

Chapter 279

Youth is good. Whether doctors or patients, youth represents unlimited possibilities and unlimited hope. Ten hours, although Zhang Fan is tired, he can fight for another ten hours.

Lao Wang and Lao song, two elderly and a half old men are in trouble. It doesn't work to change their legs. They have directly lost control and rely on their bones! This technology is also very strong, not old! Hospitals, especially large hospitals, are almost all strong people as long as they are technical masters.

This industry is too lame. People who are cruel to themselves can't mature their technology. Suture, repair, perfect, "place the drainage tube." After the last confirmation, Zhang Fan said to several assistants.

Little girl, you don't have to re drill the hole and put the drainage tube, because you can just find one full of holes! In the future, this girl can't wear any kind of sexy umbilical leakage clothes.

Abdominal surgery is the most serious. Life is big. With so many holes, if they are a little higher or skewed, inserted into the liver, broken large blood vessels, or inserted into the kidney, the girl will have no hope. How to say, maybe God saw that she didn't commit many sins, gave her a chance, and then slapped her in the face.

After the abdominal operation, even if the patient keeps his life, the rest will not worry. The director outside the chest is also on the stage. Zhang Fan has chest surgery, and Lao Wang, Lao song and Lao Gao have lower limb surgery. The abdominal operation was not finished, and the other two places did not dare to move, otherwise the legs were connected, and the ribs on the chest were plated, and then people died because of massive abdominal bleeding!

The little girl said that she had not developed well, but her secondary sexual characteristics had developed. The chest collapsed and the speed was too fast. Although the force thrown out was offset by the branches, in this way, the ribs and lower limbs were particularly broken.

The rib was originally a small L-shaped hollow bone. As a result, it was broken into three or even four sticks“ What the hell is this patient doing? The injury is so serious. " Lao Gao spoke while spelling out bones.

Now I'm really not in a hurry. Although I fell seriously, I can still put it together. This fracture joint, especially the one with incision and internal fixation, is similar to building blocks. Lao Gao is holding a free bone with a large area!

"I heard it was racing with others on the riverside road. Many people raced together. The speed was too fast. As a result, they hit pedestrians. Six motorcycles and twelve people lived the girl and pedestrians. The patient who just had an operation next door was hit by them! " The head nurse immediately popularized the gossip she heard to the doctors.

"Ah, this old man has a great life!" The anesthesiologist said curiously.

"Who says not? It's not easy for the old man to push his car to work on Binhe Road at night! When I was sent to the hospital, I didn't even have a family. " Head nurse, a woman in her thirties, works hard to make a silly white and sweet state! Really, a person's success is not in vain. Among thousands of nurses, it makes sense for her to be the head nurse.

Ribs, fragile bones in the human body. Compared with other bones, this bone can really be called Jerry built. The bone hardness is not enough. Under the thin bone cortex is a large number of air containing honeycomb bone trabeculae.

Generally, there is no need for surgery for rib fractures. Once the triangular towel is tied, it will grow well. Or for patients with non allergic skin, a wide tape can be fixed by sticking to the skin. But the little girl can't. her ribs are too broken.

Lao Gao is breaking bones and Zhang Fan is putting on the steel plate. The rib fixation is very simple. The skin on the chest is very thin, especially the chest skin of this little girl. Gently opening the skin is the rib.

One steel plate, two, three, a total of more than ten steel plates. The steel plate of the rib is very simple. It looks like a stapler. The shape of this steel plate is the combination of many staples. With a slight buckle, you can firmly grasp two broken ribs! After the chest operation, the lower limb operation is not over yet. Lao Wang and Lao song insist on it with perseverance. After all, time is unforgiving.

"Director, it's evening for the rest meeting. It's been a whole day." Zhang Fan said.

"Nothing, persistence is victory!" I don't know my last name. I'm hard to talk back. There's no way!

The brother and sister outside the operation will be really confused. The woman grinned and wanted to cry, but she couldn't cry. The man was embarrassed and didn't know what to do!

How could the little girl's uncle be regarded as the person in front of the tea vegetable market? After a while, he found out, "Hey! We were wrong and didn't realize the intention of Dean Ouyang! "

"What's the matter?" The woman asked unconsciously.

"The young doctor we despise is a knife in the Department of surgery of the municipal hospital! Ouyang

specially equipped Yaya with the best doctor. As a result ~ ~ Hey! " The man rubbed his stiff face with chagrin.

"Ah!" The woman who had been devastated by her daughter's injury couldn't hold on. She slowly sat on the ground against the wall. Such a rich woman, such a dressed woman, sitting on the ground outside the operating room, is so uncoordinated!

"Brother, find a way! Let her operate on ya ya! "

"It's no use being the president now! Hey! I knew so ~ ~ "

"My miserable girl!" Women's hearts are broken!

"Howl what! There's an operation going on inside. What's the quality! Howl again, howl away! " A little nurse poked her head out of the door of the operating room and said a voice to the woman! Among the hospital nurses, the nurses in the operating room have the biggest temper, not one! A woman grinned as if she had been strangled by her neck, huh! Come on! Come on!

The chest operation is finished, and the lower limbs operation is finished. Finally, there are facial injuries to deal with. The trauma on the face is the lightest, but for a young girl, the injury is more serious than her life!

The skin on the cheeks, chin, forehead, especially on the forehead, has been opened, and the red muscles under the skin have been exposed. Like a child's mouth, there are four such wounds on the forehead. After the rotten muscles are disinfected, they are really like a child's mouth, and the tongue in the mouth seems to be twisted and rotten by a knife.

How to sew will leave scars. In the face of such a serious abdominal injury, Zhang Fan didn't hesitate. In the face of his chest, his bones were broken into bean curd residue. Zhang Fan didn't hesitate, and the fracture of his lower limbs didn't make Zhang Fan hesitate.

But it was these wounds on his face like children laughing that made Zhang Fan hesitate. How to sew! In front of me, I can't care about the little girl's face. Now my life is saved, but when I see her face, Zhang Fan really can't help it.

The little girl is a few years younger than Jingshu. It is the time of youth and beauty, but the scar on her face, how can she live and face others in the future!

"Director Zhang, there's no way. Sew it up. If you sew it up early, you may be able to absorb it better! " Lao song looked at Zhang Fan's hesitant expression and said.

"Sew! It's up to you. It's good to keep your life! Sew slowly with a small curved needle! " Lao Wang didn't seem to pity at all, but a small curved needle exposed the characteristics of hard mouth and soft heart.

"Hey!" Zhang Fan sighed. This is the doctor's helplessness. The technology is high, but there is always a ceiling!

Zhang fan can think of the girl's future appearance. It's not too much to look like a Luocho. How cruel her future career will be, this may be God's slap on her face! Really, how cruel!

More than ten hours later, the little girl's operation was finally finished.
