

Chapter 241

For rectal cancer, Zhang Fan wants to operate on rectal cancer. The news spread all over the hospital like a whirlwind. Some enthusiastic people spread accurate and detailed first-hand information to the distance.

When Zhang Fan had a difficult operation in orthopedics, although many people knew it, most people pretended not to know it. When Zhang Fan had a huge liver tumor and asked the experts and professors of bird market to lead the team to study, people began to look directly at him. When Zhang Fan was appointed acting director, he paid attention to it directly!

Now we have to do the top operation of anorectal surgery. It's amazing. Many people automatically become Zhang Fan's publicity officer and strive to publicize for Zhang Fan. Even if Zhang Fan becomes an academician today, it won't be of direct benefit to them, but they are so tireless to publicize for Zhang Fan. If according to the most familiar starting point God, Zhang Fan has stabilized his God and began to bring his own flow!

In fact, any industry is the same. Suppressing, ignoring and pursuing are a procedure. When technology and strength are rolled, many people can't help becoming supporters. This is also a trend leader. It's shameless to say that Zhang Fan has conquered the municipal hospital.

The system accounts for 40% of the credit, Zhang Fan's efforts account for 40%, and the rest is life and a little luck. Many people may scoff. You don't have a system. You're hairy. Yes, Zhang fan can't reach this height without system, but Zhang Fan's efforts and personality can't be erased. Especially in some special industries, when starting at a low point, the proportion of people in the world is actually more important than any talent and effort.

The system is just like a person's talent. Those with superior talent are like crucian carp crossing the river. Few people finally jump over the South Tianmen gate! Therefore, talent, effort, behavior and luck are the necessary factors for a successful person.

The difficulty of rectal cancer can't be done by Zhang Fan alone. A group of inpatients in anorectal department can't get this difficult operation at present. The operation can't be done by one person. What to do? It's very simple. It's difficult to find Ouyang!

"Dean, are you busy?" After Zhang Fan knocked on the dean's office, he stood at the door with a smile and asked with a probe. No one came in. Being young has the advantage of being young. Doctors at the director level can't do it and will be ashamed. But Zhang Fan doesn't care. Ouyang is both a leader and an elder. He doesn't lose face by acting like a child to his elders.

"Director Zhang, ha ha, come in." Ouyang looked at Zhang Fan from the lens with reading glasses. Although her expression was very serious, the smile at the corners of her mouth had betrayed her attitude towards Zhang Fan.

"Hehe! Dean, you're laughing at me again!" Zhang Fan closes the door and walks to Ouyang.

"Sit down, what are you doing standing? I don't know my cervical spine is bad! Yes, it's not easy to maintain a modest attitude. I'm afraid you're a fake director and take yourself seriously." After Zhang Fan sat down, Ouyang poured a glass of water for Zhang Fan. Although he used a disposable paper cup to pick up some mineral water for Zhang Fan, this is very rare.

"Dean, I'll come, I'll come." Zhang Fan hurried forward to help.

"You sit in yours. I've been sitting too long. I'll get you some water by the way." After letting Zhang Fan sit down, Ouyang didn't go back to his big class chair, but did it on the reception sofa next to Zhang Fan.

"What? Do you want to settle down. Are you really interested in anorectal?" Don't expect Ouyang to hold you up. That's what she said. She always points to the inner education for those who value it! Listening to Ouyang's sarcastic tone, Zhang Fan finally understood the feeling of the director of urology. This woman is not only strong but also smart, not only smart but also venomous!

"No, it's up to you to decide! I'm here today to report to you." Zhang Fan quickly explained his intention that not everyone can be immune to this poisonous tongue.

"What's the matter? Isn't there enough beds? The previous empty floor makes you full in half a month. Should I praise you or criticize you?" Who is Ouyang? With Zhang Fan standing at the door, she knew that Zhang Fan definitely didn't come for his own business. It must be the work of the Department. At this time, if you don't knock, Ouyang won't be Ouyang!

Moreover, the beating is also very exquisite and level. She doesn't say anything. Let you think for yourself and think for yourself. Is it right or wrong to rob the patient? If you want to make progress and improve, you have to think, experience and understand for yourself. This is leadership! If you think leaders should be straightforward, you still need to exercise!

"No! No, the hospital bed in the department just works. You can't charge more. It's easy to have an accident if you charge more." Zhang fanlue said after thinking.

"Well, I'm still clear headed, so I'm relieved. This department is not big, but although the sparrow is small, it has all kinds of internal organs, which is also a very rare opportunity for you. Take advantage of it. Don't just stare at the operation. Comprehensive and comprehensive development will live up to your own efforts and our care and love for you. Come on, what can I do?" Knock over!

Zhang Fan's cold sweat has come down. He is like a child in front of Ouyang. He has no power to parry. Moreover, people are still good for you. You can't live up to people's heart if you are not afraid. This is a kind of leadership style and realm. If you are a grateful person, there is no way to break free from her bondage.

"It's the cousin of Chen Yan, a nurse in the Department of Cardiology, rectal cancer. I have lived in our department, and the preoperative examination has been improved, but the doctor in anorectal department is a little thin, and I don't have a senior doctor's platform. I'm a little guilty!" Zhang Fan didn't say that these doctors can't even be assistants. There's no need to press others to lift themselves.

"Chen Yan, well, I know. Diagnosed?" Ouyang was born in cardiology and is familiar with cardiology.

"Both rapid examination and routine examination support diagnosis." Talking about major, Zhang Fan is much easier.

"Has the operation plan been formulated?" Ouyang asked.

"Yes, because the plan is a little difficult, I want you to check it."

"What do I turn off? I don't understand your surgery." After thinking about it, Ouyang slightly said, "well, later, we'll go to the small conference room to have a meeting. I'll call the vice president of surgery, and you can prepare your operation plan. Are you sure there's nothing wrong?" Ouyang confirmed again.

"No problem. That is, the difficulty coefficient has increased a lot."

"How difficult?"

"I looked through the operation records and medical records of previous years. Our hospital has not done this kind of operation."

"How sure are you?"

"Eighty percent. If the operation can't be done, follow the routine operation. The risk is not great." Zhang Fan explained.

"Well, good! You're here to prepare. I'll get in touch with you." Ouyang finished and left the office!

The old lady is endless ~!
