

Chapter 245

Besides the operation, Chen Yan got the news early“ Don't cry, sister-in-law. After the operation, the results are good. We have to wait on the rest. Now is not the time to be weak. ”

"Well! As long as he is alive, I can't imagine the days without him at home. As long as he is alive, even if he is paralyzed, I am willing to serve him all my life. Swallow will trouble you to thank the doctors later. I don't know what to do. Take this money and eat. Don't be stingy. You must thank the surgeon. " Speaking, Chen Yan's sister-in-law took out a card.

"Don't worry. I'll do these. It's estimated that I can't use meals. The chief surgeon and I have a good relationship. I'll change my white coat and go to the ICU to see my brother. "

"Can I ~ ~" Chen Yan's sister-in-law holds the sleeping child with a long face. She also wants to see her husband, her man and the man who has suffered a great crime.

"No, the ICU won't let you in. I'll just go and have a look. You pack up your emotions and the next days will be the hardest. "

The anesthesiologist and itinerant nurse sent the patient to the ICU. Although there are systematic blessings, he can stand for up to six hours. He doesn't feel uncomfortable during the operation. After the operation is over and the patient is sent away, Zhang Fan's legs are as heavy as lead. He is so difficult. You can imagine the other three old guys.

In the surgical dressing room, three old men sat on the changed surgical clothes, smoking against the wall and talking nonsense without nutrition. There are stools next to them. They didn't sit because they sat on the ground, opened and straightened their legs, and then smoked a cigarette. This is the most relaxed posture. Smoking is prohibited in the hospital, but the hospital also opened and closed one eye in this place full of men. Are you tired? Tired, really tired.

But three old men, including Zhang Fan, have a happy face and a satisfied face. The sense of achievement of this kind of operation is very, very special. This sense of achievement can not be brought by money and power. If you use language to describe it, it is like a warm current, slowly rushing through the atrium, with a faint excitement flashing in your mind.

This sense of achievement brings self-discipline and pride. Doctors all over the world shout tired and tired. They really let him or her give up this profession, leave clinic and get the same salary. It can be

said that most doctors will not go. This is also the special attraction of this profession.

After all, it was the people who hung up, and they were much younger than the three of them. After ten minutes of leg rest, Zhang Fan recovered, "three leaders, shall we go to dinner? At this point, we just have lunch and dinner together."

"No. I want to go to bed now. " Lao Li lay down with a cigarette and said.

"I won't go either." Lao Chen has closed his eyes. There are few people in the dressing room at the weekend. Just a few of them, he is expected to sleep here.

"Youth is good. I'm not hungry at all. You go. " The director of general surgery was also tired. He lay on the ground like a boneless man. There was a look of an expert!

They are not hungry, but Zhang Fan is really hungry. He rushed out to find food. I didn't want to bother the old man to do it again. I ordered three dishes in the Sichuan restaurant at the back door of the hospital and wolfed them down. Most surgeons have bad stomachs and do not eat according to the order. This is an occupational disease.

The director of a department has no means and no eyelid is impossible. The director of the anorectal department should prepare for him for two months, but when Zhang Fan organized a big operation, the director of the anorectal department called to tell him that he had no idea of what he was thinking.

On the third day after rectal cancer surgery, the director of anorectal Department returned to the hospital to cancel his leave without a month! When he came, Zhang Fan was relieved and directly graduated.

The meaning of the medical office is to let Zhang Fan choose whether to stay enough for a month or leave school now. Zhang Fan chose to leave school directly, which is meaningless. The director of the anorectal Department came back before half of the holiday. What does it mean? Zhang fan understands that the Chinese New Year is coming anyway. Zhang Fan also wants to rest and accompany his sister.

Simply, Zhang Fan took the annual leave directly. Because Zhang Fan is unmarried and his family is outside the 300 public, he has seven days of family visit leave every year. Plus seven days of annual leave, Zhang fan can rest for half a month. That is, Zhang fan can rest like this. Other young residents and transferred doctors can only calculate their own vacation in their heart. If they really go on vacation, it's not a dream!

A characteristic of women's shopping is that they like to buy things they like at that time. After they come, they may not move in their whole life.

Shaohua and Jingshu can't escape. When they go, there is only one big suitcase, but when they come, there are three! Latex pillows, straw hats with huge brims, various dried Southern fruits, and many

jewelry.

"Look! I bought you an emerald ring!" Shaohua and Zhang Fan finally came back, and Zhang Fan's heart was relieved. On the day of vacation, Zhang Fan really took a few days off. On the sofa, Zhang Fan sat in the middle, Shaohua and Jingshu snuggled up to Zhang Fan's left and right, showing the results of the trip.

A very, very green ring, which Shao Hua bought for Zhang Fan, "it's very beautiful, just like a glass bead!" Zhang Fan looked, he has no love for these things, and how can a doctor wear these things and do surgery!

"You have vision. This ring is more than 800. What kind of glass is it? You see how beautiful it is!" The tourist resort spent 800 to buy the so-called glass. Shaohua and Jingshu are also silly and lovely.

On vacation, Zhang Fan really doesn't adapt to all kinds of things. He wants to sleep in early in the morning, but he wakes up automatically as early as usual! Run, read, and then go shopping with Jingshu and Shaohua.

Doctors, especially surgeons, care about their fame very much. Fame is too mysterious. Some people dream every day to let everyone know him, but no matter how they do it, it has no effect.

And Zhang Fan is becoming famous now. First of all, those who know that Zhang Fan is highly skilled are civil servants in various units, because their information is well-informed. Then, the general people gradually know the spread of these people.

In the past, Zhang Fan had few calls, that is, the calls of Shaohua and Chen Qifa, and these people all knew that Zhang Fan was busy, so the calls were not very frequent, but now Zhang Fan really began to hate the phone!

Although it was a vacation, the phone could not be turned off, because when Zhang Fan reported for vacation, he had reported to the hospital and would not leave the tea vegetable city. Therefore, this hospital has its own characteristics. As long as you don't leave the hospital, you can't turn it off. Because you can't call to end your vacation that day.

You can't turn off the phone, and the hospital doesn't have any big deal, but just because you're famous, there are a lot of people looking for Zhang Fan to see a doctor or a relationship. These people Zhang fan does not refuse. One is his hobby, and the second is Zhang Fan's principle of life. If you want to refuse, you will refuse, but this practice is inconsistent with Zhang Fan's character. Moreover, in society, the road should be wider and wider, not narrower and narrower.

Some people are born rich, have good reincarnation skills and get something for nothing. But after all, not everyone has this technology. If you want to make achievements or achieve some so-called success, you must work hard.

It's the new year, but Zhang Fan doesn't even have a chance to rest. For some reason, Ma Wentao is going to quit! Silent and unprepared to quit.

Ma Wentao's phone: "sorry! I'm leaving! "

"Where are you going?"

"I don't know!"

"Don't know?"

"Well! The new hospital is hopeless! I want to transfer the legal person of the old hospital to you. If you don't want it, I'll close it directly! "

"This!" Zhang Fan is confused directly!

"Think about it. We'll meet in three days!"

Zhang Fan took the phone and sat on the sofa in a daze!

"What's the matter? Are you going to surgery again? " Shaohua looked at Zhang Fan's dazed expression and asked with concern.

"No!"
