

Chapter 252

There are not many patients in the infectious diseases department of the municipal hospital. In addition, the new year is coming soon. There are more doctors and nurses in the Department than patients. This is also good. We should hope that this will continue. If all hospitals have no patients, this is the best. Instead of hoping it's full! This is not business! I hope people in the world are free from disease. I'd rather put medicine on the shelf to produce dust.

At the end of the morning ward round, the doctors who were off duty and finished dealing with the patients went home. Zhang Fan is on duty today. One duty is 24 hours. Fortunately, there is no emergency operation in this department, so a doctor is not a problem.

Just in the afternoon, Zhang Fan saw a strange combination, a pretty young man, followed by three girls. It is estimated that they are not very old. They are only eighteen or nine and twenty.

The man grew up well, with handsome hairstyle, white skin, slightly peach shaped eyes and high nose bridge. Even if he was a little depressed, he didn't pay much attention to the three girls behind him.

What about the three girls behind her? They are not old, that is, heavy makeup has covered the color of youth, dark circles of eyes. People who don't understand think she was beaten, red, black lips and colorful hair.

"Doctor, do hospitalization!" Boys have a nice voice. Zhang Fan was writing a medical record in front of the computer. He looked up and said, "what's the matter? Let me see the admission form. "

Zhang Fan thought he was a person. He wanted to invite three other people out. After all, this is the infectious disease department. As a result, four people are hospitalized, and they are all a disease: hepatitis B!

In the infectious diseases department of the municipal hospital, almost all of them were viral hepatitis, such as tuberculosis, typhoid fever and dysentery. After looking at the checklist, Zhang Fan shouted to the nurse to arrange a ward for four people.

Speaking of this hepatitis B, what many people think is an infectious disease, it's no big deal. In fact, this disease is really troublesome. In the early years of China, liver cirrhosis was almost transformed because of hepatitis. Liver cirrhosis followed by liver cancer, which would be fatal! Most of the cirrhosis in the west is caused by drinking.

Hepatitis B, unlike hepatitis A, is too troublesome. First, we must know what the liver is. The liver is mainly to transform nutrients into the body's absorbable nutrients, and to detoxify and secrete bile. Therefore, the protein in the plasma is the liver's combination. If the liver is not good, the body will lose weight and lose appetite. The more serious thing is bleeding!

How to describe hepatitis B? Simply speaking, it is divided into two categories. Infectious and infectious are relatively small. The big three yang are infectious, and small three Yang mistress is relatively weak. What is the route of infection? Blood and body fluids. The biopharmaceuticals of blood and blood products are good ways of spreading. Hepatitis B virus can survive in serum for a long time.

Want to understand the hepatitis B test paper, in fact, this is also very simple, hepatitis B is like a toxic woman, HB is the name of this woman hepatitis B, S represents the woman's coat, e represents shirt, C represents underwear! AG represents the danger of taking off these clothes.

When you take off your coat, shirt and underwear (HBsAg, HBeAg and anti HBC), it's troublesome. It's highly toxic. The man is poisoned by the liver, and it can infect others. When you only take off your coat, HBsAg (+) is not dangerous, that is, it doesn't mean anything or no infectivity or pathogenicity. When you take off your coat, HBsAg It is also dangerous to keep the shirt anti HBE and take off the underwear anti HBC across the shirt, but relatively. It's safer than being naked. At least it's much less infectious. This is a simple and popular description.

Zhang Fan looked at the checklist in his hand, "ouch, all his clothes are off. It's big Sanyang. HBsAg, HBeAg and anti HBC are all (+)." After reading the checklist, Zhang Fan explained to the nurse, "it's all big Sanyang. Pay attention."

"Yes!" The nurses at the nurse station agreed in unison. Zhang Fan takes a pen and paper to ask about the medical history. When asking about the medical history in other departments, the patient is usually called to the office, but the infectious diseases department can't. the doctor must go to the ward.

"Why did you come to the hospital this time?" Zhang Fan asked.

"Well, I'm just tired. I don't want to eat. Sometimes I have a fever. And my girlfriend is also the same symptoms, I heard a friend of mine said, this symptom is like AIDS, say it is not good is the whole body rotten to death, too mysterious, I hurried to check. The doctor in the clinic said no, but I Baidu it. The result is very similar to AIDS. Doctor, is HBV AIDS? "

"No. How long has this symptom been? "

"It's been about half a year. The doctor is not AIDS. Can he not be hospitalized?"

"Well! I was scared by AIDS. " Zhang Fan said with a mask: "although this is not AIDS, it can be as deadly as it develops. What job do you have, how old you are, and whether there are any genetic diseases at home? "

"Freelancer, 21 years old. Everything is fine at home. " When the young man heard that he was not AIDS, he seemed to be alive. His spirit was much better, and his speech began to be a little greasy.

"Lie down and I'll give you a physical examination. Pull up your clothes! "

The moment he opened his clothes, the young man gave Zhang Fan the feeling that he was thin and his ribs were clearly visible. There is a Maitreya Buddha tattooed on his belly. The Buddha's mouth is just his belly button! Let him have a tummy, the Buddha smiled, breathed and closed his stomach, and the Buddha was not happy. It's really a wonderful tattoo! Because of the tattoo, Zhang Fan took a closer look. He was full of spider moles. Zhang Fan sighed and shook his head. Hey! Ignorance is terrible. Then with a gentle touch, I touched the swollen liver. Turned over his eyes and the sclera was yellow.

"Feel at ease to be hospitalized. Your disease is very serious." Zhang Fan's voice was much lower. The liver is swollen, such a young doll!

"Can the doctor transfer my girlfriend to this ward, and we can take care of each other!" I don't know how to write the dead word. He looked at Zhang Fan naively.

"No, this is a hospital! Take good care of yourself! " After Zhang Fan finished, he went out of the ward to see the three female patients.

In another ward, when Zhang Fan opened the door, his eyes stared out. The nurse arranged two female patients in one room and the other in another ward. Because it is hepatitis B patients, so did not pay attention.

As a result, what Zhang Fan saw when he opened the door was that the two girls were holding each other's hair, tearing their clothes and deadlocked silently! The patient's clothes haven't been distributed yet. The two girls wear the same clothes. They have colored hair, black circles, white and black cotton stockings and thick sponge shoes. They are deadlocked. Staring at each other with big eyes. The black underwear belts are exposed!

"Let go, come on! Or I'll call the police! " Zhang Fan shouted to the nurse as he spoke. After all, he was a man. At this time, the nurse was not present. He rushed in and couldn't speak clearly. Over the past two years, Zhang Fan also learned to protect himself! It's better to have less trouble.

The nurse came and looked worried, "let go, do you hear me!" A middle-aged nurse, with a fat figure, a sharp voice and a stern tone, the two girls responded. When Zhang Fan shouted, neither of them paid attention to Zhang Fan.

"Let her go first!"

"You let go first!"

"Let go together. I'll count 1, 2 and 3. Do you hear me, or I'll call the police!" The fat aunt grabbed the two little girls in both hands and pulled away directly.

While talking, they let go at the same time, "bitch!"

"You're a bitch!"

How can things happen for a while? It turns out that these young people are not local, and they are young masters and princesses who work in a KTV. Their relationship is a little complicated. This young man is more playful, and he is in contact with these three young women at the same time.

Anyway, it's on and off, and there's no definite number. I don't know whether it's because of my youth or the nature of my work. Anyway, I'll talk to this one today and that one tomorrow. These men and women have a very special outlook on love. Because this young man is a boy and a woman, which is more attractive, that is, the so-called handsome or female beauty, so these three girls are competing at the same time. Today you win, tomorrow she wins, that's what it means.

In this way, several people have had the same symptoms one after another recently. The boys appeared the earliest and the most serious. They were persuaded to the hospital by a knowledgeable friend, and the three women followed suit.

What the nurse didn't expect was that something happened as soon as she separated the stable triangular relationship between the three women.

"If you can't live in the hospital, just leave. I'll give you one last chance. If I see you fighting again, I'll leave the hospital directly." The old nurse said sternly. They are all adults and should be responsible for themselves. Nurses are worried that they will have an accident in the hospital.

Finally, there was no choice but to have a house for three people. Fortunately, the house of the infection department was much empty.

Anyway, Zhang Fan also needs to ask for medical history and physical examination. Room by room examinations and inquiries were carried out with female nurses.

The body of youth is full of confused marks. Several girls are really very special. Since Zhang Fan worked for two years, he has really seen what confused youth is.

He was covered with smoke burns and tattoos, engraved a word, and then scratched several times, as if it was not his own body but a broken board. It can really be said that people look at it with hate and pity!

The results of the examination are not optimistic, especially in this man, who has had organ changes. Young wanton youth, but unexpectedly, the body has become a pair of broken cotton wool, facing is running!

Excessive (a) intercourse, heavy drinking, day and night reversal. Looking at the spirit of several people, it is particularly easy to get excited. It is estimated that shaking head (a) pill and DA (a) hemp may also be contaminated.

"First improve the inspection handle. The man's situation is not optimistic. And you must be careful and pay more close attention to them. " Zhang Fan specially explained.

Ask their families whether they are home in the mainland or deny that they have families. Is it really society or themselves that made them so broken? Zhang Fan doesn't know or understand!

Especially this man, it is estimated that there will be no future in the future. He can't even protect his simplest health in the future. Zhang Fan shook his head a little unfortunately, went to the doctor's order, opened the checklist and improved the examination.
