

## Chapter 264

The patient's death, discharge record and death discussion are very cumbersome things, but the patient is very special and there is nothing to discuss. After a few words in the morning meeting, the matter is over, and the person's matter is slowly gone with the wind. Hope another world, no HIV, no incurable disease!

In March, the valley area was like a sudden change of the world. The weather temperature rose and light rain suddenly came. It was silky and lubricated. Looking from a distance, a trace of green gas could be seen in the mountains. Tea vegetable city is in a depression, a depression in the hinterland of Tianshan Mountain. The whole frontier is rich in water and plants and abundant rain all year round.

In a village of chasu City, there is a mountain depression. There are many hot springs around. The temperature is a little higher than that in other places. Every March, wild peach blossoms bloom there early. People who have had a cat all winter, many people go to see the peach blossom in early spring every year. It is estimated that peach blossoms in this area are also the first to bloom in Northwest China. I really want to thank Zuo Zongtang! Thanks to the countless Xianghu children buried here. Without them, it is estimated that this green pearl will change its name in the northwest of the desert.

Zhang Fan is out of the Department and transferred to the infection department. Even if the infection department is short of people, Ouyang will not let Zhang fanding go to the Department. But there are always people in this department! Tong Lili with crying red eyes, like two peach hearts, hung in her eyes. Under the leadership of the officer of the medical department, she decided to take charge of the infection department!

"What's the matter? Cry like this!" Zhang Fan saw Tong Lili and asked with concern.

"I was assigned to the infection department!" Hoarse and low voice, Tong Lili, who has lost hope, lowers her head.

"Well!" Zhang fan can't comfort. What do you say " Do a good job? " It's impossible. Everyone knows that the infection department is bad. They can only pat Tong Lili on the shoulder and pass by.

Is Tong Lili willing? Unwilling, if you don't want to stay here, there are only two ways, postgraduate entrance examination and marriage, and there is no other way to marry an energetic person. It is understandable that everyone has the right to choose his own life. So who would be willing to work in the infectious diseases department? God knows!

After graduation, other transferred doctors must report to the medical office in time and wait for the allocation of the next department. Zhang Fan is special. The officer of the medical office came early to discuss the next department with Zhang Fan, which was explained by the director of the medical office.

"Doctor Zhang, do you need to rest for a few days?" The officers of the medical department are either clinical, public health graduates or preventive graduates. Although these people do not enter the sequence of civil servants, they may enter the municipal hospital, they also have a certain energy.

"Please, if there is no shortage of people, I'll take a few days off." Zhang Fan said politely to the officer.

"That's OK. Will you go to rheumatology next week?" The officer said in a deliberative tone.

"OK! Thank you! "

"You're welcome!"

Zhang Fan is not tired and wants to rest. There is really no challenge in this work intensity. Zhang Fan has to arrange to decorate the house. When the new house comes down, he will arrange the decoration early and come out early. His parents can come to the frontier early. He will also prepare the wedding house!

When decorating a house, Zhang Fan decorated the house with some money. Now his income is much better. He took Shaohua directly to find someone to decorate. In the past, Zhang fan installed it casually. After the decoration of the house, it was just a simple house. There was no style.

This new house continues to be prepared for simple decoration, which is not about money, but because the materials of decoration are almost modular production, and there are too many chemicals in it. If you are going to get married, you should make simple decoration as much as possible!

The occupation is not divided into quasi categories and the level is not divided into size. This is right, but in reality, especially in small cities, it is not very applicable. The larger the city is, the more fair some aspects are. The smaller the city is, the relationship network is connected with you, me and him, and no one can escape!

Ordinary farmers, who have been farmers or workers' families for eight lifetimes, go to see a doctor. It's very simple. Pull down the hospital and see a doctor. The doctor you meet is the doctor.

If you have a little energy, ask someone to find a relationship and find a more famous doctor. It's the same if you have no energy and have money. If you have more money, treat it according to the method

of more money, and if you have less money, treat it according to the method of less money.

For this, I really want to thank the state for its strong regulation and support of the medical system. No matter who goes to the operating table, the doctor must be responsible to the end. He doesn't say that whoever has more money or less money will be treated differently. In a department, the operation is a little difficult. Even if you don't spend money, there are experts in the Department to take the lead. Nonsense, impossible. The law is not fake.

However, if you want to designate a hospital in advance, or designate a doctor to perform the operation, this is a saying. This requires you to have the ability to overtake in corners. No, that's only in order and according to the rules.

Hiking is a relatively trendy sport rising in recent years. Most ordinary people just walk around the city near them on a weekend.

But there is such a circle in China. They take pleasure in conquering dangerous mountains and deserts everywhere. Although this circle is not professional, the popularity of this circle is very, very prosperous, because the initiator is said to be a super boss of Gangwan.

If you want to have a relationship with these people, it is unlikely that you can only do what you like. Therefore, in the circle, bosses with tens of millions of levels of value are ordinary members! Whether you really like this hiking or not, the annual membership fee is paid on time.

There is a complex primeval forest near the snow mountain in chasu city. The landscape environment of this forest is very complex. There are not many large beasts, such as cliffs, lakes, rivers and swamps. Moreover, it is not in the tropics, and there are no special poisonous snakes. Slowly discovered by a frontier boss.

Then he contacted and organized a group of rich people to explore. Because these people are rich and unprofessional, they choose places that look dangerous but are actually relatively safe to explore.

In fact, these rich people don't want to be disturbed by others when they choose this kind of sports, so in addition to hiring several local guides, they are the people they accompany with them, and they fight into this forest.

This kind of hiking is estimated to be more than ten kilometers, and it is also crossing rivers, climbing mountains and opening roads, which is the hobby of a group of energetic people. Most people don't choose this kind of play with little money.

Beyond the wilderness, the degraded urban people are always weak. A boss of Gangwan, in his forties, is in his prime. Left the path dug by the guide and went to help.

Just came under a tree, plop! I fell into a deep pit. It should be a deep pit dug by some people to poach wild deer. What a coincidence. The sharp wooden sign in the pit was inserted into his chrysanthemum!

Fortunately, it's on the hip. If it's on the abdomen, it's hanging!

"Ah!" Tragic! The cry of pain from the sky startled the birds in the distance! That is, the people who carry the awesome force, after minutes of cutting down the wooden sign, they are carrying the rich to the forest outside with the simple stretcher.

This place is close to the national border and far away from the big city circle. Even if you have money, you have no choice. You can only leave the forest in the original way. These people who carry them are relatively experienced people. They know that they can't pull out these signs rashly. Originally, I wanted to wrap it up. As a result, the injured place is special. I don't even need to wrap it up!

These people's equipment is really good. Originally, this kind of clothing can't be pierced through, but it's because of the falling, the body is tight, the sign is so coincidentally pierced on the hollow and tight point of the hip, and the weight and the falling acceleration click into the chrysanthemum. It's also considered that the pants are of good quality. They break only after resisting the huge energy. Otherwise, it's estimated that they will die directly.

The frontier boss, who organized this expedition, has a dead heart. He is so immortal that he has made the biggest big man in the team like this. He is like Xiao Anzi on TV. He runs quickly with the stretcher and doesn't blush! His face was white and gray, as if he was bleeding constantly.

The aboriginal boss first contacted the medical experts of the bird market. The nearest urban circle here is the bird market 800 kilometers away.

"Hurry to the local hospital."

"Can I take it to the bird market by helicopter?"

"It's difficult. If you don't do well, it's massive bleeding. First send it to the hospital in tea vegetable city."

On non paved roads, off-road vehicles that could have run fast dare not run too fast.

The accompanying personnel of the frontier boss and the harbor boss launched all the relationships. If this man died here today, he would be in great trouble.

While contacting the hospital of tea vegetable City, contact the experts of bird city. In spring, when everything recovers, the sandstorms in the frontier also report on time.

In addition to very few other places in the northwest, the spring of other cities is often earthy yellow, and the bird market is no exception. Today is black and yellow, with strong wind and sand. Like the earth in the sky, all planes are grounded ~!
