

Chapter 255

Zhang Fan's hospital has only a simple ward, operating room and no ICU. After the operation, the patients directly go to the ward. At this time, anesthesiologists and nurses usually escort the patients under the operation to the ward. But today, because the operation is a little special, Lao Chen personally sent the patients to the ward. This kind of sending patients is what Lao Chen likes to do most. Because of the gratitude of his family, inexplicably let him have a sense of honor!

Out of the operating room, the operating car slowly pushed out, "Bao!" Children are always the mother's most concern. When she saw the children coming out, the already depressed mother immediately rushed over like beating chicken blood.

"Be careful, be careful! Well, the operation was successful. " Like his mother, Lao Chen protected his children from parents, "let's go! Go! Don't go to the door of the operating room. There are still operations in it. "

"Doctor, is my mother's operation almost finished?" The little girl who was supposed to wear new clothes for the new year looked pitifully at Lao Chen. Her mother went first. As a result, others came out. Before her mother came out, she was already anxious. Now she is even more sad and worried.

"Don't worry, it's coming soon. I'll come out later!" After a word of comfort, Lao Chen continued to escort the small patient to the ward.

Because of Lao Chen's posture, the children's parents leaned forward around the hospital bed and looked at their children. Children are still depressed. It's really a great shock. At this time, although the operation was completed, he was very depressed, his lips were dry, his eyes looked forward to it, looked at his mother and wanted to return to his mother's arms, but the hateful doctor was by his side. He was afraid and dared not speak! Because the doctor can give an injection!

"The child is lucky today. His fingers are saved. Like the same kind of saplings, the operation planted the child's fingers in his arms. After two or three weeks, the finger will live." Lao Chen looked at the parents' focused expression and continued.

"Now this finger, which has just been planted, is still very weak, and the child is not sensible. You parents must take good care of it and don't let the child pull out the finger! Pay attention to light diet these days! All right, hurry back and put on your clothes and pants. Don't catch a cold. The child still needs parental care. " With these words, Lao Chen was about to leave.

The child's father was worried. Fortunately, when the child was in the traditional Chinese medicine

hospital, when he heard that he was going to cut his finger, his heart was like a thunderbolt. He wanted to bear the pain for the child himself.

Now the operation is finished and the finger is saved! His mood was like taking a roller coaster, suddenly from the trough to the top of the mountain“ Doctor, thank you, thank you ~! It's really troublesome in the evening. With this money, you can buy some food, eat some, and eat whatever you like. " His words are incoherent, but his expression is really grateful.

Lao Chen loves this, not money, but the other party's gratitude to him. In a moment, Lao Chen is tall and mighty. Pushing aside the money in the parents' hands, he said with a positive face: "this is what we should do, but I want to say something to you. We must take good care of the child. He is still young and not sensible. Aren't you adults sensible? Right! All right, take it back. "

Old Chen walked with his head held high and his head held high. The corridor breeze gently blew the corners of old Chen's white coat. He walked so neatly and firmly!

If he was in the county hospital, maybe Lao Chen would secretly put the money up. But why not take it now? The cost of the operation in the county hospital is about the same as that in the private hospital, but after the operation is completed in the county hospital, Lao Chen can get overtime pay of more than 30 yuan. If the president is in a good mood, he will pay a little hard work.

But here, he can get more than a thousand for this operation! You don't have to look at the leader's face. This is Zhang Fan's idea. Everyone makes money together. I can't see it now, but it's like a seed. Slowly, it can definitely grow into a big tree. It's better to look at the scenery.

In the operating room, the last finger of the middle-aged woman also began. Li Liang's mood was very strange. During the operation, he especially wanted Zhang Fan to stand behind him and let Zhang Fan affirm him. But he was worried that he could not do well and let Zhang Fan down. Zhang Fan looked at Li Liang, who was a little unnatural, and gently patted Li Liang on the back, "yes, it's like a model. It seems that you have worked hard. I'm relieved. You can do it yourself. "

Then he said to the anesthesiologist and nurse, "it's hard today. Let's eat dumplings later. I'll cook dumplings for you now!"

"Good boss! Be sure to cook it! " The anesthesiologist smiled and joked with Zhang Fan. The anesthesiologist was too relaxed for this kind of operation. He could just look at ECG monitoring occasionally. There was nothing to do.

The instrument nurse and the tour smiled and said nothing. In fact, this simple reply can see the ecology of the hospital. Because Zhang Fan is too powerful, doctors don't dare to joke with Zhang Fan easily.

The anesthesiologist is better, because no matter how good Zhang Fan's technology is, it is impossible to guide him to do anesthesia! This is the characteristic of technical units.

More than six hours later, the middle-aged woman's operation was also completed. I really want to thank the strength of the country. This operation can be reimbursed. Don't look at just four fingers. The operation fee and treatment fee will cost 50000 or 60000 yuan. This is a very big expense for an ordinary family, but now there is medical insurance, which can directly reimburse most of the expenses!

If there is no medical insurance, patients may choose stump embedding! Do they love money? no

Speaking of this medical insurance, we have to talk about some private hospitals. It's really uncomfortable. This money is life-saving money, but some private hospitals make trouble in private and advertise in various rural areas. They don't spend money to see a doctor and take care of food and drink!

Then, during the slack season, they used buses to pull these farmers with medical insurance to the hospital for examination, various examinations, making up medical records and medication, and then went to the competent unit to defraud the medical insurance. They are too smart, really!

The sumptuous New Year's Eve dinner, quick-frozen dumplings with various meat fillings and ham sausage of various brands were placed on the table made of computer table. Disposable chopsticks and disposable paper cups are filled with spices.

Super fragrant! Really, it smells great!

Li Liang ate a meal at noon and left his stomach for new year's Eve dinner. As a result, he came for surgery. He didn't eat for more than ten hours. He had a quarrel!

The Spring Festival, the southern flowers are in bloom, but the tea vegetable market is still a piece of silver. Pastoral areas are colder because of higher altitude. On TV, watching the herding man running valiantly on the grassland makes people drool with envy.

This is just a TV. Grazing needs to live by grass. Generally, there is no fixed residence. In summer, the problem is not big, and a tent can solve it.

But not in winter. In this winter, minus 40 degrees is not absent, so the tent can't bear the cold wind. The herdsman's winter is hard.

The tent is unreliable, and we can't spend a lot of money to build houses. We can only dig a winter nest on the ground. What's it like, digging obliquely into the deep soil layer. Like a mouse hole, when a heavy snow comes down, you have to dig out the snow slowly if you want to go out! Dongwozi is a sharp weapon for herdsman to survive the winter and resist the cold.

In fact, what pastoral areas lack most is fuel. In summer, solar energy can be used. In winter, they can only live on cow dung dried in summer.

Especially when spring is coming, when the accumulated cow dung in the past is about to reach the bottom, the herdsmen can save a little. Most of the milk is useless and boiled.

In the city, with the improvement of the medical system and the publicity in place, many people pay great attention to hygiene and pay attention to the health of diet, but the local conditions are limited and can't do it!

AK, a herdsman in his twenties, drove his sheep to the mountain in the morning. Thirsty and hungry, he was reluctant to heat the milk with cow dung. He simply drank the freshly squeezed milk, warm! Meimei drank a pound, gently burped, and continued to ride the horse to gather the distant sheep. This is the winter breakfast of most herdsmen.

Snow mountains, sheep, vast and boundless snow fields. Beautiful, really beautiful. But living here is really a test, boundless loneliness and the lack of all kinds of materials. Slowly torturing people's nerves.

People who live in big cities all year round come to this place, not to mention anything else. It is estimated that this quiet environment can make him crazy!

The third day, AK was ill! Sore throat, fatigue, loss of appetite, and then began to have a fever, "no! AK's head is hot. We must go to the hospital!" AK's father touched AK's forehead and said to AK's other brothers.

It's not easy to go to the hospital. The straight-line distance is more than 90 kilometers. But this is the hinterland of Tianshan Mountain. You have to walk around Tianshan Mountain. It's not nearly 400 kilometers down the whole journey. And there are no roads, no cars, only horseback riding.

AK's two brothers bound AK on the horse and set out. They must leave early. They must rush to a relative's pasture on the first day, or they can freeze the three people to death in the wilderness on a winter night!

"AK! All right?" Brother pulled the reins of AK's horse and kept asking.

"Good!" AK said weakly. It's hard, he's sick all over!

On the third day, I finally arrived at a township. Although there were few people, there were only a few hundred people. This is a winter settlement for herdsmen's families. The government specially established a township here. Health centers are also available.

"Forty degrees!" As soon as the doctor saw it, he hurried to reduce the fever and reduce the temperature, but the effect was not obvious. "Hurry and send it to the county hospital!" It's good to be in the township. There are cars and medicine. Although the disease has not been diagnosed, the doctor

has begun to deal with it.

County Hospital, there are few doctors during the Spring Festival. The unlicensed doctor in the emergency department looked and said directly, "hurry to the municipal hospital. This is too serious!"
