

## Chapter 280

I got up at more than 4 a.m. and went to the hospital for surgery. At 9 p.m., the surgery was finally over. I also lived a dark life. Is this normal? It can be said that most surgeons can't see the sun for twenty days a month. If they are surgical inpatients in large hospitals, they can't see the sun for more than ten months a year. It's no exaggeration. Who knows!

After the operation, several old guys, especially Lao Wang and Lao Song, who didn't rest, collapsed directly. It was a routine. The head nurse spread two middle sheets on the floor of the operating room early.

"Director Zhang, I'll also lay a medium order for you. I'll go and prepare food for you. The hospital prepared dinner, and the patient's family members also sent it to KFC. You eat that." The head nurse said politely.

The itinerant nurse helped several doctors take off their surgical clothes, "I eat KFC. The food in the hospital is not ordinary." Lao Song said.

"I also eat KFC. Give Doctor Zhang a medium order and go for a while!" Lao Wang said to the head nurse. The hospital canteen is privately contracted. I don't want to say the taste, that is, I can eat it. The owner of the canteen is also a God. He has changed the dean for several times. He has been standing in the wind!

Tired, I didn't feel it during the operation. As soon as the operation was over, these doctors, like robots unplugging the power supply, lay side by side on the plastic floor of the operating room like several dead men. Green surgical clothes and blue plastic floor, one row at a time, stretch as straight as you can! All around!

My legs are too sour to touch. My feet are not my own. My waist is hard. I stand for more than ten hours without doing anything. It's hard to stand for more than ten hours. Therefore, the elders of the medical industry have long made it clear that a surgeon is a manual worker!

After the operation, the little girl Yaya suddenly became rich. The total price of the steel plate for the chest, the imported absorbable line in the abdominal cavity and the steel plate for both lower limbs was almost 100000. Like people in some place, they wear their belongings on their bodies!

Outside the operating room, the little girl's mother was also tired. After more than ten hours of

emotional tension, the woman seemed to be four or five years old in one day. The little girl's uncle can't follow the upper line, so he goes to the lower level. This kind of person has a common character and perseverance.

Among the 100000 employees of state-owned enterprises, it is not uncommon for them to have a and their families in the municipal hospital. He found a little nurse in the operating room early. When the operation was over, the little nurse he pulled came out of the operating room.

"Leader, the operation is over. It's all right. The operation was successful!" The little girl said with a smile.

"What about ya ya? Why didn't you come out?" The little girl's mother struggled to get up and hurried to the little nurse. The little girl's uncle hurried to the little nurse's side.

Knowing that the boss's niece had an accident and had an operation, many people came to see him. They all made an eager expression!

"Yaya went to ICU. Tomorrow morning, you can go to visit. You don't have to be nervous. Dr. Zhang Fan and director Wang are talking and laughing!"

"Dr. Zhang?" Yaya's mother said a little unnaturally.

"Well, Yaya's operation was performed by Dr. Zhang. Now Dr. Zhang can count as the first knife in our surgery! It's great and nice." The little nurse said proudly! Zhang Fan has good skills and good people. He never gets angry with the little nurses. The little nurses like Zhang Fan.

"It's a pity that the famous flowers have owners, alas!" The little nurse thought of it as a pity.

"Oh!" What else did the woman want to say, but she was interrupted by her brother, "Xiao Li, I really bother you. You see, I'm really sorry to call you from home this big night!"

"It's okay, leader. It's nothing." The little nurse's family works in a state-owned enterprise.

"Thank you very much. I'll make it up after I'm in love. Look, Xiao Li, can you contact Dr. Zhang for help? I'd like to invite him and the surgeons to dinner." The vice president said.

Originally, when a doctor was invited to dinner, the boss of a large state-owned enterprise would not ask for a little nurse, but before the operation, his eyelids were shallow, he was a little too much before the operation, and he didn't want to let people at the same level know, so he asked for a little nurse who hadn't looked at him in the past!

"OK, leader, I'll ask later, but it may not work today. Several surgeons are tired and lying in the operating room."

"OK! that 's ok!, Let them fix the time. I'm always waiting! " This is that people with high EQ can take misunderstanding or mistakes as an opportunity. It is not difficult for such people to climb to this level.

Zhang Fan was annoyed before the operation. He didn't keep it all. He asked to go to someone else next time, so he came directly to a corporal of courtesy. If he didn't fight, he wouldn't make a deal! Difference, the difference between leaders and ordinary people!

In the lounge of the operating room, several people who had rested for a while had to get up. Not that they didn't want to rest, but that the head nurse had prepared food.

Qi swallows thousands of miles like a tiger. Zhang Fan's current posture is like this, one chicken leg at a time and one and a half cups of milk at a time. Driven by him, Lao Wang, who was hungry and out of date, also picked up the chicken leg and ate it.

"Director Zhang, please slow down. There are a lot of them. Their families bought a lot." The head nurse stood beside Zhang Fan, talking and gently patting Zhang Fan on the back for fear that Zhang Fan might choke!

The hand washing clothes in the operating room were very thin. The head nurse had just put his hot hand on Zhang Fan's back, which made Zhang Fan who had been voracious slow down his chewing speed.

How to say, there was a warm feeling on his back. With the head nurse's tap, the fragrance also came into Zhang Fan's nose with the wind. It was so comfortable! And a little weird! Those who know little men best are familiar women at the age of head nurse and those with high Eq.

Zhang Fan doesn't feel very comfortable when he has enough to eat and drink. It's OK to eat a little KFC, but if he eats a little more, he feels greasy.

When I opened my cell phone, there was a message from Shaohua: are you still busy? Call me when the operation is over, and I'll pick you up! I love you!

Zhang Fan looked at the time. It was more than ten o'clock. I wasn't going to call. Maybe Shaohua went to bed at night. Just about to put down his cell phone, Shaohua's message came again: are you finished?

"Haven't you rested yet? I just had an operation and ate something. I'll just go home myself. You don't have to pick me up. "

"Hehe, I guess you're about to finish the operation and have left the community. You wait for me for a while. I'll take a taxi to the hospital. "

His boyfriend has been busy all day. Shaohua is distressed! Put down his cell phone, Zhang Fan hurried to take a hot bath, changed his clothes, and said to Lao Wang, "director Wang, I'll go back first. You explain to the competent doctor. Be sure to look after the drainage bag. Call as soon as there is bloody liquid!"

"OK, hurry!"

Zhang Fan is worried about bleeding and necrosis in the abdominal cavity and suture. Worry, you have to worry. You can't be careless about matters that are vital to human life!
