

Chapter 274

Frontier people, especially the elderly frontier people, have a vivid metaphor for this motorcycle, meat wrapped in iron! The frontier is vast and sparsely populated. Many people used motorcycles in their early years. People in the frontier love drinking. I don't know how many people were buried by the former happy 120 motorcycle. Now these people are on drugs. It's strange if there's no accident.

Another ambulance came to the hospital, four or five from 110. Such a big accident has alerted the highest level of tea vegetable city. The leader in charge of transportation also came. The emergency doctor looked for the survivors and the forensic doctor looked for the dead. Many police threw up when they saw this scene. It's disgusting. It's estimated that these people can't eat meat for a while!

"Come on, people here still have breathing and heartbeat! Slow down and slowly separate the wheel from the garbage truck. Don't take the wheel off this person!" The senior director of the emergency department presided over the rescue activities.

"There's another survivor here, doctor! Come on. Seems to be breathing!" A policeman found the little girl by the pool. This little girl on the third day of junior high school is also lucky.

After throwing it out like a doll, the body fell into dense trees, which are more than one meter of landscape trees, very dense. A lot of energy was unloaded, so that the girl could live. Her condition is very similar to Lao Yang.

Lao Yang's belly was filled with steel bars, and the scattered steel bars were directly inserted into her belly. The little girl, too, was wearing leather clothes and thin white cotton underwear without zipper. As a result, the branches crashed down at high speed, and the branches were inserted into her belly like sharp blades. These branches were not thick, but really big. If there were a thicker branch, You'll die if you plug it in!

The legs fell into the pool. Fortunately, there was water and produced resistance. In this way, the little girl's two legs were directly comminuted fractures. Under the impact of high speed, the motorcycle hat on the head was directly crushed, and the rough plexiglass mask was directly broken into a sharp weapon and inserted into the girl's face! Although the branches unloaded most of the energy, but the speed was too fast. After breaking through the dense bushes, they landed on their chest and directly powdered their ribs!

The doctor in the emergency department went to touch the carotid artery and said, "come on!"

Stretcher, flat lift! Be careful and lay it flat. " Lao Yang and the little girl, one by one, were sent to the hospital by 120.

The injury degree of the little girl and Lao Yang is very similar. Both of them have chest collapse, a large number of foreign bodies inserted in the abdomen, obvious fracture of lower limbs on one side of Lao Yang and obvious fracture of lower limbs on both sides of the little girl.

And the little girl has one more injury than Lao Yang, that is, her face! It's full of plexiglass, all near the cheek. Fortunately, it's not inserted into the eyes!

That's it! The accident was terrible. The high-level officials of the city were alerted, and this matter was taken seriously. First, the traffic police and police of the city were pulled out in the middle of the night, and then the leaders of the hospital were awakened and rushed to the hospital.

As long as the government paid attention to them, they slipped them out every minute, and then the little girl's family was notified. Lao Yang was miserable and had no family.

In the municipal hospital, once the hospital leaders heard that so many people were injured and died, Ouyang worried that there were not enough doctors, so he directly ordered all surgeons to assemble urgently. Just like the charge, the scattered surgeons hurried to the hospital in the dark morning!

"What's the matter?" The wife of an attending doctor outside the chest looked at her husband vaguely, wearing clothes.

"Something happened, the hospital called the doctors together!" While dressing quickly, he explained to his wife.

"Oh! Be careful on the way, or I'll go with you. It's a big night. " The confused wife woke up immediately! Worried, he said to his husband.

"You sleep your!" Don't talk much, because you're dressed! Turned and went out. How can I sleep! The doctor's wife stared at the ceiling. Although she couldn't say how worried she was, she couldn't sleep! The same picture happened in the homes of many doctors.

Zhang Fan has been planned to go to surgery by the top and bottom officers of the medical department. It is impossible to miss him. After answering the phone, Zhang Fanfei dressed quickly. When Shaohua heard the sound and went out of the small bedroom, Zhang Fan had closed the door of the living room and went downstairs.

"Hey!" Shao Hua sighed gently and looked at the time. It was 4:40 in the morning!

All the surgeons gathered in the hall of the emergency department. Although there were many people, few people spoke and quietly sat on the stool in the waiting area waiting for the patient. Ouyang and

the vice president of surgery stood at the door of the emergency department, anxiously looking at the hospital gate!

Industry, this is the medical industry. I dare not expect more patients, but as long as there are patients, I still hope patients can be sent to the hospital early. That's such a contradiction.

The 120 with a purple light came sobbing. Residents in the neighborhood around the hospital are tired of the sound. Three hundred and sixty-five days a year, no one is quiet. Although they scold every day, no one wants to let them live in another place!

The superior leaders informed the hospital leaders that many people were injured and many died. Ouyang had to call all the surgeons. As a result, when he saw that the two 120 cars were only pulling two patients, Ouyang asked, "what about the other wounded? Has it been diverted to the traditional Chinese medicine hospital? "

"There are no more survivors. Everyone else is dead!" The driver of the emergency department said to Ouyang.

"Oh!" Ouyang didn't have time to sigh and shock. Although she is not a surgical expert, she is the president of the hospital and has to organize rescue.

There is a principle for rescue. In case of limited medical resources, rescue the mild and then the seriously ill. Save the young first, and then the old. This principle is to save more lives and people. There is no index for the rescue rate. This is a very cruel and scientific choice! If we first rescue the seriously ill, the seriously ill have not been rescued successfully, and the less ill have also become seriously ill! Compared with the elderly, young people have a greater chance of survival!

Of course, if the medical power is strong, there is no need to choose. Rescue is to save lives. This choice is very cruel for patients. Who comes first and who comes later is not only a matter of time, but also life and death!

Although there are not many patients, the condition is very serious. The two patients were placed in the emergency room like copies. This kind of injury, internal bleeding is certain. Maybe that organ is facing failure.

I don't even have time for examination. First correct shock and breathing! Both of them were complex compound injuries. The major surgical directors discussed collectively and prepared the operation plan.

If it is a general patient, there is no need to do so. Just pull up the operating table and operate directly, but these two patients are not only critical, but also have complex injuries. It is impossible without a good cooperation scheme.

In other things, Zhang Fan is not a very positive person, but once it involves surgery and patients, Zhang Fan will do his part. A group of directors surrounded Zhang Fan! This is ability, this is strength.

"It's too late! How to do it, you arrange it! " Ouyang delegated power and delegated the right of operation to Zhang Fan. Although everyone has surrounded Zhang Fan, this kind of official recognition is still needed! After all, he is a resident!

"The chest and abdomen of the two patients are very troublesome. I went to the little girl's operation with the deputy director of chest surgery and the deputy director of general surgery. The director of extrathoracic surgery, the director of general surgery, and the director of orthopedics are elderly patients. " Zhang Fan did not refuse at all and began to order. This is not the time to refuse! Because it's human life!

At present, in the municipal hospital, in terms of general surgery, thoracic surgery and orthopedic surgery, Zhang Fan said that first, other surgical directors probably won't object, and the little girl is relatively young, so the chance of birth is tilted here. There is no selfishness, but the principle, the principle of first aid!
