, Zhang Fan is as steady as a sculpture, motionless, that is, occasionally turning over books, looking at professional books, combined with work experience, thinking about confused problems, very happy.

But when it came to learning English, Zhang Fan was like a monkey in the zoo. He scratched his head, touched his face, and then turned the book to see how thick there was behind. It's really difficult. A word has several meanings and can mean different meanings in different places. It's ridiculous. This past tense and that past progressive tense are big. You can't do without learning. This mountain must be turned over whether you lie on your stomach or kneel. Otherwise, it is a barrier. Who makes China's medical level and technology less powerful than others!

Although he doesn't take exams and doesn't use much English at work, Zhang Fan has a lot of pressure. Just being a small doctor, Zhang Fan's technical level is enough. He is already top in this area.

But with the system, Zhang Fan's heart became bigger. He wanted to see the world's top medical treatment, and also wanted to stand on the top of the mountain and fight with top experts and scholars.

More want to study various diseases that perplex human beings, so the premise is to open the system and absorb professional medical knowledge. How to absorb it? First, we should take down the mountain of English. This is a tool and weapon. Without tools and weapons, how can we conquer it!

"Zhang Fan, I've been watching the baby melon I bought for you for a few hours. I've just washed it. Eat more vegetables and drink more water. I'll have some chicken soup later. The black chicken sent by cousin Shaohua has been stewed with dangshen all day. It should taste good. "

Although Shao Hua is not at home, Zhang Fan goes home as soon as he gets off work. After dinner, he lies down in front of his desk to study. The old couple are particularly satisfied with Zhang Fan, because Zhang Fan has taken charge here!
